(b) *Computation of gain recognized*—(1) *In general.* In computing the amount of gain recognized in an exchange of multiple properties, the fair market value must be determined for each property transferred and for each property received by the taxpayer in the exchange. In addition, the adjusted basis must be determined for each property transferred by the taxpayer in the exchange.

(2) *Exchange groups and residual group.* The properties transferred and the properties received by the taxpayer in the exchange are separated into exchange groups and a residual group to the extent provided in this paragraph (b)(2).

(i) *Exchange groups.* Each exchange group consists of the properties transferred and received in the exchange, all of which are of a like kind or like class. If a property could be included in more than one exchange group, the taxpayer may include the property in any of those exchange groups. Property eligible for inclusion within an exchange group does not include money or property described in section 1031(a)(2) (i.e., stock in trade or other property held primarily for sale, stocks, bonds, notes, other securities or evidences of indebtedness or interest, interests in a partnership, certificates of trust or beneficial interests, or choses in action). For example, an exchange group may consist of all exchanged properties that are within the same General Asset Class or within the same Product Class (as defined in §1.1031(a)–2(b)). Each exchange group must consist of at least one property transferred and at least one property received in the exchange.

(ii) *Treatment of liabilities.* (A) All liabilities assumed by the taxpayer as part of the exchange are offset against all liabilities of which the taxpayer is relieved as part of the exchange, regardless of whether the liabilities are recourse or nonrecourse and regardless of whether the liabilities are secured by or otherwise relate to specific property transferred or received as part of the exchange. See §§1.1031 (b)–1(c) and 1.1031(d)–2. For purposes of this section, liabilities assumed by the taxpayer as part of the exchange consist of liabilities of the other party to the exchange assumed by the taxpayer and liabilities subject to which the other party's property is transferred in the exchange. Similarly, liabilities of which the taxpayer is relieved as part of the exchange consist of liabilities of the taxpayer assumed by the other party to the exchange and liabilities subject to which the taxpayer's property is transferred.

(B) If there are excess liabilities assumed by the taxpayer as part of the exchange (i.e., the amount of liabilities assumed by the taxpayer exceeds the amount of liabilities of which the taxpayer is relieved), the excess is allocated among the exchange groups (but not to the residual group) in proportion to the aggregate fair market value of the properties received by the taxpayer in the exchange groups. The amount of excess liabilities assumed by the taxpayer that are allocated to each exchange group may not exceed the aggregate fair market value of the properties received in the exchange group.

(C) If there are excess liabilities of which the taxpayer is relieved as part of the exchange (i.e., the amount of liabilities of which the taxpayer is relieved exceeds the amount of liabilities assumed by the taxpayer), the excess is treated as a Class I asset for purposes of making allocations to the residual group under paragraph (b)(2)(iii) of this section.

(D) Paragraphs (b)(2)(ii) (A), (B), and (C) of this section are applied in the same manner even if section 1031 and this section apply to only a portion of a larger transaction (such as a transaction described in section 1060(c) and § 1.1060–1T(b)). In that event, the amount of excess liabilities assumed by the taxpayer or the amount of excess liabilities of which the taxpayer is relieved is determined based on all liabilities assumed by the taxpayer and all liabilities of which the taxpayer is relieve as part of the larger transaction.

(iii) *Residual group.* If the aggregate fair market value of the properties transferred in all of the exchange groups differs from the aggregate fair market value of the properties received in all of the exchange groups (taking liabilities into account in the manner described in paragraph (b)(2)(ii) of this section), a residual group is created. The residual group consists of an amount of money or other property having an aggregate fair market value equal to that difference. The residual group consists of either money or other property transferred in the exchange or money or other property received in the exchange, but not both. For this purpose, other property includes property described in section 1031(a)(2) (i.e., stock in trade or other property held primarily for sale, stocks, bonds, notes, other securities or evidences of indebtedness or interest, interests in a partnership, certificates of trust or beneficial interests, or choses in action), property transferred that is not of a like kind or like class with any property received, and property received that is not of a like kind or like class with any property transferred. The money and properties that are allocated to the residual group are considered to come from the following assets in the following order: first from Class I assets, then from Class II assets, then from Class III assets, and then from Class IV assets. The terms Class I assets, Class II assets, Class III assets, and Class IV assets have the same meanings as in § 1.1060–1T(d). Within each Class, taxpayers may choose which properties are allocated to the residual group.

(iv) *Exchange group surplus and deficiency.* For each of the exchange groups described in this section, an ''exchange group surplus'' or ''exchange group deficiency,'' if any, must be determined. An exchange group surplus is the excess of the aggregate fair market value of the properties received (less the amount of any excess liabilities assumed by the taxpayer that are allocated to that exchange group), in an exchange group over the aggregate fair market value of the properties transferred in that exchange group. An exchange group deficiency is the excess of the aggregate fair market value of the properties transferred in an exchange group over the aggregate fair market value of the properties received (less the amount of any excess liabilities assumed by the taxpayer that are allocated to that exchange group) in that exchange group.

(3) *Amount of gain recognized.* (i) For purposes of this section, the amount of gain or loss realized with respect to each exchange group and the residual group is the difference between the aggregate fair market value of the properties transferred in that exchange group or residual group and the properties' aggregate adjusted basis. The

gain realized with respect to each exchange group is recognized to the extent of the lesser of the gain realized and the amount of the exchange group deficiency, if any. Losses realized with respect to an exchange group are not recognized. See section 1031 (a) and (c). The total amount of gain recognized under section 1031 in the exchange is the sum of the amount of gain recognized with respect to each exchange group. With respect to the residual group, the gain or loss realized (as determined under this section) is recognized as provided in section 1001 or other applicable provision of the Code.

(ii) The amount of gain or loss realized and recognized with respect to properties transferred by the taxpayer that are not within any exchange group or the residual group is determined under section 1001 and other applicable provisions of the Code, with proper adjustments made for all liabilities not allocated to the exchange groups or the residual group.

(c) *Computation of basis of properties received.* In an exchange of multiple properties qualifying for nonrecognition of gain or loss under section 1031 and this section, the aggregate basis of properties received in each of the exchange groups is the aggregate adjusted basis of the properties transferred by the taxpayer within that exchange group, increased by the amount of gain recognized by the taxpayer with respect to that exchange group, increased by the amount of the exchange group surplus or decreased by the amount of the exchange group deficiency, and increased by the amount, if any, of excess liabilities assumed by the taxpayer that are allocated to that exchange group. The resulting aggregate basis of each exchange group is allocated proportionately to each property received in the exchange group in accordance with its fair market value. The basis of each property received within the residual group (other than money) is equal to its fair market value.

(d) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. (i) K exchanges computer A (asset class 00.12) and automobile A (asset class 00.22), both of which were held by K for productive use in its business, with W for printer B (asset class 00.12) and automobile B (asset class 00.22), both of which will be held by K for productive use in its business. K's adjusted basis and the fair market value of the exchanged properties are as follows:

	Adjusted basis	Fair market value
Computer A	$375	$1,000
Automobile A	1,500	4,000
Printer B		2,050
Automobile B		2,950

(ii) Under paragraph (b)(2) of this section, the properties exchanged are separated into exchange groups as follows:

(A) The first exchange group consists of computer A and printer B (both are within the same General Asset Class) and, as to K, has an exchange group surplus of $1050 because the fair market value of printer B ($2050) exceeds the fair market value of computer A ($1000) by that amount.

(B) The second exchange group consists of automobile A and automobile B (both are within the same General Asset Class) and, as to K, has an exchange group deficiency of $1050 because the fair market value of automobile A ($4000) exceeds the fair market value of automobile B ($2950) by that amount.

(iii) K recognizes gain on the exchange as follows:

(A) With respect to the first exchange group, the amount of gain realized is the excess of the fair market value of computer A ($1000) over its adjusted basis ($375), or $625. The amount of gain recognized is the lesser of the gain realized ($625) and the exchange group deficiency ($0), or $0.

(B) With respect to the second exchange group, the amount of gain realized is the excess of the fair market value of automobile A ($4000) over its adjusted basis ($1500), or $2500. The amount of gain recognized is the lesser of the gain realized ($2500) and the exchange group deficiency ($1050), or $1050.

(iv) The total amount of gain recognized by K in the exchange is the sum of the gains recognized with respect to both exchange groups ($0 + $1050), or $1050.

(v) The bases of the property received by K in the exchange, printer B and automobile B, are determined in the following manner:

(A) The basis of the property received in the first exchange group is the adjusted basis of the property transferred within the exchange group ($375), increased by the amount of gain recognized with respect to that exchange group ($0), increased by the amount of the exchange group surplus ($1050), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $1425. Because printer B was the only property received within the first exchange group, the entire basis of $1425 is allocated to printer B.

(B) The basis of the property received in the second exchange group is the adjusted basis of the property transferred within that exchange group ($1500), increased by the amount of gain recognized with respect to that exchange group ($1050), decreased by the amount of the exchange group deficiency ($1050), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $1500. Because automobile B was the only property received within the second exchange group, the entire basis of $1500 is allocated to automobile B.

Example 2. (i) F exchanges computer A (asset class 00.12) and automobile A (asset class 00.22), both of which were held by F for productive use in its business, with G for printer B (asset class 00.12) and automobile B (asset class 00.22), both of which will be held by F for productive use in its business, and corporate stock and $500 cash. The adjusted basis and fair market value of the properties are as follows:

	Adjusted basis	Fair market value
Computer A	$375	$1,000
Automobile A	3,500	4,000
Printer B		800
Automobile B		2,950
Corporate stock		750
Cash		500

(ii) Under paragraph (b)(2) of this section, the properties exchanged are separated into exchange groups as follows:

(A) The first exchange group consists of computer A and printer B (both are within the same General Asset Class) and, as to F, has an exchange group deficiency of $200 because the fair market value of computer A ($1000) exceeds the fair market value of printer B ($800) by that amount.

(B) The second exchange group consists of automobile A and automobile B (both are within the same General Asset Class) and, as to F, has an exchange group deficiency of $1050 because the fair market value of automobile A ($4000) exceeds the fair market value of automobile B ($2950) by that amount.

(C) Because the aggregate fair market value of the properties transferred by F in the exchange groups ($5,000) exceeds the aggregate fair market value of the properties received by F in the exchange groups ($3750) by $1250, there is a residual group in that amount consisting of the $500 cash and the $750 worth of corporate stock.

(iii) F recognizes gain on the exchange as follows:

(A) With respect to the first exchange group, the amount of gain realized is the excess of the fair market value of computer A ($1000) over its adjusted basis ($375), or $625. The amount of gain recognized is the lesser of the gain realized ($625) and the exchange group deficiency ($200), or $200.

(B) With respect to the second exchange group, the amount of gain realized is the excess of the fair market value of automobile A ($4000) over its adjusted basis ($3500), or $500. The amount of gain recognized is the lesser of the gain realized ($500) and the exchange group deficiency ($1050), or $500.

(C) No property transferred by F was allocated to the residual group. Therefore, F does not recognize gain or loss with respect to the residual group.

(iv) The total amount of gain recognized by F in the exchange is the sum of the gains recognized with respect to both exchange groups ($200 + $500), or $700.

(v) The bases of the properties received by F in the exchange (printer B, automobile B, and the corporate stock) are determined in the following manner:

(A) The basis of the property received in the first exchange group is the adjusted basis of the property transferred within that exchange group ($375), increased by the amount of gain recognized with respect to that exchange group ($200), decreased by the amount of the exchange group deficiency ($200), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $375. Because printer B was the only property received within the first exchange group, the entire basis of $375 is allocated to printer B.

(B) The basis of the property received in the second exchange group is the adjusted basis of the property transferred within that exchange group ($3500), increased by the amount of gain recognized with respect to that exchange group ($500), decreased by the amount of the exchange group deficiency ($1050), and increased by the amount of excess liabilites assumed allocated to that exchange group ($0), or $2950. Because automobile B was the only property received within the second exchange group, the entire basis of $2950 is allocated to automobile B.

(C) The basis of the property received within the residual group (the corporate stock) is equal to its fair market value or $750. Cash of $500 is also received within the residual group.

Example 3. (i) J and H enter into an exchange of the following properties. All of the property (except for the inventory) transferred by J was held for productive use in J’s business. All of the property received by J will be held by J for productive use in its business.

J Transfers:		*H Transfers:*		
Property	Adjusted basis	Fair market value	Property	Fair market value
Computer A	$1,500	$5,000	Computer Z	$4,500
Computer B	500	3,000	Printer Y	2,500
Printer C	2,000	1,500	Real Estate X	1,000
Real Estate D	1,200	2,000	Real Estate W	4,000
Real Estate E	0	1,800	Grader V	2,000
Scraper F	3,300	2,500	Truck T	1,700
Inventory	1,000	1,700	Cash	1,800
Total	9,500	17,500		17,500

(ii) Under paragraph (b)(2) of this section, the properties exchanged are separated into exchange groups as follows:

(A) The first exchange group consists of computer A, computer B, printer C, computer Z, and printer Y (all are within the same General Asset Class) and, as to J, has an exchange group deficiency of $2500 (($5000 + $3000 + $1500) − ($4500 + $2500)).

(B) The second exchange group consists of real estate D, E, X and W (all are of a like kind) and, as to J, has an exchange group surplus of $1200 (($1000 + $4000) − ($2000 + $1800)).

(C) The third exchange group consists of scraper F and grader V (both are within the same Product Class (SIC Code 3531)) and, as to J, has an exchange group deficiency of $500 ($2500 − $2000).

(D) Because the aggregate fair market value of the properties transferred by J in the exchange groups ($15,800) exceeds the aggregate fair market value of the properties received by J in the exchange groups ($14,000) by $1800, there is a residual group in that amount consisting of the $1800 cash (a Class I asset).

(E) The transaction also includes a taxable exchange of inventory (which is property described in section 1031 (a)(2)) for truck T (which is not of a like kind or like class to any property transferred in the exchange).

(iii) J recognizes gain on the transaction as follows:

(A) With respect to the first exchange group, the amount of gain realized is the excess of the aggregate fair market value of the properties transferred in the exchange group ($9500) over the aggregate adjusted basis ($4000), or $5500. The amount of gain recognized is the lesser of the gain realized ($5500) and the exchange group deficiency ($2500), or $2500.

(B) With respect to the second exchange group, the amount of gain realized is the excess of the aggregate fair market value of the properties transferred in the exchange group ($3800) over the aggregate adjusted basis ($1200), or $2600. The amount of gain recognized is the lesser of the gain realized ($2600) and the exchange group deficiency ($0), or $0.

(C) With respect to the third exchange group, a loss is realized in the amount of $800 because the fair market value of the property transferred in the exchange group ($2500) is less than its adjusted basis ($3300). Although a loss of $800 was realized, under section 1031 (a) and (c) losses are not recognized.

(D) No property transferred by J was allocated to the residual group. Therefore, J does not recognize gain or loss with respect to the residual group.

(E) With respect to the taxable exchange of inventory for truck T, gain of $700 is realized and recognized by J (amount realized of $1700 (the fair market value of truck T) less the adjusted basis of the inventory ($1000)).

(iv) The total amount of gain recognized by J in the transaction is the sum of the gains recognized under section 1031 with respect to each exchange group ($2500 + $0 + $0) and any gain recognized outside of section 1031 ($700), or $3200.

(v) The bases of the property received by J in the exchange are determined in the following manner:

(A) The aggregate basis of the properties received in the first exchange group is the adjusted basis of the properties transferred within that exchange group ($4000), increased by the amount of gain recognized with respect to that exchange group ($2500), decreased by the amount of the exchange group deficiency ($2500), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $4000. This $4000 of basis is allocated proportionately among the assets received within the first exchange group in accordance with their fair market values: Computer Z's basis is $2571 ($4000 × $4500/$7000); printer Y's basis is $1429 ($4000 × $2500/$7000).

(B) The aggregate basis of the properties received in the second exchange group is the adjusted basis of the properties transferred within that exchange group ($1200), increased by the amount of gain recognized with respect to that exchange group ($0), increased by the amount of the exchange group surplus ($1200), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $2400. This $2400 of basis is allocated proportionately among the assets received within the second exchange group in accordance with their fair market values: Real estate X's basis is $480 ($2400 × $1000/$5000); real estate W's basis is $1920 ($2400 × $4000/$5000).

(c) The basis of the property received in the third exchange group is the adjusted basis of the property transferred within that exchange group ($3300), increased by the amount of gain recognized with respect to that exchange group ($0), decreased by the amount of the exchange group deficiency ($500), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $2800. Because grader V was the only property received within the third exchange group, the entire basis of $2800 is allocated to grader V.

(D) Cash of $1800 is received within the residual group.

(E) The basis of the property received in the taxable exchange (truck T) is equal to its cost of $1700.

Example 4. (i) B exchanges computer A (asset class 00.12), automobile A (asset class 00.22) and truck A (asset class 00.241), with C for computer R (asset class 00.12), automobile R (asset class 00.22), truck R (asset class 00.241) and $400 cash. All properties transferred by either B or C were held for productive use in the respective transferor's business. Similarly, all properties to be received by either B or C will be held for productive use in the respective recipient's business. Automobile A, automobile R and truck R are each secured by a nonrecourse liability and are transferred subject to such liability. The adjusted basis, fair market value, and liability secured by each property, if any, are as follows:

	Adjusted basis	Fair market value	Liability
B transfers:			
Computer A	$800	$1,500	$0
Automobile A	900	2,500	500
Truck A	700	2,000	0
C transfers:			
Computer R	1,100	1,600	0
Automobile R	2,100	3,100	750
Truck R	600	1,400	250
Cash	....	400	....

(ii) The tax treatment to B is as follows:

(A)(*1*) The first exchange group consists of computers A and R (both are within the same General Asset Class).

(*2*) The second exchange group consists of automobiles A and R (both are within the same General Asset Class).

(*3*) The third exchange group consists of trucks A and R (both are in the same General Asset Class).

(B) Under paragraph (b)(2)(ii) of this section, all liabilities assumed by B ($1000) are offset by all liabilities of which B is relieved ($500), resulting in excess liabilities assumed of $500. The excess liabilities assumed of $500 is allocated among the exchange groups in proportion to the fair market value of the properties received by B in the exchange groups as follows:

(*1*) $131 of excess liabilities assumed ($500 × $1600/$6100) is allocated to the first exchange group. The first exchange group has an exchange group deficiency of $31 because the fair market value of computer A ($1500) exceeds the fair market value of computer R less the excess liabilities assumed allocated to the exchange group ($1600–$131) by that amount.

(*2*) $254 of excess liabilities assumed ($500 × $3100/$6100) is allocated to the second exchange group. The second exchange group has an exchange group surplus of $346 because the fair market value of automobile R less the excess liabilities assumed allocated to the exchange group ($3100–$254) exceeds the fair market value of automobile A ($2500) by that amount.

(*3*) $115 of excess liabilities assumed ($500 × $1400/$6100) is allocated to the third exchange group. The third exchange group has an exchange group deficiency of $715 because the fair market value of truck A ($2000) exceeds the fair market value of truck R less the excess liabilities assumed allocated to the exchange group ($1400–$115) by that amount.

(*4*) The difference between the aggregate fair market value of the properties transferred in all of the exchange groups, $6000, and the aggregate fair market value of the properties received in all of the exchange groups (taking excess liabilities assumed into account), $5600, is $400. Therefore there is a residual group in that amount consisting of $400 cash received.

(C) B recognizes gain on the exchange as follows:

(*1*) With respect to the first exchange group, the amount of gain realized is the excess of the fair market value of computer A ($1500) over its adjusted basis ($800), or $700. The amount of gain recognized is the lesser of the gain realized ($700) and the exchange group deficiency ($31), or $31.

(*2*) With respect to the second exchange group, the amount of gain realized is the excess of the fair market value of automobile A ($2500) over its adjusted basis ($900), or $1600. The amount of gain recognized is the lesser of the gain realized ($1600) and the exchange group deficiency ($0), or $0.

(*3*) With respect to the third exchange group, the amount of gain realized is the excess of the fair market value of truck A ($2000) over its adjusted basis ($700), or $1300. The amount of gain recognized is the lesser of gain realized ($1300) and the exchange group deficiency ($715), or $715.

(*4*) No property transferred by B was allocated to the residual group. Therefore, B does not recognize gain or loss with respect to the residual group.

(D) The total amount of gain recognized by B in the exchange is the sum of the gains recognized under section 1031 with respect to each exchange group ($31 + $0 +$715), or $746.

(E) the bases of the property received by B in the exchange (computer R, automobile R, and truck R) are determined in the following manner:

(*1*) The basis of the property received in the first exchange group is the adjusted basis of the property transferred within that exchange group ($800), increased by the amount of gain recognized with respect to that exchange group ($31), decreased by the amount of the exchange group deficiency ($31), and increased by the amount of excess liabilities assumed allocated to that exchange group ($131), or $931. Because computer R was the only property received within the first exchange group, the entire basis of $931 is allocated to computer R.

(*2*) The basis of the property received in the second exchange group is the adjusted basis of the property transferred within that exchange group ($900), increased by the amount of gain recognized with respect to that exchange group ($0), increased by the amount of the exchange group surplus ($346), and increased by the amount of excess liabilities assumed allocated to that exchange group ($254), or $1500. Because automobile R was the only property received within the second exchange group, the entire basis of $1500 is allocated to automobile R.

(*3*) The basis of the property received in the third exchange group is the adjusted basis of the property transferred within that exchange group ($700), increased by the amount of gain recognized with respect to that exchange group ($715), decreased by the amount of the exchange group deficiency ($715), and increased by the amount of excess liabilities assumed allocated to that exchange group ($115), or $815. Because truck R was the only property received within the third exchange group, the entire basis of $815 is allocated to truck R.

(F) Cash of $400 is also received by B.

(iii) The tax treatment to C is as follows:

(A) (*1*) The first exchange group consists of computers R and A (both are within the same General Asset Class).

(*2*) The second exchange group consists of automobiles R and A (both are within the same General Asset Class).

(*3*) The third exchange group consists of trucks R and A (both are in the same General Asset Class).

(B) Under paragraph (b)(2)(ii) of this section, all liabilities of which C is relieved ($1000) are offset by all liabilities assumed by C ($500), resulting in excess liabilities relieved of $500. This excess liabilities relieved is treated as cash received by C.

(*1*) The first exchange group has an exchange group deficiency of $100 because the fair market value of computer R ($1600) exceeds the fair market value of computer A ($1500) by that amount.

(*2*) The second exchange group has an exchange group deficiency of $600 because the fair market value of automobile R ($3100) exceeds the fair market value of automobile A ($2500) by that amount.

(*3*) The third exchange group has an exchange group surplus of $600 because the fair market value of truck A ($2000) exceeds the fair market value of truck R ($1400) by that amount.

(*4*) The difference between the aggregate fair market value of the properties transferred by C in all of the exchange groups, $6100, and the aggregate fair market value of the properties received by C in all of the exchange groups, $6000, is $100. Therefore, there is a residual group in that amount, consisting of excess liabilities relieved of $100, which is treated as cash received by C.

(*5*) The $400 cash paid by C and $400 of the excess liabilities relieved which is treated as cash received by C are not within the exchange groups of the residual group.

(C) C recognizes gain on the exchange as follows:

(*1*) With respect to the first exchange group, the amount of gain realized is the excess of the fair market value of computer R ($1600) over its adjusted basis ($1100), or $500. The amount of gain recognized is the lesser of the gain realized ($500) and the exchange group deficiency ($100), or $100.

(*2*) With respect to the second exchange group, the amount of gain realized is the excess of the fair market value of automobile R ($3100) over its adjusted basis ($2100), or $1000. The amount of gain recognized is the lesser of the gain realized ($1000) and the exchange group deficiency ($600), or $600.

(*3*) With respect to the third exchange group, the amount of gain realized is the excess of the fair market value of truck R ($1400) over its adjusted basis ($600), or $800. The amount of gain recognized is the lesser of gain realized ($800) and the exchange group deficiency ($0), or $0.

(*4*) No property transferred by C was allocated to the residual group. Therefore, C does not recognize any gain with respect to the residual group.

(D) The total amount of gain recognized by C in the exchange is the sum of the gains recognized under section 1031 with respect to each exchange group ($100+$600+$0), or $700.

(E) The bases of the properties received by C in the exchange (computer A, automobile A, and truck A) are determined in the following manner:

(*1*) The basis of the property received in the first exchange group is the adjusted basis of the property transferred within that exchange group ($1100), increased by the amount of gain recognized with respect to that exchange group ($100), decreased by the amount of the exchange group deficiency

($100), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $1100. Because computer A was the only property received within the first exchange group, the entire basis of $1100 is allocated to computer A.

(*2*) The basis of the property received in the second exchange group is the adjusted basis of the property transferred within that exchange group ($2100), increased by the amount of gain recognized with respect to that exchange group ($600), decreased by the amount of the exchange group deficiency ($600), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $2100. Because automobile A was the only property received within the second exchange group, the entire basis of $2100 is allocated to automobile A.

(*3*) The basis of the property received in the third exchange group is the adjusted basis of the property transferred within that exchange group ($600), increased by the amount of gain recognized with respect to that exchange group ($0), increased by the amount of the exchange group surplus ($600), and increased by the amount of excess liabilities assumed allocated to that exchange group ($0), or $1200. Because truck A was the only property received within the third exchange group, the entire basis of $1200 is allocated to truck A.

Example 5. (i) U exchanges real estate A, real estate B, and grader A (SIC Code 3531) with V for real estate R and railroad car R (General Asset Class 00.25). All properties transferred by either U or V were held for productive use in the respective transferor's business. Similarly, all properties to be received by either U or V will be held for productive use in the respective recipient's business. Real estate R is secured by a recourse liability and is transferred subject to that liability. The adjusted basis, fair market value, and liability secured by each property, if any, are as follows:

	Adjusted basis	Fair market value	Liability
U Transfers:			
Real Estate A	$2000	$5000	....
Real Estate B	8000	13,500	....
Grader A	500	2000	....
V Transfers:			
Real Estate R	$20,000	$26,500	$7000
Railroad car R	1200	1000	

(ii) The tax treatment to U is as follows:

(A) The exchange group consists of real estate A, real estate B, and real estate R.

(B) Under paragraph (b)(2)(ii) of this section, all liabilities assumed by U ($7000) are excess liabilities assumed. The excess liabilities assumed of $7000 is allocated to the exchange group.

(*1*) The exchange group has an exchange group surplus of $1000 because the fair market value of real estate R less the excess liabilities assumed allocated to the exchange group ($26,500–$7000) exceeds the aggregate fair market value of real estate A and B ($18,500) by that amount.

(*2*) The difference between the aggregate fair market value of the properties received in the exchange group (taking excess liabilities assumed into account), $19,500, and the aggregate fair market value of the properties transferred in the exchange group, $18,500, is $1000. Therefore, there is a residual group in that amount consisting of $1000 (or 50 percent of the fair market value) of grader A.

(*3*) The transaction also includes a taxable exchange of the 50 percent portion of grader A not allocated to the residual group (which is not of a like kind or like class to any property received by U in the exchange) for railroad car R (which is not of a like kind or like class to any property transferred by U in the exchange).

(C) U recognizes gain on the exchange as follows:

(*1*) With respect to the exchange group, the amount of the gain realized is the excess of the aggregate fair market value of real estate A and B ($18,500) over the aggregate adjusted basis ($10,000), or $8500. The amount of the gain recognized is the lesser of the gain realized ($8500) and the exchange group deficiency ($0), or $0.

(*2*) With respect to the residual group, the amount of gain realized and recognized is the excess of the fair market value of the 50 percent portion of grader A that is allocated to the residual group ($1000) over its adjusted basis ($250), or $750.

(*3*) With respect to the taxable exchange of the 50 percent portion of grader A not allocated to the residual group for railroad car R, gain of $750 is realized and recognized by U (amount realized of $1000 (the fair market value of railroad car R) less the adjusted basis of the 50 percent portion of grader A not allocated to the residual group ($250)).

(D) The total amount of gain recognized by U in the transaction is the sum of the gain recognized under section 1031 with respect to the exchange group ($0), any gain recognized with respect to the residual group ($750), and any gain recognized with respect to property transferred that is not in the exchange group or the residual group ($750), or $1500.

(E) The bases of the property received by U in the exchange (real estate R and railroad car R) are determined in the following manner:

(*1*) The basis of the property received in the exchange group is the aggregate adjusted basis of the property transferred within that exchange group ($10,000), increased by the amount of gain recognized with respect to that exchange group ($0), increased by the amount of the exchange group surplus

($1000), and increased by the amount of excess liabilities assumed allocated to that exchange group ($7000), or $18,000. Because real estate R is the only property received within the exchange group, the entire basis of $18,000 is allocated to real estate R.

(*2*) The basis of railroad car R is equal to its cost of $1000.

(iii) The tax treatment to V is as follows:

(A) The exchange group consists of real estate R, real estate A, and real estate B.

(B) Under paragraph (b)(2)(ii) of this section, the liabilities of which V is relieved ($7000) results in excess liabilities relieved of $7000 and is treated as cash received by V.

(*1*) The exchange group has an exchange group deficiency of $8000 because the fair market value of real estate R ($26,500) exceeds the aggregate fair market value of real estate A and B ($18,500) by that amount.

(*2*) The difference between the aggregate fair market value of the properties transferred by V in the exchange group, $26,500, and the aggregate fair market value of the properties received by V in the exchange group, $18,500, is $8000. Therefore, there is a residual group in that amount, consisting of the excess liabilities relieved of $7000, which is treated as cash received by V, and $1000 (or 50 percent of the fair market value) of grader A.

(*3*) The transaction also includes a taxable exchange of railroad car R (which is not of a like kind or like class to any property received by V in the exchange) for the 50 percent portion of grader A (which is not of a like kind or like class to any property transferred by V in the exchange) not allocated to the residual group.

(C) V recognizes gain on the exchange as follows:

(*1*) With respect to the exchange group, the amount of the gain realized is the excess of the fair market value of real estate R ($26,500) over its adjusted basis ($20,000), or $6500. The amount of the gain recognized is the lesser of the gain realized ($6500) and the exchange group deficiency ($8000), or $6500.

(*2*) No property transferred by V was allocated to the residual group. Therefore, V does not recognize gain or loss with respect to the residual group.

(*3*) With respect to the taxable exchange of railroad car R for the 50 percent portion of grader A not allocated to the exchange group or the residual group, a loss is realized and recognized in the amount of $200 (the excess of the $1200 adjusted basis of railroad car R over the amount realized of $1000 (fair market value of the 50 percent portion of grader A)).

(D) The basis of the property received by V in the exchange (real estate A, real estate B, and grader A) are determined in the following manner:

(*1*) The basis of the property received in the exchange group is the adjusted basis of the property transferred within that exchange group ($20,000), increased by the amount of gain recognized with respect to that exchange group ($6500), and decreased by the amount of the exchange group deficiency ($8000), or $18,500. This $18,500 of basis is allocated proportionately among the assets received within the exchange group in accordance with their fair market values: real estate A's basis is $5000 ($18,500 × $5000/$18,500); real estate B's basis is $13,500 ($18,500 × $13,500/$18,500).

(*2*) The basis of grader A is $2000.

(e) *Effective date.* Section 1.1031 (j)–1 is effective for exchanges occurring on or after April 11, 1991.

[T.D. 8343, 56 FR 14855, Apr. 12, 1991]

§1.1031(k)–1 Treatment of deferred exchanges.

(a) *Overview.* This section provides rules for the application of section 1031 and the regulations thereunder in the case of a ‘‘deferred exchange.’’ For purposes of section 1031 and this section, a deferred exchange is defined as an exchange in which, pursuant to an agreement, the taxpayer transfers property held for productive use in a trade or business or for investment (the ‘‘relinquished property’’) and subsequently receives property to be held either for productive use in a trade or business or for investment (the ‘‘replacement property’’). In the case of a deferred exchange, if the requirements set forth in paragraphs (b), (c), and (d) of this section (relating to identification and receipt of replacement property) are not satisfied, the replacement property received by the taxpayer will be treated as property which is not of a like kind to the relinquished property. In order to constitute a deferred exchange, the transaction must be an exchange (i.e., a transfer of property for property, as distinguished from a transfer of property for money). For example, a sale of property followed by a purchase of property of a like kind does not qualify for nonrecognition of gain or loss under section 1031 regardless of whether the identification and receipt requirements of section 1031(a)(3) and paragraphs (b), (c), and (d) of this section are satisfied. The transfer of relinquished property in a deferred exchange is not within the provisions of section 1031(a) if, as part of the consideration, the taxpayer receives money or property which does not meet the requirements of section 1031(a), but the transfer, if otherwise qualified, will be within the provisions of either section 1031 (b) or (c). See § 1.1031(a)–1(a)(2). In addition, in the case of a transfer of relinquished property in a deferred exchange, gain or loss may be recognized if the taxpayer actually or constructively receives money or property which does not meet the requirements of section 1031(a) before the taxpayer actually receives like-kind replacement property. If the taxpayer actually or constructively receives money or property which does not meet the requirements of section 1031(a) in the full amount of the consideration for the relinquished property, the transaction will constitute a sale, and not a deferred exchange, even though the taxpayer may ultimately receive like-kind replacement property. For purposes of this section, property which does not meet the requirements of section 1031(a) (whether by being described in section 1031(a)(2) or otherwise) is referred to as ''other property.'' For rules regarding actual and constructive receipt, and safe harbors therefrom, see paragraphs (f) and (g), respectively, of this section. For rules regarding the determination of gain or loss recognized and the basis of property received in a deferred exchange, see paragraph (j) of this section.

(b) *Identification and receipt requirements*—(1) *In general.* In the case of a deferred exchange, any replacement property received by the taxpayer will be treated as property which is not of a like kind to the relinquished property if—

(i) The replacement property is not ''identified'' before the end of the ''identification period,'' or

(ii) The identified replacement property is not received before the end of the ''exchange period.''

(2) *Identification period and exchange period.* (i) The identification period begins on the date the taxpayer transfers the relinquished property and ends at midnight on the 45th day thereafter.

(ii) The exchange period begins on the date the taxpayer transfers the relinquished property and ends at midnight on the earlier of the 180th day thereafter or the due date (including extensions) for the taxpayer's return of the tax imposed by chapter 1 of subtitle A of the Code for the taxable year in which the transfer of the relinquished property occurs.

(iii) If, as part of the same deferred exchange, the taxpayer transfers more than one relinquished property and the relinquished properties are transferred on different dates, the identification period and the exchange period are determined by reference to the earliest date on which any of the properties are transferred.

(iv) For purposes of this paragraph (b)(2), property is transferred when the property is disposed of within the meaning of section 1001(a).

(3) *Example.* This paragraph (b) may be illustrated by the following example.

Example: (i) M is a corporation that files its Federal income tax return on a calendar year basis. M and C enter into an agreement for an exchange of property that requires M to transfer property X to C. Under the agreement, M is to identify like-kind replacement property which C is required to purchase and to transfer to M. M transfers property X to C on November 16, 1992.

(ii) The identification period ends at midnight on December 31, 1992, the day which is 45 days after the date of transfer of property X. The exchange period ends at midnight on March 15, 1993, the due date for M's Federal income tax return for the taxable year in which M transferred property X. However, if M is allowed the automatic six-month extension for filing its tax return, the exchange period ends at midnight on May 15, 1993, the day which is 180 days after the date of transfer of property X.

(c) *Identification of replacement property before the end of the identification period*—(1) *In general.* For purposes of paragraph (b)(1)(i) of this section (relating to the identification requirement), replacement property is identified before the end of the identification period only if the requirements of this paragraph (c) are satisfied with respect to the replacement property. However, any replacement property that is received by the taxpayer before the end of the identification period will in all events be treated as identified before the end of the identification period.

(2) *Manner of identifying replacement property.* Replacement property is identified only if it is designated as replacement property in a written document signed by the taxpayer and hand delivered, mailed, telecopied, or otherwise sent before the end of the identification period to either—

(i) The person obligated to transfer the replacement property to the taxpayer (regardless of whether that person is a disqualified person as defined in paragraph (k) of this section); or

(ii) Any other person involved in the exchange other than the taxpayer or a disqualified person (as defined in paragraph (k) of this section).

Examples of persons involved in the exchange include any of the parties to the exchange, an intermediary, an escrow agent, and a title company. An identification of replacement property made in a written agreement for the exchange of properties signed by all parties thereto before the end of the identification period will be treated as satisfying the requirements of this paragraph (c)(2).

(3) *Description of replacement property.* Replacement property is identified only if it is unambiguously described in the written document or agreement. Real property generally is unambiguously described if it is described by a legal description, street address, or distinguishable name (e.g., the Mayfair Apartment Building). Personal property generally is unambiguously described if it is described by a specific description of the particular type of property. For example, a truck generally is unambigously described if it is described by a specific make, model, and year.

(4) *Alternative and multiple properties.* (i) The taxpayer may identify more than one replacement property. Regardless of the number of relinguished properties transferred by the taxpayer as part of the same deferred exchange, the maximum number of replacement properties that the taxpayer may identify is—

(A) Three properties without regard to the fair market values of the properties (the ‘‘3-property rule’’), or

(B) Any number of properties as long as their aggregate fair market value as of the end of the identification period does not exceed 200 percent of the aggregate fair market value of all the relinguished properties as of the date the relinguished properties were transferred by the taxpayer (the ‘‘200-percent rule’’).

(ii) If, as of the end of the identification period, the taxpayer has identified more properties as replacement properties than permitted by paragraph (c)(4)(i) of this section, the taxpayer is treated as if no replacement property had been identified. The preceding sentence will not apply, however, and an identification satisfying the requirements of paragraph (c)(4)(i) of this section will be considered made, with respect to—

(A) Any replacement property received by the taxpayer before the end of the identification period, and

(B) Any replacement property identified before the end of the identification period and received before the end of the exchange period, but only if the taxpayer receives before the end of the exchange period identified replacement property the fair market vlaue of which is at least 95 percent of the aggregate fair market value of all identified replacement properties (the ‘‘95-percent rule’’).

For this purpose, the fair market value of each identified replacement property is determined as of the earlier of the date the property is received by the taxpayer or the last day of the exchange period.

(iii) For purposes of applying the 3-property rule, the 200-percent rule, and the 95-percent rule, all identifications of replacement property, other than identifications of replacement property that have been revoked in the manner provided in paragraph (c)(6) of this section, are taken into account. For example, if, in a deferred exchange, B transfers property X with a fair market value of $100,000 to C and B receives like-kind property Y with a fair market value of $50,000 before the end of the identification period, under paragraph (c)(1) of this section, property Y is treated as identified by reason of being received before the end of the identification period. Thus, under paragraph (c)(4)(i) of this section, B may identify either two additional replacement properties of any fair market value or any number of additional replacement properties as long as the aggregate fair market value of the additional replacement properties does not exceed $150,000.

(5) *Incidental property disregarded.* (i) Solely for purposes of applying this paragraph (c), property that is incidental to a larger item of property is not treated as property that is separate from the larger item of property. Property is incidental to a larger item of property if—

(A) In standard commercial transactions, the property is typically transferred together with the larger item of property, and

(B) The aggregate fair market value of all of the incidental property does not exceed 15 percent of the aggregate fair market value of the larger item of property.

(ii) This paragraph (c)(5) may be illustrated by the following examples.

Example 1. For purposes of paragraph (c) of this section, a spare tire and tool kit will not be treated as separate property from a truck with a fair market value of $10,000, if the aggregate fair market value of the spare tire and tool kit does not exceed $1,500. For purposes of the 3-property rule, the truck, spare tire, and tool kit are treated as 1 property. Moreover, for purposes of paragraph (c)(3) of this section (relating to the description of replacement property), the truck, spare tire, and tool kit are all considered to be unambiguously described if the make, model, and year of the truck are specified, even if no reference is made to the spare tire and tool kit.

Example 2. For purposes of paragraph (c) of this section, furniture, laundry machines, and other miscellaneous items of personal property will not be treated as separate property from an apartment building with a fair market value of $1,000,000, if the aggregate fair market value of the furniture, laundry machines, and other personal property does not exceed $150,000. For purposes of the 3-property rule, the apartment building, furniture, laundry machines, and other personal property are treated as 1 property. Moreover, for purposes of paragraph (c)(3) of this section (relating to the description of replacement property), the apartment building, furniture, laundry machines, and other personal property are all considered to be unambiguously described if the legal description, street address, or distinguishable name of the apartment building is specified, even if no reference is made to the furniture, laundry machines, and other personal property.

(6) *Revocation of identification.* An identification of replacement property may be revoked at any time before the end of the identification period. An identification of replacement property is revoked only if the revocation is made in a written document signed by the taxpayer and hand delivered, mailed, telecopied, or othewise sent before the end of the identification period to the person to whom the identification of the replacement property was sent. An identification of replacement property that is made in a written agreement for the exchange of properties is treated as revoked only if the revocation is made in a written amendment to the agreement or in a written document signed by the taxpayer and hand delivered, mailed, telecopied, or othewise sent before the end of the identification period to all of the parties to the agreement.

(7) *Examples.* This paragraph (c) may be illustrated by the following examples. Unless otherwise provided in an example, the following facts are assumed: B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to their agreement, B transfers real property X to C on May 17, 1991. Real property X, which has been held by B for investment, is unencumbered and has a fair market value on May 17, 1991, of $100,000. On or before July 1, 1991 (the end of the identification period), B is to identify replacement property that is of a like kind to real property X. On or before November 13, 1991 (the end of the exchange period), C is required to purchase the property identified by B and to transfer that property to B. To the extent the fair market value of the replacement property transferred to B is greater or less than the fair market value of real property X, either B or C, as applicable, will make up the difference by paying cash to the other party after the date the replacement property is received by B. No replacement property is identified in the agreement. When subsequently identified, the replacement property is described by legal description and is of a like kind to real property X (determined without regard to section 1031(a)(3) and this section). B intends to

hold the replacement property received for investment.

Example 1. (i) On July 2, 1991, B identifies real property E as replacement property by designating real property E as replacement property in a written document signed by B and personally delivered to C.

(ii) Because the identification was made after the end of the identification period, pursuant to paragraph (b)(1)(i) of this section (relating to the identification requirement), real property E is treated as property which is not of a like kind to real property X.

Example 2. (i) C is a corporation of which 20 percent of the outstanding stock is owned by B. On July 1, 1991, B identifies real property F as replacement property by designating real property F as replacement property in a written document signed by B and mailed to C.

(ii) Because C is the person obligated to transfer the replacement property to B, real property F is identified before the end of the identification period. The fact that C is a ''disqualified person'' as defined in paragraph (k) of this section does not change this result.

(iii) Real property F would also have been treated as identified before the end of the identification period if, instead of sending the identification to C, B had designated real property F as replacement property in a written agreement for the exchange of properties signed by all parties thereto on or before July 1, 1991.

Example 3. (i) On June 3, 1991, B identifies the replacement property as ''unimproved land located in Hood County with a fair market value not to exceed $100,000.'' The designation is made in a written document signed by B and personally delivered to C. On July 8, 1991, B and C agree that real property G is the property described in the June 3, 1991 document.

(ii) Because real property G was not unambiguously described before the end of the identification period, no replacement property is identified before the end of the identification period.

Example 4. (i) On June 28, 1991, B identifies real properties H, J, and K as replacement properties by designating these properties as replacement properties in a written document signed by B and personally delivered to C. The written document provides that by August 1, 1991, B will orally inform C which of the identified properties C is to transfer to B. As of July 1, 1991, the fair market values of real properties H, J, and K are $75,000, $100,000, and $125,000, respectively.

(ii) Because B did not identify more than three properties as replacement properties, the requirements of the 3-property rule are satisfied, and real properties H, J, and K are all identified before the end of the identification period.

Example 5. (i) On May 17, 1991, B identifies real properties L, M, N, and P as replacement properties by designating these properties as replacement properties in a written document signed by B and personally delivered to C. The written document provides that by July 2, 1991, B will orally inform C which of the identified properties C is to transfer to B. As of July 1, 1991, the fair market values of real properties L, M, N, and P are $30,000, $40,000, $50,000, and $60,000, respectively.

(ii) Although B identified more than three properties as replacement properties, the aggregate fair market value of the identified properties as of the end of the identification period ($180,000) did not exceed 200 percent of the aggregate fair market value of real property X (200% × $100,000 = $200,000). Therefore, the requirements of the 200-percent rule are satisfied, and real properties L, M, N, and P are all identified before the end of the identification period.

Example 6. (i) On June 21, 1991, B identifies real properties Q, R, and S as replacement properties by designating these properties as replacement properties in a written document signed by B and mailed to C. On June 24, 1991, B identifies real properties T and U as replacement properties in a written document signed by B and mailed to C. On June 28, 1991, B revokes the identification of real properties Q and R in a written document signed by B and personally delivered to C.

(ii) B has revoked the identification of real properties Q and R in the manner provided by paragraph (c)(6) of this section. Identifications of replacement property that have been revoked in the manner provided by paragraph (c)(6) of this section are not taken into account for purposes of applying the 3-property rule. Thus, as of June 28, 1991, B has identified only replacement properties S, T, and U for purposes of the 3-property rule. Because B did not identify more than three properties as replacement properties for purposes of the 3-property rule, the requirements of that rule are satisfied, and real properties S, T, and U are all identified before the end of the identification period.

Example 7. (i) On May 20, 1991, B identifies real properties V and W as replacement properties by designating these properties as replacement properties in a written document signed by B and personally delivered to C. On June 4, 1991, B identifies real properties Y and Z as replacement properties in the same manner. On June 5, 1991, B telephones C and orally revokes the identification of real properties V and W. As of July 1, 1991, the fair market values of real properties V, W, Y, and Z are $50,000, $70,000, $90,000, and $100,000, respectively. On July 31, 1991, C purchases real property Y and Z and transfers them to B.

(ii) Pursuant to paragraph (c)(6) of this section (relating to revocation of identification), the oral revocation of the identification of real properties V and W is invalid. Thus, the identification of real properties V and W is taken into account for purposes of determining whether the requirements of paragraph (c)(4) of this section (relating to the identification of alternative and multiple properties) are satisfied. Because B identified more than three properties and the aggregate fair market value of the identified properties as of the end of the identification period ($310,000) exceeds 200 percent of the fair market value of real property X (200% × $100,000 = $200,000), the requirements of paragraph (c)(4) of this section are not satisfied, and B is treated as if B did not identify any replacement property.

(d) *Receipt of identified replacement property*—(1) *In general.* For purposes of paragraph (b)(1)(ii) of this section (relating to the receipt requirement), the identified replacement property is received before the end of the exchange period only if the requriements of this paragraph (d) are satisfied with respect to the replacement property. In the case of a deferred exchange, the identified replacement property is received before the end of the exchange period if—

(i) The taxpayer receives the replacement property before the end of the exchange period, and

(ii) The replacement property received is substantially the same property as identified.

If the taxpayer has identified more than one replacement property, section 1031(a)(3)(B) and this paragraph (d) are applied separately to each replacement property.

(2) *Examples.* This paragraph (d) may be illustrated by the following examples. The following facts are assumed: B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to their agreement, B transfers real property X to C on May 17, 1991. Real property X, which has been held by B for investment, is unencumbered and has a fair market value on May 17, 1991, of $100,000. On or before July 1, 1991 (the end of the identification period), B is to identify replacement property that is of a like kind to real property X. On or before November 13, 1991 (the end of the exchange period), C is required to purchase the property identified by B and to transfer that property to B. To the extent the fair market value of the replacement property transferred to B is greater or less than the fair market value of real property X, either B or C, as applicable, will make up the difference by paying cash to the other party after the date the replacement property is received by B. The replacement property is identified in a manner that satisfies paragraph (c) of this section (relating to identification of replacement property) and is of a like kind to real property X (determined without regard to section 1031(a)(3) and this section). B intends to hold any replacement property received for investment.

Example 1. (i) In the agreement, B identifies real properties J, K, and L as replacement properties. The agreement provides that by July 26, 1991, B will orally inform C which of the properties C is to transfer to B.

(ii) As of July 1, 1991, the fair market values of real properties J, K, and L are $75,000, $100,000, and $125,000, respectively. On July 26, 1991, B instructs C to acquire real property K. On October 31, 1991, C purchases real property K for $100,000 and transfers the property to B.

(iii) Because real property K was identified before the end of the identification period and was received before the end of the exchange period, the identification and receipt requirements of section 1031(a)(3) and this section are satisfied with respect to real property K.

Example 2. (i) In the agreement, B identifies real property P as replacement property. Real property P consists of two acres of unimproved land. On October 15, 1991, the owner of real property P erects a fence on the property. On November 1, 1991, C purchases real property P and transfers it to B.

(ii) The erection of the fence on real property P subsequent to its identification did not alter the basic nature or character of real property P as unimproved land. B is considered to have received substantially the same property as identified.

Example 3. (i) In the agreement, B identifies real property Q as replacement property. Real property Q consists of a barn on two acres of land and has a fair market value of $250,000 ($187,500 for the barn and underlying land and $87,500 for the remaining land). As of July 26, 1991, real property Q remains unchanged and has a fair market value of $250,000. On that date, at B’s direction, C purchases the barn and underlying land for $187,500 and transfers it to B, and B pays $87,500 to C.

(ii) The barn and underlying land differ in basic nature or character from real property

Q as a whole, B is not considered to have received substantially the same property as identified.

Example 4. (i) In the agreement, B identifies real property R as replacement property. Real property R consists of two acres of unimproved land and has a fair market value of $250,000. As of October 3, 1991, real property R remains unimproved and has a fair market value of $250,000. On that date, at B's direction, C purchases 1½ acres of real property R for $187,500 and transfers it to B, and B pays $87,500 to C.

(ii) The portion of real property R that B received does not differ from the basic nature or character of real property R as a whole. Moreover, the fair market value of the portion of real property R that B received ($187,500) is 75 percent of the fair market value of real property R as of the date of receipt. Accordingly, B is considered to have received substantially the same property as identified.

(e) *Special rules for identification and receipt of replacement property to be produced*—(1) *In general.* A transfer of relinquished property in a deferred exchange will not fail to qualify for nonrecognition of gain or loss under section 1031 merely because the replacement property is not in existence or is being produced at the time the property is identified as replacement property. For purposes of this paragraph (e), the terms ''produced'' and ''production'' have the same meanings as provided in section 263A(g)(1) and the regulations thereunder.

(2) *Identification of replacement property to be produced.* (i) In the case of replacement property that is to be produced, the replacement property must be identified as provided in paragraph (c) of this section (relating to identification of replacement property). For example, if the identified replacement property consists of improved real property where the improvements are to be constructed, the description of the replacement property satisfies the requirements of paragraph (c)(3) of this section (relating to description of replacement property) if a legal description is provided for the underlying land and as much detail is provided regarding construction of the improvements as is practicable at the time the identification is made.

(ii) For purposes of paragraphs (c)(4)(i)(B) and (c)(5) of this section (relating to the 200-percent rule and incidental property), the fair market value of replacement property that is to be produced is its estimated fair market value as of the date it is expected to be received by the taxpayer.

(3) *Receipt of replacement property to be produced.* (i) For purposes of paragraph (d)(1)(ii) of this section (relating to receipt of the identified replacement property), in determining whether the replacement property received by the taxpayer is substantially the same property as identified where the identified replacement property is property to be produced, variations due to usual or typical production changes are not taken into account. However, if substantial changes are made in the property to be produced, the replacement property received will not be considered to be substantially the same property as identified.

(ii) If the identified replacement property is personal property to be produced, the replacement property received will not be considered to be substantially the same property as identified unless production of the replacement property received is completed on or before the date the property is received by the taxpayer.

(iii) If the identified replacement property is real property to be produced and the production of the property is not completed on or before the date the taxpayer receives the property, the property received will be considered to be substantially the same property as identified only if, had production been completed on or before the date the taxpayer receives the replacement property, the property received would have been considered to be substantially the same property as identified. Even so, the property received is considered to be substantially the same property as identified only to the extent the property received constitutes real property under local law.

(4) *Additional rules.* The transfer of relinquished property is not within the provisions of section 1031(a) if the relinquished property is transferred in exchange for services (including production services). Thus, any additional production occurring with respect to the replacement property after the property is received by the taxpayer

will not be treated as the receipt of property of a like kind.

(5) *Example.* This paragraph (e) may be illustrated by the following example.

Example: (i) B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to their agreement, B transfers improved real property X and personal property Y to C on May 17, 1991. On or before November 13, 1991 (the end of the exchange period), C is required to transfer to B real property M, on which C is constructing improvements, and personal property N, which C is producing. C is obligated to complete the improvements and production regardless of when properties M and N are transferred to B. Properties M and N are identified in a manner that satisfies paragraphs (c) (relating to identification of replacement property) and (e)(2) of this section. In addition, properties M and N are of a like kind, respectively, to real property X and personal property Y (determined without regard to section 1031(a)(3) and this section). On November 13, 1991, when construction of the improvements to property M is 20 percent completed and the production of property N is 90 percent completed, C transfers to B property M and property N. If construction of the improvements had been completed, property M would have been considered to be substantially the same property as identified. Under local law, property M constitutes real property to the extent of the underlying land and the 20 percent of the construction that is completed.

(ii) Because property N is personal property to be produced and production of property N is not completed before the date the property is received by B, property N is not considered to be substantially the same property as identified and is treated as property which is not of a like kind to property Y.

(iii) Property M is considered to be substantially the same property as identified to the extent of the underlying land and the 20 percent of the construction that is completed when property M is received by B. However, any additional construction performed by C with respect to property M after November 13, 1991, is not treated as the receipt of property of a like kind.

(f) *Receipt of money or other property*—(1) *In general.* A transfer of relinquished property in a deferred exchange is not within the provisions of section 1031(a) if, as part of the consideration, the taxpayer receives money or other property. However, such a transfer, if otherwise qualified, will be within the provisions of either section 1031 (b) or (c). See § 1.1031(a)–1(a)(2). In addition, in the case of a transfer of relinquished property in a deferred exchange, gain or loss may be recognized if the taxpayer actually or constructively receives money or other property before the taxpayer actually receives like-kind replacement property. If the taxpayer actually or constructively receives money or other property in the full amount of the consideration for the relinquished property before the taxpayer actually receives like-kind replacement property, the transaction will constitute a sale and not a deferred exchange, even though the taxpayer may ultimately receive like-kind replacement property.

(2) *Actual and constructive receipt.* Except as provided in paragraph (g) of this section (relating to safe harbors), for purposes of section 1031 and this section, the determination of whether (or the extent to which) the taxpayer is in actual or constructive receipt of money or other property before the taxpayer actually receives like-kind replacement property is made under the general rules concerning actual and constructive receipt and without regard to the taxpayer's method of accounting. The taxpayer is in actual receipt of money or property at the time the taxpayer actually receives the money or property or receives the economic benefit of the money or property. The taxpayer is in constructive receipt of money or property at the time the money or property is credited to the taxpayer's account, set apart for the taxpayer, or otherwise made available so that the taxpayer may draw upon it at any time or so that the taxpayer can draw upon it if notice of intention to draw is given. Although the taxpayer is not in constructive receipt of money or property if the taxpayer's control of its receipt is subject to substantial limitations or restrictions, the taxpayer is in constructive receipt of the money or property at the time the limitations or restrictions lapse, expire, or are waived. In addition, actual or constructive receipt of money or property by an agent of the taxpayer (determined without regard to paragraph (k) of this section) is actual or constructive receipt by the taxpayer.

(3) *Example.* This paragraph (f) may be illustrated by the following example.

Example: (i) B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to the agreement, on May 17, 1991, B transfers real property X to C. Real property X, which has been held by B for investment, is unencumbered and has a fair market value on May 17, 1991, of $100,000. On or before July 1, 1991 (the end of the identification period), B is to identify replacement property that is of a like kind to real property X. On or before November 13, 1991 (the end of the exchange period), C is required to purchase the property identified by B and to transfer that property to B. At any time after May 17, 1991, and before C has purchased the replacement property, B has the right, upon notice, to demand that C pay $100,000 in lieu of acquiring and transferring the replacement property. Pursuant to the agreement, B identifies replacement property, and C purchases the replacement property and transfers it to B.

(ii) Under the agreement, B has the unrestricted right to demand the payment of $100,000 as of May 17, 1991. B is therefore in constructive receipt of $100,000 on that date. Because B is in constructive receipt of money in the full amount of the consideration for the relinquished property before B actually receives the like-kind replacement property, the transaction constitutes a sale, and the transfer of real property X does not qualify for nonrecognition of gain or loss under section 1031. B is treated as if B received the $100,000 in consideration for the sale of real property X and then purchased the like-kind replacement property.

(iii) If B's right to demand payment of the $100,000 were subject to a substantial limitation or restriction (e.g., the agreement provided that B had no right to demand payment before November 14, 1991 (the end of the exchange period)), then, for purposes of this section, B would not be in actual or constructive receipt of the money unless (or until) the limitation or restriction lapsed, expired, or was waived.

(g) *Safe harbors*—(1) *In general.* Paragraphs (g)(2) through (g)(5) of this section set forth four safe harbors the use of which will result in a determination that the taxpayer is not in actual or constructive receipt of money or other property for purposes of section 1031 and this section. More than one safe harbor can be used in the same deferred exchange, but the terms and conditions of each must be separately satisfied. For purposes of the safe harbor rules, the term ''taxpayer'' does not include a person or entity utilized in a safe harbor (e.g., a qualified intermediary). See paragraph (g)(8), *Example 3(v),* of this section.

(2) *Security or guarantee arrangements.* (i) In the case of a deferred exchange, the determination of whether the taxpayer is in actual or constructive receipt of money or other property before the taxpayer actually receives like-kind replacement property will be made without regard to the fact that the obligation of the taxpayer's transferee to transfer the replacement property to the taxpayer is or may be secured or guaranteed by one or more of the following—

(A) A mortgage, deed of trust, or other security interest in property (other than cash or a cash equivalent),

(B) A standby letter of credit which satisfies all of the requirements of §15A.453–1 (b)(3)(iii) and which may not be drawn upon in the absence of a default of the transferee's obligation to transfer like-kind replacement property to the taxpayer, or

(C) A guarantee of a third party.

(ii) Paragraph (g)(2)(i) of this section ceases to apply at the time the taxpayer has an immediate ability or unrestricted right to receive money or other property pursuant to the security or guarantee arrangement.

(3) *Qualified escrow accounts and qualified trusts.* (i) In the case of a deferred exchange, the determination of whether the taxpayer is in actual or constructive receipt of money or other property before the taxpayer actually receives like-kind replacement property will be made without regard to the fact that the obligation of the taxpayer's transferee to transfer the replacement property to the taxpayer is or may be secured by cash or a cash equivalent if the cash or cash equivalent is held in a qualified escrow account or in a qualified trust.

(ii) A qualified escrow account is an escrow account wherein—

(A) The escrow holder is not the taxpayer or a disqualified person (as defined in paragraph (k) of this section), and

(B) The escrow agreement expressly limits the taxpayer's rights to receive, pledge, borrow, or otherwise obtain the benefits of the cash or cash equivalent held in the escrow account as provided in paragraph (g)(6) of this section.

(iii) A qualified trust is a trust wherein—

(A) The trustee is not the taxpayer or a disqualified person (as defined in paragraph (k) of this section, except that for this purpose the relationship between the taxpayer and the trustee created by the qualified trust will not be considered a relationship under section 267(b)), and

(B) The trust agreement expressly limits the taxpayer's rights to receive, pledge, borrow, or otherwise obtain the benefits of the cash or cash equivalent held by the trustee as provided in paragraph (g)(6) of this section.

(iv) Paragraph (g)(3)(i) of this section ceases to apply at the time the taxpayer has an immediate ability or unrestricted right to receive, pledge, borrow, or otherwise obtain the benefits of the cash or cash equivalent held in the qualified escrow account or qualified trust. Rights conferred upon the taxpayer under state law to terminate or dismiss the escrow holder of a qualified escrow account or the trustee of a qualified trust are disregarded for this purpose.

(v) A taxpayer may receive money or other property directly from a party to the exchange, but not from a qualified escrow account or a qualified trust, without affecting the application of paragraph (g)(3)(i) of this section.

(4) *Qualified intermediaries.* (i) In the case of a taxpayer's transfer of relinquished property involving a qualified intermediary, the qualified intermediary is not considered the agent of the taxpayer for purposes of section 1031(a). In such a case, the taxpayer's transfer of relinquished property and subsequent receipt of like-kind replacement property is treated as an exchange, and the determination of whether the taxpayer is in actual or constructive receipt of money or other property before the taxpayer actually receives like-kind replacement property is made as if the qualified intermediary is not the agent of the taxpayer.

(ii) Paragraph (g)(4)(i) of this section applies only if the agreement between the taxpayer and the qualified intermediary expressly limits the taxpayer's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property held by the qualified intermediary as provided in paragraph (g)(6) of this section.

(iii) A qualified intermediary is a person who—

(A) Is not the taxpayer or a disqualified person (as defined in paragraph (k) of this section), and

(B) Enters into a written agreement with the taxpayer (the ''exchange agreement'') and, as required by the exchange agreement, acquires the relinquished property from the taxpayer, transfers the relinquished property, acquires the replacement property, and transfers the replacement property to the taxpayer.

(iv) Regardless of whether an intermediary acquires and transfers property under general tax principals, solely for purposes of paragraph (g)(4)(iii)(B) of this section—

(A) An intermediary is treated as acquiring and transferring property if the intermediary acquires and transfers legal title to that property,

(B) An intermediary is treated as acquiring and transferring the relinquished property if the intermediary (either on its own behalf or as the agent of any party to the transaction) enters into an agreement with a person other than the taxpayer for the transfer of the relinquished property to that person and, pursuant to that agreement, the relinquished property is transferred to that person, and

(C) An intermediary is treated as acquiring and transferring replacement property if the intermediary (either on its own behalf or as the agent of any party to the transaction) enters into an agreement with the owner of the replacement property for the transfer of that property and, pursuant to that agreement, the replacement property is transferred to the taxpayer.

(v) Solely for purposes of paragraphs (g)(4)(iii) and (g)(4)(iv) of this section, an intermediary is treated as entering into an agreement if the rights of a party to the agreement are assigned to the intermediary and all parties to that agreement are notified in writing of the assignment on or before the date of the relevent transfer of property. For example, if a taxpayer enters into an agreement for the transfer of relinquished property and thereafter assigns its rights in that agreement to an intermediary and all parties to that agreement are notified in writing of the assignment on or before the date of the transfer of the relinquished property, the intermediary is treated as entering into that agreement. If the relinquished property is transferred pursuant to that agreement, the intermediary is treated as having acquired and transferred the relinquished property.

(vi) Paragraph (g)(4)(i) of this section ceases to apply at the time the taxpayer has an immediate ability or unrestricted right to receive, pledge, borrow, or otherwise obtain the benefits of money or other property held by the qualified intermediary. Rights conferred upon the taxpayer under state law to terminate or dismiss the qualified intermediary are disregarded for this purpose.

(vii) A taxpayer may receive money or other property directly from a party to the transaction other than the qualified intermediary without affecting the application of paragraph (g)(4)(i) of this section.

(5) *Interest and growth factors.* In the case of a deferred exchange, the determination of whether the taxpayer is in actual or constructive receipt of money or other property before the taxpayer actually receives the like-kind replacement property will be made without regard to the fact that the taxpayer is or may be entitled to receive any interest or growth factor with respect to the deferred exchange. The preceding sentence applies only if the agreement pursuant to which the taxpayer is or may be entitled to the interest or growth factor expressly limits the taxpayer's rights to receive the interest or growth factor as provided in paragragh (g)(6) of this section. For additional rules concerning interest or growth factors, see paragraph (h) of this section.

(6) *Additional restrictions on safe harbors under paragraphs (g)(3) through (g)(5).* (i) An agreement limits a taxpayer's rights as provided in this paragraph (g)(6) only if the agreement provides that the taxpayer has no rights, except as provided in paragraph (g)(6)(ii) and (g)(6)(iii) of this section, to receive, pledge, borrow, or otherwise obtain the benefits of money or other property before the end of the exchange period.

(ii) The agreement may provide that if the taxpayer has not identified replacement property by the end of the identification period, the taxpayer may have rights to receive, pledge, borrow, or othewise obtain the benefits of money or other property at any time after the end of the identification period.

(iii) The agreement may provide that if the taxpayer has identified replacement property, the taxpayer may have rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property upon or after—

(A) The receipt by the taxpayer of all of the replacement property to which the taxpayer is entitled under the exchange agreement, or

(B) The occurrence after the end of the identification period of a material and substantial contingency that—

(*1*) Relates to the deferred exchange,

(*2*) Is provided for in writing, and

(*3*) Is beyond the control of the taxpayer and of any disqualified person (as defined in paragraph (k) of this section), other than the person obligated to transfer the replacement property to the taxpayer.

(7) *Items disregarded in applying safe harbors under paragraphs (g)(3) through (g)(5).* In determining whether a safe harbor under paragraphs (g)(3) through (g)(5) of this section ceases to apply and whether the taxpayer's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property are expressly limited as provided in paragraph (g)(6) of this section, the taxpayer's receipt of or right to receive any of the following items will be disregarded—

(i) Items that a seller may receive as a consequence of the disposition of property and that are not included in the amount realized from the disposition of property (e.g., prorated rents), and

(ii) Transactional items that relate to the disposition of the relinquished property or to the acquisition of the replacement property and appear under local standards in the typical closing statements as the responsibility of a buyer or seller (e.g., commissions, prorated taxes, recording or transfer taxes, and title company fees).

(8) *Examples.* This paragraph (g) may be illustrated by the following examples. Unless otherwise provided in an example, the following facts are assumed: B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to their agreement, B is to transfer real property X to C on May 17, 1991. Real property X, which has been held by B for investment, is unencumbered and has a fair market value on May 17, 1991, of $100,000. On or before July 1, 1991 (the end of the identification period), B is to identify replacement property that is of a like kind to real property X. On or before November 13, 1991 (the end of the exchange period), C is required to purchase the property identified by B and to transfer that property to B. To the extent the fair market value of the replacement property transferred to B is greater or less than the fair market value property X, either B or C, as applicable, will make up the difference by paying cash to the other party after the date the replacement property is received by B. The replacement property is identified as provided in paragraph (c) of this section (relating to identification of replacement property) and is of a like kind to real property X (determined without regard to section 1031(a)(3) and this section). B intends to hold any replacement property received for investment.

Example 1. (i) On May 17, 1991, B transfers real property X to C. On the same day, C pays $10,000 to B and deposits $90,000 in escrow as security for C's obligation to perform under the agreement. The escrow agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the money in escrow before November 14, 1991, except that:

(A) if B fails to identify replacement property on or before July 1, 1991, B may demand the funds in escrow at any time after July 1, 1991; and

(B) if B identifies and receives replacement property, then B may demand the balance of the remaining funds in escrow at any time after B has received the replacement property.

The funds in escrow may be used to purchase the replacement property. The escrow holder is not a disqualified person as defined in paragraph (k) of this section. Pursuant to the terms of the agreement, B identifies replacement property, and C purchases the replacement property using the funds in escrow and tranfers the replacement property to B.

(ii) C's obligation to transfer the replacement property to B was secured by cash held in a qualified escrow account because the escrow holder was not a disqualified person and the escrow agreement expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of the money in escrow as provided in paragraph (g)(6) of this section. In addition, B did not have the immediate ability or unrestricted right to receive money or other property in escrow before B actually received the like-kind replacement property. Therefore, for purposes of section 1031 and this section, B is determined not to be in actual or constructive receipt of the $90,000 held in escrow before B received the like-kind replacement property. The transfer of real property X by B and B's acquisition of the replacement property qualify as an exchange under section 1031. See paragraph (j) of this section for determining the amount of gain or loss recognized.

Example 2. (i) On May 17, 1991, B transfers real property X to C, and C deposits $100,000 in escrow as security for C's obligation to perform under the agreement. Also on May 17, B identifies real property J as replacement property. The escrow agreement provides that no funds may be paid out without prior written approval of both B and C. The escrow agreement also provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the money in escrow before November 14, 1991, except that:

(A) B may demand the funds in escrow at any time after the later of July 1, 1991, and the occurrence of any of the following events—

(*1*) real property J is destroyed, seized, requisitioned, or condemned, or

(*2*) a determination is made that the regulatory approval necessary for the transfer of real property J cannot be obtained in time for real property J to be transferred to B before the end of the exchange period;

(B) B may demand the funds in escrow at any time after August 14, 1991, if real property J has not been rezoned from residential to commercial use by that date; and

(C) B may demand the funds in escrow at the time B receives real property J or any time thereafter.

Otherwise, B is entitled to all funds in escrow after November 13, 1991. The funds in escrow may be used to purchase the replacement property. The escrow holder is not a disqualified person as described in paragraph (k) of this section. Real property J is not rezoned from residential to commercial use on or before August 14, 1991.

(ii) C's obligation to transfer the replacement property to B was secured by cash held in a qualified escrow account because the escrow holder was not a disqualified person and the escrow agreement expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of the money in escrow as provided in paragraph (g)(6) of this section. From May 17, 1991, until August 15, 1991, B did not have the immediate ability or unrestricted right to receive money or other property before B actually received the like-kind replacement property. Therefore, for purposes of section 1031 and this section, B is determined not to be in actual or constructive receipt of the $100,000 in escrow from May 17, 1991, until August 15, 1991. However, on August 15, 1991, B had the unrestricted right, upon notice, to draw upon the $100,000 held in escrow. Thus, the safe harbor ceased to apply and B was in constructive receipt of the funds held in escrow. Because B constructively received the full amount of the consideration ($100,000) before B actually received the like-kind replacement property, the transaction is treated as a sale and not as a deferred exchange. The result does not change even if B chose not to demand the funds in escrow and continued to attempt to have real property J rezoned and to receive the property on or before November 13, 1991.

(iii) If real property J had been rezoned on or before August 14, 1991, and C had purchased real property J and transferred it to B on or before November 13, 1991, the transaction would have qualified for nonrecognition of gain or loss under section 1031(a).

Example 3. (i) On May 1, 1991, D offers to purchase real property X for $100,000. However, D is unwilling to participate in a like-kind exchange. B thus enters into an exchange agreement with C whereby B retains C to facilitate an exchange with respect to real property X. C is not a disqualified person as described in paragraph (k) of this section. The exchange agreement between B and C provides that B is to execute and deliver a deed conveying real property X to C who, in turn, is to execute and deliver a deed conveying real property X to D. The exchange agreement expressly limits B's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property held by C as provided in paragraph (g)(6) of this section. On May 3, 1991, C enters into an agreement with D to transfer real property X to D for $100,000. On May 17, 1991, B executes and delivers to C a deed conveying real property X to C. On the same date, C executes and delivers to D a deed conveying real property X to D, and D deposits $100,000 in escrow. The escrow holder is not a disqualified person as defined in paragraph (k) of this section and the escrow agreement expressly limits B's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property in escrow as provided in paragraph (g)(6) of this section. However, the escrow agreement provides that the money in escrow may be used to purchase replacement property. On June 3, 1991, B identifies real property K as replacement property. On August 9, 1991, E executes and delivers to C a deed conveying real property K to C and $80,000 is released from the escrow and paid to E. On the same date, C executes and delivers to B a deed conveying real property K to B, and the escrow holder pays B $20,000, the balance of the $100,000 sale price of real property X remaining after the purchase of real property K for $80,000.

(ii) B and C entered into an exchange agreement that satisfied the requirements of paragraph (g)(4)(iii)(B) of this section. Regardless of whether C may have acquired and transferred real property X under general tax principles, C is treated as having acquired and transferred real property X because C acquired and transferred legal title to real property X. Similarly, C is treated as having acquired and transferred real property K because C acquired and transferred legal title to real property K. Thus, C was a qualified intermediary. This result is reached for purposes of this section regardless of whether C was B's agent under state law.

(iii) Because the escrow holder was not a disqualified person and the escrow agreement expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property in escrow as provided in paragraph (g)(6) of this section, the escrow account was a qualified escrow account. For purposes of section 1031 and this section, therefore, B is determined not to be in actual or constructive receipt of the funds in escrow before B received real property K.

(iv) The exchange agreement between B and C expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of any money held by C as provided in paragraph (g)(6) of this section. Because C was a qualified intermediary, for purposes of section 1031 and this section B is determined not to be in actual or constructive receipt of any funds held by C before B received real property K. In addition, B's transfer of real property X and acquisition of real property K qualify as an exchange under section 1031. See paragraph (j) of this section for determining the amount of gain or loss recognized.

(v) If the escrow agreement had expressly limited C's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property in escrow as provided in paragraph (g)(6) of this section, but had not expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of that money or other property, the escrow account would not have been a qualified escrow account. Consequently, paragraph (g)(3)(i) of this section would not have been applicable in determining whether B was in actual or constructive receipt of that money or other property before B received real property K.

Example 4. (i) On May 1, 1991, B enters into an agreement to sell real property X to D for $100,000 on May 17, 1991. However, D is unwilling to participate in a like-kind exchange. B thus enters into an exchange agreement with C whereby B retains C to facilitate an exchange with respect to real property X. C is not a disqualified person as described in paragraph (k) of this section. In the exchange agreement between B and C, B assigns to C all of B's rights in the agreement with D. The exchange agreement expressly limits B's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property held by C as provided in paragraph (g)(6) of this section. On May 17, 1991, B notifies D in writing of the assignment. On the same date, B executes and delivers to D a deed conveying real property X to D. D pays $10,000 to B and $90,000 to C. On June 1, 1991, B identifies real property L as replacement property. On July 5, 1991, B enters into an agreement to purchase real property L from E for $90,000, assigns its rights in that agreement to C, and notifies E in writing of the assignment. On August 9, 1991, C pays $90,000 to E, and E executes and delivers to B a deed conveying real property L to B.

(ii) The exchange agreement entered into by B and C satisfied the requirements of paragraph (g)(4)(iii)(B) of this section. Because B's rights in its agreements with D and E were assigned to C, and D and E were notified in writing of the assignment on or before the transfer of real properties X and L, respectively, C is treated as entering into those agreements. Because C is treated as entering into an agreement with D for the transfer of real property X and, pursuant to that agreement, real property X was transferred to D, C is treated as acquiring and transferring real property X. Similarly, because C is treated as entering into an agreement with E for the transfer of real property K and, pursuant to that agreement, real property K was transferred to B, C is treated as acquiring and transferring real property K. This result is reached for purposes of this section regardless of whether C was B's agent under state law and regardless of whether C is considered, under general tax principles, to have acquired title or beneficial ownership of the properties. Thus, C was a qualified intermediary.

(iii) The exchange agreement between B and C expressly limited B's rights to receive, pledge, borrow, or otherwise obtain the benefits of the money held by C as provided in paragraph (g)(6) of this section. Thus, B did not have the immediate ability or unrestricted right to receive money or other property held by C before B received real property L. For purposes of section 1031 and this section, therefore, B is determined not to be in actual or constructive receipt of the $90,000 held by C before B received real property L. In addition, the transfer of real property X by B and B's acquisition of real property L qualify as an exchange under section 1031. See paragraph (j) of this section for determining the amount of gain or loss recognized.

Example 5. (i) On May 1, 1991, B enters into an agreement to sell real property X to D for $100,000. However, D is unwilling to participate in a like-kind exchange. B thus enters into an agreement with C whereby B retains C to facilitate an exchange with respect to real property X. C is not a disqualified person as described in paragraph (k) of this section. The agreement between B and C expressly limits B's rights to receive, pledge, borrow, or otherwise obtain the benefits of money or other property held by C as provided in paragraph (g)(6) of this section. C neither enters into an agreement with D to transfer real property X to D nor is assigned B's rights in B's agreement to sell real property X to D. On May 17, 1991, B transfers real property X to D and instructs D to transfer the $100,000 to C. On June 1, 1991, B identifies real property M as replacement property. On August 9, 1991, C purchases real property L from E for $100,000, and E executes and delivers to C a deed conveying real property M to C. On the same date, C executes and delivers to B a deed conveying real property M to B.

(ii) Because B transferred real property X directly to D under B's agreement with D, C did not acquire real property X from B and transfer real property X to D. Moreover, because C did not acquire legal title to real property X, did not enter into an agreement with D to transfer real property X to D, and was not assigned B's rights in B's agreement to sell real property X to D, C is not treated as acquiring and transferring real property X. Thus, C was not a qualified intermediary and paragraph (g)(4))(i) of this section does not apply.

(iii) B did not exchange real property X for real property M. Rather, B sold real property X to D and purchased, through C, real property M. Therefore, the transfer of real property X does not qualify for nonrecognition of gain or loss under section 1031.

(h) *Interest and growth factors*—(1) *In general.* For purposes of this section, the taxpayer is treated as being entitled to receive interest or a growth factor with respect to a deferred exchange if the amount of money or property the taxpayer is entitled to receive depends upon the length of time elapsed between transfer of the relinquished property and receipt of the replacement property.

(2) *Treatment as interest.* If, as part of a deferred exchange, the taxpayer receives interest or a growth factor, the interest or growth factor will be treated as interest, regardless of whether it is paid to the taxpayer in cash or in property (including property of a like kind). The taxpayer must include the interest or growth factor in income according to the taxpayer's method of accounting.

(i) [Reserved]

(j) *Determination of gain or loss recognized and the basis of property received in a deferred exchange*—(1) *In general.* Except as otherwise provided, the amount of gain or loss recognized and the basis of property received in a deferred exchange is determined by applying the rules of section 1031 and the regulations thereunder. See §§1.1031(b)–1, 1.1031(c)–1, 1.1031(d)–1, 1.1031(d)–1T, 1.1031(d)–2, and 1.1031(j)–1.

(2) *Coordination with section 453*—(i) *Qualified escrow accounts and qualified trusts.* Subject to the limitations of paragraphs (j)(2) (iv) and (v) of this section, in the case of a taxpayer's transfer of relinquished property in which the obligation of the taxpayer's transferee to transfer replacement property to the taxpayer is or may be secured by cash or a cash equivalent, the determination of whether the taxpayer has received a payment for purposes of section 453 and §15a.453–1(b)(3)(i) of this chapter will be made without regard to the fact that the obligation is or may be so secured if the cash or cash equivalent is held in a qualified escrow account or a qualified trust. This paragraph (j)(2)(i) ceases to apply at the earlier of—

(A) The time described in paragraph (g)(3)(iv) of this section; or

(B) The end of the exchange period.

(ii) *Qualified intermediaries.* Subject to the limitations of paragraphs (j)(2) (iv) and (v) of this section, in the case of a taxpayer's transfer of relinquished property involving a qualified intermediary, the determination of whether the taxpayer has received a payment for purposes of section 453 and §15a.453–1(b)(3)(i) of this chapter is made as if the qualified intermediary is not the agent of the taxpayer. For purposes of this paragraph (j)(2)(ii), a person who otherwise satisfies the definition of a qualified intermediary is treated as a qualified intermediary even though that person ultimately fails to acquire identified replacement property and transfer it to the taxpayer. This paragraph (j)(2)(ii) ceases to apply at the earlier of—

(A) The time described in paragraph (g)(4)(vi) of this section; or

(B) The end of the exchange period.

(iii) *Transferee indebtedness.* In the case of a transaction described in paragraph (j)(2)(ii) of this section, the receipt by the taxpayer of an evidence of indebtedness of the transferee of the qualified intermediary is treated as the receipt of an evidence of indebtedness of the person acquiring property from the taxpayer for purposes of section 453 and §15a.453–1(b)(3)(i) of this chapter.

(iv) *Bona fide intent requirement.* The provisions of paragraphs (j)(2) (i) and (ii) of this section do not apply unless the taxpayer has a bona fide intent to enter into a deferred exchange at the beginning of the exchange period. A taxpayer will be treated as having a bona fide intent only if it is reasonable to believe, based on all the facts and circumstances as of the beginning of the exchange period, that like-kind replacement property will be acquired before the end of the exchange period.

(v) *Disqualified property.* The provisions of paragraphs (j)(2) (i) and (ii) of this section do not apply if the relinquished property is disqualified property. For purposes of this paragraph (j)(2), *disqualified property* means property that is not held for productive use in a trade or business or for investment or is property described in section 1031(a)(2).

(vi) *Examples.* This paragraph (j)(2) may be illustrated by the following examples. Unless otherwise provided in an example, the following facts are assumed: B is a calendar year taxpayer who agrees to enter into a deferred exchange. Pursuant to the agreement, B is to transfer real property X. Real property X, which has been held by B for investment, is unencumbered and has a fair market value of $100,000 at the time of transfer. B's adjusted basis in real property X at that time is $60,000. B identifies a single like-kind replacement property before the end of the identification period, and B receives the replacement property before the end of the exchange period. The transaction qualifies as a like-kind exchange under section 1031.

Example 1. (i) On September 22, 1994, B transfers real property X to C and C agrees to acquire like-kind property and deliver it to B. On that date B has a bona fide intent to enter into a deferred exchange. C's obligation, which is not payable on demand or readily tradable, is secured by $100,000 in cash. The $100,000 is deposited by C in an escrow account that is a qualified escrow account under paragraph (g)(3) of this section. The escrow agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the cash deposited in the escrow account until the earlier of the date the replacement property is delivered to B or the end of the exchange period. On March 11, 1995, C acquires replacement property having a fair market value of $80,000 and delivers the replacement property to B. The $20,000 in cash remaining in the qualified escrow account is distributed to B at that time.

(ii) Under section 1031(b), B recognizes gain to the extent of the $20,000 in cash that B receives in the exchange. Under paragraph (j)(2)(i) of this section, the qualified escrow account is disregarded for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter in determining whether B is in receipt of payment. Accordingly, B's receipt of C's obligation on September 22, 1994, does not constitute a payment. Instead, B is treated as receiving payment on March 11, 1995, on receipt of the $20,000 in cash from the qualified escrow account. Subject to the other requirements of sections 453 and 453A, B may report the $20,000 gain in 1995 under the installment method. See section 453(f)(6) for special rules for determining total contract price and gross profit in the case of an exchange described in section 1031(b).

Example 2. (i) D offers to purchase real property X but is unwilling to participate in a like-kind exchange. B thus enters into an exchange agreement with C whereby B retains C to facilitate an exchange with respect to real property X. On September 22, 1994, pursuant to the agreement, B transfers real property X to C who transfers it to D for $100,000 in cash. On that date B has a bona fide intent to enter into a deferred exchange. C is a qualified intermediary under paragraph (g)(4) of this section. The exchange agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the money held by C until the earlier of the date the replacement property is delivered to B or the end of the exchange period. On March 11, 1995, C acquires replacement property having a fair market value of $80,000 and delivers it, along with the remaining $20,000 from the transfer of real property X to B.

(ii) Under section 1031(b), B recognizes gain to the extent of the $20,000 cash B receives in the exchange. Under paragraph (j)(2)(ii) of this section, any agency relationship between B and C is disregarded for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter in determining whether B is in receipt of payment. Accordingly, B is not treated as having received payment on September 22, 1994, on C's receipt of payment from D for the relinquished property. Instead, B is treated as receiving payment on March 11, 1995, on receipt of the $20,000 in cash from C. Subject to the other requirements of sections 453 and 453A, B may report the $20,000 gain in 1995 under the installment method.

Example 3. (i) D offers to purchase real property X but is unwilling to participate in a like-kind exchange. B enters into an exchange agreement with C whereby B retains C as a qualified intermediary to facilitate an exchange with respect to real property X. On December 1, 1994, pursuant to the agreement, B transfers real property X to C who transfers it to D for $100,000 in cash. On that date B has a bona fide intent to enter into a deferred exchange. The exchange agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the cash held by C until the earliest of the end of the identification period if B has not identified replacement property, the date the replacement property is delivered to B, or the end of the exchange period. Although B has a bona fide intent to enter into a deferred exchange at the beginning of the exchange period, B does not identify or acquire any replacement property. In 1995, at the end of the identification period, C delivers the entire $100,000 from the sale of real property X to B.

(ii) Under section 1001, B realizes gain to the extent of the amount realized ($100,000) over the adjusted basis in real property X ($60,000), or $40,000. Because B has a bona fide intent at the beginning of the exchange period to enter into a deferred exchange, paragraph (j)(2)(iv) of this section does not make paragraph (j)(2)(ii) of this section inapplicable even though B fails to acquire replacement property. Further, under paragraph (j)(2)(ii) of this section, C is a qualified intermediary even though C does not acquire and transfer replacement property to B. Thus, any agency relationship between B and C is disregarded for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter in determining whether B is in receipt of payment. Accordingly, B is not treated as having received payment on December 1, 1994, on C's receipt of payment from D for the relinquished property. Instead, B is treated as receiving payment at the end of the identification period in 1995 on receipt of the $100,000 in cash from C. Subject to the other requirements of sections 453 and 453A, B may report the $40,000 gain in 1995 under the installment method.

Example 4. (i) D offers to purchase real property X but is unwilling to participate in a like-kind exchange. B thus enters into an exchange agreement with C whereby B retains C to facilitate an exchange with respect to real property X. C is a qualified intermediary under paragraph (g)(4) of this section. On September 22, 1994, pursuant to the agreement, B transfers real property X to C who then transfers it to D for $80,000 in cash and D's 10-year installment obligation for $20,000. On that date B has a bona fide intent to enter into a deferred exchange. The exchange agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the money or other property held by C until the earlier of the date the replacement property is delivered to B or the end of the exchange period. D's obligation bears adequate stated interest and is not payable on demand or readily tradable. On March 11, 1995, C acquires replacement property having a fair market value of $80,000 and delivers it, along with the $20,000 installment obligation, to B.

(ii) Under section 1031(b), $20,000 of B's gain (i.e., the amount of the installment obligation B receives in the exchange) does not qualify for nonrecognition under section 1031(a). Under paragraphs (j)(2) (ii) and (iii) of this section, B's receipt of D's obligation is treated as the receipt of an obligation of the person acquiring the property for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter in determining whether B is in receipt of payment. Accordingly, B's receipt of the obligation is not treated as a payment. Subject to the other requirements of sections 453 and 453A, B may report the $20,000 gain under the installment method on receiving payments from D on the obligation.

Example 5. (i) B is a corporation that has held real property X to expand its manufacturing operations. However, at a meeting in November 1994, B's directors decide that real property X is not suitable for the planned expansion, and authorize a like-kind exchange of this property for property that would be suitable for the planned expansion. B enters into an exchange agreement with C whereby B retains C as a qualified intermediary to facilitate an exchange with respect to real property X. On November 28, 1994, pursuant to the agreement, B transfers real property X to C, who then transfers it to D for $100,000 in cash. The exchange agreement does not include any limitations or conditions that make it unreasonable to believe that like-kind replacement property will be acquired before the end of the exchange period. The exchange agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the cash held by C until the earliest of the end of the identification period, if B has not identified replacement property, the date the replacement property is delivered to B, or the end of the exchange period. In early January 1995, B's directors meet and decide that it is not feasible to proceed with the planned expansion due to a business downturn reflected in B's preliminary financial reports for the last quarter of 1994. Thus, B's directors instruct C to stop seeking replacement property. C delivers the $100,000 cash to B on January 12, 1995, at the end of the identification period. Both the decision to exchange real property X for other property and the decision to cease seeking replacement property because of B's business downturn are recorded in the minutes of the directors' meetings. There are no other facts or circumstances that would indicate whether, on November 28, 1994, B had a bona fide intent to enter into a deferred like-kind exchange.

(ii) Under section 1001, B realizes gain to the extent of the amount realized ($100,000) over the adjusted basis of real property X ($60,000), or $40,000. The directors' authorization of a like-kind exchange, the terms of the exchange agreement with C, and the absence of other relevant facts, indicate that B had a bona fide intent at the beginning of the exchange period to enter into a deferred like-kind exchange. Thus, paragraph (j)(2)(iv) of this section does not make paragraph (j)(2)(ii) of this section inapplicable, even though B fails to acquire replacement property. Further, under paragraph (j)(2)(ii) of this section, C is a qualified intermediary, even though C does not transfer replacement property to B. Thus, any agency relationship between B and C is disregarded for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter in determining whether B is in receipt of payment. Accordingly, B is not treated as having received payment until January 12, 1995, on receipt of the $100,000 cash from C. Subject to the other requirements of sections 453 and 453A, B may report the $40,000 gain in 1995 under the installment method.

Example 6. (i) B has held real property X for use in its trade or business, but decides to transfer that property because it is no longer suitable for B's planned expansion of its commercial enterprise. B and D agree to enter into a deferred exchange. Pursuant to their agreement, B transfers real property X to D on September 22, 1994, and D deposits $100,000 cash in a qualified escrow account as security for D's obligation under the agreement to transfer replacement property to B before the end of the exchange period. D's obligation is not payable on demand or readily tradable. The agreement provides that B is not required to accept any property that is not zoned for commercial use. Before the end of the identification period, B identifies real properties J, K, and L, all zoned for residential use, as replacement properties. Any one of these properties, rezoned for commercial use, would be suitable for B's planned expansion. In recent years, the zoning board with jurisdiction over properties J, K, and L has rezoned similar properties for commercial use. The escrow agreement provides that B has no rights to receive, pledge, borrow, or otherwise obtain the benefits of the money in the escrow account until the earlier of the time that the zoning board determines, after the end of the identification period, that it will not rezone the properties for commercial use or the end of the exchange period. On January 5, 1995, the zoning board decides that none of the properties will be rezoned for commercial use. Pursuant to the exchange agreement, B receives the $100,000 cash from the escrow on January 5, 1995. There are no other facts or circumstances that would indicate whether, on September 22, 1994, B had a bona fide intent to enter into a deferred like-kind exchange.

(ii) Under section 1001, B realizes gain to the extent of the amount realized ($100,000) over the adjusted basis of real property X ($60,000), or $40,000. The terms of the exchange agreement with D, the identification of properties J, K, and L, the efforts to have those properties rezoned for commercial purposes, and the absence of other relevant facts, indicate that B had a bona fide intent at the beginning of the exchange period to enter into a deferred exchange. Moreover, the limitations imposed in the exchange agreement on acceptable replacement property do not make it unreasonable to believe that like-kind replacement property would be acquired before the end of the exchange period. Therefore, paragraph (j)(2)(iv) of this section does not make paragraph (j)(2)(i) of this section inapplicable even though B fails to acquire replacement property. Thus, for purposes of section 453 and § 15a.453–1(b)(3)(i) of this chapter, the qualified escrow account is disregarded in determining whether B is in receipt of payment. Accordingly, B is not treated as having received payment on September 22, 1994, on D's deposit of the $100,000 cash into the qualified escrow account. Instead, B is treated as receiving payment on January 5, 1995. Subject to the other requirements of sections 453 and 453A, B may report the $40,000 gain in 1995 under the installment method.

(vii) *Effective date.* This paragraph (j)(2) is effective for transfers of property occurring on or after April 20, 1994. Taxpayers may apply this paragraph (j)(2) to transfers of property occurring before April 20, 1994, but on or after June 10, 1991, if those transfers otherwise meet the requirements of § 1.1031(k)–1. In addition, taxpayers may apply this paragraph (j)(2) to transfers of property occurring before June 10, 1991, but on or after May 16, 1990, if those transfers otherwise meet the requirements of § 1.1031(k)–1 or follow the guidance of IA–237–84 published in 1990–1, C.B. See § 601.601(d)(2)(ii)(*b*) of this chapter.

(3) *Examples.* This paragraph (j) may be illustrated by the following examples. Unless otherwise provided in an example, the following facts are assumed: B, a calendar year taxpayer, and C agree to enter into a deferred exchange. Pursuant to their agreement, B is to transfer real property X to C on May 17, 1991. Real property X, which has been held by B for investment, is unencumbered and has a fair market value on May 17, 1991, of $100,000. B's adjusted basis in real property X is $40,000. On or before July 1, 1991 (the end of the identification period), B is to identify replacement property that is of a like kind to real property X. On or before November 13, 1991 (the end of the exchange period), C is required to purchase the property identified by B and to transfer that property to B. To the extent the fair market value of the replacement property transferred to B is greater or less than the fair market value of real property X, either B or C, as applicable, will make up the difference by paying cash to the other party after the date the replacement property is received. The replacement property is identified as provided in paragraph (c) of this section and is of a like kind to real property X (determined without regard to section 1031(a)(3) and this section). B intends to hold any replacement property received for investment.

Example 1. (i) On May 17, 1991, B transfers real property X to C and identifies real property R as replacement property. On June 3, 1991, C transfers $10,000 to B. On September 4, 1991, C purchases real property R for $90,000 and transfers real property R to B.

(ii) The $10,000 received by B is ''money or other property'' for purposes of section 1031 and the regulations thereunder. Under section 1031(b), B recognizes gain in the amount of $10,000. Under section 1031(d), B's basis in real property R is $40,000 (i.e., B's basis in real property X ($40,000), decreased in the amount of money received ($10,000), and increased in the amount of gain recognized ($10,000) in the deferred exchange).

Example 2. (i) On May 17, 1991, B transfers real property X to C and identifies real property S as replacement property, and C transfers $10,000 to B. On September 4, 1991, C purchases real property S for $100,000 and transfers real property S to B. On the same day, B transfers $10,000 to C.

(ii) The $10,000 received by B is ‘‘money or other property’’ for purposes of section 1031 and the regulations thereunder. Under section 1031(b), B recognizes gain in the amount of $10,000. Under section 1031(d), B’s basis in real property S is $50,000 (i.e., B’s basis in real property X ($40,000), decreased in the amount of money received ($10,000), increased in the amount of gain recognized ($10,000), and increased in the amount of the additional consideration paid by B ($10,000) in the deferred exchange).

Example 3. (i) Under the exchange agreement, B has the right at all times to demand $100,000 in cash in lieu of replacement property. On May 17, 1991, B transfers real property X to C and identifies real property T as replacement property. On September 4, 1991, C purchases real property T for $100,000 and transfers real property T to B.

(ii) Because B has the right on May 17, 1991, to demand $100,000 in cash in lieu of replacement property, B is in constructive receipt of the $100,000 on that date. Thus, the transaction is a sale and not an exchange, and the $60,000 gain realized by B in the transaction (i.e., $100,000 amount realized less $40,000 adjusted basis) is recognized. Under section 1031(d), B’s basis in real property T is $100,000.

Example 4. (i) Under the exchange agreement, B has the right at all times to demand up to $30,000 in cash and the balance in replacement propertry instead of receiving replacement property in the amount of $100,000. On May 17, 1991, B transfers real property X to C and identifies real property U as replacement property. On September 4, 1991, C purchases real property U for $100,000 and transfers real property U to B.

(ii) The transaction qualifies as a deferred exchange under section 1031 and this section. However, because B had the right on May 17, 1991, to demand up to $30,000 in cash, B is in constructive receipt of $30,000 on that date. Under section 1031(b), B recognizes gain in the amount of $30,000. Under section 1031(d), B’s basis in real property U is $70,000 (i.e., B’s basis in real property X ($40,000), decreased in the amount of money that B received ($30,000), increased in the amount of gain recognized ($30,000), and increased in the amount of additional consideration paid by B ($30,000) in the deferred exchange).

Example 5. (i) Assume real property X is encumbered by a mortgage of $30,000. On May 17, 1991, B transfers real property X to C and identifies real property V as replacement property, and C assumes the $30,000 mortgage on real property X. Real property V is encumbered by a $20,000 mortgage. On July 5, 1991, C purchases real property V for $90,000 by paying $70,000 and assuming the mortgage and transfers real property V to B with B assuming the mortgage.

(ii) The consideration received by B in the form of the liability assumed by C ($30,000) is offset by the consideration given by B in the form of the liability assumed by B ($20,000). The excess of the liability assumed by C over the liability assumed by B, $10,000, is treated as ‘‘money or other property.’’ See §1.1031(b)–1(c). Thus, B recognizes gain under section 1031(b) in the amount of $10,000. Under section 1031(d), B’s basis in real property V is $40,000 (i.e., B’s basis in real property X ($40,000), decreased in the amount of money that B is treated as receiving in the form of the liability assumed by C ($30,000), increased in the amount of money that B is treated as paying in the form of the liability assumed by B ($20,000), and increased in the amount of the gain recognized ($10,000) in the deferred exchange).

(k) *Definition of disqualified person.* (1) For purposes of this section, a disqualified person is a person described in paragraph (k)(2), (k)(3), or (k)(4) of this section.

(2) The person is the agent of the taxpayer at the time of the transaction. For this purpose, a person who has acted as the taxpayer’s employee, attorney, accountant, investment banker or broker, or real estate agent or broker within the 2-year period ending on the date of the transfer of the first of the relinquished properties is treated as an agent of the taxpayer at the time of the transaction. Solely for purposes of this paragraph (k)(2), performance of the following services will not be taken into account—

(i) Services for the taxpayer with respect to exchanges of property intended to qualify for nonrecognition of gain or loss under section 1031; and

(ii) Routine financial, title insurance, escrow, or trust services for the taxpayer by a financial institution, title insurance company, or escrow company.

(3) The person and the taxpayer bear a relationship described in either section 267(b) or section 707(b) (determined by substituting in each section ‘‘10 percent’’ for ‘‘50 percent’’ each place it appears).

(4) The person and a person described in paragraph (k)(2) of this section bear a relationship described in either section 267(b) or section 707(b) (determined by substituting in each section ''10 percent'' for ''50 percent'' each place it appears).

(5) This paragraph (k) may be illustrated by the following examples. Unless otherwise provided, the following facts are assumed: On May 1, 1991, B enters into an exchange agreement (as defined in paragraph (g)(4)(iii)(B) of this section) with C whereby B retains C to facilitate an exchange with respect to real property X. On May 17, 1991, pursuant to the agreement, B executes and delivers to C a deed conveying real property X to C. C has no relationship to B described in paragraph (k)(2), (k)(3), or (k)(4) of this section.

Example 1. (i) C is B's accountant and has rendered accounting services to B within the 2-year period ending on May 17, 1991, other than with respect to exchanges of property intended to qualify for nonrecognition of gain or loss under section 1031.

(ii) C is a disqualified person because C has acted as B's accountant within the 2-year period ending on May 17, 1991.

(iii) If C had not acted as B's accountant within the 2-year period ending on May 17, 1991, or if C had acted as B's accountant within that period only with respect to exchanges intended to qualify for nonrecognition of gain or loss under section 1031, C would not have been a disqualified person.

Example 2. (i) C, which is engaged in the trade or business of acting as an intermediary to facilitate deferred exchanges, is a wholly owned subsidiary of an escrow company that has performed routine escrow services for B in the past. C has previously been retained by B to act as an intermediary in prior section 1031 exchanges.

(ii) C is not a disqualified person notwithstanding the intermediary services previously provided by C to B (see paragraph (k)(2)(i) of this section) and notwithstanding the combination of C's relationship to the escrow company and the escrow services previously provided by the escrow company to B (see paragraph (k)(2)(ii) of this section).

Example 3. (i) C is a corporation that is only engaged in the trade or business of acting as an intermediary to facilitate deferred exchanges. Each of 10 law firms owns 10 percent of the outstanding stock of C. One of the 10 law firms that owns 10 percent of C is M. J is the managing partner of M and is the president of C. J, in his capacity as a partner in M, has also rendered legal advice to B within the 2-year period ending on May 17, 1991, on matters other than exchanges intended to qualify for nonrecognition of gain or loss under section 1031.

(ii) J and M are disqualified persons. C, however, is not a disqualified person because neither J nor M own, directly or indirectly, more than 10 percent of the stock of C. Similarly, J's participation in the management of C does not make C a disqualified person.

(l) [Reserved]

(m) *Definition of fair market value.* For purposes of this section, the fair market value of property means the fair market value of the property without regard to any liabilities secured by the property.

(n) *No inference with respect to actual or constructive receipt rules outside of section 1031.* The rules provided in this section relating to actual or constructive receipt are intended to be rules for determining whether there is actual or constructive receipt in the case of a deferred exchange. No inference is intended regarding the application of these rules for purposes of determining whether actual or constructive receipt exists for any other purpose.

(o) *Effective date.* This section applies to transfers of property made by a taxpayer on or after June 10, 1991. However, a transfer of property made by a taxpayer on or after May 16, 1990, but before June 10, 1991, will be treated as complying with section 1031 (a)(3) and this section if the deferred exchange satisfies either the provision of this section or the provisions of the notice of proposed rulemaking published in the FEDERAL REGISTER on May 16, 1990 (55 FR 20278).

[T.D. 8346, 56 FR 19938, May 1, 1991, as amended by T.D. 8535, 59 FR 18749, Apr. 20, 1994]

§ 1.1032–1 Disposition by a corporation of its own capital stock.

(a) The disposition by a corporation of shares of its own stock (including treasury stock) for money or other property does not give rise to taxable gain or deductible loss to the corporation regardless of the nature of the transaction or the facts and circumstances involved. For example, the receipt by a corporation of the subscription price of shares of its stock upon their original issuance gives rise to neither taxable gain nor deductible loss, whether the subscription or issue price be equal to, in excess of, or less than, the par or stated value of such stock. Also, the exchange or sale by a corporation of its own shares for money or other property does not result in taxable gain or deductible loss, even though the corporation deals in such shares as it might in the shares of another corporation. A transfer by a corporation of shares of its own stock (including treasury stock) as compensation for services is considered, for purposes of section 1032(a), as a disposition by the corporation of such shares for money or other property.

(b) Section 1032(a) does not apply to the acquisition by a corporation of shares of its own stock except where the corporation acquires such shares in exchange for shares of its own stock (including treasury stock). See paragraph (e) of §1.311–1, relating to treatment of acquisitions of a corporation's own stock. Section 1032(a) also does not relate to the tax treatment of the recipient of a corporation's stock.

(c) Where a corporation acquires shares of its own stock in exchange for shares of its own stock (including treasury stock) the transaction may qualify not only under section 1032(a), but also under section 368(a)(1)(E) (recapitalization) or section 305(a) (distribution of stock and stock rights).

(d) For basis of property acquired by a corporation in connection with a transaction to which section 351 applies or in connection with a reorganization, see section 362. For basis of property acquired by a corporation in a transaction to which section 1032 applies but which does not qualify under any other nonrecognition provision, see section 1012.

§1.1032–2 Disposition by a corporation of stock of a controlling corporation in certain triangular reorganizations.

(a) *Scope.* This section provides rules for certain triangular reorganizations described in §1.358–6(b) when the acquiring corporation (*S*) acquires property or stock of another corporation (*T*) in exchange for stock of the corporation (*P*) in control of *S*.

(b) *General nonrecognition of gain or loss.* For purposes of §1.1032–1(a), in the case of a forward triangular merger, a triangular C reorganization, or a triangular B reorganization (as described in §1.358–6(b)), *P* stock provided by *P* to *S*, or directly to *T* or *T*'s shareholders on behalf of *S*, pursuant to the plan of reorganization is treated as a disposition by *P* of shares of its own stock for *T*'s assets or stock, as applicable. For rules governing the use of *P* stock in a reverse triangular merger, see section 361.

(c) *Treatment of S. S* must recognize gain or loss on its exchange of *P* stock as consideration in a forward triangular merger, a triangular C reorganization, or a triangular B reorganization (as described in §1.358–6(b)), if *S* did not receive the *P* stock from *P* pursuant to the plan of reorganization. See §1.358–6(d) for the effect on *P*'s basis in its *S* or *T* stock, as applicable. For rules governing *S*'s use of *P* stock in a reverse triangular merger, see section 361.

(d) *Examples.* The rules of this section are illustrated by the following examples. For purposes of these examples, *P*, *S*, and *T* are domestic corporations, *P* and *S* do not file consolidated returns, *P* owns all of the only class of *S* stock, the *P* stock exchanged in the transaction satisfies the requirements of the applicable reorganization provisions, and the facts set forth the only corporate activity.

Example 1. Forward triangular merger solely for P stock. (a) *Facts. T* has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. Pursuant to a plan, *P* forms *S* by transferring $100 of *P* stock to *S* and *T* merges into *S*. In the merger, the *T* shareholders receive, in exchange for their *T* stock, the *P* stock that *P* transferred to *S*. The transaction is a reorganization to which sections 368(a)(1)(A) and (a)(2)(D) apply.

(b) *No gain or loss recognized on the use of P stock.* Under paragraph (b) of this section, the *P* stock provided by *P* pursuant to the plan of reorganization is treated for purposes of §1.1032–1(a) as disposed of by *P* for the *T* assets acquired by *S* in the merger. Consequently, neither *P* nor *S* has taxable gain or deductible loss on the exchange.

Example 2. Forward triangular merger solely for P stock provided in part by S. (a) *Facts. T* has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. *S* is an operating company with substantial assets that has been in existence for several years. *S* also owns *P* stock with a $20 adjusted basis and $30 fair market value. *S* acquired the *P* stock in an unrelated transaction several years before the reorganization. Pursuant to a plan, *P* transfers additional *P* stock worth $70 to *S* and *T* merges into *S*. In the merger, the *T* shareholders receive $100 of *P* stock ($70 of *P* stock provided by *P* to *S* as part of the plan and $30 of *P* stock held by *S* previously). The transaction is a reorganization to which sections 368(a)(1)(A) and (a)(2)(D) apply.

(b) *Gain or loss recognized by S on the use of its P* stock. Under paragraph (b) of this section, the $70 of *P* stock provided by *P* pursuant to the plan of reorganization is treated as disposed of by *P* for the *T* assets acquired by *S* in the merger. Consequently, neither *P* nor *S* has taxable gain or deductible loss on the exchange of those shares. Under paragraph (c) of this section, however, *S* recognizes $10 of gain on the exchange of its *P* stock in the reorganization because *S* did not receive the *P* stock from *P* pursuant to the plan of reorganization. See §1.358–6(d) for the effect on *P*'s basis in its *S* stock.

(e) *Effective date.* This section applies to triangular reorganizations occurring on or after December 23, 1994.

[T.D. 8648, 60 FR 66081, Dec. 21, 1995]

§1.1033(a)–1 Involuntary conversions; nonrecognition of gain.

(a) *In general.* Section 1033 applies to cases where property is compulsorily or involuntarily converted. An *involuntary conversion* may be the result of the destruction of property in whole or in part, the theft of property, the seizure of property, the requisition or condemnation of property, or the threat or imminence of requisition or condemnation of property. An *involuntary conversion* may be a conversion into similar property or into money or into dissimilar property. Section 1033 provides that, under certain specified circumstances, any gain which is realized from an involuntary conversion shall not be recognized. In cases where property is converted into other property similar or related in service or use to the converted property, no gain shall be recognized regardless of when the disposition of the converted property occurred and regardless of whether or not the taxpayer elects to have the gain not recognized. In other types of involuntary conversion cases, however, the proceeds arising from the disposition of the converted property must (within the time limits specified) be reinvested in similar property in order to avoid recognition of any gain realized. Section 1033 applies only with respect to gains; losses from involuntary conversions are recognized or not recognized without regard to this section.

(b) *Special rules.* For rules relating to the application of section 1033 to involuntary conversions of a principal residence with respect to which an election has been made under section 121 (relating to gain from sale or exchange of residence of individual who has attained age 65), see paragraph (g) of §1.121–5. For rules applicable to involuntary conversions of a principal residence occurring before January 1, 1951, see §1.1033(a)–3. For rules applicable to involuntary conversions of a principal residence occurring after December 31, 1950, and before January 1, 1954, see paragraph (h)(1) of §1.1034–1. For rules applicable to involuntary conversions of a personal residence occurring after December 31, 1953, see §1.1033(a)–3. For special rules relating to the election to have section 1034 apply to certain involuntary conversions of a principal reisdence occurring after December 31, 1957, see paragraph (h)(2) of §1.1034–1. For special rules relating to certain involuntary conversions of real property held either for productive use in trade or business or for investment and occurring after December 31, 1957, see §1.1033(g)–1. See also special rules applicable to involuntary conversions of property sold pursuant to reclamation laws, livestock destroyed by disease, and livestock sold on account of drought provided in §§1.1033(c)–1, 1.1033(d)–1, and 1.1033(e)–1, respectively. For rules relating to basis of property acquired through involuntary conversions, see §1.1033(b)–1. For determination of the period for which the taxpayer has held property acquired as a result of certain involuntary conversions, see section 1223 and regulations issued thereunder. For treatment of gains from involuntary conversions as capital gains in certain cases, see section 1231(a) and regulations issued thereunder. For portion of war loss recoveries treated as gain on involuntary conversion, see section 1332(b)(3) and regulations issued thereunder.

(Secs. 1033 (90 Stat. 1920, 26 U.S.C. 1033), and 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6856, 30 FR 13318, Oct. 20, 1965; T.D. 7625, 44 FR 31013, May 30, 1979; T.D. 7758, 46 FR 6925, Jan. 22, 1981]

§1.1033(a)–2 Involuntary conversion into similiar property, into money or into dissimilar property.

(a) *In general.* The term *disposition of the converted property* means the destruction, theft, seizure, requisition, or condemnation of the converted property, or the sale or exchange of such property under threat or imminence of requisition or condemnation.

(b) *Conversion into similar property.* If property (as a result of its destruction in whole or in part, theft, seizure, or requisition or condemnation or threat or imminence thereof) is compulsorily or involuntarily converted only into property similar or related in service or use to the property so converted, no gain shall be recognized. Such nonrecognition of gain is mandatory.

(c) *Conversion into money or into dissimilar property.* (1) If property (as a result of its destruction in whole or in part, theft, seizure, or requisition or condemnation or threat or imminence thereof) is compulsorily or involuntarily converted into money or into property not similar or related in service or use to the converted property, the gain, if any, shall be recognized, at the election of the taxpayer, only to the extent that the amount realized upon such conversion exceeds the cost of other property purchased by the taxpayer which is similar or related in service or use to the property so converted, or the cost of stock of a corporation owning such other property which is purchased by the taxpayer in the acquisition of control of such corporation, if the taxpayer purchased such other property, or such stock, for the purpose of replacing the property so converted and during the period specified in subparagraph (3) of this paragraph. For the purposes of section 1033, the term *control* means the ownership of stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of the corporation.

(2) All of the details in connection with an involuntary conversion of property at a gain (including those relating to the replacement of the converted property, or a decision not to replace, or the expiration of the period for replacement) shall be reported in the return for the taxable year or years in which any of such gain is realized. An election to have such gain recognized only to the extent provided in subparagraph (1) of this paragraph shall be made by including such gain in gross income for such year or years only to such extent. If, at the time of filing such a return, the period within which the converted property must be replaced has expired, or if such an election is not desired, the gain should be included in gross income for such year or years in the regular manner. A failure to so include such gain in gross income in the regular manner shall be deemed to be an election by the taxpayer to have such gain recognized only to the extent provided in subparagraph (1) of this paragraph even though the details in connection with the conversion are not reported in such return. If, after having made an election under section 1033(a)(2), the converted property is not replaced within the required period of time, or replacement is made at a cost lower than was anticipated at the time of the election, or a decision is made not to replace, the tax liability for the year or years for which the election was made shall be recomputed. Such recomputation should be in the form of an *amended return*. If a decision is made to make an election under section 1033(a)(2) after the filing of the return and the payment of the tax for the year or years in which any of the gain on an involuntary conversion is realized and before the expiration of the period within which the converted property must be replaced, a claim for credit or refund for such year or years should be filed. If the replacement of the converted property occurs in a year or years in which none of the gain on the conversion is realized, all of the details in connection with such replacement shall be reported in the return for such year or years.

(3) The period referred to in subparagraphs (1) and (2) of this paragraph is the period of time commencing with the date of the disposition of the converted property, or the date of the beginning of the threat or imminence of requisition or condemnation of the converted property, whichever is earlier, and ending 2 years (or, in the case of a disposition occurring before December 31, 1969, 1 year) after the close of the first taxable year in which any part of the gain upon the conversion is realized, or at the close of such later date as may be designated pursuant to an application of the taxpayer. Such application shall be made prior to the expiration of 2 years (or, in the case of a disposition occurring before December 31, 1969, 1 year) after the close of the first taxable year in which any part of the gain from the conversion is realized, unless the taxpayer can show to the satisfaction of the district director—

(i) Reasonable cause for not having filed the application within the required period of time, and

(ii) The filing of such application was made within a reasonable time after the expiration of the required period of time. The application shall contain all of the details in connection with the involuntary conversion. Such application shall be made to the district director for the internal revenue district in which the return is filed for the first taxable year in which any of the gain from the involuntary conversion is realized. No extension of time shall be granted pursuant to such application unless the taxpayer can show reasonable cause for not being able to replace the converted property within the required period of time.

See section 1033(g)(4) and § 1.1033(g)–1 for the circumstances under which, in the case of the conversion of real property held either for productive use in trade or business or for investment, the 2-year period referred to in this paragraph (c)(3) shall be extended to 3 years.

(4) Property or stock purchased before the disposition of the converted property shall be considered to have been purchased for the purpose of replacing the converted property only if such property or stock is held by the taxpayer on the date of the disposition of the converted property. Property or stock shall be considered to have been purchased only if, but for the provisions of section 1033(b), the unadjusted basis of such property or stock would be its cost to the taxpayer within the meaning of section 1012. If the taxpayers unadjusted basis of the replacement property would be determined, in the absence of section 1033(b), under any of the exceptions referred to in section 1012, the unadjusted basis of the property would not be its cost within the meaning of section 1012. For example, if property similar or related in service or use to the converted property is acquired by gift and its basis is determined under section 1015, such property will not qualify as a replacement for the converted property.

(5) If a taxpayer makes an election under section 1033(a)(2), any deficiency, for any taxable year in which any part of the gain upon the conversion is realized, which is attributable to such gain may be assessed at any time before the expiration of three years from the date the district director with whom the return for such year has been filed is notified by the taxpayer of the replacement of the converted property or of an intention not to replace, or of a failure to replace, within the required period, notwithstanding the provisions of section 6212(c) or the provisions of any other law or rule of law which would otherwise prevent such assessment. If replacement has been made, such notification shall contain all of the details in connection with such replacement. Such notification should be made in the return for the taxable year or years in which the replacement occurs, or the intention not to replace is formed, or the period for replacement expires, if this return is filed with such district director. If this return is not filed with such district director, then such notification shall be made to such district director at the time of filing this return. If the taxpayer so desires, he may, in either event, also notify such district director before the filing of such return.

(6) If a taxpayer makes an election under section 1033(a)(2) and the replacement property or stock was purchased before the beginning of the last taxable

year in which any part of the gain upon the conversion is realized, any deficiency, for any taxable year ending before such last taxable year, which is attributable to such election may be assessed at any time before the expiration of the period within which a deficiency for such last taxable year may be assessed, notwithstanding the provisions of section 6212(c) or 6501 or the provisions of any law or rule of law which would otherwise prevent such assessment.

(7) If the taxpayer makes an election under section 1033(a)(2), the gain upon the conversion shall be recognized to the extent that the amount realized upon such conversion exceeds the cost of the replacement property or stock, regardless of whether such amount is realized in one or more taxable years.

(8) The proceeds of a use and occupancy insurance contract, which by its terms insured against actual loss sustained of net profits in the business, are not proceeds of an involuntary conversion but are income in the same manner that the profits for which they are substituted would have been.

(9) There is no investment in property similar in character and devoted to a similar use if—

(i) The proceeds of unimproved real estate, taken upon condemnation proceedings, are invested in improved real estate.

(ii) The proceeds of conversion of real property are applied in reduction of indebtedness previously incurred in the purchase or a leasehold.

(iii) The owner of a requisitioned tug uses the proceeds to buy barges.

(10) If, in a condemnation proceeding, the Government retains out of the award sufficient funds to satisfy special assessments levied against the remaining portion of the plot or parcel of real estate affected for benefits accruing in connection with the condemnation, the amount so retained shall be deducted from the gross award in determining the amount of the net award.

(11) If, in a condemnation proceeding, the Government retains out of the award sufficient funds to satisfy liens (other than liens due to special assessments levied against the remaining portion of the plot or parcel of real estate affected for benefits accruing in connection with the condemnation) and mortgages against the property, and itself pays the same, the amount so retained shall not be deducted from the gross award in determining the amount of the net award. If, in a condemnation proceeding, the Government makes an award to a mortgagee to satisfy a mortgage on the condemned property, the amount of such award shall be considered as a part of the *amount realized* upon the conversion regardless of whether or not the taxpayer was personally liable for the mortgage debt. Thus, if a taxpayer has acquired property worth $100,000 subject to a $50,000 mortgage (regardless of whether or not he was personally liable for the mortgage debt) and, in a condemnation proceeding, the Government awards the taxpayer $60,000 and awards the mortgagee $50,000 in satisfaction of the mortgage, the entire $110,000 is considered to be the *amount realized* by the taxpayer.

(12) An amount expended for replacement of an asset, in excess of the recovery for loss, represents a capital expenditure and is not a deductible loss for income tax purposes.

(Secs. 1033 (90 Stat. 1920, 26 U.S.C. 1033), and 7805 (68A Stat. 917, 26 U.S.C. 7805)

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6679, 28 FR 10515, Oct. 1, 1963; T.D. 7075, 35 FR 17996, Nov. 24, 1970; T.D. 7625, 44 FR 31013, May 30, 1979; T.D. 7758, 46 FR 6925, Jan. 22, 1981]

§1.1033(a)–3 Involuntary conversion of principal residence.

Section 1033 shall apply in the case of property used by the taxpayer as his principal residence if the destruction, theft, seizure, requisition, or condemnation of such residence, or the sale or exchange of such residence under threat or imminence thereof, occurs before January 1, 1951, or after December 31, 1953. However, section 1033 shall not apply to the seizure, requisition, or condemnation (but not destruction), or the sale or exchange under threat or imminence thereof, of such residence property if the seizure, requisition, condemnation, sale, or exchange occurs after December 31, 1957, and if the taxpayer properly elects under section 1034(i) to treat the transaction as a sale (see paragraph (h)(2)(ii) of §1.1034–1). See section 121 and paragraphs (d) and (g) of §1.121–5 for special rules relating to the involuntary conversion of a principal residence of individuals who have attained age 65.

[T.D. 6856, 30 FR 13319, Oct. 20, 1965. Redesignated and amended by T.D. 7625, 44 FR 31013, May 30, 1979]

§1.1033(b)–1 Basis of property acquired as a result of an involuntary conversion.

(a) The provisions of the first sentence of section 1033(b) may be illustrated by the following example:

Example: A's vessel which has an adjusted basis of $100,000 is destroyed in 1950 and A receives in 1951 insurance in the amount of $200,000. If A invests $150,000 in a new vessel, taxable gain to the extent of $50,000 would be recognized. The basis of the new vessel is $100,000; that is, the adjusted basis of the old vessel ($100,000) minus the money received by the taxpayer which was not expended in the acquisition of the new vessel ($50,000) plus the amount of gain recognized upon the conversion ($50,000). If any amount in excess of the proceeds of the conversion is expended in the acquisition of the new property, such amount may be added to the basis otherwise determined.

(b) The provisions of the last sentence of section 1033(b) may be illustrated by the following example:

Example: A taxpayer realizes $22,000 from the involuntary conversion of his barn in 1955; the adjusted basis of the barn to him was $10,000, and he spent in the same year $20,000 for a new barn which resulted in the nonrecognition of $10,000 of the $12,000 gain on the conversion. The basis of the new barn to the taxpayer would be $10,000—the cost of the new barn ($20,000) less the amount of the gain not recognized on the conversion ($10,000). The basis of the new barn would not be a substituted basis in the hands of the taxpayer within the meaning of section 1016(b)(2). If the replacement of the converted barn had been made by the purchase of two smaller barns which, together, were similar or related in service or use to the converted barn and which cost $8,000 and $12,000, respectively, then the basis of the two barns would be $4,000 and $6,000, respectively, the total basis of the purchased property ($10,000) allocated in proportion to their respective costs (8,000/ 20,000 of $10,000 or $4,000; and 12,000/20,000 of $10,000, or $6,000).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated and amended by T.D. 7625, 44 FR 31013, May 30, 1979]

§1.1033(c)–1 Disposition of excess property within irrigation project deemed to be involuntary conversion.

(a) The sale, exchange, or other disposition occurring in a taxable year to which the Internal Revenue Code of 1954 applies, of excess lands lying within an irrigation project or division in order to conform to acreage limitations of the Federal reclamation laws effective with respect to such project or division shall be treated as an involuntary conversion to which the provisions of section 1033 and the regulations thereunder shall be applicable. The term *excess lands* means irrigable lands within an irrigation project or division held by one owner in excess of the amount of irrigable land held by such owner entitled to receive water under the Federal reclamation laws applicable to such owner in such project or division. Such excess lands may be either (1) lands receiving no water from the project or division, or (2) lands receiving water only because the owner thereof has executed a valid recordable contract agreeing to sell such lands under terms and conditions satisfactory to the Secretary of the Interior.

(b) If a disposition in order to conform to the acreage limitation provisions of Federal reclamation laws includes property other than excess lands (as, for example, where the excess lands alone do not constitute a marketable parcel) the provisions of section 1033(d) shall apply only to the part of the disposition that relates to excess lands.

(c) The provisions of §1.1033(a)–2 shall be applicable in the case of dispositions treated as involuntary conversions under this section. The details in connection with such a disposition required to be reported under paragraph (c)(2) of §1.1033(a)–2 shall include the authority whereby the lands disposed of are considered *excess lands*, as defined in this section, and a statement that such disposition is not part of a plan contemplating the disposition of all or any nonexcess land within the irrigation project or division.

(d) The term *involuntary conversion,* where it appears in subtitle A of the Code or the regulations thereunder, includes dispositions of excess property within irrigation projects described in this section. (See, e.g., section 1231 and the regulations thereunder.)

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated and amended by T.D. 7625, 44 FR 31013, May 30, 1979]

§1.1033(d)–1 Destruction or disposition of livestock because of disease.

(a) The destruction occurring in a taxable year to which the Internal Revenue Code of 1954 applies, of livestock by, or on account of, disease, or the sale or exchange, in such a year, of livestock because of disease, shall be treated as an involuntary conversion to which the provisions of section 1033 and the regulations thereunder shall be applicable. Livestock which are killed either because they are diseased or because of exposure to disease shall be considered destroyed on account of disease. Livestock which are sold or exchanged because they are diseased or have been exposed to disease, and would not otherwise have been sold or exchanged at that particular time shall be considered sold or exchanged because of disease.

(b) The provisions of §1.1033(a)–2 shall be applicable in the case of a disposition treated as an involuntary conversion under this section. The details in connection with such a disposition required to be reported under paragraph (c)(2) of §1.1033(a)–2 shall include a recital of the evidence that the livestock were destroyed by or on account of disease, or sold or exchanged because of disease.

(c) The term *involuntary conversion,* where it appears in subtitle A of the Code or the regulations thereunder, includes disposition of livestock described in this section. (See, e.g., section 1231 and the regulations thereunder.)

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated by T.D. 7625, 44 FR 31013, May 30, 1979]

§1.1033(e)–1 Sale or exchange of livestock solely on account of drought.

(a) The sale or exchange of livestock (other than poultry) held for draft, breeding, or dairy purposes in excess of the number the taxpayer would sell or exchange during the taxable year if he followed his usual business practices shall be treated as an involuntary conversion to which section 1033 and the regulations thereunder are applicable if the sale or exchange of such livestock by the taxpayer is solely on account of drought. Section 1033(e) and this section shall apply only to sales and exchanges occurring after December 31, 1955.

(b) To qualify under section 1033(e) and this section, the sale or exchange of the livestock need not take place in a drought area. While it is not necessary that the livestock be held in a drought area, the sale or exchange of the livestock must be solely on account of drought conditions the existence of which affected the water, grazing, or other requirements of the livestock so as to necessitate their sale or exchange.

(c) The total sales or exchanges of livestock held for draft, breeding, or dairy purposes occurring in any taxable year which may qualify as an involuntary conversion under section 1033(e) and this section is limited to the excess of the total number of such livestock sold or exchanged during the taxable year over the number that the taxpayer would have sold or exchanged if he had followed his usual business practices, that is, the number he would have been expected to sell or exchange under ordinary circumstances if there had been no drought. For example, if in the past it has been a taxpayer's practice to sell or exchange annually one-half of his herd of dairy cows, only the number sold or exchanged solely on account of drought conditions which is in excess of one-half of his herd, may qualify as an involuntary conversion under section 1033(e) and this section.

(d) The replacement requirements of section 1033 will be satisfied only if the livestock sold or exchanged is replaced within the prescribed period with livestock which is similar or related in service or use to the livestock sold or exchanged because of drought, that is, the new livestock must be functionally the same as the livestock involuntarily converted. This means that the new livestock must be held for the same useful purpose as the old was held. Thus, although dairy cows could be replaced by dairy cows, a taxpayer could not replace draft animals with breeding or dairy animals.

(e) The provisions of § 1.1033(a)–2 shall be applicable in the case of a sale or exchange treated as an involuntary conversion under this section. The details in connection with such a disposition required to be reported under paragraph (c)(2) of § 1.1033(a)–2 shall include:

(1) Evidence of the existence of the drought conditions which forced the sale or exchange of the livestock;

(2) A computation of the amount of gain realized on the sale or exchange;

(3) The number and kind of livestock sold or exchanged; and

(4) The number of livestocks of each kind that would have been sold or exchanged under the usual business practice in the absence of the drought.

(f) The term *involuntary conversion,* where it appears in subtitle A of the Code or the regulations thereunder, includes the sale or exchange of livestock described in this section.

(g) The provisions of section 1033(e) and this section apply to taxable years ending after December 31, 1955, but only in the case of sales or exchange of livestock after December 31, 1955.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated by T.D. 7625, 44 FR 31013, May 30, 1979]

§ 1.1033(g)–1 Condemnation of real property held for productive use in trade or business or for investment.

(a) *Special rule in general.* This section provides special rules for applying section 1033 with respect to certain dispositions, occurring after December 31, 1957, of real property held either for productive use in trade or business or for investment (not including stock in trade or other property held primarily for sale). For this purpose, disposition means the seizure, requisition, or condemnation (but not destruction) of the converted property, or the sale or exchange of such property under threat or imminence of seizure, requisition, or condemnation. In such cases, for purposes of applying section 1033, the replacement of such property with property of like kind to be held either for productive use in trade or business or for investment shall be treated as property similar or related in service or use to the property so converted. For principles in determining whether the replacement property is property of like kind, see paragraph (b) of § 1.1031(a)–1.

(b) *Election to treat outdoor advertising displays as real property*—(1) *In general.* Under section 1033(g)(3) of the Code, a taxpayer may elect to treat property which constitutes an outdoor advertising display as real property for purposes of chapter 1 of the Code. The election is available for taxable years beginning after December 31, 1970. In the case of an election made on or before July 21, 1981, the election is available whether or not the period for filing a claim for credit or refund under section 6511 has expired. No election may be made with respect to any property for which (i) the investment credit under section 38 has been claimed, or (ii) an election to expense certain depreciable business assets under section 179(a) is in effect. The election once made applies to all outdoor advertising displays of the taxpayer which may be made the subject of an election under this paragraph, including all outdoor advertising displays acquired or constructed by the taxpayer in a taxable year after the taxable year for which the election is made. The election applies with respect to dispositions during the taxable year for which made and all subsequent taxable years (unless an effective revocation is made pursuant to paragraph (b)(2) (ii) or (iii)).

(2) *Election*—(i) *Time and manner of making election*—(A) *In general.* Unless otherwise provided in the return or in the instructions for a return for a taxable year, any election made under section 1033(g)(3) shall be made by attaching a statement to the return (or amended return if filed on or before July 21, 1981) for the first taxable year to which the election is to apply. Any election made under this paragraph must be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for such taxable year or July 21, 1981, whichever occurs last. If a taxpayer makes an election (or revokes an election under subdivision (ii) or (iii) of this subparagraph (b) (2)) for a taxable

year for which he or she has previously filed a return, the return for that taxable year and all other taxable years affected by the election (or revocation) must be amended to reflect any tax consequences of the election (or revocation). However, no return for a taxable year for which the period for filing a claim for credit or refund under section 6511 has expired may be amended to make any changes other than those resulting from the election (or revocation). In order for the election (or revocation) to be effective, the taxpayer must remit with the amended return any additional tax due resulting from the election (or revocation), notwithstanding the provisions of section 6212(c) or 6501 or the provisions of any other law which would prevent assessment or collection of such tax.

(B) *Statement required when making election.* The statement required when making the election must clearly indicate that the election to treat outdoor advertising displays as real property is being made.

(ii) *Revocation of election by Commissioner's consent.* Except as otherwise provided in paragraph (b)(2)(iii) of this section, an election under section 1033(g)(3) shall be irrevocable unless consent to revoke is obtained from the Commissioner. In order to secure the Commissioner's consent to revoke an election, the taxpayer must file a request for revocation of election with the Commissioner of Internal Revenue, Washington, DC 20224. The request for revocation shall include—

(A) The taxpayer's name, address, and taxpayer identification number,

(B) The date on which and taxable year for which the election was made and the Internal Revenue Service office with which it was filed,

(C) Identification of all outdoor advertising displays of the taxpayer to which the revocation would apply (including the location, date of purchase, and adjusted basis in such property),

(D) The effective date desired for the revocation, and

(E) The reasons for requesting the revocation.

The Commissioner may require such other information as may be necessary in order to determine whether the requested revocation will be permitted. The Commissioner may prescribe administrative procedures (subject to such limitations, terms and conditions as he deems necessary) to obtain his consent to permit the taxpayer to revoke the election. The taxpayer may submit a request for revocation for any taxable year for which the period of limitations for filing a claim for credit or refund or overpayment of tax has not expired.

(iii) *Revocation where election was made on or before December 11, 1979.* In the case of an election made on or before December 11, 1979, the taxpayer may revoke such election provided such revocation is made not later than March 23, 1981. The request for revocation shall be made in conformity with the requirements of paragraph (b)(2)(ii), except that, in lieu of the information required by paragraph (b)(2)(ii)(E), the taxpayer shall state that the revocation is being made pursuant to this paragraph. In addition, the taxpayer must forward, with the statement of revocation, copies of his or her tax returns, including both the original return and any amended returns, for the taxable year in which the original election was made and for all subsequent years and must remit any additional tax due as a result of the revocation.

(3) *Definition of outdoor advertising display.* The term *outdoor advertising display* means a rigidly assembled sign, display, or device that constitutes, or is used to display, a commercial or other advertisement to the public and is permanently affixed to the ground or permanently atttached to a building or other inherently permanent structure. The term includes highway billboards affixed to the ground with wood or metal poles, pipes, or beams, with or without concrete footings.

(4) *Character of replacement property.* For purposes of section 1033(g), an interest in real property purchased as replacement property for a compulsorily or involuntarily converted outdoor advertising display (with respect to which an election under this section is in effect) shall be considered property of a like kind as the property converted even though a taxpayer's interest in the replacement property is different from the interest held in the

property converted. Thus, for example, a fee simple interest in real estate acquired to replace a converted billboard and a 5-year leasehold interest in the real property on which the billboard was located qualifies as property of a like kind under this section.

(c) *Special rule for period within which property must be replaced.* In the case of a disposition described in paragraph (a) of this section, section 1033(a)(2)(B) and § 1.1033(a)–2(c)(3) (relating to the period within which the property must be replaced) shall be applied by substituting 3 years for 2 years. This paragraph shall apply to any disposition described in section 1033(f)(1) and paragraph (a) of this section occurring after December 31, 1974, unless a condemnation proceeding with respect to the property was begun before October 4, 1976. Thus, regardless of when the property is disposed of, the taxpayer will not be eligible for the 3-year replacement period if a condemnation proceeding was begun before October 4, 1976. However, if the property is disposed of after December 31, 1974, and the condemnation proceeding was begun (if at all) after October 4, 1976, then the taxpayer is eligible for the 3-year replacement period. For the purposes of this paragraph, whether a condemnation proceeding is considered as having begun is determined under the applicable State or Federal procedural law.

(d) *Limitation on application of special rule.* This section shall not apply to the purchase of stock in the acquisition of control of a corporation described in section 1033(a)(2)(A).

(Secs. 1033 (90 Stat. 1920, 26 U.S.C. 1033), and 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated and amended by T.D. 7625, 44 FR 31013, May 30, 1979; 44 FR 38458, July 2, 1979. Further redesignated and amended by T.D. 7758, 46 FR 6925, Jan. 22, 1981; T.D. 7758, 46 FR 23235, Apr. 24, 1981; T.D. 8121, 52 FR 414, Jan. 6, 1987]

§ 1.1033(h)–1 Effective date.

Except as provided otherwise in § 1.1033(e)–1 and § 1.1033(g)–1, the provisions of section 1033 and the regulations thereunder are effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(Secs. 1033 (90 Stat. 1920, 26 U.S.C. 1033), and 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960. Redesignated and amended by T.D. 7625, 44 FR 31013, May 30, 1979. Further redesignated and amended by T.D. 7758, 46 FR 6925, Jan. 22, 1981]

§ 1.1034–1 Sale or exchange of residence.

(a) *Nonrecognition of gain; general statement.* Section 1034 provides rules for the nonrecognition of gain in certain cases where a taxpayer sells one residence after December 31, 1953, and buys or builds, and uses as his principal residence, another residence within specified time limits before or after such sale. In general, if the taxpayer invests in a new residence an amount at least as large as the adjusted sales price of his old residence, no gain is recognized on the sale of the old residence (see paragraph (b) of this section for definitions of *adjusted sales price, new residence,* and *old residence*). On the other hand, if the new residence costs the taxpayer less than the adjusted sales price of the old residence, gain is recognized to the extent of the difference. Thus, if an amount equal to or greater than the adjusted sales price of an old residence is invested in a new residence, according to the rules stated in section 1034, none of the gain (if any) realized from the sale shall be recognized. If an amount less than such adjusted sales price is so invested, gain shall be recognized, but only to the extent provided in section 1034. If there is no investment in a new residence, section 1034 is inapplicable and all of the gain shall be recognized. Whenever, as a result of the application of section 1034, any or all of the gain realized on the sale of an old residence is not recognized, a corresponding reduction must be made in the basis of the new residence. The provisions of section 1034 are mandatory, so that the taxpayer cannot elect to have gain recognized under circumstances where this section is applicable. Section 1034 applies only to gains; losses are recognized or not recognized without regard to the provisions of this section. Section 1034 affects only the amount of gain recognized, and not the amount of gain realized (see also section 1001 and the regulations issued thereunder). Any gain realized upon disposition of other property in exchange for the new residence is not affected by section 1034. For special rules relating to the sale or exchange of a principal residence by a taxpayer who has attained age 65, see section 121 and paragraph (g) of §1.121–5. For special rules relating to a case where real property with respect to the sale of which gain is not recognized under this section is reacquired by the seller in partial or full satisfaction of the indebtedness arising from such sale and resold by him within 1 year after the date of such reacquisition, see §1.1038–2.

(b) *Definitions.* The following definitions of frequently used terms are applicable for purposes of section 1034 (other definitions and detailed explanations appear in subsequent paragraphs of this regulation):

(1) *Old residence* means property used by the taxpayer as his principal residence which is the subject of a sale by him after December 31, 1953 (section 1034(a); for detailed explanation see paragraph (c)(3) of this section).

(2) *New residence* means property used by the taxpayer as his principal residence which is the subject of a purchase by him (section 1034(a); for detailed explanation and limitations see paragraphs (c)(3) and (d)(1) of this section).

(3) *Adjusted sales price* means the amount realized reduced by the fixing-up expenses (section 1034(b)(1); for special rule applicable in some cases to husband and wife, see paragraph (f) of this section).

(4) *Amount realized* is to be computed by subtracting,

(i) The amount of the items which, in determining the gain from the sale of the old residence, are properly an offset against the consideration received upon the sale (such as commissions and expenses of advertising the property for sale, of preparing the deed, and of other legal services in connection with the sale); from

(ii) The amount of the consideration so received, determined (in accordance with section 1001(b) and regulations issued thereunder) by adding to the sum of any money so received, the fair market value of the property (other than money) so received. If, as part of the consideration for the sale, the purchaser either assumes a liability of the taxpayer or acquires the old residence subject to a liability (whether or not the taxpayer is personally liable on the debt), such assumption or acquisition, in the amount of the liability, shall be treated as money received by the taxpayer in computing the *amount realized.*

(5) *Gain realized* is the excess (if any) of the amount realized over the adjusted basis of the old residence (see also section 1001(a) and regulations issued thereunder).

(6) *Fixing-up expenses* means the aggregate of the expenses for work performed (in any taxable year, whether beginning before, on, or after January 1, 1954) on the old residence in order to assist in its sale, provided that such expenses (i) are incurred for work performed during the 90-day period ending on the day on which the contract to sell the old residence is entered into; and (ii) are paid on or before the 30th day after the date of the sale of the old residence; and (iii) are neither (a) allowable as deductions in computing taxable income under section 63(a), nor (b) taken into account in computing the amount realized from the sale of the old residence (section 1034(b) (2) and (3)). *Fixing-up expenses* does not include expenditures which are properly chargeable to capital account and which would, therefore, constitute adjustments to the basis of the old residence (see section 1016 and regulations issued thereunder).

(7) *Cost of purchasing the new residence* means the total of all amounts which are attributable to the acquisition, construction, reconstruction, and improvements constituting capital expenditures, made during the period beginning 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) before the date of sale of the old residence and ending either (i) 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after such date in the case of a new residence purchased but not constructed by the taxpayer, or (ii) two years (18 months in the case of a sale of an old residence prior to January 1,

1975) after such date in the case of a new residence the construction of which was commenced by the taxpayer before the expiration of 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after such date (section 1034(a), (c)(2) and (c)(5); for detailed explanation, see paragraph (c)(4) of this section; for special rule applicable in some cases to husband and wife, see paragraph (f) of this section; see also paragraph (b)(9) of this section for definition of *purchase*).

(8) *Sale* (of a residence) means a sale or an exchange (of a residence) for other property which occurs after December 31, 1953, an involuntary conversion (of a residence) which occurs after December 31, 1950, and before January 1, 1954, or certain involuntary conversions where the disposition of the property occurs after December 31, 1957, in respect of which a proper election is made under section 1034(i)(2) (see sections 1034(c)(1), 1034(i)(1)(A), and 1034(i)(2); for detailed explanation concerning involuntary conversions, see paragraph (h) of this section).

(9) *Purchase* (of a residence) means a purchase or an acquisition (of a residence) on the exchange of property or the partial or total construction or reconstruction (of a residence) by the taxpayer (section 1034(c) (1) and (2)). However, the mere improvement of a residence, not amounting to reconstruction, does not constitute *purchase* of a residence.

(c) *Rules for application of section 1034*—(1) *General rule; limitations on applicability.* Gain realized from the sale (after December 31, 1953) of an old residence will be recognized only to the extent that the taxpayer's adjusted sales price of the old residence exceeds the taxpayer's cost of purchasing the new residence, provided that the taxpayer either (i) within a period beginning 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) before the date of such sale and ending 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after such date purchases property and uses it as his principal residence, or (ii) within a period beginning 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) before the date of such sale and ending two years (18 months in the case of a sale of an old residence prior to January 1, 1975) after such date uses as his principal residence a new residence the construction of which was commenced by him at any time before the expiration of 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after the date of the sale of the old residence (section 1034 (a) and (c)(5); for detailed explanation of use as *principal residence* see subparagraph (3) of this paragraph). The rule stated in the preceding sentence applies to a new residence purchased by the taxpayer before the date of sale of the old residence provided the new residence is still owned by him on such date (section 1034(c)(3)). Whether the construction of a new residence was commenced by the taxpayer before the expiration of 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after the date of the sale of the old residence will depend upon the facts and circumstances of each case. Section 1034 is not applicable to the sale of a residence if within the previous 18 months (previous year in the case of a sale of an old residence prior to January 1, 1975) the taxpayer made another sale of residential property on which gain was realized but not recognized (section 1034(d)). For further details concerning limitations on the application of section 1034, see paragraph (d) of this section.

(2) *Computation and examples.* In applying the general rule stated in subparagraph (1) of this paragraph, the taxpayer should first subtract the commissions and other selling expenses from the selling price of his old residence, to determine the amount realized. A comparison of the amount realized with the cost or other basis of the old residence will then indicate whether there is any gain realized on the sale. Unless the amount realized is greater than the cost or other basis, no gain is realized and section 1034 does not apply. If the amount realized exceeds the cost or other basis, the amount of such excess constitutes the gain realized. The amount realized should then be reduced by the fixing-up expenses (if any), to determined the adjusted sales price. A comparison of the adjusted sales price of the old residence

with the cost of purchasing the new residence will indicate how much (if any) of the realized gain is to be recognized. If the cost of purchasing the new residence is the same as, or greater than, the adjusted sales price of the old residence, then none of the realized gain is to be recognized. On the other hand, if the cost of purchasing the new residence is smaller than the adjusted sales price of the old residence, the gain realized, all of the gain realized is to be recognized to the extent of the difference. It should be noted that any amount of gain realized but not recognized is to be applied as a downward adjustment to the basis of the new residence (for details see paragraph (e) of this section).) The application of the general rule stated above may be illustrated by the following examples:

Example 1. A taxpayer decides to sell his residence, which has a basis of $17,500. To make it more attractive to buyers, he paints the outside at a cost of $300 in April, 1954. He pays for the painting when the work is finished. In May, 1954, he sells the house for $20,000. Brokers' commissions and other selling expenses are $1,000. In October, 1954, the taxpayer buys a new residence for $18,000. The amount realized, the gain realized, the adjusted sales price, and the gain to be recognized are computed as follows:

Selling price	$20,000
Less: Commissions and other selling expenses	1,000
Amount realized	19,000
Less: Basis	17,500
Gain realized	1,500
Amount realized	19,000
Less: Fixing-up expenses	300
Adjusted sales price	18,700
Cost of purchasing new residence	18,000
Gain recognized	700
Gain realized but not recognized	800
Adjusted basis of new residence (see paragraph (e) of this section)	17,200

Example 2. The facts are the same as in example (1), except that the selling price of the old residence is $18,500. The computations are as follows:

Selling price	$18,500
Less: Commissions and other selling expenses	1,000
Amount realized	17,500
Less: Basis	17,500
Gain realized	0

NOTE: Since no gain is realized, section 1034 is inapplicable; it is, therefore, unnecessary to compute the adjusted sales price of the old residence and compare it with the cost of purchasing the new residence. No adjustment to the basis of the new residence is to be made.

Example 3. The facts are the same as in example (1), except that the cost of purchasing the new residence is $17,000. The computations are as follows:

Selling price	$20,000
Less: Commissions and other selling expenses	1,000
Amount realized	19,000
Less: Basis	17,500
Gain realized	1,500
Amount realized	19,000
Less: Fixing-up expenses	300
Adjusted sales price	18,700
Cost of purchasing the new residence	17,000
Gain recognized	1,500

NOTE: Since the adjusted sales price of the old residence exceeds the cost of purchasing the new residence by $1,700, which is more than the gain realized, all of the gain realized is recognized. No adjustment to the basis of the new residence is to be made.

Gain realized but not recognized	$0

Example 4. The facts are the same as in example (1), except that the fixing-up expenses are $1,100. The computations are as follows:

Selling price	$20,000
Less: Commissions and other selling expenses	1,000
Amount realized	19,000
Less: Basis	17,500
Gain realized	1,500
Amount realized	19,000
Less: Fixing-up expenses	1,100
Adjusted sales price	17,900
Cost of purchasing the new residence	18,000
Gain recognized	0

NOTE: Since the cost of purchasing the new residence exceeds the adjusted sales price, none of the gain realized is recognized.

Gain realized but not recognized	$1,500
Adjusted basis of new residence (see paragraph (e) of this section)	16,500

(3) *Property used by the taxpayer as his principal residence.* (i) Whether or not property is used by the taxpayer as his residence, and whether or not property is used by the taxpayer as his principal residence (in the case of a taxpayer using more than one property as a residence), depends upon all the facts and circumstances in each case, including the good faith of the taxpayer. The mere fact that property is, or has been, rented is not determinative that such property is not used by the taxpayer as

his principal residence. For example, if the taxpayer purchases his new residence before he sells his old residence, the fact that he temporarily rents out the new residence during the period before he vacates the old residence may not, in the light of all the facts and circumstances in the case, prevent the new residence from being considered as property used by the taxpayer as his principal residence. Property used by the taxpayer as his principal residence may include a houseboat, a house trailer, or stock held by a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216(b) (1) and (2)), if the dwelling which the taxpayer is entitled to occupy as such stockholder is used by him as his principal residence (section 1034(f)). Property used by the taxpayer as his principal residence does not include personal property such as a piece of furniture, a radio, etc., which, in accordance with the applicable local law, is not a fixture.

(ii) Where part of a property is used by the taxpayer as his principal residence and part is used for other purposes, an allocation must be made to determine the application of this section. If the old residence is used only partially for residential purposes, only that part of the gain allocable to the residential portion is not to be recognized under this section and only an amount allocable to the selling price of such portion need be invested in the new residence in order to have the gain allocable to such portion not recognized under this section. If the new residence is used only partially for residential purposes only so much of its cost as is allocable to the residential portion may be counted as the cost of purchasing the new residence.

(4) *Cost of purchasing new residence.* (i) The taxpayer's cost of purchasing the new residence includes not only cash but also any indebtedness to which the property purchased is subject at the time of purchase whether or not assumed by the taxpayer (including purchase-money mortgages, etc.) and the face amount of any liabilities of the taxpayer which are part of the consideration for the purchase. Commissions and other purchasing expenses paid or incurred by the taxpayer on the purchase of the new residence are to be included in determining such cost. In the case of an acquisition of a residence upon an exchange which is considered as a *purchase* under this section, the fair market value of the new residence on the date of the exchange shall be considered as the taxpayer's cost of purchasing the new residence. Where any part of the new residence is acquired by the taxpayer other than by *purchase,* the value of such part is not to be included in determining the taxpayer's cost of the new residence (see paragraph (b)(9) of this section for definition of *purchase*). For example, if the taxpayer acquires a residence by gift or inheritance, and spends $20,000 in reconstructing such residence, only such $20,000 may be treated as his cost of purchasing the new residence.

(ii) The taxpayer's cost of purchasing the new residence includes only so much of such cost as is attributable to acquisition, construction, reconstruction, or improvements made within the period of three years or 42 months (two years or 30 months in the case of a sale of an old residence prior to January 1, 1975), as the case may be, in which the purchase and use of the new residence must be made in order to have gain on the sale of the old residence not recognized under this section. Thus, if the construction of the new residence is begun three years before the date of sale of the old residence and completed on the date of sale of the old residence, only that portion of the cost which is attributable to the last 18 months (last year in the case of a sale of an old residence prior to January 1, 1975) of such construction constitutes the taxpayer's cost of purchasing the new residence, for purposes of section 1034. Furthermore, the taxpayer's cost of purchasing the new residence includes only such amounts as are properly chargeable to capital account rather than to current expense. As to what constitutes capital expenditures, see section 263.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example: M began the construction of a new residence on January 15, 1974, and completed it on October 14, 1974. The cost of $45,000 was incurred ratably over the 9-month period of construction. On December 14, 1975, M sold his old residence and realized a gain. In determining the extent to which the realized gain is not to be recognized under section 1034, M's cost of constructing the new residence shall include only the $20,000 which was attributable to the June 15—October 14, 1974, period (4 months at $5,000). The $25,000 balance of the cost of constructing the new residence was not attributable to the period beginning 18 months before the date of the sale of the old residence and ending two years after such date and, under section 1034, is not properly a part of M's cost of constructing the new residence.

(d) *Limitations on application of section 1034.* (1) If a residence is purchased by the taxpayer prior to the date of the sale of the old residence, the purchased residence shall, in no event, be treated as a new residence if such purchased residence is sold or otherwise disposed of by him prior to the date of the sale of the old residence (section 1034(c)(3)). And, if the taxpayer, during the period within which the purchase and use of the new residence must be made in order to have any gain on the sale of the old residence not recognized under this section, purchases more than one property which is used by him as his principal residence during the 18 months (or two years in the case of the construction of the new residence) succeeding the date of the sale of the old residence, only the last of such properties shall be considered a new residence (section 1034(c)(4)). In the case of a sale of an old residence prior to January 1, 1975, the period of 18 months (or two years) referred to in the preceding sentence shall be one year (or 18 months). If within 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) before the date of the sale of the old residence, the taxpayer sold other property used by him as his principal residence at a gain, and any part of such gain was not recognized under this section or section 112(n) of the Internal Revenue Code of 1939, this section shall not apply with respect to the sale of the old residence (section 1034(d)).

(2) The following example will illustrate the rules of subparagraph (1) of this paragraph:

Example: A taxpayer sells his old residence on January 15, 1954, and purchases another residence on February 15, 1954. On March 15, 1954, he sells the residence which he bought on February 15, 1954, and purchases another residence on April 15, 1954. The gain on the sale of the old residence on January 15, 1954, will not be recognized except to the extent to which the taxpayer's adjusted sales price of the old residence exceeds the cost of purchasing the residence which he purchased on April 15, 1954. Gain on the sale of the residence which was bought on February 15, 1954, and sold on March 15, 1954, will be recognized.

(e) *Basis of new residence.* (1) Where the purchase of a new residence results, under this section, in the nonrecognition of any part of the gain realized upon the sale of an old residence, then, in determining the adjusted basis of the new residence as of any time following the sale of the old residence, the adjustments to basis shall include a reduction by an amount equal to the amount of the gain which was not recognized upon the sale of the old residence (section 1034(e); for special rule applicable in some cases to husband and wife, see paragraph (f) of this section). Such a reduction is not to be made for the purpose of determining the adjusted basis of the new residence as of any time preceding the sale of the old residence. For the purpose of this determination, the amount of the gain not recognized under this section upon the sale of the old residence includes only so much of the gain as is not recognized because of the taxpayer's cost, up to the date of the determination of the adjusted basis, of purchasing the new residence.

(2) The following example will illustrate the rule of subparagraph (1) of this paragraph:

Example: On January 1, 1954, the taxpayer buys a new residence for $10,000. On March 1, 1954, he sells for an adjusted sales price of $15,000 his old residence, which has an adjusted basis to him of $5,000 (no fixing-up expenses are involved, so that $15,000 is the *amount realized* as well as the *adjusted sales price*). Between April 1 and April 15 a wing is constructed on the new house at a cost of $5,000. Between May 1 and May 15 a garage is constructed at a cost of $2,000. The adjusted basis of the new residence is $10,000 during January and February, $5,000 during March, $5,000 following the completion of the construction in April, and $7,000 following the completion of the construction in May. Since the old residence was not sold until March 1, no adjustment to the basis of the new residence is made during January and

February. Computations for March, April, and May are as follows:

Amount realized on sale of old residence	$15,000
Less: Adjusted basis of old residence	5,000
Gain realized on sale of old residence	10,000
March 1, 1954	
Adjusted sales price of old residence	15,000
Less: Cost of purchasing new residence	10,000
Gain recognized	5,000
Gain realized but not recognized	5,000
Cost of purchasing new residence	10,000
Less: Gain realized but not recognized	5,000
Adjusted basis of new residence	5,000
April 15, 1954	
Gain realized on sale of old residence	10,000
Adjusted sales price of old residence	15,000
Less: Cost of purchasing new residence	15,000
Gain recognized	0
Gain realized but not recognized	10,000
Cost of purchasing new residence	15,000
Less: Gain realized but not recognized	10,000
Adjusted basis of new residence	5,000
May 15, 1954	
Gain realized on sale of old residence	10,000
Adjusted sales price of old residence	15,000
Less: Cost of purchasing new residence	17,000
Gain recognized	0
Gain realized but not recognized	10,000
Cost of purchasing new residence	17,000
Less: Gain realized but not recognized	10,000
Adjusted basis of new residence	7,000

(f) *Husband and wife.* (1) If the taxpayer and his spouse file the consent referred to in this paragraph, then the *taxpayer's adjusted sales price of the old residence* shall mean the taxpayer's, or the taxpayer's and his spouse's, adjusted sales price of the old residence, and the *taxpayer's cost of purchasing the new residence* shall mean the cost to the taxpayer, or to his spouse, or to both of them, of purchasing the new residence, whether such new residence is held by the taxpayer, or his spouse, or both (section 1034(g)). Such consent may be filed only if the old residence and the new residence are each used by the taxpayer and his same spouse as their principal residence. If the taxpayer and his spouse do not file such a consent, the recognition of gain upon sale of the old residence shall be determined under this section without regard to the foregoing.

(2) The consent referred to in subparagraph (1) of this paragraph is a consent by the taxpayer and his spouse to have the basis of the interest of either of them in the new residence reduced from what it would have been but for the filing of such consent by an amount by which the gain of either of them on the sale of his interest in the old residence is not recognized solely by reason of the filing of such consent. Such reduction in basis is applicable to the basis of the new residence, whether such basis is that of the husband, of the wife, or divided between them. If the basis is divided between the husband and wife, the reduction in basis shall be divided between them in the same proportion as the basis (determined without regard to such reduction) is divided. Such consent shall be filed with the district director with whom the taxpayer filed the return for the taxable year or years in which the gain from the sale of the old residence was realized.

(3) The following examples will illustrate the application of this rule:

Example 1. A taxpayer, in 1954, sells for an adjusted sales price of $10,000 the principal residence of himself and his wife, which he owns individually and which has an adjusted basis to him of $5,000 (no fixing-up expenses are involved, so that $10,000 is the *amount realized* as well as the *adjusted sales price*). Within a year after such sale he and his wife contribute $5,000 each from their separate funds for the purchase of their new principal residence which they hold as tenants in common, each owning an undivided one-half interest therein. If the taxpayer and his wife file the required consent, the gain of $5,000 upon the sale of the old residence will not be recognized to the taxpayer, and the adjusted basis of the taxpayer's interest in the new residence will be $2,500 and the adjusted basis of his wife's interest in such property will be $2,500.

Example 2. A taxpayer and his wife, in 1954, sell for an adjusted sales price of $10,000 their principal residence, which they own as joint tenants and which has an adjusted basis of $2,500 to each of them ($5,000 together) (no fixing-up expenses are involved, so that $10,000 is the *amount realized* as well as the *adjusted sales price*). Within a year after such sale, the wife spends $10,000 of her own funds in the purchase of a principal residence for herself and the taxpayer and takes title in her name only. If the taxpayer and his wife file the required consent, the adjusted basis to the wife of the new residence will be $5,000, and the gain of the taxpayer will be $2,500 upon the sale of the old residence will not be recognized. The wife, as a taxpayer herself, will have her gain of $2,500 on the sale of the old residence not recognized under the general rule.

(g) *Members of Armed Forces.* (1) Section 1034(h) provides a special rule for members of the Armed Forces with respect to the period after the sale of the old residence within which the acquisition of a new residence may result in a non-recognition of gain on such sale. The running of the period of 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after the sale of the old residence in the case of the purchase of a new residence, or the period of two years (18 months in the case of a sale of an old residence prior to January 12, 1975) after such sale in the case of the construction of a new residence, is suspended during any time that the taxpayer serves on extended active duty with the Armed Forces of the United States. (This paragraph applies to time served on extended active duty prior to July 1, 1973, only if such extended active duty occurred during an induction period as defined in section 112(c)(5) as in effect prior to July 1, 1973.) However, in no event may such suspension extend for more than four years after the date of the sale of the old residence the period within which the purchase or construction of a new residence may result in a nonrecognition of gain. For example, if the taxpayer is on extended active duty with the Army from January 1, 1975, to June 30, 1976, and if he sold his old residence on January 10, 1975, the latest date on which the taxpayer may use a new residence constructed by him and have any part of the gain on the sale of his old residence not recognized under this section is June 30, 1978 (the date two years following the taxpayer's termination of active duty). However, if this taxpayer were on extended active duty with the Army from January 1, 1975, to December 31, 1978, the latest date on which he might use a new residence constructed by him and have any part of the gain on the sale of his old residence not recognized under this section would be January 10, 1979 (the date four years following the date of the sale of the old residence).

(2) This suspension covers not only the Armed Forces service of the taxpayer but if the taxpayer and his same spouse used both the old and the new residences as their principal residence, then the extension applies in like manner to the time the taxpayer's spouse is on extended active duty with the Armed Forces of the United States.

(3) The time during which the running of the period is suspended is part of such period. Thus, construction costs during such time are includible in the cost of purchasing the new residence under paragraph (c)(4) of this section.

(4) The running of the period of 18 months (or two years) after the date of sale of the old residence referred to in section 1034(c)(4) and in paragraph (d) of this section is not suspended. The running of the 18-month period prior to the date of the sale of the old residence within which the new residence may be purchased in order to have gain on the sale of the old residence not recognized under this section is also not suspended. In the case of a sale of an old residence prior to January 1, 1975, the periods of 18 months (or two years) referred to in each of the two preceding sentences shall be one year (or 18 months).

(5) The term *extended active duty* means any period of active duty which is served pursuant to a call or order to such duty for a period in excess of 90 days or for an indefinite period. If the call or order is for a period of more than 90 days, it is immaterial that the time served pursuant to such call or order is less than 90 days, if the reason for such shorter period of service occurs after the beginning of such duty. As to what constitutes active service as a member of the Armed Forces of the United States, see paragraph (i) of §1.112–1. As to who are members of the Armed Forces of the United States, see section 7701(a)(15), and the regulations in part 301 of this chapter (Regulations on Procedure and Administration).

(h) *Special rules for involuntary conversions*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, section 1034 is inapplicable to involuntary conversions of personal residences occurring after December 31, 1953 (section 1034(i)(1)(B)). For purposes of section 1034, an involuntary conversion of a personal residence occurring after December 31, 1950, and before January 1, 1954, is treated as a sale of such residence (section 1034(i)(1)(A); see paragraph (b)(8) of this section). For purposes of this paragraph, an involuntary conversion is defined, as the destruction in whole or in part, theft, seizure, requisition, or condemnation of property, or the sale or exchange of property under threat or imminence thereof. See section 1033 and § 1.1033(a)–3 for treatment of residences involuntarily converted after December 31, 1953.

(2) *Election to treat condemnation of personal residence as sale.* (i) Section 1034(i)(2) provides a special rule which permits a taxpayer to elect to treat the seizure, requisition, or condemnation of his principal residence, or the sale or exchange of such residence under threat or imminence thereof, if occurring after December 31, 1957, as the sale of such residence for purposes of section 1034 (relating to sale or exchange of residence). A taxpayer may thus elect to have section 1034 apply, rather than section 1033 (relating to involuntary conversions), in determining the amount of gain realized on the disposition of his old residence that will not be recognized and the extent to which the basis of his new residence acquired in lieu thereof shall be reduced. Once made, the election shall be irrevocable.

(ii) If the taxpayer elects to be governed by the provisions of section 1034, section 1033 will have no application. Thus, a taxpayer who elects under section 1034(i)(2) to treat the seizure, requisition, or condemnation of his principal residence (but not the destruction), or the sale or exchange of such residence under threat or imminence thereof, as a sale for the purpose of section 1034 must satisfy the requirements of section 1034 and this section. For example, under section 1034 a taxpayer generally must replace his old residence with a new residence which he uses as his principal residence, within a period beginning 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) before the date of disposition of his old residence, and ending 18 months (one year in the case of a sale of an old residence prior to January 1, 1975) after such date. However, in the case of a new residence the construction of which was commenced by the taxpayer within such period, the replacement period shall not expire until 2 years (18 months in the case of a sale of an old residence prior to January 1, 1975) after the date of disposition of the old residence.

(iii) *Time and manner of making election.* The election under section 1034(i)(2) shall be made in a statement attached to the taxpayer's income tax return, when filed, for the taxable year during which the disposition of his old residence occurs. The statement shall indicate that the taxpayer elects under section 1034(i)(2) to treat the disposition of his old residence as a sale for purposes of section 1034, and shall also show—

(*a*) The basis of the old residence;

(*b*) The date of its disposition;

(*c*) The adjusted sales price of the old residence, if known; and

(*d*) The purchase price, date of purchase, and date of occupancy of the new residence if it has been acquired prior to the time of making the election.

(i) *Statute of limitations.* (1) Whenever a taxpayer sells property used as his principal residence at a gain, the statutory period prescribed in section 6501(a) for the assessment of a deficiency attributable to any part of such gain shall not expire prior to the expiration of three years from the date of receipt, by the district director with whom the return was filed for the taxable year or years in which the gain from the sale of the old residence was realized (section 1034(j)), of a written notice from the taxpayer of—

(i) The taxpayer's cost of purchasing the new residence which the taxpayer claims result in nonrecognition of any part of such gain.

(ii) The taxpayer's intention not to purchase a new residence within the period when such a purchase will result in nonrecognition of any part of such gain, or

(iii) The taxpayer's failure to make such a purchase within such period.

Any gain from the sale of the old residence which is required to be recognized shall be included in gross income for the taxable year or years in which such gain was realized. Any deficiency attributable to any portion of such gain may be assessed before the expiration of the 3-year period described in this paragraph, notwithstanding the provisions of any law or rule of law which might otherwise bar such assessment.

(2) The notification required by the preceding subparagraph shall contain all pertinent details in connection with the sale of the old residence and, where applicable, the purchase price of the new residence. The notification shall be in the form of a written statement and shall be accompanied, where appropriate, by an amended return for the year in which the gain from the sale of the old residence was realized, in order to reflect the inclusion in gross income for that year of gain required to be recognized in connection with such sale.

(j) *Effective date.* Pursuant to section 7851(a)(1)(C), paragraphs (a), (b), (c), (d), (f), (g), and (i) of this section apply in the case of any *sale* (as defined in paragraph (b)(8) of this section) made after December 31, 1953, although such sale may occur in a taxable year subject to the Internal Revenue Code of 1939. Similarly, the rule in paragraph (h) of this section that involuntary conversions of personal residences are not to be treated as sales for purposes of section 1034 but are governed by section 1033 applies to any such involuntary conversion made after December 31, 1953, although such involuntary conversion may occur in a taxable year subject to the Internal Revenue Code of 1939. The rule in paragraph (e) of this section requiring an adjustment to the basis of a new residence, the purchase of which results (under section 1034, or section 112(n) of the Internal Revenue Code of 1939) in the nonrecognition of gain on the sale of an old residence, applies in determining the adjusted basis of the new residence at any time following such sale, although such sale may occur in a taxable year subject to the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6916, 32 FR 5924, Apr. 13, 1967; 32 FR 6971, May 6, 1967; T.D. 7404, 41 FR 6758, Feb. 13, 1976; T.D. 7625, 44 FR 31013, May 30, 1979]

§1.1035–1 Certain exchanges of insurance policies.

Under the provisions of section 1035 no gain or loss is recognized on the exchange of:

(a) A contract of life insurance for another contract of life insurance or for an endowment or annuity contract (section 1035(a)(1));

(b) A contract of endowment insurance for another contract of endowment insurance providing for regular payments beginning at a date not later than the date payments would have begun under the contract exchanged, or an annuity contract (section 1035(a)(2)); or

(c) An annuity contract for another annuity contract (section 1035(a)(3)), but section 1035 does not apply to such exchanges if the policies exchanged to not relate to the same insured. The exchange, without recognition of gain or loss, of an annuity contract for another annuity contract under section 1035(a)(3) is limited to cases where the same person or persons are the obligee or obligees under the contract received in exchange as under the original contract. This section and section 1035 do not apply to transactions involving the exchange of an endowment contract or annuity contract for a life insurance contract, nor an annuity contract for an endowment contract. In the case of such exchanges, any gain or loss shall be recognized. In the case of exchanges which would be governed by section 1035 except for the fact that the property received in exchange consists not only of property which could otherwise be received without the recognition of gain or loss, but also of other property or money, see section 1031 (b) and (c) and the regulations thereunder. Such an exchange does not come within the provisions of section 1035. Determination of the basis of property acquired in an exchange under section 1035(a) shall be governed by section 1031(d) and the regulations thereunder.

§1.1036–1 Stock for stock of the same corporation.

(a) Section 1036 permits the exchange, without the recognition of gain or loss, of common stock for common stock, or of preferred stock for preferred stock, in the same corporation.

Section 1036 applies even though voting stock is exchanged for nonvoting stock or nonvoting stock is exchanged for voting stock. It is not limited to an exchange between two individual stockholders; it includes a transaction between a stockholder and the corporation. However, a transaction between a stockholder and the corporation may qualify not only under section 1036(a), but also under section 368(a)(1)(E) (recapitalization) or section 305(a) (distribution of stock and stock rights). The provisions of section 1036(a) do not apply if stock is exchanged for bonds, or preferred stock is exchanged for common stock, or common stock is exchanged for preferred stock, or common stock in one corporation is exchanged for common stock in another corporation. See paragraph (l) of section 1301–1 for certain transactions treated as distributions under section 301. See paragraph (e)(5) of § 1.368–2 for certain transactions which result in deemed distributions under section 305(c) to which sections 305(b)(4) and 301 apply.

(b) For rules relating to recognition of gain or loss where an exchange is not wholly in kind, see subsections (b) and (c) of section 1031. For rules relating to the basis of property acquired in an exchange described in paragraph (a) of this section, see subsection (d) of section 1031.

(c) A transfer is not within the provisions of section 1036(a) if as part of the consideration the other party to the exchange assumes a liability of the taxpayer (or if the property transferred is subject to a liability), but the transfer, if otherwise qualified, will be within the provisions of section 1031(b).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7281, 38 FR 18540, July 12, 1973]

§ 1.1037–1 Certain exchanges of United States obligations.

(a) *Nonrecognition of gain or loss*—(1) *In general.* Section 1037(a) provides for the nonrecognition of gain or loss on the surrender to the United States of obligations of the United States issued under the Second Liberty Bond Act (31 U.S.C. 774(2)) when such obligations are exchanged solely for other obligations issued under that Act and the Secretary provides by regulations promulgated in connection with the issue of such other obligations that gain or loss is not to be recognized on such exchange. It is not necessary that at the time of the exchange the obligation which is surrendered to the United States be a capital asset in the hands of the taxpayer. For purposes of section 1037(a) and this subparagraph, a circular of the Treasury Department which offers to exchange obligations of the United States issued under the Second Liberty Bond Act for other obligations issued under that Act shall constitute regulations promulgated by the Secretary in connection with the issue of the obligations offered to be exchanged if such circular contains a declaration by the Secretary that no gain or loss shall be recognized for Federal income tax purposes on the exchange or grants the privilege of continuing to defer the reporting of the income of the bonds exchanged until such time as the bonds received in the exchange are redeemed or disposed of, or have reached final maturity, whichever is earlier. See, for example, regulations of the Bureau of the Public Debt, 31 CFR part 339, or Treasury Department Circular 1066, 26 FR 8647. The application of section 1037(a) and this subparagraph will not be precluded merely because the taxpayer is required to pay money on the exchange. See section 1031 and the regulations thereunder if the taxpayer receives money on the exchange.

(2) *Recognition of gain or loss postponed.* Gain or loss which has been realized but not recognized on the exchange of a U.S. obligation for another such obligation because of the provisions of section 1037(a) (or so much of section 1031 (b) or (c) as related to section 1037(a)) shall be recognized at such time as the obligation received in the exchange is disposed of, or redeemed, in a transaction other than an exchange described in section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)) or reaches final maturity, whichever is earlier, to the extent gain or loss is realized on such later transaction.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples, in which it is assumed that the taxpayer uses the

cash receipts and disbursements method of accounting and has never elected under section 454(a) to include in gross income currently the annual increase in the redemption price of non-interest-bearing obligations issued at a discount. In addition, it is assumed that the old obligations exchanged are capital assets transferred in an exchange in respect of which regulations are promulgated pursuant to section 1037(a):

Example 1. A, the owner of a $1,000 series E U.S. savings bond purchased for $750 and bearing an issue date of May 1, 1945, surrenders the bond to the United States in exchange solely for series H U.S. savings bonds on February 1, 1964, when the series E bond has a redemption value of $1,304.80. In the exchange A pays an additional $195.20 and obtains three $500 series H bonds. None of the $554.80 gain ($1,304.80 less $750) realized by A on the series E bond is recognized at the time of the exchange.

Example 2. In 1963, B purchased for $97 a marketable U.S. bond which was originally issued at its par value of $100. In 1964 he surrenders the bond to the United States in exchange solely for another marketable U.S. bond which then has a fair market value of $95. B's loss of $2 on the old bond is not recognized at the time of the exchange, and his basis for the new bond is $97 under section 1031(d). If it has been necessary for B to pay $1 additional consideration in the exchange, his basis in the new bond would be $98.

Example 3. The facts are the same as in example (2) except that B also receives $1 interest on the old bond for the period which has elapsed since the last interest payment date and that B does not pay any additional consideration on the exchange. As in example (2), B has a loss of $2 which is not recognized at the time of the exchange and his basis in the new bond is $97. In addition, the $1 of interest received on the old bond is includible in gross income. B holds the new bond 1 year and sells it in the market for $99 plus interest. At this time he has a gain of $2, the difference between his basis of $97 in the new bond and the sales price of such bond. In addition, the interest received on the new bond is includible in gross income.

Example 4. The facts are the same as in example (2), except that in addition to the new bond B also receives $1.85 in cash, $0.85 of which is interest. The $0.85 interest received is includible in gross income. B's loss of $1 ($97 less $96) on the old bond is not recognized at the time of the exchange by reason of section 1031(c). Under section 1031(d) B's basis in the new bond is $96 (his basis of $97 in the old bond, reduced by the $1 cash received in the exchange).

Example 5. (a) For $975 D subscribes to a marketable U.S. obligation which has a face value of $1,000. Thereafter, he surrenders this obligation to the United States in exchange solely for a 10-year marketable $1,000 obligation which at the time of exchange has a fair market value of $930, at which price such obligation is initially offered to the public. At the time of issue of the new obligation there was no intention to call it before maturity. Five years after the exchange D sells the new obligation for $960.

(b) On the exchange of the old obligation for the new obligation D sustains a loss of $45 ($975 less $930), none of which is recognized pursuant to section 1037(a).

(c) The basis of the new obligation in D's hands, determined under section 1031(d), is $975 (the same basis as that of the old obligation).

(d) On the sale of the new obligation D sustains a loss of $15 ($975 less $960), all of which is recognized by reason of section 1002.

Example 6. (a) The facts are the same as in example (5), except that five years after the exchange D sells the new obligation for $1,020.

(b) On the exchange of the old obligation for the new obligation D sustains a loss of $45 ($975 less $930), none of which is recognized pursuant to section 1037(a).

(c) The basis of the new obligation in D's hands, determined under section 1031(d), is $975 (the same basis as that of the old obligation). The issue price of the new obligation under section 1232(b)(2) is $930.

(d) On the sale of the new obligation D realizes a gain of $45 ($1,020 less $975), all of which is recognized by reason of section 1002. Of this gain of $45, the amount of $35 is treated as ordinary income and $10 is treated as long-term capital gain, determined as follows:

(1) Ordinary income under first sentence of section 1232(a)(2)(B) on sale of new obligation:	
Stated redemption price of new obligation at maturity	$1,000
Less: Issue price of new obligation under section 1232(b)(2)	930
Original issue discount on new obligation	70
Proration under section 1232(a)(2)(B)(ii): ($70×60 months/120 months)	35
(2) Long-term capital gain ($45 less $35)	10

Example 7. (a) The facts are the same as in example (5), except that D retains the new obligation and redeems it at maturity for $1,000.

(b) On the exchange of the old obligation for the new obligation D sustains a loss of $45 ($975 less $930), none of which is recognized pursuant to section 1037(a).

(c) The basis of the new obligation in D's hands, determined under section 1031(d), is $975 (the same basis as that of the old obligation). The issue price of the new obligation is $930 under section 1232(b)(2).

(d) On the redemption of the new obligation D realizes a gain of $25 ($1,000 less $975), all of which is recognized by reason of section 1002. Of this gain of $25, the entire amount is treated as ordinary income, determined as follows:

Ordinary income under first sentence of section 1232(a)(2)(B) on redemption of new obligation:	
Stated redemption price of new obligation at maturity	$1,000
Less: Issue price of new obligation under section 1232(b)(2)	930
Original issue discount on new obligation	70
Proration under section 1232(a)(2)(B)(ii): ($70×120 months/120 months), but such amount not to exceed the $25 gain recognized on redemption	25

(b) *Application of section 1232 upon disposition or redemption of new obligation*—(1) *Exchanges involving nonrecognition of gain on obligations issued at a discount.* If an obligation, the gain on which is subject to the first sentence of section 1232(a)(2)(B), because the obligation was originally issued at a discount, is surrendered to the United States in exchange for another obligation and any part of the gain realized on the exchange is not then recognized because of the provisions of section 1037(a) (or because of so much of section 1031(b) as relates to section 1037(a)), the first sentence of section 1232(a)(2)(B) shall apply to so much of such unrecognized gain as is later recognized upon the disposition or redemption of the obligation which is received in the exchange as though the obligation so disposed of or redeemed were the obligation surrendered, rather than the obligation received, in such exchange. See the first sentence of section 1037(b)(1). Thus, in effect that portion of the gain which is unrecognized on the exchange but is recognized upon the later disposition or redemption of the obligation received from the United States in the exchange shall be considered as ordinary income in an amount which is equal to the gain which, by applying the first sentence of section 1232(a)(2)(B) upon the earlier surrender of the old obligation to the United States, would have been considered as ordinary income if the gain had been recognized upon such earlier exchange. Any portion of the gain which is recognized under section 1031(b) upon the earlier exchange and is treated at such time as ordinary income shall be deducted from the gain which is treated as ordinary income by applying the first sentence of section 1232(a)(2)(B) pursuant to this subparagraph upon the disposition or redemption of the obligation which is received in the earlier exchange. This subparagraph shall apply only in a case where on the exchange of United States obligations there was some gain not recognized by reason of section 1037(a) (or so much of section 1031(b) as relates to section 1037(a)); it shall not apply where, only loss was unrecognized by reason of section 1037(a).

(2) *Rules to apply when a nontransferable obligation is surrendered in the exchange.* For purposes of applying both section 1232(a)(2)(B) and subparagraph (1) of this paragraph to the total gain realized on the obligation which is later disposed of or redeemed, if the obligation surrendered to the United States in the earlier exchange is a nontransferable obligation described in section 454 (a) or (c)—

(i) The aggregate amount considered, with respect to the obligation so surrendered in the earlier exchange, as ordinary income shall not exceed the difference between the issue price of the surrendered obligation and the stated redemption price of the surrendered obligation which applied at the time of the earlier exchange, and

(ii) The issue price of the obligation which is received from the United States in the earlier exchange shall be considered to be the stated redemption price of the surrendered obligation which applied at the time of the earlier exchange, increased by the amount of other consideration (if any) paid to the United States as part of the earlier exchange.

If the obligation received in the earlier exchange is a nontransferable obligation described in section 454(c) and such obligation is partially redeemed before final maturity or partially disposed of by being partially reissued to another owner, the amount determined by applying subdivision (i) of this subparagraph shall be determined on a basis proportional to the total denomination of obligations redeemed or disposed of. See paragraph (c) of § 1.454–1.

(3) *Long-term capital gain.* If, in a case where both subparagraphs (1) and (2) of this paragraph are applied, the total

gain realized on the redemption or disposition of the obligation which is received from the United States in the exchange to which section 1037(a) (or so much of section 1031(b) as related to section 1037(a)) applies exceeds the amount of gain which, by applying such subparagraphs, is treated as ordinary income, the gain in excess of such amount shall be treated as long-term capital gain.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples, in which it is assumed that the taxpayer uses the cash receipts and disbursements method of accounting and has never elected under section 454(a) to include in gross income currently the annual increase in the redemption price of non-interest-bearing obligations issued at a discount. In addition, it is assumed that the old obligations exchanged are capital assets transferred in an exchange in respect of which regulations are promulgated pursuant to section 1037(a):

Example 1. (a) A purchased a noninterest-bearing nontransferable U.S. bond for $74 which was issued after December 31, 1954, and redeemable in 10 years for $100. Several years later, when the stated redemption value of such bond is $94.50, A surrenders it to the United States in exchange for $1 in cash and a 10-year marketable bond having a face value of $100. On the date of exchange the bond received in the exchange has a fair market value of $96. Less than one month after the exchange, A sells the new bond for $96.

(b) On the exchange of the old bond for the new bond A realizes a gain of $23, determined as follows:

Amount realized (a new bond worth $96 plus $1 cash)	$97
Less: Adjusted basis of old bond	74
Gain realized	23

Pursuant to so much of section 1031(b) as applies to section 1037(a), the amount of such gain which is recognized is $1 (the money received). Such recognized gain of $1 is treated as ordinary income. On the exchange of the old bond a gain of $22 ($23 less $1) is not recognized.

(c) The basis of the new bond in A's hands, determined under section 1031(d) is $74 (the basis of the old bond, decreased by the $1 received in cash and increased by the $1 gain recognized on the exchange).

(d) On the sale of the new bond A realizes a gain of $22 ($96 less $74), all of which is recognized by reason of section 1002. Of this gain of $22, the amount of $19.50 is treated as ordinary income and $2.50 is treated as long-term capital gain, determined as follows:

(1) Ordinary income, treating sale of new bond as though a sale of old bond and applying section 1037(b)(1)(A):		
Stated redemption price of old bond		$94.50
Less: Issue price of old bond		74.00
Aggregate gain under section 1037(b)(1)(A) (not to exceed $22 not recognized at time of exchange)		20.50
Less: Amount of such gain recognized at time of exchange		1.00
Ordinary income		19.50
(2) Ordinary income under first sentence of section 1232(a)(2)(B), applying section 1037(b)(1)(B) to sale of new bond:		
Stated redemption price of new bond at maturity	$100.00	
Less: Issue price of new bond under section 1037(b)(1)(B) ($94.50 plus $0 additional consideration paid on exchange)	94.50	
Original issue discount on new bond	5.50	
Proration under section 1232(a)(2)(B)(ii): ($5.50×0 months/120 months)		0
(3) Total ordinary income (sum of subparagraphs (1) and (2))		19.50
(4) Long-term capital gain ($22 less $19.50)		2.50

Example 2. (a) The facts are the same as in example (1), except that, less than one month after the exchange of the old bond, the new bond is sold for $92.

(b) On the sale of the new bond A realizes a gain of $18 ($92 less $74), all of which is recognized by reason of section 1002. Of this gain, the entire amount of $18 is treated as ordinary income. This amount is determined as provided in paragraph (d)(1) of example (1) except that the ordinary income of $19.50 is limited to the $18 recognized on the sale of the new bond.

Example 3. (a) The facts are the same as in example (1), except that 2 years after the exchange of the old bond A sells the new bond for $98.

(b) On the sale of the new bond A realizes a gain of $24 ($98 less $74), all of which is recognized by reason of section 1002. Of this gain of $24, the amount of $20.60 is treated as ordinary income and $3.40 is treated as long-term capital gain, determined as follows:

(1) Ordinary income applicable to old bond (determined as provided in paragraph (d)(1) of example (1))	$19.50
(2) Ordinary income applicable to new bond (determined as provided in paragraph (d)(2) of example (1), except that the proration of the original issue discount under section 1232(a)(2)(B)(ii) amounts to $1.10 ($5.50×24 months/120 months)	1.10

(3) Total ordinary income (sum of subparagraphs (1) and (2))	20.60
(4) Long-term capital gain ($24 less $20.60)	3.40

Example 4. (a) The facts are the same as in example (1), except that A retains the new bond and redeems it at maturity for $100.

(b) On the redemption of the new bond A realizes a gain of $26 ($100 less $74), all of which is recognized by reason of section 1002. Of this gain of $26, the amount of $25 is treated as ordinary income and $1 is treated as long-term capital gain, determined as follows:

(1) Ordinary income applicable to old bond (determined as provided in paragraph (d)(1) of example (1))	$19.50
(2) Ordinary income applicable to new bond (determined as provided in paragraph (d)(2) of example (1), except that the proration of the original issue discount under section 1232(a)(2)(B)(ii) amounts to $5.50 ($5.50×120 months/120 months))	5.50
(3) Total ordinary income (sum of subparagraphs (1) and (2))	25.00
(4) Long-term capital gain ($26 less $25)	1.00

Example 5. (a) In 1958 B purchased for $7,500 a series E United States savings bond having a face value of $10,000. In 1965 when the stated redemption value of the series E bond is $9,760, B surrenders it to the United States in exchange solely for a $10,000 series H U.S. savings bond, after paying $240 additional consideration. B retains the series H bond and redeems it at maturity in 1975 for $10,000, after receiving all the semiannual interest payments thereon.

(b) On the exchange of the series E bond for the series H bond, B realizes a gain of $2,260 ($9,760 less $7,500), none of which is recognized at such time by reason of section 1037(a).

(c) The basis of the series H bond in B's hands, determined under section 1031(d), is $7,740 (the $7,500 basis of the series E bond, plus $240 additional consideration paid for the series H bond).

(d) On the redemption of the series H bond, B realizes a gain of $2,260 ($10,000 less $7,740), all of which is recognized by reason of section 1002. This entire gain is treated as ordinary income by treating the redemption of the series H bond as though it were a redemption of the series E bond and by applying section 1037(b)(1)(A).

(e) Under section 1037(b)(1)(B) the issue price of the series H bonds is $10,000 ($9,760 stated redemption price of the series E bond at time of exchange, plus $240 additional consideration paid). Thus, with respect to the series H bond, there is no original issue discount to which section 1232(a)(2)(B) might apply.

Example 6. (a) The facts are the same as in example (5), except that in 1970 B submits the $10,000 series H bond to the United States for partial redemption in the amount of $3,000 and for reissuance of the remainder in $1,000 series H savings bonds registered in his name. On this transaction B receives $3,000 cash and seven $1,000 series H bonds, bearing the original issue date of the $10,000 bond which is partially redeemed. The $1,000, series H bonds are redeemed at maturity in 1975 for $7,000.

(b) On the partial redemption of the $10,000 series H bond in 1970 B realizes a gain of $678 ($3,000 less $2,322 [$7,740×$3,000/$10,000]), all of which is recognized at such time by reason of section 1002 and paragraph (c) of § 1.454–1. This entire gain is treated as ordinary income, by treating the partial redemption of the series H bond as though it were a redemption of the relevant denominational portion of the series E bond and by applying section 1037(b)(1)(A).

(c) On the redemption at maturity in 1975 of the seven $1,000 series H bonds B realizes a gain of $1,582 ($7,000 less $5,418 [$7,740×$7,000/$10,000]), all of which is recognized at such time by reason of section 1002 and paragraph (c) of § 1.454–1. This entire gain is treated as ordinary income, determined in the manner described in paragraph (b) of this example.

Example 7. (a) The facts are the same as in example (5), except that in 1970 B requests the United States to reissue the $10,000 series H bond by issuing two $5,000 series H bonds bearing the original issue date of such $10,000 bond. One of such $5,000 bonds is registered in B's name, and the other is registered in the name of C, who is B's son. Each $5,000 series H bond is redeemed at maturity in 1975 for $5,000.

(b) On the issuing in 1970 of the $5,000 series H bond to C, B realizes a gain of $1,130 ($5,000 less $3,870 [$7,740×$5,000/$10,000]), all of which is recognized at such time by reason of section 1002 and paragraph (c) of § 1.454–1. This entire gain is treated as ordinary income by treating the transaction as though it were a redemption of the relevant denominational portion of the series E bond and by applying section 1037(b)(1)(A).

(c) On the redemption at maturity in 1975 of the $5,000 series H bond registered in his name B realizes a gain of $1,130 ($5,000 less $3,870 [$7,740×$5,000/$10,000]), all of which is recognized at such time by reason of section 1002 and paragraph (c) of § 1.454–1. This entire gain is treated as ordinary income, determined in the manner described in paragraph (b) of this example.

(d) On the redemption at maturity in 1975 of the $5,000 series H bond registered in his name C does not realize any gain, since the amount realized on redemption does not exceed his basis in the property, determined as provided in section 1015.

(5) *Exchanges involving nonrecognition of gain or loss on transferable obligations issued at not less than par*—(i) *In general.* If a transferable obligation of the United States which was originally

issued at not less than par is surrendered to the United States for another transferable obligation in an exchange to which the provisions of section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)) apply, the issue price of the obligation received from the United States in the exchange shall be considered for purposes of applying section 1232 to gain realized on the disposition or redemption of the obligation so received, to be the same as the issue price of the obligation which is surrendered to the United States in the exchange, increased by the amount of other consideration, if any, paid to the United States as part of the exchange. This subparagraph shall apply irrespective of whether there is gain or loss unrecognized on the exchange and irrespective of the fair market value, at the time of the exchange, of either the obligation surrendered to, or the obligation received from, the United States in the exchange.

(ii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples, in which it is assumed that the taxpayer uses the cash receipts and disbursements method of accounting and that the old obligations exchanged are capital assets transferred in an exchange in respect of which regulations are promulgated pursuant to section 1037(a):

Example 1. (a) A purchases in the market for $85 a marketable U.S. bond which was originally issued at its par value of $100. Three months later, A surrenders this bond to the United States in exchange solely for another $100 marketable U.S. bond which then has a fair market value of $88. He holds the new bond for 5 months and then sells it on the market for $92.

(b) On the exchange of the old bond for the new bond A realizes a gain of $3 ($88 less $85), none of which is recognized by reason of section 1037(a).

(c) The basis of the new bond in A's hands, determined under section 1031(d), is $85 (the same as that of the old bond). The issue price of the new bond for purposes of section 1232(a)(2)(B) is considered under section 1037(b)(2) to be $100 (the same issue price as that of the old bond).

(d) On the sale of the new bond A realizes a gain of $7 ($92 less $85), all of which is recognized by reason of section 1002. Of this gain of $7, the entire amount is treated as long-term capital gain, determined as follows:

(1) Ordinary income under first sentence of section 1232(a)(2)(B), applicable to old bond:		
Stated redemption price of old bond at maturity	$100	
Less: Issue price of old bond	100	
Original issue discount on old bond		0
(2) Ordinary income under first sentence of section 1232(a)(2)(B), applying section 1037(b)(2) to sale of new bond:		
Stated redemption price of new bond at maturity	100	
Less: Issue price of new bond under section 1037(b)(2)	100	
Original issue discount on new bond		0
(3) Long-term capital gain ($7 less sum of subparagraphs (1) and (2))		$7

Example 2. The facts are the same as in example (1), except that A retains the new bond and redeems it at maturity for $100. On the redemption of the new bond, A realizes a gain of $15 ($100 less $85), all of which is recognized under section 1002. This entire gain is treated as long-term capital gain, determined in the same manner as provided in paragraph (d) of example (1).

Example 3. (a) For $1,000 B subscribes to a marketable U.S. bond which has a face value of $1,000. Thereafter, he surrenders this bond to the United States in exchange solely for a 10-year marketable $1,000 bond which at the time of exchange has a fair market value of $930, at which price such bond is initially offered to the public. Five years after the exchange, B sells the new bond for $950.

(b) On the exchange of the old bond for the new bond, B sustains a loss of $70 ($1,000 less $930), none of which is recognized pursuant to section 1037(a).

(c) The basis of the new bond in A's hands, determined under section 1031(d), is $1,000 (the same basis as that of the old bond).

(d) On the sale of the new bond B sustains a loss of $50 ($1,000 less $950), all of which is recognized by reason of section 1002.

Example 4. (a) The facts are the same as in example (3), except that 5 years after the exchange B sells the new bond for $1,020.

(b) On the exchange of the old bond for the new bond B sustains a loss of $70 ($1,000 less $930), none of which is recognized pursuant to section 1037(a).

(c) The basis of the new bond in B's hands, determined under section 1031(d), is $1,000 (the same basis as that of the old bond). The issue price of the new bond for purposes of section 1232(a)(2)(B) is considered under section 1037(b)(2) to be $1,000 (the same issue price as that of the old bond).

(d) On the sale of the new bond B realizes a gain of $20 ($1,020 less $1,000), all of which is recognized by reason of section 1002. This entire gain is treated as long-term capital gain, determined in the same manner as provided in paragraph (d) of example (1).

(6) *Other rules for applying section 1232.* To the extent not specifically affected by the provisions of section 1037(b) and subparagraphs (1) through (5) of this paragraph, any gain realized on the disposition or redemption of any obligation received from the United States in an exchange to which section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)) applies shall be treated in the manner provided by section 1232 if the facts and circumstances relating to the acquisition and disposition or redemption of such obligation require the application of section 1232.

(c) *Holding period of obligation received in the exchange.* The holding period of an obligation received from the United States in an exchange to which the provisions of section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)) apply shall include the period for which the obligation which was surrendered to the United States in the exchange was held by the taxpayer, but only if the obligation so surrendered was at the time of the exchange a capital asset in the hands of the taxpayer. See section 1223 and the regulations thereunder.

(d) *Basis.* The basis of an obligation received from the United States in an exchange to which the provisions of section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)) apply shall be determined as provided in section 1031(d) and the regulations thereunder.

(e) *Effective date.* Section 1.1037 and this section shall apply only for taxable years ending after September 22, 1959.

[T.D. 6935, 32 FR 15824, Nov. 17, 1967, as amended by T.D. 7154, 36 FR 24998, Dec. 28, 1971]

§ 1.1038–1 Reacquisitions of real property in satisfaction of indebtedness.

(a) *Scope of section 1038*—(1) *General rule on gain or loss.* If a sale of real property gives rise to indebtedness to the seller which is secured by the real property which is sold, and the seller of such property reacquires such property in a taxable year beginning after September 2, 1964, in partial or full satisfaction of such indebtedness, then, except as provided in paragraphs (b) and (f) of this section, no gain or loss shall result to the seller from such reacquisition. The treatment so provided is mandatory; however, see § 1.1038–3 for an election to apply the provisions of this section to certain taxable years beginning after December 31, 1957. It is immaterial, for purposes of applying this subparagraph, whether the seller realized a gain or sustained a loss on the sale of the real property, or whether it can be ascertained at the time of the sale whether gain or loss occurs as a result of the sale. It is also immaterial what method of accounting the seller used in reporting gain or loss from the sale of the real property or whether at the time of reacquisition such property has depreciated or appreciated in value since the time of the original sale. Moreover, the character of the gain realized on the original sale of the property is immaterial for purposes of applying this subparagraph. The provisions of this section shall apply, except as provided in § 1.1038–2, to the reacquisition of real property which was used by the seller as his principal residence and with respect to the sale of which an election under section 121 is in effect or with respect to the sale of which gain was not recognized under section 1034.

(2) *Sales giving rise to indebtedness*—(i) *Sale defined.* For purposes of this section, it is not necessary for title to the property to have passed to the purchaser in order to have a sale. Ordinarily, a sale of property has occurred in a transaction in which title to the property has not passed to the purchaser, if the purchaser has a contractual right to retain possession of the property so long as he performs his obligations under the contract and to obtain title to the property upon the completion of the contract. However, a sale may have occurred even if the purchaser does not have the right to possession until he partially or fully satisfies the terms of the contract. For example, if S contracts to sell real property to P, and if S promises to convey title to P upon the completion of all of the payments due under the contract and to allow P to obtain possession of the property after 10 percent of the purchase price has been paid, there has been a sale on the date of the contract

for purposes of this section. This section shall not apply to a disposition of real property which constituted an exchange of property or was treated as a sale under section 121(d)(4) or section 1034(i); nor shall it apply to a sale of stock in a cooperative housing corporation described in section 121(d)(3) or section 1034(f).

(ii) *Secured indebtedness defined.* An indebtedness to the seller is secured by the real property for purposes of this section whenever the seller has the right to take title or possession of the property or both if there is a default with respect to such indebtedness. A sale of real property may give rise to an indebtedness to the seller although the seller is limited in his recourse to the property for payment of the indebtedness in the case of a default.

(3) *Reacquisitions in partial or full satisfaction of indebtedness*—(i) *Purpose of reacquisition.* This section applies only where the seller reacquires the real property in partial or full satisfaction of the indebtedness to him that arose from the sale of the real property and was secured by the property. That is, the reacquisition must be in furtherance of the seller's security rights in the property with respect to indebtedness to him that arose at the time of the sale. Accordingly, if the seller in reacquiring the real property does not pay consideration in addition to discharging the purchaser's indebtedness to him that arose from the sale and was secured by such property, this section shall apply to the reacquisition even though the purchaser has not defaulted in his obligations under the contract or such a default is not imminent. If in addition to discharging the purchaser's indebtedness to him that arose from the sale the seller pays consideration in reacquiring the real property, this section shall generally apply to the reacquisition if the reacquisition and the payment of additional consideration is provided for in the original contract for the sale of the property. This section generally shall apply to a reacquisition of real property if the seller reacquires the property either when the purchaser has defaulted in his obligations under the contract or when such a default is imminent. This section generally shall not apply to a reacquisition of real property where the seller pays consideration in addition to discharging the purchaser's indebtedness to him that arose from the sale if the reacquisition and payment of additional consideration was not provided for in the original contract for the sale of the property and if the purchaser has not defaulted in his obligations under the contract or such a default is not imminent. Thus, for example, if the purchaser is in arrears on the payment of interest or principal or has in any other way defaulted on his contract for the purchase of the property, or if the facts of the case indicate that the purchaser is unable satisfactorily to perform his obligations under the contract, and the seller reacquires the property from the purchaser in a transaction in which the seller pays consideration in addition to discharging the purchaser's indebtedness to him that arose from the sale and was secured by the property, this section shall apply to the reacquisition. Additional consideration paid by the seller includes money and other property paid or transferred by the seller. Also, the reacquisition by the seller of real property subject to an indebtedness (or the assumption, upon the reacquisition, of indebtedness) which arose subsequent to the original sale shall be considered as a payment by the seller of additional consideration. However, the reacquisition by the seller of real property subject to an indebtedness (or the assumption, upon the reacquisition, of an indebtedness) which arose prior to or arose out of the original sale shall not be considered as a payment by the seller of additional consideration.

(ii) *Manner of reacquisition.* For purposes of applying section 1038 and this section there must be a reacquisition by the seller of the real property itself, but the manner in which the seller so reduces the property to ownership or possession, as the case may be, shall generally be immaterial. Thus, the seller may reduce the real property to ownership or possession or both, as the case may require, by agreement or by process of law. The reduction of the real property to ownership or possession by agreement includes, where valid under local law, such methods as voluntary conveyance from the purchaser and abandonment to the seller. The reduction of the real property to ownership or possession by process of law includes foreclosure proceedings in which a competitive bid is entered, such as foreclosure by judicial sale or by power of sale contained in the loan agreement without recourse to the courts, as well as those types of foreclosure proceedings in which a competitive bid is not entered, such as strict foreclosure and foreclosure by entry and possession, by writ of entry, or by publication or notice.

(4) *Persons from whom real property may be reacquired.* The real property reacquired in satisfaction of the indebtedness need not be reacquired from the purchaser but may be reacquired from the purchaser's transferee or assignee, or from a trustee holding title to such property pending the purchaser's satisfaction of the terms of the contract, so long as the indebtedness that is partially or completely satisfied in the reacquisition of such property arose in the original sale of the property and was secured by the property so reacquired. In such a case, a reference in this section to the purchaser shall, where appropriate, include the purchaser's transferee or assignee. Thus, for example, this section will apply if the seller reacquires the property from a purchaser from the original purchaser and either the property is subject to, or the subsequent purchaser assumes, the liability to the seller on the indebtedness.

(5) *Reacquisitions not included.* This section shall not apply to reacquisitions of real property by mutual savings banks, domestic building and loan associations, and cooperative banks, described in section 593(a). However, for rules respecting the reacquisition of real property by such organizations, see § 1.595–1.

(b) *Amount of gain resulting from a reacquisition*—(1) *Determination of amount*—(i) *In general.* As a result of a reacquisition to which paragraph (a) of this section applies gain shall be derived by the seller to the extent that the amount of money and the fair market value of other property (other than obligations of the purchaser arising with respect to the sale) which are received by the seller, prior to such reacquisition, with respect to the sale of the property exceed the amount of the gain derived by the seller on the sale of such property which is returned as income for periods prior to the reacquisition. However, the amount of gain so determined shall in no case exceed the amount determined under paragraph (c) of this section with respect to such reacquisition.

(ii) *Amount of gain returned as income for prior periods.* For purposes of this subparagraph and paragraph (c)(1) of this section, the amount of gain on the sale of the property which is returned as income for periods prior to the reacquisition of the real property does not include any amount of income determined under paragraph (f)(2) of this section which is considered to be received at the time of the reacquisition of the property. However, the amount of gain on the sale of the property which is returned as income for such periods does include gain on the sale resulting from payments received in the taxable year in which the date of reacquisition occurs if such payments are received prior to such reacquisition. The application of this subdivision may be illustrated by the following example:

Example: In 1965 S, who uses the calendar year as the taxable year, sells to P for $10,000 real property which has an adjusted basis of $3,000. S properly elects under section 453 to report the income from the sale on the installment method. In 1965 and 1966, S receives a total of $4,000 on the contract. On May 15, 1967, S receives $1,000 on the contract. Because of P's default, S reacquires the property on August 31, 1967. The gain on the sale which is returned as income for periods prior to the reacquisition is $3,500 ($5,000×$7,000/$10,000).

(2) *Amount of money and other property received with respect to the sale*—(i) *In general.* Amounts of money and other property received by the seller with respect to the sale of the property include payments made by the purchaser for the seller's benefit, as well as payments made and other property transferred directly to the seller. If the purchaser of the real property makes payments on a mortgage or other indebtedness to which the property is subject at the time of the sale of such property

to him, or on which the seller was personally liable at the time of such sale, such payments are considered amounts received by the seller with respect to the sale. However, if after the sale the purchaser borrows money and uses the property as security for the loan, payments by the purchaser in satisfaction of the indebtedness are not considered as amounts received by the seller with respect to the sale, although the seller does in fact receive some indirect benefit when the purchaser makes such payments.

(ii) *Payments by purchaser at time of reacquisition.* All payments made by the purchaser at the time of the reacquisition of the real property that are with respect to the original sale of the property shall be treated, for purposes of subparagraph (1) of this paragraph, by the seller as having been received prior to the reacquisition with respect to such sale. For example, if the purchaser, at the time of the reacquisition by the seller, pays money or other property to the seller in partial or complete satisfaction of the purchaser's indebtedness on the original sale, the seller shall treat such amounts as having been received prior to the reacquisition with respect to the sale.

(iii) *Interest received.* For purposes of this subparagraph and paragraph (c)(1) of this section any amounts received by the seller as interest, stated or unstated, are excluded from the computation of gain on the sale of the property and are not considered amounts of money or other property received with respect to the sale.

(iv) *Amounts received on sale of purchaser's indebtedness.* Money or other property received by the seller on the sale of the purchaser's indebtedness that arose at the time of the sale of the real property are amounts received by the seller with respect to the sale of such real property, except that the amounts so received from the sale of such indebtedness shall be reduced by the amount of money and the fair market value of other property paid or transferred by the seller, before the reacquisition of the real property, to reacquire such indebtedness. For example, if S sells real property to P for $25,000, and under the contract receives $10,000 down and a note from P for $15,000, S would receive $22,000 with respect to the sale if he were to discount the note for $12,000. If before the reacquisition of the real property S were to reacquire the discounted note for $8,000, he would receive $14,000 with respect to the sale.

(3) *Obligations of the purchaser arising with respect to the sale.* The term *obligations of the purchaser arising with respect to the sale* of the real property includes, for purposes of subparagraph (1) of this paragraph, only that indebtedness on which the purchaser is liable to the seller and which arises out of the sale of such property. Thus, the term does not include any indebtedness in respect of the property that the seller owes to a third person which the purchaser assumes, or to which the property is subject, at the time of the sale of the property to the purchaser. Nor does the term include any indebtedness on which the purchaser is liable to the seller if such indebtedness arises subsequent to the sale of such property.

(c) *Limitation upon amount of gain*—(1) *In general.* Except as provided by subparagraph (2) of this paragraph, the amount of gain on a reacquisition of real property, as determined under paragraph (b) of this section, shall in no case exceed—

(i) The amount by which the price at which the real property was sold exceeded its adjusted basis at the time of the sale, as determined under § 1.1011–1, reduced by

(ii) The amount of gain on the sale of such real property which is returned as income for periods prior to the reacquisition, and by

(iii) The amount of money and the fair market value of other property (other than obligations of the purchaser to the seller which are secured by the real property) paid or transferred by the seller in connection with the reacquisition of such real property.

(2) *Cases where limitation does not apply.* The limitation provided by subparagraph (1) of this paragraph shall not apply in a case where the selling price of property is indefinite in amount and cannot be ascertained at the time of the reacquisition of such property, as, for example, where the selling price is stated as a percentage

of the profits to be realized from the development of the property which is sold. Moreover, the limitation so provided shall not apply to a reacquisition of real property occurring in a taxable year beginning before September 3, 1964, to which the provisions of this section are applied pursuant to an election under § 1.1038–3.

(3) *Determination of sales price.* The price at which the real property was sold shall be, for purposes of subparagraph (1) of this paragraph, the gross sales price reduced by the selling commissions, legal fees, and other expenses incident to the sale of such property which are properly taken into account in determining gain or loss on the sale. For example, the amount of selling commissions paid by a nondealer will be deducted from the gross sales price in determining the price at which the real property was sold; on the other hand, selling commissions paid by a real estate dealer will be deducted as a business expense. Examples of other expenses incident to the sale of the property are expenses for appraisal fees, advertising expense, cost of preparing maps, recording fees, and documentary stamp taxes. Payments on indebtedness to the seller which are for interest, stated or unstated, are not included in determining the price at which the property was sold. See paragraph (b)(2)(iii) of this section.

(4) *Determination of amounts paid or transferred in connection with a reacquisition*—(i) *In general.* Amounts of money or property paid or transferred by the seller of the real property in connection with the reacquisition of such property include payments of money, or transfers of property, to persons from whom the real property is reacquired as well as to other persons. Payments or transfers in connection with the reacquisition of the property do not include money or property paid or transferred by the seller to reacquire obligations of the purchaser to the seller which were received by the seller with respect to the sale of the property or which arose subsequent to the sale. Amounts of money or property paid or transferred by the seller in connection with the reacquisition of the property include payments or transfers for such items as court costs and fees for services of an attorney, master, trustee, or auctioneer, or for publication, acquiring title, clearing liens, or filing and recording.

(ii) *Assumption of indebtedness.* The assumption by the seller, upon reacquisition of the real property, of any indebtedness to another person which at such time is secured by such property will be considered a payment of money by the seller in connection with the reacquisition. Also, if at the time of reacquisition such property is subject to an indebtedness which is not an indebtedness of the purchaser to the seller, the seller shall be considered to have paid money, in an amount equal to such indebtedness, in connection with the reacquisition of the property. Thus, for example, if at the time of the sale the purchaser executes in connection with the sale a first mortgage to a bank and a second mortgage to the seller and at the time of reacquisition the seller reacquires the property subject to the first mortgage which he does not assume, the seller will be considered to have paid money, in an amount equal to the unpaid amount of the first mortgage, in connection with the reacquisition.

(d) *Character of gain resulting from a reacquisition.* Paragraphs (b) and (c) of this section set forth the extent to which gain shall be derived from a reacquisition to which paragraph (a) of this section applies, but the rule provided by section 1038 and this section do not affect the character of the gain so derived. The character of the gain resulting from such a reacquisition is determined on the basis of whether the gain on the original sale was returned on the installment method or, if not, on the basis of whether title to the real property was transferred to the purchaser; and, if title was transferred to the purchaser in a deferred-payment sale, whether the reconveyance of the property to the seller was voluntary. For example, if the gain on the original sale of the reacquired property was returned on the installment method, the character of the gain on reacquisition by the seller shall be determined in accordance with the rules provided in paragraph (a) of § 1.453–9. If the original sale was not on the installment method but was a deferred-payment sale, as described in §1.453–6(a), where title to the real property was transferred to the purchaser and the seller accepts a voluntary reconveyance of the property, the gain on the reacquisition shall be ordinary income; however, if the obligations satisfied are securities (as defined in section 165(g)(2)(C)), any gain resulting from the reacquisition is capital gain subject to the provisions of subchapter P of chapter 1 of the Code.

(e) *Recognition of gain.* The entire amount of the gain determined under paragraphs (b) and (c) of this section with respect to a reacquisition to which paragraph (a) of this section applies shall be recognized notwithstanding any other provisions of subtitle A (relating to income taxes) of the Code.

(f) *Special rules applicable to worthless indebtedness*—(1) *Worthlessness resulting from reacquisition.* No debt of the purchaser to the seller which was secured by the reacquired real property shall be considered as becoming worthless or partially worthless as a result of a reacquisition of such real property to which paragraph (a) of this section applies. Accordingly, no deduction for a bad debt and no charge against a reserve for bad debts shall be allowed, as a result of the reacquisition, in order to reflect the noncollectibility of any indebtedness of the purchaser to the seller which at the time of reacquisition was secured by such real property.

(2) *Indebtedness treated as worthless prior to reacquisition*—(i) *Prior taxable years.* If for any taxable year ending before the taxable year in which occurs a reacquisition of real property to which paragraph (a) of this section applies the seller of such property has treated any indebtedness of the purchaser which is secured by such property as having become worthless or partially worthless by taking a bad debt deduction under section 166(a), he shall be considered as receiving, at the time of such reacquisition, income in an amount equal to the amount of such indebtedness previously treated by him as having become worthless. The amount so treated as income received shall be treated as a recovery of a bad debt previously deducted as worthless or partially worthless. Accordingly, the amount of such income shall be excluded from gross income, as provided in §1.111–1, to the extent of the *recovery exclusion* with respect to such item. For purposes of §1.111–1, if the indebtedness was treated as partially worthless in a prior taxable year, the amount treated under this subparagraph as a recovery shall be considered to be with respect to the part of the indebtedness that was previously deducted as worthless. The seller shall not be considered to have treated an indebtedness as worthless in any taxable year for which he took the standard deduction under section 141 or paid the tax imposed by section 3 if a deduction in respect of such indebtedness was not allowed in determining adjusted gross income for such year under section 62.

(ii) *Current taxable year.* No deduction shall be allowed under section 166 (a), for the taxable year in which occurs a reacquisition of real property to which paragraph (a) of this section applies, in respect of any indebtedness of the purchaser secured by such property which has been treated by the seller as having become worthless or partially worthless in such taxable year but prior to the date of such reacquisition.

(3) *Basis adjustment.* The basis of any indebtedness described in subparagraph (2)(i) of this paragraph shall be increased (as of the date of the reacquisition) by an amount equal to the amount which, under such subparagraph of this paragraph, is treated as income received by the seller with respect to such indebtedness, but only to the extent the amount so treated as received is not excluded from gross income by reason of the application of §1.111–1.

(g) *Rules for determining gain or loss on disposition of reacquired property*—(1) *Basis of reacquired real property.* The basis of any real property acquired in a reacquisition to which paragraph (a) of this section applies shall be the sum of the following amounts, determined as of the date of such reacquisition:

(i) The amount of the adjusted basis, determined under sections 453 and 1011, and the regulations thereunder, of all indebtedness of the purchaser to the seller which at the time of reacquisition was secured by such property, including any increase by reason of paragraph (f)(3) of this section,

(ii) The amount of gain determined under paragraphs (b) and (c) of this section with respect to such reacquisition, and

(iii) The amount of money and the fair market value of other property (other than obligations of the purchaser to the seller which are secured by the real property) paid or transferred by the seller in connection with the reacquisition of such real property, determined as provided in paragraph (c) of this section even though such paragraph does not apply to the reacquisition.

(2) *Basis of undischarged indebtedness.* The basis of any indebtedness of the purchaser to the seller which was secured by the reacquired real property described in subparagraph (1) of this paragraph, to the extent that such indebtedness is not discharged upon the reacquisition of such property, shall be zero. Therefore, to the extent not discharged upon the reacquisition of the real property, indebtedness on the original obligation of the purchaser, a substituted obligation of the purchaser, a deficiency judgment entered in a court of law into which the purchaser's obligation has merged, or any other obligation of the purchaser to the seller, shall be zero if such indebtedness constitutes an indebtedness to the seller which was secured by such property.

(3) *Holding period of reacquired property.* Since the reacquisition described in subparagraph (1) of this paragraph is in a sense considered a nullification of the original sale of the real property, for purposes of determining gain or loss on a disposition of such property after its reacquisition the period for which the seller has held the real property at the time of such disposition shall include the period for which such property is held by him prior to the original sale. However, the holding period shall not include the period of time commencing with the date following the date on which the property is originally sold to the purchaser and ending with the date on which the property is reacquired by the seller. The period for which the property was held by the seller prior to the original sale shall be determined as provided in § 1.1223–1. For example, if under paragraph (a) of § 1.1223–1 real property, which was acquired as the result of an involuntary conversion, has been held for five months on January 1, 1965, the date of its sale, and such property is reacquired on July 2, 1965, and resold on July 3, 1965, the seller will be considered to have held such property for five months and one day for purposes of this subparagraph.

(h) *Illustrations.* The application of this section may be illustrated by the following examples in which it is assumed that the reacquisition is in satisfaction of secured indebtedness arising out of the sale of the real property:

Example 1. (a) S purchases real property for $20 and sells it to P for $100, the property not being mortgaged at the time of sale. Under the contract P pays $10 down and executes a note for $90, with stated interest at 6 percent, to be paid in nine annual installments. S properly elects to report the gain on the installment method. After the second $10 annual payment P defaults and S accepts a voluntary reconveyance of the property in complete satisfaction of the indebtedness. S pays $5 in connection with the reacquisition of the property. The fair market value of the property at the time of the reacquisition is $110.

(b) The gain derived by S on the reacquisition of the property is $6, determined as follows:

Gain before application of limitation:		
Money with respect to the sale received by S prior to the reacquisition		$30
Less: Gain returned by S as income for periods prior to the reacquisition ($30×[($100 – $20)/$100])		24
Gain before application of limitation		6
Limitation on amount of gain:		
Sales price of real property		100
Less:		
Adjusted basis of the property at the time of sale	$20	
Gain returned by S as income for periods prior to the reacquisition	24	
Amount of money paid by S in connection with the reacquisition	5	49
Limitation on amount of gain		51
Gain resulting from the reacquisition of the property		6

(c) The basis of the reacquired real property at the date of the reacquisition is $25, determined as follows:

Adjusted basis of P's indebtedness to S ($70 − [$70×$80/$100])	$14
Gain resulting from the reacquisition of the property	6
Amount of money paid by S in connection with the reacquisition	5
Basis of reacquired property	25

Example 2. (a) The facts are the same as in example (1) except that S purchased the property for $80.

(b) The gain derived by S on the reacquisition of the property is $9, determined as follows:

Gain before application of limitation:		
Money with respect to the sale received by S prior to the reacquisition		$30
Less: Gain returned by S as income for periods prior to the reacquisition ($30×[($100 − $80)/$100])		$6
Gain before application of limitation		24
Limitation on amount of gain:		
Sales price of real property		100
Less:		
Adjusted basis of the property at the time of sale	$80	
Gain returned by S as income for periods prior to the reacquisition	6	
Amount of money paid by S in connection with the reacquisition	5	91
Limitation on amount of gain		9
Gain resulting from the reacquisition of the property		9

(c) The basis of the reacquired real property at the date of the reacquisition is $70, determined as follows:

Adjusted basis of P's indebtedness to S ($70 − [$70×$20/$100])	$56
Gain resulting from the reacquisition of the property	9
Amount of money paid by S in connection with the reacquisition	5
Basis of reacquired property	70

Example 3. (a) S purchases real property for $70 and sells it to P for $100, the property not being mortgaged at the time of sale. Under the contract P pays $10 down and executes a note for $90, with stated interest at 6 percent, to be paid in nine annual installments. S properly elects to report the gain on the installment method. After the first $10 annual payment P defaults and S accepts a voluntary reconveyance of the property in complete satisfaction of the indebtedness. S pays $5 in connection with the reacquisition of the property. The fair market value of the property at the time of the reacquisition is $50.

(b) The gain derived by S on the reacquisition of the property is $14, determined as follows:

Gain before application of limitation:		
Money with respect to the sale received by S prior to the reacquisition		$20
Less: Gain returned by S as income for periods prior to the reacquisition ($20×[($100 − $70)/$100])		6
Gain before application of limitation		14
Limitation on amount of gain:		
Sales price of real property		100
Less:		
Adjusted basis of the property at time of sale	$70	
Gain returned by S as income for periods prior to the reacquisition	6	
Amount paid by S in connection with the reacquisition	5	81
Limitation on amount of gain		19
Gain resulting from the reacquisition of the property		14

(c) The basis of the reacquired real property at the date of the reacquisition is $75, determined as follows:

Adjusted basis of P's indebtedness to S ($80 − [$80×$30/$100])	$56
Gain resulting from the reacquisition of the property	14
Amount of money paid by S in connection with the reacquisition	5
Basis of reacquired property	75

Example 4. (a) S purchases real property for $20 and sells it to P for $100, the property not being mortgaged at the time of sale. Under the contract P pays $10 down and executes a note for $90, with stated interest at 6 percent, to be paid in nine annual installments. S properly elects to report gain on the installment method. After the second $10 annual payment P defaults and S accepts from P in complete satisfaction of the indebtedness a voluntary reconveyance of the property plus cash in the amount of $20. S does not pay any amount in connection with the reacquisition of the property. The fair market value of the property at the time of the reacquisition is $30.

(b) The gain derived by S on the reacquisition of the property is $10, determined as follows:

Gain before application of the limitation:		
Money with respect to the sale received by S prior to the reacquisition ($30+$20)		$50
Less: Gain returned by S as income for periods prior to the reacquisition ($50×[($100 − $20)/$100])		40
Gain before application of limitation		10
Limitation on amount of gain:		
Sales price of real property		100
Less:		
Adjusted basis of the property at time of sale	$20	

Gain returned by S as income for periods prior to the reacquisition	40	60
Limitation on amount of gain		40
Gain resulting from the reacquisition of the property		10

(c) The basis of the reacquired real property at the date of the reacquisition is $20, determined as follows:

Adjusted basis of P's indebtedness to S ($50 – [$50×$80/$100])	$10
Gain resulting from the reacquisition of the property	10
Basis of reacquired property	20

Example 5. (a) S purchases real property for $80 and sells it to P for $100, the property not being mortgaged at the time of sale. Under the contract P pays $10 down and executes a note for $90, with stated interest at 6 percent, to be paid in nine annual installments. At the time of sale P's note has a fair market value of $90. S does not elect to report the gain on the installment method but treats the transaction as a deferred-payment sale. After the third $10 annual payment P defaults and S forecloses. Under the foreclosure sale S bids in the property at $70, cancels P's obligation of $60, and pays $10 to P. There are no other amounts paid by S in connection with the reacquisition of the property. The fair market value of the property at the time of the reacquisition is $70.

(b) The gain derived by S on the reacquisition of the property is $0, determined as follows:

Gain before application of the limitation:		
Money with respect to the sale received by S prior to the reacquisition		$40
Less: Gain returned by S as income for periods prior to the reacquisition ([$10+$90] – $80)		20
Gain before application of limitation		20
Limitation on amount of gain:		
Sales price of real property		100
Less:		
Adjusted basis of the property at the time of sale	$80	
Gain returned by S as income for periods prior to the reacquisition	20	
Amount of money paid by S in connection with the reacquisition	10	110
Limitation on amount of gain (not to be less than zero)		0
Gain resulting from the reacquisition of the property		0

(c) The basis of the reacquired real property at the date of the reacquisition is $70, determined as follows:

Adjusted basis of P's indebtedness to S (face value at time of reacquisition)	$60
Gain resulting from the reacquisition of the property	0
Amount of money paid by S in connection with the reacquisition	10
Basis of reacquired property	70

[T.D. 6916, 32 FR 5925, Apr. 13, 1967; 32 FR 6971, May 6, 1967]

§ 1.1038–2 Reacquisition and resale of property used as a principal residence.

(a) *Application of special rules*—(1) *In general.* If paragraph (a) of § 1.1038–1 applies to the reacquisition of real property which was used by the seller as his principal residence and with respect to the sale of which an election under section 121 is in effect or with respect to the sale of which gain was not recognized under section 1034, the provisions of § 1.1038–1 (other than paragraph (a) thereof) shall not, and this section shall, apply to the reacquisition of such property if the property is resold by the seller within one year after the date of the reacquisition. For purposes of this section an election under section 121 shall be considered to be in effect with respect to the sale of the property if, at the close of the last day for making such an election under section 121(c) with respect to such sale, an election under section 121 has been made and not revoked. Thus, a taxpayer who properly elects, subsequent to the reacquisition, to have section 121 apply to a sale of his residence may be eligible for the treatment provided in this section. The treatment provided by this section is mandatory; however, see § 1.1038–3 for an election to apply the provisions of this section to certain taxable years beginning after December 31, 1957.

(2) *Sale and resale treated as one transaction.* In the case of a reacquisition to which this section applies, the resale of the reacquired property shall be treated, for purposes of applying sections 121 and 1034, as part of the transaction constituting the original sale of such property. In effect, the reacquisition is generally disregarded pursuant to this section and, for purposes of applying sections 121 and 1034, the resale of the property is considered to constitute a sale of such property occurring on the date of the original sale of such property.

(b) *Transactions not included.* (1) If with respect to the original sale of the property there was no nonrecognition of gain under section 1034 and an election under section 121 is not in effect, the provisions of § 1.1038–1, and not this section, shall apply to the reacquisition. Thus, for example, if in the case of a taxpayer not entitled to the benefit of section 121 there is no gain on the original sale of the property, the provisions of § 1.1038–1, and not this section, shall apply even though a redetermination of gain under this section would result in the nonrecognition of gain on the sale under section 1034. Also, if in the case of such a taxpayer there was gain on the original sale of the property but after the application of section 1034 all of such gain was recognized, the provisions of § 1.1038–1, and not this section, shall apply to the reacquisition.

(2) If the original sale of the property was not eligible for the treatment provided by section 121 and section 1034, the provisions of § 1.1038–1, and not this section, shall apply to the reacquisition of the property even though the resale of such property is eligible for the treatment provided by either or both of sections 121 and 1034.

(c) *Redetermination of gain required*—(1) *Sale of old residence.* The amount of gain excluded under section 121 on the sale of the property and the amount of gain recognized under section 1034 on the sale of the property shall be redetermined under this section by recomputing the adjusted sales price and the adjusted basis of the property, and any adjustments resulting from the redetermination of the gain on the sale of such property shall be reflected in the income of the seller for his taxable year in which the resale of the property occurs.

(2) *Sale of new residence.* If gain was not recognized under section 1034 on the original sale of the property, the adjusted basis of the new residence shall be redetermined under this section. If the new residence has been sold, the amount of gain returned on such sale of the new residence which is affected by the redetermination of the recognized gain on the sale of the old residence shall be redetermined under this section, and any adjustments resulting from the redetermination of the gain on the sale of the new residence shall be reflected in income of the seller for his taxable year in which the resale of the old residence occurs.

(d) *Redetermination of adjusted sales price.* For purposes of applying sections 121 and 1034 pursuant to this section, the adjusted sales price of the reacquired real property shall be redetermined by taking into account both the sale and the resale of the property and shall be—

(1) The amount realized, which for purposes of section 1001 shall be—

(i) The amount realized on the resale of the property, as determined under paragraph (b)(4) of § 1.1034–1, plus

(ii) The amount realized on the original sale of the property, determined as provided in paragraph (b)(4) of § 1.1034–1, less that portion of any obligations of the purchaser arising with respect to such sale which at the time of reacquisition is secured by such property and is unpaid, less

(iii) The amount of money and the fair market value of other property (other than obligations of the purchaser to the seller secured by the real property) paid or transferred by the seller in connection with the reacquisition of such real property,

reduced by

(2) The total of the fixing-up expenses (as defined in par. (b)(6) of § 1.1034–1) incurred for work performed on such real property to assist in both its original sale and its resale.

For purposes of applying paragraph (b)(6) of § 1.1034–1, there shall be two 90-day periods, the first ending on the day on which the contract to sell is entered into in connection with the original sale of the property, and the second ending on the day on which the contract to sell is entered into in connection with the resale of the property. There shall also be two 30-day periods for such purposes, the first ending on the 30th day after the date of the original sale, and the second ending on the 30th day after the date of the resale. For determination of the obligations of the purchaser arising with respect to the original sale of the property, see paragraph (b)(3) of § 1.1038–1. For determination of amounts paid or transferred by the seller in connection with the reacquisition of the property, see paragraph (c)(4) of § 1.1038–1.

(e) *Determination of adjusted basis at time of resale.* For purposes of applying sections 121 and 1034 pursuant to this section, the adjusted basis of the reacquired real property at the time of its resale shall be—

(1) The sum of—

(i) The adjusted basis of such property at the time of the original sale, with proper adjustment under section 1016(a) in respect of such property for the period occurring after the reacquisition of such property, and

(ii) Any indebtedness of the purchaser to the seller which arose subsequent to the original sale of such property and which at the time of reacquisition was secured by such property,

reduced by

(2) Any indebtedness of the purchaser to the seller which at the time of reacquisition was secured by the reacquired real property and which, for any taxable year ending before the taxable year in which occurs the reacquisition to the seller which was secured by the seller as having become worthless or partially worthless by taking a bad debt deduction under section 166(a).

The reduction under the preceding sentence by reason of having treated indebtedness as worthless or partially worthless shall not exceed the amount by which there would be an increase in the basis of such indebtedness under paragraph (f)(3) of § 1.1038–1 if section 1038(d) had been applicable to the reacquisition of such property.

(f) *Treatment of indebtedness secured by the property*—(1) *Year of reacquisition.* No debt of the purchaser to the seller which was secured by the reacquired real property shall be considered as becoming worthless or partially worthless as a result of a reacquisition of such real property to which this section applies. Accordingly, no deduction for a bad debt shall be allowed, as a result of the reacquisition, in order to reflect the noncollectibility of any indebtedness of the purchaser to the seller which at the time of reacquisition was secured by such real property. In addition, no deduction shall be allowed, for the taxable year in which occurs a reacquisition of real property to which this section applies, in respect of any indebtedness of the purchaser secured by such property which has been treated by the seller as having become worthless or partially worthless in such taxable year but prior to the date of such reacquisition.

(2) *Prior taxable years.* For reduction of the basis of the real property for indebtedness treated as worthless or partially worthless for taxable years ending before the taxable year in which occurs the reacquisition, see paragraph (e) of this section.

(3) *Basis of indebtedness.* The basis of any indebtedness of the purchaser to the seller which was secured by the reacquired real property, to the extent that such indebtedness is not discharged upon the reacquisition of such property, shall be zero.

(g) *Date of sale.* Since the resale of the property, by being treated as part of the transaction constituting the original sale of the property, is treated as having occurred on the date of the original sale, in determining whether any of the time requirements of section 121 or section 1034 are satisfied for purposes of this section the date of the original sale is used, except to the extent provided in paragraph (d)(2) of this section.

(h) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. (a) On June 30, 1964, S, a single individual over 65 years of age, sells his principal residence to P for $25,000, the property not being mortgaged at the time of sale. S properly elects to apply the provisions of section 121 to the sale. Under the contract, P pays $5,000 down and executes a note for $20,000 with stated interest at 6 percent, the principal being payable in installments of $5,000 each on January 1 of each year and the note being secured by the real property which is sold. At the time of sale P's note has a fair market value of $20,000. S does not elect to report the gain on the installment method but treats the transaction as a deferred-payment sale, title to the property being transferred to P at the time of sale. S uses the calendar year as the taxable year and the cash receipts and disbursements method of accounting. After making two annual payments of $5,000 each on the note, P defaults on the contract, and on March 1, 1967, S reacquires the real property in full satisfaction of P's indebtedness, title to the property being voluntarily reconveyed to S. On November 1, 1967, S sells the property to T for $35,000. The assumption is made that no fixing-up expenses are incurred for work performed on the principal residence in order to assist in the sale of the property in 1964 or in the resale of the property in 1967. At the time of sale in 1964 the property has an adjusted basis of $15,000. S does not treat any indebtedness with respect to the sale in 1964 as being worthless or partially worthless or make any capital expenditures with respect to the property after such sale. In his return for 1964, S includes in income $2,000 capital gain from the sale of his residence.

(b) The results obtained before and after the reacquisition of the property are as follows:

	Before reacquisition	After reacquisition
Adjusted sales price:		
$5,000+$20,000	$25,000	....
$15,000+$35,000	....	$50,000
Less: Adjusted basis of property at time of sale	15,000	15,000
Gain on sale	10,000	35,000
Gain excluded from income under section 121:.		
$10,000×$20,000/$25,000	8,000	....
$35,000×$20,000/$50,000	....	14,000
Gain included in income after applying section 121:		
$10,000 − $8,000	2,000	....
$35,000 − $14,000	....	21,000

(c) S is required to show the additional inclusion of $19,000 capital gain ($21,000 − $2,000) in income on his return for 1967.

Example 2. (a) The facts are the same as in example (1) except that on April 1, 1965, S purchases a new residence at a cost of $30,000 and qualifies for the nonrecognition of gain under section 1034 in respect of the sale of his principal residence on June 30, 1964. In his return for 1964, S does not include any capital gain in income as a result of the sale of the old residence.

(b) The results obtained before and after the reacquisition of the property are as follows:

	Before reacquisition	After reacquisition
Application of section 121 (see example (1)):		
Adjusted sales price	$25,000	$50,000
Less: Adjusted basis of property at time of sale	15,000	15,000
Gain on sale	10,000	35,000
Gain excluded from income under section 121	8,000	14,000
Gain not excluded from income under section 121	2,000	21,000
Application of section 1034: Adjusted sales price:		
$25,000 − $8,000	17,000	....
$50,000 − $14,000	....	36,000
Less: Cost of new residence	30,000	30,000
Gain recognized under section 1034 on sale of old residence	0	6,000
Gain not recognized under section 1034 on sale of old residence:		
($10,000 − [$8,000+$0])	2,000	....
($35,000 − [$14,000+$6,000])	....	15,000
Adjusted basis of new residence on April 1, 1965:		
$30,000 − $2,000	28,000	....
$30,000 − $15,000	....	15,000

(c) The $6,000 of capital gain on the sale of the old residence is required to be included in income on the return for 1967. The adjusted basis on April 1, 1965, for determining gain on a sale or exchange of the new residence at any time on or after that date is $15,000, after taking into account the reacquisition and resale of the old residence.

Example 3. The facts are the same as in example (2) except that S sells the new residence on June 20, 1965, for $40,000 and includes $12,000 of capital gain ($40,000 − $28,000) on its sale in his income on the return for 1965. S is required to include the additional capital gain of $13,000 ([$40,000 − $15,000] − $12,000) on the sale of the new residence in his income on the return for 1967. For this purpose, the assumption is also made that there are no additional adjustments to the basis of the new residence after April 1, 1965.

[T.D. 6916, 32 FR 5929, Apr. 13, 1967; 32 FR 6971, May 6, 1967]

§1.1038–3 Election to have section 1038 apply for taxable years beginning after December 31, 1957.

(a) *In general.* If an election is made in the manner provided by paragraph (b) of this section, the applicable provisions of §§1.1038–1 and 1.1038–2 shall apply to all reacquisitions of real property occurring in each and every taxable year beginning after December 31, 1957, and before September 3, 1964, for which the assessment of a deficiency, or the credit or refund of an overpayment, is not prevented on September 2, 1964, by the operation of any law or rule of law. The election so made shall apply to all taxable years beginning after December 31, 1957, and before September 3, 1964, for which the assessment of a deficiency, or the credit or refund of an overpayment, is not prevented on September 2, 1964, by the operation of any law or rule of law and shall apply to every reacquisition occurring in such taxable years. The fact that the assessment of a deficiency, or the credit or refund of an overpayment, is prevented for any other taxable year or years affected by the election will not prohibit the making of an election under this section. For example, if an individual who uses the calendar year as the taxable year were to sell in 1960 real property used as his principal residence in respect of the sale of which gain is not recognized under section 1034, and if such property were reacquired by the seller in 1962 and resold within 1 year, he would be permitted to make an election under this section with respect to such reacquisition even though on September 2, 1964, the period of limitations on assessment or refund has run for 1960. An election under this section shall be deemed a consent to the application of the provisions of this section.

(b) *Time and manner of making election*—(1) *In general.* (i) An election to have the provisions of § 1.1038–2 apply to reacquisitions of real property occurring in taxable years beginning after December 31, 1957, and before September 3, 1964, shall be made by filing on or before September 3, 1965, a return, an amended return, or a claim for refund, whichever is proper, for each taxable year in which the resale of such real property occurs. If the return for any such year is not due on or before such date and has not been filed, the election with respect to such taxable year shall be made by filing on or before such date the statement described in subparagraph (2) of this paragraph.

(ii) An election to have the provisions of § 1.1038–1 apply to reacquisitions of real property occurring in taxable years beginning after December 31, 1957, and before September 3, 1964, shall be made by filing on or before September 3, 1965, a return, an amended return, or a claim for refund, whichever is proper, for each taxable year in which such reacquisitions occur. If the return for any such year is not due on or before such date and has not been filed, the election with respect to such taxable year shall be made by filing on or before such date the statement described in subparagraph (2) of this paragraph.

(iii) If the facts are such that § 1.1038–2 applies to a reacquisition of property except that the reacquisition occurs in a taxable year beginning after December 31, 1957, and before September 3, 1964, an election may not be made under this paragraph to have the provisions of § 1.1038–1 apply to such reacquisition.

(iv) Once made, an election under this paragraph may not be revoked after September 3, 1965. To any return, amended return, or claim for refund filed under this subparagraph there shall be attached the statement described in subparagraph (2) of this paragraph.

(2) *Statement to be attached.* The statement described in subparagraph (1) of this paragraph shall indicate—

(i) The name, address and account number of the taxpayer, and the fact that the taxpayer is electing to have the provisions of section 1038 apply to the reacquisitions of real property,

(ii) The taxable years in which the reacquisitions of property occur and any other taxable year or years the tax for which is affected by the application of section 1038 to such reacquisitions,

(iii) The office of the district director where the return or returns for such taxable year or years were or will be filed,

(iv) The dates on which such return or returns were filed and on which the tax for such taxable year or years was paid,

(v) The type of real property reacquired, the terms under which such property was sold and reacquired, and an indication of whether the taxpayer is applying the provisions of § 1.1038–2 to the reacquisition of such property,

(vi) If § 1.1038–2 is being applied to the reacquisition, the terms under which the old residence was resold and, if applicable, the terms under which the new residence was sold, and

(vii) The office where, and the date when, the election to apply section 121 in respect to any sale of such property was or will be made.

(3) *Place for filing.* Any claim for refund, amended return, or statement, filed under this paragraph in respect of any taxable year, whether the taxable year in which occurs the reacquisition of property or the taxable year in which occurs the resale of the old residence, shall be filed in the office of the district director in which the return for such taxable year was or will be filed.

(c) *Extension of period of limitations on assessment or refund*—(1) *Assessment of tax.* If an election is properly made under paragraph (b) of this section and the assessment of a deficiency for the taxable years to which such election applies is not prevented on September 2, 1964, by the operation of any law or rule of law, the period within which a deficiency for such taxable years may be assessed shall, to the extent such deficiency is attributable to the application of section 1038, not expire prior to one year after the date on which such election is made.

(2) *Refund of tax.* If an election is properly made under paragraph (b) of this section and the credit or refund of any overpayment for the taxable years to which such election applies is not prevented on September 2, 1964, by the operation of any law or rule of law, the period within which a claim for credit or refund of an overpayment for such taxable years may be filed shall, to the extent such overpayment is attributable to the application of section 1038, not expire prior to one year after the date on which such election is made.

(d) *Payment of interest for period prior to September 2, 1964.* No interest shall be payable with respect to any deficiency attributable to the application of the provisions of section 1038, and no interest shall be allowed with respect to any credit or refund of any overpayment attributable to the application of such section, for any period prior to September 2, 1964. See section 2(c)(3) of the Act of September 2, 1964 (Pub. L. 88–750, 78 Stat. 856).

[T.D. 6916, 32 FR 5930, Apr. 13, 1967]

§1.1039–1 Certain sales of low-income housing projects.

(a) *Nonrecognition of gain.* Section 1039 provides rules under which the taxpayer may elect not to recognize gain in certain cases where a qualified housing project is sold or disposed of after October 9, 1969, in an approved disposition and another such qualified housing project or projects (referred to as the *replacement project*) is acquired, constructed, or reconstructed within a specified reinvestment period. If the requirements of section 1039 are met, and if the taxpayer makes an election in accordance with the provisions of paragraph (b)(4) of this section, then the gain realized upon the sale or disposition is recognized only to the extent that the net amount realized on such sale or disposition exceeds the cost of the replacement project. However, notwithstanding section 1039, gain may be recognized by reason of the application of section 1245 or 1250 to the sale or disposition. (See §1.1245–6(b) and §1.1250–3(h). The terms *qualified housing project, approved disposition, reinvestment period,* and *net amount realized* are defined in paragraph (c) of this section.

(b) *Rules of application*—(1) *In general.* The election under section 1039(a) may be made only by the taxpayer owning the qualified housing project disposed of. Thus, if the qualified housing project disposed of is owned by a partnership, the partnership must make the election. (See section 703(b).) Similarly, if the qualified housing project disposed of is owned by a corporation or trust, the corporation or trust must make the election. In addition, the reinvestment of the taxpayer must be in such a manner that the taxpayer would be entitled to a deduction for depreciation on the replacement project. Thus, if the qualified housing project disposed of is owned by individual A, the purchase by A of stock in a corporation owning or constructing such a project or of an interest in a partnership owning or constructing such a project will not be considered as the purchase or construction by A of such a project.

(2) *Special rules.* (i) The cost of a replacement project acquired before the approved disposition of a qualified housing project shall be taken into account under section 1039 only if such

property is held by the taxpayer on the date of the approved disposition.

(ii) Except as provided in section 1039 (d), no property acquired by the taxpayer shall be taken into account for purposes of section 1039(a)(2) unless the unadjusted basis of such property is its cost within the meaning of section 1012. For example, if a qualified housing project is acquired in an exchange under section 1031, relating to exchange of property held for productive use or investment, such property will not be taken into account under section 1039(a)(2) because its basis is determined by reference to the basis of the property exchanged. (See section 1031(d).)

(3) *Cost of replacement project.* The taxpayer's cost for the replacement project includes only amounts properly treated as capital expenditures by the taxpayer that are attributable to acquisition, construction, or reconstruction made within the reinvestment period (as defined in paragraph (c)(4) of this section). See section 263 for rules as to what constitutes capital expenditures. Thus, assume that a calendar year taxpayer realizes gain in 1970 upon the approved disposition of a qualified housing project occurring on January 1, 1970. If the taxpayer had begun construction of another qualified housing project on January 1, 1969, and completes such construction on June 1, 1972, only that portion of the cost attributable to the period before January 1, 1972, constitutes the cost of the replacement project for purposes of section 1039. For purposes of determining the cost of a replacement project attributable to a particular period, the total cost of the project may be allocated to such period on the basis of the portion of the total project actually constructed during such period.

(4) *Election.* (i) An election not to recognize the gain realized upon an approved disposition of a qualified housing project to the extent provided in section 1039(a) may be made by attaching a statement to the income tax return filed for the first taxable year in which any portion of the gain on such disposition is realized. Such a statement shall contain the information required by subdivision (iii) of this subparagraph. If the taxpayer does not file such a statement for the first taxable year in which any portion of the gain is realized, but fails to report a portion of the gain realized upon the approved disposition as income for such year or for any subsequent taxable year, then an election shall be deemed to be made under section 1039 (a) with respect to that portion of the gain not reported as income.

(ii) An election may be made under section 1039(a) even though the replacement project has not been acquired or constructed at the time of election. However, if an election has been made and (*a*) a replacement project is not constructed, reconstructed, or acquired, (*b*) the cost of the replacement project is lower than the net amount realized from the approved disposition, or (*c*) a decision is made not to construct, reconstruct, or acquire a replacement project, then the tax liability for the year or years for which the election was made shall be recomputed and an amended return filed. An election may be made even though the taxpayer has filed his return and recognized gain upon the disposition provided that the period of limitation on filing claims for credit or refund prescribed by section 6511 has not expired. In such case, a statement containing the information required by subdivision (iii) of this subparagraph should be filed together with a claim for credit or refund for the taxable year or years in which gain was recognized.

(iii) The statement referred to in subdivisions (i) and (ii) of this subparagraph shall contain the following information:

(*a*) The date of the approved disposition;

(*b*) If a replacement project has been acquired, the date of acquisition and cost of the project;

(*c*) If a replacement project has been constructed or reconstructed by or for the taxpayer, the date construction was begun, the date construction was completed, and the percentage of construction completed within the reinvestment period;

(*d*) If no replacement project has been constructed, reconstructed, or acquired prior to the time of filing of the statement, the estimated cost of such construction, reconstruction, or acquisition;

(*e*) The adjusted basis of the project disposed of; and

(*f*) The amount realized upon the approved disposition and a description of the expenses directly connected with the disposition and the taxes (other than income taxes) attributable to the disposition.

(c) *Definitions*—(1) *General.* The definitions contained in subparagraphs (2) through (5) of this paragraph shall apply for purposes of this section.

(2) *Qualified housing project.* The term *qualified housing project* means a rental or cooperative housing project for lower income families that has been constructed, reconstructed, or rehabilitated pursuant to a mortgage which is insured under section 221(d)(3) or 236 of the National Housing Act, provided that with respect to the housing project disposed of and the replacement project constructed, reconstructed, or acquired, the owner of the project at the time of the approved disposition and prior to the close of the reinvestment period is, under such sections or regulations issued thereunder,

(i) Limited as to rate of return on his investment in the project, and

(ii) Limited as to rentals or occupancy charges for units in the project.

If the owner of the project is organized and operated as a nonprofit cooperative or other nonprofit organization, then such owner shall be considered to meet the requirement of subdivision (i) of this subparagraph.

(3) *Approved disposition.* The term *approved disposition* means a sale or other disposition of a qualified housing project to the tenants or occupants of units in such project, or to a nonprofit cooperative or other nonprofit organization formed and operated solely for the benefit of such tenants or occupants, provided that it is approved by the Secretary of Housing and Urban Development or his delegate under section 221 (d)(3) or 236 of the National Housing Act or regulations issued under such sections. Evidence of such approval should be attached to the tax return or statement in which the election under section 1039 is made.

(4) *Reinvestment period.* (i) The term *reinvestment period* means the period beginning 1 year before the date of the disposition and ending 1 year after the close of the first taxable year in which any part of the gain from such disposition is realized, or at such later date as may be designated pursuant to an application made by the taxpayer. Such application shall be made before the expiration of one year after the close of the first taxable year in which any part of the gain from such disposition is realized, unless the taxpayer can show to the satisfaction of the district director that—

(*a*) Reasonable cause exists for not having filed the application within the required period, and

(*b*) The filing of such application was made within a reasonable time after the expiration of the required period.

The application shall contain all the information required by paragraph (b)(4) of this section and shall be made to the district director for the internal revenue district in which the return is filed for the first taxable year in which any of the gain from the approved disposition is realized.

(ii) Ordinarily, requests for extension of the reinvestment period will not be granted until near the end of such period and any extension will usually be limited to a period not exceeding one year. Although granting of an extension depends upon the facts and circumstances of a particular case, if a predominant portion of the construction of the replacement project has been completed or is reasonably expected to be completed within the reinvestment period (determined without regard to any extension thereof), an extension of the reinvestment period will ordinarily be granted. The fact that there is a scarcity of replacement property for acquisition will not be considered sufficient grounds for granting an extension.

(5) *Net amount realized.* (i) The *net amount realized* from the approved disposition of a qualified housing project is the amount realized from such disposition, reduced by—

(*a*) The expenses paid or incurred by the taxpayer which are directly connected with the approved disposition, and (*b*) The amount of taxes (other than income taxes) paid or incurred by the taxpayer which are attributable to the approved disposition.

(ii) Examples of expenses directly connected with an approved disposition of a qualified housing project include amounts paid for sales or other commissions, advertising, and for the preparation of a deed or other legal services in connection with the disposition. An amount paid for a repair to the building will be considered as an expense directly connected with the approved disposition under subdivision (i)(*a*) of this subparagraph only if such repair is required as a condition of sale, or is required by the Secretary of Housing and Urban Development or his delegate as a condition of approval of the disposition.

(iii) Examples of taxes that are attributable to the approved disposition include local property transfer taxes and stamp taxes. A local real property tax is not so attributable.

(d) *Basis and holding period of replacement project*—(1) *Basis.* If the taxpayer makes an election under section 1039, the basis of the replacement housing project shall be its cost (including costs incurred subsequent to the reinvestment period) reduced by the amount of gain not recognized under section 1039 (a). If the replacement consists of more than one housing project, the basis determined under this subparagraph shall be allocated to the properties in proportion to their respective costs.

(2) *Holding period.* The holding period of the replacement housing project shall begin on the date the taxpayer acquires such project, that is, on the date the taxpayer first acquires possession or control of such project and bears the burdens and enjoys the benefits of ownership of the replacement project. (For special rule regarding the holding period of property for purposes of section 1250, see section 1250(e)(4).)

(e) *Assessment of deficiencies*—(1) *Deficiency attributable to gain.* If a taxpayer makes an election under section 1039(a) with respect to an approved disposition, any deficiency attributable to the gain on such disposition, for any taxable year in which any part of such gain is realized, may be assessed at any time before the expiration of 3 years after the date the district director or director of the regional service center with whom the return for such year has been filed is notified by the taxpayer of the acquisition or the completion of construction or reconstruction of the replacement qualified housing project or of the failure to acquire, construct, or reconstruct a replacement qualified housing project, as the case may be. Such a deficiency may be assessed before the expiration of such 3-year period notwithstanding the provisions of section 6212(c) or the provisions of any other law or rule of law which would otherwise prevent such assessment. If replacement has been made, such notification shall contain the information required by paragraph (b)(4)(iii) of this section. Such notification shall be attached to the return filed for the taxable year or years in which the replacement occurs, or in which the period for the replacement expires, and a copy of such notification shall be filed with the district director or director of regional service center with whom the election under section 1039(a) was required to be filed, if the return is not filed with such director.

(2) *Deficiency attributable to election.* If gain upon an approved disposition is realized in two (or more) taxable years, and the replacement qualified housing project was acquired, constructed, or reconstructed before the beginning of the last such year, any deficiency, for any taxable year before such last year, which is attributable to an election by the taxpayer under section 1039(a) may be assessed at any time before the expiration of the period within which a deficiency for such last taxable year may be assessed, notwithstanding the provisions of section 6212(c) or 6501 or the provisions of any law or rule of law which would otherwise prevent such assessment. Thus, if gain upon an approved disposition is realized in 1971 and 1975, and if a replacement project is purchased in 1971, any deficiency for 1971 may be assessed within the period for assessing a deficiency for 1975.

[T.D. 7191, 37 FR 12951, June 30, 1972; 37 FR 14385, July 20, 1972, as amended by T.D. 7400, 41 FR 5101, Feb. 4, 1976]

§1.1041–1T Treatment of transfer of property between spouses or incident to divorce (temporary).

Q–1: How is the transfer of property between spouses treated under section 1041?

A–1: Generally, no gain or loss is recognized on a transfer of property from an individual to (or in trust for the benefit of) a spouse or, if the transfer is incident to a divorce, a former spouse. The following questions and answers describe more fully the scope, tax consequences and other rules which apply to transfers of property under section 1041.

(a) *Scope of section 1041 in general.*

Q–2: Does section 1041 apply only to transfers of property incident to divorce?

A–2: No. Section 1041 is not limited to transfers of property incident to divorce. Section 1041 applies to any transfer of property between spouses regardless of whether the transfer is a gift or is a sale or exchange between spouses acting at arm's length (including a transfer in exchange for the relinquishment of property or marital rights or an exchange otherwise governed by another nonrecognition provision of the Code). A divorce or legal separation need not be contemplated between the spouses at the time of the transfer nor must a divorce or legal separation ever occur.

Example 1. A and B are married and file a joint return. A is the sole owner of a condominium unit. A sale or gift of the condominium from A to B is a transfer which is subject to the rules of section 1041.

Example 2. A and B are married and file separate returns. A is the owner of an independent sole proprietorship, X Company. In the ordinary course of business, X Company makes a sale of property to B. This sale is a transfer of property between spouses and is subject to the rules of section 1041.

Example 3. Assume the same facts as in example (2), except that X Company is a corporation wholly owned by A. This sale is not a sale between spouses subject to the rules of section 1041. However, in appropriate circumstances, general tax principles, including the step-transaction doctrine, may be applicable in recharacterizing the transaction.

Q–3: Do the rules of section 1041 apply to a transfer between spouses if the transferee spouse is a nonresident alien?

A–3: No. Gain or loss (if any) is recognized (assuming no other nonrecognition provision applies) at the time of a transfer of property if the property is transferred to a spouse who is a nonresident alien.

Q–4: What kinds of transfers are governed by section 1041?

A–4: Only transfers of property (whether real or personal, tangible or intangible) are governed by section 1041. Transfers of services are not subject to the rules of section 1041.

Q–5: Must the property transferred to a former spouse have been owned by the transferor spouse during the marriage?

A–5: No. A transfer of property acquired after the marriage ceases may be governed by section 1041.

(b) *Transfer incident to the divorce.*

Q–6: When is a transfer of property *incident to the divorce*?

A–6: A transfer of property is *incident to the divorce* in either of the following 2 circumstances—

(1) The transfer occurs not more than one year after the date on which the marriage ceases, or

(2) The transfer is related to the cessation of the marriage.

Thus, a transfer of property occurring not more than one year after the date on which the marriage ceases need not be related to the cessation of the marriage to qualify for section 1041 treatment. (See A–7 for transfers occurring more than one year after the cessation of the marriage.)

Q–7: When is a transfer of property *related to the cessation of the marriage*?

A–7: A transfer of property is treated as related to the cessation of the marriage if the transfer is pursuant to a divorce or separation instrument, as defined in section 71(b)(2), and the transfer occurs not more than 6 years after the date on which the marriage ceases. A divorce or separation instrument includes a modification or amendment to such decree or instrument. Any transfer not pursuant to a divorce or separation instrument and any transfer occurring more than 6 years after the cessation of the marriage is presumed to be not related to the cessation of the marriage. This presumption may be rebutted only by showing that the transfer was made to effect the division of property owned by the former spouses at the time of the cessation of the marriage. For example, the presumption may be rebutted by showing that (a) the transfer was not made within the one- and six-year periods described above because of factors which hampered an earlier transfer of the property, such as legal or business impediments to transfer or disputes concerning the value of the property owned at the time of the cessation of the marriage, and (b) the transfer is effected promptly after the impediment to transfer is removed.

Q–8: Do annulments and the cessations of marriages that are void *ab initio* due to violations of state law constitute divorces for purposes of section 1041?

A–8: Yes.

(c) *Transfers on behalf of a spouse.*

Q–9: May transfers of property to third parties on behalf of a spouse (or former spouse) qualify under section 1041?

A–9: Yes. There are three situations in which a transfer of property to a third party on behalf of a spouse (or former spouse) will qualify under section 1041, provided all other requirements of the section are satisfied. The first situation is where the transfer to the third party is required by a divorce or separation instrument. The second situation is where the transfer to the third party is pursuant to the written request of the other spouse (or former spouse). The third situation is where the transferor receives from the other spouse (or former spouse) a written consent or ratification of the transfer to the third party. Such consent or ratification must state that the parties intend the transfer to be treated as a transfer to the nontransferring spouse (or former spouse) subject to the rules of section 1041 and must be received by the transferor prior to the date of filing of the transferor's first return of tax for the taxable year in which the transfer was made. In the three situations described above, the transfer of property will be treated as made directly to the nontransferring spouse (or former spouse) and the nontransferring spouse will be treated as immediately transferring the property to the third party. The deemed transfer from the nontransferring spouse (or former spouse) to the third party is not a transaction that qualifies for nonrecognition of gain under section 1041.

(d) *Tax consequences of transfers subject to section 1041.*

Q–10: How is the transferor of property under section 1041 treated for income tax purposes?

A–10: The transferor of property under section 1041 recognizes no gain or loss on the transfer even if the transfer was in exchange for the release of marital rights or other consideration. This rule applies regardless of whether the transfer is of property separately owned by the transferor or is a division (equal or unequal) of community property. Thus, the result under section 1041 differs from the result in *United States* v. *Davis,* 370 U.S. 65 (1962).

Q–11: How is the transferee of property under section 1041 treated for income tax purposes?

A–11: The transferee of property under section 1041 recognizes no gain or loss upon receipt of the transferred property. In all cases, the basis of the transferred property in the hands of the transferee is the adjusted basis of such property in the hands of the transferor immediately before the transfer. Even if the transfer is a bona fide sale, the transferee does not acquire a basis in the transferred property equal to the transferee's cost (the fair market value). This carryover basis rule applies whether the adjusted basis of the transferred property is less than, equal to, or greater than its fair market value at the time of transfer (or the value of any consideration provided by the transferee) and applies for purposes of determining loss as well as gain upon the subsequent disposition of the property by the transferee. Thus, this rule is different from the rule applied in section 1015(a) for determining the basis of property acquired by gift.

Q–12: Do the rules described in A–10 and A–11 apply even if the transferred property is subject to liabilities which exceed the adjusted basis of the property?

A–12: Yes. For example, assume A owns property having a fair market value of $10,000 and an adjusted basis of $1,000. In contemplation of making a transfer of this property incident to a divorce from B, A borrows $5,000 from a bank, using the property as security for the borrowing. A then transfers the property to B and B assumes, or takes the property subject to, the liability to pay the $5,000 debt. Under section 1041, A recognizes no gain or loss upon the transfer of the property, and the adjusted basis of the property in the hands of B is $1,000.

Q–13: Will a transfer under section 1041 result in a recapture of investment tax credits with respect to the property transferred?

A–13: In general, no. Property transferred under section 1041 will not be treated as being disposed of by, or ceasing to be section 38 property with respect to, the transferor. However, the transferee will be subject to investment tax credit recapture if, upon or after the transfer, the property is disposed of by, or ceases to be section 38 property with respect to, the transferee. For example, as part of a divorce property settlement, B receives a car from A that has been used in A's business for two years and for which an investment tax credit was taken by A. No part of A's business is transferred to B and B's use of the car is solely personal. B is subject to recapture of the investment tax credit previously taken by A.

(e) *Notice and recordkeeping requirement with respect to transactions under section 1041.*

Q–14: Does the trasnsferor of property in a transaction described in section 1041 have to supply, at the time of the transfer, the transferee with records sufficient to determine the adjusted basis and holding period of the property at the time of the transfer and (if applicable) with notice that the property transferred under section 1041 is potentially subject to recapture of the investment tax credit?

A–14: Yes. A transferor of property under section 1041 must, at the time of the transfer, supply the transferee with records sufficient to determine the adjusted basis and holding period of the property as of the date of the transfer. In addition, in the case of a transfer of property which carries with it a potential liability for investment tax credit recapture, the transferor must, at the time of the transfer, supply the transferee with records sufficient to determine the amount and period of such potential liability. Such records must be preserved and kept accessible by the transferee.

(f) *Property settlements—effective dates, transitional periods and elections.*

Q–15: When does section 1041 become effective?

A–15: Generally, section 1041 applies to all transfers after July 18, 1984. However, it does not apply to transfers after July 18, 1984 pursuant to instruments in effect on or before July 18, 1984. (See A–16 with respect to exceptions to the general rule.)

Q–16: Are there any exceptions to the general rule stated in A–15 above?

A–16: Yes. Two transitional rules provide exceptions to the general rule stated in A–15. First, section 1041 will apply to transfers after July 18, 1984 under instruments that were in effect on or before July 18, 1984 if both spouses (or former spouses) elect to have section 1041 apply to such transfers. Second, section 1041 will apply to all transfers after December 31, 1983 (including transfers under instruments in effect on or before July 18, 1984) if both spouses (or former spouses) elect to have section 1041 apply. (See A–18 relating to the time and manner of making the elections under the first or second transitional rule.)

Q–17: Can an election be made to have section 1041 apply to some, but not all, transfers made after December 31, 1983, or some but not all, transfers made after July 18, 1984 under instruments in effect on or before July 18, 1984?

A–17: No. Partial elections are not allowed. An election under either of the two elective transitional rules applies to all transfers governed by that election whether before or after the election is made, and is irrevocable.

(g) *Property settlements—time and manner of making the elections under section 1041.*

Q–18: How do spouses (or former spouses) elect to have section 1041 apply to transfers after December 31, 1983, or to transfers after July 18, 1984 under instruments in effect on or before July 18, 1984?

A–18: In order to make an election under section 1041 for property transfers after December 31, 1983, or property transfers under instruments that were in effect on or before July 18, 1984, both spouses (or former spouses) must elect the application of the rules of section 1041 by attaching to the transferor's first filed income tax return for the taxable year in which the first transfer occurs, a statement signed by both spouses (or former spouses) which includes each spouse's social security number and is in substantially the form set forth at the end of this answer.

In addition, the transferor must attach a copy of such statement to his or her return for each subsequent taxable year in which a transfer is made that is governed by the transitional election. A copy of the signed statment must be kept by both parties.

The election statements shall be in substantially the following form:

In the case of an election regarding transfers after 1983:

SECTION 1041 ELECTION

The undersigned hereby elect to have the provisions of section 1041 of the Internal Revenue Code apply to all qualifying transfers of property after December 31, 1983. The undersigned understand that section 1041 applies to all property transferred between spouses, or former spouses incident to divorce. The parties further understand that the effects for Federal income tax purposes of having section 1041 apply are that (1) no gain or loss is recognized by the transferor spouse or former spouse as a result of this transfer; and (2) the basis of the transferred property in the hands of the transferee is the adjusted basis of the property in the hands of the transferor immediately before the transfer, whether or not the adjusted basis of the transferred property is less than, equal to, or greater than its fair market value at the time of the transfer. The undersigned understand that if the transferee spouse or former spouse disposes of the property in a transaction in which gain is recognized, the amount of gain which is taxable may be larger than it would have been if this election had not been made.

In the case of an election regarding preexisting decrees:

SECTION 1041 ELECTION

The undersigned hereby elect to have the provisions of section 1041 of the Internal Revenue Code apply to all qualifying transfers of property after July 18, 1984 under any instrument in effect on or before July 18, 1984. The undersigned understand that section 1041 applies to all property transferred between spouses, or former spouses incident to the divorce. The parties further understand that the effects for Federal income tax purposes of having section 1041 apply are that (1) no gain or loss is recognized by the transferor spouse or former spouse as a result of this transfer; and (2) the basis of the transferred property in the hands of the transferee is the adjusted basis of the property in the hands of the transferor immediately before the transfer, whether or not the adjusted basis of the transferred property is less than, equal to, or greater than its fair market value at the time of the transfer. The undersigned understand that if the transferee spouse or former spouse disposes of the property in a transaction in which gain is recognized, the amount of gain which is taxable may be larger than it would have been if this election had not been made.

(Secs. 1041(d)(4), (98 Stat. 798, 26 U.S.C. 1041(d)(4)), 152(e)(2)(A) (98 Stat. 802, 26 U.S.C. 152(e)(2)(A)), 215(c) (98 Stat. 800, 26 U.S.C. 215(c)) and 7805 (68A Stat. 917, 26 U.S.C. 7805) of the Internal Revenue Code of 1954))

[T.D. 7973, 49 FR 34452, Aug. 31, 1984]

§ 1.1042–1T Questions and answers relating to the sales of stock to employee stock ownership plans or certain cooperatives (temporary).

Q–1: What does section 1042 provide?

A–1: (a) Section 1042 provides rules under which a taxpayer may elect not to recognize gain in certain cases where *qualified securities* are sold to a qualifying employee stock ownership plan or worker-owned cooperative in taxable years of the seller beginning after July 18, 1984, and *qualified replacement property* is purchased by the taxpayer within the *replacement period.* If the requirements of Q&A–2 of this section are met, and if the taxpayer makes an election under section 1042(a) in accordance with Q&A–3 of this section, the gain realized by the taxpayer on the sale of the qualified securities is recognized only to the extent that the amount realized on such sale exceeds the cost to the taxpayer of the qualified replacement property.

(b) Under section 1042, the term *qualified securities* means employer securities (as defined in section 409(l)) with respect to which each of the following requirements is satisfied: (1) The employer securities were issued by a domestic corporation; (2) for at least one year before and immediately after the sale, the domestic corporation that issued the employer securities (and each corporation that is a member of a *controlled group of corporations* with such corporation for purposes of section 409(l)) has no stock outstanding that is readily tradeable on an established market; (3) as of the time of the sale, the employer securities have been held by the taxpayer for more than 1 year; and (4) the employer securities were not received by the taxpayer in a distribution from a plan described in section 401(a) or in a transfer pursuant to an option or other right to acquire stock to which section 83, 422, 422A, 423, or 424 applies.

(c) The term *replacement period* means the period which begins 3 months before the date on which the sale of qualified securities occurs and which ends 12 months after the date of such sale. A replacement period may include any period which occurs prior to July 19, 1984.

(d) The term *qualified replacement property* means any securities (as defined in section 165(g)(2)) issued by a domestic corporation which does not, for the taxable year of such corporation in which the securities are purchased by the taxpayer, have passive investment income (as defined in section 1362(d)(3)(D)) that exceeds 25 percent of the gross receipts of such corporation for the taxable year preceding the taxable year of purchase. In addition, securities of the domestic corporation that issued the employer securities qualifying under section 1042 (and of any corporation that is a member of a *controlled group of corporations* with such corporation for purposes of section 409(l)) will not qualify as *qualified replacement property*.

(e) For purposes of section 1042(a), there is a *purchase* of qualified replacement property only if the basis of such property is determined by reference to its cost to the taxpayer. If the basis of the qualified replacement property is determined by reference to its basis in the hands of the transferor thereof or another person, or by reference to the basis of property (other than cash or its equivalent) exchanged for such property, then the basis of such property is not determined solely by reference to its cost to the taxpayer.

Q–2: What is a sale of qualified securities for purposes of section 1042(b)?

A–2: (a) Under section 1042(b), a sale of qualified securities is one under which all of the following requirements are met:

(1) The qualified securities are sold to an employee stock ownership plan (as defined in section 4975(e)(7)) maintained by the corporation that issued the qualified securities (or by a member of the *controlled group of corporations* with such corporation for purposes of section 409(l)) or to an eligible worker-owned cooperative (as defined in section 1042(c)(2));

(2) The employee stock ownership plan or eligible worker-owned cooperative owns, immediately after the sale, 30 percent or more of the total value of the employer securities (within the meaning of section 409(l) outstanding as of such time;

(3) No portion of the assets of the employee stock ownership plan or eligible worker-owned cooperative attributable to qualified securities that are sold to the plan or cooperative by the taxpayer or by any other person in a sale with respect to which an election under section 1042(a) is made accrue under the plan or are allocated by the cooperative, either directly or indirectly and either concurrently with or at any time thereafter, for the benefit of (i) the taxpayer; (ii) any person who is a member of the family of the taxpayer (within the meaning of section 267(c)(4)); or (iii) any person who owns (after the application of section 318(a)), at any time after July 18, 1984, and until immediately after the sale, more than 25 percent of in value of the outstanding portion of any class of stock of the corporation that issued the qualified securities (or of any member of the *controlled group of corporations* with such corporation for purposes of section 409(l)). For purposes of this calculation, stock that is owned, directly or indirectly, by or for a qualified plan shall not be treated as outstanding.

(4) The taxpayer files with the Secretary (as part of the required election described in Q&A–3 of this section) a

verified written statement of the domestic corporation (or corporations) whose employees are covered by the plan acquiring the qualified securities or of any authorized officer of the eligible workerowned cooperative, consenting to the application of section 4978(a) with respect to such corporation or cooperative.

(b) For purposes of determining whether paragraph (a)(2) of this section is satisfied, sales of qualified securities by two or more taxpayers may be treated as a single sale if such sales are made as part of a single, integrated transaction under a prearranged agreement between the taxpayers.

(c) For purposes of determining whether paragraph (a)(3) of this section is satisfied with respect to the prohibition against an accrual or allocation of qualified securities, the accrual or allocation of any benefits or contributions or other assets that are not attributable to qualified securities sold to the employee stock ownership plan or eligible worker-owned cooperative in a sale with respect to which an election under section 1042(a) is made (including any accrual or allocation under any other plan or arrangement maintained by the corporation or any member of *the controlled group of corporations* with such corporation for purposes of section 409(l)) must be made without regard to the allocation of such qualified securities. Paragraph (a)(3) of this section above may be illustrated in part by the following example: Individuals A, B, and C own 50, 25, and 25, respectively, of the 100 outstanding shares of common stock of Corporation X. Such shares constitute qualified securities as defined in Q&A–1 of this section. A and B, but not C, are employees of Corporation X. For the benefit of all its employees, Corporation X establishes an employee stock ownership plan that obtains a loan meeting the exemption requirements of section 4975(d)(3). The loan proceeds are used by the plan to purchase the 100 shares of qualified securities from A, B, and C, all of whom elect nonrecognition treatment under section 1042(a) with respect to the gain realized on their sale of such securities. Under the requirements of paragraph (a)(3) of this section, no part of the assets of the plan attributable to the 100 shares of qualified securities may accrue under the plan (or under any other plan or arrangement maintained by Corporation X) for the benefit of A or B or any person who is a member of the family of A or B (as determined under section 267(c)(4)). Furthermore, no other assets of the plan or assets of the employer may accrue for the benefit of such individuals in lieu of the receipt of assets attributable to such qualified securities.

(d) A sale under section 1042(a) shall not include any sale of securities by a dealer or underwriter in the ordinary course of its trade or business as a dealer or underwriter, whether or not guaranteed.

Q–3: What is the time and manner for making the election under section 1042(a)?

A–3: (a) The election not to recognize the gain realized upon the sale of qualified securities to the extent provided under section 1042(a) shall be made in a *statement of election* attached to the taxpayer's income tax return filed on or before the due date (including extensions of time) for the taxable year in which the sale occurs. If a taxpayer does not make a timely election under this section to obtain section 1042(a) nonrecognition treatment with respect to the sale of qualified securities, it may not subsequently make an election on an amended return or otherwise. Also, an election once made is irrevocable.

(b) The statement of election shall provide that the taxpayer elects to treat the sale of securities as a sale of qualified securities under section 1042(a), and shall contain the following information:

(1) A description of the qualified securities sold, including the type and number of shares;

(2) The date of the sale of the qualified securities;

(3) The adjusted basis of the qualified securities;

(4) The amount realized upon the sale of the qualified securities;

(5) The identity of the employee stock ownership plan or eligible worker-owned cooperative to which the qualified securities were sold; and

(6) If the sale was part of a single, interrelated transaction under a prearranged agreement between taxpayers involving other sales of qualified securities, the names and taxpayer identification numbers of the other taxpayers under the agreement and the number of shares sold by the other taxpayers. See Q&A–2 of this section.

If the taxpayer has purchased qualified replacement property at the time of the election, the taxpayer must attach as part of the statement of election a *statement of purchase* describing the qualified replacement property, the date of the purchase, and the cost of the property, and declaring such property to be the qualified replacement property with respect to the sale of qualified securities. Such statement of purchase must be notarized by the later of thirty days after the purchase or March 6, 1986. In addition, the statement of election must be accompanied by the verified written statement of consent required under Q&A–2 of this section with respect to the qualified securities sold.

(c) If the taxpayer has not purchased qualified replacement property at the time of the filing of the statement of election, a timely election under this Q&A shall not be considered to have been made unless the taxpayer attaches the notarized statement of purchase described above to the taxpayer's income tax return filed for the taxable year following the year for which the election under section 1042(a) was made. Such notarized statement of purchase shall be filed with the district director or the director of the regional service center with whom such election was originally filed, if the return is not filed with such director.

Q–4: What is the basis of qualified replacement property?

A–4: If a taxpayer makes an election under section 1042(a), the basis of the qualified replacement property purchased by the taxpayer during the replacement period shall be reduced by an amount equal to the amount of gain which was not recognized. If more than one item of qualified replacement property is purchased, the basis of each of such items shall be reduced by an amount determined by multiplying the total gain not recognized by reason of the application of section 1042(a) by a fraction, the numerator of which is the cost of such item of property and the denominator of which is the total cost of all such items of property. For the rule regarding the holding period of qualified replacement property, see section 1223(13).

Q–5: What is the statute of limitations for the assessment of a deficiency relating to the gain on the sale of qualified securities?

A–5: (a) If any gain is realized by the taxpayer on the sale of any qualified securities and such gain has not been recognized under section 1042(a) in accordance with the requirements of this section, the statutory period provided in section 6501(a) for the assessment of any deficiency with respect to such gain shall not expire prior to the expiration of 3 years from the date of receipt, by the district director or director of regional service center with whom the statement of election under 1042(a) was originally filed, of:

(1) A notarized statement of purchase as described in Q&A–3;

(2) A written statement of the taxpayer's intention not to purchase qualified replacement property within the replacement period; or

(3) A written statement of the taxpayer's failure to purchase qualified replacement property within the replacement period.

In those situations when a taxpayer is providing a written statement of an intention not to purchase or of a failure to purchase qualified replacement property, the statement shall be accompanied, where appropriate, by an amended return for the taxable year in which the gain from the sale of the qualified securities was realized, in order to reflect the inclusion in gross income for that year of gain required to be recognized in connection with such sale.

(b) Any gain from the sale of qualified securities which is required to be recognized due to a failure to meet the requirements under section 1042 shall be included in the gross income for the taxable year in which the gain was realized. If any gain from the sale of qualified securities is not recognized under section 1042(a) in accordance with the requirements of this section, any deficiency attributable to any portion of such gain may be assessed at any time before the expiration of the 3-year period described in this Q&A, notwithstanding the provision of any law or rule of law which would otherwise prevent such assessment.

Q–6: When does section 1042 become effective?

A–6: Section 1042 applies to sales of qualified securities in taxable years of sellers beginning after July 18, 1984.

[T.D. 8073, 51 FR 4333, Feb. 4, 1986]

§ 1.1044(a)–1 Time and manner for making election under the Omnibus Budget Reconciliation Act of 1993.

(a) *Description*. Section 1044(a), as added by section 13114 of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66, 107 Stat. 430), generally allows individuals and C corporations that sell publicly traded securities after August 9, 1993, to elect not to recognize certain gain from the sale if the taxpayer purchases common stock or a partnership interest in a specialized small business investment company (SSBIC) within the 60-day period beginning on the date the publicly traded securities are sold.

(b) *Time and manner for making the election*. The election under section 1044(a) must be made on or before the due date (including extensions) for the income tax return for the year in which the publicly traded securities are sold. The election is to be made by reporting the entire gain from the sale of publicly traded securities on Schedule D of the income tax return in accordance with instructions for Schedule D, and by attaching a statement to Schedule D showing—

(1) How the nonrecognized gain was calculated;

(2) The SSBIC in which common stock or a partnership interest was purchased;

(3) The date the SSBIC stock or partnership interest was purchased; and

(4) The basis of the SSBIC stock or partnership interest.

(c) *Revocability of election*. The election described in this section is revocable with the consent of the Commissioner.

(d) *Effective date*. The rules set forth in this section are effective December 12, 1996.

[T.D. 8688, 61 FR 65322, Dec. 12, 1996]

SPECIAL RULES

§ 1.1051–1 Basis of property acquired during affiliation.

(a)(1) The basis of property acquired by a corporation during a period of affiliation from a corporation with which it was affiliated shall be the same as it would be in the hands of the corporation from which acquired. This rule is applicable if the basis of the property is material in determining tax liability for any year, whether a separate return or a consolidated return is made in respect of such year. For the purpose of this section, the term *period of affiliation* means the period during which such corporations were affiliated (determined in accordance with the law applicable thereto), but does not include any taxable year beginning on or after January 1, 1922, unless a consolidated return was made, nor any taxable year after the taxable year 1928.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: The X Corporation, the Y Corporation, and the Z Corporation were affiliated for the taxable year 1920. During that year the X Corporation transferred assets to the Y Corporation for $120,000 cash, and the Y Corporation in turn transferred the assets during the same year to the Z Corporation for $130,000 cash. The assets were acquired by the X Corporation in 1916 at a cost of $100,000. The basis of the assets in the hands of the Z Corporation is $100,000.

(b) The basis of property acquired by a corporation during any period, in the taxable year 1929 or any subsequent taxable year, in respect of which a consolidated return was made or was required under the regulations governing the making of consolidated returns, shall be determined in accordance with such regulations. The basis in the case of property held by a corporation during any period, in the taxable year 1929 or any subsequent taxable year, in respect of which a consolidated return is made or is required under the regulations governing the making of consolidated returns, shall be adjusted in respect of any items relating to such period in accordance with such regulations.

(c) Except as otherwise provided in the regulations promulgated under section 1502 of the Internal Revenue Code of 1954 or the regulations under section 141 of the Internal Revenue Code of 1939 or the Revenue Act of 1938 (52 Stat. 447), 1936 (49 Stat. 1652), 1934 (48 Stat. 683), 1932 (47 Stat. 169), or 1928 (45 Stat. 791), the basis of property after a consolidated return period shall be the same as the basis immediately prior to the close of such period.

§1.1052–1 Basis of property established by Revenue Act of 1932.

Section 1052(a) provides that if property was acquired after February 28, 1913, in any taxable year beginning before January 1, 1934, and the basis of the property, for the purposes of the Revenue Act of 1932 (47 Stat. 169), was prescribed by section 113(a) (6), (7), or (9) of that act, then for purposes of subtitle A of the Code, the basis shall be the same as the basis prescribed in the Revenue Act of 1932. For the rules applicable in determining the basis of stocks or securities under section 113(a)(9) of the Revenue Act of 1932 in case of certain distributions after December 31, 1923, and in any taxable year beginning before January 1, 1934, see 26 CFR (1939) 39.113 (a)(12)–1 (Regulations 118).

§1.1052–2 Basis of property established by Revenue Act of 1934.

Section 1052(b) provides that if property was acquired after February 28, 1913, in any taxable year beginning before January 1, 1936, and the basis of the property for the purposes of the Revenue Act of 1934 (48 Stat. 683) was prescribed by section 113(a) (6), (7), or (8) of that act, then for purposes of subtitle A of the Code, the basis shall be the same as the basis prescribed in the Revenue Act of 1934. For example, if after December 31, 1920, and in any taxable year beginning before January 1, 1936, property was acquired by a corporation by the issuance of its stock or securities in connection with a transaction which is not described in section 112(b)(5) of the Internal Revenue Code of 1939 but which is described in section 112(b)(5) of the Revenue Act of 1934, the basis of the property so acquired shall be the same as it would be in the hands of the transferor, with proper adjustments to the date of the exchange.

§1.1052–3 Basis of property established by the Internal Revenue Code of 1939.

Section 1052(c) provides that if property was acquired after February 28, 1913, in a transaction to which the Internal Revenue Code of 1939 applied and the basis thereof was prescribed by section 113(a) (6), (7), (8), (13), (15), (18), (19) or (23) of such Code, then for purposes of subtitle A of the Internal Revenue Code of 1954, the basis shall be the same as the basis prescribed in the Internal Revenue Code of 1939. In such cases, see section 113(a) of the Internal Revenue Code of 1939 and the regulations thereunder.

§1.1053–1 Property acquired before March 1, 1913.

(a) *Basis for determining gain.* In the case of property acquired before March 1, 1913, the basis as of March 1, 1913, for determining gain is the cost or other basis, adjusted as provided in section 1016 and other applicable provisions of chapter 1 of the Code, or its fair market value as of March 1, 1913, whichever is greater.

(b) *Basis for determining loss.* In the case of property acquired before March 1, 1913, the basis as of March 1, 1913, for determining loss is the basis determined in accordance with part II (section 1011 and following), subchapter O, chapter 1 of the Code, or other applicable provisions of chapter 1 of the Code, without reference to the fair market value as of March 1, 1913.

(c) *Example.* The application of paragraphs (a) and (b) of this section may be illustrated by the following example:

Example: (i) On March 1, 1908, a taxpayer purchased for $100,000, property having a useful life of 50 years. Assuming that there were no capital improvements to the property, the depreciation sustained on the property before March 1, 1913, was $10,000 (5 years @ $2,000), so that the original cost adjusted, as of March 1, 1913, for depreciation sustained prior to that date is $90,000. On that date the property had a fair market value of $94,500 with a remaining life of 45 years.

(ii) For the purpose of determining gain from the sale or other disposition of the property on March 1, 1954, the basis of the property is the fair market value of $94,500 as of March 1, 1913, adjusted for depreciation allowed or allowable after February 28, 1913, computed on $94,500. Thus, the substituted basis, $94,500, is reduced by the depreciation adjustment from March 1, 1913, to February 28, 1954, in the aggregate of $86,100 (41 years @ $2,100), leaving an adjusted basis for determining gain of $8,400 ($94,500 less $86,100).

(iii) For the purpose of determining loss from the sale or other disposition of such property on March 1, 1954, the basis of the property is its cost, adjusted for depreciation sustained before March 1, 1913, computed on cost, and the amount of depreciation allowed or allowable after February 28, 1913, computed on the fair market value of $94,500 as of March 1, 1913. In this example, the amount of depreciation sustained before March 1, 1913, is $10,000 and the amount of depreciation determined for the period after February 28, 1913, is $86,100. Therefore, the aggregate amount of depreciation for which the cost ($100,000) should be adjusted is $96,100 ($10,000 plus $86,100), and the adjusted basis for determining loss on March 1, 1954, is $3,900 ($100,000 less $96,100).

(d) *Fair market value.* The determination of the fair market value of property on March 1, 1913, is generally a question of fact and shall be established by competent evidence. In determining the fair market value of stock or other securities, due regard shall be given to the fair market value of the corporate assets as of such date, and other pertinent factors. In the case of property traded in on public exchanges, actual sales on or near the basic date afford evidence of value. In general, the fair market value of a block or aggregate of a particular kind of property is not to be determined by a forced-sale price, or by an estimate of what a whole block or aggregate would bring if placed upon the market at one and the same time. In such a case the value should be determined by ascertaining as the basis the fair market value of each unit of the property. All relevant facts and elements of value as of the basic date should be considered in each case.

§ 1.1054–1 Certain stock of Federal National Mortgage Association.

(a) *In general.* The basis in the hands of the initial holder of a share of stock which is issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., section 1718) in a taxable year beginning after December 31, 1959, shall be an amount equal to the issuance price of the stock reduced by the amount, if any, required by section 162(d) to be treated (with respect to such share) as an ordinary and necessary business expense. See section 162(d) and § 1.162–19. For purposes of this section the initial holder is the original purchaser who is issued stock of the Federal National Mortgage Association (FNMA) pursuant to section 303(c) of the Act and who appears on the books of FNMA as the initial holder. See § 1.162–19.

(b) *Example.* The provisions of this section may be illustrated by the following example:

Example: Pursuant to section 303(c) of the Federal National Mortgage Association Charter Act a certificate of FNMA stock is issued to A as of January 1, 1961. The issuance price of the stock was $100 and the fair market value of the stock on the date of issue was $69. A was required by section 162(d) to treat $31 as a business expense for the year 1961. The basis of the share of stock in the hands of A, the initial holder, shall be $69, the amount paid for the stock ($100) reduced by $31.

[T.D. 6690, 28 FR 12254, Nov. 19, 1963]

§ 1.1055–1 General rule with respect to redeemable ground rents.

(a) *Character of a redeemable ground rent.* For purposes of subtitle A of the Code (1) a redeemable ground rent (as defined in section 1055(c) and paragraph (b) of this section) shall be treated as being in the nature of a mortgage, and (2) real property held subject to liabilities under such a redeemable ground rent shall be treated as held subject to liabilities under a mortgage. Thus, under section 1055(a) and this paragraph, the transfer of property subject to a redeemable ground rent has the same effect as the transfer of property subject to a mortgage, the acquisition of property subject to a redeemable ground rent is to be treated the same as the acquisition of property subject to a mortgage, and the holding of property subject to a redeemable ground rent is to be treated in the same manner as the holding of property subject to a mortgage. See section 163(c) for the treatment of any annual or periodic rental payment under a redeemable ground rent as interest.

(b) *Definition of redeemable ground rent.* For purposes of subtitle A of the Code, the term *redeemable ground rent* means only a ground rent with respect to which all the following conditions are met:

(1) There is a lease of land which is assignable by the lessee without the consent of the lessor.

(2) The term of the lease is for a period in excess of 15 years, taking into account all periods for which the lease may be renewed at the option of the lessee.

(3) The lessee has a present or future right to terminate the lease and to acquire the lessor's interest in the land (i.e., to redeem the ground rent) by the payment of a determined or determinable amount, which amount is referred to in §§1.1055–2, 1.1055–3, and 1.1055–4 as a *redemption price.* Such right must exist by virtue of State or local law. If the lessee's right to terminate the lease and to acquire the lessor's interest is not granted by State or local law but exists solely by virtue of a private agreement or privately created condition, the ground rent is not a *redeemable ground rent.*

(4) The lessor's interest in the land subject to the lease is primarily a security interest to protect the payment to him of the annual or periodic rental payments due under the lease.

(c) *Effective date.* In general, the provisions of section 1055 and paragraph (a) of this section take effect on April 11, 1963, and apply with respect to taxable years ending on or after such date. See §1.1055–3 for rules for determining the basis of real property acquired subject to liabilities under a redeemable ground rent regardless of when such property was acquired. See also §1.1055–4 for rules for determining the basis of a redeemable ground rent in the hands of a holder who reserved or created such ground rent in connection with a transfer, occurring before April 11, 1963, of the right to hold real property subject to liabilities under such ground rent.

[T.D. 6821, 30 FR 6216, May 4, 1965]

§1.1055–2 Determination of amount realized on the transfer of the right to hold real property subject to liabilities under a redeemable ground rent.

In determining the amount realized from a transfer, occurring on or after April 11, 1963, of the right to hold real property subject to liabilities under a redeemable ground rent, such ground rent shall be accounted for in the same manner as a mortgage for an amount of money equal to the redemption price of the ground rent. The provisions of this section apply in respect of any such transfer even though such ground rent was created prior to April 11, 1963. For provisions relating to the determination of the amount of and recognition of gain or loss from the sale or other disposition of property, see section 1001 and the regulations thereunder.

[T.D. 6821, 30 FR 6217, May 4, 1965]

§1.1055–3 Basis of real property held subject to liabilities under a redeemable ground rent.

(a) *In general.* The provisions of section 1055(a) and paragraph (a) of §1.1055–1 are applicable in determining the basis of real property held on or after April 11, 1963, in any case where the property at the time of acquisition was subject to liabilities under a redeemable ground rent. (See section 1055(b)(2).) Thus, if on or after April 11, 1963, a taxpayer holds real property which was subject to liabilities under a redeemable ground rent at the time he acquired it, the basis of such property in the hands of such taxpayer, regardless of when the property was acquired, will include the redeemable ground rent in the same manner as if it were a mortgage in an amount equal to the redemption price of such ground rent. Likewise, if on or after April 11, 1963, a taxpayer holds real property which was subject to liabilities under a redeemable ground rent at the time he acquired it and which has a substituted basis in his hands, the basis of the property in the hands of the taxpayer's predecessor in interest is to be determined by treating the redeemable ground rent in the same manner as a mortgage in an amount equal to the redemption price of such ground rent.

(b) *Illustrations.* The provisions of this section may be illustrated by the following examples:

Example 1. On April 11, 1963, taxpayer A held residential property which he acquired on January 15, 1963, for a purchase price of $10,000 and which, at the time he acquired it, was subject to a ground rent redeemable for a redemption price of $1,600. A's basis for the property includes the purchase price ($10,000) plus the redeemable ground rent in the same manner as if it were a mortgage for $1,600.

Example 2. In 1962, taxpayer X, a corporation, acquired real property subject to a redeemable ground rent in a transfer to which section 351 (relating to transfer of property to corporation controlled by transferor) applied and in which the basis of the property to X was the transferor's basis. X still held the property on April 11, 1963. The transferor's basis in the property is to be determined by treating the redeemable ground rent to which it was subject in the transferor's hands as if it were a mortgage.

[T.D. 6821, 30 FR 6217, May 4, 1965]

§ 1.1055–4 Basis of redeemable ground rent reserved or created in connection with transfers of real property before April 11, 1963.

(a) *In general.* In the case of a redeemable ground rent created or reserved in connection with a transfer, occurring before April 11, 1963, of the right to hold real property subject to liabilities under such ground rent, the basis of such ground rent on or after April 11, 1963, in the hands of the person who reserved or created the ground rent is the amount which was taken into account in respect of such ground rent in computing the amount realized from the transfer of such real property. Thus, if no such amount was taken into account, such basis shall be determined without regard to section 1055. (See section 1055(b)(3).)

(b) The provisions of this section may be illustrated by the following examples:

Example 1. The taxpayer, who was in the business of building houses, purchased an undeveloped lot of land for $500 and built a house thereon at a cost of $10,000. Subsequently, he transferred the right to hold the lot improved by the house for a consideration of $12,000, and an annual ground rent for such property of $120 which was redeemable for a redemption price of $2,000. The taxpayer reported a $2,000 gain on the transfer, treating the amount realized as $12,000 and his cost allocable to the interest transferred as $10,000. Since the builder did not take the redeemable ground rent into account in computing gain on the transfer, his basis for such ground rent is $500 (the cost of the land not offset against the consideration received for the transfer). Thus, if he subsequently sells the redeemable ground rent (or if it is redeemed from him) for $2,000, he has no gain of $1,500 in the year of sale (or redemption).

Example 2. Assume the same facts as in Example 1 except that the builder reported a gain of $3,500 on the transfer, treating the amount realized as $14,000 ($12,000 cash plus $2,000 for the redeemable ground rent) and his costs as $10,500 ($10,000 for the house and $500 for the lot). Since the taxpayer took the entire amount of the redeemable ground rent into account in computing his gain, his basis for such ground rent is $2,000. Thus, if he subsequently sells the redeemable ground rent (or if it is redeemed from him) for $2,000, he has no gain or loss on the transaction.

Example 3. Assume the same facts as in Example 1 except that the builder reported a gain of $3,000 on the transfer. He computed this gain by treating the amount realized as $12,000 but treating his cost allocable to the interest transferred as $12,000/$14,000ths of his total $10,500 cost, or $9,000. Since the builder still has remaining $1,500 of unallocated cost, his basis for the redeemable ground rent is $1,500. Thus, if he subsequently sells the redeemable ground rent (or if it is redeemed from him) for $2,000, he has a gain of $500 in the year of sale (or redemption).

[T.D. 6821, 30 FR 6217, May 4, 1965]

§ 1.1059(e)–1 Non-pro rata redemptions.

(a) *In general.* Section 1059(d)(6) (exception where stock held during entire existence of corporation) and section 1059(e)(2) (qualifying dividends) do not apply to any distribution treated as an extraordinary dividend under section 1059(e)(1). For example, if a redemption of stock is not pro rata as to all shareholders, any amount treated as a dividend under section 301 is treated as an extraordinary dividend regardless of whether the dividend is a qualifying dividend.

(b) *Reorganizations.* For purposes of section 1059(e)(1), any exchange under section 356 is treated as a redemption and, to the extent any amount is treated as a dividend under section 356(a)(2), it is treated as a dividend under section 301.

(c) *Effective date.* This section applies to distributions announced (within the meaning of section 1059(d)(5)) on or after June 17, 1996.

[T.D. 8724, 62 FR 38028, July 16, 1997]

§1.1059A–1 Limitation on taxpayer's basis or inventory cost in property imported from related persons.

(a) *General rule.* In the case of property imported into the United States in a transaction (directly or indirectly) by a controlled taxpayer from another member of a controlled group of taxpayers, except for the adjustments permitted by paragraph (c) (2) of this section, the amount of any costs taken into account in computing the basis or inventory cost of the property by the purchasing U.S. taxpayer and which costs are also taken into account in computing the valuation of the property for customs purposes may not, for purposes of the basis or inventory cost, be greater than the amount of the costs used in computing the customs value. For purposes of this section, the terms *controlled taxpayer* and *group of controlled taxpayers* shall have the meaning set forth in §1.482–1(a).

(b) *Definitions*—(1) *Import.* For purposes of section 1059A and this section only, the term *import* means the filing of the entry documentation required by the U.S. Customs Service to secure the release of imported merchandise from custody of the U.S. Customs Service.

(2) *Indirectly.* For purposes of this section, *indirectly* refers to a transaction between a controlled taxpayer and another member of the controlled group whereby property is imported through a person acting as an agent of, or otherwise on behalf of, either or both related persons, or as a middleman or conduit for transfer of the property between a controlled taxpayer and another member of the controlled group. In the case of the importation of property indirectly, an adjustment shall be permitted under paragraph (c)(2) of this section for a commission or markup paid to the person acting as agent, middleman, or conduit, only to the extent that the commission or markup: is otherwise properly included in cost basis or inventory cost; was actually incurred by the taxpayer and not remitted, directly or indirectly, to the taxpayer or related party; and there is a substantial business reason for the use of a middleman, agent, or conduit.

(c) *Customs value*—(1) *Definition.* For purposes of this section only, the term *customs value* means the value required to be taken into account for purposes of determining the amount of any customs duties or any other duties which may be imposed on the importation of any property. Where an item or a portion of an item is not subject to any customs duty or is subject to a free rate of duty, such item or portion of such item shall not be subject to the provisions of section 1059A or this section. Thus, for example, the portion of an item that is an American good returned and not subject to duty (items 806.20 and 806.30, Tariff Schedules of the United States, 19 U.S.C. 1202); imports on which no duty is imposed that are valued by customs for statistical purposes only; and items subject to a zero rate of duty (19 U.S.C. 1202, General Headnote 3) are not subject to section 1059A or this section. Also, items subject only to the user fee under 19 U.S.C. 58(c), or the harbor maintenance tax imposed by 26 U.S.C. 4461, or only to both, are not subject to section 1059A or this section. This section imposes no limitation on a claimed basis or inventory cost in property which is less than the value used to compute the customs duty with respect to the same property. Section 1059A and this section have no application to imported property not subject to any customs duty based on value, including property subject only to a per item duty or a duty based on volume, because there is no customs value, within the meaning of this paragraph, with respect to such property.

(2) *Adjustments to customs value.* To the extent not otherwise included in customs value, a taxpayer, for purposes of determining the limitation on claimed basis or inventory cost of property under this section, may increase the customs value of imported property by the amounts incurred by it and properly included in inventory cost for—

(i) Freight charges,

(ii) Insurance charges,

(iii) The construction, erection, assembly, or technical assistance provided with respect to, the property after its importation into the United States, and

(iv) Any other amounts which are not taken into account in determining the customs value, which are not properly includible in customs value, and which are appropriately included in the cost basis or inventory cost for income tax purposes. See § 1.471–11 and section 263A.

Appropriate adjustments may also be made to customs values when the taxpayer has not allocated the value of assists to individual articles but rather has reported the value of assists on a periodic basis in accordance with 19 CFR 152.103(e). When 19 CFR 152.103(e) has been utilized for customs purposes, the taxpayer may adjust his customs values by allocating the value of the assists to all imported articles to which the assists relate. To the extent that an amount attributable to an adjustment permitted by this section is paid by a controlled taxpayer to another member of the group of controlled taxpayers, an adjustment is permitted under this section only to the extent that the amount incurred represents an arm's length charge within the meaning of § 1.482–1(d)(3).

(3) *Offsets to adjustments.* To the extent that a customs value is adjusted under paragraph (c)(2) of this section for purposes of calculating the limitation on claimed cost basis or inventory cost under this section, the amount of the adjustments must be offset (reduced) by amounts that properly reduce the cost basis of inventory and that are not taken into account in determining customs value, such as rebates and other reductions in the price actually incurred, effected between the purchaser and related seller after the date of importation of the property.

(4) *Application of section 1059A to property having dutiable and nondutiable portions.* When an item of imported property is subiect to a duty upon the full value of the imported article, less the cost or value of American goods returned, and the taxpayer claims a basis or inventory cost greater than the customs value reported for the item, the claimed tax basis or inventory cost in the dutiable portion of the item is limited under section 1059A and this section to the customs value of the dutiable portion under paragraph (c)(1). The claimed tax basis or inventory cost in the nondutiable portion of the item is determined by multiplying the customs value of the nondutiable portion by a fraction the numerator of which is the amount by which the claimed basis or inventory cost of the item exceeds the customs value of the item and the denominator of which is the customs value of the item and adding this amount to the customs value of the nondutiable portion of the item. The claimed tax basis or inventory cost in the dutiable portion is determined by multiplying the customs value of the dutiable portion by a fraction the numerator of which is the amount by which the claimed basis or inventory cost of the item exceeds the customs value of the item and the denominator of which is the customs value of the item and adding this amount to the customs value of the dutiable portion of the item. However, the taxpayer may not claim a tax basis or inventory cost in the dutiable portion greater than the customs value of this portion of the item.

(5) *Allocation of adjustments to property having dutiable and nondutiable portions.* When an item of imported property is subject to a duty upon the full value of the imported article, less the cost or value of American goods returned, and the taxpayer establishes that the customs value may be increased by adjustments permitted under paragraph (c)(2) of this section for purposes of the section 1059A limitation, the taxpayer's basis or inventory cost of the dutiable portion of the item is determined by multiplying the customs value of the dutiable portion times the percentage that the adjustments represent of the total customs value of the item and adding this amount to the customs value of the dutiable portion of the item. The taxpayer's basis or inventory cost of the nondutiable portion of the item is determined in the same manner. The amount so determined for the dutiable portion of the item is the section 1059A limitation for this portion of the item.

(6) *Alternative method of demonstrating compliance.* In lieu of calculating all adjustments and offsets to adjustments to customs value for an item of property pursuant to paragraph (c) (2) and (3) of this section, a taxpayer may demonstrate compliance with this section and section 1059A by comparing costs taken into account in computing basis or inventory costs of the property and the costs taken into account in computing customs value at any time after importation, provided that in any such comparison the same costs are included both in basis or inventory costs and in customs value. If, on the basis of such comparison, the basis or inventory cost is equal to or less than the customs value, the taxpayer shall be deemed to have met the requirements of this section and section 1059A.

(7) *Relationship of section 1059A to section 482.* Neither this section nor section 1059A limits in any way the authority of the Commissioner to increase or decrease the claimed basis or inventory cost under section 482 or any other appropriate provision of law. Neither does this section or section 1059A permit a taxpayer to adjust upward its cost basis or inventory cost for property appropriately determined under section 482 because such basis or inventory cost is less than the customs value with respect to such property.

(8) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $2,000 to Y for merchandise imported into the United States and an additional $150 for ocean freight and insurance. The customs value of the shipment is determined to be the amount actually paid by X ($2,000) and does not include the charges for ocean freight and insurance. For purposes of computing the limitation on its inventory cost for the merchandise under section 1059A and this section, X is permitted, under paragraph (c)(2) of this section, to increase the customs value ($2,000) by amounts it paid for ocean freight and insurance charges ($150). Thus, the inventory cost claimed by X in the merchandise may not exceed $2,150.

Example 2. Assume the same facts as in Example 1 except that, subsequent to the date of importation of the merchandise, Y grants to X a rebate of $200 of the purchase price. At the time of sale, the rebate was contingent upon the volume of merchandise ultimately bought by X from Y. The value of the merchandise, for customs purposes, is not decreased by the rebate paid to X by Y. Therefore, the customs value, for customs purposes, of the merchandise remains the same ($2,000). For purposes of computing its inventory cost, X was permitted, under paragraph (c)(2) of this section, to increase the customs value for purposes of section 1059A of $2,000 by the amounts it paid for ocean freight and insurance charges ($150). However, under paragraph (c)(3) of this section, X is required to reduce the amount of the customs value by the lesser of the amount of the rebate or the amount of any positive adjustments to the original customs value. The inventory price claimed by X may not exceed $2,000 ($2,000 customs value, plus $150 transportation adjustment, less $150 offsetting rebate adjustment). While X's limitation under section 1059A is $2,000, X may not claim a basis or inventory cost in the merchandise in excess of $1,950. *See* I.R.C. section 1012; and section 1.471–2.

Example 3. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $10,000 to Y for merchandise imported into the United States. The merchandise is composed, in part, of American goods returned. The customs value of the merchandise, on which a customs duty is imposed, is determined to be $8,000 ($10,000, the amount declared by X, less $2,000, the value of the American goods returned). For income tax purposes, X claims a cost basis in the merchandise of $11,000. None of the adjustments permitted by paragraph (c)(2) of this section is applicable. The portion of the merchandise constituting American goods returned represented 20 percent of the total customs value of the merchandise. Since the cost basis claimed by X for income tax purposes represents a 10 percent increase over the customs valuation (before reduction for American goods returned), the claimed tax basis in the dutiable content is considered to be $8,800 and in the portion constituting American goods returned is $2,200. Since a customs duty was imposed only on the dutiable content of the merchandise, the limitation in section 1059A and this section is applicable only to the claimed tax basis in this portion of the merchandise. Accordingly, under paragraph (a) of this section, X is limited to a cost basis of $10,200 in the merchandise. This amount represents a cost basis of $8,000 in the dutiable content and of $2,200 in the portion of the merchandise constituting American goods returned.

Example 4. Assume the same facts as in Example 3 except that X establishes that it is entitled to increase its customs value by $1,000 in adjustments permitted by paragraph (c)(2) of this section. Since the adjustments to customs value that X is entitled to under paragraph (c)(2) of this section are 10 percent of the customs value, for purposes of determining the limitation under section 1059A and this section, both the dutiable content and the portion of the merchandise constituting American goods returned shall be increased to an amount 10 percent greater than the respective values determined for customs purposes, or $8,800 for the dutiable content and $2,200 for the portion of the merchandise constituting American goods returned. Accordingly, under paragraph (a) of this section, X is limited to a cost basis of $11,000 in the merchandise.

Example 5. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $10,000 to Y for merchandise imported into the United States. The customs value of the merchandise, on which a customs duty is imposed, is determined to be $10,000. Subsequent to the date of importation of the merchandise, Y grants to X a rebate of $1,000 of the purchase price. The value of the merchandise, for customs purposes, is not decreased by the rebate paid to X by Y. Notwithstanding the fact that X correctly reported and paid customs duty on a value of $10,000 and that its limitation on basis or inventory cost under this section is $10,000, X may not claim a basis or inventory cost in the merchandise in excess of $9,000. *See* I.R.C. section 1012; and section 1.471–2.

Example 6. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $5,000 to Y for merchandise imported into the United States. The merchandise is not subject to a customs duty or is subject to a free rate of duty and is valued by customs solely for statistical purposes. Accordingly, pursuant to paragraph (c)(1) of this section, the merchandise is not subject to the provisions of section 1059A or this section.

Example 7. Assume the same facts as in Example 6, except that the merchandise is subject to a customs duty based on value and that the customs value (taking into account no costs other than the value of the goods) is determined to be $5,000. Assume further that the $5,000 payment is only for the value of the goods, no other cost is reflected in that payment, and only the $5,000 payment to Y is reflected in X's inventory cost or basis prior to inclusion of any other amounts properly included in inventory or cost basis. Pursuant to paragraph (c)(6) of this section, X, by demonstrating these facts is deemed to meet the requirements of this section and section 1059A.

Example 8. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $9 to Y for merchandise imported into the United States and an additional $1 for ocean freight. The customs value of the article does not include the $l paid for ocean freight. Furthermore, for customs purposes the value is calculated pursuant to computed value and is determined to be $8. For purposes of computing the limitation on its inventory cost for the article under section 1059A and this section, X is permitted, under paragraph (c)(2) of this section, to increase the customs value ($8) by the amount it paid for ocean freight ($1). Thus, the inventory cost claimed by X in the article may not exceed $9.

(9) *Averaged customs values.* In cases of transactions in which (i) an appropriate transfer price is properly determined for tax purposes by reference to events occurring after importation, (ii) the value for customs purposes of one article is higher and of a second article is lower than the actual transaction values, (iii) the relevant articles have been appraised on the basis of a value estimated at the time of importation in accordance with customs regulations, and (iv) the entries have been liquidated upon importation, the section 1059A limitation on the undervalued article may be increased up to the amount of actual transaction value by the amount of the duty overpaid on the overvalued article times a fraction the numerator of which is "1" and the denominator of which is the rate of duty on the undervalued article. This paragraph (c)(9) applies exclusively to cases of property imported in transactions that are open for tax purposes in which the actual transaction value cannot be determined and the entry has been liquidated for customs purposes on the basis of a value estimated at the time of importation in accordance with customs regulations; in these cases, the property is appropriately valued for tax purposes by reference to a formula, in existence at the time of importation, based on subsequent events and valued for customs purposes by a different formula. This paragraph (c)(9) does not apply where customs value is correctly determined for purposes of liquidating the entry and where the customs value is subsequently adjusted for tax purposes, for example by a rebate, under paragraph (c)(2) of this section. The application of paragraph (c)(9) may be illustrated by the following example:

Example: Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X purchases Articles A and B from Y on consignment and imports the Articles into the United States. The purchase price paid by X will be determined as a percentage of the sale prices that X realizes. Rather than deferring liquidation, customs liquidates the entry on the basis of estimated values and the customs duties are paid by X. Ultimately, it is determined that Article A was undervalued and Article B was overvalued by X for customs purposes. The section 1059A limitation for Article A is computed as follows:

	Article A	Article B
Finally-determined customs value	$9	$9
Transaction value	$10	$5
Duty rate	10%	5%
Customs duty paid	$.90	$.45
Duty overpaid or (underpaid)	($.10)	$.20

The section 1059A limitation on Article A may be increased by the amount of the duty over-paid on Article B, $.20, times 1/.10, up to the amount of the transaction value. Therefore, the section 1059A limitation on Article A is $9.00 plus $1.00, or a total of $10.00. The section 1059A limitation on Article B is reduced (but never below transaction value) by $2.00 to $7.00.

(d) *Finality of customs value and of other determinations of the U.S. Customs Service.* For purposes of section 1059A and this section, a taxpayer is bound by the finally-determined customs value and by every final determination made by the U.S. Customs Service, including, but not limited to, dutiable value, the value attributable to the cost or value of products of the United States, and classification of the product for purposes of imposing any duty. The customs value is considered to be finally determined, and all U.S. Customs Service determinations are considered final, when liquidation of the entry becomes final. For this purpose, the term *liquidation* means the ascertainment of the customs duties occurring on the entry of the property, and liquidation of the entry is considered to become final after 90 days following notice of liquidation to the importer, unless a protest is filed. If the importer files a protest, the customs value will be considered finally determined and all other U.S. Customs Service determinations will be considered final either when a decision by the Customs Service on the protest is not contested after expiration of the period allowed to contest the decision or when a judgment of the Court of International Trade becomes final. For purposes of this section, any adjustments to the customs value resulting from a petition under 19 U.S.C. section 1516 (requests by interested parties unrelated to the importer for redetermination of the appraised value, classification, or the rate of duty imposed on imported merchandise) or reliquidation under 19 U.S.C. section 1521 (reliquidation by the Customs Service upon a finding that fraud was involved in the original liquidation) will not be taken into account. However, reliquidation under 19 U.S.C. section 1501 (voluntary reliquidation by the Customs Service within 90 days of the original liquidation to correct errors in appraisement, classification, or any element entering into a liquidation or reliquidation) or reliquidation under 19 U.S.C. section 1520(c)(1) (to correct a clerical error, mistake of fact, or other inadvertance within one year of a liquidation or reliquidation) will be taken into account in the same manner as, and take the place of, the original liquidation in determining customs value.

(e) *Drawbacks.* For purposes of this section, a drawback, that is, a refund or remission (in whole or in part) of a customs duty because of a particular use made (or to be made) of the property on which the duty was assessed or collected, shall not affect the determination of the customs value of the property.

(f) *Effective date.* Property imported by a taxpayer is subject to section 1059A and this section if the entry documentation required to be filed to obtain the release of the property from the custody of the United States Customs Service was filed after March 18, 1986. Section 1059A and this section will not apply to imported property where (1) the entry documentation is filed prior to September 3, 1987; and (2) the importation was liquidated under the circumstances described in paragraph (c)(9) of this section.

[T.D. 8260, 54 FR 37311, Sept. 8, 1989]

§ 1.1060–1T Special allocation rules for certain asset acquisitions (temporary).

(a) *Scope*—(1) *In general.* This section prescribes rules relating to the requirements of section 1060, which, in the case of an applicable asset acquisition, requires the transferor (the *seller*) and the transferee (the *purchaser*) each to allocate the consideration paid or received in the transaction among the assets transferred in the same manner as amounts are allocated under section 338(b)(5) (relating to the allocation of adjusted grossed-up basis among the assets of the target corporation when a section 338 election is made). In the case of an applicable asset acquisition described in paragraph (b)(1) of this section, sellers and purchasers must allocate the consideration under the residual method, as described in paragraph (d) of this section, in order to determine, respectively, the amount realized from, and the basis in, each of the transferred assets. Subsequent adjustments to the consideration for the transferred assets must be allocated under the residual method in the manner described in paragraph (f) of this section. For rules relating to an applicable asset acquisition that is the transfer of a partnership interest, see § 1.755–2T.

(2) *Effective date*—(i) *In general.* This section applies with respect to any acquisition of assets that occurs after May 6, 1986, unless it occurs pursuant to a binding contract in effect on May 6, 1986, and at all times thereafter. The reporting requirements of this section apply to asset acquisitions occurring in a taxable year for which the due date (including extensions of time) of the income tax return or return of income is on or after September 13, 1988. See paragraph (h) of this section for special effective dates for certain reporting requirements.

(ii) *Allocation of consideration.* Paragraphs (d) and (h)(3) of this section and conforming amendments to other provisions of this section apply to applicable asset acquisitions completed on or after February 14, 1997. For applicable asset acquisitions completed before February 14, 1997, if section 197 does not apply to any of the acquired assets, the provisions of the regulations in effect before February 14, 1997 apply (see § 1.1060–1T as contained in 26 CFR part 1 revised April 1, 1996). For applicable asset acquisitions completed before February 14, 1997, if section 197 applies to any of the acquired assets, the taxpayer (and related parties) may consistently (in all transactions in which AGUB (as defined in § 1.338(b)–1), ADSP (as defined in § 1.338–3), MADSP (as defined in § 1.338(h)(10)–1), or consideration must be allocated under section 338 or 1060)—

(A) Apply the provisions of this section;

(B) Apply the provisions of this section as in effect before February 14, 1997 (see § 1.1060–1T as contained in 26 CFR part 1 revised April 1, 1996); or

(C) Apply the provisions of this section as in effect before February 14, 1997 (see § 1.1060–1T as contained in 26 CFR part 1 revised April 1, 1996), but treat all amortizable section 197 intangibles as Class IV assets.

(3) *Outline of topics.* In order to facilitate the use of this section, this paragraph (a)(3) lists the paragraphs, subparagraphs, and subdivisions contained in this section.

(a) Scope.
(1) In general.
(2) Effective date.
(i) In general.
(ii) Allocation of consideration.
(3) Outline of topics.
(b) Applicable asset acquisition.
(1) In general.
(2) Assets constituting a trade or business.
(3) Examples.
(4) Like-kind exchange.
(c) Definitions.
(1) Consideration.
(2) Fair market value.
(3) Purchase date.
(d) Allocation of consideration among assets under the residual method.
(1) Reduction in the amount of consideration for cash and other items designated by the Internal Revenue Service.
(2) Assets other than Class I assets.
(i) In general.
(ii) Class II assets.
(iii) Class III assets.
(iv) Class IV assets.
(v) Class V assets.
(e) Certain limitations and special rules for consideration allocable to an asset.
(1) Allocation not to exceed fair market value.
(2) Other limitations.

(3) Liabilities taken into account in determining amount realized on subsequent disposition.

(4) Internal Revenue Service authority.

(f) Subsequent adjustments to consideration.

(1) In general.

(2) Allocation of increases in consideration.

(i) In general.

(ii) Effect of disposition or depreciation of assets by purchaser.

(3) Allocation of decreases in consideration.

(i) In general.

(ii) Effect of disposition of assets or reduction of basis below zero.

(4) Specific allocation of increases (or decreases) in consideration to certain contingent income assets.

(i) Patents and similar property.

(ii) Specific allocation.

(5) Internal Revenue Service authority.

(g) Examples.

(h) Applicable asset acquisition reporting requirements.

(1) In general.

(2) Time and manner of reporting.

(i) In general.

(ii) Additional reporting requirement.

(3) Interim procedures for Form 8594.

(b) *Applicable asset acquisition*—(1) *In general.* An *applicable asset acquisition* is any transfer, whether direct or indirect, of a group of assets if (i) the assets transferred constitute a trade or business in the hands of either the seller or the purchaser and (ii) except as provided in paragraph (b)(4) of this section, the purchaser's basis in the transferred assets is determined wholly by reference to the purchaser's consideration.

(2) *Assets constituting a trade or business.* For purposes of this section, a group of assets constitutes a trade or business if the use of such assets would constitute an active trade or business for purposes of section 355. Even though a group of assets may not qualify as an active trade or business for purposes of section 355, it will constitute a trade or business for purposes of this section if its character is such that goodwill or going concern value could under any circumstances attach to such group. In making this determination, all the facts and circumstances surrounding the transaction shall be taken into account. Factors to be considered include:

(i) The existence of an excess of the total consideration over the aggregate book value of the tangible and intangible assets purchased (other than goodwill and going concern value) as shown in the financial accounting books and records of the purchaser; and

(ii) Related transactions, including lease agreements, licenses, convenants not to compete, employment contracts, management contracts, or other similar agreements between the purchaser and seller (or managers, directors, owners, or employees of the seller) in connection with the transfer.

(3) *Examples.* Paragraphs (b) (1) and (2) of this section may be illustrated by the following examples:

Example 1. S is a high grade machine shop that manufactures microwave connectors in limited quantities. It is a successful company with a reputation within the industry and among its customers for manufacturing unique, high quality products. Its tangible assets consist primarily of ordinary machinery for working metal and plating. It has no secret formulas or patented drawings of value. P is a company that designs, manufactures, and markets electronic components. It wants to establish an immediate presence in the microwave industry, an area in which it previously has not been engaged. P is acquiring assets of a number of smaller companies and hopes that these assets will collectively allow it to offer a broad product mix. P acquires the assets of S in order to augment its product mix and to promote its presence in the microwave industry. P will not use the assets acquired from S to manufacture microwave connectors. The assets transferred are assets which constitute a trade or business in the hands of the seller. Thus, P's purchase of S's assets is an applicable asset acquisition. The fact that P will not use the assets acquired from S to continue the business of S does not affect this conclusion.

Example 2. S, a sole proprietor who operates a restaurant, leases the building housing the restaurant and sells all its restaurant equipment to P. S's use of the building and the restaurant equipment constitute a trade or business. P begins operating a restaurant in the building it leases from S. Because the assets transferred together with the asset leased are assets which constitute a trade or business, P's purchase of S's assets is an applicable asset acquisition.

Example 3. The S corporation conducts various business enterprises including a retail store in State X that conducts activities that meet the active trade or business requirements for purposes of section 355. P is a minority shareholder of S. In complete redemption of P's stock in S held by P within the meaning of section 302(b)(3), S distributes to P all the assets of S used in S's retail business in State X. The distribution of S's assets in redemption of P's stock is treated as a sale or exchange, and P's basis in the assets transferred is determined wholly by reference to the consideration paid, the S stock. Thus, S's distribution of assets constituting a trade or business to P is an applicable asset acquisition.

(4) *Like-kind exchange.* Notwithstanding the fact that a portion of a group of assets which constitute a trade or business is exchanged for like-kind property, the transaction nevertheless may constitute an applicable asset acquisition. For purposes of this subparagraph (4), like-kind property means any property permitted by section 1031, 1035, or 1036 to be received without the recognition of gain or loss. For purposes of determining whether the transaction constitutes an applicable asset acquisition, (i) the fact that, by reason of section 1031(d), the purchaser's basis in the group of assets is not determined wholly by reference to the consideration paid is disregarded, and (ii) whether the assets transferred constitute a trade or business is determined by taking into account all the assets transferred (including the like-kind property). If an applicable asset acquisition includes like-kind property, then for purposes of allocating consideration among the assets under paragraph (d) of this section, the like-kind property exchanged and any other property or money which is treated as transferred in exchange for the like-kind property are excluded. The basis in and the gain or loss recognized from the like-kind property exchanged and the other property (if any) which is treated as transferred in exchange for the like-kind property is determined under section 1031. For purposes of this section, the amount of money and other property that is treated as transferred in exchange for the like-kind property is equal to so much of the amount of money and the fair market value of other property as does not exceed the difference between the fair market values of the like-kind properties exchanged. The money and other property that are treated as transferred in exchange for the like-kind property (and which are excluded from the assets to which section 1060 applies) are considered to come from the following assets in the following order: first from Class I assets, then from Class II assets, then from Class III assets, then from Class IV assets, and then from Class V assets. For this purpose, liabilities assumed (or to which the like-kind property or other property that is part of the like-kind exchange is subject) are treated as Class I assets. See *Example 3* in paragraph (g) of this section for an example of the application of section 1060 to a single transaction which is, in part, a like-kind exchange.

(c) *Definitions*—(1) *Consideration.* The purchaser's consideration is the cost of the assets acquired in the applicable asset acquisition. The seller's consideration is the amount realized from the applicable asset acquisition under section 1001(b).

(2) *Fair market value.* Generally, the fair market value of an asset is its gross fair market value (i.e., fair market value determined without regard to mortgages, liens, pledges, or other liabilities). However, for purposes of determining the amount of the seller's gain or loss, the fair market value of any property subject to a nonrecourse indebtedness shall be treated as being not less than the amount of such indebtedness. (For purposes of the preceding sentence, a liability that was incurred by reason of the acquisition of the property is disregarded to the extent that such liability was not taken into account in determining the seller's basis in such property.)

(3) *Purchase date.* The purchase date is the date on which the applicable asset acquisition occurs.

(d) *Allocation of consideration among assets under the residual method*—(1) *Reduction in the amount of consideration for cash and other items designated by the Internal Revenue Service.* Consideration is first reduced by the amount of Class I assets (if any) transferred by the seller. Class I assets are cash, demand deposits and like accounts in banks, savings and loan associations (and other depository institutions), and other similar items designated in the Internal Revenue Bulletin by the Internal Revenue Service. The amount of the consideration remaining after the reduction is to be allocated to the other assets transferred.

(2) *Assets other than Class I assets*—(i) *In general.* Subject to the limitations and other special rules of paragraph (e) of this section, consideration (as reduced by the amount of Class I assets) is allocated among Class II assets transferred by the seller in proportion to the fair market values of such Class II assets on the purchase date, then among Class III assets transferred by the seller in proportion to the fair market values of such Class III assets on that date, then among Class IV assets transferred by the seller in proportion to the fair market values of such Class IV assets on that date, and finally to Class V assets.

(ii) *Class II assets.* Class II assets are certificates of deposit, U.S. government securities, readily marketable stock or securities (within the meaning of §1.351–1(c)(3)), foreign currency, and other items designated in the Internal Revenue Bulletin by the Internal Revenue Service.

(iii) *Class III assets.* Class III assets are all assets other than Class I, II, IV, and V assets.

(iv) *Class IV assets.* Class IV assets are all section 197 intangibles, as defined in section 197, except those in the nature of goodwill and going concern value.

(v) *Class V assets.* Class V assets are section 197 intangibles in the nature of goodwill and going concern value.

(e) *Certain limitations and special rules for consideration allocable to an asset*—(1) *Allocation not to exceed fair market value.* The amount of consideration allocated to an asset (other than Class V assets) shall not exceed the fair market value of that asset on the purchase date.

(2) *Other limitations.* The amount of consideration allocated to an asset is subject to any applicable limitations under the Code or general principles of tax law. For example, if the applicable asset acquisition is a transaction described in section 1056(a) (relating to basis limitation for player contracts transferred in connection with the sale of a franchise), the amount of consideration the purchaser may allocate to a contract for the services of an athlete shall not exceed the limitation imposed by that section.

(3) *Liabilities taken into account in determining amount realized on subsequent disposition.* In determining the amount realized on a subsequent sale or other disposition of property acquired by the purchaser, the entire amount of any liability included in determining the purchaser's consideration is considered to be an amount taken into account in determining the purchaser's basis in property which secures such liability for purposes of applying §1.1001–2(a). Thus, if a liability is included in the purchaser's consideration, §1.1001–2(a)(3) shall not prevent the amount of such liability from being treated as discharged within the meaning of §1.1001–2(a)(4) as a result of the purchaser's sale or disposition of the property which secures such liability.

(4) *Internal Revenue Service authority.* In connection with the examination of a return, the Internal Revenue Service may challenge the taxpayer's determination of the fair market value of any asset by any appropriate method and take into account all factors, including any lack of adverse tax interests between the parties. For example, in certain cases the Internal Revenue Service may make an independent showing of the value of goodwill and going concern value as a means of calling into question the validity of the taxpayer's valuation of other assets.

(f) *Subsequent adjustments to consideration*—(1) *In general.* If there is an increase or a decrease in consideration of either the seller or the purchaser after the purchase date that must be taken into account in order to adjust or redetermine, under applicable principles of tax law, the seller's amount realized with respect to, or the purchaser's cost of, the assets transferred, then such increase or decrease is allocated by the seller or the purchaser among the assets pursuant to this paragraph (f).

(2) *Allocation of increases in consideration*—(i) *In general.* An increase in consideration is allocated under paragraph (d) of this section among the assets transferred. Amounts allocable to an asset (or with respect to an asset disposed of by the purchaser) are subject to the fair market value limitation and other limitations in paragraph

(e) of this section. Except as provided in paragraph (f)(4)(ii) of this section, for the purpose of applying paragraph (e) of this section, the fair market value is the fair market value on the purchase date.

(ii) *Effect of disposition or depreciation of assets by purchaser.* If an asset has been disposed of, depreciated, amortized, or depleted by the purchaser before an increase in consideration is taken into account, the increase in consideration otherwise allocable to such asset by the purchaser shall be taken into account under principles of tax law applicable when part of the cost of an asset (not previously reflected in its basis) is paid after the asset has been disposed of, depreciated, amortized, or depleted.

(3) *Allocation of decreases in consideration*—(i) *In general.* A decrease in consideration is allocated in the following order: first, as a reduction in the amount previously allocated to Class V assets, second, as a reduction in the amount previously allocated to Class IV assets in proportion to their fair market values, third, as a reduction in the amount previously allocated to Class III assets in proportion to their fair market values, and finally, as a reduction in the amount previously allocated to Class II assets in proportion to their fair market values. Decreases in consideration allocated to an asset shall not exceed the amount of consideration previously allocated to that asset. Except as provided in paragraph (f)(4)(ii) of this section (relating to patents and similar property), the fair market value is the fair market value on the purchase date.

(ii) *Effect of disposition of assets or reduction of basis below zero.* If an asset has been disposed of, depreciated, amortized, or depleted by the purchaser before a decrease in consideration is taken into account, the decrease in the purchaser's consideration otherwise allocable to such asset shall be taken into account under principles of tax law applicable when the cost of an asset (previously reflected in basis) is reduced after the asset has been disposed of or depreciated, amortized, or depleted. For purposes of this subdivision (ii), an asset is considered to have been disposed of to the extent that its allocable portion of the decrease in consideration would reduce its basis below zero.

(4) *Specific allocation of increases (or decreases) in consideration to certain contingent income assets*—(i) *Patents and similar property.* The specific allocation under paragraph (f)(4)(ii) of this section of an increase (or decrease) in consideration applies if (A) the increase (or decrease) is the result of a contingency that directly relates to income produced by a particular intangible asset (*contingent income asset*), such as a patent, a secret process, or a copyright, and (B) the increase (or decrease) is related to such contingent income asset and not to other assets. Consideration as initially determined, and any increase (or decrease) in consideration to which this specific allocation rule does not apply, are allocated among the assets (including contingent income assets) in accordance with the provisions of paragraphs (f) (2) and (3) of this section.

(ii) *Specific allocation.* Subject to the fair market value and other limitations in paragraph (e) of this section, any increase (or decrease) in consideration to which this subdivision (ii) applies is allocated first, specifically to the contingent income asset to which the increase (or decrease) relates and, then, under paragraph (f) (2) (or 3)) of this section. Solely for purposes of applying the fair market value and other limitations to a contingent income asset, the fair market value of such asset on the purchase date shall be redetermined when the increase (or decrease) is taken into account. (For purposes of this redetermination, only those circumstances that resulted in the increase (or decrease) in consideration are taken into account.) This redetermination does not affect the fair market value limitations or other limitations as they apply to other transferred assets.

(5) *Internal Revenue Service authority.* In connection with the examination of a return, the Internal Revenue Service, in appropriate cases, may apply the principles of paragraph (f)(4) of this section to allocate an increase (or decrease) in consideration among particular assets to the extent such allocation is necessary to reflect properly

the consideration that relates to each of those assets.

(g) *Examples.* The provisions of paragraphs (b), (d), (e), and (f) of this section may be illustrated by the following examples:

Example 1. (i) On January 1, 1998, S, a sole proprietor, sells to P, a corporation, a group of assets which constitute a trade or business under paragraph (b)(2) of this section. P pays S $2,000 in cash and assumes $1,000 in liabilities. Thus, the total consideration is $3,000.

(ii) Assume that P acquires no Class I assets and that on the purchase date, the fair market values of the Class II, Class III, and Class IV assets S sold to P are as follows:

Asset class	Asset	Fair market value
II	Portfolio of marketable securities	$ 400
	Total Class II	$ 400
III	Furniture and fixtures	$ 800
	Building	800
	Land	200
	Equipment	400
	Accounts receivable	100
	Total Class III	$2,300
IV	Covenant not to compete	$100
	Total Class IV	$100

(iii) Under paragraphs (d) (1) and (2) of this section, the amount of consideration allocable to the Class II, III, IV, and V assets is the total consideration reduced by the amount of any Class I assets. Since P acquired no Class I assets, the total consideration of $3,000 is next allocated first to Class II, then to Class III, and then to Class IV assets. Since the fair market value of the Class II assets is $400, $400 of consideration is allocated to the Class II assets. Since the remaining amount of consideration is $2,600 ($3,000 − $400), an amount which exceeds the sum of the fair market values of the Class III assets ($2,300), the amount allocated to each Class III asset is its fair market value. Since, after the allocation to Class III assets, the remaining amount of consideration is $300 ($3,000 − ($400 + $2,300)), an amount which exceeds the fair market value of the Class IV asset ($100), the amount allocated to the Class IV asset is its fair market value. Thus, the total amount allocated to the Class II assets is $400, the total amount allocated to the Class III assets is $2,300, and the total amount allocated to the Class IV asset is $100.

(iv) The amount allocated to the Class V assets (assets in the nature of goodwill and going concern value) is $200 (i.e., $3,000 − ($400 + $2,300 + $100)).

Example 2. (i) Assume the same facts as in *Example 1.* Assume further that P and S each use the calendar year as the taxable year and that, on September 30, 1998, P files a claim against S alleging fraud in the sale of all of the assets.

(ii) On January 1, 2007, S refunds $400 of the purchase price to P in a settlement of the lawsuit.

(iii) Under paragraph (f)(3)(i) of this section, both S and P take into account the $400 decrease in consideration and allocate it among the assets. First, since $200 of consideration previously was allocated to the assets in the nature of goodwill and going concern value (Class V assets), $200 of the decrease in consideration is allocated to those assets. Then, since $100 of consideration previously was allocated to the only Class IV asset, the covenant not to compete, the next $100 of the remaining decrease in consideration ($200) is allocated to that asset. The remaining decrease in consideration ($100) is then allocated to the Class III assets in proportion to their fair market values on the purchase date as follows:

Asset	Fair market value	Allocation fraction	Decrease in consideration ($100 × Col. (2))
Furniture and fixtures	$800	800/2,300	$34.78
Building	800	800/2,300	34.78
Land	200	200/2,300	8.70
Equipment	400	400/2,300	17.39
Accounts receivable	100	100/2,300	4.35
Total	$2,300		$100.00

(iv) In summary, the redetermined consideration that S received for the group of assets is $2,600 after taking into account the decrease in consideration. After allocating the decrease, P's and S's redetermined consideration is as follows:

Asset	Original consideration	Decrease in consideration	Redetermined consideration
Portfolio of marketable securities	$400.00	$0.00	$400.00

Asset	Original consideration	Decrease in consideration	Redetermined consideration
Furniture and fixtures	800.00	34.78	765.22
Building	800.00	34.78	765.22
Land	200.00	8.70	191.30
Equipment	400.00	17.39	382.61
Accounts receivable	100.00	4.35	95.65
Covenant not to compete	100.00	100.00	0.00
Goodwill and going concern value	200.00	200.00	0.00
Total	$3,000.00	$400.00	$2,600.00

(v) Assume that, as a result of deductions under section 168, P's adjusted basis in the equipment immediately before the decrease in consideration is zero. P, therefore, treats the equipment as if it were disposed of before the decrease is taken into account. In 2007, P recognizes income of $17.39, the character of which is determined under the principles of *Arrowsmith* v. *Commissioner*, 344 U.S. 6 (1952), and the tax benefit rule. No adjustment to the basis of P's assets is made for any tax paid on this amount. Assume also that, as a result of amortization deductions, the adjusted basis of the covenant not to compete and the goodwill and going concern value immediately before the decrease in consideration is $120. A similar adjustment to income is made in 2007 with respect to the $180 of previously amortized covenant not to compete and goodwill and going concern value.

Example 3. (i) On January 1, 1998, A transfers assets X, Y, and Z worth $1,000 to B in exchange for assets D, E, and F, worth $100, plus $1,000 cash.

(ii) Assume the exchange of assets constitutes an exchange of like-kind property to which section 1031 applies. Assume also that goodwill or going concern value could under any circumstances attach to each group of assets and, therefore, each group constitutes a trade or business under section 1060.

(iii) Assume the fair market values of the assets and the amount of money transferred are as follows:

Asset	Fair market value
By A	
X	$400
Y	400
Z	200
Total	1,000
By B	
D	40
E	30
F	30
Cash (amount)	1,000
	1,100

(iv) Under paragraph (b)(4) of this section, for purposes of allocating consideration under paragraph (d) of this section, the like-kind assets exchanged and any money or other property which are treated as transferred in exchange for the like-kind property are excluded from the application of section 1060.

(v) Since assets X, Y, and Z are like-kind property, they are excluded from the application of the section 1060 allocation rules.

(vi) Since assets D, E, and F are like-kind property, they are excluded from the application of the section 1060 allocation rules. In addition, $900 of the $1,000 cash B gave to A for A's like-kind assets is treated as transferred in exchange for the like-kind property in order to equalize the fair market values of the like-kind assets. Therefore, $900 of the cash is excluded from the application of the section 1060 allocation rules.

(vii) $100 of the cash is allocated under section 1060 and paragraph (d) of this section.

(viii) A, as transferor of assets X, Y, and Z, received $100 that must be allocated under section 1060 and paragraph (d) of this section. Since A transferred no Class I, II, III, or IV assets to which section 1060 applies, the $100 is allocated to Class V assets (assets in the nature of goodwill and going concern value).

(ix) A, as transferee of assets D, E, and F, gave consideration only for assets to which section 1031 applies. Therefore, the allocation rules of section 1060 and paragraph (d) of this section are not applied to determine the bases of the assets A received.

(x) B, as transferor of assets D, E, and F, received consideration only for assets to which section 1031 applies. Therefore, the allocation rules of section 1060 do not apply in determining B's gain or loss.

(xi) B, as transferee of assets X, Y, and Z, gave A $100 that must be allocated under section 1060 and paragraph (d) of this section. Since B received from A no Class I, II, III, or IV assets to which section 1060 applies, the $100 consideration is allocated by B to Class V assets (assets in the nature of goodwill and going concern value).

Example 4. (i) On January 1, 1998, S, a sole proprietor, sells to P, a corporation, a group of assets which constitutes a trade or business under paragraph (b)(2) of this section. S, who plans to retire immediately, also executes a covenant not to compete in P's favor.

P pays S $3,000 in cash and assumes $1,000 in liabilities. Thus, the total consideration is $4,000.

(ii) On the purchase date, P and S also execute a separate agreement that states that the fair market values of the Class II, Class III, and Class IV assets S sold to P are as follows:

Asset class	Asset	Fair market value
II	Portfolio of marketable securities	$500
	Total Class II	$500
III	Furniture and fixtures	$800
	Building	800
	Land	200
	Equipment	400
	Accounts receivable	200
	Total Class III	$2,400
IV	Covenant not to compete	$900
	Total Class IV	$900

(iii) P and S each allocate the consideration in the transaction among the assets transferred under paragraph (d) of this section in accordance with the agreed upon fair market values of the assets, so that $500 is allocated to Class II assets, $2,400 is allocated to Class III assets, $900 is allocated to Class IV assets, and $200 ($4,000 total consideration less $3,800 allocated to asset classes II, III, and IV is allocated to the Class V assets (assets in the nature of goodwill and going concern value).

(iv) In connection with the examination of P's return, the District Director, in determining the fair market values of the assets transferred, may disregard the parties' agreement. Assume that the District Director correctly determines that the fair market value of the covenant not to compete was $100. Since the allocation of consideration among Class II, III, and IV assets results in allocation up to the fair market value limitation, the $800 of unallocated consideration resulting from the District Director's redetermination of the value of the covenant not to compete is allocated to Class V assets (assets in the nature of goodwill and going concern value).

(h) *Applicable asset acquisition reporting requirements*—(1) *In general.* The seller and the purchaser in an applicable asset acquisition each shall report information concerning the amount of consideration in the transaction and its allocation among the assets transferred. They also must report information concerning subsequent adjustments to consideration. For reporting requirements relating to the transfer of the partnership interest, see §1.755–2T(c).

(2) *Time and manner of reporting*—(i) *In general.* The seller and the purchaser each must file asset acquisition statements on Form 8594 with their income tax returns or returns of income for the taxable year that includes the purchase date. This reporting requirement applies to asset acquisitions that occur in a taxable year for which the due date (including extensions of time) of the income tax return or return of income is on or after September 13, 1988.

(ii) *Additional reporting requirement.* If the amount of consideration allocated to any asset by the seller or the purchaser is increased (or decreased) after the taxable year that includes the purchase date, the seller or purchaser making the increase (or decrease) shall file a supplemental asset acquisition statement on Form 8594 with the income tax return or return of income for the taxable year in which the increase (or decrease) is properly taken into account. This reporting requirement applies to an increase (or decrease) in the amount of consideration allocated to any asset that is properly taken into account in a taxable year for which the due date (including extensions of time) of the income tax return or return of income is on or after September 13, 1988, even if the seller or purchaser may not have been required to file an asset acquisition statement for the taxable year that included the purchase date because of the effective date rule in paragraph (h)(2)(i) of this section.

(3) *Interim procedures for Form 8594.* Until such time, if any, as Form 8594 is revised to require otherwise, the sum of the amounts allocated to Classes IV and V should be reported on Form 8594 as Class IV assets.

[T.D. 8215, 53 FR 27039, July 18, 1988; 53 FR 29801, Aug. 8, 1988, as amended by T.D. 8711, 62 FR 2272, Jan. 16, 1997; 62 FR 14821, Mar. 28, 1997]

CHANGES TO EFFECTUATE F.C.C. POLICY

§1.1071–1 Gain from sale or exchange to effectuate policies of Federal Communications Commission.

(a)(1) At the election of the taxpayer, section 1071 postpones the recognition of the gain upon the sale or exchange of property if the Federal Communications Commission grants the taxpayer a certificate with respect to the ownership and control of radio broadcasting stations which is in accordance with subparagraph (2) of this paragraph. Any taxpayer desiring to obtain the benefits of section 1071 shall file such certificate with the Commissioner of Internal Revenue, or the district director for the internal revenue district in which the income tax return of the taxpayer is required to be filed.

(2)(i) In the case of a sale or exchange before January 1, 1958, the certificate from the Federal Communications Commission must clearly identify the property and show that the sale or exchange is necessary or appropriate to effectuate the policies of such Commission with respect to the ownership and control of radio broadcasting stations.

(ii) In the case of a sale or exchange after December 31, 1957, the certificate from the Federal Communications Commission must clearly identify the property and show that the sale or exchange is necessary or appropriate to effectuate a change in a policy of, or the adoption of a new policy by, such Commission with respect to the ownership and control of radio broadcasting stations.

(3) The certificate shall be accompanied by a detailed statement showing the kind of property, the date of acquisition, the cost or other basis of the property, the date of sale or exchange, the name and address of the transferee, and the amount of money and the fair market value of the property other than money received upon such sale or exchange.

(b) Section 1071 applies only in the case of a sale or exchange made necessary by reason of the Federal Communications Commission's policies as to ownership or control of radio facilities. Section 1071 does not apply in the case of a sale or exchange made necessary as a result of other matters, such as the operation of a broadcasting station in a manner determined by the Commission to be not in the public interest or in violation of Federal or State law.

(c) An election to have the benefits of section 1071 shall be made in the manner prescribed in §1.1071–4.

(d) For purposes of section 1071, the term *radio broadcasting* includes telecasting.

§1.1071–2 Nature and effect of election.

(a) *Alternative elections.* (1) A taxpayer entitled to the benefits of section 1071 in respect of a sale or exchange of property may elect—

(i) To treat such sale or exchange as an involuntary conversion under the provisions of section 1033; or

(ii) To treat such sale or exchange as an involuntary conversion under the provisions of section 1033, and in addition elect to reduce the basis of property, in accordance with the regulations prescribed in §1.1071–3, by all or part of the gain that would otherwise be recognized under section 1033; or

(iii) To reduce the basis of property, in accordance with the regulations prescribed in §1.1071–3, by all or part of the gain realized upon the sale or exchange.

(2) The effect of the provisions of subparagraph (1) of this paragraph is, in general, to grant the taxpayer an election to treat the proceeds of the sale or exchange as the proceeds of an involuntary conversion subject to the provisions of section 1033, and a further election to reduce the basis of certain property owned by the taxpayer by the amount of the gain realized upon the sale or exchange to the extent of that portion of the proceeds which is not treated as the proceeds of an involuntary conversion.

(3) An election in respect to a sale or exchange under section 1071 shall be irrevocable and binding for the taxable year in which the sale or exchange takes place and for all subsequent taxable years.

(b) *Application of section 1033.* (1) If the taxpayer elects, under either paragraph (a)(1) (i) or (ii) of this section, to treat the sale or exchange as an involuntary conversion, the provisions of section 1033, as modified by section 1071, together with the regulations prescribed under such sections, shall be applicable in determining the amount of recognized gain and the basis of property required as a result of such sale or exchange. For the purposes of section 1071 and the regulations thereunder, stock of a corporation operating a radio broadcasting station shall be treated as property similar or related in service or use to the property sold or exchanged. Securities of such a corporation other than stock, or securities of a corporation not operating a radio broadcasting station, do not constitute property similar or related in service or use to the property sold or exchanged. If the taxpayer exercises the election referred to in paragraph (a)(1)(i) of this section, the gain realized upon such sale or exchange shall be recognized to the extent of that part of the money received upon the sale or exchange which is not expended in the manner prescribed in section 1033 and the regulations thereunder. If, however, the taxpayer exercises the elections referred to in paragraph (a)(1)(ii) of this section, the amount of the gain which would be recognized, determined in the same manner as in the case of an election under paragraph (a)(1)(i) of this section, shall not be recognized but shall be applied to reduce the basis of property, remaining in the hands of the taxpayer after such sale or exchange or acquired by him during the same taxable year, which is of a character subject to the allowance for depreciation under section 167. Such reduction of basis shall be made in accordance with and under the conditions prescribed by §1.1071–3.

(2) In the application of section 1033 to determine the recognized gain and the basis of property acquired as a result of a sale or exchange pursuant to an election under paragraph (a)(1) (i) or (ii) of this section, the entire amount of the proceeds of such sale or exchange shall be taken into account.

(c) *Example.* The application of the provisions of section 1071 may be illustrated by the following example:

Example: A, who makes his return on a calendar year basis, sold in 1954, for $100,000 cash, stock of X Corporation, which operates a radio broadcasting station. A's basis of this stock was $75,000. The sale was certified by the Federal Communications Commission as provided in section 1071. Soon after, in the same taxable year, A used $50,000 of the proceeds of the sale to purchase stock in Y Corporation, which operates a radio broadcasting station. A elected in his 1954 return to treat such sale and purchase as an involuntary conversion subject to the provisions of section 1033. He also elected at the same time to reduce the basis of depreciable property by the amount of the gain that otherwise would be recognized under the provisions of section 1033, as made applicable by section 1071. The sale results in a recognized gain of $25,000 under section 1033. However, this gain is not recognized in this case because the taxpayer elected to reduce the basis of other property by the amount of the gain. This may be shown as follows:

(1) Sale price of X Corporation stock ..	$100,000
Basis for gain or loss	75,000
Gain realized	25,000
Proceeds of sale	100,000
Amount expended to replace property sold	50,000
Amount not expended in manner prescribed in section 1033	50,000
Realized gain, recognized under section 1033 (not to exceed the unexpended portion of proceeds of sale)	25,000
Less: Amount applied as a reduction of basis of depreciable property	25,000
Recognized gain for tax purposes	None

(2) The basis of Y Corporation stock in the hands of A is $50,000, computed in accordance with section 1033 and the regulations prescribed under that section. The $50,000 basis is computed as follows:

Basis of property sold (converted)	$75,000
Less: Amount of proceeds not expended	50,000
Balance	25,000
Plus amount of gain recognized under section 1033	25,000
Basis of Y Corporation stock in A's hands	50,000

§1.1071–3 Reduction of basis of property pursuant to election under section 1071.

(a) *General rule.* (1) In addition to the adjustments provided in section 1016 and other applicable provisions of chapter 1 of the Code which adjustments are required to be made with respect to the cost or other basis of property, a further adjustment shall be made in the amount of the unrecognized gain under section 1071, if the taxpayer so elects. Such further adjustment shall be made only with respect to the cost or other basis of property which is of a character subject to the allowance for depreciation under section 167 (whether or not used in connection with a broadcasting business), and which remains in the hands of the taxpayer immediately after the sale or exchange in respect of which the election is made, or which is acquired by the taxpayer in the same taxable year in which such sale or exchange occurs. If the property is in the hands of the taxpayer immediately after the sale or exchange, the time of reduction of the basis is the date of the sale or exchange; in all other cases the time of reduction of the basis is the date of acquisition.

(2) The reduction of basis under section 1071 in the amount of the unrecognized gain shall be made in respect of the cost or other basis, as of the time prescribed, of all units of property of the specified character. The cost or other basis of each unit shall be decreased in an amount equal to such proportion of the unrecognized gain as the adjusted basis (for determining gain, determined without regard to this section) of such unit bears to the aggregate of such adjusted bases of all units of such property, but the amount of the decrease shall not be more than the amount of such adjusted basis. If in the application of such rule the adjusted basis of any unit is reduced to zero, the process shall be repeated to reduce the adjusted basis of the remaining units of property by the portion of the unrecognized gain which is not absorbed in the first application of the rule. For such purpose the *adjusted basis* of the remaining units shall be the adjusted basis for determining gain reduced by the amount of the adjustment previously made under this section. The process shall be repeated until the entire amount of the unrecognized gain has been absorbed.

(3) The application of the provisions of this section may be illustrated by the following example:

Example: Using the facts given in the example set forth in § 1.1071–2(c), except that the taxpayer elects to reduce the basis of depreciable property in accordance with paragraph (a)(1)(iii) of § 1.1071–2, the computation may be illustrated as follows:

Sale price of X Corporation stock	$100,000
Basis for gain or loss	75,000
Realized gain (recognized except for the election under § 1.1071–1)	$25,000
Adjusted basis of other depreciable property in hands of A immediately after sale:	
Building	80,000
Transmitter	16,000
Fixtures	4,000
Total	100,000
Computation of reduction:	
Building (80,000/100,000)×$25,000 (gain)	20,000
Transmitter (16,000/100,000)×$25,000	4,000
Fixtures (4,000/100,000)×$25,000	1,000
Total reduction	25,000
New basis of assets:	
Building ($80,000 minus $20,000)	60,000
Transmitter ($16,000 minus $4,000)	12,000
Fixtures ($4,000 minus $1,000)	3,000
Total adjusted basis after reduction under section 1071	75,000
Realized gain upon sale of X Corporation stock	25,000
Less: Amount applied as a reduction to basis of depreciable property	25,000
Recognized gain for tax purposes	None

(b) *Special cases.* With the consent of the Commissioner, the taxpayer may, however, have the basis of the various units of property of the class specified in section 1071 and this section adjusted in a manner different from the general rule set forth in paragraph (a) of this section. Variations from such general rule may, for example, involve adjusting the basis of only certain units of such property. The request for variations from such general rule should be filed by the taxpayer with his return for the taxable year in which he elects to have the basis of property reduced under section 1071. Agreement between the taxpayer and the Commissioner as to any variations from such general rule shall be effective only if incorporated in a closing agreement entered into under the provisions of section 7121.

§ 1.1071–4 Manner of election.

(a) An election under the provisions of section 1071 shall be in the form of a written statement and shall be executed and filed in duplicate. Such statement shall be signed by the taxpayer or his authorized representative.

In the case of a corporation, the statement shall be signed with the corporate name, followed by the signature and title of an officer of the corporation empowered to sign for the corporation, and the corporate seal must be affixed. An election under section 1071 to reduce the basis of property and an election under such section to treat the sale or exchange as an involuntary conversion under section 1033 may be exercised independently of each other. An election under section 1071 must be filed with the return for the taxable year in which the sale or exchange occurs. Where practicable, the certificate of the Federal Communications Commission required by §1.1071–1 should be filed with the election.

(b) If, in pursuance of an election to have the basis of its property adjusted under section 1071, the taxpayer desires to have such basis adjusted in any manner different from the general rule set forth in paragraph (a) of §1.1071–3, the precise method (including allocation of amounts) should be set forth in detail on separate sheets accompanying the election. Consent by the Commissioner to any departure from such general rule shall be effected only by a closing agreement entered into under the provisions of section 7121.

EXCHANGES IN OBEDIENCE TO S.E.C. ORDERS

§1.1081–1 Terms used.

The following terms, when used in this section and §§1.1081–2 to 1.1083–1, inclusive, shall have the meanings assigned to them in section 1083: *Order of the Securities and Exchange Commission*; *registered holding company*; *holding company system*; *associate company*; *majority-owned subsidiary company*; *system group*; *nonexempt property*; and *stock or securities*. Any other term used in this section and §§1.1081–2 to 1.1083–1, inclusive, which is defined in the Internal Revenue Code of 1954, shall be given the respective definition contained in such Code.

§1.1081–2 Purpose and scope of exception.

(a) The general rule is that the entire amount of gain or loss from the sale or exchange of property is to be recognized (see section 1002) and that the entire amount received as a dividend is to be included in gross income. (See sections 61 and 301.) Exceptions to the general rule are provided elsewhere in subchapters C and O, chapter 1 of the Code, one of which is that made by section 1081 with respect to exchanges, sales, and distributions specifically described in section 1081. Section 1081 provides the extent to which gain or loss is not to be recognized on (1) the receipt of a distribution described in section 1081(c)(2), or (2) an exchange or sale, or the receipt of a distribution, made in obedience to an order of the Securities and Exchange Commission, which is issued to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79k (b)). Section 331 provides that a distribution in liquidation of a corporation shall be treated as an exchange. Such distribution is to be treated as an exchange under the provisions of sections 1081 to 1083, inclusive. The order of the Securities and Exchange Commission must be one requiring or approving action which the Commission finds to be necessary or appropriate to effect a simplification or geographical integration of a particular public utility holding company system. For specific requirements with respect to an order of the Securities and Exchange Commission, see section 1081 (f).

(b) The requirements for nonrecognition of gain or loss as provided in section 1081 are precisely stated with respect to the following general types of transactions:

(1) The exchange that is provided for in section 1081 (a), in which stock or securities in a registered holding company or a majority-owned subsidiary company are exchanged for stock or securities.

(2) The exchange that is provided for in section 1081 (b), in which a registered holding company or an associate company of a registered holding company exchanges property for property.

(3) The distribution that is provided for in section 1081 (c)(1), in which stock or securities are distributed to a shareholder in a corporation which is a registered holding company or a majority-

owned subsidiary company, or the distribution that is provided for in section 1081 (c)(2), in which a corporation distributes to a shareholder, rights to acquire common stock in a second corporation.

(4) The transfer that is provided for in section 1081 (d), in which a corporation which is a member of a system group transfers property to another member of the same system group.

Certain rules with respect to the receipt of nonexempt property on an exchange described in section 1081 (a) are prescribed in section 1081 (e).

(c) These exceptions to the general rule are to be strictly construed. Unless both the purpose and the specific requirements of sections 1081 to 1083, inclusive, are clearly met, the recognition of gain or loss upon the exchange, sale, or distribution will not be postponed under those sections. Moreover, even though a taxable transaction occurs in connection or simultaneously with a realization of gain or loss to which nonrecognition is accorded, nevertheless, nonrecognition will not be accorded to such taxable transaction. In other words, the provisions of section 1081 do not extend in any case to gain or loss other than that realized from and directly attributable to a disposition of property as such, or the receipt of a corporate distribution as such, in an exchange, sale, or distribution specifically described in section 1081.

(d) The application of the provisions of part VI (section 1081 and following), subchapter O, chapter 1 of the Code, is intended to result only in postponing the recognition of gain or loss until a disposition of property is made which is not covered by such provisions, and, in the case of an exchange or sale subject to the provisions of section 1081 (b), in the reduction of basis of certain property. The provisions of section 1082 with respect to the continuation of basis and the reduction in basis are designed to effect these results. Although the time of recognition may be shifted, there must be a true reflection of income in all cases, and it is intended that the provisions of such part VI, shall not be construed or applied in such a way as to defeat this purpose.

§ 1.1081–3 Exchanges of stock or securities solely for stock or securities.

The exchange, without the recognition of gain or loss, that is provided for in section 1081 (a) must be one in which stock or securities in a corporation which is a registered holding company or a majority-owned subsidiary company are exchanged solely for stock or securities other than stock or securities which constitute nonexempt property. An exchange is not within the provisions of section 1081 (a) unless the stock or securities transferred and those received are stock or securities as defined by section 1083 (f). The stock or securities which may be received without the recognition of gain or loss are not limited to stock or securities in the corporation from which they are received. An exchange within the provisions of section 1081 (a) may be a transaction between the holder of stock or securities and the corporation which issued the stock or securities. Also the exchange may be made by a holder of stock or securities with an associate company (i.e., a corporation in the same holding company system with the issuing corporation) which is a registered holding company or a majority-owned subsidiary company. In either case, the nonrecognition provisions of section 1081 (a) apply only to the holder of the stock or securities. However, the transferee corporation must be acting in obedience to an order of the Securities and Exchange Commission directed to such corporation, if no gain or loss is to be recognized to the holder of the stock or securities who makes the exchange with such corporation. See also section 1081(b), in case the holder of the stock or securities is a registered holding company or an associate company of a registered holding company. An exchange is not within the provisions of section 1081(a) if it is within the provisions of section 1081(d), relating to transfers within a system group. For treatment when nonexempt property is received, see section 1081(e); for further limitations, see section 1081(f).

§1.1081–4 Exchanges of property for property by corporations.

(a) *Application of section 1081(b).* Section 1081(b) applies only to the transfers specified therein with respect to which section 1081(d) is inapplicable, and deals only with such transfers if gain is realized upon the sale or other disposition effected by such transfers. If loss is realized section 1081(b) is inapplicable and the application of other provisions of subtitle A of the Code must be determined. See section 1081(g). If section 1081(b) is applicable, the other provisions of subchapters C and O, chapter 1 of the Code, relating to the nonrecognition of gain are inapplicable, and the conditions under which, and the extent to which, the realized gain is not recognized are set forth in paragraphs (b), (c), (d), (e), and (f) of this section.

(b) *Nonrecognition of gain; no nonexempt proceeds.* No gain is recognized to a transferor corporation upon the sale or other disposition of property transferred by such transferor corporation in exchange solely for property other than nonexempt property, as defined in section 1083(e), but only if all of the following requirements are satisfied:

(1) The transferor corporation is, under the definition in section 1083 (b), a registered holding company or an associate company of a registered holding company;

(2) Such transfer is in obedience to an order of the Securities and Exchange Commission (as defined in section 1083 (a)) and such order satisfies the requirements of section 1081 (f);

(3) The transferor corporation has filed the required consent to the regulations under section 1082(a)(2) (see paragraph (g) of this section); and

(4) The entire amount of the gain, as determined under section 1001, can be applied in reduction of basis under section 1082(a)(2).

(c) *Nonrecognition of gain; nonexempt proceeds.* If the transaction would be within the provisions of paragraph (b) of this section if it were not for the fact that the property received in exchange consists in whole or in part of nonexempt property (as defined in section 1083 (e)), then no gain is recognized if such nonexempt property, or an amount equal to the fair market value of such nonexempt property at the time of the transfer.

(1) Is expended within the required 24-month period for property other than nonexempt property; or

(2) Is invested within the required 24-month period as a contribution to the capital, or as paid-in surplus, of another corporation;

but only if the expenditure or investment is made

(3) In accordance with an order of the Securities and Exchange Commission (as defined in section 1083 (a)) which satisfies the requirements of section 1081 (f) and which recites that such expenditure or investment by the transferor corporation is necessary or appropriate to the integration or simplification of the holding company system of which the transferor corporation is a member; and

(4) The required consent, waiver, and bond have been executed and filed. See paragraphs (g) and (h) of this section.

(d) *Recognition of gain in part; insufficient expenditure or investment in case of nonexempt proceeds.* If the transaction would be within the provisions of paragraph (c) of this section if it were not for the fact that the amount expended or invested is less than the fair market value of the nonexempt property received in exchange, then the gain, if any, is recognized, but in an amount not in excess of the amount by which the fair market value of such nonexempt property at the time of the transfer exceeds the amount so expended and invested.

(e) *Items treated as expenditures for the purpose of paragraphs (c) and (d) of this section.* For the purposes of paragraphs (c) and (d) of this section, the following are treated as expenditures for property other than nonexempt property:

(1) A distribution in cancellation or redemption (except a distribution having the effect of a dividend) of the whole or a part of the transferor's own stock (not acquired on the transfer);

(2) A payment in complete or partial retirement or cancellation of securities representing indebtedness of the transferor or a complete or partial retirement or cancellation of such securities which is a part of the consideration for the transfer; and

(3) If, on the transfer, a liability of the transferor is assumed, or property of the transferor is transferred subject to a liability, the amount of such liability.

(f) *Recognition of gain in part; inability to reduce basis.* If the transaction would be within the provisions of paragraph (b) or (c) of this section, if it were not for the fact that an amount of gain cannot be applied in reduction of basis under section 1082(a)(2), then the gain, if any, is recognized, but in an amount not in excess of the amount which cannot be so applied in reduction of basis. If the transaction would be within the provisions of paragraph (d) of this section, if it were not for the fact that an amount of gain cannot be applied in reduction of basis under section 1082(a)(2), then the gain, if any, is recognized, but in an amount not in excess of the aggregate of—

(1) The amount of gain which would be recognized under paragraph (d) of this section if there were no inability to reduce basis under section 1082(a)(2); and

(2) The amount of gain which cannot be applied in reduction of basis under section 1082(a)(2).

(g) *Consent to regulations under section 1082(a)(2).* To be entitled to the benefits of the provisions of section 1081(b), a corporation must file with its return for the taxable year in which the transfer occurs a consent to have the basis of its property adjusted under section 1082(a)(2) (see § 1.1082–3), in accordance with the provisions of the regulations in effect at the time of filing of the return for the taxable year in which the transfer occurs. Such consent shall be made on Form 982 in accordance with these regulations and instructions on the form or issued therewith.

(h) *Requirements with respect to expenditure or investment.* If the full amount of the expenditure or investment required for the application of paragraph (c) of this section has not been made by the close of the taxable year in which such transfer occurred, the taxpayer shall file with the return for such year an application for the benefit of the 24-month period for expenditure and investment, reciting the nature and time of the proposed expenditure or investment. When requested by the district director, the taxpayer shall execute and file (at such time and in such form) such waiver of the statute of limitations with respect to the assessment of deficiencies (for the taxable year of the transfer and for all succeeding taxable years in any of which falls any part of the period beginning with the date of the transfer and ending 24 months thereafter) as the district director may specify, and such bond with such surety as the district director may require, in an amount not in excess of double the estimated maximum income tax which would be payable if the corporation does not make the required expenditure or investment within the required 24-month period.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6751, 29 FR 11356, Aug. 6, 1964; T.D. 7517, 42 FR 58935, Nov. 14, 1977]

§ 1.1081–5 Distribution solely of stock or securities.

(a) *In general.* If, without any surrender of his stock or securities as defined in section 1083(f), a shareholder in a corporation which is a registered holding company or a majority-owned subsidiary company receives stock or securities in such corporation or owned by such corporation, no gain to the shareholder will be recognized with respect to the stock or securities received by such shareholder which do not constitute nonexempt property, if the distribution to such shareholder is made by the distributing corporation in obedience to an order of the Securities and Exchange Commission directed to such corporation. A distribution is not within the provisions of section 1081(c)(1) if it is within the provisions of section 1081(d), relating to transfers within a system group. A distribution is also not within the provisions of section 1081(c)(1) if it involves a surrender by the shareholder of stock or securities or a transfer by the shareholder of property in exchange for the stock or securities received by the shareholder. For further limitations, see section 1081(f).

(b) *Special rule.* (1) If there is distributed to a shareholder in a corporation rights to acquire common stock in a second corporation, no gain to the shareholder from the receipt of the rights shall be recognized, but only if all the following requirements are met:

(i) The rights are received by the shareholder without the surrender by the shareholder of any stock in the distributing corporation,

(ii) Such distribution is in accordance with an arrangement forming a ground for an order of the Securities and Exchange Commission issued pursuant to section 3 of the Public Utility Holding Company Act of 1935 (15 U. S. C. 79c) that the distributing corporation is exempt from any provision or provisions of such act, and

(iii) Before January 1, 1958, the distributing corporation disposes of all the common stock in the second corporation which it owns.

(2) The distributing corporation shall, as soon as practicable, notify the district director in whose district the corporation's income tax return and supporting data was filed (see paragraph (g) of §1.1081–11), as to whether or not the requirement of subparagraph (1)(iii) of this paragraph has been met. If such requirement has not been met, the periods of limitation (sections 6501 and 6502) with respect to any deficiency, including interest and additions to the tax, resulting solely from the receipt of such rights to acquire stock, shall include one year immediately following the date of such notification; and assessment and collection shall be made notwithstanding any provisions of law or rule of law which would otherwise prevent such assessment and collection.

§1.1081–6 Transfers within system group.

(a) The nonrecognition of gain or loss provided for in section 1081(d)(1) is applicable to an exchange of property for other property (including money and other nonexempt property) between corporations which are all members of the same system group. The term *system group* is defined in section 1083 (d).

(b) Section 1081 (d)(1) also provides for nonrecognition of gain to a corporation which is a member of a system group if property (including money or other nonexempt property) is distributed to such corporation as a shareholder in a corporation which is a member of the same system group, without the surrender by such shareholder of stock or securities in the distributing corporation.

(c) As stated in §1.1081–2, nonrecognition of gain or loss will not be accorded to a transaction not clearly provided for in part VI (section 1081 and following), subchapter O, chapter 1 of the Code, even though such transaction occurs simultaneously or in connection with an exchange, sale, or distribution to which nonrecognition is specifically accorded. Therefore, nonrecognition will not be accorded to any gain or loss realized from the discharge, or the removal of the burden, of the pecuniary obligations of a member of a system group, even though such obligations are acquired upon a transfer or distribution specifically described in section 1081 (d)(1); but the fact that the acquisition of such obligations was upon a transfer or distribution specifically described in section 1081 (d)(1) will, because of the basis provisions of section 1082 (d), affect the cost to the member of such discharge or its equivalent. Thus, section 1081 (d)(1) does not provide for the nonrecognition of any gain or loss realized from the discharge of the indebtedness of a member of a system group as the result of the acquisition in exchange, sale, or distribution of its own bonds, notes, or other evidences of indebtedness which were acquired by another member of the same system group for a consideration less or more than the issuing price thereof (with proper adjustments for amortization of premiums or discounts).

(d) The provisions of paragraph (c) of this section may be illustrated by the following example:

Example: Suppose that the A Corporation and the B Corporation are both members of the same system group; that the A Corporation holds at a cost of $900 a bond issued by the B Corporation at par, $1,000; and that the A Corporation and the B Corporation enter into an exchange subject to the provisions of section 1081 (d)(1) in which the $1,000 bond of the B Corporation is transferred from the A Corporation to the B Corporation. The $900 basis reflecting the cost to the A Corporation which would have been the basis available to the B Corporation if the property transferred to it had been something other than its own securities (see §1.1082–6) will, in this type of transaction, reflect the cost to the B Corporation of effecting a retirement of its own $1,000 bond. The $100 gain of the B Corporation reflected in the retirement will therefore be recognized.

(e) No exchange or distribution may be made without the recognition of gain or loss as provided for in section 1081 (d)(1), unless all the corporations which are parties to such exchange or distribution are acting in obedience to an order of the Securities and Exchange Commission. If an exchange or distribution is within the provisions of section 1081 (d)(1) and also may be considered to be within some other provisions of section 1081, it shall be considered that only the provisions of section 1081 (d)(1) apply and that the nonrecognition of gain or loss upon such exchange or distribution is by virtue of that section.

§ 1.1081–7 Sale of stock or securities received upon exchange by members of system group.

(a) Section 1081(d)(2) provides that to the extent that property received upon an exchange by corporations which are members of the same system group consists of stock or securities issued by the corporation from which such property was received, such stock or securities may, under certain specifically described circumstances, be sold to a party not a member of the system group, without the recognition of gain or loss to the selling corporation. The nonrecognition of gain or loss is limited, in the case of stock, to a sale of stock which is preferred as to both dividends and assets. The stock or securities must have been received upon an exchange with respect to which section 1081(d)(1) operated to prevent recognition of gain or loss to any party to the exchange. Nonrecognition of gain or loss upon the sale of such stock or securities is permitted only if the proceeds derived from the sale are applied in retirement or cancellation of stock or securities of the selling corporation which were outstanding at the time the exchange was made. It is also essential to nonrecognition of gain or loss upon the sale that both the sale of the stock or securities and the application of the proceeds derived therefrom be made in obedience to an order of the Securities and Exchange Commission. If any part of the proceeds derived from the sale is not applied in making the required retirement or cancellation of stock or securities and if the sale is otherwise within the provisions of section 1081 (d)(2), the gain resulting from the sale shall be recognized, but in an amount not in excess of the proceeds which are not so applied. In any event, if the proceeds derived from the sale of the stock or securities exceed the fair market value of such stock or securities at the time of the exchange through which they were acquired by the selling corporation, the gain resulting from the sale is to be recognized to the extent of such excess. Section 1081 (d)(2) does not provide for the nonrecognition of any gain resulting from the retirement of bonds, notes, or other evidences of indebtedness for a consideration less than the issuing price thereof. Also, that section does not provide for the nonrecognition of gain or loss upon the sale of any stock or securities received upon a distribution or otherwise than upon an exchange.

(b) The application of paragraph (a) of this section may be illustrated by the following example:

Example: The X Corporation and the Y Corporation, both of which make their income tax returns on a calendar year basis, are members of the same system group. As part of an exchange to which section 1081 (d)(1) is applicable the Y Corporation on June 1, 1954, issued to the X Corporation 1,000 shares of class A stock, preferred as to both dividends and assets. The fair market value of such stock at the time of issuance was $90,000 and its basis to the X Corporation was $75,000. On December 1, 1954, in obedience to an appropriate order of the Securities and Exchange Commission, the X Corporation sells all of such stock to the public for $100,000 and applies $95,000 of this amount to the retirement of its own bonds, which were outstanding on June 1, 1954. The remaining $5,000 is not used to retire any of the X Corporation’s stock or securities. Of the total gain of $25,000 realized on the disposition of the Y Corporation stock, only $10,000 is recognized (the difference between the fair market value of the stock when acquired and the amount for which it was sold), since such amount is greater than the portion ($5,000) of the proceeds not applied to the retirement of the X Corporation’s stock or securities. If in this example the stock acquired by the X Corporation had not been stock of the Y Corporation issued to the X Corporation or if it had been stock not preferred as to both dividends and assets, the full amount of the gain

($25,000) realized upon its disposition would have been recognized, regardless of what was done with the proceeds.

§1.1081–8 Exchanges in which money or other nonexempt property is received.

(a) Under section 1081(e)(1), if in any exchange (not within any of the provisions of section 1081(d)) in which stock or securities in a corporation which is a registered holding company or a majority-owned subsidiary are exchanged for stock or securities as provided for in section 1081 (a), there is received by the taxpayer money or other nonexempt property (in addition to property permitted to be received without recognition of gain), then—

(1) The gain, if any, to the taxpayer is to be recognized in an amount not in excess of the sum of the money and the fair market value of the other nonexempt property, but

(2) The loss, if any, to the taxpayer from such an exchange is not to be recognized to any extent.

(b) If money or other nonexempt property is received from a corporation in an exchange described in paragraph (a) of this section and if the distribution of such money or other nonexempt property by or on behalf of such corporation has the effect of the distribution of a taxable dividend, then, as provided in section 1081 (e)(2), there shall be taxed to each distributee (1) as a dividend, such an amount of the gain recognized on the exchange as is not in excess of the distributee's ratable share of the undistributed earnings and profits of the corporation accumulated after February 28, 1913, and (2) the remainder of the gain so recognized shall be taxed as a gain from the exchange of property.

§1.1081–9 Requirements with respect to order of Securities and Exchange Commission.

The term *order of the Securities and Exchange Commission* is defined in section 1083(a). In addition to the requirements specified in that definition, section 1081(f) provides that, except in the case of a distribution described in section 1081(c)(2), the provisions of section 1081 shall not apply to an exchange, expenditure, investment, distribution, or sale unless each of the following requirements is met:

(a) The order of the Securities and Exchange Commission must recite that the exchange, expenditure, investment, distribution, or sale is necessary or appropriate to effectuate the provisions of section 11(b) of the Public Utility Holding Company Act of 1935 (15 U. S. C. 79k (b)).

(b) The order shall specify and itemize the stocks and securities and other property (including money) which are ordered to be acquired, transferred, received, or sold upon such exchange, acquisition, expenditure, distribution, or sale and, in the case of an investment, the investment to be made, so as clearly to identify such property.

(c) The exchange, acquisition, expenditure, investment, distribution, or sale shall be made in obedience to such order and shall be completed within the time prescribed in such order.

These requirements were not designed merely to simplify the administration of the provisions of section 1081, and they are not to be considered as pertaining only to administrative matters. Each one of the three requirements is essential and must be met if gain or loss is not to be recognized upon the transaction.

§1.1081–10 Nonapplication of other provisions of the Internal Revenue Code of 1954.

The effect of section 1081(g) is that an exchange, sale, or distribution which is within section 1081 shall, with respect to the nonrecognition of gain or loss and the determination of basis, be governed only by the provisions of part VI (section 1081 and following), subchapter O, chapter 1 of the Code, the purpose being to prevent overlapping of those provisions and other provisions of subtitle A of the Code. In other words, if by virtue of section 1081 any portion of a person's gain or loss on any particular exchange, sale, or distribution is not to be recognized, then the gain or loss of such person shall be nonrecognized only to the extent provided in section 1081, regardless of what the result might have been if part VI (section 1081 and following), subchapter O, chapter 1 of the Code, had not been enacted;

and similarly, the basis in the hands of such person of the property received by him in such transaction shall be the basis provided by section 1082, regardless of what the basis of such property might have been under section 1011 if such part VI had not been enacted. On the other hand, if section 1081 does not provide for the nonrecognition of any portion of a person's gain or loss (whether or not such person is another party to the same transaction referred to above), then the gain or loss of such person shall be recognized or nonrecognized to the extent provided for by other provisions of subtitle A of the Code as if such part VI had not been enacted; and similarly, the basis in his hands of the property received by him in such transaction shall be the basis provided by other provisions of subtitle A of the Code as if such part VI had not been enacted.

§ 1.1081–11 Records to be kept and information to be filed with returns.

(a) *Exchanges; holders of stock or securities.* Every holder of stock or securities who receives stock or securities and other property (including money) upon an exchange shall, if the exchange is made with a corporation acting in obedience to an order of the Securities and Exchange Commission, file as a part of his income tax return for the taxable year in which the exchange takes place a complete statement of all facts pertinent to the nonrecognition of gain or loss upon such exchange, including—

(1) A clear description of the stock or securities transferred in the exchange, together with a statement of the cost or other basis of such stock or securities.

(2) The name and address of the corporation from which the stock or securities were received in the exchange.

(3) A statement of the amount of stock or securities and other property (including money) received from the exchange. The amount of each kind of stock or securities and other property received shall be set forth upon the basis of the fair market value thereof at the date of the exchange.

(b) *Exchanges; corporations subject to S.E.C. orders.* Each corporation which is a party to an exchange made in obedience to an order of the Securities and Exchange Commission directed to such corporation shall file as a part of its income tax return for its taxable year in which the exchange takes place a complete statement of all facts pertinent to the nonrecognition of gain or loss upon such exchange, including—

(1) A copy of the order of the Securities and Exchange Commission directed to such corporation, in obedience to which the exchange was made.

(2) A certified copy of the corporate resolution authorizing the exchange.

(3) A clear description of all property, including all stock or securities, transferred in the exchange, together with a complete statement of the cost or other basis of each class of property.

(4) The date of acquisition of any stock or securities transferred in the exchange, and, if any of such stock or securities were acquired by the corporation in obedience to an order of the Securities and Exchange Commission, a copy of such order.

(5) The name and address of all persons to whom any property was transferred in the exchange.

(6) If any property transferred in the exchange was transferred to another corporation, a copy of any order of the Securities and Exchange Commission directed to the other corporation, in obedience to which the exchange was made by such other corporation.

(7) If the corporation transfers any nonexempt property, the amount of the undistributed earnings and profits of the corporation accumulated after February 28, 1913, to the time of the exchange, computed in accordance with the last sentence in paragraph (b) of § 1.316–2.

(8) A statement of the amount of stock or securities and other property (including money) received upon the exchange, including a statement of all distributions or other dispositions made thereof. The amount of each kind of stock or securities and other property received shall be stated on the basis of the fair market value thereof at the date of the exchange.

(9) A statement showing as to each class of its stock the number of shares and percentage owned by any other

corporation, the voting rights and voting power, and the preference (if any) as to both dividends and assets.

(10) The term *exchange* shall, whenever occurring in this paragraph, be read as *exchange, expenditure, or investment.*

(c) *Distributions; shareholders.* Each shareholder who receives stock or securities or other property (including money) upon a distribution made by a corporation in obedience to an order of the Securities and Exchange Commission shall file as a part of his income tax return for the taxable year in which such distribution is received a complete statement of all facts pertinent to the nonrecognition of gain upon such distribution, including—

(1) The name and address of the corporation from which the distribution is received.

(2) A statement of the amount of stock or securities or other property received upon the distribution, including (in case the shareholder is a corporation) a statement of all distributions or other disposition made of such stock or securities or other property by the shareholder. The amount of each class of stock or securities and each kind of property shall be stated on the basis of the fair market value thereof at the date of the distribution.

(3) If the shareholder is a corporation, a statement showing as to each class of its stock the number of shares and percentage owned by a registered holding company or a majority-owned subsidiary company of a registered holding company, the voting rights and voting power, and the preference (if any) as to both dividends and assets.

(d) *Distributions; distributing corporations subject to S.E.C. orders.* Every corporation making a distribution in obedience to an order of the Securities and Exchange Commission shall file as a part of its income tax return for its taxable year in which the distribution is made a complete statement of all facts pertinent to the nonrecognition of gain to the distributee upon such distribution including—

(1) A copy of the order of the Securities and Exchange Commission, in obedience to which the distribution was made.

(2) A certified copy of the corporate resolution authorizing the distribution.

(3) A statement of the amount of stock or securities or other property (including money) distributed to each shareholder. The amount of each kind of stock or securities or other property shall be stated on the basis of the fair market value thereof at the date of the distribution.

(4) The date of acquisition of the stock or securities distributed, and, if any of such stock or securities were acquired by the distributing corporation in obedience to an order of the Securities and Exchange Commission, a copy of such order.

(5) The amount of the undistributed earnings and profits of the corporation accumulated after February 28, 1913, to the time of the distribution, computed in accordance with the last sentence in paragraph (b) of §1.316–2.

(6) A statement showing as to each class of its stock the number of shares and percentage owned by any other corporation, the voting rights and voting power, and the preference (if any) as to both dividends and assets.

(e) *Sales by members of system groups.* Each corporation which is a member of a system group and which in obedience to an order of the Securities and Exchange Commission sells stock or securities received upon an exchange (made in obedience to an order of the Securities and Exchange Commission) and applies the proceeds derived therefrom in retirement or cancellation of its own stock or securities shall file as a part of its income tax return for the taxable year in which the sale is made a complete statement of all facts pertaining to the nonrecognition of gain or loss upon such sale, including—

(1) A copy of the order of the Securities and Exchange Commission in obedience to which the sale was made.

(2) A copy of the order of the Securities and Exchange Commission in obedience to which the proceeds derived from the sale were applied in whole or in part in the retirement or cancellation of its stock or securities.

(3) A certified copy of the corporate resolutions authorizing the sale of the stock or securities and the application of the proceeds derived therefrom.

(4) A clear description of the stock or securities sold, including the name and address of the corporation by which they were issued.

(5) The date of acquisition of the stock or securities sold, together with a statement of the fair market value of such stock or securities at the date of acquisition, and a copy of all orders of the Securities and Exchange Commission in obedience to which such stock or securities were acquired.

(6) The amount of the proceeds derived from such sale.

(7) The portion of the proceeds of such sale which was applied in retirement or cancellation of its stock or securities, together with a statement showing how long such stock or securities were outstanding prior to retirement or cancellation.

(8) The issuing price of its stock or securities which were retired or canceled.

(f) *Section 1081 (c)(2) distributions; shareholders.* Each shareholder who receives a distribution described in section 1081 (c)(2) (concerning rights to acquire common stock) shall file as a part of his income tax return for the taxable year in which such distribution is received a complete statement of all the facts pertinent to the nonrecognition of gain upon such distribution, including—

(1) The name and address of the corporation from which the distribution is received.

(2) A statement of the amount of the rights received upon the distribution, stated on the basis of their fair market value at the date of the distribution.

(g) *Section 1081 (c)(2) distributions; distributing corporations.* Every corporation making a distribution described in section 1081(c)(2) (concerning rights to acquire common stock) shall file as a part of its income tax return for its taxable year in which the distribution is made a complete statement of all facts pertinent to the nonrecognition of gain to the distributees upon such distribution including—

(1) A copy of the arrangement forming the basis for the issuance of the order by the Securities and Exchange Commission.

(2) A copy of the order issued by the Securities and Exchange Commission pursuant to section 3 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79c).

(3) A certified copy of the corporate resolution authorizing the arrangement and the distribution.

(4) A statement of the amount of the rights distributed to each shareholder, stated on the basis of their fair market value at the date of the distribution.

(5) The date of acquisition of the stock with respect to which such rights are distributed, and if any were acquired by the distributing corporation in obedience to an order of the Securities and Exchange Commission, a copy of such order.

(6) The amount of the undistributed earnings and profits of the distributing corporation accumulated after February 28, 1913, to the time of the distribution computed in accordance with the last sentence in paragraph (b) of §1.316–2.

(h) *General requirements.* Permanent records in substantial form shall be kept by every taxpayer who participates in an exchange or distribution to which sections 1081 to 1083, inclusive, are applicable, showing the cost or other basis of the property transferred and the amount of stock or securities and other property (including money) received, in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received on the exchange or distribution.

§1.1082–1 Basis for determining gain or loss.

(a) For determining the basis of property acquired in a taxable year beginning before January 1, 1942, in any manner described in section 372 of the Internal Revenue Code of 1939 prior to its amendment by the Revenue Act of 1942 (56 Stat. 798), see such section (before its amendment by such Act).

(b) If the property was acquired in a taxable year beginning after December 31, 1941, in any manner described in section 1082 (other than subsection (a)(2)), or section 372 (other than subsection (a)(2)) of the Internal Revenue Code of 1939 after its amendments, the basis shall be that prescribed in section 1082 with respect to such property.

However, in the case of property acquired in a transaction described in section 1081(c)(2), this paragraph is applicable only if the property was acquired in a distribution made in a taxable year subject to the Internal Revenue Code of 1954.

(c) Section 1082 makes provisions with respect to the basis of property acquired in a transfer in connection with which the recognition of gain or loss is prohibited by the provisions of section 1081 with respect to the whole or any part of the property received. In general, and except as provided in §1.1082–3, it is intended that the basis for determining gain or loss pertaining to the property prior to its transfer, as well as the basis for determining the amount of depreciation or depletion deductible and the amount of earnings or profits available for distribution, shall continue notwithstanding the non-taxable conversion of the asset in form or its change in ownership. The continuance of the basis may be reflected in a shift thereof from one asset to another in the hands of the same owner, or in its transfer with the property from one owner into the hands of another. See also §1.1081–2.

§1.1082–2 Basis of property acquired upon exchanges under section 1081 (a) or (e).

(a) In the case of an exchange of stock or securities for stock or securities as described in section 1081 (a), if no part of the gain or loss upon such exchange was recognized under section 1081, the basis of the property acquired is the same as the basis of the property transferred by the taxpayer with proper adjustments to the date of the exchange.

(b) If, in an exchange of stock or securities as described in section 1081 (a), gain to the taxpayer was recognized under section 1081 (e) on account of the receipt of money, the basis of the property acquired is the basis of the property transferred (adjusted to the date of the exchange), decreased by the amount of money received and increased by the amount of gain recognized upon the exchange. If, upon such exchange, there were received by the taxpayer money and other nonexempt property (not permitted to be received without the recognition of gain), and gain from the transaction was recognized under section 1081 (e), the basis (adjusted to the date of the exchange) of the property transferred by the taxpayer, decreased by the amount of money received and increased by the amount of gain recognized, must be apportioned to and is the basis of the properties (other than money) received on the exchange. For the purpose of the allocation of such basis to the properties received, there must be assigned to the nonexempt property (other than money) an amount equivalent to its fair market value at the date of the exchange.

(c) Section 1081(e) provides that no loss may be recognized on an exchange of stock or securities for stock or securities as described in section 1081(a), although the taxpayer receives money or other nonexempt property from the transaction. However, the basis of the property (other than money) received by the taxpayer is the basis (adjusted to the date of the exchange) of the property transferred, decreased by the amount of money received. This basis must be apportioned to the properties received, and for this purpose there must be allocated to the nonexempt property (other than money) an amount of such basis equivalent to the fair market value of such nonexempt property at the date of the exchange.

(d) Section 1082 (a) does not apply in ascertaining the basis of property acquired by a corporation by the issuance of its stock or securities as the consideration in whole or in part for the transfer of the property to it. For the rule in such cases, see section 1082 (b).

(e) For purposes of this section, any reference to section 1081 shall be deemed to include a reference to corresponding provisions of prior internal revenue laws.

§1.1082–3 Reduction of basis of property by reason of gain not recognized under section 1081(b).

(a) *Introductory.* In addition to the adjustments provided in section 1016 and other applicable provisions of chapter 1 of the Code, and the regulations relating thereto, which are required to be made with respect to the cost or other basis of property, section

1082(a)(2) provides that a further adjustment shall be made in any case in which there shall have been a nonrecognition of gain under section 1081(b). Such further adjustment shall be made with respect to the basis of the property in the hands of the transferor immediately after the transfer and of the property acquired within 24 months after such transfer by an expenditure or investment to which section 1081(b) relates, and on account of which expenditure or investment gain is not recognized. If the property is in the hands of the transferor immediately after the transfer, the time of reduction is the day of the transfer; in all other cases the time of reduction is the date of acquisition. The effect of applying an amount in reduction of basis of property under section 1081 (b) is to reduce by such amount the basis for determining gain upon sale or other disposition, the basis for determining loss upon sale or other disposition, the basis for depreciation and for depletion, and any other amount which the Code prescribes shall be the same as any of such bases. For the purposes of the application of an amount in reduction of basis under section 1081(b), property is not considered as having a basis capable of reduction if—

(1) It is money, or

(2) If its adjusted basis for determining gain at the time the reduction is to be made is zero, or becomes zero at any time in the application of section 1081 (b).

(b) *General rule.* (1) Section 1082 (a)(2) sets forth seven categories of property, the basis of which for determining gain or loss shall be reduced in the order stated.

(2) If any of the property in the first category has a basis capable of reduction, the reduction must first be made before applying an amount in reduction of the basis of any property in the second or in a succeeding category, to each of which in turn a similar rule is applied.

(3) In the application of the rule to each category, the amount of the gain not recognized shall be applied to reduce the cost or other basis of all the property in the category as follows: The cost or other basis (at the time immediately after the transfer or, if the property is not then held but is thereafter acquired, at the time of such acquisition) of each unit of property in the first category shall be decreased (but the amount of the decrease shall not be more than the amount of the adjusted basis at such time for determining gain, determined without regard to this section) in an amount equal to such proportion of the unrecognized gain as the adjusted basis (for determining gain, determined without regard to this section) at such time of each unit of property of the taxpayer in that category bears to the aggregate of the adjusted basis (for determining gain, computed without regard to this section) at such time of all the property of the taxpayer in that category. When such adjusted basis of the property in the first category has been thus reduced to zero, a similar rule shall be applied, with respect to the portion of such gain which is unabsorbed in such reduction of the basis of the property in such category, in reducing the basis of the property in the second category. A similar rule with respect to the remaining unabsorbed gain shall be applied in reducing the basis of the property in the next succeeding category.

(c) *Special cases.* (1) With the consent of the Commissioner, the taxpayer may, however, have the basis of the various units of property within a particular category specified in section 1082(a)(2) adjusted in a manner different from the general rule set forth in paragraph (b) of this section. Variations from such general rule may, for example, involve adjusting the basis of only certain units of the taxpayer's property within a given category. A request for variations from the general rule should be filed by the taxpayer with its income tax return for the taxable year in which the transfer of property has occurred.

(2) Agreement between the taxpayer and the Commissioner as to any variations from such general rule shall be effective only if incorporated in a closing agreement entered into under the provisions of section 7121. If no such agreement is entered into by the taxpayer and the Commissioner, then the consent filed on Form 982 shall (except as otherwise provided in this subparagraph) be deemed to be a consent to the

application of such general rule, and such general rule shall apply in the determination of the basis of the taxpayer's property. If, however, the taxpayer specifically states on such form that it does not consent to the application of the general rule, then, in the absence of a closing agreement, the document filed shall not be deemed a consent within the meaning of section 1081(b)(4).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7517, 42 FR 58935, Nov. 14, 1977]

§1.1082–4 Basis of property acquired by corporation under section 1081(a), 1081(b), or 1081(e) as contribution of capital or surplus, or in consideration for its own stock or securities.

If, in connection with an exchange of stock or securities for stock or securities as described in section 1081(a), or an exchange of property for property as described in section 1081(b), or an exchange as described in section 1081(e), property is acquired by a corporation by the issuance of its stock or securities, the basis of such property shall be determined under section 1082(b). If the corporation issued its stock or securities as part or sole consideration for the property acquired, the basis of the property in the hands of the acquiring corporation is the basis (adjusted to the date of the exchange) which the property would have had in the hands of the transferor if the transfer had not been made, increased in the amount of gain or decreased in the amount of loss recognized under section 1081 to the transferor upon the transfer. If any property is acquired by a corporation from a shareholder as paid-in surplus, or from any person as a contribution to capital, the basis of the property to the corporation is the basis (adjusted to the date of acquisition) of the property in the hands of the transferor.

§1.1082–5 Basis of property acquired by shareholder upon tax-free distribution under section 1081(c) (1) or (2).

(a) *Stock or securities.* If there was distributed to a shareholder in a corporation which is a registered holding company or a majority-owned subsidiary company, stock or securities (other than stock or securities which are nonexempt property), and if by virtue of section 1081 (c)(1) no gain was recognized to the shareholder upon such distribution, then the basis of the stock in respect of which the distribution was made must be apportioned between such stock and the stock or securities so distributed to the shareholder. The basis of the old shares and the stock or securities received upon the distribution shall be determined in accordance with the following rules:

(1) If the stock or securities received upon the distribution consist solely of stock in the distributing corporation and the stock received is all of substantially the same character and preference as the stock in respect of which the distribution is made, the basis of each share will be the quotient of the cost or other basis of the old shares of stock divided by the total number of the old and the new shares.

(2) If the stock or securities received upon the distribution are in whole or in part stock in a corporation other than the distributing corporation, or are in whole or in part stock of a character or preference materially different from the stock in respect of which the distribution is made, or if the distribution consists in whole or in part of securities other than stock, the cost or other basis of the stock in respect of which the distribution is made shall be apportioned between such stock and the stock or securities distributed in proportion, as nearly as may be, to the respective values of each class of stock or security, old and new, at the time of such distribution, and the basis of each share of stock or unit of security will be the quotient of the cost or other basis of the class of stock or security to which such share or unit belongs, divided by the number of shares or units in the class. Within the meaning of this subparagraph, stocks or securities in one corporation are different in class from stocks or securities in another corporation, and, in general, any material difference in character or preference or terms sufficient to distinguish one stock or security from another stock or security, so that different values may properly be assigned thereto, will constitute a difference in class.

(b) *Stock rights.* If there was distributed to a shareholder in a corporation rights to acquire common stock in a second corporation, and if by virtue of section 1081 (c)(2) no gain was recognized to the shareholder upon such distribution, then the basis of the stock in respect of which the distribution was made must be apportioned between such stock and the stock rights so distributed to the shareholder. The basis of such stock and the stock rights received upon the distribution shall be determined in accordance with the following:

(1) The cost or other basis of the stock in respect of which the distribution is made shall be apportioned between such stock and the stock rights distributed, in proportion to the respective values thereof at the time the rights are issued.

(2) The basis for determining gain or loss from the sale of a right, or from the sale of a share of stock in respect of which the distribution is made, will be the quotient of the cost or other basis, properly adjusted, assigned to the rights or the stock, divided, as the case may be, by the number of rights acquired or by the number of shares of such stock held.

(c) *Cross reference.* As to the basis of stock or securities distributed by one member of a system group to another member of the same system group, see § 1.1082–6.

§ 1.1082–6 Basis of property acquired under section 1081(d) in transactions between corporations of the same system group.

(a) If property was acquired by a corporation which is a member of a system group, from a corporation which is a member of the same system group, upon a transfer or distribution described in section 1081 (d)(1), then as a general rule the basis of such property in the hands of the acquiring corporation is the basis which such property would have had in the hands of the transferor if the transfer or distribution had not been made. Except as otherwise indicated in this section, this rule will apply equally to cases in which the consideration for the property acquired consists of stock or securities, money, and other property, or any of them, but it is contemplated that an ultimate true reflection of income will be obtained in all cases, notwithstanding any peculiarities in form which the various transactions may assume. See the example in § 1.1081–6.

(b) An exception to the general rule is provided for in case the property acquired consists of stock or securities issued by the corporation from which such stock or securities were received. If such stock or securities were the sole consideration for the property transferred to the corporation issuing such stock or securities, then the basis of the stock or securities shall be (1) the same as the basis (adjusted to the time of the transfer) of the property transferred for such stock or securities, or (2) the fair market value of such stock or securities at the time of their receipt, whichever is the lower. If such stock or securities constituted only part consideration for the property transferred to the corporation issuing such stock or securities, then the basis shall be an amount which bears the same ratio to the basis of the property transferred as the fair market value of such stock or securities on their receipt bears to the total fair market value of the entire consideration received, except that the fair market value of such stock or securities at the time of their receipt shall be the basis therefor, if such value is lower than such amount.

(c) The application of paragraph (b) of this section may be illustrated by the following examples:

Example 1. Suppose the A Corporation has property with an adjusted basis of $600,000 and, in an exchange in which section 1081 (d)(1) is applicable, transfers such property to the B Corporation in exchange for a total consideration of $1,000,000, consisting of (1) cash in the amount of $100,000, (2) tangible property having a fair market value of $400,000 and an adjusted basis in the hands of the B Corporation of $300,000, and (3) stock or securities issued by the B Corporation with a par value and a fair market value as of the date of their receipt in the amount of $500,000. The basis to the B Corporation of the property received by it is $600,000, which is the adjusted basis of such property in the hands of the A Corporation. The basis to the A Corporation of the assets (other than cash) received by it is as follows: Tangible property, $300,000, the adjusted basis of such property to the B Corporation, the former owner;

stock or securities issued by the B Corporation, $300,000, an amount equal to 550,000/1,000,000ths of $600,000.

Example 2. Suppose that in example (1) the property of the A Corporation transferred to the B Corporation had an adjusted basis of $1,100,000 instead of $600,000, and that all other factors in the example remain the same. In such case, the basis to the A Corporation of the stock or securities in the B Corporation is $500,000, which was the fair market value of such stock or securities at the time of their receipt by the A Corporation, because this amount is less than the amount established as 500,000/1,000,000ths of $1,100,000 or $550,000.

§ 1.1083–1 Definitions.

(a) *Order of the Securities and Exchange Commission.* (1) An order of the Securities and Exchange Commission as defined in section 1083(a) must be issued after May 28, 1938 (the date of the enactment of the Revenue Act of 1938 (52 Stat. 447)), and must be issued under the authority of section 11(b) or 11(e) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79k (b), (e)), to effectuate the provisions of section 11(b) of such Act. In all cases the order must become or have become final in accordance with law; i.e., it must be valid, outstanding, and not subject to further appeal. See further sections 1083(a) and 1081(f).

(2) Section 11 (b) of the Public Utility Holding Company Act of 1935 provides:

> Sec. 11. *Simplification of holding company systems.** * *
>
> (b) It shall be the duty of the Commission, as soon as practicable after January 1, 1938:
>
> (1) To require by order, after notice and opportunity for hearing, that each registered holding company, and each subsidiary company thereof, shall take such action as the Commission shall find necessary to limit the operations of the holding-company system of which such company is a part to a single integrated public-utility system, and to such other businesses as are reasonably incidental, or economically necessary or appropriate to the operations of such integrated public-utility system: *Provided, however,* That the Commission shall permit a registered holding company to continue to control one or more additional integrated public-utility systems, if, after notice and opportunity for hearing, it finds that—
>
> (A) Each of such additional systems cannot be operated as an independent system without the loss of substantial economies which can be secured by the retention of control by such holding company of such system;
>
> (B) All of such additional systems are located in one State, or in adjoining States, or in a contiguous foreign country; and
>
> (C) The continued combination of such systems under the control of such holding company is not so large (considering the state of the art and the area or region affected) as to impair the advantages of localized management, efficient operation, or the effectiveness of regulation.
>
> The Commission may permit as reasonably incidental, or economically necessary or appropriate to the operations of one or more integrated public-utility systems the retention of an interest in any business (other than the business of a public-utility company as such) which the Commission shall find necessary or appropriate in the public interest or for the protection of investors or consumers and not detrimental to the proper functioning of such system or systems.
>
> (2) To require by order, after notice and opportunity for hearing, that each registered holding company, and each subsidiary company thereof, shall take such steps as the Commission shall find necessary to ensure that the corporate structure or continued existence of any company in the holding-company system does not unduly or unnecessarily complicate the structure, or unfairly or inequitably distribute voting power among security holders, of such holding-company system. In carrying out the provisions of this paragraph the Commission shall require each registered holding company (and any company in the same holding-company system with such holding company) to take such action as the Commission shall find necessary in order that such holding company shall cease to be a holding company with respect to each of its subsidiary companies which itself has a subsidiary company which is a holding company. Except for the purpose of fairly and equitably distributing voting power among the security holders of such company, nothing in this paragraph shall authorize the Commission to require any change in the corporate structure or existence of any company which is not a holding company, or of any company whose principal business is that of a public-utility company. The Commission may by order revoke or modify any order previously made under this subsection, if, after notice and opportunity for hearing, it finds that the conditions upon which the order was predicated do not exist. Any order made under this subsection shall be subject to judicial review as provided in section 24.

(3) Section 11(e) of the Public Utility Holding Company Act of 1935 provides:

> Sec. 11. *Simplification of holding company systems.* * * *
>
> (e) In accordance with such rules and regulations or order as the Commission may

deem necessary or appropriate in the public interest or for the protection of investors or consumers, any registered holding company or any subsidiary company of a registered holding company may, at any time after January 1, 1936, submit a plan to the Commission for the divestment of control, securities, or other assets, or for other action by such company or any subsidiary company thereof for the purpose of enabling such company or any subsidiary company thereof to comply with the provisions of subsection (b). If, after notice and opportunity for hearing, the Commission shall find such plan, as submitted or as modified, necessary to effectuate the provisions of subsection (b) and fair and equitable to the persons affected by such plan, the Commission shall make an order approving such plan; and the Commission, at the request of the company, may apply to a court, in accordance with the provisions of subsection (f) of section 18, to enforce and carry out the terms and provisions of such plan. If, upon any such application, the court, after notice and opportunity for hearing, shall approve such plan as fair and equitable and as appropriate to effectuate the provisions of section 11, the court as a court of equity may, to such extent as it deems necessary for the purpose of carrying out the terms and provisions of such plan, take exclusive jurisdiction and possession of the company or companies and the assets thereof, wherever located; and the court shall have jurisdiction to appoint a trustee, and the court may constitute and appoint the Commission as sole trustee, to hold or administer, under the direction of the court and in accordance with the plan theretofore approved by the court and the Commission, the assets so possessed.

(b) *Registered holding company, holding-company system, and associate company*. (1) Under section 5 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79e), any holding company may register by filing with the Securities and Exchange Commission a notification of registration, in such form as the Commission may by rules and regulations prescribe as necessary or appropriate in the public interest or for the protection of investors or consumers. A holding company shall be deemed to be registered upon receipt by the Securities and Exchange Commission of such notification of registration. As used in this part, the term *registered holding company* means a holding company whose notification of registration has been so received and whose registration is still in effect under section 5 of the Public Utility Holding Company Act of 1935. Under section 2 (a)(7) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b (a)(7)), a corporation is a holding company (unless it is declared not to be such by the Securities and Exchange Commission), if such corporation directly or indirectly owns, controls, or holds with power to vote 10 percent or more of the outstanding voting securities of a public-utility company (i.e., an electric utility company or a gas utility company as defined by such act) or of any other holding company. A corporation is also a holding company if the Securities and Exchange Commission determines, after notice and opportunity for hearing, that such corporation directly or indirectly exercises (either alone or pursuant to an arrangement or understanding with one or more other persons) such a controlling influence over the management or policies of any public-utility company (i.e., an electric utility company or a gas utility company as defined by such act) or holding company as to make it necessary or appropriate in the public interest or for the protection of investors or consumers that such corporation be subject to the obligations, duties, and liabilities imposed upon holding companies by the Public Utility Holding Company Act of 1935 (15 U.S.C. ch. 2C). An electric utility company is defined by section 2 (a)(3) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b (a)(3)) to mean a company which owns or operates facilities used for the generation, transmission, or distribution of electrical energy for sale, other than sale to tenants or employees of the company operating such facilities for their own use and not for resale; and a gas utility company is defined by section 2 (a)(4) of such act (15 U.S.C. 79b (a)(4)), to mean a company which owns or operates facilities used for the distribution at retail (other than distribution only in enclosed portable containers, or distribution to tenants or employees of the company operating such facilities for their own use and not for resale) of natural or manufactured gas for heat, light, or power. However, under certain conditions the Securities and Exchange Commission may declare a company not to be an electric utility company or a gas utility company, as the case may be, in which event the company shall not be considered an electric utility company or a gas utility company.

(2) The term *holding company system* has the meaning assigned to it by section 2 (a)(9) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b (a)(9)), and hence means any holding company, together with all its subsidiary companies (i.e., subsidiary companies within the meaning of section 2(a)(8) of such act (15 U.S.C. 79b (a)(8)), which in general include all companies 10 percent of whose outstanding voting securities is owned directly or indirectly by such holding company) and all mutual service companies of which such holding company or any subsidiary company thereof is a member company. The term *mutual service company* means a company approved as a mutual service company under section 13 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79m). The term *member company* is defined by action 2 (a)(14) of such act (15 U.S.C. 79b (a)(14)), to mean a company which is a member of an association or group of companies mutually served by a mutual service company.

(3) The term *associate company* has the meaning assigned to it by section 2 (a)(10) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79b (a)(10)), and hence an associate company of a company is any company in the same holding-company system with such company.

(c) *Majority-owned subsidiary company.* The term *majority-owned subsidiary company* is defined in section 1083 (c). Direct ownership by a registered holding company of more than 50 percent of the specified stock of another corporation is not necessary to constitute such corporation a majority-owned subsidiary company. To illustrate, if the H Corporation, a registered holding company, owns 51 percent of the common stock of the A Corporation and 31 percent of the common stock of the B Corporation, and the A Corporation owns 20 percent of the common stock of the B Corporation (the common stock in each case being the only stock entitled to vote), both the A Corporation and the B Corporation are majority-owned subsidiary companies.

(d) *System group.* The term *system group* is defined in section 1083 (d) to mean one or more chains of corporations connected through stock ownership with a common parent corporation, if at least 90 percent of each class of stock (other than (1) stock which is preferred as to both dividends and assets, and (2) stock which is limited and preferred as to dividends but which is not preferred as to assets but only if the total value of such stock is less than 1 percent of the aggregate value of all classes of stock which are not preferred as to both dividends and assets) of each of the corporations (except the common parent corporation) is owned directly by one or more of the other corporations, and if the common parent corporation owns directly at least 90 percent of each class of stock (other than stock preferred as to both dividends and assets) of at least one of the other corporations; but no corporation is a member of a system group unless it is either a registered holding company or a majority-owned subsidiary company. While the type of stock which must, for the purpose of this definition, be at least 90 percent owned may be different from the voting stock which must be more than 50 percent owned for the purpose of the definition of a majority-owned subsidiary company under section 1083(c), as a general rule both types of ownership tests must be met under section 1083(d), since a corporation, in order to be a member of a system group, must also be a registered holding company or a majority-owned subsidiary company.

(e) *Nonexempt property.* The term *nonexempt property* is defined by section 1083(e) to include—

(1) The amount of any consideration in the form of a cancellation or assumption of debts or other liabilities of the transferor (including a continuance of encumbrances subject to which the property was transferred). To illustrate, if in obedience to an order of the Securities and Exchange Commission the X Corporation, a registered holding company, transfers property to the Y Corporation in exchange for property (not nonexempt property) with a fair

market value of $500,000, the X Corporation receives $100,000 of nonexempt property, if for example—

(i) The Y Corporation cancels $100,000 of indebtedness owed to it by the X Corporation;

(ii) The Y Corporation assumes an indebtedness of $100,000 owed by the X Corporation to another company, the A Corporation; or

(iii) The Y Corporation takes over the property conveyed to it by the X Corporation subject to a mortgage of $100,000.

(2) Short-term obligations (including notes, drafts, bills of exchange, and bankers' acceptances) having a maturity at the time of issuance of not exceeding 24 months, exclusive of days of grace.

(3) Securities issued or guaranteed as to principal or interest by a government or subdivision thereof (including those issued by a corporation which is an instrumentality of a government or subdivision thereof).

(4) Stock or securities which were acquired from a registered holding company which acquired such stock or securities after February 28, 1938, or an associate company of a registered holding company which acquired such stock or securities after February 28, 1938, unless such stock or securities were acquired in obedience to an order of the Securities and Exchange Commission (as defined in section 1083 (a)) or were acquired with the authorization or approval of the Securities and Exchange Commission under any section of the Public Utility Holding Company Act of 1935, and are not nonexempt property within the meaning of section 1083(e) (1), (2), or (3).

(5) Money, and the right to receive money not evidenced by a security other than an obligation described as nonexempt property in section 1083 (e) (2) or (3). The term *the right to receive money* includes, among other items, accounts receivable, claims for damages, and rights to refunds of taxes.

(f) *Stock or securities.* The term *stock or securities* is defined in section 1083(f) for the purposes of part VI (section 1081 and following), subchapter O, chapter 1 of the Code. As therein defined, the term includes voting trust certificates and stock rights or warrants.

WASH SALES OF STOCK OR SECURITIES

§ 1.1091–1 Losses from wash sales of stock or securities.

(a) A taxpayer cannot deduct any loss claimed to have been sustained from the sale or other disposition of stock or securities if, within a period beginning 30 days before the date of such sale or disposition and ending 30 days after such date (referred to in this section as the 61-day period), he has acquired (by purchase or by an exchange upon which the entire amount of gain or loss was recognized by law), or has entered into a contract or option so to acquire, substantially identical stock or securities. However, this prohibition does not apply (1) in the case of a taxpayer, not a corporation, if the sale or other disposition of stock or securities is made in connection with the taxpayer's trade or business, or (2) in the case of a corporation, a dealer in stock or securities, if the sale or other disposition of stock or securities is made in the ordinary course of its business as such dealer.

(b) Where more than one loss is claimed to have been sustained within the taxable year from the sale or other disposition of stock or securities, the provisions of this section shall be applied to the losses in the order in which the stock or securities the disposition of which resulted in the respective losses were disposed of (beginning with the earliest disposition). If the order of disposition of stock or securities disposed of at a loss on the same day cannot be determined, the stock or securities will be considered to have been disposed of in the order in which they were originally acquired (beginning with the earliest acquisition).

(c) Where the amount of stock or securities acquired within the 61-day period is less than the amount of stock or securities sold or otherwise disposed of, then the particular shares of stock or securities the loss from the sale or other disposition of which is not deductible shall be those with which the stock or securities acquired are matched in accordance with the following rule: The stock or securities acquired will be matched in accordance with the order of their acquisition (beginning with the earliest acquisition) with an equal number of the shares of stock or securities sold or otherwise disposed of.

(d) Where the amount of stock or securities acquired within the 61-day period is not less than the amount of stock or securities sold or otherwise disposed of, then the particular shares of stock or securities the acquisition of which resulted in the nondeductibility of the loss shall be those with which the stock or securities disposed of are matched in accordance with the following rule: The stock or securities sold or otherwise disposed of will be matched with an equal number of the shares of stock or securities acquired in accordance with the order of acquisition (beginning with the earliest acquisition) of the stock or securities acquired.

(e) The acquisition of any share of stock or any security which results in the nondeductibility of a loss under the provisions of this section shall be disregarded in determining the deductibility of any other loss.

(f) The word *acquired* as used in this section means acquired by purchase or by an exchange upon which the entire amount of gain or loss was recognized by law, and comprehends cases where the taxpayer has entered into a contract or option within the 61-day period to acquire by purchase or by such an exchange.

(g) For purposes of determining under this section the 61-day period applicable to a short sale of stock or securities, the principles of paragraph (a) of §1.1233–1 for determining the consummation of a short sale shall generally apply except that the date of entering into the short sale shall be deemed to be the date of sale if, on the date of entering into the short sale, the taxpayer owns (or on or before such date has entered into a contract or option to acquire) stock or securities identical to those sold short and subsequently delivers such stock or securities to close the short sale.

(h) The following examples illustrate the application of this section:

Example 1. A, whose taxable year is the calendar year, on December 1, 1954, purchased 100 shares of common stock in the M Company for $10,000 and on December 15, 1954, purchased 100 additional shares for $9,000. On January 3, 1955, he sold the 100 shares purchased on December 1, 1954, for $9,000. Because of the provisions of section 1091, no loss from the sale is allowable as a deduction.

Example 2. A, whose taxable year is the calendar year, on September 21, 1954, purchased 100 shares of the common stock of the M Company for $5,000. On December 21, 1954, he purchased 50 shares of substantially identical stock for $2,750, and on December 27, 1954, he purchased 25 additional shares of such stock for $1,125. On January 3, 1955, he sold for $4,000 the 100 shares purchased on September 21, 1954. There is an indicated loss of $1,000 on the sale of the 100 shares. Since, within the 61-day period, A purchased 75 shares of substantially identical stock, the loss on the sale of 75 of the shares ($3,750−$3,000, or $750) is not allowable as a deduction because of the provisions of section 1091. The loss on the sale of the remaining 25 shares ($1,250−$1,000, or $250) is deductible subject to the limitations provided in sections 267 and 1211. The basis of the 50 shares purchased December 21, 1954, the acquisition of which resulted in the nondeductibility of the loss ($500) sustained on 50 of the 100 shares sold on January 3, 1955, is $2,500 (the cost of 50 of the shares sold on January 3, 1955) + $750 (the difference between the purchase price ($2,750) of the 50 shares acquired on December 21, 1954, and the selling price ($2,000) of 50 of the shares sold on January 3, 1955), or $3,250. Similarly, the basis of the 25 shares purchased on December 27, 1954, the acquisition of which resulted in the nondeductibility of the loss ($250) sustained on 25 of the shares sold on January 3, 1955, is $1,250+$125, or $1,375. See §1.1091–2.

Example 3. A, whose taxable year is the calendar year, on September 15, 1954, purchased 100 shares of the stock of the M Company for $5,000. He sold these shares on February 1, 1956, for $4,000. On each of the four days from February 15, 1956, to February 18, 1956, inclusive, he purchased 50 shares of substantially identical stock for $2,000. There is an indicated loss of $1,000 from the sale of the 100 shares on February 1, 1956, but, since within the 61-day period A purchased not less than 100 shares of substantially identical stock, the loss is not deductible. The particular shares of stock the purchase of which resulted in the nondeductibility of the loss are the first 100 shares purchased within such period, that is, the 50 shares purchased on February 15, 1956, and the 50 shares purchased on February 16, 1956. In determining the period for which the 50 shares purchased on February 15, 1956, and the 50 shares purchased on February 16, 1956, were held, there is to be included the period for which the 100 shares purchased on September 15, 1954, and sold on February 1, 1956, were held.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6926, 32 FR 11468, Aug. 9, 1967]

§ 1.1091–2 Basis of stock or securities acquired in "wash sales".

(a) *In general.* The application of section 1091(d) may be illustrated by the following examples:

Example 1. A purchased a share of common stock of the X Corporation for $100 in 1935, which he sold January 15, 1955, for $80. On February 1, 1955, he purchased a share of common stock of the same corporation for $90. No loss from the sale is recognized under section 1091. The basis of the new share is $110; that is, the basis of the old share ($100) increased by $10, the excess of the price at which the new share was acquired ($90) over the price at which the old share was sold ($80).

Example 2. A purchased a share of common stock of the Y Corporation for $100 in 1935, which he sold January 15, 1955, for $80. On February 1, 1955, he purchased a share of common stock of the same corporation for $70. No loss from the sale is recognized under section 1091. The basis of the new share is $90; that is, the basis of the old share ($100) decreased by $10, the excess of the price at which the old share was sold ($80) over the price at which the new share was acquired ($70).

(b) *Special rule.* For a special rule as to the adjustment to basis required under section 1091(d) in the case of wash sales involving certain regulated investment company stock for which there is an average basis, see paragraph (e)(3)(iii) (*c*) and (*d*) of § 1.1012–1.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7129, 36 FR 12738, July 7, 1971]

§ 1.1092(b)–1T Coordination of loss deferral rules and wash sale rules (temporary).

(a) *In general.* Except as otherwise provided, in the case of the disposition of a position or positions of a straddle, the rules of paragraph (a)(1) of this section apply before the application of the rules of paragraph (a)(2) of this section.

(1) Any loss sustained from the disposition of shares of stock or securities that constitute positions of a straddle shall not be taken into account for purposes of this subtitle if, within a period beginning 30 days before the date of such disposition and ending 30 days after such date, the taxpayer has acquired (by purchase or by an exchange on which the entire amount of gain or loss was recognized by law), or has entered into a contract or option so to acquire, substantially identical stock or securities.

(2) Except as otherwise provided, if a taxpayer disposes of less than all of the positions of a straddle, any loss sustained with respect to the disposition of that position or positions (hereinafter referred to as *loss position*) shall not be taken into account for purposes of this subtitle to the extent that the amount of unrecognized gain as of the close of the taxable year in one or more of the following positions—

(i) Successor positions,

(ii) Offsetting positions to the loss position, or

(iii) Offsetting positions to any successor position,

exceeds the amount of loss disallowed under paragraph (a)(1) of this section. See § 1.1092(b)–5T relating to definitions.

(b) *Carryover of disallowed loss.* Any loss that is disallowed under paragraph (a) of this section shall, subject to any further application of paragraph (a)(1) of this section and the limitations under paragraph (a)(2) of this section, be treated as sustained in the succeeding taxable year. However, a loss disallowed in Year 1, for example, under paragraph (a)(1) of this section will not be allowed in Year 2 unless the substantially identical stock or securities, the acquisition of which caused the loss to be disallowed in Year 1, are disposed of during Year 2 and paragraphs (a)(1) and (a)(2) of this section do not apply in Year 2 to disallow the loss.

(c) *Treatment of disallowed loss*—(1) *Character.* If the disposition of a loss position would (but for the application of this section) result in a capital loss, the loss allowed under paragraph (b) of this section with respect to the disposition of the loss position shall be treated as a capital loss. In any other case, a loss allowed under paragraph (b) of this section shall be treated as an ordinary loss. For example, if the disposition of a loss position would, but for the application of paragraph (a) of this section, give rise to a capital loss, that loss when allowed pursuant to paragraph (b) of this section will be treated as a capital loss on the date the loss is allowed regardless of whether any gain or loss with respect to one or more successor positions would be treated as ordinary income or loss.

(2) *Section 1256 contracts.* If the disposition of a loss position would (but for the application of this section) result in 60 percent long-term capital loss and 40 percent short-term capital loss, the loss allowed under paragraph (b) of this section with respect to the disposition of the loss position shall be treated as 60 percent long-term capital loss and 40 percent short-term capital loss regardless of whether any gain or loss with respect to one or more successor positions would be treated as 100 percent long-term or short-term capital gain or loss.

(d) *Exceptions.* (1) This section shall not apply to losses sustained—

(i) With respect to the disposition of one or more positions that constitute part of a hedging transaction;

(ii) With respect to the disposition of a loss position included in a mixed straddle account (as defined in paragraph (b) of § 1.1092(b)–4T); and

(iii) With respect to the disposition of a position that is part of a straddle consisting only of section 1256 contracts.

(2) Paragraph (a)(1) of this section shall not apply to losses sustained by a dealer in stock or securities if such losses are sustained in a transaction made in the ordinary course of such business.

(e) *Coordination with section 1091.* Section 1092(b) applies in lieu of section 1091 to losses sustained from the disposition of positions in a straddle. See example (18) of paragraph (g) of this section.

(f) *Effective date.* The provisions of this section apply to dispositions of loss positions on or after January 24, 1985.

(g) *Examples.* This section may be illustrated by the following examples. It is assumed in each example that the following positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year and none of the exceptions contained in paragraph (d) of this section apply.

Example 1. On December 1, 1985, A enters into offsetting long and short positions. On December 10, 1985, A disposes of the short position at an $11 loss, at which time there is $5 of unrealized gain in the offsetting long position. At year-end there is still $5 of unrecognized gain in the offsetting long position. Under these circumstances, $5 of the $11 loss will be disallowed for 1985 because there is $5 of unrecognized gain in the offsetting long position; the remaining $6 of loss, however, will be taken into account in 1985.

Example 2. Assume the facts are the same as in example (1), except that at year-end there is $11 of unrecognized gain in the offsetting long position. Under these circumstances, the entire $11 loss will be disallowed for 1985 because there is $11 of unrecognized gain at year-end in the offsetting long position.

Example 3. Assume the facts are the same as in example (1), except that at year-end there is no unrecognized gain in the offsetting long position. Under these circumstances, the entire $11 loss will be allowed for 1985.

Example 4. On November 1, 1985, A enters into offsetting long and short positions. On November 10, 1985, A disposes of the long position at a $10 loss, at which time there is $10 of unrealized gain in the short position. On November 11, 1985, A enters into a new long position (successor position) that is offsetting with respect to the retained short position but is not substantially identical to the long position disposed of on November 10, 1985. A holds both positions through year-end, at which time there is $10 of unrecognized gain in the successor long position and no unrecognized gain in the offsetting short position. Under these circumstances, the entire $10 loss will be disallowed for 1985 because there is $10 of unrecognized gain in the successor long position.

Example 5. Assume the facts are the same as in example (4), except that at year-end there is $4 of unrecognized gain in the successor long position and $6 of unrecognized gain in the offsetting short position. Under these circumstances, the entire $10 loss will be disallowed for 1985 because there is a total of $10 of unrecognized gain in both the successor long position and offsetting short position.

Example 6. Assume the facts are the same as in example (4), except that at year-end A disposes of the offsetting short position at a $2 loss. Under these circumstances, $10 of the total $12 loss will be disallowed because there is $10 of unrecognized gain in the successor long position.

Example 7. Assume the facts are the same as in example (4), and on January 10, 1986, A disposes of the successor long position at no gain or loss. A holds the offsetting short position until year-end, at which time there is $10 of unrecognized gain. Under these circumstances, the $10 loss will be disallowed for 1986 because there is $10 of unrecognized gain in an offsetting position at year-end.

Example 8. Assume the facts are the same as in example (4), except at year-end there is $8 of unrecognized gain in the successor long position and $8 of unrecognized loss in the offsetting short position. Under these circumstances, $8 of the total $10 realized loss will be disallowed because there is $8 of unrecognized gain in the successor long position.

Example 9. On October 1, 1985, A enters into offsetting long and short positions. Neither the long nor the short position is stock or securities. On October 2, 1985, A disposes of the short position at a $10 loss and the long position at a $10 gain. On October 3, 1985, A enters into a long position identical to the original long position. At year-end there is $10 of unrecognized gain in the second long position. Under these circumstances, the $10 loss is allowed because the second long position is not a successor position or offsetting position to the short loss position.

Example 10. On November 1, 1985, A enters into offsetting long and short positions. On November 10, 1985, there is $20 of unrealized gain in the long position and A disposes of the short position at a $20 loss. By November 15, 1985, the value of the long position has declined eliminating all unrealized gain in the position. On November 15, 1985, A establishes a second short position (successor position) that is offsetting with respect to the long position but is not substantially identical to the short position disposed of on November 10, 1985. At year-end there is no unrecognized gain in the offsetting long position or in the successor short position. Under these circumstances, the $20 loss sustained with respect to the short loss position will be allowed for 1985 because at year-end there is no unrecognized gain in the successor short position or the offsetting long position.

Example 11. Assume the facts are the same as in example (10), except that the second short position was established on November 8, 1985, and there is $20 of unrecognized gain in the second short position at year-end. Since the second short position was entered into within 30 days before the disposition of the loss position, the second short position is considered a successor position to the loss position. Under these circumstances, the $20 loss will be disallowed because there is $20 of unrecognized gain in a successor position.

Example 12. Assume the facts are the same as in example (10), except that at year-end there is $18 of unrecognized gain in the offsetting long position and $18 of unrecognized gain in the successor short position. Under these circumstances, the entire loss will be disallowed because there is more than $20 of unrecognized gain in both the successor short position and offsetting long position.

Example 13. Assume the facts are the same as in example (10), except that there is $20 of unrecognized gain in the successor short position and no unrecognized gain in the offsetting long position at year-end. Under these circumstances, the entire $20 loss will be disallowed because there is $20 of unrecognized gain in the successor short position.

Example 14. On January 2, 1986, A enters into offsetting long and short positions. Neither the long nor the short position is stock or securities. On March 3, 1986, A disposes of the long position at a $10 gain. On March 10, 1986, A disposes of the short position at a $10 loss. On March 14, 1986, A enters into a new short position. On April 10, 1986, A enters into an offsetting long position. A holds both positions to year-end, at which time there is $10 of unrecognized gain in the offsetting long position and no unrecognized gain or loss in the short position. Under these circumstances, the $10 loss will be allowed because (1) the rules of paragraph (a)(1) of this section are not applicable; and (2) the rules of paragraph (a)(2) of this section do not apply, since all positions of the straddle that contained the loss position were disposed of.

Example 15. On December 1, 1985, A enters into offsetting long and short positions. On December 4, 1985, A disposes of the short position at a $10 loss. On December 5, 1985, A establishes a new short position that is offsetting to the long position, but is not substantially identical to the short position disposed of on December 4, 1985. On December 6, 1985, A disposes of the long position at a $10 gain. On December 7, 1985, A enters into a second long position that is offsetting to the new short position, but is not substantially identical to the long position disposed of on December 6, 1985. A holds both positions to year-end at which time there is no unrecognized gain in the second short position and $10 of unrecognized gain in the offsetting long position. Under these circumstances, the entire $10 loss will be disallowed for the 1985 taxable year because the second long position is an offsetting position with respect to the second short position which is a successor position.

Example 16. On September 1, 1985, A enters into offsetting positions consisting of a long section 1256 contract and short non-section 1256 position. No elections under sections 1256(d)(1) or 1092(b)(2)(A), relating to mixed straddles, are made. On November 1, 1985, at which time there is $20 of unrecognized gain in the short non-section 1256 position, A disposes of the long section 1256 contract at a $20 loss and on the same day acquires a long non-section 1256 position (successor position) that is offsetting with respect to the short non-section 1256 position. But for the application of this section, A's disposition of the section 1256 contract would give rise to a capital loss. At year-end there is a $20 of unrecognized gain in the offsetting short non-section 1256 position and no unrecognized gain in the successor long position. Under these circumstances, the entire $20 loss will be disallowed for 1985 because there is $20 unrecognized gain in the offsetting short position. In 1986, A disposes of the successor long non-section 1256 position and there is no unrecognized gain at year-end in the offsetting short position. Under these circumstances, the $20 loss disallowed in 1985 with respect to the section 1256 contract will be treated in 1986 as 60 percent long-term capital loss and 40 percent short-term capital loss.

Example 17. On January 2, 1986, A, not a dealer in stock or securities, acquires stock in X Corporation (X stock) and an offsetting put option. On March 3, 1986, A disposes of the X stock at a $10 loss. On March 10, 1986, A disposes of the put option at a $10 gain. On March 14, 1986, A acquires new X stock that is substantially identical to the X stock disposed of on March 3, 1986. A holds the X stock to year-end. Under these circumstances, the $10 loss will be disallowed for 1986 under paragraph (a)(1) of this section because A, within a period beginning 30 days before March 3, 1986 and ending 30 days after such date, acquired stock substantially identical to the X stock disposed of.

Example 18. On June 2, 1986, A, not a dealer in stock or securities, acquires stock in X Corporation (X stock). On September 2, 1986, A disposes of the X stock at a $100 loss. On September 15, 1986, A acquires new X stock that is substantially identical to the X stock disposed of on September 2, 1986, and an offsetting put option. A holds these straddle positions to year-end. Under these circumstances, section 1091, rather than section 1092(b), will apply to disallow the $100 loss for 1986 because the loss was not sustained from the disposition of a position that was part of a straddle. See paragraph (e) of this section.

Example 19. On November 1, 1985, A, not a dealer in stock or securities, acquires stock in Y Corporation (Y stock) and an offsetting put option. On November 12, 1985, there is $20 of unrealized gain in the put option and A disposes of the Y stock at a $20 loss. By November 15, 1985, the value of the put option has declined eliminating all unrealized gain in the position. On November 15, 1985, A acquires a second Y stock position that is substantially identical to the Y stock disposed of on November 12, 1985. At year-end there is no unrecognized gain in the put option or the Y stock. Under these circumstances, the $20 loss will be disallowed for 1985 under paragraph (a)(1) of this section because A, within a period beginning 30 days before November 12, 1985 and ending 30 days after such date, acquired stock substantially identical to the Y stock disposed of.

Example 20. Assume the facts are the same as in Example 19 and that on December 31, 1986, A disposes of the put option at a $40 gain and there is $20 of unrecognized loss in the Y stock. Under these circumstances, the $20 loss which was disallowed in 1985 also will be disallowed for 1986 under the rules of paragraph (a)(1) of this section because A has not disposed of the stock substantially identical to the Y stock disposed of on November 12, 1985.

Example 21. Assume the facts are the same as in example (19), except that on December 31, 1986, A disposes of the Y stock at a $20 loss and there is $40 of unrecognized gain in the put option. Under these circumstances, A will not recognize in 1986 either the $20 loss disallowed in 1985 or the $20 loss sustained with respect to the December 31, 1986 disposition of Y stock. Paragraph (a)(1) of this section does not apply to disallow the losses in 1986 since the substantially identical Y stock was disposed of during the year (and no substantially identical stock or securities was acquired by A within the 61 day period). However, paragraph (a)(2) of this section applies to disallow for 1986 the $40 of losses sustained with respect to the dispositions of positions in the straddle because there is $40 of unrecognized gain in the put option, an offsetting position to the loss positions.

Example 22. On January 2, 1986, A, not a dealer in stock or securities, acquires stock in X Corporation (X stock) and an offsetting put option. On March 3, 1986, A disposes of the X stock at a $10 loss. On March 17, 1986, A acquires new X stock that is substantially identical to the X stock disposed of on March 3, 1986. On December 31, 1986, A disposes of the X stock at a $5 gain, at which time there is $5 of unrecognized gain in the put option. Under these circumstances, the $10 loss sustained with respect to the March 3, 1986, disposition of X stock will be allowed under paragraph (a) (1) of this section since the substantially identical X stock acquired on March 17, 1986, was disposed of by year-end (and no substantially identical stock or securities were acquired by A within the 61 day period). However, $5 of the $10 loss will be disallowed under paragraph (a)(2) of this section because there is $5 of unrecognized gain in the put option, an offsetting position to the loss position.

Example 23. Assume the facts are the same as in example (22), except that on December 31, 1986, A disposes of the offsetting put option at a $5 loss and there is $5 of unrecognized gain in the X stock acquired on March 17, 1986. Under these circumstances, the $10 loss sustained with respect to the X stock disposed of on March 3, 1986, will be disallowed for 1986 under paragraph (a)(1) of this section. The $5 loss sustained upon the disposition of the put option will be allowed because (1) the rules of paragraph (a)(1) of this section are not applicable; and (2) the rules of paragraph (a)(2) of this section allow the loss, since the unrecognized gain in the X stock ($5) is not in excess of the loss ($10) disallowed under paragraph (a)(1) of this section.

Example 24. On January 2, 1986, A, not a dealer in stock or securities, acquires 200 shares of Z Corporation stock (Z stock) and 2 put options on Z stock (giving A the right to sell 200 shares of Z stock). On September 2, 1986, there is $200 of unrealized gain in the put option positions and A disposes of the 200 shares of Z stock at a $200 loss. On September 10, 1986, A acquires 100 shares of Z stock (substantially identical to the Z stock disposed of on September 2, 1986), and a call option that is offsetting to the put options on Z stock and that is not an option to acquire property substantially identical to the Z stock disposed of on September 2, 1986. At year-end, there is $80 of unrecognized gain in the Z stock position, $80 of unrecognized gain in the call option position, and no unrecognized gain or loss in the offsetting put option positions. Under these circumstances, $40 of the $200 loss sustained with respect to the September 2, 1986 disposition of Z stock will be recognized by A in 1986 under paragraph (a) of this section, as set forth below. Paragraph (a)(1) of this section applies first to disallow $100 of the loss (½ of the loss), since 100 shares of substantially identical Z stock (½ of the stock) were acquired within the 61 day period. Paragraph (a)(2) of this section then applies to disallow that portion of the loss allowed under paragraph (a)(1) of this section ($200 − $100=$100) equal to the excess of the total unrecognized gain in the Z stock and call option positions (successor positions to the loss position) ($80+$80=$160) over the $100 loss disallowed under paragraph (a)(1) of this section ($160 − $100=$60; $100 − $60=$40).

Example 25. Assume the facts are the same as in example (24), except that at year-end there is $110 of unrecognized gain in the Z stock position, $78 of unrecognized gain in the call option position, and $10 of unrecognized gain in the offsetting put option positions. Under these circumstances, $2 of the $200 loss sustained with respect to the September 2, 1986 disposition of Z stock will be allowed in 1986 under paragraph (a) of this section, as set forth below. Paragraph (a)(1) of this section applies first to disallow $100 of the loss (½ of the loss) since 100 shares of substantially identical Z stock (½ of the stock) were acquired within the 61 day period. Paragraph (a)(2) of this section then applies to disallow that portion of the loss allowed under paragraph (a)(1) of this section ($200 − $100=$100) equal to the excess of the total unrecognized gain in the Z stock and call option positions (successor positions to the loss position) and the put option positions (offsetting positions to the loss position) ($110+$78+$10=$198) over the $100 loss disallowed under paragraph (a)(1) of this section ($198 − $100=$98; $100 − $98=$2).

Example 26. Assume the facts are the same as in example (24), except that at year-end there is $120 of unrecognized gain in the Z stock position, $88 of unrecognized gain in the call option position, and $10 of unrecognized loss in one of the offsetting put option positions. At year-end A disposes of the other put option position at a $10 loss. Under these circumstances, $2 of the $210 loss sustained with respect to the September 2, 1986 disposition of Z stock ($200) and the year-end disposition of a put option ($10) will be allowed in 1986 under paragraph (a) of this section, as set forth below. Paragraph (a)(1) of this section applies first to disallow $100 of the loss from the disposition of Z stock (½ of the loss), since 100 shares of substantially identical Z stock (½ of the stock) were acquired within the 61 day period. Paragraph (a)(2) of this section then applies to disallow that portion of the loss allowed under paragraph (a)(1) of this section ($210 − $100=$110) equal to the excess of the total unrecognized gain in the Z stock and call option positions (successor positions to the Z stock loss position, and offsetting positions to the put option loss position) ($120+$88=$208) over the $100 loss disallowed under paragraph (a)(1) of this section ($208 − $100=$108; $110 − $108=$2).

Example 27. On January 27, 1986, A enters into offsetting long (L1) and short (S1) positions. Neither L1 nor S1 nor any other positions entered into by A in 1986 are stock or securities. On February 3, 1986, A disposes of L1 at a $10 loss. On February 5, 1986, A enters into a new long position (L2) that is offsetting to S1. On October 15, 1986, A disposes of S1 at an $11 loss. On October 17, 1986, A enters into a new short position (S2) that is offsetting to L2. On December 30, 1986, A disposes of L2 at a $12 loss. On December 31, 1986, A enters into a new long position (L3) that is offsetting to S2. At year-end, S2 has an unrecognized gain of $33. Paragraph (a)(1) of this section does not apply since none of the positions were shares of stock or securities. However, all $33 ($10+$11+$12) of the losses sustained with respect to L1, S1 and L2 will be disallowed under paragraph (a)(2) because there is $33 of unrecognized gain in S2 at year-end. The $10 loss from the disposition of L1 is disallowed because S2 is or was an offsetting position to a successor long position (L2 or L3). The $11 loss from the disposition of S1 is disallowed because S2 is a successor position to S1. The $12 loss from the disposition of L2 is disallowed because S2 was an offsetting position to L2.

(Secs. 1092(b) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 95 Stat. 324, 26 U.S.C. 1092(b), 7805) and sec. 102(h) of the Tax Reform Act of 1984 (98 Stat. 625))

[T.D. 8007, 50 FR 3319, Jan. 24, 1985, as amended by T.D. 8070, 51 FR 1786, Jan. 15, 1986; 51 FR 3773, Jan. 30, 1986; 51 FR 5516, Feb. 14, 1986]

§1.1092(b)–2T Treatment of holding periods and losses with respect to straddle positions (temporary).

(a) *Holding period*—(1) *In general.* Except as otherwise provided in this section, the holding period of any position that is part of a straddle shall not begin earlier than the date the taxpayer no longer holds directly or indirectly (through a related person or flowthrough entity) an offsetting position with respect to that position. See §1.1092(b)–5T relating to definitions.

(2) *Positions held for the long-term capital gain holding period (or longer) prior to establishment of the straddle.* Paragraph (a)(1) of this section shall not apply to a position held by a taxpayer for the long-term capital gain holding period (or longer) before a straddle that includes such position is established. The determination of whether a position has been held by a taxpayer for the long-term capital gain holding period (or longer) shall be made by taking into account the application of paragraph (a)(1) of this section. See section 1222(3) relating to the holding period for long-term capital gains.

(b) *Treatment of loss*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, loss on the disposition of one or more positions (*loss position*) of a straddle shall be treated as a long-term capital loss if—

(i) On the date the taxpayer entered into the loss position the taxpayer held directly or indirectly (through a related person or flowthrough entity) one or more offsetting positions with respect to the loss position; and

(ii) All gain or loss with respect to one or more positions in the straddle would be treated as long-term capital gain or loss if such positions were disposed of on the day the loss position was entered into.

(2) *Special rules for non-section 1256 positions in a mixed straddle.* Loss on the disposition of one or more positions (*loss position*) that are part of a mixed straddle and that are non-section 1256 positions shall be treated as 60 percent long-term capital loss and 40 percent short-term capital loss if—

(i) Gain or loss from the disposition of one or more of the positions of the straddle that are section 1256 contracts would be considered gain or loss from the sale or exchange of a capital asset;

(ii) The disposition of no position in the straddle (other than a section 1256 contract) would result in a long-term capital gain or loss; and

(iii) An election under section 1092(b)(2)(A)(i)(I) (relating to straddle-by-straddle identification) or 1092(b)(2)(A)(i)(II) (relating to mixed straddle accounts) has not been made.

(c) *Exceptions*—(1) *In general.* This section shall not apply to positions that—

(i) Constitute part of a hedging transaction;

(ii) Are included in a straddle consisting only of section 1256 contracts; or

(iii) Are included in a mixed straddle account (as defined in paragraph (b) of §1.1092(b)–4T).

(2) *Straddle-by-straddle identification.* Paragraphs (a)(2) and (b) of this section shall not apply to positions in a section 1092(b)(2) identified mixed straddle. See §1.1092(b)–3T.

(d) *Special rule for positions held by regulated investment companies.* For purposes of section 851(b)(3) (relating to the definition of a regulated investment company), the holding period rule of paragraph (a) of this section shall not apply to positions of a straddle. However, if section 1233(b) (without regard to sections 1233(e)(2)(A) and 1092(b)) would have applied to such positions, then for purposes of section 851(b)(3) the rules of section 1233(b) shall apply. Similarly, the effect of daily marking-to-market provided under §1.1092(b)–4T(c) will be disregarded for purposes of section 851(b)(3).

(e) *Effective date*—(1) *In general.* Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to positions in a straddle established after June 23, 1981, in taxable years ending after such date.

(2) *Special effective date for mixed straddle positions.* The provisions of paragraph (b)(2) of this section shall apply to positions in a mixed straddle established on or after January 1, 1984.

(f) *Examples.* Paragraphs (a) through (e) may be illustrated by the following examples. It is assumed in each example that the following positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year and none of the exceptions in paragraph (c) of this section apply.

Example 1. On October 1, 1984, A acquires gold. On January 1, 1985, A enters into an offsetting short gold forward contract. On April 1, 1985, A disposes of the short gold forward contract at no gain or loss. On April 10, 1985, A sells the gold at a gain. Since the gold had not been held for more than 6 months before the offsetting short position was entered into, the holding period for the gold begins no earlier than the time the straddle is terminated. Thus, the holding period of the original gold purchased on October 1, 1984, and sold on April 10, 1985, begins on April 1, 1985, the date the straddle was terminated. Consequently, gain recognized with respect to the gold will be treated as short-term capital gain.

Example 2. On January 1, 1985, A enters into a long gold forward contract. On May 1, 1985, A enters into an offsetting short gold regulated futures contract. A does not make an election under section 1256(d) or 1092(b)(2)(A). On August 1, 1985, A disposes of the gold forward contract at a gain. Since the forward contract had not been held by A for more than 6 months prior to the establishment of the straddle, the holding period for the forward contract begins no earlier than the time the straddle is terminated. Thus, the gain recognized on the closing of the gold forward contract will be treated as short-term capital gain.

Example 3. Assume the facts are the same as in example (2), except that A disposes of the short gold regulated futures contract on July 1, 1985, at no gain or loss and the forward contract on November 1, 1985. Since the forward contract had not been held for more than 6 months before the mixed straddle was established, the holding period for the forward contract begins July 1, 1985, the date the straddle terminated. Thus, the gain recognized on the closing of the forward contract will be treated as short-term capital gain.

Example 4. On January 1, 1985, A enters into a long gold forward contract and on August 4, 1985, A enters into an offsetting short gold forward contract. On September 1, 1985, A disposes of the short position at a loss. Since an offsetting long position had been held by A for more than 6 months prior to the acquisition of the offsetting short position, the loss with respect to the closing of the short position will be treated as long-term capital loss.

Example 5. On March 1, 1985, A enters into a long gold forward contract and on July 17, 1985, A enters into an offsetting short gold regulated futures contract. A does not make an election under section 1256(d) or 1092(b)(2)(A). On August 10, 1985, A disposes of the long gold forward contract at a loss. Since the gold forward contract was part of a mixed straddle, and the disposition of no position in the straddle (other than the regulated futures contract) would give rise to a long-term capital loss, the loss recognized on the termination of the gold forward contract will be treated as 40 percent short-term capital loss and 60 percent long-term capital loss.

Example 6. Assume the facts are the same as in example (5), except that on August 11, 1985, A disposes of the short gold regulated futures contract at a gain. Under these circumstances, the gain will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain since the holding period rules of paragraph (a) of this section are not applicable to section 1256 contracts.

Example 7. Assume the facts are the same as in example (5), except that A enters into the long gold forward contract on January 1, 1985, and does not dispose of the long gold forward contract but instead on August 10, 1985, disposes of the short gold regulated futures contract at a loss. Under these circumstances, the loss will be treated as a long-term capital loss since A held an offsetting non-section 1256 position for more than 6 months prior to the establishment of the straddle. However, such loss may be subject to the rules of § 1.1092(b)–1T.

(Secs. 1092(b) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 95 Stat. 324, 26 U.S.C. 1092(b), 7805) and sec. 102(h) of the Tax Reform Act of 1984 (98 Stat. 625))

[T.D. 8007, 50 FR 3320, Jan. 24, 1985, as amended by T.D. 8070, 51 FR 1788, Jan. 15, 1986]

§ 1.1092(b)–3T Mixed straddles; straddle-by-straddle identification under section 1092(b)(2)(A)(i)(I) (temporary).

(a) *In general.* Except as otherwise provided, a taxpayer shall treat in accordance with paragraph (b) of this section gains and losses on positions that are part of a mixed straddle for which the taxpayer has made an election under paragraph (d) of this section (hereinafter referred to as a *section 1092(b)(2) identified mixed straddle*). No election may be made under this section for any straddle composed of one or more positions that are includible in a mixed straddle account (as defined in paragraph (b) of §1.1092(b)–4T) or for any straddle for which an election under section 1256(d) has been made. See §1.1092(b)–5T relating to definitions.

(b) *Treatment of gains and losses from positions included in a section 1092(b)(2) identified mixed straddle*—(1) *In general.* Gains and losses from positions that are part of a section 1092(b)(2) identified mixed straddle shall be determined and treated in accordance with the rules of paragraph (b) (2) through (7) of this section.

(2) *All positions of a section 1092(b)(2) identified mixed straddle are disposed of on the same day.* If all positions of a section 1092(b)(2) identified mixed straddle are disposed of (or deemed disposed of) on the same say, gains and losses from section 1256 contracts in the straddle shall be netted, and gains and losses from non-section 1256 positions in the straddle shall be netted. Net gain or loss from the section 1256 contracts shall then be offset against net gain or loss from the non-section 1256 positions to determine the net gain or loss from the straddle. If net gain or loss from the straddle is attributable to the positions of the straddle that are section 1256 contracts, such gain or loss shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. If net gain or loss from the straddle is attributable to the positions of the straddle that are non-section 1256 positions, such gain or loss shall be treated as short-term capital gain or loss. This paragraph (b)(2) may be illustrated by the following examples. It is assumed in each example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year.

Example 1. On April 1, 1985, A enters into a non-section 1256 position and an offsetting section 1256 contract and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On April 10, 1985, A disposes of the non-section 1256 position at a $600 loss and the section 1256 contract at a $600 gain. Under these circumstances, the $600 loss on the non-section 1256 position will be offset against the $600 gain on the section 1256 contract and the net gain or loss from the straddle will be zero.

Example 2. Assume the facts are the same as in example (1), except that the gain on the section 1256 contract is $800. Under these circumstances, the $600 loss on the non-section 1256 position will be offset against the $800 gain on the section 1256 contract. The net gain of $200 from the straddle will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain because it is attributable to the section 1256 contract.

Example 3. Assume the facts are the same as in example (1), except that the loss on the non-section 1256 position is $800. Under these circumstances, the $600 gain on the section 1256 contract will be offset against the $800 loss on the non-section 1256 position. The net loss of $200 from the straddle will be treated as short-term capital loss because it is attributable to the non-section 1256 position.

Example 4. On May 1, 1985, A enters into a straddle consisting of two non-section 1256 positions and two section 1256 contracts and makes a valid election to treat the straddle as a section 1092(b)(2) identified mixed straddle. On May 10, 1985, A disposes of the non-section 1256 positions, one at a $700 loss and the other at a $500 gain, and disposes of the section 1256 contracts, one at a $400 gain and the other at a $300 loss. Under these circumstances, the gain and losses from the section 1256 contracts and non-section 1256 positions will first be netted, resulting in a net gain of $100 ($400–$300) on the section 1256 contracts and a net loss of $200 ($700–$500) on the non-section 1256 positions. The net gain of $100 from the section 1256 contracts will then be offset against the $200 net loss on the non-section 1256 positions. The net loss of $100 from the straddle will be treated as short-term capital loss because it is attributable to the non-section 1256 positions.

Example 5. On December 30, 1985, A enters into a section 1256 contract and an offsetting non-section 1256 position and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On December 31, 1985, A disposes of the non-section 1256 position at a $2,000 gain. A also realizes a $2,000 loss on the section 1256 contract because it is deemed disposed of under section 1256(a)(1). Under these circumstances, the $2,000 gain on the non-section 1256 position will be offset against the $2,000 loss on the section 1256 contract, and the net gain or loss from the straddle will be zero.

Example 6. Assume the facts are the same as in example (5), except that the section 1092(b)(2) identified mixed straddle was entered into on November 12, 1985, A realizes a $2,200 loss on the section 1256 contract, and on December 15, 1985, A enters into a non-section 1256 position that is offsetting to the non-section 1256 gain position of the section 1092(b)(2) identified mixed straddle. At year-end there is $200 of unrecognized gain in the non-section 1256 position that was entered into on December 15. Under these circumstances, the $2,200 loss on the section 1256 contract will be offset against the $2,000 gain on the non-section 1256 position. The net $200 loss from the straddle will be treated as 60 percent long-term capital loss and 40 percent short-term capital loss because it is attributable to the section 1256 contract. The net loss of $200 from the straddle will be disallowed in 1985 under the loss deferral rules of section 1092(a) because there is $200 of unrecognized gain in a successor position (as defined in paragraph (n) of § 1.1092(b)–5T) at year-end. See paragraph (c) of this section.

(3) *All of the non-section 1256 positions of a section 1092(b)(2) identified mixed straddle disposed of on the same day*. This paragraph (b)(3) applies if all of the non-section 1256 positions of a section 1092(b)(2) identified mixed straddle are disposed of on the same day or if this paragraph (b)(3) is made applicable by paragraph (b)(5) of this section. In the case to which this paragraph (b)(3) applies, gain and loss realized from non-section 1256 positions shall be netted. Realized and unrealized gain and loss with respect to the section 1256 contracts of the straddle also shall be netted on that day. Realized net gain or loss from the non-section 1256 positions shall then be offset against net gain or loss from the section 1256 contracts to determine the net gain or loss from the straddle on that day. Net gain or loss from the straddle that is attributable to the non-section 1256 positions shall be realized and treated as short-term capital gain or loss on that day. Net gain or loss from the straddle that is attributable to realized gain or loss with respect to section 1256 contracts shall be realized and treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. Any gain or loss subsequently realized on the section 1256 contracts shall be adjusted (through an adjustment to basis or otherwise) to take into account the extent to which gain or loss was offset by unrealized gain or loss on the section 1256 contracts on that day. This paragraph (b)(3) may be illustrated by the following examples. It is assumed in each example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year.

Example 1. On July 20, 1985, A enters into a section 1256 contract and an offsetting non-section 1256 position and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On July 27, 1985, A disposes of the non-section 1256 position at a $1,500 loss, at which time there is $1,500 of unrealized gain in the section 1256 contract. A holds the section 1256 contract at year-end at which time there is $1,800 of gain. Under these circumstances, on July 27, 1985, A offsets the $1,500 loss on the non-section 1256 position against the $1,500 gain on the section 1256 contract and realizes no gain or loss. On December 31, 1985, A realizes a $300 gain on the section 1256 contract because the position is deemed disposed of under section 1256(a)(1). The $300 gain is equal to $1,800 of gain less a $1,500 adjustment for unrealized gain offset against the loss realized on the non-section 1256 position on July 27, 1985, and the gain will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain.

Example 2. Assume the facts are the same as in example (1), except that on July 27, 1985, A realized a $1,700 loss on the non-section 1256 position. Under these circumstances, on July 27, 1985, A offsets the $1,700 loss on the non-section 1256 position against the $1,500 gain on the section 1256 contract. A realizes a $200 loss from the straddle on July 27, 1985, which will be treated as short-term capital loss because it is attributable to the non-section 1256 position. On December 31, 1985, A realizes a $300 gain on the section 1256 contract, computed as in example (1), which will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain.

Example 3. On March 1, 1985, A enters into a straddle consisting of two non-section 1256 positions and two section 1256 contracts and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On March 11, 1985, A disposes of the non-section 1256 positions, one at a $100 loss and the other at a $150 loss, and disposes of one section 1256 contract at a $100 loss. On that day there is $100 of unrealized gain on the section 1256 contract retained by A. A holds the remaining section 1256 contract at year-end, at which time there is $150 of gain. Under these circumstances, on March 11, 1985, A will first net the gains and losses from the section 1256 contracts and net the gains and losses from the non-section 1256 positions resulting in no gain or loss on the section 1256 contracts and a net loss of $250 on the non-section 1256 positions. Since there is no gain or loss to offset against the non-section 1256 positions, the net loss of $250 will be treated as short-term capital loss because it is attributable to the non-section 1256 positions. On December 31, 1985, A realizes a $50 gain on the remaining section 1256 contract because the position is deemed disposed of under section 1256(a)(1). The $50 gain is equal to $150 gain less a $100 adjustment to take into account the $100 unrealized gain that was offset against the $100 loss realized on the section 1256 contract on March 11, 1985.

Example 4. Assume the facts are the same as in example (3), except that A disposes of the section 1256 contract at a $500 gain. As in example (3), A has a net loss of $250 on the non-section 1256 positions disposed of. In this example, however, A has net gain of $600 ($500+$100) on the section 1256 contracts on March 11, 1985. Therefore, of the net gain from the straddle of $350 ($600–$250), $250 ($500–$250) is treated as 60 percent long-term capital gain and 40 percent short-term capital gain because only $250 is attributable to the realized gain from the section 1256 contract. In addition, because none of the $100 unrealized gain from the remaining section 1256 contract was offset against gain or loss on the non-section 1256 positions, no adjustment is made under paragraph (b)(3) of this section and the entire $150 gain on December 31 with respect to that contract is realized on that date.

(4) *All of the section 1256 contracts of a section 1092(b)(2) identified mixed straddle disposed of on the same day.* This paragraph (b)(4) applies if all of the section 1256 contracts of a section 1092(b)(2) identified mixed straddle are disposed of (or deemed disposed of) on the same day or if this paragraph (b)(4) is made applicable by paragraph (b)(5) of this section. In the case to which this paragraph (b)(4) applies, gain and loss realized from section 1256 contracts shall be netted. Realized and unrealized gain and loss with respect to the non-section 1256 positions of the straddle also shall be netted on that day. Realized net gain or loss from the section 1256 contracts shall be treated as short-term capital gain or loss to the extent of net gain or loss on the non-section 1256 positions on that day. Net gain or loss with respect to the section 1256 contracts that exceeds the net gain or loss with respect to the non-section 1256 positions of the straddle shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. See paragraph (b)(7) of this section relating to the gain or loss on such non-section 1256 positions. This paragraph (b)(4) may be illustrated by the following examples. It is assumed in each example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year.

Example 1. On December 30, 1985, A enters into a section 1256 contract and an offsetting non-section 1256 position and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On December 31, 1985, A disposes of the section 1256 contract at a $1,000 gain, at which time there is $1,000 of unrealized loss in the non-section 1256 position. Under these circumstances, the $1,000 gain realized on the section 1256 contract will be treated as short-term capital gain because there is a $1,000 loss on the non-section 1256 position.

Example 2. Assume the facts are the same as in example (1), except that A realized a $1,500 gain on the disposition of the section 1256 contract. Under these circumstances, $1,000 of the gain realized on the section 1256 contract will be treated as short-term capital gain because there is a $1,000 loss on the non-section 1256 position. The net gain of $500 from the straddle will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain because it is attributable to the section 1256 contract.

Example 3. Assume the facts are the same as in example (1), except that A realized a $1,000 loss on the section 1256 contract and there is $1,000 of unrecognized gain on the non-section 1256 position. Under these circumstances, the $1,000 loss on the section 1256 contract will be treated as short-term capital loss because there is a $1,000 gain on the non-section 1256 position. Such loss, however, will be disallowed in 1985 under the loss deferral rules of section 1092(a) because there is $1,000 of unrecognized gain in an offsetting position at year-end. See paragraph (c) of this section.

Example 4. Assume the facts are the same as in example (1), except that the section 1256 contract and non-section 1256 position were entered into on December 1, 1985, and the section 1256 contract is disposed of on December 19, 1985, for a $1,000 gain, at which time there is $1,000 of unrealized loss on the non-section 1256 position. At year-end there is only $800 of unrealized loss in the non-section 1256 position. Under these circumstances, the result is the same as in example (1) because there was $1,000 of unrealized loss on the non-section 1256 position at the time of the disposition of the section 1256 contract.

Example 5. On July 15, 1985, A enters into a straddle consisting of two non-section 1256 positions and two section 1256 contracts and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On July 20, 1985, A disposes of one non-section 1256 position at a gain of $1,000 and both section 1256 contracts at a net loss of $1,000. On the same day there is $200 of unrealized loss on the non-section 1256 position retained by A. Under these circumstances, realized and unrealized gain and loss with respect to the non-section 1256 positions is netted, resulting in a net gain of $800. Thus, $800 of the net loss on the section 1256 contracts disposed of will be treated as short-term capital loss because there is $800 of net gain on the non-section 1256 positions. In addition, the net loss of $200 from the straddle will be treated as 60 percent long-term capital loss and 40 percent short-term capital loss because it is attributable to the section 1256 contract.

(5) *Disposition of one or more, but not all, positions of a section 1092(b)(2) identified mixed straddle on the same day.* If one or more, but not all, of the positions of a section 1092(b)(2) identified mixed straddle are disposed of on the same day, and paragraphs (b) (3) and (4) of this section are not applicable (without regard to this paragraph (b)(5)), the gain and loss from the non-section 1256 positions that are disposed of on that day shall be netted, and the gain and loss from the section 1256 contracts that are disposed of on that day shall be netted. In order to determine whether the rules of paragraph (b)(3) or (b)(4) of this section apply, net gain or loss from the section 1256 contracts disposed of shall then be offset against net gain or loss from the non-section 1256 positions disposed of to determine net gain or loss from such positions of the straddle. If net gain or loss from the disposition of such positions of the straddle is attributable to the non-section 1256 positions disposed of, the rules prescribed in paragraph (b)(3) of this section apply. If net gain or loss from the disposition of such positions is attributable to the section 1256 contracts disposed of, the rules prescribed in paragraph (b)(4) of this section apply. If the net gain or loss from the netting of non-section 1256 positions disposed of and the netting of section 1256 contracts disposed of are either both gains or losses, the rules prescribed in paragraph (b)(3) of this section shall apply to net gain or loss from such non-section 1256 positions, and the rules prescribed in paragraph (b)(4) of this section shall apply to net gain or loss from such section 1256 contracts. However, for purposes of determining the treatment of gain or loss subsequently realized on a position of such straddle, to the extent that unrealized gain or loss on other positions was used to offset realized gain or loss on a non-section 1256 position under paragraph (b)(3) of this section, or was used to treat realized gain or loss on a section 1256 contract as short-term capital gain or loss under paragraph (b)(4) of this section, such amount shall not be used for such purposes again. This paragraph (b)(5) may be illustrated by the following examples. It is assumed that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year.

Example 1. On July 15, 1985, A enters into a straddle consisting of four non-section 1256 positions and four section 1256 contracts and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On July 20, 1985, A disposes of one non-section 1256 position at a gain of $800 and one section 1256 contract at a loss of $300. On the same day there is $400 of unrealized net loss on the section 1256 contracts retained by A and $100 of unrealized net loss on the non-section 1256 positions retained by A. Under these circumstances, the loss of $300 on the section 1256 contract disposed of will be offset against the gain of $800 on the non-section 1256 position disposed of. The net gain of $500 is attributable to the non-section 1256 position. Therefore, the rules of paragraph (b)(3) of this section apply. Under the rules of paragraph (b)(3) of this section, the net loss of $700 on the section 1256 contracts is offset against the net gain of $800 attributable to the non-section 1256 position disposed of. The net gain of $100 will be treated as short-term capital gain because it is attributable to the non-section 1256 position disposed of. Gain or loss subsequently realized on the section 1256 contracts will be adjusted to take into account the unrealized loss of $400 that was offset against the $800 gain attributable to the non-section 1256 position disposed of.

Example 2. Assume the facts are the same as in Example 1, except that A disposes of the non-section 1256 position at a gain of $300 and the section 1256 contract at a loss of $800, and there is $200 of unrealized net gain in the non-section 1256 positions retained by A. Under these circumstances, the gain of $300 on the non-section 1256 position disposed of will be offset against the loss of $800 on the section 1256 contract disposed of. The net loss of $500 is attributable to the section 1256 contract. Therefore, the rules of paragraph (b)(4) of this section apply. Under the rules of paragraph (b)(4) of this section, $500 of the net loss realized on the section 1256 contract will be treated as short-term capital loss because there is $500 of realized and unrealized gain in the non-section 1256 positions. The remaining net loss of $300 will be treated as 60 percent long-term capital loss and 40 percent short-term capital loss because it is attributable to a section 1256 contract disposed of. In addition, A realizes a $300 short-term capital gain attributable to the disposition of the non-section 1256 position.

Example 3. (i) Assume the facts are the same as in example (1), except that the section 1256 contract was disposed of at a $500 gain. Under these circumstances, there is gain of $500 attributable to the section 1256 contact disposed of and a gain of $800 attributable to the non-section 1256 position. Therefore, the rules of both paragraphs (b)(3) and (4) of this § 1.1092(b)–3T apply.

(ii) Under paragraph (b)(3) of this section, the realized and unrealized gains and losses on the section 1256 contracts are netted, resulting in a net gain of $100 ($500–$400). The section 1256 contract net gain does not offset the gain on the non-section 1256 position disposed of. Therefore, the gain of $800 on the non-section 1256 position disposed of will be treated as a short-term capital gain because there is no net loss on the section 1256 contracts.

(iii) Under paragraph (b)(4) of this section, the realized and unrealized gains and losses on the non-section 1256 positions are netted, resulting in a non-section 1256 position net gain of $700 ($800–$100). Because there is no net loss on the non-section 1256 positions, the $500 gain realized on the section 1256 contract will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain.

(6) *Accrued gain and loss with respect to positions of a section 1092(b)(2) identified mixed straddle.* If one or more positions of a section 1092(b)(2) identified mixed straddle were held by the taxpayer on the day prior to the day the section 1092(b)(2) identified mixed straddle is established, such position or positions shall be deemed sold for their fair market value as of the close of the last business day preceding the day such straddle is established. See §§ 1.1092(b)–1T and 1.1092(b)–2T for application of the loss deferral and wash sale rules and for treatment of holding periods and losses with respect to such positions. An adjustment (through an adjustment to basis or otherwise) shall be made to any subsequent gain or loss realized with respect to such to such position or positions for any gain or loss recognized under this paragraph (b)(6). This paragraph (b)(6) may be illustrated by the following examples. It is assumed in each example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year.

Example 1. On January 1, 1985, A enters into a non-section 1256 position. As of the close of the day on July 9, 1985, there is $500 of unrealized long-term capital gain in the non-section 1256 position. On July 10, 1985, A enters into an offsetting section 1256 contract and makes a valid election to treat the straddle as a section 1092(b)(2) identified mixed straddle. Under these circumstances, on July 9, 1985, A will recognize $500 of long-term capital gain on the non-section 1256 position.

Example 2. On February 1, 1985, A enters into a section 1256 contract. As of the close of the day on February 4, 1985, there is $500 of unrealized gain on the section 1256 contract. On February 5, 1985, A enters into an offsetting non-section 1256 position and makes a valid election to treat the straddle as a section 1092(b)(2) identified mixed straddle. Under these circumstances, on February 4, 1985, A will recognize a $500 gain on the section 1256 contract, which will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain.

Example 3. Assume the facts are the same as in example (2) and that on February 10, 1985, there is $2,000 of unrealized gain in the section 1256 contract. A disposes of the section 1256 contract at a $2,000 gain and disposes of the offsetting non-section 1256 position at a $1,000 loss. Under these circumstances, the $2,000 gain on the section 1256 contract will be reduced to $1,500 to take into account the $500 gain recognized when the section 1092(b)(2) identified mixed straddle was established. The $1,500 gain on the section 1256 contract will be offset against the $1,000 loss on the non-section 1256 position. The net $500 gain from the straddle will be treated as 60 percent long-term capital gain and 40 percent short-term capital gain because it is attributable to the section 1256 contract.

Example 4. On March 1, 1985, A enters into a non-section 1256 position. As of the close of the day on March 2, 1985, there is $400 of unrealized short-term capital gain in the non-section 1256 position. On March 3, 1985, A enters into an offsetting section 1256 contract and makes a valid election to treat the straddle as a section 1092(b)(2) identified mixed straddle. On March 10, 1985, A disposes of the section 1256 contract at a $500 loss and the non-section 1256 position at a $500 gain. Under these circumstances, on March 2, 1985, A will recognize $400 of short-term capital gain attributable to the gain accrued on the non-section 1256 position prior to the day the section 1092(b)(2) identified mixed straddle was established. On March 10, 1985, the gain of $500 on the non-section 1256 position will be reduced to $100 to take into account the $400 of gain recognized when the section 1092(b)(2) identified mixed straddle was established. The $100 gain on the non-section 1256 position will be offset against the $500 loss on the section 1256 contract. The net loss of $400 from the straddle will be treated as 60 percent long-term capital loss and 40 percent short-term capital loss because it is attributable to the section 1256 contract.

(7) *Treatment of gain and loss from non-section 1256 positions after disposition of all section 1256 contracts.* Gain or loss on a non-section 1256 position that is part of a section 1092(b)(2) identified mixed straddle and that is held after all section 1256 contracts in the straddle are disposed of shall be treated as short-term capital gain or loss to the extent attributable to the period when the positions were part of such straddle. See § 1.1092(b)–2T for rules concerning the holding period of such positions. This paragraph (b)(7) may be illustrated by the following example. It is assumed that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) during the taxable years.

Example: On December 1, 1985, A, an individual calendar year taxpayer, enters into a section 1256 contract and an offsetting non-section 1256 position and makes a valid election to treat such straddle as a section 1092(b)(2) identified mixed straddle. On December 31, 1985, A disposes of the section 1256 contract at a $1,000 loss. On the same day, there is $1,000 of unrecognized gain in the non-section 1256 position. The $1,000 loss on the section 1256 contract is treated as short-term capital loss because there is a $1,000 gain on the non-section 1256 position, but the $1,000 loss is disallowed in 1985 because there is $1,000 of unrecognized gain in the offsetting nonsection 1256 position. See section 1092(a) and § 1.1092(b)–1T. On July 10, 1986, A disposes of the non-section 1256 position at a $1,500 gain, $500 of which is attributable to the post-straddle period. Under these circumstances, $1,000 of the gain on the non-section 1256 position will be treated as short-term capital gain because that amount of the gain is attributable to the period when the position was part of a section 1092(b)(2) identified mixed straddle. The remaining $500 of the gain will be treated as long-term capital gain because the position was held for more than six months after the straddle was terminated. In addition, the $1,000 short-term capital loss disallowed in 1985 will be taken into account at this time.

(c) *Coordination with loss deferral and wash sale rules of § 1.1092(b)–1T.* This section shall apply prior to the application of the loss deferral and wash sale rules of § 1.1092(b)–1T.

(d) *Identification required*—(1) *In general.* To elect the provisions of this section, a taxpayer must clearly identify on a reasonable and consistently applied economic basis each position that is part of the section 1092(b)(2) identified mixed straddle before the close of the day on which the section 1092(b)(2) identified mixed straddle is established. If the taxpayer disposes of a position that is part of a section 1092(b)(2) identified mixed straddle before the close of the day on which the straddle is established, such identification must be made at or before the time that the taxpayer disposes of the position. In the case of a taxpayer who is an individual, the close of the day is midnight (local time) in the location of the taxpayer's principal residence. In the case of all other taxpayers, the close of the day is midnight (local time) in the location of the taxpayer's principal place of business. Only the person or entity that directly holds all positions of a straddle may make the election under this section.

(2) *Presumptions.* A taxpayer is presumed to have identified a section 1092(b)(2) identified mixed straddle by the time prescribed in paragraph (d)(1) of this section if the taxpayer receives independent verification of the identification (within the meaning of paragraph (d)(4) of this section). The presumption referred to in this paragraph (d)(2) may be rebutted by clear and convincing evidence to the contrary.

(3) *Corroborating evidence.* If the presumption of paragraph (d)(2) of this section does not apply, the burden shall be on the taxpayer to establish that an election under paragraph (d)(1) of this section was made by the time specified in paragraph (d)(1) of this section. If the taxpayer has no evidence of

the time when the identification required by paragraph (d)(1) of this section is made, other than the taxpayer's own testimony, the election is invalid unless the taxpayer shows good cause for failure to have evidence other than the taxpayer's own testimony.

(4) *Independent verification.* For purposes of this section, the following constitute independent verification:

(i) *Separate account.* Placement of one or more positions of a section 1092(b)(2) identified mixed straddle in a separate account designated as a *section 1092(b)(2) identified mixed straddle account* that is maintained by a broker (as defined in §1.6045–1(a)(1)), futures commission merchant (as defined in 7 U.S.C. 2 and 17 CFR 1.3(p)), or similar person and in which notations are made by such person identifying all positions of the section 1092(b)(2) identified mixed straddle and stating the date the straddle is established.

(ii) *Confirmation.* A written confirmation from a person referred to in paragraph (d)(4)(i) of this section, or from the party from which one or more positions of the section 1092(b)(2) identified mixed straddle are acquired, stating the date the straddle is established and identifying the other positions of the straddle.

(iii) *Other methods.* Such other methods of independent verification as the Commissioner may approve at the Commissioner's discretion.

(5) *Section 1092 (b)(2) identified mixed straddles established before February 25, 1985.* Notwithstanding the provisions of paragraph (d)(1) of this section, relating to the time of identification of a section 1092(b)(2) identified mixed straddle, a taxpayer may identify straddles that were established before February 25, 1985 as section 1092(b)(2) identified mixed straddles after the time specified in paragraph (d)(1) of this section if the taxpayer adopts a reasonable and consistent economic basis for identifying the positions of such straddles.

(e) *Effective date*—(1) *In general.* The provisions of this section shall apply to straddles established on or after January 1, 1984.

(2) *Pre-1984 accrued gain.* If the last business day referred to in paragraph (b)(6) of this section is contained in a period to which paragraph (b)(6) does not apply, the gains and losses from the deemed sale shall be included in the first period to which paragraph (b)(6) applies.

(Secs. 1092(b)(1), 1092(b)(2) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 98 Stat. 627; 26 U.S.C. 1092(b)(1), 1092(b)(2), 7805))

[T.D. 8008, 50 FR 3325, Jan. 24, 1985; 50 FR 12243, Mar. 28, 1985; 50 FR 19344, May 8, 1985]

§1.1092(b)–4T Mixed straddles; mixed straddle account (temporary).

(a) *In general.* A taxpayer may elect (in accordance with paragraph (f) of this section) to establish one or more mixed straddle accounts (as defined in paragraph (b) of this section). Gains and losses from positions includible in a mixed straddle account shall be determined and treated in accordance with the rules set forth in paragraph (c) of this section. A mixed straddle account is treated as established as of the first day of the taxable year for which the taxpayer makes the election or January 1, 1984, whichever is later. See §1.1092(b)–5T relating to definitions.

(b) *Mixed straddle account defined*—(1) *In general.* The term *mixed straddle account* means an account for determining gains and losses from all positions held as capital assets in a designated class of activities by the taxpayer at the time the taxpayer elects to establish a mixed straddle account. A separate mixed straddle account must be established for each separate designated class of activities.

(2) *Permissible designations.* Except as otherwise provided in this section, a taxpayer may designate as a class of activities the types of positions that a reasonable person, on the basis of all the facts and circumstances, would ordinarily expect to be offsetting positions. This paragraph (b)(2) may be illustrated by the following example. It is assumed in the example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) during the taxable year, and that gain or loss from the positions is treated as gain or loss from a capital asset.

Example: B engages in transactions in dealer equity options on XYZ Corporation stock, stock in XYZ Corporation, dealer equity options on UVW Corporation stock, and stock in UVW Corporation. A reasonable person, on the basis of all the facts and circumstances, would not expect dealer equity options on XYZ Corporation stock and stock in XYZ Corporation to offset any dealer equity options on UVW Corporation stock or any stock in UVW Corporation. If B makes the mixed straddle account election under this section for all such positions, B must designate two separate classes of activities, one consisting of transactions in dealer equity options on XYZ Corporation stock and stock in XYZ Corporation, and the other consisting of transactions in dealer equity options on UVW Corporation stock and stock in UVW Corporation, and maintain two separate mixed straddle accounts.

(3) *Positions that offset positions in more than one mixed straddle account.* Gains and losses from positions that a reasonable person, on the basis of all the facts and circumstances, ordinarily would expect to be offsetting with respect to positions in more than one mixed straddle account shall be allocated among such accounts under a reasonable and consistent method that clearly reflects income. This paragraph (b)(2) may be illustrated by the following example. It is assumed that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) during the taxable year, and that gain or loss from the positions is treated as gain or loss from a capital asset.

Example: B holds stock in XYZ Corporation, UVW Corporation, and RST Corporation, and options on a broad based stock index future. A reasonable person, on the basis of all the facts and circumstances, would expect the stock in XYZ Corporation, UVW Corporation, and RST Corporation to be offsetting positions with respect to the options on the broad based stock index future. A reasonable person, on the basis of all the facts and circumstances, would not expect that stock in XYZ Corporation, UVW Corporation, or RST Corporation would be offsetting positions with respect to each other. If B makes the mixed straddle account election under this section for all such positions, B must designate three separate classes of activities: one consisting of stock in XYZ Corporation; one consisting of stock in UVW Corporation; and one consisting of stock in RST Corporation, and maintain three separate mixed straddle accounts. Options on the broad based stock index future must be designated as part of all three classes of activities and gains and losses from such options must be allocated among such accounts under a reasonable and consistent method that clearly reflects income, because such options are a type of position expected to be offsetting with respect to the positions in all three mixed straddle accounts.

(4) *Impermissible designations*—(i) *Types of positions that are not offsetting included in designated class of activities.* If the Commissioner determines, on the basis of all the facts and circumstances, that a class of activities designated by a taxpayer includes types of positions that a reasonable person, on the basis of all the facts and circumstances, ordinarily would not expect to be offsetting positions with respect to other types of positions in the account, the Commissioner may—

(A) Amend the class of activities designated by the taxpayer and remove positions from the account that are not within the amended designated class of activities; or

(B) Amend the class of activities designated by the taxpayer to establish two or more mixed straddle accounts.

(ii) *Types of positions that are offsetting not included in designated class of activities.* If the Commissioner determines, on the basis of all the facts and circumstances, that a designated class of activities does not include types of positions that are offsetting with respect to types of positions within the designated class, the Commissioner may—

(A) Amend the class of activities designated by the taxpayer to include types of positions that are offsetting with respect to the types of positions within the designated class and place such positions in the account; or

(B) Amend the class of activities designated by the taxpayer to exclude types of positions that are offsetting with respect to the types of positions that are not in the account.

(iii) *Treatment of positions removed from or included in the account.* (A) Positions removed from a mixed straddle account will be subject to the rules of taxation generally applicable to such positions. Thus, for example, if the positions removed from the account are offsetting positions with respect to other positions outside the account, the rules of §§ 1.1092(b)–1T and 1.1092(b)–2T apply.

(B) If the taxpayer acted consistently and in good faith in designating the class of activities of the account and in placing positions in the account, the rules of §1.1092(b)–2T(b)(2) shall not apply to any mixed straddles resulting from the removal of such positions from the account and the Commissioner, at the Commissioner's discretion, may identify such mixed straddles as section 1092(b)(2) identified mixed straddles and apply the rules of §1.1092(b)–3T(b) to such straddles.

(C) If positions are placed in a mixed straddle account, such positions shall be treated as if they were originally included in the mixed straddle account in which they are placed.

(5) *Positions included in a mixed straddle account that are not within the designated class of activities.* The Commissioner may remove one or more positions from a mixed straddle account if, on the basis of all the facts and circumstances, the Commissioner determines that such positions are not within the designated class of activities of the account. See paragraph (b)(4)(iii) of this section for rules concerning the treatment of such positions.

(6) *Positions outside a mixed straddle account that are within the designated class of activities.* If a taxpayer holds types of positions outside of a mixed straddle account (including positions in another mixed straddle account) that are within the designated class of activities of a mixed straddle account, the Commissioner may require the taxpayer to include such types of positions in the mixed straddle account, move positions from one account to another, or remove from the mixed straddle account types of positions that are offsetting with respect to the types of positions held outside the account. See paragraph (b)(4)(iii) of this section for the treatment of such positions.

(c) *Treatment of gains and losses from positions in a mixed straddle account*—(1) *Daily account net gain or loss.* Except as provided in paragraphs (d) and (e) of this section (relating to positions in a mixed straddle account before January 1, 1985) as of the close of each business day of the taxable year, gain or loss shall be determined for each position in a mixed straddle account that is disposed of during the day. Positions in a mixed straddle account that have not been disposed of as of the close of the day shall be treated as if sold for their fair market value at the close of each business day. Gains and losses for each business day from non-section 1256 positions in each mixed straddle account shall be netted to determine *net non-section 1256 position gain or loss* for the account, and gains and losses for each business day from section 1256 contracts in each mixed straddle account shall be netted to determine *net section 1256 contract gain or loss* for the account. Net non-section 1256 position gain or loss from the account is then offset against net section 1256 contract gain or loss from the same mixed straddle account to determine the *daily account net gain or loss* for the account. If daily account net gain or loss is attributable to the net non-section 1256 position gain or loss, daily account net gain or loss for such account shall be treated as short-term capital gain or loss. If daily account net gain or loss is attributable to the net section 1256 contract gain or loss, daily account net gain or loss for such account shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. If net non-section 1256 position gain or loss and net section 1256 contract gain or loss are either both gains or both losses, that portion of the daily account net gain or loss attributable to net non-section 1256 position gain or loss shall be treated as short-term capital gain or loss and that portion of the daily account net gain or loss attributable to net section 1256 contract gain or loss shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. An adjustment (through an adjustment to basis or otherwise) shall be made to any subsequent gain or loss determined under this paragraph (c)(1) to take into account any gain or loss determined for prior business days under this paragraph (c)(1).

(2) *Annual account net gain or loss; total annual account net gain or loss.* On the last business day of the taxable year, the *annual account net gain or loss* for each mixed straddle account established by the taxpayer shall be determined by netting the daily account net gain or loss for each business day in

the taxable year for each account. Annual account net gain or loss for each mixed straddle account shall be adjusted pursuant to paragraph (c)(3) of this section. The *total annual account net gain or loss* shall be determined by netting the annual account net gain or loss for all mixed straddle accounts established by the taxpayer, as adjusted pursuant to paragraph (c)(3) of this section. Total annual account net gain or loss is subject to the limitations of paragraph (c)(4) of this section. See paragraphs (d) and (e) of this section for determining the annual account net gain or loss for mixed straddle accounts established for taxable years beginning before January 1, 1985.

(3) *Application of section 263(g) to mixed straddle accounts.* No deduction shall be allowed for interest and carrying charges (as defined in section 263(g)(2)) properly allocable to a mixed straddle account. Interest and carrying charges properly allocable to a mixed straddle account means the excess of—

(i) The sum of—

(A) Interest on indebtedness incurred or continued during the taxable year to purchase or carry any position in the account; and

(B) All other amounts (including charges to insure, store or transport the personal property) paid or incurred to carry any position in the account; over

(ii) The sum of—

(A) The amount of interest (including original issue discount) includible in gross income for the taxable year with respect to all positions in the account;

(B) Any amount treated as ordinary income under section 1271(a)(3)(A), 1278, or 1281(a) with respect to any position in the account for the taxable year; and

(C) The excess of any dividends includible in gross income with respect to positions in the account for the taxable year over the amount of any deduction allowable with respect to such dividends under section 243, 244, or 245.

For purposes of paragraph (c)(3)(i) of this section, the term *interest* includes any amount paid or incurred in connection with positions in the account used in a short sale. Any interest and carrying charges disallowed under this paragraph (c)(3) shall be capitalized by treating such charges as an adjustment to the annual account net gain or loss and shall be allocated pro rata between net short-term capital gain or loss and net long–term capital gain or loss.

(4) *Limitation on total annual account net gain or loss.* No more than 50 percent of total annual account net gain for the taxable year shall be treated as long-term capital gain. Any long-term capital gain in excess of the 50 percent limit shall be treated as short-term capital gain. No more than 40 percent of total annual account net loss for the taxable year shall be treated as short-term capital loss. Any short-term capital loss in excess of the 40 percent limit shall be treated as long-term capital loss.

(5) *Accrued gain and loss with respect to positions includible in a mixed straddle account.* Positions includable in a mixed straddle account that are held by a taxpayer on the day prior to the day the mixed straddle account is established shall be deemed sold for their fair market value as of the close of the last business day preceding the day such mixed straddle account is established. See §§ 1.1092(b)–1T and 1.1092(b)–2T for application of the loss deferral and wash sale rules and for treatment of holding periods and losses with respect to such positions. An adjustment (through an adjustment to basis or otherwise) shall be made to any subsequent gain or loss realized with respect to such positions for any gain or loss recognized under this paragraph (c)(5).

(6) *Examples.* This paragraph (c) may be illustrated by the following examples. It is assumed in each example that the positions are the only positions held directly or indirectly (through a related person or flowthrough entity) by an individual calendar year taxpayer during the taxable year, and that gain or loss from the positions is treated as gain or loss from a capital asset.

Example 1. A establishes a mixed straddle account for a class of activities consisting of transactions in stock of XYZ Corporation and dealer equity options on XYZ Corporation stock. Assume that A enters into no transactions in XYZ Corporation stock or dealer equity options on XYZ Corporation stock prior to December 26, 1985. Thus, the net non-section 1256 position gain or loss and the net section 1256 contract gain or loss for the account are zero for each business day except the following days:

	Net non-section 1256 position gain or loss (XYZ corporation stock)	Net section 1256 contract gain or loss (XYZ corporation dealer equity options)
December 26, 1985	$1,000	$20,000
December 27, 1985	(9,000)	3,000
December 30, 1985	(5,000)	15,000
December 31, 1985	7,000	(2,000)

The daily account net gain or loss is as follows:

	Daily account net gain or loss	Treatment of daily account net gain or loss	Long-term	Short-term
December 26, 1985	$21,000	$1,000 short-term capital gain, $20,000 60 percent long-term capital gain and 40 percent short-term capital gain.	$12,000	$9,000
December 27, 1985	(6,000)	Short-term capital loss	....	(6,000)
December 30, 1985	10,000	60 percent long-term capital gain and 40 percent short-term capital gain.	6,000	4,000
December 31, 1985	5,000	Short-term capital gain	....	5,000

The annual account net gain or loss is $18,000 of long-term capital gain and $12,000 of short-term capital gain. Because A has no other mixed straddle accounts, total annual account net gain or loss is also $18,000 long-term capital gain and $12,000 short-term capital gain. Because more than 50 percent of the total annual account net gain is long-term capital gain, $3,000 of the $18,000 long-term capital gain will be treated as short-term capital gain.

Example 2. Assume the facts are the same as in example (1), except that interest and carrying charges in the amount of $6,000 are allocable to the mixed straddle account and are capitalized under paragraph (c)(3) of this section. Under these circumstances, $3,600 (($18,000/$30,000)×$6,000) of the interest and carrying charges will reduce the $18,000 long-term capital gain to $14,400 long-term capital gain and $2,400 (($12,000/$30,000)×$6,000) of the interest and carrying charges will reduce the $12,000 short-term capital gain to $9,600 short-term capital gain. Because more than 50 percent of the total annual account net gain is long-term capital gain, $2,400 of the $14,400 long-term capital gain will be treated as short-term capital gain.

Example 3. Assume the facts are the same as in example (1), except that A has a second mixed straddle account, which has an annual account net loss of $14,000 of long-term capital loss and $6,000 of short-term capital loss. Under these circumstances, the total annual account net gain is $4,000 ($18,000−$14,000) of long-term capital gain and $6,000 ($12,000−$6,000) of short-term capital gain. Because not more than 50 percent of the total annual account net gain is long-term capital gain, none of the long-term capital gain will be treated as short-term capital gain.

Example 4. Assume the facts are the same as in example (3), except that interest and carrying charges in the amount of $4,000 are allocable to the second mixed straddle account and are capitalized under paragraph (c)(3) of this section. Under these circumstances, $2,800 (($14,000/$20,000)×$4,000)) of the interest and carrying charges will increase the $14,000 long-term capital loss to $16,800 of long-term capital loss and $1,200 (($6,000/$20,000)×$4,000)) of the interest and carrying charges will increase the $6,000 short-term capital loss to $7,200 short-term capital loss. The total annual account net gain is $1,200 of long-term capital gain ($18,000 $16,800) and $4,800 ($12,000−$7,200) of short-term capital gain. Because not more than 50 percent of the total annual account net gain is long-term capital gain, none of the $1,200 long-term capital gain will be treated as short-term capital gain.

Example 5. Assume the facts are the same as in example (1), except that A has a second mixed straddle account, which has an annual account net loss of $20,000 of long-term capital loss and $15,000 of short-term capital loss. Under these circumstances, the total annual account net loss is $2,000 ($20,000−$18,000) of long-term capital loss and $3,000 ($15,000−$12,000) of short-term capital loss. Because more than 40 percent of the total annual account net loss is short-term capital loss, $1,000 of the short-term capital loss will be treated as long-term capital loss.

Example 6. A establishes two mixed straddle accounts. Account 1 has an annual account net gain of $5,000 short-term capital gain, which results from netting $5,000 of long-term capital loss and $10,000 of short-term capital gain. Account 2 has an annual account net loss of $2,000 long-term capital loss, which results from netting $3,000 of long-term capital loss against $1,000 of short-term capital gain. The total annual account net gain is $3,000 short-term capital gain, which results from netting the annual account net gain of $5,000 short-term capital gain from Account 1 against the annual account net loss of $2,000 long-term capital loss from Account 2.

(d) *Treatment of gains and losses from positions in a mixed straddle account established on or before December 31, 1984, in taxable years ending after December 31, 1984; pre-1985 account net gain or loss.* For mixed straddle accounts established on or before December 31, 1984, in taxable years ending after December 31, 1984, the taxpayer on December 31, 1984, shall determine gain or loss for each position in the mixed straddle account that has been disposed of on any day during the period beginning on the first day of the taxpayer's taxable year that includes December 31, 1984, and ending on December 31, 1984. Positions in the mixed straddle account that have not been disposed of as of the close of December 31, 1984, shall be treated as if sold for their fair market value as of the close of December 31, 1984. Gains and losses for such period from non-section 1256 positions in each mixed straddle account shall be netted to determine *pre-1985 net non-section 1256 position gain or loss* and gains and losses for such period from section 1256 contracts in each mixed straddle account shall be netted to determine *pre-1985 net section 1256 contract gain or loss.* Pre-1985 net non-section 1256 position gain or loss is then offset against pre-1985 net section 1256 contract gain or loss from the same mixed straddle account to determine the *pre-1985 account net gain or loss* for the period. If the pre-1985 account net gain or loss is attributable to pre-1985 net non-section 1256 position gain or loss, the pre-1985 account net gain or loss from such account shall be treated as short-term capital gain or loss. If the pre-1985 account net gain or loss is attributable to pre-1985 net section 1256 contract gain or loss, the pre-1985 account net gain or loss from such account shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. If pre-1985 net non-section 1256 position gain or loss and pre-1985 net section 1256 contract gain or loss are either both gains or losses, that portion of the pre-1985 account net gain or loss attributable to pre-1985 net non-section 1256 position gain or loss shall be treated as short-term capital gain or loss and that portion of the pre-1985 account net gain or loss attributable to pre-1985 net section 1256 contract gain or loss shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. An adjustment (through an adjustment to basis or otherwise) shall be made to any subsequent gain or loss realized with respect to such positions for any gain or loss recognized under this paragraph (d). To determine the annual account net gain or loss for such account, the pre-1985 account net gain or loss shall be treated as daily account net gain or loss for purposes of paragraph (c)(2) of this section. See paragraph (c)(5) of this section for treatment of accrued gain or loss with respect to positions includible in a mixed straddle account.

(e) *Treatment of gains and losses from positions in a mixed straddle account for taxable years ending on or before December 31, 1984*—(1) *In general.* For mixed straddle accounts established on or before December 31, 1984, in taxable years ending on or before December 31, 1984, the taxpayer at the close of the taxable year shall determine gain or loss for each position in the mixed straddle account that has been disposed of on any day during the period beginning on the later of the first day of the taxable year or January 1, 1984, and ending on the last day of the taxable year. Positions in the mixed straddle account that have not been disposed of as of the close of the last business day of the taxable year shall be treated as if sold for their fair market value at the close of such day. Gains and losses from non-section 1256 positions in each mixed straddle account shall be netted to determine *1984 net non-section 1256 position gain or loss* for the account and gains and losses from section 1256 contracts shall be netted to determine *1984 net section 1256 contract gain or loss* for the account. The 1984 net non-section 1256 position gain or loss is then offset against 1984 net section 1256 contract gain or loss from the same mixed straddle account to determine *annual account net gain or loss* for the account. If annual account net gain or loss is attributable to 1984 net non-section 1256 position gain or loss, annual account net gain or loss shall be treated as short-term capital gain or loss. If annual account net gain or loss is attributable to 1984 net section 1256 contract gain or loss, annual account net gain or loss shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. If 1984 net non-section 1256 position gain or loss and 1984 net section 1256 contract gain or loss are either both gains or both losses, that portion of annual account net gain or loss attributable to 1984 net non-section 1256 position gain or loss shall be treated as short-term capital gain or loss and that portion of annual account net gain or loss attributable to 1984 net section 1256 contract gain or loss shall be treated as 60 percent long-term capital gain or loss and 40 percent short-term capital gain or loss. An adjustment (through an adjustment to basis or otherwise) shall be made to any subsequent gain or loss realized with respect to such positions for any gain or loss recognized under this paragraph (e). See paragraph (c) (2) through (5) of this section relating to determining the total annual account net gain or loss, application of section 263(g) to mixed straddle accounts, the limitation on the total annual account net gain or loss, and treatment of accrued gain or loss with respect to positions includible in a mixed straddle account.

(2) *Pre-1984 accrued gain.* If the last business day referred to in paragraph (c)(5) of this section is contained in a period to which such paragraph (c)(5) does not apply, the gains and losses from the deemed sale shall be included in the first period to which paragraph (c)(5) applies.

(f) *Election*—(1) *Time for making the election.* Except as otherwise provided, the election under this section to establish one or more mixed straddle accounts for a taxable year must be made by the due date (without regard to automatic and discretionary extensions) of the taxpayer's income tax return for the immediately preceding taxable year (or part thereof). For example, an individual taxpayer on a calendar year basis must make the election by April 15, 1986, to establish one or more mixed straddle accounts for taxable year 1986. Similarly, a calendar year corporate taxpayer must make its election by March 15, 1986, to establish one or more mixed straddle accounts for 1986. If a taxpayer begins trading or investing in positions in a new class of activities during a taxable year, the election under this section with respect to the new class of activities must be made by the taxpayer by the later of the due date of the taxpayer's income tax return for the immediately preceding taxable year (without regard to automatic and discretionary extensions), or 60 days after the first mixed straddle in the new class of activities is entered into. Similarly, if on or after the date the election is made with respect to an account, the taxpayer begins trading or investing in positions that are includible in such account but were not specified in the original election, the taxpayer must make an amended election as prescribed in paragraph (f)(2)(ii) of this section by the later of the due date of the taxpayer's income tax return for the immediately preceding taxable year (without regard to automatic and discretionary extensions), or 60 days after the acquisition of the first of the positions. If an election is made after the times specified in this paragraph (f)(1), the election will be permitted only if the Commissioner concludes that the taxpayer had reasonable cause for failing to make a timely election. For example, if a calendar year taxpayer holds few positions in one class of activities prior to April 15 of a taxable year, and the taxpayer greatly increases trading activity with respect to positions in the class of activities after April 15, then the Commissioner may conclude that the taxpayer had reasonable cause for failing to make a timely election and allow the taxpayer to make a mixed straddle account election for the taxable year. See paragraph (f)(2) of this section for rules relating to the manner for making these elections.

(2) *Manner for making the election*—(i) *In general.* A taxpayer must make the election on Form 6781 in the manner prescribed by such Form, and by attaching the Form to the taxpayer's income tax return for the immediately

preceding taxable year (or request for an automatic extension). In addition, the taxpayer must attach a statement to Form 6781 designating with specificity the class of activities for which a mixed straddle account is established. The designation must describe the class of activities in sufficient detail so that the Commissioner may determine, on the basis of the designation, whether specific positions are includible in the mixed straddle account. In the case of a taxpayer who elects to establish more than one mixed straddle account, the Commissioner must be able to determine, on the basis of the designations, that specific positions are placed in the appropriate account. The election applies to all positions in the designated class of activities held by the taxpayer during the taxable year.

(ii) *Elections for new classes of activities and expanded elections.* Amended elections and elections made with respect to a new class of activities that the taxpayer has begun trading or investing in during a taxable year, shall be made on Form 6781 within the times prescribed in paragraph (f)(1) of this section. A statement must be attached to the Form containing the information required in paragraph (f)(2)(i) of this section, with respect to the new or expanded designated class of activities.

(iii) *Special rule.* The Commissioner may disregard a mixed straddle account election if the Commissioner determines, on the basis of all the facts and circumstances, that the principal purpose for making the mixed straddle account election with respect to a class of activities was to avoid the rules of § 1.1092(b)–1T (a). For example, if a taxpayer holds stock that is not part of a straddle and that would generate a loss if sold or otherwise disposed of, and the taxpayer both acquires offsetting option positions with respect to the stock and makes a mixed straddle account election with respect to the stock and stock options near the end of a taxable year, the Commissioner may disregard the mixed straddle account election.

(3) *Special rule for taxable years ending after 1983 and before September 1, 1986.* An election under this section to establish one or more mixed straddle accounts for any taxable year that includes July 17, 1984, and any taxable year that ends before September 1, 1986 (or, in the case of a corporation, October 1, 1986), must be made by the later of—

(i) December 31, 1985, or

(ii) The due date (without regard to automatic and discretionary extensions) of the return for the taxpayer's taxable year that begins in 1984 if the due date of the taxpayer's return for such year (without regard to automatic and discretionary extensions) is after December 31, 1985.

The election shall be made by attaching Form 6781 together with a statement to the taxpayer's income tax return, amended return, or other appropriate form that is filed on or before the deadline determined in the preceding sentence. The attached statement must designate with specificity, in accordance with paragraph (f)(2)(i) of this section, the class of activities for which a mixed straddle account is established. For example, if a fiscal year taxpayer's return (for its taxable year ending September 30, 1985) is due (without regard to extensions) on January 15, 1986, and the taxpayer intends to obtain an automatic extension to file the return, the election under this section for any or all of the fiscal years ending in 1984, 1985 or 1986 must be made on or before January 15, 1986, with the request for an automatic extension. Similarly, a calendar year taxpayer (whether or not such taxpayer has obtained an automatic extension of time to file) who has filed its 1984 income tax return before October 15, 1985, without making a mixed straddle account election for either 1984 or 1985, or both, may make the mixed straddle account election under this section for either or for both of such years with an amended return filed on or before December 31, 1985. The mixed straddle account elected on this amended return will be effective for all positions in the designated class of activities even if the taxpayer had elected straddle-by-straddle identification as provided under § 1.1092(b)–3T for purposes of the previously filed 1984 income tax return. For taxable years beginning in 1984 and 1985, the election under this paragraph (f)(3) is effective for the entire taxable year. For taxable years beginning in 1983, an election shall be effective for that part of the year beginning after December 31, 1983, for which the election under § 1.1256(h)–1T or 1.1256(h)–2T is made. See § 1.6081–1T regarding an extension of time to file certain individual income tax returns.

(4) *Period for which election is effective.* For taxable years beginning on or after January 1, 1984, an election under this section, including an amendment to the election pursuant to paragraph (f)(1) of this section, shall be effective only for the taxable year for which the election is made. This election may be revoked during the taxable year for the remainder of the taxable year only with the consent of the Commissioner. An application for consent to revoke the election shall be filed with the service center with which the election was filed and shall—

(i) Contain the name, address, and taxpayer identification number of the taxpayer;

(ii) Show that the volume or nature of the taxpayer's activities has changed substantially since the election was made, and that the taxpayer's activities no longer warrant the use of such mixed straddle account; and

(iii) Any other relevant information.

If a taxpayer's election for a taxable year is revoked, the taxpayer may not make a new election for the same class of activities under paragraph (f)(1) of this section during the same taxable year.

(g) *Effective date.* The provisions of this section apply to positions held on or after January 1, 1984.

(Secs. 1092(b)(1), 1092(b)(2) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 98 Stat. 627; 26 U.S.C. 1092(b)(1), 1092(b)(2), 7805))

[T.D. 8008, 50 FR 3329, Jan. 24, 1985; 50 FR 12243, Mar. 28, 1985, as amended by T.D. 8058, 50 FR 42013, Oct. 17, 1985]

§ 1.1092(b)–5T Definitions (temporary).

The following definitions apply for purposes of §§ 1.1092(b)–1T through 1.1092(b)–4T.

(a) *Disposing, disposes, or disposed.* The term *disposing, disposes,* or *disposed* includes the sale, exchange, cancellation, lapse, expiration, or other termination of a right or obligation with respect to personal property (as defined in section 1092(d)(1)).

(b) *Hedging transaction.* The term *hedging transaction* means a hedging transaction as defined in section 1256(e).

(c) *Identified straddle.* The term *identified straddle* means an identified straddle as defined in section 1092(a)(2)(B).

(d) *Loss.* The term *loss* means a loss otherwise allowable under section 165(a) (without regard to the limitation contained in section 165(f)) and includes a write-down in inventory.

(e) *Mixed straddle.* The term *mixed straddle* means a straddle—

(1) All of the positions of which are held as capital assets;

(2) At least one (but not all) of the positions of which is a section 1256 contract;

(3) For which an election under section 1256(d) has not been made; and

(4) Which is not part of a larger straddle.

(f) *Non-section 1256 position.* The term *non-section 1256 position* means a position that is not a section 1256 contract.

(g) *Offsetting position.* The term *offsetting position* means an offsetting position as defined in section 1092(c)(2).

(h) *Position.* The term *position* means a position as defined in section 1092(d)(2).

(i) [Reserved]

(j) *Related person or flowthrough entity.* The term *related person or flowthrough entity* means a related person or flowthrough entity as defined in sections 1092(d)(4) (B) and (C) respectively.

(k) *Section 1256 contract.* The term *section 1256 contract* means a section 1256 contract as defined in section 1256(b).

(l) [Reserved]

(m) *Straddle.* The term *straddle* means a straddle as defined in section 1092(c)(1).

(n) *Successor position.* The term *successor position* means a position (''P'') that is or was at any time offsetting to a second position if—

(1) The second position was offsetting to any loss position disposed of; and

(2) P is entered into during a period commencing 30 days prior to, and ending 30 days after, the disposition of the loss position referred to in paragraph (n)(1) of this section.

(o) *Unrecognized gain.* The term *unrecognized gain* means unrecognized gain as defined in section 1092(a)(3)(A).

(p) *Substantially identical.* The term *substantially identical* has the same meaning as substantially identical in section 1091(a).

(q) *Securities.* The term *security* means a security as defined in section 1236(c).

(Secs. 1092(b) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 95 Stat. 324, 26 U.S.C. 1092(b), 7805) and sec. 102(h) of the Tax Reform Act of 1984 (98 Stat. 625))

[T.D. 8007, 50 FR 3321, Jan. 24, 1985, as amended by T.D. 8070, 51 FR 1788, Jan. 15, 1986]

§1.1092(d)–1 Definitions and special rules.

(a) *Actively traded.* Actively traded personal property includes any personal property for which there is an established financial market.

(b) *Established financial market*—(1) *In general.* For purposes of this section, an established financial market includes—

(i) A national securities exchange that is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);

(ii) An interdealer quotation system sponsored by a national securities association registered under section 15A of the Securities Exchange Act of 1934;

(iii) A domestic board of trade designated as a contract market by the Commodities Futures Trading Commission;

(iv) A foreign securities exchange or board of trade that satisfies analogous regulatory requirements under the law of the jurisdiction in which it is organized (such as the London International Financial Futures Exchange, the Marche a Terme International de France, the International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited, the Frankfurt Stock Exchange, and the Tokyo Stock Exchange);

(v) An interbank market;

(vi) An interdealer market (as defined in paragraph (b)(2)(i) of this section); and

(vii) Solely with respect to a debt instrument, a debt market (as defined in paragraph (b)(2)(ii) of this section).

(2) *Definitions*—(i) *Interdealer market.* An interdealer market is characterized by a system of general circulation (including a computer listing disseminated to subscribing brokers, dealers, or traders) that provides a reasonable basis to determine fair market value by disseminating either recent price quotations (including rates, yields, or other pricing information) of one or more identified brokers, dealers, or traders or actual prices (including rates, yields, or other pricing information) of recent transactions. An interdealer market does not include a directory or listing of brokers, dealers, or traders for specific contracts (such as yellow sheets) that provides neither price quotations nor actual prices of recent transactions.

(ii) *Debt market.* A debt market exists with respect to a debt instrument if price quotations for the instrument are readily available from brokers, dealers, or traders. A debt market does not exist with respect to a debt instrument if—

(A) No other outstanding debt instrument of the issuer (or of any person who guarantees the debt instrument) is traded on an established financial market described in paragraph (b)(1)(i), (ii), (iii), (iv), (v), or (vi) of this section (other traded debt);

(B) The original stated principal amount of the issue that includes the debt instrument does not exceed $25 million;

(C) The conditions and covenants relating to the issuer's performance with respect to the debt instrument are materially less restrictive than the conditions and covenants included in all of the issuer's other traded debt (e.g., the debt instrument is subject to an economically significant subordination provision whereas the issuer's other traded debt is senior); or

(D) The maturity date of the debt instrument is more than 3 years after the latest maturity date of the issuer's other traded debt.

(c) *Notional principal contracts.* For purposes of section 1092(d)—

(1) A notional principal contract (as defined in §1.446–3(c)(1)) constitutes personal property of a type that is actively traded if contracts based on the same or substantially similar specified indices are purchased, sold, or entered into on an established financial market

within the meaning of paragraph (b) of this section; and

(2) The rights and obligations of a party to a notional principal contract are rights and obligations with respect to personal property and constitute an interest in personal property.

(d) *Effective dates.* Paragraph (b)(1)(vii) of this section applies to positions entered into on or after October 14, 1993. Paragraph (c) of this section applies to positions entered into on or after July 8, 1991.

[T.D. 8491, 58 FR 53135, Oct. 14, 1993]

§1.1092(d)–2 Personal property.

(a) *Special rules for stock.* Under section 1092(d)(3)(B), personal property includes any stock that is part of a straddle, at least one of the offsetting positions of which is a position with respect to substantially similar or related property (other than stock). For purposes of this rule, the term *substantially similar or related property* is defined in §1.246–5 (other than §1.246–5(b)(3)). The rule in §1.246–5(c)(6) does not narrow the related party rule in section 1092(d)(4).

(b) *Effective date*—(1) *In general.* This section applies to positions established on or after March 17, 1995.

(2) *Special rule for certain straddles.* This section applies to positions established after March 1, 1984, if the taxpayer substantially diminished its risk of loss by holding substantially similar or related property involving the following types of transactions—

(i) Holding offsetting positions consisting of stock and a convertible debenture of the same corporation where the price movements of the two positions are related; or

(ii) Holding a short position in a stock index regulated futures contract (or alternatively an option on such a regulated futures contract or an option on the stock index) and stock in an investment company whose principal holdings mimic the performance of the stocks included in the stock index (or alternatively a portfolio of stocks whose performance mimics the performance of the stocks included in the stock index).

[T.D. 8590, 60 FR 14641, Mar. 20, 1995]

CAPITAL GAINS AND LOSSES

Treatment of Capital Gains

§1.1201–1 Alternative tax.

(a) *Corporations*—(1) *In general.* (i) If for any taxable year a corporation has net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) (as defined in section 1222(11)) section 1201(a) imposes an alternative tax in lieu of the tax imposed by sections 11 and 511, but only if such alternative tax is less than the tax imposed by sections 11 and 511. The alternative tax is not in lieu of the personal holding company tax imposed by section 541 or of any other tax not specifically set forth in section 1201(a).

(ii) In the case of an insurance company, the alternative tax imposed by section 1201(a) is also in lieu of the tax imposed by sections 821 (a) or (c) and 831 (a), except that for taxable years beginning before January 1, 1963, the reference to section 821 (a) or (c) is to be read as reference to section 821 (a)(1) or (b). For taxable years beginning after December 31, 1954, and before January 1, 1958, the alternative tax imposed by section 1201(a) shall also be in lieu of the tax imposed by section 802(a), as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 38), if such alternative tax is less than the tax imposed by such section. See section 802(e), as added by the Life Insurance Company Tax Act for 1955 (70 Stat. 39). However, for taxable years beginning after December 31, 1958, and before January 1, 1962, section 802(a)(2), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 115), imposes a separate tax equal to 25 percent of the amount by which the net long-term capital gain of any life insurance company (as defined in section 801(a) and paragraph (b) of §1.801–3) exceeds its net short-term capital loss. See paragraph (f) of §1.802–3. For alternative tax for life insurance companies in the case of taxable years beginning after December 31, 1961, see section 802(a)(2) and the regulations thereunder.

(iii) See section 56 and the regulations thereunder for provisions relating to the minimum tax for tax preferences.

(2) *Alternative tax.* The alternative tax is the sum of:

(i) A partial tax computed at the rates provided in sections 11, 511, 821 (a) or (c), and 831(a), on the taxable income of the taxpayer reduced by the amount of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977), and

(ii) An amount equal to the tax determined under subparagraph (3) of this paragraph.

For taxable years beginning after December 31, 1954, and before January 1, 1958, the partial tax under subdivision (i) of this subparagraph shall also be computed at the rates provided in section 802(a). For taxable years beginning before January 1, 1963, the reference in such subdivision to section 821 (a) or (c) is to be read as a reference to section 821 (a) or (b).

(3) *Tax on capital gains.* For purposes of subparagraph (2)(ii) of this paragraph, the tax shall be:

(i) In the case of a taxable year beginning after December 31, 1974, a tax of 30 percent of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976),

(ii) In the case of a taxable year beginning after December 31, 1969, and before January 1, 1975:

(*a*) A tax of 25 percent of the lesser of the amount of the subsection (d) gain (as defined in section 1201(d) and paragraph (f) of this section) or the amount of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976), plus

(*b*) A tax of 30 percent (28 percent in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971) of the excess, if any, of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976) over the subsection (d) gain,

(iii) In the case of a taxable year beginning before January 1, 1970, and after March 31, 1954, a tax of 25 percent of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976), or

(iv) In the case of a taxable year beginning before April 1, 1954, a tax of 26 percent of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976).

(4) *Determination of special deductions.* In the computation of the partial tax described in subparagraph (2)(i) of this paragraph the special deductions provided for in sections 243, 244, 245, 247, 922, and 941 shall not be recomputed as the result of the reduction of taxable income by the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977).

(b) *Other taxpayers*—(1) *In general.* If for any taxable year a taxpayer (other than a corporation) has net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) (as defined in section 1222(11)) section 1201(b) imposes an alternative tax in lieu of the tax imposed by sections 1 and 511, but only if such alternative tax is less than the tax imposed by sections 1 and 511. The alternative tax is not in lieu of any other tax not specifically set forth in section 1201(b). See section 56 and the regulations thereunder for provisions relating to the minimum tax for tax preferences.

(2) *Alternative tax.* The alternative tax is the sum of:

(i) A partial tax computed at the rates provided by sections 1 and 511 on the taxable income reduced by an amount equal to 50 percent of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977), and

(ii) In the case of a taxable year beginning after December 31, 1969:

(*a*) A tax of 25 percent of the lesser of the amount of the subsection (d) gain (as defined in section 1201(d) and paragraph (f) of this section) or the amount of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977), plus

(*b*) A tax computed as provided in section 1201(c) and paragraph (e) of this section on the excess, if any, of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) over the subsection (d) gain, or

(iii) In the case of a taxable year beginning before January 1, 1970, a tax of 25 percent of the net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976).

(3) *Cross references.* See § 1.1–2(a) for rule relating to the computation of the limitation on tax in cases where the alternative tax is imposed. See § 1.34–2 (a)

for rule relating to the computation of the dividend received credit under section 34 (for dividends received on or before December 31, 1964), and §1.35–1 (a) for rule relating to the computation of credit for partially tax-exempt interest under section 35 in cases where the alternative tax is imposed.

(c) *Tax-exempt trusts and organizations.* In applying section 1201 in the case of tax-exempt trusts or organizations subject to the tax imposed by section 511, the only amount which is taken into account as capital gain or loss is that which is taken into account in computing unrelated business taxable income under section 512. Under section 512, the only amount taken into account as capital gain or loss is that resulting from the application of section 631(a), relating to the election to treat the cutting of timber as a sale or exchange.

(d) *Joint returns.* In the case of a joint return, the excess of any net long-term capital gain over any net short-term capital loss is to be determined by combining the long-term capital gains and losses and the short-term capital gains and losses of the spouses.

(e) *Computation of tax on capital gain in excess of subsection (d) gain*—(1) *In general.* The tax computed for purposes of section 1201(b)(3) and paragraph (b)(2)(ii)(*b*) of this section shall be the amount by which a tax determined under section 1 or 511 on an amount equal to the taxable income (but not less than 50 percent of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977)) for the taxable year exceeds a tax determined under section 1 or 511 on an amount equal to the sum of (i) the amount subject to tax under section 1201 (b)(1) and paragraph (b)(2)(i) of this section for such year plus (ii) an amount equal to 50 percent of the subsection (d) gain for such year.

(2) *Limitation.* Notwithstanding subparagraph (1) of this paragraph, the tax computed for purposes of section 1201(b) (3) and paragraph (b)(2)(ii)(*b*) of this section shall not exceed an amount equal to the following percentage of the excess of the net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) over the subsection (d) gain for the taxable year:

(i) 29½ percent, in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971, or

(ii) 32½ percent, in the case of a taxable year beginning after December 31, 1970, and before January 1, 1972.

(f) *Definition of subsection (d) gain*—(1) *In general.* For purposes of section 1201 and this section, the term *subsection (d) gain* means the sum of the long-term capital gains for the taxable year arising:

(i) In the case of amounts received or accrued, as the case may be, before January 1, 1975 (other than any gain from a transaction described in section 631 or 1235), from:

(*a*) Sales or other dispositions on or before October 9, 1969, including sales or other dispositions the income from which is returned as provided in section 453 (a)(1) or (b)(1), or

(*b*) Sales or other dispostions after October 9, 1969, pursuant to binding contracts entered into on or before that date, including sales or other dispositions the income from which is returned as provided in section 453 (a)(1) or (b)(1),

(ii) From liquidating distributions made by a corporation which are made (a) before October 10, 1970, and (b) pursuant to a plan of complete liquidation adopted on or before October 9, 1969, or

(iii) In the case of a taxpayer (other than a corporation), from any other source not described in subdivision (i) or (ii) of this subparagraph, but the amount taken into account from such other sources shall be limited to the amount, if any, by which $50,000 ($25,000 in the case of a married individual filing a separate return) exceeds the sum of the gains to which subdivisions (i) and (ii) of this subparagraph apply.

(2) *Special rules.* For purposes of subparagraph (1) of this paragraph:

(i) A binding contract entered into on or before October 9, 1969, means a contract, whether written or unwritten, which on or before that date was legally enforceable against the taxpayer under applicable law. If on or before October 9, 1969, a taxpayer grants an irrevocable option or irrevocable contractual right to another party to buy certain property and such other party exercises that option or right after October 9, 1969, the sale of such property is a sale pursuant to a binding contract entered into on or before October 9, 1969. The application of this subdivision may be illustrated by the following example:

Example: During 1964, A, B, and C formed a closely held corporation, and A was appointed as president of the organization. On July 1, 1964, A received for consideration 100 shares of common stock in the corporation subject to the agreement that, if A should retire from the management of the corporation or die, A or his estate would first offer his shares of stock to the corporation for purchase and that, if the corporation did not buy the stock within 60 days, the stock could be sold to any party other than the corporation. On September 1, 1970, A retired from the management of the corporation and offered his shares to the corporation for purchase. Pursuant to the agreement, the corporation purchased A's stock on September 30, 1970. A's sale of such stock was pursuant to a binding contract entered into on or before October 9, 1969.

(ii) A contract which pursuant to subdivision (i) of this subparagraph constitutes a binding contract entered into on or before October 9, 1969, does not cease to qualify as such a contract by reason of the fact that after October 9, 1969, there is a modification of the terms of the contract such as a change in the time of performance, or in the amount of the debt or in the terms and mode of payment, or in the rate of interest, or there is a change in the form or nature of the obligation or the character of the security, so long as the taxpayer is at all times on and after October 9, 1969, legally bound by such contract. The application of this subdivision may be illustrated by the following examples:

Example 1. On August 1, 1969, A sold certain capital assets to B on the installment plan and elected to return the gain therefrom under section 453, the agreement providing for payments over a period of 2 years. At the time of the sale these assets had been held by A for more than 6 months. On July 31, 1970, A and B agreed to a modification of the terms of payment under the sales agreement, the only change in the contract being that the installment payments due after July 31, 1970, would be paid over a 3-year period. For purposes of this paragraph the payments received by A after July 31, 1970, are considered amounts received from the sale on August 1, 1969. (See section 483 for rules with respect to interest on deferred payments.)

Example 2. On April 1, 1969, A sold certain capital assets to B on the installment plan and elected to return the gain therefrom under section 453, the agreement providing for payments over a period of 3 years. At the time of the sale these assets had been held by A for more than 6 months. On March 31, 1970, C assumed B's obligation to pay the balance of the installments which were due after that date. For purposes of this paragraph any installment payments received by A after March 31, 1970, from C are considered amounts received from a sale made on or before October 9, 1969.

Example 3. On May 1, 1969, A offers to sell certain capital assets to B if B accepts the offer within 1 year, unless it is previously withdrawn by A. B accepts the offer on November 1, 1969, and the transaction is consummated shortly thereafter. For purposes of this paragraph, any payment received by A pursuant to the sale is not considered an amount received from a sale made on or before October 9, 1969, or from a sale pursuant to a binding contract entered into on or before that date.

(iii) An amount which is considered under section 402(a)(2) or 403(a)(2) as gain of the taxpayer from the sale or exchange of a capital asset held for more than 6 months shall be treated as gain subject to the provisions of section 1201 (d)(1) and subdivision (i) of such subparagraph, but only if on or before October 9, 1969, (*a*) the employee with respect to whom such amount is distributed or paid, died or was otherwise separated from the service, and (*b*) the terms of the plan required, or the employee elected, that total distributions or amounts payable be paid to the taxpayer within 1 taxable year.

(iv) Gain described in section 1201(d) (1) or (2) with respect to a partnership, estate, or trust, which is required to be included in the gross income of a partner in such partnership, or of a beneficiary of such estate or trust, shall be treated as such gain with respect to such partner or beneficiary. Thus, for example, if during 1974 a partnership which uses the calendar year as its taxable year receives amounts which give rise to section 1201(d)(1) gain, a partner who uses the fiscal year ending June 30 as his taxable year shall treat his distributive share of such gain as subsection (d) gain for his taxable year ending June 30, 1975, even though such share is distributed to him after December 31, 1974. See §1.706–1.

(v) An individual shall be considered married for purposes of subdivision (iii) of such subparagraph if for the taxable year he may elect with his spouse to make a joint return under section 6013(a).

(vi) In applying such subparagraph for purposes of section 21(a) (1) long-term capital gains arising from amounts received before January 1, 1970, shall be taken into account if such amounts are received during the taxable year.

(g) *Illustrations.* The application of this section may be illustrated by the following examples in which the assumption is made that section 56 (relating to minimum tax for tax preferences) does not apply:

Example 1. A, a single individual, has for the calendar year 1954 taxable income (exclusive of capital gains and losses) of $99,400. He realizes in 1954 a gain of $50,000 on the sale of a capital asset held for 19 months and sustains a loss of $20,000 on the sale of a capital asset held for 5 months. He had no other capital gains or losses. Since the alternative tax is less than the tax otherwise computed under section 1, the tax payable is the alternative tax, that is $74,298. The tax is computed as follows:

Tax Under Section 1

Taxable income exclusive of capital gains and losses		$99,400
Net long-term capital gain (100 percent of $50,000)	$50,000	
Net short-term capital loss (100 percent of $20,000)	20,000	
Excess of net long-term capital gain over the net short-term capital loss		30,000
		129,400
Deduction of 50 percent of excess of net long-term capital gain over the net short-term capital loss (section 1202)		15,000
Taxable income		114,400
Tax under section 1		80,136
Alternative Tax Under Section 1201(b)		
Taxable income		$114,400
Less 50 percent of excess of net long-term capital gain over net short-term capital loss (section 1201(b)(1))		15,000
Taxable income exclusive of capital gains and losses		99,400
Partial tax (tax on $99,400)		66,798
Plus 25 percent of $30,000		7,500
Alternative tax under section 1201(b)		74,298

Example 2. A husband and wife, who file a joint return for the calendar year 1970, have taxable income (exclusive of capital gains and losses) of $100,000. In 1970 they realize $200,000 of net long-term capital gain in excess of net short-term capital loss, including long-term capital gains of $100,000 arising from sales consummated in 1968 the income from which is returned on the installment method under section 453, and long-term capital gains of $50,000, arising in respect of distributions from X corporation made before October 10, 1970, which were pursuant to a plan of complete liquidation adopted on October 9, 1969. Since the alternative tax under section 1201(b) is less than the tax otherwise computed under section 1, the tax payable for 1970 is the alternative tax, that is, $97,430 plus the tax surcharge under section 51. The tax (without regard to the tax surcharge) is computed as follows:

Tax Under Section 1

Taxable income exclusive of capital gains and losses		$100,000
Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976) (excess of net long-term capital gain over the net short-term capital loss)		200,000
Total		300,000
Deduction of 50 percent of net section 1201 (net capital gain for taxable years beginning after December 31, 1976) gain (section 1202)		100,000
Taxable income		200,000
Tax under section 1		110,980
Alternative Tax Under Section 1201(b)		
(1) Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976)		$200,000
(2) Subsection (d) gain:		
Section 1201(d)(1)		100,000
Section 1201(d)(2)		50,000
Total subsection (d) gain		150,000
(3) Net section 1201 (net capital gain for taxable years beginning after December 31, 1976) gain in excess of subsection (d) gain ($200,000 less $150,000)		50,000
(4) Tax under section 1201(b)(1):		
(i) Taxable income	$200,000	
(ii) Less: 50% of item (1)	100,000	
(iii) Amount subject to tax under section 1201(b)(1)	100,000	
Partial tax (computed under section 1) ...		45,180
(5) Tax under section 1201(b)(2): (25% of item (1) or of item (2), whichever is lesser [25% of $150,000])		37,500
(6) Tax under section 1201(b)(3) on item (3):		
Tax under section 1 on taxable income ($200,000)	$110,980	
Less: Tax under section 1 on sum of item (4)(iii)(c) ($100,000) plus 50% of item (2) ($75,000) (Total $175,000)	93,780	
Tax under section 1201(c)(1)	17,200	

Limitation under section.

1201(c)(2)(A) (29½% of item (3))	14,750	14,750
(7) Alternative tax under section 1201(b)		97,430

Example 3. A husband and wife, who file a joint return for the calender year 1971, have taxable income (exclusive of capital gains and losses) of $80,000. In 1971 they realize long-term capital gain of $30,000 arising from a sale consummated on July 1, 1969, the income from which is returned on the installment method under section 453. From securities transactions in 1971 they have long-term capital gains of 60,000 and a short-term capital loss of $10,000. Since the alternative tax under section 1201(b) is less than the tax otherwise computed under section 1, the tax payable is the alternative tax, that is, $55,140. The tax is computed as follows:

Tax Under Section 1		
Taxable income exclusive of capital gains and losses		$80,000
Net long-term capital gains (100% of $90,000)	$90,000	
Net short-term capital loss (100% of $10,000)	10,000	
Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976)		80,000
Total		160,000
Deduction of 50% of net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976) (section 1202)		40,000
Taxable income		120,000
Tax under section 1		57,580
Alternative Tax Under Section 1201(b)		
(1) Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976)		$80,000
(2) Subsection (d) gain:		
Section 1201(d)(1)		30,000
Section 1201(d)(2)		
Section 1201(d)(3) ($50,000 less $30,000)		20,000
Total subsection (d) gain		50,000
(3) Net section 1201 (net capital gain for taxable years beginning after December 31, 1976) gain in excess of subsection (d) gain ($80,000 less $50,000)		30,000
(4) Tax under section 1201(b)(1):		
(i) Taxable income	$120,000	
(ii) Less: 50% of item (1)	40,000	
(iii) Amount subject to tax under section 1201(b)(1)	80,000	
Partial tax (computed under section 1)		33,340
(5) Tax under section 1201(b)(2): (25% of item (1) or of item (2), whichever is lesser [25% of $50,000])		12,500
(6) Tax under section 1201 (b)(3) on item (3):		
Tax under section 1 on taxable income ($120,000)	$57,580	
Less: Tax under sec. 1 on sum of item (4) (iii) ($80,000) plus 50% of item (2) ($25,000) (Total $105,000)	$48,280	
Tax under section 1201(c)(1)	9,300	
Limitation under section 1201(c) (2)(B) (32½% of item (3))	9,750	$9,300
(7) Alternative tax under section 1201(b)		55,140

Example 4. A husband and wife, who file a joint return for the calendar year 1973, have taxable income (exclusive of capital gains and losses) of $250,000. In 1973 they realize long-term capital gains (not described in section 1201(d) (1) or (2)) of $140,000 and a short-term capital loss of $50,000. Since the alternative tax under section 1201(b) is less than the tax otherwise computed under section 1, the tax payable is the alternative tax, that is, $172,480. The tax is computed as follows:

Tax Under Section 1		
Taxable income exclusive of capital gains and losses		$250,000
Net long-term capital gains (100% of $140,000)	$140,000	
Net short-term capital loss (100% of $50,000)	50,000	
Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976)		90,000
Total		340,000
Deduction of 50% of net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976) (section 1202)		45,000
Taxable income		295,000
Tax under section 1		177,480
Alternative Tax Under Section 1201(b)		
(1) Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976)		$90,000
(2) Subsection (d) gain:		
Section 1201(d)(1)		....
Section 1201(d)(2)		....
Section 1201(d)(3)		50,000
Total subsection (d) gain		50,000
(3) Net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976) in excess of subsection (d) gain ($90,000 less $50,000)		40,000
(4) Tax under section 1201(b)(1):		
(i) Taxable income	$295,000	
(ii) Less: 50% of item (1)	45,000	
(iii) Amount subject to tax under section 1201(b)(1)	250,000	
Partial tax (computed under section 1)		145,980
(5) Tax under section 1201(b)(2): (25% of item (1) or of item (2), whichever is lesser [25% of $50,000])		$12,500
(6) Tax under section 1201(b)(3) on item (3):		
Tax under section 1 on taxable income ($295,000)	$177,480	
Less: Tax under section 1 on sum of item (4) (iii) ($250,000) plus 50% of item (2) ($25,000) (Total $275,000)	163,480	14,000
(7) Alternative tax under section 1201(b)		172,480

[T.D. 7337, 39 FR 44975, Dec. 30, 1974, as amended by T.D. 7728, 45 FR 72651, Nov. 3, 1980]

§ 1.1202–0 Table of contents.

This section lists the major captions that appear in the regulations under § 1.1202–2.

§ 1.1202–2 Qualified small business stock; effect of redemptions.
(a) Redemptions from taxpayer or related person.
(1) In general.
(2) De minimis amount.
(b) Significant redemptions.
(1) In general.
(2) De minimis amount.
(c) Transfers by shareholders in connection with the performance of services not treated as purchases.
(d) Exceptions for termination of services, death, disability or mental incompetency, or divorce.
(1) Termination of services.
(2) Death.
(3) Disability or mental incompetency.
(4) Divorce.
(e) Effective date.

[T.D. 8749, 62 FR 68166, Dec. 31, 1997]

§ 1.1202–1 Deduction for capital gains.

(a) In computing gross income, adjusted gross income, taxable income, capital gain net income (net capital gain for taxable years beginning before January 1, 1977) and net capital loss, 100 percent of any gain or loss (computed under section 1001, recognized under section 1002, and taken into account without regard to subchapter P (section 1201 and following), chapter 1 of the Code) upon the sale or exchange of a capital asset shall be taken into account regardless of the period for which the capital asset has been held. Nevertheless, the net short-term capital gain or loss and the net long-term capital gain or loss must be separately computed. In computing the adjusted gross income or the taxable income of a taxpayer other than a corporation, if for any taxable year the net long-term capital gain exceeds the net short-term capital loss, 50 percent of the amount of the excess is allowable as a deduction from gross income under section 1202.

(b) For the purpose of computing the deduction allowable under section 1202 in the case of an estate or trust, any long-term or short-term capital gains which, under sections 652 and 662, are includible in the gross income of its income beneficiaries as gains derived from the sale or exchange of capital assets must be excluded in determining whether, for the taxable year of the estate or trust, its net long-term capital gain exceeds its net short-term capital loss. To determine the extent to which such gains are includible in the gross income of a beneficiary, see the regulations under sections 652 and 662. For example, during 1954 a trust realized a gain of $1,000 upon the sale of stock held for 10 months. Under the terms of the trust instrument all of such gain must be distributed during the taxable year to A, the sole income beneficiary. Assuming that under section 652 or 662 A must include all of such gain in his gross income, the trust is not entitled to any deduction with respect to such gain under section 1202. Assuming A had no other capital gains or losses for 1954, he would be entitled to a deduction of $500 under section 1202. For purposes of this section, an income beneficiary shall be any beneficiary to whom an amount is required to be distributed, or is paid or credited, which is includible in his gross income.

(c) The provisions of this section may be illustrated by the following example:

Example: A, an individual, had the following transactions in 1954:

Long-term capital gain	$6,000	
Long-term capital loss	4,000	
Net long-term capital gain		$2,000
Short-term capital loss	1,800	
Short-term capital gain	300	
Net short-term capital loss		1,500
Excess of net long-term capital gain over net short-term capital loss		500

Since the net long-term capital gain exceeds the net short-term capital loss by $500, 50 percent of the excess, or $250, is allowable as a deduction under section 1202.

[T.D. 6500, 25 FR 12001, Nov. 26, 1960, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1202–2 Qualified small business stock; effect of redemptions.

(a) *Redemptions from taxpayer or related person*—(1) *In general.* Stock acquired by a taxpayer is not qualified small business stock if, in one or more purchases during the 4-year period beginning on the date 2 years before the issuance of the stock, the issuing corporation purchases (directly or indirectly) more than a de minimis amount of its stock from the taxpayer or from a person related (within the meaning of section 267(b) or 707(b)) to the taxpayer.

(2) *De minimis amount.* For purposes of this paragraph (a), stock acquired from the taxpayer or a related person exceeds a de minimis amount only if the aggregate amount paid for the stock exceeds $10,000 and more than 2 percent of the stock held by the taxpayer and related persons is acquired. The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock held (directly or indirectly) by the taxpayer and related persons immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

(b) *Significant redemptions*—(1) *In general.* Stock is not qualified small business stock if, in one or more purchases during the 2-year period beginning on the date 1 year before the issuance of the stock, the issuing corporation purchases more than a de minimis amount of its stock and the purchased stock has an aggregate value (as of the time of the respective purchases) exceeding 5 percent of the aggregate value of all of the issuing corporation's stock as of the beginning of such 2-year period.

(2) *De minimis amount.* For purposes of this paragraph (b), stock exceeds a de minimis amount only if the aggregate amount paid for the stock exceeds $10,000 and more than 2 percent of all outstanding stock is purchased. The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of the stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock outstanding immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

(c) *Transfers by shareholders in connection with the performance of services not treated as purchases.* A transfer of stock by a shareholder to an employee or independent contractor (or to a beneficiary of an employee or independent contractor) is not treated as a purchase of the stock by the issuing corporation for purposes of this section even if the stock is treated as having first been transferred to the corporation under § 1.83–6(d)(1) (relating to transfers by shareholders to employees or independent contractors).

(d) *Exceptions for termination of services, death, disability or mental incompetency, or divorce.* A stock purchase is disregarded if the stock is acquired in the following circumstances:

(1) *Termination of services*—(i) *Employees and directors.* The stock was acquired by the seller in connection with the performance of services as an employee or director and the stock is purchased from the seller incident to the seller's retirement or other bona fide termination of such services;

(ii) *Independent contractors.* [Reserved]

(2) *Death.* Prior to a decedent's death, the stock (or an option to acquire the stock) was held by the decedent or the decedent's spouse (or by both), by the decedent and joint tenant, or by a trust revocable by the decedent or the decedent's spouse (or by both), and—

(i) The stock is purchased from the decedent's estate, beneficiary (whether by bequest or lifetime gift), heir, surviving joint tenant, or surviving spouse, or from a trust established by the decedent or decedent's spouse; and

(ii) The stock is purchased within 3 years and 9 months from the date of the decedent's death;

(3) *Disability or mental incompetency.* The stock is purchased incident to the disability or mental incompetency of the selling shareholder; or

(4) *Divorce.* The stock is purchased incident to the divorce (within the meaning of section 1041(c)) of the selling shareholder.

(e) *Effective date.* This section applies to stock issued after August 10, 1993.

[T.D. 8749, 62 FR 68166, Dec. 31, 1997]

TREATMENT OF CAPITAL LOSSES

§1.1211–1 Limitation on capital losses.

(a) *Corporations*—(1) *General rule.* In the case of a corporation, there shall be allowed as a deduction an amount equal to the sum of:

(i) Losses sustained during the taxable year from sales or exchanges of capital assets, plus

(ii) The aggregate of all losses sustained in other taxable years which are treated as a short-term capital loss in such taxable year pursuant to section 1212(a)(1),

but only to the extent of gains from such sales or exchanges of capital assets in such taxable year.

(2) *Banks.* See section 582(c) for modification of the limitation under section 1211(a) in the case of a bank, as defined in section 581.

(b) *Taxpayers other than corporations*—(1) *General rule.* In the case of a taxpayer other than a corporation, there shall be allowed as a deduction an amount equal to the sum of:

(i) Losses sustained during the taxable year from sales or exchanges of capital assets, plus

(ii) The aggregate of all losses sustained in other taxable years which are treated either as a short-term capital loss or as a long-term capital loss in such taxable year pursuant to section 1212(b), but only to the extent of gains from sales or exchanges of capital assets in such taxable year, plus (if such losses exceed such gains) the additional allowance or transitional additional allowance deductible under section 1211(b) from ordinary income for such taxable year. The additional allowance deductible under section 1211(b) shall be determined by application of subparagraph (2) of this paragraph, and the transitional additional allowance by application of subparagraph (3) of this paragraph.

(2) *Additional allowance.* Except as otherwise provided by subparagraph (3) of this paragraph, the additional allowance deductible under section 1211(b) for taxable years beginning after December 31, 1969, shall be the least of:

(i) The taxable income for the taxable year reduced, but not below zero, by the zero bracket amount (in the case of taxable years beginning before January 1, 1977, the taxable income for the taxable year);

(ii) $3,000 ($2,000 for taxable years beginning in 1977; $1,000 for taxable years beginning before January 1, 1977); or

(iii) The sum of the excess of the net short-term capital loss over the net long-term capital gain, plus one-half of the excess of the net long-term capital loss over the net short-term capital gain.

(3) *Transitional additional allowance*—(i) *In general.* If, pursuant to the provisions of §1.1212–1(b) and subdivision (iii) of this subparagraph, there is carried to the taxable year from a taxable year beginning before January 1, 1970, a long-term capital loss, and if for the taxable year there is an excess of net long-term capital loss over net short-term capital gain, then, in lieu of the additional allowance provided by subparagraph (2) of this paragraph, the transitional additional allowance deductible under section 1211(b) shall be the least of:

(*a*) The taxable income for the taxable year reduced, but not below zero, by the zero bracket amount (in the case of taxable years beginning before January 1, 1977, the taxable income for the taxable year);

(*b*) $3,000 ($2,000 for taxable years beginning in 1977; $1,000 for taxable years beginning before January 1, 1977); or

(*c*) The sum of the excess of the net short-term capital loss over the net long-term capital gain; that portion of the excess of the net long-term capital loss over the net short-term capital gain computed as provided in subdivision (ii) of this subparagraph; plus one-half of the remaining portion of the excess of the net long-term capital loss over the net short-term capital gain.

(ii) *Computation of specially treated portion of excess long-term capital loss over net short-term capital gain.* In determining the transitional additional allowance deductible as provided by this subparagraph, there shall be applied thereto in full on a dollar-for-dollar basis the excess of net long-term capital loss over net short-term capital gain (computed with regard to capital losses carried to the taxable year) to the extent that the long-term capital losses carried to the taxable year from taxable years beginning before January

1, 1970, as provided by § 1.1212–1(b) and subdivision (iii) of this subparagraph, exceed the sum of (*a*) the portion of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) actually realized in the taxable year (i.e., computed without regard to capital losses carried to the taxable year) which consists of net long-term capital gain actually realized in the taxable year, plus (*b*) the amount by which the portion of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) actually realized in the taxable year (i.e., computed without regard to capital losses carried to the taxable year) which consists of net short-term capital gain actually realized in the taxable year exceeds the total of short-term capital losses carried to the taxable year from taxable years beginning before January 1, 1970, as provided by § 1.1212–1(b) and subdivision (iv) of this subparagraph.

The amount by which the net long-term capital losses carried to the taxable year from taxable years beginning before January 1, 1970, exceeds the sum of (*a*) plus (*b*) shall constitute the *transitional net long-term capital loss component* for the taxable year for the purpose of this subparagraph.

(iii) *Carryover of certain long-term capital losses not utilized in computation of transitional additional allowance.* If for a taxable year beginning after December 31, 1969, the transitional net long-term capital loss component determined as provided in subdivision (ii) of this subparagraph exceeds the amount of such component applied to the transitional additional allowance for the taxable year as provided by subdivision (i) of this subparagraph and subparagraph (4)(ii) of this paragraph, then such excess shall for the purposes of this subparagraph be carried to the succeeding taxable year as long-term capital losses from taxable years beginning before January 1, 1970, for utilization in the computation of the transitional additional allowance in the succeeding taxable year as provided in subdivisions (i) and (ii) of this subparagraph. In no event, however, shall the amount of such component carried to the following taxable year as otherwise provided by this subdivision exceed the total of net long-term capital losses actually carried to such succeeding taxable year pursuant to section 1212(b) and § 1.1212–1(b).

(iv) *Carryover of certain short-term capital losses not utilized in computation of additional allowance or transitional additional allowance.* If for a taxable year beginning after December 31, 1969, the total short-term capital losses carried to such year from taxable years beginning before January 1, 1970, as provided by § 1.1212–1(b) and this subdivision exceed the sum of:

(*a*) The portion of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) actually realized in the taxable year (i.e., computed without regard to capital losses carried to the taxable year) which consists of net short-term capital gain actually realized in the taxable year, plus

(*b*) The amount by which the portion of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) actually realized in the taxable year (i.e., computed without regard to capital losses carried to the taxable year) which consists of net long-term capital gain actually realized in the taxable year exceeds the total long-term capital losses carried to the taxable year from taxable years beginning before January 1, 1970, as provided in § 1.1212–1(b) and subdivision (iii) of this subparagraph,

then such excess shall constitute the *transitional net short-term capital loss component* for the taxable year, and to the extent such component also exceeds the net short-term capital loss applied to the additional allowance (as provided in subparagraphs (2) and (4)(i) of this paragraph) or the transitional additional allowance (as provided by subdivision (i) of this subparagraph and subparagraph (4)(i) of this paragraph) for the taxable year shall be carried to the succeeding taxable year as short-term capital losses from taxable years beginning before January 1, 1970, for utilization in such succeeding taxable year in the computation of the additional allowance (as provided by subparagraph (2) of this paragraph) or the transitional additional allowance (as provided by subdivision (i) and (ii) of this subparagraph). In no event, however, shall the amount of such component so carried to the following taxable year as otherwise provided by this subdivision exceed the total of net short-term capital losses actually carried to such succeeding taxable year pursuant to section 1212(b) and §1.1212–1(b).

(v) *Scope of rules.* The rules provided by this subparagraph are for the purpose of computing the amount of the transitional additional allowance deductible for the taxable year pursuant to the provisions of section 1212(b)(3) and this subparagraph. More specifically, their operation permits the limited use of a long-term capital loss carried to the taxable year from a taxable year beginning before December 31, 1969, in full on a dollar-for-dollar basis in computing the transitional additional allowance deductible for the taxable year. These rules have no application to, or effect upon, a determination of the character or amount of capital gain net income (net capital gain for taxable years beginning before January 1, 1977) reportable in the taxable year. See paragraph (b)(1) of this section and §1.1212–1 for the determination of the amount and character of capital gains and losses reportable in the taxable year. Further, except to the extent that their application may affect the amount of the transitional additional allowance deductible for the taxable year and thus the amount to be treated as short-term capital loss for carryover purposes under section 1212(b) and §1.1212–1(b)(2), these rules have no effect upon a determination of the character or amount of capital losses carried to or from the taxable year pursuant to section 1212(b) and §1.1212–1(b).

(4) *Order of application of capital losses to additional allowance or transitional additional allowance.* In applying the excess of the net short-term capital loss over the net long-term capital gain and the excess of the net long-term capital loss over the net short-term capital gain to the additional allowance or transitional additional allowance deductible under section 1211(b) and this paragraph, such excesses shall, subject to the limitations of subparagraph (2) or (3) of this paragraph, be used in the following order:

(i) First, there shall be applied to the additional allowance or transitional additional allowance the excess, if any, of the net short-term capital loss over the net long-term capital gain.

(ii) Second, if such transitional additional allowance exceeds the amount so applied thereto as provided in subdivision (i) of this subparagraph, there shall next be applied thereto as provided in subparagraph (3) of this paragraph the excess, if any, of the net long-term capital loss over the net short-term capital gain to the extent of the transitional net long-term capital loss component for the taxable year computed as provided by subdivision (ii) of subparagraph (3) of this paragraph.

(iii) Third, if such additional allowance or transitional additional allowance exceeds the sum of the amounts so applied thereto as provided in subdivisions (i) and (ii) of this subparagraph, there shall be applied thereto one-half of the balance, if any, of the excess net long-term capital loss not applied pursuant to the provisions of subdivision (ii) of this subparagraph.

(5) *Taxable years beginning prior to January 1, 1970.* For any taxable year beginning prior to January 1, 1970, subparagraphs (2) and (3) of this paragraph shall not apply and losses from sales or exchanges of capital assets shall be allowed as a deduction only to the extent of gains from such sales or exchanges, plus (if such losses exceed such gains) the taxable income of the taxpayer or $1,000, whichever is smaller.

(6) *Special rules.* (i) For purposes of section 1211(b) and this paragraph, taxable income is to be computed without regard to gains or losses from sales or exchanges of capital assets and without regard to the deductions provided in section 151 (relating to personal exemptions) or any deduction in lieu thereof. For example, the deductions available to estates and trusts under section 642(b) are in lieu of the deductions allowed under section 151, and, in the case of estates and trusts, are to be added back to taxable income for the purposes of section 1211(b) and this paragraph.

(ii) For taxable years beginning before January 1, 1976, in case the tax is computed under section 3 and the regulations thereunder (relating to optional tax tables for individuals), the term *taxable income* as used in section 1211(b) and this paragraph shall be read as *adjusted gross income.*

(iii) In the case of a joint return, the limitation under section 1211(b) and this paragraph, relating to the allowance of losses from sales or exchanges of capital assets, is to be computed and the net capital loss determined with respect to the combined taxable income and the combined capital gains and losses of the spouses.

(7) *Married taxpayers filing separate returns*—(i) *In general.* In the case of a husband or a wife who files a separate return for a taxable year beginning after December 31, 1969, the $3,000, $2,000, and $1,000 amounts specified in subparagraphs (2)(ii) and (3)(i)(*b*) of this paragraph shall instead be $1,500, $1,000, and $500, respectively.

(ii) *Special rule.* If, pursuant to the provisions of § 1.1212–1(b) and subparagraph (3) (iii) or (iv) of this paragraph, there is carried to the taxable year from a taxable year beginning before January 1, 1970, a short-term capital loss or a long-term capital loss, the $1,500, $1,000 and $500 amounts specified in subdivision (i) of this subparagraph shall instead be maximum amounts of $3,000, $2,000, and $1,000 respectively, equal to $1,500, $1,000, and $500, respectively, plus the total of the transitional net long-term capital loss component for the taxable year computed as provided by subparagraph (3)(ii) of this paragraph and the transitional net short-term capital loss component for the taxable year computed as provided by subparagraph (3)(iv) of this paragraph.

(8) *Examples.* The provisions of section 1211(b) may be illustrated by the following examples:

Example 1. A, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1970:

Taxable income exclusive of capital gains and losses		$4,400
Deduction provided by section 151		625
Taxable income for purposes of section 1211(b)		5,025
Long-term capital gain	$1,200	
Long-term capital loss	(5,300)	
Net long-term capital loss	(4,100)	
Losses to the extent of gains	(1,200)	
Additional allowance deductible under section 1211(b)		1,000

The net long-term capital loss of $4,100 is deductible in 1970 only to the extent of an additional allowance of $1,000 which is smaller than the taxable income of $5,025. Under section 1211(b) and subparagraph (2) of this paragraph, $2,000 of excess net long-term capital loss was required to produce the $1,000 additional allowance. Therefore, a net long-term capital loss of $2,100 ($4,100 minus $2,000) is carried over under section 1212(b) to the succeeding taxable year. If A had the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions in 1977, the additional allowance would be $2,000, and a net long-term capital loss of $100 would be carried over. For a taxable year beginning in 1978 or thereafter, these facts would give rise to a $2,050 additional allowance and no carryover.

Example 2. B, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1970:

Taxable income exclusive of capital gains and losses	$90	
Deduction provided by section 151	625	
Taxable income for purposes of section 1211(b)	715	
Long-term capital gain	$1,200	
Long-term capital loss	(5,200)	
Net long-term capital loss	(4,000)	
Losses to the extent of gains	(1,200)	
Additional allowance deductible under section 1211(b)		715

The net long-term capital loss of $4,000 is deductible in 1970 only to the extent of an additional allowance of $715, since the $715 of taxable income for purposes of section 1211(b) is smaller than $1,000. Under section 1211(b) and subparagraph (2) of this paragraph, $1,430 of net long-term capital loss was required to produce the $715 additional allowance. Therefore, a net long-term capital loss of $2,570 ($4,000 minus $1,430) is carried over under section 1212(b) to the succeeding taxable year. For illustration of the result if the net capital loss for the taxable year is smaller than both $1,000 and taxable income for the purposes of section 1211(b), see examples (3) and (4) of this subparagraph. For carryover of a net capital loss, see § 1.1212–1. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transations for taxable years beginning in 1977 or thereafter, the same result would be reached.

Example 3. A, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1971:

Taxable income exclusive of capital gains and losses	$13,300	
Deduction provided by section 151	675	
Taxable income for purposes of section 1211(b)	13,975	
Long-term capital gain	$400	
Long-term capital loss	($600)	
Net long-term capital loss	(200)	
Short-term capital gain	900	
Short-term capital loss	(1,400)	
Net short-term capital loss	(500)	
Losses to extent of gains	(1,300)	
Additional allowance deductible under section 1211(b)		$600

The $600 additional allowance deductible under section 1211(b) is the least of: (i) Taxable income of $13,975, (ii) $1,000, or (iii) the sum of the excess of the net short-term capital loss of $500 over the net long-term capital gain, plus one-half of the excess of the net long-term capital loss of $200 over the net short-term capital gain. The $600 additional allowance, therefore, consists of the net short-term capital loss of $500, plus $100 (one-half of the net long-term capital loss of $200), the total of which is smaller than both $1,000 and taxable income for purposes of section 1211(b). No amount of net capital loss remains to be carried over under section 1212(b) to the succeeding taxable year since the entire amount of the net short-term capital loss of $500 plus the entire amount of the net long-term capital loss of $200 required to produce $100 of the deduction was absorbed by the additional allowance deductible under section 1211(b) for 1971. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for taxable years beginning in 1977 or thereafter, the result would remain unchanged.

Example 4. A, a married individual filing a separate return with one exemption allowable as a deduction under section 151, has the following transactions in 1971:

Taxable income exclusive of capital gains and losses	$12,000	
Deduction provided by section 151	675	
Taxable income for purposes of section 1211(b)	12,675	
Long-term capital loss	($800)	
Long-term capital gain	300	
Net long-term capital loss	(500)	
Short-term capital loss	(500)	
Short-term capital gain	600	
Net short-term capital gain	100	
Losses to the extent of gains		(900)
Additional allowance deductible under section 1211(b)		200

The excess net long-term capital loss of $400 (net long-term capital loss of $500 minus net short-term capital gain of $100) is deductible in 1971 only to the extent of an additional allowance of $200 (one-half of $400) which is smaller than both $500 (married taxpayer filing a separate return for a taxable year beginning after December 31, 1969) and taxable income for purposes of section 1211(b). Since there is no net short-term capital loss in excess of net long-term capital gains for the taxable year, the $200 additional allowance deductible under section 1211(b) consists entirely of excess net long-term capital loss. No amount of net capital loss remains to be carried over under section 1212(b) to the succeeding taxable year. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for taxable years beginning in 1977 or thereafter, the result would remain unchanged.

Example 5. A, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1970:

Taxable income exclusive of capital gains and losses	$13,300
Deduction provided by section 151	625
Taxable income for purposes of section 1211(b)	13,925
Long-term capital loss	($6,000)
Long-term capital gain	2,000
Net long-term capital loss	(4,000)
Short-term capital gain	3,000
Short-term capital loss carried to 1970 from 1969 under section 1212(b)(1)	(3,000)
Net short-term capital loss	0
Losses to the extent of gains	(5,000)
Additional allowance deductible under section 1211(b)	1,000

The $1,000 additional allowance deductible under section 1211(b) is the least of (i) taxable income of $13,925, (ii) $1,000, or (iii) the sum of the net short-term capital loss ($0) plus one-half of the net long-term capital loss of $4,000. The $1,000 additional allowance, therefore, consists of net long-term capital loss. Since $2,000 of the net long-term capital loss of $4,000 was required to produce the $1,000 additional allowance, the $2,000 balance of the net long-term capital loss is carried over under section 1212(b) to 1971. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for taxable years beginning in 1977 or thereafter, the additional allowance would be $2,000, and there would be no carryover.

Example 6. A, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1970:

Taxable income exclusive of capital gains and losses		$13,300
Deduction provided by section 151		625
Taxable income for purposes of section 1211(b)		13,925
Long-term capital gain	$5,000	
Long-term capital loss	(7,000)	
Long-term capital loss carried to 1970 from 1969 under section 1212 (b)(1)	(500)	
Net long-term capital Loss	(2,500)	
Short-term capital gain	1,100	
Short-term capital loss	(1,400)	
Net short-term capital loss	(300)	
Losses to extent of gains	(6,100)	
Transitional additional allowance deductible under section 1211(b)	1,000	

Because a component of the net long-term capital loss for 1970 is a $500 long-term capital loss carried to 1970 from 1969, the transitional additional allowance deductible under section 1211(b) and subparagraph (3) of this paragraph is the least of (i) taxable income of $13,925, (ii) $1,000 or (iii) the sum of the net short-term capital loss of $300, plus the net long-term capital loss for 1970, to the extent of the $500 long-term capital loss carried to 1970 from 1969 and one-half of the $2,000 balance of the net long-term capital loss. The entire $500 long-term capital loss carried to 1970 from 1969 is applicable in full to the transitional additional allowance because there was no net capital gain (capital gain net income for taxable years beginning after December 31, 1976) actually realized in 1970. The $1,000 transitional additional allowance, therefore, consists of the net short-term capital loss of $300, the $500 long-term capital loss carried to 1970 from 1969, plus one-half of enough of the balance of the 1970 net long-term capital loss ($400) to make up the $200 balance of the $1,000 transitional additional allowance. A long-term capital loss of $1,600 ($2,500 minus $900), all of which is attributable to 1970, is carried over under section 1212(b) to 1971. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for taxable years beginning in 1977 or thereafter, the transitional additional allowance would be $1,800. No amount would remain to be carried over to the succeeding taxable year.

Example 7. A, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1970:

Taxable income exclusive of capital gains and losses		$13,300
Deduction provided by section 151		625
Taxable income for purposes of section 1211(b)		13,925
Long-term capital loss	($2,000)	
Long-term capital loss carried to 1970 from 1969 under section 1212 (b)(1)	(500)	
Net long-term capital loss	(2,500)	
Short-term capital gain	2,600	
Short-term capital loss carried to 1970 from 1969 under section 1212 (b)(1)	(3,000)	
Net short-term capital loss	(400)	
Losses to the extent of gains	(2,600)	
Transitional additional allowance deductible under section 1211(b)	1,000	

Because a component of the net long-term capital loss for 1970 is a $500 long-term capital loss carried to 1970 from 1969, the transitional additional allowance deductible under section 1211(b) and subparagraph (3) of this paragraph is the least of (i) taxable income of $13,925, (ii) $1,000, or (iii) the sum of the net short-term capital loss of $400, plus the net long-term capital loss for 1970 to the extent of the $500 long-term capital loss carried to 1970 from 1969, and one-half of the $2,000 balance of the net long-term capital loss. The entire $500 long-term capital loss carried to 1970 from 1969 is applicable in full to the transitional additional allowance because the net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for the taxable year (computed without regard to capital losses carried to the taxable year) consisted entirely of net short-term capital gain not in excess of the short-term capital loss carried to 1970 from 1969. The $1,000 transitional additional allowance, therefore, consists of the net short-term capital loss of $400, the $500 long-term capital loss carried to 1970 from 1969, plus one-half of enough of the balance of the 1970 net long-term capital loss ($200) to make up the $100 balance of the $1,000 transitional additional allowance. A long-term capital loss of $1,800 ($2,500 minus $700), all of which is attributable to 1970, is carried over under section 1212(b) to 1971. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for taxable years beginning in 1977 or thereafter, the transitional additional allowance would be $1,900. No amount would remain to be carried over to the succeeding taxable year.

Example 8. Assume the facts in Example (7) but assume that the individual with one exemption allowable as a deduction under section 151 is married and files a separate return for 1970. The maximum transitional additional allowance to which the individual would be entitled for 1970 pursuant to subparagraph (7)(ii) of this paragraph would be the sum of $500 plus (i) $2,400 of the short-term capital loss of $3,000 carried to 1970 from 1969 (the amount by which such carryover exceeds the $600 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) actually realized in 1970, all of which is net short-term capital gain) and (ii) the $500 long-term capital loss carried to 1970 from 1969. However, since this sum ($3,400) exceeds $1,000, the maximum transitional additional allowance to which the individual is entitled for 1970 is limited to $1,000. If for 1971, the same married individual had taxable income of $13,925 for purposes of section 1211(b) and no capital transactions, and filed a separate return, the additional allowance deductible under section 1211(b) for 1971 would be limited to $500 by reason of subdivision (i) of subparagraph (7) of this paragraph, since, as illustrated in Example 7, no part of the capital loss carried over to 1971 under section 1212 (b) is attributable to 1969. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions as in example (7) for a married individual filing a separate return for a taxable year beginning in 1977 or thereafter, the transitional additional allowance would be $1,900. No amount would remain to be carried over to the succeeding taxable year.

Example 9. B, an unmarried individual with one exemption allowable as a deduction under section 151, has the following transactions in 1971:

Taxable income exclusive of capital gains and losses		$10,000
Deductions provided by section 151		675
Taxable income for purposes of section 1211(b)		10,675
Long-term capital gain	$2,500	
Long-term capital loss treated under §1.1211–1 (b)(3)(iii) as carried over from 1969	(5,000)	
Net long-term capital loss	(2,500)	
Short-term capital gain	2,700	
Short-term capital loss carried to 1971 from 1970 under section 1212 (b)(1)	(1,000)	
Short-term capital loss treated under §1.1211–1 (b)(3)(iv) as carried over from 1969	($2,000)	
Net short-term capital loss	(300)	
Losses to extent of gain	(5,200)	
Transitional additional allowance deductible under section 1211(b)	1,000	

Because a component of the net long-term capital loss for 1971 is a long-term capital loss treated under subparagraph (3)(iii) of this paragraph as carried over from 1969, the rules for computation of the transitional additional allowance under subparagraph (3) (i) and (ii) of this paragraph apply. The *transitional net long-term capital loss component* for 1971 under subparagraph (3)(ii) of this paragraph is $1,800, that is, the amount by which the $5,000 long-term loss treated as carried over from 1969 to 1971 exceeds (a) the net long-term capital gain of $2,500 actually realized in 1971 plus (b) the $700 excess of the $2,700 net short-term capital gain actually realized in 1971 over the $2,000 short-term capital loss treated as carried over to 1971 from 1969. The transitional additional allowance for 1971 consists of the $300 net short-term capital loss plus $700 of the net long-term capital loss attributable to 1969. A net long-term capital loss of $1,800 ($2,500 minus $700) is carried over to 1972 under section 1212(b). Only $1,100 of the $1,800 will be treated in 1972 as carried over from 1969 since under subparagraph (3)(iii) of this paragraph the *transitional net long-term capital loss component* of $1,800 is reduced by the amount ($700) applied to the transitional additional allowance for 1971. Assuming the same taxable income for purposes of section 1211(b) (after reduction by the zero bracket amount) and the same transactions for a taxable year beginning in 1977, the transitional additional allowance would be $2,000. A net long-term capital loss of $800 would remain to be carried over. Of this amount $100 would be treated as carried over from 1969. Assuming the original facts for a taxable year beginning in 1978, the transitional additional allowance would be $2,450. No amount would remain to be carried over to the succeeding taxable year.

[T.D. 7301, 39 FR 964, Jan. 4, 1974; 39 FR 2758, Jan. 24, 1974, as amended by T.D. 7597, 44 FR 12419, Mar. 7, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.1212–1 Capital loss carryovers and carrybacks.

(a) *Corporations; other taxpayers for taxable years beginning before January 1, 1964*—(1) *Regular net capital loss sustained for taxable years beginning before January 1, 1970.* (i) A corporation sustaining a net capital loss for any taxable year beginning before January 1, 1970, and a taxpayer other than a corporation sustaining a net capital loss for any taxable year beginning before January 1, 1964, shall carry over such net loss to each of the 5 succeeding taxable years and treat it in each of such 5 succeeding taxable years as a short-term capital loss to the extent not allowed as a deduction against any net capital gains (capital gain net income for taxable years beginning after December 31, 1976) of any taxable years intervening between the taxable year in which the net capital loss was sustained and the taxable year to which carried. The carryover is thus applied in each succeeding taxable year to offset any net capital gain in such succeeding taxable year. The amount of the capital loss carryover may not be included in computing a new net capital loss of a taxable year which can be carried over to the next 5 succeeding taxable years. For purposes of this subparagraph, a net capital gain (capital gain net income for taxable years beginning after December 31, 1976) shall be computed without regard to capital loss carryovers or carrybacks. In the case of nonresident alien individuals, see section 871 for special rules on capital loss carryovers. For the rules applicable to the portion of a net capital loss of a corporation which is attributable to a foreign expropriation capital loss sustained in taxable years beginning after December 31, 1958, see subparagraph (2) of this paragraph. For the rules applicable to a taxpayer other than a corporation in the treatment of that amount of a net capital loss which may be carried over under section 1212 and this subparagraph as a short-term capital loss to the first taxable year beginning after December 31, 1963, see paragraph (b) of this section.

(ii) The practical operation of the provisions of this subparagraph may be illustrated by the following example:

Example: (a) For the taxable years 1952 to 1956, inclusive, an individual with one exemption allowable under section 151 (or corresponding provision of prior law) is assumed to have a net short-term capital loss, net short-term capital gain, net long-term capital loss, net long-term capital gain, and taxable income (net income for 1952 and 1953) as follows:

	1952	1953	1954	1955	1956
Carryover from prior years:					
From 1952		($50,000)	($29,500)	($29,500)	
From 1954				(19,500)	($13,000)
Net short-term loss (computed without regard to the carryovers)	($30,000)	(5,000)	(10,000)		
Net short-term gain (computed without regard to the carryovers)				40,000	
Net long-term loss	(20,500)		(10,000)	(5,000)	
Net long-term gain		25,000			15,000
Net income or taxable income, computed without regard to capital gains and losses, and, after 1953, without regard to the deduction provided by section 151	500	500	500	1,000	500
Net capital gain (capital gain net income for taxable years beginning after December 31, 1976) (computed without regard to the carryovers)		20,500		36,000	
Net capital loss	(50,000)		(19,500)		
Deduction allowable under section 1202					1,000
Taxable income (after deductions allowable under sections 151 and 1202)					900

(b) *Net capital loss of 1952.* The net capital loss is $50,000. This figure is the excess of the losses from sales or exchanges of capital assets over the sum of (1) gains (in this case, none) from sales or exchanges of capital assets, and (2) net income (computed without regard to capital gains and losses) of $500. This amount may be carried forward in full as a short-term loss to 1953. However, in 1953 there was a net capital gain (capital gain net income for taxable years beginning after December 31, 1976) of $20,500, as defined by section 117(a)(10)(B) of the Internal Revenue Code of 1939, and limited by section 117(e)(1) of the 1939 Code, against which this net capital loss of $50,000 is allowed in part. The remaining portion—$29,500—may be carried forward to 1954 and 1955 since there was no net capital gain (capital gain net income for taxable years beginning after December 31, 1976) in 1954. In 1955 this $29,500 is allowed in full against net capital gain of $36,000, as defined by paragraph (d) of § 1.1222–1 and limited by subdivision (i) of this subparagraph.

(c) *Net capital loss of 1954.* The net capital loss is $19,500. This figure is the excess of the losses from sales or exchanges of capital assets over the sum of (1) gains (in this case, none) from sales or exchanges of capital assets and (2) taxable income (computed without regard to capital gains and losses and the deductions provided in section 151) of

$500. This amount may be carried forward in full as a short-term loss to 1955. The net capital gain (capital gain net income for taxable years beginning after December 31, 1976) in 1955, before deduction of any carryovers, is $36,000. (See sections 1222(9)(B) and 1212 of the Internal Revenue Code of 1954, as it existed prior to the enactment of the Revenue Act of 1964.) The $29,500 balance of the 1952 loss is first applied against the $36,000, leaving a balance of $6,500. Against this amount the $19,500 loss arising in 1954 is applied, leaving a loss of $13,000, which may be carried forward to 1956. Since this amount is treated as a short-term capital loss in 1956 under subdivision (i) of this subparagraph, the excess of the net long-term capital gain over the net short-term capital loss is $2,000 ($15,000 minus $13,000). Half of this excess is allowable as a deduction under section 1202. Thus, after also deducting the exemption allowed as a deduction under section 151 ($600), the taxpayer has a taxable income of $900 ($2,500 minus $1,600) for 1956.

(2) *Corporations sustaining foreign expropriation capital losses for taxable years ending after December 31, 1958*—(i) *In general.* A corporation sustaining a net capital loss for any taxable year ending after December 31, 1958, any portion of which is attributable to a foreign expropriation capital loss, shall carry over such portion of the loss to each of the ten succeeding taxable years and treat it in each of such succeeding taxable years as a short-term capital loss to the extent and consistent with the manner provided in subparagraph (1) of this paragraph. For such purposes, the portion of any net capital loss for any taxable year which is attributable to a foreign expropriation capital loss is the amount, not in excess of the net capital loss for such year, of the foreign expropriation capital loss for such year. The portion of a net capital loss for any taxable year which is attributable to a foreign expropriation capital loss shall be treated as a separate net capital loss for that year and shall be applied, after first applying the remaining portion of such net capital loss, to offset any capital gain net income (net capital gain for taxable years beginning before January 1, 1977) in a succeeding taxable year. In applying net capital losses of two or more taxable years to offset the capital gain net income (net capital gain(s) for taxable years beginning before January 1, 1977) of a subsequent taxable year, such net capital losses shall be offset against such capital gain net income (net capital gain(s) for taxable years beginning before January 1, 1977) in the order of the taxable years in which the losses were sustained, beginning with the loss for the earliest preceding taxable year, even though one or more of such net capital losses are attributable in whole or in part to a foreign expropriation capital loss.

(ii) *Foreign expropriation capital loss defined.* For purposes of this subaparagraph the term *foreign expropriation capital loss* means, for any taxable year, the sum of the losses taken into account in computing the net capital loss for such year which are:

(*a*) Losses sustained directly by reason of the expropriation, intervention, seizure, or similar taking of property by the government of any foreign country, any political subdivision thereof, or any agency or instrumentality of the foregoing, or

(*b*) Losses (treated under section 165 (g)(1) as losses from the sale or exchange of capital assets) from securities which become worthless by reason of the expropriation, intervention, seizure, or similar taking of property by the government of any foreign country, any political subdivision thereof, or any agency or instrumentality of the foregoing.

(iii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. X, a domestic corporation which uses the calendar year as the taxable year, owns as a capital asset 75 percent of the outstanding stock of Y, a foreign corporation operating in a foreign country. In 1961, the foreign country seizes all of the assets of Y, rendering X's stock in Y worthless and thus causing X to sustain a $40,000 foreign expropriation capital loss for such year. In 1961, X has $30,000 of other losses from the sale or exchange of capital assets and $50,000 of gains from the sale or exchange of capital assets. X's net capital loss for 1961 is $20,000 ($70,000 − $50,000). Since the foreign expropriation capital loss exceeds this amount, the entire $20,000 is a foreign expropriation capital loss for 1961.

Example 2. Z, a domestic corporation which uses the calendar year as the taxable year, has a net capital loss of $50,000 for 1961, $30,000 of which is attributable to a foreign expropriation capital loss. Pursuant to the provisions of this paragraph, $30,000 of such net capital loss shall be carried over as a short-term capital loss to each of the 10 taxable years succeeding 1961, and the remaining $20,000 of the net capital loss shall be carried over as a short-term capital loss to each of the 5 taxable years succeeding 1961. Z has a $35,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) (determined without regard to any capital loss carryover) for 1962. In offsetting the $50,000 capital loss carryover from 1961 against the $35,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for 1962, the $30,000 portion of such carryover which is attributable to the foreign expropriation capital loss for 1961 is applied against the 1962 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) after applying the $20,000 remaining portion of the carryover. Thus, there is a capital loss carryover of $15,000 to 1963, all of which is attributable to the foreign expropriation capital loss for 1961. Z has a net capital loss for 1963 of $10,000, no portion of which is attributable to a foreign expropriation capital loss. For 1964, Z has a net capital gain (capital gain net income for taxable years beginning after December 31, 1976) of $22,000 (determined without regard to the capital loss carryovers from 1961 and 1963). In offsetting the capital loss carryovers from 1961 and 1963 against Z's $22,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for 1964, the $15,000 carryover from 1961 is applied against the 1964 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) before the $10,000 capital loss carryover from 1963 is applied against such gain. Thus, $3,000 of the 1963 net capital loss remains to be carried over to 1965.

(3) *Regular net capital loss sustained by a corporation for taxable years beginning after December 31, 1969*—(i) *General rule.* A corporation sustaining a net capital loss for any taxable year beginning after December 31, 1969 (hereinafter in this paragraph referred to as the *loss year*), shall:

(*a*) Carry back such net capital loss to each of the 3 taxable years preceding the loss year, but only to the extent that such net capital loss is not attributable to a foreign expropriation capital loss and the carryback of such net capital loss does not increase or produce a net operating loss (as defined in section 172(c)) for the taxable year to which it is carried back; and

(*b*) Carry over such net capital loss to each of the 5 taxable years succeeding the loss year,

and, subject to subdivision (ii) of this subparagraph, treat such net capital loss in each of such 3 preceding and 5 succeeding taxable years as a short-term capital loss.

(ii) *Amount treated as a short-term capital loss in each year.* The entire amount of the net capital loss for any loss year shall be carried to the earliest of the taxable years to which such net capital loss may be carried, and the portion of such net capital loss which shall be carried to each of the other taxable years to which such net capital loss may be carried shall be the excess, if any, of such net capital loss over the total of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (computed without regard to the capital loss carryback from the loss year or any taxable year thereafter) for each of the prior taxable years to which such net capital loss may be carried.

(iii) *Special rules. (a)* In the case of a net capital loss which is not a foreign expropriation capital loss and which cannot be carried back in full to a preceding taxable year by reason of section 1212(a)(1)(A)(ii) and subdivision (i)(*a*) of this subparagraph because such loss would produce or increase a net operating loss in such preceding taxable year, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such preceding taxable year shall in no case be treated as greater than the amount of such net capital loss which can be carried back to such preceding taxable year upon the application of section 1212(a)(1)(A)(ii) and subdivision (i)(*a*) of this subparagraph.

(*b*) For the rules applicable to the portion of a net capital loss of a corporation which is attributable to a foreign expropriation capital loss sustained in a taxable year beginning after December 31, 1958, see section 1212(a)(2) and subparagraph (2) of this paragraph.

(*c*) Section 1212(a)(1)(A) and subdivision (*i*)(*a*) of this subparagraph shall not apply to (and no carryback shall be allowed with respect to) the net capital loss of a corporation for any taxable year for which such corporation is an electing small business corporation under subchapter S. See § 1.1372–1.

(*d*) A net capital loss of a corporation for a year for which it is not an electing small business corporation under subchapter S shall not be carried back under section 1212(a)(1)(A) and subdivision (i)(*a*) of this subparagraph to a taxable year for which such corporation is an electing small business corporation. See section 1212(a)(3).

(*e*) A net capital loss of a corporation shall not be carried back under section 1212(a)(1)(A) and subdivision (i)(*a*) of this subparagraph to a taxable year for which the corporation was a foreign personal holding company, a regulated investment company, or a real estate investment trust, or for which an election made by the corporation under section 1247 is applicable. See section 1212(a)(4).

(*f*) A taxable year to which a net capital loss of a corporation cannot, by reason of (*d*) or (*e*) of this subdivision, be carried back under section 1212(a)(1)(A) and subdivision (i)(*a*) of this subparagraph shall nevertheless be treated as 1 of the 3 taxable years preceding the loss year for purposes of section 1212(a)(1)(A) and such subdivision (i)(*a*); but any capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such taxable year to which such net capital loss cannot be carried back shall be disregarded for purposes of subdivision (ii) of this subparagraph.

(*g*) A regulated investment company (as defined in section 851) sustaining a net capital loss shall carry over that loss to each of the 8 taxable years succeeding the loss year. However, the 8-year period prescribed in the preceding sentence shall be reduced (but not to less than 5 years) by the sum of (*1*) the number of taxable years to which the net capital loss must be carried back pursuant to subdivision (i)(*a*) of this subparagraph (as limited by subdivision (iii)(*e*) of this subparagraph) and (*2*) the number of taxable years, of the 8 taxable year succeeding the loss year, that the corporation failed to qualify as a regulated investment company as defined in section 851. This subdivision shall not extend the carryover period prescribed in subdivision (i)(*b*) of this subparagraph to a year in which a corporation is not a regulated investment company as defined in section 851.

(iv) The application of this subparagraph may be illustrated by the following examples, in each of which it is assumed that the corporation is not, and never has been, a corporation described in subdivision (iii) (*c*) or (*d*) of this subparagraph, that the corporation files its tax returns on a calendar year basis, and that no capital loss sustained is a foreign expropriation capital loss:

Example 1. A corporation has a net capital loss for 1970 which section 1212(a)(1)(A) permits to be carried back. The entire net capital loss for 1970 may be carried back to 1967, but only to the extent that a net operating loss for 1967 would not be produced or increased. The amount of the carryback to 1968 is the excess of the net capital loss for 1970 over the net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for 1967, computed without regard to a capital loss carryback from 1970 or any taxable year thereafter. The amount of the carryback to 1969 is the excess of the net capital loss for 1970 over the sum of the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) for 1967 and 1968, computed without regard to a capital loss carryback from 1970 or any taxable year thereafter. The amount of the carryover to 1971 is the excess of the net capital loss for 1970 over the sum of the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) for 1967, 1968, and 1969, computed without regard to a capital loss carryback from 1970 or any taxable year thereafter. Similarly, the amount of the carryover to 1972, 1973, 1974, and 1975, respectively, is the excess of the net capital loss for 1970 over the sum of the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) for taxable years prior to 1972, 1973, 1974, or 1975, as the case may be, to which the net capital loss for 1970 may be carried, computed without regard to a capital loss carryback from 1970 or any year thereafter.

Example 2. For the taxable years 1967 to 1975, inclusive, a corporation is assumed to have net capital loss, net capital gain (capital gain net income for taxable years beginning after December 31, 1976), and taxable income (computed without regard to capital gains and losses) as follows:

	1967	1968	1969	1970	1971	1972	1973	1974	1975
Taxable income (computed without regard to capital gains or losses)	$25,000	$25,000	$25,000	$25,000	$25,000	$25,000	$25,000	$25,000	$25,000
Net capital loss			(1,000)	(29,500)	(16,000)	(500)			
Net capital gain (capital gain net income for taxable years beginning after December 31, 1976) (computed without regard to carrybacks or carryovers)	14,000	16,000					8,000	7,500	6,500
Carryback or carryover:									
From 1969							(1,000)		
From 1970	(14,000)	(15,500)							
From 1971		(500)					(7,000)	(7,500)	(1,000)
From 1972									(500)

The net capital loss of 1969, under the rules of subparagraph (1) of this paragraph, may not be carried back. Thus, the net capital loss for 1970 is carried back and partially absorbed by the net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for 1967, and a portion of the net capital losses of both 1970 and 1971 are carried back to 1968. The net capital loss for 1969 is the oldest that may be carried to 1973, and thus, it is the first carried over and absorbed by the net capital gain for 1973. The net capital loss for 1972 (which is not carried back because of the net capital losses in the 3 years preceding 1972) may be carried over to 1973.

Example 3. For the taxable years 1967 to 1970, inclusive, a corporation which was organized on January 1, 1967, realized operating income and net capital gains (capital gain net income for taxable years beginning after December 31, 1976) and sustained operating losses and net capital losses as follows:

	Operating income or loss (exclusive of capital gain or loss)	Capital gain or loss
1967	$20,000	$24,000
1968	20,000	0
1969	20,000	0
1970	(25,000)	(20,000)

The net capital loss of $20,000 for 1970 is carried back to 1967 and applied against the $24,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) realized in that year, reducing such net capital gain (capital gain net income for taxable years beginning after December 31, 1976) to $4,000. The net operating loss of $25,000 for 1970 is then carried back to 1967 and applied first to eliminate the $20,000 of operating income for that year and then to eliminate the net capital gain (capital gain net income for taxable years beginning after December 31, 1976) for that year of $4,000 (as reduced by the 1970 capital loss carryback).

Example 4. Assume the same facts as in Example 3 but substitute the following figures:

	Operating income or loss (exclusive of capital gain or loss)	Capital gain or loss
1967	($20,000)	$24,000
1968	20,000	0
1969	20,000	0
1970	(25,000)	(20,000)

The net capital loss of $20,000 for 1970 is carried back to 1967 and applied against the $24,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) realized in that year only to the extent of $4,000, the maximum amount to which the 1970 capital loss carryback can be applied without producing a net operating loss for 1967. The unused $16,000 balance of the 1970 net long-term capital loss can be carried forward to 1971 and subsequent taxable years to the extent provided in subdivision (i)(*b*) of this subparagraph.

Example 5. Assume the same facts as in Example 3 but substitute the following figures:

	Operating income or loss (exclusive of capital gain or loss)	Capital gain or loss
1967	0	0
1968	($20,000)	0
1969	0	$24,000
1970	20,000	(24,000)

The net capital loss of $24,000 for 1970 is carried back to 1969 and applied against the $24,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) realized in that year to the extent of $24,000. The application of the capital loss carryback is not limited as it was in Example 4 because such carryback neither increases nor produces a net operating loss, as such, for 1969. The $20,000 net operating loss for 1968 is then carried forward to 1970 to eliminate the $20,000 of operating income for that year.

Example 6. Assume the same facts as in Example 3 but substitute the following figures:

	Operating income or loss (exclusive of capital gain or loss)	Capital gain or loss
1967	0	0
1968	0	0
1969	($20,000)	($24,000)
1970	20,000	20,000

The net capital loss of $24,000 for 1969 is carried forward to 1970 and applied against the $20,000 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) realized in that year. The unused $4,000 balance of the 1969 net capital loss can be carried forward to 1971 and subsequent taxable years to the extent provided in subdivision (i)(*b*) of this subparagraph.

(b) *Taxpayers other than corporations for taxable years beginning after December 31, 1963*—(1) *In general.* If a taxpayer other than a corporation sustains a net capital loss for any taxable year beginning after December 31, 1963, the portion thereof which is a short-term capital loss carryover shall be carried over to the succeeding taxable year and treated as a short-term capital loss sustained in such succeeding taxable year, and the portion thereof which constitutes a long-term capital loss carryover shall be carried over to the succeeding taxable year and treated as a long-term capital loss sustained in such succeeding taxable year. The carryovers are included in the succeeding taxable year in the determination of the amount of the short-term capital loss, the net short-term capital gain or loss, the long-term capital loss, and the net long-term capital gain or loss in such year, the net capital loss in such year, and the capital loss carryovers from such year. For purposes of this subparagraph:

(i) A short-term capital loss carryover is the excess of the net short-term capital loss for the taxable year over the net long-term capital gain for such year, and

(ii) A long-term capital loss carryover is the excess of the net long-term capital loss for the taxable year over the net short-term capital gain for such year.

(2) *Special rules for determining a net short-term capital gain or loss for purposes of carryover*—(i) *Taxable years beginning after December 31, 1963, and before January 1, 1970.* In determining a net short-term capital gain or loss of a taxable year beginning after December 31, 1963, and before January 1, 1970, for purposes of computing a short-term or long-term capital loss carryover to the succeeding taxable year, an amount equal to the additional allowance deductible under section 1211(b) for the taxable year (determined as provided in section 1211(b), as in effect for taxable years beginning before January 1, 1970, and §1.1211–1(b)(5)) is treated as a short-term capital gain occurring in such year.

(ii) *Taxable years beginning after December 31, 1969.* In determining a net short-term capital gain or loss of a taxable year beginning after December 31, 1969:

(*a*) For purposes of computing a short-term capital loss carryover to the succeeding taxable year, an amount equal to the additional allowance for the taxable year (determined as provided in section 1211(b) and §1.1211–1(b)(2)) is treated as a short-term capital gain occurring in such year, and

(*b*) For purposes of computing a long-term capital loss carryover to the succeeding taxable year, an amount equal to the sum of the additional allowance for the taxable year (determined as provided in section 1211(b) and §1.1211–1(b)(2)), plus the excess of such additional allowance over the net short-term capital loss (determined without regard to section 1212(b)(2) for such year) is treated as a short-term capital gain in such year.

The rules provided in this subdivision are for the purpose of taking into account the additional allowance deductible for the current taxable year under section 1211(b) and §1.1211–1(b)(2) in determining the amount and character of capital loss carryovers from the current taxable year to the succeeding taxable year. Their practical application to a determination of the amount and character of capital loss carryovers from the current taxable year to the succeeding taxable year involves identification of the net long-term and net short-term capital loss components of the additional allowance deductible in the current taxable year as provided by § 1.1211–1(b)(2)(iii). To the extent that the additional allowance is composed of net short-term capital losses, such losses are treated as a short-term capital gain in the current taxable year in determining the capital loss carryovers to the succeeding year. To the extent that the additional allowance is composed of net long-term capital losses applied pursuant to the provisions of § 1.1211–1(b)(2)(iii), an amount equal to twice the amount of such component of the additional allowance is treated as a short-term capital gain in the current taxable year. See paragraph (4) of this section for transitional rules if any part of the additional allowance is composed of net long-term capital losses carried to the current taxable year from a taxable year beginning before January 1, 1970.

(3) *Transitional rule for net capital losses sustained in a taxable year beginning before January 1, 1964.* A taxpayer other than a corporation sustaining a net capital loss for any taxable year beginning before January 1, 1964, shall treat as a short-term capital loss in the first taxable year beginning after December 31, 1963, any amount which would be treated as a short-term capital loss in such year under subchapter P of chapter 1 of the Code as in effect immediately before the enactment of the Revenue Act of 1964.

(4) *Transitional rule for net long-term capital losses sustained in a taxable year beginning before January 1, 1970.* In the case of a net long-term capital loss sustained by a taxpayer other than a corporation in a taxable year beginning prior to January 1, 1970 (referred to in this section as a *pre-1970 taxable year*) which is carried over and treated as a long-term capital loss in the first taxable year beginning after December 31, 1969 (referred to in this section as a *post-1969 taxable year*), the transitional additional allowance deductible under section 1211(b) for the taxable year shall be determined by application of section 1211(b) as in effect for pre-1970 taxable years and § 1.1211–1(b)(3), and the amount of such long-term capital loss carried over and treated as a long-term capital loss in the succeeding taxable year shall be determined by application of section 1212(b)(1) as in effect for pre-1970 taxable years and subparagraph (2)(i) of this paragraph (instead of under sections 1211(b) and 1212(b)(1) as in effect for post-1969 taxable years and § 1.1211–1(b)(2) and subparagraph (2)(ii) of this paragraph, respectively) but only to the extent that such pre-1970 long-term capital loss constitutes a *transitional net long-term capital loss component* (determined as provided in § 1.1211–1(b)(3)(ii)) in the taxable year to which such pre-1970 long-term capital loss is carried. Thus, for purposes of paragraph (2) of this section, to the extent that a component of the transitional additional allowance deductible for a post-1969 taxable year under section 1211(b) and § 1.1211–1(b)(3)(i) is a transitional net long-term capital loss component carried over to such post-1969 taxable year, such component shall be treated as a short-term capital gain in determining the amount and character of capital loss carryovers from such post-1969 taxable year to the succeeding taxable year. Such component shall be so treated as a short-term capital gain in full on a dollar-for-dollar basis and shall not be doubled for this purpose as is provided by subdivision (ii) of paragraph (2) of this section in the case of a component of the additional allowance made up of net long-term capital losses applied pursuant to the provisions of § 1.1211–1(b)(2)(iii). The transitional rule provided in this paragraph does not apply to a determination of the character of capital losses (as long-term or short-term) actually deductible for the current taxable year under section 1211(b) and § 1.1211–1(b).

(5) *Examples.* The application of this paragraph can be illustrated by the following examples:

Example 1. For the taxable year 1971, an unmarried individual has taxable income for purposes of section 1211(b) of $8,000, a long-term capital loss of $2,000, and no other capital gains or losses. $1,000 (one-half) of the net long-term capital loss is deductible in 1971 as the additional allowance deductible under section 1211(b). No amount of capital loss remains to be carried over to the succeeding taxable year.

Example 2. For the taxable year 1972, the same unmarried individual has taxable income for purposes of section 1211(b) of $8,000, a long-term capital loss of $3,000 and no other capital gains or losses. $1,500 (one-half of the excess net capital loss) is deductible in

1972, but limited to the $1,000 maximum additional allowance deductible under section 1211(b). By application of section 1212(b)(1), he will carry over to 1973 a long-term capital loss of $1,000 determined as follows:

Net long-term capital loss		($3,000)
Additional allowance deductible under section 1211(b)	$1,000	
Excess of additional allowance over net short-term capital loss (determined without regard to section 1212(b)(2)(B)(i))	1,000	
Total amount treated as short-term capital gain under 1212(b)(2)(B) for purposes of determining carryover		2,000
Long-term capital loss carryover to 1973		(1,000)

If, in 1973, he had taxable income for purposes of section 1211(b) of $8,000, but no capital gains or losses, $500 (one-half) of the net long-term capital loss carryover from 1972 would be deductible in 1973 as the additional allowance deductible under section 1211(b). No amount of capital loss would be carried over to 1974.

Example 3. For the taxable year 1971, an unmarried individual has taxable income for purposes of section 1211(b) of $9,000, a $500 short-term capital gain, a $700 short-term capital loss, a $1,000 long-term capital gain and a $1,700 long-term capital loss. He will offset $1,500 of capital losses against capital gains. The excess net capital loss of $900 is deductible in 1971 to the extent of a $550 additional allowance deductible under 1211(b) which is smaller than both $1,000 and taxable income for purposes of section 1211(b), determined as follows:

Losses allowed to the extent of gains	($1,500)
Amount allowed under section 1211(b)(1)(C):	
(i) Excess of net short-term capital loss over net long-term capital gain	(200)
(ii) One-half of the excess of net long-term capital loss over net short-term capital gain	(350)
Additional allowance deductible under section 1211(b)	550

The total amount treated as short-term capital gain under section 1212(b)(2)(B) for purposes of determining any carryover to the succeeding taxable year exceeds $900. No amount of net capital loss remains to be carried over to the succeeding taxable year.

Example 4. If in example (3) above, the long-term capital loss had been $2,800, the taxpayer would carry over $200 of long-term capital loss to 1972, determined as follows:

Losses allowed to extent of gains	($1,500)
Amount allowed under section 1211(b)(1) (B) and (C):	
(i) Excess of net short-term capital loss over net long-term capital gain	(200)
(ii) One-half the excess of net long-term capital loss over net short-term capital gain	(900)

as limited by 1211(b)(1)(B) to an additional allowance of $1,000.

Carryover under section 1212(b)(1):

Net long-term capital loss for 1971	($1,800)
Additional allowance under section 1211(b)(1)(B)	1,000
Excess of additional allowance deductible under section 1211(b) over net short-term capital loss determined without regard to section 1212(b)(2)(B)(i) ($1,000 less $200)	800
Total amount treated as short-term capital gain under section 1212(b)(2)(B) for purposes of determining carryover	1,800
Short-term capital gain for 1971	500
Total short-term capital gain	2,300
Short-term capital loss for 1971	(700)
Net short-term capital gain	1,600
Long-term capital loss carryover ($1,800 less $1,600)	200

Example 5. For 1969, an unmarried individual has taxable income for purposes of section 1211(b) of $8,000, a long-term capital loss of $3,000, and no other capital gains or losses. He is allowed to deduct in 1969 $1,000 as the additional allowance deductible under section 1211(b) (as in effect for pre-1970 taxable years) and to carry over to 1970, a long-term capital loss of $2,000 under section 1212(b) (as in effect for pre-1970 taxable years).

If, in 1970, the same unmarried individual with taxable income for purposes of section 1211(b) of $8,000, has no capital gains or losses, he would deduct $1,000 of his pre- 1970 capital loss carryover as the transitional additional allowance deductible under section 1211(b) (as in effect for pre-1970 years) and carry over under section 1212(b)(1) (as in effect for pre-1970 taxable years) to 1971 the remaining $1,000 as a pre-1970 long-term capital loss.

If, in 1970, the same individual instead has a long-term capital gain of $2,500, and a long-term capital loss of $1,500, he would net these two items with the $2,000 carried to 1970 as a long-term capital loss. Thus, he would have a net long-term capital loss for 1970 of $1,000 which is deductible in 1970 as the transitional additional allowance deductible under section 1211(b). He would have no amount to carry over under section 1212(b)(1) to 1971.

If, in 1970, the same individual instead has a long-term capital loss of $1,200, and a long-term capital gain of $200, resulting in a net long-term capital loss of $3,000 when netted with the $2,000 carried to 1970 as a long-term capital loss, he would deduct $1,000 in respect of his pre-1970 long-term capital loss carryover as the transitional additional allowance deductible under section 1211(b) (as in effect for pre-1970 taxable years) and carry over under section 1212(b)(1) (as in effect for pre-1970 taxable years) to 1971 the remaining $1,000 of the pre-1970 component of his long-term capital loss carryover, and the $1,000 net long-term capital loss actually sustained in 1970 as the second component of his long-term capital loss carryover.

Example 6. For 1970 a married individual filing a separate return has taxable income of $8,000, a long-term capital loss of $3,500 and a short-term capital gain of $3,000. He also has a pre-1970 short-term capital loss of $2,000 which is carried to 1970. The $3,000 short-term capital gain realized in 1970 would first be reduced by the $2,000 short-term capital loss carryover, and then the remaining $1,000 balance of the short-term capital gain would be offset against the $3,500 long-term capital loss, producing a net long-term capital loss of $2,500, no part of which is a net long-term capital loss carried over from 1969. However, under the special rule of § 1.1211–1(b)(7)(ii) in 1970, the taxpayer would deduct as the additional allowance deductible under section 1211(b), the $500 limitation in § 1.1211–1(b)(2)(ii) in the case of a married taxpayer filing a separate return in a taxable year ending after December 31, 1969, plus the *transitional net short-term capital loss component* of $2,000 computed under § 1.1211–1(b)(3)(iv), but limited to a total deduction of $1,000. The $1,000 additional allowance deductible under section 1211(b) would absorb $2,000 of the $2,500 net long-term capital loss, and he would carry the unused $500 balance of such loss to 1971 for use in that year.

Example 7. For 1970, an unmarried individual filing a separate return has taxable income for purposes of section 1211(b) of $8,000, and a long-term capital loss of $2,000. He also has a pre-1970 long-term capital loss of $2,500 which is carried to 1970. In 1970, the taxpayer would deduct as the transitional additional allowance deductible under section 1211(b) $1,000, absorbing $1,000 of the pre-1970 long-term capital loss of $2,500. He would carry to 1971 the unused $1,500 balance of his pre-1970 long-term capital loss plus the 1970 long-term capital loss of $2,000, or a total of $3,500, for use in 1971.

For 1971, the same taxpayer filing a separate return with taxable income for purposes of section 1211(b) of $8,000, has a $3,600 long-term capital gain and a $2,200 long-term capital loss. When these gains and losses are combined with the long-term capital loss carryover from 1970 of $3,500, a net long-term capital loss of $2,100 results. He would deduct $1,000 as the transitional additional allowance deductible under section 1211(b). The $1,000 additional allowance would absorb $100 of the unused pre-1970 long-term capital loss carryover of $1,500 plus $1,800 of the unused post-1969 long-term capital loss carryover of $2,100 (the amount of the 1971 net long-term capital loss necessary to make up the remaining $900 balance of the additional allowance). Although a component of the 1971 net long-term capital loss is the unused pre-1970 long-term capital loss carryover of $1,500, only $100 of this carryover is available for use in full on a dollar-for-dollar basis in computing the transitional additional allowance for 1971 since it only exceeds by that amount the $1,400 net capital gain (capital gain net income for taxable years beginning after December 31, 1976) actually realized in 1971 all of which is net long-term capital gain (long-term capital gain of $3,600 reduced by long-term capital loss of $2,200). See § 1.1221–1(b)(3)(ii). The taxpayer would carry over to 1972 as a long-term capital loss the remaining $200 of the 1971 long-term capital loss.

Example 8. For 1970, an unmarried individual has taxable income for purposes of section 1211(b) of $8,000 and a short-term capital loss of $700. He also has a pre-1970 long-term capital loss carryover of $1,200. He would deduct $1,000 as the transitional additional allowance deductible under section 1211(b). The $1,000 transitional additional allowance would be composed of the 1970 short-term capital loss of $700 and $300 of the pre-1970 long-term capital loss carryover. He would carry over to 1971 the unused $900 balance of his $1,200 pre-1970 long-term capital loss carryover for use in 1971.

(c) *Husband and wife.* (1) The following rules shall be applied in computing capital loss carryovers by husband and wife:

(i) If a husband and wife making a joint return for any taxable year made separate returns for the preceding year, any capital loss carryovers of each spouse from such preceding taxable year may be carried forward to the taxable year in accordance with paragraph (a) or (b) of this section.

(ii) If a joint return was made for the preceding taxable year, any capital loss carryover from such preceding taxable year may be carried forward to the taxable year in accordance with paragraph (a) or (b) of this section.

(iii) If a husband and wife make separate returns for the first taxable year beginning after December 31, 1963, or any prior taxable year, and they made a joint return for the preceding taxable year, any capital loss carryover from such preceding taxable year shall be allocated to the spouses on the basis of their individual net capital loss which gave rise to such capital loss carryover. The capital loss carryover so allocated to each spouse may be carried forward by such spouse to the taxable year in accordance with paragraph (a) or (b) of this section.

(iv) If a husband and wife making separate returns for any taxable year following the first taxable year beginning after December 31, 1963, made a joint return for the preceding taxable year, any long-term or short-term capital loss carryovers shall be allocated to the spouses on the basis of their individual net long-term and net short-term capital losses for the preceding taxable year which gave rise to such capital loss carryovers, and the portions of the long-term or short-term capital loss carryovers so allocated to each spouse may be carried forward by such spouse to the taxable year in accordance with paragraph (b) of this section.

(v) If separate returns are made both for the taxable year and the preceding taxable year, any capital loss carryover of each spouse may be carried forward by such spouse in accordance with paragraph (a) or (b) of this section.

(2) The provisions of subparagraph (1) (i), (iii), and (iv) of this paragraph may be illustrated by the following examples:

Example 1. If H and W, husband and wife, make a joint return for 1955, having made separate returns for 1954 in which H had a net capital loss of $3,000 and W had a net capital loss of $2,000, in their joint return for 1955 they would have a short-term capital loss of $5,000 (the sum of their separate capital loss carryovers from 1954), allowable in accordance with paragraph (a) of this section. If, on the other hand, they make separate returns in 1955 following a joint return in 1954 in which their net capital loss was $5,000 allocable $3,000 to H and $2,000 to W, the carryover of H as a short-term capital loss for the purpose of his 1955 separate return would be $3,000 and that of W for her separate return would be $2,000, each allowable in accordance with paragraph (a) of this section.

Example 2. H and W, husband and wife, make separate returns for 1966 following a joint return for 1965. The capital gains and losses incurred by H and W in 1965, including those carried over by them to 1965, were as follows:

	H	W
Long-term capital gains	$8,000	$9,000
Long-term capital losses	(15,000)	(6,000)
Short-term capital gains	10,000	4,000
Short-term capital losses	(19,000)	(5,000)

Thus, in 1965 H and W had a net capital loss of $14,000 on their joint return. Of this amount, $4,000 was a long-term capital loss carryover, and $10,000 was a short-term capital loss carryover, determined in accordance paragraph (b) of this section. H's net long-term capital loss was $7,000 for 1965. This amount was offset on the joint return by W's net long-term capital gain of $3,000. Thus, H may carry over to his separate return for 1966, a long-term capital loss carryover of $4,000. H and W may carry over to their separate returns for 1966, as short-term capital loss carryovers, the amounts of their respective net short-term losses from 1965, $9,000 and $1,000.

[T.D. 6828, 30 FR 7806, June 17, 1965, as amended by T.D. 6867, 30 FR 15095, Dec. 7, 1965; T.D. 7301, 39 FR 968, Jan. 4, 1974; 39 FR 2758, Jan. 24, 1974; T.D. 7659, 44 FR 73019, Dec. 17, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

General Rules for Determining Capital Gains and Losses

§ 1.1221–1 Meaning of terms.

(a) The term *capital assets* includes all classes of property not specifically excluded by section 1221. In determining whether property is a *capital asset,* the period for which held is immaterial.

(b) Property used in the trade or business of a taxpayer of a character which is subject to the allowance for depreciation provided in section 167 and real property used in the trade or business of a taxpayer is excluded from the term *capital assets.* Gains and losses from the sale or exchange of such property are not treated as gains and losses from the sale or exchange of capital assets, except to the extent provided in section 1231. See § 1.1231–1. Property held for the production of income, but not used in a trade or business of the taxpayer, is not excluded from the term *capital assets* even though depreciation may have been allowed with respect to such property under section 23(l) of the Internal Revenue Code of 1939 before its amendment by section 121(c) of the Revenue Act of 1942 (56 Stat. 819). However, gain or loss upon the sale or exchange of land held by a taxpayer primarily for sale to customers in the ordinary course of his business, as in the case of a dealer in real estate, is not subject to the provisions of subchapter P (section 1201 and following), chapter 1 of the Code.

(c)(1) A copyright, a literary, musical, or artistic composition, and similar property are excluded from the term *capital assets* if held by a taxpayer whose personal efforts created such property, or if held by a taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or in part by reference to the basis of such property in the hands of a taxpayer whose personal efforts created such property. For purposes of this subparagraph, the phrase *similar property* includes for example, such property as a theatrical production, a radio program, a newspaper cartoon strip, or any other property eligible for copyright protection (whether under statute or common law), but does not include a patent or an invention, or a design which may be protected only under the patent law and not under the copyright law.

(2) In the case of sales and other dispositions occurring after July 25, 1969, a letter, a memorandum, or similar property is excluded from the term *capital asset* if held by (i) a taxpayer whose personal efforts created such property, (ii) a taxpayer for whom such property was prepared or produced, or (iii) a taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or in part by reference to the basis of such property in the hands of a taxpayer described in subdivision (i) or (ii) of this subparagraph. In the case of a collection of letters, memorandums, or similar property held by a person who is a taxpayer described in subdivision (i), (ii), or (iii) of this subparagraph as to some of such letters, memorandums, or similar property but not as to others, this subparagraph shall apply only to those letters, memorandums, or similar property as to which such person is a taxpayer described in such subdivision. For purposes of this subparagraph, the phrase *similar property* includes, for example, such property as a draft of a speech, a manuscript, a research paper, an oral recording of any type, a transcript of an oral recording, a transcript of an oral interview or of dictation, a personal or business diary, a log or journal, a corporate archive, including a corporate charter, office correspondence, a financial record, a drawing, a photograph, or a dispatch. A letter, memorandum, or property similar to a letter or memorandum, addressed to a taxpayer shall be considered as prepared or produced for him. This subparagraph does not apply to property, such as a corporate archive, office correspondence, or a financial record, sold or disposed of as part of a going business if such property has no significant value separate and apart from its relation to and use in such business; it also does not apply to any property to which subparagraph (1) of this paragraph applies (i.e., property to which section 1221(3) applied before its amendment by section 514(a) of the Tax Reform Act of 1969 (83 Stat. 643)).

(3) For purposes of this paragraph, in general, property is created in whole or in part by the personal efforts of a taxpayer if such taxpayer performs literary, theatrical, musical, artistic, or other creative or productive work which affirmatively contributes to the creation of the property, or if such taxpayer directs and guides others in the performance of such work. A taxpayer, such as corporate executive, who merely has administrative control of writers, actors, artists, or personnel and who does not substantially engage in the direction and guidance of such persons in the performance of their work, does not create property by his personal efforts. However, for purposes of subparagraph (2) of this paragraph, a letter or memorandum, or property similar to a letter or memorandum, which is prepared by personnel who are under the administrative control of a taxpayer, such as a corporate executive, shall be deemed to have been prepared or produced for him whether or not such letter, memorandum, or similar property is reviewed by him.

(4) For the application of section 1231 to the sale or exchange of property to which this paragraph applies, see § 1.1231–1. For the application of section 170 to the charitable contribution of property to which this paragraph applies, see section 170(e) and the regulations thereunder.

(d) Section 1221(4) excludes from the definition of *capital asset* accounts or notes receivable acquired in the ordinary course of trade or business for services rendered or from the sale of stock in trade or inventory or property held for sale to customers in the ordinary course of trade or business. Thus, if a taxpayer acquires a note receivable for services rendered, reports the fair market value of the note as income, and later sells the note for less than the amount previously reported, the loss is an ordinary loss. On the other hand, if the taxpayer later sells the note for more than the amount originally reported, the excess is treated as ordinary income.

(e) Obligations of the United States or any of its possessions, or of a State or Territory, or any political subdivision thereof, or of the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, are excluded from the term *capital assets.* An obligation may be issued on a discount basis even though the price paid exceeds the face amount. Thus, although the Second Liberty Bond Act (31 U.S.C. 754) provides that United States Treasury bills shall be issued on a discount basis, the issuing price paid for a particular bill may, by reason of competitive bidding, actually exceed the face amount of the bill. Since the obligations of the type described in this paragraph are excluded from the term *capital assets,* gains or losses from the sale or exchange of such obligations are not subject to the limitations provided in such subchapter P. It is, therefore, not necessary for a taxpayer (other than a life insurance company taxable under part I (section 801 and following), subchapter L, chapter 1 of the Code, as amended by the Life Insurance Company Tax Act of 1955 (70 Stat. 36), and, in the case of taxable years beginning before January 1, 1955, subject to taxation only on interest, dividends, and rents) to segregate the original discount accrued and the gain or loss realized upon the sale or other disposition of any such obligation. See section 454(b) with respect to the original discount accrued. The provisions of this paragraph may be illustrated by the following examples:

Example 1. A (not a life insurance company) buys a $100,000, 90-day Treasury bill upon issuance for $99,998. As of the close of the forty-fifth day of the life of such bill, he sells it to B (not a life insurance company) for $99,999.50. The entire net gain to A of $1.50 may be taken into account as a single item of income, without allocating $1 to interest and $0.50 to gain. If B holds the bill until maturity his net gain of $0.50 may similarly be taken into account as a single item of income, without allocating $1 to interest and $0.50 to loss.

Example 2. The facts in this example are the same as in example (1) except that the selling price to B is $99,998.50. The net gain to A of $0.50 may be taken into account without allocating $1 to interest and $0.50 to loss, and, similarly, if B holds the bill until maturity his entire net gain of $1.50 may be taken into account as a single item of income without allocating $1 to interest and $0.50 to gain.

[T.D. 6500, 25 FR 12003, Nov. 26, 1960, as amended by T.D. 7369, 40 FR 29840, July 16, 1975]

§1.1221–2 Hedging transactions.

(a) *Treatment of hedging transactions*—(1) *In general.* This section governs the treatment of hedging transactions under section 1221. Except as provided in paragraph (f)(2) of this section (and notwithstanding the provisions of §1.1221–1(a)), the term capital asset does not include property that is part of a hedging transaction (as defined in paragraph (b) of this section).

(2) *Short sales and options.* This section also governs the character of gain or loss from a short sale or option that is part of a hedging transaction. See §§1.1233–2 and 1.1234–4. Except as provided in paragraph (f)(2) of this section, gain or loss on a short sale or option that is part of a hedging transaction (as defined in paragraph (b) of this section) is ordinary income or loss.

(3) *Exclusivity.* If a transaction is not a hedging transaction as defined in paragraph (b) of this section, gain or loss from the transaction is not made ordinary on the grounds that property involved in the transaction is a surrogate for a noncapital asset, that the transaction serves as insurance against a business risk, that the transaction serves a hedging function, or that the transaction serves a similar function or purpose.

(4) *Coordination with other sections*—(i) *Section 988.* This section does not apply

to determine the character of gain or loss realized on a section 988 transaction as defined in section 988(c)(1) or realized with respect to a qualified fund as defined in section 988(c)(1)(E)(iii). This section does apply, however, to transactions or payments that would be subject to section 988 but for the date that the transactions were entered into or the date that the payments were made.

(ii) *Sections 864(e) and 954(c).* Except as otherwise provided in regulations issued pursuant to sections 864(e) and 954(c), the definition of hedging transaction in paragraph (b) of this section does not apply for purposes of section 864(e) and 954(c).

(b) *Hedging transaction defined.* A hedging transaction is a transaction that a taxpayer enters into in the normal course of the taxpayer's trade or business primarily—

(1) To reduce risk of price changes or currency fluctuations with respect to ordinary property (as defined in paragraph (c)(5) of this section) that is held or to be held by the taxpayer; or

(2) To reduce risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or ordinary obligations incurred or to be incurred, by the taxpayer.

(c) *Rules of application.* The rules of this paragraph (c) apply for purposes of the definition of the term hedging transaction in paragraph (b) of this section. These rules must be interpreted reasonably and consistently with the purposes of this section. Where no specific rules of application control, the definition of hedging transaction must be interpreted reasonably and consistently with the purposes of this section.

(1) *Reducing risk*—(i) *Transactions that reduce risk.* Whether a transaction reduces a taxpayer's risk is determined based on all of the facts and circumstances surrounding the taxpayer's business and the transaction. In general, a taxpayer's hedging strategies and policies as reflected in the taxpayer's minutes or other records are evidence of whether particular transactions reduce the taxpayer's risk.

(ii) *Micro and macro hedges*—(A) *In general.* A taxpayer has risk of a particular type only if it is at risk when all of its operations are considered. Nonetheless, a hedge of a particular asset or liability generally will be respected as reducing risk if it reduces the risk attributable to the asset or liability and if it is reasonably expected to reduce the overall risk of the taxpayer's operations. If a taxpayer hedges particular assets or liabilities, or groups of assets or liabilities, and the hedges are undertaken as part of a program that, as a whole, is reasonably expected to reduce the overall risk of the taxpayer's operations, the taxpayer generally does not have to demonstrate that each hedge that was entered into pursuant to the program reduces its overall risk.

(B) *Fixed-to-floating hedges.* Under the principles of paragraph (c)(1)(ii)(A) of this section, a transaction that economically converts an interest rate or price from a fixed price or rate to a floating price or rate may reduce risk. For example, if a taxpayer's income varies with interest rates, the taxpayer may be at risk if it has a fixed rate liability. Similarly, a taxpayer with a fixed cost for its inventory may be at risk if the price at which the inventory can be sold varies with a particular factor. Thus, a transaction that converts an interest rate or price from fixed to floating may be a hedging transaction.

(iii) *Written options.* A written option may reduce risk. For example, in appropriate circumstances, a written call option with respect to assets held by a taxpayer or a written put option with respect to assets to be acquired by a taxpayer may be a hedging transaction. See also paragraph (c)(1)(v) of this section.

(iv) *Extent of risk reduction.* A taxpayer may hedge all or any portion of its risk for all or any part of the period during which it is exposed to the risk.

(v) *Transactions that counteract hedging transactions.* If a transaction is entered into primarily to counteract all or any part of the risk reduction effected by one or more hedging transactions, the transaction is a hedging transaction. For example, if a written option is used to reduce or eliminate the risk reduction obtained from another position such as a purchased option, then it may be part of a hedging transaction.

(vi) *Number of transactions.* The fact that a taxpayer frequently enters into and terminates positions (even if done on a daily or more frequent basis) is not relevant to whether these transactions are hedging transactions. Thus, for example, a taxpayer hedging the risk associated with an asset or liability may frequently establish and terminate positions that hedge that risk, depending on the extent the taxpayer wishes to be hedged. Similarly, if a taxpayer maintains its level of risk exposure by entering into and terminating a large number of transactions in a single day, its transactions may nonetheless qualify as hedging transactions.

(vii) *Transactions that do not reduce risk.* A transaction that is not entered into to reduce a taxpayer's risk is not a hedging transaction. For example, assume that a taxpayer produces a commodity for sale, sells the commodity, and enters into a long futures or forward contract in that commodity in the hope that the price will increase. Because the long position does not reduce risk, the transaction is not a hedging transaction. Moreover, gain or loss on the contract is not made ordinary on the grounds that it is a surrogate for inventory. See paragraph (a)(3) of this section.

(2) *Entering into a hedging transaction.* A taxpayer may enter into a hedging transaction by using a position that was a hedge of one asset or liability to hedge another asset or liability (recycling).

(3) *No investments as hedging transactions.* If an asset (such as an investment) is not acquired primarily to reduce risk, the purchase or sale of that asset is not a hedging transaction even if the terms of the asset limit or reduce the taxpayer's risk with respect to other assets or liabilities. For example, a taxpayer's interest rate risk from a floating rate borrowing may be reduced by the purchase of debt instruments that bear a comparable floating rate. The acquisition of the debt instruments, however, is not a hedging transaction because the transaction is not entered into primarily to reduce the taxpayer's risk. Similarly, borrowings generally are not made primarily to reduce risk.

(4) *Normal course.* Solely for purposes of paragraph (b) of this section, if a transaction is entered into in furtherance of a taxpayer's trade or business, the transaction is entered into in the normal course of the taxpayer's trade or business. This rule applies even if the risk to be reduced relates to the expansion of an existing business or the acquisition of a new trade or business.

(5) *Ordinary property and obligations*—(i) *In general.* Except as provided in paragraph (g)(3) of this section (which contains transition rules), property is ordinary property to a taxpayer only if a sale or exchange of the property by the taxpayer could not produce capital gain or loss regardless of the taxpayer's holding period when the sale or exchange occurs. Thus, for example, property used in a trade or business within the meaning of section 1231(b) (determined without regard to the holding period specified in that section) is not ordinary property. An obligation is an ordinary obligation if performance or termination of the obligation by the taxpayer could not produce capital gain or loss. For purposes of the preceding sentence, termination has the same meaning as in section 1234A.

(ii) *Hedges of noninventory supplies.* Notwithstanding paragraph (c)(5)(i) of this section, if a taxpayer sells only a negligible amount of a noninventory supply, then, only for purposes of determining whether a transaction to hedge the purchase of that noninventory supply is a hedging transaction, the supply is treated as ordinary property. A noninventory supply is a supply that a taxpayer purchases for consumption in its trade or business and that is not an asset described in sections 1221 (1) through (5).

(6) *Borrowings.* Whether hedges of a taxpayer's debt issuances (borrowings) are hedging transactions is determined without regard to the use of the proceeds of the borrowing.

(7) *Hedging an aggregate risk.* The term hedging transaction includes a transaction that reduces an aggregate risk of interest rate changes, price changes, and/or currency fluctuations only if all of the risk, or all but a de

minimis amount of the risk, is with respect to ordinary property, ordinary obligations, and borrowings.

(d) *Hedging by members of a consolidated group*—(1) *General rule: single-entity approach.* For purposes of this section, the risk of one member of a consolidated group is treated as the risk of the other members as if all of the members of the group were divisions of a single corporation. For example, if any member of a consolidated group hedges the risk of another member of the group by entering into a transaction with a third party, that transaction may potentially qualify as a hedging transaction. Conversely, intercompany transactions are not hedging transactions because, when considered as transactions between divisions of a single corporation, they do not reduce the risk of that single corporation.

(2) *Separate-entity election.* In lieu of the single-entity approach specified in paragraph (d)(1) of this section, a consolidated group may elect separate-entity treatment of its hedging transactions. If a group makes this separate-entity election, the following rules apply.

(i) *Risk of one member not risk of other members.* Notwithstanding paragraph (d)(1) of this section, the risk of one member is not treated as the risk of other members.

(ii) *Intercompany transactions.* An intercompany transaction is a hedging transaction (an intercompany hedging transaction) with respect to a member of a consolidated group if and only if it meets the following requirements—

(A) The position of the member in the intercompany transaction would qualify as a hedging transaction with respect to the member (taking into account paragraph (d)(2)(i) of this section) if the member had entered into the transaction with an unrelated party; and

(B) The position of the other member (the marking member) in the transaction is marked to market under the marking member's method of accounting.

(iii) *Treatment of intercompany hedging transactions.* An intercompany hedging transaction (that is, a transaction that meets the requirements of paragraphs (d)(2)(ii) (A) and (B) of this section) is subject to the following rules—

(A) The character and timing rules of §1.1502–13 do not apply to the income, deduction, gain, or loss from the intercompany hedging transaction; and

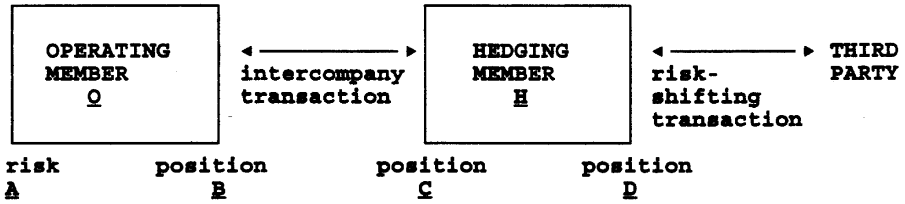
(B) Except as provided in paragraph (f)(3) of this section, the character of the marking member's gain or loss from the transaction is ordinary.

(iv) *Making and revoking the election.* Unless the Commissioner otherwise prescribes, the election described in this paragraph (d)(2) must be made in a separate statement saying ''[Insert Name and Employer Identification Number of Common Parent] HEREBY ELECTS THE APPLICATION OF SECTION 1.1221–2(d)(2) (THE SEPARATE-ENTITY APPROACH).'' The statement must also indicate the date as of which the election is to be effective. The election must be signed by the common parent and filed with the group's Federal income tax return for the taxable year that includes the first date for which the election is to apply. The election applies to all transactions entered into on or after the date so indicated. The election may be revoked only with the consent of the Commissioner.

(3) *Definitions.* For definitions of consolidated group, divisions of a single corporation, group, intercompany transactions, and member, see section 1502 and the regulations thereunder.

(4) *Examples.* The following examples illustrate this paragraph (d):

General Facts. In these examples, O and H are members of the same consolidated group. O's business operations give rise to interest rate risk ''A,'' which O wishes to hedge. O enters into an intercompany transaction with H that transfers the risk to H. O's position in the intercompany transaction is ''B,'' and H's position in the transaction is ''C.'' H enters into position ''D'' with a third party to reduce the interest rate risk it has with respect to its position C. D would be a hedging transaction with respect to risk A if O's risk A were H's risk.



Example 1. Single-entity treatment—(i) *General rule.* Under paragraph (d)(1) of this section, O's risk A is treated as H's risk, and therefore D is a hedging transaction with respect to risk A. Thus, the character of D is determined under the rules of this section, and the income, deduction, gain, or loss from D must be accounted for under a method of accounting that satisfies §1.446–4. The intercompany transaction B–C is not a hedging transaction and is taken into account under §1.1502–13.

(ii) *Identification.* D must be identified as a hedging transaction under paragraph (e)(1) of this section, and A must be identified as the hedged item under paragraph (e)(2) of this section. Under paragraph (e)(5) of this section, the identification of A as the hedged item can be accomplished by identifying the positions in the intercompany transaction as hedges or hedged items, as appropriate. Thus, substantially contemporaneous with entering into D, H may identify C as the hedged item and O may identify B as a hedge and A as the hedged item.

Example 2. Separate-entity election; counterparty that does not mark to market. In addition to the *General Facts* stated above, assume that the group makes a separate-entity election under paragraph (d)(2) of this section. If H does not mark C to market under its method of accounting, then B is not a hedging transaction, and the B–C intercompany transaction is taken into account under the rules of section 1502. D is not a hedging transaction with respect to A, but D may be a hedging transaction with respect to C if C is ordinary property or an ordinary obligation and if the other requirements of paragraph (b) of this section are met. If D is not part of a hedging transaction, then D may be part of a straddle for purposes of section 1092.

Example 3. Separate-entity election; counterparty that marks to market. The facts are the same as in *Example 2* above, except that H marks C to market under its method of accounting. Also assume that B would be a hedging transaction with respect to risk A if O had entered into that transaction with an unrelated party. Thus, for O, the B–C transaction is an intercompany hedging transaction with respect to O's risk A, the character and timing rules of §1.1502–13 do not apply to the B–C transaction, and H's income, deduction, gain, or loss from C is ordinary. However, other attributes of the items from the B–C transaction are determined under §1.1502–13. D is a hedging transaction with respect to C if it meets the requirements of paragraph (b) of this section.

(e) *Identification and recordkeeping*—(1) *Same-day identification of hedging transactions.* A taxpayer that enters into a hedging transaction (including recycling an existing hedge) must identify it as a hedging transaction. This identification must be made before the close of the day on which the taxpayer enters into the transaction.

(2) *Substantially contemporaneous identification of hedged item*—(i) *Content of the identification.* A taxpayer that enters into a hedging transaction must identify the item, items, or aggregate risk being hedged. Identification of an item being hedged generally involves identifying a transaction that creates risk, and the type of risk that the transaction creates. For example, if a taxpayer is hedging the price risk with respect to its June purchases of corn inventory, the transaction being hedged is the June purchase of corn and the risk is price movements in the market where the taxpayer buys its corn. For additional rules concerning the content of this identification, see paragraph (e)(3) of this section.

(ii) *Timing of the identification.* The identification required by this paragraph (e)(2) must be made substantially contemporaneously with entering into the hedging transaction. An identification is not substantially contemporaneous if it is made more than 35 days after entering into the hedging transaction.

(3) *Identification requirements for certain hedging transactions.* In the case of the hedging transactions described in this paragraph (e)(3), the identification

under paragraph (e)(2) of this section must include the information specified.

(i) *Anticipatory asset hedges.* If the hedging transaction relates to the anticipated acquisition of assets by the taxpayer, the identification must include the expected date or dates of acquisition and the amounts expected to be acquired.

(ii) *Inventory hedges.* If the hedging transaction relates to the purchase or sale of inventory by the taxpayer, the identification is made by specifying the type or class of inventory to which the transaction relates. If the hedging transaction relates to specific purchases or sales, the identification must also include the expected dates of the purchases or sales and the amounts to be purchased or sold.

(iii) *Hedges of debt of the taxpayer*—(A) *Existing debt.* If the hedging transaction relates to accruals or payments under an issue of existing debt of the taxpayer, the identification must specify the issue and, if the hedge is for less than the full adjusted issue price or the full term of the debt, the amount and the term covered by the hedge.

(B) *Debt to be issued.* If the hedging transaction relates to the expected issuance of debt by the taxpayer or to accruals or payments under debt that is expected to be issued by the taxpayer, the identification must specify the following information: the expected date of issuance of the debt; the expected maturity or maturities; the total expected issue price of the issue; and the expected interest provisions. If the hedge is for less than the entire expected issue price of the debt or the full expected term of the debt, the identification must also include the amount or the term being hedged. The identification may indicate a range of dates, terms, and amounts, rather than specific dates, terms, or amounts. For example, a taxpayer might identify a transaction as hedging the yield on an anticipated issuance of fixed rate debt during the second half of its fiscal year, with the anticipated amount of the debt between $75 million and $125 million, and an anticipated term of approximately 20 to 30 years.

(iv) *Hedges of aggregate risk*—(A) *Required identification.* If a transaction hedges aggregate risk as described in paragraph (c)(7) of this section, the identification under paragraph (e)(2) of this section must include a description of the risk being hedged and of the hedging program under which the hedging transaction was entered. This requirement may be met by placing in the taxpayer's records a description of the hedging program and by establishing a system under which individual transactions are identified as being entered into pursuant to the program.

(B) *Description of hedging program.* A description of a hedging program must include an identification of the type of risk being hedged, a description of the type of items giving rise to the risk being aggregated, and sufficient additional information to demonstrate that the program is designed to reduce aggregate risk of the type identified. If the program contains controls on speculation (for example, position limits), the description of the hedging program must also explain how the controls are established, communicated, and implemented.

(4) *Manner of identification and records to be retained*—(i) *Inclusion of identification in tax records.* The identification required by this paragraph (e) must be made on, and retained as part of, the taxpayer's books and records.

(ii) *Presence or absence of identification must be unambiguous.* The presence or absence of an identification for purposes of this paragraph (e) must be unambiguous. The identification of a hedging transaction for financial accounting or regulatory purposes does not satisfy this requirement unless the taxpayer's books and records indicate that the identification is also being made for tax purposes. The taxpayer may indicate that individual hedging transactions, or a class or classes of hedging transactions, that are identified for financial accounting or regulatory purposes are also being identified as hedging transactions for purposes of this section.

(iii) *Manner of identification.* The taxpayer may separately and explicitly make each identification, or, so long as paragraph (e)(4)(ii) of this section is satisfied, the taxpayer may establish a system pursuant to which the identification is indicated by the type of transaction or by the manner in which the transaction is consummated or recorded. An identification under this system is made at the later of the time that the system is established or the time that the transaction satisfies the terms of the system by being entered, or by being consummated or recorded, in the designated fashion.

(iv) *Examples.* The following examples illustrate the principles of paragraph (e)(4)(iii) of this section and assume that the other requirements of paragraph (e) of this section are satisfied.

(A) A taxpayer can make an identification by designating a hedging transaction for (or placing it in) an account that has been identified as containing only hedges of a specified item (or of specified items or specified aggregate risk).

(B) A taxpayer can make an identification by including and retaining in its books and records a statement that designates all future transactions in a specified derivative product as hedges of a specified item, items, or aggregate risk.

(C) A taxpayer can make an identification by placing a designated mark on a record of the transaction (for example, trading ticket, purchase order, or trade confirmation) or by using a designated form or a record that contains a designated legend.

(5) *Identification of hedges involving members of a consolidated group*—(i) *General rule: single-entity approach.* A member of a consolidated group must satisfy the requirements of this paragraph (e) as if all of the members of the group were divisions of a single corporation. Thus, the member entering into the hedging transaction with a third party must identify the hedging transaction under paragraph (e)(1) of this section. Under paragraph (e)(2) of this section, that member must also identify the item, items, or aggregate risk that is being hedged, even if the item, items, or aggregate risk relates primarily or entirely to other members of the group. If the members of a group use intercompany transactions to transfer risk within the group, the requirements of paragraph (e)(2) of this section may be met by identifying the intercompany transactions, and the risks hedged by the intercompany transactions, as hedges or hedged items, as appropriate. Because identification of the intercompany transaction as a hedge serves solely to identify the hedged item, the identification is timely if made within the period required by paragraph (e)(2) of this section. For example, if a member transfers risk in an intercompany transaction, it may identify under the rules of this paragraph (e) both its position in that transaction and the item, items, or aggregate risk being hedged. The member that hedges the risk outside the group may identify under the rules of this paragraph (e) both its position with the third party and its position in the intercompany transaction. Paragraph (d)(4) *Example 1* of this section illustrates this identification.

(ii) *Rule for consolidated groups making the separate-entity election.* If a consolidated group makes the separate-entity election under paragraph (d)(2) of this section, each member of the group must satisfy the requirements of this paragraph (e) as though it were not a member of a consolidated group.

(6) *Consistency with section 1256(e)(2)(C).* Any identification for purposes of section 1256(e)(2)(C) is also an identification for purposes of paragraph (e)(1) of this section.

(f) *Effect of identification and non-identification*—(1) *Transactions identified*—(i) *In general.* If a taxpayer identifies a transaction as a hedging transaction for purposes of paragraph (e)(1) of this section, the identification is binding with respect to gain, whether or not all of the requirements of paragraph (e) of this section are satisfied. Thus, gain from that transaction is ordinary income. If the transaction is not in fact a hedging transaction described in paragraph (b) of this section, however, paragraphs (a)(1) and (a)(2) of this section do not apply and the character of loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose. Thus, the taxpayer's identification of the transaction as a hedging transaction does not itself make loss from the transaction ordinary.

(ii) *Inadvertent identification.* Notwithstanding paragraph (f)(1)(i) of this section, if the taxpayer identifies a transaction as a hedging transaction for purposes of paragraph (e) of this section, the character of the gain is determined as if the transaction had not been identified as a hedging transaction if—

(A) The transaction is not a hedging transaction (as defined in paragraph (b) of this section);

(B) The identification of the transaction as a hedging transaction was due to inadvertent error; and

(C) All of the taxpayer's transactions in all open years are being treated on either original or, if necessary, amended returns in a manner consistent with the principles of this section.

(2) *Transactions not identified*—(i) *In general.* Except as provided in paragraphs (f)(2) (ii) and (iii) of this section, the absence of an identification that satisfies the requirements of paragraph (e)(1) of this section is binding and establishes that a transaction is not a hedging transaction. Thus, subject to the exceptions, the rules of paragraphs (a) (1) and (2) of this section do not apply, and the character of gain or loss is determined without reference to whether the transaction is a surrogate for a noncapital asset, serves as insurance against a business risk, serves a hedging function, or serves a similar function or purpose.

(ii) *Inadvertent error.* If a taxpayer does not make an identification that satisfies the requirements of paragraph (e) of this section, the taxpayer may treat gain or loss from the transaction as ordinary income or loss under paragraph (a)(1) or (a)(2) of this section if—

(A) The transaction is a hedging transaction (as defined in paragraph (b) of this section);

(B) The failure to identify the transaction was due to inadvertent error; and

(C) All of the taxpayer's hedging transactions in all open years are being treated on either original or, if necessary, amended returns as provided in paragraphs (a)(1) and (a)(2) of this section.

(iii) *Anti-abuse rule.* If a taxpayer does not make an identification that satisfies all the requirements of paragraph (e) of this section but the taxpayer has no reasonable grounds for treating the transaction as other than a hedging transaction, then gain from the transaction is ordinary. Thus, a taxpayer may not elect to treat gain or loss from a hedging transaction as capital gain or loss. The reasonableness of the taxpayer's failure to identify a transaction is determined by taking into consideration not only the requirements of paragraph (b) of this section but also the taxpayer's treatment of the transaction for financial accounting or other purposes and the taxpayer's identification of similar transactions as hedging transactions.

(3) *Transactions by members of a consolidated group*—(i) *Single-entity approach.* If a consolidated group is under the general rule of paragraph (d)(1) of this section (the single-entity approach), the rules of this paragraph (f) apply only to transactions that are not intercompany transactions.

(ii) *Separate-entity election.* If a consolidated group has made the election under paragraph (d)(2) of this section, then, in addition to the rules of paragraphs (f) (1) and (2) of this section, the following rules apply.

(A) If an intercompany transaction is identified as a hedging transaction but does not meet the requirements of paragraphs (d)(2)(ii) (A) and (B) of this section, then, notwithstanding any contrary provision in § 1.1502–13, each party to the transaction is subject to the rules of paragraph (f)(1) of this section with respect to the transaction as though it had incorrectly identified its position in the transaction as a hedging transaction.

(B) If a transaction meets the requirements of paragraphs (d)(2)(ii) (A) and (B) of this section but the transaction is not identified as a hedging transaction, each party to the transaction is subject to the rules of paragraph (f)(2) of this section. (Because the transaction is an intercompany hedging transaction, the character and timing rules of § 1.1502–13 do not apply. See paragraph (d)(2)(iii)(A) of this section.)

(g) *Effective dates and transition rules*—(1) *Effective date for identification requirements*—(i) *In general.* Paragraph

(e) of this section applies to transactions that—

(A) Are entered into on or after January 1, 1994; or

(B) Are entered into before that date and remain in existence on March 31, 1994.

(ii) *Transition rule.* In the case of a hedging transaction that is entered into before January 1, 1994, and remains in existence on March 31, 1994, an identification is timely if it is made before the close of business on March 31, 1994.

(iii) *Special rules for hedging transactions not described in §1.1221–2T(b).* In the case of a transaction that is entered into before October 1, 1994, that is a hedging transaction within the meaning of paragraph (b) of this section (or is treated as a hedging transaction under paragraph (g)(3) of this section), and that the taxpayer reasonably treated as not being a hedging transaction within the meaning of paragraph (b) of §1.1221–2T (26 CFR part 1 revised as of April 1, 1994)—

(A) If the transaction does not remain in existence on October 1, 1994, paragraph (e) of this section does not apply; and

(B) If the transaction remains in existence on October 1, 1994, paragraph (e) of this section applies, and an identification is timely if it is made before the close of business on October 1, 1994.

(2) *Reliance on §1.1221–2T*—(i) *General rule.* A taxpayer may rely on any paragraph in §1.1221–2T (26 CFR part 1 revised as of April 1, 1994), for transactions entered into prior to October 1, 1994, provided that the taxpayer applies the paragraph reasonably and consistently.

(ii) *Identification.* In the case of a transaction entered into before October 1, 1994, an identification is deemed to satisfy paragraph (e) of this section if it satisfies §1.1221–2T(c) (26 CFR part 1 revised as of April 1, 1994). For this purpose, identification of the hedged item is timely if it is made within the period specified in paragraph (e)(2)(ii) of this section.

(3) *Transition rules for hedges of certain property*—(i) *Transition rule for section 1231 assets.* For all taxable years that ended prior to July 18, 1994 and that, as of September 1, 1994, were still open for assessment under section 6501, a taxpayer may treat as hedging transactions all transactions that were entered into during those years and that hedge property used in the trade or business within the meaning of section 1231(b) (a section 1231 asset) if the taxpayer can establish that, during those years—

(A) Sales of section 1231 assets did not give rise to net gain treated as capital gain (after application of section 1231(c));

(B) All of the hedges of section 1231 assets would be hedging transactions under paragraph (b) of this section if section 1231 assets were ordinary property; and

(C) On original or amended returns, the taxpayer consistently treats all of the hedges of section 1231 assets as hedging transactions.

(ii) *Transition rule for noninventory supplies.* For all taxable years that ended prior to July 18, 1994 and that, as of September 1, 1994, were still open for assessment under section 6501, a taxpayer may treat as hedging transactions all hedges of purchases of noninventory supplies (as defined in paragraph (c)(5)(ii) of this section) that would not otherwise qualify as hedging transactions and that were entered into during those years if the taxpayer can establish that, during those years—

(A) The taxpayer did not sell in any of those years more than 15 percent of the greater of the total amount of the supply held at the beginning of the year or the total amount of the supply acquired during that year;

(B) All of the hedges would be hedging transactions under paragraph (b) of this section if noninventory supplies were ordinary property; and

(C) On original or amended returns, the taxpayer consistently treats all of the hedges of noninventory supplies as hedging transactions.

(4) *Effective date and transition rules for hedges by members of a consolidated group.* Paragraphs (d), (e)(5), and (f)(3) of this section apply to transactions entered into on or after March 8, 1996.

(5) *Elections to accelerate the effective date of the regulations*—(i) *Election to apply the single-entity approach retroactively.* A consolidated group may

elect to begin to apply paragraphs (d) (1) and (3), (e)(5)(i), and (f)(3)(i) of this section to all transactions entered into in any taxable year (the election year) beginning prior to March 8, 1996. This election must be made in the manner, and at the time, prescribed by the Commissioner. A group may make the election only if the election year, and each subsequent taxable year, are still open for assessment under section 6501 on July 1, 1996 (or such earlier date as the Commissioner may allow). The election applies to all transactions entered into in the election year and in all subsequent consolidated return years until the date, if any, as of which the group makes a separate-entity election under paragraph (d)(2) of this section. The rules of paragraph (g)(6) of this section apply to all transactions that were entered into before March 8, 1996 in taxable years subject to an election under this paragraph (g)(5)(i). The election may be revoked only with the consent of the Commissioner.

(ii) *Ability to apply the separate-entity approach retroactively*. Notwithstanding paragraph (g)(4) of this section, the separate-entity election described in paragraph (d)(2) of this section may be made for any taxable year beginning on or after July 12, 1995. If that election is made for a taxable year beginning before March 8, 1996, then paragraphs (d) (2) and (3), (e)(5)(ii), and (f)(3)(ii) of this section apply to all transactions entered into on or after the beginning of that taxable year and while the election is in effect, and the rules of paragraph (g)(6) of this section (other than paragraph (g)(6)(i)) apply to all transactions that were entered into on or after the first day of the first year for which the election is made and before March 8, 1996.

(6) *Transitional identification rules*. To allow a consolidated group to conform to paragraphs (g)(5) (i) and (ii) of this section, this paragraph (g)(6) nullifies certain hedge identifications and permits a member of a consolidated group to add certain hedge identifications. This paragraph (g)(6) applies only to the extent provided in paragraph (g)(5) of this section.

(i) *Intercompany transactions previously identified*. Notwithstanding paragraph (f)(1)(i) of this section, if, for purposes of paragraph (e)(1) of this section, a member identified as a hedging transaction an intercompany transaction (or a transaction that would qualify as an intercompany transaction under § 1.1502–13(b)(1) if the taxable year in which the transaction was entered into were described in § 1.1502–13(*l*)), the character of the gain on the intercompany transaction is determined as if it had not been identified as a hedging transaction. The identification may, however, serve to identify the hedged item under paragraph (e)(5)(i) of this section.

(ii) *Additional identifications of hedging transactions*. A member of a consolidated group must identify under paragraph (e)(5) of this section a transaction that—

(A) Was entered into before March 8, 1996,

(B) When entered into was not a hedging transaction (as defined in paragraph (b) of this section),

(C) Solely as a result of the group's election under paragraph (g)(5) (i) or (ii) of this section, is a hedging transaction (as defined in paragraph (b) of this section), and

(D) Remains in existence on March 8, 1996.

(iii) *Additional identification of hedged items*. In the case of transactions described in paragraph (g)(6)(ii) of this section, the hedging member must identify under paragraph (e)(5) of this section the item, items, or aggregate risk being hedged.

(iv) *Consistency requirement for hedge identifications*. In identifying transactions as hedging transactions under paragraph (g)(6)(ii) of this section, all of the members of the group must treat similar or identical transactions consistently within the same year and from year to year. If paragraph (g)(6)(ii) of this section requires a member to identify a transaction, and the member fails to identify a transaction as a hedging transaction, but it or another member of the group identifies similar or identical hedging transactions in the same or a subsequent year, then for purposes of paragraphs (f)(2)(iii) and (3) of this section, the member entering into the transaction is treated as having no reasonable grounds for treating the transaction as other than a hedging transaction.

(v) *Extension of time for making additional identifications.* If an identification of a hedging transaction would not be required but for the rules of paragraph (g)(6)(ii) of this section, the identification is timely for purposes of paragraph (e)(1) of this section if made before the close of business on May 7, 1996. If an identification of a hedged item would not be required but for the rules of paragraph (g)(6)(iii) of this section, it is timely for purposes of paragraph (e)(2) of this section if made before the close of business on the later of May 7, 1996 or the last day of the period specified in paragraph (e)(2)(ii) of this section.

[T.D. 8555, 59 FR 36363, July 18, 1994, as amended by T.D. 8653, 61 FR 519, Jan. 8, 1996; 61 FR 11547, Mar. 21, 1996]

§1.1222–1 Other terms relating to capital gains and losses.

(a) The phrase *short-term* applies to the category of gains and losses arising from the sale or exchange of capital assets held for 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less; the phrase *long-term* to the category of gains and losses arising from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). The fact that some part of a loss from the sale or exchange of a capital asset may be finally disallowed because of the operation of section 1211 does not mean that such loss is not *taken into account in computing taxable income* within the meaning of that phrase as used in sections 1222(2) and 1222(4).

(b)(1) In the definition of *net short-term capital gain,* as provided in section 1222(5), the amounts brought forward to the taxable year under section 1212 (other than section 1212(b)(1)(B)) are short-term capital losses for such taxable year.

(2) In the definition of *net long-term capital gain,* as provided in section 1222(7), the amounts brought forward to the taxable year under section 1212(b)(1)(B) are long-term capital losses for such taxable year.

(c) Gains and losses from the sale or exchange of capital assets held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) (described as short-term capital gains and short-term capital losses) shall be segregated from gains and losses arising from the sale or exchange of such assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) (described as long-term capital gains and long-term capital losses).

(d)(1) The term capital gain net income (net capital gain for taxable years beginning before January 1, 1977) means the excess of the gains from sales or exchanges of capital assets over the losses from sales or exchanges of capital assets, which losses include any amounts carried to the taxable year pursuant to section 1212(a) or section 1212(b).

(2) Notwithstanding subparagraph (1) of this paragraph, in the case of a taxpayer other than a corporation for taxable years beginning before January 1, 1964, the term *net capital gain* means the excess of (i) the sum of the gains from sales or exchanges of capital assets, plus the taxable income (computed without regard to gains and losses from sales or exchanges of capital assets and without regard to the deductions provided by section 151, relating to personal exemptions, or any deductions in lieu thereof) of the taxpayer or $1,000, whichever is smaller, over (ii) the losses from sales or exchanges of capital assets, which losses include amounts carried to the taxable year by such taxpayer under paragraph (a)(1) of §1.1212–1. Thus, in the case of estates and trusts for taxable years beginning before January 1, 1964, taxable income for the purposes of this paragraph shall be computed without regard to gains and losses from sales or exchanges of capital assets and without regard to the deductions allowed by section 642(b) to estates and trusts in lieu of personal exemptions. The term *net capital gain* is not applicable in the case of a taxpayer other than a corporation for taxable years beginning after December 31, 1963, and before January 1, 1970. In the case of a taxpayer

whose tax liability is computed under section 3 for taxable years beginning before January 1, 1964, the term *taxable income,* for purposes of this paragraph, shall be read as *adjusted gross income.*

(e) The term *net capital loss* means the excess of the losses from sales or exchanges of capital assets over the sum allowed under section 1211. However, in the case of a corporation, amounts which are short-term capital losses under § 1.1212–1(a) are excluded in determining such *net capital loss.*

(f) See section 165(g) and section 166(e), under which losses from worthless stocks, bonds, and other securities (if they constitute capital assets) are required to be treated as losses under subchapter P (section 1201 and following), chapter 1 of the Code, from the sale or exchange of capital assets, even though such securities are not actually sold or exchanged. See also section 1231 and § 1.1231–1 for the determination of whether or not gains and losses from the involuntary conversion of capital assets and from the sale, exchange, or involuntary conversion of certain property used in the trade or business shall be treated as gains and losses from the sale or exchange of capital assets. See also section 1236 and § 1.1236–1 for the determination of whether or not gains from the sale or exchange of securities by a dealer in securities shall be treated as capital gains, or whether losses from such sales or exchanges shall be treated as ordinary losses.

(g) In the case of nonresident alien individuals not engaged in trade or business within the United States, see section 871 and the regulations thereunder for the determination of the net amount of capital gains subject to tax.

(h) The term net capital gain (net section 1201 gain for taxable years beginning before January 1, 1977) means the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for such year.

[T.D. 6500, 25 FR 12004, Nov. 26, 1960, as amended by T.D. 6828, 30 FR 7808, June 17, 1965; T.D. 6867, 30 FR 15096, Dec. 7, 1965; T.D. 7301, 39 FR 971, Jan. 4, 1974; T.D. 7337, 39 FR 44978, Dec. 30, 1974; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1223–1 Determination of period for which capital assets are held.

(a) The holding period of property received in an exchange by a taxpayer includes the period for which the property which he exchanged was held by him, if the property received has the same basis in whole or in part for determining gain or loss in the hands of the taxpayer as the property exchanged. However, this rule shall apply, in the case of exchanges after March 1, 1954, only if the property exchanged was at the time of the exchange a capital asset in the hands of the taxpayer or property used in his trade or business as defined in section 1231(b). For the purposes of this paragraph, the term *exchange* includes the following transactions:

(1) An involuntary conversion described in section 1033, and

(2) A distribution to which section 355 (or so much of section 356 as relates to section 355) applies.

Thus, if property acquired as the result of a compulsory or involuntary conversion of other property of the taxpayer has under section 1033(c) the same basis in whole or in part in the hands of the taxpayer as the property so converted, its acquisition is treated as an exchange and the holding period of the newly acquired property shall include the period during which the converted property was held by the taxpayer. Thus, also, where stock of a controlled corporation is received by a taxpayer pursuant to a distribution to which section 355 (or so much of section 356 as relates to section 355) applies, the distribution is treated as an exchange and the period for which the taxpayer has held the stock of the controlled corporation shall include the period for which he held the stock of the distributing corporation with respect to which such distribution was made.

(b) The holding period of property in the hands of a taxpayer shall include the period during which the property was held by any other person, if such property has the same basis in whole or in part in the hands of the taxpayer for determining gain or loss from a sale or exchange as it would have in the hands of such other person. For example, the period for which property acquired by gift after December 31, 1920, was held by the donor must be included in determining the period for which the property was held by the taxpayer if, under the provisions of section 1015, such property has, for the purpose of determining gain or loss from the sale or exchange, the same basis in the hands of the taxpayer as it would have in the hands of the donor.

(c) In determining the period for which the taxpayer has held stock or securities received upon a distribution where no gain was recognized to the distributee under section 1081(c) (or under section 112(g) of the Revenue Act of 1928 (45 Stat. 818) or the Revenue Act of 1932 (47 Stat. 197)), there shall be included the period for which he held the stock or securities in the distributing corporation before the receipt of the stock or securities on such distribution.

(d) If the acquisition of stock or securities resulted in the nondeductibility (under section 1091, relating to wash sales) of the loss from the sale or other disposition of substantially identical stock or securities, the holding period of the newly acquired securities shall include the period for which the taxpayer held the securities with respect to which the loss was not allowable.

(e) The period for which the taxpayer has held stock, or stock subscription rights, received on a distribution shall be determined as though the stock dividend, or stock right, as the case may be, were the stock in respect of which the dividend was issued if the basis for determining gain or loss upon the sale or other disposition of such stock dividend or stock right is determined under section 307. If the basis of stock received by a taxpayer pursuant to a spin-off is determined under so much of section 1052(c) as refers to section 113(a)(23) of the Internal Revenue Code of 1939, and such stock is sold or otherwise disposed of in a taxable year which is subject to the Internal Revenue Code of 1954, the period for which the taxpayer has held the stock received in such spin-off shall include the period for which he held the stock of the distributing corporation with respect to which such distribution was made.

(f) The period for which the taxpayer has held stock or securities issued to him by a corporation pursuant to the exercise by him of rights to acquire such stock or securities from the corporation will, in every case and whether or not the receipt of taxable gain was recognized in connection with the distribution of the rights, begin with and include the day upon which the rights to acquire such stock or securities were exercised. A taxpayer will be deemed to have exercised rights received from a corporation to acquire stock or securities therein where there is an expression of assent to the terms of such rights made by the taxpayer in the manner requested or authorized by the corporation.

(g) The period for which the taxpayer has held a residence, the acquisition of which resulted under the provisions of section 1034 in the nonrecognition of any part of the gain realized on the sale or exchange of another residence, shall include the period for which such other residence had been held as of the date of such sale or exchange. See § 1.1034–1. For purposes of this paragraph, the term *sale or exchange* includes an involuntary conversion occurring after December 31, 1950, and before January 1, 1954.

(h) If a taxpayer accepts delivery of a commodity in satisfaction of a commodity futures contract, the holding period of the commodity shall include the period for which the taxpayer held the commodity futures contract, if such futures contract was a capital asset in his hands.

(i) If shares of stock in a corporation are sold from lots purchased at different dates or at different prices and the identity of the lots cannot be determined, the rules prescribed by the regulations under section 1012 for determining the cost or other basis of such stocks so sold or transferred shall also apply for the purpose of determining the holding period of such stock.

(j) In the case of a person acquiring property, or to whom property passed, from a decedent (within the meaning of section 1014(b)) dying after December 31, 1970, such person shall be considered to have held the property for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) if the property:

(1) Has a basis in the hands of such person which is determined in whole or in part under section 1014, and

(2) Is sold or otherwise disposed of by such person within 6 months after the decedent's death.

The provisions of this paragraph apply to sales of such property included in the decedent's gross estate for the purposes of the estate tax by the executor or administrator of the estate and to sales of such property by other persons who have acquired property from the decedent. The provisions of this paragraph may also be applicable to cases involving joint tenancies, community property, and properties transferred in contemplation of death. Thus, if a surviving joint tenant, who acquired property by right of survivorship, sells or otherwise disposes of such property within 6 months after the date of the decedent's death, and the basis of the property in his hands is determined in whole or in part under section 1014, the property shall be considered to have been held by the surviving joint tenant for more than 6 months. Similarly, a surviving spouse's share of community property shall be considered to have been held by her for more than 6 months if it is sold or otherwise disposed of within 6 months after the date of the decedent's death, regardless of when the property was actually acquired by the marital community. For the purposes of this paragraph, it is immaterial that the sale or other disposition produces gain or loss. If property is considered to have been held for more than 6 months by reason of this paragraph, it also is considered to have been held for that period for purposes of section 1231 (if that section is otherwise applicable).

(k) Any reference in section 1223 or this section to another provision of the Internal Revenue Code of 1954 is, where applicable, to be deemed a reference to the corresponding provision of the Internal Revenue Code of 1939, or prior internal revenue laws. The provisions of prior internal revenue laws here intended are the sections referred to in the sections of the Internal Revenue Code of 1939 which correspond to the sections of the Internal Revenue Code of 1954 referred to in section 1223. Thus, the sections corresponding to section 1081(c) are section 371(c) of the Revenue Act of 1938 (52 Stat. 553) and section 371(c) of the Internal Revenue Code of 1939. The sections corresponding to section 1091 are section 118 of each of the following: The Revenue Acts of 1928 (45 Stat. 826), 1932 (47 Stat. 208), 1934 (48 Stat. 715), 1936 (49 Stat. 1692), 1938 (52 Stat. 503), and the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 12005, Nov. 26, 1960, as amended by T.D. 7238, 37 FR 28717, Dec. 29, 1972; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

Special Rules for Determining Capital Gains and Losses

§ 1.1231–1 Gains and losses from the sale or exchange of certain property used in the trade or business.

(a) *In general.* Section 1231 provides that, subject to the provisions of paragraph (e) of this section, a taxpayer's gains and losses from the disposition (including involuntary conversion) of assets described in that section as *property used in the trade or business* and from the involuntary conversion of capital assets held for more than 6 months shall be treated as long-term capital gains and losses if the total gains exceed the total losses. If the total gains do not exceed the total losses, all such gains and losses are treated as ordinary gains and losses. Therefore, if the taxpayer has no gains subject to section 1231, a recognized loss from the condemnation (or from a sale or exchange under threat of condemnation) of even a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) is an ordinary loss. Capital assets subject to section 1231 treatment include only capital assets involuntarily converted. The noncapital assets subject to section 1231 treatment are (1) depreciable business property and business real property held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) other than stock in trade and certain copyrights and artistic property and, in the case of sales and other dispositions occurring after July 25, 1969, other than a letter, memorandum, or property similar to a letter or memorandum; (2) timber, coal, and iron ore which do not otherwise meet the requirements of section 1231 but with respect to which section 631 applies; and (3) certain livestock and unharvested crops. See paragraph (c) of this section.

(b) *Treatment of gains and losses.* For the purpose of applying section 1231, a taxpayer must aggregate his recognized gains and losses from:

(1) The sale, exchange, or involuntary conversion of property used in the trade or business (as defined in section 1231(b)), and

(2) The involuntary conversion (but not sale or exchange) of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

If the gains to which section 1231 applies exceed the losses to which the section applies, the gains and losses are treated as long-term capital gains and losses and are subject to the provisions of parts I and II (section 1201 and following), subchapter P, chapter 1 of the Code, relating to capital gains and losses. If the gains to which section 1231 applies do not exceed the losses to which the section applies, the gains and losses are treated as ordinary gains and losses. Therefore, in the latter case, a loss from the involuntary conversion of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) is treated as an ordinary loss and is not subject to the limitation on capital losses in section 1211. The phrase *involuntary conversion* is defined in paragraph (e) of this section.

(c) *Transactions to which section applies.* Section 1231 applies to recognized gains and losses from the following:

(1) The sale, exchange, or involuntary conversion of property held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and used in the taxpayer's trade or business, which is either real property or is of a character subject to the allowance for depreciation under section 167 (even though fully depreciated), and which is not:

(i) Property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of business;

(ii) A copyright, a literary, musical, or artistic composition, or similar property, or (in the case of sales and other dispositions occurring after July 25, 1969) a letter, memorandum, or property similar to a letter or memorandum, held by a taxpayer described in section 1221(3); or

(iii) Livestock held for draft, breeding, dairy, or sporting purposes, except to the extent included under paragraph (4) of this paragraph, or poultry.

(2) The involuntary conversion of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(3) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(4) The sale, exchange, or involuntary conversion of livestock if the requirements of §1.1231–2 are met.

(5) The sale, exchange, or involuntary conversion of unharvested crops on land which is (i) used in the taxpayer's trade or business and held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), and (ii) sold or exchanged at the same time and to the same person. See paragraph (f) of this section.

For purposes of section 1231, the phrase *property used in the trade or business* means property described in this paragraph (other than property described in subparagraph (2) of this paragraph). Notwithstanding any of the provisions of this paragraph, section 1231(a) does not apply to gains and losses under the circumstances described in paragraph (e) (2) or (3) of this section.

(d) *Extent to which gains and losses are taken into account.* All gains and losses to which section 1231 applies must be taken into account in determining whether and to what extent the gains exceed the losses. For the purpose of this computation, the provisions of section 1211 limiting the deduction of capital losses do not apply, and no losses are excluded by that section. With that exception, gains are included in the computations under section 1231 only to the extent that they are taken into account in computing gross income, and losses are included only to the extent that they are taken into account in computing taxable income. The following are examples of gains and losses not included in the computations under section 1231:

(1) Losses of a personal nature which are not deductible by reason of section 165 (c) or (d), such as losses from the sale of property held for personal use;

(2) Losses which are not deductible under section 267 (relating to losses with respect to transactions between related taxpayers) or section 1091 (relating to losses from wash sales);

(3) Gain on the sale of property (to which section 1231 applies) reported for any taxable year on the installment method under section 453, except to the extent the gain is to be reported under section 453 for the taxable year; and

(4) Gains and losses which are not recognized under section 1002, such as those to which sections 1031 through 1036, relating to common nontaxable exchanges, apply.

(e) *Involuntary conversion*—(1) *General rule.* For purposes of section 1231, the terms *compulsory or involuntary conversion* and *involuntary conversion* of property mean the conversion of proeprty into money or other property as a result of complete or partial destruction, theft or seizure, or an exercise of the power of requisition or condemnation, or the threat or imminence thereof. Losses upon the complete or partial destruction, theft, seizure, requisition, or condemnation of property are treated as losses upon an involuntary conversion whether or not there is a conversion of the property into other property or money and whether or not the property is uninsured, partially insured, or totally insured. For example, if a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), with an adjusted basis of $400, but not held for the production of income, is stolen, and the loss which is sustained in the taxable year 1956 is not compensated for by insurance or otherwise, section 1231 applies to the $400 loss. For certain exceptions to this subparagraph, see subparagraphs (2) and (3) of this paragraph.

(2) *Certain uninsured losses.* Notwithstanding the provisions of subparagraph (1) of this paragraph, losses sustained during a taxable year beginning after December 31, 1957, and before January 1, 1970, with respect to both property used in the trade or business and any capital asset held for more than 6 months and held for the production of income, which losses arise from fire, storm, shipwreck, or other casualty, or from theft, and which are not compensated for by insurance in any amount, are not losses to which section 1231(a) applies. Such losses shall not be taken into account in applying the provisions of this section.

(3) *Exclusion of gains and losses from certain involuntary conversions.* Notwithstanding the provisions of subparagraph (1) of this paragraph, if for any taxable year beginning after December 31, 1969, the recognized losses from the involuntary conversion as a result of fire, storm, shipwreck, or other casualty, or from theft, of any property used in the trade or business or of any capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) exceed the recognized gains from the involuntary conversion of any such property as a result of fire, storm, shipwreck, or other casualty, or from theft, such gains and losses are not gains and losses to which section 1231 applies and shall not be taken into account in applying the provisions of this section. The net loss, in effect, will be treated as an ordinary loss. This subparagraph shall apply whether such property is uninsured, partially insured, or totally insured and, in the case of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), whether the property is property used in the trade or business, property

held for the production of income, or a personal asset.

(f) *Unharvested crops.* Section 1231 does not apply to a sale, exchange, or involuntary conversion of an unharvested crop if the taxpayer retains any right or option to reacquire the land the crop is on, directly or indirectly (other than a right customarily incident to a mortgage or other security transaction). The length of time for which the crop, as distinguished from the land, is held is immaterial. A leasehold or estate for years is not *land* for the purpose of section 1231.

(g) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. A, an individual, makes his income tax return on the calendar year basis. A's recognized gains and losses for 1957 of the kind described in section 1231 are as follows:

	Gains	*Losses*
1. Gain on sale of machinery, used in the business and subject to an allowance for depreciation, held for more than 6 months	$4,000	
2. Gain reported in 1957 (under section 453) on installment sale in 1956 of factory premises used in the business (including building and land, each held for more than 6 months)	6,000	
3. Gain reported in 1957 (under section 453) on installment sale in 1957 of land held for more than 6 months, used in the business as a storage lot for trucks	2,000	
4. Gain on proceeds from requisition by Government of boat, held for more than 6 months, used in the business and subject to an allowance for depreciation	500	
5. Loss upon the destruction by fire of warehouse, held for more than 6 months and used in the business (excess of adjusted basis of warehouse over compensation by insurance, etc.)		$3,000
6. Loss upon theft of unregistered bearer bonds, held for more than 6 months	....	5,000
7. Loss in storm of pleasure yacht, purchased in 1950 for $1,800 and having a fair market value of $1,000 at the time of the storm		1,000
8. Total gains	12,500	
9. Total losses		9,000
10. Excess of gains over losses	3,500	

Since the aggregate of the recognized gains ($12,500) exceeds the aggregate of the recognized losses ($9,000), such gains and losses are treated under section 1231 as gains and losses from the sale or exchange of capital assets held for more than 6 months. For any taxable year beginning after December 31, 1957, and before January 1, 1970, the $5,000 loss upon theft of bonds (item 6) would not be taken into account under section 1231. See paragraph (e)(2) of this section.

Example 2. If in example (1), A also had a loss of $4,000 from the sale under threat of condemnation of a capital asset acquired for profit and held for more than six months, then the gains ($12,500) would not exceed the losses ($9,000 plus $4,000, or $13,000). Neither the loss on that sale nor any of the other items set forth in example (1) would then be treated as gains and losses from the sale or exchanges of capital assets, but all of such items would be treated as ordinary gains and losses. Likewise, if A had no other gain or loss, the $4,000 loss would be treated as an ordinary loss.

Example 3. A's yacht, used for pleasure and acquired for that use in 1945 at a cost of $25,000, was requisitioned by the Government in 1957 for $15,000. A sustained no loss deductible under section 165(c) and since no loss with respect to the requisition is recognizable, the loss will not be included in the computations under section 1231.

Example 4. A, an individual, makes his income tax return on a calendar year basis. During 1970 trees on A's residential property which were planted in 1950 after the purchase of such property were destroyed by fire. The loss, which was in the amount of $2,000 after applying section 165(c)(3), was not compensated for by insurance or otherwise. During the same year A also recognized a $1,500 gain from insurance proceeds compensating him for the theft sustained in 1970 of a diamond brooch purchased in 1960 for personal use. A has no other gains or losses for 1970 from the involuntary conversion of property. Since the recognized losses exceed the recognized gains from the involuntary conversion for 1970 as a result of fire, storm, shipwreck, or other casualty, or from theft, of any property used in the trade or business or of any capital asset held for more than 6 months, neither the gain nor the loss is included in making the computations under section 1231.

Example 5. The facts are the same as in example (4), except that A also recognized a gain of $1,000 from insurance proceeds compensating him for the total destruction by fire of a truck, held for more than 6 months, used in A's business and subject to an allowance for depreciation. A has no other gains or losses for 1970 from the involuntary conversion of property. Since the recognized losses ($2,000) do not exceed the recognized gains ($2,500) from the involuntary conversion for 1970 as a result of fire, storm, shipwreck, or other casualty, or from theft, of any property used in the trade or business or of any capital asset held for more than 6 months, such gains and losses are included in making the computations under section 1231. Thus, if A has no other gains or losses for 1970 to which section 1231 applies, the gains and losses from these involuntary conversions are treated under section 1231 as gains and losses from the sale or exchange of capital assets held for more than 6 months.

Example 6. The facts are the same as in example (5) except that A also has the following recognized gains and losses for 1970 to which section 1231 applies:

	Gains	*Losses*
Gain on sale of machinery, used in the business and subject to an allowance for depreciation, held for more than 6 months	$4,000	
Gain reported in 1970 (under section 453) on installment sale in 1969 of factory premises used in the business (including building and land, each held for more than 6 months)	6,000	
Gain reported in 1970 (under section 453) on installment sale in 1970 of land held for more than 6 months, used in the business as a storage lot for trucks	$2,000	
Loss upon the sale in 1970 of warehouse, used in the business and subject to an allowance for depreciation, held for more than 6 months		$5,000
Total gains	12,000	
Total losses		5,000

Since the aggregate of the recognized gains ($14,500) exceeds the aggregate of the recognized losses ($7,000), such gains and losses are treated under section 1231 as gains and losses from the sale or exchange of capital assets held for more than 6 months.

Example 7. B, an individual, makes his income tax return on the calendar year basis. During 1970 furniture used in his business and held for more than 6 months was destroyed by fire. The recognized loss, after compensation by insurance, was $2,000. During the same year B recognized a $1,000 gain upon the sale of a parcel of real estate used in his business and held for more than 6 months, and a $6,000 loss upon the sale of stock held for more than 6 months. B has no other gains or losses for 1970 from the involuntary conversion, or the sale or exchange of, property. The $6,000 loss upon the sale of stock is not a loss to which section 1231 applies since the stock is not property used in the trade or business, as defined in section 1231(b). The $2,000 loss upon the destruction of the furniture is not a loss to which section 1231 applies since the recognized losses ($2,000) exceed the recognized gains ($0) from the involuntary conversion for 1970 as a result of fire, storm, shipwreck, or other casualty, or from theft, of any property used in the trade or business or of any capital asset held for more than 6 months. Accordingly, the $1,000 gain upon the sale of real estate is considered to be gain from the sale or exchange of a capital asset held for more than 6 months since the gains ($1,000) to which section 1231 applies exceed the losses ($0) to which such section applies.

Example 8. The facts are the same as in example (7) except that B also recognized a gain of $4,000 from insurance proceeds compensating him for the total destruction by fire of a freighter, held for more than 6 months, used in B's business and subject to an allowance for depreciation. Since the recognized losses ($2,000) do not exceed the recognized gains ($4,000) from the involuntary conversion for 1970 as a result of fire, storm, shipwreck, or other casualty, or from theft, of any property used in the trade or business or of any capital asset held for more than 6 months, such gains and losses are included in making the computations under section 1231. Since the aggregate of the recognized gains to which section 1231 applies ($5,000) exceeds the aggregate of the recognized losses to which such section applies ($2,000), such gains and losses are treated under section 1231 as gains and losses from the sale or exchange of capital assets held for more than 6 months. The $6,000 loss upon the sale of stock is not taken into account in making such computation since it is not a loss to which section 1231 applies.

[T.D. 6500, 25 FR 12006, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9309, July 27, 1965; T.D. 7369, 40 FR 29841, July 16, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7829, 47 FR 38515, Sept. 1, 1982]

§ 1.1231–2 Livestock held for draft, breeding, dairy, or sporting purposes.

(a)(1) In the case of cattle, horses, or other livestock acquired by the taxpayer after December 31, 1969, section 1231 applies to the sale, exchange, or involuntary conversion of such cattle, horses, or other livestock, regardless of age, held by the taxpayer for draft, breeding, dairy, or sporting purposes, and held by him:

(i) For 24 months or more from the date of acquisition in the case of cattle or horses, or

(ii) For 12 months or more from the date of acquisition in the case of such other livestock.

(2) In the case of livestock (including cattle or horses) acquired by the taxpayer on or before December 31, 1969,

section 1231 applies to the sale, exchange, or involuntary conversion of such livestock, regardless of age, held by the taxpayer for draft, breeding, or dairy purposes, and held by him for 12 months or more from the date of acquisition.

(3) For the purposes of section 1231, the term *livestock* is given a broad, rather than a narrow, interpretation and includes cattle, hogs, horses, mules, donkeys, sheep, goats, fur-bearing animals, and other mammals. However, it does not include poultry, chickens, turkeys, pigeons, geese, other birds, fish, frogs, reptiles, etc.

(b)(1) Whether or not livestock is held by the taxpayer for draft, breeding, dairy, or sporting purposes depends upon all of the facts and circumstances in each case. The purpose for which the animal is held is ordinarily shown by the taxpayer's actual use of the animal. However, a draft, breeding, dairy, or sporting purpose may be present if an animal is disposed of within a reasonable time after its intended use for such purpose is prevented or made undesirable by reason of accident, disease, drought, unfitness of the animal for such purpose, or a similar factual circumstance. Under certain circumstances, an animal held for ultimate sale to customers in the ordinary course of the taxpayer's trade or business may be considered as held for draft, breeding, dairy, or sporting purposes. However, an animal is not held by the taxpayer for draft, breeding, dairy, or sporting purposes merely because it is suitable for such purposes or merely because it is held by the taxpayer for sale to other persons for use by them for such purposes. Furthermore, an animal held by the taxpayer for other purposes is not considered as held for draft, breeding, dairy, or sporting purposes merely because of a negligible use of the animal for such purposes or merely because of the use of the animal for such purposes as an ordinary or necessary incident to the other purposes for which the animal is held. See paragraph (c) of this section for the rules to be used in determining when horses are held for racing purposes and, therefore, are considered as held for sporting purposes.

(2) The application of this paragraph is illustrated by the following examples:

Example 1. An animal intended by the taxpayer for use by him for breeding purposes is discovered to be sterile or unfit for the breeding purposes for which it was held, and is disposed of within a reasonable time thereafter. This animal is considered as held for breeding purposes.

Example 2. The taxpayer retires from the breeding or dairy business and sells his entire herd, including young animals which would have been used by him for breeding or dairy purposes if he had remained in business. These young animals are considered as held for breeding or dairy purposes. The same would be true with respect to young animals which would have been used by the taxpayer for breeding or dairy purposes but which are sold by him in reduction of his breeding or dairy herd, because of, for example, drought.

Example 3. A taxpayer in the business of raising hogs for slaughter customarily breeds sows to obtain a single litter to be raised by him for sale, and sells these brood sows after obtaining the litter. Even though these brood sows are held for ultimate sale to customers in the ordinary course of the taxpayer's trade or business, they are considered as held for breeding purposes.

Example 4. A taxpayer in the business of raising horses for sale to others for use by them as draft horses uses them for draft purposes on his own farm in order to train them. This use is an ordinary or necessary incident to the purpose of selling the animals, and, accordingly, these horses are not considered as held for draft purposes.

Example 5. The taxpayer is in the business of raising registered cattle for sale to others for use by them as breeding cattle. It is the business practice of this particular taxpayer to breed the offspring of his herd which he is holding for sale to others prior to sale in order to establish their fitness for sale as registered breeding cattle. In such case, the taxpayer's breeding of such offspring is an ordinary and necessary incident to his holding them for the purpose of selling them as bred heifers or proven bulls and does not demonstrate that the taxpayer is holding them for breeding purposes. However, those cattle held by the taxpayer as additions or replacements to his own breeding herd to produce calves are considered to be held for breeding purposes, even though they may not actually have produced calves.

Example 6. A taxpayer, engaged in the business of buying cattle and fattening them for slaughter, purchased cows with calf. The calves were born while the cows were held by the taxpayer. These cows are not considered as held for breeding purposes.

(c)(1) For purposes of paragraph (b) of this section, a horse held for racing purposes shall be considered as held for sporting purposes. Whether a horse is held for racing purposes shall be determined in accordance with the following rules:

(i) A horse which has actually been raced at a public race track shall, except in rare and unusual circumstances, be considered as held for racing purposes.

(ii) A horse which has not been raced at a public track shall be considered as held for racing purposes if it has been trained to race and other facts and circumstances in the particular case also indicate that the horse was held for this purpose. For example, assume that the taxpayer maintains a written training record on all horses he keeps in training status, which shows that a particular horse does not meet objective standards (including, but not limited to, such considerations as failure to achieve predetermined standards of performance during training, or the existence of a physical or other defect) established by the taxpayer for determining the fitness and quality of horses to be retained in his racing stable. Under such circumstances, if the taxpayer disposes of the horse within a reasonable time after he determined that it did not meet his objective standards for retention, the horse shall be considered as held for racing purposes.

(iii) A horse which has neither been raced at a public track nor trained for racing shall not, except in rare and unusual circumstances, be considered as held for racing purposes.

(2) This paragraph may be illustrated by the following examples:

Example 1. The taxpayer breeds, raises, and trains horses for the purpose of racing. Every year he culls some horses from his racing stable. In 1971, the taxpayer decided that in order to prevent his racing stable from getting too large to be effectively operated he must cull six horses from it. All six of the horses culled by the taxpayer had been raced at public tracks in 1970. Under subparagraph (1)(i) of this paragraph, all these horses are considered as held for racing purposes.

Example 2. Assume the same facts as in example (1). Assume further that the taxpayer decided to cull four more horses from his racing stable in 1971. All these horses had been trained to race but had not been raced at public tracks. The taxpayer culled these four horses because the training log which the taxpayer maintains on all the horses he trains showed these horses to be unfit to remain in his racing stable. Horse A was culled because it developed shin splints during training. Horses B and C were culled because of poor temperament. B bolted every time a rider tried to mount it, and C became extremely nervous when it was placed in the starting gate. Horse D was culled because it did not qualify for retention under one of the objective standards the taxpayer had established for determining which horses to retain since it was unable to run a specified distance in a minimum time. These four horses were disposed of within a reasonable time after the taxpayer determined that they were unfit to remain in his stable. Under subparagraph (1)(ii) of this paragraph, all these horses are considered as held for racing purposes.

[T.D. 7141, 36 FR 18792, Sept. 22, 1971]

§ 1.1232–1 Bonds and other evidences of indebtedness; scope of section.

(a) *In general.* Section 1232 applies to any bond, debenture, note, or certificate or other evidence of indebtedness (referred to in this section and §§ 1.1232–2 through 1.1232–4 as an obligation) (1) which is a capital asset in the hands of the taxpayer, and (2) which is issued by any corporation, or by any government or political subdivision thereof. In general, section 1232(a)(1) provides that the retirement of an obligation, other than certain obligations issued before January 1, 1955, is considered to be an exchange and, therefore, is usually subject to capital gain or loss treatment. In general, section 1232(a)(2)(B) provides that in the case of a gain realized on the sale or exchange of certain obligations issued at a discount after December 31, 1954, which are either corporate bonds issued on or before May 27, 1969, or government bonds, the amount of gain equal to such discount or, under certain circumstances, the amount of gain equal to a specified portion of such discount, constitutes ordinary income. In the case of certain corporate obligations issued after May 27, 1969, in general, section 1232(a)(3) provides for the inclusion as interest in gross income of a ratable portion of original issue discount for each taxable year over the life of the obligation, section 1232(a)(3)(E) provides for an increase in basis equal to the original issue discount included in gross income, and section 1232(a)(2)(A) provides that any gain realized on such an obligation held more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) shall be considered gain from the sale or exchange of a capital asset held more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). For the requirements for reporting original issue discount on certain obligations issued after May 27, 1969, see section 6049(a) and the regulations thereunder. Section 1232(c) treats as ordinary income a portion of any gain realized upon the disposition of (i) coupon obligations which were acquired after August 16, 1954, and before January 1, 1958, without all coupons maturing more than 12 months after purchase attached, and (ii) coupon obligations which were acquired after December 31, 1957, without all coupons maturing after the date of purchase attached.

(b) *Requirement that obligations be capital assets.* In order for section 1232 to be applicable, an obligation must be a capital asset in the hands of the taxpayer. See section 1221 and the regulations thereunder. Obligations held by a dealer in securities (except as provided in section 1236) or obligations arising from the sale of inventory or personal services by the holder are not capital assets. However, obligations held by a financial institution, as defined in section 582(c) (relating to treatment of losses and gains on bonds of certain financial institutions) for investment and not primarily for sale to customers in the ordinary course of the financial institution's trade or business, are capital assets. Thus, with respect ot obligations held as capital assets by such a financial institution which are corporate obligations to which section 1232(a)(3) applies, there is ratable inclusion of original issue discount as interest in gross income under paragraph (a) of §1.1232–3A, and gain on a sale or exchange (including retirement) may be subject to ordinary income treatment under section 582(c) and paragraph (a)(1) of §1.1232–3.

(c) *Face-amount certificates*—(1) *In general.* For purposes of section 1232, this section and §§1.1232–2 through 1.1232–4, the term *other evidence of indebtedness* includes *face amount certificates* as defined in section 2(a)(15) and 4 of the Investment Company Act of 1940 (15 U.S.C. 80a–2 and 80a–4).

(2) *Amounts received in taxable years beginning prior to January 1, 1964.* Amounts received in taxable years beginning prior to January 1, 1964 under face amount certificates which were issued after December 31, 1954, are subject to the limitation on tax under section 72(e)(3). See paragraph (g) of §1.72–11 (relating to limit on tax attributable to receipt of a lump sum received as an annuity payment). However, section 72(e)(3) does not apply to any such amounts received in taxable years beginning after December 31, 1963.

(3) *Certificates issued after December 31, 1975.* In the case of a face-amount certificate issued after December 31, 1975 (other than such a certificate issued pursuant to a written commitment which was binding on such date and at all times thereafter), the provisions of section 1232(a)(3) (relating to the ratable inclusion of original issue discount in gross income) shall apply. See section 1232–3A(f). For treatment of any increase in basis under section 1232(a)(3)(A) as consideration paid for purposes of computing the investment in the contract under section 72, see §1.72–6(c)(4).

(d) *Certain deposits in financial institutions.* For purposes of section 1232, this section and §§1.1232–2 through 1.1232–4, the term *other evidence of indebtedness* includes certificates of deposit, time deposits, bonus plans, and other deposit arrangements with banks, domestic building and loan associations, and similar financial institutions. For application of section 1232 to such deposits, see paragraph (e) of §1.1232–3A. However, section 1232, this section, and §§1.1232–2 through 1.1232–4 shall not apply to such deposits made prior to January 1, 1971. For treatment of renewable certificates of deposit, see paragraph (e)(4) of §1.1232–3A.

[T.D. 7154, 36 FR 25000, Dec. 28, 1971, as amended by T.D. 7311, 39 FR 11880, Apr. 1, 1974; T.D. 7365, 40 FR 27936, July 2, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1232–2 Retirement.

Section 1232(a)(1) provides that any amount received by the holder upon the retirement of an obligation shall be considered as an amount received in exchange therefor. However, section 1232(a)(1) does not apply in the case of an obligation issued before January 1, 1955, which was not issued with interest coupons or in registered form on March 1, 1954. For treatment of gain on an obligation held by certain financial institutions, see section 582(c) and paragraph (a)(1)(iii) of § 1.1232–3.

[T.D. 7154, 36 FR 25000, Dec. 28, 1971]

§ 1.1232–3 Gain upon sale or exchange of obligations issued at a discount after December 31, 1954.

(a) *General rule; sale or exchange*—(1) *Obligations issued by a corporation after May 27, 1969*—(i) *General rule.* Under section 1232(a)(2)(A), in the case of gain realized upon the sale or exchange of an obligation issued at a discount by a corporation after May 27, 1969 (other than an obligation subject to the transitional rule of subparagraph (4) of this paragraph), and held by the taxpayer for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977):

(*a*) If at the time of original issue there was no intention to call the obligation before maturity, such gain shall be considered as long-term capital gain, or

(*b*) If at the time of original issue there was an intention to call the obligation before maturity, such gain shall be considered ordinary income to the extent it does not exceed the excess of:

(*1*) An amount equal to the entire *original issue discount,* over

(*2*) An amount equal to the entire *original issue discount* multiplied by a fraction the numerator of which is the sum of the number of complete months and any fractional part of a month elapsed since the date of original issue and the denominator of which is the number of complete months and any fractional part of a month from the date of original issue to the stated maturity date.

The balance, if any, of the gain shall be considered as long-term capital gain. The amount described in (*2*) of this subdivision (*b*) in effect reduces the amount of original issue discount to be treated as ordinary income under this subdivision (*b*) by the amounts previously includible (regardless of whether included) by all holders (computed, however, as to any holder without regard to any purchase allowance under paragraph (a)(2)(ii) of § 1.1232–3A and without regard to whether any holder purchased at a premium as defined in paragraph (d)(2) of § 1.1232–3).

(ii) *Cross references.* For definition of the terms *original issue discount* and *intention to call before maturity,* see paragraphs (b) (1) and (4) respectively of this section. For definition of the term *date of original issue,* see paragraph (b)(3) of this section. For computation of the number of complete months and any fractional portion of a month, see paragraph (a)(3) of § 1.1232–3A.

(iii) *Effect of section 582(c).* Gain shall not be considered to be long-term capital gain under subdivision (i) of this subparagraph if section 582(c) (relating to treatment of losses and gains on bonds of certain financial institutions) applies.

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. On January 1, 1970, A, a calendar-year taxpayer, purchases at original issue for cash of $7,600, M Corporation's 10-year, 5 percent bond which has a stated redemption price at maturity of $10,000. On January 1, 1972, A sells the bond to B, for $9,040. A has previously included $480 of the original issue discount in his gross income (see example (1) of paragraph (d) of § 1.1232–3A) and increased his basis in the bond by that amount to $8,080 (see paragraph (c) of § 1.1232–3A). Thus, if at the time of original issue there was no intention to call the bond before maturity, A's gain of $960 (amount realized, $9,040, less adjusted basis, $8,080) is considered long-term capital gain.

Example 2. (i) Assume the same facts as in example (1), except that at the time of original issue there was an intention to call the bond before maturity. The amount of the entire gain includible by A as ordinary income under subparagraph (1)(i) of this paragraph is determined as follows:

(1) Entire original issue discount (stated redemption price at maturity, $10,000, minus issue price, $7,600)	$2,400

(2) Less: Line (1), $2,400, multiplied by months elapsed since date of original issue, 24, divided by months from such date to stated maturity date, 120	$480
(3) Maximum amount includible by A as ordinary income	$1,920

Since the amount in line (3) is greater than A's gain, $960, A's entire gain is includible as ordinary income.

(ii) On January 1, 1979, B, a calendar-year taxpayer, sells the bond to C for $10,150. Assume that B has included $120 of original issue discount in his gross income for each taxable year he held the bond (see example (2) of paragraph (d) of §1.1232–3A) and therefore increased his basis by $840 (i.e., $120 each year×7 years) to $9,880. B's gain is therefore $270 (amount realized, $10,150, less basis, $9,880). The amount of such gain includible by B as ordinary income under subparagraph (1)(i) of this paragraph is determined as follows:

(1) Entire original issue discount (as determined in part (i) of this example)	$2,400
(2) Less: Line (1), $2,400, multiplied by months elapsed since date of original issue, 108, divided by months from such date to stated maturity date, 120	$2,160
(3) Maximum amount includible by B as ordinary income	$240

Since the amount in line (3) is less than B's gain, $270, only $240 of B's gain is includible as ordinary income. The remaining portion of B's gain, $30, is considered long-term capital gain.

(3) *Obligations issued by a corporation on or before May 27, 1969, and government obligations.* Under section 1232(a)(2)(B), if gain is realized on the sale or exchange after December 31, 1957, of an obligation held by the taxpayer more than 6 months, and if the obligation either was issued at a discount after December 31, 1954, and on or before May 27, 1969, by a corporation or was issued at a discount after December 31, 1954, by or on behalf of the United States or a foreign country, or a political subdivision of either, then such gain shall be considered ordinary income to the extent it does not exceed:

(i) An amount equal to the entire *original issue discount,* or

(ii) If at the time of original issue there was no intention to call the obligation before maturity, a portion of the *original issue discount* determined in accordance with paragraph (c) of this section,

And the balance, if any, of the gain shall be considered as long-term capital gain. For the definition of the terms *original issue discount* and *intention to call before maturity,* see paragraphs (b) (1) and (4) respectively of this section. See section 1037(b) and paragraph (b) of §1.1037–1 for special rules which are applicable in applying section 1232(a)(2)(B) and this subparagraph to gain realized on the disposition or redemption of obligations of the United States which were received from the United States in an exchange upon which gain or loss is not recognized because of section 1037(a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)).

(4) *Transitional rule.* Subparagraph (3) of this paragraph (in lieu of subparagraph (1) of this paragraph) shall apply to an obligation issued by a corporation pursuant to a written commitment which was binding on May 27, 1969, and at all times thereafter.

(5) *Obligations issued after December 31, 1954, and sold or exchanged before January 1, 1958.* Gain realized upon the sale or exchange before January 1, 1958, of an obligation issued at a discount after December 31, 1954, and held by the taxpayer for more than 6 months, shall be considered ordinary income to the extent it equals a specified portion of the *original issue discount,* and the balance, if any, of the gain shall be considered as long-term capital gain. The term *original issue discount* is defined in paragraph (b)(1) of this section. The computation of the amount of gain which constitutes ordinary income is illustrated in paragraph (c) of this section.

(6) *Obligations issued before January 1, 1955.* Whether gain representing original issue discount realized upon the sale or exchange of obligations issued at a discount before January 1, 1955, is capital gain or ordinary income shall be determined without reference to section 1232.

(b) *Definitions*—(1) *Original issue discount*—(i) *In general.* For purposes of section 1232, the term *original issue discount* means the difference between the issue price and the stated redemption price at maturity. The stated redemption price is determined without regard to optional call dates.

(ii) *De minimis rule.* If the original issue discount is less than one-fourth of 1 percent of the stated redemption price at maturity multiplied by the number of full years from the date of original issue to maturity, then the discount shall be considered to be zero. For example, a 10-year bond with a stated redemption price at maturity of $100 issued at $98 would be regarded as having an original issue discount of zero. Thus, any gain realized by the holder would be a long-term capital gain if the bond was a capital asset in the hands of the holder and held by him for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). However, if the bond were issued at $97.50 or less, the original issue discount would not be considered zero.

(iii) *Stated redemption price at maturity*—(*a*) Definition. Except as otherwise provided in this subdivision (iii), the term *stated redemption price at maturity* means the amount fixed by the last modification of the purchase agreement, including dividends, interest, and any other amounts, however designated, payable at that time. If any amount based on a fixed rate of simple or compound interest is actually payable or will be treated as constructively received under section 451 and the regulations thereunder either: (*1*) At fixed periodic intervals of one year or less during the entire term of an obligation, or (*2*) except as provided in subdivision (*e*) of this paragraph (b)(1)(iii), at maturity in the case of an obligation with a term of one year or less, any such amount payable at maturity shall not be included in determining the stated redemption price at maturity. For purposes of subdivision (*a*)(*2*) of this paragraph (b)(1)(iii), the term of an obligation shall include any renewal period with respect to which, under the terms of the obligation, the holder may either take action or refrain from taking action which would prevent the actual or constructive receipt of any interest on such obligation until the expiration of any such renewal period. To illustrate this paragraph (b)(1)(iii), assume that a note which promises to pay $1,000 at the end of three years provides for additional amounts labeled as interest to be paid at the rate of $50 at the end of the first year, $50 at the end of the second year, and $120 at the end of the third year. The stated redemption price at maturity will be $1,070 since only $50 of the $120 payable at the end of the third year is based on a fixed rate of simple or compound interest. If, however, the $120 were payable at the end of the second year, so that only $50 in addition to principal would be payable at the end of the third year, then under the rule for serial obligations contained in subparagraph (2)(iv)(*c*) of this paragraph, the $1,000 note is treated as consisting of two series. The first series is treated as maturing at the end of the second year at a stated redemption price of $70. The second series is treated as maturing at the end of the third year at a stated redemption price of $1,000. For the calculation of issue price and the allocation of original issue discount with respect to each such series, see example (3) of subparagraph (2)(iv)(*f*) of this paragraph.

(*b*) *Special rules.* In the case of face -amount certificates, the redemption price at maturity is the price as modified through changes such as extensions of the purchase agreement and includes any dividends which are payable at maturity. In the case of an obligation issued as part of an investment unit consisting of such obligation and an option (which is not excluded by (*c*) of this subdivision (iii)), security, or other property, the term *stated redemption price at maturity* means the amount payable on maturity in respect of the obligation, and does not include any amount payable in respect of the option, security, or other property under a repurchase agreement or option to buy or sell the option, security, or other property. For application of this subdivision to certain deposits in financial institutions, see paragraph (e) of § 1.1232–3A.

(*c*) *Excluded option*. An option is excluded by this subdivision (c) if it is an option to which paragraph (a) of § 1.61–15 applies or if it is an option, referred to in paragraph (a) of § 1.83–7, granted in connection with performance of services to which section 421 does not apply.

(*d*) *Obligation issued in installments.* If an obligation is issued by a corporation under terms whereby the holder makes installment payments, then the stated redemption price for each installment payment shall be computed in a manner consistent with the rules contained in subparagraph (2)(iv) of this paragraph for computing the issue price for each series of a serial obligation. For application of this subdivision (*d*) to certain open account deposit arrangements, see examples (1) and (2) of paragraph (e)(5)(ii) of §1.1232–3A.

(*e*) *Application of definition.* Subdivision (*a*)(*2*) of this paragraph (b)(1)(iii) shall not apply:

(*1*) For taxable years beginning before September 19, 1979, if for the issuer's last taxable year beginning before September 19, 1978, the rules of §1.163–4 were properly applied by the issuer, or

(*2*) In the case of an obligation with a term of six months or less held by a nonresident alien individual or foreign corporation, but only for purposes of the appliction of sections 871 and 881.

(iv) *Carryover of original issue discount.* If in pursuance of a plan of reorganization an obligation is received in an exchange for another obligation, and if gain or loss is not recognized in whole or in part on such exchange of obligations by reason, for example, of section 354 or 356, then the obligation received shall be considered to have the same original issue discount as the obligation surrendered reduced by the amount of gain (if any) recognized as ordinary income upon such exchange of obligations, and by the amount of original issue discount with respect to the obligation surrendered which was included as interest income under the ratable inclusion rules of sections 1232(a)(3) and 1.1232–3A. If inclusion as interest of the ratable monthly portion of original issue discount is required under section 1232(a)(3) with respect to the obligation received, see paragraph (a)(2)(iii) of §1.1232–3A for computation of the ratable monthly portion of original issue discount. For special rules in connection with certain exchanges of U.S. obligations, see section 1037.

(2) *Issue price defined*—(i) *In general.* The term *issue price* in the case of obligations registered with the Securities and Exchange Commission means the initial offering price to the public at which price a substantial amount of such obligations were sold. For this purpose, the term *the public* does not include bond houses and brokers, or similar persons or organizations acting in the capacity of underwriters or wholesalers. Ordinarily, the issue price will be the first price at which the obligations were sold to the public, and the issue price will not change if, due to market developments, part of the issue must be sold at a different price. When obligations are privately placed, the issue price of each obligation is the price paid by the first buyer of the particular obligation, irrespective of the issue price of the remainder of the issue. In the case of an obligation issued by a foreign obligor, the issue price shall be increased by the amount, if any, of interest equalization tax paid under section 4911 (and not credited, refunded, or reimbursed) on the acquisition of the obligation by the first buyer. In the case of an obligation which is convertible into stock or another obligation, the issue price includes any amount paid in respect of the conversion privilege. However, in the case of an obligation issued as part of an investment unit (as defined in subdivision (ii)(*a*) of this subparagraph), the issue price of the obligation includes only that portion of the initial offering price or price paid by the first buyer properly allocable to the obligation under the rules prescribed in subdivision (ii) of this subparagraph. The terms *initial offering price* and *price paid by the first buyer* include the aggregate payments made by the purchaser under the purchase agreement, including modifications thereof. Thus, all amounts paid by the purchaser under the purchase agreement or a modification of it are included in the issue price (but in the case of an obligation issued as part of an investment unit, only to the extent allocable to such obligation under subdivision (ii) of this subparagraph), such as amounts paid upon face-amount certificates or installment trust certificates in which the purchaser contracts to make a series of payments which will be returnable to the holder with an increment at a later date.

(ii) *Investment units consisting of obligations and property—(a) In general.* An investment unit, within the meaning of this subdivision (ii) and for purposes of section 1232, consists of an obligation and an option, security, or other property. For purposes of this subparagraph, the initial offering price of an investment unit shall be allocated to the individual elements of the unit on the basis of their respective fair market values. However, if the fair market value of the option, security, or other property is not readily ascertainable (within the meaning of paragraph (c) of § 1.421–6), then the portion of the initial offering price or price paid by the first buyer of the unit which is allocable to the obligation issued as part of such unit shall be ascertained as of the time of acquisition of such unit by reference to the assumed price at which such obligation would have been issued had it been issued apart from such unit. The assumed price of the obligation shall be ascertained by comparison to the yields at which obligations of a similar character which are not issued as part of an investment unit are sold in arm's length transactions, and by adjusting the price of the obligation in question to this yield. The adjustment may be made by subtracting from the face amount of the obligation the total present value of the interest foregone by the purchaser as a result of purchasing the obligation at a lower yield as part of an investment unit. In most cases, assumed price may also be determined in a similar manner through the use of standard bond tables. Any reasonable method may be used in selecting an obligation for comparative purposes. Obligations of the same grade and classification shall be used to the extent possible, and proper regard shall be given, with respect to both the obligation in question and the comparative obligation, to the solvency of the issuer, the nature of the issuer's trade or business, the presence and nature of security for the obligation, the geographic area in which the loan is made, and all other factors relevant to the circumstances. An obligation which is convertible into stock or another obligation must not be used as a comparative obligation (except where the investment unit contains an obligation convertible into stock or another obligation), since such an obligation would not reflect the yield attributable solely to the obligation element of the investment unit.

(*b*) *Agreement as to assumed price.* In the case of an investment unit which is privately placed, the assumed price at which the obligation would have been issued had it been issued apart from such unit may be agreed to by the issuer and the original purchaser of the investment unit in writing on or before the date of purchase. Alternatively, an agreement between the issuer and original purchaser may specify the rate of interest which would have been paid on the obligation if the transaction were one not involving the issuance of options, and an assumed issue price may be determined (in the manner described in (*a*) of this subdivision) from such agreed assumed rate of interest. An assumed price based upon such an agreement between the parties will generally be presumed to be the issue price of the obligation with respect to the issuer, original purchaser, and all subsequent holders: *Provided,* That the agreement was made in arm's length negotiations between parties having adverse interests: *And, provided further,* That such price does not, under the rules stated in (*a*) of this subdivision, appear to be clearly erroneous. An assumed issue price agreed to by the parties as provided herein will not be considered clearly erroneous if it is not less than the face value adjusted (in the manner described in (*a*) of this subdivision) to a yield which is one percentage point greater than the actual rate of interest payable on the obligation. Similarly, if the agreement between the parties specifies an agreed assumed rate of interest (in lieu of an agreed assumed issue price) and such agreed rate is not more than 1 percentage point greater than the actual rate payable on the obligation, an adjusted issue price based upon such agreed assumed rate of interest will not be considered clearly erroneous.

(*c*) *Cross references.* For rules relating to the deductibility by the issuing corporation of bond discount resulting from an allocation under the rule stated in (*a*) of this subdivision, see §§ 1.163–3 and 1.163–4. For rules relating to the basis of obligations and options, securities, or other property acquired in investment units, see § 1.1012–1(d). For rules relating to certain reporting requirements with respect to options acquired in connection with evidences of indebtedness and for the tax treatment of such options, see § 1.61–15, and section 1234 and the regulations thereunder. With respect to the tax consequences to the issuing corporation upon the exercise of options issued in connection with evidences of indebtedness to which this section applies, see section 1032 and the regulations thereunder.

(*d*) *Examples.* The application of the principles set forth in this subdivision (ii) may be illustrated by the following examples in each of which it is assumed that there was no intention to call the note before maturity:

Example 1. M Corporation is a small manufacturer of electronic components located in the southwestern United States. On January 1, 1969, in consideration for the payment of $41,500, M issues to X its unsecured note for $40,000 together with warrants to purchase 3,000 shares of M stock at $10 per share at any time during the term of the note. The note is payable in 4 years and provides for interest at the rate of 5 percent per year, payable semiannually. The fair market values of the note and the warrants are not readily ascertainable. Assume that companies in the same industry as M Corporation, and similarly situated both financially and geographically, are generally able to borrow money on their unsecured notes at an annual interest rate of 6 percent. Using a present value table, the calculation of the issue price of a 5 percent, 4 year, $40,000 note, discounted to yield 6 percent compounded semiannually is made as follows:

(1)	(2)	(3)	(2)×(3)
Semiannual interest period	Amount payable at 5 percent	Factor for present value discounted at 3 percent per period	Present value of payment
1	$1,000	0.9709	$970.90
2	1,000	.9426	942.60
3	1,000	.9151	915.10
4	1,000	.8885	888.50
5	1,000	.8626	862.60
6	1,000	.8375	837.50
7	1,000	.8131	813.10
8	1,000	.7894	789.40
8	40,000	.7804	31,576.00
Total present value of note discounted at 6 percent, compounded semiannually			38,595.70

The same result may be reached through the use of a standard bond table or by the following present value calculation:

Present value of annuity of $1,000 payable over 8 periods at 3 percent per period=1000×7.0197=	$7,019.70
Add: Present value of principal (as calculated above)	31,576.00
Total	$38,595.70

Accordingly, the assumed price at which M's note would have been issued had it been issued without stock purchase warrants, i.e., that portion of the $41,500 price paid by X which is allocable to M's note, is $38,596 (rounded). Since the price payable on redemption of M's note at maturity is $40,000, the original issue discount on M's note is $1,404 ($40,000 minus $38,596). Under the rules stated in § 1.163–3, M is entitled to a deduction, to be prorated or amortized over the life of the note, equal to this original issue discount on the note. The excess of the price for the unit over the portion of such price allocable to the note, $2,904 ($41,500 minus $38,596), is allocable to and is the basis of the stock purchase warrants acquired by X in connection with M's note. Upon the exercise of X's warrants, M will be allowed no deduction and will have no income. Upon maturity of the note X will receive $40,000 from M, of which $1,404, the amount of the original issue discount, will be taxable as ordinary income. If X were to transfer the note at its face amount to A 2 years after the issue date, X would realize, under section 1232(a)(2)(B), ordinary income of $702 (one-half of $1,404).

Example 2. (1) On January 1, 1969, N Corporation negotiates with Y, a small business investment company, for a loan in the amount of $51,500 in consideration of which N Corporation issues to Y its unsecured 5-year note for $50,000, together with warrants to purchase 2,000 shares of N stock at $5 per share at any time during the term of the note. The note provides for interest of 6 percent, payable semiannually. The fair market values of the note and warrants are not readily ascertainable. The loan agreement between Y and N contains a provision, agreed to in arms-length bargaining between the parties, that a rate of 7 percent payable semiannually would have been applied to the loan if warrants were not issued as part of the consideration for the loan. The issue price of the note is $47,921 (rounded), determined with the use of a standard bond table, or computed in the manner illustrated in Example 1 or in the following alternative manner:

(1)	(2)	(3)	(4)	(5)	(4)×(5)
Interest period	Interest rate differential	Principal	Interest foregone for period (½%)	Factor for present value discounted at 3½ percent per period	Present value of interest foregone
1	1%(7%-6%)	$50,000	250	0.9662	$241.53
2	1%	50,000	250	.9335	233.38
3	1%	50,000	250	.9019	225.48
4	1%	50,000	250	.8714	217.85
5	1%	50,000	250	.8420	210.50
6	1%	50,000	250	.8135	203.38
7	1%	50,000	250	.7860	196.50
8	1%	50,000	250	.7594	189.85
9	1%	50,000	250	.7337	183.43
10	1%	50,000	250	.7089	177.25
Total present value of interest foregone					$2,079.15
Principal					50,000.00
Less: Total present value of interest foregone					2,079.15
Issue price					47,920.85

The calculation of present value of interest foregone may also be made as follows:

Present value of annuity of $250 discounted for 10 periods at 3½ percent per period=$250×8.3166=$2,079.15.

The total present value of interest foregone, $2,079, is also the original issue discount attributable to the note ($50,000 − $47,921). Under (*b*) of this subdivision, since the agreed assumed rate of interest of 7 percent is not more than 1 percentage point greater than the actual rate payable on the note, determination of the issue price of the note (and original issue discount) based upon such assumed rate will be presumed to be correct and will not be considered clearly erroneous, provided that both N and Y adhere to such determination. Under the rules in § 1.163–3, N is entitled to a deduction, to be prorated or amortized over the life of the note, equal to the original issue discount on the note. The excess of the price paid for the unit over the portion of such price allocable to the note, $3,579 ($51,500 − $47,921) is allocable to and is the basis of the stock purchase warrants acquired by Y in connection with N's note. Upon the exercise or sale of the warrants by Y, N will be allowed no deduction and will have no income. Upon maturity of the note Y will receive $50,000 from N, of which $2,079, the amount of the original issue discount, will be taxable as ordinary income. If Y were to transfer the note at its face value to B 2½ years after the issue date, Y would realize, under section 1232(a)(2)(B), ordinary income of $1,039.50 (one-half of $2,079).

(2) Assume that instead of the parties agreeing on an assumed interest rate at which the obligation would have been issued without the warrants, the parties agreed that the obligation at the actual 6 percent rate would have been issued without the warrants at a discounted price of $48,000. In this situation the agreed assumed issue price is presumed to be correct since it is not less than the face value adjusted (in the manner illustrated in part (*1*) of this example) to a yield which is one percentage point greater than the actual rate of interest payable on the obligation ($47,921).

Example 3. O Corporation is a small advertising company located in the northeastern United States. Z is a tax-exempt organization. In consideration for the payment of $60,000, O issues to Z, in a transaction not within the scope of section 503(b), its unsecured 5-year note for $60,000, together with warrants to purchase 6,000 shares of O stock at $10 per share at any time during the term of the note. The note is subject to quarterly amortization at the rate of $3,000 per quarter, and provides for interest on the outstanding unpaid balance at an annual rate of 6 percent payable quarterly (1½ percent per quarter). The fair market values of the notes and warrants are not readily ascertainable. The loan agreement between O and Z contains a recital that if the $60,000 note had been issued without the warrants only $45,000 would have been paid for it. An examination of relevant facts indicates that companies in the same industry as O Corporation, and similarly situated both financially and geographically, are able to borrow money on their unsecured notes at an annual interest cost of 8½ percent payable quarterly (2⅛ percent per quarter). By reference to a present value table, it is found that the present value of O's note discounted to yield 8½ percent compounded quarterly is $56,608 (rounded). The computation is as follows:

(1)	(2)	(3)	(4)	(5)	(6)
Quarterly interest period	Principal payable	Interest payable (1½ percent)	Total amount payable (2)+(3)	Factor for present value discounted at 2⅛ percent per quarter	Present value of total payment (4)×(5)
1	$3,000	$900	$3,900	0.9792	$3,818.88
2	3,000	855	3,855	.9588	3,696.17
3	3,000	810	3,810	.9389	3,577.21
4	3,000	765	3,765	.9193	3,461.16
5	3,000	720	3,720	.9002	3,348.74
6	3,000	675	3,675	.8815	3,239.51
7	3,000	630	3,630	.8631	3,133.05
8	3,000	585	3,585	.8452	3,030.04
9	3,000	540	3,540	.8276	2,929.70
10	3,000	495	3,495	.8104	2,832.35
11	3,000	450	3,450	.7935	2,737.58
12	3,000	405	3,405	.7770	2,645.69
13	3,000	360	3,360	.7608	2,556.29
14	3,000	315	3,315	.7450	2,469.68
15	3,000	270	3,270	.7295	2,385.47
16	3,000	225	3,225	.7143	2,303.62
17	3,000	180	3,180	.6994	2,224.09
18	3,000	135	3,135	.6849	2,147.16
19	3,000	90	3,090	.6706	2,072.15
20	3,000	45	3,045	.6567	1,999.65
Total					56,608.19

This amount ($56,608) is the assumed price at which the note would have been issued had it been issued without stock purchase warrants. The assumed price of $45,000 agreed to by the parties is not presumed to be correct since it is less than the face value adjusted to a yield which is one percentage point greater than the actual rate of interest payable on the obligation. The parties did not have adverse interests in agreeing upon an assumed price (since an excessively large amount of original issue discount would benefit O, the borrower, without adversely affecting Z, an exempt organization which would pay no tax on original issue discount income), and the price agreed to appears to be clearly erroneous when compared to the $56,608 assumed issue price determined under the principles of (*a*) of this subdivision. Since the maturity value of O's note is $60,000, the original issue discount on O's note is $3,392 ($60,000 minus $56,608). Under the rules in §1.163–3, O is entitled to a deduction, to be prorated or amortized over the life of the note, equal to this original issue discount on the note. The excess of the price paid for the unit over the portion of such price allocable to the note, $3,392 ($60,000 minus $56,608), is allocable to and is the basis of the stock purchase warrants acquired by Z in connection with O's note. Upon the exercise or sale of the warrants by Z, O will be allowed no deduction and will have no income.

(iii) *Issuance for property after May 27, 1969*—(*a*) *In general.* Except as provided in (*b*) of this subdivision, if an obligation or an investment unit is issued for property other than money, the issue price of such obligation shall be the stated redemption price at maturity and, therefore, no original issue discount is created as a result of the exchange. However, in such case, there may be an amount treated as interest under section 483. In the case of certain exchanges of obligations of the United States for other such obligations, see section 1037 for the determination of the amount of original issue discount on the obligation acquired in the exchange. For carryover of original issue discount in the case of certain exchanges of obligations, see subparagraph (1)(iv) of this paragraph.

(*b*) *Exceptions for original issue discount.* If an obligation or investment unit is issued for property in an exchange which is not pursuant to a plan of reorganization referred to in (*d*) of this subdivision, and if:

(*1*) The obligation, investment unit, or an element of the investment unit is part of an issue a portion of which is traded on an established securities market, or

(*2*) The property for which such obligation or investment unit is issued is stock or securities which are traded on an established securities market, then the issue price of the obligation or investment unit shall be the fair market value of the property for which such obligation or investment unit is issued, as determined under (*c*) of this subdivision. Such issue price shall control for purposes of determining the amount realized by the person exchanging the property for the obligation or unit issued and the bases of the property acquired by the holder and issuer.

An obligation which is not traded on an established securities market and which is not part of an issue or investment unit a portion of which is so traded shall not be treated as property described in (*1*) of this (*b*) even though the obligation is convertible into property so traded. For purposes of this (*b*), an obligation, investment unit, or element of an investment unit shall be treated as traded on an established securities market if it is so traded on or within 10 *trading* days after the date it is issued. *Trading* days shall mean those days on which an established securities market is open. For purposes of this subdivision (iii), the term *established securities market* shall have the same meaning as in paragraph (d)(4) of § 1.453–3 (relating to limitations on installment method for purchaser evidences of indebtedness payable on demand or readily tradable).

(*c*) *Determination of fair market value in cases to which (b) of this subdivision applies.* In general, for purposes of (*b*) of this subdivision, the fair market value of property for which an obligation or investment unit is issued shall be deemed to be the same as the fair market value of such obligation or investment unit, determined by reference to the fair market value of that portion of the issue, of which such obligation or unit is a part, which is traded on an established securities market. The fair market value of such obligation or unit shall be determined as of the first date after the date of issue (within the meaning of section 1232(b)(3)) that such obligation or unit is traded on an established securities market. If, however, the obligation or investment unit is not part of an issue a portion of which is traded on an established securities market, but the property for which the obligation or investment unit is issued is stock or securities which are traded on an established securities market, the fair market value of such property shall be the fair market value of such stock or securities on the date such obligation or unit is issued for such property. The fair market value of property for purposes of this (*c*) shall be determined as provided in § 20.2031–2 of this chapter (Estate Tax Regulations) but without applying the blockage and other special rules contained in paragraph (e) thereof.

(*d*) *Not in reorganization.* An exchange which is not pursuant to a reorganization referred to in this subdivision (*d*) is an exchange in which the obligation or investment unit is not issued pursuant to a plan of reorganization within the meaning of section 368(a)(1) or pursuant to an insolvency reorganization within the meaning of section 371, 373, or 374. Thus, for example, no original issue discount is created on an obligation issued in a recapitalization within the meaning of section 368(a)(1)(E). Similarly, no original issue discount is created on an obligation issued in an exchange, pursuant to a plan of reorganization, to which section 361 applies regardless of the income tax consequences to any person who pursuant to such plan is the ultimate recipient of the obligation. The application of section 351 shall not preclude the creation of original issue discount. For carryover of original issue discount in the case of an exchange of obligations pursuant to a plan of reorganization, see subparagraph (1)(iv) of this paragraph.

(*e*) *Effective date.* Determinations with respect to obligations issued on or before May 27, 1969, or pursuant to a written commitment which was binding on that date and at all times thereafter, shall be made without regard to this subdivision (iii).

(iv) *Serial obligations—(a) In general.* If an issue of obligations which matures serially is issued by a corporation, and if on the basis of the facts and circumstances in such case an independent issue price for each particular maturity can be established, then the obligations with each particular maturity shall be considered a separate series, and the obligations of each such series shall be treated as a separate issue with a separate issue price, maturity date, and stated redemption price at maturity. The ratable monthly portion of original issue discount attributable to each obligation within a particular series shall be determined and ratably included as interest in gross income under the rules of §1.1232–3A.

(*b*) *Issue price not independently established.* If a separate issue price cannot be established with respect to each series of an issue of obligations which matures serially, the issue price for each obligation of each series shall be its stated redemption price at maturity minus the amount of original issue discount allocated thereto in accordance with (*d*) of this subdivision. The amount of original issue discount so allocated shall be ratably included as interest in gross income under rules of §1.1232–3A.

(*c*) *Single obligation rule.* If a single corporate obligation provides for payments (other than payments which would not be included in the stated redemption price at maturity under subparagraph (1)(iii) of this paragraph) in two or more installments, the provisions of (*b*) of this subdivision shall be applied by treating such obligation as an issue of obligations consisting of more than one series each of which matures on the due date of each such installment payment.

(*d*) *Allocation of discount.* For purposes of (*b*) and (*c*) of this subdivision, the original issue discount with respect to each series of an issue shall be the total original issue discount for the issue multiplied by a fraction:

(*1*) The numerator of which is the product of (*i*) the stated redemption price of such series and (*ii*) the number of complete years (and any fraction thereof) constituting the period for such series from the date of original issue (as defined in paragraph (b)(3) of this section) to its stated maturity date, and

(*2*) The denominator of which is the sum of the products determined in (*1*) of this subdivision (*d*) with respect to each such series.

If a series consists of more than one obligation, the original issue discount allocated to such series shall be apportioned to such obligations in proportion to the stated redemption price of each. Computations under this subdivision (*d*) may be made using periods other than years, such as, for example, months or periods of 3 months.

(*e*) *Effective date.* The provisions of this subdivision (iv) shall apply with respect to corporate obligations issued after July 22, 1971. However, no inference shall be drawn from the preceding sentence with respect to serial obligations issued prior to such date.

(*f*) *Examples.* The provisions of this subdivision (iv) may be illustrated by the following examples:

Example 1. On January 1, 1972, P Corporation issued a note with a total face value of $100,000 to B for cash of $94,000. The terms of the note provide that $50,000 is payable on December 31, 1973, and the other $50,000 on December 31, 1975. Each payment is treated as the stated redemption price of a series, and the total original issue discount with respect to the note, $6,000, is allocated to each such series as follows:

Year of maturity	1973	1975	Total
(1) Stated redemption price	$50,000	$50,000	
(2) Multiply by years outstanding	2	4	
(3) Product of bond years	$100,000	$200,000	
(4) Sum of products	....	....	$300,000
(5) Fractional portion of discount	$100,000	$200,000	
	$300,000	$300,000	
(6) Multiply line (5) by discount for entire issue	$6,000	$6,000	
(7) Discount for each series	$2,000	$4,000	
(8) Issue price (line (1), minus line (7))	$48,000	$46,000	

Example 2. Assume the same facts as in example (1) except that a separate note is issued for each payment. The result is the same as in example (1).

Example 3. On January 1, 1971, Y Bank, a corporation, issues a note to C for $1,000 cash. The terms of the note provide that $50 will be paid at the end of the first year, $120 at the end of the second year, and $1,050 at the end of the third year. Under (*c*) of this subdivision (iv), the $1,000 note is treated as consisting of two series, the first of which matures at the end of the second year, and the second of which matures at the end of the third year. The issue price and the allocation of original issue discount with respect to each series is computed as follows:

Year of maturity	1972	1973	Total
(1) Stated redemption price	$70	$1,000	
(2) Multiply by years outstanding	2	3	
(3) Product of bond years	$140	$3,000	
(4) Sum of products	....	....	$3,140
(5) Fractional portion of discount	$140 $3,140	$3,000 $3,140	
(6) Multiply line (5) by discount for entire issue	$70	$70	
(7) Discount for each series	$3.12	$66.88	
(8) Issue price (line 1 minus line (7))	$66.88	$933.12	

(3) *Date of original issue.* In the case of issues of obligations which are registered with the Securities and Exchange Commission, the term *date of original issue* means the date on which the issue was first sold to the public at the issue price. In the case of issues which are privately placed, the term *date of original issue* means the date on which each obligation was sold to the original purchaser.

(4) *Intention to call before maturity*—(i) *Meaning of term.* For purposes of section 1232, the term *intention to call the bond or other evidence of indebtedness before maturity* means an understanding between (*a*) the issuing corporation (such corporation is hereinafter referred to as the *issuer*), and (*b*) the original purchaser of such obligation (or, in the case of obligations constituting part of an issue, any of the original purchasers of such obligations) that the issuer will redeem the obligation before maturity. For purposes of this subparagraph, the term *original purchaser* does not include persons or organizations acting in the capacity of underwriters or dealers, who purchased the obligation for resale in the ordinary course of their trade or business. It is not necessary that the issuer's intention to call the obligation before maturity be communicated directly to the original purchaser by the issuer. The understanding to call before maturity need not be unconditional; it may, for example, be dependent upon the financial condition of the issuer on the proposed early call date.

(ii) *Proof of intent—(a) In general.* Ordinarily, the existence or nonexistance of an understanding at the time of original issue that the obligation will be redeemed before maturity shall be determined by an examination of all of the circumstances under which the obligation was issued and held. The fact that the obligation is issued with provisions on its face giving the issuer the privilege of redeeming the obligation before maturity is not determinative of an intention to call before maturity; likewise, the absence of such provision is not determinative of the absence of an intention to call before maturity. However, such provision, or the absence of such provision, is one of the circumstances to be given consideration along with other factors in determining whether an understanding existed. If the obligation was part of an issue registered with the Securities and Exchange Commission and was sold to the public (whether or not sold directly to the public by the obligor) without representation to the public that the obligor intends to call the obligation before maturity, there shall be a presumption that no intention to call the obligation before maturity was in existence at the time of original issue. The existence of a provision on the face of an obligation giving the issuer the privilege of redeeming the obligation before maturity shall not in and of itself overcome the presumption set forth in the preceding sentence.

(*b*) *Circumstances indicating absence of understanding.* Examples of circumstances which would be evidence that there was no understanding at the time of original issue to redeem the obligation before maturity are:

(*1*) The issue price and term of the obligation appear to be reasonable, taking into account the interest rate, if any, on the obligation, for a corporation in the financial condition of the issuer at the time of issue.

(*2*) The original purchaser and the issuer are not related within the meaning of section 267(b) and have not engaged in transactions with each other (other than concerning the obligation).

(*3*) The original purchaser is not related within the meaning of section 267(b) to any of the officers or directors of the issuer, and he has not engaged in transactions with such officers or directors (other than concerning the obligation).

(*4*) The officers and directors of the issuer at the time of issue of the obligation are different from those in control at the time the obligation is called or the taxpayer disposes of it.

(c) *Gain treated as ordinary income in certain cases; computation.* The amount of gain treated as ordinary income under paragraph (a) (3)(ii) or (5) of this section is computed by multiplying the original issue discount by a fraction, the numerator of which is the number of full months the obligation was held by the holder and the denominator of which is the number of full months from the date of original issue to the date specified as the redemption date at maturity. (See paragraph (b)(3) of this section for definition of *date of original issue.*) The period that the obligation was held by the taxpayer shall include any period that it was held by another person if, under chapter 1 of the Code, for the purpose of determining gain or loss from a sale or exchange, the obligation has the same basis, in whole or in part, in the hands of the taxpayer as it would have in the hands of such other person. This computation is illustrated by the following examples:

Example 1. An individual purchases a 10-year, 3-percent coupon bond for $900 on original issue on February 1, 1955, and sells it on February 20, 1960, for $940. The redemption price is $1,000. At the time of original issue, there was no intention to call the bond before maturity. The bond has been held by the taxpayer for 60 full months. (The additional days amounting to less than a full month are not taken into account.) The number of complete months from date of issue to date of maturity is 120 (10 years). The fraction $^{60}/_{120}$ multiplied by the discount of $100 is equal to $50, which represents the proportionate part of the original issue discount attributable to the period of ownership by the taxpayer. Accordingly, any part of the gain up to $50 will be treated as ordinary income. Therefore, in this case the entire gain of $40 is treated as ordinary income.

Example 2. Assume the same facts in the preceding example, except that the selling price of the bond is $970. In this case $50 of the gain of $70 is treated as ordinary income and the balance of $20 is treated as long-term capital gain.

Example 3. Assume the same facts as in example (1), except that the selling price of the bond is $800. In this case, the individual has a long-term capital loss of $100.

Example 4. Assume the same facts as in example (1), except that the bond is purchased by the second holder February 1, 1960, for $800. The second holder keeps it to the maturity date (February 1, 1965) when it is redeemed for $1,000. Since that holder has held the bond for 60 full months, he will, upon redemption, have $50 in ordinary income and $150 in long-term capital gain.

(d) *Exceptions to the general rule*—(1) *In general.* Section 1232(a)(2)(C) provides that section 1232(a)(2) does not apply (i) to obligations the interest on which is excluded from gross income under section 103 (relating to certain government obligations), or (ii) to any holder who purchases an obligation at a premium.

(2) *Premium.* For purposes of section 1232, this section, and §1.1232–3A, *premium* means a purchase price which exceeds the stated redemption price of an obligation at its maturity. For purposes of the preceding sentence, if an obligation is acquired as part of an investment unit consisting of an option, security, or other property and an obligation, the purchase price of the obligation is that portion of the price paid or payable for the unit which is allocable to the obligation. The price paid for the unit shall be allocated to the individual elements of the unit on the basis of their respective fair market values. However, if the fair market value of the option, security, or other property is not readily ascertainable (within the meaning of paragraph (c) of §1.421–6), then the price paid for the unit shall be allocated in accordance with the rules under paragraph (b)(2)(ii) of this section for allocating the initial offering price of an investment unit to its elements. If, under chapter 1 of the Code, the basis of an obligation in the hands of the holder is the same, in whole or in part, for the purposes of determining gain or loss from a sale or exchange, as the basis of the obligation in the hands of another person who purchased the obligation at a premium, then the holder shall be considered to have purchased the obligation at a premium. Thus, the donee of an obligation purchased at a premium by the doner will be considered a holder who purchased the obligation at a premium.

(e) *Amounts previously includible in income.* Nothing in section 1232(a)(2) shall require the inclusion of any amount previously includible in gross income. Thus, if an amount was previously includible in a taxpayer's income on account of obligations issued at a discount and redeemable for fixed amounts increasing at stated intervals, or, under section 818(b) (relating to accrual of discount on bonds and other evidences of indebtedness held by life insurance companies), such amount is not again includible in the taxpayer's gross income under section 1232(a)(2). For example, amounts includible in gross income by a cash receipts and disbursements method taxpayer who has made an election under section 454 (a) or (c) (relating to accounting rules for certain obligations issued at a discount to which section 1232(a)(3) does not apply) are not includible in gross income under section 1232(a)(2). In the case of a gain which would include, under section 1232(a)(2), an amount considered to be ordinary income and a further amount considered long-term capital gain, any amount to which this paragraph applies is first used to offset the amount considered ordinary income. For example, on January 1, 1955, A purchases a 10-year bond which is redeemable for fixed amounts increasing at stated intervals. At the time of original issue, there was no intention to call the bond before maturity. The purchase price of the bond is $75, which is also the issue price. The stated redemption price at maturity of the bond is $100. A elects to treat the annual increase in the redemption price of the bond as income pursuant to section 454(a). On January 1, 1960, A sells the bond for $90. The total stated increase in the redemption price of the bond which A has reported annually as income for the taxable years 1955 through 1959 is $7. The portion of the original issue discount of $25 attributable to this period is $12.50, computed as follows:

60 (months bond is held by A)/120 (months from date of original issue to redemption date)×$25 (original issue discount)

However, $7, which represents the annual stated increase taken into income, is offset against the amount of $12.50, leaving $5.50 of the gain from the sale to be treated as ordinary income.

(f) *Recordkeeping requirements.* In the case of any obligation held by a taxpayer which was issued at an original issue discount after December 31, 1954, the taxpayer shall keep a record of the issue price and issue date upon or with each obligation (if known to or reasonably ascertainable by him). If the obligation held by the taxpayer is an obligation of the United States received from the United States in an exchange upon which gain or loss is not recognized because of section 1037 (a) (or so much of section 1031 (b) or (c) as relates to section 1037(a)), the taxpayer shall keep sufficient records to determine the issue price of such obligation for purposes of applying section 1037(b) and paragraphs (a) and (b) of § 1.1037–1 upon the disposition or redemption of such obligation. The issuer (or in the case of obligations first sold to the public through an underwriter or wholesaler, the underwriter or wholesaler) shall mark the issue price and issue date upon every obligation which is issued at an original issue discount after September 26, 1957, but only if the period between the date of original issue (as defined in paragraph (b)(3) of this section) and the stated maturity date is more than 6 months.

[T.D. 6500, 25 FR 12008, Nov. 26, 1960, as amended by T.D. 6984, 33 FR 19176, Dec. 21, 1968; T.D. 7154, 36 FR 25000, Dec. 28, 1971; 37 FR 527, Jan. 13, 1972; T.D. 7213, 37 FR 21992, Oct. 18, 1972; 37 FR 22863, Oct. 26, 1972; T.D. 7663, 44 FR 76782, Dec. 28, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1232–3A Inclusion as interest of original issue discount on certain obligations issued after May 27, 1969.

(a) *Ratable inclusion as interest*—(1) *General rule.* Under section 1232(a)(3), the holder of any obligation issued by a corporation after May 27, 1969 (other than an obligation issued by or on behalf of the United States or a foreign country, or a political subdivision of either) shall include as interest in his gross income an amount equal to the ratable monthly portion of original issue discount multiplied by the sum of the number of complete months and any fractional part of a month such holder held the obligation during the taxable year. For increase in basis for amounts included as interest in gross income pursuant to this paragraph, see paragraph (c) of this section. For requirements for reporting original issue discount, see section 6049(a) and the regulations thereunder.

(2) *Ratable monthly portion of original issue discount*—(i) *General rule.* Except when subdivision (ii) of this subparagraph applies, the term *ratable monthly portion of original issue discount* means an amount equal to the original issue discount divided by the sum of the number of complete months (plus any fractional part of a month) beginning on the date of original issue and ending the day before the stated maturity date of such obligation.

(ii) *Reduction for purchase allowance.* With respect to an obligation which has been acquired by purchase (within the meaning of subparagraph (4) of this paragraph), the term *ratable monthly portion of original issue discount* means the lesser of the amount determined under subdivision (i) of this subparagraph or an amount equal to:

(*a*) The excess (if any) of the stated redemption price of the obligation at maturity over its cost to the purchaser divided by

(*b*) The sum of the number of complete months (plus any fractional part of a month) beginning on the date of such purchase and ending the day before the stated maturity date of such obligation.

The amount of the ratable monthly portion within the meaning of this subdivision reflects a purchase allowance provided under section 1232(a)(3)(B) where a purchase is made at a price in excess of the sum of the issue price plus the portion of original issue discount previously includible (regardless of whether included) in the gross income of all previous holders (computed, however, as to such previous holders without regard to any purchase allowance under this subdivision and without regard to whether any previous holder purchased at a premium).

(iii) *Ratable monthly portion upon carryover to new obligation.* In any case in which there is a carryover of original issue discount under paragraph (b)(1)(iv) of §1.1232–3 from an obligation exchanged to an obligation received in such exchange, the ratable monthly portion of original issue discount in respect of the obligation received shall be computed by dividing the amount of original issue discount carried over by the sum of the number of complete months (plus any fractional part of a month) beginning on the date of the exchange and ending the day before the stated maturity date of the obligation received.

(iv) *Cross references.* For definitions of the terms *original issue discount* and *date of original issue,* see subparagraphs (1) and (3) respectively, of §1.1232–3(b). For definition of the term *premium,* see paragraph (d)(2) of §1.1232–3.

(3) *Determination of number of complete months*—(i) *In general.* For purposes of this section:

(*a*) A complete month and a fractional part of a month commence with the date of original issue and the corresponding day of each succeeding calendar month (or the last day of a calendar month in which there is no corresponding day),

(*b*) If an obligation is acquired on any day other than the date a complete month commences, the ratable monthly portion of original issue discount for the complete month in which the acquisition occurs shall be allocated between the transferor and the transferee in accordance with the number of days in such complete month each held the obligation,

(*c*) In determining the allocation under (*b*) of this subdivision, any holder may treat each month as having 30 days,

(*d*) The transferee, and not the transferor, shall be deemed to hold the obligation during the entire day on the date of acquisition, and

(*e*) The obligor will be treated as the transferee on the date of redemption.

(ii) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example: On February 22, 1970, A acquires an obligation of X Corporation for which February 1, 1970, is the date of original issue. B acquires the obligation on June 16, 1970. A does not choose to treat each month as having 30 days. Thus, A held the obligation for 3¾ months during 1970, i.e., one-fourth of February (7⁄28 days), March, April, May, one-half of June (15⁄30 days). The ratable monthly portion of original issue discount for the obligation is multiplied by 3¾ months to determine the amount included in A's gross income for 1970 pursuant to this paragraph.

(4) *Purchase.* For purposes of this section, the term *purchase* means any acquisition (including an acquisition upon original issue) of an obligation to which this section applies, but only if the basis of such obligation is not determined in whole or in part by reference to the adjusted basis of such obligation in the hands of the person from whom it was acquired or under section 1014(a) (relating to property acquired from a decedent).

(b) *Exceptions*—(1) *Binding commitment.* Section 1232(a)(3) shall not apply to any obligation issued pursuant to a written commitment which was binding on May 27, 1969, and at all times thereafter.

(2) *Exception for 1-year obligations.* Section 1232(a)(3) shall not apply to any obligation in respect of which the period between the date of original issue (as defined in paragraph (b)(3) of § 1.1232–3) and the stated maturity date is 1 year or less. In such case, gain on the sale or exchange of such obligation shall be included in gross income as interest to the extent the gain does not exceed an amount equal to the ratable monthly portion of original issue discount multiplied by the sum of the number of complete months and any fractional part of a month such taxpayer held such obligation.

(3) *Purchase at a premium.* Section 1232(a)(3) shall not apply to any holder who purchased the obligation at a premium (within the meaning of paragraph (d)(2) of § 1.1232–3).

(4) *Life insurance companies.* Section 1232(a)(3) shall not apply to any holder which is a life insurance company to which section 818(b) applies. However, ratable inclusion of original issue discount as interest under section 1232(a)(3) is required by an insurance company which is subject to the tax imposed by section 821 or 831.

(c) *Basis adjustment.* The basis of an obligation in the hands of the holder thereof shall be increased by any amount of original issue discount with respect thereto included as interest in his gross income pursuant to paragraph (a) of this section. See section 1232(a)(3)(E). However, the basis of an obligation shall not be increased by any amount that was includible as interest in gross income under paragraph (a) of this section, but was not actually included by the holder in his gross income.

(d) *Examples.* The provisions of paragraphs (a) through (c) of this section may be illustrated by the following examples:

Example 1. On January 1, 1970, A, a calendar-year taxpayer, purchases at original issue, for cash of $7,600, M Corporation's 10-year, 5-percent bond which has a stated redemption price of $10,000. The ratable monthly portion of original issue discount, as determined under section 1232(a)(3) and this section, to be included as interest in A's gross income for each month he holds such bond is $20, computed as follows:

Original issue discount (stated redemption price, $10,000, minus issue price, $7,600)	$2,400	
Divide by: Number of months from date of original issue to stated maturity date	120	months
Ratable monthly portion	$20	

Assume that A holds the bond for all of 1970 and 1971 and includes as interest in his gross income for each such year an amount equal to the ratable monthly portion, $20, multiplied by the number of months he held the bond each such year, 12 months, or $240. Accordingly, on January 1, 1972, A's basis in the bond will have increased under paragraph (c) of this section by the amount so included, $480 (i.e., $240×2), from his cost, $7,600, to $8,080. For results if A sells the bond on that date, see examples (1) and (2) of paragraph (a)(2) of § 1.1282–3.

Example 2. Assume the same facts as in example (1). Assume further that on January 1, 1972, A sells the bond to B, a calendar-year taxpayer for $9,040.

Since B purchased the bond, he determines under paragraph (a)(2)(ii) of this section the amount of the ratable monthly portion he must include as interest in his gross income in order to reflect the amount of his purchase allowance (if any). B determines that his ratable monthly portion is $10, computed as follows:

(1) Stated redemption price at maturity	$10,000	
(2) Minus: B's cost	$9,040	
(3) Excess	$960	
(4) Divide by: Number of months from date of purchase to stated maturity date	96	months
(5) Tentative ratable monthly portion	$10	
(6) Ratable monthly portion as computed in example (1)	$20	

Since line (5) is lower than line (6), B's ratable monthly portion is $10. Accordingly, if B holds the bond for all of 1972, he must include $120 (i.e., ratable monthly portion, $10×12 months) as interest in his gross income.

Example 3. (1) Assume the same facts as in example (1). Assume further that on January 1, 1975, A sells the bond to B for $10,150. Under the exception of paragraph (b)(3) of this section, B is not required to include any amount in respect of original issue discount as interest in his gross income since he has purchased the bond at a premium.

(2) On January 1, 1979, B sells the bond to C, a calendar-year taxpayer, for $9,940. Since C is now the holder of the bond (and no exception applies to him), he must include as interest in his gross income the ratable monthly portion of original issue determined under section 1232(a)(3) and this section. Since C purchased the bond he determines under paragraph (a)(2)(ii) of this section the amount of the ratable monthly portion he must include as interest in his gross income in order to reflect the amount of his purchase allowance (if any). C determines that his ratable monthly portion is $5, computed as follows:

(1) Stated redemption price at maturity	$10,000	
(2) Minus: C's cost	$9,940	
(3) Excess	$60	
(4) Divide by: Number of months from date of purchase to stated maturity date	12	months
(5) Tentative ratable monthly portion	$5	
(6) Ratable monthly portion as computed in example (1)	$20	

Since line (5) is lower than line (6), C's ratable monthly portion is $5. Accordingly, if C holds the bond for all of 1979, he must include $60 (i.e., ratable monthly portion, $5, ×12 months) as interest in his gross income. Upon maturity of the bond on January 1, 1980, C will receive $10,000 from M, which under paragraph (c) of this section will equal his adjusted basis (the sum of his cost, $9,940, plus original issue discount included as interest in his gross income, $60).

Example 4. On January 1, 1968, D, a calendar-year taxpayer, purchases at original issue, for cash of $8,000, P Corporation's 20-year, 6 percent bond which has a stated redemption price of $10,000 and which will mature on January 1, 1988. The original issue discount with respect to such bond is $2,000. However, the ratable inclusion rules of section 1232(a)(3) do not apply to D, since the bond was issued by P before May 28, 1969. On January 1, 1973, pursuant to a plan of reorganization as defined in section 368(a)(1)(E), and in which no gain or loss is recognized by D under section 354, D's 20-year bond is exchanged for a 10-year, 6 percent bond which also has a stated redemption price of $10,000 but will mature on January 1, 1983. Under paragraph (b)(1)(iv) of §1.1232–3, the $2,000 of original issue discount is carried over to the new 10-year bond received in such exchange. Since the new bond is an obligation issued after May 27, 1969, D is required to begin ratable inclusion of the $2,000 of discount as interest in his gross income for 1973. The ratable monthly portion of original issue discount, as determined under section 1232(a)(3) to be included as interest in gross income is computed as follows:

Amount of original issue discount carried over	$2,000	
Divide by: Number of complete months beginning on January 1, 1973, and ending on December 31, 1982	120	months
Ratable monthly portion	$16.67	

(e) *Application of section 1232 to certain deposits in financial institutions and similar arrangements*—(1) *In general.* Under paragraph (d) of §1.1232–1, the term *other evidence of indebtedness* includes certificates of deposit, time deposits, bonus plans, and other deposit arrangements with banks, domestic building and loan associations, and similar financial institutions.

(2) *Adjustments where obligation redeemed before maturity*—(i) *In general.* If an obligation described in subparagraph (1) of this paragraph is redeemed for a price less than the stated redemption price at maturity from a taxpayer who acquired the obligation upon original issue, such taxpayer shall be allowed as a deduction, in computing adjusted gross income, the amount of the original issue discount he included in gross income but did not receive (as determined under subdivision (ii) of this subparagraph). The taxpayer's basis of such obligation (determined after any increase in basis for the taxable year under section 1232(a)(3)(E) by the amount of original issue discount included in the holder's gross income under section 1232(a)(3)) shall be decreased by the amount of such adjustment.

(ii) *Computation.* The amount of the adjustment under subdivision (i) of this subparagraph shall be an amount equal to the excess (if any) of (*a*) the ratable monthly portion of the original issue discount included in the holder's gross income under section 1232(a)(3) for the period he held the obligation, over (*b*) the excess (if any) of the amount received upon the redemption over the issue price. Under paragraph (b)(1)(iii)(*a*) of § 1.1232–3, if any amount based on a fixed rate of simple or compound interest is actually payable or will be treated as constructively received under section 451 and the regulations thereunder at fixed periodic intervals of 1 year or less during the term of the obligation, any such amount payable upon redemption shall not be included in determining the amount received upon such redemption.

(iii) *Partial redemption. (a)* In the case of an obligation (other than a single obligation having serial maturity dates), if a portion of the obligation is redeemed prior to the stated maturity date of the entire obligation, the provisions of this subdivision shall be applied and not the provisions of subdivision (ii) of this subparagraph. In such case, the adjusted basis of the unredeemed portion of the obligation on the date of the partial redemption shall be an amount equal to the adjusted basis of the entire obligation on that date minus the amount paid upon the redemption.

(*b*) If the adjusted basis of the unredeemed portion (as computed under (*a*) of this subdivision) is equal to or in excess of the amount to be received for the unredeemed portion at maturity, no gain or loss shall be recognized at the time of the partial redemption but the holder shall be allowed a deduction, in computing adjusted gross income for the taxable year during which such partial redemption occurs, equal to the amount of such excess (if any), and no further original issue discount will be includible in the holder's gross income under section 1232(a)(3) over the remaining term of the unredeemed portion. In such case, the holder shall decrease his basis in the unredeemed portion (as computed under (a) of this subdivision) by the amount of such adjustment.

(*c*) If the adjusted basis of the unredeemed portion (as computed under (*a*) of this subdivision) is less than the redemption price of the unredeemed portion at maturity, a new computation shall be made under paragraph (a) of this section (without regard to the exception for one-year obligations in paragraph (b)(2) of this section) of the ratable monthly portion of original issue discount to be included as interest in the gross income of the holder over the remaining term of the unredeemed portion. For purposes of such computation, the adjusted basis of the unredeemed portion shall be treated as the issue price, the date of the partial redemption shall be treated as the issue date, and the amount to be paid for the unredeemed portion at maturity shall be treated as the stated redemption price.

(3) *Examples.* The application of section 1232 to obligations to which this paragraph applies may be illustrated by the following examples:

Example 1. A is a cash method taxpayer who uses the calendar year as his taxable year. On January 1, 1971, he purchases a certificate of deposit from X Bank, a corporation, for $10,000. The certificate of deposit is not redeemable until December 31, 1975, except in an emergency as defined in, and subject to the qualifications provided by, Regulation Q of the Board of Governors of the Federal Reserve. See 12 CFR 217.4(d). The stated redemption price at maturity is $13,382.26. The terms of the certificate do not expressly refer to any amount as interest. A's certificate of deposit is an obligation to which section 1232 and this paragraph apply. A shall include the ratable portion of original issue discount in gross income for 1971 as determined under section 1232(a)(3). Thus, if A holds the certificate of deposit for the full calendar year 1971, the amount to be included in A's gross income for 1971 is $676.45, that is, 12/60 months, multiplied by the excess of the stated redemption price ($13,382.26) over the issue price ($10,000).

Example 2. Assume the same facts as in example (1), except that the certificate of deposit provides for payment upon redemption at December 31, 1975, of an amount equal to ''$10,000, plus 6 percent compound interest from January 1, 1971, to December 31, 1975.'' Thus, the total amount payable upon redemption in both example (1) and this example is $13,382.26. The certificate of deposit is an obligation to which section 1232 and this paragraph apply and, since the substance of the deposit arrangement is identical to that contained in example (1), A must include the same amount in gross income.

Example 3. Assume the same facts as in example (1), except that the certificate provides for the payment of interest in the amount of $200 on December 31, of each year and $2,000 plus $10,000 (the original amount) payable upon redemption at December 31,

1975. Thus, if A holds the certificate of deposit for the full calendar year 1971, A must include in his gross income for 1971 the $200 interest payable on December 31, 1971, and $400 of original issue discount, that is, 12⁄60 months multiplied by the excess of the stated redemption price ($12,000) over the issue price ($10,000).

Example 4. B is a cash method taxpayer who uses the calendar year as his taxable year. On January 1, 1971, B purchases a 4-year savings certificate from the Y Building and Loan Corporation for $4,000, redeemable on December 31, 1974, for $5,000. On December 31, 1973, Y redeems the certificate for $4,660. Under section 1232(a)(3), B included $250 of original issue discount in his gross income for 1971, $250 for 1972, and includes $250 in his gross income for 1973 for a total of $750. Since the excess of (i) the amount received upon the redemption, $4,660, over (ii) the issue price, $4,000, or $660, is lower than the total amount of original issue discount ($750) included in B's gross income for the period he held the certificate by $90, the $90 will be treated under subparagraph (2) of this paragraph as a deduction in computing adjusted gross income, and accordingly, will decrease the basis of his certificate by such amount. B has no gain or loss upon the redemption, as determined in accordance with the following computation:

Adjusted basis January 1, 1973	$4,500
Increase under section 1232(a)(3)(E)	250
Subtotal	4,750
Decrease under subparagraph (b)(2) of this paragraph	90
Basis upon redemption	4,660
Amount realized upon redemption	4,660
Gain or loss	0

Example 5. On January 1, 1971, C, a cash method taxpayer who uses the calendar year as his taxable year, opens a savings account in Z bank with a $10,000 deposit. Under the terms of the account, interest is made available semiannually at 6 percent annual interest, compounded semiannually. Since all of the interest on C's account in Z Bank is made available semiannually, the stated redemption price at maturity under paragraph (b)(1)(iii)(*a*) of § 1.1232–3 equals the issue price, and, therefore, no original issue discount is reportable by C under section 1232(a)(3). However, C must include the sum of $300 (i.e., ½ × 6% × $10,000) plus $309 (i.e., ½ × 6% × $10,300) or $609, of interest made available during 1971 in his gross income for 1971.

Example 6. (i) D is a cash method taxpayer who uses the calendar year as his taxable year. On January 1, 1971, D purchases a $10,000 deferred income certificate from M Bank. Under the terms of the certificate, interest accrues at 6 percent per annum, compounded quarterly. The period of the account is 10 years. In addition, the holder is permitted to withdraw the entire amount of the purchase price at any time (but not interest prior to the expiration of the 10 year term), and upon such a withdrawal of the purchase price, no further interest accrues. If the certificate is held to maturity, the issue price plus accrued interest will aggregate $18,140.18.

(ii) In respect of the certificate, the original issue discount is $8,140.18, determined by subtracting the issue price of the certificate ($10,000) from the stated redemption price at maturity ($18,140.18). Thus, under section 1232(a)(3) the ratable monthly portion of original issue discount is $67.835 (i.e., 1⁄20 months, multiplied by $8,140.18). Under section 1232(a)(3), D includes $814.02 (i.e., 12 months, multiplied by $67.835) in his gross income for each calendar year the certificate remains outstanding and under section 1232(a)(3)(E) increases his basis by that amount. Thus, on December 31, 1975, D's basis for the certificate is $14,070.10 (i.e., issue price, $10,000, increased by product of $814.02×5 years).

(iii) On December 31, 1975, D withdraws the $10,000. Under the terms of the certificate $3,468.55 cannot be withdrawn until December 31, 1980. Under the provisions of subparagraph (2)(iii) of this paragraph, the $10,000 partial redemption shall be treated as follows:

(1) Adjusted basis of obligation at time of partial redemption	$14,070.10
(2) Amount paid upon redemption	10,000.00
(3) Adjusted basis of unredeemed portion (line (1) less line (2))	4,070.10
(4) Amount to be paid for unredeemed portion at maturity (December 31, 1980)	3,468.55
(5) Adjustment in computing adjusted gross income (excess of line (3) over line (4))	601.55

Since the adjusted basis of the unredeemed portion exceeds the amount to be received for the unredeemed portion at maturity, D is allowed a deduction, in computing adjusted gross income, of $601.25 in 1975 and no further original issue discount is includible as interest in his gross income. In addition, D will decrease his basis in the unredeemed portion by $601.55, the amount of such adjustment, from $4,070.10 to $3,468.55.

Example 7. E is a cash method taxpayer who uses the calendar year as his taxable year. On January 1, 1971, E purchases a $10,000 ''Bonus Savings Certificate'' from N Building and Loan Corporation. Under the terms of the certificate, interest is payable at 5 percent per annum, compounded quarterly, and the period of the account is 3 years. In addition, the certificate provides that if the holder makes no withdrawals of principal or interest during the term of the certificate, a bonus payment equal to 5 percent of the purchase price of the certificate will be paid to the holder of the certificate at maturity. Thus, the amount of the bonus payment is $500 (i.e., 5 percent multiplied by $10,000). Since the 5 percent annual interest is payable quarterly, the amount of such interest is not included in determining the stated redemption price at maturity under paragraph (b)(1)(iii) of § 1.1232–3. However, since the bonus payment is only payable at maturity, the amount of such bonus is included as part of the stated redemption price at maturity. Thus, the stated redemption price at maturity equals $10,500 (purchase price, $10,000, plus bonus payment $500). Accordingly, the original issue discount attributable to such certificate equals $500 (stated redemption price at maturity. $10,500, minus issue price, $10,000). Therefore, E must include as interest $166.67 (i.e., 12⁄36 months, multiplied by the original issue discount, $500) in his gross income for each taxable year he holds the certificate.

(4) *Renewable certificates of deposit*—(i) *In general.* The renewal of a certificate of deposit shall be treated as a purchase of the certificate on the date the renewal period begins regardless of any requirement pursuant to the terms of the certificate that the holder give notice of an intention to renew or not to renew. Thus, for example, in the case of a certificate of deposit for which a renewal period begins after December 31, 1970, such renewal shall be treated as a purchase after such date whether or not the initial period began before such date.

(ii) *Computation.* For purposes of computing the amount of original issue discount to be ratably included as interest in gross income under section 1232(a)(3) in respect of a renewable certificate of deposit for the initial period or any renewal period, the following rules apply:

(*a*) The issue price on the date any renewal period begins is considered to be in the case of a certificate of deposit initially purchased:

(*1*) After December 31, 1970, the adjusted basis of the certificate on the date such period begins,

(*2*) Before January 1, 1971, the amount the adjusted basis would have been on the date such period begins had the holder included all amounts of original issue discount as interest in gross income that would have been includible if section 1232(a)(3) had applied to the certificate from the date of original purchase.

Thus, if under the terms of the certificate, no amount is forfeited upon a failure to renew, then the issue price on the date any renewal period begins is considered to be the amount which would have been received by the holder on such date had it not been renewed.

(*b*) The date of original issue for any renewal period shall be considered to be the date it begins.

(*c*) The date of maturity for the initial period or any renewal period shall be considered to be the date it ends.

(*d*) The stated redemption price at maturity for the initial period or any renewal period shall be considered to be the maximum amount which would be received at the end of any such period, without regard to any reduction resulting from withdrawal prior to maturity or failure to renew at any renewal date.

(iii) *Application of 1-year rule.* For purposes of paragraph (b)(2) of this section (relating to nonapplication of section 1232(a)(3) to any obligation having a term of 1 year or less), the period between the date of original issue (as defined in paragraph (b)(3) of § 1.1232–3) of a renewable certificate of deposit and its stated maturity date shall include all renewal periods with respect to which, under the terms of the certificate, the holder may either take action or refrain from taking action which would prevent the actual or constructive receipt of any interest on such certificate until the expiration of any such renewal period whether or not the original date of issue is prior to January 1, 1971.

(iv) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example: (a) On May 1, 1969, A purchases a 2-year renewable certificate of deposit from M bank, a corporation, for $10,000. Interest will be compounded semiannually at 6 percent on May 1 and November 1. The terms of the certificate provide that such certificate will be automatically renewed on the anniversary date every 2 years if the holder does not notify M of an intention not to renew prior to 60 days before the particular anniversary date. Thus, on May 1, 1971, and May 1, 1973, the certificate may be redeemed for

$11,255.09 and $12,667.60, respectively. However, in no event shall the initial period and the renewal periods exceed 10 years. A does not notify M of an intention not to renew by March 1, 1971, and the certificate is automatically renewed for an additional 2-year period on May 1, 1971.

(*b*) Under subdivision (i) of this subparagraph, the May 1, 1971, renewal shall be treated as the purchase of a certificate of deposit on that date, i.e., after December 31, 1970. Under subdivision (ii) of this subparagraph, the issue price is considered to be $11,255.09 and the date of maturity is considered to be May 1, 1973. Since the stated redemption price at maturity is $12,667.60. A must include $58.85 as interest in gross income for each month he holds the certificate during the renewal period beginning May 1, 1971, computed as follows:

Original issue discount (stated redemption price, $12,667.60, minus issue price, $11,255.09)	$1,412.51
Divided by: Number of months from renewal to maturity date	24 months
Ratable monthly portion	$58.85

(5) *Time deposit open account arrangements*—(i) *In general.* The term *time deposit open account arrangement* means an arrangement with a fixed maturity date where deposits may be made from time to time and ordinarily no interest will be paid or constructively received until such fixed maturity date. All deposits pursuant to such an arrangement constitute parts of a single obligation. The amount of original issue discount to be ratably included as interest in the gross income of the depositor for any taxable year shall be the sum of the amounts separately computed for each deposit. For this purpose, the issue price for a deposit is the amount thereof and the stated redemption price at maturity is computed under paragraph (b)(1)(iii)(*d*) of § 1.1232–3.

(ii) *Obligations redeemed before maturity.* In the event of a partial redemption of a time deposit open account before maturity, the following rules, in addition to subparagraph (2) of this paragraph, shall apply:

(*a*) If, pursuant to the terms of the withdrawal, the amount received by the depositor is determined with reference to the principal amount of a specific deposit and interest earned from the date of such deposit, then such terms shall control for the purpose of determining which deposit was withdrawn.

(*b*) If (*a*) of this subdivision (ii) does not apply, then the withdrawal shall be deemed to be of specific deposits together with interest earned from the date of such deposits, on a first-in, first-out basis.

(iii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1. (i) F is a cash method taxpayer who uses the calendar year as his taxable year. On December 1, 1970, F enters into a 5-year deposit open account arrangement with M Savings and Loan Corp. The terms of the arrangement provide that F will deposit $100 each month for a period of 5 years, and that interest will be compounded semiannually (on June 1 and December 1) at 6 percent, but will be paid only at maturity. Thus, assuming F makes deposits of $100 on the first of each month beginning with December 1, 1970, the account will have a stated redemption price of $6,998.20 at maturity on December 1, 1975. Since, however, section 1232 applies only to deposits made after December 31, 1970 (see paragraph (d) of § 1.1232–1), the $34.39 of compound interest to be earned on the first deposit of $100 over the term of the arrangement will not be subject to the ratable inclusion rules of section 1232(a)(3). F must include such $34.39 of interest in his gross income on December 1, 1975, the date it is paid.

(ii) For 1971, F must include $44.19 of original issue discount as interest in gross income, to be computed as follows:

(1)	(2)	(3)	(4)	(5)	(6)	(7)
Date of $100 deposit	Months to maturity	Redemption price at maturity	Original issue discount (Col.3 – $100)	Ratable monthly portion (Col.4÷Col.2)	Months on deposit in 1971	1971 original issue discount (Col.5×Col.6)
1–1–71	59	$133.73	$33.73	$0.5717	12	$6.86
2–1–71	58	133.07	33.07	.5702	11	6.27
3–1–71	57	132.42	32.42	.5688	10	5.69
4–1–71	56	131.77	31.77	.5673	9	5.11
5–1–71	55	131.12	31.12	.5658	8	4.53
6–1–71	54	130.48	30.48	.5644	7	3.95
7–1–71	53	129.84	29.84	.5630	6	3.38

(1)	(2)	(3)	(4)	(5)	(6)	(7)
Date of $100 deposit	Months to maturity	Redemption price at maturity	Original issue discount (Col.3 − $100)	Ratable monthly portion (Col.4÷Col.2)	Months on deposit in 1971	1971 original issue discount (Col.5×Col.6)
8–1–71	52	129.20	29.20	.5615	5	2.81
9–1–71	51	128.56	28.56	.5600	4	2.24
10–1–71	50	127.93	27.93	.5586	3	1.68
11–1–71	49	127.30	27.30	.5571	2	1.11
12–1–71	48	126.68	26.68	.5558	1	0.56
Total original issue discount to be included as interest in F's gross income for 1971						44.19

Example 2. (i) G is a cash method taxpayer who uses the calendar year as his taxable year. On February 1, 1971, G enters into a 4-year deposit open account arrangement with T Bank, a corporation. The terms of the deposit arrangement provide that G may deposit any amount from time to time in multiples of $50 for a period of 4 years. The terms also provide that G may not redeem any amount until February 1, 1975, except in an emergency as defined in, and subject to the qualifications provided by, Regulation Q of the Board of Governors of the Federal Reserve System. See 12 CFR 217.4(d). Interest will be compounded semiannually (on February 1 and August 1) at 6 percent, providing there is no redemption prior to February 1, 1975. However, if there is a redemption prior to such date, interest will be compounded semiannually at 5½ percent.

(ii) The schedule of deposits made by G pursuant to the arrangement, and computation of ratable monthly portion for each deposit, is set forth in the table below:

(1)	(2)	(3)	(4)	(5)	(6)
Date of deposit	Months to maturity	Amount of deposit	Redemption price at maturity	Original issue discount (Col.4 − Col.3)	Ratable monthly portion (Col.5÷Col.2)
2–1–71	48	100	$126.68	$26.68	0.5558
6–1–71	44	200	248.42	48.42	1.1005
12–1–71	38	500	602.95	102.95	2.7092
2–1–72	36	800	955.24	155.24	4.3122
3–1–72	35	800	950.56	150.56	4.3017
7–1–72	31	600	699.00	99.00	3.1935
8–1–72	30	250	289.82	39.82	1.3273

(iii) With respect to amounts on deposit pursuant to the arrangement, the amounts of original issue discount G must include as interest in his gross income for 1971 and 1972 are computed in the table below:

(1)	(2)	(3)	(4)	(5)	(6)
Date of deposit	Ratable monthly portion	Months on deposit in 1971	1971 original issue discount (Col.2× Col.3)	Months on deposit in 1972	1972 original issue discount (Col.2× Col.5)
2–1–71	$0.5558	11	$6.11	12	$6.67
6–1–71	1.1005	7	7.70	12	13.21
12–1–71	2.7092	1	2.71	12	32.51
2–1–72	4.3122			11	47.43
3–1–72	4.3017			10	43.02
7–1–72	3.1935			6	19.16
8–1–72	1.3273			5	6.64
Total original issue discount includible as interest in gross income for taxable year			16.52		168.64

(6) *Certain contingent interest arrangement*—(i) *In general.* If under the terms of a deposit arrangement:

(*a*) The holder cannot receive payment of any interest or constructively receive any interest prior to a fixed maturity date, (*b*) Interest is earned at a guaranteed minimum rate of compound interest,

(*c*) Additional contingent interest may be earned for any year at a rate not to exceed one percentage point above such guaranteed minimum rate, and

(*d*) Any additional contingent interest is credited at least annually to the depositor's account,

Then any contingent interest credited to the depositor shall be treated as creating a separate obligation subject to the rules of subdivision (ii) of this subparagraph.

(ii) *Computation.* For purposes of computing the original issue discount to be included as interest in the depositor's gross income under section 1232(a)(3) with respect to such separate obligation:

(*a*) The issue price shall be zero,

(*b*) The date of original issue shall be the date on which the contingent interest is credited to the depositor's account and begins to earn interest,

(*c*) The date of maturity shall be the fixed maturity date of the deposit, and

(*d*) The stated redemption price at maturity is the sum of the amount of such contingent interest plus any interest to be earned thereon at the guaranteed minimum rate of compound interest between such dates of original issue and maturity.

(7) *Contingent interest arrangements other than those described in subparagraph (6)*—(i) *In general.* If under the terms of a deposit arrangement, contingent interest may be earned and credited to a depositor's account, but is neither actually or constructively received before a fixed maturity date nor treated under subparagraph (6)(i) of this paragraph as creating a separate obligation, then the redemption price shall include the amount which would be credited to such account assuming the issuer, during the term of such account, credits contingent interest at the greater of the rate:

(*a*) Last credited on a similar account, or

(*b*) Equal to the average rate credited for the preceding 5 calendar years on a similar account.

(ii) *Adjustments for additional interest.* The rate taken into account under this subparagraph in computing the redemption price shall be treated as the guaranteed minimum rate for purposes of applying subparagraph (6) of this paragraph in the event the rate at which contingent interest is actually credited to the depositor's account exceeds such rate previously taken into account. If for any period the actual rate at which contingent interest is credited to the account exceeds by more than 1 percentage point the rate for the previous period taken into account under this subparagraph in computing the redemption price, a new computation shall be made to determine the ratable monthly portion of original issue discount to be included as interest in the gross income of the depositor over the remaining term of the account. For purposes of such computation, the date that interest is first so credited to the account shall be treated as the issue date, the adjusted basis of the account on such date shall be the issue price, and the redemption price shall equal the amount actually on deposit in the account on such date plus the amount which would be credited to such account assuming the issuer, during the remaining term of such account, continues to credit contingent interest at the new rate.

(iii) *Adjustment for reduced interest.* If for any period the actual rate of interest at which contingent interest is credited to the depositor's account is less than the rate for the previous period taken into account under this subparagraph in computing the redemption price, the difference between the amount of interest which would have been credited to the account at the rate for such previous period and the amount actually credited shall be allowed as a deduction against the amount of original issue discount with respect to such account required to be included in the gross income of the depositor. If an account is redeemed for a price less than the adjusted basis of the account, the depositor shall be allowed as a deduction, in computing adjusted gross income, the amount of the original issue discount he included in gross income but did not receive.

(f) *Application of section 1232(a)(3) to face-amount certificates*—(1) *In general.* Under paragraph (c)(3) of §1.1232–1, the provisions of section 1232(a)(3) and this section apply in the case of a face-amount certificate issued after December 31, 1975 (other than such a certificate issued pursuant to a written commitment which was binding on such date and at all times thereafter).

(2) *Relationship with paragraph (e) of this section.* Determinations with regard to the inclusion as interest of original issue discount on, and certain adjustments with respect to, face-amount certificates to which this section applies shall be made in a manner consistent with the rules of paragraph (e) of this section (relating to the application of section 1232 to certain deposits in financial institutions and similar arrangements). Thus, for example, if a face-amount certificate is redeemed before maturity, the holder shall be allowed a deduction in computing adjusted gross income computed in a manner consistent with the rules of paragraph (e)(2) of this section. For a further example, if under the terms of a face-amount certificate, the issuer may grant additional credits to be paid at a fixed maturity date, computations with respect to such additional credits shall be made in a manner consistent with the rules of paragraphs (e) (6) and (7) of this section (as applicable) relating to contingent interest arrangements.

[T.D. 7154, 36 FR 25005, Dec. 28, 1971; 37 FR 527, Jan. 13, 1972, as amended by T.D. 7213, 37 FR 21993, Oct. 18, 1972; 37 FR 22863, Oct. 26, 1972; T.D. 7311, 39 FR 11880, Apr. 1, 1974; T.D. 7365, 40 FR 27936, July 2, 1975]

§ 1.1232–4 Obligations with excess coupons detached.

Section 1232(c) provides that if an obligation which is issued at any time with interest coupons:

(a) Is purchased after August 16, 1954, and before January 1, 1958, and the purchaser does not receive all the coupons which first become payable more than 12 months after the date of the purchase, or

(b) Is purchased after December 31, 1957, and the purchaser does not receive all the coupons which first become payable after the date of purchase,

Any gain on the later sale or other disposition of the obligation by the purchaser (or by a transferee of the purchaser whose basis is determined by reference to the basis of the obligation in the hands of the purchaser) shall be treated as ordinary income to the extent that the fair market value of the obligation (determined as of the time of the purchase) with coupons attached exceeds the purchase price. If both the preceding sentence and section 1232(a)(2) apply with respect to the gain realized on the retirement or other disposition of an obligation, then section 1232(a)(2) shall apply only with respect to that part of the gain to which the preceding sentence does not apply. For example, a $100 bond which sells at $90 with all its coupons attached is purchased by A for $80 with 3 years' coupons detached. Three years later, A sells the bond for $92. The first $10 of the $12 profit is taxable as ordinary income. The remaining $2 gain is taxable either as ordinary income or as long-term capital gain, depending upon the application of section 1232(a)(2). Pursuant to section 7851(a)(1)(C), the regulations prescribed in this section shall also apply to taxable years beginning before January 1, 1954, and ending after December 31, 1953, although such years are subject to the Internal Revenue Code of 1939.

[T.D. 7154, 36 FR 25009, Dec. 28, 1971]

§ 1.1233–1 Gains and losses from short sales.

(a) *General.* (1) For income tax purposes, a short sale is not deemed to be consummated until delivery of property to close the short sale. Whether the recognized gain or loss from a short sale is capital gain or loss or ordinary gain or loss depends upon whether the property so delivered constitutes a capital asset in the hands of the taxpayer.

(2) Thus, if a dealer in securities makes a short sale of X Corporation stock, ordinary gain or loss results on closing of the short sale if the stock used to close the short sale was stock which he held primarily for sale to customers in the ordinary course of his trade or business. If the stock used to close the short sale was a capital asset in his hands, or if the taxpayer in this example was not a dealer, a capital gain or loss would result.

(3) Generally, the period for which a taxpayer holds property delivered to close a short sale determines whether

long-term or short-term capital gain or loss results.

(4) Thus, if a taxpayer makes a short sale of shares of stock and covers the short sale by purchasing and delivering shares which he held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), the recognized gain or loss would be considered short-term capital gain or loss. If the short sale is made through a broker and the broker borrows property to make a delivery, the short sale is not deemed to be consummated until the obligation of the seller created by the short sale is finally discharged by delivery of property to the broker to replace the property borrowed by the broker.

(5) For rules for determining the date of sale for purposes of applying under section 1091 the 61-day period applicable to a short sale of stock or securities at a loss, see paragraph (g) of §1.1091–1.

(b) *Hedging transactions.* Under section 1233(g), the provisions of section 1233 and this section shall not apply to any bona fide hedging transaction in commodity futures entered into by flour millers, producers of cloth, operators of grain elevators, etc., for the purpose of their business. Gain or loss from a short sale of commodity futures which does not qualify as a hedging transaction shall be considered gain or loss from the sale or exchange of a capital asset if the commodity future used to close the short sale constitutes a capital asset in the hands of the taxpayer as explained in paragraph (a) of this section.

(c) *Special short sales*—(1) *General.* Section 1233 provides rules as to the tax consequences of a short sale of property if gain or loss from the short sale is considered as gain or loss from the sale or exchange of a capital asset under section 1233(a) and paragraph (a) of this section and if, at the time of the short sale or on or before the date of the closing of the short sale, the taxpayer holds property substantially identical to that sold short. The term *property* is defined for purposes of such rules to include only stocks and securities (including stocks and securities dealt with on a *when issued* basis) and commodity futures, which are capital assets in the hands of the taxpayer. Certain restrictions on the application of the section to commodity futures are provided in section 1233(e) and paragraph (d)(2) of this section. Section 1233(f) contains special provisions governing the operation of rule (2) in subparagraph (2) of this paragraph in the case of a purchase and short sale of stock (as defined in subparagraph (3) qualifying as an arbitrage operation. See paragraph (f) of this section for detailed rules relating to arbitrage operations in stocks and securities.

(2) *Treatment of special short sales.* The first two rules, which are set forth in section 1233(b), are applicable whenever property substantially identical to that sold short has been held by the taxpayer on the date of the short sale for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) (determined without regard to rule (2), contained in this subparagraph, relating to the holding period) or is acquired by him after the short sale and on or before the date of the closing thereof. These rules are:

Rule (1). Any gain upon the closing of such short sale shall be considered as a gain upon the sale or exchange of a capital asset held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) (notwithstanding the period of time any property used to close such short sale has been held); and

Rule (2). The holding period of such substantially identical property shall be considered to begin (notwithstanding the provisions of section 1223) on the date of the closing of such short sale or on the date of a sale, gift, or other disposition of such property, whichever date occurs first.

(3) *Options to sell.* For the purpose of rule (1) and rule (2) in subparagraph (2) of this paragraph, the acquisition of an option to sell property at a fixed price shall be considered a short sale, and the exercise or failure to exercise such option shall be considered as a closing of such short sale, except that any option to sell property at a fixed price acquired on or after August 17, 1954 (the day after enactment of the Internal Revenue Code of 1954), shall not be considered a short sale and the exercise or failure to exercise such option shall not be considered as the closing of a

short sale provided that the option and property identified as intended to be used in its exercise are acquired on the same date. This exception shall not apply, if the option is exercised, unless it is exercised by the sale of the property so identified. In the case of any option not exercised which falls within this exception, the cost of such option shall be added to the basis of the property with which such option is identified. If the option itself does not specifically identify the property intended to be used in exercising the option, then the identification of such property shall be made by appropriate entries in the taxpayer's records within 15 days after the date such property is acquired or before November 17, 1956, whichever expiration date later occurs.

(4) *Treatment of losses.* The third rule, which is set forth in section 1233(d), is applicable whenever property substantially identical to that sold short has been held by the taxpayer on the date of the short sale for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). This rule is:

Rule (3). Any loss upon the closing of such short sale shall be considered as a loss upon the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), notwithstanding the period of time any property used to close such short sale has been held. For the purpose of this rule, the acquisition of an option to sell property at a fixed price is not considered a short sale, and the exercise or failure to exercise such option is not considered as a closing of a short sale.

(5) *Application of rules.* Rules (1) and (3) contained in subparagraphs (2) and (4) of this paragraph do not apply to the gain or loss attributable to so much of the property sold short as exceeds in quantity the substantially identical property referred to in section 1233 (b) and (d), respectively. Except as otherwise provided in section 1233(f), rule (2) in subparagraph (2) of this paragraph applies to the substantially identical property referred to in section 1233(b) in the order of the dates of the acquisition of such property, but only to so much of such property as does not exceed the quantity sold short. If property substantially identical to that sold short has been held by the taxpayer on the date of the short sale for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), or is acquired by him after the short sale and on or before the date of the closing thereof, and if property substantially identical to that sold short has been held by the taxpayer on the date of the short sale for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), all three rules are applicable.

(6) *Examples.* The following examples illustrate the application of these rules to short sales of stock in the case of a taxpayer who makes his return on the basis of the calendar year:

Example 1. A buys 100 shares of X stock at $10 per share on February 1, 1955, sells short 100 shares of X stock at $16 per share on July 1, 1955, and closes the short sale on August 2, 1955, by delivering the 100 shares of X stock purchased on February 1, 1955, to the lender of the stock used to effect the short sale. Since 100 shares of X stock had been held by A on the date of the short sale for not more than 6 months, the gain of $600 realized upon the closing of the short sale is, by application of rule (1) in subparagraph (2) of this paragraph, a short-term capital gain.

Example 2. A buys 100 shares of X stock at $10 per share on February 1, 1955, sells short 100 shares of X stock at $16 per share on July 1, 1955, closes the short sale on August 1, 1955, with 100 shares of X stock purchased on that date at $18 per share, and on August 2, 1955, sells at $18 per share the 100 shares of X stock purchased on February 1, 1955. The $200 loss sustained upon the closing of the short sale is a short-term capital loss to which section 1233(d) has no application. By application of rule (2) in subparagraph (2) of this paragraph, however, the holding period of the 100 shares of X stock purchased on February 1, 1955, and sold on August 2, 1955 is considered to begin on August 1, 1955, the date of the closing of the short sale. The $800 gain realized upon the sale of such stock is, therefore, a short-term capital gain.

Example 3. A buys 100 shares of X stock at $10 per share on February 1, 1955, sells short 100 shares of X stock at $16 per share on September 1, 1955, sells on October 1, 1955, at $18 per share the 100 shares of X stock purchased on February 1, 1955, and closes the short sale on October 1, 1955, with 100 shares of X stock purchased on that date at $18 per share. The $800 gain realized upon the sale of the 100 shares of X stock purchased on February 1, 1955, is a long-term capital gain to which section 1233(b) has no application. Since A had held 100 shares of X stock on the date of the short sale for more than 6 months, the $200 loss sustained upon the closing of the short sale is, by application of rule (3) in subparagraph (4) of this paragraph, a long-term capital loss. If, instead of purchasing 100 shares of X stock on October 1, 1955, A closed the short sale with the 100 shares of stock purchased on February 1, 1955, the $600 gain realized on the closing of the short sale would be a long-term capital gain to which section 1233(b) has no application.

Example 4. A sells short 100 shares of X stock at $16 per share on February 1, 1955. He buys 250 shares of X stock on March 1, 1955, at $10 per share and holds the latter stock until September 2, 1955 (more than 6 months), at which time, 100 shares of the 250 shares of X stock are delivered to close the short sale made on February 1, 1955. Since substantially identical property was acquired by A after the short sale and before it was closed, the $600 gain realized on the closing of the short sale is, by application of rule (1) in subparagraph (2) of this paragraph, a short-term capital gain. The holding period of the remaining 150 shares of X stock is not affected by section 1233 since this amount of the substantially identical property exceeds the quantity of the property sold short.

Example 5. A buys 100 shares of X stock at $10 per share on February 1, 1955, buys an additional 100 shares of X stock at $20 per share on July 1, 1955, sells short 100 shares of X stock at $30 per share on September 1, 1955, and closes the short sale on February 1, 1956, by delivering the 100 shares of X stock purchased on February 1, 1955, to the lender of the stock used to effect the short sale. Since 100 shares of X stock had been held by A on the date of the short sale for not more than 6 months, the gain of $2,000 realized upon the closing of the short sale is, by application of rule (1) in subparagraph (2) of this paragraph, a short-term capital gain and the holding period of the 100 shares of X stock purchased on July 1, 1955, is considered, by application of rule (2) in subparagraph (2) of this paragraph to begin on February 1, 1956, the date of the closing of the short sale. If, however, the 100 shares of X stock purchased on July 1, 1955, had been used by A to close the short sale, then, since 100 shares of X stock had been held by A on the date of the short sale for not more than 6 months, the gain of $1,000 realized upon the closing of the short sale would be, by application of rule (1) in subparagraph (2) of this paragraph, a short-term capital gain, but the holding period of the 100 shares of X stock purchased on February 1, 1955, would not be affected by section 1233. If, on the other hand, A purchased an additional 100 shares of X stock at $40 per share on February 1, 1956, and used such shares to close the short sale at that time, then, since 100 shares of X stock had been held by A on the date of the short sale for more than 6 months, the loss of $1,000 sustained upon the closing of the short sale would be, by application of rule (3) in subparagraph (4) of this paragraph, a long-term capital loss, and since 100 shares of X stock had been held by A on the date of the short sale for not more than 6 months, the holding period of the 100 shares of X stock purchased on July 1, 1955, would be considered, by application of rule (2) in subparagraph (2) of this paragraph, to begin on February 1, 1956, but the holding period of the 100 shares of X stock purchased on February 1, 1955, would not be affected by section 1233.

Example 6. A buys 100 shares of X preferred stock at $10 per share on February 1, 1955. On July 1, 1955, he enters into a contract to sell 100 shares of XY common stock at $16 per share when, as, and if issued pursuant to a particular plan of reorganization. On August 2, 1955, he receives 100 shares of XY common stock in exchange for the 100 shares of X preferred stock purchased on February 1, 1955, and delivers such common shares in performance of his July 1, 1955, contract. Assume that the exchange of the X preferred stock for the XY common stock is a tax-free exchange pursuant to section 354(a)(1), and that on the basis of all of the facts and circumstances existing on July 1, 1955, the *when issued* XY common stock is substantially identical to the X preferred stock. Since 100 shares of substantially identical property had been held by A for not more than 6 months on the date of entering into the July 1, 1955, contract of sale, the gain of $600 realized upon the closing of the contract of sale is, by application of rule (1) in subparagraph (2) of this paragraph, a short-term capital gain.

(d) *Other rules for the application of section 1233*—(1) *Substantially identical property.* The term *substantially identical property* is to be applied according to the facts and circumstances in each case. In general, as applied to stocks or securities, the term has the same meaning as the term *substantially identical stock or securities* used in section 1091, relating to wash sales of stocks or securities. For certain restrictions on the term as applied to commodity futures see subparagraph (2) of this paragraph. Ordinarily, stocks or securities of one corporation are not considered substantially identical to stocks or securities of another corporation. In certain situations they may be substantially identical; for example, in the case of a reorganization the facts and circumstances may be such that the stocks and securities of predecessor and successor corporations are substantially identical property. Similarly, bonds or preferred stock of a corporation are not ordinarily considered substantially identical to the common stock of the same corporation. However, in certain situations, as, for example, where the preferred stock or bonds are convertible into common stock of the same corporation, the relative values, price changes, and other circumstances may be such as to make such bonds or preferred stock and the common stock substantially identical property. Similarly, depending on the facts and circumstances, the term may apply to the stocks and securities to be received in a corporate reorganization or recapitalization, traded in on a when issued basis, as compared with the stocks or securities to be exchanged in such reorganization or recapitalization.

(2) *Commodity futures.* (i) As provided in section 1233(e)(2)(B), in the case of futures transactions in any commodity on or subject to the rules of a board of trade or commodity exchange, a commodity future requiring delivery in one calendar month shall not be considered as property substantially identical to another commodity future requiring delivery in a different calendar month. For example, commodity futures in May wheat and July wheat are not considered, for the purpose of section 1233, substantially identical property. Similarly, futures in different commodities which are not generally through custom of the trade used as hedges for each other (such as corn and wheat, for example) are not considered substantially identical property. If commodity futures are otherwise substantially identical property, the mere fact that they were procured through different brokers will not remove them from the scope of the term *substantially identical property.* Commodity futures procured on different markets may come within the term *substantially identical property* depending upon the facts and circumstances in the case, with the historical similarity in the price movements in the two markets as the primary factor to be considered.

(ii) Section 1233(e)(3), relating to so-called *arbitrage* transactions in commodity futures, provides that where a taxpayer enters into two commodity futures transactions on the same day, one requiring delivery by him in one market and the other requiring delivery to him of the same (or substantially identical) commodity in the same calendar month in a different market, and the taxpayer subsequently closes both such transactions on the same day, section 1233 shall have no application to so much of the commodity involved in either such transaction as does not exceed in quantity the commodity involved in the other. Section 1233(f), relating to arbitrage operations in stocks or securities, has no application to arbitrage transactions in commodity futures.

(iii) The following example indicates the application of section 1233 to a commodity futures transaction:

Example: A, who makes his return on the basis of the calendar year, on February 1, 1955, enters into a contract through broker X to purchase 10,000 bushels of December wheat on the Chicago market at $2 per bushel. On July 1, 1955, he enters into a contract through broker Y to sell 10,000 bushels of December wheat on the Chicago market at $2.25 per bushel. On August 2, 1955, he closes both transactions at $2.50 per bushel. The $2,500 loss sustained on the closing of the short sale is a short-term capital loss to which section 1233(d) has no application. By application of rule (2) in paragraph (c)(2) of this section, however, the holding period of the futures contract entered into on February 1, 1955, is considered to begin on August 2, 1955, the date of the closing of the short sale. The $5,000 gain realized upon the closing of such contract is, therefore, a short-term capital gain.

(3) *Husband and wife.* Section 1233(e)(2)(C) provides that, in the case of a short sale of property by an individual, the term *taxpayer* in the application of subsections (b), (d), and (e) shall be read as *taxpayer or his spouse.* Thus, if the spouse of a taxpayer holds or acquires property substantially identical to that sold short by the taxpayer, and other conditions of subsections (b), (d), and (e) are met, then the rules set forth therein are applicable to the same extent as if the taxpayer held or acquired the substantially identical property. For this purpose, an individual who is legally separated from the taxpayer under a decree of divorce or of separate maintenance

shall not be considered as the spouse of the taxpayer.

(e) *Special rule for short sales by dealers in securities under certain circumstances.* In the case of a short sale of stock (as defined in subparagraph (3) of this paragraph) after December 31, 1957, by a dealer in securities, section 1233(e)(4)(A) provides that the holding period of substantially identical stock which he has held as an investment for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) shall be determined in accordance with section 1233(b)(2) unless such short sale is closed within 20 days of the date on which it was made. See rule (2) in paragraph (c)(2) of this section for the purpose of determining the holding period of such substantially identical stock. In addition, section 1233(e)(4)(B) provides that for the purpose of the special rule of section 1233(e)(4)(A), the acquisition of an option to sell property at a fixed price shall be considered a short sale, and the exercise or failure to exercise such option shall be considered a closing of such short sale. For purposes of this paragraph:

(1) Whether or not a taxpayer is a *dealer in securities* shall be determined in accordance with the meaning of the term for purposes of section 1236;

(2) Whether or not stock is *substantially identical* with other property shall be determined in accordance with the provisions of paragraph (d)(1) of this section; and

(3) The term *stock* means:

(i) Any share or certificate of stock,

(ii) Any bond or other evidence of indebtedness which is convertible into a share or certificate of stock, and

(iii) Any evidence of an interest in, or right to subscribe to or purchase, any of the items described in subdivision (i) or (ii) of this subparagraph.

(f) *Arbitrage operations in stocks and securities and holding periods*—(1) *General rule.* (i) In the case of a short sale entered into as part of an arbitrage operation, rule (2) of paragraph (c)(2) of this section shall apply first to substantially identical property acquired for arbitrage operations and held by the taxpayer at the close of business on the day of the short sale. The holding period of substantially identical property not acquired for arbitrage operations shall be affected only to the extent that the amount of property sold short exceeds the amount of substantially identical property acquired for arbitrage operations and held by the tapayer at the close of business on the day of the short sale.

(ii) If the substantially identical property acquired for arbitrage operations is disposed of without closing the short sale so that a net short position in assets acquired for arbitrage operations is created, a short sale in the amount of such net short position will be deemed to have been made on the day such net short position is created. Rule (2) of paragraph (c)(2) of this section will then apply to substantially identical property not acquired for arbitrage operations to the same extent as if the taxpayer, on the day such net short position is created, sold short an amount equal to the amount of the net short position in a transaction not entered into as part of an arbitrage operation.

(iii) The following examples illustrate the application of rule (2) of paragraph (c)(2) of this section to arbitrage operations:

Example 1. On August 13, 1957, A buys 100 bonds of X Corporation for purposes other than arbitrage operations. The bonds are convertible at the option of the bondholders into common stock of X Corporation on the basis of one bond for one share of stock. On November 1, 1957, A sells short 100 shares of common stock of X Corporation in a transaction identified and intended to be part of an arbitrage operation and on the same day buys another 100 bonds of X Corporation in a transaction identified and intended to be part of the same arbitrage operation. The bonds acquired on both August 13, 1957, and November 1, 1957, are, on the basis of all the facts and circumstances, substantially identical to the common stock of X Corporation. On December 1, 1957, A closes the short sale with 100 shares of common stock of X Corporation acquired on that day. The holding period of the bonds acquired on November 1, by application of rule (2) of paragraph (c)(2) of this section, will be deemed to begin on December 1 and the holding period of the bonds acquired on August 13 will be unaffected. If, instead of purchasing the 100 shares of common stock of X Corporation on December 1, 1957, A had converted the bonds acquired on November 1 into common stock and, on December 1, 1957, used the stock so acquired to close the short sale, rule (2) of paragraph (c)(2) of this section would similarly have no effect on the holding period of the bonds acquired on August 13.

Example 2. Assume the same facts as in example (1), except that A, on December 1, sells the bonds acquired on November 1 (or converts such bonds into common stock and sells the stock), but does not close the short sale. The sale of the bonds (or stock) creates a net short position in assets acquired for arbitrage operations which is deemed to be a short sale made on December 1. Accordingly, the holding period of the bonds acquired on August 13 will, by application of rule (2) of paragraph (c)(2) of this section, begin on the date such short sale is closed or on the date of sale, gift, or other disposition of such bonds, whichever date occurs first.

(2) *Right to receive or acquire property.* (i) For purposes of section 1233(f) (1) and (2) and subparagraph (1) of this paragraph, a taxpayer will be deemed to hold substantially identical property acquired for arbitrage operations at the close of any business day if, by virtue of the ownership of other property acquired for arbitrage operations (whether or not substantially identical) or because of any contract entered into by the taxpayer in an arbitrage operation, he then has the right to receive or acquire such substantially identical property.

(ii) The application of section 1233(f)(3) and subdivision (i) of this subparagraph may be illustrated by the following example:

Example: A acquires on August 13, 1957, 100 shares of common stock of X Corporation for purposes other than arbitrage operations. On November 1, A sells short, in a transaction identified and intended to be part of an arbitrage operation, 100 shares of X common stock. On the same day, in a transaction also identified and intended to be part of the same arbitrage operation, A contracts to purchase 100 shares of preferred stock of X. The preferred stock of X may be converted into common stock of X on the basis of one share of preferred stock for one share of common stock. The preferred stock is not actually delivered to A until November 3. Since A has contracted before the close of business on the date of the short sale, as part of an arbitrage operation, to purchase property by virtue of which he has the right to receive or acquire substantially identical property to that sold short, he will be deemed, for purposes of section 1233(f) (1) and (2), to hold such substantially identical property at the close of business on the date of the short sale. For purposes of this subparagraph, it is immaterial whether, on the basis of all the facts and circumstances, the preferred stock of X is substantially identical to the common stock of X. The short sale on November 1 does not affect the holding period of the 100 shares of X Corporation common stock purchased on August 13, 1957. Because of the operation of rule (2) of paragraph (c)(2) of this section, the holding period of the preferred stock acquired as the result of A's contract to purchase it as part of an arbitrage operation (or the common stock which A acquires by conversion of such preferred stock into common stock) will not begin until the short sale entered into in the arbitrage operation is closed.

(3) *Definition of arbitrage operations.* For the purpose of section 1233(f), arbitrage operations are transactions involving the purchase and sale of property entered into for the purpose of profiting from a current difference between the price of the property purchased and the price of the property sold. Assets acquired for arbitrage operations include only stocks and securities and rights to acquire stocks and securities. The property purchased may be either identical to the property sold or, if not so identical, such that its acquisition will entitle the taxpayer to acquire property which is so identical. Thus, the purchase of bonds or preferred stock convertible, at the holder's option, into common stock and the short sale of the common stock which may be acquired therefor, or the purchase of stock rights and the short sale of the stock to be acquired on the exercise of such rights, may qualify as arbitrage operations. A transaction will qualify as an arbitrage operation under section 1233(f) only if the taxpayer properly identifies the transaction as an arbitrage operation on his records as soon as he is able to do so. Such identification must ordinarily be entered in the taxpayer's records on the day of the transaction. Property acquired in a transaction properly identified as part of an arbitrage operation is the only property which will be deemed acquired for an arbitrage operation. The provisions of section 1233(f) and this paragraph shall continue to apply to property acquired in a transaction properly identified as an arbitrage operation although, because of subsequent events, e.g., a change in the value of bonds so acquired or of stock

into which such bonds may be converted, the taxpayer sells such property outright rather than using it to complete the arbitrage operation.

(4) *Effective date of section 1233(f).* Section 1233(f), relating to arbitrage operations involving short sales of property, is effective only with respect to taxable years ending after August 12, 1955, and only with respect to short sales made after such date.

[T.D. 6500, 25 FR 12011, Nov. 26, 1960, as amended by T.D. 6494, 25 FR 9372, Sept. 30, 1960; T.D. 6926, 32 FR 11468, Aug. 9, 1967; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1233–2 Hedging transactions.

The character of gain or loss on a short sale that is (or is identified as being) part of a hedging transaction is determined under the rules of § 1.1221–2.

[T.D. 8555, 59 FR 36367, July 18, 1994]

§ 1.1234–1 Options to buy or sell.

(a) *Sale or exchange*—(1) *Capital assets.* Gain or loss from the sale or exchange of an option (or privilege) to buy or sell property which is (or if acquired would be) a capital asset in the hands of the taxpayer holding the option is considered as gain or loss from the sale or exchange of a capital asset (unless, under the provisions of subparagraph (2) of this paragraph, the gain or loss is subject to the provisions of section 1231). The period for which the taxpayer has held the option determines whether the capital gain or loss is short-term or long-term.

(2) *Section 1231 transactions.* Gain or loss from the sale or exchange of an option to buy or sell property is considered a gain or loss subject to the provisions of section 1231 if, had the sale or exchange been of the property subject to the option, held by the taxpayer for the length of time he held the option, the sale or exchange would have been subject to the provisions of section 1231.

(3) *Other property.* Gain or loss from the sale or exchange of an option to buy or sell property which is not (or if acquired would not be) a capital asset in the hands of the taxpayer holding the option is considered ordinary income or loss (unless under the provisions of subparagraph (2) of this paragraph, the gain or loss is subject to the provisions of section 1231).

(b) *Failure to exercise option.* If the holder of an option to buy or sell property incurs a loss on failure to exercise the option, the option is deemed to have been sold or exchanged on the date that it expired. Any such loss to the holder of an option is treated under the general rule provided in paragraph (a) of this section. In general, any gain to the grantor of an option arising from the failure of the holder to exercise it, and any gain or loss realized by the grantor of an option as a result of a closing transaction, such as repurchasing the option from the holder, is considered ordinary income or loss. However, for the treatment of gain or loss from a closing transaction with respect to or gain on the lapse of an option granted in stock, securities, commodities or commodity futures, see section 1234(b) and § 1.1234–3. For special rules for grantors of straddles applicable to certain options granted on or before September 1, 1976, see § 1.1234–2.

(c) *Certain options to sell property at a fixed price.* Section 1234 does not apply to a loss on the failure to exercise an option to sell property at a fixed price which is acquired on the same day on which the property identified as intended to be used in exercising the option is acquired. Such a loss is not recognized, but the cost of the option is added to the basis of the property with which it is identified. See section 1233(c) and the regulations thereunder.

(d) *Dealers in options to buy or sell.* Any gain or loss realized by a dealer in options from the sale or exchange or an option to buy or sell property is considered ordinary income or loss under paragraph (a)(3) of this section. A dealer in options to buy or sell property is considered a dealer in the property subject to the option.

(e) *Other exceptions.* Section 1234 does not apply to gain resulting from the sale or exchange of an option:

(1) To the extent that the gain is in the nature of compensation (see sections 61 and 421, and the regulations thereunder, relating to employee stock options);

(2) If the option is treated as section 306 stock (see section 306 and the regulations thereunder, relating to dispositions of certain stock); or

(3) To the extent that the gain is a distribution of earnings or profits taxable as a dividend (see section 301 and the regulations thereunder, relating to distributions of property).

(4) Acquired by the taxpayer before March 1, 1954, if in the hands of the taxpayer such option is a capital asset (whether or not the property to which the option relates is, or would be if acquired by the taxpayer, a capital asset in the hands of the taxpayer).

(f) *Limitations on effect of section.* Losses to which section 1234 applies are subject to the limitations on losses under sections 165(c) and 1211 when applicable. Section 1234 does not permit the deduction of any loss which is disallowed under any other provision of law. In addition, section 1234 does not apply to an option to lease property, but does apply to an option to buy or sell a lease. Thus, an option to obtain all the right, title, and interest of a lessee in leased property is subject to the provisions of section 1234, but an option to obtain a sublease from the lessee is not. Furthermore, if section 1234 applies to an option to buy or sell a lease, it is the character the lease itself, if acquired, would have in the hands of the taxpayer, and not the character of the property leased, which determines the treatment of gain or loss experienced by the taxpayer with respect to such an option.

(g) *Examples.* The rules set forth in this section may be illustrated by the following examples:

Example 1. A taxpayer is considering buying a new house for his residence and acquires an option to buy a certain house at a fixed price. Although the property goes up in value, the taxpayer decides he does not want the house for his residence and sells the option for more than he paid for it. The gain which taxpayer realized is a capital gain since the property, if acquired, would have been a capital asset in his hands.

Example 2. Assume the same facts as in example (1), except that the property goes down in value, and the taxpayer decides not to purchase the house. He sells the option at a loss. While this is a capital loss under section 1234, it is not a deductible loss because of the provisions of section 165(c).

Example 3. A dealer in industrial property acquires an option to buy an industrial site and fails to exercise the option. The loss is an ordinary loss since he would have held the property for sale to customers in the ordinary course of his trade or business if he had acquired it.

[T.D. 6500, 25 FR 12013, Nov. 26, 1960, as amended by T.D. 7652, 44 FR 62282, Oct. 30, 1979]

§ 1.1234–2 Special rule for grantors of straddles applicable to certain options granted on or before September 1, 1976.

(a) *In general.* Section 1234(c)(1) provides a special rule applicable in the case of gain on the lapse of an option granted by the taxpayer as part of a straddle. In such a case, the gain shall be deemed to be gain from the sale or exchange of a capital asset held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) on the day that the option expired. Thus, such gain shall be treated as a short-term capital gain, as defined in section 1222(1). Section 1234(c)(1) does not apply to any person who holds securities (including options to acquire or sell securities) for sale to customers in the ordinary course of his trade or business.

(b) *Definitions.* The following definitions apply for purposes of section 1234(c) and this section.

(1) *Straddle.* The term *straddle* means a simultaneously granted combination of an option to buy (i.e., a *call*) and an option to sell (i.e., a *put*) the same quantity of a security at the same price during the same period of time.

(2) *Security.* The term *security* has the meaning assigned to such term by section 1236(c) and the regulations thereunder. Thus, for example, the term *security* does not include commodity futures.

(3) *Grantor.* The term *grantor* means the writer or issuer of the option contracts making up the straddle.

(4) *Multiple option.* The term *multiple option* means a simultaneously granted combination of an option to buy plus an option to sell plus one or more additional options to buy or sell a security.

(c) *Special rules in the case of a multiple option.* (1) If, in the case of a multiple option, the number of the options to sell and the number of the options to buy are the same and if the terms of all of the options are identical (as to the quantity of the security, price, and period of time), then each of the options contained in the multiple option shall be deemed to be a component of a straddle for purposes of section 1234(c)(1) and paragraph (a) of this section.

(2) If, in the case of a multiple option, the number of the options to sell and the number of the options to buy are not the same or if the terms of all of the options are not identical (as to the quantity of the security, price, and period of time), then section 1234(c)(1) applies to gain on the lapse of an option granted as part of the multiple option only if:

(i) The grantor of the multiple option identifies the two options which comprise each straddle contained in the multiple option in the manner prescribed in subparagraph (3) of this paragraph; or

(ii) It is clear from the facts and circumstances that the lapsed option was part of a straddle. See example (6) of paragraph (f) of this section. A multiple option to which this subdivision applies may not be regarded as consisting of a number of straddles which exceeds the lesser of the options to sell or the options to buy as the case may be. For example, if a multiple option of five puts and four calls is granted it may not be regarded as consisting of more than four straddles, although the particular facts and circumstances could dictate that the option consists of less than four straddles.

(3) The identification required under subparagraph (2)(i) of this paragraph shall be made by the grantor indicating in his records, to the extent feasible, the individual serial number of, or other characteristic symbol imprinted upon, each of the two individual options which comprise the straddle, or by adopting any other method of identification satisfactory to the Commissioner. Such identification must be made before the expiration of the 15th day after the day on which the multiple option is granted. The preceding sentence shall apply only with respect to multiple options granted after January 24, 1972. In computing the 15-day period prescribed by this paragraph, the first day of such period is the day following the day on which the multiple option is granted.

(d) *Allocation of premium.* The allocation of a premium received for a straddle or a multiple option between or among the component options thereof shall be made on the basis of the relative market value of such component options at the time of their issuance or on any other reasonable and consistently applied basis which is acceptable to the Commissioner.

(e) *Effective date*—(1) *In general.* This section, relating to special rules for grantors of straddles, shall apply only with respect to straddle transactions entered into after January 25, 1965, and before September 2, 1976.

(2) *Special rule.* For a special rule with respect to the identification of a straddle granted as part of a multiple option, see paragraph (c).

(f) *Illustrations.* The application of section 1234(c) and this section may be illustrated by the following examples:

Example 1. On February 1, 1971, taxpayer A, who files his income tax returns on a calendar year basis, issues a straddle for 100 shares of X Corporation stock and receives a premium of $1,000. The options comprising the straddle were to expire on August 10, 1971. A has allocated $450 (45 percent of $1,000) of the premium to the put and $550 (55 percent of $1,000) to the call. On March 1, 1971, B, the holder of the put, exercises his option. C, the holder of the call, fails to exercise his option prior to its expiration. As a result of C's failure to exercise his option, A realizes a short-term capital gain of $550 (that part of the premium allocated to the call) on August 10, 1971.

Example 2. Assume the same facts as in example (1), except that C exercises his call on March 1, 1971, and B fails to exercise his put prior to its expiration. As a result of B's failure to exercise his option, A realizes a short-term capital gain of $450 (that part of the premium allocated to the put) on August 10, 1971.

Example 3. Assume the same facts as in example (1), except that both B and C fail to exercise their respective options. As a result of the failure of B and C to exercise their options, A realizes short-term capital gains of $1,000 (the premium for granting the straddle) on August 10, 1971.

Example 4. On March 1, 1971, taxpayer D issues a multiple option containing five puts and five calls. Each put and each call is for the same number of shares of Y Corporation stock, at the same price, and for the same period of time. Thus, each of the puts and calls is deemed to be a component part of a straddle. The puts and calls comprising the multiple option were to expire on September 10, 1971. All of the puts are exercised, and all of the calls lapse. As a result of the lapse of the calls, D realizes a short-term capital gain on September 10, 1971, in the amount of that part of the premium for the multiple option which is allocable to all of the calls.

Example 5. Assume the same facts as in example (4) except that one of the puts and two of the calls lapse and the remaining puts and calls are exercised. As a result, on September 10, 1971, D realizes a short-term capital gain in the amount of that part of the premium for the multiple option which is allocable to both of the lapsed calls and the lapsed put.

Example 6. On March 1, 1971, taxpayer E issues a multiple option containing five puts and four calls. Each put and call is for the same number of shares of Y Corporation stock at the same price and for the same period of time, E does not identify the puts and calls as parts of straddles in the manner prescribed in paragraph (c)(3) of this section. However, because the terms of all of the puts and all of the calls are identical four of the puts and four of the calls are deemed to be a component part of a straddle. The puts and calls comprising the multiple option were to expire on September 10, 1971. Four of the puts are exercised and the four calls and one of the puts lapse. As a result, on September 10, 1971, E realizes short-term capital gain in the amount of that part of the premium for the multiple option which is allocable to the four lapsed calls and realizes ordinary income in the amount of that part of such premium which is allocable to the lapsed put. If E had identified four of the puts and four of the calls as constituting parts of straddles in the manner prescribed in paragraph (c)(3) of this section and the put that lapsed constituted part of a straddle, then the gain on the lapse of the put would also be short-term capital gain.

Example 7. Assume the same facts as in example (6) except that two of the puts are for Y Corporation stock at a price which is greater than that of the other puts and the other calls and that two of the calls expire on October 10, 1971. Additionally, assume that the put which lapses is at the lower price. The two puts offering the Y Corporation stock at the greater price and the two calls with the later expiration date cannot be deemed to be component parts of a straddle. Thus, only two of the puts and two of the calls are deemed to be a component part of a straddle. As a result, E realizes income as follows:

(i) On September 10, 1971, short-term capital gain in the amount of that part of the premium for the multiple option which is allocable to the two lapsed calls with the expiration date of September 10, 1971, and ordinary income in the amount of that part of such premium which is allocable to the lapsed put. If E had identified two of the puts at the lower price and the two calls with the expiration date of September 10, 1971, as constituting parts of straddles in the manner prescribed in paragraph (c)(3) of this section and if the put that lapsed was one of those identified as constituting a part of a straddle, then the gain on the lapse of that put would also be short-term capital gain.

(ii) On October 10, 1971, ordinary income in the amount of that part of the premium for the multiple option which is allocable to the lapsed calls with an expiration date of October 10, 1971.

[T.D. 7152, 36 FR 24801, Dec. 23, 1971, as amended by T.D. 7210, 37 FR 20688, Oct. 3, 1972; T.D. 7652; 44 FR 62282, Oct. 30, 1979; 44 FR 67657, Nov. 27, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1234–3 Special rules for the treatment of grantors of certain options granted after September 1, 1976.

(a) *In general.* In the case of the grantor of an option (including an option granted as part of a straddle or multiple option), gain of loss from any closing transaction with respect to, and gain on the lapse of, an option in property shall be treated as a gain or loss from the sale or exchange of a capital asset held not more than 1 year. (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(b) *Definitions.* The following definitions apply for purposes of this section.

(1) The term *closing transaction* means any termination of a grantor's obligation under an option to buy property (a *call*) or an option to sell property (a *put*) other than through the exercise or lapse of the option. For example, the grantor of a call may effectively terminate his obligation under the option by either:

(i) Repurchasing the option from the holder or

(ii) Purchasing from an options exchange a call with terms identical to the original option granted and designating the purchase as a closing transaction.

A put or call purchased to make a closing transaction is identical as to striking price and expiration date. Such put or call need not match the granted option in time of creation, date of acquisition, cost of the entire option or units therein, or number of units subject to the option. If such put or call terminates only part of a grantor's obligation under the granted option, a closing transaction is made as to that part.

(2) The term *property* means stocks and securities (including stocks and securities dealt with on a *when issued* basis), commodities, and commodity futures.

(3) The term *grantor* means the writer or issuer of an option.

(4) The term *straddle* means a simultaneously granted combination of an option to buy and an option to sell the same quantity of property at the same price during the same period of time.

(5) The term *multiple option* means a simultaneously granted combination of an option to buy plus an option to sell plus one or more additional options to buy or sell property.

(c) *Nonapplicability to broker-dealers.* The provisions of this section do not apply to any option granted in the ordinary course of the taxpayer's trade or business of granting options. However, the provisions of this section do apply to:

(1) Gain from any closing transaction with respect to an option and gain on lapse of an option if gain on the sale or exchange of the option would be considered capital gain by a dealer in securities under section 1236(a) and the regulations thereunder, and

(2) Loss from any closing transaction with respect to an option if loss on the sale or exchange of the option would not be considered ordinary loss by a dealer in securities under section 1236(b) and the regulations thereunder.

The preceding sentence shall be applied with respect to dealers in *property* (as defined in paragraph (b)(2) of this section) and without regard to the limitation of the applicability of section 1236 to dealers in securities.

(d) *Nonapplicability to compensatory options.* Section 1234 does not apply to options to purchase stock or other property which are issued as compensation for services, as described in sections 61, 83, and 421 and the regulations thereunder.

(e) *Premium allocation for simultaneously granted options.* The allocation of a premium received for a straddle or multiple option between or among the component options thereof shall be made on the basis of the relative market value of the component options at the time of their issuance or on any other reasonable and consistently applied basis which is acceptable to the Commissioner.

(f) *Effective date.* This section, relating to special rules for the treatment of grantors of certain options, shall apply to options granted after September 1, 1976.

[T.D. 7652, 44 FR 62282, Oct. 30, 1979; 44 FR 67657, Nov. 27, 1979]

§1.1234–4 Hedging transactions.

The character of gain or loss on an acquired or a written option that is (or is identified as being) part of a hedging transaction is determined under the rules of §1.1221–2.

[T.D. 8555, 59 FR 36367, July 18, 1994]

§1.1235–1 Sale or exchange of patents.

(a) *General rule.* Section 1235 provides that a transfer (other than by gift, inheritance, or devise) of all substantial rights to a patent, or of an undivided interest in all such rights to a patent, by a holder to a person other than a related person constitutes the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), whether or not payments therefor are:

(1) Payable periodically over a period generally coterminous with the transferee's use of the patent, or

(2) Contingent on the productivity, use, or disposition of the property transferred.

(b) *Scope of section 1235.* If a transfer is not one described in paragraph (a) of this section, section 1235 shall be disregarded in determining whether or not such transfer is the sale or exchange of a capital asset. For example, a transfer by a person other than a holder or a transfer by a holder to a related person is not governed by section 1235. The tax consequences of such transfers shall be determined under other provisions of the internal revenue laws.

(c) *Special rules*—(1) *Payments for infringement.* If section 1235 applies to the transfer of all substantial rights to a patent (or an undivided interest therein), amounts received in settlement of, or as the award of damages in, a suit for compensatory damages for infringement of the patent shall be considered payments attributable to a transfer to which section 1235 applies to the extent that such amounts relate to the interest transferred. For taxable years beginning before January 1, 1964, see section 1304, as in effect before such date, and § 1.1304A–1 for treatment of compensatory damages for patent infringement.

(2) *Payments to an employee.* Payments received by an employee as compensation for services rendered as an employee under an employment contract requiring the employee to transfer to the employer the rights to any invention by such employee are not attributable to a transfer to which section 1235 applies. However, whether payments received by an employee from his employer (under an employment contract or otherwise) are attributable to the transfer by the employee of all substantial rights to a patent (or an undivided interest therein) or are compensation for services rendered the employer by the employee is a question of fact. In determining which is the case, consideration shall be given not only to all the facts and circumstances of the employment relationship but also to whether the amount of such payments depends upon the production, sale, or use by, or the value to, the employer of the patent rights transferred by the employee. If it is determined that payments are attributable to the transfer of patent rights, and all other requirements under section 1235 are met, such payments shall be treated as proceeds derived from the sale of a patent.

(3) *Successive transfers.* The applicability of section 1235 to transfers of undivided interest in patents, or to successive transfers of such rights, shall be determined separately with respect to each transfer. For example, X, who is a holder, and Y, who is not a holder, transfer their respective two-thirds and one-third undivided interests in a patent to Z. Assume the transfer by X qualifies under section 1235 and that X in a later transfer acquires all the rights with respect to Y's interest, including the rights to payments from Z. One-third of all the payments thereafter received by X from Z are not attributable to a transfer to which section 1235 applies.

(d) *Payor's treatment of payments in a transfer under section 1235.* Payments made by the transferee of patent rights pursuant to a transfer satisfying the requirements of section 1235 are payments of the purchase price for the patent rights and are not the payment of royalties.

(e) *Effective date.* Amounts received or accrued, and payments made or accrued, during any taxable year beginning after December 31, 1953 and ending after August 16, 1954, pursuant to a transfer satisfying the requirements of section 1235, whether such transfer occurred in a taxable year to which the Internal Revenue Code of 1954 applies, or in a year prior thereto, are subject to the provisions of section 1235.

(f) *Nonresident aliens.* For the special rule relating to nonresident aliens who have gains arising from a transfer to which section 1235 applies, see section 871 and the regulations thereunder. For withholding of tax from income of nonresident aliens, see section 1441 and the regulations thereunder.

[T.D. 6500, 25 FR 12014, Nov. 26, 1960, as amended by T.D. 6885, 31 FR 7803, June 2, 1966; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1235–2 Definition of terms.

For the purposes of section 1235 and § 1.1235–1:

(a) *Patent.* The term *patent* means a patent granted under the provisions of title 35 of the United States Code, or any foreign patent granting rights generally similar to those under a United States patent. It is not necessary that the patent or patent application for the invention be in existence if the requirements of section 1235 are otherwise met.

(b) *All substantial rights to a patent.* (1) The term *all substantial rights to a patent* means all rights (whether or not then held by the grantor) which are of value at the time the rights to the patent (or an undivided interest therein) are transferred. The term *all substantial rights to a patent* does not include a grant of rights to a patent:

(i) Which is limited geographically within the country of issuance;

(ii) Which is limited in duration by the terms of the agreement to a period less than the remaining life of the patent;

(iii) Which grants rights to the grantee, in fields of use within trades or industries, which are less than all the rights covered by the patent, which exist and have value at the time of the grant; or

(iv) Which grants to the grantee less than all the claims or inventions covered by the patent which exist and have value at the time of the grant.

The circumstances of the whole transaction, rather than the particular terminology used in the instrument of transfer, shall be considered in determining whether or not all substantial rights to a patent are transferred in a transaction.

(2) Rights which are not considered substantial for purposes of section 1235 may be retained by the holder. Examples of such rights are:

(i) The retention by the transferor of legal title for the purpose of securing performance or payment by the transferee in a transaction involving transfer of an exclusive license to manufacture, use, and sell for the life of the patent;

(ii) The retention by the transferor of rights in the property which are not inconsistent with the passage of ownership, such as the retention of a security interest (such as a vendor's lien), or a reservation in the nature of a condition subsequent (such as a provision for forfeiture on account of nonperformance).

(3) Examples of rights which may or may not be substantial, depending upon the circumstances of the whole transaction in which rights to a patent are transferred, are:

(i) The retention by the transferor of an absolute right to prohibit sublicensing or subassignment by the transferee;

(ii) The failure to convey to the transferee the right to use or to sell the patent property.

(4) The retention of a right to terminate the transfer at will is the retention of a substantial right for the purposes of section 1235.

(c) *Undivided interest.* A person owns an *undivided interest* in all substantial rights to a patent when he owns the same fractional share of each and every substantial right to the patent. It does not include, for example, a right to the income from a patent, or a license limited geographically, or a license which covers some, but not all, of the valuable claims or uses covered by the patent. A transfer limited in duration by the terms of the instrument to a period less than the remaining life of the patent is not a transfer of an undivided interest in all substantial rights to a patent.

(d) *Holder.* (1) The term *holder* means any individual:

(i) Whose efforts created the patent property and who would qualify as the *original and first* inventor, or joint inventor, within the meaning of title 35 U.S.C., or

(ii) Who has acquired his interest in the patent property in exchange for a consideration paid to the inventor in money or money's worth prior to the actual reduction of the invention to practice (see paragraph (e) of this section), provided that such individual was neither the employer of the inventor nor related to him (see paragraph (f) of this section). The requirement that such individual is neither the employer of the inventor nor related to him must be satisfied at the time when the substantive rights as to the interest to be acquired are determined, and at the time when the consideration in money or money's worth to be paid is definitely fixed. For example, if prior to the actual reduction to practice of an invention an individual who is neither the employer of the inventor nor related to him agrees to pay the inventor a sum of money definitely fixed as to amount in return for an undivided one-half interest in rights to a patent and at a later date, when such individual has become the employer of the inventor, he pays the definitely fixed sum of money pursuant to the earlier agreement, such individual will not be denied the status of a holder because of such employment relationship.

(2) Although a partnership cannot be a holder, each member of a partnership who is an individual may qualify as a holder as to his share of a patent

owned by the partnership. For example, if an inventor who is a member of a partnership composed solely of individuals uses partnership property in the development of his invention with the understanding that the patent when issued will become partnership property, each of the inventor's partners during this period would qualify as a holder. If, in this example, the partnership were not composed solely of individuals, nevertheless, each of the individual partners' distributive shares of income attributable to the transfer of all substantial rights to the patent or an undivided interest therein, would be considered proceeds from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(3) An individual may qualify as a holder whether or not he is in the business of making inventions or in the business of buying and selling patents.

(e) *Actual reduction to practice.* For the purposes of determining whether an individual is a holder under paragraph (d) of this section, the term *actual reduction to practice* has the same meaning as it does under section 102(g) of title 35 of the United States Code. Generally, an invention is reduced to actual practice when it has been tested and operated successfully under operating conditions. This may occur either before or after application for a patent but cannot occur later than the earliest time that commercial exploitation of the invention occurs.

(f) *Related person.* (1) The term *related person* means one whose relationship to another person at the time of the transfer is described in section 267(b), except that the term does not include a brother or sister, whether of the whole or the half blood. Thus, if a holder transfers all his substantial rights to a patent to his brother or sister, or both, such transfer is not to a related person.

(2) If, prior to September 3, 1958, a holder transferred all his substantial rights to a patent to a corporation in which he owned more than 50 percent in value of the outstanding stock, he is considered as having transferred such rights to a related person for the purpose of section 1235. On the other hand, if a holder, prior to September 3, 1958, transferred all his substantial rights to a patent to a corporation in which he owned 50 percent or less in value of the outstanding stock and his brother owned the remaining stock, he is not considered as having transferred such rights to a related person since the brother relationship is to be disregarded for purposes of section 1235.

(3) If, subsequent to September 2, 1958, a holder transfers all his substantial rights to a patent to a corporation in which he owns 25 percent or more in value of the outstanding stock, he is considered as transferring such rights to a related person for the purpose of section 1235. On the other hand if a holder, subsequent to September 2, 1958, transfers all his substantial rights to a patent to a corporation in which he owns less than 25 percent in value of the outstanding stock and his brother owns the remaining stock, he is not considered as transferring such rights to a related person since the brother relationship is to be disregarded for purposes of section 1235.

(4) If a relationship described in section 267(b) exists independently of family status, the brother-sister exception, described in subparagraphs (1), (2), and (3) of this paragraph, does not apply. Thus, if a holder transfers all his substantial rights to a patent to the fiduciary of a trust of which the holder is the grantor, the holder and the fiduciary are related persons for purposes of section 1235(d). (See section 267(b)(4).) The transfer, therefore, would not qualify under section 1235(a). This result obtains whether or not the fiduciary is the brother or sister of the holder since the disqualifying relationship exists because of the grantor-fiduciary status and not because of family status.

[T.D. 6500, 25 FR 12014, Nov. 26, 1960, as amended by T.D. 6852, 30 FR 12730, Oct. 6, 1965; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1236–1 Dealers in securities.

(a) *Capital gains.* Section 1236(a) provides that gain realized by a dealer in securities from the sale or exchange of a security (as defined in paragraph (c) of this section) shall not be considered as gain from the sale or exchange of a capital asset unless:

(1) The security is, before the expiration of the thirtieth day after the date of its acquisition, clearly identified in the dealer's records as a security held for investment or, if acquired before October 20, 1951, was so identified before November 20, 1951; and

(2) The security is not held by the dealer primarily for sale to customers in the ordinary course of his trade or business at any time after the identification referred to in subparagraph (1) of this paragraph has been made.

Unless both of these requirements are met, the gain is considered as gain from the sale of assets held by the dealer primarily for sale to customers in the course of his business.

(b) *Ordinary losses.* Section 1236(b) provides that a loss sustained by a dealer in securities from the sale or exchange of a security shall not be considered a loss from the sale or exchange of property which is not a capital asset if at any time after November 19, 1951, the security has been clearly identified in the dealer's records as a security held for investment. Once a security has been identified after November 19, 1951, as being held by the dealer for investment, it shall retain that character for purposes of determining loss on its ultimate disposition, even though at the time of its disposition the dealer holds it primarily for sale to his customers in the ordinary course of his business. However, section 1236 has no application to the extent that section 582(c) applies to losses of banks.

(c) *Definitions*—(1) *Security.* For the purposes of this section, the term *security* means any share of stock in any corporation, any certificate of stock or interest in any corporation, any note, bond, debenture, or other evidence of indebtedness, or any evidence of any interest in, or right to subscribe to or purchase, any of the foregoing.

(2) *Dealer in securities.* For definition of a *dealer in securities,* see the regulations under section 471.

(d) *Identification of security in dealer's records.* (1) A security is clearly identified in the dealer's records as a security held for investment when there is an accounting separation of the security from other securities, as by making appropriate entries in the dealer's books of account to distinguish the security from inventories and to designate it as an investment and by (i) indicating with such entries, to the extent feasible, the individual serial number of, or other characteristic symbol imprinted upon, the individual security, or (ii) adopting any other method of identification satisfactory to the Commissioner.

(2) In computing the 30-day period prescribed by section 1236(a), the first day of the period is the day following the date of acquisition. Thus, in the case of a security acquired on March 18, 1957, the 30-day period expires at midnight on April 17, 1957.

[T.D. 6500, 25 FR 12015, Nov. 26, 1960, as amended by T.D. 6726, 29 FR 5667, Apr. 29, 1964]

§1.1237–1 Real property subdivided for sale.

(a) *General rule*—(1) *Introductory.* This section provides a special rule for determining whether the taxpayer holds real property primarily for sale to customers in the ordinary course of his business under section 1221(1). This rule is to permit taxpayers qualifying under it to sell real estate from a single tract held for investment without the income being treated as ordinary income merely because of subdividing the tract or of active efforts to sell it. The rule is not applicable to dealers in real estate or to corporations, except a corporation making such sales in a taxable year beginning after December 3l, 1954, if such corporation qualifies under the provisions of paragraph (c)(5)(iv) of this section.

(2) *When subdividing and selling activities are to be disregarded.* When its conditions are met, section 1237 provides that if there is no other substantial evidence that a taxpayer holds real estate primarily for sale to customers in the ordinary course of his business, he shall not be considered a real estate dealer holding it primarily for sale merely because he has (i) subdivided the tract into lots (or parcels) and (ii) engaged in advertising, promotion, selling activities or the use of sales agents in connection with the sale of lots in such subdivision. Such subdividing and selling activities shall be disregarded in determining the purpose

for which the taxpayer held real property sold from a subdivision whenever it is the only substantial evidence indicating that the taxpayer has ever held the real property sold primarily for sale to customers in the ordinary course of his business.

(3) *When subdividing and selling activities are to be taken into account.* When other substantial evidence tends to show that the taxpayer held real property for sale to customers in the ordinary course of his business, his activities in connection with the subdivision and sale of the property sold shall be taken into account in determining the purpose for which the taxpayer held both the subdivided property and any other real property. For example, such other evidence may consist of the taxpayer's selling activities in connection with other property in prior years during which he was engaged in subdividing or selling activities with respect to the subdivided tract, his intention in prior years (or at the time of acquiring the property subdivided) to hold the tract primarily for sale in his business, his subdivision of other tracts in the same year, his holding other real property for sale to customers in the same year, or his construction of a permanent real estate office which he could use in selling other real property. On the other hand, if the only evidence of the taxpayer's purpose in holding real property consisted of not more than one of the following, in the year in question, such fact would not be considered substantial other evidence:

(i) Holding a real estate dealer's license;

(ii) Selling other real property which was clearly investment property;

(iii) Acting as a salesman for a real estate dealer, but without any financial interest in the business; or

(iv) Mere ownership of other vacant real property without engaging in any selling activity whatsoever with respect to it.

If more than one of the above exists, the circumstances may or may not constitute substantial evidence that the taxpayer held real property for sale in his business, depending upon the particular facts in each case.

(4) *Section 1237 not exclusive.* (i) The rule in section 1237 is not exclusive in its application. Section 1237 has no application in determining whether or not real property is held by a taxpayer primarily for sale in his business if any requirement under the section is not met. Also, even though the conditions of section 1237 are met, the rules of section 1237 are not applicable if without regard to section 1237 the real property sold would not have been considered real property held primarily for sale to customers in the ordinary course of his business. Thus, the district director may at all times conclude from convincing evidence that the taxpayer held the real property solely as an investment. Furthermore, whether or not the conditions of section 1237 are met, the section has no application to losses realized upon the sale of realty from subdivided property.

(ii) If, owing solely to the application of section 1237, the real property sold is deemed not to have been held primarily for sale in the ordinary course of business, any gain realized upon such sale shall be treated as ordinary income to the extent provided in section 1237(b) (1) and (2) and paragraph (e) of this section. Any additional gain realized upon the sale shall be treated as gain arising from the sale of a capital asset or, if the circumstances so indicate, as gain arising from the sale of real property used in the trade or business as defined in section 1231 (b)(1). For the relationship between sections 1237 and 1231, see paragraph (f) of this section.

(5) *Principal conditions of qualification.* Before section 1237 applies, the taxpayer must meet three basic conditions, more fully explained later: He cannot have held any part of the tract at any time previously for sale in the ordinary course of his business, nor in the year of sale held any other real estate for sale to customers; he cannot make substantial improvements on the tract which increase the value of the lot sold substantially; and he must have owned the property 5 years, unless he inherited it. However, the taxpayer may make certain improvements if they are necessary to make the property marketable if he elects neither to add their cost to the basis of the property, or of any other property, nor to deduct the cost as an expense, and he

has held the property at least 10 years. If the requirements of section 1237 are met, gain (but not more than 5 percent of the selling price of each lot) shall be treated as ordinary income in and after the year in which the sixth lot or parcel is sold.

(b) *Disqualification arising from holding real property primarily for sale*—(1) *General rule.* Section 1237 does not apply to any transaction if the taxpayer either:

(i) Held the lot sold (or the tract of which it was a part) primarily for sale in the ordinary course of his business in a prior year, or

(ii) Holds other real property primarily for sale in the ordinary course of his business in the same year in which such lot is sold.

Where either of these elements is present, section 1237 shall be disregarded in determining the proper treatment of any gain arising from such sale.

(2) *Method of applying general rule.* For purposes of this paragraph, in determining whether the lot sold was held primarily for sale in the ordinary course of business in a prior year, the principles of section 1237 shall be applied, whether or not section 1237 was effective for such prior year, if the sale of the lot occurs after December 31, 1953, or, in the case of a corporation meeting the requirements of paragraph (c)(5)(iv) of this section, if the sale of the lot occurs in a taxable year beginning after December 31, 1954. Whether, on the other hand, the taxpayer holds other real property for sale in the ordinary course of his business in the same year such lot was sold shall be determined without regard to the application of section 1237 to such other real property.

(3) *Attribution rules with respect to the holding of property.* The taxpayer is considered as holding property which he owns individually, jointly, or as a member of a partnership. He is not generally considered as holding property owned by members of his family, an estate or trust, or a corporation. See, however, paragraph (c)(5) (iv)(c) of this section for an exception to this rule. The purpose for which a prior owner held the lot or tract, or his activities, are immaterial except to the extent they indicate the purpose for which the taxpayer has held the lot or tract. See paragraph (d) of this section for rules relating to the determination of the period for which the property is held. The principles of this subparagraph may be illustrated by the following example:

Example: A dealer in real property held a tract of land for sale to customers in the ordinary course of his business for 5 years. He then made a gift of it to his son. As a result of the operation of section 1223(2) the son will have held the property for the period of time required by section 1237. However, he will not qualify for the benefits of section 1237 because, there being no evidence to the contrary, the circumstances involved establish that the son holds the property for sale to customers, as did his father.

(c) *Disqualification arising from substantial improvements*—(1) *General rule.* Section 1237 will not apply if the taxpayer or certain others make improvements on the tract which are substantial and which substantially increase the value of the lot sold. Certain improvements are not substantial within the meaning of section 1237(a)(2) if they are necessary to make the lot marketable at the prevailing local price and meet the other conditions of section 1237(b)(3). See subparagraph (5) of this paragraph.

(2) *Improvements made or deemed to be made by the taxpayer.* Certain improvements made by the taxpayer or made under a contract of sale between the taxpayer and the buyer make section 1237 inapplicable.

(i) For the purposes of section 1237 (a)(2) the taxpayer is deemed to have made any improvements on the tract while he held it which are made by:

(*a*) The taxpayer’s whole or half brothers and sisters, spouse, ancestors and lineal descendants.

(*b*) A corporation controlled by the taxpayer. A corporation is controlled by the taxpayer if he controls, as the result of direct ownership, constructive ownership, or otherwise, more than 50 percent of the corporation’s voting stock.

(*c*) A partnership of which the taxpayer was a member at the time the improvements were made.

(*d*) A lessee if the improvement takes the place of a payment of rental income. See section 109 and the regulations thereunder.

(*e*) A Federal, State, or local government, or political subdivision thereof, if the improvement results in an increase in the taxpayer's basis for the property, as it would, for example, from a special tax assessment for paving streets.

(ii) The principles of subdivision (i) of this subparagraph may be illustrated by the following example:

Example: A held a tract of land for 3 years during which he made substantial improvements thereon which substantially enhanced the value of every lot on the tract. A then made a gift of the tract to his son. The son made no further improvements on the tract but held it for 3 years and then sold several lots therefrom. The son is not entitled to the benefits of section 1237 since under section 1237(a)(2) he is deemed to have made the substantial improvements made by his father, and under section 1223(2) he is treated as having held the property for the period during which his father held it. Thus, the disqualifying improvements are deemed to have been made by the son while the tract was held by him. See paragraph (d) of this section for rules relating to the determination of the period for which the property is held.

(iii) The taxpayer is also charged with making any improvements made pursuant to a contract of sale entered into between the taxpayer and the buyer. Therefore, the buyer, as well as the taxpayer, may make improvements which prevent the application of section 1237.

(*a*) If a contract of sale obligates either the taxpayer or the buyer to make a substantial improvement which would substantially increase the value of the lot, the taxpayer may not claim the application of section 1237 unless the obligation to improve the lot ceases (for any reason other than that the improvement has been made) before or within the period, prescribed by section 6511, within which the taxpayer may file a claim for credit or refund of an overpayment of his tax on the gain from the sale of the lot. The following example illustrates this rule:

Example: In 1956, A sells several lots from a tract he has subdivided for sale. Section 1237 would apply to the sales of these lots except that in the contract of sale, A agreed to install sewers, hard surface roads, and other utilities which would increase the value of the lots substantially. If in 1957, instead of requiring the improvements, the buyer releases A from this obligation, A may then claim the application of section 1237 to the sale of lots in 1956 in computing his income tax for 1956, since the period of limitations in which A may file a claim for credit or refund of an overpayment of his 1956 income tax has not expired.

(*b*) An improvement is made pursuant to a contract if the contract imposes an obligation on either party to make the improvement, but not if the contract merely places restrictions on the improvements, if any, either party may make. The following example illustrates this rule:

Example: B sells several lots from a tract which he has subdivided. Each contract of sale prohibits the purchaser from building any structure on his lot except a personal residence costing $15,000 or more. Even if the purchasers build such residences, that does not preclude B from applying section 1237 to the sales of such lots, since the contracts did not obligate the purchasers to make any improvements.

(iv) Improvements made by a bona fide lessee (other than as rent) or by others not described in section 1237(a)(2) do not preclude the use of section 1237.

(3) *When improvements substantially enhance the value of the lot sold.* Before a substantial improvement will preclude the use of section 1237, it must substantially enhance the value of the lot sold.

(i) The increase in value to be considered is only the increase attributable to the improvement or improvements. Other changes in the market price of the lot, not arising from improvements made by the taxpayer, shall be disregarded. The difference between the value of the lot, including improvements, when the improvement has been completed and an appraisal of its value if unimproved at that time, will disclose the value added by the improvements.

(ii) Whether improvements have substantially increased the value of a lot depends upon the circumstances in each case. If improvements increase the value of a lot by 10 percent or less, such increase will not be considered as substantial, but if the value of the lot is increased by more than 10 percent, then all relevant factors must be considered to determine whether, under such circumstances, the increase is substantial.

(iii) Improvement may increase the value of some lots in a tract without equally affecting other lots in the same tract. Only the lots whose value was substantially increased are ineligible for application of the rule established by section 1237.

(4) *When an improvement is substantial.* To prevent the application of section 1237, the improvement itself must be substantial in character. Among the improvements considered substantial are shopping centers, other commercial or residential buildings, and the installation of hard surface roads or utilities such as sewers, water, gas, or electric lines. On the other hand a temporary structure used as a field office, surveying, filling, draining, leveling and clearing operations, and the construction of minimum all-weather access roads, including gravel roads where required by the climate, are not substantial improvements.

(5) *Special rules relating to substantial improvements.* Under certain conditions a taxpayer, including a corporation to which subdivision (iv) of this subparagraph applies, may obtain the benefits of section 1237 whether or not substantial improvements have been made. In addition, an individual taxpayer may, under certain circumstances elect to have substantial improvements treated as necessary and not substantial.

(i) *When an improvement is not considered substantial.* An improvement will not be considered substantial if all of the following conditions are met:

(*a*) The taxpayer has held the property for 10 years. The full 10-year period must elapse, whether or not the taxpayer inherited the property. Although the taxpayer must hold the property 10 years, he need not hold it for 10 years after subdividing it. See paragraph (d) of this section for rules relating to the determination of the period for which the property is held.

(*b*) The improvement consists of the building or installation of water, sewer, or drainage facilities (either surface, sub-surface, or both) or roads, including hard surface roads, curbs, and gutters.

(*c*) The district director with whom the taxpayer must file his return is satisfied that, without such improvement, the lot sold would not have brought the prevailing local price for similar building sites.

(*d*) The taxpayer elects, as provided in subdivision (iii) of this subparagraph, not to adjust the basis of the lot sold or any other property held by him for any part of the cost of such improvement attributable to such lot and not to deduct any part of such cost as an expense.

(ii) *Meaning of similar building site.* A *similar building site* is any real property in the immediate vicinity whose size, terrain, and other characteristics are comparable to the taxpayer's property. For the purpose of determining whether a tract is marketable at the prevailing local price for similar building sites, the taxpayer shall furnish the district director with sufficient evidence to enable him to compare (*a*) the value of the taxpayer's property in an unimproved state with (*b*) the amount for which similar building sites, improved by the installation of water, sewer, or drainage facilities or roads, have recently been sold, reduced by the present cost of such improvements. Such comparison may be made and expressed in terms of dollars per square foot, dollars per acre, or dollars per front foot, or in any other suitable terms depending upon the practice generally followed by real estate dealers in the taxpayer's locality. The taxpayer shall also furnish evidence, where possible, of the best bona fide offer received for the tract or a lot thereof just before making the improvement, to assist the district director in determining the value of the tract or lot if it had been sold in its unimproved state. The operation of this subdivision and subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. A has been offered $500 per acre for a tract without roads, water, or sewer facilities which he has owned for 15 years. The adjacent tract has been subdivided and improved with water facilities and hard surface roads, and has sold for $4,000 per acre. The estimated cost of roads and water facilities on the adjacent tract is $2,500 per acre. The prevailing local price for similar building sites in the vicinity would be $1,500 per acre (i.e., $4,000 less $2,500). If A installed roads and water facilities at a cost of $2,500 per acre, his tract would sell for approximately $4,000 per acre. Under section 1237(b)(3) the installation of roads and water facilities does not constitute a substantial improvement if A elects to disregard the cost of such improvements ($2,500 per acre) in computing his cost or other basis for the lots sold from the tract, and in computing his basis for any other property owned by him.

Example 2. Assume the same facts as in example (1) of this subdivision, except that A can obtain $1,600 per acre for his property without improvements. The installation of any substantial improvements would not constitute a necessary improvement under section 1237(b)(3), since the prevailing local price could have been obtained without any improvement.

Example 3. Assume the same facts as in example (1) of this subdivision, except that the adjacent tract has also been improved with sewer facilities, the present cost of which is $1,200 per acre. The installation of the substantial improvements would not constitute a necessary improvement under section 1237(b)(3) on A's part, since the prevailing local price ($4,000 less the sum of $1,200 plus $2,500, or $300) could have been obtained by A without any improvement.

(iii) *Manner of making election.* The election required by section 1237(b)(3)(C) shall be made as follows:

(*a*) The taxpayer shall submit:

(*1*) A plat showing the subdivision and all improvements attributable to him.

(*2*) A list of all improvements to the tract, showing:

(*i*) The cost of such improvements.

(*ii*) Which of the improvements, without regard to the election, he considers *substantial* and which he considers not *substantial.*

(*iii*) Those improvements which are substantial to which the election is to apply, with a fair allocation of their cost to each lot they affect, and the amount by which they have increased the values of such lots.

(*iv*) The date on which each lot was acquired and its basis for determining gain or loss, exclusive of the cost of any improvements listed in subdivision (iii) of this subdivision.

(*3*) A statement that he will neither deduct as an expense nor add to the basis of any lot sold, or of any other property, any portion of the cost of any substantial improvement which substantially increased the value of any lot in the tract and which either he listed pursuant to (*a*)(*2*)(iii) of this subdivision or which the district director deems substantial.

(*b*) The election and the information required under (*a*) of this subdivision shall be submitted to the district director:

(*1*) With the taxpayer's income tax return for the taxable year in which the lots subject to the election were sold, or

(*2*) In the case of a return filed prior to August 14, 1957, either with a timely claim for refund, where the benefits of section 1237 have not been claimed on such return, or, independently, before November 13, 1957, where such benefits have been claimed, or

(*3*) If there is an obligation to make disqualifying improvements outstanding when the taxpayer files his return, with a formal claim for refund at the time of the release of the obligation, if it is then still possible to file a timely claim.

(*c*) Once made, the election as to the necessary improvement costs attributable to any lot sold shall be irrevocable and binding on the taxpayer unless the district director assesses an income tax as to such lot as if it were held for sale in the ordinary course of taxpayer's business. Under such circumstances, in computing gain, the cost or other basis shall be computed without regard to section 1237.

(iv) *Exceptions with respect to necessary* improvements and certain corporations. For taxable years beginning after December 31, 1954, individual taxpayers and certain corporations may obtain the benefits of section 1237 without complying with the provisions of subdivisions (i) (*c*) and (*d*), (ii), and (iii) of this subparagraph if the requirements of section 1237 are otherwise met and if:

(*a*) The property in question was acquired by the taxpayer through the foreclosure of a lien thereon,

(*b*) The lien foreclosed secured the payment of an indebtedness to the taxpayer or (in the case of a corporation) secured the payment of an indebtedness to a creditor who has transferred the foreclosure bid to the taxpayer in exchange for all of the stock of the corporation and other consideration, and (*c*) In the case of a corporate taxpayer, no shareholder of the corporation holds real property for sale to customers in the ordinary course of his trade or business or holds a controlling interest in another corporation which actually so holds real property, or which, but for the application of this subdivision, would be considered to so hold real property.

Thus, in the case of such property, it is not necessary for the taxpayer to satisfy the district director that the property would not have brought the prevailing local price without improvements or to elect not to add the cost of the improvements to his basis. In addition, if 80 percent or more of the real property owned by a taxpayer is property to which this subdivision applies, the requirements of (*a*) and (*b*) of this subdivision need not be met with respect to property adjacent to such property which is also owned by the taxpayer.

(d) *Holding period required*—(1) *General rules.* To apply section 1237, the taxpayer must either have inherited the lot sold or have held it for 5 years. Generally, the provisions of section 1223 are applicable in determining the period for which the taxpayer has held the property. The provisions of this subparagraph may be illustrated by the following examples:

Example 1. A held a tract of land for 3 years under circumstances otherwise qualifying for section 1237 treatment. He made a gift of the tract to B at a time when the fair market value of the tract exceeded A's basis for the tract. B held the tract for 2 more years under similar circumstances. B then sold 4 lots from the tract. B is entitled to the benefits of section 1237 since under section 1223(2) he held the lots for 5 years and all the other requirements of section 1237 are met.

Example 2. C purchased all the stock in a corporation in 1955. The corporation purchased an unimproved tract of land in 1957. In 1961 the corporation was liquidated under section 333 and C acquired the tract of land. For purposes of section 1237, C's holding period commenced on the date the corporation actually acquired the land in 1957 and not on the date C purchased the stock.

(2) *Rules relating to property acquired upon death.* If the taxpayer inherited the property there is no 5-year holding period required under section 1237. However, any holding period required by any other provision of the Code, such as section 1222, is nevertheless applicable. For purposes of section 1237, neither the survivor's one-half of community property, nor property acquired by survivorship in a joint tenancy, is property acquired by devise or inheritance. The holding period for the surviving joint tenant begins on the date the property was originally acquired.

(e) *Tax consequences if section 1237 applies*—(1) *Introductory.* Where there is no substantial evidence other than subdivision and related selling activities that real property is held for sale in the ordinary course of taxpayer's business and section 1237 applies, section 1237(b)(1) provides a special rule for computing taxable gain. For the relationship between sections 1237 and 1231, see paragraph (f) of this section.

(2) *Characterization of gain and its relation to selling expenses.* (i) When the taxpayer has sold less than 6 lots or parcels from the same tract up to the end of his taxable year, the entire gain will be capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) In computing the number of lots or parcels sold, two or more contiguous lots sold to a single buyer in a single sale will be counted as only one parcel. The following example illustrates this rule:

Example: A meets all the conditions of section 1237 in subdividing and selling a single tract. In 1956 he sells 4 lots to B, C, D, and E. In the same year F buys 3 adjacent lots. Since A has sold only 5 lots or parcels from the tract, any gain A realizes on the sales will be capital gain.

(ii) If the taxpayer has sold the sixth lot or parcel from the same tract within the taxable year, then the amount, if any, by which 5 percent of the selling price of each lot exceeds the expenses incurred in connection with its sale or exchange, shall, to the extent it represents gain, be ordinary income. Any part of the gain not treated as ordinary income will be treated as capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) Five percent of the selling price of each lot sold from the tract in the taxable year the sixth lot is sold and thereafter is, to the extent it represents gain, considered ordinary income. However, all expenses of sale of the lot are to be deducted first from the 5 percent of the gain which would otherwise be considered ordinary income, and any remainder of such expenses shall reduce the gain upon the sale or exchange which would otherwise be considered capital gain. Such expenses cannot be deducted as ordinary business expenses from other income. The 5-percent rule applies to all lots sold from the tract in the year the sixth lot or parcel is sold. Thus, if the taxpayer sells the first 6 lots of a single tract in one year, 5 percent of the selling price of each lot sold shall be treated as ordinary income and reduced by the selling expenses. On the other hand, if the taxpayer sells the first 3 lots of a single tract in 1955, and the next 3 lots in 1956, only the gain realized from the sales made in 1956 shall be so treated. For the effect of a 5-year interval between sales, see paragraph (g)(2) of this section. The operation of this subdivision may be illustrated by the following examples:

Example 1. Assume the selling price of the sixth lot of a tract is $10,000, the basis of the lot in the hands of the taxpayer is $5,000, and the expenses of sale are $750. The amount of gain realized by the taxpayer is $4,250, of which the amount of ordinary income attributable to the sale is zero, computed as follows:

Selling price		$10,000
Basis		5,000
Excess over basis		5,000
5 percent of selling price	500	
Expenses of sale	750	
Amount of gain realized treated as ordinary income		0
Excess over basis		5,000
5 percent of selling price	500	
Excess of expenses over 5 percent of selling price	250	
		750
Amount of gain realized from sale of property not held for sale in ordinary course of business		4,250

Example 2. Assume the same facts as in Example 1, except that the expenses of sale of such sixth lot are $300. The amount of gain realized by the taxpayer is $4,700, of which the amount of ordinary income attributable to the sale is $200, computed as follows:

Selling price		$10,000
Basis		5,000
Excess over basis		5,000
5 percent of selling price	$500	
Expenses of sale	300	
Amount of gain realized treated as ordinary income		200
Excess over basis		5,000
5 percent of selling price	500	
Excess of expenses over 5 percent of selling price	0	
		500
Amount of gain realized from sale of property not held for sale in ordinary course of business		4,500

(iii) In the case of an exchange, the term *selling price* shall mean the fair market value of property received plus any sum of money received in exchange for the lot. See section 1031 for those exchanges in which no gain is recognized. For the purpose of subsections (b) and (c) of section 1237 and paragraphs (e) and (g) of this section, an exchange shall be treated as a sale or exchange whether or not gain or loss is recognized with respect to such exchange.

(f) *Relationship of section 1237 and section 1231.* Application of section 1237 to a sale of real property may, in some cases, result in the property being treated as real property used in the trade or business, as described in section 1231(b)(1). Thus, assuming section 1237 is otherwise applicable, if the lot sold would be considered property described in section 1231(b)(1) except for the fact that the taxpayer subdivided the tract of which it was a part, then evidence of such subdivision and connected sales activities shall be disregarded and the lot sold shall be considered real property used in the trade or business. Under such circumstances, any gain or loss realized from the sale shall be treated as gain or loss arising from the sale of real property used in the trade or business.

(g) *Definition of tract*—(1) *Aggregation of properties.* For the purposes of section 1237, the term *tract* means either (i) a single piece of real property or (ii) two or more pieces of real property if they were contiguous at any time while held by the taxpayer, or would have been contiguous but for the interposition of a road, street, railroad, stream, or similar property. Properties are contiguous if their boundaries meet at one or more points. The single piece of contiguous properties need not have been conveyed by a single deed. The taxpayer may have assembled them over a period of time and may hold them separately, jointly, or as a partner, or in any combination of such forms of ownership.

(2) *When a subdivision will be considered a new tract.* If the taxpayer sells or exchanges no lots from the tract for a period of 5 years after the sale or exchange of at least 1 lot in the tract, then the remainder of the tract shall be deemed a new tract for the purpose of counting the number of lots sold from the same tract under section 1237(b)(1). The pieces in the new tract need not be contiguous. The 5-year period is measured between the dates of the sales or exchanges.

(h) *Effective date.* This section shall apply only to gain realized on sales made after December 31, 1953, or, in the case of a person meeting the requirements of paragraph (c)(5)(iv) of this section, if the sale of the lot occurs in a taxable year beginning after December 31, 1954. Pursuant to section 7851(a)(1)(C), the regulations prescribed in this section (other than subdivision (iv) of paragraph (c)(5)) shall also apply to taxable years beginning before January 1, 1954, and ending after December 31, 1953, and to taxable years beginning after December 31, 1953, and ending before August 17, 1954, although such years are subject to the Internal Revenue Code of 1939. Irrespective of whether the taxable year involved is subject to the Internal Revenue Code of 1939 or the Internal Revenue Code of 1954, sales or exchanges made before January 1, 1954, shall be taken into account to determine whether: (1) No sales or exchanges have been made for 5 years, under section 1237(c), and (2) more than 5 lots or parcels have been sold or exchanged from the same tract, under section 1237(b)(1). Thus, if the taxpayer sold 5 lots from a single tract in 1950, and another lot is sold in 1954, the lot sold in 1954 constitutes the *sixth lot* sold from the original tract. On the other hand, if the first 5 lots were sold in 1948, the sale made in 1954 shall be deemed to have been made from a new tract.

[T.D. 6500, 25 FR 12016, Nov. 26, 1960]

§1.1238–1 Amortization in excess of depreciation.

(a) *In general.* Section 1238 provides that if a taxpayer is entitled to a deduction for amortization of an emergency facility under section 168, and if the facility is later sold or exchanged, any gain realized shall be considered as ordinary income to the extent that the amortization deduction exceeds normal depreciation. Thus, under section 1238 gain from a sale or exchange of property shall be considered as ordinary income to the extent that its adjusted basis is less than its adjusted basis would be if it were determined without regard to section 168. If an entire facility is certified under section 168(e), the taxpayer may use allowances for depreciation based on any rate and method which would have been proper if the basis of the facility were not subject to amortization under section 168, in determining what the adjusted basis of the facility would be if it were determined without regard to section 168. If only a portion of a facility is certified under section 168(e), allowances for depreciation based on the rate and method properly used with respect to the uncertified part of the facility are used in determining what the adjusted basis of the facility would be if it were determined without regard to section 168. The principles of this paragraph may be illustrated by the following examples:

Example 1. On December 31, 1954, a taxpayer making his income tax returns on a calendar year basis acquires at a cost of $20,000 an emergency facility (used in his business) 50 percent of the adjusted basis of which has been certified under section 168(e). The facility would normally have a useful life of 20 years and a salvage value of $2,000 allocable equally between the certified and uncertified portions. Under section 168 the taxpayer elects to begin the 60-month amortization period on January 1, 1955. He takes amortization deductions with respect to the certified portion in the amount of $4,000 for the years 1955 and 1956 (24 months). On December 31, 1956, he sells the facility for a price of $19,000 which is allocable equally between the certified and uncertified portions. The adjusted basis of the certified portion on that date is

$6,000 ($10,000 cost, less $4,000 amortization). With respect to the uncertified portion, the straight line method of depreciation is used and a deduction for depreciation in the amount of $450 is claimed and allowed for the year 1955. The adjusted basis of the uncertified portion on January 1, 1956, is $9,550 ($10,000 cost, less $450 depreciation). The depreciation allowance for the uncertified portion for the year 1956 would be limited to $50, the amount by which the adjusted basis of such portion at the beginning of the year exceeded its aliquot portion of the sales price. Thus, on December 31, 1956, the adjusted basis of the uncertified portion would be $9,500. Without regard to section 168, and using the rate and method the taxpayer properly applied to the uncertified portion of the facility, the adjusted basis of the certified portion on December 31, 1956, would be $9,500, computed in the same manner as the adjusted basis of the uncertified portion. The difference between the facility's actual adjusted basis ($15,500) and its adjusted basis determined without regard to section 168 ($19,000), is $3,500. Accordingly, the entire $3,500 gain on the sale of the facility ($19,000 sale price, less $15,500 adjusted basis) is treated as ordinary income.

Example 2. Assume that the entire facility in example (1) had been certified under section 168(e) and that, therefore, the adjusted basis of the facility on December 31, 1956, is $12,000. Assume further that the taxpayer adopts straight line depreciation as a proper method of depreciation for determining the adjusted basis of the facility without regard to section 168. Thus, the adjusted basis, without regard to section 168, would be $19,000. This amount is $7,000 more than the $12,000 adjusted basis under section 168. Hence, the entire $7,000 gain on the sale of the facility ($19,000 sale price less $12,000 adjusted basis) is treated as ordinary income.

(b) *Substituted basis.* If a taxpayer acquires other property in an exchange for an emergency facility with respect to which amortization deductions have been allowed or allowable, and if the basis in his hands of the other property is determined by reference to the basis of the emergency facility, then the basis of the other property is determined with regard to section 168, and therefore the provisions of section 1238 apply with respect to gain realized on a subsequent sale or exchange of the other property. The provisions of section 1238 also apply to gain realized on the sale or exchange of an emergency facility (or other property acquired, as described in the preceding sentence, in exchange for an emergency facility) by a taxpayer in whose hands the basis of the facility (or other property) is determined by reference to its basis in the hands of another person to whom deductions were allowable or allowed with respect to the facility under section 168.

[T.D. 6500, 25 FR 12020, Nov. 26, 1960, as amended by T.D. 6825, 30 FR 7281, June 2, 1965]

§1.1239–1 Gain from sale or exchange of depreciable property between certain related taxpayers after October 4, 1976.

(a) *In general.* In the case of a sale or exchange of property, directly or indirectly, between related persons after October 4, 1976 (other than a sale or exchange made under a binding contract entered into on or before that date), any gain recognized by the transferor shall be treated as ordinary income if such property is, in the hands of the transferee, subject to the allowance for depreciation provided in section 167. This rule also applies to property which would be subject to the allowance for depreciation provided in section 167 except that the purchaser has elected a different form of deduction, such as those allowed under sections 169, 188, and 191.

(b) *Related persons.* For purposes of paragraph (a) of this section, the term *related persons* means:

(1) A husband and wife,

(2) An individual and a corporation 80 percent or more in value of the outstanding stock of which is owned, directly or indirectly, by or for such individual, or

(3) Two or more corporations 80 percent or more in value of the outstanding stock of each of which is owned, directly or indirectly, by or for the same individual.

(c) *Rules of construction*—(1) *Husband and wife.* For purposes of paragraph (b)(1) of this section, if on the date of the sale or exchange a taxpayer is legally separated from his spouse under an interlocutory decree of divorce, the taxpayer and his spouse shall not be treated as husband and wife, provided the sale or exchange is made pursuant to the decree and the decree subsequently becomes final. Thus, if pursuant to an interlocutory decree of divorce, an individual transfers depreciable property to his spouse and, because of this section, the gain recognized on the transfer of the property is treated as ordinary income, the individual may, if the interlocutory decree becomes final after his tax return has been filed, file a claim for a refund.

(2) *Sales between commonly controlled corporations.* In general, in the case of a sale or exchange of depreciable property between related corporations (within the meaning of paragraph (b)(3) of this section), gain which is treated as ordinary income by reason of this section shall be taxable to the transferor corporation rather than to a controlling shareholder. However, such gain shall be treated as ordinary income taxable to a controlling shareholder rather than the transferor corporation if the transferor corporation is used by a controlling shareholder as a mere conduit to make a sale to another controlled corporation, or the entity of the corporate transferor is otherwise properly disregarded for tax purposes. Sales between two or more corporations that are related within the meaning of paragraph (b)(3) of this section may also be subject to the rules of section 482 (relating to allocation of income between or among organizations, trades, or businesses which are commonly owned or controlled), and to rules requiring constructive dividend treatment to the controlling shareholder in appropriate circumstances.

(3) *Relationship determination for transfers made after January 6, 1983—taxpayer and an 80-percent owned entity.* For purposes of paragraph (b)(2) of this section with respect to transfers made after January 6, 1983—

(i) If the transferor is an entity, the transferee and such entity are related if the entity is an 80-percent owned entity with respect to such transferee either immediately before or immediately after the sale or exchange of depreciable property, and

(ii) If the transferor is not an entity, the transferee and such transferor are related if the transferee is an 80-percent owned entity with respect to such transferor immediately after the sale or exchange of depreciable property.

(4) *Relationship determination for transfers made after January 6, 1983—two 80-percent owned entities.* For purposes of paragraph (b)(3) of this section, with respect to transfers made after January 6, 1983, two entities are related if the same shareholder both owns 80 percent or more in value of the stock of the transferor before the sale or exchange of depreciable property and owns 80 percent or more in value of the stock of the transferee immediately after the sale or exchange of depreciable property.

(5) *Ownership of stock.* For purposes of determining the ownership of stock under this section, the constructive ownership rules of section 318 shall be applied, except that section 318(a)(2)(C) (relating to attribution of stock ownership from a corporation) and section 318(a)(3)(C) (relating to attribution of stock ownership to a corporation) shall be applied without regard to the 50-percent limitation contained therein. The application of the constructive ownership rules of section 318 to section 1239 is illustrated by the following examples:

Example 1. A, an individual, owns 79 percent of the stock (by value) of Corporation X, and a trust for A's children owns the remaining 21 percent of the stock. A's children are deemed to own the stock owned for their benefit by the trust in proportion to their actuarial interests in the trust (section 318(a)(2)(B)). A, in turn, constructively owns the stock so deemed to be owned by his children (section 318(a)(1)(A)(ii)). Thus, A is treated as owning all the stock of Corporation X, and any gain A recognizes from the sale of depreciable property to Corporation X is treated under section 1239 as ordinary income.

Example 2. Y Corporation owns 100 percent in value of the stock of Z Corporation. Y Corporation sells depreciable property at a gain to Z Corporation. P and his daughter, D, own 80 percent in value of the Y Corporation stock. Under the constructive ownership rules of section 318, as applied to section 1239, P and D are each considered to own the stock in Z Corporation owned by Y Corporation. Also, P and D are each considered to own the stock in Y Corporation owned by the other. As a result, both P and D constructively own 80 percent or more in value of the stock of both Y and Z Corporations. Thus, the sale between Y and Z is governed by section 1239 and produces ordinary income to Y.

[T.D. 7569, 43 FR 51388, Nov. 3, 1978, as amended by T.D. 8106, 51 FR 42835, Nov. 26, 1986]

§ 1.1239–2 Gain from sale or exchange of depreciable property between certain related taxpayers on or before October 4, 1976.

Section 1239 provides in general that any gain from the sale or exchange of depreciable property between a husband and wife or between an individual and a controlled corporation on or before October 4, 1976 (and in the case of a sale or exchange occurring after that date if made under a binding contract entered into on or before that date), shall be treated as ordinary income. Thus, any gain recognized to the transferor from a sale or exchange after May 3, 1951, and on or before October 4, 1976 (or thereafter if pursuant to a binding contract entered into on or before that date), directly or indirectly, between a husband and wife or between an individual and a controlled corporation, of property which, in the hands of the transferee, is property of a character subject to an allowance for depreciation provided in section 167 (including such property on which a deduction for amortization is allowable under sections 168 and 169) shall be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231. For the purpose of section 1239, a corporation is controlled when more than 80 percent in value of all outstanding stock of the corporation is beneficially owned by the taxpayer, his spouse, and his minor children and minor grandchildren. For the purpose of this section, the terms *children* and *grandchildren* include legally adopted children and their children. The provisions of section 1239(a)(2) are applicable whether property is transferred from a corporation to a shareholder or from a shareholder to a corporation.

[T.D. 6500, 25 FR 12021, Nov. 26, 1960, as amended by T.D. 7569, 43 FR 51388, Nov. 3, 1978]

§ 1.1240–1 Capital gains treatment of certain termination payments.

Any amounts received by an employee for the assignment or release of all his rights to receive, after termination of his employment and for a period of not less than five years or for a period ending with his death, a percentage of the profits or receipts of his employer attributable to a time subsequent to such termination, are considered received from the sale or exchange of a capital asset held for more than six months if the following requirements are met:

(a) The employee was employed by the employer, in whose future profits or receipts the employee had an interest, for a period of more than 20 years before the assignment or release by the employee of his rights in such future profits or receipts,

(b) The full rights of the employee to the percentage of the future profits or receipts on such employer, which rights are the subject of the assignment or release, were incorporated in the terms of the contract of employment between the employee and the employer for a period of at least 12 years, and were so incorporated before August 16, 1954,

(c) The assignment or release was made after the termination of the employee's employment with such employer,

(d) The assignment or release conveyed all the rights of the employee in the future profits or receipts of such employer and conveyed no other rights of the employee, and

(e) The total amount to which the employee became entitled pursuant to the assignment or release was received by the employee after the termination of his employment with such employer and in one taxable year of the employee.

The requirement that the assignment or release be made after the termination of the employee's employment contemplates a complete and bona fide termination of the relationship of employer and employee. This requires more than a mere termination of such relationship under the particular contract or contracts of employment pursuant to which the employee acquired his rights in the future profits or receipts of the employer. The contract need not expressly provide that the employee shall share in the future profits or receipts of the employer for a minimum period of five years. However, if the contract does not expressly so provide and the assignment or release is made before the expiration of five years following the termination of employment, the terms of the contract considered in conjunction with the facts in the particular situation must establish that the rights of the employee to a percentage of future profits or receipts, in all probability, will extend to a period of not less than five years from the date of termination of employment or for a period ending with his death. Section 1240 has application only to an assignment or release made by the employee who acquired the right to a percentage of future profits or receipts of the employer, and has no application to amounts received other than as payment for assignment or release of such right. Section 1240 has no effect upon the determination of the income tax of the employer making the payment to the employee.

[T.D. 6500, 25 FR 12021, Nov. 26, 1960]

§1.1241–1 Cancellation of lease or distributor's agreement.

(a) *In general.* Section 1241 provides that proceeds received by lessees or distributors from the cancellation of leases or of certain distributorship agreements are considered as amounts received in exchange therefor. Section 1241 applies to leases of both real and personal property. Distributorship agreements to which section 1241 applies are described in paragraph (c) of this section. Section 1241 has no application in determining whether or not a cancellation not qualifying under that section is a sale or exchange. Further, section 1241 has no application in determining whether or not a lease or a distributorship agreement is a capital asset, even though its cancellation qualifies as an exchange under section 1241.

(b) *Definition of cancellation.* The term *cancellation* of a lease or a distributor's agreement, as used in section 1241, means a termination of all the contractual rights of a lessee or distributor with respect to particular premises or a particular distributorship, other than by the expiration of the lease or agreement in accordance with its terms. A payment made in good faith for a partial cancellation of a lease or a distributorship agreement is recognized as an amount received for cancellation under section 1241 if the cancellation relates to a severable economic unit, such as a portion of the premises covered by a lease, a reduction in the unexpired term of a lease or distributorship agreement, or a distributorship in one of several areas or of one of several products. Payments made for other modifications of leases or distributorship agreements, however, are not recognized as amounts received for cancellation under section 1241.

(c) *Amounts received upon cancellation of a distributorship agreement.* Section 1241 applies to distributorship agreements only if they are for marketing or marketing and servicing of goods. It does not apply to agreements for selling intangible property or for rendering personal services as, for example, agreements establishing insurance agencies or agencies for the brokerage of securities. Further, it applies to a distributorship agreement only if the distributor has made a substantial investment of capital in the distributorship. The substantial capital investment must be reflected in physical assets such as inventories of tangible goods, equipment, machinery, storage facilities, or similar property. An investment is not considered substantial for purposes of section 1241 unless it consists of a significant fraction or more of the facilities for storing, transporting, processing, or otherwise dealing with the goods distributed, or consists of a substantial inventory of such goods. The investment required in the maintenance of an office merely for clerical operations is not considered substantial for purposes of this section. Furthermore, section 1241 shall not apply unless a substantial amount of the capital or assets needed for carrying on the operations of a distributorship are acquired by the distributor and actually used in carrying on the distributorship at some time before the cancellation of the distributorship agreement. It is immaterial for the purposes of section 1241 whether the distributor acquired the assets used in performing the functions of the distributorship before or after beginning his operations under the distributorship agreement. It is also immaterial whether the distributor is a retailer, wholesaler, jobber, or other type of distributor. The application of this paragraph may be illustrated by the following examples:

Example 1. Taxpayer is a distributor of various food products. He leases a warehouse including cold storage facilities and owns a number of motor trucks. In 1955 he obtains the exclusive rights to market certain frozen food products in his State. The marketing is accomplished by using the warehouse and trucks acquired before he entered into the agreement and entails no additional capital. Payments received upon the cancellation of the agreement are treated under section 1241 as though received upon the sale or exchange of the agreement.

Example 2. Assume that the taxpayer in example (1) entered into an exclusive distributorship agreement with the producer under which the taxpayer merely solicits orders through his staff of salesmen, the goods being shipped direct to the purchasers. Payments received upon the cancellation of the agreement would not be treated under section 1241 as though received upon the sale or exchange of the agreement.

Example 3. Taxpayer is an exclusive distributor for M city of certain frozen food products which he distributes to frozen-food freezer and locker customers. The terms of his distributorship do not make it necessary for him to have any substantial investment in inventory. Taxpayer rents a loading platform for a nominal amount, but has no warehouse space. Orders for goods from customers are consolidated by the taxpayer and forwarded to the producer from time to time. Upon receipt of these goods, taxpayer allocates them to the individual orders of customers and delivers them immediately by truck. Although it would require a fleet of fifteen or twenty trucks to carry out this operation, the distributor uses only one truck of his own and hires cartage companies to deliver the bulk of the merchandise to the customers. Payments received upon the cancellation of the distributorship agreement in such a case would not be considered received upon the sale or exchange of the agreement under section 1241 since the taxpayer does not have facilities for the physical handling of more than a small fraction of the goods involved in carrying on the distributorship and, therefore, does not have a substantial capital investment in the distributorship. On the other hand, if the taxpayer had acquired and used a substantial number of the trucks necessary for the deliveries to his customers, payments received upon the cancellation of the agreement would be considered received in exchange therefor under section 1241.

[T.D. 6500, 25 FR 12021, Nov. 26, 1960]

§ 1.1242–1 Losses on small business investment company stock.

(a) *In general.* Any taxpayer who sustains a loss for a taxable year beginning after September 2, 1958, as a result of the worthlessness, or from the sale or exchange, of the stock of a small business investment company (whether or not such stock was originally issued to such taxpayer) shall treat such loss as a loss from the sale or exchange of property which is not a capital asset, if at the time of such loss:

(1) The company which issued the stock is licensed to operate as a small business investment company pursuant to regulations promulgated by the Small Business Administration (13 CFR part 107), and

(2) Such loss would, but for the provisions of section 1242, be a loss from the sale or exchange of a capital asset.

(b) *Treatment of losses for purposes of section 172.* For the purposes of section 172 (relating to the net operating loss deduction), any amount of loss treated by reason of section 1242 as a loss from the sale or exchange of property which is not a capital asset shall be treated as attributable to the trade or business of the taxpayer. Accordingly, the limitation of section 172(d)(4) on the allowance of nonbusiness deductions in computing a net operating loss shall not apply to any loss with respect to the stock of a small business investment company as described in paragraph (a) of this section. See section 172(d) and § 1.172–3.

(c) *Statement to be filed with return.* A taxpayer claiming a deduction for a loss on the stock of a small business investment company shall file with his income tax return a statement containing: The name and address of the small business investment company which issued the stock, the number of shares, basis, and selling price of the stock with respect to which the loss is claimed, the respective dates of purchase and sale of such stock, or the reason for its worthlessness and approximate date thereof. For the rules applicable in determining the worthlessness of securities, see section 165 and the regulations thereunder.

[T.D. 6500, 25 FR 12022, Nov. 26, 1960]

§1.1243–1 Loss of small business investment company.

(a) *In general*—(1) *Taxable years beginning after July 11, 1969.* For taxable years beginning after July 11, 1969, a small business investment company to which section 582(c) applies, and which sustains a loss as a result of the worthlessness, or on the sale or exchange, of the stock of a small business concern (as defined in section 103(5) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 662(5)) and in 13 CFR 107.3), shall treat such loss as a loss from the sale or exchange of property which is not a capital asset if:

(i) The stock was issued pursuant to the conversion privilege of the convertible debentures acquired in accordance with the provisions of section 304 of the Small Business Investment Act of 1958 (15 U.S.C. 684) and the regulations thereunder.

(ii) Such loss would, but for the provisions of section 1243, be a loss from the sale or exchange of a capital asset, and

(iii) At the time of the loss, the company is licensed to operate as a small business investment company pursuant to regulations promulgated by the Small Business Administration (13 CFR part 107).

If section 582(c) does not apply for the taxable year, see subparagraph (2) of this paragraph.

(2) *Taxable years beginning before July 11, 1974.* For taxable years beginning after September 2, 1958, but before July 11, 1974, a small business investment company to which section 582(c) does not apply, and which sustains a loss as a result of the worthlessness, or on the sale or exchange, of the securities of a small business concern (as defined in section 103(5) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 662(5)) and in 13 CFR 107.3), shall treat such loss as a loss from the sale or exchange of property which is not a capital asset if:

(i) The securities are either the convertible debentures, or the stock issued pursuant to the conversion privilege thereof, acquired in accordance with the provisions of section 304 of the Small Business Investment Act of 1958 (15 U.S.C. 684) and the regulations thereunder.

(ii) Such loss would, but for the provisions of this subparagraph, be a loss from the sale or exchange of a capital asset, and

(iii) At the time of the loss, the company is licensed to operate as a small business investment company pursuant to regulations promulgated by the Small Business Administration (13 CFR part 107).

If section 582(c) applies for the taxable year, see subparagraph (1) of this paragraph.

(b) *Material to be filed with return.* A small business investment company which claims a deduction for a loss on the convertible debentures (pursuant to paragraph (a)(2) of this section) or stock (pursuant to paragraph (a) (1) or (2) of this section) of a small business concern shall submit with its income tax return a statement that it is a Federal licensee under the Small Business Investment Act of 1958 (15 U.S.C. chapter 14B). The statement shall also set forth: the name and address of the small business concern with respect to whose securities the loss was sustained, the number of shares of stock or the number and denomination of debentures with respect to which the loss is claimed, the basis and selling price thereof, and the respective dates of purchase and sale of the securities, or the reason for their worthlessness and the approximate date thereof. For the rules applicable in determining the worthlessness of securities, see section 165 and the regulations thereunder.

[T.D. 7171, 37 FR 5621, Mar. 17, 1972]

§1.1244(a)–1 Loss on small business stock treated as ordinary loss.

(a) *In general.* Subject to certain conditions and limitations, section 1244 provides that a loss on the sale or exchange (including a transaction treated as a sale or exchange, such as worthlessness) of *section 1244 stock* which would otherwise be treated as a loss from the sale or exchange of a capital asset shall be treated as a loss from the sale or exchange of an asset which is not a capital asset (referred to in this section and §§ 1.1244(b)–1 to 1.1244(e)–1, inclusive, as an *ordinary loss*). Such a loss shall be allowed as a deduction from gross income in arriving at adjusted gross income. The requirements that must be satisfied in order that stock may be considered section 1244 stock are described in §§ 1.1244(c)–1 and 1.1244(c)–2. These requirements relate to the stock itself and the corporation issuing such stock. In addition, the taxpayer who claims an ordinary loss deduction pursuant to section 1244 must satisfy the requirements of paragraph (b) of this section.

(b) *Taxpayers entitled to ordinary loss.* The allowance of an ordinary loss deduction for a loss of section 1244 stock is permitted only to the following two classes of taxpayers:

(1) An individual sustaining the loss to whom the stock was issued by a small business corporation, or

(2) An individual who is a partner in a partnership at the time the partnership acquired the stock in an issuance from a small business corporation and whose distributive share of partnership items reflects the loss sustained by the partnership. The ordinary loss deduction is limited to the lesser of the partner's distributive share at the time of the issuance of the stock or the partner's distributive share at the time the loss is sustained. In order to claim a deduction under section 1244 the individual, or the partnership, sustaining the loss must have continuously held the stock from the date of issuance. A corporation, trust, or estate is not entitled to ordinary loss treatment under section 1244 regardless of how the stock was acquired. An individual who acquires stock from a shareholder by purchase, gift, devise, or in any other manner is not entitled to an ordinary loss under section 1244 with respect to this stock.

Thus, ordinary loss treatment is not available to a partner to whom the stock is distributed by the partnership. Stock acquired through an investment banking firm, or other person, participating in the sale of an issue may qualify for ordinary loss treatment only if the stock is not first issued to the firm or person. Thus, for example, if the firm acts as a selling agent for the issuing corporation the stock may qualify. On the other hand, stock purchased by an investment firm and subsequently resold does not qualify as section 1244 stock in the hands of the person acquiring the stock from the firm.

(c) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples:

Example 1. A and B, both individuals, and C, a trust, are equal partners in a partnership to which a small business corporation issues section 1244 stock. The partnership sells the stock at a loss. A's and B's distributive share of the loss may be treated as an ordinary loss pursuant to section 1244, but C's distributive share of the loss may not be so treated.

Example 2. The facts are the same as in example (1) except that the section 1244 stock is distributed by the partnership to partner A and he subsequently sells the stock at a loss. Section 1244 is not applicable to the loss since A did not acquire the stock by issuance from the small business corporation.

[T.D. 6495, 25 FR 9675, Oct. 8, 1960, as amended by T.D. 7779, 46 FR 29467, June 2, 1981]

§ 1.1244(b)–1 Annual limitation.

(a) *In general.* Subsection (b) of section 1244 imposes a limitation on the aggregate amount of loss that for any taxable year may be treated as an ordinary loss by a taxpayer by reason of that section. In the case of a partnership, the limitation is determined separately as to each partner. Any amount of loss in excess of the applicable limitation is treated as loss from the sale or exchange of a capital asset.

(b) *Amount of loss*—(1) *Taxable years beginning after December 31, 1978.* For any taxable year beginning after December 31, 1978, the maximum amount that may be treated as an ordinary loss under section 1244 is:

(i) $50,000, or

(ii) $100,000, if a husband and wife file a joint return under section 6013.

These limitations on the maximum amount of ordinary loss apply whether the loss or losses are sustained on pre-November 1978 stock (as defined in § 1.1244 (c)–1 (a)(1)), post-November 1978 stock (as defined in § 1.1244 (c)–1 (a)(2)), or on any combination of pre-November 1978 stock and post-November 1978 stock. The limitation referred to in (ii) applies to a joint return whether the loss or losses are sustained by one or both spouses.

(2) *Taxable years ending before November 6, 1978.* For any taxable year ending before November 6, 1978, the maximum amount that may be treated as an ordinary loss under section 1244 is:

(i) $25,000 or

(ii) $50,000, if a husband and wife file a joint return under section 6013.

The limitation referred to in (ii) applies to a joint return whether the loss or losses are sustained by one or both spouses.

(3) *Taxable years including November 6, 1978.* For a taxable year including November 6, 1978, the maximum amount that may be treated as ordinary loss under section 1244 is the sum of:

(i) The amount calculated by applying the limitations described in subparagraph (1) of this paragraph (b) to the amount of loss, if any, sustained during the taxable year on post-November 1978 stock, plus

(ii) The amount calculated by applying the limitations described in subparagraph (2) of this paragraph (b) to the amount of loss, if any, sustained during the taxable year on pre-November 1978 stock,

To the extent this sum does not exceed $50,000, or, if a husband and wife file a joint return under section 6013 for the taxable year, $100,000.

(4) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. A, a married taxpayer who files a joint return for the taxable year ending December 31, 1977, sustains a $50,000 loss qualifying under section 1244 on pre-November 1978 stock in Corporation X and an equal amount of loss qualifying under section 1244 on pre-November 1978 stock in Corporation Y. A is limited to $50,000 of ordinary loss under paragraph (b)(2)(ii). The remaining $50,000 of loss is treated as loss from the sale or exchange of a capital asset.

Example 2. For the taxable year ending December 31, 1979, B, a married taxpayer who files a joint return, sustains a $90,000 loss on post-November 1978 stock in Corporation X. In the same taxable year, C, B's spouse, sustains a $25,000 loss on post-November 1978 stock in Corporation Y. Both losses qualify under section 1244. B and C's ordinary loss is limited to $100,000 under paragraph (b)(1)(ii). The remaining $15,000 of loss is treated as loss from the sale or exchange of a capital asset.

Example 3. D, a married taxpayer who files a joint return and reports income on a fiscal year basis for the taxable year ending November 30, 1978, sustains a $60,000 loss qualifying under section 1244 on pre-November 1978 stock and a $40,000 loss qualifying under section 1244 on post-November 1978 stock. D's ordinary loss on pre-November 1978 stock is limited to $50,000 under subparagraph (3)(ii) of this paragraph (b). D's $40,000 loss on post-November 1978 stock is within the limit of subparagraph (3)(i) of this paragraph (b). The total of these losses, $90,000, is the aggregate amount deductible by D as ordinary loss under section 1244. The remaining $10,000 of loss is treated as loss from the sale or exchange of a capital asset.

Example 4. E, a married taxpayer who files a joint return for the taxable year ending December 31, 1980, sustains a $75,000 loss qualifying under section 1244 on pre-November 1978 stock and a $10,000 loss qualifying under section 1244 on post-November 1978 stock. E may deduct the total of these losses, $85,000, as ordinary loss under paragraph (b)(1)(ii).

Example 5. Assume the same facts as in the preceding example, except that the losses are sustained in the taxable year beginning January 1, 1978, and ending December 31, 1978. E is limited to $60,000 of ordinary loss ($50,000 on pre-November 1978 stock plus $10,000 on post-November 1978 stock) under paragraph (b)(3). The remaining $25,000 of loss is treated as loss from the sale or exchange of a capital asset.

Example 6. F, a married taxpayer who files a joint return for the taxable year beginning January 1, 1978, and ending December 31, 1978, sustains a $75,000 loss qualifying under section 1244 on pre-November 1978 stock and a $125,000 loss qualifying under section 1244 on post-November 1978 stock. F's loss on pre-November 1978 stock is limited to $50,000 of ordinary loss under subparagraph (3)(ii) of this paragraph (b). F's loss on post-November 1978 stock is limited to $100,000 of ordinary loss under subparagraph (3)(i) of this paragraph (b). The total of these losses, $150,000, is limited to $100,000 of ordinary loss under paragraph (b)(3). F's aggregate amount of ordinary loss under section 1244 is $100,000. The remaining $100,000 of loss is treated as loss from the sale or exchange of a capital asset.

[T.D. 7779, 46 FR 29467, June 2, 1981]

§1.1244(c)–1 Section 1244 stock defined.

(a) *In general.* For purposes of §§1.1244(a)–1 to 1.1244(e)–1, inclusive:

(1) The term *pre-November 1978 stock* means stock issued after June 30, 1958, and on or before November 6, 1978.

(2) The term *post-November 1978 stock* means stock issued after November 6, 1978.

In order that stock may qualify as section 1244 stock, the requirements described in paragraphs (b) through (e) of this section must be satisfied. In addition, the requirements of paragraph (f) of this section must be satisfied in the case of pre-November 1978 stock. Whether these requirements have been met is determined at the time the stock is issued, except for the requirement in paragraph (e) of this section. Whether the requirement in paragraph (e) of this section, relating to gross receipts of the corporation, has been satisfied is determined at the time a loss is sustained. Therefore, at the time of issuance it cannot be said with certainty that stock will qualify for the benefits of section 1244.

(b) *Common stock.* Only common stock, either voting or nonvoting, in a domestic corporation may qualify as section 1244 stock. For purposes of section 1244, neither securities of the corporation convertible into common stock nor common stock convertible into other securities of the corporation are treated as common stock. An increase in the basis of outstanding stock as a result of a contribution to capital is not treated as an issuance of stock under section 1244. For definition of domestic corporation, see section 7701(a)(4) and the regulations under that section.

(c) *Small business corporation.* At the time the stock is issued (or, in the case of pre-November 1978 stock, at the time of adoption of the plan described in paragraph (f)(1) of this section) the corporation must be a *small business corporation.* See § 1.1244(c)–2 for the definition of a small business corporation.

(d) *Issued for money or other property.* (1) The stock must be issued to the taxpayer for money or other property transferred by the taxpayer to the corporation. However, stock issued in exchange for stock or securities, including stock or securities of the issuing corporation, cannot qualify as section 1244 stock, except as provided in § 1.1244(d)–3, relating to certain cases where stock is issued in exchange for section 1244 stock. Stock issued for services rendered or to be rendered to, or for the benefit of, the issuing corporation does not qualify as section 1244 stock. Stock issued in consideration for cancellation of indebtedness of the corporation shall be considered issued in exchange for money or other property unless such indebtedness is evidenced by a security, or arises out of the performance of personal services.

(2) The following examples illustrate situations where stock fails to qualify as section 1244 stock as a result of the rules in subparagraph (1) of this paragraph:

Example 1. A taxpayer owns stock of Corporation X issued to him prior to July 1, 1958. Under a plan adopted in 1977, he exchanges his stock for a new issuance of stock of Corporation X. The stock received by the taxpayer in the exchange may not qualify as section 1244 stock even if the corporation has adopted a valid plan and is a small business corporation.

Example 2. A taxpayer owns stock in Corporation X. Corporation X merges into Corporation Y. In exchange for his stock, Corporation Y issues shares of its stock to the taxpayer. The stock in Corporation Y does not qualify as section 1244 stock even if the stock exchanged by the taxpayer did qualify.

Example 3. Corporation X transfers part of its business assets to Corporation Y, a new corporation, and all of the stock of Corporation Y is issued directly to the shareholders of Corporation X. Since the Corporation Y stock was not issued to the shareholders for a transfer by them of money or other property, none of the Corporation Y stock in the hands of the shareholders can qualify.

(e) *Gross receipts.* (1)(i)(*a*) Except as provided in subparagraph (2) of this paragraph, stock will not qualify under section 1244, if 50 percent or more of the gross receipts of the corporation, for the period consisting of the five most recent taxable years of the corporation ending before the date the loss on such stock is sustained by the shareholders, is derived from royalties, rents, dividends, interest, annuities, and sales or exchanges of stock or securities. If the corporation has not been in existence for five taxable years ending before such date, the percentage test referred to in the preceding sentence applies to the period of the taxable years ending before such date during which the corporation has been in existence; and if the loss is sustained during the first taxable year of the corporation such test applies to the period beginning with the first day of such taxable year and ending on the day before the loss is sustained. The test under this paragraph shall be made on the basis of total gross receipts, except that gross receipts from the sales or exchanges of stock or securities shall be taken into account only to the extent of gains therefrom. The term *gross receipts* as used in section 1244(c)(1)(C) is not synonymous with *gross income.* Gross receipts means the total amount received or accrued under the method of accounting used by the corporation in computing its taxable income. Thus, the total amount of receipts is not reduced by returns and allowances, cost, or deductions. For example, gross receipts will include the total amount received or accrued during the corporation's taxable year from the sale or exchange (including a sale or exchange to which section 337 applies) of any kind of property, from investments, and for services rendered by the corporation. However, gross receipts does not include amounts received in nontaxable sales or exchanges (other than those to which section 337 applies), except to the extent that gain is recognized by the corporation, nor does that term include amounts received as a loan, as a repayment of a loan, as a contribution to capital, or on the issuance by the corporation of its own stock.

(*b*) The meaning of the term *gross receipts* as used in section 1244(c)(1)(C) may be further illustrated by the following examples:

Example 1. A corporation on the accrual method sells property (other than stock or securities) and receives payment partly in money and partly in the form of a note payable at a future time. The amount of the money and the face amount of the note would be considered gross receipts in the taxable year of the sale and would not be reduced by the adjusted basis of the property, the costs of sale, or any other amount.

Example 2. A corporation has a long-term contract as defined in paragraph (a) of §1.451–3 with respect to which it reports income according to the percentage-of-completion method as described in paragraph (b)(1) of §1.451–3. The portion of the gross contract price which corresponds to the percentage of the entire contract which has been completed during the taxable year shall be included in gross receipts for such year.

Example 3. A corporation which regularly sells personal property on the installment plan elects to report its taxable income from the sale of property (other than stock or securities) on the installment method in accordance with section 453. The installment payments actually received in a given taxable year of the corporation shall be included in gross receipts for such year.

(ii) The term *royalties* as used in subdivision (i) of this subparagraph means all royalties, including mineral, oil, and gas royalties (whether or not the aggregate amount of such royalties constitutes 50 percent or more of the gross income of the corporation for the taxable year), and amounts received for the privilege of using patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like property. The term *royalties* does not include amounts received upon the disposal of timber, coal, or domestic iron ore with a retained economic interest to which the special rules of section 631 (b) and (c) apply or amounts received from the transfer of patent rights to which section 1235 applies. For the definition of *mineral, oil, or gas royalties,* see paragraph (b)(11) (ii) and (iii) of §1.543–1. For purposes of this subdivision, the gross amount of royalties shall not be reduced by any part of the cost of the rights under which they are received or by any amount allowable as a deduction in computing taxable income.

(iii) The term *rents* as used in subdivision (i) of this subparagraph means amounts received for the use of, or right to use, property (whether real or personal) of the corporation, whether or not such amounts constitute 50 percent or more of the gross income of the corporation for the taxable year. The term *rents* does not include payments for the use or occupancy of rooms or other space where significant services are also rendered to the occupant, such as for the use or occupancy of rooms or other quarters in hotels, boarding houses, or apartment houses furnishing hotel services, or in tourist homes, motor courts, or motels. Generally, services are considered rendered to the occupant if they are primarily for his convenience and are other than those usually or customarily rendered in connection with the rental of rooms or other space for occupancy only. The supplying of maid service, for example, constitutes such services; whereas the furnishing of heat and light, the cleaning of public entrances, exits, stairways, and lobbies, the collection of trash, etc., are not considered as services rendered to the occupant. Payments for the use or occupancy of entire private residences or living quarters in duplex or multiple housing units, of offices in an office building, etc., are generally *rents* under section 1244(c)(1)(C). Payments for the parking of automobiles ordinarily do not constitute rents. Payments for the warehousing of goods or for the use of personal property do not constitute rents if significant services are rendered in connection with such payments.

(iv) The term *dividends* as used in subdivision (i) of this subparagraph includes dividends as defined in section 316, amounts required to be included in gross income under section 551 (relating to foreign personal holding company income taxed to United States shareholders), and consent dividends determined as provided in section 565.

(v) The term *interest* as used in subdivision (i) of this subparagraph means any amounts received for the use of money (including tax-exempt interest).

(vi) The term *annuities* as used in subdivision (i) of this subparagraph means the entire amount received as an annuity under an annuity, endowment, or life insurance contract, regardless of whether only part of such amount would be includible in gross income under section 72.

(vii) For purposes of subdivision (i) of this subparagraph, gross receipts from the sales or exchanges of stock or securities are taken into account only to the extent of gains therefrom. Thus, the gross receipts from the sale of a particular share of stock will be the excess of the amount realized over the adjusted basis of such share. If the adjusted basis should equal or exceed the amount realized on the sale or exchange of a certain share of stock, bond, etc., there would be no gross receipts resulting from the sale of such security. Losses on sales or exchanges of stock or securities do not offset gains on the sales or exchanges of other stock or securities for purposes of computing gross receipts from such sales or exchanges. Gross receipts from the sale or exchange of stocks and securities include gains received from such sales or exchanges by a corporation even though such corporation is a regular dealer in stocks and securities. For the meaning of the term *stocks or securities,* see paragraph (b)(5)(i) of § 1.543–1.

(2) The requirement of subparagraph (1) of this paragraph need not be satisfied if for the applicable period the aggregate amount of deductions allowed to the corporation exceeds the aggregate amount of its gross income. But for this purpose the deductions allowed by section 172, relating to the net operating loss deduction, and by sections 242, 243, 244, and 245, relating to certain special deductions for corporations, shall not be taken into account. Notwithstanding the provisions of this subparagraph and of subparagraph (1) of this paragraph, pursuant to the specific delegation of authority granted in section 1244(e) to prescribe such regulations as may be necessary to carry out the purposes of section 1244, ordinary loss treatment will not be available with respect to stock of a corporation which is not largely an operating company within the five most recent taxable years (or such lesser period as the corporation is in existence) ending before the date of the loss. Thus, for example, assume that a person who is not a dealer in real estate forms a corporation which issues stock to him which meets all the formal requirements of section 1244 stock. The corporation then acquires a piece of unimproved real estate which it holds as an investment. The property declines in value and the stockholder sells his stock at a loss. The loss does not qualify for ordinary loss treatment under section 1244 but must be treated as a capital loss.

(3) In applying subparagraphs (1) and (2) of this paragraph to a successor corporation in a reorganization described in section 368(a)(1)(F), such corporation shall be treated as the same corporation as its predecessor. See paragraph (d)(2) of § 1.1244(d)–3.

(f) *Special rules applicable to pre-November 1978 stock.* (1)(i) Pre-November 1978 common stock must have been issued under a written plan adopted by the corporation after June 30, 1958, and on or before November 6, 1978, to offer only this stock during a period specified in the plan ending not later than 2 years after the date the plan is adopted. The 2-year requirement referred to in the preceding sentence is met if the period specified in the plan is based upon the date when, under the rules or regulations of a Government agency relating to the issuance of the stock, the stock may lawfully be sold, and it is clear that this period will end, and in fact does end, within 2 years after the plan is adopted. The plan must specifically state, in terms of dollars, the maximum amount to be received by the corporation in consideration for the stock to be issued under the plan. See §1.1244(c)–2 for the limitation on the amount that may be received by the corporation under the plan.

(ii) To qualify, the pre-November 1978 stock must be issued during the period of the offer, which period must end not later than two years after the date the plan is adopted. Pre-November 1978 stock which is subscribed for during the period of the plan but not issued during this period cannot qualify as section 1244 stock. Pre-November 1978 stock issued on the exercise of a stock right, stock warrant, or stock option (which right, warrant, or option was not outstanding at the time the plan was adopted) will be treated as issued under a plan only if the right, warrant, or option is applicable solely to unissued stock offered under the plan and is exercised during the period of the plan.

(iii) Pre-November 1978 stock subscribed for prior to the adoption of the plan, including stock subscribed for prior to the date the corporation comes into existence, may be considered issued under a plan adopted by the corporation if the stock is not in fact issued prior to the adoption of the plan.

(iv) Pre-November 1978 stock issued for a payment which, alone or together with prior payments, exceeds the maximum amount that may be received under the plan, is not considered issued under the plan, and none of the stock can qualify as section 1244 stock. See §1.1244(c)–2(b) for a different rule with respect to post-November 1978 stock.

(2) Pre-November 1978 stock does not qualify as section 1244 stock if at the time of the adoption of the plan under which it is issued there remains unissued any portion of a prior offering of stock. Thus, if any portion of an outstanding offering of common or preferred stock is unissued at the time of the adoption of the plan, stock issued under the plan will not qualify as section 1244 stock. An offer is outstanding unless and until it is withdrawn by affirmative action before the plan is adopted. Stock rights, stock warrants, stock options, or securities convertible into stock, that are outstanding at the time the plan is adopted, are considered prior offerings. The authorization in the corporate charter to issue stock different from stock offered under the plan or in excess of stock offered under the plan is not of itself a prior offering.

(3)(i) Even though the plan satisfies the requirements of subparagraph (1) of this paragraph (f), if another offering of pre-November 1978 stock is made by the corporation subsequent to, or simultaneous with, the adoption of the plan, pre-November 1978 stock issued under the plan after the other offering does not qualify as section 1244 stock. The issuance of stock options, stock rights, or stock warrants at any time during the period of the plan, that are exercisable on stock other than stock offered under the plan, is considered a subsequent offering. Similarly, the issuance of pre-November 1978 stock other than that offered under the plan is considered a subsequent offering. Because stock issued upon exercise of a converson privilege is stock issued for a security, and stock issued under a stock option granted in whole or in part for services is not issued for money or other property, the issuance of securities with a conversion privilege and the issuance of such a stock option are subsequent offerings, because the conversion privilege and the stock option are exercisable with respect to stock other than that which may properly be offered under the plan. Pre-November 1978 stock issued under the plan before a subsequent offering is not disqualified because of the subsequent offering. The rule of the subparagraph, together with the rule of subparagraph (2) of this paragraph (f), relating to offers prior to the adoption of the plan, limits pre-November 1978 section 1244 stock to stock issued by the corporation during a period when any stock issued by it must have been issued under the plan.

(ii) Any modification of a plan that changes the offering to include preferred stock, or that increases the amount of pre-November 1978 stock that may be issued under the plan to such an extent that the requirements of paragraph (c) of this section would not have been satisfied if determined with reference to this amount as of the date the plan was initially adopted, or that extends the period of time during which stock may be issued under the plan to more than 2 years from the date the plan was initially adopted, is considered a subsequent offering, and no stock issued after this offering may qualify. However, a corporation may withdraw a plan and adopt a new plan to issue stock. To determine whether stock issued under this new plan may qualify, this paragraph (f) must be applied with respect to the new plan as of the date of its adoption. For example, amounts received for stock under the prior plan must be taken into account in determining whether the statutory requirements relating to definition of small business corporation are satisfied. In applying the requirements of paragraph (c) of this section, reference should be made to equity capital as of the date the new plan is adopted. The same principles apply if the period of the initial plan expires and the corporation adopts a new plan.

[T.D. 7779, 46 FR 29468, June 2, 1981]

§ 1.1244(c)–2 Small business corporation defined.

(a) *In general.* A corporation is treated as a small business corporation if it is a domestic corporation that satisfies the requirements described in paragraph (b) or (c) of this section. The requirements of paragraph (b) of this section apply if a loss is sustained on post-November 1978 stock. The requirements of paragraph (c) of this section apply if a loss is sustained on pre-November 1978 stock. If losses are sustained on both pre-November 1978 stock and post-November 1978 stock in the same taxable year, the requirements of paragraph (b) of this section are applied to the corporation at the time of the issuance of the stock (as required by paragraph (b) in the case of a loss on post-November 1978 stock) in order to determine whether the loss on post-November 1978 stock qualifies as a section 1244 loss, and the requirements of paragraph (c) of this section are applied to the corporation at the time of the adoption of the plan (as required by paragraph (c) in the case of a loss on pre-November 1978 stock) in order to determine whether the loss on pre-November 1978 stock qualifies as a section 1244 loss. For definition of domestic corporation, see section 7701 (a)(4) and the regulations under that section.

(b) *Post-November 1978 stock*—(1) *Amount received by corporation for stock.* Capital receipts of a small business corporation may not exceed $1,000,000. For purposes of this paragraph the term *capital receipts* means the aggregate dollar amount received by the corporation for its stock, as a contribution to capital, and as paid-in surplus. If the $1,000,000 limitation is exceeded, the rules of subparagraph (2) of this paragraph (b) apply. In making these determinations, (i) property is taken into account at its adjusted basis to the corporation (for determining gain) as of the date received by the corporation, and (ii) this aggregate amount is reduced by the amount of any liability to which the property was subject and by the amount of any liability assumed by the corporation at the time the property was received. Capital receipts are not reduced by distributions to shareholders, even though the distributions may be capital distributions.

(2) *Requirement of designation in event $1,000,000 limitation exceeded.* (i) If capital receipts exceed $1,000,000, the corporation shall designate as section 1244 stock certain shares of post-November 1978 common stock issued for money or other property in the transitional year. For purposes of this paragraph, the term *transitional year* means the first taxable year in which capital receipts exceed $1,000,000 and in which the corporation issues stock. This designation shall be made in accordance with the rules of subdivision (iii) of this paragraph (b)(2). The amount received for designated stock shall not exceed $1,000,000 less amounts received—

(A) In exchange for stock in years prior to the transitional year;

(B) As contributions to capital in years prior to the transitional year; and

(C) As paid-in surplus in years prior to the transitional year.

(ii) Post-November 1978 common stock issued for money or other property before the transitional year qualifies as section 1244 stock without affirmative designation by the corporation. Post-November 1978 common stock issued after the transitional year does not qualify as section 1244 stock.

(iii) The corporation shall make the designation required by subdivision (i) of this paragraph (b)(2) not later than the 15th day of the third month following the close of the transitional year. However, in the case of post-November 1978 common stock issued on or before June 2, 1981 the corporation shall make the required designation by August 3, 1981 or by the 15th day of the 3rd month following the close of the transitional year, whichever is later. The designation shall be made by entering the numbers of the qualifying share certificates on the corporation's records. If the shares do not bear serial numbers or other identifying numbers or letters, or are not represented by share certificates, the corporation shall make an alternative designation in writing at the time of issuance, or, in the case of post-November 1978 common stock issued on or before June 2, 1981 by August 3, 1981. This alternative designation may be made in any manner sufficient to identify the shares qualifying for section 1244 treatment. If the corporation fails to make a designation by share certificate number or an alternative written designation as described, the rules of subparagraph (3) of this paragraph (b) apply.

(3) *Allocation of section 1244 benefit in event corporation fails to designate qualifying shares.* If a corporation issues post-November 1978 stock in the transitional year and fails to designate certain shares of post-November 1978 common stock as section 1244 stock in accordance with the rules of subparagraph (2) of this paragraph (b), the following rules apply:

(i) Section 1244 treatment is extended to losses sustained on post-November 1978 common stock issued for money or other property in taxable years before the transitional year and is withheld from losses sustained on post-November 1978 stock issued in taxable years after the transitional year.

(ii) Post-1958 capital received before the transitional year is subtracted from $1,000,000.

iii) Subject to the annual limitation described in §1.1244(b)–1, an ordinary loss on post-November 1978 common stock issued for money or other property in the transitional year is allowed in an amount which bears the same ratio to the total loss sustained by the individual as:

(A) The amount described in §1.1244(c)–2(b) (3) (ii) bears to

(B) The total amount of money and other property received by the corporation in exchange for stock, as a contribution to capital, and as paid-in surplus in the transitional year.

(4) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example 1. On December 1, 1978, Corporation W, a newly-formed corporation, issues 10,000 shares of common stock at $125 a share for an amount (determined under subparagraph (1) of this paragraph (b)) of money and other property totaling $1,250,000. The board of directors specifies that 8,000 shares are section 1244 stock and records the certificate numbers of the qualifying shares in its minutes. Because Corporation W issued post-November 1978 common stock in exchange for money and other property exceeding $1,000,000, but has designated shares of stock as section 1244 stock and the designated shares were issued in exchange for money and other property not exceeding $1,000,000 (8,000 shares × $125 price per share = $1,000,000), the 8,000 designated shares qualify as section 1244 stock.

Example 2. Corporation X comes into existence on June 1, 1979. On June 10, 1979, Corporation X issues 2,500 shares of common stock at $250 per share to shareholder A and 2,500 shares of common stock at $250 per share to shareholder B. By written agreement dated September 1, 1981, shareholder A and shareholder B determine that 1,500 of shareholder A's shares and all of shareholder B's shares will be treated as section 1244 stock. Although shareholder A's 1,500 shares and shareholder B's 2,500 shares were issued for money and other property not exceeding $1,000,000 (4,000 shares × $250 price per share = $1,000,000, these 4,000 shares do not qualify as section 1244 stock under the rules of subparagraph (2) of this paragraph (b) for three reasons: The agreement of September 1, 1979, (i) did not identify which 1,500 of shareholder A's 2,500 shares were intended to qualify for section 1244 treatment, (ii) was made by the shareholders and not by Corporation X, and (iii) was made later than the 15th day of the third month following the close of the transitional year. However, certain of the shares issued by Corporation X may qualify as section 1244 stock under the rules of subparagraph (3) of this paragraph (b). See example (4).

Example 3. On December 1, 1980, Corporation Y issues common stock to shareholder A in exchange for $500,000 in cash. On August 1, 1981, Corporation Y issues common stock to shareholder B in exchange for property having an adjusted basis to Corporation Y of $500,000. On December 1, 1981, B transfers a tract of land having a basis in B's hands of $250,000 to Corporation Y as a contribution to capital. Under section 362(a)(2) of the Code, Corporation Y takes a basis of $250,000 in the tract of land. Corporation Y is a calendar year corporation. On February 15, 1982, it designates all of shareholder B's stock as section 1244 stock by entering the numbers of the qualifying certificates on the corporation's records. The designation made by Corporation Y is effective because it identifies which shares of its stock qualify for section 1244 treatment, was made in writing before the 15th day of the 3rd month following the close of the transitional year (1981), and because the amount received for designated stock does not exceed $1,000,000, less amounts received (i) in exchange for stock in years prior to the transitional year; (ii) as contributions to capital in years prior to the transitional year; and (iii) as paid-in surplus in years prior to the transitional year. Nevertheless, in the event of B's sale of his stock at a loss, the increase in basis attributable to his December, 1981, contribution to capital will be treated as allocable to stock that is not section 1244 stock under § 1.1244(d)–2.

Example 4. Corporation Z, a newly-formed corporation, issues 10,000 shares of common stock at $200 per share on July 1, 1979. In exchange for its stock Corporation Z receives property (other than stock or securities) having a basis to the corporation of $400,000, and $1,600,000 in cash, for a total of $2,000,000. Corporation Z fails to designate any of the issued shares as section 1244 stock. Shareholder C purchases 2,500 shares of the 10,000 shares of Corporation Z stock for $500,000 on July 1, 1979. Subsequently, shareholder C sells the 2,500 shares for $400,000. Shareholder C may treat $50,000 of the $100,000 loss as an ordinary loss under section 1244. The amount of that loss is computed under the rule of subparagraph (3) of this paragraph (b) as follows:

$$\frac{X \text{ [C's section 1244 loss]}}{\$100{,}000 \text{ [C's total loss]}} = \frac{\$1{,}000{,}000 \text{ [\$1,000,000} - 0 = \$1{,}000{,}000\text{]}}{\$2{,}000{,}000 \text{ [total amount received by Corporation Z]}}$$

$$X = \$50{,}000$$

The remaining $50,000 is not treated as an ordinary loss under section 1244.

Example 5. (i) Corporation V, a newly-formed corporation, issues common stock to shareholder A and shareholder B on June 15, 1980, in exchange for $800,000 in cash ($400,000 from A and $400,000 from B). On September 15, 1981, the corporation issues common stock to shareholder C in exchange for $600,000 in cash. On January 1, 1982, common stock is issued to shareholder D in exchange for $100,000 in cash. Corporation V fails to designate any of the issued shares as section 1244 stock. A, B, C, and D subsequently sell their Corporation Y stock at a loss.

(ii) Subject to the annual limitation discussed in § 1.1244(b)–1, A and B may treat their entire loss as an ordinary loss under section 1244. D may not treat any part of his loss as an ordinary loss under section 1244. Subject to the annual limitation, one-third of the loss sustained by shareholder C is treated as an ordinary loss under section 1244. These results are calculated under the rules of subparagraph (3) of this paragraph (b) as follows: First, section 1244 treatment is extended to post-November 1978 stock issued to A and B in 1980, a taxable year before the transitional year (1981); section 1244 treatment is withheld from the stock issued to D in 1982, a taxable year after the transitional year. Second $800,000 the amount of post-1958 capital received in taxable years before the transitional year, is subtracted from $1,000,000 to leave $200,000. Third, subject to the annual limitation, an ordinary loss is allowed to C in an amount which bears the same ratio to his total loss as the amount calculated in the preceding sentence ($200,000) bears to the total amount received by the corporation in the transitional year in exchange for stock, as a contribution to capital, or as paid-in surplus ($600,000).

Example 6. Corporation V comes into existence on July 1, 1982. On that date it issues 10 shares of voting common stock to shareholder A in exchange for $500,000 and 5 shares of voting common stock to shareholder B in exchange for $250,000, designating the shares issued to both A and B as section 1244 stock. On September 15, 1982, Corporation V receives a contribution to capital from shareholders A and B having a basis in their hands of $225,000. On February 1, 1983, Corporation V issues one share of stock to shareholder C in exchange for $50,000. Corporation V may designate one-half of the share issued to shareholder C as section 1244 stock under

§1.1244(c)–2 (b)(2). In 1982 the corporation received $750,000 for stock ($500,000 from A and $250,000 from B) and $225,000 as a capital contribution, totaling $975,000 in capital receipts. The receipt of $50,000 from shareholder C in exchange for stock in 1983 causes capital receipts to exceed $1,000,000 and 1983 thus becomes Corporation V's transitional year. Corporation V may receive only $25,000 for designated stock in 1983 under the rule set forth in §1.1244 (c)–2 (b)(2)(i), which states that the amount received for designated stock shall not exceed $1,000,000, less amounts received (i) in exchange for stock in years prior to the transitional year ($750,000 from A and B), (ii) as contributions to capital in years prior to the transitional year ($225,000), and (iii) as paid-in surplus in years prior to the transitional year ($0). Thus, one-half of C's share (representing the receipt of $25,000) may be designated as section 1244 stock by Corporation V. In the event of the sale of A's stock or B's stock at a loss, the increase in basis attributable to their contribution to capital will be treated as allocable to stock that is not section 1244 stock under §1.1244(d)–2.

(c) *Pre-November 1978 stock*—(1) *Amount received by corporation for stock.* At the time of the adoption of the plan, the sum of the aggregate dollar amount to be paid for pre-November 1978 stock that may be offered under the plan plus the aggregate amount of money and other property that has been received by the corporation after June 30, 1958, and on or before November 6, 1978, for its stock, as a contribution to capital by its shareholders, and as paid-in surplus must not exceed $500,000. In making these determinations (i) property is taken into account at its adjusted basis to the corporation (for determining gain) as of the date received by the corporation, and (ii) this aggregate amount is reduced by the amount of any liability to which the property was subject and by the amount of any liability assumed by the corporation at the time the property was received. For purposes of the $500,000 test, the total amount of money and other property received for stock, as a contribution to capital, and as paid-in surplus is not reduced by distributions to shareholders, even though the distributions may be capital distributions. Thus, once the total amount of money and other property received after June 30, 1958, reaches $500,000, the corporation is precluded from subsequently issuing pre-November 1978 stock. For a different rule that applies to post-November 1978 stock see §1.1244(c)–2(b).

(2) *Equity capital.* The sum of the aggregate dollar amount to be paid for pre-November 1978 stock that may be offered under the plan plus the equity capital of the corporation (determined on the date of the adoption of the plan) may not exceed $1,000,000. For this purpose, equity capital is the sum of the corporation's money and other property (in an amount equal to its adjusted basis for determining gain) less the amount of the corporation's indebtedness to persons other than its shareholders.

(3) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples:

Example 1. Corporation W comes into existence on December 1, 1958. On that date the corporation may adopt a plan to issue common stock for an amount (determined under subparagraph (1) of this paragraph (c)) not in excess of $500,000 during a period ending not later than November 30, 1960. Such corporation will qualify as a small business corporation as of the date that the plan is adopted. However, if the corporation adopts a plan to issue stock for an amount in excess of $500,000 it is not a small business corporation at the time the plan is adopted and no stock issued under the plan may qualify as section 1244 stock. If the cost of organizing corporation W amounted to $1,000 and constituted paid-in surplus or a contribution to capital, such amount must be taken into account in determining the amount that may be received under the plan, with the result that only $499,000 may be so received.

Example 2. On December 1, 1958, Corporation X, a newly formed corporation, adopts a plan to issue common stock for an amount (determined under subparagraph (1) of this paragraph (c)) not in excess of $500,000 during a period ending not later than November 30, 1960. By January 1, 1960, the corporation has, pursuant to the plan, issued at par, stock having an aggregate par value of $400,000, $200,000 of which was issued for $200,000 cash, and $200,000 of which was issued for property (other than stock or securities) having a basis to the corporation of $100,000 and a fair market value of $200,000. The corporation may, prior to November 30, 1960, issue stock for an amount not in excess of $200,000 cash or property having a basis to it not in excess of $200,000. Stock issued for any payment which, alone or together with any payments received after January 1, 1960, exceeds such $200,000 amount would not qualify as section 1244 stock because it would not be issued pursuant to the plan.

Example 3. Assume that on December 1, 1958, Corporation Y, a newly formed corporation, adopts a plan to issue common stock for an amount (determined under subparagraph (1) of this paragraph (c)) not in excess of $500,000 during a period ending not later than November 30, 1960. By January 1960 the corporation has received $400,000 cash for stock issued pursuant to the plan, but due to business successes the equity capital of the corporation exceeds $1,000,000. Since the equity capital test is made as of the date that the plan is adopted, the corporation may still, prior to November 30, 1960, issue section 1244 stock pursuant to the plan until the full amount specified in the plan has been received.

Example 4. Subsequent to June 30, 1958, Corporation Z receives a total of $600,000 cash on the issuance of its stock. In 1960 Corporation Z redeems shares of its stock for the total amount of $300,000 and the redemptions reduce Corporation Z's capital to substantially less than $500,000. Notwithstanding the redemptions, pre-November 1978 stock subsequently issued by Corporation Z will not qualify as section 1244 stock because the $500,000 limitation has been previously exceeded.

[T.D. 7779, 46 FR 29470, June 2, 1981, as amended by T.D. 7837, 47 FR 42729, Sept. 29, 1982; 60 FR 16575, Mar. 31, 1995]

§ 1.1244(d)–1 Contributions of property having basis in excess of value.

(a) *In general.* (1) Section 1244(d)(1)(A) provides a special rule which limits the amount of loss on section 1244 stock that may be treated as an ordinary loss. This rule applies only when section 1244 stock is issued by a corporation in exchange for property that, immediately before the exchange, has an adjusted basis (for determining loss) in excess of its fair market value. If section 1244 stock is issued in exchange for such property and the basis of such stock in the hands of the taxpayer is determined by reference to the basis of such property, then for purposes of section 1244, the basis of such stock shall be reduced by an amount equal to the excess, at the time of the exchange, of the adjusted basis of the property over its fair market value.

(2) The provisions of section 1244(d)(1)(A) do not affect the basis of stock for purposes other than section 1244. Such provisions are to be used only in determining the portion of the total loss sustained that may be treated as an ordinary loss pursuant to section 1244.

(b) *Transfer of more than one item.* If a taxpayer exchanges several items of property for stock in a single transaction so that the basis of the property transferred is allocated evenly among the shares of stock received, the computation under this section should be made by reference to the aggregate fair market value and the aggregate basis of the property transferred.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. B transfers property with an adjusted basis of $1,000 and a fair market value of $250 to a corporation for 10 shares of section 1244 stock in an exchange that qualifies under section 351. The basis of B's stock is $1,000 ($100 per share), but, solely for purposes of section 1244, the total basis of the stock must be reduced by $750, the excess of the adjusted basis of the property exchanged over its fair market value. Thus, the basis of such stock for purposes of section 1244 is $250 and the basis of each share for such purposes is $25. If B sells his 10 shares for $250, he will recognize a loss of $750, all of which must be treated as a capital loss. If he sells the 10 shares for $200, then $50 of his total loss of $800 will be treated as an ordinary loss under section 1244, assuming the various requirements of such section are satisfied, and the remaining $750 will be a capital loss.

Example 2. B owns property with a basis of $20,000. The fair market value of the property unencumbered is $15,000 but the property is subject to a $2,000 mortgage. B transfers the encumbered property to a corporation for 100 shares of section 1244 stock in an exchange that qualifies under section 351. The basis of the shares, determined in accordance with section 358, is $18,000 or $180 per share, but solely for purposes of section 1244 the basis is $13,000 ($130 per share), which is its basis for purposes other than section 1244, reduced by $5,000, the excess of the adjusted basis, immediately before the exchange, of the property transferred over its fair market value.

Example 3. C transfers business assets to a corporation for 100 shares of section 1244 stock in an exchange that qualifies under section 351. The assets transferred are as follows:

	Basis	Fair market value
Cash	$10,000	$10,000
Inventory	15,000	30,000
Depreciable property	50,000	20,000
Land	25,000	10,000
	100,000	70,000

The basis for the shares received by C is $100,000, which is applied $1,000 to each share. However, the basis of the shares for purposes of section 1244 is $70,000 ($700 per share), the basis for general purposes reduced by $30,000, the excess of the aggregate adjusted basis of the property transferred over the aggregate fair market value of such property.

[T.D. 6495, 25 FR 9679, Oct. 8, 1960]

§1.1244(d)–2 Increases in basis of section 1244 stock.

(a) *In general.* If subsequent to the time of its issuance there is for any reason, including the operation of section 1376(a), an increase in the basis of section 1244 stock, such increase shall be treated as allocable to stock which is not section 1244 stock. Therefore, a loss on stock, the basis of which has been increased subsequent to its issuance, must be apportioned between the part that qualifies as section 1244 stock and the part that does not so qualify. Only the loss apportioned to the part that so qualifies may be treated as an ordinary loss pursuant to section 1244. The amount of loss apportioned to the part that qualifies is the amount which bears the same ratio to the total loss as the basis of the stock which is treated as allocated to section 1244 stock bears to the total basis of the stock.

(b) *Example.* The provisions of paragraph (a) of this section may be illustrated by the following example:

Example: For $10,000 a corporation issues 100 shares of section 1244 stock to X. X later contributes $2,000 to the capital of the corporation and this increases the total basis of his 100 shares to $12,000. Subsequently, he sells the 100 shares for $9,000. Of the $3,000 loss, $2,500 is allocated to the portion of the stock that qualifies as section 1244 stock ($10,000/$12,000 of $3,000), and the remaining $500 is allocated to the portion of the stock that does not so qualify. Therefore, to the extent of $2,500, the loss may be treated as an ordinary loss assuming the various requirements of section 1244 stock are satisfied. However, the remaining $500 loss must be treated as a capital loss.

[T.D. 6495, 25 FR 9680, Oct. 8, 1960]

§1.1244(d)–3 Stock dividend, recapitalizations, changes in name, etc.

(a) *In general.* Section 1244(c)(1) provides that stock may not qualify for the benefits of section 1244 unless it is issued to the taxpayer for money or other property not including stock or securities. However, section 1244(d)(2) authorizes exceptions to this rule. The exceptions may apply in three situations: (1) The receipt of a stock dividend; (2) the exchange of stock for stock pursuant to a reorganization described in section 368(a)(1)(E); and (3) the exchange of stock for stock pursuant to a reorganization described in section 368(a)(1)(F).

(b) *Stock dividends.* (1) If common stock is received by an individual or partnership in a nontaxable distribution under section 305(a) made solely with respect to stock owned by such individual or partnership which meets the requirements of section 1244 stock determinable at the time of the distribution, then the common stock so received will also be treated as meeting such requirements. For purposes of this paragraph and paragraphs (c) and (d) of this section, the requirements of section 1244 stock determinable at the time of the distribution or exchange are all of the requirements of section 1244(c)(1) other than the one described in subparagraph (C) thereof, relating to the gross receipts test.

(2) If, however, such stock dividend is received by such individual or partnership partly with respect to stock meeting the requirements of section 1244 stock determinable at the time of the distribution, and partly with respect to stock not meeting such requirements, then only part of the stock received as a stock dividend will be treated as meeting such requirements. Assuming all the shares with respect to which the dividend is received have equal rights to dividends, such part is the number of shares which bears the same ratio to the total number of shares received as the number of shares owned immediately before the stock dividend which meets such qualifications bears to the total number of shares with respect to which the stock dividend is received. In determining the basis of shares received in the stock dividend and of the shares held before the stock dividend, section 307 shall apply as if two separate nontaxable stock dividends were made, one with respect to the shares that meet the requirements and the other with respect to shares that do not meet the requirements.

(3) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. Corporation X issues 100 shares of its common stock to B for $1,000. Subsequently, in a nontaxable stock dividend B receives 5 more shares of common stock of Corporation X. If the 100 shares meet all the requirements of section 1244 stock determinable at the time of the distribution of the stock dividend, the 5 additional shares shall also be treated as meeting such requirements.

Example 2. In 1959, Corporation Y issues 100 shares of its common stock to C for $1,000 and these shares meet the requirements of section 1244 stock determinable at the time of the issuance. In 1960, C purchases an additional 200 shares of such stock from another shareholder for $3,000; however, these shares do not meet the requirements of section 1244 stock because they were not originally issued to C by the corporation. In 1961, C receives 15 shares of Corporation Y common stock as a stock dividend. Of the shares received, 5 shares, the number received with respect to the 100 shares of stock which met the requirements of section 1244 at the time of the distribution, i.e., 100/300 × 15, shall also be treated as meeting such requirements. The remaining 10 shares do not meet such requirements as they are not received with respect to section 1244 stock. The basis of such 5 shares is determined by applying section 307 as if the 5 shares were received as a separate stock dividend made solely with respect to shares that meet the requirements of section 1244 stock at the time of the distribution. Thus, the basis of the 5 shares is $47.61 (5⁄105 of $1,000).

(c) *Recapitalizations.* (1) If, pursuant to a recapitalization described in section 368(a)(1)(E), common stock of a corporation is received by an individual or partnership in exchange for stock of such corporation meeting the requirements of section 1244 stock determinable at the time of the exchange, such common stock shall be treated as meeting such requirements.

(2) If common stock is received pursuant to such a recapitalization partly in exchange for stock meeting the requirements of section 1244 stock determinable at the time of the exchange and partly in exchange for stock not meeting such requirements, then only part of such common stock will be treated as meeting such requirements. Such part is the number of shares which bears the same ratio to the total number of shares of common stock so received as the basis of the shares transferred which meet such requirements bears to the basis of all the shares transferred for such common stock. The basis allocable, pursuant to section 358, to the common stock which is treated as meeting such requirements is limited to the basis of stock that meets such requirements transferred in the exchange.

(3) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 3. A owns 500 shares of voting common stock of Corporation X. Corporation X revises its capital structure to provide for two classes of common stock: Class A voting and Class B nonvoting. In a recapitalization described in subparagraph (E) of section 368(a)(1). A exchanges his 500 shares for 750 shares of Class B nonvoting stock. If the 500 shares meet all the requirements of section 1244 stock determinable at the time of the exchange, the 750 shares received in the exchange are treated as meeting such requirements.

Example 4. B owns 500 shares of common stock of Corporation X with a basis of $5,000, and 100 shares of preferred stock of that corporation with a basis of $2,500. Pursuant to a recapitalization described in section 368(a)(1)(E), B exchanges all of his shares for 900 shares of common stock of Corporation X. The 500 common shares meet the requirements of section 1244 stock determinable at the time of the exchange, but the 100 preferred shares do not meet such requirements since only common stock may qualify. Of the 900 common shares received, 600 shares ($5,000/$7,500×900 shares) are treated as meeting the requirements of section 1244 stock at the time of the exchange, because they are deemed to be received in exchange for the 500 common shares which met such requirements. The remaining 300 shares do not meet such requirements as they are not deemed to be received in exchange for section 1244 stock. The basis of the 600 shares is $5,000, the basis of the relinquished shares meeting the requirements of section 1244.

(d) *Change of name, etc.* (1) If, pursuant to a reorganization described in section 368(a)(1)(F), common stock of a successor corporation is received by an individual or partnership in exchange for stock of the predecessor corporation meeting the requirements of section 1244 stock determinable at the time of the exchange, such common stock shall be treated as meeting such requirements. If common stock is received pursuant to such a reorganization partly in exchange for stock meeting the requirements of section 1244 stock determinable at the time of the exchange and partly in exchange for stock not meeting such requirements, the principles of paragraph (c)(2) of this section apply in determinating the number of shares received which are treated as meeting the requirements of section 1244 stock and the basis of those shares.

(2) For purposes of paragraphs (1)(C) and (3)(A) of section 1244(c), a successor corporation in a reorganization described in section 368(a)(1)(F) shall be treated as the same corporation as its predecessor.

[T.D. 7779, 46 FR 29472, June 2, 1981]

§1.1244(d)–4 Net operating loss deduction.

(a) *General rule.* For purpose of section 172, relating to the net operating loss deduction, any amount of loss that is treated as an ordinary loss under section 1244 (taking into account the annual dollar limitation of that section) shall be treated as attributable to the trade or business of the taxpayer. Therefore, this loss is allowable in determining the taxpayer's net operating loss for a taxable year and is not subject to the application of section 172(d)(4), relating to nonbusiness deductions. A taxpayer may deduct the maximum of ordinary loss permitted under section 1244(b) even though all or a portion of the taxpayer's net operating loss carryback or carryover for the taxable year was, when incurred, a loss on section 1244 stock.

(b) *Example.* The provisions of this section may be illustrated by the following example:

Example: A, a single individual, computes a net operating loss of $15,000 for 1980 in accordance with the rules of §1.172–3, relating to net operating loss in case of a taxpayer other than a corporation. Included within A's computation of this net operating loss is a deduction arising under section 1244 for a loss on small business stock. A had no taxable income in 1977, 1978, or 1979. Assume that A can carry over the entire $15,000 loss under the rules of section 172. In 1981 A has gross income of $75,000 and again sustains a loss on section 1244 stock. The amount of A's 1981 loss on section 1244 stock is $50,000. A may deduct the full $50,000 as an ordinary loss under section 1244 and the full $15,000 as a net operating loss carryover in 1981.

[T.D. 7779, 46 FR 29473, June 2, 1981]

§1.1244(e)–1 Records to be kept.

(a) *By the corporation*—(1) *Mandatory records.* A plan to issue pre-November 1978 stock must appear upon the records of the corporation. Any designation of post-November 1978 stock under §1.1244(c)–2(b)(2) also must appear upon the records of the corporation.

(2) *Discretionary records.* In order to substantiate an ordinary loss deduction claimed by its shareholders, the corporation should maintain records showing the following:

(i) The persons to whom stock was issued, the date of issuance to these persons, and a description of the amount and type of consideration received from each;

(ii) If the consideration received is property, the basis in the hands of the shareholder and the fair market value of the property when received by the corporation;

(iii) The amount of money and the basis in the hands of the corporation of other property received for its stock, as a contribution to capital, and as paid-in surplus;

(iv) Financial statements of the corporation, such as its income tax returns, that identify the source of the gross receipt of the corporation for the period consisting of the five most recent taxable years of the corporation, or, if the corporation has not been in existence for 5 taxable years, for the period of the corporation's existence;

(v) Information relating to any tax-free stock dividend made with respect to section 1244 stock and any reorganization in which stock is transferred by the corporation in exchange for section 1244 stock; and

(vi) With respect to pre-November 1978 stock;

(A) Which certificates represent stock issued under the plan;

(B) The amount of money and the basis in the hands of the corporation of other property received after June 30, 1958, and before the adoption of the plan, for its stock, as a contribution to capital, and as paid-in surplus; and

(C) The equity capital of the corporation on the date of adoption of the plan.

(b) *By the taxpayer.* A person who claims an ordinary loss with respect to stock under section 1244 must have records sufficient to establish that the taxpayer is entitled to the loss and satisfies the requirements of section 1244. See also section 6001, requiring records to be maintained.

In addition, a person who owns section 1244 stock in a corporation shall maintain records sufficient to distinguish such stock from any other stock he may own in the corporation.

[T.D. 6495, 25 FR 9681, Oct. 8, 1960, as amended by T.D. 7779, 46 FR 29473, June 2, 1981; 46 FR 31881, June 18, 1981; T.D. 8594, 60 FR 20898, Apr. 28, 1995]

§ 1.1245–1 General rule for treatment of gain from dispositions of certain depreciable property.

(a) *General.* (1) In general, section 1245(a)(1) provides that, upon a disposition of an item of section 1245 property, the amount by which the lower of (i) the *recomputed basis* of the property, or (ii) the amount realized on a sale, exchange, or involuntary conversion (or the fair market value of the property on any other disposition), exceeds the adjusted basis of the property shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income). The amount of such gain shall be determined separately for each item of section 1245 property. In general, the term *recomputed basis* means the adjusted basis of property plus all adjustments reflected in such adjusted basis on account of depreciation allowed or allowable for all periods after December 31, 1961. See section 1245(a)(2) and § 1.1245–2. Generally, the ordinary income treatment applies even though in the absence of section 1245 no gain would be recognized under the Code. For example, if a corporation distributes section 1245 property as a dividend, gain may be recognized as ordinary income to the corporation even though, in the absence of section 1245, section 311(a) would preclude any recognition of gain to the corporation. For the definition of *section 1245 property,* see section 1245(a)(3) and § 1.1245–3. For exceptions and limitations to the application of section 1245(a)(1), see section 1245(b) and § 1.1245–4.

(2) Section 1245(a)(1) applies to dispositions of section 1245 property in taxable years beginning after December 31, 1962, except that:

(i) In respect of section 1245 property which is an elevator or escalator, section 1245(a)(1) applies to dispositions after December 31, 1963, and

(ii) In respect of section 1245 property which is livestock (described in subparagraph (4) of § 1.1245–3(a)), section 1245(a)(1) applies to dispositions made in taxable years beginning after December 31, 1969, and

(iii) [Reserved].

(3) For purposes of this section and §§ 1.1245–2 through 1.1245–6, the term *disposition* includes a sale in a sale-and-leaseback transaction and a transfer upon the foreclosure of a security interest, but such term does not include a mere transfer of title to a creditor upon creation of a security interest or to a debtor upon termination of a security interest. Thus, for example, a disposition occurs upon a sale of property pursuant to a conditional sales contract even though the seller retains legal title to the property for purposes of security but a disposition does not occur when the seller ultimately gives up his security interest following payment by the purchaser.

(4) For purposes of applying section 1245, the facts and circumstances of each disposition shall be considered in determining what is the appropriate item of section 1245 property. A taxpayer may treat any number of units of section 1245 property in any particular depreciation account (as defined in § 1.167(a)–7) as one item of section 1245 property as long as it is reasonably clear, from the best estimates obtainable on the basis of all the facts and circumstances, that the amount of gain to which section 1245(a)(1) applies is not less than the total of the gain under section 1245(a)(1) which would be computed separately for each unit. Thus, for example, if 50 units of section 1245 property X, 25 units of section 1245

property Y, and other property are accounted for in one depreciation account, and if each such unit is sold at a gain in one transaction in which the total gain realized on the sale exceeds the sum of the adjustments reflected in the adjusted basis (as defined in paragraph (a)(2) of §1.1245–2) of each such unit on account of depreciation allowed or allowable for periods after December 31, 1961, all 75 units may be treated as one item of section 1245 property. If, however, 5 such units of section 1245 property Y were sold at a loss, then only 70 of such units (50 of X plus the 20 of Y sold at a gain) may be treated as one item of section 1245 property.

(5) In case of a sale, exchange, or involuntary conversion of section 1245 and non-section 1245 property in one transaction, the total amount realized upon the disposition shall be allocated between the section 1245 property and the non-section 1245 property in proportion to their respective fair market values. In general, if a buyer and seller have adverse interests as to the allocation of the amount realized between the section 1245 property and the non-section 1245 property, any arm's length agreement between the buyer and the seller will establish the allocation. In the absence of such an agreement, the allocation shall be made by taking into account the appropriate facts and circumstances. Some of the facts and circumstances which shall be taken into account to the extent appropriate include, but are not limited to, a comparison between the section 1245 property and all the property disposed of in such transaction of (i) the original cost and reproduction cost of construction, erection, or production, (ii) the remaining economic useful life, (iii) state of obsolescence, and (iv) anticipated expenditures to maintain, renovate, or to modernize.

(b) *Sale, exchange, or involuntary conversion.* (1) In the case of a sale, exchange, or involuntary conversion of section 1245 property, the gain to which section 1245(a)(1) applies is the amount by which (i) the lower of the amount realized upon the disposition of the property or the recomputed basis of the property, exceeds (ii) the adjusted basis of the property.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. On January 1, 1964, Brown purchases section 1245 property for use in his manufacturing business. The property has a basis for depreciation of $3,300. After taking depreciation deductions of $1,300 (the amount allowable), Brown realizes after selling expenses the amount of $2,900 upon sale of the property on January 1, 1969. Brown's gain is $900 ($2,900 amount realized minus $2,000 adjusted basis). Since the amount realized upon disposition of the property ($2,900) is lower than its recomputed basis ($3,300, i.e., $2,000 adjusted basis plus $1,300 in depreciation deductions), the entire gain is treated as ordinary income under section 1245(a)(1) and not as gain from the sale or exchange of property described in section 1231.

Example 2. Assume the same facts as in example (1) except that Brown exchanges the section 1245 property for land which has a fair market value of $3,700, thereby realizing a gain of $1,700 ($3,700 amount realized minus $2,000 adjusted basis). Since the recomputed basis of the property ($3,300) is lower than the amount realized upon its disposition ($3,700), the excess of recomputed basis over adjusted basis, or $1,300, is treated as ordinary income under section 1245(a)(1). The remaining $400 of the gain may be treated as gain from the sale or exchange of property described in section 1231.

(c) *Other dispositions.* (1) In the case of a disposition of section 1245 property other than by way of a sale, exchange, or involuntary conversion, the gain to which section 1245(a)(1) applies is the amount by which (i) the lower of the fair market value of the property on the date of disposition or the recomputed basis of the property, exceeds (ii) the adjusted basis of the property. If property is transferred by a corporation to a shareholder for an amount less than its fair market value in a sale or exchange, for purposes of applying section 1245 such transfer shall be treated as a disposition other than by way of a sale, exchange, or involuntary conversion.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. X Corporation distributes section 1245 property to its shareholders as a dividend. The property has an adjusted basis of $2,000 to the corporation, a recomputed basis of $3,300, and a fair market value of $3,100. Since the fair market value of the property ($3,100) is lower than its recomputed basis ($3,300), the excess of fair market value over adjusted basis, or $1,100, is treated under section 1245(a)(1) as ordinary income to the corporation even though, in the absence of section 1245, section 311(a) would preclude recognition of gain to the corporation.

Example 2. Assume the same facts as in example (1) except that X Corporation distributes the section 1245 property to its shareholders in complete liquidation of the corporation. Assume further that section 1245(b)(3) does not apply and that the fair market value of the property is $3,800 at the time of the distribution. Since the recomputed basis of the property ($3,300) is lower than its fair market value ($3,800), the excess of recomputed basis over adjusted basis, or $1,300, is treated under section 1245(a)(1) as ordinary income to the corporation even though, in the absence of section 1245, section 336 would preclude recognition of gain to the corporation.

(d) *Losses.* Section 1245(a)(1) does not apply to losses. Thus, section 1245(a)(1) does not apply if a loss is realized upon a sale, exchange, or involuntary conversion of property, all of which is considered section 1245 property, nor does the section apply to a disposition of such property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(e) *Treatment of partnership and partners.* (1) The manner of determining the amount of gain recognized under section 1245(a)(1) to a partnership may be illustrated by the following example:

Example: A partnership sells for $63 section 1245 property which has an adjusted basis to the partnership of $30 and a recomputed basis to the partnership of $60. The partnership recognizes under section 1245(a)(1) gain of $30, i.e., the lower of the amount realized ($63) or recomputed basis ($60), minus adjusted basis ($30). This result would not be changed if one or more partners had, in respect of the property, a special basis adjustment described in section 743(b) or had taken depreciation deductions in respect of such special basis adjustment.

(2)(i) Unless paragraph (e)(3) of this section applies, a partner's distributive share of gain recognized under section 1245(a)(1) by the partnership is equal to the lesser of the partner's share of total gain from the disposition of the property (gain limitation) or the partner's share of depreciation or amortization with respect to the property (as determined under paragraph (e)(2)(ii) of this section). Any gain recognized under section 1245(a)(1) by the partnership that is not allocated under the first sentence of this paragraph (e)(2)(i) (excess depreciation recapture) is allocated among the partners whose shares of total gain from the disposition of the property exceed their shares of depreciation or amortization with respect to the property. Excess depreciation recapture is allocated among those partners in proportion to their relative shares of the total gain (including gain recognized under section 1245(a)(1)) from the disposition of the property that is allocated to the partners who are not subject to the gain limitation. See *Example 2* of paragraph (e)(2)(iii) of this section.

(ii)(A) Subject to the adjustments described in paragraphs (e)(2)(ii)(B) and (e)(2)(ii)(C) of this section, a partner's share of depreciation or amortization with respect to property equals the total amount of allowed or allowable depreciation or amortization previously allocated to that partner with respect to the property.

(B) If a partner transfers a partnership interest, a share of depreciation or amortization must be allocated to the transferee partner as it would have been allocated to the transferor partner. If the partner transfers a portion of the partnership interest, a share of depreciation or amortization proportionate to the interest transferred must be allocated to the transferee partner.

(C)(*1*) A partner's share of depreciation or amortization with respect to property contributed by the partner includes the amount of depreciation or amortization allowed or allowable to the partner for the period before the property is contributed.

(*2*) A partner's share of depreciation or amortization with respect to property contributed by a partner is adjusted to account for any curative allocations. (See § 1.704–3(c) for a description of the traditional method with curative allocations.) The contributing partner's share of depreciation or amortization with respect to the contributed property is decreased (but not below zero) by the amount of any curative allocation of ordinary income to the contributing partner with respect to that property and by the amount of any curative allocation of deduction or loss (other than capital loss) to the noncontributing partners with respect to that property. A noncontributing partner's share of depreciation or amortization with respect to the contributed property is increased by the noncontributing partner's share of any curative allocation of ordinary income to the contributing partner with respect to that property and by the amount of any curative allocation of deduction or loss (other than capital loss) to the noncontributing partner with respect to that property. The partners' shares of depreciation or amortization with respect to property from which curative allocations of depreciation or amortization are taken is determined without regard to those curative allocations. See *Example 3(iii)* of paragraph (e)(2)(iii) of this section.

(*3*) A partner's share of depreciation or amortization with respect to property contributed by a partner is adjusted to account for any remedial allocations. (See §1.704–3(d) for a description of the remedial allocation method.) The contributing partner's share of depreciation or amortization with respect to the contributed property is decreased (but not below zero) by the amount of any remedial allocation of income to the contributing partner with respect to that property. A noncontributing partner's share of depreciation or amortization with respect to the contributed property is increased by the amount of any remedial allocation of depreciation or amortization to the noncontributing partner with respect to that property. See *Example 3(iv)* of paragraph (e)(2)(iii) of this section.

(*4*) If, under paragraphs (e)(2)(ii)(C)(*2*) and (e)(2)(ii)(C)(*3*) of this section, the partners' shares of depreciation or amortization with respect to a contributed property exceed the adjustments reflected in the adjusted basis of the property under §1.1245–2(a) at the partnership level, then the partnership's gain recognized under section 1245(a)(1) with respect to that property is allocated among the partners in proportion to their relative shares of depreciation or amortization (subject to any gain limitation that might apply).

(*5*) This paragraph (e)(2)(ii)(C) also applies in determining a partner's share of depreciation or amortization with respect to property for which differences between book value and adjusted tax basis are created when a partnership revalues partnership property pursuant to §1.704–1(b)(2)(iv)(*f*).

(iii) *Examples.* The application of this paragraph (e)(2) may be illustrated by the following examples:

Example 1. Recapture allocations. (i) *Facts.* A and B each contribute $5,000 cash to form AB, a general partnership. The partnership agreement provides that depreciation deductions will be allocated 90 percent to A and 10 percent to B, and, on the sale of depreciable property, A will first be allocated gain to the extent necessary to equalize A's and B's capital accounts. Any remaining gain will be allocated 50 percent to A and 50 percent to B. In its first year of operations, AB purchases depreciable equipment for $5,000. AB depreciates the equipment over its 5-year recovery period and elects to use the straight-line method. In its first year of operations, AB's operating income equals its expenses (other than depreciation). (To simplify this example, AB's depreciation deductions are determined without regard to any first-year depreciation conventions.)

(ii) *Year 1.* In its first year of operations, AB has $1,000 of depreciation from the partnership equipment. In accordance with the partnership agreement, AB allocates 90 percent ($900) of the depreciation to A and 10 percent ($100) of the depreciation to B. At the end of the year, AB sells the equipment for $5,200, recognizing $1,200 of gain ($5,200 amount realized less $4,000 adjusted tax basis). In accordance with the partnership agreement, the first $800 of gain is allocated to A to equalize the partners' capital accounts, and the remaining $400 of gain is allocated $200 to A and $200 to B.

(iii) *Recapture allocations.* $1,000 of the gain from the sale of the equipment is treated as section 1245(a)(1) gain. Under paragraph (e)(2)(i) of this section, each partner's share of the section 1245(a)(1) gain is equal to the lesser of the partner's share of total gain recognized on the sale of the equipment or the partner's share of total depreciation with respect to the equipment. Thus, A's share of the section 1245(a)(1) gain is $900 (the lesser of A's share of the total gain ($1,000) and A's share of depreciation ($900)). B's share of the section 1245(a)(1) gain is $100 (the lesser of B's share of the total gain ($200) and B's share of depreciation ($100)). Accordingly, $900 of the $1,000 of total gain allocated to A is treated as ordinary income and $100 of the $200 of total gain allocated to B is treated as ordinary income.

Example 2. Recapture allocation subject to gain limitation. (i) *Facts.* A, B, and C form general partnership ABC. The partnership agreement provides that depreciation deductions will be allocated equally among the partners, but that gain from the sale of depreciable property will be allocated 75 percent to A and 25 percent to B. ABC purchases depreciable personal property for $300 and subsequently allocates $100 of depreciation deductions each to A, B, and C, reducing the adjusted tax basis of the property to $0. ABC then sells the property for $440. ABC allocates $330 of the gain to A (75 percent of $440) and allocates $110 of the gain to B (25 percent of $440). No gain is allocated to C.

(ii) *Application of gain limitation.* Each partner's share of depreciation with respect to the property is $100. C's share of the total gain from the disposition of the property, however, is $0. As a result, under the gain limitation provision in paragraph (e)(2)(i) of this section, C's share of section 1245(a)(1) gain is limited to $0.

(iii) *Excess depreciation recapture.* Under paragraph (e)(2)(i) of this section, the $100 of section 1245(a)(1) gain that cannot be allocated to C under the gain limitation provision (excess depreciation recapture) is allocated to A and B (the partners not subject to the gain limitation at the time of the allocation) in proportion to their relative shares of total gain from the disposition of the property. A's relative share of the total gain allocated to A and B is 75 percent ($330 of $440 total gain). B's relative share of the total gain allocated to A and B is 25 percent ($110 of $440 total gain). However, under the gain limitation provision of paragraph (e)(2)(i) of this section, B cannot be allocated 25 percent of the excess depreciation recapture ($25) because that would result in a total allocation of $125 of depreciation recapture to B (a $100 allocation equal to B's share of depreciation plus a $25 allocation of excess depreciation recapture), which is in excess of B's share of the total gain from the disposition of the property ($110). Therefore, only $10 of excess depreciation recapture is allocated to B and the remaining $90 of excess depreciation recapture is allocated to A. A is not subject to the gain limitation because A's share of the total gain ($330) still exceeds A's share of section 1245(a)(1) gain ($190). Accordingly, all $110 of the total gain allocated to B is treated as ordinary income ($100 share of depreciation allocated to B plus $10 of excess depreciation recapture) and $190 of the total gain allocated to A is treated as ordinary income ($100 share of depreciation allocated to A plus $90 of excess depreciation recapture).

Example 3. Determination of partners' shares of depreciation with respect to contributed property. (i) *Facts.*C and D form partnership CD as equal partners. C contributes depreciable personal property C1 with an adjusted tax basis of $800 and a fair market value of $2,800. Prior to the contribution, C claimed $200 of depreciation from C1. At the time of the contribution, C1 is depreciable under the straight-line method and has four years remaining on its 5-year recovery period. D contributes $2,800 cash, which CD uses to purchase depreciable personal property D1, which is depreciable over seven years under the straight-line method. (To simplify the example, all depreciation is determined without regard to any first-year depreciation conventions.)

(ii) *Traditional method.* C1 generates $700 of book depreciation (¼ of $2,800 book value) and $200 of tax depreciation (¼ of $800 adjusted tax basis) each year. C and D will each be allocated $350 of book depreciation from C1 in year 1. Under the traditional method of making section 704(c) allocations, D will be allocated the entire $200 of tax depreciation from C1 in year 1. D1 generates $400 of book and tax depreciation each year (1/7 of $2,800 book value and adjusted tax basis). C and D will each be allocated $200 of book and tax depreciation from D1 in year 1. As a result, after the first year of partnership operations, C's share of depreciation with respect to C1 is $200 (the depreciation taken by C prior to contribution) and D's share of depreciation with respect to C1 is $200 (the amount of tax depreciation allocated to D). C and D each have a $200 share of depreciation with respect to D1. At the end of four years, C's share of depreciation with respect to C1 will be $200 (the depreciation taken by C prior to contribution) and D's share of depreciation with respect to C1 will be $800 (four years of $200 depreciation per year). At the end of four years, C and D will each have an $800 share of depreciation with respect to D1 (four years of $200 depreciation per year).

(iii) *Effect of curative allocations.* (A) *Year 1.* If the partnership elects to make curative allocations under § 1.704–3(c) using depreciation from D1, the results will be the same as under the traditional method, except that $150 of the $200 of tax depreciation from D1 that would be allocated to C under the traditional method will be allocated to D as additional depreciation with respect to C1. As a result, after the first year of partnership operations, C's share of depreciation with respect to C1 will be reduced to $50 (the total depreciation taken by C prior to contribution ($200) decreased by the amount of the curative allocation to D ($150)). D's share of depreciation with respect to C1 will be $350 (the depreciation allocated to D under the traditional method ($200) increased by the amount of the curative allocation to D ($150)). C and D will each have a $200 share of depreciation with respect to D1.

(B) *Year 4.* At the end of four years, C's share of depreciation with respect to C1 will be reduced to $0 (the total depreciation taken by C prior to contribution ($200) decreased, but not below zero, by the amount of the curative allocations to D ($600)), and D's share of depreciation with respect to C1 will be $1,400 (the total depreciation allocated to D under the traditional method ($800) increased by the amount of the curative allocations to D ($600)). However, CD's section 1245(a)(1) gain with respect to C1 will not be more than $1,000 (CD's tax depreciation ($800) plus C's tax depreciation prior to contribution ($200)). Under paragraph (e)(2)(ii)(C)(*4*) of this section, because the partners' shares of depreciation with respect to C1 exceed the adjustments reflected in the property's adjusted basis, CD's section 1245(a)(1) gain will be allocated in proportion to the partners' relative shares of depreciation with respect to C1. Because C's share of depreciation with respect to C1 is $0, and D's share of depreciation with respect to C1 is $1,400, all of CD's $1,000 of section 1245(a)(1) gain will be allocated to D. At the end of four years, C and D will each have an $800 share of depreciation with respect to D1 (four years of $200 depreciation per year).

(iv) *Effect of remedial allocations.* (A) *Year 1.* If the partnership elects to make remedial allocations under §1.704–3(d), there will be $600 of book depreciation from C1 in year 1. (Under the remedial allocation method, the amount by which C1's book basis ($2,800) exceeds its tax basis ($800) is depreciated over a 5-year life, rather than a 4-year life.) C and D will each be allocated one-half ($300) of the total book depreciation. As under the traditional method, D will be allocated all $200 of tax depreciation from C1. Because the ceiling rule would cause a disparity of $100 between D's book and tax allocations of depreciation, D will also receive a $100 remedial allocation of depreciation with respect to C1, and C will receive a $100 remedial allocation of income with respect to C1. As a result, after the first year of partnership operations, D's share of depreciation with respect to C1 is $300 (the depreciation allocated to D under the traditional method ($200) increased by the amount of the remedial allocation ($100)). C's share of depreciation with respect to C1 is $100 (the total depreciation taken by C prior to contribution ($200) decreased by the amount of the remedial allocation of income ($100)). C and D will each have a $200 share of depreciation with respect to D1.

(B) *Year 5.* At the end of five years, C's share of depreciation with respect to C1 will be $0 (the total depreciation taken by C prior to contribution ($200) decreased, but not below zero, by the total amount of the remedial allocations of income to C ($600)). D's share of depreciation with respect to C1 will be $1,400 (the total depreciation allocated to D under the traditional method ($800) increased by the total amount of the remedial allocations of depreciation to D ($600)). However, CD's section 1245(a)(1) gain with respect to C1 will not be more than $1,000 (CD's tax depreciation ($800) plus C's tax depreciation prior to contribution ($200)). Under paragraph (e)(2)(ii)(C)(*4*) of this section, because the partners' shares of depreciation with respect to C1 exceed the adjustments reflected in the property's adjusted basis, CD's section 1245(a)(1) gain will be allocated in proportion to the partners' relative shares of depreciation with respect to C1. Because C's share of depreciation with respect to C1 is $0, and D's share of depreciation with respect to C1 is $1,400, all of CD's $1,000 of section 1245(a)(1) gain will be allocated to D. At the end of five years, C and D will each have a $1,000 share of depreciation with respect to D1 (five years of $200 depreciation per year).

(iv) *Effective date.* This paragraph (e)(2) is effective for properties acquired by a partnership on or after August 20, 1997. However, partnerships may rely on this paragraph (e)(2) for properties acquired before August 20, 1997 and disposed of on or after August 20, 1997.

(3)(i) If (*a*) a partner had a special basis adjustment under section 743(b) in respect of section 1245 property, or (*b*) on the date he acquired his partnership interest by way of a sale or exchange (or upon death of another partner) the partnership owned section 1245 property and an election under section 754 (relating to optional adjustment to basis of partnership property) was in effect with respect to the partnership, then the amount of gain recognized under section 1245(a)(1) by him upon a disposition by the partnership of such property shall be determined under this subparagraph.

(ii) There shall be allocated to such partner, in the same proportion as the partnership's total gain is allocated to him as his distributive share under section 704, a portion of (*a*) the common partnership adjusted basis for the property, and (*b*) the amount realized by the partnership upon the disposition, or, if nothing is realized, the fair market value of the property. There shall also be allocated to him, in the same proportion as the partnership's gain recognized under section 1245(a)(1) is allocated under subparagraph (2) of this paragraph as his distributive share of such gain, a portion of *the adjustments reflected in the adjusted basis* (as defined in paragraph (a)(2) of §1.1245–2) of such property. If on the date he acquired his partnership interest by way of a sale or exchange the partnership owned such property and an election under section 754 was in effect, then for purposes of the preceding sentence the amount of the adjustments reflected in the adjusted basis of such property on such date shall be deemed to be zero. For special rules relating to the amount of adjustments reflected in the adjusted basis of property after partnership transactions, see paragraph (c)(6) of § 1.1245–2.

(iii) The partner's adjusted basis in respect of the property shall be deemed to be (*a*) the portion of the partnership's adjusted basis for the property allocated to the partner under subdivision (ii) of this subparagraph, (*b*) increased by the amount of any special basis adjustment described in section 743(b)(1) (or decreased by the amount of any special basis adjustment described in section 743(b)(2) which the partner may have in respect of the property on the date the partnership disposed of the property.

(iv) The partner's recomputed basis in respect of the property shall be deemed to be (*a*) the sum of the partner's adjusted basis for the property, as determined in subdivision (iii) of this subparagraph, plus the amount of *the adjustments reflected in the adjusted basis* (as defined in paragraph (a)(2) of § 1.1245–2) for the property allocated to the partner under subdivision (ii) of this subparagraph, (*b*) increased by the amount by which any special basis adjustment described in section 743(b)(1) (or decreased by the amount by which any special basis adjustment described in section 743(b)(2)) in respect of the property was reduced, but only to the extent such amount was applied to adjust the amount of the deductions allowed or allowable to the partner for depreciation or amortization of section 1245 property attributable to periods referred to in paragraph (a)(2) of § 1.1245–2. The terms *allowed or allowable, depreciation or amortization,* and *attributable to periods* shall have the meanings assigned to these terms in paragraph (a) of § 1.1245–2.

(4) The application of subparagraph (3) of this paragraph may be illustrated by the following example:

Example: A, B, and C each hold a one-third interest in calendar year partnership ABC. On December 31, 1962, the firm holds section 1245 property which has an adjusted basis of $30,000 and a recomputed basis of $33,000. Depreciation deductions in respect of the property for 1962 were $3,000. On January 1, 1963, when D purchases C's partnership interest, the election under section 754 is in effect and a $5,000 special basis adjustment is made in respect of D to his one-third share of the common partnership adjusted basis for the property. For 1963 and 1964 the partnership deducts $6,000 as depreciation in respect of the property, thereby reducing its adjusted basis to $24,000, and D deducts $2,800, i.e., his distributive share of partnership depreciation ($2,000) plus depreciation in respect of his special basis adjustment ($800). On March 15, 1965, the partnership sells the property for $48,000. Since the partnership's recomputed basis for the property ($33,000, i.e., 24,000 adjusted basis plus $9,000 in depreciation deductions) is lower than the amount realized upon the sale ($48,000), the excess of recomputed basis over adjusted basis, or $9,000, is treated as partnership gain under section 1245(a)(1). D's distributive share of such gain is $3,000 (⅓ of $9,000). However, the amount of gain recognized by D under section 1245 (a)(1) is only $2,800, determined as follows:

(1) Adjusted basis:		
D's portion of partnership adjusted basis (⅓ of $24,000)	$8,000	
D's special basis adjustment as of December 31, 1964 ($5,000 minus $800)	4,200	
D's adjusted basis		$12,200
(2) Recomputed basis:		
D's adjusted basis	12,200	
D's portion of partnership depreciation for 1963 and 1964, i.e., for periods after he acquired his partnership interest (⅓ of $6,000)	2,000	
Depreciation for 1963 and 1964 in respect of D's special basis adjustment	800	
D's recomputed basis.		15,000
(3) D's portion of amount realized by partnership (⅓ of $48,000)		16,000
(4) Gain recognized to D under section 1245(a)(1), i.e., the lower of (2) or (3), minus (1)		2,800

[T.D. 6832, 30 FR 8576, July 7, 1965, as amended by T.D. 7084, 36 FR 268, Jan. 8, 1971; T.D. 7141, 36 FR 18793, Sept. 22, 1971; T.D. 8730, 62 FR 44216, Aug. 20, 1997]

§ 1.1245–2 Definition of recomputed basis.

(a) *General rule*—(1) *Recomputed basis defined.* The term *recomputed basis* means, with respect to any property, an amount equal to the sum of:

(i) The adjusted basis of the property, as defined in section 1011, plus

(ii) The amount of the adjustments reflected in the adjusted basis.

(2) *Definition of adjustments reflected in adjusted basis.* The term *adjustments reflected in the adjusted basis* means:

(i) With respect to any property other than property described in subdivision (ii), (iii), or (iv) of this subparagraph, the amount of the adjustments attributable to periods after December 31, 1961,

(ii) With respect to an elevator or escalator, the amount of the adjustments attributable to periods after June 30, 1963,

(iii) With respect to livestock (described in subparagraph (4) of §1.1245–3(a)), the amount of the adjustments attributable to periods after December 31, 1969, or

(iv) [Reserved]

which are reflected in the adjusted basis of such property on account of deductions allowed or allowable for depreciation or amortization (within the meaning of subparagraph (3) of this paragraph). For cases where the taxpayer can establish that the amount allowed for any period was less than the amount allowable, see subparagraph (7) of this paragraph. For determination of adjusted basis of property in a multiple asset account, see paragraph (c)(3) of §1.167(a)–8.

(3) *Meaning of depreciation or amortization.* (i) For purposes of subparagraph (2) of this paragraph, the term *depreciation or amortization* includes allowances (and amounts treated as allowances) for depreciation (or amortization in lieu thereof), and deductions for amortization of emergency facilities under section 168. Thus, for example, such term includes a reasonable allowance for exhaustion, wear and tear (including a reasonable allowance for obsolescence) under section 167, an expense allowance (additional first-year depreciation allowance for property placed in service before January 1, 1981), under section 179, an expenditure treated as an amount allowed under section 167 by reason of the application of section 182(d)(2)(B) (relating to expenditures by farmers for clearing land), and a deduction for depreciation of improvements under section 611 (relating to depletion). For further examples, the term *depreciation or amortization* includes periodic deductions referred to in §1.162–11 in respect of a specified sum paid for the acquisition of a leasehold and in respect of the cost to a lessee of improvements on property of which he is the lessee. However, such term does not include deductions for the periodic payment of rent.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: On January 1, 1966, Smith purchases for $1,000, and places in service, an item of property described in section 1245(a)(3)(A). Smith deducts an additional first-year allowance for depreciation under section 179 of $200. Accordingly, the basis of the property for purposes of depreciation is $800 on January 1, 1966. Between that date and January 1, 1974, Smith deducts $640 in depreciation (the amount allowable) with respect to the property, thereby reducing its adjusted basis to $160. Since this adjusted basis reflects deductions for depreciation and amortization (within the meaning of this subparagraph) amounting to $840 ($200 plus $640), the recomputed basis of the property is $1,000 ($160 plus $840).

(4) *Adjustments of other taxpayers or in respect of other property.* (i) For purposes of subparagraph (2) of this paragraph, the adjustments reflected in adjusted basis on account of depreciation or amortization which must be taken into account in determining recomputed basis are not limited to those adjustments on account of depreciation or amortization with respect to the property disposed of, nor are such adjustments limited to those on account of depreciation or amortization allowed or allowable to the taxpayer disposing of such property. Except as provided in subparagraph (7) of this paragraph, all such adjustments are taken into account, whether the deductions were allowed or allowable in respect of the same or other property and whether to the taxpayer or to any other person. For manner of determining the amount of adjustments reflected in the adjusted basis of property immediately after certain dispositions, see paragraph (c) of this section.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: On January 1, 1966, Jones purchases machine X for use in his trade or business. The machine, which is section 1245 property, has a basis for depreciation of $10,000. After taking depreciation deductions of $2,000 (the amount allowable), Jones transfers the machine to his son as a gift on January 1, 1968. Since the exception for gifts in section 1245(b)(1) applies, Jones does not recognize gain under section 1245(a)(1). The son's adjusted basis for the machine is $8,000. On January 1, 1969, after taking a depreciation deduction of $1,000 (the amount allowable), the son exchanges machine X for machine Y in a like kind exchange described in section 1031. Since the exception for like kind exchanges in section 1245(b)(4) applies, the son does not recognize gain under section 1245(a)(1). The son's adjusted basis for machine Y is $7,000. In 1969, the son takes a depreciation deduction of $1,000 (the amount allowable) in respect of machine Y. The son sells machine Y on June 30, 1970. No depreciation was allowed or allowable for 1970, the year of the sale. The recomputed basis of machine Y on June 30, 1970, is determined in the following manner:

Adjusted basis	$6,000	
Adjustments reflected in the adjusted basis:		
Depreciation deducted by Jones for 1966 and 1967 on machine X	2,000	
Depreciation deducted by son for 1968 on machine X	1,000	
Depreciation deducted by son for 1969 on machine Y	1,000	
Total adjustments reflected in the adjusted basis		$4,000
Recomputed basis		10,000

(5) *Adjustments reflected in adjusted basis of property described in section 1245(a)(3)(B).* For purposes of subparagraph (2) of this paragraph, the adjustments reflected in the adjusted basis of property described in section 1245(a)(3)(B), on account of depreciation or amortization which must be taken into account in determining recomputed basis, may include deductions attributable to periods during which the property is not used as an integral part of an activity, or does not constitute a facility, specified in section 1245(a)(3)(B) (i) or (ii). Thus, for example, if depreciation deductions taken with respect to such property after December 31, 1961, amount to $10,000 (the amount allowable), of which $6,000 is attributable to periods during which the property is used as an integral part of a specified activity or constitutes a specified facility, then the entire $10,000 of depreciation deductions are adjustments reflected in the adjusted basis for purposes of determining recomputed basis. Moreover, if the property was never so used but was acquired in a transaction to which section 1245(b)(4) (relating to like kind exchanges and involuntary conversions) applies, and if by reason of the application of paragraph (d)(3) of § 1.1245–4 the property is considered as section 1245 property described in section 1245(a)(3)(B), then the entire $10,000 of depreciation deductions would also be adjustments reflected in the adjusted basis for purposes of determining recomputed basis.

(6) *Allocation of adjustments attributable to periods after certain dates.* (i) For purposes of determining recomputed basis, the amount of adjustments reflected in the adjusted basis of property other than property described in subparagraph (2) (ii), (iii), or (iv) of this paragraph are limited to adjustments attributable to periods after December 31, 1961. Accordingly, if depreciation deducted with respect to such property of a calendar year taxpayer is $1,000 a year (the amount allowable) for each of 10 years beginning with 1956, only the depreciation deducted in 1962 and succeeding years shall be treated as reflected in the adjusted basis for purposes of determining recomputed basis. With respect to a taxable year beginning in 1961 and ending in 1962, the deduction for depreciation or amortization shall be ascertained by applying the principles stated in paragraph (c)(3) of § 1.167(a)–8 (relating to determination of adjusted basis of retired asset). The amount of the deduction, determined in such manner, shall be allocated on a daily basis in order to determine the portion thereof which is attributable to a period after December 31, 1961. Thus, for example, if a taxpayer, whose fiscal year ends on May 31, 1962, acquires section 1245 property on November 12, 1961, and the deduction for depreciation attributable to the property for such fiscal year is ascertained (under the principles of paragraph (c)(3) of § 1.167(a)–8) to be $400, then the portion thereof attributable to a period after December 31, 1961, is $302 ($^{151}/_{200}$ of $400). If, however, the property were acquired by such taxpayer after December 31, 1961, the

entire deduction for depreciation attributable to the property for such fiscal year would be allocable to a period after December 31, 1961. For treatment of certain normal retirements described in paragraph (e)(2) of §1.167(a)–8, see paragraph (c) of §1.1245–6. For principles of determining the amount of adjustments for depreciation or amortization reflected in the adjusted basis of property upon an abnormal retirement of property in a multiple asset account, see paragraph (c)(3) of §1.167(a)–8.

(ii) For purposes of determining recomputed basis, the amount of adjustments reflected in the adjusted basis of an elevator or escalator are limited to adjustments attributable to periods after June 30, 1963.

(iii) For purposes of determining recomputed basis, the amount of adjustments reflected in the adjusted basis of livestock (described in subparagraph (2)(iii) of this paragraph) are limited to adjustments attributable to periods after December 31, 1969.

(7) *Depreciation or amortization allowed or allowable.* For purposes of determin ing recomputed basis, generally all adjustments (for periods after Dec. 31, 1961, or, in the case of property described in subparagraph (2) (ii), (iii), or (iv) of this paragraph, for periods after the applicable date) attributable to allowed or allowable depreciation or amortization must be taken into account. See section 1016(a)(2) and the regulations thereunder for the meaning of *allowed* and *allowable.* However, if a taxpayer can establish by adequate records or other sufficient evidence that the amount allowed for depreciation or amortization for any period was less than the amount allowable for such period, the amount to be taken into account for such period shall be the amount allowed. No adjustment is to be made on account of the tax imposed by section 56 (relating to the minimum tax for tax preferences). See paragraph (b) of this section (relating to records to be kept and information to be filed). For example, assume that in the year 1967 it becomes necessary to determine the recomputed basis of property, the $500 adjusted basis of which reflects adjustments of $1,000 with respect to depreciation deductions allowable for periods after December 31, 1961. If the taxpayer can establish by adequate records or other sufficient evidence that he had been allowed deductions amounting to only $800 for the period, then in determining recomputed basis the amount added to adjusted basis with respect to the $1,000 adjustments to basis for the period will be only $800.

(8) *Exempt organizations.* In respect of property disposed of by an organization which is or was exempt from income taxes (within the meaning of section 501(a)), adjustments reflected in the adjusted basis (within the meaning of subparagraph (2) of this paragraph) shall include only depreciation or amortization allowed or allowable (i) in computing unrelated business taxable income (as defined in section 512(a), or (ii) in computing taxable income of the organization (or a predecessor organization) for a period during which it was not exempt or, by reason of the application of section 502, 503, or 504, was denied its exemption.

(b) *Records to be kept.* In any case in which it is necessary to determine recomputed basis of an item of section 1245 property, the taxpayer shall have available permanent records of all the facts necessary to determine with reasonable accuracy the amount of such recomputed basis, including the following:

(1) The date, and the manner in which, the property was acquired,

(2) The taxpayer's basis on the date the property was acquired and the manner in which the basis was determined,

(3) The amount and date of all adjustments to the basis of the property allowed or allowable to the taxpayer for depreciation or amortization and the amount and date of any other adjustments by the taxpayer to the basis of the property,

(4) In the case of section 1245 property which has an adjusted basis reflecting adjustments for depreciation or amortization taken by the taxpayer with respect to other property, or by another taxpayer with respect to the same or other property, the information described in subparagraphs (1), (2), and (3) of this paragraph with respect

to such other property or such other taxpayer.

(c) *Adjustments reflected in adjusted basis immediately after certain acquisitions*—(1) *Zero.* (i) If on the date a person acquires property his basis for the property is determined solely by reference to its cost (within the meaning of section 1012), then on such date the amount of the adjustments reflected in his adjusted basis for the property is zero.

(ii) If on the date a person acquires property his basis for the property is determined solely by reason of the application of section 301(d) (relating to basis of property received in corporate distribution) or section 334(a) (relating to basis of property received in a liquidation in which gain or loss is recognized), then on such date the amount of the adjustments reflected in his adjusted basis for the property is zero.

(iii) If on the date a person acquires property his basis for the property is determined solely under the rules of section 334 (b)(2) or (c) relating to basis of property received in certain corporate liquidations), then on such date the amount of the adjustments reflected in his adjusted basis for the property is zero.

(iv) If as of the date a person acquires property from a decedent such person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), then on such date the amount of the adjustments reflected in his adjusted basis for the property is zero.

(2) *Gifts and certain tax-free transactions.* (i) If property is disposed of in a transaction described in subdivision (ii) of this subparagraph, then the amount of the adjustments reflected in the adjusted basis of the property in the hands of a transferee immediately after the disposition shall be an amount equal to:

(*a*) The amount of the adjustments reflected in the adjusted basis of the property in the hands of the transferor immediately before the disposition, minus

(*b*) The amount of any gain taken into account under section 1245(a)(1) by the transferor upon the disposition.

(ii) The transactions referred to in subdivision (i) of this subparagraph are:

(*a*) A disposition which is in part a sale or exchange and in part a gift (see paragraph (a)(3) of § 1.1245–4).

(*b*) A disposition (other than a disposition to which section 1245(b)(6)(A) applies) which is described in section 1245(b)(3) (relating to certain tax-free transactions), or

(*c*) An exchange described in paragraph (e)(2) of § 1.1245–4 (relating to transfers described in section 1081(d)(1)(A)).

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example: Jones transfers section 1245 property to a corporation in exchange for stock of the corporation and $1,000 cash in a transaction which qualifies under section 351 (relating to transfer to a corporation controlled by transferor). Before the exchange the amount of the adjustments reflected in the adjusted basis of the property is $3,000. Upon the exchange $1,000 gain is recognized under section 1245(a)(1). Immediately after the exchange, the amount of the adjustments reflected in the adjusted basis of the property in the hands of the corporation is $2,000 (that is, $3,000 minus $1,000).

(3) *Certain transfers at death.* (i) If property is acquired in a transfer at death to which section 1245(b)(2) applies, the amount of the adjustments reflected in the adjusted basis of property in the hands of the transferee immediately after the transfer shall be the amount (if any) of depreciation or amortization deductions allowed the transferee before the decedent's death, to the extent that the basis of the property (determined under section 1014(a)) is required to be reduced under the second sentence of section 1014(b)(9) (relating to adjustments to basis where property is acquired from a decedent prior to his death).

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: H purchases section 1245 property in 1965 which he immediately conveys to himself and W, his wife, as tenants by the entirety. Under local law each spouse is entitled to one-half the income from the property. H and W file joint income tax returns for calendar years 1965, 1966, and 1967. Over the 3 years, depreciation deductions amounting to $4,000 (the amount allowable) are allowed in respect of the property of which one-half thereof, or $2,000, is allocable to W. On January 1, 1968, H dies and the entire value of the property at the date of death is included in H's gross estate. Since W's basis for the property (determined under section 1014(a)) is reduced (under the second sentence of section 1014(b)(9)) by the $2,000 depreciation deductions allowed W before H's death, the adjustments reflected in the adjusted basis of the property in the hands of W immediately after H's death amount to $2,000.

(4) *Property received in a like kind exchange, involuntary conversion, or F.C.C. transaction.* (i) If property is acquired in a transaction described in subdivision (ii) of this subparagraph then immediately after the acquisition (and before applying subparagraph (5) of this paragraph, if applicable) the amount of the adjustments reflected in the adjusted basis of the property acquired shall be an amount equal to:

(*a*) The amount of the adjustments reflected in the adjusted basis of the property disposed of immediately before the disposition, minus

(*b*) The sum of (*1*) the amount of any gain recognized under section 1245(a)(1) upon the disposition, plus (*2*) the amount of gain (if any) referred to in subparagraph (5)(ii) of this paragraph.

(ii) The transactions referred to in subdivision (i) of this subparagraph are:

(*a*) A disposition which is a like kind exchange or an involuntary conversion to which section 1245(b)(4) applies, or

(*b*) A disposition to which the provisions of section 1071 and paragraph (e)(1) of §1.1245–4 apply.

(iii) The provisions of subdivisions (i) and (ii) of this subparagraph may be illustrated by the following examples:

Example 1. Smith exchanges machine A for machine B and $1,000 cash in a like kind exchange. Gain of $1,000 is recognized under section 1245(a)(1). If before the exchange the amount of the adjustments reflected in the adjusted basis of machine A was $5,000, the amount of adjustments reflected in the adjusted basis of machine B after the exchange is $4,000 (that is, $5,000 minus $1,000).

Example 2. Assume the same facts as in example (1) except that machine A is destroyed by fire, that $5,000 in insurance proceeds are received of which $4,000 is used to purchase machine B, and that Smith properly elects under section 1033(a)(3)(A) to limit recognition of gain. The result is the same as in example (1), that is, the amount of adjustments reflected in the adjusted basis of machine B is $4,000 ($5,000 minus $1,000).

(iv) If more than one item of section 1245 property is acquired in a transaction referred to in subdivision (i) of this subparagraph, the total amount of the adjustments reflected in the adjusted bases of the items acquired shall be allocated to such items in proportion to their respective adjusted bases.

(5) *Property after a reduction in basis pursuant to election under section 1071 or application of section 1082(a)(2).* If the basis of section 1245 property is reduced pursuant to an election under section 1071 (relating to gain from sale or exchange to effectuate policies of F.C.C.), or the application of section 1082(a)(2) (relating to sale or exchange in obedience to order of S.E.C.), then immediately after the basis reduction the amount of the adjustments reflected in the adjusted basis of the property shall be the sum of:

(i) The amount of the adjustments reflected in the adjusted basis of the property immediately before the basis reduction (but after applying subparagraph (4) of this paragraph, if applicable), plus

(ii) The amount of gain which was not recognized under section 1245(a)(1) by reason of the reduction in the basis of the property. See paragraph (e)(1) of §1.1245–4.

(6) *Partnership property after certain transactions.* (i) For the amount of adjustments reflected in the adjusted basis of property immediately after certain distributions of the property by a partnership to a partner, see section 1245(b)(6)(B).

(ii) If under paragraph (b)(3) of §1.751–1 (relating to certain distributions of partnership property other than section 751 property treated as sales or exchanges) a partnership is treated as purchasing section 1245 property (or a portion thereof) from a distributee who relinquishes his interest in such property (or portion), then on the date of such purchase the amount of adjustments reflected in the adjusted basis of such purchased property (or portion) shall be zero.

(iii) See paragraph (e)(3)(ii) of § 1.1245–1 for the amount of adjustments reflected in the adjusted basis of partnership property in respect of a partner who acquired his partnership interest in certain transactions when an election under section 754 (relating to optional adjustments to basis of partnership property) was in effect.

[T.D. 6832, 30 FR 8578, July 7, 1965, as amended by T.D. 7084, 36 FR 268, Jan. 8, 1971; T.D. 7141, 36 FR 18793, Sept. 22, 1971; 36 FR 19160, Sept. 30, 1971; T.D. 7564, 43 FR 40496, Sept. 12, 1978; T.D. 8121, 52 FR 414, Jan. 6, 1987]

§ 1.1245–3 Definition of section 1245 property.

(a) *In general.* (1) The term *section 1245 property* means any property (other than livestock excluded by the effective date limitation in subparagraph (4) of this paragraph) which is or has been property of a character subject to the allowance for depreciation provided in section 167 and which is either:

(i) Personal property (within the meaning of paragraph (b) of this section),

(ii) Property described in section 1245(a)(3)(B) (see paragraph (c) of this section), or

(iii) An elevator or an escalator within the meaning of subparagraph (C) of section 48(a)(1) (relating to the definition of *section 38 property* for purposes of the investment credit), but without regard to the limitations in such subparagraph (C).

(2) If property is section 1245 property under a subdivision of subparagraph (1) of this paragraph, a leasehold of such property is also section 1245 property under such subdivision. Thus, for example, if A owns personal property which is section 1245 property under subparagraph (1)(i) of this paragraph, and if A leases the personal property to B, B's leasehold is also section 1245 property under such provision. For a further example, if C owns and leases to D for a single lump-sum payment of $100,000 property consisting of land and a fully equipped factory building thereon, and if 40 percent of the fair market value of such property is properly allocable to section 1245 property, then 40 percent of D's leasehold is also section 1245 property. A leasehold of land is not section 1245 property.

(3) Even though property may not be of a character subject to the allowance for depreciation in the hands of the taxpayer, such property may nevertheless be section 1245 property if the taxpayer's basis for the property is determined by reference to its basis in the hands of a prior owner of the property and such property was of a character subject to the allowance for depreciation in the hands of such prior owner, or if the taxpayer's basis for the property is determined by reference to the basis of other property which in the hands of the taxpayer was property of a character subject to the allowance for depreciation. Thus, for example, if a father uses an automobile in his trade or business during a period after December 31, 1961, and then gives the automobile to his son as a gift for the son's personal use, the automobile is section 1245 property in the hands of the son.

(4) Section 1245 property includes livestock, but only with respect to taxable years beginning after December 31, 1969. For purposes of section 1245, the term *livestock* includes horses, cattle, hogs, sheep, goats, and mink and other furbearing animals, irrespective of the use to which they are put or the purpose for which they are held.

(b) *Personal property defined.* The term *personal property* means:

(1) Tangible personal property (as defined in paragraph (c) of § 1.48–1, relating to the definition of *section 38 property* for purposes of the investment credit), and

(2) Intangible personal property.

(c) *Property described in section 1245(a)(3)(B).* (1) The term *property described in section 1245(a)(3)(B)* means tangible property of the requisite depreciable character other than personal property (and other than a building and its structural components), but only if there are adjustments reflected in the adjusted basis of the property (within the meaning of paragraph (a)(2) of § 1.1245–2) for a period during which such property (or other property):

(i) Was used as an integral part of manufacturing, production, or extraction, or as an integral part of furnishing transportation, communications, electrical energy, gas, water, or sewage disposal services by a person engaged in a trade or business of furnishing any such service, or

(ii) Constituted a research or storage facility used in connection with any of the foregoing activities.

Thus, even though during the period immediately preceding its disposition the property is not used as an integral part of an activity specified in subdivision (i) of this subparagraph and does not constitute a facility specified in subdivision (ii) of this subparagraph, such property is nevertheless property described in section 1245(a)(3)(B) if, for example, there are adjustments reflected in the adjusted basis of the property for a period during which the property was used as an integral part of manufacturing by the taxpayer or another taxpayer, or for a period during which other property (which was involuntarily converted into, or exchanged in a like kind exchange for, the property) was so used by the taxpayer or another taxpayer. For rules applicable to involuntary conversions and like kind exchanges, see paragraph (d)(3) of §1.1245–4.

(2) The language used in subparagraph (1) (i) and (ii) of this paragraph shall have the same meaning as when used in paragraph (a) of §1.48–1, and the terms *building* and *structural components* shall have the meanings assigned to those terms in paragraph (e) of §1.48–1.

[T.D. 6832, 30 FR 8580, July 7, 1965, as amended by T.D. 7141, 36 FR 18794, Sept. 22, 1971]

§1.1245–4 Exceptions and limitations.

(a) *Exception for gifts*—(1) *General rule.* Section 1245(b)(1) provides that no gain shall be recognized under section 1245(a)(1) upon a disposition by gift. For purposes of this paragraph, the term *gift* means, except to the extent that subparagraph (3) of this paragraph applies, a transfer of property which, in the hands of the transferee, has a basis determined under the provisions of section 1015 (a) or (d) (relating to basis of property acquired by gifts). For reduction in amount of charitable contribution in case of a gift of section 1245 property, see section 170(e) and the regulations thereunder.

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. A places section 1245 property in trust to pay the income from the property to B for his life, and after B's death to distribute the property to C. If the basis of the property to the fiduciary and to C is determined under the uniform basis rules prescribed in paragraph (b) of §1.1015–1, and under paragraph (c) of §1.1015–1 the time the fiduciary and C acquire their interests in the property is the time the donor relinquished dominion over the property, then section 1245(a)(1) does not apply to the transfer by A to the trust or to the distribution to C.

Example 2. Assume the same facts as in example (1), except that the fiduciary sells the section 1245 property and reinvests the proceeds in other section 1245 property which is distributed to C upon B's death. Assume further that under paragraph (f) of §1.1015–1 C's basis for the distributed property is the cost or other basis to the fiduciary. Section 1245(a)(1) applies to the sale but not to the distribution.

(3) *Disposition in part a sale or exchange and in part a gift.* Where a disposition of property is in part a sale or exchange and in part a gift, the gain to which section 1245(a)(1) applies is the amount by which (i) the lower of the amount realized upon the disposition of the property or the recomputed basis of the property, exceeds (ii) the adjusted basis of the property. For determination of the recomputed basis of the property in the hands of the transferee, see paragraph (c)(2) of §1.1245–2.

(4) *Example.* The provisions of subparagraph (3) of this paragraph may be illustrated by the following example:

Example: (i) Smith transfers section 1245 property, which he has held in excess of 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), to his son for $60,000. Immediately before the transfer the property in the hands of Smith has an adjusted basis of $30,000, a fair market value of $90,000, and a recomputed basis of $110,000. Since the amount realized upon disposition of the property ($60,000) is lower than its recomputed basis ($110,000), the excess of the amount realized over adjusted basis, or $30,000, is treated as ordinary income under section 1245(a)(1) and not as gain from the sale or exchange of property described in section 1231. Smith has made a gift of $30,000 ($90,000 fair market value minus $60,000 amount realized) to which section 1245(a)(1) does not apply.

(ii) Immediately before the transfer, the amount of adjustments reflected in the adjusted basis of the property was $80,000. Under paragraph (c)(2) of § 1.1245–2, $50,000 of adjustments are reflected in the adjusted basis of the property immediately after the transfer, that is, $80,000 of such adjustments immediately before the transfer, minus $30,000 gain taken into account under section 1245(a)(1) upon the transfer. Thus, the recomputed basis of the property in the hands of the son is $110,000.

(b) *Exception for transfers at death*—(1) *General rule.* Section 1245(b)(2) provides that, except as provided in section 691 (relating to income in respect of a decedent), no gain shall be recognized under section 1245(a)(1) upon a transfer at death. For purposes of this paragraph, the term *transfer at death* means a transfer of property which, in the hands of the transferee, has a basis determined under the provisions of section 1014(a) (relating to basis of property acquired from a decedent) because of the death of the transferor. For recomputed basis of property acquired in a transfer at death, see paragraph (c)(1)(iv) of § 1.1245–2.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Smith owns section 1245 property which, upon Smith's death, is inherited by his son. Since the property is described in section 1014(b)(1), its basis in the hands of the son is determined under the provisions of section 1014(a). Therefore, section 1245(a)(1) does not apply to the transfer at Smith's death.

Example 2. H purchases section 1245 property which he conveys to himself and W, his wife, as tenants by the entirety. Upon H's death in 1970 the property (including W's share) is included in his gross estate. Since the entire property is described in section 1014(b) (1) and (9), its basis in the hands of W is determined under the provisions of section 1014(a). Therefore, section 1245(a)(1) does not apply to the transfer at H's death. For determination of the recomputed basis of the property in the hands of W, see paragraph (c)(3) of § 1.1245–2.

Example 3. Green's will provides for the bequest of section 1245 property to trustees to pay the income from the property to his wife for her lifetime, and upon her death to distribute the property to his son. If under paragraph (a)(2) of § 1.1014–4 the son's unadjusted basis for the property is its fair market value at the time the decedent died, section 1245(a)(1) does not apply to the distribution of the property to the son.

Example 4. The trustee of a trust created by will transfers section 1245 property to a beneficiary in satisfaction of a specific bequest of $10,000. If under the principles of paragraph (a)(3) of § 1.1014–4 the trust realizes a taxable gain upon the transfer, section 1245(a)(1) applies to the transfer.

(c) *Limitation for certain tax-free transactions*—(1) *Limitation on amount of gain.* Section 1245(b)(3) provides that upon a transfer of property described in subparagraph (2) of this paragraph, the amount of gain taken into account by the transferor under section 1245(a)(1) shall not exceed the amount of gain recognized to the transferor on the transfer (determined without regard to section 1245). For purposes of this subparagraph, in case of a transfer of both section 1245 property and non-section 1245 property in one transaction, the amount realized from the disposition of the section 1245 property (as determined under paragraph (a)(5) of § 1.1245–1) shall be deemed to consist of that portion of the fair market value of each property acquired which bears the same ratio to the fair market value of such acquired property as the amount realized from the disposition of the section 1245 property bears to the total amount realized. The preceding sentence shall be applied solely for purposes of computing the portion of the total gain (determined without regard to section 1245) which shall be recognized as ordinary income under section 1245(a)(1). For determination of the recomputed basis of the section 1245 property in the hands of the transferee, see paragraph (c)(2) of § 1.1245–2. Section 1245(b)(3) does not apply to a disposition of property to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by chapter 1 of the Code.

(2) *Transfers covered.* The transfers referred to in subparagraph (1) of this paragraph are transfers of property in which the basis of the property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(i) Section 332 (relating to distributions in complete liquidation of an 80-percent-or-more controlled subsidiary corporation). See subparagraph (3) of this paragraph.

(ii) Section 351 (relating to transfer to a corporation controlled by transferor).

(iii) Section 361 (relating to exchanges pursuant to certain corporate reorganizations).

(iv) Section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings).

(v) Section 374(a) (relating to exchanges pursuant to certain railroad reorganizations).

(vi) Section 721 (relating to transfers to a partnership in exchange for a partnership interest).

(vii) Section 731 (relating to distributions by a partnership to a partner). For special carryover basis rule, see section 1245(b)(6)(A) and paragraph (f)(1) of this section.

(3) *Complete liquidation of subsidiary*. In the case of a distribution in complete liquidation of an 80-percent-or-more controlled subsidiary to which section 332 applies, the limitation provided in section 1245(b)(3) is confined to instances in which the basis of the property in the hands of the transferee is determined, under section 334(b)(1), by reference to its basis in the hands of the transferor. Thus, for example, the limitation of section 1245(b)(3) may apply in respect of a liquidating distribution of section 1245 property by an 80-percent-or-more controlled corporation to the parent corporation, but does not apply in respect of a liquidating distribution of section 1245 property to a minority shareholder. Section 1245(b)(3) does not apply to a liquidating distribution of property by an 80-percent-or-more controlled subsidiary to its parent if the parent's basis for the property is determined, under section 334(b)(2), by reference to its basis for the stock of the subsidiary.

(4) *Examples*. The provisions of this paragraph may be illustrated by the following examples:

Example 1. Section 1245 property, which is owned by Smith, has a fair market value of $10,000, a recomputed basis of $8,000, and an adjusted basis of $4,000. Smith transfers the property to a corporation in exchange for stock in the corporation worth $9,000 plus $1,000 in cash in a transaction qualifying under section 351. Without regard to section 1245, Smith would recognize $1,000 gain under section 351(b), and the corporation's basis for the property would be determined under section 362(a) by reference to its basis in the hands of Smith. Since the recomputed basis of the property disposed of ($8,000) is lower than the amount realized ($10,000), the excess of recomputed basis over adjusted basis ($4,000), or $4,000, would be treated as ordinary income under section 1245(a)(1) if the provisions of section 1245(b)(3) did not apply. However, section 1245(b)(3) limits the gain taken into account by Smith under section 1245(a)(1) to $1,000. If, instead, Smith transferred the property to the corporation solely in exchange for stock of the corporation worth $10,000, then, because of the application of section 1245(b)(3), Smith would not take any gain into account under section 1245(a)(1). If, however, Smith transferred the property to the corporation for stock worth $5,000 and $5,000 cash, only $4,000 of the $5,000 gain under section 351(b) would be treated as ordinary income under section 1245(a)(1).

Example 2. Assume the same facts as in example (1) except that Smith contributes the property to a new partnership in which he has a one-half interest. Since, without regard to section 1245, no gain would be recognized to Smith under section 721, and by reason of the application of section 721 the partnership's basis for the property would be determined under section 723 by reference to its basis in the hands of Smith, the application of section 1245(b)(3) results in no gain being taken into account by Smith under section 1245(a)(1).

Example 3. Assume the same facts as in example (2) except that the property is subject to a $9,000 mortgage. Since under section 752(b) (relating to decrease in partner's liabilities) Smith is treated as receiving a distribution in money of $4,500 (one-half of liability assumed by partnership), and since the basis of Smith's partnership interest is $4,000 (the adjusted basis of the contributed property), the $4,500 distribution results in his realizing $500 gain under section 731(a) (relating to distributions by a partnership), determined without regard to section 1245. Accordingly, the application of section 1245(b)(3) limits the gain taken into account by Smith under section 1245(a)(1) to $500.

(d) *Limitation for like kind exchanges and involuntary conversions*—(1) *General rule*. Section 1245(b)(4) provides that if property is disposed of and gain (determined without regard to section 1245) is not recognized in whole or in part under section 1031 (relating to like kind exchanges) or section 1033 (relating to involuntary conversions), then the amount of gain taken into account by the transferor under section 1245(a)(1) shall not exceed the sum of:

(i) The amount of gain recognized on such disposition (determined without regard to section 1245), plus

(ii) The fair market value of property acquired which is not section 1245 property and which is not taken into account under subdivision (i) of this subparagraph (that is, the fair market value of non-section 1245 property acquired which is qualifying property under section 1031 or 1033, as the case may be).

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. Smith exchanges machine A for machine B in a like kind exchange as to which no gain is recognized under section 1031(a). Both machines are section 1245 property. No gain is recognized under section 1245(a)(1) because of the limitation contained in section 1245(b)(4). The result would be the same if machine A were involuntarily converted into machine B in a transaction as to which no gain is recognized under section 1033(a)(1).

Example 2. Jones owns property A, which is section 1245 property, with an adjusted basis of $100,000 and a recomputed basis of $116,000. The property is destroyed by fire and Jones receives $117,000 of insurance proceeds. Thus, the amount of gain under section 1245(a)(1), determined without regard to section 1245(b)(4), would be $16,000. He uses $105,000 of the proceeds to purchase section 1245 property similar or related in service or use to property A, and $9,000 of the proceeds to purchase stock in the acquisition of control of a corporation owning property similar or related in service or use to property A. Both acquisitions qualify under section 1033(a)(3)(A). Jones properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain to the amount by which the amount realized from the conversion exceeds the cost of the stock and other property acquired to replace the converted property. Since $3,000 of the gain is recognized (without regard to section 1245) under section 1033(a)(3) (that is, $117,000 minus $114,000), and since the stock purchased for $9,000 is not section 1245 property and was not taken into account in determining the gain under section 1033, section 1245(b)(4) limits the amount of the gain taken into account under section 1245(a)(1) to $12,000 (that is, $3,000 plus $9,000). If, instead of purchasing $9,000 in stock, Jones purchases $9,000 worth of property which is section 1245 property similar or related in use to the destroyed property, section 1245(b)(4) would limit the amount of gain taken into account under section 1245(a)(1) to $3,000.

(3) *Certain tangible property.* If:

(i) A person disposes of section 1245 property in a transaction to which section 1245(b)(4) applies,

(ii) Adjustments are reflected in the adjusted basis (within the meaning of paragraph (a)(2) of § 1.1245–2) of such property which are attributable to the use of such property (or other property) as an integral part of an activity, or as a facility, specified in section 1245(a)(3)(B) (i) or (ii), and

(iii) Property is acquired in the transaction which would be considered as section 1245 property described in section 1245(a)(3)(B) if such person used the acquired property as an integral part of such an activity, or as such a facility, then (regardless of the use of the acquired property) the acquired property shall be considered as section 1245 property described in section 1245(a)(3)(B). For definition of property described in section 1245(a)(3)(B), see paragraph (c) of § 1.1245–3. Thus, for example, if a person's section 1245 property (which is personal property) is involuntarily converted into property A which would qualify as section 1245 property only if it were devoted to a specified use, and if the person had so devoted the section 1245 property disposed of, then the acquired property is considered as section 1245 property described in section 1245(a)(3)(B) and therefore its fair market value is not taken into account under subparagraph (1)(ii) of this paragraph. For recomputed basis of property A, see paragraph (a)(5) of § 1.1245–2. Moreover, if property A is not devoted to a specified use and is subsequently involuntarily converted into property B which would qualify as section 1245 property only if it were so devoted, then property B is also considered as section 1245 property described in section 1245(a)(3)(B).

(4) *Application to disposition of section 1245 property and nonsection 1245 property in one transaction.* For purposes of this paragraph, if both section 1245 property and nonsection 1245 property are acquired as the result of one disposition in which both section 1245 property and nonsection 1245 property are disposed of, then except as provided in subparagraph (7) of this paragraph:

(i) The total amount realized upon the disposition shall be allocated (in a manner consistent with the principles of paragraph (a)(5) of § 1.1245–1) between the section 1245 property and the non-section 1245 property disposed of in proportion to their respective fair market values.

(ii) The amount realized upon the disposition of the section 1245 property shall be deemed to consist of so much of the fair market value of the section 1245 property acquired as is not in excess of the amount realized from the section 1245 property disposed of, and the remaining portion (if any) of the amount realized upon the disposition of the section 1245 property shall be deemed to consist of so much of the fair market value of the non-section 1245 property acquired as is not in excess of the amount of such remaining portion, and

(iii) The amount realized upon the disposition of the non-section 1245 property shall be deemed to consist of so much of the fair market value of all the property acquired which was not taken into account in subdivision (ii) of this subparagraph.

(5) *Example.* The provisions of subparagraph (4) of this paragraph may be illustrated by the following example:

Example: (i) Smith owns section 1245 property A with a fair market value of $30,000, and non-section 1245 property X with a fair market value of $20,000. Properties A and X are destroyed by fire and Smith receives insurance proceeds of $40,000. He uses all the proceeds, plus additional cash of $10,000, to purchase in a single transaction properties B and Y which qualify under section 1033(a)(3)(A), and he properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain to the excess of the amount realized from the conversion over the costs of the qualifying properties acquired. Thus no gain would be recognized (without regard to section 1245) under section 1033(a)(3)(A). Property B is section 1245 property with a fair market value of $15,000, and property Y is non-section 1245 property with a fair market value of $35,000.

(ii) The amount realized upon the disposition of A and X ($40,000) is allocated between A and X in proportion to their respective fair market values. Thus, the amount considered realized in respect of A is $24,000 (that is, 30/50 of $40,000). (The amount considered realized in respect of X is $16,000 (that is, 20/50 of $40,000).)

(iii) The $24,000 realized upon the disposition of A is deemed to consist of the fair market value of B ($15,000) and $9,000 of the fair market value of Y. (The $16,000 realized upon the disposition of X is deemed to consist of $16,000 of the fair market value of Y. Also, $10,000 of the fair market value of Y is attributable to the additional cash of $10,000.)

(iv) Assume that A has an adjusted basis of $5,000, and a recomputed basis of $40,000. Since the amount considered realized upon the disposition of A ($24,000) is lower than its recomputed basis ($40,000), the amount of gain which would be recognized under section 1245(a)(1), determined without regard to section 1245(b)(4), is $19,000, that is, the amount realized ($24,000) minus the adjusted basis ($5,000). Since no gain is recognized (without regard to section 1245) under section 1033(a)(3), and since $9,000 of the property acquired in exchange for section 1245 property A is non-section 1245 property Y, section 1245(b)(4) limits the amount of gain taken into account under section 1245(a)(1) to $9,000.

(6) *Cross references.* For the manner of determining the recomputed basis of property acquired in a transaction to which section 1245(b)(4) applies, see paragraph (c)(4) of § 1.1245–2. For the manner of determining the basis of such property, see paragraph (a) of § 1.1245–5.

(7) *Coordination with section 1250.* For purposes of this paragraph, if section 1245 property and section 1250 property are disposed of in one transaction in which the property acquired includes section 1250 property, the allocation rules of paragraph (d)(6) of § 1.1250–3 shall apply.

(e) *Limitation for section 1071 and 1081 transactions*—(1) *Section 1071 and 1081(b) transactions.* If property is disposed of and gain (determined without regard to section 1245) is not recognized in whole or in part because of the application of section 1071 (relating to gain from sale or exchange to effectuate policies of F.C.C.) or section 1081(b) (relating to gain from sale or exchange in obedience to order of S.E.C.), then the amount of gain taken into account by the transferor under section 1245(a)(1) shall not exceed the sum of:

(i) The amount of gain recognized on such disposition (determined without regard to section 1245),

(ii) In the case of a transaction to which section 1071 applies, the fair market value of property acquired which is not section 1245 property and which is not taken into account under subdivision (i) of this subparagraph, plus

(iii) The amount by which the basis of property, other than section 1245 property, is reduced (pursuant to an election under section 1071 or pursuant to the application of section 1082(a)(2)), and which is not taken into account under subdivision (i) or (ii) of this subparagraph.

(2) *Section 1081(d)(1)(A) transaction.* No gain shall be recognized under section 1245(a)(1) upon an exchange of property as to which gain would not be recognized (without regard to section 1245) because of the application of section 1081(d)(1)(A) (relating to transfers within system group). For recomputed basis of property acquired in a transaction referred to in this subparagraph, see paragraph (c)(2) of § 1.1245–2.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation X elects under section 1071 to treat a sale of section 1245 property for $100,000 as an involuntary conversion subject to the provisions of section 1033, but does not elect to reduce the basis of depreciable property pursuant to an election under section 1071. The corporation uses $35,000 of the proceeds to purchase section 1245 property and $40,000 to purchase other property. Both properties qualify as replacement property under section 1033. Assuming that the amount of gain under section 1245(a)(1) (determined without regard to this paragraph) would be $70,000, and that $25,000 of gain would be recognized (without regard to section 1245) upon the application of section 1071, the amount of gain taken into account under section 1245(a)(1) is $65,000 ($25,000 plus $40,000).

Example 2. (i) Assume the same facts as in example (1) except that the corporation elects under section 1071 to reduce its basis for property of a character subject to the allowance for depreciation under section 167 by the amount of gain which would be recognized without regard to the application of section 1245, that is, by $25,000. Assume further that under section 1071 the corporation may reduce the basis of depreciable property consisting of property A, which is section 1245 property with an adjusted basis of $30,000, and property B, which is property other than section 1245 property with an adjusted basis of $20,000. Under paragraph (a)(2) of § 1.1071–3, the $25,000 of unrecognized gain is applied to reduce the basis of property A by $15,000 (30,000/50,000 of $25,000) and the basis of property B by $10,000 (20,000/50,000 of $25,000).

(ii) The amount of gain which would be recognized (determined without regard to section 1245) under section 1071 is zero, i.e., the amount determined in example (1) ($25,000), minus the amount of the reduction in basis of depreciable property pursuant to the election ($25,000). The amount of gain taken into account under section 1245(a)(1) is $50,000, i.e., the sum of (*a*) the gain which would be recognized without regard to section 1245 (zero), (*b*) the cost of property acquired which is not section 1245 property ($40,000), plus (c) the amount by which the basis of property B is reduced ($10,000). For method of increasing basis of property B, see paragraph (b)(2) of § 1.1245–5, and for recomputed basis of property A, see paragraph (c)(5) of § 1.1245–2.

(f) *Limitation for property distributed by a partnership*—(1) *In general.* For purposes of section 1245(b)(3) (relating to certain tax-free transactions), the basis of section 1245 property distributed by a partnership to a partner shall be deemed to be determined by reference to the adjusted basis of such property to the partnership.

(2) *Adjustments reflected in the adjusted basis.* If section 1245 property is distributed by a partnership to a partner, then, for purposes of determining the recomputed basis of the property in the hands of the distributee, the amount of the adjustments reflected in the adjusted basis of the property immediately after the distribution shall be an amount equal to:

(i) The potential section 1245 income (as defined in paragraph (c)(4) of § 1.751–1) of the partnership in respect of the property immediatley before the distribution, reduced by

(ii) The portion of such potential section 1245 income which is recognized as ordinary income to the partnership under paragraph (b)(2)(ii) of § 1.751–1.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) A machine, which is section 1245 property owned by partnership ABC, has an adjusted basis of $9,000, a recomputed basis of $18,000, and a fair market value of $15,000. Since the fair market value of the machine is lower than its recomputed basis, the potential section 1245 income in respect of the machine is the excess of fair market value over adjusted basis, or $6,000. The partnership distributes the machine to C in a complete liquidation of his partnership interest to which section 736(a) does not apply.

C, who had originally contributed the machine to the partnership, has a basis for his partnership interest of $10,000. Since section 751(b)(2)(A) provides that section 751(b)(1) does not apply to a distribution of property to the partner who contributed the property, no gain would be recognized to the partnership under section 731(b) (without regard to the application of section 1245). By reason of the application of section 731, C's basis for the property would, under section 732(b), be equal to his basis for his interest in the partnership, or $10,000.

(ii) Since section 731 applies to the distribution, and since subparagraph (1) of this paragraph provides that, for purposes of section 1245(b)(3), C's basis for the property is deemed to be determined by reference to the adjusted basis of the property to the partnership, the gain taken into account under section 1245(a)(1) by the partnership is limited by section 1245(b)(3) so as not to exceed the amount of gain which would be recognized to the partnership if section 1245 did not apply. Accordingly, the partnership does not recognize any gain under section 1245(a)(1) upon the distribution.

(iii) Immediately after the distribution, the amount of the adjustments reflected in the adjusted basis of the property is equal to $6,000 (that is, the potential section 1245 income of the partnership in respect of the property before the distribution, $6,000, minus the gain recognized by the partnership under section 751(b), zero). Accordingly, C's recomputed basis for the property is $16,000 (that is, adjusted basis, $10,000, plus adjustments reflected in the adjusted basis, $6,000).

Example 2. Assume the same facts as in example (1) except that the machine had been purchased by the partnership. Assume further that upon the distribution, the partnership recognizes $4,000 gain as ordinary income under section 751(b). Under section 1245(b)(3), gain to be taken into account under section 1245(a)(1) by the partnership is limited to $4,000. Immediately after the distribution, the amount of adjustments reflected in the adjusted basis of the property is $2,000 (that is, potential section 1245 income of the partnership, $6,000, minus gain recognized to the partnership under section 751(b), $4,000). Thus, if the adjusted basis of the machine in the hands of C were $11,333 (see, for example, the computation in paragraph (d)(2) of example (6) of paragraph (g) of §1.751–1), the recomputed basis of the machine would be $13,333 ($11,333 plus $2,000).

(g) [Reserved]

(h) *Timber property subject to amortization under section 194*—(1) *In general.* For purposes of section 1245(a)(2), in determining the recomputed basis of property with respect to which a deduction under section 194 was allowed for any taxable year, a taxpayer shall not take into account amortization deductions claimed under section 194 to the extent such deductions are attributable to the amortizable basis (within the meaning of section 194(c)(2)) of the taxpayer acquired before the tenth taxable year preceding the taxable year in which gain with respect to the property is recognized.

(2) *Example.* The principles of paragraph (h)(1) of this section are illustrated by the following example:

Example: Assume A owns qualified timber property (as defined in section 194(c)(1)) with a basis of $30,000. In 1981, A incurs $12,000 of qualifying reforestation expenditures and elects to amortize the maximum $10,000 of such expenses under section 194. The $10,000 of deductions are taken during the 8-year period from 1981 to 1988. If A sells the property in 1990 for $60,000 a gain of $28,000 ($60,000—adjusted basis of $32,000) is recognized on the sale. Since the sale took place within 10 years of the taxable year in which the reforestation expenditures were made, $10,000 of the gain is treated as ordinary income, and the remaining $18,000 of gain would be capital gain, if it otherwise qualifies for capital gain treatment. In order to avoid ordinary income treatment of the gain attributable to the reforestation expenditures incurred in 1981, A would have to wait until 1992 to dispose of the property.

[T.D. 6832, 30 FR 8581, July 7, 1965, as amended by T.D. 7084, 36 FR 268, Jan. 8, 1971; T.D. 7207, 37 FR 20799, Oct. 14, 1972; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7927, 48 FR 55851, Dec. 16, 1983]

§1.1245–5 Adjustments to basis.

In order to reflect gain recognized under section 1245(a)(1), the following adjustments to the basis of property shall be made:

(a) *Property acquired in like kind exchange or involuntary conversion.* (1) If property is acquired in a transaction to which section 1245(b)(4) applies, its basis shall be determined under the rules of section 1031(d) or 1033(c).

(2) The provisions of this paragraph may be illustrated by the following example:

Example: Jones exchanges property A, which is section 1245 property with an adjusted basis of $10,000, for property B, which has a fair market value of $9,000, and property C, which has a fair market value of $3,500, in a like kind exchange as to which no gain would be recognized under section

1031(a). Upon the exchange $2,500 gain is recognized under section 1245(a)(1), since property C is not section 1245 property. See section 1245(b)(4). Under the rules of section 1031(d), the basis of the properties received in the exchange is $12,500 (i.e., the basis of property transferred, $10,000, plus the amount of gain recognized, $2,500), of which the amount allocated to property C is $3,500 (the fair market value thereof), and the residue, $9,000, is allocated to property B.

(b) *Sections 1071 and 1081 transactions.* (1) If property is acquired in a transaction to which section 1071 and paragraph (e)(1) of § 1.1245–4 (relating to limitation for section 1071 transactions, etc.) apply, its basis shall be determined in accordance with the principles of paragraph (a) of this section.

(2) If the basis of property, other than section 1245 property, is reduced pursuant to either an election under section 1071 or the application of section 1082(a)(2), then the basis of the property shall be increased to the extent of the gain recognized under section 1245(a)(1) by reason of the application of paragraph (e)(1)(iii) of § 1.1245–4.

[T.D. 6832, 30 FR 8584, July 7, 1965]

§ 1.1245–6 Relation of section 1245 to other sections.

(a) *General.* The provisions of section 1245 apply notwithstanding any other provision of subtitle A of the Code. Thus, unless an exception or limitation under section 1245(b) applies, gain under section 1245(a)(1) is recognized notwithstanding any contrary nonrecognition provision or income characterizing provision. For example, since section 1245 overrides section 1231 (relating to property used in the trade or business), the gain recognized under section 1245(a)(1) upon a disposition will be treated as ordinary income and only the remaining gain, if any, from the disposition may be considered as gain from the sale or exchange of a capital asset if section 1231 is applicable. See example (2) of paragraph (b)(2) of § 1.1245–1. For effect of section 1245 on basis provisions of the Code, see § 1.1245–5.

(b) *Nonrecognition sections overridden.* The nonrecognition provisions of subtitle A of the Code which section 1245 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, 501(a), 512(b)(5), and 1039. See section 1245(b) for the extent to which section 1245(a)(1) overrides sections 332, 351, 361, 371(a), 374(a), 721, 731, 1031, 1033, 1071, and 1081 (b)(1) and (d)(1)(A). For limitation on amount of adjustments reflected in adjusted basis of property disposed of by an organization exempt from income taxes (within the meaning of section 501(a)), see paragraph (a)(8) of § 1.1245–2.

(c) *Normal retirement of asset in multiple asset account.* Section 1245(a)(1) does not require recognition of gain upon normal retirements of section 1245 property in a multiple asset account as long as the taxpayer's method of accounting, as described in paragraph (e)(2) of § 1.167(a)–8 (relating to accounting treatment of asset retirements), does not require recognition of such gain.

(d) *Installment method.* (1) Gain from a disposition to which section 1245(a)(1) applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall be deemed to consist of gain to which section 1245(a)(1) applies until all such gain has been reported, and the remaining portion (if any) of such income shall be deemed to consist of gain to which section 1245(a)(1) does not apply. For treatment of amounts as interest on certain deferred payments, see section 483.

(2) The provisions of this paragraph may be illustrated by the following example:

Example: Jones contracts to sell an item of section 1245 property for $10,000 to be paid in 10 equal payments of $1,000 each, plus a sufficient amount of interest so that section 483 does not apply. He properly elects under section 453 to report under the installment method gain of $2,000 to which section 1245(a)(1) applies and gain of $1,000 to which section 1231 applies. Accordingly, $300 of each of the first 6 installment payments and $200 of the seventh installment payment is ordinary income under section 1245(a)(1), and $100 of the seventh installment payment and $300 of each of the last 3 installment payments is gain under section 1231.

(e) *Exempt income.* The fact that section 1245 provides for recognition of gain as ordinary income does not change into taxable income any income which is exempt under section 115 (relating to income of states, etc.), 892 (relating to income of foreign governments), or 894 (relating to income exempt under treaties).

(f) *Treatment of gain not recognized under section 1245.* Section 1245 does not prevent gain which is not recognized under section 1245 from being considered as gain under another provision of the Code, such as, for example, section 311(c) (relating to liability in excess of basis), section 341(f) (relating to collapsible corporations), section 357(c) (relating to liabilities in excess of basis), section 1238 (relating to amortization in excess of depreciation), or section 1239 (relating to gain from sale of depreciable property between certain related persons). Thus, for example, if section 1245 property, which has an adjusted basis of $1,000 and a recomputed basis of $1,500, is sold for $1,750 in a transaction to which section 1239 applies, $500 of the gain would be recognized under section 1245(a)(1) and the remaining $250 of the gain would be treated as ordinary income under section 1239.

[T.D. 6832, 30 FR 8584, July 7, 1965, as amended by T.D. 7084, 36 FR 269, Jan. 8, 1971; T.D. 7400, 41 FR 5101, Feb. 4, 1976]

§1.1247–1 Election by foreign investment companies to distribute income currently.

(a) *Election by foreign investment company*—(1) *In general.* If a registered foreign investment company (as defined in paragraph (b) of this section) elects, on or before December 31, 1962, with respect to each of its taxable years beginning after December 31, 1962, to comply with the requirements of subparagraph (2) of this paragraph, then section 1246 (relating to gain on foreign investment company stock) shall not apply with respect to a qualified shareholder (as defined in paragraph (b) of §1.1247–3) of such company who disposes of his stock during any taxable year of the company to which such election applies. See section 1247(a)(1).

(2) *Requirements.* A registered foreign investment company which makes an election under section 1247(a) shall, with respect to each of its taxable years beginning after December 31, 1962, comply with the following requirements:

(i) Under section 1247(a)(1)(A), the company shall distribute to its shareholders, during the taxable year, 90 percent or more of what its taxable income would be for such taxable year if it were a domestic corporation. To the extent elected by the company under section 1247(a)(2)(B), a distribution of taxable income made not later than 2 months and 15 days after the close of the taxable year shall be treated as distributed during such taxable year. For rules relating to computation of taxable income for a taxable year and distributions of such taxable income, see §1.1247–2.

(ii) Under section 1247(a)(1)(B), the company shall designate to each shareholder the amount of his pro rata share of the excess of the net long-term capital gain over the net short-term capital loss for the taxable year and the amount thereof which is being distributed. For the manner of designating and the computation of such amounts, see §1.1247–3.

(iii) Under section 1247(a)(1)(C), the company shall provide the information and maintain the records required by §1.1247–5.

(b) *Definition of registered foreign investment company.* The term *registered foreign investment company* means a foreign corporation which is registered within the time specified in this paragraph under the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 to 80b–2), either as a management company or as a unit investment trust. Under such Act, a company is deemed registered upon receipt by the Securities and Exchange Commission of Form N–8A entitled *Notification of Registration Filed Pursuant to Section 8(a) of the Investment Company Act of 1940.* See section 8(a) of such Act (15 U.S.C. 80a–8(a)) and 17 CFR 274.10. A company which computes its income on the basis of a calendar year must have registered on or before December 31, 1962, and a company which computes its income on the basis of a fiscal year must have registered on or before the last day of its fiscal year beginning in 1962 and ending in 1963.

(c) *Time and manner of making election*—(1) *In general.* The election provided by paragraph (a) of this section must have been made on or before December 31, 1962, by means of a letter addressed to the Director of Interna-Service, Washington, DC 20225, which clearly stated that the company elects to comply with the provisions of section 1247. The letter must have been signed by an officer of the foreign investment company who was a resident of the United States and who was duly authorized to act on behalf of the company.

(2) *Information furnished.* The following information must have been submitted in connection with the election:

(i) The name, address, and employer identification number, if any, and the taxable year of the company;

(ii) The principal place of business of the company;

(iii) The date and the country under whose laws the company was incorporated;

(iv) The date of filing with the Securities and Exchange Commission, and the file number, of Form N–8A;

(v) The names and addresses of all of the company's directors and officers and of any custodian or agent of the company located in the United States; and

(vi) The name and address of the person (or persons) in the United States having custody of the books of account, records, and other documents of the company, and the location of such books, records, and other documents if different from such address.

(3) *Time information furnished.* (i) If a foreign investment company was registered with the Securities and Exchange Commission on the date of election, all the information required by subparagraph (2) of this paragraph must have been submitted with the election.

(ii) If a foreign investment company made its election before it was so registered, the information required by subparagraph (2) (i), (ii), and (iii) of this paragraph must have been submitted with the election and the information required by subparagraph (2) (iv), (v), and (vi) of this paragraph must have been submitted within 60 days following receipt by the Securities and Exchange Commission of Form N–8A.

(d) *Termination of election*—(1) *General.* Section 1247(b) provides that the election of a foreign investment company under section 1247(a) shall permanently terminate as of the close of the taxable year preceding its first taxable year in which any of the following occurs:

(i) The company fails to comply with the provisions of section 1247(a)(1) (A), (B), or (C), unless it is shown that such failure is due to reasonable cause and not due to willful neglect;

(ii) The company is a foreign personal holding company as defined in section 552; or

(iii) The company ceases to be a registered foreign investment company which is described in paragraph (b) of this section. A company ceases to be a registered company, for example, as of the time the Securities and Exchange Commission revokes its order permitting registration of the company.

(2) *Reasonable cause.* Whether a failure by a foreign investment company to comply with the provisions of section 1247(a)(1) (A), (B), or (C) is due to reasonable cause and not due to willful neglect depends on whether the company exercised ordinary business care and prudence. For example, if in determining its taxable income under section 1247(a) the company relied in good faith upon estimates and opinions of independent certified public accountants or other experts which are also used for purposes of its financial statements filed with the Securities and Exchange Commission under the Investment Company Act of 1940, such reliance would constitute reasonable cause for purposes of this paragraph. In such a case, the company's election under section 1247(a) for the taxable year would not be terminated nor would the company be required to make an additional distribution for such taxable year in order to comply with the provisions of section 1247(a)(1)(A).

[T.D. 6798, 30 FR 1174, Feb. 4, 1965]

§ 1.1247–2 Computation and distribution of taxable income.

(a) *In general.* Taxable income of a foreign investment company means taxable income as defined in section

63(a), computed without regard to subchapter N, chapter 1 of the Code, and in accordance with the following rules:

(1) There shall be excluded the excess, if any, of the company's net long-term capital gain over the net short-term capital loss. See §1.1247–3 for the manner of computing such excess.

(2) The deduction provided in section 172 (relating to net operating losses) shall not be allowed.

(3) Except for the deduction provided in section 248 (relating to organizational expenditures), the special deductions provided for corporations in part VIII (sections 241 and following), subchapter B, chapter 1 of the Code shall not be allowed.

(4) In computing the amount of the deduction allowed under section 164 there shall be included taxes paid or accrued during the taxable year which are imposed by the United States or by the country under the laws of which the company is created or organized. See, however, §1.1247–4.

(b) *Election to distribute taxable income after close of taxable year.* A company may elect under section 1247(a)(2)(B), in respect of taxable income for a taxable year, to treat a distribution made not later than 2 months and 15 days after the close of such taxable year as a distribution made during such taxable year of such taxable income. The company shall make the election by attaching to the information return required by paragraph (c)(1) of §1.1247–5 for such taxable year a statement setting forth the amount of each distribution (or portion thereof) to which the election applies and the date of each such distribution. The election shall be irrevocable after the expiration of the time for filing such information return. The distribution (or portion thereof) to which the election applies shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made. A distribution to which this paragraph applies shall be includible in the gross income of a shareholder of the foreign investment company for his taxable year in which received or accrued.

[T.D. 6798, 30 FR 1175, Feb. 4, 1965]

§1.1247–3 Treatment of capital gains.

(a) *Treatment by the company*—(1) *In general.* If an election to distribute income currently pursuant to section 1247(a) is in effect for a taxable year of a foreign investment company, the company shall designate (in the manner described in subparagraph (3) of this paragraph) to each shareholder his pro rata amount of the excess of the net long-term capital gain over the net short-term capital loss for the company's taxable year, and the portion thereof which is being distributed to each such shareholder. See section 1247(a)(1)(B). Except as provided in subparagraph (2) of this paragraph, the company shall compute such excess (hereinafter referred to as *excess capital gains*) as if such company were a domestic corporation, but without regard to subchapter N, chapter 1 of the Code. See paragraph (d) of §1.1247–1 for rules relating to termination of election under section 1247(a) for failure to properly compute or to properly designate excess capital gains. A company may make an irrevocable election (by notifying its shareholders as provided in subparagraph (3) of this paragraph) to distribute, on or before the 45th day following the close of its taxable year, all or a portion of the excess capital gains and have any such distribution treated as if made during such taxable year.

(2) *Rules for computing capital gains and losses.* Generally, the adjusted basis of property held by a foreign investment company shall be its cost adjusted in accordance with the applicable provisions of the Code. However, in respect of property held by a foreign investment company on the first day of the first taxable year for which the election under section 1247(a) applies, the amounts shown on such day in the permanent books of account, records, and other documents of the company shall, at the option of the company, be accepted as the adjusted basis of such property, if on such day such books, records, and other documents were being maintained in the manner prescribed by regulations under section 30 of the Investment Company Act of 1940 (15 U.S.C. 80a–30). In computing capital gains and losses of a foreign investment company under section 1247, the

provisions of section 1212 (relating to allowance of capital loss carryover) shall not apply to any capital loss incurred in or with respect to taxable years before the first taxable year for which the election under section 1247(a) applies. See section 1247(a)(2)(C).

(3) *Notice to shareholders.* The company shall designate by written notice, mailed on or before the 45th day following the close of its taxable year:

(i) To each person who is a shareholder at the close of such taxable year, his pro rata amount of the portion of the excess capital gains for such year which was not distributed, and

(ii) To each person who received a distribution of excess capital gains with respect to such taxable year, the amount and the date of each such distribution.

Each notice shall show the name and address of the foreign investment company and the taxable year of the company for which the designation is made.

(b) *Treatment of capital gains by qualified shareholder*—(1) *Definition of qualified shareholder.* (i) The term *qualified shareholder* means any shareholder of a registered foreign investment company who is a United States person (as defined in section 7701(a)(30)), other than a shareholder described in subdivision (ii) of this subparagraph.

(ii) A United States person shall not be treated as a qualified shareholder for a taxable year if in his return for such taxable year (or for any prior taxable year) he did not include, in computing his long-term capital gains, his pro rata amount of the undistributed portion of the excess capital gains which the company designated for its taxable year ending within or with such taxable year of the shareholder. Thus, for example, if a shareholder fails to include as long-term capital gain in his return for his taxable year ending December 31, 1966, the amount designated by the company as his pro rata amount of undistributed excess capital gains for the company's taxable year ending June 30, 1966, he would not be a qualified shareholder for his taxable year ending December 31, 1966, or for any subsequent taxable year. However, if the shareholder can show that his failure to include his pro rata amount of the undistributed portion of the excess capital gains in his return was due to reasonable cause and not due to willful neglect, he will continue to be a qualified shareholder. Such shareholder shall, for the year with respect to which such failure occurred, include in his taxable income his previously omitted pro rata amount of the undistributed portion of excess capital gains.

(2) *Treatment of excess capital gains.* A qualified shareholder of a foreign investment company, for any taxable year of the company for which the election under section 1247(a) is in effect, shall include in his return in computing his long-term capital gains:

(i) For his taxable year in which received, his pro rata amount of the distributed portion of the excess capital gains for such taxable year of the company, and

(ii) For his taxable year in which or with which the taxable year of the company ends, his pro rata amount of the undistributed portion of the excess capital gains for such taxable year of the company.

(3) *Sales at end of company's taxable year.* For purposes of determining whether the purchaser or seller of a share of foreign investment company stock is the shareholder at the close of such company's taxable year who is required to include an amount of undistributed excess capital gains in gross income, the amount of the undistributed excess capital gains shall be treated in the same manner as a cash dividend payable to shareholders of record at the close of the company's taxable year. Thus, if a cash dividend paid to shareholders of record as of the close of the foreign investment company's taxable year would be considered income to the purchaser, then the purchaser is also considered to be the shareholder of such company at the close of its taxable year for purposes of including an amount of undistributed excess capital gains in gross income. For rules for determining whether a dividend is income to the purchaser or seller of a share of stock, see paragraph (c) of §1.61–9.

(4) *Partners and partnerships.* If the shareholder required to include an amount of undistributed excess capital

gains in gross income under section 1247(d)(2) and subparagraph (2)(ii) of this paragraph is a partnership, such amount shall be taken into account by the partnership for the taxable year of the partnership in which occurs the last day of the taxable year of the foreign investment company in respect of which the undistributed portion of the excess capital gains were designated. The amount so includible by the partnership shall be taken into account by the partners as distributive shares of the partnership gains and losses from sales or exchanges of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) pursuant to section 702(a)(2) and paragraph (a)(2) of § 1.702–1. The partners shall increase the basis of their partnership interests under section 705(a)(1) by their distributive shares of such gains.

(5) *Effect on earnings and profits of corporate shareholder.* If a shareholder required to include an amount of undistributed excess capital gains in gross income under section 1247(d)(2) and subparagraph (2)(ii) of this paragraph is a corporation, such corporation, in computing its earnings and profits for the taxable year for which such amount is so includible, shall treat such amount as if it had actually been received in that year.

(6) *Example.* The application of this paragraph may be illustrated by the following example:

Example: Smith owns one share of stock in a foreign investment company which he purchased in 1964. In respect of the company's taxable year ending June 30, 1966, during which the election under section 1247(a) was in effect, Smith receives from the company on July 15, 1966, a distribution in the amount of $8. He also receives a notice stating that for such taxable year $9 was being designated as his pro rata amount of the excess capital gains, $8 of which was distributed on July 15, 1966, and $1 of which was being designated as the undistributed portion. In order for Smith to be a qualified shareholder for his taxable year ending December 31, 1966, he must include in computing his long-term capital gains in his return for 1966, his pro rata amount of the undistributed portion of the excess capital gains, that is, $1. Smith must also include in such return his pro rata amount of the distributed portion of excess capital gains, that is, $8. If, however, Smith does not include in income his pro rata amount of the undistributed portion of excess capital gains, he is not a qualified shareholder for 1966 (or for any subsequent year). In such a case, the $8 is not treated under the provisions of section 1247(d)(1) as a distribution of long-term capital gains for such year but as a corporate distribution taxable as ordinary income to the extent provided in subchapter C, chapter 1 of the Code.

(c) *Adjustments relating to undistributed capital gains*—(1) *Adjustments in earnings and profits of the company.* If a foreign investment company, to which the election under section 1247(a) applies, designates an amount as the undistributed portion of excess capital gains for its taxable year, the earnings and profits of the company (within the meaning of subchapter C, chapter 1 of the Code) shall be reduced, and its capital account shall be increased, by such amount.

(2) *Increase in basis of qualified shareholder's stock.* A qualified shareholder, who computes his long-term capital gains for a taxable year by including (in respect of each share of stock which he owns in a foreign investment company) the pro rata amount of the undistributed portion of the excess capital gains which was designated by the company for its taxable year ending with or within such taxable year of the shareholder, shall, as of the day following the close of such taxable year of the company, increase the adjusted basis of each share by such pro rata amount.

(d) *Loss on sale or exchange of certain stock held 1 year or less*—(1) *In general.* If:

(i) A qualified shareholder of a foreign investment company to which the election under section 1247(a) applies treats any amount designated under section 1247(a)(1)(B) with respect to a share of stock as long-term capital gain, and

(ii) Such share is held by the taxpayer for 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less,

Then any loss on the sale or exchange of such share shall, to the extent of the amount described in subdivision (i) of this subparagraph, be treated under section 1247(i) as loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(2) *Example.* The application of this paragraph may be illustrated by the following example:

Example: On October 1, 1966, B, a calendar year taxpayer, purchases for $100 a share of stock in a foreign investment company to which the election under section 1247(a) applies. On January 20, 1967, the company, in a notice to B, designates for its taxable year ending December 31, 1966, $8 per share as excess capital gains of which $6 was distributed on December 1, 1966, and $2 was designated as undistributed. B includes the $8 in computing his long-term capital gains in his return for 1966 and, under paragraph (c)(2) of this section, B's basis for the share is increased to $102 as of January 1, 1967. On February 1, 1967, B sells the share for $93, incurring a $9 loss of which $8 is treated as a long-term capital loss under section 1247(i) and $1 is treated as a short-term capital loss.

[T.D. 6798, 30 FR 1175, Feb. 4, 1965, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1247–4 Election by foreign investment company with respect to foreign tax credit.

(a) *In general*—(1) *Election.* If an election to distribute income currently pursuant to section 1247(a) is in effect for a taxable year of a foreign investment company, and if at the close of such taxable year more than 50 percent of the value of the total assets of the company consists of stock or securities in foreign corporations, then the company may elect for such taxable year, in the manner provided in paragraph (d) of this section, the application of section 1247(f) in respect of foreign taxes referred to in subparagraph (2) of this paragraph which are paid during such taxable year. For purposes of this section, the term *value* shall have the same meaning as assigned to such term in section 851(c)(4) (relating to definition of regulated investment company). For definition of foreign corporation, see section 7701(a).

(2) *Taxes affected.* The election under section 1247(f) for a taxable year applies with respect to income, war profits, and excess profits taxes described in section 901(b)(1) which are paid by the company to foreign countries and possessions of the United States. A tax paid by a foreign investment company does not include a tax which is paid by the shareholders of the company. Whether a tax is paid by the company, and whether a tax is an income, war profits, or excess profits tax described in section 901(b)(1), shall be determined under the principles of chapter 1 of the Code without regard to the law of any foreign country and without regard to any income tax convention, including any income tax convention to which the United States is a party. Section 1247(f) does not apply with respect to foreign taxes which would be deemed to have been paid by the company under section 902 if the company were a domestic corporation. For purposes of this paragraph, taxes paid to the United States are not considered foreign taxes.

(b) *Effect of election*—(1) *Effect on company.* If a valid election under section 1247(f) is made for a taxable year of a foreign investment company, then, for purposes of determining under section 1247(a)(1)(A) whether the company has distributed to its shareholders with respect to such taxable year 90 percent or more of what the company's taxable income would be for such year if the company were a domestic corporation, the following rules shall apply:

(i) The company shall compute such taxable income without any deduction for the foreign taxes referred to in paragraph (a)(2) of this section which were paid or accrued during the taxable year.

(ii) If the amount of taxable income (computed without regard to subdivision (i) of this subparagraph) is more than zero, the company shall treat the foreign taxes referred to in paragraph (a)(2) of this section which were paid during such taxable year of the company as distributed to its shareholders to the extent of the amount which bears the same ratio to the amount of such foreign taxes as (*a*) the amount actually distributed (or treated as distributed pursuant to an election under section 1247(a)(2)(B)) during such taxable year from such taxable income (determined without regard to subdivision (i) of this subparagraph), bears to (*b*) the amount of such taxable income (also determined without regard to such subdivision (i)). Thus, for example, if for a taxable year a foreign investment company has taxable income of $1,000 (determined after deducting foreign taxes paid of $100), and if $600 of such taxable income is distributed during the taxable year and $350 of such taxable income is distributed not later than 2 months and 15 days after the close of the taxable year, then $950 is treated as distributed for purposes of satisfying the 90-percent distribution requirement of section 1247(a)(1)(A), and the amount of foreign taxes treated as distributed under this subdivision is $95 (that is, $100 multiplied by $950/ $1,000).

(iii) If the amount of taxable income (computed without regard to subdivision (i) of this subparagraph) is zero, then all foreign taxes referred to in paragraph (a)(2) of this section which were paid during the taxable year shall be treated as distributed by the company on the last day of such taxable year. Thus, for example, if for a taxable year a foreign investment company has taxable income of $500 (computed without deducting $800 of foreign taxes paid during such year), the amount of taxable income computed without regard to subdivision (i) of this paragraph is zero, and the $800 of foreign taxes is treated as distributed under this subdivision on the last day of the company's taxable year.

(2) *Effect on qualified shareholders.* The following rules apply to a qualified shareholder of a foreign investment company which makes a valid election under section 1247(f) for a taxable year:

(i) The qualified shareholder shall include in his gross income (in addition to taxable dividends actually received) his proportionate share of the foreign taxes referred to in paragraph (a)(2) of this section which were paid during such taxable year of the company, and shall treat such proportionate share as paid by him for purposes of the deduction under section 164(a) and the foreign tax credit under section 901. See, however, paragraph (c)(1) of this section for a limitation on the amount a shareholder may treat as his proportionate share of foreign taxes.

(ii) In respect of any distribution made (or treated as made under section 1247(a)(2)(B)) during the taxable year of the company and which is received by a qualified shareholder, the term *proportionate share of foreign taxes* means, for purposes of this section, an amount which bears the same ratio to (*a*) the amount of the foreign taxes referred to in paragraph (a)(2) of this section which were paid during such taxable year of the company, as (*b*) the amount of such distribution to the shareholder out of the company's taxable income for such taxable year (determined without regard to subparagraph (1)(i) of this paragraph), bears to (*c*) the amount of such taxable income (also determined without regard to such subparagraph (1)(i)).

(iii) In respect of any distribution of foreign taxes treated as made under subparagraph (1)(iii) of this paragraph on the last day of the taxable year of the company, the term *proportionate share of foreign taxes* means, for purposes of this section, an amount which bears the same ratio to (*a*) the amount of foreign taxes referred to in paragraph (a)(2) of this section which were paid during such taxable year of the company, as (*b*) the fair market value of all shares of stock of the company held by such qualified shareholder on the last day of such taxable year, bears to (*c*) the fair market value of all such shares outstanding on such last day.

(iv) For purposes of the foreign tax credit, the qualified shareholder shall treat his proportionate share of foreign taxes as having been paid by him to the country in which the foreign investment company is created or organized.

(v) For purposes of the foreign tax credit, the qualified shareholder shall treat as gross income from sources within the country in which the foreign investment company is created or organized the sum of (*a*) his proportionate share of foreign taxes, (*b*) any dividend paid to him by such foreign investment company, and (*c*) his pro rata amount of distributed and undistributed portions of excess capital gains referred to in paragraph (a) of §1.1247–3.

(vi)(*a*) In respect of a distribution made (or treated as made under section 1247(a)(2)(B)) during a taxable year of the company, a qualified shareholder shall consider his proportionate share of foreign taxes as having been received, and as having been paid, by him during his taxable year in which the distribution is includible in his gross income.

(*b*) In respect of an amount of foreign taxes treated as distributed under subparagraph (1)(iii) of this paragraph on the last day of a taxable year of the company, the qualified shareholder shall consider his proportionate share of foreign taxes as having been received, and as having been paid, by him during his taxable year in which such last day falls.

(vii) If the qualified shareholder is a corporation, it shall not be deemed under section 902 to have paid any taxes paid by the foreign investment company to which the election under section 1247(f) applied.

(3) *Effect on nonqualified shareholders.* A shareholder who is not a qualified shareholder shall not include his proportionate share of foreign taxes in gross income, and shall not be entitled to treat such proportionate share as having been paid by him to a foreign country for purposes of the deduction under section 164(a) or, except to the extent that section 902 is applicable, for purposes of the foreign tax credit under section 901.

(4) *Example.* The application of paragraph (a) of this section and this paragraph may be illustrated by the following examples:

Example 1. (i) X Corporation, a foreign investment company incorporated in country C with 100,000 shares of stock outstanding, uses the calendar year as its taxable year. For 1964, X Corporation has the following income and pays the following foreign taxes:

Dividend income, minus operating expenses		$675,000
Foreign income taxes paid:		
Withheld by country A	$25,000	
Withheld by country B	50,000	
Income tax of country C	90,000	
Total foreign income tax paid		165,000
Taxable income for purposes of section 1247(a)(1)(A), determined without regard to section 1247(f)		510,000

X Corporation distributes to its shareholders the amount of $459,000 (i.e., 90 percent of $510,000).

(ii) Assume that X Corporation validly elects the application of section 1247(f). Accordingly, X Corporation determines that its taxable income for purposes of section 1247(a)(1)(A) without any deduction for foreign income taxes paid or accrued is $675,000 ($510,000, plus $165,000).

(iii) Assume that X Corporation intends to distribute the least amount which would satisfy the requirements of section 1247(a)(1)(A), as modified by the election under section 1247(f). Thus, the total amount X distributes is $607,500, which consists of the sum of (*a*) $459,000 actually distributed, that is, 90 percent of $510,000 of taxable income (determined after the deduction for foreign taxes), plus (*b*) foreign taxes paid of $148,500 which are treated as distributed, that is, 90 percent of $165,000 of foreign taxes paid by X Corporation.

Example 2. Assume the same facts as in example (1) except that X Corporation distributes the entire $510,000 in the following manner: On December 15, 1964, X Corporation distributes $170,000 as a dividend of $1.70 per share. On February 25, 1965, X Corporation distributes the remaining $340,000 as a dividend of $3.40 per share pursuant to an election under section 1247(a)(2)(B) to treat such distribution as if made in 1964. Assume that Brown, a qualified shareholder, uses the calendar year as his taxable year. The amount of $0.55 per share (that is, $165,000, multiplied by $1.70/$510,000) must be treated by Brown as foreign taxes paid by him in 1964 to country C and the amount of $1.10 per share (that is, $165,000 multiplied by $3.40/$510,000) must be similarly treated by Brown in 1965. The amount of $2.25 per share ($1.70 of dividends actually received plus $0.55 representing foreign taxes paid) must be reported by Brown as income considered received in 1964 from country C, and the amount of $4.50 per share ($3.40 of dividends actually received plus $1.10 representing foreign taxes paid) must be so reported by Brown in 1965.

Example 3. A foreign investment company organized under the laws of country C receives a dividend of $1,000 from X Corporation, which is also organized under the laws of country C. Under the laws of country C, the foreign investment company would, if it so elects, be considered as having paid income tax in the amount of $150 which X Corporation paid to country C with respect to the earnings from which the dividend was paid. If the foreign investment company were a domestic corporation, however, it would not be considered for purposes of section 901(b)(1) as having paid the tax actually paid by X Corporation. Accordingly, the election under section 1247(f) does not apply in respect of the $150. The result would be the same if X Corporation was organized under the laws of any other foreign country to which it paid taxes and if the laws of country C permitted the foreign investment company to be considered as the payor of such taxes.

(c) *Notice to shareholders*—(1) *In general.* If, in the manner provided in paragraph (d) of this section, a foreign investment company makes an election with respect to the foreign tax credit under section 1247(f), the company shall furnish to each shareholder a written notice mailed not later than 45 days after the close of the taxable year of the company for which the election is made, designating the shareholder's proportionate share of the foreign taxes referred to in paragraph (a)(2) of this section which were paid by the company during such taxable year. This notice may be combined with the written notice to shareholders described in paragraph (a)(3) of §1.1247–3 relating to excess capital gains.

(2) *Application to shareholder.* For purposes of paragraph (b)(2) of this section, the amount which a shareholder may treat as his proportionate share of foreign taxes paid by the company shall not exceed the amounts so designated by the company in such written notice. If, however, an amount designated by the company in a notice exceeds the shareholder's proper proportionate share of such foreign taxes, the shareholder is limited to the amount correctly determined.

(d) *Manner of making election*—(1) *In general.* The election of a foreign investment company to have section 1247(f) apply for a taxable year shall be made by filing as part of its information return required by paragraph (c)(1) of §1.1247–5 a Form 1118 modified so that it becomes a statement in support of the election made by the company under section 1247(f).

(2) *Irrevocability of election.* An election under section 1247(f) for a taxable year of a foreign investment company shall be made with respect to all foreign taxes referred to in paragraph (a)(2) of this section which were paid during such taxable year, and must be made not later than the time prescribed for filing the information return under paragraph (c)(1) of §1.1247–5. Such election, if made, shall be irrevocable with respect to the distributions, and the foreign taxes with respect thereto, to which the election applies.

[T.D. 6798, 30 FR 1177, Feb. 4, 1965]

§1.1247–5 Information and recordkeeping requirements.

(a) *General.* In order to carry out the purposes of section 1247, a foreign investment company shall keep the records and comply with the information requirements prescribed by this section for each taxable year of the company for which the election under section 1247(a) is in effect. See section 1247(a)(1)(C).

(b) *Recordkeeping requirements.* The company shall maintain and preserve such permanent books of account, records, and other documents as are sufficient to establish in accordance with the provisions of §1.1247–2 what its taxable income would be if it were a domestic corporation. Generally, if the books and records of the company are maintained in the manner prescribed by regulations under section 30 of the Investment Company Act of 1940 (15 U.S.C. 80a–30), the requirements of the preceding sentence shall be considered satisfied. Such books, records, and other documents shall be available for inspection in the United States by authorized internal revenue officers or employees, and shall be maintained so long as the contents thereof may be material in the administration of section 1247.

(c) *Information returns.* The company shall file, for each taxable year during which the election under section 1247(a) is in effect, on or before the 15th day of the third month following the close of its taxable year or on or before May 1, 1965, whichever is later, with the Director of International Operations, Internal Revenue Service, Washington, DC, 20225:

(1) Form 1120, modified so as to be an annual information return, establishing the amount of its taxable income referred to in paragraph (b) of this section, and

(2) Form 2438, modified so as to be an annual information return, establishing the amount of the company's excess capital gains (referred to in paragraph (a)(1) of §1.1247–3) for the taxable year, the distributed portion thereof, and the amount of the undistributed portion thereof.

[T.D. 6798, 30 FR 1178, Feb. 4, 1965]

§1.1248–1 Treatment of gain from certain sales or exchanges of stock in certain foreign corporations.

(a) *In general.* (1) If a United States person (as defined in section 7701(a)(30)) recognizes gain on a sale or exchange after December 31, 1962, of stock in a foreign corporation, and if in respect of such person the conditions of subparagraph (2) of this paragraph are satisfied, then the gain shall be included in the gross income of such person as a dividend to the extent of the earnings and profits of such corporation attributable to such stock under § 1.1248–2 or 1.1248–3, whichever is applicable, which were accumulated in taxable years of such foreign corporation beginning after December 31, 1962, during the period or periods such stock was held (or was considered as held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation. See section 1248(a). For computation of earnings and profits attributable to such stock if there are any *lower tier* corporations, see paragraph (a) (3) and (4) of § 1.1248–2 or paragraph (a) of § 1.1248–3, whichever is applicable. In general, the amount of gain to be included in a person's gross income as a dividend under section 1248(a) shall be determined separately for each share of stock sold or exchanged. However, such determination may be made in respect of a block of stock if earnings and profits attributable to the block are computed under § 1.1248–2 or 1.1248–3. See paragraph (b) of § 1.1248–2 and paragraph (a)(5) of § 1.1248–3. For the limitation on the tax attributable to an amount included in an individual's gross income as a dividend under section 1248(a), see section 1248(b) and § 1.1248–4. For the treatment, under certain circumstances, of the sale or exchange of stock in a domestic corporation as the sale or exchange of stock held by the domestic corporation in a foreign corporation, see section 1248(e) and § 1.1248–6. For the nonapplication of section 1248 in certain circumstances, see section 1248(f) and paragraph (e) of this section. For the requirement that the person establish the amount of earnings and profits attributable to the stock sold or exchanged and, for purposes of section 1248(b), the amount of certain taxes, see section 1248(g) and § 1.1248–7.

(2) In respect of a United States person who sells or exchanges stock in a foreign corporation, the conditions referred to in subparagraph (1) of this paragraph are satisfied only if (i) such person owned, within the meaning of section 958(a), or was considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such foreign corporation at any time during the 5-year period ending on the date of the sale or exchange, and (ii) at such time such foreign corporation was a controlled foreign corporation (as defined in section 957).

(3) For purposes of subparagraph (2) of this paragraph, (i) a foreign corporation shall not be considered to be a controlled foreign corporation at any time before the first day of its first taxable year beginning after December 31, 1962, and (ii) the percentage of the total combined voting power of stock of a foreign corporation owned (or considered as owned) by a United States person shall be determined in accordance with the principles of section 951(b) and the regulations thereunder.

(4) The application of this paragraph may be illustrated by the following examples:

Example 1. Corporation F is a foreign corporation which has outstanding 100 shares of one class of stock. F was a controlled foreign corporation for the period beginning on January 1, 1963, and ending on June 30, 1965, but was not a controlled foreign corporation at any time thereafter. On December 31, 1965, Brown, a United States person who has owned 15 shares of F stock since 1962, sells 7 of his 15 shares and recognizes gain with respect to each share sold. Since Brown owned stock representing at least 10 percent of the total combined voting power of F at a time during the 5-year period ending on December 31, 1965, while F was a controlled foreign corporation, the conditions of subparagraph (2) of this paragraph are satisfied. Therefore, section 1248(a) applies to the gain recognized by Brown to the extent of the earnings and profits attributable under § 1.1248–3 to such shares.

Example 2. Assume the same facts as in example (1). Assume further that on February 1, 1970, Brown sells the remainder of his shares in F Corporation and recognizes gain with respect to each share sold. Even though Brown did not own stock representing at least 10 percent of the total combined voting power of F on February 1, 1970, nevertheless, in respect of each of the 8 shares of F stock which he sold on such date, the conditions of subparagraph (2) of this paragraph are satisfied since Brown owned stock representing at least 10 percent of such voting power at a time during the 5-year period ending on February 1, 1970, while F was a controlled foreign corporation. Therefore, section 1248(a) applies to the gain recognized by Brown to the extent of the earnings and profits attributable under §1.1248–3 to such shares. If, however, Brown had sold the reminder of his shares in F on July 1, 1970, since the last date on which Brown owned stock representing at least 10 percent of the total combined voting power of F while F was a controlled foreign corporation was June 30, 1965, a date which is not within the 5-year period ending July 1, 1970, the conditions of subparagraph (2) of this paragraph would not be satisfied and section 1248(a) would not apply.

Example 3. Corporation G, a foreign corporation created in 1950, has outstanding 100 shares of one class of stock and uses the calendar year as its taxable year. Corporation X, a United States person, owns 60 shares of G stock and has owned such stock since G was created. Corporation Y, a United States person, owned 15 shares of the G stock from 1950 until December 1, 1962, on which date it sold 10 of such shares. On December 31, 1963, Y sells its remaining 5 shares of the G stock and recognizes gain on the sale. Since G is not considered to be a controlled foreign corporation at any time before January 1, 1963, and since Y did not own stock representing at least 10 percent of the total combined voting power of G at any time on or after such date, the conditions of subparagraph (2) of this paragraph are not satisfied and section 1248(a) does not apply.

(b) *Sale or exchange.* For purposes of this section and §§1.1248–2 through 1.1248–7, the term *sale or exchange* includes the receipt of a distribution which is treated as in exchange for stock under section 302(a) (relating to distributions in redemption of stock), section 331(a)(1) (relating to distributions in complete liquidation of a corporation), or section 331(a)(2) (relating to distributions in partial liquidation of a corporation).

(c) *Gain recognized.* Section 1248(a) applies to a sale or exchange of stock in a foreign corporation only if gain is recognized in whole or in part upon such sale or exchange. Thus, for example, if a United States person exchanges stock in a foreign corporation, and if under section 332, 351, 354, 355, or 361 no gain is recognized as a result of a determination by the Commissioner under section 367 that the exchange is not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes, then no amount is includible in the gross income of such person as a dividend under section 1248(a).

(d) *Credit for foreign taxes.* (1) If a domestic corporation includes an amount in its gross income as a dividend under section 1248(a) upon a sale or exchange of stock in a foreign corporation (referred to as a *first tier* corporation), and if on the date of the sale or exchange the domestic corporation owns directly at least 10 percent of the voting stock of the first tier corporation:

(i) The foreign tax credit provisions of sections 901 through 908 shall apply in the same manner and subject to the same conditions and limitations as if the first tier corporation on such date distributed to the domestic corporation as a dividend that portion of the amount included in gross income under section 1248(a) which does not exceed the earnings and profits of the first tier corporation attributable to the stock under §1.1248–2 or §1.1248–3, as the case may be, and

(ii) If on such date such first tier corporation owns directly 50 percent or more of the voting stock of a *lower tier* corporation described in paragraph (a)(3) of §1.1248–2 or paragraph (a)(3) of §1.1248–3, as the case may be (referred to as a *second tier* corporation), then the foreign tax credit provisions of sections 901 through 905 shall apply in the same manner and subject to the same conditions and limitations as if on such date (*a*) the domestic corporation owned directly that percentage of the stock in the second tier corporation which such domestic corporation is considered to own by reason of the application of section 958(a)(2), and (*b*) the second tier corporation had distributed to the domestic corporation as a dividend that portion of the amount included in gross income under section 1248(a) which does not exceed the earnings and profits of the second tier corporation attributable to such stock under §1.1248–2 or §1.1248–3, as the case may be.

(2) A credit shall not be allowed under subparagraph (1) of this paragraph in respect of taxes which are not actually paid or accrued. For the inclusion as a dividend in the gross income of a domestic corporation of an amount equal to the taxes deemed paid by such

corporation under section 902(a)(1), see section 78.

(3) If subparagraph (1)(ii) of this paragraph applies, and if the amount included in gross income under section 1248(a) upon the sale or exchange of the stock in a first tier corporation described in subparagraph (1)(ii) of this paragraph is less than the sum of the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, plus the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, then the amount considered distributed to the domestic corporation as a dividend shall be determined by multiplying the amount included in gross income under section 1248(a) by:

(i) For purposes of applying subparagraph (1)(i) of this paragraph, the percentage that (*a*) the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, bears to (*b*) the sum of the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, plus the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, and

(ii) For purposes of applying subparagraph (1)(ii) of this paragraph, the percentage that (*a*) the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, bears to (*b*) the sum referred to in subdivision (i)(*b*) of this subparagraph.

(4) The provisions of this paragraph may be illustrated by the following examples:

Example 1. On June 30, 1964, domestic corporation D owns 10 percent of the voting stock of controlled foreign corporation X. On such date, D sells a share of X stock and includes $200 of the gain on the sale in its gross income as a dividend under section 1248(a). X does not own any stock of a lower tier corporation referred to in paragraph (a)(3) of § 1.1248–3. D uses the calendar year as its taxable year and instead of deducting foreign taxes under section 164, D chooses the benefits of the foreign tax credit provisions for 1964. If D had included $200 in its gross income as a dividend with respect to a distribution from X on June 30, 1964, the amount of the foreign income taxes paid by X which D would be deemed to have paid under section 902(a) in respect of such distribution would be $60. Thus, in respect of the $200 included in D's gross income as a dividend under section 1248(a), and subject to the applicable limitations and conditions of sections 901 through 905, D is entitled under this paragraph to a foreign tax credit of $60 for 1964.

Example 2. On June 30, 1965, domestic corporation D owns all of the voting stock of foreign corporation Y, and Y (the first tier corporation) owns all of the voting stock of foreign corporation Z (a second tier corporation). On such date, D sells a block of Y stock and includes $400 of the gain on the sale in its gross income as a dividend under section 1248(a). The earnings and profits attributable under § 1.1248–3 to the block are $600 from Y and $1,800 from Z. D uses the calendar year as its taxable year and instead of deducting foreign taxes under section 164, D chooses the benefits of the foreign tax credit provisions for 1965. For purposes of applying the foreign tax credit provisions, Y is considered under subparagraph (3) of this paragraph to have distributed to D a dividend of $100 ($400×600/2400) and Z is considered to have so distributed to D a dividend of $300 ($400×1800/2400). If D had included $100 in its gross income as a dividend with respect to a distribution from Y on June 30, 1965, the amount of foreign income taxes paid by Y which D would be deemed to have paid under section 902(a) in respect of such distribution is $80. If D had owned the stock in Z directly, and if D had included $300 in its gross income as a dividend with respect to a distribution from Z, the amount of foreign income taxes paid by Z which D would be deemed to have paid under section 902(a) in respect of such distribution is $120. Thus, in respect of the $400 included in D's gross income as a dividend under section 1248(a), and subject to the applicable limitations and conditions of sections 901 through 905, D is entitled under this paragraph to a foreign tax credit of $200 ($80 plus $120) for 1965.

(e) *Exceptions.* Under section 1248(f), this section and §§ 1.1248–2 through 1.1248–7 shall not apply to:

(1) Distributions to which section 303 (relating to distributions in redemption of stock to pay death taxes) applies;

(2) Gain realized on exchanges to which section 356 (relating to receipt of additional consideration in certain reorganizations) applies; or

(3) Any amount to the extent that such amount is, under any other provision of the Code, treated as (i) a dividend, (ii) gain from the sale of an asset which is not a capital asset, or (iii) gain from the sale of an asset held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(f) *Installment method.* (1) Gain from a sale or exchange to which section 1248 applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall be deemed to consist of gain which is included in gross income under section 1248 as a dividend until all such gain has been reported, and the remaining portion (if any) of such income shall be deemed to consist of gain to which section 1248 does not apply. For treatment of amounts as interest on certain deferred payments, see section 483.

(2) The application of this paragraph may be illustrated by the following example:

Example: Jones contracts to sell stock in a controlled foreign corporation for $5,000 to be paid in 10 equal payments of $500 each, plus a sufficient amount of interest so that section 483 does not apply. He properly elects under section 453 to report under the installment method gain of $1,000 which is includible in gross income under section 1248 as a dividend and gain of $500 which is a long-term capital gain. Accordingly, $150 of each of the first 6 installment payments and $100 of the seventh installment payment are included in gross income under section 1248 as a dividend, and $50 of the seventh installment payment and $150 of each of the last 3 installment payments are long-term capital gain.

[T.D. 6779, 29 FR 18130, Dec. 22, 1964, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7961, 49 FR 26225, June 27, 1984]

§1.1248–2 Earnings and profits attributable to a block of stock in simple cases.

(a) *General*—(1) *Manner of computation.* For purposes of paragraph (a)(1) of §1.1248–1, if a United States person sells or exchanges a block of stock (as defined in paragraph (b) of this section) in a foreign corporation, and if the conditions of paragraph (c) of this section are satisfied in respect of the block, then the earnings and profits attributable to the block which were accumulated in taxable years of the corporation beginning after December 31, 1962, during the period such block was held (or was considered to be held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* (i) For each taxable year of the corporation beginning after December 31, 1962, the earnings and profits accumulated for each such taxable year by the corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) for the period the person held (or is considered to have held by reason of the application of section 1223) the block, the amount of earnings and profits attributable to the block shall be computed in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If the conditions of paragraph (c)(5)(ii) of this section must be satisfied in respect of stock in a *lower tier* foreign corporation which such person owns within the meaning of section 958(a)(2), then (i) the earnings and profits accumulated for each such taxable year by such lower tier corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) for the period the person held (or is considered to have held by reason of the application of section 1223) the block, the amount of earnings and profits of the lower tier corporation attributable to the block shall be computed in the manner prescribed in paragraph (e) of this section applied as if such person owned directly the percentage of such stock in such lower tier corporation which such person owns within the meaning of section 958(a)(2).

(4) *Step 3.* The amount of earnings and profits attributable to the block shall be the sum of the amounts computed under steps 1 and 2.

(b) *Block of stock.* For purposes of this section, the term *block of stock* means a group of shares sold or exchanged in one transaction, but only if:

(1) The amount realized, basis, and holding period are identical for each such share, and

(2) In case, during the period the person held (or is considered to have held by reason of the application of section 1223) such shares, any amount was included under section 951 in the gross income of the person (or another person) in respect of the shares, the excess under paragraph (e)(3)(ii) of this section (computed as if each share were a block) is identical for each such share.

(c) *Conditions to application.* This section shall apply only if the following conditions are satisfied:

(1)(i) On each day of the period during which the block of stock was held (or is considered as held by reason of the application of section 1223) by the person during taxable years of the corporation beginning after December 31, 1962, the corporation is a controlled foreign corporation, and

(ii) On no such day is the corporation a foreign personal holding company (as defined in section 552) or a foreign investment company (as defined in section 1246(b)).

(2) The corporation had only one class of stock, and the same number of shares of such stock were outstanding, on each day of each taxable year of the corporation beginning after December 31, 1962, any day of which falls within the period referred to in subparagraph (1) of this paragraph.

(3) For each taxable year referred to in subparagraph (2) of this paragraph, the corporation is not a less developed country corporation (as defined in section 902(d)).

(4) For each taxable year referred to in subparagraph (2) of this paragraph, the corporation does not make any distributions out of its earnings and profits other than distributions which, under section 316 (as modified by section 959), are considered to be out of earnings and profits accumulated in taxable years beginning after December 31, 1962, during the period such person held (or is considered to have held by reason of the application of section 1223) the block while such corporation was a controlled foreign corporation.

(5)(i) If (*a*) on the date of the sale or exchange such person, by reason of his ownership of such block, owns within the meaning of section 958(a)(2) stock in another foreign corporation (referred to as a *lower tier* corporation), and (*b*) the conditions of paragraph (a)(2) of §1.1248–1 would be satisfied by such person in respect of such stock in the lower tier corporation if such person were deemed to have sold or exchanged such stock in the lower tier corporation on the date he actually sold or exchanged such block in the first tier corporation, then the conditions of subdivision (ii) of this subparagraph must be satisfied.

(ii) In respect of stock in such lower tier corporation, (*a*) the conditions set forth in subparagraphs (1) through (4) of this paragraph (applied as if such person owned directly such stock in such lower tier corporation) must be met and (*b*) such person must own within the meaning of section 958(a)(2) the same percentage of the shares of such stock on each day which falls within the period referred to in subparagraph (1) of this paragraph.

(d) *Earnings and profits accumulated for a taxable year*—(1) *General.* For purposes of this section, the earnings and profits accumulated for a taxable year of a foreign corporation shall be the earnings and profits for such year computed in accordance with the rules prescribed in §1.964–1 (relating to determination of earnings and profits for a taxable year of a controlled foreign corporation) and reduced by any distributions therefrom. If the stock in the corporation is sold or exchanged before any action is taken by or on behalf of the corporation under paragraph (c) of §1.964–1, the computation of earnings and profits under §1.964–1 for purposes of this section shall be made as if no elections had been made and no accounting method had been adopted.

(2) *Special rules.* (i) The earnings and profits of the corporation accumulated:

(*a*) For any taxable year beginning before January 1, 1967 (computed without any reduction for distributions), shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b) as gross income derived from sources within the United States, and

(*b*) For any taxable year beginning after December 31, 1966 (computed without any reduction for distributions), shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b)(2) as income effectively connected for that year with the conduct by such corporation of a trade or business in the United States, whether derived from sources within or from sources without the United States,

Over any deductions allocable to such item under section 882(c). However, if the sale or exchange of stock in the foreign corporation by the United States person occurs before January 1, 1967, the provisions of (*a*) of this subdivision apply with respect to such sale or exchange even though the taxable year begins after December 31, 1966. See section 1248(d)(4). Any item which is required to be excluded from gross income, or which is taxed at a reduced rate, under an applicable treaty obligation of the United States shall not be excluded under this subdivision from earnings and profits accumulated for a taxable year (computed without any reduction for distributions).

(ii) If a foreign corporation adopts a plan of complete liquidation in a taxable year of the corporation beginning after December 31, 1962, and if because of the application of section 337(a) gain or loss would not be recognized by the corporation from the sale or exchange of property if the corporation were a domestic corporation, then the earnings and profits of the corporation accumulated for the taxable year (computed without any reduction for distributions) shall be determined without regard to the amount of such gain or loss. See section 1248(d)(2). For the nonapplication of section 337(a) to a liquidation by a collapsible corporation (as defined in section 341) and to certain other liquidations, see section 337(c).

(e) *Earnings and profits attributable to block*—(1) *General.* Except as provided in subparagraph (3) of this paragraph, the earnings and profits attributable to a block of stock of a controlled foreign corporation for the period a United States person held (or is considered to have held by reason of the application of section 1223) the block are an amount equal to:

(i) The sum of the earnings and profits accumulated for each taxable year of the corporation beginning after December 31, 1962 (computed under paragraph (d) of this section) during such period, multiplied by

(ii) The percentage that (*a*) the number of shares in the block, bears to (*b*) the total number of shares of the corporation outstanding during such period.

(2) *Special rule.* For purposes of computing the sum referred to in subparagraph (1)(i) of this paragraph, in case the block was held (or is considered as held by reason of the application of section 1223) during a taxable year beginning after December 31, 1962, but not on each day of such taxable year, there shall be included in such sum only that portion which bears the same ratio to (i) the total earnings and profits for such taxable year (computed under paragraph (d) of this section), as (ii) the number of days during such taxable year the block was held (or is considered as so held), bears to (iii) the total number of days in such taxable year.

(3) *Amounts included in gross income under section 951.* (i) If, during the period the person held (or is considered to have held by reason of the application of section 1223) the block, any amount was included under section 951 in the gross income of such person (or of another person whose holding of the stock sold or exchanged is, by reason of the application of section 1223, attributed to such person) in respect of the block, then the earnings and profits attributable to the block for such period shall be an amount equal to (*a*) the earnings and profits attributable to the block which would have been computed under subparagraph (1) of this paragraph if this subparagraph did not apply, reduced by (*b*) the excess computed under subdivision (ii) of this subparagraph. See section 1248(d)(1).

(ii) The excess computed under this subdivision is the excess (if any) of (*a*) amounts included under section 951 in the gross income of such person (or such other person) in respect of the block during such period, over (*b*) the portion of such amounts which, in any taxable year of such person (or such other person), resulted in an exclusion from the gross income of such person (or such other person) under section 959(a)(1) (relating to exclusion from gross income of distributions of previously taxed earnings and profits).

(iii) This subparagraph shall apply notwithstanding an election under section 962 by such person to be subject to tax at corporate rates.

(4) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. On May 26, 1965, Green, a United States person, purchases at its fair market value a block of 25 of the 100 outstanding shares of the only class of stock of controlled foreign corporation F. He sells the block on January 1, 1968. In respect of the block, Green did not include any amount in his gross income under section 951. F uses the calendar year as its taxable year and does not own stock in any lower tier corporation referred to in paragraph (c)(5)(i) of this section. All of the conditions of paragraph (c) of this section are satisfied in respect of the block. The earnings and profits accumulated by F (computed under paragraph (d) of this section) are $10,000 for 1965, $13,000 for 1966, and $11,000 for 1967. The earnings and profits of F attributable to the block are $7,500, determined as follows:

Sum of earnings and profits accumulated by F during period block was held:	
For 1965 (219/365×$10,000)	$6,000
For 1966	$13,000
For 1967	$11,000
Sum	$30,000
Multiplied by:	
Number of shares in block (25), divided by total number of shares outstanding (100)	25%
Earnings and profits attributable to block	$7,500

Example 2. Assume the same facts as in example (1) except that in respect of the block Green includes in his gross income under section 951 the total amount of $2,800 for 1965 and 1966, and because of such inclusion the amount of $2,800 which was distributed to Green by F on January 15, 1967, is excluded from his gross income under section 959(a)(1). Accordingly, the earnings and profits of F attributable to the block are $7,000, determined as follows:

Earnings and profits attributable to the block, as computed in example (1)	$7,500
Minus:	
Excess of amount included in Green's gross income under section 951 ($2,800), over portion thereof which resulted in an exclusion under section 959(a)(1) ($2,300)	500
Earnings and profits attributable to block	7,000

Example 3. Assume the same facts as in example (1) except that on each day beginning on January 1, 1966 (the date controlled foreign corporation G was organized) through January 1, 1968, F owns 80 of the 100 outstanding shares of the only class of G stock. Since, by reason of his ownership of 25 shares of F stock, Green owns within the meaning of section 958(a)(2) the equivalent of 20 shares of G stock ($^{25}/_{100}$ of 80 shares), G is a lower tier corporation referred to in paragraph (c)(5)(i)(*a*) of this section. If Green had sold the 20 shares of G stock on January 1, 1968, the date he actually sold the block of F stock, the conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied in respect of the G stock, and, accordingly, the conditions of paragraph (c)(5)(ii) of this section must be satisfied. Assume further that such conditions are satisfied, that G uses the calendar year as its taxable year, and that the earnings and profits accumulated by G (computed under paragraph (d) of this section) are $19,000 for 1966 and $21,000 for 1967. The earnings and profits of F and of G attributable to the block are $15,500, determined as follows:

Sum of earnings and profits accumulated by G for period Green owned G stock within the meaning of section 958(a)(2) ($19,000 plus $21,000)	$40,000
Multiplied by:	
Number of G shares deemed owned within the meaning of section 958(a)(2) by Green (20), divided by total number of G shares outstanding (100)	20%
Earnings and profits of G attributable to block	$8,000
Earnings and profits of F attributable to block, as determined in example (1)	$7,500
Total earnings and profits attributable to block	$15,000

[T.D. 6779, 29 FR 18131, Dec. 22, 1964, as amended by T.D. 7293, 38 FR 32803, Nov. 28, 1973]

§ 1.1248–3 Earnings and profits attributable to stock in complex cases.

(a) *General*—(1) *Manner of computation.* For purposes of paragraph (a)(1) of § 1.1248–1, if a United States person sells or exchanges stock in a foreign corporation, and if the provisions of § 1.1248–2 do not apply, then the earnings and profits attributable to the stock which were accumulated in taxable years of the corporation beginning after December 31, 1962, during the period or periods such stock was held (or was considered to be held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* For each taxable year of the corporation beginning after December 31, 1962, (i) the earnings and profits accumulated for such taxable year by the corporation shall be computed in the manner prescribed in paragraph (b) of this section, (ii) the person's *tentative ratable share* of such earnings and profits shall be computed in the manner prescribed in paragraph (c) or (d) (whichever is applicable) of this section, and (iii) the person's *ratable share* of such earnings and profits shall be computed by adjusting the tentative ratable share in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If the provisions of paragraph (f) of this section (relating to earnings and profits of *lower tier* foreign corporations) apply, the amount of the person's ratable share of the earnings and profits accumulated by each *lower tier* corporation attributable to any such taxable year (i) shall be computed in the manner prescribed by paragraph (f) of this section, and (ii) shall be added to such person's ratable share for such taxable year determined in step 1.

(4) *Step 3.* The amount of earnings and profits attributable to the share shall be the sum of the ratable shares computed for each such taxable year in the manner prescribed in steps 1 and 2.

(5) *Share or block.* In general, the computation under this paragraph shall be made separately for each share of stock sold or exchanged, except that if a group of shares constitute a block of stock the computation may be made in respect of the block. For purposes of this section, the term *block of stock* means a group of shares sold or exchanged in one transaction, but only if (i) the amount realized, basis, and holding period are identical for each such share, and (ii) the adjustments (if any) under paragraphs (e) and (f)(5) of this section of the tentative ratable shares would be identical for each such share if such adjustments were computed separately for each such share.

(6) *Deficit in earnings and profits.* For purposes of this section and §§ 1.1248–4 through 1.1248–7, in respect of a taxable year, the term *earnings and profits accumulated* for a taxable year (but only if computed under paragraph (b) of this section) includes a deficit in earnings and profits accumulated for such taxable year. Similarly, a tentative ratable share, or a ratable share, may be a deficit.

(7) *Examples.* The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. On December 31, 1967, Brown sells 10 shares of stock in foreign corporation X, which uses the calendar year as its taxable year. The 10 shares constitute a block of stock under subparagraph (5) of this paragraph. Under step 1, Brown's ratable shares of the earnings and profits of X attributable to the block are as follows:

Taxble year of X	Ratable shares
1963	$100
1964	150
1965	[1] 50
1966	50
1967	100
Sum	350

[1] Deficit.

The amount of the earnings and profits attributable to such block under step 3 is $350.

Example 2. Assume the same facts as in example (1), except that in respect of X there are *lower tier* corporations Y and Z to which the provisions of paragraph (f) of this section apply. Brown's ratable shares of the earnings and profits of X, Y, and Z attributable to the block under steps 1 and 2 for each taxable year of X are as follows:

Taxable year of X	Ratable shares			
	X	Y	Z	Total
1963	$100	$40	$20	$160
1964	150	40	−60	130
1965	−50	30	50	30
1966	50	50	30	130
1967	100	−40	40	100
Sum	350	120	80	550

The amount of the earnings and profits attributable to such block under step 3 is $550.

(b) *Earnings and profits accumulated for a taxable year*—(1) *General.* For purposes of this section, the earnings and profits accumulated for a taxable year of a foreign corporation shall be the earnings and profits for such year, computed in accordance with the rules prescribed in § 1.964–1 (relating to determination of earnings and profits for a taxable year of a controlled foreign corporation), except that (i) the special rules of subparagraph (2) of this paragraph shall apply, and (ii) adjustments shall be made under subparagraph (3) of this paragraph for distributions made by the corporation during such taxable year. If the stock in the corporation is sold or exchanged before any action is taken by or on behalf of the corporation under paragraph (c) of § 1.964–1, the computation of earnings and profits under § 1.964–1 for purposes of this section shall be made as if no elections had been made and no accounting method had been adopted. The amount of earnings and profits accumulated for a taxable year of a foreign corporation, as computed under this paragraph, is not necessarily the same amount as the earnings and profits of the taxable year computed under section 316(a)(1) or paragraph (d) of § 1.1248–2. Thus, for example, if a distribution with respect to stock is in excess of the amount of earnings and profits of the taxable year computed under section 316(a)(2), such excess is treated under section 316(a)(2), or paragraph (d) of § 1.1248–2 as made out of any earnings and profits accumulated in prior taxable years, whereas the amount of such excess may create, or increase, a deficit in the earnings and profits accumulated for the taxable year as computed under this paragraph. See subparagraph (3) of this paragraph.

(2) *Special rules.* (i) The earnings and profits of the corporation accumulated:

(*a*) For any taxable year beginning before January 1, 1967, shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b) as gross income derived from sources within the United States, and

(*b*) For any taxable year beginning after December 31, 1966, shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b)(2) as income effectively connected for that year with the conduct by such corporation of a trade or business in the United States, whether derived from sources within or from sources without the United States,

Over any deductions allocable to such item under section 882(c). However, if the sale or exchange of stock in the foreign corporation by the U.S. person occurs before January 1, 1967, the provisions of (*a*) of this subdivision apply with respect to such sale or exchange even though the taxable year begins after December 31, 1966. See section 1248(d)(4). Any item which is required to be excluded from gross income, or which is taxed at a reduced rate, under an applicable treaty obligation of the United States shall not be excluded under this subdivision from earnings and profits accumulated for a taxable year.

(ii) If a foreign corporation adopts a plan of complete liquidation in a taxable year of the corporation beginning after December 31, 1962, and if because of the application of section 337(a) gain or loss would not be recognized by the corporation from the sale or exchange of property if the corporation were a domestic corporation, then the earnings and profits of the corporation accumulated for the taxable year shall be determined without regard to the amount of such gain or loss. See section 1248(d)(2). For the nonapplication of section 337(a) to a liquidation by a collapsible corporation (as defined in section 341) and to certain other liquidations, see section 337(c).

(3) *Adjustment for distributions.* (i) The earnings and profits of a foreign corporation accumulated for a taxable year (computed without regard to this subparagraph) shall be reduced (if necessary below zero so as to create a deficit), or a deficit in such earnings and profits shall be increased, by the amount of the distributions (other than in redemption of stock under section 302(a) or 303) made by the corporation in respect of its stock during such taxable year (*a*) out of such earnings and profits, or (*b*) out of earnings and profits accumulated for prior taxable years beginning after December 31, 1962 (computed under this paragraph). Except for purposes of applying this subparagraph, the application of the preceding sentence shall not affect the amount of earnings and profits accumulated for any such prior taxable year.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, was organized on January 1, 1965, and was a controlled foreign corporation on each day of 1965. The amount of X's earnings and profits accumulated for 1965 (computed under this paragraph without regard to the adjustment for distributions under this subparagraph) is $400,000, of which $100,000 is distributed by X as dividends during 1965. The amount of X's earnings and profits accumulated for 1965 (computed under this paragraph) is $300,000 (that is, $400,000 minus $100,000). The result would be the same even if X was not a controlled foreign corporation on each day of 1965.

Example 2. Assume the same facts as in example (1). Assume further that the amount of X's earnings and profits accumulated for 1966 (computed under this paragraph without regard to the adjustment for distributions under this subparagraph) is $150,000, and that X distributes the amount of $260,000 as dividends during 1966. Since $150,000 of the distribution is from earnings and profits accumulated for 1966 (computed without regard to the adjustment for distributions under this subparagraph), and since $110,000 is from earnings and profits accumulated for 1965, the earnings and profits of X accumulated for 1966 are a deficit of $110,000 (that is, $150,000 minus $260,000). However, the earnings and profits accumulated for 1965 are still $300,000 for purposes of computing in the manner prescribed in paragraph (c) of this section a person's tentative ratable share.

(c) *Tentative ratable share if earnings and profits accumulated for a taxable year not less than zero*—(1) *General rule.* For purposes of paragraph (a)(2)(ii) of this section, in respect of a share (or block) of stock in a foreign corporation, if the amount of the earnings and profits accumulated for a taxable year of the corporation (computed under paragraph (b) of this section), beginning after December 31, 1962, is not less than zero, then the person's tentative ratable share for such taxable year shall be equal to:

(i)(*a*) Such amount (if the computation is made in respect of a block, multiplied by the number of shares in the block), divided by (*b*) the number of shares in the corporation outstanding, or deemed under subparagraph (2) of this paragraph to be outstanding, on each day of such taxable year, multiplied by

(ii) The percentage that (*a*) the number of days in such taxable year of the corporation during the period the person held (or was considered to have held by reason of the application of section 1223) the share (or block) while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(2) *Shares deemed outstanding for a taxable year.* For purposes of this section and §§1.1248–4 through 1.1248–7, if the number of shares of stock in a foreign corporation outstanding on each day of a taxable year of the corporation is not constant, then the number of such shares deemed outstanding on each such day shall be the sum of the fractional amounts in respect of each share outstanding on any day of the taxable year. The fractional amount in respect of a share shall be determined by dividing (i) the number of days in the taxable year during which such share was outstanding (excluding the day the share became outstanding, but including the day the share ceased to be outstanding), by (ii) the total number of days in such taxable year.

(3) *Examples.* The application of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. On each day of 1964, S owns a block consisting of 30 of the 100 shares of the only class of stock outstanding in F Corporation, and on each such day F is a controlled foreign corporation. F uses the calendar year as its taxable year and F's earnings and profits accumulated for 1964 (computed under paragraph (b) of this section) are $10,000. S's tentative ratable share with respect to the block is $3,000, computed as follows:

Earnings and profits accumulated for taxable year	$10,000
Multiplied by:	
Number of shares in block (30), divided by number of shares outstanding (100)	30%
Multiplied by:	
Number of days in 1964 S held block while F was a controlled foreign corporation (365), divided by number of days in 1964 (365)	100%
Tentative ratable share for block	$3,000

Example 2. On December 31, 1964, X Corporation, a controlled foreign corporation which uses the calendar year as its taxable year, had 100 shares of one class of stock outstanding, 15 of which were owned by T. T's 15 shares were redeemed by X on March 14, 1965. On December 31, 1965, in addition to the remaining 85 shares, 10 new shares of stock (which were issued on May 26, 1965) were outstanding. Thus, during 1965, 15 shares were outstanding for 73 days, 10 for 219 days, and 85 for 365 days. The earnings and profits

(computed under paragraph (b) of this section) accumulated for X's taxable year ending on December 31, 1965, are $18,800. T's tentative ratable share with respect to one share of stock is $40, computed as follows:

Earnings and profits accumulated for taxable year		$18,800
Divided by:		
Number of shares deemed outstanding each day of 1965:.		
15 for 73 days (15×73/365)	3	
10 for 219 days (10×219/365)	6	
85 for 365 days (35×365/365)	85	
Total number of shares deemed outstanding each day of 1965		94
Earnings and profits accumulated per share		$200
Multiplied by:		
Number of days in 1965 T held his share while X was a controlled foreign corporation (73), divided by number of days in 1965 (365)		20%
T's tentative ratable share per share of stock		$40

Example 3. Assume the same facts as in example (2) except that X was not a controlled foreign corporation after January 31, 1965. T's tentative ratable share with respect to one share of stock for 1965 is $17, computed as follows:

Earnings and profits accumulated per share, determined in example (2)	$200
Multiplied by:	
Number of days in 1965 T held X stock while X was a controlled foreign corporation (31), divided by number of days in 1965 (365)	8.5%
Tentative ratable share	$17

(4) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraphs (1) and (2) of this paragraph the earnings and profits accumulated for the taxable year of the corporation (computed under paragraph (b) of this section) shall be allocated to each class of stock in accordance with the principles of paragraph (e) (2) and (3) of § 1.951–1, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(d) *Tentative ratable share if deficit in earnings and profits accumulated for taxable year*—(1) *General rule.* For purposes of paragraph (a)(2)(ii) of this section, in respect of a share (or block) of stock in a foreign corporation, if there is a deficit in the earnings and profits accumulated for a taxable year of the corporation (computed under paragraph (b) of this section) beginning after December 31, 1962, the person's tentative ratable share for such taxable year shall be an amount equal to the sum of the partial tentative ratable shares computed under subparagraphs (2) and (3) of this paragraph.

(2) *Operating deficit.* The partial tentative ratable share under this subparagraph is computed in 2 steps. First, compute (under paragraph (b) of this section without regard to the adjustment for distributions under subparagraph (3) thereof) the deficit (if any) in earnings and profits accumulated for such taxable year. Second, compute the partial tentative ratable share in the same manner as the tentative ratable share for such taxable year would be computed under paragraph (c) of this section if such deficit were the amount referred to in paragraph (c)(1)(i)(*a*) of this section.

(3) *Deficit from distributions.* The partial tentative ratable share under this subparagraph is computed in 2 steps. First, compute and treat as a deficit only that portion of the adjustment for distributions under paragraph (b)(3) of this section for such taxable year which is attributable under subparagraph (4) of this paragraph to distributions out of earnings and profits accumulated during prior taxable years of the corporation beginning after December 31, 1962, during the period or periods the corporation was a controlled foreign corporation and the share (or block) of stock was owned by a United States shareholder (as defined in section 951(b) and the regulations thereunder). Second, compute the partial tentative ratable share for such taxable year in the same manner as the tentative ratable share for such taxable year would be computed under paragraph (c) of this section if (i) such deficit were the amount referred to in paragraph (c)(1)(i)(*a*) of this section, and (ii) the corporation were a controlled foreign corporation on each day of such taxable year.

(4) *Order of distributions.* For purposes of applying subparagraph (3) of this paragraph only, the adjustment for distributions under paragraph (b)(3) of

this section for a taxable year of a foreign corporation shall be treated as attributable first to distributions of earnings and profits for the taxable year (computed under paragraph (b) of this section without regard to such adjustment) to the extent thereof, and then to distributions out of the most recent of earnings and profits accumulated during prior taxable years beginning after December 31, 1962 (computed under paragraph (b) of this section). If the foreign corporation was a controlled foreign corporation during a prior taxable year for a period or periods which was only part of such prior taxable year, then for purposes of the preceding sentence (i) such taxable year shall be divided into periods the corporation was or was not a controlled foreign corporation, (ii) distributions of the earnings and profits accumulated during such prior taxable year shall be considered made from the most recent period first, and (iii) the earnings and profits accumulated during such prior taxable year shall be allocated to a period during such year in the same proportion as the number of days in the period bears to the number of days in such year. Except for purposes of applying subparagraph (3) of this paragraph, the application of this subparagraph shall not affect the amount of earnings and profits accumulated for any such prior taxable year (computed under paragraph (b) of this section).

(5) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. On each day of 1965 X Corporation, which uses the calendar year as its taxable year, was a controlled foreign corporation having 100 shares of one class of stock outstanding, a block of 25 of which were owned by T, who acquired them in 1962 and sold them in 1967. The deficit in X's earnings and profits accumulated for 1965 (computed under paragraph (b) of this section without regard to the adjustment for distributions under subparagraph (3) thereof) is $100,000, and thus in respect of the block T's partial tentative ratable share computed under subparagraph (2) of this paragraph is a deficit of $25,000 (that is, $100,000×25/100). During 1965 X does not make any distributions in respect of its stock, and thus in respect of the block T's partial tentative ratable share computed under subparagraph (3) of this paragraph is zero. Accordingly, T's tentative ratable share in respect of the block of X stock for 1965 is a deficit of $25,000. If, however, X was a controlled foreign corporation for only 292 days during 1965, T's tentative ratable share in respect of the block for 1965 would be a deficit of $20,000 (that is, $25,000×292/365).

Example 2. (i) Assume the same facts as in example (1) except that at no time during 1965 is X a controlled foreign corporation and that during 1965 X distributes $80,000 with respect to its stock. Assume further that X was a controlled foreign corporation on each day of 1964, but only for the first 146 days of 1963, and that X's earnings and profits accumulated for prior taxable years computed under paragraph (b) of this section are $70,000 for 1964 and $20,000 for 1963.

(ii) Since X was not a controlled foreign corporation on any day of 1965, in respect of the block T's partial tentative ratable share computed under subparagraph (2) of this paragraph is zero.

(iii) The partial tentative ratable share under subparagraph (3) of this paragraph is computed in the following manner: For 1965 the adjustment for distributions under paragraph (b)(3) of this section is $80,000. Under subparagraph (4) of this paragraph $70,000 of such adjustment is attributable to the distribution of all of the earnings and profits accumulated during 1964, on every day of which X was a controlled foreign corporation, and $10,000 of the adjustment is attributable to the distribution of $10,000 of the earnings and profits accumulated for 1963. The portion of the earnings and profits accumulated by X in 1963 attributable to the first 146 days in 1963 during which X was a controlled foreign corporation is $8,000 (that is, $20,000×146/365), and the portion attributable to the period in 1963 during which X was not a controlled foreign corporation is $12,000 (that is, $20,000×219/365). Under subparagraph (4)(ii) of this paragraph, the distribution in 1965 of $10,000 of earnings and profits accumulated during 1963 is attributable to the more recent period in 1963, that is, the period X was not a controlled foreign corporation. Accordingly, the portion of the adjustment for distributions under paragraph (b)(3) of this section attributable to earnings and profits accumulated during periods X was a controlled foreign corporation is $70,000, and in respect of the block T's partial tentative ratable share under subparagraph (3) of this paragraph is a deficit of $17,500 (that is, $70,000×25/100).

(iv) T's tentative ratable share in respect of the block of X stock for 1965 is a deficit of $17,500 (that is, the sum of the partial tentative ratable share for the block computed under subparagraph (2) of this paragraph, zero, plus the partial tentative ratable share for the block computed under subparagraph (3) of this paragraph, a deficit of $17,500).

(v) Assume that X had 100 shares of one class of stock outstanding on each day of

1964 and 1963. Notwithstanding the distributions in 1965 of earnings and profits accumulated during 1964 and 1963 (computed under paragraph (b) of this section), nevertheless, in respect of the block T's tentative ratable share for 1964 is $17,500 (that is, earnings and profits accumulated during 1964 so computed of $70,000, multiplied by 25 shares/100 shares) and in respect of the block T's tentative ratable share for 1963 is $2,000 (that is, earnings and profits accumulated during 1963 so computed of $20,000, multiplied by 25 shares/100 shares, and multiplied by the percentage that the number of days in 1963 on which X was a controlled foreign corporation bears to the total number of days in 1963, 146/365).

Example 3. Assume the same facts as in example (2) except that X was a controlled foreign corporation on each day of 1965. The tentative ratable share with respect to the block of stock for 1965 is a deficit of $42,500, that is, the sum of the partial tentative ratable share under subparagraph (2) of this paragraph (as determined in example (1)), a deficit of $25,000, plus the partial tentative ratable share under subparagraph (3) of this paragraph (as determined in example (2)), a deficit of $17,500.

(6) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the earnings and profits accumulated for the taxable year of the corporation (computed under paragraph (b) of this section) shall be allocated to each class of stock in accordance with the principles of paragraph (e) (2) and (3) of § 1.951–1, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(e) *Ratable share of earnings and profits accumulated for a taxable year*—(1) *In general.* For purposes of paragraph (a)(2)(iii) of this section, in respect of a share (or block) of stock in a foreign corporation, the person's ratable share of the earnings and profits accumulated for a taxable year beginning after December 31, 1962, shall be an amount equal to the tentative ratable share computed under paragraph (c) or (d) (as the case may be) of this section, adjusted in the manner prescribed in subparagraphs (2) through (6) of this paragraph.

(2) *Amounts included in gross income under section 951.* (i) In respect of a share (or block) of stock in a foreign corporation, a person's tentative ratable share for a taxable year of the corporation (computed under paragraph (c) of this section) shall be reduced (but not below zero) by the excess of (*a*) the amount, if any, included (in respect of such corporation for such taxable year) under section 951 in the gross income of such person or (during the period such share, or block, was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block), over (*b*) the portion of such amount which, in any taxable year of such person or such other person, resulted in an exclusion from the gross income of such person or such other person of an amount under section 959(a)(1) (relating to exclusion from gross income of distributions of previously taxed earnings and profits). See section 1248(d)(1). This subdivision shall apply notwithstanding an election under section 962 by such person to be subject to tax at corporate rates.

(ii) The application of this subparagraph may be illustrated by the following example:

Example: On December 31, 1975, Brown sells one share of stock in X Corporation, a controlled foreign corporation which has never been a less developed country corporation (as defined in section 902(d)). Both Brown and X use the calendar year as the taxable year. In respect of his share, Brown's tentative ratable share for 1971 (computed under paragraph (c) of this section) is $35. In respect of his share, Brown included $4 in his gross income for 1971 under section 951, and the amount of $3, which was distributed to him by X on January 15, 1972, is excluded from Brown's gross income under section 959(a)(1). In respect of the stock, Brown's ratable share for 1971 is $34, determined as follows:

Tentative ratable share	$35
Minus:	
Excess of amount of tentative ratable share included in Brown's gross income under section 951 ($4), over portion thereof which resulted in exclusion under section 959(a)(1) ($3)	1
Ratable share	34

(3) *Amounts included in gross income under section 551.* In respect of a share (or block) of stock in a foreign corporation, a person's tentative ratable share for a taxable year of the corporation (computed under paragraph (c) of this section) shall be reduced (but not below zero) by the amount, if any, included (in respect of such corporation for such taxable year) under section 551 in the

gross income of such person or (during the period such share, or block, was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block).

(4) *Less developed country corporations.* (i) If the foreign corporation was a less developed country corporation as defined in section 902(d) for a taxable year of the corporation, and if the person who sold or exchanged a share (or block) of stock in such corporation satisfies the requirements of paragraph (a) of §1.1248–5 in respect of such stock, then his ratable share for such taxable year shall be zero. See section 1248(d)(3).

(ii) The application of this subparagraph may be illustrated by the following example:

Example: Assume the same facts as in the example in subparagraph (2)(ii) of this paragraph except that X was a less developed country corporation for 1971. Assume further that Brown satisfies the requirements of paragraph (a) of §1.1248–5. Brown's ratable share in respect of the stock for 1971 is zero.

(5) *Qualified shareholder of foreign investment company.* In respect of a share (or block) of stock in a foreign corporation which was a foreign investment company described in section 1246 (b)(1), if the election under section 1247(a) to distribute income currently was in effect for a taxable year of the company, and if the person who sold or exchanged the stock (or another person who actually owned the stock during such taxable year and whose holding of the stock is attributed by reason of the application of section 1223 to the person who sold or exchanged the stock) was a qualified shareholder (as defined in section 1247(c)) for his taxable year in which or with which such taxable year of the company ends, then the ratable share in respect of the share (or block) for such taxable year of the company shall be zero. See section 1248(d)(5). In case gain is recognized under section 1246 in respect of a share (or block), see section 1248(f)(3)(B).

(6) *Adjustment for certain distributions.* If (i) the person who sold or exchanged the share or block (or another person who actually owned the share or block and whose holding of the share or block is attributed by reason of the application of section 1223 to such person) received a distribution during a taxable year of the corporation, and (ii) such distribution was not included in the gross income of such person (or such other person) by reason of the application of section 959(a)(1) to amounts which were included under section 951(a)(1) in the gross income of a United States shareholder whose holding of the share or block is not attributed by reason of the application of section 1223 to such person (or such other person), then the amount of such distribution shall be added to such person's tentative ratable share for such taxable year. Thus, for example, such tentative ratable share may be increased, or a deficit reduced, by the amount of such distribution.

(f) *Earnings and profits of subsidiaries of foreign corporations*—(1) *Application of paragraph.* (i) In respect of a person who sells or exchanges stock in a foreign corporation (referred to as a *first tier* corporation), the provisions of this paragraph shall apply if the following 3 conditions exist:

(*a*) The conditions of paragraph (a)(2) of §1.1248–1 are satisfied by the person in respect of such stock;

(*b*) By reason of his ownership of such stock, on the date of such sale or exchange such person owned, within the meaning of section 958(a)(2), stock in another foreign corporation (referred to as a *lower tier* corporation); and

(*c*) The conditions of paragraph (a)(2) of §1.1248–1 would be satisfied by such person in respect of such stock in the lower tier corporation if such person were deemed to have sold or exchanged such stock in the lower tier corporation on the date he actually sold or exchanged such stock in the first tier corporation.

(ii) If the provisions of this paragraph apply, (*a*) the person's tentative ratable share (or shares) of the earnings and profits accumulated by the lower tier corporation attributable to a taxable year of the first tier corporation shall be computed under subparagraph (2) or (4) of this paragraph, whichever is applicable, and (*b*) such person's ratable share (or shares) for the lower tier corporation attributable to a taxable year of the first tier corporation shall be computed under subparagraph (5) of this paragraph. For the manner of taking into account the ratable share for a lower tier corporation, see paragraph (a)(3) of this section.

(iii) The application of this subparagraph may be illustrated by the following example:

Example: On each day of 1964 and 1965 corporations X and Y are controlled foreign corporations, and each has outstanding 100 shares of one class of stock. On January 15, 1965, T, a United States person, owns one share of stock in X and X directly owns 20 shares of stock in Y. Thus, T owns, within the meaning of section 958(a)(2), stock in Y. On that date, T sells his share in X and satisfies the conditions of paragraph (a)(2) of § 1.1248–1 in respect of his stock in X. Assuming that the conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied by T in respect of the stock he indirectly owns in Y if, on January 15, 1965, he were deemed to have sold such stock in Y, the provisions of this paragraph apply.

(2) *Tentative ratable share (of lower tier corporation attributable to a taxable year of first tier corporation) not less than zero.* If the provisions of this paragraph apply to a sale or exchange by a United States person of a share (or block) of stock in a first tier corporation, and if the amount of earnings and profits accumulated (computed under paragraph (b) of this section) for a taxable year (beginning after December 31, 1962) of the lower tier corporation is not less than zero, then in respect of the share (or block) such person's tentative ratable share of the earnings and profits accumulated for such taxable year of the lower tier corporation attributable to any taxable year (beginning after December 31, 1962) of such first tier corporation shall be an amount equal to:

(i)(*a*) Such amount of earnings and profits accumulated for such taxable year of the lower tier corporation (if the computation is made in respect of a block in the first tier corporation, multiplied by the number of shares in the block), divided by (*b*) the number of shares in the first tier corporation outstanding, or deemed under paragraph (c)(2) of this section to be outstanding, on each day of such taxable year of the first tier corporation, multiplied by

(ii) The percentage that (*a*) the number of days during the period or periods in such taxable year of the first tier corporation on which such person held (or was considered to have held by reason of the application of section 1223) the share (or block) in the first tier corporation while the first tier corporation owned (within the meaning of section 958(a)) stock of such lower tier corporation at times while such lower tier corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year of the first tier corporation, multiplied by

(iii) The percentage that (*a*) the average number of shares in the lower tier corporation which were owned within the meaning of section 958(a) by the first tier corporation during such period or periods (referred to in subdivision (ii)(*a*) of this subparagraph), bears to (*b*) the total number of such shares outstanding, or deemed under the principles of paragraph (c)(2) of this section to be outstanding, during such period or periods, multiplied by

(iv) The percentage that (*a*) the number of days in such taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*b*) the total number of days in such taxable year of the lower tier corporation.

(3) *Examples.* The application of subparagraph (2) of this paragraph may be illustrated by the following examples:

Example 1. In a year subsequent to 1969, Brown, a United States person, sells 5 of his shares of stock in X Corporation in a transaction as to which the provisions of this paragraph apply. Brown had purchased the 5 shares prior to 1969. On each day of 1969 X Corporation actually had 100 shares of one class of stock outstanding. On each such day X Corporation directly owned all of the shares of stock in Y Corporation, and Y Corporation directly owned all of the shares of stock in Z Corporation. Z Corporation on each such day was a controlled foreign corporation. Both X and Z use the calendar year as the taxable year. Z's earnings and profits accumulated for 1969 (computed under paragraph (b) of this section) are $2,000. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $20 per share, computed as follows:

(i) Z's earnings and profits for 1969 ($2,000), divided by the number of shares in X deemed outstanding each day of 1969 (100)	$20

Multiplied by:	
(ii) Since on each day of 1969 Brown (by reason of owning directly his shares in X) owned, within the meaning of section 958(a)(2), stock in Z while Z was a controlled foreign corporation, the percentage determined under subparagraph (2)(ii) of this paragraph equals	100%
Multiplied by:	
(iii) Since on each day of 1969 X owned 100 percent of the stock of Y while Y owned 100 percent of the stock in Z, the percentage determined under subparagraph (2)(iii) of this paragraph equals	100%
Multiplied by:	
(iv) Since X and Z each use the same taxable year, the percentage determined under subparagraph (2)(iv) of this paragraph equals	100%
Total	$20

Example 2. Assume the same facts as in example (1), except that Brown sold his stock in X on October 19, 1969. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $16 per share, computed as follows:

(i) The amount determined in subdivision (i) of example (1)	$20
Multiplied by:	
(ii) The number of days in the period during 1969 Brown (by reason of owning directly his stock in X) owned, within the meaning of section 958(a)(2), his stock in Z while Z was a controlled foreign corporation (292), divided by the number of days in 1969 (365), equals	80%
Multiplied by:	
(iii) The percentage determined in subdivision. (iii) of example (1)	100%
Multiplied by:	
(iv) The percentage determined in subdivision. (iv) of example (1)	100%
Total	$16

Example 3. Assume the same facts as in examples (1) and (2), except that on each day during 1969 Y owned (within the meaning of section 958(a)(2)) 81 of the 100 shares of Z's outstanding stock. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $12.96 per share, computed as follows:

(i) The amount determined in subdivision (i) of example (1)	$20
Multiplied by:	
(ii) The percentage determined in subdivision (ii) of example (2)	80%
Multiplied by:	
(iii) The average number of shares in Z which were owned (within the meaning of section 958(a)) by X during the applicable period (81), divided by the total number of shares in Z during such period (100)	81%
Multiplied by:	
(iv) The percentage determined in subdivision (iv) of example (1)	100%
Total	$12.96

The result would be the same if X owned (within the meaning of section 958(a)(2)) 81 percent of the stock in Y while Y so owned 100 percent of the stock in X, or if X so owned 90 percent of the stock in Y while Y so owned 90 percent of the stock in Z.

Example 4. Assume the same facts as in example (3), except that Z Corporation uses a fiscal year ending June 30 as its taxable year. Assume further that Z's earnings and profits accumulated for its fiscal year ending June 30, 1969, and for its fiscal year ending June 30, 1970, are $3,000 and $2,000, respectively. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $16.17 per share, computed as follows:

	In respect of Z's taxable year ending	
	June 30, 1969	June 30, 1970
(i) Z's earnings and profits, divided by the number of shares in X deemed outstanding on each day of 1969:		
$3,000/100	$30	
$2,000/100	....	$20
Multiplied by:		
(ii) The percentage determined in subdivision (ii) of example (2)	80%	80%
Multiplied by:		
(iii) The percentage determined in subdivision (iii) of example (3)	81%	81%
Multiplied by:		
(iv) Number of days in Z's taxable year which fall within 1969, divided by total number of days in Z's taxable year:		
181/365	49.6%	
184/365	....	50.4%
Totals	$9.64	$6.53
(v) Sum of tentative ratable shares of Z attributable to X's 1969 calendar year:		
For Z's taxable year ending		
June 30, 1969	....	$9.64
June 30, 1970	....	$6.53
Sum	....	$16.17

(4) *Deficit in tentative ratable share of lower tier corporation attributable to a taxable year of first tier corporation.* (i) If there is a deficit in the earnings and profits accumulated for a taxable year of a lower tier corporation beginning after December 31, 1962 (computed under paragraph (b) of this section), the person's tentative ratable share for such taxable year of such lower tier corporation attributable to a taxable

year of a first tier corporation shall not be computed under subparagraph (2) of this paragraph but shall be an amount equal to the sum of the partial tentative ratable shares computed under subdivisions (ii) and (iii) of this subparagraph.

(ii) The partial tentative ratable share under this subdivision is computed in 2 steps. First, compute (under paragraph (b) of this section without regard to the adjustments for distributions under subparagraph (3) thereof) the deficit (if any) in earnings and profits accumulated for such taxable year of such lower tier corporation. Second, compute the partial tentative ratable share in the same manner as such tentative ratable share would be computed under subparagraph (2) of this paragraph if such deficit were the amount referred to in subparagraph (2)(i)(a) of this paragraph.

(iii) The partial tentative ratable share under this subdivision is computed in 2 steps. First, compute and treat as a deficit the portion of the adjustment for distributions under paragraph (b)(3) of this section for such taxable year which is attributable under paragraph (d)(4) of this section to distributions of earnings and profits accumulated during prior taxable years of the lower tier corporation beginning after December 31, 1962, during the period or periods such lower tier corporation was a controlled foreign corporation and the percentage of the stock of such lower tier corporation (which the person owns within the meaning of section 958(a)(2)) was owned within the meaning of section 958(a) by a United States shareholder (as defined in section 951(b) and the regulations thereunder). Second, compute the partial tentative ratable share in the same manner as such tentative ratable share would be computed under subparagraph (2) of this paragraph if (a) such deficit were the amount referred to in subparagraph (2)(i)(a) of this paragraph, and (b) such lower tier corporation were a controlled foreign corporation on each day of such taxable year.

(5) *Ratable share of lower tier corporation attributable to a first tier corporation*. (i) If the provisions of this paragraph apply in respect of a share of stock in a first tier corporation, a person's ratable share of the earnings and profits accumulated by the lower tier corporation attributable to a taxable year of the first tier corporation shall be an amount equal to the tentative ratable share computed under subparagraph (2) or (4) of this paragraph, adjusted in the manner prescribed in this subparagraph.

(ii) If the first tier corporation and the lower tier corporation use the same taxable year, then in respect of a share (or block) of stock in the first tier corporation the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation (computed under subparagraph (2) of this paragraph) shall be reduced (but not below zero) by the excess of (*a*) the amount, if any, included (in respect of such lower tier corporation for its taxable year) under section 951 in the gross income of such person or (during the period such stock was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such stock, over (b) the portion of such amount which, in any taxable year of such person or such other person, resulted in an exclusion from the gross income of such person or such other person of an amount under section 959(a)(1). For an illustration of the principles in the preceding sentence, see the example in paragraph (e)(2)(ii) of this section.

(iii) If the first tier corporation and the lower tier corporation do not use the same taxable year, and if there would be an excess computed under subdivision (ii) of this subparagraph in respect of a taxable year of the lower tier corporation (were the taxable years of such corporations the same), then such person's tentative ratable share of the accumulated earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of the first tier corporation shall be reduced (but not below zero) by an amount which bears the same ratio to (*a*) such excess, as (*b*) the number of days in the taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*c*) the total number of days in the taxable year of the first tier corporation.

(iv) If the first tier corporation and the lower tier corporation use the same taxable year, then in respect of a share (or block) of stock in the first tier corporation the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation (computed under subparagraph (2) of this paragraph) shall be reduced (but not below zero) by the amount, if any, included (in respect of such corporation for such taxable year) under section 551, by reason of the application of section 555(b), in the gross income of such person or (during the period such share (or block) was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block).

(v) If the first tier corporation and the lower tier corporation do not use the same taxable year, and if there would be a reduction in the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation by an amount computed under subdivision (iv) of this subparagraph in respect of a taxable year of the lower tier corporation (were the taxable years of such corporations the same), then such person's tentative ratable share of the accumulated earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of the first tier corporation shall be reduced by an amount which bears the same ratio to (*a*) such amount, as (*b*) the number of days in the taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*c*) the total number of days in the taxable year of the first tier corporation.

(vi) If the lower tier corporation was a less developed country corporation as defined in section 902(d) for a taxable year of the corporation, see paragraph (g) of this section.

(g) *Lower tier corporation a less developed country corporation*—(1) *General.* If the lower tier corporation was a less developed country corporation as defined in section 902(d) for a taxable year of such corporation, and if the person who sold or exchanged a share (or block) of stock in the first tier corporation satisfies on the date of such sale or exchange:

(i) The requirements of paragraph (a)(1) of § 1.1248–5 with respect to such stock, and

(ii) The requirements of paragraph (d)(1) of § 1.1248–5 with respect to any stock of the lower tier corporation which such person, by reason of his direct ownership of such stock in the first tier corporation, owned within the meaning of section 958(a)(2),

Then such person's ratable share (or a deficit in such ratable share) for such taxable year of the lower tier corporation attributable to a taxable year of the first tier corporation (determined without regard to this paragraph) shall be reduced by an amount computed by multiplying such ratable share (so determined without regard to this paragraph) by the percentage computed under either subparagraph (2) or (4) of this paragraph, whichever is applicable.

(2) *Percentage for second tier corporation.* For purposes of subparagraph (1) of this paragraph, if stock of a lower tier corporation (hereinafter referred to as a *second tier* corporation) is owned directly by the first tier corporation on the date of the sale or exchange referred to in such subparagraph (1), the percentage under this subparagraph shall be computed by dividing (i) the number of shares of stock of the second tier corporation which the first tier corporation has owned directly for an uninterrupted 10-year period ending on such date, by (ii) the total number of shares of the stock of such second tier corporation owned directly by such first tier corporation on such date.

(3) *Examples.* The provisions of subparagraph (2) of this paragraph may be illustrated by the following examples:

Example 1. On January 1, 1966, Smith, a United States person, recognizes gain upon the sale of one share of the only class of stock of F Corporation, which he has owned continuously since 1955. He includes a portion of the gain in his gross income as a dividend under section 1248(a). On January 1, 1966, F owns directly 60 shares of the 100 outstanding shares of the only class of stock of G Corporation, which F acquired in 1955 and owned continuously until such sale. F uses a taxable year ending June 30, and G uses the calendar year as the taxable year. For 1964, G was a less developed country corporation, and on each day of 1964 G was a controlled foreign corporation. Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (determined without regard to this paragraph) is $6.00. Since the percentage computed under subparagraph (2) of this paragraph is 100 percent (60 shares divided by 60 shares), Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (after the application of subparagraph (2) of this paragraph) is zero (that is, $6.00 reduced by 100 percent of $6.00).

Example 2. Assume the same facts as in example (1) except that of the 60 shares of G Corporation which F Corporation owned on January 1, 1966, 20 shares were acquired in 1961. The percentage computed under subparagraph (2) of this paragraph is 66⅔ percent (40 shares divided by 60 shares). Accordingly, Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (after the application of subparagraph (2) or this paragraph) is $2.00 (that is, $6.00 reduced by 66⅔ percent of $6.00).

(4) *Percentage for lower tier corporations other than second tier corporation.* For purposes of subparagraph (1) of this paragraph, if stock of a lower tier corporation (other than a second tier corporation) is owned within the meaning of section 958(a)(2) by the first tier corporation on the date of the sale or exchange referred to in such subparagraph (1), the percentage under this subparagraph shall be computed in the following manner:

(i) First, determine the percentage for the second tier corporation in accordance with subparagraph (2) of this paragraph.

(ii) Second, determine a partial percentage for each other lower tier corporation in the same manner as the percentage for the second tier corporation is determined. Thus, for example, the partial percentage for a third tier corporation is determined by dividing (*a*) the number of shares of stock of the third tier corporation which the second tier corporation has owned directly for an uninterrupted 10-year period ending on the date of the sale or exchange referred to in subparagraph (1) of this paragraph, by (*b*) the total number of shares of stock of such third tier corporation owned directly by such second tier corporation on such date.

(iii) Third, the percentage for a third tier corporation is the percentage for the second tier corporation multiplied by the partial percentage for the third tier corporation. The percentage for a fourth tier corporation is the percentage for the third tier corporation (as determined in the preceding sentence) multiplied by the partial percentage for the fourth tier corporation. In a similar manner, the percentage for any other lower tier corporation may be determined.

(5) *Example.* The application of subparagraph (4) of this paragraph may be illustrated by the following example:

Example: On January 1, 1967, Brown, a United States person recognizes gain upon the sale of one share of the only class of stock of W Corporation, which he has owned continuously since 1955. He includes a portion of the gain in his gross income as a dividend under section 1248(a). W is the first tier corporation of a chain of foreign corporations W, X, Y, and Z. W and Z each use the calendar year as the taxable year. For 1964, Z was a less developed country corporation and on each day of 1964 Z was a controlled foreign corporation. Additional facts are set forth in the table below:

Corporation—(1)	Shares directly owned by preceding tier—		Column (2) divided by column (3) (percent)—(4)
	For uninterrupted 10-year period ending Jan. 1, 1967—(2)	On Jan. 1, 1967—(3)	
X	40	60	66⅔
Y	30	40	75
Z	20	30	66⅔

For 1964, the percentage referred to in subparagraph (4) of this paragraph for Z is 33⅓ percent (66⅔%×75%×66⅔%).

(6) *Special rule.* For purposes of applying the provisions of this paragraph, a lower tier corporation may be treated as a second tier corporation with respect to any of its stock which is owned directly by a first tier corporation whereas such lower tier corporation may be treated as a lower tier corporation other than a second tier corporation with respect to other stock in such lower tier corporation which is

owned (within the meaning of section 958(a)(2)) by such first tier corporation. Thus, for example, if corporations X, Y, and Z are foreign corporations, X is a first tier corporation owning directly 100 percent of the stock of Y and 40 percent of the stock of Z, and in addition Y owns directly 60 percent of the stock of Z, then the 40 percent of the Z stock (which X owns directly) is considered to be stock in a second tier corporation and the 60 percent of the Z stock (which Y owns directly and which X is considered to own within the meaning of section 958(a)(2)) is considered to be stock in a third tier corporation.

[T.D. 6779, 29 FR 18133, Dec. 22, 1964, as amended by T.D. 7293, 38 FR 32803, Nov. 28, 1973; T.D. 7545, 43 FR 19652, May 8, 1978]

§ 1.1248–4 Limitation on tax applicable to individuals.

(a) *General rule*—(1) *Limitation on tax*. Under section 1248(b), if during a taxable year an individual sells or exchanges stock in a foreign corporation, then in respect of the stock the increase in the individual's income tax liability for such taxable year which is attributable (under paragraph (b) of this section) to the amount included in his gross income as a dividend under section 1248(a) shall not be greater than an amount equal to the sum of:

(i) The excess, computed under paragraph (c) of this section in respect of the stock of the United States taxes which would have been paid by the corporation over the taxes (including United States taxes) actually paid by the corporation, plus.

(ii) An amount equal to the increase in the individual's income tax liability which would be attributable to the inclusion in his gross income for such taxable year, as long-term capital gain, of an amount equal to the excess of (*a*) the amount included in the individual's gross income as a dividend under section 1248(a) in respect of such stock, over (*b*) the excess referred to in subdivision (i) of this subparagraph.

(2) *Share or block*. In general, the limitation on tax attributable (under paragraph (b) of this section) to the amount included in an individual's gross income as a dividend under section 1248(a) shall be determined separately for each share of stock sold or exchanged. However, such determination may be made in respect of a block of stock if earnings and profits attributable to the block are computed under § 1.1248–2 or 1.1248–3. See paragraph (b) of § 1.1248–2 and paragraph (a)(5) of § 1.1248–3.

3) *Application of limitation*. The provisions of subparagraph (1) of this paragraph shall not apply unless the individual establishes:

(i) In the manner prescribed in § 1.1248–7, the amount of the earnings and profits of the corporation attributable under paragraph (a)(1) of § 1.1248–2 or under paragraph (a)(1) of § 1.1248–3, whichever is applicable, to the stock, and

(ii) The amount equal to the sum described in subparagraph (1) of this paragraph, computed in accordance with the provisions of this section.

(4) *Example*. The provisions of this paragraph may be illustrated by the following example:

Example: On December 31, 1966, Smith, a United States person, sells a share of stock of X Corporation which he has owned continuously since December 31, 1965, and includes $100 of the gain on the sale in his gross income as a dividend under section 1248(a). Both X and Smith use the calendar year as the taxable year. The increase in Smith's income tax liability for 1966 which is attributable (under paragraph (b) of this section) to the inclusion of the $100 in his gross income as a dividend is $70. X was a controlled foreign corporation on each day of 1966. The excess computed under paragraph (c) of this section in respect of the share, of the United States taxes which X would have paid over the taxes (including United States taxes) actually paid by X is $49. Under section 1248(b), the limitation on the tax attributable to the $100 included by Smith in his gross income as a dividend under section 1248(a) is $61.75, computed as follows:

(i) Excess, computed under paragraph (c) of this section, of United States taxes which X Corporation would have paid in 1966 over the taxes actually paid by X in 1966	....	$49.00
(ii) The amount determined under subparagraph (1)(ii) of this paragraph:		
The amount Smith included in his gross income as a dividend under section 1248(a)	$100.00	
Less the excess referred to in subdivision (i) of this example	49.00	
Difference	51.00	

Increase in Smith's tax liability attributable to including $51 in his gross income as long-term capital gain (25 percent of $51)		12.75
(iii) Limitation on tax		61.75

(b) *Tax attributable to amount treated as dividend*—(1) *General.* For purposes of paragraph (a)(1) of this section, in respect of a share (or block) of stock in a foreign corporation sold or exchanged by an individual during a taxable year, the tax attributable to the amount included in his gross income as a dividend under section 1248(a) shall be the amount which bears the same ratio to (i) the excess of (*a*) his income tax liability for the taxable year determined without regard to section 1248(b) over (*b*) such tax liability determined as if the portion of the total gain recognized during the taxable year which is treated as a dividend under section 1248(a) had not been recognized, as (ii) the amount included as a dividend under section 1248(a) in respect of the share (or block), bears to (iii) the total amount included as a dividend under section 1248(a) in the individual's gross income for such taxable year.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. (i) During 1963, Brown, an unmarried United States person, sells a block of stock in a controlled foreign corporation. On the sale, he recognizes $22,000 gain, of which $18,000 is treated as a dividend under section 1248(a) and $4,000 as long-term capital gain. Brown computes his income tax liability for his taxable year ending December 31, 1963, under section 1201 (relating to alternative tax) in accordance with the additional facts assumed in the following table:

	Computation of income tax liability without regard to section 1248(b)	Computation of income tax liability as if the gain treated as a divided under section 1248(a) had not been recognized
Income from salary	$300,000	$300,000
Long-term capital gain resulting from sale of stock, less deduction for capital gains under section 1202 ($4,000 less $2,000)	2,000	2,000
Amount treated as a dividend under section 1248(a)	18,000	0
Adjusted gross income	320,000	302,000
Charitable contribution of $100,000 to church (limited under section 170(b) to 30 percent of adjusted gross income)	(96,000)	(90,600)
Other itemized deductions and personal exemption	(7,700)	(7,700)
Taxable income	216,300	203,700
Less 50 percent of $4,000	2,000	2,000
Amount subject to partial tax under section 1201(b)(1)	214,300	201,700
Partial tax	169,833	158,367
25 percent of $4,000	1,000	1,000
Tax liability	170,833	159,367

(ii) The tax attributable to the $18,000 treated as a dividend under section 1248(a) is $11,466 ($170,833 minus $159,367).

Example 2. Assume the same facts as in example (1) except that the $18,000 treated as a dividend under section 1248(a) is attributable to the sale of a block of stock in X Corporation and a block of stock in Y Corporation. Assume further that $10,000 of the gain on the block of X stock was treated as a dividend and that $8,000 of the gain on the block of Y stock was treated as a dividend. Thus, the tax attributable to the amount treated as a dividend in respect of the block of X stock is $6,370 ($10,000/$18,000 of $11,466) and the amount in respect of the block of Y stock is $5,096 ($8,000/$18,000 of $11,466). The result would be the same if both blocks of stock were blocks of stock in the same corporation.

(c) *Excess (of United States taxes which would have been paid over taxes actually paid) attributable to a share (or block)*—(1) *General.* For purposes of paragraph (a)(1)(i) of this section:

(i) The term *taxes* means income, war profits, or excess profits taxes, and

(ii) The excess (and the portion of such excess attributable to an individual's share or block of stock in a foreign corporation) of the United States taxes which would have been paid by the corporation over the taxes (including United States taxes) actually paid by the corporation, for the period or periods the stock was held (or was considered to be held by reason of the application of section 1223) by the individual in taxable years of the corporation beginning after December 31, 1962, while the corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* For each taxable year of the corporation beginning after December 31, 1962, in respect of the individual's share (or block) of such stock (i) the taxable income of the corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) the excess (and the portion of such excess attributable to the stock of the United States taxes which would have been paid by the corporation on such taxable income over the taxes (including United States taxes) actually paid by the corporation shall be computed in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If during such taxable year the corporation is a first tier corporation to which paragraph (f) of this section applies, (i) the excess (and the portion of such excess attributable to the individual's share, or block, of stock in the first tier corporation) of the United States taxes which would have been paid by any lower tier corporation over the taxes (including United States taxes) actually paid by such lower tier corporation shall be computed under paragraph (f) of this section, and (ii) such portion shall be added to the portion of the excess attributable to the individual's share (or block) of such stock as determined in step 1 for such taxable year.

(4) *Step 3.* The excess, in respect of the individual's share (or block), of the United States taxes which would have been paid by the corporation over the taxes actually paid by the corporation shall be the sum of the portions computed for each such taxable year in the manner prescribed in steps 1 and 2.

(d) *Taxable income.* For purposes of paragraph (c)(2)(i) of this section, taxable income shall be computed in respect of an individual's share (or block) in accordance with the following rules:

(1) *Application of principles of §1.952–2.* Except as otherwise provided in this paragraph, the principles of paragraphs (a)(1), (b)(1), and (c) of §1.952–2 (other than subparagraphs (2)(iii)(*b*), (2)(v), (5)(i), and (6) of such paragraph (c)) shall apply.

(2) *Effect of elections.* In respect of a taxable year of a foreign corporation, no effect shall be given to an election or an adoption of accounting method unless for such taxable year effect is given to such election or adoption of accounting method under paragraph (d)(1) of §1.1248–2 or paragraph (b)(1) of §1.1248–3, whichever is applicable.

(3) The deductions for certain dividends received provided in sections 243, 244, and 245 shall not be allowed.

(4) *Deduction for taxes.* In computing the amount of the deduction allowed under section 164, there shall be excluded income, war profits, or excess profits taxes paid or accrued which are imposed by the authority of any foreign country or possession of the United States.

(5) *Capital loss carryover.* In determining the amount of a net capital loss to be carried forward under section 1212 to the taxable year:

(i) No net capital loss shall be carried forward from a taxable year beginning before January 1, 1963.

(ii) The portion of a net capital loss or a capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for a taxable year beginning after December 31, 1962, which shall be taken into account shall be the amount of such loss or gain (as the case may be), multiplied by the percentage which (*a*) the number of days in such taxable year during which the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock sold or exchanged while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X is a foreign corporation which was created on January 1, 1963, and which uses the calendar year as its taxable year. X was a controlled foreign corporation on each day of the period March 15, 1963, through December 31, 1965, but was not a controlled foreign corporation on any day during the period January 1, 1963, through

March 14, 1963. On December 31, 1965, Smith, a United States person, sells a share of X stock which he has owned continuously since January 1, 1963. A portion of the gain recognized on the sale is includible in Smith's gross income as a dividend under section 1248(a). X had a net capital loss (determined without regard to subchapter N, chapter 1 of the Code) of $200 for 1963. Since, however, X was a controlled foreign corporation for only 292 days in 1963, for purposes of determining the net capital loss carryover to 1964 the portion of the net capital loss of $200 for 1963 which Smith takes into account under subdivision (ii) of this subparagraph is $160 (292/365 of $200), and, accordingly, the amount of the net capital loss carryover to 1964 is $160.

Example 2. Assume the same facts as in example (1), except that X was not a controlled foreign corporation on any day of the period May 26, 1964, through June 30, 1965. Assume further that X had a net capital gain (capital gain net income for taxable years beginning after December 31, 1976) (determined without regard to subchapter N, chapter 1, of the Code) of $160 for 1964. In computing X's taxable income for 1964 under this paragraph, Smith applies the net capital loss carryover of $160 from 1963 to reduce the net capital gain of $160 for 1964 to zero. Since, however, X was a controlled foreign corporation for only 146 days in 1964, for purposes of computing the portion of the 1963 capital loss of $160 which is a net capital loss carryover to 1965, the portion of the 1964 capital gain which Smith takes into account under subdivision (ii) of this subparagraph is $63.83 (146⁄366 of $160). Thus, the net capital loss carryover to 1965 is $96.17 ($160 minus $63.83).

(6) *Net operating loss deduction.* (i) The individual shall reduce the taxable income (computed under subparagraphs (1) through (5) of this paragraph) of the corporation for the taxable year by the amount of the net operating loss deduction of the corporation computed under section 172, as modified in the manner prescribed in this subparagraph.

(ii) The rules of subparagraphs (1) through (5) of this paragraph shall apply for purposes of determining the excess referred to in section 172(c) and the taxable income referred to in section 172(b)(2).

(iii) A net operating loss shall not be carried forward from, or carried back to, a taxable year beginning before January 1, 1963.

(iv) The portion of a net operating loss incurred, or of taxable income earned, in a taxable year beginning after December 31, 1962, which shall be taken into account under section 172(b)(2) shall be the amount of such loss or income (as the case may be), multiplied by the percentage which (*a*) the number of days in such taxable year during which the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock sold or exchanged while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(v) For illustrations of the principles of this subparagraph, see the examples relating to net capital loss carryovers in subparagraph (5)(iii) of this paragraph.

(7) *Adjustment for amount previously included in gross income of United States shareholders.* In respect of the individual's share (or block) of stock sold or exchanged, the taxable income of the corporation for the taxable year (determined without regard to this subparagraph and subparagraph (8) of this paragraph) shall be reduced (but not below zero) by an amount equal to the sum of the amounts included under section 951 in the gross income of United States shareholders (as defined in section 951(b)) of the corporation for the taxable year.

(8) *Adjustment for distributions.* In respect of the individual's share (or block) of stock sold or exchanged, the taxable income of the corporation for the taxable year (determined without regard to this subparagraph) shall be reduced (but not below zero) by the amount of the distributions (other than in redemption of stock under section 302(a) or 303) made by the corporation out of earnings and profits of such taxable year (within the meaning of section 316(a)(2)). For purposes of the preceding sentence, distributions shall be taken into account only to the extent not excluded from the gross income of the United States shareholders of the corporation under section 959.

(e) *Excess attributable to a share (or block) of stock*—(1) *Excess of United States taxes which would have been paid over taxes actually paid.* For purposes of paragraph (c)(2)(ii) of this section, in respect of a taxable year of a foreign corporation, the portion of the excess under this subparagraph which is attributable to an individual's share (or block) of such stock shall be an amount equal to:

(i) The excess (if any) of (*a*) the United States taxes which would have been paid by the corporation on its taxable income (computed under paragraph (d) of this section) for the taxable year had it been taxed as a domestic corporation under chapter 1 of the Code (but without regard to subchapters F, G, H, L, M, N, S, and T thereof) for such taxable year, over (*b*) the income, war profits, or excess profits taxes actually paid by the corporation during such taxable year (including such taxes paid to the United States),

(ii) Multiplied by the percentage that (*a*) the number of days in such taxable year of the corporation during the period or periods the share (or block) was held (or was considered as held by reason of the application of section 1223) by the individual while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year,

(iii) If the computation is made in respect of a block, multiplied by the number of shares in the block, and

(iv) Divided by the number of shares in the corporation outstanding, or deemed under paragraph (c)(2) of § 1.1248–3 to be outstanding, on each day of such taxable year.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example: (i) Jones, a United States person, owns on each day of 1963 10 shares of the 100 shares of the only class of outstanding stock of X corporation. He sells one of such shares on December 31, 1963. X corporation is a controlled foreign corporation on each day of 1963 and Jones and X each use the calendar year as the taxable year. For 1963, the excess of the United States taxes which would have been paid by X had it been taxable as a domestic corporation over the taxes (including United States taxes) actually paid by X is $23,500, computed as follows:

Amount subject to partial tax under section 1201(a)(1), as computed by Jones:		
Taxable income		$300,000
Less excess of net long-term capital gain over net short-term capital loss		100,000
Amount subject to partial tax		200,000
Excess determined under subparagraph (1)(i) of this paragraph:		
30 percent×$25,000	$7,500	
52 percent×$175,000	91,000	
Partial tax		98,500
25 percent×$100,000		25,000
United States taxes X would have paid (alternative tax computed under section 1201(a))		123,500
Less income taxes X actually paid to:		
United States	$10,000	
Foreign countries	90,000	
Total		$100,000
Excess		23,500
Multiplied by:		
Percentage determined under subparagraph (1)(ii) of this paragraph:		
Since on each day of 1963, Jones held the share of X stock while X was a controlled foreign corporation, the percentage equals		100%
Total		$23,500

(ii) The portion of the excess determined in subdivision (i) of this example which is attributable to the share held by Jones is $235, that is, the amount of such excess ($23,500), divided by the number of shares of X deemed to be outstanding on each day of 1963 (100).

(3) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the excess (if any) which would be determined under subparagraph (1)(i) of this paragraph shall be allocated to each class of stock in accordance with the principles of paragraph (e) (2) and (3) of § 1.951–1, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(f) *Subsidiaries of foreign corporations*—(1) *Excess for lower tier corporation attributable to taxable year of first tier corporation.* For purposes of paragraph (c)(3) of this section, if the provisions of paragraph (a)(3) of § 1.1248–2 or paragraph (f) of § 1.1248–3 apply in the case of the sale or exchange by an individual of a share (or block) of stock in a first tier corporation, then in respect of a taxable year of a lower tier corporation (beginning after December 31, 1962) which includes at least one day which falls within a taxable year of the first tier corporation (beginning after December 31, 1962), the portion of the excess under this subparagraph attributable to the share shall be an amount equal to:

(i) The excess (if any) of (*a*) the United States taxes which would have been paid by the lower tier corporation on its taxable income (computed under paragraph (g) of this section) for such taxable year of the lower tier corporation had it been taxed as a domestic corporatin under chapter 1 of the Code (but without regard to subchapters F, G, H, L, M, N, and T thereof) for such taxable year of the lower tier corporation, over (*b*) the income, war profits, or excess profits taxes actually paid by the lower tier corporation during such taxable year (including such taxes paid to the United States),

(ii) Multiplied by each of the percentages described under paragraph (f)(2)(ii), (iii), and (iv) of § 1.1248–3 in respect of such taxable year of the first tier corporation,

(iii) If the computation is made in respect of a block of stock, multiplied by the number of shares in the block, and

(iv) Divided by the number of shares in the first tier corporation outstanding, or deemed under paragraph (c)(2) of § 1.1248–3 to be outstanding, on each day of such taxable year of the first tier corporation.

(2) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the principles of paragraph (e)(3) of this section shall apply.

(g) *Taxable income of lower tier corporations*—(1) *General.* For purposes of paragraph (f)(1)(i) of this section, in respect of the individual's share (or block) the taxable income of a lower tier corporation shall be computed in the manner provided in paragraph (d) of this section, except as provided in this paragraph.

(2) *Capital loss carryover.* For purposes of subparagraph (1) of this paragraph, the provisions of paragraph (d)(5)(ii) of this section shall not apply. In determining the amount of a net capital loss to be carried forward under section 1212 to the taxable year of a lower tier corporation, the portion of a net capital loss or a capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for a taxable year of the lower tier corporation beginning after December 31, 1962, which shall be taken into account shall be the amount of such loss or gain (as the case may be), multiplied by the percentage which (i) the number of days in such taxable year during the period or periods the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock in the first tier corporation sold or exchanged while the first tier corporation owned (within the meaning of section 958 (a)) stock in the lower tier corporation while the lower tier corporation was a controlled foreign corporation, bears to (ii) the total number of days in such taxable year.

(3) *Net operating loss deduction.* For purposes of subparagraph (1) of this paragraph, the provisions of paragraph (d)(6)(iv) of this section shall not apply. In determining the amount of the net operating loss deduction for a taxable year of a lower tier corporation, the portion of a net operating loss incurred, or of taxable income earned, in a taxable year of the lower tier corporation beginning after December 31, 1962, which shall be taken into account under section 172(b)(2) shall be the amount of such loss or income (as the case may be) multiplied by the percentage described in subparagraph (2) of this paragraph for such taxable year.

[T.D. 6779, 29 FR 18139, Dec. 22, 1964, as amended by T.D. 7545, 43 FR 19653, May 8, 1978; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.1248–5 Stock ownership requirements for less developed country corporations.

(a) *General rule*—(1) *Requirements.* For purposes of paragraph (e)(4) of § 1.1248–3, a United States person shall be considered as satisfying the requirements of this paragraph with respect to a share (or block) of stock of a foreign corporation if on the date he sells or exchanges such share (or block):

(i) The 10-year stock ownership requirement of paragraph (b) of this section is met with respect to such share (or block), and

(ii) In the case of a United States person which is a domestic corporation, the requirement of paragraph (c) of this section, if applicable, is met.

(2) *Ownership of stock.* For purposes of this section:

(i) The rules for determining ownership of stock prescribed by section 958 (a) and (b) shall apply.

(ii) Stock owned by a United States person who is an individual, estate, or trust which was acquired by reason of the death of the predecessor in interest of such United States person shall be considered as owned by such United States persons during the period such stock was owned by such predecessor in interest, and during the period such stock was owned by any other predecessor in interest if between such United States person and such other predecessor in interest there was no transfer other than by reason of the death of an individual.

(b) *10-year stock ownership requirement*—(1) *General.* A United States person meets the 10-year stock ownership requirement with respect to a share (or block) of stock in a foreign corporation which he sells or exchanges only if the share (or block) was owned (under the rules of paragraph (a)(2) of this section) by such person for a continuous period of at least 10 years ending on the date of the sale or exchange. See the first sentence of section 1248(d)(3). Thus, for example, if Jones, a United States person, sells a share of stock in a foreign corporation on January 1, 1965, the 10-year stock ownership requirement is met with respect to a share only if the share was owned (under the rules of paragraph (a)(2) of this section) by Jones continuously from January 1, 1955, to January 1, 1965. If a foreign corporation has not been in existence for at least 10 years on the date of the sale or exchange of the share, the 10-year stock ownership requirement cannot be met.

(2) *Special rule.* For purposes of this paragraph, a United States person shall be considered to have owned stock during the period he was considered to have held the stock by reason of the application of section 1223.

(c) *Disqualification of domestic corporation as a result of changes in ownership of its stock*—(1) *General.* (i) For purposes of paragraph (a)(1)(ii) of this section, the requirement of this paragraph must be met only if, on at least one day during the 10-year period ending on the date of the sale or exchange by a domestic corporation of a share of stock in a foreign corporation, one or more noncorporate United States shareholders (as defined in subdivision (iii) of this subparagraph) own more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the domestic corporation.

(ii) The requirement of this paragraph is that if one or more persons are noncorporate United States shareholders on the first such day (referred to in subdivision (i) of this subparagraph), such person or persons continue after such first day, at all times during the remainder of such 10-year period, to own in the aggregate more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the domestic corporation. For purposes of determining whether a domestic corporation meets the requirement of this paragraph, the stock owned by a United States person who is a noncorporate United States shareholder of a domestic corporation on such first day shall not be counted at any time after he ceases during such 10-year period to be a noncorporate United States shareholder of such corporation.

(iii) For purposes of this paragraph, the term *noncorporate United States shareholder* means, with respect to a domestic corporation, a United States person who is an individual, estate, or trust and who owns 10 percent or more of the total combined voting power of all classes of stock of such domestic corporation.

(iv) For purposes of this paragraph, the percentage of the total combined voting power of stock of a foreign corporation owned by a United States person shall be determined in accordance with the principles of section 951(b) and the regulations thereunder.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. During the entire period beginning December 31, 1954, and ending December 31, 1964, domestic corporation N owns all the stock of controlled foreign corporation X, a less developed country corporation. On December 31, 1964, N recognizes gain upon the sale of all its X stock. A, B, and C, who are unrelated individuals, were the only United States persons owning, or considered as owning, 10 percent or more of the total combined voting power of all classes of stock entitled to vote of N at any time during the 10-year period December 31, 1954, through December 31, 1964. The percentages of the total combined voting power in N, which A, B, and C owned during such 10-year period, are as follows:

Owner	Dec. 31, 1954–Apr. 1, 1957 (*Percent*)	Apr. 2, 1957–Oct. 1, 1959 (*Percent*)	Oct. 2, 1959–Dec. 31, 1964 (*Percent*)
A	20	20	20
B	9	30	30
C	30	15	9

Domestic corporation N does not meet the requirement of this paragraph with respect to the stock of controlled foreign corporation X for the following reasons:

(i) April 2, 1957, is the first day (during the 10-year period ending on December 31, 1964, the date N sells the X stock) on which noncorporate United States shareholders of N own more than 50 percent of the total combined voting power in N, and thus the requirement of this paragraph must be met. See subparagraph (1)(i) of this paragraph. Although A, B, and C did own, in the aggregate, more than 50 percent of such voting power before April 2, 1957, the voting power owned by B is not counted because B was not a noncorporate United States shareholder of N before such date.

(ii) Although C is a noncorporate United States shareholder on April 2, 1957, C ceases to own 10 percent or more of the total combined voting power in N on October 2, 1959. Thus, after October 1, 1959, the N stock which C owns is not counted for purposes of determining whether the more-than-50-percent stock ownership test is met. See subparagraph (1)(ii) of this paragraph. Accordingly, after October 1, 1959, the requirement of this paragraph is not met.

Example 2. Assume the same facts as in example (1), except that B's wife owns directly 5 percent of the total combined voting power in N from December 31, 1954, to December 31, 1964. On the basis of the assumed facts, N meets the requirement of this paragraph with respect to the stock of controlled foreign corporation X for the following reasons:

(i) December 31, 1954, is the first day (of the 10-year period ending on the date N sells the X stock) on which noncorporate United States shareholders of N own more than 50 percent of the total combined voting power in N. B is a noncorporate United States shareholder on such date because he owns, and is considered as owning, 14 percent of the total combined voting power in N (9 percent directly, and, under section 958(b), 5 percent constructively). Thus, on December 31, 1954, noncorporate United States shareholders A, B, and C own, in the aggregate, more than 50 percent of the total combined voting power in N.

(ii) A, B, and C, the noncorporate United States shareholders of N on December 31, 1954, own, and are considered as owning, more than 50 percent of the total voting power of N from December 31, 1954, to October 1, 1959. Since beginning on October 2, 1959, A owns 20 percent and B owns, and is considered as owning, 35 percent of the total combined voting power in N, A and B owns, and are considered as owning, more than 50 percent of the total combined voting power in N from October 2, 1959, to December 31, 1964. Therefore, the requirement of this paragraph is met.

(d) *Application of section to lower tier corporation*—(1) *General.* For purposes of paragraph (g)(1)(ii) of § 1.1248–3, a United States person satisfies the requirements of this subparagraph in respect of stock of a lower tier corporation which such person, by reason of his direct ownership of the share (or block) of the first tier corporation sold or exchanged, owned within the meaning of section 958(a)(2) on the date he sold or exchanged such share (or block), if on such date:

(i) The 10-year stock ownership requirement of paragraph (b) of this section is met by such person with respect to any stock in the lower tier corporation which such person so owned, and

(ii) In the case of a United States person which is a domestic corporation, the requirement of paragraph (c) of this section, if applicable, is met.

(2) *Special rule.* For purposes of this paragraph, in applying paragraphs (b) and (c) of this section, the sale or exchange of a share (or block) of stock in a first tier corporation by a United States person shall be deemed to be the sale or exchange of any stock in a lower tier corporation which the person, by reason of his direct ownership of such share (or block) of the first tier corporation, owned within the meaning of section 958(a)(2) on the date he actually sold or exchanged such share (or block) in the first tier corporation.

[T.D. 6779, 29 FR 18142, Dec. 22, 1964]

§ 1.1248–6 Sale or exchange of stock in certain domestic corporations.

(a) *General rule.* If a United States person recognizes gain upon the sale or exchange of a share (or block) of stock of a domestic corporation which was formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations, and if the conditions of paragraph (a)(2) of §1.1248–1 would be met by such person in respect of the share (or block) if the domestic corporation were a foreign corporation, then section 1248 shall apply in respect of such gain in accordance with the rules provided in paragraph (b) of this section.

(b) *Application.* (1) The gain referred to in paragraph (a) of this section shall be included in the gross income of the United States person as a dividend under section 1248(a) to the extent of the earnings and profits attributable under §1.1248–2 or §1.1248–3, whichever is applicable, to the share (or block), computed, however, in accordance with the following rules:

(i) The domestic corporation shall be treated as if it were a first tier foreign corporation;

(ii) If, after the application of subdivision (i) of this subparagraph, the provisions of paragraph (a)(3) of §1.1248–2 or paragraph (f) of §1.1248–3 (as the case may be) would apply in respect of a foreign corporation the stock of which is owned (within the meaning of section 958(a)) by the domestic corporation treated as the first tier corporation, such foreign corporation shall be considered a lower tier corporation;

(iii) Except to the extent provided in subdivision (iv) of this subparagraph, the earnings and profits of the domestic corporation treated as the first tier corporation accumulated for a taxable year, as computed under paragraph (d) of §1.1248–2 or paragraph (b) of §1.1248–3 (as the case may be), shall be considered to be zero; and

(iv) If, during a taxable year, a domestic corporation treated as the first tier corporation realizes gain upon the sale or exchange of stock in a foreign corporation, and solely by reason of the application of section 337 (relating to certain liquidations) the gain was not recognized, then the earnings and profits of such domestic corporation accumulated for the taxable year, as computed under paragraph (d) of §1.1248–2 or paragraph (b) of §1.1248–3 (as the case may be), shall be considered to be an amount equal to the portion of such gain realized during the taxable year which, if section 337 had not applied, would have been treated as a dividend under section 1248(a).

(2) If the person selling or exchanging the stock in the domestic corporation is an individual, the limitation on tax attributable to the amount included in his gross income as a dividend under subparagraph (1) of this paragraph shall be determined, in accordance with the principles of paragraph (f) of §1.1248–4, by treating the domestic corporation as a first tier corporation.

(3)(i) If the earnings and profits of the foreign corporation or corporations (or of the domestic corporation treated as a first tier corporation) to be taken into account under subparagraph (1) of this paragraph are not established in the manner provided in paragraph (a)(1) of §1.1248–7, all of the gain from the sale or exchange of the share (or block) of the domestic corporation shall be treated as a dividend.

(ii) To the extent that the person does not establish, in the manner provided in paragraph (c) of §1.1248–7, the foreign taxes paid by such foreign corporation or corporations to be taken into account for purposes of computing the limitation on tax attributable to a share, such foreign taxes shall not be taken into account for purposes of such computation.

(c) *Corporation formed or availed of principally for holding stock of foreign corporations.* Whether or not a domestic corporation is formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations shall be determined on the basis of all the facts and circumstances of each particular case.

[T.D. 6779, 29 FR 18143, Dec. 22, 1964]

§1.1248–7 Taxpayer to establish earnings and profits and foreign taxes.

(a) *In general.* (1) If a taxpayer sells or exchanges stock in a foreign corporation which was a controlled foreign corporation and the Commissioner determines that the taxpayer has not established the amount of the earnings and profits of the corporation attributable to the stock under §1.1248–2 or §1.1248–3, whichever is applicable, all the gain from such sale or exchange shall be treated as a dividend under section 1248(a). See section 1248(g). A taxpayer shall be considered to have established such amount if:

(i) He attaches to his income tax return, filed on or before the last day prescribed by law (including extensions thereof) for his taxable year in which he sold or exchanged the stock, the schedule prescribed by paragraph (b) of this section or, if such last day is before April 1, 1965, he files such schedule before such date with the district director with whom such return was filed, and

(ii) He establishes in the manner prescribed by paragraph (d) of this section the correctness of each amount shown on such schedule.

(2) Notwithstanding an omission of information from, or an error with respect to an amount shown on, the schedule referred to in subparagraph (1)(i) of this paragraph, a taxpayer shall be considered to have complied with such subparagraph (1)(i) if:

(i) He establishes that such omission or error was inadvertent, or due to reasonable cause and not due to willful neglect, and that he has substantially complied with the requirements of this section, and

(ii) The taxpayer corrects such omission or error at the time when he complies with paragraph (d) of this section.

(3) For the requirement to establish the amount of foreign taxes to be taken into account for purposes of section 1248(b), see paragraph (c) of this section.

(b) *Schedule attached to return.* (1) The taxpayer shall attach to his income tax return for his taxable year in which he sold or exchanged the stock, a schedule showing his name, address, and identifying number. Except to the extent provided in paragraph (e) of this section, the schedule shall also show the amount of the earnings and profits attributable under paragraph (a) of §1.1248–2 or paragraph (a) of §1.1248–3 (as the case may be) to the stock, and, in order to support the computation of such amount, any additional information required by subparagraphs (2), (3), (4), and (5) of this paragraph.

(2) The schedule shall also show for the first tier corporation, and for each lower tier corporation as to which information is required under subparagraph (4) of this paragraph, (i) the name of the corporation, (ii) the country under whose laws the corporation is created or organized, and (iii) the last day of the taxable year which the corporation regularly uses in computing its income.

(3) If the amount of earnings and profits attributable to a block of stock sold or exchanged are computed under §1.1248–2, the schedule shall also show:

(i) For each taxable year of the corporation, beginning after December 31, 1962, during the period the taxpayer held (or was considered to have held by reason of the application of section 1223) the block, (a) the earnings and profits accumulated for each such taxable year computed under paragraph (d) of §1.1248–2, and (b) the sum thereof computed under paragraph (e) (1)(i) and (2) of §1.1248–2,

(ii) The number of shares in the block and the total number of shares of the corporation outstanding during such period,

(iii) If during the period the person held (or is considered to have held by reason of the application of section 1223) the block any amount was included under section 951 in the gross income of such person (or another person) in respect of the block, the computation of the excess referred to in paragraph (e)(3)(ii) of §1.1248–2, and

(iv) If the amount of earnings and profits of a lower tier corporation attributable to the block are computed under paragraph (a)(3) of §1.1248–2, (a) the number of shares in the lower tier corporation which the taxpayer owns within the meaning of section 958(a)(2)(b) the total number of shares of such lower tier corporation outstanding during such period, and (c) in respect of such lower tier corporation, the information prescribed in subdivisions (i) and (iii) of this subparagraph.

(4) If the amount of earnings and profits attributable to a share (or block) sold or exchanged are computed under §1.1248–3, the schedule shall also show for each taxable year of the corporation beginning after December 31, 1962, any day of which falls in a period or periods the taxpayer held (or was considered to have held by reason of the application of section 1223) the

stock while the corporation was a controlled foreign corporation:

(i) The number of days in such period or periods, but only if such number is less than the total number of days in such taxable year,

(ii) The earnings and profits accumulated for the taxable year computed under paragraph (b) of §1.1248–3,

(iii) The number of shares in the corporation outstanding, or deemed under paragraph (c)(2) of §1.1248–3 to be outstanding, on each day of the taxable year,

(iv) The taxpayer's tentative ratable share computed under paragraph (c) or (d) (as the case may be) of §1.1248–3,

(v) The amount of, and a short description of each adjustment to, the tentative ratable share under paragraph (e) of §1.1248–3, and

(vi) The amount of the ratable share referred to in paragraph (e)(1) of §1.1248–3.

(5) In respect of a taxable year referred to in subparagraph (4) of this paragraph of a first tier corporation, if the taxpayer is required to compute under paragraph (f)(5) of §1.1248–3 his ratable share of the earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of such first tier corporation, then for such taxable year of the lower tier corporation the schedule shall show:

(i) The earnings and profits accumulated for the taxable year of the lower tier corporation, computed under paragraph (b) of §1.1248–3,

(ii) Each percentage described in paragraph (f)(2) (ii), (iii), and (iv) of §1.1248–3,

(iii) The amount of the taxpayer's tentative ratable share computed under paragraph (f) (2) or (4) (as the case may be) of §1.1248–3,

(iv) The amount of, and a short description of each adjustment to, the tentative ratable share under paragraph (f)(5) of §1.1248–3, and

(v) The amount of the ratable share referred to in paragraph (f)(5)(i) of §1.1248–3.

(c) *Foreign taxes.* (1) If the taxpayer fails to establish any portion of the amount of any foreign taxes which he is required to establish by subparagraph (2) of this paragraph, then such portion shall not be taken into account under section 1248(b)(1)(B):

(2) The taxpayer shall establish in respect of the stock he sells or exchanges the amount of the foreign taxes described in section 1248(b)(1)(B) paid by the first tier corporation for each taxable year of such corporation for which the information is required under paragraph (b) (3) or (4) of this section, and the amount of such taxes paid by each lower tier corporation for each taxable year (as to which information is required under paragraph (b) (3)(iv) or (5) of this section) of each such lower tier corporation. A taxpayer shall be considered to have established the amount of such foreign taxes if:

(i) He attaches to the schedule described in paragraph (b) of this section a supplementary schedule which, except to the extent provided in paragraph (e) of this section, sets forth the amount of such foreign taxes for each taxable year (of the first tier corporation and of each such lower tier corporation) as to which such amount must be established under this subparagraph, and

(ii) He establishes in the manner prescribed by paragraph (d)(2) of this section the correctness of each amount shown on such supplementary schedule.

(d) *Establishing amounts on schedules.* (1) A taxpayer shall be considered to have established, in respect of the stock he sold or exchanged, the correctness of an amount shown on a schedule described in paragraph (b) of this section only if he produces or provides within 180 days after demand by the district director (or within such longer period to which such director consents):

(i) The books of original entry, or similar systematic accounting records maintained by any person or persons on a current basis as supplements to such books, which establish to the satisfaction of the district director the correctness of each such amount, and

(ii) In respect of any such books or records which are not in the English language, either an accurate English translation of any such records as are demanded, or the services of a qualified interpreter satisfactory to such director.

(2) A shareholder shall be considered to have established in respect of such stock the correctness of an amount shown on a supplementary schedule described in paragraph (c) of this section only if he produces or provides within 180 days after demand by the district director (or within such longer period to which such director consents):

(i) Evidence described in paragraph (a)(2) of § 1.905–2 of such amount, or

(ii) Secondary evidence of such amount, in the same manner and to the same extent as would be permissible under paragraph (b) of § 1.905–2 in the case of a taxpayer who claimed the benefits of the foreign tax credit in respect of such amount.

(e) *Insufficient information at time return is filed.* If stock in a foreign corporation, which was a controlled foreign corporation, is sold or exchanged by a taxpayer during a taxable year of the corporation (or of a lower tier corporation) which ends after the last day of the taxpayer's taxable year in which the sale or exchange occurs, and if:

(1) For the taxpayer's taxable year, the last day referred to in paragraph (a)(1) of this section for filing his income tax return with a schedule prescribed in paragraph (b) of this section, and, if applicable, with a supplemental schedule prescribed in paragraph (c) of this section, or

(2) The last day referred to in paragraph (a)(1) of this section (that is, April 1, 1965) for filing any such schedule or schedules with the district director with whom such return was filed,

Is not later than 90 days after the close of such taxable year of any such corporation, then such return with such schedule or schedules may be filed, or any such schedule or schedules may be filed, on the basis of estimates of amounts or percentages (for any such taxable year of any such corporation) required to be shown on any such schedule or schedules. If any such estimate differs from the actual amount or percentage, the taxpayer shall, within 90 days after the close of any such taxable year of any such corporation, file (or attach to a claim for refund or amended return filed) at the office of the district director with whom he filed the return a new schedule or schedules showing the actual amounts or percentages.

[T.D. 6779, 29 FR 18143, Dec. 22, 1964]

§ 1.1249–1 Gain from certain sales or exchanges of patents, etc., to foreign corporations.

(a) *General rule.* Section 1249 provides that if gain is recognized from the sale or exchange after December 31, 1962, of a patent, an invention, model, or design (whether or not patented), a copyright, a secret formula or process, or any other similar property right (not including property such as goodwill, a trademark, or a trade brand) to any foreign corporation by any United States person (as defined in section 7701(a)(30)) which controls such foreign corporation, and if such gain would (but for the provisions of section 1249) be gain from the sale or exchange of a capital asset or of property described in section 1231, then such gain shall be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231. Section 1249 applies only to gain recognized in taxable years beginning after December 31, 1962.

(b) *Control.* For purposes of paragraph (a) of this section, the term *control* means, with respect to any foreign corporation, the ownership, directly or indirectly, of stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote. For purposes of the preceding sentence, the rules for determining ownership of stock provided by section 958 (a) and (b), and the principles for determining percentage of total combined voting power owned by United States shareholders provided by paragraphs (b) and (c) of § 1.957–1, shall apply.

[T.D. 6765, 29 FR 14879, Nov. 3, 1964]

§ 1.1250–1 Gain from dispositions of certain depreciable realty.

(a) *Dispositions after December 31, 1969*—(1) *Ordinary income.* (i) In general, section 1250(a)(1) provides that, upon a disposition of an item of section 1250 property after December 31, 1969, the applicable percentage of the lower of:

(*a*) The additional depreciation (as defined in §1.1250–2) attributable to periods after December 31, 1969 in respect of the property, or

(*b*) The excess of the amount realized on a sale, exchange, or involuntary conversion (or the fair market value of the property on any other disposition) over the adjusted basis of the property,

Shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income). The amount of such gain shall be determined separately for each item (see subparagraph (2)(ii) of this paragraph) of section 1250 property. If the amount determined under (*b*) of this subdivision exceeds the amount determined under (*a*) of this subdivision, then such excess shall be treated as provided in subdivision (ii) of this subparagraph. For relation of section 1250 to other provisions, see paragraph (c) of this section.

(ii) If the amount determined under subdivision (i)(*b*) of this subparagraph exceeds the amount determined under subdivision (i)(*a*) of this subparagraph, then the applicable percentage of the lower of:

(*a*) The additional depreciation attributable to periods before January 1, 1970, or

(*b*) Such excess,

shall also be recognized as ordinary income.

(iii) If gain would be recognized upon a disposition of an item of section 1250 property under subdivisions (i) and (ii) of this subparagraph, and if section 1250(d) applies, then the gain recognized shall be considered as recognized first under subdivision (i) of this subparagraph. (See example (3)(i) of paragraph (c)(4) of §1.1250–3.)

(2) *Meaning of terms.* (i) For purposes of section 1250, the term *disposition* shall have the same meaning as in paragraph (a)(3) of §1.1245–1. *Section 1250 property* is, in general, depreciable real property other than section 1245 property. See paragraph (e) of this section. See paragraph (d)(1) of this section for meaning of the term *applicable percentage.* If, however, the property is considered to have two or more elements with separate periods (for example, because units thereof are placed in service on different dates, improvements are made to the property, or because of the application of paragraph (h) of §1.1250–3), see the special rules of §1.1250–5.

(ii) For purposes of applying section 1250, the facts and circumstances of each disposition shall be considered in determining what is the appropriate item of section 1250 property. In general, a building is an item of section 1250 property, but in an appropriate case more than one building may be treated as a single item. For example, if two or more buildings or structures on a single tract or parcel (or contiguous tracts or parcels) of land are operated as an integrated unit (as evidenced by their actual operation, management, financing, and accounting), they may be treated as a single item of section 1250 property. For the manner of determining whether an expenditure shall be treated as an addition to capital account of an item of section 1250 property or as a separate item of section 1250 property, see paragraph (d)(2)(iii) of §1.1250–5.

(3) *Sale, exchange, or involuntary conversion after December 31, 1969.* (i) In the case of a disposition of section 1250 property by a sale, exchange, or involuntary conversion after December 31, 1969, the gain to which section 1250(a)(1) applies is the applicable percentage for the property (determined under paragraph (d)(1) of this section) multiplied by the lower of (*a*) the additional depreciation in respect of the property attributable to periods after December 31, 1969, or (*b*) the excess (referred to as *gain realized*) of the amount realized over the adjusted basis of the property.

(ii) In addition to gain recognized under section 1250(a)(1) and subdivision (i) of this subparagraph, gain may also be recognized under section 1250(a)(2) and this subdivision if the gain realized exceeds the additional depreciation attributable to periods after December 31, 1969. In such a case, the amount of gain recognized under section 1250(a)(2) and this subdivision is the applicable percentage for the property (determined under paragraph (d)(2) of this section) multiplied by the lower of (*a*) the additional depreciation attributable to periods before January 1, 1970, or (*b*) the excess (referred to as *remaining gain*) of the gain realized over the additional depreciation attributable to periods after December 31, 1969.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Section 1250 property which has an adjusted basis of $500,000 is sold for $650,000 after December 31, 1969, and thus the gain realized is $150,000. At the time of the sale the additional depreciation in respect of the property attributable to periods after December 31, 1969, is $190,000 and the applicable percentage is 100 percent (paragraph (d)(1)(i)(*e*) of this section). Since the gain realized ($150,000), is lower than the additional depreciation ($190,000), the amount of gain recognized as ordinary income under section 1250(a)(1) is $150,000 (that is, 100 percent of $150,000). No gain is recognized under section 1250(a)(2).

Example 2. Section 1250 property which has an adjusted basis of $440,000 is sold for $500,000 on December 31, 1974, and thus the gain realized is $60,000. The property was acquired on March 31, 1966. At the time of the sale, the additional depreciation attributable to periods after December 31, 1969, is $20,000, and the additional depreciation attributable to periods before January 1, 1970, is $60,000. The property qualified as residential rental property for each taxable year ending after December 31, 1969, and the applicable percentage is 95 percent (paragraph (d)(1)(i)(*c*) of this section). The applicable percentage under paragraph (d)(2) of this section is 15 percent. Since the additional depreciation attributable to periods after December 31, 1969 ($20,000), is lower than the gain realized ($60,000), the amount of gain recognized as ordinary income under section 1250(a)(1) is $19,000 (that is, 95 percent of $20,000). In addition, gain is recognized under section 1250(a)(2) since there is remaining gain of $40,000 (that is, the gain realized ($60,000) minus the additional depreciation attributable to periods after December 31, 1969 ($20,000)). Since the remaining gain of $40,000 is lower than the additional depreciation attributable to periods before January 1, 1970 ($60,000), the amount of gain recognized as ordinary income under section 1250(a)(2) is $6,000 (that is, 15 percent of $40,000). The remaining $35,000 (that is, gain realized $60,000, minus gain recognized under section 1250(a), $25,000) of the gain may be treated as gain from the sale or exchange of property described in section 1231.

(4) *Other dispositions after December 31, 1969.* (i) In the case of a disposition of section 1250 property after December 31, 1969, other than by way of a sale, exchange, or involuntary conversion, the gain to which section 1250(a)(1) applies is the applicable percentage for the property (determined under paragraph (d)(1) of this section) multiplied by the lower of (*a*) the additional depreciation in respect of the property attributable to periods after December 31, 1969, or (*b*) the excess (referred to as *potential gain*) of the fair market value of the property over its adjusted basis. In addition, if the potential gain exceeds the additional depreciation attributable to periods after December 31, 1969, then the gain to which section 1250(a)(2) applies is the applicable percentage for the property (determined under paragraph (d)(2) of this section) multiplied by the lower of (*c*) the additional depreciation attributable to periods before January 1, 1970, or (*d*) the excess (referred to as *remaining potential gain*) of the potential gain over the additional depreciation attributable to periods after December 31, 1969. If property is transferred by a corporation to a shareholder for an amount less than its fair market value in a sale or exchange, for purposes of applying section 1250 such transfer shall be treated as a disposition other than by way of a sale, exchange, or involuntary conversion.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Section 1250 property having an adjusted basis of $500,000 and a fair market value of $550,000 is distributed by a corporation to a stockholder in complete liquidation of the corporation after December 31, 1969, and thus the potential gain is $50,000. At the time of the liquidation, the additional depreciation for the property attributable to periods after December 31, 1969, is $80,000 and the applicable percentage is 100 percent (paragraph (d)(1)(i)(*e*) of this section). Since the potential gain of $50,000 is lower than the additional depreciation attributable to periods after December 31, 1969 ($80,000), the amount of gain recognized as ordinary income under section 1250(a)(1) is $50,000 (that is, 100 percent of $50,000) even though in the absence of section 1250, section 336 would preclude recognition of gain to the corporation.

Example 2. The facts are the same as in example (1) except that the fair market value of the property is $650,000, and thus the potential gain is $150,000. Since the additional depreciation attributable to periods after

December 31, 1969 ($80,000), is lower than the potential gain of $150,000, the amount of gain recognized as ordinary income under section 1250(a)(1) is $80,000 (that is, 100 percent of $80,000). In addition, section 1250(a)(2) applies since there is remaining potential gain of $70,000, that is, potential gain ($150,000) minus additional depreciation attributable to periods after December 31, 1969 ($80,000). The additional depreciation attributable to periods before January 1, 1970, is $90,000 and the applicable percentage under paragraph (d)(2) of this section is 50 percent. Since the remaining potential gain of $70,000 is lower than the additional depreciation attributable to periods before January 1, 1970 ($90,000), the amount of gain recognized as ordinary income under section 1250(a)(2) is $35,000 (that is, 50 percent of $70,000). Thus under section 1250(a), $115,000 (that is, $80,000 under section 1250(a)(1), plus $35,000 under section 1250(a)(2)) is recognized as ordinary income, even though in the absence of section 1250, section 336 would preclude recognition of gain to the corporation.

(5) *Instances of nonapplication.* (i) Section 1250(a)(1) does not apply to losses. Thus, section 1250(a)(1) does not apply if a loss is realized upon a sale, exchange, or involuntary conversion of property, all of which is considered section 1250 property, nor does the section apply to a disposition of such property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(ii) In general, in the case of section 1250 property with a holding period under section 1223 of more than 1 year, section 1250(a)(1) does not apply if for periods after December 31, 1969, there are no *depreciation adjustments in excess of straight line* (as computed under section 1250(b) and paragraph (b) of § 1.1250–2).

(6) *Allocation rules.* (i) In the case of a sale, exchange, or involuntary conversion of section 1250 property and nonsection 1250 property in one transaction after December 31, 1969, the total amount realized upon the disposition shall be allocated between the section 1250 property and the other property in proportion to their respective fair market values. Such allocation shall be made in accordance with the principles set forth in paragraph (a)(5) of § 1.1245–1 (relating to allocation between section 1245 property and nonsection 1245 property).

(ii) If an item of section 1250 property has two (or more) applicable percentages because one subdivision of paragraph (d)(1)(i) of this section applies to one portion of the taxpayer's holding period (determined under § 1.1250–4) and another subdivision of such paragraph applies with respect to another such portion, then the gain realized on a sale, exchange, or involuntary conversion, or the potential gain in the case of any other disposition, shall be allocated to each such portion of the taxpayer's holding period after December 31, 1969, in the same proportion as the additional depreciation with respect to such item for such portion bears to the additional depreciation with respect to such item for the entire holding period after December 31, 1969.

(b) *Dispositions before January 1, 1970*—(1) *Ordinary income.* In general, section 1250(a)(2) provides that, upon a disposition of an item of section 1250 property after December 31, 1963, and before January 1, 1970, the applicable percentage of the lower of:

(i) The additional depreciation (as defined in § 1.1250–2) attributable to periods before January 1, 1970, in respect of the property, or

(ii) The excess of the amount realized on a sale, exchange, or involuntary conversion (or the fair market value of the property on any other disposition) over the adjusted basis of the property,

shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income). The amount of such gain shall be determined separately for each item (see subparagraph (2)(ii) of this paragraph) of section 1250 property. For relation of section 1250 to other provisions, see paragraph (c) of this section.

(2) *Meaning of terms.* (i) For purposes of section 1250, the term *disposition* shall have the same meaning as in paragraph (a)(3) of § 1.1245–1. *Section 1250 property* is, in general, depreciable real property other than section 1245 property. See paragraph (e) of this section. For purposes of this paragraph, the term *applicable percentage* means 100 percent minus 1 percentage point for each full month the property was

held after the date on which the property was held 20 full months. See paragraph (d)(2) of this section. If, however, the property is considered to have two or more elements with separate holding periods (for example, because units thereof are placed in service on different dates, or improvements are made to the property), see the special rules of § 1.1250–5.

(ii) For purposes of applying section 1250, the facts and circumstances of each disposition shall be considered in determining what is the appropriate item of section 1250 property. In general, a building is an item of section 1250 property, but in an appropriate case more than one building may be treated as a single item. For manner of determining whether an expenditure shall be treated as an addition to the capital account of an item of section 1250 property or as a separate item of section 1250 property, see paragraph (d)(2)(iii) of § 1.1250–5.

(3) *Sale, exchange, or involuntary conversion before January 1, 1970.* (i) In the case of a disposition of section 1250 property by a sale, exchange, or involuntary conversion before January 1, 1970, the gain to which section 1250(a)(2) applies is the applicable percentage for the property multiplied by the lower of (*a*) the additional depreciation in respect of the property or (*b*) the excess (referred to as *gain realized*) of the amount realized over the adjusted basis of the property.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: Section 1250 property, which has an adjusted basis of $200,000, is sold for $290,000 before January 1, 1970. At the time of the sale the additional depreciation in respect of the property is $130,000 and the applicable percentage is 60 percent. Since the gain realized ($90,000, that is, amount realized, $290,000, minus adjusted basis, $200,000) is lower than the additional depreciation ($130,000), the amount of gain recognized as ordinary income under section 1250(a)(2) is $54,000 (that is, 60 percent of $90,000). The remaining $36,000 ($90,000 minus $54,000) of the gain may be treated as gain from the sale or exchange of property described in section 1231.

(4) *Other dispositions before January 1, 1970.* (i) In the case of a disposition of section 1250 property before January 1, 1970, other than by way of a sale, exchange, or involuntary conversion, the gain to which section 1250(a)(2) applies is the applicable percentage for the property multiplied by the lower of (*a*) the additional depreciation in respect of the property, or (*b*) the excess (referred to as *potential gain*) of the fair market value of the property on the date of disposition over its adjusted basis. If property is transferred by a corporation to a shareholder for an amount less than its fair market value in a sale or exchange, for purposes of applying section 1250 such transfer shall be treated as a disposition other than by way of a sale, exchange, or involuntary conversion.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: Assume the same facts as in the example in subparagraph (3)(ii) of this paragraph except that the property is distributed by a corporation to a stockholder before January 1, 1970, in complete liquidation of the corporation, and that at the time of the distribution the fair market value of the property is $370,000. Since the additional depreciation ($130,000) is lower than the potential gain of $170,000 (that is, fair market value, $370,000, minus adjusted basis, $200,000), the amount of gain recognized as ordinary income under section 1250(a)(2) is $78,000 (that is, 60 percent of $130,000) even though, in the absence of section 1250, section 336 would preclude recognition of gain to the corporation.

(5) *Instances of nonapplication.* (i) Section 1250(a)(2) does not apply to losses. Thus, section 1250(a)(2) does not apply if a loss is realized upon a sale, exchange, or involuntary conversion of property, all of which is considered section 1250 property, nor does the section apply to a disposition of such property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(ii) In general, in the case of section 1250 property with a holding period under section 1223 of more than one year, section 1250(a)(2) does not apply if for periods after December 1, 1963, there are no *depreciation adjustments in excess of straight line* (as computed under section 1250(b) and paragraph (b) of § 1.1250–2).

(iii) In a case in which section 1250 property (including each element thereof, if any) has a holding period under §1.1250–4 (or paragraph (a)(2)(ii) of §1.1250–5) of at least 10 years, section 1250(a)(2) does not apply. If within the 10-year period preceding the date the property is disposed of, an element is added to the property by reason, for example, of an addition to capital account, see §1.1250–5.

(6) *Allocation rule.* In the case of a sale, exchange, or involuntary conversion of section 1250 property and nonsection 1250 property in one transaction before January 1, 1970, the total amount realized upon the disposition shall be allocated between the section 1250 property and the other property in proportion to their respective fair market values. Such allocation shall be made in accordance with the principles set forth in paragraph (a)(5) of §1.1245–1 (relating to allocation between section 1245 property and nonsection 1245 property).

(c) *Relation of section 1250 to other provisions*—(1) *General.* The provisions of section 1250 apply notwithstanding any other provision of subtitle A of the Code. See section 1250(i). Thus, unless an exception or limitation under section 1250(d) and §1.1250–3 applies, gain under section 1250(a) is recognized notwithstanding any contrary nonrecognition provision or income characterizing provision. For example, since section 1250 overrides section 1231 (relating to property used in the trade or business), the gain recognized under section 1250(a) upon a disposition will be treated as ordinary income and only the remaining gain, if any, from the disposition may be considered as gain from the sale or exchange of a capital asset if section 1231 is applicable. See the example in paragraph (b)(3)(ii) of this section.

(2) *Nonrecognition sections overridden.* The nonrecognition provisions of subtitle A of the Code which section 1250 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, 501(a), and 512(b)(5). See section 1250(d) for the extent to which section 1250(a) overrides sections 332, 351, 361, 371(a), 374(a), 721, 731, 1031, 1033, 1039, 1071, and 1081 (b)(1) and (d)(1)(A). For amount of additional depreciation in respect of property disposed of by an organization exempt from income taxes (within the meaning of section 501(a)), see paragraph (d)(6) of §1.1250–2.

(3) *Exempt income.* The fact that section 1250 provides for recognition of gain as ordinary income does not change into taxable income any income which is exempt under section 115 (relating to income of States, etc.), 892 (relating to income of foreign governments), or 894 (relating to income exempt under treaties).

(4) *Treatment of gain not recognized under section 1250.* Section 1250 does not prevent gain which is not recognized under section 1250 from being considered as gain under another provision of the Code, such as, for example, section 1239 (relating to gain from sale of depreciable property between certain related persons). Thus, for example, if section 1250 property which has an adjusted basis of $10,000 is sold for $17,500 in a transaction to which section 1239 applies, and if $5,000 of the gain would be recognized under section 1250(a) then the remaining $2,500 of the gain would be treated as ordinary income under section 1239.

(5) *Normal retirement of asset in multiple asset account.* Section 1250(a) does not require recognition of gain upon normal retirements of section 1250 property in a multiple asset account as long as the taxpayer's method of accounting, as described in paragraph (e)(2) of §1.167(a)–8 (relating to accounting treatment of asset retirements), does not require recognition of such gain.

(6) *Installment method.* Gain from a disposition to which section 1250(a) applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall be deemed to consist of gain to which section 1250(a) applies until all such gain has been reported, and the remaining portion (if any) of such income shall be deemed to consist of other gain. For treatment of amounts as interest on certain deferred payments, see section 483.

(d) *Applicable percentage*—(1) *Definition for purposes of section 1250(a)(1).* (i)

For purposes of section 1250(a)(1), the term *applicable percentage* means:

(*a*) In the case of property disposed of pursuant to a written contract which was, on July 24, 1969, and at all times thereafter binding on the owner of the property, 100 percent minus 1 percentage point for each full month the property was held after the date on which the property was held 20 full months;

(*b*) In the case of property constructed, reconstructed, or acquired by the taxpayer before January 1, 1975, with respect to which a mortgage is insured under section 221(d)(3) or 236 of the National Housing Act, or housing is financed or assisted by direct loan or tax abatement under similar provisions of State or local laws, and with respect to which the owner is subject to the restrictions described in section 1039(b)(1)(B) (relating to approved dispositions of certain Government-assisted housing projects), 100 percent minus 1 percentage point for each full month of the taxpayer's holding period for the property (determined under § 1.1250–4) during which the property qualified under this sentence, beginning after the date on which the property so qualified for 20 full months.

(*c*) In the case of residential rental property (as defined in section 167(j)(2)(B)) other than that covered by (*a*) and (*b*) of this subdivision, 100 percent minus 1 percentage point for each full month of the taxpayer's holding period for the property (determined under § 1.1250–4) included within a taxable year for which the property qualified as residential rental property, beginning after the date on which the property so qualified for 100 full months.

(*d*) In the case of property with respect to which a deduction was allowed under section 167(k) (relating to the depreciation of expenditures to rehabilitate low-income rental housing), 100 percent minus 1 percentage point for each full month of the taxpayer's holding period (determined under § 1.1250–4) beginning 100 full months after the date on which the property was placed in service.

(*e*) In the case of all other property, 100 percent.

The provisions of (a), (b), and (c) of this subdivision shall not apply with respect to additional depreciation described in section 1250(b)(4). If the taxpayer's holding period under § 1.1250–4 includes a period before January 1, 1970, such period shall be taken into account in applying each provision of this subdivision.

(ii) A single item of property may have two (or more) applicable percentages under the provisions of subdivision (i) of this subparagraph. For example, if the provision of subdivision (i) of this subparagraph which applies to an item of section 1250 property (or to an element of such property if the property is treated as consisting of more than one element under § 1.1250–5) in the taxable year in which the item (or element) is disposed of did not apply to the item (or element) in a prior taxable year which is included within the taxpayer's holding period under § 1.1250–4 and which ends after December 31, 1969, then each provision of subdivision (i) of this subparagraph shall apply only for the period during which the property qualified under such provision.

(iii) If the taxpayer makes rehabilitation expenditures and elects to compute depreciation under section 167(k) with respect to the property attributable to the rehabilitation expenditures, such property will generally constitute a separate improvement under paragraph (c) of § 1.1250–5 and therefore will constitute an element of section 1250 property. For computation of applicable percentage and gain recognized under section 1250(a) in such a case, see paragraph (a) of § 1.1250–5.

(iv) The principles of this subparagraph may be illustrated by the following examples:

Example 1. Section 1250 property is sold on December 31, 1970, pursuant to a written contract which was binding on the owner of the property on July 24, 1969, and at all times thereafter. The property was acquired on July 31, 1968. The applicable percentage for the property under subdivision (i)(*a*) of this subparagraph is 91 percent, since the property was held 29 full months.

Example 2. Section 1250 property is sold on June 30, 1978. The property was acquired by a calendar year taxpayer on June 30, 1966. Subdivision (i)(*e*) of this subparagraph applies to the property in 1977 and 1978. However, subdivision (i)(*c*) of this subparagraph applied to the property for the taxable years of 1970 through 1976. Thus, the property has two applicable percentages under this subparagraph. The period before January 1, 1970 (42 full months), and the period from 1970 through 1976 (84 full months) are both taken into account in determining the applicable percentage under subdivision (i)(*c*) of this subparagraph. Thus, the applicable percentage is 74 percent (that is, 100 percent minus the excess of the holding period taken into account (126 full months) over 100 full months). The applicable percentage for the years 1977 and 1978 is 100 percent under subdivision (i)(*e*) of this subparagraph.

Example 3. Section 1250 property is sold on December 31, 1978. The property was acquired by a calendar year taxpayer on December 31, 1969. The taxpayer made rehabilitation expenditures in 1973 and properly elected to compute depreciation under section 167(k) on the property attributable to the expenditures for the 60-month period beginning on January 1, 1974, the date such property was placed in service. Subdivision (i)(*c*) applies to the property (other than the property with respect to which a deduction was allowed under section 167(k)) for the taxable years of 1970 through 1978 (108 full months) and the applicable percentage for such property is 92 percent. The applicable percentage for the property with respect to which a deduction under section 167(k) was allowed is 100 percent under subdivision (i)(*d*) of this subparagraph, since the holding period for purposes of such subdivision begins on the date such property is placed in service.

Example 4. Section 1250 property is sold by a calendar year taxpayer on March 31, 1974. The property was transferred to the taxpayer by gift on December 31, 1970, and under section 1250(e)(2), the taxpayer's holding period for the property for purposes of computing the applicable percentage includes the transferor's holding period of 80 full months. Subdivision (i)(*c*) of this subparagraph applies to the property in the years 1970 through 1974. The applicable percentage under subdivision (i) (*c*) of this subparagraph is 81 percent, since the period before January 1, 1970 (68 full months), and that portion of the period after December 31, 1969, during which such subdivision applied (51 full months) are taken into account.

(2) *Definition for purposes of section 1250(a)(2).* For purposes of section 1250(a)(2), the term *applicable percentage* means:

(i) In case of property with a holding period of 20 full months or less, 100 percent;

(ii) In case of property with a holding period of more than 20 full months but less than 10 years, 100 percent minus 1 percentage point for each full month the property is held after the date on which the property is held 20 full months; and

(iii) In case of property with a holding period of at least 10 years, zero.

(3) *Holding period.* For purposes of this paragraph, the holding period of property shall be determined under the rules of §1.1250–4, and not under the rules of section 1223, notwithstanding that the property was acquired on or before December 31, 1963. In the case of a disposition of section 1250 property which consists of 2 or more elements (within the meaning of paragraph (c) of §1.1250–5), the holding period for each element shall be determined under the rules of paragraph (a)(2)(ii) of §1.1250–5.

(4) *Full month.* For purposes of this paragraph, the term *full month* (or *full months*) means the period beginning on a date in 1 month and terminating on the date before the corresponding date in the next succeeding month (or in another succeeding month), or, if a particular succeeding month does not have such a corresponding date, terminating on the last day of such particular succeeding month.

(5) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Property is purchased on January 17, 1959. Under paragraph (b)(1) of §1.1250–4, its holding period begins on January 18, 1959, and thus at any time during the period beginning on October 17, 1960, and ending on November 16, 1960, the property is considered held 21 full months and has an applicable percentage under section 1250(a)(2) of 99 percent. On and after January 17, 1969, the property has a holding period of at least 120 full months (10 years) and, therefore, the applicable percentage under section 1250(a)(2) for the property is zero. Accordingly, no gain would be recognized under section 1250(a)(2) upon disposition of the property. If, however, the property consists of two or more elements, see the special rules of §1.1250–5.

Example 2. Property is purchased on January 31, 1968. Under paragraph (b)(1) of §1.1250–4 its holding period begins on February 1, 1968, and thus at any time during the period beginning on February 29, 1968, and ending on March 30, 1968, the property is considered held 1 full month. At any time during the period beginning on March 31, 1970, and ending on April 29, 1970, the property is considered held 26 full months. At any time during the period beginning on April 30, 1970, and ending on May 30, 1970, the property is considered held 27 full months.

(e) *Section 1250 property*—(1) *Definition.* The term *section 1250 property* means any real property (other than section 1245 property, as defined in section 1245(a)(3) and § 1.1245–3) which is or has been property of a character subject to the allowance for depreciation provided in section 167. See section 1250(c).

(2) *Character of property.* For purposes of subparagraph (1) of this paragraph, the term *is or has been property of a character subject to the allowance for depreciation provided in section 167* shall have the same meaning as when used in paragraph (a) (1) and (3) of § 1.1245–3. Thus, if a father uses a house in his trade or business during a period after December 31, 1963, and then gives the house to his son as a gift for the son's personal use, the house is section 1250 property in the hands of the son. For exception to the application of section 1250(a) upon disposition of a principal residence, see section 1250(d)(7).

(3) *Real property.* (i) For purposes of subparagraph (1) of this paragraph, the term *real property* means any property which is not personal property within the meaning of paragraph (b) of § 1.1245–3. The term section 1250 property includes three types of depreciable real property. The first type is intangible real property. For purposes of this paragraph, a leasehold of land or of section 1250 property is intangible real property, and accordingly such a leasehold is section 1250 property. However, a fee simple interest in land is not depreciable, and therefore is not section 1250 property. The second type is a building or its structural components within the meaning of paragraph (c) of § 1.1245–3. The third type is all other tangible real property except (*a*) property described in section 1245(a)(3)(B) as defined in paragraph (c)(1) of § 1.1245–3 (relating to property used as an integral part of a specified activity or as a specified facility), and (*b*) property described in section 1245(a)(3)(D). An elevator or escalator (within the meaning of section 1245(a)(3)(C)) is not section 1250 property.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: A owns and leases to B for a single lump-sum payment of $100,000 property consisting of land and a fully equipped factory building thereon. If 30 percent of the fair market value of such property is properly allocable to the land, 25 percent to section 1250 property (the building and its structural components), and 45 percent to section 1245 property (the equipment), then 55 percent of B's leasehold is section 1250 property.

(4) *Coordination with definition of section 1245 property.* (i) Property may lose its character as section 1250 property and become section 1245 property. Thus, for example, if section 1250 property of the third type described in subparagraph (3)(i)(*a*) of this paragraph is converted to use as an integral part of manufacturing, the property would lose its character as section 1250 property and would become section 1245 property. However, once property in the hands of a taxpayer is section 1245 property, it can never become section 1250 property in the hands of such taxpayer. See also paragraph (a) (4) and (5) of § 1.1245–2.

(f) *Treatment of partnerships and partners.* If a partnership disposes of section 1250 property, the amount of gain recognized under section 1250(a) by the partnership and by a partner shall be determined in a manner consistent with the principles provided in paragraph (e) of § 1.1245–1. Thus, for example, a partner's distributive share of gain recognized by the partnership under section 1250(a) shall be determined in the same manner as his distributive share of gain recognized by the partnership under section 1245(a)(1) is determined, and, if required, additional depreciation in respect of section 1250 property shall be allocated to the partner in the same manner as the adjustments reflected in the adjusted basis of section 1245 property are allocated to the partner. For a further example, if on the date a partner acquires his partnership interest by way of a sale or exchange the partnership owns section 1250 property and an election under section 754 (relating to optional adjustment to basis of partnership property) is in effect with respect to the partnership, then such partner's additional depreciation in respect of such property on such date is deemed to be zero. For limitation on the amount of gain recognized under section 1250(a) in respect of a partnership and for the amount of additional depreciation in respect of partnership property after certain transactions, see paragraph (f) of § 1.1250–3. For treatment of section 1250 property as an unrealized receivable, see section 751(c).

(g) *Examples.* The principles of this section may be illustrated by the following examples:

Example 1. Section 1250 property which has an adjusted basis of $350,000 is sold for $630,000 on December 31, 1984. The property was acquired by a calendar year taxpayer on December 31, 1969. For the taxable years from 1970 through 1980, the property qualified as residential rental property and the applicable percentage for those years is 68 percent (paragraph (d)(1)(i)(*c*) of this section). For taxable years from 1981 through 1984, the property did not qualify as residential rental property and the applicable percentage for those years is 100 percent (paragraph (d)(1)(i)(*e*) of this section). The additional depreciation for the years from 1970 through 1980 is $120,000. The additional depreciation for the years from 1981 through 1984 is $20,000. The gain realized is $280,000 (that is, amount realized, $630,000, minus adjusted basis $350,000). The gain recognized as ordinary income under section 1250(a)(1) is computed in two steps. First, since the additional depreciation attributable to the years 1970 through 1980 ($120,000) is lower than the gain realized attributable to such years determined under paragraph (a)(6) of this section ($240,000, that is, gain realized, $280,000, multiplied by 12⁄14), the gain recognized as ordinary income under section 1250(a)(1) in the first step is $81,600, that is, 68 percent of $120,000. Second, since the additional depreciation attributable to the years 1981 through 1984 ($20,000) is lower than the gain realized attributable to those years ($40,000, that is, gain realized, $280,000, multiplied by 2⁄14), the gain recognized as ordinary income under section 1250(a)(1) for the years from 1981 through 1984 is $20,000 (that is, 100 percent of $20,000). The total gain recognized under section 1250(a)(1) is $101,600 (that is, $81,600 plus $20,000).

Example 2. Section 1250 property which has an adjusted basis of $400,000 is sold for $472,000 on December 31, 1978. The property was acquired on December 31, 1966. The additional depreciation attributable to periods before January 1, 1970, is $40,000 and the applicable percentage under paragraph (d)(2) of this section is zero percent. The property qualifies as residential rental property for the years 1970 through 1976, but fails to qualify for 1977 and 1978. Under paragraph (d)(1) of this section, the applicable percentage for the years 1970 through 1976 is 80 percent (paragraph (d)(1)(i)(*c*) of this section), and the applicable percentage for the years 1977 and 1978 is 100 percent (paragraph (d)(1)(i)(*e*) of this section). The additional depreciation attributable to the years 1970 through 1976 is $50,000, and the additional depreciation attributable to the years 1977 and 1978 is $10,000. The gain recognized as ordinary income under section 1250(a)(1) is computed in two steps. First, since the additional depreciation attributable to the years 1970 through 1976 ($50,000) is lower than the gain realized attributable to such years ($60,000, that is, $72,000 multiplied by 5⁄6), the gain recognized under section 1250(a)(1) in the first step is $40,000 (that is, 80 percent of $50,000). Second, since the additional depreciation attributable to 1977 and 1978 ($10,000) is lower than the gain realized attributable to such years ($12,000, that is, $72,000 multiplied by 1⁄6), the gain recognized under section 1250(a)(1) in the second step is $10,000 (that is, 100 percent of $10,000). In addition, section 1250(a)(2) applies. However, since the applicable percentage is zero percent, none of the gain is recognized as ordinary income under section 1250(a)(2). Thus, the remaining $22,000 (that is, gain realized, $72,000, minus gain recognized under section 1250(a), $50,000) of the gain may be treated as gain from the sale or exchange of property described in section 1231.

Example 3. The facts are the same as in example (2) except that the property is disposed of on December 31, 1980. The property qualifies as residential rental property for the years 1979 and 1980. Thus, the applicable percentage for years 1970 through 1976, 1979, and 1980 is 56 percent (paragraph (d)(1)(i)(*c*) of this section). The applicable percentage for the years 1977 and 1978 is 100 percent (paragraph (d)(1)(i)(*e*) of this section). The additional depreciation for the years 1979 and 1980 is $8,000. The gain recognized under section 1250(a)(1) is computed in two steps. First, since the additional depreciation attributable to the years 1970 through 1976, 1979, and 1980 ($58,000) is lower than the gain realized attributable to such years ($61,412, that is, $72,000 multiplied by $58,000/$68,000), the gain recognized under section 1250(a)(1) in the first step is $32,480 (that is, 56 percent of $58,000). Second, since the additional depreciation attributable to 1977 and 1978 ($10,000) is lower than the gain realized attributable to such years ($10,588, that is, $72,000 multiplied by $10,000/$68,000) the gain recognized under section 1250(a)(1) in the second step is $10,000 (that is, 100 percent of $10,000). In addition section 1250(a)(2) applies. However, since the applicable percentage is zero percent, none of the gain is recognized as ordinary income under section 1250(a)(2). Thus, the remaining $29,520 (that is, gain realized, $72,000, minus gain recognized under section 1250(a), $42,480) of the gain may be treated as gain from the sale or exchange of property described in section 1231.

[T.D. 7084, 36 FR 271, Jan. 8, 1971, as amended by T.D. 7193, 37 FR 12953, June 30, 1972]

§ 1.1250–2 Additional depreciation defined.

(a) *In general*—(1) *Definition for purposes of section 1250(b)(1).* Except as otherwise provided in paragraph (e) of this section, for purposes of section 1250(b)(1), the term *additional depreciation* means:

(i) In the case of property which at the time of disposition has a holding period under section 1223 of not more than 1 year, the *depreciation adjustments* (as defined in paragraph (d) of this section) in respect of such property for periods after December 31, 1963, and

(ii) In the case of property which at the time of disposition has a holding period under section 1223 of more than 1 year, the depreciation adjustments in excess of straight line for periods after December 31, 1963, computed under paragraph (b)(1) of this section.

(2) *Definition for purposes of section 1250(b)(4).* Except as otherwise provided in paragraph (e) of this section, for purposes of section 1250(b)(4), the term *additional depreciation* means:

(i) In the case of property with respect to which a deduction under section 167(k) (relating to depreciation of expenditures to rehabilitate low-income rental housing) was allowed, which at the time of disposition has a holding period under section 1223 of not more than 1 year from the time the rehabilitation expenditures were incurred, the *depreciation adjustments* (as defined in paragraph (d) of this section) in respect of the property, and

(ii) In the case of property with respect to which a deduction under section 167(k) (relating to depreciation of expenditures to rehabilitate low-income rental housing) was allowed, which at the time of disposition has a holding period under section 1223 of more than 1 year from the time the rehabilitation expenditures were incurred, the depreciation adjustments in excess of straight line for the property, computed under paragraph (b)(2) of this section. For purposes of this subparagraph, all rehabilitation expenditures which are incurred in connection with the rehabilitation of an element of section 1250 property shall be considered incurred on the date the last such expenditure is considered incurred under the accrual method of accounting, regardless of the method of accounting used by the taxpayer with regard to other items of income and expense. If the property consists of two or more elements (for example, if the property is placed in service at different times), then each element shall be treated as if it were a separate property and the expenditures attributable to each such element shall be considered incurred on the date the last such expenditure is considered incurred.

(3) *Allocation to certain periods.* With respect to a taxable year beginning in 1963 and ending in 1964, or beginning in 1969 and ending in 1970, the amount of depreciation adjustments or of depreciation adjustments in excess of straight line (as the case may be) shall be ascertained by applying the principles of paragraph (c)(3) of § 1.167(a)–8 (relating to determination of adjusted basis of retired asset), and the amount determined in such manner shall be allocated on a daily basis in order to determine the portion thereof which is attributable to a period after December 31, 1963, or after December 31, 1969, as the case may be.

(b) *Computation of depreciation adjustments in excess of straight line*—(1) *General rule.* For purposes of paragraph (a)(1) of this section, depreciation adjustments in excess of straight line shall be, in the case of any property, the excess of (i) the sum of the *depreciation adjustments* (as defined in paragraph (d) of this section) in respect of the property attributable to periods after December 31, 1963, over (ii) the sum such adjustments would have been for such periods if such adjustments had been determined for the entire period the property was held under the straight line method of depreciation (or, if applicable, under the lease-renewal-period provision in paragraph (c) of this section). Depreciation in excess of straight line may arise, for example, if the declining balance method, the sum of the years-digits method, or the units of production method is used, or for another example, if the cost of a leasehold improvement or of a leasehold is depreciated over a period which does not take into account certain renewal periods referred to in paragraph (c) of this section. For computations of depreciation adjustments in excess of straight line (or a deficit therein) both on an annual basis and on the basis of the entire period the property was held, see subparagraph (6) of this paragraph.

(2) *Depreciation under section 167(k).* For purposes of paragraph (a)(2) of this section, depreciation adjustments in excess of straight line shall be, in the case of any property with respect to which a deduction was allowed under section 167(k) (relating to depreciation of expenditures to rehabilitate low-income rental housing), the excess of (i) the sum of the *depreciation adjustments* (as defined in paragraph (d) of this section) allowed in respect of the property, over (ii) the sum such adjustments would have been if such adjustments had been determined for the entire period the property was held under the straight line method of depreciation permitted by section 167(b)(1).

(3) *General rule for computing useful life and salvage value.* For purposes of computing under subparagraph (1)(ii) of this paragraph the sum of the depreciation adjustments would have been under the straight line method, if a useful life (or salvage value) was used in determining the amount allowed as a depreciation adjustment for any taxable year, such life (or value) shall be used in determining the amount such depreciation adjustment would have been for such taxable year under the straight line method. If, however, for any taxable year a method of depreciation was used as to which a useful life was not taken into account such as, for example, the units of production method, or as to which salvage value was not taken into account in determining the annual allowances, such as, for example, the declining balance method or the amortization of a leasehold improvement over the term of a lease, then, for the purpose of determining the amount such depreciation adjustment would have been under the straight line method for such taxable year:

(i) There shall be used the useful life (or salvage value) which would have been proper if depreciation had actually been determined under the straight line method throughout the period the property was held, and

(ii) Such useful life (or such salvage value) shall be determined by taking into account for each taxable year the same facts and circumstances as would have been taken into account if the taxpayer had used such method throughout the period the property was held.

(4) *Special rule for computing useful life and salvage value (section 167(k)).* For purposes of computing under subparagraph (2)(ii) of this paragraph the sum the depreciation adjustments would have been under the straight line method, the useful life and salvage value permitted under section 167(k) shall not apply, the useful life of the property shall be determined under paragraph (b) of §1.167(a)–1 (or, if applicable, under the lease-renewal-period provision of paragraph (c) of this section), and the salvage value of the property shall be determined under paragraph (c) of §1.167(a)–1. Such useful life or salvage value shall be determined by taking into account for each taxable year the same facts and circumstances as would have been taken into account if the taxpayer had used the straight line method permitted under section 167(b)(1) throughout the period the property was held.

(5) *Property held before January 1, 1964.* In the case of property held before January 1, 1964:

(i) For purposes of computing under subparagraph (1)(ii) of this paragraph the sum the depreciation adjustments would have been under the straight line method, the adjusted basis of the property on such date shall be the amount such adjusted basis would have been if depreciation deductions allowed or allowable before such date had been determined under the straight line method computed in accordance with subparagraph (3) of this paragraph, and

(ii) The depreciation adjustments in excess of straight line in respect of the property computed under subparagraph

(1) of this paragraph, but without regard to this subdivision, shall be reduced by the amount of depreciation adjustments less than straight line for periods before January 1, 1964, that is, by the excess (if any) of the sum the depreciation adjustments would have been for periods before January 1, 1964, under the straight line method, over the sum of the depreciation adjustments attributable to periods before such date.

(6) *Determination of additional depreciation in certain cases.* If an item of section 1250 property is subject to two (or more) applicable percentages, a separate computation of additional depreciation shall be made for the portion of the taxpayer's holding period subject to each such percentage. That is, a separate computation shall be made to determine the excess of (i) the depreciation adjustments (as defined in paragraph (d) of this section) for each such portion of the taxpayer's holding period after December 31, 1963, over (ii) the amount such adjustments would have been for each such portion if such adjustments were determined under the straight line method of depreciation (or, if applicable, under the lease-renewal-period provision in paragraph (c) of this section). Thus, for example, in the case of an item of section 1250 property acquired on January 1, 1968, and disposed of on January 1, 1973, if the applicable percentage for the period before January 1, 1970, were determined under paragraph (d)(2) of § 1.1250–1 and the applicable percentage for the period after December 31, 1969, were determined under paragraph (d)(1)(i)(*e*) of § 1.1250–1, the additional depreciation would be computed separately for the period before January 1, 1970, and for the period after December 31, 1969. If the additional depreciation attributable to any such portion of the taxpayer's holding period is a deficit (that is, if the depreciation adjustments for that portion are less than the amount such adjustments would have been for that portion if depreciation adjustments were determined for the entire period the property was held under the straight line method of depreciation, or, if applicable, under the lease-renewal-period provision in paragraph (c) of this section), then such deficit will be applied to reduce the additional depreciation for other portion (or portions) of the taxpayer's holding period. (See examples (4) and (5) of subparagraph (7) of this paragraph.)

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. A calendar year taxpayer sells section 1250 property on January 1, 1968, which he purchased for $10,000 on January 1, 1963. For the period of 1963 through 1967 he computed depreciation deductions in respect of the property under the declining balance method using a rate of 200 percent of the straight line rate and a proper useful life of 10 years. Under such method salvage value is not taken into account in computing annual allowances. For purposes of applying subparagraph (3) of this paragraph, if the taxpayer had used the straight line method for such period, he would have used a salvage value of $1,000, and the depreciation under the straight line method would have been $900 each year, that is, one-tenth of $10,000 minus $1,000. As of January 1, 1968, the additional depreciation for the property is $1,123, as computed in the table below:

Year	Actual depreciation	Straight line	Additional depreciation (deficit)
1963	$2,000	$900	
1964	1,600	900	$700
1965	1,280	900	380
1966	1,024	900	124
1967	819	900	(81)
Sum for periods after Dec. 31, 1963	4,723	3,600	1,123

Example 2. Assume the same facts as in example (1) except that the taxpayer sells the section 1250 property on January 1, 1970. Assume further that as of January 1, 1968, the taxpayer elects under section 167(e)(1) to change to the straight line method. On that date the adjusted basis of the property is $3,277 ($10,000 minus $6,723). He redetermines the remaining useful life of the property to be 8 years and its salvage value to be $77, and thus takes depreciation deductions for 1968 and 1969 of $400 (the amount allowable) for each such year, that is, one-eighth of $3,200 (that is, $3,277 minus $77). For purposes of applying subparagraph (3) of this paragraph, if he had used the straight line method throughout the period he held the property, the adjusted basis of the property on January 1, 1968, would have been $5,500 ($10,000 minus $4,500), and the depreciation which would have resulted under such method for 1968 and 1969 would have been $678 for each such year, that is, one-eighth of $5,423 ($5,500

minus $77). As of January 1, 1970, the additional depreciation for the property is $567, as computed in the table below:

Years	Depreciation	Straight line	Additional depreciation (deficit)
1964 through 1967 ..	$4,723	$3,600	$1,123
1968	400	678	(278)
1969	400	678	(278)
Sum for periods after Dec. 31, 1963	5,523	4,956	567

Example 3. On January 1, 1978, a calendar year taxpayer sells section 1250 property. The property, which is attributable to rehabilitation expenditures of $50,000 incurred in 1970, was placed in service on January 1, 1971. The taxpayer elected to compute depreciation for the period of 1971 through 1975 under section 167(k). Under such section salvage value is not taken into account in computing annual allowances, and the useful life of the property is deemed to be 5 years. For purposes of applying subparagraph (4) of this paragraph, if the taxpayer had used the straight line method permitted under section 167(b)(1) for such period, he would have used a salvage value of $5,000 and a useful life of 15 years. Depreciation under the straight line method would thus have been $3,000 each year, 1/15 of $45,000 (that is, $50,000 minus $5,000). As of January 1, 1978, the additional depreciation for the property is $29,000, as computed in the table below:

Year	Actual depreciation	Straight line	Additional depreciation (deficit)
1971	$10,000	$3,000	$7,000
1972	10,000	3,000	7,000
1973	10,000	3,000	7,000
1974	10,000	3,000	7,000
1975	10,000	3,000	7,000
1976		3,000	(3,000)
1977	....	3,000	(3,000)
Total	50,000	21,000	29,000

Example 4. Section 1250 property which has an adjusted basis of $108,000 is sold for $146,000 on December 31, 1972, and thus the gain realized is $38,000. The property was acquired on December 31, 1963. The applicable percentage for the period before January 1, 1970, is 12 percent (paragraph (d)(2) of § 1.1250–1) and the applicable percentage for the period after December 31, 1969, is 100 percent (paragraph (d)(1)(i)(*e*) of § 1.1250–1). The additional depreciation must be computed separately for the period before January 1, 1970, and for the period after December 31, 1969. Assume that the additional depreciation for the period before January 1, 1970, is $32,000 and that there is a deficit in additional depreciation of $2,000 for the period after December 31, 1969. Accordingly, the additional depreciation for the period before January 1, 1970 ($32,000) is reduced to $30,000 by the $2,000 deficit in additional depreciation for the period after December 31, 1969. Although section 1250(a)(1) applies to the property, none of the gain is recognized as ordinary income under that section since there is a deficit in additional depreciation for the period after December 31, 1969. Gain is recognized under section 1250(a)(2) since there is remaining gain of $38,000 (that is, gain realized, $38,000, minus the additional depreciation attributable to periods after December 31, 1969, zero). Since the additional depreciation attributable to the period before January 1, 1970 ($30,000), is lower than the gain realized ($38,000), the amount of gain recognized under section 1250(a)(2) is $3,600 (that is, 12 percent of $30,000).

Example 5. Section 1250 property which has an adjusted basis of $207,000 is sold for $267,000 on February 24, 1988, and thus the gain realized is $60,000. The property was acquired on April 30, 1970. The applicable percentage for the period from April 30, 1970, through December 31, 1981, is 60 percent (paragraph (d)(1)(i)(c) of § 1.1250–1) and the applicable percentage for the period from January 1, 1982, through February 24, 1988, is 100 percent (paragraph (d)(1)(i)(e) of § 1.1250–1). The additional depreciation must be computed separately for the period before January 1, 1982, and for the period after December 31, 1981. Assume that the additional depreciation for the period before January 1, 1982, is $43,000 and that there is a deficit in additional depreciation of $6,000 for the period after December 31, 1981. Accordingly, the additional depreciation for the period before January 1, 1982 ($43,000), is reduced to $37,000 by the $6,000 deficit for the period after December 31, 1981. There is no gain recognized under section 1250(a)(1) for the period after December 31, 1981, since there is a deficit in additional depreciation for that period. The gain recognized under section 1250(a)(1) for the period before January 1, 1982, is $22,200, that is, the lower of the gain realized attributable to that period ($60,000) or the additional depreciation attributable to that period ($37,000), or $37,000, multiplied by 60 percent, the applicable percentage.

(c) *Property held by lessee*—(1) *Amount depreciation would have been.* For purposes of paragraph (b) of this section, in case of a leasehold which is section 1250 property, in determining the amount the depreciation adjustments would have been under the straight line method in respect of any building or other improvement (which is section 1250 property) erected or made on the leased property, or in respect of any cost of acquiring the lease, the lease period shall be treated as including all renewal periods. See section 1250(b)(2). For determination of the extent to which a leasehold is section 1250 property, see paragraph (e)(3) of § 1.1250–1.

(2) *Renewal period.* (i) For purposes of this paragraph, the term *renewal period* means any period for which the lease may be renewed, extended, or continued pursuant to an option or options exercisable by the lessee (whether or not specifically provided for in the lease) except that the inclusion of one or more renewal periods shall not extend the period taken into account by more than two-thirds of the period on the basis of which the depreciation adjustments were allowed.

(ii) In respect of the cost of any building erected (or other improvement made) on the leased property by the lessee, or in respect of the portion of the cost of acquiring a leasehold which is attributable to an existing building (or other improvement) on the leasehold at the time the lessee acquires the leasehold, the inclusion of one or more renewal periods shall not extend the period taken into account to a period which exceeds the useful life remaining, at the time the leasehold is disposed of, of such building (or such other improvement). Determinations under this subdivision shall be made without regard to the proper period under section 167 or 178 for depreciating or amortizing a leasehold acquisition cost or improvement.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example: Assume that a leasehold improvement with a useful life of 30 years is properly amortized on the basis of a 10-year initial lease term. The lease is renewable for an additional 9 years. The period taken into account is 16⅔ years, that is, 10 years plus two-thirds of 10 years. If, however, the leasehold improvement were disposed of at the end of 12 years, and if its remaining useful life were only 3 years, then the period taken into account would be 15 years.

(d) *Depreciation adjustments*—(1) *General.* For purposes of this section, the term *depreciation adjustments* means, in respect of any property, all adjustments reflected in the adjusted basis of such property on account of deductions described in subparagraph (2) of this paragraph allowed or allowable (whether in respect of the same or other property) to the taxpayer or to any other person. For cases where the taxpayer can establish that the amount allowed for any period was less than the amount allowable, see subparagraph (4) of this paragraph. For determination of adjusted basis of property in a multiple asset account, see paragraph (c)(3) of § 1.167(a)–8. The term *depreciation adjustments* as used in this section does not have the same meaning as the term *adjustments reflected in the adjusted basis* as defined in paragraph (a)(2) of § 1.1245–2.

(2) *Deductions.* The deductions described in this subparagraph are allowances (and amounts treated as allowances) for depreciation or amortization (other than amortization under section 168, 169 (as enacted by section 704(a), Tax Reform Act of 1969 (83 Stat. 667)), or 185). Thus, for example, such deductions include a reasonable allowance for exhaustion, wear, and tear (including a reasonable allowance for obsolesence) under section 167, the periodic deductions referred to in § 1.162–11 in respect of a specified sum paid for the acquisition of a leasehold and in respect of the cost to a lessee of improvements on property of which he is the lessee. However, such deductions do not include deductions for the periodic payment of rent.

(3) *Depreciation of other taxpayers or in respect of other property.* (i) The depreciation adjustments (reflected in the adjusted basis) referred to in subparagraph (1) of this paragraph (*a*) are not limited to adjustments with respect to the property disposed of, nor to those allowed or allowable to the taxpayer disposing of such property, and (*b*) except as provided in subparagraph (4) of this paragraph, are taken into account, whether allowed or allowable in respect of the same or other property and whether to the taxpayer or to any other person. For manner of determining the amount of additional depreciation after certain dispositions, see paragraph (e) of this section.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example: On January 1, 1966, a calendar year taxpayer purchases for $100,000 a building for use in his trade or business. He takes depreciation deductions of $20,000 (the amount allowable), of which $3,000 is additional depreciation, and transfers the building to his son as a gift on January 1, 1968. Since the exception for gifts in section 1250(d)(1) applies, the taxpayer does not recognize gain under section 1250(a)(2). In the son's adjusted basis of $80,000 for the building there is reflected $3,000 of additional depreciation. On January 1, 1969, after taking a depreciation deduction of $10,000 (the amount allowable), of which $1,000 is additional depreciation, the son sells the building. At the time of the sale the additional depreciation is $4,000 ($3,000 allowed the father plus $1,000 allowed the son).

(4) *Depreciation allowed or allowable.* (i) For purposes of subparagraph (1) of this paragraph, generally all deductions (described in subparagraph (2) of this paragraph) allowed or allowable shall be taken into account. See section 1016(a)(2) and the regulations thereunder for the meaning of *allowed* and *allowable.* However, if a taxpayer can establish by adequate records or other sufficient evidence that the amount allowed for any period was less than the amount allowable for such period, the amount to be taken into account for such period shall be the amount allowed. The preceding sentence shall not apply for purposes of computing under paragraph (b)(1)(ii) of this section the amount such deductions would have been under the straight line method.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example: In the year 1969 it becomes necessary to determine the additional depreciation in respect of section 1250 property, the adjusted basis of which reflects a depreciation adjustment of $1,000 with respect to depreciation deductions allowable for the calendar year 1965 under the sum of the years-digits method. Under paragraph (b)(1)(ii) of this section, the depreciation which would have resulted under the straight line method for 1965 is $800. If the taxpayer can establish by adequate records or other sufficient evidence that he did not take, and was not allowed, any deduction for depreciation in respect of the property in 1965, then, for purposes of computing the depreciation adjustments in excess of straight line in respect of the property, the amount to be taken into account for 1965 as allowed or allowable is zero, and the amount to be taken into account in computing deductions which would have resulted under the straight line method in 1965 is $800. Thus, in effect, there is a deficit in additional depreciation for 1965 of $800.

(5) *Retired or demolished property.* Depreciation adjustments referred to in subparagraph (1) of this paragraph generally do not include adjustments in respect of retired or demolished portions of an item of section 1250 property. If a retired or demolished portion is replaced in a disposition described in section 1250(d)(4)(A) (relating to like kind exchanges and involuntary conversions), see paragraph (d)(7) of §1.1250–3.

(6) *Exempt organization.* In respect of property disposed of by an organization which is or was exempt from income taxes (within the meaning of section 501(a), the depreciation adjustments (reflected in the adjusted basis) referred to in subparagraph (1) of this paragraph shall include only adjustments allowed or allowable (i) in computing unrelated business taxable income (as defined in section 512(a)), or (ii) in computing taxable income of the organization for a period during which it was not exempt or, by reason of the application of section 502, 503, or 504, was denied its exemption.

(e) *Additional depreciation immediately after certain acquisitions*—(1) *Zero.* If on the date a person acquires property his basis for the property is determined solely (i) by reference to its cost (within the meaning of section 1012), (ii) by reason of the application of section 301(d) (relating to basis of property received in corporate distribution) or section 334(a) (relating to basis of property received in a liquidation in which gain or loss is recognized), or (iii) under the rules of section 334 (b)(2) or (c) (relating to basis of property received in certain corporate liquidations), then on such date the additional depreciation for the property is zero.

(2) *Transactions referred to in section 1250(d).* In the case of property acquired in a disposition described in section 1250(d) (relating to exceptions and limitations to application of section 1250), additional depreciation shall be computed in accordance with the rules prescribed in §1.1250–3.

(f) *Records to be kept and information to be filed*—(1) *Records to be kept.* In any case in which it is necessary to determine the additional depreciation of an item of section 1250 property, the taxpayer shall have available permanent records of all the facts necessary to determine with reasonable accuracy the amount of such additional depreciation, including the following:

(i) The date, and the manner in which, the property was acquired,

(ii) The taxpayer's basis on the date the property was acquired and the manner in which the basis was determined,

(iii) The amount and date of all adjustments to the basis of the property allowed or allowable to the taxpayer for depreciation adjustments referred to in paragraph (d)(1) of this section and the amount and date of any other adjustments by the taxpayer to the basis of the property, and

(iv) In the case of section 1250 property which has an adjusted basis reflecting depreciation adjustments referred to in paragraph (d)(1) of this section taken by the taxpayer with respect to other property, or by another taxpayer with respect to the same or other property, the information described in subdivisions (i), (ii), and (iii) of this subparagraph with respect to such other property or such other taxpayer.

(2) *Information to be filed.* If a taxpayer acquires in a transaction (other than a like kind exchange or involuntary conversion described in section 1250(d)(4)) section 1250 property which has a basis reflecting depreciation adjustments referred to in paragraph (d)(1) of this section allowed or allowable to another taxpayer, then the taxpayer shall file with its income tax return or information return for the taxable year in which the property is acquired a statement showing all information described in subparagraph (1) of this paragraph. See section 6012 (relating to persons required to make returns of income) and part III of subchapter A of chapter 61 of the Code (relating to information returns).

[T.D. 7084, 36 FR 273, Jan. 8, 1971, as amended by T.D. 7193, 37 FR 12956, June 30, 1972]

§ 1.1250–3 Exceptions and limitations.

(a) *Exception for gifts*—(1) *General rule.* Section 1250(d)(1) provides that no gain shall be recognized under section 1250(a) upon a disposition by gift. For purposes of this paragraph, the term *gift* shall have the same meaning as in paragraph (a) of § 1.1245–4. For reduction in amount of charitable contribution in case of a gift of section 1250 property, see section 170(e) and paragraph (c)(3) of § 1.170–1.

(2) *Disposition in part a sale or exchange and in part a gift.* Where a disposition of property is in part a sale or exchange and in part a gift, the disposition shall be subject to the provisions of § 1.1250–1 and the gain to which section 1250(a) applies, shall be computed under that section.

(3) *Treatment of property in hands of transferee.* If property is disposed of in a transaction which is a gift:

(i) The additional depreciation for the property in the hands of the transferee immediately after the disposition shall be an amount equal to (a) the amount of the additional depreciation for the property in the hands of the transferor immediately before the disposition, minus (b) the amount of any gain (in case the disposition is in part a sale or exchange and in part a gift) which would have been taken into account under section 1250(a) by the transferor upon the disposition if the applicable percentage had been 100 percent.

(ii) For purposes of computing the applicable percentage, the holding period under section 1250(e)(2) of property received as a gift in the hands of the transferee includes the transferor's holding period,

(iii) In case of a disposition which is in part a sale or exchange and in part a gift, if the adjusted basis of the property in the hands of the transferee exceeds its adjusted basis immediately before the transfer, the excess is an addition to capital account under paragraph (d)(2)(ii) of § 1.1250–5 (relating to property with 2 or more elements), and

(iv) If the property disposed of consists of two or more elements within the meaning of paragraph (c) of § 1.1250–5, see paragraph (e)(1) of § 1.1250–5 for the amount of additional depreciation and holding period for each element in the hands of the transferee.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) On May 15, 1967, Smith transfers section 1250 property to his son for $45,000. In the hands of Smith the property had an adjusted basis of $40,000 and a fair market value of $70,000. Thus, the gain realized is $5,000 (amount realized, $45,000, minus adjusted basis, $40,000), and Smith has made a gift of $25,000 (fair market value, $70,000, minus amount realized, $45,000).

(ii) Smith's holding period for the property is 80 full months and, thus, the applicable percentage under section 1250(a)(2) is 40 percent. The additional depreciation for the property is $10,000. Since the gain realized ($5,000) is lower than the additional depreciation ($10,000), Smith recognized as ordinary income under section 1250(a)(2) gain of $2,000 (that is, applicable percentage, 40 percent, multiplied by gain realized, $5,000) and the $3,000 remaining portion of the gain realized may be treated as gain from the sale of property described in section 1231.

(iii) On the date the son receives the property, the additional depreciation for the property in his hands is $5,000, that is, the additional depreciation for the property in the hands of the father immediately before the transfer ($10,000), minus the gain which would have been recognized under section 1250(a)(2) upon the transfer if the applicable percentage had been 100 percent ($5,000); for purposes of computing applicable percentage his holding period is his father's holding period of 80 full months; and under §1.1015–4 his unadjusted basis for the property is $45,000, that is, the amount he paid ($45,000) plus the excess (zero) of his father's adjusted basis over such amount.

(iv) The son sells the property for $80,000 on March 15, 1968, 10 full months after he received it from his father. Thus, his holding period is 90 full months (his father's holding period of 80 full months plus the 10 full months the son actually owned the property) and the applicable percentage under section 1250(a)(2) is 30 percent. Assume that no depreciation was allowed or allowable to the son. Thus, the son's adjusted basis and additional depreciation for the property on the date of the sale is the same as on the date he received it. Accordingly, the gain realized is $35,000 (selling price of $80,000, minus adjusted basis of $45,000). Since the additional depreciation ($5,000) is lower than the gain realized ($35,000), the son recognizes as ordinary income under section 1250(a)(2) gain of $1,500, that is, applicable percentage (30 percent) multiplied by additional depreciation ($5,000).

Example 2. Assume the same facts as in example (1), except that the son sells the property on June 15, 1969, 25 full months after he received it from his father. Thus, his holding period is 105 full months (his father's holding period of 80 full months plus the 25 full months the son actually owned the property) and the applicable percentage under section 1250(a)(2) is 15 percent. Assume further that on the date of the sale the adjusted basis of the property is $39,000, and that for the period the son actually owned the property there is a deficit in additional depreciation of $2,000. Accordingly, the gain realized is $41,000 (selling price of $80,000, minus adjusted basis of $39,000), and the additional depreciation for the property is $3,000 (that is, the additional depreciation for the property in the hands of the son on the date he received it, as determined in example (1), $5,000, minus the amount of the deficit in additional depreciation for the period the son actually owned the property, ($2,000). Since the additional depreciation ($3,000) is lower than the gain realized ($41,000), the son recognizes as ordinary income under section 1250(a)(2) gain of $450, that is, applicable percentage (15 percent) multiplied by additional depreciation ($3,000).

(b) *Exception for transfers at death*—(1) *General rule.* Section 1250(d)(2) provides that, except as provided in section 691 (relating to income in respect of a decedent), no gain shall be recognized under section 1250(a) upon a transfer at death. For purposes of this paragraph, the term *transfer at death* shall have the same meaning as in paragraph (b) of §1.1245–4.

(2) *Treatment of transferee.* (i) If as of the date a person acquires property from a decedent such person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), then (*a*) on the date of death the additional depreciation for the property is zero, and (*b*) for purposes of computing applicable percentage the holding period of the property under section 1250(e)(1)(A) is deemed to begin on the day after the date of death.

(ii) If property is acquired in a transfer at death to which section 1250(d)(2) applies, the amount of the additional depreciation for the property in the hands of the transferee immediately after the transfer shall be the amount (if any) of the additional depreciation in respect of the property allowed the transferee before the decedent's death, but only to the extent that the basis of the property (determined under section 1014(a)) is required to be reduced under the second sentence of section 1014(b)(9) (relating to adjustments to basis where property is acquired from a decedent prior to his death) by depreciation adjustments referred to in paragraph (d)(1) of § 1.1250–2 which give rise to such additional depreciation. For treatment of such property as having a special element with additional depreciation so computed, see paragraph (c)(5)(i) of § 1.1250–5 (relating to property with two or more elements). For purposes of determining applicable percentage, such special element shall have a holding period which includes the transferee's holding period for such property for the period before the decedent's death.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On March 6, 1966, Smith dies owning an item of section 1250 property. On March 7, 1968, the executor distributes the property to Smith's son pursuant to a specific bequest of the property in Smith's will. Under section 1014(a)(2) and paragraph (a)(2) of § 1.1014–4, the unadjusted basis of the property in the hands of the son is its fair market value on March 6, 1966 (the date Smith died), and the son is considered to have acquired the property on such date. Under section 1250(e)(1)(A), the son's holding period for the property begins on March 7, 1966 (the day after the day he is considered to have acquired the property). Thus, on March 7, 1968 (the date the property was distributed to the son), the holding period for the property is 24 full months, and the applicable percentage under section 1250(a)(2) is 96 percent. On such date, the additional depreciation for the property includes any additional depreciation in respect of the property for the period the property was possessed by the estate.

Example 2. H purchases section 1250 property in 1965 which he immediately conveys to himself and W, his wife, as tenants by the entirety. Under local law each spouse is entitled to one-half the income from the property. H and W file joint income tax returns for calendar years 1965, 1966, and 1967. Over the 3 years, depreciation allowed in respect of the property was $4,000 (the amount allowable) of which $500 is additional depreciation. One-half of these amounts are allocable to W. Thus, depreciation deductions of $2,000, of which $250 is additional depreciation, are allowable to W. On January 1, 1968, H dies and the entire value of the property at the date of death is included in H's gross estate. Since W's basis for the property (determined under section 1014(a)) is reduced (under the second sentence of section 1014(b)(9)) by the $2,000 depreciation deductions allowed W before H's death of which $250 is additional depreciation, the additional depreciation for the property in the hands of W immediately after H's death is $250.

(c) *Limitation for certain tax-free transactions*—(1) *General.* Section 1250(d)(3) provides that upon a transfer of property described in subparagraph (2) of this paragraph, the amount of gain taken into account by the transferor under section 1250(a) shall not exceed the amount of gain recognized to the transferor on the transfer (determined without regard to section 1250). For purposes of this subparagraph, in case of a transfer of both section 1250 property and nonsection 1250 property in one transaction, the amount realized from the disposition of the section 1250 property shall be deemed to consist of that portion of the fair market value of each property acquired which bears the same ratio to the fair market value of such acquired property as the amount realized from the disposition of the section 1250 property bears to the total amount realized. The preceding sentence shall be applied solely for purposes of computing the portion of the total gain (determined without regard to section 1250) which shall be recognized as ordinary income under section 1250(a). Section 1250(d)(3) does not apply to a disposition of property to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by chapter 1 of the Code.

(2) *Transfers covered.* The transfers described in this subparagraph are transfers of property in which the basis of the property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(i) Section 332 (relating to distributions in complete liquidation of an 80 percent or more controlled subsidiary corporation). For application of section 1250(d)(3) to such a complete liquidation, the principles of paragraph (c)(3) of § 1.1245–4 shall apply.

(ii) Section 351 (relating to transfer to a corporation controlled by transferor).

(iii) Section 361 (relating to exchanges pursuant to certain corporate reorganizations).

(iv) Section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings).

(v) Section 374(a) (relating to exchanges pursuant to certain railroad reorganizations).

(vi) Section 721 (relating to transfers to a partnership in exchange for a partnership interest).

(vii) Section 731 (relating to distributions by a partnership to a partner). For special carryover basis rule, see section 1250(d)(6)(A) and paragraph (f)(1) of this section.

(3) *Treatment of property in hands of transferee.* In the case of a transfer described in subparagraph (2) (other than subdivision (vii) thereof) of this paragraph:

(i) The additional depreciation for the property in the hands of the transferee immediately after the disposition shall be an amount equal to (*a*) the amount of the additional depreciation for the property in the hands of the transferor immediately before the disposition, minus (*b*) the amount of additional depreciation necessary to produce an amount equal to the gain taken into account under section 1250(a) by the transferor upon the disposition (taking into account the applicable percentage for the property),

(ii) For purposes of computing applicable percentage, the holding period under section 1250(e)(2) of the property in the hands of the transferee includes the transferor's holding period,

(iii) If the adjusted basis of the property in the hands of the transferee exceeds its adjusted basis immediately before the transferee, the excess is an addition to capital account under paragraph (d)(2)(ii) of §1.1250–5 (relating to property with 2 or more elements), and

(iv) If the property disposed of consists of 2 or more elements within the meaning of paragraph (c) of §1.1250–5, see paragraph (e)(1) of §1.1250–5 for the amount of additional depreciation and the holding period for each element in the hands of the transferee.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) Green transfers section 1250 property on March 1, 1968, to a corporation, which is not exempt from taxation, in exchange for cash of $9,000 and stock in the corporation worth $91,000, in a transaction qualifying under section 351. Thus, the amount realized is $100,000 ($9,000 plus $91,000). The property has an applicable percentage under section 1250(a)(2) of 60 percent, an adjusted basis of $40,000, and additional depreciation of $20,000. The gain realized is $60,000, that is, amount realized ($100,000) minus adjusted basis ($40,000). Since the additional depreciation ($20,000) is lower than the gain realized ($60,000), the amount of gain which would be treated as ordinary income under section 1250(a)(2) would be $12,000 (60 percent of $20,000) if the limitation provided in section 1250(d)(3) did not apply. Since under section 351(b) gain in the amount of $9,000 would be recognized to the transferor without regard to section 1250, the limitation provided in section 1250(d)(3) limits the gain taken into account by the transferor under section 1250(a)(2) to $9,000.

(ii) The amount of additional depreciation for the property in the hands of the transferee immediately after the transfer is $5,000, that is, the amount of additional depreciation before the transfer ($20,000) minus the amount of additional depreciation necessary to produce an amount equal to the gain recognized under section 1250(a)(2) upon the transfer ($15,000, that is, $9,000 of gain recognized divided by 60 percent, the applicable percentage). (If the property is subsequently disposed of, and for the period after the initial transfer there is additional depreciation in respect of the property, then at the time of the subsequent disposition the additional depreciation will exceed $5,000. If, however, for the period after the initial transfer there was a deficit in additional depreciation, then at the time of the subsequent disposition the additional depreciation would be less than $5,000.)

Example 2. (i) Assume the same facts as in example (1) except that the additional depreciation is $10,000. Since additional depreciation ($10,000) is lower than the gain realized ($60,000), the amount of gain which would be treated as ordinary income under section 1250(a)(2) would be $6,000 (60 percent of $10,000) if the limitation provided in section 1250(d)(3) did not apply. Since under section 351(b) gain in the amount of $9,000 would be recognized to the transferor without regard to section 1250, the limitation under section 1250(d)(3) does not prevent treatment of the entire $6,000 as ordinary income under section 1250(a)(2). The $3,000 remaining portion of the $9,000 gain may be treated as gain from the sale of property described in section 1231.

(ii) Immediately after the transfer, the amount of additional depreciation is zero, that is, the amount of additional depreciation before the transfer ($10,000) minus the amount of additional depreciation necessary to produce an amount equal to the gain taken into account under section 1250(a)(2) upon the transfer ($10,000) that is, $6,000 divided by 60 percent.

Example 3. (i) Miller transfers section 1250 property after December 31, 1969, to a corporation, which is not exempt from taxation, in exchange for cash of $9,000 and stock in the corporation worth $31,000, in a transaction qualifying under section 351. Thus, the amount realized is $40,000 ($9,000 plus $31,000). The property has an applicable percentage under paragraph (d)(1)(i)(*e*) of this section of 100 percent and an applicable percentage under paragraph (d)(2) of this section of 50 percent. The adjusted basis of the property on the date of the transfer is $24,000, and the gain realized is $16,000 (that is, amount realized, $40,000, minus adjusted basis, $24,000). The additional depreciation attributable to periods after December 31, 1969, is $8,000 and the additional depreciation attributable to periods before January 1, 1970, is $12,000. Since the additional depreciation attributable to periods after December 31, 1969 ($8,000), is lower than the gain realized ($16,000), the amount of gain which would be recognized as ordinary income under section 1250(a)(1) would be $8,000 (100 percent of $8,000) if the limitation provided in section 1250(d)(3) did not apply. In addition, gain is recognized under section 1250(a)(2) since there is a remaining potential gain of $8,000 (that is, gain realized, $16,000, minus additional depreciation attributable to periods after December 31, 1969 ($8,000)). Since the remaining potential gain ($8,000) is lower than the additional depreciation attributable to periods before January 1, 1970 ($12,000), the amount of gain which would be recognized under section 1250(a)(2) would be $4,000 (50 percent of $8,000) if the limitation in section 1250(d)(3) did not apply. Since under section 351(b) gain in the amount of $9,000 would be recognized to the transferor without regard to section 1250, the limitation in section 1250(d)(3) limits the gain taken into account by the transferor under section 1250(a) to $9,000. Since the section 1250(a)(1) gain is considered as recognized first under paragraph (a)(1)(iii) of § 1.1250–1, of the $9,000 of gain recognized, $8,000 is recognized under section 1250(a)(1) and $1,000 is recognized under section 1250(a)(2).

(ii) The amount of additional depreciation for the property in the hands of the transferee immediately after the transfer is $10,000, the amount of additional depreciation immediately before the transfer ($20,000), minus the sum of (*a*) the amount of additional depreciation necessary to produce an amount equal to the gain recognized under section 1250(a)(1) upon the transfer, $8,000 (that is, gain recognized under section 1250(a)(1), $8,000, divided by 100 percent, the applicable percentage under section 1250(a)(1)), plus (*b*) the amount of additional depreciation necessary to produce an amount equal to the gain recognized under section 1250(a)(2) upon the transfer, $2,000 (that is, gain recognized under section 1250(a)(2), $1,000, divided by 50 percent, the applicable percentage under section 1250(a)(2)). Of this amount, zero (that is, $8,000 minus $8,000) is attributable to periods after December 31, 1969, and $10,000 ($12,000 minus $2,000) is attributable to periods before January 1, 1970.

(d) *Limitation for like kind exchanges and involuntary conversions*—(1) *Limitation on gain.* (i) Under section 1250(d)(4)(A), if property is disposed of and gain (determined without regard to section 1250) is not recognized in whole or in part under section 1031 (relating to like kind exchanges) or section 1033 (relating to involuntary conversions), then the amount of gain taken into account by the transferor under section 1250(a) shall not exceed the greater of the two limitations set forth in subdivisions (ii) and (iii) of this subparagraph. Immediately after the transfer the basis of the acquired property shall be determined under subparagraph (2), (3), or (4) (whichever is applicable) of this paragraph, and its additional depreciation shall be computed under subparagraph (5) of this paragraph. The holding period of the acquired property for purposes of computing applicable percentage, which is determined under section 1250(e)(1), does not include the holding period of the property disposed of. In the case of a disposition of section 1250 property and other property in one transaction, see subparagraph (6) of this paragraph. In case of a disposition described in section 1250(d)(4)(A) of a portion of this item of property, see subparagraph (7) of this paragraph.

(ii) For purposes of this subparagraph, the first limitation is the sum of:

(*a*) The amount of gain recognized on the disposition under section 1031 or 1033 (determined without regard to section 1250), plus

(*b*) An amount equal to the cost of any stock purchased in a corporation which (without regard to section 1250) would result in nonrecognition of gain under section 1033(a)(3)(A).

(iii) For purposes of this subparagraph, the second limitation is the excess (if any) of:

(*a*) The amount of gain which would (without regard to section 1250(d)(4)) be taken into account under section 1250(a), over

(*b*) The fair market value (or cost in the case of a transaction described in section 1033(a)(3)) of the section 1250 property acquired in the transaction.

(iv) The provisions of this subparagraph may be illustrated by the following example:

Example: A taxpayer receives $96,000 of insurance proceeds upon the destruction of section 1250 property by fire. If section 1250(d)(4)(A) did not apply to the disposition, $16,000 of gain would be recognized under section 1250(a). In acquisitions qualifying under section 1033(a)(3)(A), he uses $90,000 of the proceeds to purchase property similar or related in service or use to the property destroyed, of which $42,000 is for one item of section 1250 property and $48,000 is for one piece of land, and $5,000 of the proceeds to purchase stock in the acquisition of control of a corporation owning property similar or related in service or use to the property destroyed. The taxpayer properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain (determined without regard to section 1250) to $1,000, that is, the excess of the amount realized from the conversion ($96,000) over the cost of the property acquired in acquisitions qualifying under section 1033(a)(3)(A) ($95,000, that is, $90,000 plus $5,000). The amount of gain recognized under section 1250(a) is $6,000, determined in the following manner:

The first limitation:	
(*a*) Amount of gain recognized under section 1033(a)(3), determined without regard to section 1250(a)	$1,000
(*b*) Fair market value of stock in a corporation which qualifies under section 1033(a)(3)(A)	5,000
(*c*) Sum of (*a*) plus (*b*)	6,000
The second limitation:	
(*d*) Amount of gain which would be recognized under section 1250(a) if section 1250(d)(4) did not apply	16,000
(*e*) Cost of section 1250 property acquired in transaction	42,000
(*f*) Excess of (*d*) over (*e*)	0

Since the first limitation ($6,000) exceeds the second limitation (zero), the amount of gain recognized under section 1250(a) is $6,000. The balance ($10,000) of the gain realized ($16,000) is not recognized.

(2) *Basis of property purchased upon involuntary conversion into money.* (i) If section 1250 property is purchased in a compulsory or involuntary conversion to which section 1033(a)(3) applies, and if by reason of the application of section 1250(d)(4)(A) all or part of the gain computed under section 1250(a) is not taken into account, then the basis of the section 1250 property and other purchased property shall be determined under the rules prescribed in this subparagraph. See section 1250(d)(4)(D).

(ii) The total basis of all purchased property, the acquisition of which results in the nonrecognition of any part of the gain realized upon the transaction, shall be (*a*) its cost, reduced by (*b*) the portion of the total gain realized which was not recognized. To the extent that section 1250(d)(4)(A)(i) prevents the purchase of stock from resulting in nonrecognition of gain, the basis of purchased stock is its cost.

(iii) If purchased property consists of both section 1250 property and other property, the total basis computed under subdivision (ii) of this subparagraph shall be allocated between the section 1250 property (treated as a class) and the other property (treated as a class) in proportion to their respective costs, except that for purposes of this subdivision (but not subdivision (iv) of this subparagraph) the cost of the section 1250 property shall be deemed to be the excess of (*a*) its actual cost, over (*b*) the gain not taken into account under section 1250(a) by reason of the application of section 1250(d)(4)(A).

(iv) If the property acquired consists of more than one item of section 1250 property (or of more than one item of other property), the total basis of the section 1250 property (or of the other property), as computed under subdivisions (ii) and (iii) of this subparagraph, shall be allocated to each item of section 1250 property (or other property) in proportion to their respective actual costs.

(v) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Assume the same facts as in the example in subparagraph (1)(iv) of this paragraph. Assume further that the portion of the gain realized which was not recognized under section 1033(a)(3) or 1250(a) upon the transaction is $60,000, of which the gain computed under section 1250(a) which is not taken into account by reason of the application of section 1250(d)(4)(A) is $10,000, that is, the excess of the gain which would have been recognized under section 1250(a) if section 1250(d)(4)(A) did not apply ($16,000) over the gain recognized under section 1250(a) ($6,000). In such example $95,000 of proceeds were used to purchase property in acquisitions qualifying under section 1033(a)(3)(A) of which $42,000 was for section 1250 property, $48,000 for land, and $5,000 for stock in a corporation. The basis of each acquired property is determined in the following manner:

(*a*) Under subdivision (ii) of this subparagraph, the total basis of the acquired properties (other than the stock) is $30,000, that is, their cost ($90,000, of which $42,000 is for section 1250 property and $48,000 is for land), reduced by the portion of the total gain realized which was not recognized ($60,000).

(*b*) Under subdivision (iii) of this subparagraph, such total basis is allocated between the section 1250 property and the land in proportion to their respective costs, and for this purpose the cost of the section 1250 property is considered to be $32,000, that is, its actual cost ($42,000) minus the gain not recognized under section 1250(a) by reason of the application of section 1250(d)(4)(A) ($10,000). Thus, the basis of the section 1250 property is $12,000 (32/80 of $30,000), and the basis of the land is $18,000 (48/80 of $30,000).

(*c*) The basis of the purchased stock is its cost of $5,000. See last sentence of subdivision (ii) of this subparagraph.

Example 2. Assume the same facts as in example (1) except that the section 1250 property purchased for $42,000 consists of 2 items of such property ($10,500 for C, and $31,500 for D), and that the land purchased for $48,000 consists of 2 pieces of land ($12,000 for X, and $36,000 for Y). Under subdivision (iv) of this subparagraph, the total basis for each class of property is allocated between the individual properties of such class in proportion to their respective actual costs. Thus, the total basis of $12,000, as determined in example (1), for the section 1250 property is allocated as follows:

To C: $12,000×($10,500/$42,000)	$3,000
To D: $12,000×($31,500/$42,000)	9,000
Total	12,000

The total basis of $18,000, as determined in example (1), for the land is allocated as follows:

To X: $18,000×($12,000/$48,000)	$4,500
To Y: $18,000×($36,000/$48,000)	13,500
Total	18,000

(3) *Basis of property acquired upon involuntary conversion into similar property.* If property is involuntarily converted into property similar or related in service or use in a transaction to which section 1033(a)(1) applies, and if by reason of the application of section 1250(d)(4)(A) all or part of the gain computed under section 1250(a) is not taken into account, then:

(i) The total basis of the acquired property shall be determined under the first sentence of section 1033(c), and

(ii) If more than one item of property is acquired, such total basis shall be allocated to the individual items of property acquired in accordance with the principles prescribed in subparagraph (2) (iii) and (iv) of this paragraph, except that an amount equivalent to the fair market value of each item of property on the date acquired shall be treated as its actual cost.

(4) *Basis of property acquired in like kind exchange.* If section 1250 property is transferred in an exchange described in section 1031 (a) or (b), and if by reason of the application of section 1250(d)(4)(A) all or part of the gain computed under section 1250(a) is not taken into account, then:

(i) The total basis of the property (including nonsection 1250 property) acquired of the type permitted to be received under section 1031 without recognition of gain or loss shall be determined under section 1031(d), and

(ii) If more than one item of property of such type was received, such total basis shall be allocated to the individual items of property of such type in accordance with the principles prescribed in subparagraph (2) (iii) and (iv) of this paragraph, except that an amount equivalent to the fair market value of each such item of property on the date received shall be treated as its actual cost.

(5) *Additional depreciation for property acquired in like kind exchange or involuntary conversion.* (i) If property is disposed of in a transaction described in section 1031 or 1033, and if by reason of the application of section 1250(d)(4)(A) all or part of the gain computed under section 1250(a) is not taken into account, then the additional depreciation for the acquired property immediately after the transaction (as computed under section 1250(d)(4)(E)) shall be an amount equal to the amount of gain computed under section 1250(a) which

was not taken into account by reason of the application of section 1250(d)(4)(A).

(ii) In case more than one item of section 1250 property is acquired in the transaction, the additional depreciation computed under subdivision (i) of this subparagraph shall be allocated to each such item of section 1250 property in proportion to their respective adjusted bases.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. (a) On January 15, 1969, section 1250 property X is condemned and proceeds of $100,000 are received. On such date, X's adjusted basis is $25,000, the additional depreciation is $10,000, and the applicable percentage under section 1250(a)(2) is 70 percent. Since the additional depreciation ($10,000) is less than the gain realized ($75,000, that is, $100,000 minus 25,000) the amount of gain computed under section 1250(a)(2) (without regard to section 1250(d)(4)(A)) is $7,000, that is, 70 percent of $10,000.

(b) On March 1, 1969, all the proceeds are used to purchase section 1250 property Y in a transaction qualifying under section 1033(a)(3)(A) for nonrecognition of gain. Accordingly, the gain not recognized by reason of the application of section 1033(a)(3)(A) is $75,000, of which $7,000 is gain computed under section 1250(a)(2) which is not taken into account by reason of the application of section 1250(d)(4)(A). See subparagraph (1) of this paragraph.

(c) Immediately after the transaction, Y's basis is $25,000, that is, its cost ($100,000) minus the total gain realized which was not recognized ($75,000), and the additional depreciation (as computed under section 1250(d)(4)(E)) is $7,000, that is, the amount of gain not taken into account under section 1250(a)(2) by reason of the application of section 1250(d)(4)(A).

(d) On December 15, 1969, before any depreciation deductions were allowed or allowable in respect of Y, Y is sold for $90,000. Under section 1250(e)(1), the holding period of Y is 9 months, and thus, under section 1250(a)(2), the applicable percentage is 100 percent. Since the additional depreciation ($7,000) is less than the gain realized ($65,000, that is $90,000 minus $25,000), the amount of gain recognized under section 1250(a)(2) as ordinary income is $7,000, that is, 100 percent of $7,000.

Example 2. Assume the same facts as in example (1), except that property Y was purchased on June 15, 1962, and that 90 full months thereafter, or December 15, 1969, it is sold for $35,000. Thus the applicable percentage under section 1250(a)(2) is 30 percent. Assume further that at the time of such sale Y's adjusted basis is $5,000 and additional depreciation in respect of Y for periods after it was acquired is $2,500. Thus, the additional depreciation at the time of the sale is $9,500, that is, the sum of the additional depreciation in respect of Y attributable to X as computed under section 1250(d)(4)(E) in (*c*) of example (1) ($7,000), plus the additional depreciation attributable to periods after Y was acquired ($2,500). Since the additional depreciation ($9,500) is less than the gain realized ($30,000, that is, $35,000 minus $5,000), the gain recognized under section 1250(a)(2) as ordinary income is $2,850, that is, 30 percent of $9,500.

(6) *Single disposition of section 1250 property and property of different class.* (i) For purposes of this subparagraph:

(*a*) Section 1250 property, section 1245 property (as defined in section 1245(a)(3)), and other property shall each be treated as a separate class of property, and

(*b*) The term *qualifying property* means property which may be acquired without recognition of gain under the applicable provision of section 1031 or 1033 (applied without regard to section 1250 or 1245) upon the disposition of property.

(ii) If upon a sale of section 1250 property gain would be recognized under section 1250(a) and if such section 1250 property together with property of a different class or classes are disposed of in one transaction in which gain is not recognized in whole or in part under section 1031 or 1033 (without regard to sections 1245 and 1250), then:

(*a*) The total amount realized shall be allocated between the different classes of property disposed of in proportion to their respective fair market values,

(*b*) The amount realized upon the disposition of property of a class shall be deemed to consist of so much of the fair market value of qualifying property of the same class acquired as is not in excess of the amount realized from the property of such class disposed of,

(*c*) The remaining portion (if any) of the amount realized upon the disposition of property of such class shall be deemed to consist of so much of the fair market value of any other property acquired as is not in excess of such remaining portion, and

(*d*) For purposes of applying (*c*) of this subdivision, the fair market value of acquired property shall be taken into account only once and in such manner as the taxpayer determines.

(iii) The amounts determined under this subparagraph in respect of property shall apply for all purposes of the Code.

(iv) The application of this subparagraph may be illustrated by the following example:

Example: (a) Green owns property consisting of land and a fully equipped factory building thereon. The property is condemned and proceeds of $100,000 are received. If the property were sold for $100,000, gain of $40,000 would be recognized of which $10,000 would be recognized as ordinary income under section 1250(a). Proceeds of $95,000 are used to purchase property similar or related in service or use to the condemned property and under section 1033(a)(3)(A) (without regard to sections 1245 and 1250) recognition of gain is limited to $5,000. The fair market values by classes of the property disposed of, and of the property acquired, are summarized in the table below:

	Fair market value of property	
	Disposed of	Acquired
Section 1245 property	$35,000	$55,000
Section 1250 property	45,000	28,000
Land	20,000	12,000
Cash		5,000
	100,000	100,000

(*b*) The allocations under subdivision (ii) of this subparagraph are summarized in the table below:

Property disposed of	Property acquired			Cash Remaining
	Sec. 1245 Property	Sec. 1250 Property	Land	
$35,000 of section 1245 property	$35,000			
$45,000 of section 1250 property	[1] 17,000	$28,000		
$20,000 of land	[1] 3,000		$12,000	[1] $5,000
Total	55,000	28,000	12,000	5,000

[1] Determined by taxpayer pursuant to subdivision (ii)(d) of this subparagraph.

(*c*) Upon the disposition of the section 1245 property, only section 1245 property is acquired, and thus gain (if any) would not be recognized under section 1245(a)(1). See section 1245(b)(4). Upon the disposition of the section 1250 property gain under section 1250(a) would not be recognized by reason of the application of section 1250(d)(4)(A). See subparagraph (1) of this paragraph. If the gain realized on the disposition of the land is not less than $5,000, then under section 1033(a)(3)(A) the gain recognized would be $5,000, that is, an amount equal to the portion of the proceeds from the disposition of the land ($5,000) not invested in qualifying property.

(7) *Disposition of portion of property*. A disposition described in section 1250(d)(4)(A) of a portion of an item of property gives rise to an addition to capital account described in the last sentence of paragraph (d)(2)(i) of § 1.1250–5 (relating to property with 2 or more elements). If the addition to capital account is a separate improvement within the meaning of paragraph (d) of § 1.1250–5, and thus an element, then immediately after the addition is made the amount of additional depreciation for such separate improvement shall be computed under subparagraph (5) of this paragraph by treating such portion and such addition as separate properties. If the addition is not a separate improvement, then immediately after the addition is made such property is considered under paragraph (c)(5)(ii) of § 1.1250–5 as having a special element with the same amount of additional depreciation so computed. For purposes of computing applicable percentage, the holding period of the separate improvement or special element (as the case may be), which is determined under section 1250(e)(1), does not include the holding period of the property disposed of.

(e) *Sections 1071 and 1081 transactions*—(1) *General.* This paragraph prescribes regulations under section 1250(d)(5) which apply in the case of a disposition of section 1250 property in a transaction in which gain (determined without regard to section 1250) is not recognized in whole or in part by reason of the application of section 1071 (relating to gain from sale or exchange to effectuate policies of FCC) or section 1081 (relating to gain from sale or exchange in obedience to order of SEC).

(2) *Involuntary conversion treatment under section 1071.* If section 1250 property is disposed of and gain (determined without regard to section 1250) is not recognized in whole or in part solely by reason of an election under the first sentence of section 1071(a) to treat the transaction as an involuntary conversion, the consequences of the transaction shall be determined under the principles of paragraph (d) of this section.

(3) *Basis reduction under sections 1071 or 1082(a)(2).* (i) If section 1250 property is disposed of and gain (determined without regard to section 1250) is not recognized in whole or in part by reason of a reduction in basis of property pursuant to an election under section 1071(a) or the application of section 1082(a)(2), then the amount of gain taken into account by the transferor under section 1250(a) shall not exceed the sum of:

(*a*) The amount of gain recognized on such disposition (determined without regard to section 1250), plus

(*b*) In case involuntary conversion treatment was also elected under section 1071(a), an amount equal to the cost of any stock purchased in a corporation which (without regard to section 1250) would result in nonrecognition of gain under section 1033(a)(3), as modified by section 1071(a), plus

(*c*) The portion of the gain computed under section 1250(a) (without regard to this paragraph) which is neither taken into account under (*a*) or (*b*) of this subdivision nor applied under subdivision (ii) of this subparagraph to reduce the basis of section 1250 property.

(ii)(*a*) The amount of gain computed under section 1250(a) (without regard to this paragraph) which is not taken into account under subdivision (i) (*a*) or (*b*) of this subparagraph shall be applied to the amount by which the basis of the section 1250 property was reduced under section 1071(a) or 1082(a)(2), as the case may be, before other gain (which is not gain computed under section 1250(a)) is so applied.

(*b*) If the basis of more than one item of section 1250 property was so reduced, the gain applied under (*a*) of this subdivision to all such section 1250 properties shall be applied to such items in proportion to the amounts of their respective basis reductions.

(*c*) Any gain not applied under (*a*) of this subdivision shall be applied to the amount by which the basis of the non-section 1250 property was reduced.

(iii) If gain computed under section 1250 is applied under subdivision (ii) of this subparagraph to reduce the basis of section 1250 property, the amount so applied shall be treated as additional depreciation in respect of such section 1250 property. For treatment of such section 1250 property as having a special element with additional depreciation consisting of such amount, see paragraph (c)(5)(i) of §1.1250–5. For purposes of computing applicable percentage, such special element shall have a holding period beginning on the day after the date as of which the property's basis was so reduced.

(4) *Section 1081(d)(1)(A) transaction.* No gain shall be recognized under section 1250(a) upon an exchange of property as to which gain is not recognized (without regard to section 1250) because of the application of section 1081(d)(1)(A) (relating to transfers within system group). For treatment of property in the hands of a transferee, the principles of paragraph (c)(3) of this section shall apply.

(f) *Property distributed by a partnership to a partner*—(1) *General.* For purposes of section 1250 (d)(3) and (e)(2), the basis of section 1250 property distributed by a partnership to a partner shall be determined by reference to the adjusted basis of such property to the partnership. Thus, if section 731 applies to a distribution of section 1250 property by a partnership to a partner, then even though the partner's basis is not determined for other purposes by reference to the partnership's basis, (i) the amount of gain taken into account by the partnership under section 1250(a) is limited by section 1250(d)(3) to the amount of gain recognized to the partnership upon the distribution (determined without regard to section 1250), and (ii) the holding period of the property in the hands of the partner shall, under section 1250(e)(2), include the holding period of the property in the hands of the partnership. For nonapplication of section 1250(d)(3) to a disposition to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by chapter 1 of the Code, see paragraph (c)(1) of this section.

(2) *Treatment of property distributed by partnership.* (i) If section 1250 property is distributed by a partnership to a partner in a distribution in which no part of the partnership's *potential section 1250 income* in respect of the property was recognized as ordinary income to the partnership under paragraph (b)(2)(ii) of §1.751–1, the additional depreciation for the property in the hands of the distributee attributable to periods before the distribution shall be an amount equal to the total potential section 1250 income of the partnership in respect of the property immediately before the distribution, recomputed as if the applicable percentage for the property had been 100 percent. Under paragraph (c)(4) of §1.751–1, the potential section 1250 income is, in effect, the gain to which section 1250(a) would have applied if the property had been sold by the partnership immediately before the distribution at its fair market value at such time.

(ii) If upon the distribution any potential section 1250 income in respect of the property was recognized to the partnership under paragraph (b)(2)(ii) of §1.751–1, then after the distribution the additional depreciation shall be an amount equal to (*a*) the total potential section 1250 income in respect of the property, as recomputed in subdivision (i) of this subparagraph, minus (*b*) the amount of potential section 1250 income which would have been recognized to the partnership under paragraph (b)(2)(ii) of §1.751–1 if the applicable percentage for the property had been 100 percent.

(iii) If the partner's basis for the property immediately after the transaction exceeds the partnership's adjusted basis for the property immediately before the transaction, the excess may be an addition to capital account under paragraph (d)(2)(ii) of §1.1250–5 (relating to property with two or more elements).

(3) *Examples.* The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. (i) A partnership distributes a building to Smith on January 1, 1969, in a complete liquidation of his partnership interest to which section 736(a) does not apply. On the date of the distribution, the partnership's holding period for the property is 40 full months and, accordingly, the applicable percentage under section 1250(a)(2) is 80 percent. On such date, the partnership's additional depreciation for the building ($6,250) is lower than the excess ($40,000) of its fair market value ($140,000) over adjusted basis ($100,000). Thus, under paragraph (c)(4) of §1.751–1, the partnership's potential section 1250 income in respect of the building is $5,000 (80 percent of $6,250). Assume that section 751(b) does not apply to the distribution. Accordingly, no gain would be recognized to the partnership under section 731(b) (without regard to the application of section 1250). Smith's basis for his partnership interest was $150,000, and under section 732(b) Smith's basis for the building is equal to his basis for his partnership interest. Thus, Smith's basis for the building is not determined by reference to the partnership's basis for the building. Nevertheless, under subparagraph (1) of this paragraph, no gain is recognized to the partnership under section 1250(a)(2) and Smith's holding period for the property includes the partnership's holding period.

(ii) Six full months after Smith received the building in the distribution, or July 1, 1969, he sells it for $153,000. Assume that no depreciation was allowed or allowable to Smith for the building, and that the special rules under §1.1250–5 for property with two or more elements do not apply. Since Smith's holding period for the building includes its holding period in the hands of the partnership, his holding period is 46 full months (40 full months for the partnership plus 6 full months for Smith) and the applicable percentage under section 1250(a)(2) is 74 percent.

(iii) Since no potential section 1250 income was recognized to the partnership under paragraph (b)(2)(ii) of §1.751–1, the additional depreciation for the building attributable to periods before the distribution is determined under the provisions of subparagraph (2)(i) of this paragraph. Under such provisions, the potential section 1250 income to the partnership, which was actually $5,000 (that is, 80 percent of $6,250), is recomputed as if the applicable percentage were 100 percent, and thus such additional depreciation is $6,250 (that is, 100 percent of $6,250). Since no depreciation was allowed or allowable for the building in Smith's hands, the additional depreciation for the building attributable to Smith's total holding period (46 full months) is $6,250. Since the gain realized ($3,000, that is, amount realized, $153,000, minus adjusted basis, $150,000), is lower than the additional depreciation ($6,250), the gain recognized to Smith under section 1250(a)(2) is $2,220 (that is, 74 percent of $3,000).

Example 2. Assume the facts as in example (1) except that as a result of the distribution the partnership recognizes under paragraph (b)(2)(ii) of §1.751–1 potential section 1250 income of $1,000 (that is, 80 percent of $1,250). The additional depreciation attributable to periods before the distribution, as determined under the provisions of subparagraph (2)(ii) of this paragraph, is $5,000, that is, (*a*) the total potential section 1250 income in respect of the property, recomputed in example (1) as if the applicable percentage were 100 percent ($6,250), minus (*b*) the amount of potential section 1250 income which would have been recognized to the partnership under paragraph (b)(2)(ii) of §1.751–1 if the applicable percentage for the property had been 100 percent ($1,250, that is, 100 percent of $1,250).

(4) *Treatment of partnership property after certain transactions.* If under paragraph (b)(3) of §1.751–1 (relating to certain distributions of partnership property other than section 751 property treated as sales or exchanges) a partnership is treated as purchasing section 1250 property (or a portion thereof) from a distributee who relinquishes his interest in such property (or portion), then after the date of such purchase the following rules shall apply:

(i) If only a portion of the property is treated as purchased, there shall be excluded from the additional depreciation for the remaining portion any additional depreciation in respect of the purchased portion for periods before such purchase.

(ii) In respect of the purchased property (or portion), (*a*) as of the date of purchase the amount of additional depreciation shall be zero, and (*b*) for purposes of computing applicable percentage the holding period shall begin on the day after the date of such purchase.

(5) *Cross reference.* See paragraph (f) of §1.1250–1 for the amount of additional depreciation for partnership property in respect of a partner who acquired his partnership interest in certain transactions when an election under section 754 (relating to optional adjustments to basis of partnership property) was in effect.

(g) *Disposition of principal residence*—(1) *In general.* (i) Section 1250(d)(7)(A) provides that section 1250(a) shall not apply to a disposition of property by a taxpayer to the extent the property is used by the taxpayer as his principal residence (within the meaning of section 1034(a) and the regulations thereunder, relating to a sale or exchange of residence). Thus, for example, if a doctor sells a house, of which one portion was used as his principal residence within the meaning of section 1034(a) and the other portion was properly subject to the allowance for depreciation as property used in his trade or business, then, by reason of the application of section 1250(d)(7)(A), section 1250(a) does not apply in respect of the disposition of the portion used as his principal residence. The provisions of this subparagraph shall apply regardless of whether section 1034 applies. Thus, for example, if section 1034 did not apply to the sale because the doctor did not invest in a new principal residence within the period specified in section 1034, nevertheless section 1250(a) would not apply to the disposition of the portion used as a principal residence.

(ii) Section 1250(d)(7)(B) provides that section 1250(a) shall not apply to a disposition of section 1250 property by a taxpayer who, in respect of the property, satisfies the age and ownership requirements of section 121 (relating to exclusion from gross income of gain on sale or exchange of residence of individual who has attained age 65), but only to the extent the taxpayer satisfies the use requirements of section 121 in respect of such property. Thus, if a taxpayer has attained the age of 65 before the date on which he disposes of section 1250 property, and if during the 8-year period ending on the date of the disposition the property has been owned and used by the taxpayer solely as his principal residence for periods aggregating 5 years or more, then section 1250(a) does not apply in respect to the disposition. This result would not be changed even if the taxpayer does not or cannot make the election provided for in section 121 and even if section 121 applies to only a portion of the gain because the adjusted sales price exceeds the $20,000 limitation in section 121(b)(1). If, however, only a portion of the property has been used as his principal residence for such periods aggregating 5 years or more, then, by reason of the application of section

1250(d)(7)(B), section 1250(a) is inapplicable only to the portion so used. For special rules for determining whether the age, ownership, and use requirements of section 121 are treated as satisfied, and for the manner of applying such requirements, see section 121(d) and the regulations thereunder.

(2) *Concurrent operation of section 1250(d)(7) with other provisions.* Upon the disposition of a principal residence, gain computed under section 1250(a) may not be recognized in whole or in part by reason of the application of both the provisions of section 1250(d)(7) and the provisions of one of the other exceptions or limitations enumerated in section 1250(d). Thus, for example, if an entire house is transferred as a gift, and if section 1250(d)(7) applies to only a portion of the house, then section 1250(d)(1) excepts the disposition of the entire house from the application of section 1250(a).

(3) *Special rule.* If by reason of section 1250(d)(7) a disposition is partially excepted from the application of section 1250(a), and if no other paragraph of section 1250(d) excepts the disposition entirely from such application, then the gain to which section 1250(a) applies shall be an amount which bears the same ratio to (i) the gain computed under section 1250(a) (without regard to section 1250(d)(7)), as (ii) the fair market value of the portion of the property to which the exception in section 1250(d)(7) does not apply, bears to (iii) the total fair market value of the property. Thus, for example, if under paragraph (a)(2) of this section gain of $300 would be recognized as ordinary income under section 1250(a) (without regard to section 1250(d)(7)) upon a combined sale and gift of section 1250 property, and if the property has a fair market value of $25,000 of which $10,000 is properly allocable to a portion not used as a principal residence, then the amount of gain recognized as ordinary income under section 1250(a) would be $120 (10/25 of $300).

(4) *Treatment of property in hands of transferee.* If property is disposed of in a transaction to which section 1250(d)(7) applies, and if its basis in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of section 1250(d)(1) (relating to gifts) or section 1250(d)(3) (relating to certain tax-free transactions), then the treatment of the property in the hands of the transferee shall be determined under paragraph (a)(3) or (c)(3) (whichever is applicable) of this section

(5) *Treatment of property acquired in like kind exchange or involuntary conversion.* If property is disposed of in a transaction to which section 1250(d)(7) (relating to principal residence) and section 1250(d)(4) (relating to like kind exchanges and involuntary conversions) apply, then:

(i) The basis of the property acquired shall be determined under the applicable provisions of paragraph (d) (2), (3), or (4) of this section, applied as if all gain computed under section 1250(a) (except any gain not recognized solely by reason of the application of section 1250(d)(7)) were not taken into account by reason of section 1250(d)(4)(A),

(ii) The additional depreciation for the property acquired shall be determined in the manner prescribed in paragraph (d)(5) of this section, so applied, and

(iii) For purposes of computing the applicable percentage, the holding period of the acquired property shall be determined under section 1250(e)(1).

(6) *Treatment of property acquired in section 1034 transaction.* If a principal residence is disposed of in a transaction to which section 1250(d)(7) applies, and if by reason of the application of section 1034 (relating to sale or exchange of residence) the basis of property acquired in the transaction is determined by reference to the basis in the hands of the taxpayer of the property disposed of, then:

(i) The additional depreciation for the acquired property immediately after the transaction shall be an amount equal to (*a*) the amount of the additional depreciation for the property disposed of, minus (*b*) the amount of any gain which would have been taken into account under section 1250(a) by the transferor upon the disposition if the applicable percentage for the property had been 100 percent,

(ii) For purposes of computing the applicable percentage, the holding period of the acquired property includes the holding period of the disposed of property (see section 1250(e)(3)),

(iii) If the adjusted basis of the acquired property exceeds the adjusted basis immediately before the transfer of the property disposed of, the excess is an addition to capital account under paragraph (d)(2)(ii) of §1.1250–5 (relating to property with more than one element), and

(iv) If the property disposed of consisted of two or more elements within the meaning of paragraph (c) of §1.1250–5, see paragraph (e)(3) of §1.1250–5 for the amount of additional depreciation and the holding period for each element in the hands of the transferee.

(h) *Limitation for disposition of qualified low-income housing*—(1) *Limitation on gain.* (i) Under section 1250(d)(8)(A), if section 1250 property is disposed of and gain (determined without regard to section 1250) is not recognized in whole or in part under section 1039 (relating to certain sales of low-income housing projects), then the amount of gain recognized by the transferor under section 1250(a) shall not exceed the greater of:

(*a*) The amount of gain recognized under section 1039 (determined without regard to section 1250), or

(*b*) The excess, if any, of the amount of gain which would, but for section 1250(d)(8)(A), be taken into account under section 1250(a), over the cost of the section 1250 property acquired in the transaction.

For purposes of this paragraph the term *qualified housing project, approved disposition, reinvestment period,* and *net amount realized* shall have the same meaning as in section 1039 and §1.1039–1.

(ii) The principles of this subparagraph may be illustrated by the following examples:

Example 1. (i) Taxpayer A owns a qualified housing project and makes an approved disposition of the project on January 1, 1971. The net amount realized upon the disposition is $550,000, of which $475,000 is attributable to section 1250 property. The adjusted basis of the section 1250 property is $250,000 and the gain realized on the disposition of section 1250 property is $225,000. The additional depreciation for the property is $100,000, the applicable percentage is 48 percent, and if section 1250(d)(8)(A) did not apply to the disposition, $48,000 of gain would be recognized under section 1250(a). Within the reinvestment period, A purchases a replacement qualified housing project at a cost of $525,000, of which $425,000 is attributable to section 1250 property. A properly elects under section 1039(a) and the regulations thereunder to limit the recognition of gain (determined without regard to section 1250) to $25,000, that is, the excess of the net amount realized ($550,000) over the cost of the replacement housing project ($525,000).

(ii) The amount of gain recognized under section 1250(a) is limited to $25,000, that is, the greater of (*a*) the amount of gain recognized without regard to section 1250(a) ($25,000), or (*b*) the excess of (*1*) the amount of gain which would be taken into account under section 1250(a) if section 1250(d)(8)(A) did not apply ($225,000), over (*2*) the cost of the replacement section 1250 property ($425,000), or zero.

Example 2. The facts are the same as in example (1) except that only $180,000 of the cost of the replacement housing project is attributable to section 1250 property. Thus, the gain recognized under section 1250(a) is limited to $45,000, the greater of (*a*) the excess of (*1*) the amount of gain which would be taken into account under section 1250(a) if section 1250(d)(8)(A) did not apply ($225,000), over (*2*) the cost of the replacement section 1250 property ($180,000), or (*b*) the amount of gain recognized without regard to section 1250 ($25,000).

(2) *Replacement project consisting of more than one element.* (i) If (*a*) section 1250 property is disposed of, (*b*) any portion of the gain which would have been recognized under section 1250(a) is not recognized by reason of section 1250(d)(8)(A), and (*c*) the cost of the replacement section 1250 property constructed, reconstructed, or acquired during the reinvestment period exceeds the net amount realized attributable to the section 1250 property disposed of, then the section 1250 property shall consist of two elements. For purposes of this paragraph, the *reinvestment element* is that portion of the section 1250 property constructed, reconstructed, or acquired during the reinvestment period the cost of which does not exceed the net amount realized attributable to the section 1250 property disposed of, reduced by any gain recognized with respect to such property. The *additional cost element* is that portion of the section 1250 property constructed, reconstructed, or acquired during the reinvestment period whose cost exceeds the net amount realized attributable to the section 1250 property disposed of.

(ii) The principles of this subparagraph may be illustrated by the following example:

Example 1. (i) Taxpayer B disposes of a qualified housing project consisting of section 1250 property with an adjusted basis of $500,000 and land with a basis of $100,000. The amount realized on the disposition is $750,000 of which $650,000 is attributable to the section 1250 property. B constructs a replacement housing project at a cost of $1,000,000 of which $850,000 is attributable to section 1250 property. B elects in accordance with the provisions of section 1039(a) and the regulations there under not to recognize the $150,000 gain realized.

(ii) Under section 1250(d)(8)(A) no gain is recognized under section 1250(a). The replacement section 1250 property consists of the two elements. The reinvestment element has a cost of $650,000, i.e., that portion of the replacement section 1250 property the cost of which does not exceed the amount realized attributable to the section 1250 property disposed of ($650,000), reduced by any gain recognized with respect to such property (zero). The additional cost element has a cost of $200,000, that is, the excess of the cost of the replacement section 1250 property ($850,000) over the amount realized attributable to the section 1250 property disposed of ($650,000).

(3) *Basis of property acquired.* (i) If section 1250 property is disposed of and gain (determined without regard to section 1250) is not recognized in whole or in part under section 1039 (relating to certain sales of low-income housing projects), then the basis of the section 1250 property and other property acquired in the transaction shall be determined in accordance with the rules of this subparagraph. Generally, the basis of the property acquired in a transaction to which section 1039(a) applies is its cost reduced by the amount of any gain not recognized attributable to the property disposed of (see section 1039(d)). In a case where the replacement section 1250 property constructed, reconstructed, or acquired within the reinvestment period is treated as consisting of more than one element under section 1250(d)(8)(e), the aggregate basis of the property determined under section 1039(d) shall be allocated as follows: first, to the reinvestment element of the section 1250 property, in an amount equal to the amount determined under section 1250(d)(8)(E)(i) reduced by the amount of any gain not recognized attributable to the section 1250 property disposed of; second, to the other replacement property (other than section 1250 property) in an amount equal to the amount of its cost reduced (but not below zero) by any remaining amount of gain not recognized; and finally, to the additional cost element of the section 1250 property, in an amount equal to the amount determined under section 1250(d)(8)(E)(ii) reduced by any amount of gain not recognized which has not been taken into account in determining the basis of the reinvestment element and the other replacement property that is not section 1250 property. See paragraph (h)(2) of this section for definition of the terms *reinvestment element* and *additional cost element.*

(ii) The principles of this subparagraph may be illustrated by the following examples:

Example 1. The facts are the same as in example (1) of subparagraph (1)(ii) of this paragraph. The basis of the replacement section 1250 property is $225,000, the amount of the reinvestment element ($425,000) minus the gain not recognized attributable to the section 1250 property disposed of ($200,000).

Example 2. Taxpayer C disposes of a qualified housing project on January 1, 1971. The adjusted basis for the project is $3,800,000, of which $3,000,000 is attributable to section 1250 property and $800,000 is attributable to land. The amount realized on the disposition is $5,000,000, of which $4,000,000 is attributable to the section 1250 property and $1,000,000 is attributable to the land. The gain realized upon the disposition is $1,200,000, that is, amount realized ($5,000,000) minus adjusted basis ($3,800,000), of which $1,000,000 is attributable to the section 1250 property disposed of. Within the reinvestment period, C purchases another qualified housing project at a cost of $5,500,000, of which $4,000,000 is attributable to section 1250 property and $1,500,000 is attributable to other property. C makes an election under section 1039(a) and the regulations thereunder and none of the $1,200,000 gain realized on the disposition is recognized (determined without regard to section 1250). Under section 1250(d)(8)(A), none of the gain realized is recognized under section 1250(a). The basis of the replacement section 1250 property is $3,000,000, that is, the amount of the reinvestment element ($4,000,000) less the amount of gain not recognized attributable to section 1250 property disposed of ($1,000,000). The basis of the other property acquired is $1,300,000, that is, its cost ($1,500,000) reduced by the remaining gain not recognized ($200,000).

Example 3. The facts are the same as in example (2) except that the cost of the replacement section 1250 property is $4,500,000 and the cost of the other property is $1,000,000. Thus, the replacement section 1250 property consists of two elements under section 1250(d)(8)(E). The reinvestment element (section 1250(d)(8)(E)(i)) has a basis of $3,000,000, that is $4,000,000 (that portion of the section 1250 property acquired the cost of which does not exceed the net amount realized attributable to the section 1250 property disposed of), reduced by $1,000,000 (the gain not recognized attributable to the section 1250 property disposed of). The basis of the other property is $800,000, that is, its cost ($1,000,000) reduced by the remaining gain not recognized ($200,000). The additional cost element (section 1250(d)(8)(E)(ii)) has a basis of $500,000, that is, the portion of the section 1250 property acquired the cost of which exceeds the net amount realized attributable to the section 1250 property disposed of. This amount ($500,000) is not reduced by any amount of gain not recognized because all of the gain not recognized has already been taken into account in determining the basis of the reinvestment element and the other replacement property that is not section 1250 property.

(4) *Additional depreciation for property acquired.* (i) If a qualified housing project is disposed of in a transaction to which section 1039(a) applies, the additional depreciation for the replacement property immediately after the transaction shall be an amount equal to (*a*) the amount of additional depreciation for the property disposed of, minus (*b*) the amount of additional depreciation necessary to produce the amount of gain recognized under section 1250(a). Thus, if no gain is recognized upon a disposition of a qualified housing project, the additional depreciation for the property acquired will be the same as for the property disposed of. On the other hand, if upon disposition of a project, gain of $40,000 was recognized under section 1250(a), and if the additional depreciation for the project and the applicable percentage were $100,000 and 80 percent, respectively, the additional depreciation for the replacement housing project would be $50,000, that is, $100,000 minus $50,000, the amount of additional depreciation necessary to produce $40,000 of recognized gain where the applicable percentage is 80 percent.

(ii) If the property acquired in the transaction consists of more than one element of section 1250 property by reason of section 1250(d)(8)(E), the additional depreciation under subdivision (i) of this subparagraph shall be allocated solely to the reinvestment element.

(5) *Additional limitation.* If, in a transaction to which section 1039(a) applies, gain is recognized by the taxpayer, the amount of gain recognized which is attributable to section 1250 property disposed of is, under section 1250(d)(8)(F)(i), limited to an amount equal to the net amount realized attributable to the section 1250 property disposed of reduced by the greater of (i) the adjusted basis of the section 1250 property disposed of, or (ii) the cost of the section 1250 property acquired. The limitation of section 1250(d)(8)(F)(i) may be illustrated by the following example:

Example: Taxpayer D owns property constituting a qualified housing project under section 1039(b)(1). In an approved disposition, the project is sold for $225,000. The net amount realized on the disposition is $225,000 of which $175,000 is attributable to the section 1250 property disposed of. The adjusted basis of such property is $150,000 and thus the gain realized upon the disposition of the section 1250 property is $25,000. Assume that the total gain realized upon disposition of the project is $45,000. Within the reinvestment period, D purchases another qualified housing project at a cost of $200,000, of which $160,000 is attributable to section 1250 property. D elects, in accordance with section 1039(a) and the regulations thereunder, to limit the recognition of gain to $25,000, that is, the net amount realized ($225,000), minus the cost of the replacement housing project ($200,000). Under this subparagraph, $15,000 of the $25,000 gain recognized is attributable to the section 1250 property disposed of, that is, the net amount realized attributable to the section 1250 property disposed of ($175,000), reduced by $160,000, the greater of the adjusted basis of the section 1250 property disposed of ($150,000) or the cost of the section 1250 property acquired ($160,000).

(6) *Allocation rule.* (i) If, in a transaction to which paragraph (h)(1) of this section applies, the section 1250 property disposed of is treated as consisting of more than one element by reason of the application of section 1250(d)(8)(E) with respect to a prior transaction, then the amount of gain recognized, the net amount realized, and the additional depreciation with respect to each such element shall be allocated to

the elements of the replacement section 1250 property in accordance with the provisions of this subparagraph.

(ii) The portion of the net amount realized upon such a disposition which shall be allocated to each element of the section 1250 property disposed of is that amount which bears the same ratio to the net amount realized attributable to all the section 1250 property disposed of in the transaction as the additional depreciation for that element bears to the total additional depreciation for all elements disposed of. If any gain is recognized upon disposition of the section 1250 property, such gain shall be allocated to each element in the same proportion as the gain realized for that element bears to the gain realized for all elements disposed of. The additional depreciation for each reinvestment element of the replacement section 1250 property shall be the same as for the corresponding element of the property disposed of, decreased by the amount of additional depreciation necessary to produce the amount of gain recognized for such element. The additional depreciation for any additional cost element shall be zero.

(iii) The principles of this subparagraph may be illustrated by the following example:

Example: Taxpayer E disposes of a qualified housing project in an approved disposition. The net amount realized is $1,090,000 of which $900,000 is attributable to section 1250 property. The section 1250 property consists of (1) a reinvestment element with an adjusted basis of $300,000, additional depreciation of $100,000, and an applicable percentage of 50 percent, and (2) an additional cost element with an adjusted basis of $200,000, additional depreciation of $50,000, and an applicable percentage of 80 percent. Gain of $400,000 is realized on the disposition of the section 1250 property, that is, amount realized ($900,000) minus adjusted basis ($500,000). Within the reinvestment period, E purchases another qualified housing project at a cost of $1,000,000 of which $840,000 is attributable to section 1250 property. E elects, in accordance with section 1039 and the regulations thereunder, to limit recognition of gain (determined without regard to section 1250) to $90,000, that is, the excess of the net amount realized ($1,090,000) over the cost of the replacement project ($1,000,000). Under section 1250(d)(8)(A), the amount of gain recognized under section 1250(a) is limited to $90,000 (see subparagraph (1) of this paragraph). Under section 1250(d)(8)(F)(ii) and this subparagraph, $600,000 of the $900,000 net amount realized attributable to the section 1250 property is allocated to the reinvestment element, that is, additional depreciation for the element ($100,000) over total additional depreciation ($150,000) times the net amount realized ($900,000). The remaining $300,000 is allocated to the additional cost element. Thus, the gain realized attributable to the reinvestment element is $300,000, that is, net amount realized ($600,000) minus adjusted basis ($300,000). The gain realized attributable to the additional cost element is $100,000, that is, net amount realized ($300,000) minus adjusted basis ($200,000). Under subparagraph (5) of this paragraph, the gain recognized attributable to the section 1250 property is limited to $60,000, that is, the net amount realized attributable to the section 1250 property disposed of ($900,000) minus the greater of the adjusted basis of such property ($500,000) or the cost of the section 1250 property acquired in the transaction ($840,000). Under section 1250(d)(8)(F)(ii) and this subparagraph, $45,000 of the $60,000 gain recognized is attributable to the reinvestment element, that is, $60,000 multiplied by a fraction whose numerator is the gain realized attributable to the reinvestment element ($300,000) and whose denominator is the total gain realized attributable to all the section 1250 property ($400,000). The remaining $15,000 of the gain recognized is attributable to the additional cost element. The new property acquired has no additional cost element. The reinvestment element of the new property acquired consists of 2 subelements corresponding to the reinvestment element and additional cost element of the property disposed of. The subelement corresponding to the reinvestment element has additional depreciation of $10,000, that is, its additional depreciation immediately before the disposition ($100,000), minus $90,000, the amount of additional depreciation necessary to produce $45,000 of section 1250(a) gain where the applicable percentage is 50 percent. The subelement corresponding to the additional cost element has additional depreciation of $31,250, that is, its additional depreciation immediately before the disposition ($50,000), minus $18,750, the amount of additional depreciation necessary to produce $15,000 of section 1250(a) gain where the applicable percentage is 80 percent.

[T.D. 7084, 36 FR 275, Jan. 8, 1971, as amended by T.D. 7193, 37 FR 12957, June 30, 1972; T.D. 7400, 41 FR 5101, Feb. 4, 1976; 41 FR 7095, Feb. 17, 1976]

§ 1.1250–4 Holding period.

(a) *General.* In general, for purposes only of determining the applicable percentage (as defined in section 1250

(1)(C) and (2)(B)) of section 1250 property, the holding period of the property shall be determined under the rules of section 1250(e) and this section and not under the rules of section 1223. If the property is treated as consisting of two or more elements (within the meaning of paragraph (c)(1) of §1.1250–5), see paragraph (a)(2)(ii) of §1.1250–5 for application of this section to determination of holding period of each element. Section 1250(e) does not affect the determination of the amount of additional depreciation in respect of section 1250 property.

(b) *Beginning of holding period.* (1) For the purpose of determining the applicable percentage, in the case of property acquired by the taxpayer (other than by means of a transaction referred to in paragraph (c) or (d) of this section), the holding period of the property shall begin on the day after the date of its acquisition. See section 1250(e)(1)(A). Thus, for example, if a taxpayer purchases section 1250 property on January 1, 1965, the holding period of the property begins on January 2, 1965. If he sells the property on October 1, 1966, the holding period on the day of the sale is 21 full months, and, accordingly, the applicable percentage is 99 percent. This result would not be changed even if the property initially had been used solely as the taxpayer's residence for a portion of the 21-month period. If, however, the property were sold on September 30, 1966, the holding period would be only 20 full months.

(2) For the purpose of determining the applicable percentage in the case of property constructed, reconstructed, or erected by the taxpayer, the holding period of the property shall begin on the first day of the month during which the property is placed in service. See section 1250(e)(1)(B). Thus, for example, if a taxpayer constructs section 1250 property and places it in service on January 15, 1965, its holding period begins on January 1, 1965. If the taxpayer sells the property on December 31, 1966, its holding period on the day of sale is 24 full months, and, accordingly, the applicable percentage is 96 percent. For purposes of this subparagraph, property is placed in service on the date on which it is first used, whether in a trade or business, in the production of income, or in a personal activity. Thus, for example, a residence constructed by a taxpayer for his personal use is placed in service on the date it is occupied as a residence. For purposes of determining the date property is placed in service, it is immaterial when the period begins for depreciation with respect to the property under any depreciation practice under which depreciation begins in any month other than the month in which the property is placed in service. If one or more units of a single property are placed in service on different dates before the completion of the property, see paragraph (c)(3) of §1.1250–5 (relating to treatment of each such unit as an element).

(c) *Property with transferred basis.* Under section 1250(e)(2), if the basis of property acquired in a transaction described in this subparagraph is determined by reference to its basis in the hands of the transferor, then the holding period of the property in the hands of the transferee shall include the holding period of the property in the hands of the transferor. The transactions described in this subparagraph are:

(1) A gift described in section 1250(d)(1).

(2) Certain transfers at death to the extent provided in paragraph (b)(2)(ii) of §1.1250–3.

(3) Certain tax-free transactions to which section 1250(d)(3) applies. For application of section 1250 (d)(3) and (e)(2) to a distribution by a partnership to a partner, see paragraph (f)(1) of §1.1250–3.

(4) A transfer described in paragraph (e)(4) of §1.1250–3 (relating to transaction under section 1081(d)(1)(A)).

(d) *Principal residence acquired in certain transactions.* The holding period of a principal residence acquired in a transaction to which section 1034 and paragraph (g)(6) of §1.1250–3 apply includes the holding period of the principal residence disposed of in such transaction. See section 1250(e)(3). The holding period of a principal residence acquired does not include the period beginning on the day after the date of the disposition and ending on the date of the acquisition.

(e) *Application of transferred basis and principal residence rules.* The determination of holding period under this section shall be made without regard to whether a transaction occurred prior to the effective date of section 1250 and without regard to whether there was any gain upon the transaction. Thus, for example, under paragraph (c) of this section a donee's holding period for property includes his donor's holding period notwithstanding that the gift occurred on or before December 31, 1963, or that there was no additional depreciation in respect of the property at the time of the gift.

(f) *Qualified low-income housing project acquired in certain transactions.* The holding period of a *reinvestment element* (and of subelements thereof) of section 1250 property (as defined in paragraph (h) (2) of § 1.1250–3) acquired in a transaction to which sections 1039(a) and 1250(d)(8)(A) apply includes the holding period of the corresponding element of the section 1250 property disposed of. See section 1250(e)(4). The holding period of the *additional cost element* (as defined in paragraph (h)(2) of § 1.1250–3) begins on the date the replacement project is acquired. The holding period of a *reinvestment element* of section 1250 property does not include the period beginning on the day after the date of the disposition and ending (1) on the date of the acquisition of the replacement housing project, or (2) on the date the replacement housing project constructed or reconstructed by the taxpayer is placed in service.

(g) *Cross reference.* If the adjusted basis of the property in the hands of the transferee immediately after a transaction to which paragraph (c) or (d) of this section applies exceeds its adjusted basis in the hands of the transferor immediately before the transaction, the excess is an addition to capital account under paragraph (d)(2)(ii) of § 1.1250–5 (relating to property with two or more elements).

[T.D. 7084, 36 FR 281, Jan. 8, 1971, as amended by T.D. 7400, 41 FR 5103, Feb. 4, 1976]

§ 1.1250–5 Property with two or more elements.

(a) *Dispositions before January 1, 1970*—(1) *Amount treated as ordinary income.* If section 1250 property consisting of two or more elements (described in paragraph (c) of this section) is disposed of before January 1, 1970, the amount of gain taken into account under section 1250(a)(2) shall be the sum, determined in three steps under subparagraphs (2), (3), and (4) of this paragraph, of the amounts of gain for each element.

(2) *Step 1.* The first step is to make the following computations:

(i) In respect of the property as a whole, compute the additional depreciation (as defined in section 1250(b)), and the gain realized. For purposes of this paragraph, in the case of a transaction other than a sale, exchange or involuntary conversion, the gain realized shall be considered to be the excess of the fair market value of the property over its adjusted basis.

(ii) In respect of each element as if it were a separate property, compute the additional depreciation for the element, and the applicable percentage (as defined in section 1250(a)(2)) for the element. For additional depreciation in respect of an element of property acquired in certain transactions, see paragraph (e) of this section. For purposes of determining additional depreciation, the holding period of an element shall be determined under section 1223, applied by treating the element as a separate property. However, for the purpose of determining applicable percentage, the holding period for an element shall, except to the extent provided in paragraphs (c)(5), (e), and (f) of this section, be determined in accordance with the rules prescribed in § 1.1250–4.

(3) *Step 2.* The second step is to determine the amount of gain for each element in the following manner:

(i) If the amount of additional depreciation in respect of the property as a whole is equal to the sum of the additional depreciation in respect of each element having additional depreciation, and if such amount is not more than the gain realized, then the amount of gain to be taken into account for an element is the product of the additional depreciation for the element, multiplied by the applicable percentage for the element.

(ii) If subdivision (i) of this subparagraph does not apply, the amount of gain to be taken into account for an element is the product of:

(*a*) The additional depreciation for the element, multiplied by

(*b*) The applicable percentage for the element, and multiplied by

(*c*) A ratio, computed by dividing (*1*) the lower of the additional depreciation in respect of the property as a whole or the gain realized, by (*2*) the sum of the additional depreciation in respect of each element having additional depreciation.

(4) *Step 3.* The third step is to compute the sum of the amounts of gain for each element, as determined in step 2.

(5) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1 Gain of $35,000 is realized upon a sale, before January 1, 1970, of section 1250 property which consists of four elements (W, X, Y, and Z). Since on the date of the sale the amount of additional depreciation in respect of the property as a whole ($24,000) is equal to the sum of the additional depreciation in respect of each element having additional depreciation and is less than the gain realized, the additional depreciation for each element is determined under subparagraph (3)(i) of this paragraph. The amount of gain taken into account under section. 1250(a)(2) is $7,500, as determined in the following table in accordance with the additional facts assumed.

Element	Additional deprecia-tion×	Applicable percentage=	Gain for element
W	$12,000×	0=	0
X	6,000×	50=	$3,000
Y	0×	63=	0
Z	6,000×	75=	4,500
Totals	24,000		7,500

Example 2. Assume the same facts as in example (1), except that in respect of the property as a whole the additional depreciation is $20,000 because with respect to element Y additional depreciation allowed was $4,000 less than straight line. Accordingly, the sum of the additional depreciation for each element having additional depreciation is $24,000, that is, $4,000 greater than the additional depreciation in respect of the property as a whole. Thus, the additional depreciation for each element is determined under subparagraph (3)(ii) of this paragraph. The ratio referred to in subparagraph (3)(ii)(c) of this paragraph is twenty twenty-fourths, that is, the lower of additional depreciation in respect of the property as a whole ($20,000) or the gain realized ($35,000), divided by the sum of the additional depreciation in respect of each element having additional depreciation ($24,000). The amount of gain taken into account under section 1250(a)(2) is $6,250, as determined in the following table:

Element	Additional deprecia-tion×	Applica-ble per-cent-age×	Ratio=	Gain for element
W	$12,000×	0×	20:24=	0
X	6,000×	50×	20:24=	$2,500
Y	0×	63×	20:24=	0
Z	6,000×	75×	20:24=	3,750
Totals	24,000			6,250

(b) *Dispositions after December 31, 1969*—(1) *Amount treated as ordinary income.* If section 1250 property consisting of two or more elements (described in paragraph (c) of this section) is disposed of after December 31, 1969, the amount of gain taken into account under section 1250(a) shall be the sum, determined in 5 steps under subparagraphs (2), (3), (4), (5), and (6) of this paragraph, of the amount of gain for each element. Steps 3 and 4 are used only if the gain realized exceeds the additional depreciation attributable to periods after December 31, 1969, in respect of the property as a whole.

(2) *Step 1.* The first step is to make the following computations:

(i) In respect of the property as a whole, compute the additional depreciation (as defined in section 1250(b)) attributable to periods after December 31, 1969, and the gain realized. For purposes of this paragraph, in the case of a transaction other than a sale, exchange, or involuntary conversion, the gain realized shall be considered to be the excess of the fair market value of the property over its adjusted basis.

(ii) In respect of each element as if it were a separate property, compute the additional depreciation for the element attributable to periods after December 31, 1969, and the applicable percentage (as defined in section 1250(a)(1)) for the element. For additional depreciation in respect of an element of property acquired in certain transactions, see paragraph (e) of this section. For purposes of determining additional depreciation, the holding period of an element shall be determined under section 1223, applied by treating the element as a separate property. However, for the purpose of determining applicable percentage, the holding period for an element shall, except to the extent provided in paragraphs (c)(5), (e), and (f) of this section, be determined in accordance with the rules prescribed in § 1.1250–4.

(3) *Step 2.* The second step is to determine the amount of gain recognized for each element under section 1250(a) (1) in the following manner:

(i) If the amount of additional depreciation in respect of the property as a whole attributable to periods after December 31, 1969, is equal to the sum of the additional depreciation in respect of each element having such additional depreciation, and if such amount is not more than the gain realized, then the amount of gain to be taken into account for an element under section 1250(a)(1) is the product of the additional depreciation attributable to periods after December 31, 1960, for the element, multiplied by the applicable percentage for the element determined under section 1250(a)(1).

(ii) If subdivision (i) of this subparagraph does not apply, the amount of gain to be taken into account under section 1250(a)(1) for an element is the product of:

(*a*) The additional depreciation attributable to periods after December 31, 1969, for the element multiplied by

(*b*) The applicable percentage for the element determined under section 1250(a)(1) for the element, and multiplied by

(*c*) A ratio, computed by dividing (*1*) the lower of the additional depreciation in respect of the property as a whole which is attributable to periods after December 31, 1969, or the gain realized, by (*2*) the sum of the additional depreciation attributable to periods after December 31, 1969, in respect of each element having such additional depreciation.

(4) *Step (3).* If the gain realized exceeds the additional depreciation in respect of the property as a whole attributable to periods after December 31, 1969.

(i) Compute the additional depreciation attributable to periods before January 1, 1970, and the remaining gain (or remaining potential gain in the case of a transaction other than a sale, exchange, or involuntary conversion), in respect of the property as a whole.

(ii) Compute the additional depreciation attributable to periods before January 1, 1970, and the applicable percentage determined under section 1250(a)(2) in respect of each element as if it were a separate property. For additional depreciation in respect of an element of property acquired in certain transactions, see paragraph (e) of this section. For purposes of determining additional depreciation, the holding period of an element shall be determined under section 1223, applied by treating the element as a separate property. However, for the purpose of determining applicable percentage, the holding period of an element shall, except to the extent provided in paragraphs (c)(5), (e), and (f) of this section, be determined in accordance with the rules prescribed in § 1.1250–4.

(5) *Step (4).* The fourth step is to compute the gain recognized under section 1250(a)(2) for each element (if computation was required under step (3)) in the following manner:

(i) If the amount of additional depreciation in respect of the property as a whole attributable to periods before January 1, 1970, is equal to the sum of the additional depreciation in respect of each element having such additional depreciation, and if such amount is not more than the remaining gain (or remaining potential gain), then the amount of gain to be taken into account for an element under section 1250(a)(2) is the product of the additional depreciation attributable to periods before January 1, 1970, for the element, multiplied by the applicable percentage determined under section 1250(a)(2) for the element.

(ii) If subdivision (i) of this subparagraph does not apply, the amount of gain to be taken into account for an element under section 1250(a)(2) is the product of:

(*a*) The additional depreciation attributable to periods before January 1, 1970, for the element, multiplied by,

(*b*) The applicable percentage for the element determined under section 1250(a)(2), and multiplied by,

(*c*) A ratio, computed by dividing (*1*) the lower of the additional depreciation in respect of the property as a whole which is attributable to periods before January 1, 1970,

or the remaining gain (or remaining potential gain), by (*2*) the sum of the additional depreciation attributable to periods before January 1, 1970, in respect of each element having additional depreciation.

(6) *Step (5).* The fifth step is to compute the sum of the amount of gain for each element, as determined in steps (2) and (4).

(7) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Gain of $60,000 is realized upon a sale, after the December 31, 1969, of section 1250 property which was constructed by the taxpayer after such date. The property consists of four elements (W, X, Y, and Z). Since on the date of sale the amount of additional depreciation attributable to periods after December 31, 1969, in respect of the property as a whole ($32,000), is equal to the sum of the additional depreciation in respect of each element having such additional depreciation and is less than the gain realized, the gain recognized for each element is determined under subparagraph (3)(i) of this paragraph. The amount of gain taken into account under section 1250(a)(1) is $28,500, as determined in the following table in accordance with the additional facts assumed:

Element	Additional depreciation after Dec. 31, 1969×	Applicable percentage= (1250(a)(1))	Gain for element
W	$14,000×	80=	$11,200
X	6,000×	90=	5,400
Y	2,000×	95=	1,900
Z	10,000×	100=	10,000
Total	32,000		28,500

Example 2. Assume the same facts as in example (1), except that the property was acquired by the taxpayer before January 1, 1970. Since the gain realized ($60,000) exceeds the additional depreciation attributable to periods after December 31, 1969 ($32,000), section 1250(a)(2) applies to the remaining gain of $28,000. Since the additional depreciation in respect of the property as a whole attributable to periods before January 1, 1970 ($21,000), is equal to the sum of the additional depreciation in respect of each element having such additional depreciation and is less than the remaining gain ($28,000), the amount of gain recognized for each element under section 1250(a)(2) is determined under subparagraph (5)(i) of this paragraph. The amount of gain taken into account under section 1250(a)(1) is $28,500 the same as in example (1). The amount of gain taken into account under section 1250(a)(2) is $3,900, as determined in the following table in accordance with the additional facts assumed:

Element	Additional depreciation before Jan. 1, 1970×	Applicable percentage= (1250(a)(2))	Gain for element (1250)(a)(2))
W	$8,000×	0=	$0
X	6,000×	10=	600
Y	2,000×	15=	300
Z	5,000×	60=	3,000
Total	21,000		3,900

Example 3. (i) The facts are the same as in example (2) except that element Y has a deficit in additional depreciation attributable to periods after December 31, 1969, of $6,000 and thus the additional depreciation attributable to periods after December 31, 1969, in respect of the property as a whole is $24,000. The sum of the additional depreciation for each element having additional depreciation is $30,000, or $6,000 more than the additional depreciation in respect of the property as a whole. Thus, the gain recognized for each element under section 1250(a)(1) is determined under subparagraph (3)(ii) of this paragraph. The ratio referred to in subparagraph (3)(ii) (*c*) of this paragraph is 24:30, that is, the lower of the additional depreciation in respect of the property as a whole attributable to periods after December 31, 1969 ($24,000), or the gain realized ($60,000), divided by the sum of the additional depreciation in respect of each element having such additional depreciation ($30,000). The amount of gain taken into account under section 1250(a)(1) is $21,280, as determined in the following table:

Element	Additional depreciation×	Applicable percentage× (1250(a)(1))	Ratio=	Gain for element
W	$14,000×	80×	24:30=	$8,960
X	6,000×	90×	24:30=	4,320
Y	(6,000)×	95×	24:30=	0
Z	10,000×	100×	24:30=	8,000
Total.	24,000			21,280

(ii) In addition, gain is recognized under section 1250(a)(2) since there is a remaining potential gain of $36,000, that is, gain realized ($60,000) minus the additional depreciation attributable to periods after December 31, 1969 ($24,000). The gain recognized in respect of each element and the gain recognized under section 1250(a)(2) ($3,900) are the same as in example (2), since the additional depreciation attributable to periods before January 1, 1970 ($21,000) is less than the remaining gain ($36,000).

(c) *Element*—(1) *General.* For purposes of this section, in the case of section 1250 property there shall be treated as separate elements the separate improvements, units, remaining property, special elements, and low-income housing elements which are respectively referred to in paragraphs (c) (2), (3), (4), (5), and (6) of this section.

(2) *Separate improvements.* There shall be treated as an element each *separate improvement* (as defined in paragraph (d)(1) of this section) to the property.

(3) *Units.* If before completion of section 1250 property one or more units thereof are placed in service, each such unit of the section 1250 property shall be treated as an element.

(4) *Remaining property.* The remaining property which is not taken into account under subparagraph (2) or (3) of this paragraph shall be treated as an element.

(5) *Special elements.* (i) If the basis of section 1250 property is reduced in the manner described in paragraph (b)(2)(ii) of § 1.1250–3 (relating to property acquired from a decedent prior to his death) or in paragraph (e)(3)(iii) of § 1.1250–3 (relating to basis reduction under section 1071 or 1082(a)(2)), then such property shall be considered as having a special element with additional depreciation equal to the amount of additional depreciation included in the depreciation adjustments (referred to in paragraph (d)(1) of § 1.1250–2) to which the basis reduction is attributable. For purposes of computing applicable percentage, the holding period of a special element under this subdivision shall be determined under paragraph (b)(2)(ii) or (e)(3)(iii) (whichever is applicable) of § 1.1250–3.

(ii) If a disposition described in section 1250(d)(4)(A) (relating to like kind exchanges and involuntary conversions) of a portion of an item of property gives rise to an addition to capital account (described in the last sentence of paragraph (d)(2)(i) of this section) which is not a separate improvement, then such property shall be considered as having a special element with additional depreciation and, for purposes of computing applicable percentage, a holding period determined under paragraph (d)(7) of § 1.1250–3.

(6) *Low-income housing elements.* If, in an approved disposition of a qualified housing project, a replacement qualified housing project is treated as consisting of more than one element of section 1250 property by reason of section 1250(d)(8)(E) (see paragraph (h)(2) of § 1.1250–3), the elements determined under such section shall be treated as elements for purposes of this section. For definition of the terms *qualified housing project* and *approved disposition,* see section 1039(b) and the regulations thereunder.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. A taxpayer constructs an apartment house which he places in service in three stages. The total cost is $1 million, of which $350,000 is allocable to the first stage, $500,000 to the second stage, and $150,000 to the third stage. The first stage, which is placed in service on January 1, 1965, consists of 300 apartments and certain facilities including a central heating system and a common lobby. The second stage, which is placed in service on July 15, 1965, consists of 550 apartments and certain facilities including the motor for a central air-conditioning system. The third stage, which is placed in service on January 19, 1966, consists of the residue of the apartment house. On December 31, 1968, the taxpayer disposes of the apartment house. On such date, the apartment house has three elements which are described in the table below:

Stage	Kind of element	Cost	Full months in holding period	Applicable percentage
1	Unit	$350,000	48	72
2	Unit	500,000	42	78
3	Remaining property.	150,000	36	84

Example 2. Assume the same facts as in example (1) except that on January 1, 1969, two new floors, which were added after the apartment house was completed, are placed in service and that on July 1, 1972, the taxpayer disposes of the building. Assume further that the two new floors are one separate improvement (within the meaning of paragraph (d) of this section). On the date disposed of, the property consists of four elements, that is, the three elements described in example (1) and the separate improvement.

(d) *Separate improvement*—(1) *Definition.* For purposes of this section, with respect to any section 1250 property, the term *separate improvement* means an *addition to capital account* described in subparagraph (2) of this paragraph which qualifies as an *improvement* under the 1-year test prescribed in subparagraph (3) of this paragraph and which satisfies the 36-month test prescribed in subparagraph (4) of this paragraph.

(2) *Addition to capital account.* (i) In the case of any section 1250 property, an addition to capital account described in this subparagraph is any addition to capital account in respect of such property after its initial acquisition or completion by the taxpayer or by any person who held the property during a period included in the taxpayer's holding period (see §1.1250–4) for the property. An addition to the capital account of section 1250 property may arise, for example, if there is an expenditure for section 1250 property which is an improvement, replacement, addition, or alteration to such property (regardless of whether the cost thereof is capitalized or charged against the depreciation reserve). In such a case, the *addition to capital account* is the gross addition, unreduced by amounts attributable to replaced property, to the net capital account and not the net addition to such account. Thus, if a roof has an adjusted basis of $20,000, and is replaced by constructing a new roof at a cost of $50,000, the gross addition of $50,000 is an addition to capital account. (The adjusted basis of the old roof is no longer included in the capital account for the property.) For purposes of this section, the status of an addition to capital account is not affected by whether or not it is treated as a separate property for purposes of determining depreciation adjustments. In case of an addition to the capital account of property arising after December 31, 1963, upon a disposition referred to in section 1250(d)(4) (relating to like kind exchanges and involuntary conversions) of a portion of an item of such property, the amount of such addition (and its basis for all purposes of the Code) shall be the basis thereof determined under paragraph (d) (2), (3), or (4) (whichever is applicable) of §1.1250–3, applied by treating such portion and such addition as separate properties.

(ii) An addition to capital account may be attributable to an excess of the adjusted basis of section 1250 property in the hands of a transferee immediately after a transaction referred to in section 1250(e)(2) (relating to holding period of property with transferred basis) over its adjusted basis in the hands of the transferor immediately before the transaction. Thus, for example, such excess may arise from a gift which is in part a sale or exchange (see paragraph (a)(2) of §1.1250–3), from an increase in basis due to gift tax paid (see section 1015(d)), from a transfer referred to in paragraph (c)(2) of §1.1250–3 (relating to certain tax-free transactions) in which gain is partially recognized, or from a distribution by a partnership to a partner in which no gain is recognized by reason of the application of section 731. Similarly, an addition to capital account may be attributable to an excess of the adjusted basis of a principal residence acquired in a transaction referred to in section 1250(e)(3) over the adjusted basis of the principal residence disposed of, as well as to any increase in the adjusted basis of section 1250 property of a partnership by reason of an optional basis adjustment under section 734(b) or 743(b).

(iii) Whether or not an expenditure shall be treated as an addition to capital account described in this subparagraph, as distinguished from a separate item of property, may depend on how the property or properties are disposed of. Thus, for example, if a taxpayer, who owns a motel consisting of 10 buildings with common heating and plumbing systems, adds to the motel three new buildings which are connected to the common systems, and if the taxpayer sells the motel to one person in one transaction, then for purposes of this subparagraph the cost of the three new buildings shall be treated as an addition to the capital account of the motel and, if the 1-year and 36-month tests of subparagraphs (3) and (4) of this paragraph are satisfied, the motel consists of at least two elements. If, however, the 10-building group and the three-building group were individually sold in separate transactions to two different people each of whom would operate his group as a separate business, the motel would consist of two items of property.

(3) *One-year test for improvement.* (i) An addition to capital account of section 1250 property for any taxable year (including a short taxable year and the entire taxable year in which the disposition occurs) shall be treated as an improvement only if the sum of all additions to the capital account of such property for such taxable year exceeds the greater of:

(*a*) $2,000, or

(*b*) One percent of the unadjusted basis of the property, determined as of the beginning (*1*) of such taxable year, or (*2*) of the holding period (within the meaning of § 1.1250–4) of the property, whichever is the later.

(ii) For purposes of this section, the term *unadjusted basis* means the adjusted basis of the property, determined without regard to the adjustments provided in section 1016(a) (2) and (3) (relating to adjustments for depreciation, amortization, and depletion). For purposes of this paragraph, as of any particular date the unadjusted basis of section 1250 property (*a*) includes the cost of any addition to capital account for the property which arises prior to such date (regardless of whether such addition qualified under this subparagraph as an improvement), and (*b*) does not include the cost of a component retired before such date.

(iii) In respect of a particular disposition of section 1250 property by a person:

(*a*) There shall not be taken into account under the 1-year test for improvements in this subparagraph any addition to capital account which arises by reason of (or after) such disposition or which arises before the beginning of the holding period under § 1.1250–4 of such person for the property, and

(*b*) Such test shall be made in respect of each taxable year of such person (and of any prior transferor) any day of which is included under § 1.1250–4 in such person's holding period for the property, except that (*1*) such test shall be made for a taxable year of such person only if such person actually owned the property on at least 1 day of such taxable year, and (*2*) such test shall be made for a taxable year of such prior transferor only if such prior transferor actually owned the property on at least 1 day of such taxable year.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. The unadjusted basis of section 1250 property as of the beginning of January 1, 1960, is $300,000. During the taxable year ending on December 31, 1960, the only additions to the capital account for the property are addition A on January 1, 1960, costing $1,000, and addition B on July 1, 1960, costing $600. Since the sum of the amounts added to capital account for such taxable year is less than $2,000, A and B are not treated as improvements. This result would not be changed if addition C, costing $600, were added on December 15, 1960, since although the sum of the additions ($1,000 plus $600 plus $600, or $2,200) exceeds $2,000, such sum is less than 1 percent of the unadjusted basis of the property as of the beginning of 1960 ($3,000, that is, 1 percent of $300,000). If however, C cost $1,500, then A, B, and C would each be considered an improvement since the sum of the amounts added to capital account $3,100) would exceed $3,000.

Example 2. Green and his son both use the calendar year as the taxable year. On February 1, 1965, Green makes addition A to a piece of section 1250 property. On June 15, 1965, Green transfers such property to his son as a gift which is in part a sale (see paragraph (a) of § 1.1250–3). Addition B arises by reason of the transfer. On August 1, 1965, the son makes addition C to the property. For purposes of determining the amount of gain recognized under section 1250(a) to Green upon the transfer, the determination of whether addition A is an improvement is made without taking into account additions B and C. For purposes of determining the amount of gain recognized under section 1250(a) upon a subsequent disposition of the property by the son, additions B and C would be taken into account in the determination of whether A is an improvement, and A would be taken into account in the determination of whether B and C are improvements.

Example 3. Assume the same facts as in example (2). Assume further that on September 15, 1965, the son transfers the property to a corporation in exchange for cash and stock in the corporation in a transaction qualifying under section 351 (see paragraph (c) of § 1.1250–3), and that the corporation uses a fiscal year ending November 30. For purposes of determining the amount of gain recognized under section 1250(a) upon a subsequent disposition by the corporation, the one-year test under subdivision (i) of this subparagraph is made for the entire taxable year of Green and of the son ending on December 31, 1965, and in respect of the corporation's taxable year ending November 30, 1965. Accordingly, if on December 7, 1965, addition D is made by the corporation, then, upon a subsequent disposition by the corporation, D is taken into account for purposes of the determination in respect of the entire taxable year of Green and of the son ending on December 31, 1965, and for the corporation's taxable year ending November 30, 1966, but not for purposes of the corporation's taxable year ending November 30, 1965. If D were made on January 3, 1966, D would still be taken into account for purposes of the determination in respect of the corporation's taxable year ending November 30, 1966. However, since neither Green nor his son actually owned the property on any day of the taxable year ending December 31, 1966, no determination is made in respect of such taxable year of Green or of the son.

(4) *36-month test for separate improvement.* (i) If, during the 36-month period ending on the last day of any taxable year (including a short taxable year and the entire taxable year in which the disposition occurs), the sum of the amounts treated under subparagraph (3) of this paragraph as improvements for such period exceeds the greatest of:

(*a*) 25 percent of the adjusted basis of the property,

(*b*) 10 percent of the unadjusted basis (determined under subparagraph (3)(ii) of this paragraph) of the property, or

(*c*) $5,000,

Then each such improvement during such period shall be treated as a separate improvement, and thus as an element. For purposes of (*a*) and (*b*) of this subdivision, the adjusted basis (or unadjusted basis) of section 1250 property shall be determined as of the beginning of the 36-month period, or as of the beginning of the holding period of the property (within the meaning of §1.1250–4), whichever is the later.

(ii) In respect of a particular disposition of section 1250 property by a person:

(*a*) There shall not be taken into account under the 36-month test for separate improvements in this subparagraph any amount treated under subparagraph (3) of this paragraph as an improvement which arises by reason of (or after) the disposition or which arises before the beginning of the holding period under §1.1250–4 of such person for the property, and

(*b*) Such test shall be made in respect of each 36-month period ending on the last day of each taxable year of such person (and of any prior transferor) if at least 1 day of such period is included under §1.1250–4 in such person's holding period for the property, except that (*1*) such test shall be made for a 36-month period ending on the last day of a taxable year of such person only if such person actually owned the property on at least 1 day of such period, and (*2*) such test shall be made for a 36-month period ending on the last day of a taxable year of such prior transferor only if such prior transferor actually owned the property on at least 1 day of such period.

(iii) For illustration of the principles of subdivision (ii) of this subparagraph, see examples (2) and (3) in subparagraph (3)(iv) of this paragraph.

(5) *Example.* The application of this paragraph may be illustrated by the following example:

Example: (i) On December 31, 1967, X, a calendar year taxpayer, purchases an item of section 1250 property at a cost of $100,000. In the table below, the adjusted basis and unadjusted basis of the property are shown for the beginning of January 1 of each taxable year and it is assumed that each addition to capital was added on January 1 of the year shown.

Year	Adjusted basis	Unadjusted basis	1 percent of unadjusted basis	Addition
1969	$94,000	$100,000	$1,000	A–$10,000
1970	97,030	110,000	1,100	B–4,000
1971	94,041	114,000	1,140	C–6,000
1972	92,799	120,000	1,200	....
1973	86,158	120,000	1,200	D–18,000

(ii) Since each addition to capital account for the property exceeds the greater of $2,000 or one percent of unadjusted basis, determined as of the beginning of the taxable year in which made, each addition to capital account qualifies as an improvement under subparagraph (2) of this paragraph.

(iii) Since the beginning of the holding period of the property under §1.1250–4 (Jan. 1, 1968) is later than the beginning of the 36-month period ending on December 31, 1969, the determination as to whether there are any separate improvements on the property as of December 31, 1969, is made by examining the adjusted basis (or unadjusted basis) of the property as of the beginning of January 1, 1968. As of December 31, 1969, there were no separate improvements on the property since the only amount treated as an improvement for the period beginning on January 1, 1968, and ending on December 31, 1969, in addition A (costing $10,000), which is less than $25,000, that is, 25 percent of the adjusted basis ($100,000) of the property as of the beginning of January 1, 1968.

(iv) As of December 31, 1970, there were no separate improvements on the property since the sum of the amounts treated as improvements for the 36-month period ending on December 31, 1970, is $14,000 (that is, $10,000 for A, plus $4,000 for B), and this sum is less than $25,000, that is, 25 percent of the adjusted basis ($100,000) of the property as of the beginning of January 1, 1968.

(v) As of December 31, 1971, there were no separate improvements on the property since the sum of the amounts treated as improvements for the 36-month period ending on December 31, 1971, is $20,000 (that is, $10,000 for A, plus $4,000 for B, plus $6,000 for C), and this sum is less than $23,500, that is, 25 percent of the adjusted basis ($94,000) of the property as of the beginning of January 1, 1969.

(vi) As of December 31, 1972, there were no separate improvements on the property since the sum of the amounts treated as improvements for the 36-month period ending on December 31, 1972, is $10,000 (that is, $4,000 for B plus $6,000 for C), and this sum is less than $24,258 that is, 25 percent of the adjusted basis ($97,030) of the property as of the beginning of January 1, 1970.

(vii) As of December 31, 1973, C and D are separate improvements (notwithstanding that as of December 31, 1971 and 1972, C was not a separate improvement) since the sum of the amounts added for the 36-month period ending December 31, 1973, is $24,000 (that is, $6,000 for C plus $18,000 for D), and this sum exceeds the greatest of:

(*a*) $23,510, that is, 25 percent of the adjusted basis ($94,041) of the section 1250 property as of the beginning of January 1, 1971,

(*b*) $11,400, that is, 10 percent of the unadjusted basis ($114,000) of the property as of the beginning of such first day, or

(*c*) $5,000.

(e) *Additional depreciation and holding period of property acquired in certain transactions*—(1) *Transferred basis.* If property consisting of two or more elements is disposed of, and if the holding period of the property in the hands of the transferee for purposes of computing applicable percentage includes the holding period of the transferor by reason of the application of paragraph (c) (other than subparagraph (2) thereof) of § 1.1250–4, then the additional depreciation for each element of the property in the hands of the transferee immediately after the transfer shall be computed in the manner set forth in this subparagraph. First, any element having a deficit in additional depreciation in the hands of the transferor immediately before such transfer shall be considered to have the same deficit in the hands of the transferee. Second, elements having additional depreciation in the hands of the transferor immediately before the transfer shall be considered to have additional depreciation in the hands of the transferee. The sum of the transferee's additional depreciation for all elements of the property having additional depreciation in the hands of the transferor shall be an amount equal to the additional depreciation in respect of the property as a whole immediately after the transfer increased by the sum of the deficits in addition depreciation for all elements having such deficits. In case there is more than one element having additional depreciation, the additional depreciation for any such element in the hands of the transferee shall be computed by multiplying (i) the amount computed under the preceding sentence by (ii) the additional depreciation for such element in the hands of the transferor divided by the sum of the additional depreciation for all such elements having additional depreciation in the hands of the transferor. For purposes of computing applicable percentage, the holding period for an element of such property in the hands of the transferee shall include the holding period of such element in the hands of the transferor.

(2) *Example.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: Section 1250 property has additional depreciation of $16,000 of which $12,000 is additional depreciation for element X and $4,000 for element Y. The property is transferred to a corporation in exchange for cash of $6,000 and for stock in the corporation. Assume that recognition of gain under section 1250(a) is limited to $6,000 (the amount of cash received) by reason of the application of section 351(b) (relating to transfer to corporation controlled by transferor) and section 1250(d)(3) (relating to limitation on application of section 1250 in certain tax-free transactions). Under paragraph (c)(3)(i) of § 1.1250–3, the additional depreciation for the property in the hands of the corporation immediately after the transfer is $10,000, that is, the additional depreciation for the property in the hands of the transferor immediately before the transfer ($16,000) minus the gain under section 1250(a) recognized upon the transfer ($6,000). Under subparagraph (1) of this paragraph, in the hands of the corporation immediately after the transfer element X has additional depreciation of $7,500 (12⁄16 of $10,000) and element Y as additional depreciation of $2,500 (4⁄16 of $10,000). Under paragraph (d)(2)(ii) of this section there is an addition of $6,000 to the capital account for the property.

(3) *Principal residence.* If a principal residence consisting of two or more elements is disposed of, and if for purposes of computing applicable percentage the holding period of the principal residence acquired includes the holding period of the principal residence disposed of by reason of the application of paragraph (d) of §1.1250–4, then the additional depreciation (or a deficit in additional depreciation) for an element of the principal residence acquired immediately after the transaction shall be determined in a manner consistent with the principles of subparagraph (1) of this paragraph. For purposes of computing applicable percentage, the holding period for an element of the principal residence acquired includes the holding period of such element of the principal residence disposed of, but not the period beginning on the day after the date of the disposition and ending on the date of the acquisition.

(f) *Holding period for small separate improvements*—(1) *General.* This paragraph prescribes a special holding period solely for the purpose of computing the applicable percentage of a separate improvement (as defined in paragraph (d) of this section) which is treated as an element. See paragraph (a)(2)(ii) of this section for determination of holding period under section 1223 for purposes of computing additional depreciation. In respect of section 1250 property, if the amount of a separate improvement does not exceed the greater of:

(i) $2,000, or

(ii) One percent of the unadjusted basis (within the meaning of paragraph (d)(3)(ii) of this section) of such property, determined as of the beginning of the taxable year in which such separate improvement was made,

Then such separate improvement shall be treated for purposes of computing applicable percentage as placed in service on the first day, of a calendar month, which is the closest such first day to the middle of the taxable year. See the last sentence of section 1250(f)(4)(B). If two such first days are equally close to the middle of the taxable year, the earliest of such days is the applicable day.

(2) *Example.* The application of this paragraph may be illustrated by the following example:

Example: (i) The unadjusted basis of section 1250 property as of the beginning of January 1, 1960, is $100,000. During the taxable year ending on December 31, 1960, the only additions to the capital account for the property are addition A on March 10, 1960, costing $1,200 and addition B on September 16, 1960, costing $1,400. Since the sum of the additions ($2,600) exceeds the greater of $2,000 and 1 percent of unadjusted basis ($1,000, that is, 1 percent of $100,000), each addition is an improvement under the 1-year test of paragraph (d)(3) of this section. Assume that the 36-month test of paragraph (d)(4) of this section is satisfied and, therefore, each addition is a separate improvement treated as an element.

(ii) Since each element is less than $2,000, the provisions of this paragraph apply. Since there are 366 days in 1960, the middle of the year is at the end of 183 days, or July 1. Thus, that first day of a calendar month in 1960, which is the closest first day (of a calendar month) to the middle of the taxable year, is July 1, 1960. Accordingly, for purposes of computing applicable percentage, elements A and B are each treated as placed in service on July 1, 1960.

[T.D. 7084, 36 FR 275, Jan. 8, 1971, as amended by T.D. 7193, 37 FR 12957, June 30, 1972; T.D. 7400, 41 FR 5103, Feb. 4, 1976]

§1.1251–1 General rule for treatment of gain from disposition of property used in farming where farm losses offset nonfarm income.

(a) *Applicability.* The provisions of section 1251, this section, and §§1.1251–2 through 1.1251–4 shall apply with respect to any taxable year beginning after December 31, 1969, but only if (1) there is a farm net loss (as defined in section 1251(e)(2) and paragraph (b) of §1.1251–3) for the taxable year, or (2) there is a balance in the excess deductions account (as described in §1251–2) as of the close of the taxable year before subtracting any amount under paragraph (c)(1)(i) of § 1251–2. See section 1251(a). In general, a taxpayer who has a farm net loss and certain other taxpayers are required to establish and maintain an excess deductions account as provided in section 1251(b). Certain additions and subtractions are made to the excess deductions account, and upon the disposition of *farm recapture property* any gain to the extent of the balance in the excess deductions account is recognized as ordinary income under section 1251(c)(1). See paragraph (b)(1) of this section. *Farm recapture property* is, in general, certain farming property (other than section 1250 property) described in paragraph (1), (3), or (4) of section 1231(b). See paragraph (a) of § 1.1251–3.

(b) *Ordinary income*—(1) *General rule.* In general, subject to the provisions of subparagraphs (2), (3), (4), and (5) of this paragraph, upon a disposition of an item of farm recapture property during a taxable year beginning after December 31, 1969, the amount of which:

(i) In the case of a sale, exchange, or involuntary conversion, the amount realized, or

(ii) In the case of any other disposition, the fair market value of such property

exceeds the adjusted basis of such property shall be recognized under section 1251(c)(1) as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income). The amount of gain recognized as ordinary income under section 1251(c)(1) shall be determined separately for each item of farm recapture property in a manner consistent with the principles of subparagraphs (4) and (5) of § 1.1245–1(a) (relating to gain from dispositions of certain depreciable property). Generally, such ordinary income treatment applies even though in the absence of section 1251(c)(1) no gain would be recognized under the Code. For example, if a corporation distributes farm recapture property as a dividend gain may be recognized as ordinary income to the corporation even though, in the absence of section 1251(c)(1), section 311(a) would preclude any recognition of gain to the corporation. For purposes of section 1251, the term *disposition* shall have the same meaning as in paragraph (a)(3) of § 1.1245–1. For the relation of section 1251 to other provisions of the Code, see paragraph (e) of this section.

(2) *Limitation as to dispositions of land*—(i) *In general.* In the case of a disposition of land, gain shall be recognized as ordinary income under section 1251(c)(1) only to the extent of the land's *potential gain.* See section 1251(c)(2)(C).

(ii) *Potential gain.* For purposes of section 1251, the term *potential gain* means in respect of land an amount equal to the excess of its fair market value over its adjusted basis, but limited to the extent of the deductions allowable in respect to such land pursuant to an election (if any) under sections 175 (relating to soil and water conservation expenditures) and 182 (relating to expenditures by farmers for clearing land) for the taxable year of disposition and the four immediately preceding taxable years regardless of whether any such preceding taxable year begins before December 31, 1969. See section (e)(5).

(iii) *Cross reference.* For additional recapture of certain deductions allowed under sections 175 and 182 in respect of farm land, see section 1252.

(3) *Exceptions and special rules.* The amount of gain to be recognized as ordinary income under section 1251(c)(1) after applying subparagraph (2) of this paragraph, if applicable, shall be subject to the exceptions and special rules of section 1251(d) and § 1.1251–4.

(4) *Limitation as to amount in excess deductions account*—(i) *In general.* The aggregate of the amount of gain recognized as ordinary income under section 1251(c)(1) (after applying subparagraphs (2) and (3) of this paragraph, if applicable) shall not exceed the amount in the excess deductions account at the close of the taxable year after subtracting from the account the amount specified in section 1251(b)(3)(A) and paragraph (c)(1)(i) of § 1.1251–2. See section 1251(c)(2)(A). For transfer of amount in an excess deductions account, see section 1251(b)(5).

(ii) *Dispositions taken into account.* If the aggregate of the amount to which section 1251(c)(1) applies is limited for any taxable year by the application of subdivision (i) of this subparagraph, section 1251(c)(1) shall apply in respect of dispositions of items of farm recapture property in the order made. See section 1251(c)(2)(B).

(5) *Relationship to section 1245.* If property is disposed of which qualifies as both section 1245 property (as defined in section 1245(a)(3)) as well as farm recapture property, then gain shall be recognized as ordinary income under section 1251(c)(1) only to the extent that the amount of any gain realized (in the case of a sale, exchange, or involuntary conversion), or to the extent that the excess of the fair market value of the property over its adjusted basis (in the case of any other disposition), was not recognized as ordinary income under section 1245(a)(1). The amount of gain recognized as ordinary income under section 1245(a)(1) upon a disposition of farm recapture property (i) is taken into account under paragraph (b)(2) of §1.1251–3 for purposes of computing farm net loss (or farm net income) and (ii) is not under paragraph (c)(1)(ii) of §1.1251–2 subtracted from the excess deductions account.

(6) *Examples.* The principles of this paragraph may be illustrated by the following examples:

Example 1. A, an unmarried individual who uses the calendar year as his taxable year, makes one disposition of farm recapture property during 1970. On June 30, 1970, he sells for $75,000 farm recapture property (other than land) with an adjusted basis of $43,000 for a realized gain of $32,000 none of which is recognized under section 1245. The balance in A's excess deductions account is $39,000 at the close of 1970 (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A)). Hence, the entire gain of $32,000 is recognized as ordinary income under section 1251(c)(1), and the balance remaining in A's excess deductions account is $7,000. If, however, the original balance in the excess deductions account were only $15,000, then only $15,000 would be recognized as ordinary income under section 1251(c)(1) and A's excess deductions account balance would be reduced to zero. The remaining gain of $17,000 may be treated as gain from the sale or exchange of property described in section 1231.

Example 2. M, a calendar year corporation makes one disposition of farm recapture property during 1975. On January 15, 1975, M distributes as a dividend to its shareholders land which it had acquired on March 3, 1970. On that date, the excess of the fair market value ($67,500) over the adjusted basis of land ($45,000) is $22,500 and the sum of the deductions allowable in respect of such land under sections 175 and 182 is $5,000 for 1970 and $13,000 for the taxable year of disposition and the four immediately preceding taxable years. Thus, the potential gain (as defined in subparagraph (2)(ii) of this paragraph) is limited to $13,000. At the end of M's taxable year (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A) there is a balance of $25,000 in the excess deductions account of M. Since such balance exceeds the potential gain, M recognizes $13,000 as ordinary income under section 1251(c)(1) even though, in the absence of that provision, section 311(a) would preclude recognition of gain to M. The balance in M's excess deductions account is reduced by $13,000, from $25,000 to $12,000. With respect to the treatment of the remaining gain ($9,500) from the disposition of the land, see section 1252 and example (2) of paragraph (e) §1.1252–1.

Example 3. Assume the same facts as in example (2), except that M makes a second disposition of farm recapture property during 1975. On June 5, 1975. M sells for $55,000 a breeding herd of cattle having an adjusted basis of $35,000 for a realized gain of $20,000. M had acquired the herd on April 1, 1971. Assume further that $6,000 of the $20,000 gain realized is treated as ordinary income under section 1245(a)(1). Thus, the amount of gain M would recognize as ordinary income under section 1251(c)(1), computed before applying the excess deductions account limitation, is $14,000. In accordance with the computation in example (1) of paragraph (c)(2) of §1.1251–2, the excess deductions account limitations limit the maximum amount of gain which can be recognized as ordinary income under section 1251(c)(1) upon the disposition of the land and the breeding herd to $25,000. Under subparagraph (4)(ii) of this paragraph, the amount of such limitation, $25,000, is assigned to each property in the order of disposition. Thus, the amount of gain recognized as ordinary income under section 1251 is $13,000 (as in example (1) of this subparagraph) on the disposition of the land and $12,000 on the disposition of the breeding herd. The remaining gain of $2,000 (i.e., $14,000 minus $12,000) on the disposition of the breeding herd may be treated as gain from the sale or exchange of property described in section 1231.

(c) *Instances of nonapplication*—(1) *In general.* Section 1251 does not apply with respect to dispositions of farm recapture property by a taxpayer during a taxable year if at the close of such year after making the necessary additions and subtractions under section 1251(b) (2) and (3)(A), there is no balance in the taxpayer's excess deductions account.

(2) *Losses.* Section 1251(c)(1) does not apply to losses. Thus, section 1251(c)(1) does not apply if a loss is realized upon a sale, exchange or involuntary conversion of property, all of which is farm recapture property, nor does the section apply to a disposition of such property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(3) *Certain dispositions of interests in land.* Section 1251(c)(1) does not apply to dispositions of interests in land with respect to which no deductions were allowable pursuant to an election under section 175 (relating to soil and water conservation expenditures) and 182 (relating to expenditures by farmers for clearing land) for the taxable year of disposition and the four immediately preceding taxable years. For possible application of section 1252 in such a case, see example (1) of paragraph (e) of § 1.1252–1.

(d) *Partnerships.* [Reserved]

(e) *Relation of section 1251 to other provisions*—(1) *General.* The provisions of section 1251 apply (after applying paragraph (b)(5) of this section, relating to section 1245 property) notwithstanding any other provision of subtitle A of the Code. Thus, unless an exception or special rule under section 1251(d) and § 1.1251–4 applies, gain under section 1251(c)(1) is recognized notwithstanding any contrary nonrecognition provision or income characterizing provision. For example, section 1251 overrides section 1231 (relating to property used in a trade or business). Accordingly, gain recognized under section 1251(c)(1) upon a disposition of farm recapture property will be treated as ordinary income to the extent of the balance in the taxpayer's excess deductions account, and only the remaining gain, if any, from the disposition may be considered as gain from the sale or exchange of a capital asset if section 1231 is applicable. See example (3) of paragraph (d)(6) of this section.

(2) *Nonrecognition sections overridden.* The nonrecognition of gain provisions of subtitle A of the Code which section 1251 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, and 512(b)(5). See section 1251(d) and § 1.1251–4 for the extent to which 1251(c)(1) overrides sections 332, 351, 361, 371(a), 374(a), 721, 1031, and 1033.

(3) *Treatment of gain not recognized under section 1251(c)(1).* For treatment of gain not recognized under section 1251(c)(1), the principles of paragraph (f) § 1.1251–6 shall be applicable. Thus section 1251 does not prevent gain which is not recognized under section 1251 from being considered as gain under another provision of the Code, such as for example, section 1252(a)(1) (relating to treatment of gain from disposition of farm land). See example (1) of paragraph (e) of § 1.1252–1.

(4) *Exempt income.* With regard to exempt income, the principles of paragraph (e) of § 1.1245–6 shall be applicable.

(5) *Normal retirement of asset in multiple asset account.* Section 1251(c)(1) does not require recognition of gain upon normal retirements of farm recapture property in a multiple asset account as long as the taxpayer's method of accounting, as described in paragraph (e)(2) of § 1.167(a)–8 (relating to accounting treatment of asset retirements), does not require recognition of such gain.

(6) *Installment method*—(i) *In general.* Gain from a disposition to which section 1251(c)(1) applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall be deemed to consist of gain to which section 1251(c)(1) applies until all such gain has been reported, and the remaining portion (if any) of such income shall be deemed to consist of gain to which section 1251(c)(1) does not apply. For treatment of amounts as interest on certain deferred payments, see section 483. For adjustments in the excess deductions account, see paragraph (c)(1)(ii) of § 1.1251–2.

(ii) *Special rule.* If a taxpayer disposes of property used in the trade or business of farming which qualifies as both section 1245 property as well as farm recapture property and elects to report the gain from such disposition under the installment method, then the income (other than interest) on each installment payment shall (*a*) first be deemed to consist of gain to which section 1245(a)(1) applies until all such gain has been reported, (*b*) The remaining portion (if any) of such income shall be deemed to consist of gain to which section 1251(e)(1) applies until all such gain has been reported, and (*c*) finally the remaining portion (if any) of such income shall be deemed to consist of gain to which neither section 1245(a)(1) nor 1251 (c)(1) applies. See paragraph (d)(3) of §1.1252–1 with respect to the installment method in regard to the disposition of property which is both farm recapture property as well as farm land (as defined in section 1252(a)(2) and paragraph (a)(3)(i) of §1.1252–1).

[T.D. 7418, 41 FR 18814, May 7, 1976; 41 FR 23669, June 11, 1976]

§1.1251–2 Excess deductions account.

(a) *Establishment and maintenance of account*—(1) *General rule.* With respect to any taxable year beginning after December 31, 1969, any taxpayer who:

(i) Has a farm net loss (as defined in section 1251(e)(2) and in paragraph (b) of §1.1251–3) for such a taxable year, or

(ii) Has an excess deductions account balance as of the close of such a taxable year

shall establish (if not previously established) and maintain for purposes of section 1251 an excess deductions account. See section 1251(b)(1). Once an excess deductions account is established (or succeeded to under paragraph (e) of this section in the case of certain corporate transactions and gifts) all entries (including the entries prescribed by paragraph (f) of this section with respect to married taxpayers who file joint returns) with respect to the account must be part of the taxpayer's permanent records for all taxable years for which the account must be maintained. For purposes of applying section 1251 and this section, the term *taxpayer* in the case of a partnership means each partner of such partnership and in the case of an estate or trust means the estate or trust regardless of whether it is taxable under subpart A or E, subchapter J, chapter 1 of the Code.

(2) *Distributions from estate or trust.* If farm recapture property is distributed from an estate or trust in a transaction to which section 1251(d) (1) or (2) (relating to exceptions for gifts and transfers at death) applies, then the excess deductions account balance of the estate or trust shall be succeeded to by the distributee in the amount, if any, and manner prescribed in paragraph (e)(2) of this section. For purposes of the preceding sentence only, the rules of paragraph (e)(2) of this section shall be applied by treating each distribution as a gift at the time made. Thus; for example, if all of the farm recapture property of an estate or trust is distributed to a distributee on the date the estate or trust terminates, the distributee will succeed on that date to the excess deductions account balance of the estate or trust.

(3) *Exception.* A taxpayer is not required to maintain an excess deductions account under subparagraph (1) of this paragraph for a taxable year if:

(i) For such taxable year there would be no additions to the taxpayer's excess deductions account, and

(ii) For the immediately preceding taxable year the balance in the taxpayer's excess deductions account was reduced to zero by reason of section 1251 (b)(3) (relating to subtractions from the account) or section 1251(b)(5) (relating to transfer of account).

(b) *Additions to account*—(1) *General rule.* For each taxable year, there shall be added to the excess deductions account an amount equal to the taxpayer's farm net loss. See section 1251(b)(2)(A).

(2) *Exceptions.* In the case of an individual and, in the case of an electing small business corporation (as defined in section 1371(b)), subparagraph (1) of this paragraph shall apply for a taxable year:

(i) Only if the taxpayer's nonfarm adjusted gross income (as defined in paragraph (d) of §1.1251–3) for such year exceeds $50,000, and

(ii) Only to the extent the taxpayer's farm net loss for such year exceeds $25,000.

The limitations of this subparagraph apply to a person (other than a trust) to whom the tax rates set forth in section 1 are applicable and as prescribed in subparagraph (3) of this paragraph in respect of an electing small business corporation.

(3) *Electing small business corporation*—(i) *Taxable years ending before December 11, 1971.* For taxable years ending before December 11, 1971, in the case of an electing small business corporation (as defined in section 1371(b):

(*a*) For purposes of subparagraph (2) of this paragraph, the term *the taxpayer* means such corporation or any one of its shareholders, and the term *such year,* in the case of a shareholder, means his taxable year with which or within which the taxable year of the corporation ends (see paragraph (d)(2) of § 1.1251–3 for special rules relating to the computation of nonfarm adjusted gross income of a shareholder of an electing small business corporation), and

(*b*) The limitations in subparagraph (2) of this paragraph shall not apply to the corporation for a taxable year if on any day of such year there is a taxpayer who is a shareholder having, for his taxable year with which or within which the taxable year of such corporation ends, a farm net loss (as defined in paragraph (b) of § 1.1251–3).

For purposes of determining whether a shareholder of such corporation has a farm net loss, there shall not be taken into account his pro rata share of farm net income or loss of any other electing small business corporation for such corporation's taxable year ending with or within his taxable year.

(*c*) The provisions of this subdivision (i) do not apply for purposes of determining whether the shareholder must make an addition to his excess deductions account and the amount of such addition.

(ii) *Taxable years ending after December 10, 1971.* [Reserved]

(4) *Married individuals*—(i) *Lower limitations for separate returns.* If married taxpayers file separate returns, then for purposes of this paragraph each spouse shall be treated as a separate individual. However, in such case, (*a*) the amount specified in subparagraph (2)(i) of this paragraph shall be $25,000 in lieu of $50,000, and (*b*) the amount specified in subparagraph (2)(ii) of this paragraph shall be $12,500 in lieu of $25,000. The lower limitations in the preceding sentence shall not apply if the spouse of the taxpayer does not have any nonfarm adjusted gross income for the taxable year. See section 1251(b)(2)(C).

(ii) *Joint return.* If married taxpayers for a taxable year file a joint return under section 6013, then for purposes of this paragraph they shall for such taxable year be treated as a single taxpayer. For rules applicable to establishing, maintaining, and allocating a joint excess deductions account, see paragraph (f) of this section.

(5) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. For 1971, the M Corporation which uses the claendar year as its taxable year and which is not an electing small business corporation has a farm net loss of $40,000 and nonfarm taxable income of $45,000. Since subparagraph (2) of this paragraph does not apply to M, it is required to make a $40,000 addition to its excess deductions account.

Example 2. For 1971, A, an unmarried individual who uses the calendar year as his taxable year, has a farm net loss of $33,000 and nonfarm adjusted gross income of $65,000. Under subparagraph (2) of this paragraph, A is required to make an addition of $8,000 to his excess deductions account (that is, the excess of the farm net loss, $33,000, over the $25,000 amount referred to in subparagraph (2)(ii) of this paragraph). If, however, A were a trust, the limitation in subparagraph (2) of this paragraph would not apply and such trust would be required to add $33,000 (the amount of the entire farm net loss) to its excess deductions account.

Example 3. H and W each use the calendar year as the taxable year. For 1971, H, a married taxpayer who files a separate return, has a farm net loss of $45,000 and nonfarm adjusted gross income of $60,000. H's spouse W does not have any nonfarm adjusted gross income for 1971. Thus, the lower limitations in subparagraph (4)(i) of this paragraph do not apply. Accordingly, H is required to make an addition of $20,000 to his excess deductions account (that is, the excess of the farm net loss, $45,000, over the $25,000 amount referred to in subparagraph (2)(ii) of this paragraph).

Example 4. Assume the same facts as in example (3), except that for 1971 W has a farm net loss of $10,000 and nonfarm adjusted gross income of $30,000. Thus, the lower limitations in subparagraph (4)(i) of this paragraph do apply and H is required to make an addition of $32,500 to his excess deductions account (that is, the excess of his farm net loss, $45,000, over the $12,500 amount referred to in subparagraph (4)(i)(*b*) of this paragraph). Since, however, W did not have a farm net loss in excess of $12,500, she would not be required to make an addition to her excess deductions account. For the result if H and W were to file a joint return, see example (1) of paragraph (f)(6) of this section.

Example 5. For 1970, the M Corporation, which uses the calendar year as its taxable year and which is an electing small business corporation, has a farm net loss of $35,000 and nonfarm adjusted gross income of $60,000. A, B, and C, the sole equal shareholders of M, are cash method taxpayers and each uses a fiscal year ending on March 31. For the taxable year ending March 31, 1971, A has a farm net loss of $5,000. Thus, as M's taxable year ends within the taxable year of A during which A has a farm net loss, the limitations in subparagraph (2) of this paragraph do not apply with respect to M for 1970. See subparagraph (1) of this paragraph, to add $35,000 to its excess deductions account.

Example 6. Assume the same facts as in example (5), except that A's farm net loss occurred in his fiscal year ending March 31, 1970, and no shareholder of M has a farm net loss for the fiscal year ending March 31, 1971. Thus, the limitations in subparagraph (2) of this paragraph do apply with respect to M for 1970, and accordingly M is required to add $10,000 to its excess deductions account for 1970 (that is, the excess of M's farm net loss $35,000, over the $25,000 amount referred to in subparagraph (2)(ii) of this paragraph).

Example 7. Assume the same facts as in example (6), except that M has $45,000 of nonfarm adjusted gross income for 1970 and A, for his taxable year ending March 31, 1971, has $40,000 of nonfarm adjusted gross income, computed without regard to his interest in M. Assume the M paid no dividends. Since, under paragraph (d)(2) of §1.1251–3, A's income from M under section 1373(b) is computed on the basis of M's nonfarm adjusted gross income, A's gross income from M is $15,000 (⅓ of $45,000), and A's total nonfarm adjusted gross income is $55,000. Accordingly, M would be required to add $10,000 to its excess deductions account for 1970 for the reasons stated in example (6).

Example 8. Assume the same facts as in example (7). Assume further that A is one of two equal shareholders in N, another electing small business corporation with a taxable year ending on January 31, and that N for its taxable year ending on January 31, 1971, has a $42,000 nonfarm loss and farm net income of $23,000. Assume that N paid no dividends. Thus, A for purposes of subparagraph (2)(i) of this paragraph, would only have a total of $34,000 of nonfarm adjusted gross income ($55,000) computed per example (7) minus $21,000 (A's share of N's nonfarm net operating loss (½ of $42,000) computed in accordance with paragraph (d)(2) of §1.1251–3)). Assuming that no other shareholder of M has nonfarm adjusted gross income in excess of $50,000, by reason of the $50,000 limitation in subparagraph (2)(i) of this paragraph, M makes no addition for 1971 to its excess deductions account. (N would make no addition to its excess deductions account as it does not have a farm net loss.) If, however, N were to have a nonfarm loss of only $8,000, A for purposes of subparagraph (2)(i) of this paragraph would have a total of $51,000 of nonfarm adjusted gross income ($51,000 of nonfarm adjusted gross income ($55,000, minus ½ of N's nonfarm loss of $8,000)). Hence, with respect to M the result would be the same as in example (7) (and N would make no addition to its excess deductions account since it does not have a farm net loss).

Example 9. D and E are equal individual shareholders in corporations X, Y, and Z, the stock of each corporation having recently been purchased from a different unrelated person. X, Y, and Z are electing small business corporations. D, E, and the corporations all use the calendar year as the taxable year. For 1970, the farm net income of D and E (determined without regard to their respective pro rata shares of the farm net income or loss of X, Y, and Z) are $100,000 and zero, respectively. For 1970, the farm net income or loss of the corporations are losses of $80,000 and $20,000 for X and Z, respectively, and income of $60,000 for Y. For 1970, the determinations under subparagraph (3)(ii) of this paragraph as to whether a shareholder of corporation X or Z (no determination is necessary with respect to Y since Y does not have a farm net loss) has a farm net loss are made as follows:

DETERMINATIONS AS TO WHETHER D OR E HAS A FARM NET LOSS

	As to X		As to Z	
	D	E	D	E
Farm net income (determined without regard to X, Y, and Z)	$100,000	$0	$100,000	$0
Pro rata (½) share of corporation's farm net income (or loss):				
Of X			(40,000)	(40,000)
Of Y	30,000	30,000	30,000	30,000
Of Z	(10,000)	(10,000)		
Farm net income (or loss) for purposes of determination	$120,000	$20,000	$90,000	($10,000)

Accordingly, since the determination as to X indicates that neither D nor E has a farm net loss, the limitations of subparagraph (2) of this paragraph apply to X. Thus, assuming that X, D, or E has nonfarm adjusted gross income in excess of $50,000, X will add $55,000 to its excess deductions account, i.e., the excess of the farm net loss, $80,000, over the $25,000 amount referred to in subparagraph (2)(ii) of this paragraph. Since, however, the determination as to Z indicates that E has a farm net loss, such limitations do not apply to Z. Thus, the addition for 1970 to Z's excess deductions account is the entire amount of its farm net loss, $20,000.

(c) *Subtractions from account*—(1) *General rule.* Under section 1251(b)(3), if there is any amount in the excess deductions account at the close of a taxable year (determined after making any addition required under paragraph (b) of this section for such year but before making any reduction under this paragraph for such year), then the excess deductions account shall be reduced (but not below zero) by subtracting:

(i) An amount equal to (*a*) the farm net income (as defined in section 1251 (e)(3) and in paragraph (c) of § 1.1251–3) for such year, plus (*b*) the amount (as determined in subparagraph (3) of this paragraph) necessary to adjust the account for deductions for any taxable year which did not result in a reduction of the taxpayer's tax under subtitle A of the Code for such taxable year or any preceding taxable year, and

(ii) After making any addition to the excess deductions account under paragraph (b) of this section and any reduction under subdivision (i) of this subparagraph for the taxable year, an amount equal to the sum of the amounts recognized as ordinary income solely by reason of the application of section 1251(c)(1). See section 1251(b)(3)(B). Thus, no amount shall be subtracted under this subdivision for gain recognized by reason of the application of section 1245(a)(1) or 1252(a)(1). For effect on computation of farm net loss or income of gain recognized under section 1245(a)(1) upon a disposition of farm recapture property, see paragraph (b)(2) of § 1.1251–3. In the case of an installment sale of farm recapture property, the taxpayer's excess deductions account shall be reduced under this subdivision in the year of such sale by an amount equal to the gain (computed in the year of sale) to be recognized as ordinary income under section 1251(c)(1).

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples in which it is assumed that there is no subtraction for lack of tax benefit under subparagraph (3) of this paragraph:

Example 1. Assume the same facts as in example (3) of paragraph (b)(6) of § 1.1251–1. M's excess deductions account balance as of the close of 1975 is computed, in accordance with the additional facts assumed, in the table below:

M'S EXCESS DEDUCTIONS ACCOUNT

(1) Balance January 1, 1975		$26,000
(2) Additions for 1975		0
(3) Subtotal		26,000
(4) Subtractions for 1975 (farm net income[1])		1,000
(5) Excess deductions account limitation on gain recognized as ordinary income under section 1251(c)(1) for 1975		25,000
(6) Subtraction for disposition of farm recapture property:.		
(a) Gain from disposition of land to which section 1251(c)(1) applies (computed before applying limitation	$13,000	
(b) Gain from disposition of breeding herd to which section 1251(c)(1) applies (computed before applying limitation)	14,000	
(c) Sum of lines (a) and (b)	27,000	
(d) Excess deductions account limitation (amount in line (5))	25,000	
(e) Gain recognized as ordinary income under section 1251(c)(1) (lower of line (6)(c) or line (6)(d)		25,000
(7) Balance December 31, 1975		0

[1] Computed by treating the section 1245 gain of $6,000 under paragraph (b)(1)(ii) of § 1.1251–3 as gross income derived from the trade or business of farming.

For allocation of the $25,000 of gain recognized as ordinary income to the land and herd, and for treatment of the gain recognized in excess of $25,000 see example (3) of paragraph (b)(6) of §1.1251–1.

Example 2. A is an unmarried individual who uses the calendar year as his taxable year. In 1971, A makes a single disposition of farm recapture property (other than land) realizing a gain of $46,000 of which $15,000 is recognized as ordinary income under section 1245(a)(1). The gain to which section 1251(c)(1) applies (computed before applying the excess deductions account limitation in section 1251(c)(2)(A) and paragraph (b)(4)(i) of §1.1251–1) is $31,000 (i.e., $46,000 minus $15,000). The treatment of the gain realized on the disposition in excess of the $15,000 recognized as ordinary income under section 1245(a)(1) and the balance in A's excess deductions account as of the close of 1971 is computed, in accordance with the facts assumed, in the table below:

A'S EXCESS DEDUCTIONS ACCOUNT

(1) Balance January 1, 1971		$50,000
(2) Additions for 1971:		
(a) Farm net loss for 1971[1]	$5,000	
(b) Less amount in paragraph (b)(2)(ii) of this section	25,000	
(c) Total additions for 1971		0
(3) Subtotal		50,000
(4) Subtractions for 1971		0
(5) Excess deductions account limitation on gain recognized as ordinary income under section 1251(c)(1) for 1971		50,000
(6) Subtraction for dispositions of farm recapture property:		
(a) Gain to which section 1251(c)(1) applies (computed before applying limitation)	31,000	
(b) Limitation (amount in line (5)	50,000	
(c) Gain recognized as ordinary income under section 1251(c)(1) lower of line 6(a) or line 6(b)		31,000
(7) Balance December 31, 1971	19,000	

[1] Computed by treating the section 1245 gain of $15,000 under paragraph (b)(1)(ii) of §1.1251–3 as gross income derived from the trade or business of farming.

(3) *Amount necessary to adjust the excess deductions account with respect to deductions which did not result in a reduction of the taxpayer's tax*—(i) *In general.* Under section 1251(b)(3)(A), a subtraction is made from the excess deductions account to adjust the account for deductions that did not result in a reduction of the taxpayer's tax for the taxable year or any preceding taxable year. The amounts to be subtracted are determined under subdivisions (ii) and (iii) of this subparagraph in accordance with the rules in subdivision (iv) of this subparagraph. This subtraction shall be made before determining the amount of gain to which section 1251(c) applies. The amount subtracted under subdivision (ii) of this subparagraph is a temporary subtraction made solely to determine the amount in the excess deductions account for purposes of the limitation in section 1251(c)(2).

(ii) *Temporary subtraction.* The amount temporarily subtracted from the excess deductions account for a taxable year is the sum of the farm portion of (*a*) any net operating loss for such taxable year which does not reduce taxable income (computed without regard to the deduction under section 172(a)) in a prior year, and (*b*) any net operating loss from a prior taxable year which is carried to such taxable year but which does not reduce taxable income (computed without regard to the deduction under section 172(a)) in such taxable year.

(iii) *Permanent subtraction.* The amount permanently subtracted from the excess deductions account for a taxable year is the excess of the farm portion of any net operating loss which may be carried to the preceding year (reducing by the portion of such loss which reduced taxable income (computed without regard to the deduction under section 172(a)) for such preceding year) over the amount of such loss which may be carried to the taxable year, but the subtraction shall not be made earlier than the taxable year in which the excess deductions account is increased by reason of such loss.

(iv) *Rules of application.* For purposes of this subparagraph, the following rules shall apply:

(*a*) The farm portion of a net operating loss is that portion of such loss attributable to the trade or business of farming. Such portion and the remaining portion (hereinafter referred to as the nonfarm loss) shall be absorbed pro rata. If a farm net loss is not added to the excess deductions account in the year in which such loss occurs, the net operating loss (if any) for such year shall be treated as a nonfarm loss.

(*b*) In the case of an individual (other than a trust), the farm portion of a net operating loss shall be decreased by an amount, if any, equal to the excess of $25,000 (or the amount determined under paragraph (b)(2)(ii) of this section) over the nonfarm adjusted gross income. Such amount shall be added to the nonfarm portion of such net operating loss.

(*c*) The amounts considered as reducing taxable income under subdivision (ii) of this subparagraph in the taxable year shall be determined on the basis of a tentative computation of taxable income for such year in which the gain realized from the disposition of property to which section 1251(c)(1) applied shall be computed without regard to the excess deductions account limitation.

(v) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example: A is an unmarried individual who uses the calendar year as his taxable year. For the years 1970 through 1974, A's items of income and deductions are as shown in the table below. A's personal deductions are disregarded. A had no income or loss for any year prior to 1970. Based upon such amounts and the computations shown below, A must recognize as ordinary income under section 1251(c)(1), $35,325 for 1971, $10,000 for 1972, $3,925 for 1973, and $150,000 for 1974.

Amounts assumed	1970	1971	1972	1973	1974
(a) Farm net income	($250,000)	$20,000	$5,000	($75,000)	($10,000)
(b) Nonfarm income	55,000	(82,000)	30,000	10,000	200,000
(c) Gain which would be recognized as ordinary income under 1251(c) (computed without regard to the EDA limitation) (hereinafter referred to as *farm property disposition*)		88,000	10,000	2,000	150,000
(d) Personal exemption	625	675	750	750	750
(e) Net operating loss (NOL) (computed per section 172(c))	(195,000)			(45,000)	

I. COMPUTATIONS FOR 1971

1. Excess Deductions Account (EDA) Limitation for 1971:			
a. EDA on December 31, 1970:			
1970 Farm net loss		250,000	
Less		(25,000)	
		225,000	225,000
b. Less farm net income for 1971			(20,000)
c. EDA before temporary subtraction			205,000
d. Less temporary subtraction per subdivision (ii)(*b*):			
Aggregate farm NOL carryover to 1971		195,000	
Less tentative farm NOL deduction for 1971:			
Farm net income	20,000		
Nonfarm income	(82,000)		
Farm property disposition	88,000		
Exemption	(675)		
Tentative taxable income	25,325		
Tentative NOL reducing taxable income	25,325	(25,325)	
		169,675	(169,675)
e. EDA limitation for 1971			35,325
2. 1971 Taxable Income:			
a. Farm net income			20,000
b. Nonfarm income			($82,000)
c. Farm property disposition			88,000
d. Exemption			(675)

Amounts assumed	1970	1971	1972	1973	1974
e. Section 1202 deduction:					
Farm property disposition				$88,000	
Less amount treated as ordinary income under section 1251(c) (lesser of amount of gain on line 1(e))				35,325	
Capital gain				52,675	
Less 50 percent deduction				26,337	(26,338)
f. 1971 Taxable income				....	(1,013)
II. COMPUTATIONS FOR 1972					
1. Excess Deductions Account Limitation for 1972:					
a. EDA (line 1(c) above)					205,000
b. Less recapture in 1971					(35,325)
c. Less farm net income for 1972					(5,000)
d. Less permanent subtraction per subdivision (iii):					
1970 Farm NOL carryover to 1971				195,000	....
Less 1970 farm NOL carryover to 1972 (computed per section 172(b)(2)):					
Farm NOL to 1971			$195,000	....	....
Less 1971 taxable income computed per section 172(b)(2):					
Farm net income		$20,000			
Nonfarm income		(82,000)

f. Taxable income before NOL deduction					339,250
g. Net operating loss deduction					(169,000)
h. Taxable income					170,250

(vi) *Electing small business corporation. (a)* In the case of an electing small business corporation, the amounts to be subtracted under subdivisions (ii) and (iii) of this subparagraph, shall be the sum of the amounts under such subdivisions computed with respect to each shareholder of the corporation for the taxable year of the shareholder with which or within which the taxable year of the corporation ends, by applying (*b*) of this subdivision (vi), in lieu of subdivision (iv)(*a*) of this subparagraph.

(*b*) For purposes of (*a*) of this subdivision, the farm portion of a shareholder's net operating loss is that portion of the net operating loss of such shareholder attributable to the corporation's farm net loss, and such portion and the remaining portion shall be considered to be absorbed pro rata. If a corporation's farm net loss is not added to its excess deduction account in the year in which such loss occurs, no portion of a shareholder's net operating loss for the taxable year of the shareholder with which or within which such taxable year of the corporation ends shall be attributable to such corporation's farm net loss.

(d) *Exception for taxpayers using certain accounting methods*—(1) *General rule.* Under section 1251(b)(4), except to the extent that a taxpayer has succeeded to an excess deductions account as provided in paragraph (e) of this section (relating to receipt of farm recapture property in certain corporate and gift transactions), additions to the account shall not be required by a taxpayer who elects to compute taxable income from the trade or business of farming (as defined in paragraph (e)(1) of §1.1251–3:

(i) By using inventories for all property which may be inventoried except as to property to which subdivision (ii) of this subparagraph applies, and

(ii) In accordance with subparagraph (3) of this paragraph, by charging to capital account all expenditures paid or incurred which are properly chargeable to capital account including such expenditures which the taxpayer may, under chapter 1 of the Code or regulations prescribed thereunder, otherwise treat or elect to treat as expenditures which are not chargeable to capital account.

For rules as to procedure of making the election, effect of a change in method of accounting upon making the election, and conditions for revoking the election, see subparagraphs (4), (5), and (6), respectively, of this paragraph.

(2) *Inventories.* The absence of property which may be inventories shall not preclude a taxpayer from making an election under section 3251(b)(4). Any acceptable inventory method will satisfy the requirement of subparagraph (1)(i) of this paragraph.

(3) *Property chargeable to capital account*—(i) *In general.* Property subject to the capitalization requirement prescribed in subparagraph (1)(ii) of this paragraph includes all property described in section 1231(b) (1) and (3),

without regard to any holding period therein provided, which is used in the trade or business of farming. Thus, for example, property subject to the capitalization requirement includes property used in the trade or business of farming of a character subject to the allowance for depreciation and real property so used regardless of the period held, and livestock used in the trade or business of farming which is held for draft, breeding, dairy, or sporting purposes regardless of the period held.

(ii) *Expenditures which must be capitalized.* Expenditures subject to the requirement of subparagraph (1)(ii) of this paragraph are all expenditures, whether direct or indirect, paid or incurred, which are properly chargeable to capital account. For examples of the meaning of the term *properly chargeable to capital account,* see §§ 1.61–4, 1.162–12, 1.263(a)–1, and 1.263(a)–2, and paragraph (a)(4) (ii) and (iii) of § 1.446–1. Other examples of expenditures referred to in subparagraph (1)(ii) of this paragraph are expenditures under sections 175 (relating to soil and water conservation), 180 (relating to fertilizer, etc.), 182 (relating to land clearing), and 266 (relating to certain carrying charges) which (without regard to section 1251) a taxpayer may treat or elect to treat as expenditures which are not chargeable to capital account. Thus, for example, with respect to developing a farm, ranch, orchard, or grove, amounts properly chargeable to capital account include amounts paid or incurred for upkeep, taxes, interest, and other carrying charges, water for irrigation, fertilizing, controlling undergrowth, and the cultivating and spraying of trees. For a further example, with respect to a produced animal, amounts properly chargeable to capital account for the animal include all expenditures paid or incurred for producing the animal, such as for stud, breeding, and veterinary services, as well as all amounts paid or incurred with respect to the brood animal during the gestation period of the produced animal including all amounts paid or incurred for feed, maintenance, utilities, indirect overhead, depreciation, insurance, and carrying charges. Direct and indirect expenditures properly chargeable to capital account with respect to raising an animal may include, in addition to expenditures for feed, maintenance, etc., expenditures for training. Direct and indirect expenditures with respect to feed may include, in the case of a grazing operation, fees for the rental of grazing land, and the portion of all labor, taxes, interest, fencing costs, and carrying charges paid or incurred by the taxpayer allocable to grazing. For purposes of this subparagraph, reasonable allocations shall be made by the taxpayer of items between animals held for different purposes and as to each animal held. However, all amounts allocated to a brood animal during the period of gestation are, for purposes of this subparagraph, entirely chargeable to the capital of the produced animal.

(iii) *Unharvested crops.* With respect to unharvested crops to which section 1231(b)(4) applies, see section 268 and paragraph (g) of § 1.1016–5 (relating, respectively, to disallowance of certain deductions and to adjustments to basis).

(iv) *Changes in character of property.* If, in a taxable year subsequent to the first taxable year to which an election under section 1251(b)(4) applies, property which was not subject to the requirements of subparagraph (1)(ii) of this paragraph becomes subject to such requirements, then the following rules shall apply:

(*a*) The adjusted basis of such property at the beginning of the taxable year in which it becomes subject to the requirements of subparagraph (1)(ii) of this paragraph shall be equal to the amount its adjusted basis would have been on such date had it been accounted for in accordance with such requirements (taking into account, if applicable, the depreciation which would have been allowed as determined by the taxpayer using a period, salvage value, and methods that would have been proper).

(*b*) At the beginning of the taxable year in which such property becomes subject to the requirements of subparagraph (1)(ii) of this paragraph:

(*1*) If such property was not included in the opening inventory, the amount equal to the excess of its adjusted basis as computed in (*a*) of this subdivision over its adjusted basis as of the close of the preceding taxable year, or

(*2*) If such property was included in the opening inventory, such opening inventory shall be reduced by the inventory value of such property included therein and the amount of the difference between the adjusted basis for the property computed in (*a*) of this subdivision and such inventory value,

Shall be added to gross income for such taxable year and shall be treated as gross income derived from the trade or business of farming under paragraph (b)(1)(ii) of §1.1251–3, except that if the difference in (*b)(2*) of this subdivision represents an excess of such inventory value over the adjusted basis for the property computed in (*a*) of this subdivision then such excess shall be subtracted from gross income for such taxable year and shall be treated as a deduction allowed which is directly connected with carrying on the trade or business of farming under paragraph (b)(1)(i) of §1.1251–3.

(*c*) If any deductions for depreciation are treated as amounts which would have been allowed in a prior taxable year or years for purposes of (*a*) of this subdivision, such deduction shall be treated as having been allowed for purposes of applying sections 1245 and 1250 in the same taxable year or years and thus included in the amount of adjustments reflected in adjusted basis within the meaning of paragraph (a)(1)(ii) of §1.1245–2 or depreciation adjustments within the meaning of paragraph (d)(1) of §1.1250–2 (as the case may be).

(*d*) For purposes of this subparagraph (3), if during a taxable year property becomes subject to the requirements of subparagraph (1)(ii) of this paragraph, it shall be considered subject to such requirements on each day it is held during such year.

(*e*) The adjusted basis under (*a*) of this subdivision of property of a character subject to the allowance for depreciation shall be its basis for which deductions may be computed under section 167.

(v) *Example.* The provisions of subdivision (iv) of this subparagraph may be illustrated by the following example:

Example: On January 1, 1974, A, an individual taxpayer who in a previous year had elected under section 1251(b)(4) to compute income from the trade or business of farming by using inventories and by charging to capital account all items properly chargeable to capital under the rules of subdivision (ii) of this subparagraph, purchases a herd of six-month-old feeder calves for $13,000. During 1974, in connection with such herd, A incurred raising costs of $4,000 and carrying charges of $1,600 which would have been properly chargeable to capital account within the meaning of subparagraph (1)(ii) of this paragraph if the herd had not been included in inventory. A determines under his unit-livestock method that on December 31, 1974, the inventory value of the herd is $17,000. On March 1, 1975, A decides to use one-half of the herd for breeding purposes with such part of the herd becoming subject to the capitalization requirements. On January 1, 1975, the adjusted basis for the animals held for breeding purposes, computed under the provisions of subdivision (iv)(a) of this subparagraph, is $9,300 (that is, the aggregate of one-half of the purchase price of $13,000 for the entire herd of feeder calves, $6,500, one-half of the carrying charges of $1,600 incurred during 1974 in connection with the entire herd, $800, and one-half of the $4,000 of raising costs incurred during 1974 for the entire herd, $2,000). There is no adjustment for the depreciation which would have been allowed since no animal in the herd had reached an acceptable breeding age. Therefore, A as of January 1, 1975, must under the provisions of subdivision (iv)(*b)(2*) of this subparagraph subtract $8,500 from his opening inventory value of $17,000. However, A has not changed his method of accounting with respect to such animals. Under the provisions of subdivision (iv)(*b)(2*) of this subparagraph, A for 1975 will add $800 to his gross income (that is, the difference between the adjusted basis for the calves to be used for breeding purposes, $9,300, over the inventory value of such animals, $8,500). Such amount under the provisions of subdivision (iv)(*b*) shall be treated as gross income derived from the trade or business of farming under paragraph (b)(1) of §1.1251–3.

(4) *Time and manner of making election*—(i) *In general.* The election under section 1251(b)(4) for any taxable year beginning after December 31, 1969, shall be filed within the time prescribed by law (including extensions thereof) for filing the return for such taxable year. Such election shall be made and filed by attaching a statement of such election signed by the taxpayer to the return for the first taxable year for which the election is made. The statement shall contain a declaration that the taxpayer is making an election

under section 1251(b)(4) of the Code and that taxable income from the trade or business of farming is computed by using inventories for all property, which may be inventoried and by charging to capital account all expenditures paid or incurred which are properly chargeable to capital account (including such expenditures which the taxpayer may, under chapter 1 of the Code or regulations prescribed thereunder, otherwise treat or elect to treat as expenditures which are not properly chargeable to capital account). Additionally, the statement must contain the information prescribed by subparagraph (5) of this paragraph, if applicable.

(ii) *Joint return.* If for a taxable year taxpayers file a joint return under section 6013, the election referred to in subparagraph (1) of this paragraph must be made by both such taxpayers in accordance with the provisions of subdivision (i) of this subparagraph. If, however, in such case either of such taxpayers has for a previous taxable year made such an election, then only the taxpayer who has not made such election is required to comply with the provisions of subdivision (i) of this subparagraph. The taxpayer who previously made such an election shall attach a statement to the return specifying the taxable year for which the election was made and with whom the election was filed.

(5) *Change in method of accounting, etc.*—(i) *In general.* If, in order to comply with an election made under section 1251(b)(4), a taxpayer must change his method of accounting (in computing taxable income from the trade or business of farming) by placing in inventory a class of items not previously treated as in an inventory or by charging to capital account a class of items which had been consistently treated as an expense or as part of inventory (see paragraph (e)(2)(ii)(*b*) of § 1.446–1), the taxpayer will be deemed to have obtained the consent of the Commissioner as to such change in method of accounting solely as to such items and there shall be taken into account in accordance with section 481 of the Code and the regulations thereunder those adjustments which are determined to be necessary by reason of such change solely as to such items in order to prevent amounts from being duplicated or omitted. For purposes of section 481(a)(2), such change in method of accounting with respect to only such items shall be treated as a change not initiated by the taxpayer and, thus, under paragraph (a)(2) of § 1.481–1, no part of the adjustments required under section 481 with respect to such items shall be based on amounts which are taken into account in computing income (or which should have been taken into account had the new method of accounting been used) for taxable years beginning before January 1, 1954, or ending before August 17, 1954.

(ii) *Additional information.* If, in order to comply with an election made under subparagraph (1) of this paragraph a taxpayer (or in the case of a joint return one or both taxpayers) changes his method of accounting, then in addition to the information required to be filed under subparagraph (4) of this paragraph the taxpayer must file on Form 3115 as part of such election all the information described in paragraph (e)(3) of § 1.446–1 (relating to change in method of accounting), but the time prescribed in paragraph (e)(3) of § 1.446–1 for filing Form 3115 shall not apply.

(iii) *Election made before May 7, 1976.* If an election referred to in subparagraph (1) of this paragraph was made before May 7, 1976, the taxpayer shall file not later than August 5, 1976, such information referred to in subparagraph (4) of this paragraph not previously required by applicable regulations to be filed in order to make such election, and, in addition, if subdivision (ii) of this subparagraph applies, the taxpayer shall file not later than August 5, 1976, on Form 3115 the information referred to in subdivision (ii) of this subparagraph with the district director, or the director of the internal revenue service center, with whom the election was filed. For this purpose, Form 3115 shall be attached to a statement clearly identifying the election referred to in subparagraph (1) of this paragraph and the first taxable year to which it applied.

(6) *Revocability of election*—(i) *In general.* An election referred to in subparagraph (1) of this paragraph is binding on the taxpayer or in the case of a

joint return both taxpayers) for the taxable year of such election and for all subsequent taxable years (regardless of whether they continue to file a joint return) and may not be revoked except with the consent of the Commissioner. Since revocation would constitute a change in method of accounting, in order to secure the Commissioner's consent to the revocation of such an election and to a change of the taxpayer's method of accounting, all the provisions of paragraph (e)(3) of §1.446–1 must be met including the requirement that Form 3115 must be filed within 180 days after the beginning of the taxable year in which it is desired to make the change. See section 481 and the regulations thereunder (relating to certain adjustments required by such changes).

(ii) *Revocation of elections made prior to May 7, 1976.* If on or before May 7, 1976, an election under section 1251(b)(4) has been made, such election may be revoked without permission of the Commissioner by filing on or before August 5, 1976, with the district director or the director of the internal revenue service center with whom the election was filed a statement of revocation of an election under section 1251(b)(4). If such election to revoke is for a period which falls within one or more taxable years for which an income tax returns shall be filed for any such taxable years for which the computation of taxable income is affected by reason of such revocation.

(e) *Transfer of excess deductions account*—(1) *Certain corporate transactions*—(i) *In general.* Under section 1251(b)(5)(A), in the case of a transfer described in section 1251(d)(3) and paragraph (c)(2) of §1.1251–4 to which section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings), 374(a) (relating to exchanges pursuant to certain railroad reorganizations), or 381 (relating to carryovers in certain corporate acquisitions) applies, the acquiring corporation shall succeed to and take into account as of the close of the day of distribution or transfer the excess deductions account of the transferor. Determinations under this subdivision shall be made under subdivisions (ii), (iii), and (iv) of this subparagraph regardless of whether section 381 applies. For treatment as farm recapture property of stock or securities received in certain transfers to controlled corporations to which section 1251(d)(3) (but not section 1251(b)(5)(A)) applies, see section 1251(d)(6) and paragraph (f) of §1.1251–4.

(ii) *Acquiring corporation.* For purposes of subdivision (i) of this subparagraph, determinations as to which corporation is the acquiring corporation shall be made under paragraph (b)(2) of §1.381(a)–1.

(iii) *Certain operating rules.* For purposes of subdivision (i) of this subparagraph, the operating rules of section 381(b) and §1.381(b)–1 shall apply. Thus, for example, except in the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the amount of the excess deductions account of the transferor shall be computed, as of the close of the date of distribution or transfer (as determined under paragraph (b) of §1.381(b)–1), as if the taxable year of the transferor closed on such date (regardless of whether the taxable year actually closed). In the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the acquiring corporation's excess deductions account shall be treated for purposes of section 1251 just as the transferor corporation's excess deductions account would have been treated if there had been no reorganization.

(iv) *Excess deductions account balance.* For purposes of subdivision (i) of this subparagraph, the amount in the transferor's excess deductions account as of the close of the date of distribution or transfer referred to in subdivision (iii) of this subparagraph shall be the amount in such account determined after making all the applicable additions and subtractions under section 1251(b) (other than subtractions under paragraph (5)(A) of section 1251(b) and this subparagraph) for the taxable year ending (or considered ending) on such date including a subtraction by reason of gain (if any) recognized under section 1251(c)(1) by reason of a disposition which is in part a sale or exchange and in part a gift transaction to which section 1251(d)(1) and paragraph (a)(2) of § 1.1251–4 apply.

(2) *Certain gifts*—(i) *In general.* If farm recapture property is disposed of by gift (including for purposes of this paragraph in a transaction which is in part a sale or exchange and in part a gift or a transaction treated under paragraph (a)(2) of this section as a gift), and if such gift is made during any *1-year period* (described in subdivision (ii) of this subparagraph) for which the *potential gain limitation percentage* (as computed in subdivision (iii) of this subparagraph) exceeds 25 percent, then the provisions of subdivision (iv) of this subparagraph shall apply in respect of such gift.

(ii) *One-year period.* For purposes of this subparagraph, a *1-year period* is a period of 365 days beginning on the date a gift is made by the donor.

(iii) *Potential gain limitation percentage.* Under this subdivision, the *potential gain limitation percentage* for any such 1-year period is a percentage equal to (*a*) the sum of the potential gains (determined as of the first day of such period) on each item of farm recapture property held by such taxpayer on such first day disposed of by gift by the taxpayer during such period, divided by (*b*) the sum of the potential gains (determined as of the first day of such period) on all farm recapture property held by such taxpayer on such first day.

(iv) *Allocation ratio.* With respect to each gift of property (to which the provisions of this subdivision apply) made during a taxable year, each donee shall succeed (at the time the first of such gifts is made during such taxable year) to the same proportion of (*a*) the donor's excess deductions account determined, as of the close of such taxable year of the donor, after making all the applicable additions and subtractions under section 1251(b) (other than subtractions under section 1251(b)(5) and this paragraph), as (*b*) the potential gain (determined immediately prior to the time the first of such gifts is made during such taxable year) on the property (held by the donor immediately prior to such time) received by such donee bears to (*c*) The aggregate potential gain (determined immediately prior to such time) on all farm recapture property held by the donor immediately prior to such time.

(v) *Definitions and certain special rules.* For purposes of this subparagraph:

(*a*) The term *potential gain* means an amount equal to the excess of the fair market value of property over its adjusted basis, but, in the case of land, limited under paragraph (b)(2)(ii) of § 1.1251–1 to the extent of the deductions allowable in respect of such land pursuant to an election (if any) under sections 175 (relating to soil and water conservation expenditures) and 182 (relating to expenditures by farmers for clearing land) for the taxable year of disposition and the four immediately preceding taxable years regardless of whether any such preceding taxable year begins before December 31, 1969. See section 1251(e)(5).

(*b*) Property held on the first day of a one-year period shall include property received by gift during such one-year period and the potential gain with respect to such property, for purposes of making the computations under this subparagraph, shall be the potential gain in the hands of the donor reduced by the amount of gain (in the case of an exchange which is part a sale and part a gift) taken into account by the donor.

(*c*) Property held by a taxpayer on the first day of a one-year period which property becomes farm recapture property in the hands of such taxpayer during such one-year period shall be considered to be farm recapture property on each day of such one-year period.

(vi) *Part-sale-part-gift transaction.* If property is disposed of in a transaction which is in part a sale or exchange and in part a gift, then for purposes of subdivisions (iii)(*a*) and (iv)(*b*) of this subparagraph the potential gain with respect to the property transferred shall be reduced by the amount of gain taken into account by the transferor.

(vii) *Joint return.* For application of the provisions of this subparagraph with respect to a taxable year for which a joint return is filed, see paragraph (f)(4) of this section.

(3) *Examples.* The provisions of subparagraph (2) of this paragraph may be illustrated by the following examples

in which it is assumed that all taxpayers are unmarried individuals.

Example 1. The only farm recapture property A owns is a farm, consisting of farm land and certain farm equipment which is farm recapture property. During the period involved, there was no deduction allowable under section 175 or 182 to any person owning an interest in the farm. A, who uses the calendar year as his taxable year, makes a series of gifts of undivided interests in the farm. In these circumstances, computations may be made by reference to percentages of undivided interests in the farm. The potential gain limitation percentages for each applicable 1-year period are computed, in accordance with the additional facts assumed, in the table below:

Date Gift to donee	9/1/70	8/1/71	3/1/72	5/1/73
	C	D	E	F
(1) Percent of undivided interest in entire farm given as gift by A on date indicated	20%	10%	10%	60%
(2) Percent of undivided interest in entire farm held by A immediately before gift	100%	80%	70%	60%
(3) Potential gain:.				
(a) On all property held by A on date of gift	$100,000	$96,000	$140,000	$125,000
(b) Limitation percentage (sum of amounts in line (1) during 1-year period beginning on date of gift divided by line (2))	30%	25%	14.28%	100%

(ii) Under subparagraph (2)(iv) of this paragraph, C, D, and F each succeed to the proportion of A's excess deductions account at each applicable time as computed in accordance with the additional facts assumed, in the table below:

	Taxable year ending—			
	Dec. 31, 1970	Dec. 31, 1971	Dec. 32, 1972	Dec. 31, 1973
Gift to donee to which subparagraph (2)(iv) of this paragraph applies during taxable year	C	D	E	F
(4) Potential gain (determined immediately prior to time first gift to which subparagraph (2)(iv) of this paragraph applies is made):				
(a) On property received by donee to which such subparagraph (2)(iv) applies (line (3)(a) multiplied by line (1) divided by line (2))	$20,000	$12,000	....	$125,000
(b) Aggregate potential gain on all farm recapture property held by donor (line (3)(a))	$100,000	$96,000	....	$125,000
(5) Allocation ratio (line (4)(a), divided by line (4)(b))	20%	12.5%	....	100%
(6) Excess deductions account of A:.				
(a) At end of previous taxable year	0	$160,000	$210,000	$200,000
(b) Net increase (decrease) for taxable year (determined before making any subtractions under section 1251(b)(5) and this paragraph)	$200,000	$80,000	($10,000)	$36,000
(c) At 12/31 (so determined)	$200,000	$240,000	$200,000	$236,000
(d) Less: Portion to which donee succeeds (line (5), multiplied by line (6)(c))	$40,000	$30,000	$0	$236,000
(e) At 12/31 (to line (6)(a) following taxable year)	$160,000	$210,000	$200,000	$0

Since the potential gain limitation percentage for the 1-year period beginning on September 1, 1970, exceeds 25 percent, a portion of A's excess deductions account, under the provisions of subparagraph (2)(iv) of this paragraph, is succeeded to by C and D. Similarly, since such percentage for the 1-year period beginning May 1, 1973, exceeds 25 percent, such provisions apply to the gift made to F. Since, however, such percentage is 25 percent or less for all 1-year periods in which the gift to E falls (i.e., 25 percent and 14.28 percent for the 1-year periods beginning, respectively, on August 1, 1971, and March 1, 1972) such provisions do not apply to the gift to E.

Example: 2. (i) G uses the calendar year as his taxable year and H uses a taxable year ending June 30. As of the close of 1972, G has $100,000 in his excess deductions account, determined before any subtractions under section 1251(b)(5) and this paragraph. G owns only three items of farm recapture property, none of which is land. On May 1, 1972, G makes a gift of farm recapture property No. 1 to his son and on September 1, 1972, G sells to H for $80,000 farm recapture property No. 2 in a transaction which is in part a sale and in part a gift. G owns throughout all relevant periods farm recapture property No. 3. The potential gain limitation percentage for G's one-year period beginning May 1, 1972, is computed in accordance with the additional facts assumed in the table below:

Farm Recapture Property				Total
No. 1	No. 2	No. 3		
(1) Fair market value 5/1/72	$25,000	$100,000	$800,000	
(2) Adjusted basis 5/1/72	$10,000	$60,000	$795,000	
(3) Potential gain (line (1), minus line (2))	$15,000	$40,000	$5,000	$60,000
(4) Sum of potential gains on properties disposed of by gift during period less gain taken into account by transferor on part-sale-part-gift	$15,000	$20,000		$35,000
(5) Potential gain limitation percentage (total line (4), divided by total line (3))				58⅓%

Since the potential gain limitation percentage for the one-year period beginning on May 1, 1972, exceeds 25 percent, the provisions of subparagraph (2)(iv) of this paragraph apply to the gift to the son and that portion of the disposition to H which is a gift.

(ii) The portion of G's excess deductions account determined, as of the close of 1972, before any subtraction under section 1251(b)(5) and this paragraph, allocated to the son and to H as of May 1, 1972, is computed in the table below:

	Property			Total
	No. 1	No. 2	No. 3	
(1) Potential gain under part (i) of this example (since the first day of the one-year period is the same as the time as of which the first gift was made during the taxable year)	$15,000	$40,000	$5,000	$60,000
(2) Potential gain less amount taken into account by transfer on part-sale-part-gift	15,000	20,000		
(3) Allocation percentage (line (2), divided by $60,000)	25%	33⅓%		
(4) Excess deductions account at close of taxable year (determine before making any subtractions under section 1251(b)(5) and this paragraph)				100,000
(5) Portion to which donee succeeds on 5/1/72	25,000	33,333		58,333
(6) G's excess deductions account 12/31/72				$41,667

Accordingly, the amount of G's excess deduction account succeeded to as of May 1, 1972, is $25,000 by the son and $33,333 by H.

(f) *Joint return*—(1) *Joint excess deductions account.* If for a taxable year a taxpayer and his spouse file a joint return under section 6013, then for such taxable year each taxpayer shall (if necessary) establish and maintain a joint excess deductions account. Such joint excess deductions account shall consist of the aggregate of the separately maintained excess deductions account of each spouse. A separately maintained excess deductions account shall be computed under the rules of paragraphs (b) and (c) of this section, except that for each taxable year a joint return is filed:

(i) The $50,000 amount in the nonfarm adjusted gross income limitation in paragraph (b)(2)(i) of this section shall be considered satisfied if the combined nonfarm adjusted gross income of both spouses exceeds $50,000,

(ii) The $25,000 amount in the farm net loss exclusion in paragraph (b)(2)(ii) of this section shall be allocated between the two spouses in proportion to the farm net loss of each spouse having a farm net loss, and

(iii) The separately maintained excess deductions account of each spouse shall be reduced, if necessary, below zero, by the amount of such spouse's farm net income (computed as if a separate return were filed) plus the amount of gain (computed under subparagraph (3) of this paragraph) which is recognized as ordinary income under section 1251(c)(1) in respect of a disposition of farm recapture property owned by the taxpayer.

(2) *Surviving spouse.* For purposes of this paragraph, a joint return does not include a return of a surviving spouse (as defined in section 2 relating to a spouse who died during either of his two taxable years immediate preceding the taxable year) which is treated as a joint return of a husband and wife under section 6013.

(3) *Application of excess deductions account limitation in joint return year.* In the case of a taxable year for which a joint return is filed, the aggregate of the amount of gain recognized as ordinary income under section 1251(c)(1) (after applying paragraph (b) (2)(o) and (3) of §1.125–1, if applicable) shall not exceed the amount in the joint excess deductions account (that is, the aggregate of the separately maintained excess deductions account of each spouse) at the close of the taxable year after subtracting from each such separately maintained account the amount specified in section 1251(b) (3) (A) and paragraph (c) (1) (i) of this section as modified by the rules of this paragraph. For the amount of limitation for a taxable year for which a separate return is filed, see paragraph (b)(4) of this section. For determinations as to which dispositions are taken into account for any taxable year, see paragraph (b)(4) of §1.1251–1.

(4) *Certain gifts*—(i) *In general.* If farm recapture property is transferred as a gift by a spouse to a person other than a spouse during a taxable year for which a joint return is filed, the spouses shall for purposes of applying the provisions of section 1251(b) (5) (B) and paragraph (e)(2) of this section be treated as a single taxpayer. Thus, under paragraph (e)(2) of §1.1251–2, the potential gain limitation percentage and the proportion for allocating the amount in the joint excess deductions account to one or more donees shall be determined by treating the spouses as a single taxpayer. However, with respect to each gift by a spouse, such spouse's separately maintained excess deductions account shall be reduced (below zero, if necessary) by the amount of the joint excess deductions account balance to which the donee of such gift succeeded under paragraph (e)(2)(iv) of this section.

(ii) *Gift between spouses.* If farm recapture property is transferred by gift by one spouse to another spouse during a taxable year for which a joint return is filed, such gift shall not affect the balance in the joint excess deductions account but its effect on the separately maintained excess deductions account of each spouse shall be determined as if separate returns were filed, but only after applying subdivision (i) of this subparagraph.

(5) *Allocation of joint excess deductions account upon filing separate returns*—(i) *In general.* If for any reason a taxpayer and his spouse cease to file a joint return, then except as provided in this subparagraph the amount of the separately maintained excess deductions account of each spouse as of the close of the last taxable year for which a joint return was filed shall be the amount of such spouse's excess deductions account as of the beginning of the first taxable year for which they cease filing a joint return.

(ii) *Deficit.* If under subparagraph (4)(i) of this paragraph one of the spouses has a deficit in his separately maintained excess deductions account as of the close of the last taxable year for which a joint return was filed, then as of the beginning of the first taxable year for which they cease filing a joint return:

(*a*) The spouse who had such deficit shall have an excess deductions account of zero, and

(*b*) The other spouse shall have an excess deductions account equal to the amount prescribed in subdivision (i) of this subparagraph minus the amount of such deficit.

(6) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 3. Assume the same facts as in example (4) of paragraph (b)(5) of this section, except that H and W file a joint return under section 6013 and that H has a farm net loss of only $40,000. Thus, since the nonfarm adjusted gross income for calendar year 1971 was $60,000 for H and $30,000 for W, their combined nonfarm adjusted gross income exceeds $50,000, thereby satisfying under subparagraph (1)(i) of this paragraph the $50,000 limitation of paragraph (b)(2)(i) of this section. Assume further that for 1971 only W makes a dispostion of farm recapture property (other than land and section 1245 property). As a result of such disposition, W realizes a gain of $14,000. Accordingly, for 1971, the separately maintained excess deductions accounts of H and W, their joint excess deductions account, and the treatment of the gain realized by W on the disposition of the farm recapture property are computed, in accordance with the facts assumed in the table below:

EXCESS DEDUCTIONS ACCOUNTS

		H's		W's		Joint
(1) Balance Jan. 1, 1971	....	$10,000	....	$5,000	....	$15,000
(2) Additions for 1971:						
(a) Farm net loss for 1971	$40,000	....	$10,000	....	$50,000	....
(b) Less amount in paragraph (b)(2)(ii) of this section as allocated under subparagraph (1)(ii) of this paragraph	20,000	....	5,000	....	25,000	....
(c) Total additions for 1971	....	20,000	....	5,000	....	25,000
(3) Subtotal	....	30,000		10,000	....	40,000
(4) Subtractions for 1971	....	0	....	0	....	
(5) Excess deductions account limitation on gain recognized as ordinary income under section 1251(e)(1) for 1971	....	30,000	....	10,000	....	40,000
(6) Subtraction for dispositions of farm recapture property:						
(a) Gain to which section 1251(c)(1) applies (computed before applying limitation)	0	....	14,000	....	14,000	....
(b) Limitation (amount in line (5))	30,000	....	10,000	....	40,000	....
(c) Gain recognized as ordinary income under section 1251(c)(1), computed for joint account (lower of line 6(a) or line 6(b) subject to provisions as to separately maintained accounts of subparagraph (1)(iii)	....	....	....	14,000	....	14,000
(7) Balance Dec. 31, 1971	....	30,000	....	(4,000)	....	26,000

If for 1972, H and W were to file separate returns, then the separately maintained excess deductions account balances as of January 1, 1972, would be $26,000 and zero respectively. See subparagraph (5)(ii) of this paragraph.

[T.D. 7418, 41 FR 18816, May 7, 1976; 41 FR 23669, June 11, 1976]

§ 1.1251–3 Definitions relating to section 1251.

(a) *Farm recapture property*—(1) *In general.* (i) The term *farm recapture property* means any property (other than section 1250 property as defined in section 1250(c)) which, in the hands of the taxpayer is or was property:

(*a*) Which is described in section 1231(b)(1) (relating to business property held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), section 1231(b)(3) (relating to livestock), or section 1231(b)(4) (relating to an unharvested crop), and

(*b*) Which, at the time the property qualifies under (*a*) of this subdivision, is used in the trade or business of farming (as defined in paragraph (e) of this section).

(ii) The term *farm recapture property* also includes:

(*a*) Property acquired by gift and property acquired in a transaction to which section 1251(b)(5)(A) applies, if such property was farm recapture property within the meaning of subdivision (i) of this subparagraph in the hands of the transferor, and

(*b*) Property the basis of which in the hands of the taxpayer holding such property is determined by reference to the basis of other property which in the hands of such taxpayer was farm recapture property within the meaning of subdivision (i) of this paragraph. For purposes of (*b*) of this subdivison (ii) property whose basis is determined in accordance with the last sentence of section 1033(c) shall be considered as having as basis determined by reference to the property whose conversion gave rise to the application of such section.

(iii) *Leasehold of farm recapture property.* If property is farm recapture property under this subparagraph, a leasehold of such property is also farm recapture property is also farm recapture property to the same extent as described in, and in accordance with the principles of paragraph (a)(2) of §1.1245–3.

(iv) If property described in subdivision (ii) of this subparagraph is stock or securities received in certain corporate transactions described in section 1251(d)(6), see paragraph (f) of §1.1251–4 for determination as to extent such stock or securities is farm recapture property.

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: On December 15, 1971, A, an individual calendar year taxpayer engaged in the trade or business of farming (as defined in paragraph (e) of this section) exchanges in a transaction which qualifies under section 1031(a) (relating to an exchange of property held for productive use or investment) tractor No. 1 which A acquired on March 1, 1971, for tractor No. 2. Under subparagraph (1)(i) of this paragraph, tractor No. 1 is farm recapture property as the tractor was used in the trade or business of farming and was held for a period in excess of 6 months. Under subparagraph (1)(ii) of this paragraph, tractor No. 2 is farm recapture property as the basis of tractor No. 2 in the hands of A is determined with reference to the adjusted basis of tractor No. 1.

(b) *Farm net loss*—(1) *In general.* The term *farm net loss* means the amount by which:

(i) The deductions allowed or allowable for the taxable year by chapter 1 of subtitle A of the Code which are directly connected with the carrying on of the trade or business of farming, exceed

(ii) The gross income derived from such trade or business.

(2) *Disposition of farm recapture property.* For purposes of subparagraph (1) of this paragraph, no gain or loss (regardless of how treated) resulting from the disposition of farm recapture property shall be taken into account, except that under subparagraph (1)(ii) of this paragraph gain upon disposition of such property which is recognized as ordinary income by reason of section 1245(a)(1) shall be taken into account. Thus, for example, if land used in the trade or business of farming were disposed of and gain of $3,000 was realized, then none of such gain would be taken into account in computing farm net loss and farm net income even if all or a portion of such gain is recognized as ordinary income by reason of section 1251(c)(1), section 1252(a)(1), or both. If such land were disposed of at a loss, the result would be the same. See paragraph (d)(1)(ii) of this section with respect to the exclusion of gain or loss from the disposition of farm recapture property from the computation of nonfarm adjusted gross income.

(3) *Amount of deduction under section 172(a) attributable to farm net loss.* (i) If all or a portion of a net operating loss (within the meaning of section 172(c)) for a taxable year is absorbed in another taxable year as a carryover or carry back, then for purposes of determining the amount of deductions referred to in subparagraph (1)(i) of this paragraph for such other taxable year the portion of the amount absorbed in such other taxable year which is attributable to amounts directly connected with the carrying on of the trade or business of farming shall be an amount equal to the amount absorbed, multiplied by a fraction the numerator of which is the amount of the farm net loss for the taxable year the net operating loss arose (but not in excess of the net operating loss for such year) and the denominator of which is the amount of the net operating loss for such year.

(ii) No portion of a farm net loss added to the excess deductions account in the year a net operating loss arose (or which would have been added to such account but for the application of the $25,000 or $12,500 farm net loss exclusion under paragraph (b) (2)(ii) or (4)(i)(*b*) of §1.1251–2) shall be taken into account under subparagraph (1)(i) of this paragraph in any other taxable year. Accordingly the same farm net loss shall not be added to the excess deductions account more than once and a farm net loss for any taxable year shall not be subject to the $25,000 or $12,500 exclusion more than once.

(iii) If a net operating loss for a current taxable year attributable in whole or part to a farm net loss is carried back and absorbed in a preceding taxable year no redetermination shall be made with respect to (*a*) the amount of gain recognized as ordinary income under section 1251(c)(1) and paragraph

(b) of § 1.1251–1 in any taxable year preceding the current taxable year, and (*b*) the amount of the taxpayer's excess deductions account allocated under paragraph (e)(2) of § 1.1251–2 to a donee as of the close of any taxable year preceding the current taxable year.

(4) *Special rules as to estates and trusts.* In the case of an estate or trust, computations of amounts under this paragraph shall be made without regard to any deductions under section 651 or 661. If on the termination of an estate or trust the beneficiaries succeeding to its property are allowed a deduction under section 642(h) (relating to unused loss carryovers and excess deductions on termination available to beneficiaries), to the extent the carryover or excess deduction is attributable to a farm loss it shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amount of a carryover or of excess deductions from a particular taxable year of an estate or trust succeeded to under section 642(h) shall be allocated between amounts attributable to a farm net loss and other amounts in the same proportion as the farm net loss for such year bears to the amount of such carryover or of excess deductions. If there is more than one beneficiary, the total farm net loss succeeded to by all the beneficiaries shall be allocated to each beneficiary in proportion to the deduction of each under section 642(h).

(c) *Farm net income.* The term *farm net income* means the amount by which the amount referred to in paragraph (b)(1)(ii) of this section exceeds the amount referred to in paragraph (b)(1)(i) of this section.

(d) *Nonfarm adjusted gross income*—(1) *In general.* The term *nonfarm adjusted gross income* means adjusted gross income (taxable income in the case of a taxpayer other than an individual) computed without regard to:

(i) Income or deductions taken into account in computing farm net loss and farm net income,

(ii) Gains and losses (regardless of how treated) resulting from the disposition of farm recapture property, and

(iii) In the case of an estate or trust, the principles of paragraph (b)(4) of this section, to the extent applicable, shall apply.

(2) *Special rules.* The following rules in addition to the rules of subparagraph (1) of this paragraph, shall apply in computing the adjusted gross income of a shareholder of an electing small business corporation:

(i) The amount of any distribution described in section 1373 (c)(2) made by the corporation shall be disregarded,

(ii) For purposes of computing the amount includible in the gross income of a shareholder under section 1373(b), the corporation's undistributable taxable income shall equal the corporation's nonfarm adjusted gross income (as defined in subparagraph (1) of this paragraph) minus the amount described in section 1373(c)(1), and

(iii) For purposes of computing a shareholder's deduction under section 1374, the corporation's net operating loss shall be computed without regard to the items referred to in subparagraph (1) (i) and (ii) of this paragraph.

(e) *Trade or business of farming*—(1) *In general.* For purposes of section 1251, the term *trade or business of farming* includes any trade or business with respect to which the taxpayer may compute gross income under § 1.61–4, expenses under § 1.162–12, make an election under section 175, 180, or 182, or use an inventory method referred to in § 1.471–6. Such term does not include any activity not engaged in for profit within the meaning of section 183 and section 183–2.

(2) *Horse racing.* If a taxpayer is engaged in the raising of horses, including horses which are bred or purchased, then for purposes of section 1251 the term *trade or business of farming* also includes the racing of such horses by the taxpayer. Thus, for example, if a taxpayer purchases a yearling and develops it to the racing stage, the term *trade or business of farming* includes the racing of such horse.

(3) *Several businesses of farming.* If a taxpayer is engaged in more than one trade or business of farming, all such trades and businesses shall be treated as one trade or business.

[T.D. 7418, 41 FR 18826, May 7, 1976, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.1251–4 Exceptions and limitations.

(a) *Exception for gifts*—(1) *General rule.* Section 1251(d)(1) provides that no gain shall be recognized under section 1251(c)(1) upon a disposition by gift. For purposes of this paragraph, the term *gift* shall have the same meaning as in paragraph (a) of §1.1245–4 and, with respect to the application of this paragraph, principles illustrated by the examples of paragraph (a)(2) of §1245–4 shall apply. For reduction in amount of charitable contribution in case of a gift of farm recapture property, see section 170(e) and §1.170A–4.

(2) *Disposition in part a sale or exchange and in part a gift.* Where a disposition of farm recpature property is in part a sale or exchange and in part a gift, the amount of gain recognized as ordinary income under section 1251(c)(1) shall not exceed:

(i) In the case of farm recapture property other than land, the excess of the amount realized over adjusted basis, and

(ii) In the case of land, the lower of the amount in subdivision (i) of this subparagraph or the potential gain (as defined in paragraph (b)(2)(ii) of §1.1251–1.

(3) *Treatment of land in hand of transferee.* See paragraph (g) of this section for treatment of transferee in the case of a disposition of land to which this paragraph applies.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. A, a calendar year taxpayer, makes one disposition of farm recapture property during 1976. On March 2, 1976, A makes a gift to B (also a calendar year taxpayer) of a parcel of land which he had on January 15, 1971. On the date of such disposition, the excess of the fair market value ($65,000) over the adjusted basis of the land ($40,000) is $25,000 and the sum of the deductions allowable in respect of such land under sections 175 and 182 is $21,000 for 1971 and $3,000 (attributable to 1975) for the taxable year of disposition and the four immediately preceding taxable years. Thus, the potential gain (as defined in paragraph (b)(2)(ii) of §1.1251–1) is limited to $3,000. At the end of 1976 (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A)), there is a balance in A's excess deductions account of $25,000. However, upon making the gift, A recognizes no gain under section 1251(c)(1) or section 1252(a)(1). See subparagraph (a)(1) of this paragraph and paragraph (a)(1) of §1.1252–2. For treatment of the land in the hands of B, see example (1) of paragraph (g)(3) of this section. For effect of the gift on the excess deductions accounts of A and B, see paragraph (e)(2) of §1.1251–2.

Example 2. Assume the same facts as in example (1), except that A transfers the land to B for $50,000. Thus, the gain realized is $10,000 (amount realized, $50,000, minus adjusted basis $40,000), and A has made a gift of $15,000 (fair market value, $65,000, minus amount realized, $50,000). Since under subparagraph (2)(ii) of this paragraph, the potential gain ($3,000) is lower than the gain realized ($10,000), the gain to which section 1251(c)(1) could apply is limited by subparagraph (2)(ii) of this paragraph to $3,000. Thus, as A has $25,000 in his excess deductions account, $3,000 is recognized as ordinary income under section 1251(c)(1). See example (2) of paragraph (a)(4) of §1.1252–2 for computation of gain of $7,000 which is recognized as ordinary income by A under section 1252(a)(1). For treatment of the land in the hands of B, see example (2) of paragraph (g)(3) of this section.

(b) *Exception for transfers at death*—(1) *General rule.* Section 1251(d)(2) provides that, except as provided in section 691 (relating to income in respect of a decedent), no gain shall be recognized under section 1251(c)(1) upon a transfer at death. For purposes of this paragraph, the term *transfer at death* shall have the same meaning as in paragraph (b) of §1.1245–4 and, with respect to the application of this paragraph, principles illustrated by the examples of paragraph (b)(2) of §1.1245–4 shall apply.

(2) *Treatment of land in hands of transferee.* If as of the date a person acquires land which is farm recapture property from a decedent such person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), then on such date the potential gain in respect to such land is zero.

(c) *Certain corporate transactions*—(1) *Limitation on amount of gain.* Under section 1251(d)(3), upon a transfer of property described in subparagraph (2) of this paragraph, the amount of gain recognized as ordinary income by the transferor under section 1251(c)(1) shall not exceed an amount equal to the excess (if any) of (i) the amount of gain recognized to the transferor on the transfer (determined without regard to section 1251) over (ii) the amount (if any) of gain recognized as ordinary income under section 1245(a)(1). For purposes of this subparagraph, the principles of paragraph (c)(1) of § 1.1245–4 shall apply. Thus, in case of a transfer of both farm recapture property and property other than farm recapture property in a single transaction, the amount realized from the disposition of the farm recapture property (as determined in a manner consistent with the principles of paragraph (a)(5) of § 1.1245–1) shall be deemed to consist of that portion of the fair market value of each property acquired which bears the same ratio to the fair market value of such acquired property as the amount realized from the disposition of farm recapture property bears to the total amount realized. The preceding sentence shall be applied solely for purposes of computing the portion of the total gain (determined without regard to section 1251) which is eligible to be recognized as ordinary income under section 1251(c)(1). Section 1251(d)(3) does not apply to a disposition of property to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by chapter 1 of the Code.

(2) *Transfers covered.* The transfers referred to in subparagraphs (1) of this paragraph are transfers of farm recapture property in which the basis of such property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(i) Section 332 (relating to distributions in complete liquidation of an 80-percent-or-more controlled subsidiary corporation). For the application of section 1251(d)(3) to such a complete liquidation, the principles of paragraph (c)(3) of § 1.1245–4 shall apply. Thus, for example, the provisions of subparagraph (1) of this paragraph do not apply to a liquidating distribution of farm recapture property by an 80-percent-or-more controlled subsidiary to its parent if the parent's basis for the property is determined, under section 334(b)(2), by reference to its basis for the stock of the subsidiary.

(ii) Section 351 (relating to transfer to corporation controlled by transferor).

(iii) Section 351 (relating to exchanges pursuant to certain corporate reorganizations).

(iv) Section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings).

(v) Section 374(a) (relating to exchanges pursuant to certain railroad reorganizations).

(3) *Partnerships.* For the application of section 1251 to partnerships, see paragraph (e) of this section.

(4) *Treatment of land in hands of transferee.* See paragraph (g) of this section for treatment of transferee in the case of a disposition of land to which this paragraph applies.

(5) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) A, an individual calendar year taxpayer, makes one disposition of farm recapture property during 1971. On January 20, 1971. A transfers farm recapture property (other than land and section 1245 property), having an adjusted basis of $22,000, to corporation M in exchange for stock in M worth $35,000 plus $15,000 in cash in a transaction qualifying under section 351. Thus, the amount realized is $50,000, and the gain realized is the excess of the amount realized, $50,000, over the adjusted basis, $22,000, or $28,000. Without regard to section 1251, A would recognize gain of $15,000 under section 351(b), and M's basis for the farm recapture property would be determined under section 362(a) by reference to its basis in the hands of A. Assume further that the balance in A's excess deductions account (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A)) at the close of 1971 is $20,000. Thus, since such balance in the excess deductions account ($20,000) is lower than the gain realized ($28,000), is subparagraph (1) of this paragraph did not apply, gain of $20,000 would be recognized as ordinary income under section 1251(c)(1). However, subparagraph (1) of this paragraph limits the amount of gain to be recognized as ordinary income under section 1251(c)(1) to $15,000.

(ii) If, however, A transferred the farm recapture property to M solely in exchange for stock worth $50,000, then, because of the application of subparagraph (1) of this paragraph he would not recognize any gain under section 1251(c)(1). If, instead, A transferred the farm recapture property to M in exchange for stock worth $25,000 and $25,000 cash, only $20,000 (the amount of such balance in the excess deductions account) of the gain of $25,000 recognized under section 351(b) would be recognized as ordinary income under section 1251(c)(1). The remaining $5,000 of gain recognized under section 351(b) may be treated as gain from the sale or exchange of property described in section 1231. In the hands of M, the property received from A is farm recapture property under the provisions of paragraph (a)(11)(ii) of §1.1251–3. For treatment of the property received by A in such transaction; see section 1251(d)(6) and paragraph (f) of this section.

Example 2. Assume the same facts as in subdivision (i) of example (1), except that the farm recapture property is section 1245 property. Assume further than $5,000 is recognized as ordinary income under section 1245(a)(1), and that as of the close of 1971, A has a balance of $15,000 in his excess deductions account (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A) which, under paragraph (b) of §1.1251–3, is computed by treating the $5,000 of gain to which section 1245 applies as gross income derived from the trade or business of farming). The amount of gain recognized as ordinary income under section 1251(c)(1) is $10,000, computed as follows:

(1) Amount of gain under section 1251(c)(1) (determined without regard to subparagraph (1) of this paragraph):.	
(a) Portion of gain realized ($28,000) in excess of amount recognized as ordinary income under section 1245(a)(1) ($5,000)	$23,000
(b) Excess deductions account balance	15,000
(c) Lower of (a) or (b)	15,000
(2) Limitation in subparagraph (1) of this paragraph:	
(a) Gain recognized (determined without regard to section 1251)	15,000
(b) Minus: Gain recognized as ordinary income under section 1245(a)(1)	5,000
(c) Difference	10,000
(3) Lower of line (1)(c) or line (2)(c)	10,000

(d) *Limitation for like kind exchanges and involuntary conversions*—(1) *General rule.* Under section 1251(d)(4), if farm recapture property is disposed of and gain (determined without regard to section 1251) is not recognized in whole or in part under section 1031 (relating to like kind exchanges) or section 1033 (relating to involuntary conversions), then the amount of gain recognized as ordinary income by the transferor under section 1251(c)(1) shall not exceed an amount equal to the excess (if any) of (i) the amount of gain recognized on such disposition (determined without regard to section 1251) or (ii) the amount (if any) of gain recognized as ordinary income under section 1245(a)(1).

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. (i) A, an individual calendar year taxpayer, owns a herd of breeding cattle having an adjusted basis of $75,000 which he acquired on March 30, 1970, A receives insurance proceeds of $90,000. Thus, the gain realized is $15,000 (that is, the excess of the amount realized, $75,000), A makes no other disposition of farm recapture property during 1970. Assume that had the herd been sold at its fair market value on March 15, 1970, no gain would have been recognized as ordinary income under section 1245(a)(1). As of the close of 1970, A has a balance of $12,000 in his excess deductions account (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A)). Thus, since the balance in the excess deductions account, $12,000, is lower than the gain realized, $15,000, the amount of gain which would be recognized under section 1251(c)(1) (determined without regard to subparagraph (1) of this paragraph) would be $12,000.

(ii) Assume further that A spends $72,000 of the insurance proceeds to purchase another breeding herd, $10,000 to purchase stock in the acquisition of control of a corporation which owns property similar or related in service or use to the destroyed breeding herd, and retains cash of $8,000. Both of the acquisitions by A qualify under section 1033(a)(3)(A), and A properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain to $8,000 (that is, the amount by which the amount realized from the conversion, $90,000 exceeds the cost of the stock and other property acquired to replace the converted property, $72,000 plus $10,000). Thus, since $8,000 is the amount of gain which would be recognized under section 1033(a)(3) (determined without regard to section 1251), and since that amount is lower than the gain of $12,000 which would be recognized under section 1251(c)(1) (determined without regard to subparagraph (1) of this paragraph), under subparagraph (1) of this paragraph the amount of gain recognized under section 1251(c)(1) is limited to $8,000. The stock purchased for $10,000 qualifies under paragraph (a)(1)(ii)(*b*) of §1.1251–3 as farm recapture property.

Example 2. (i) A, an individual calendar year taxpayer, owns land which he had acquired on March 7, 1970, having an adjusted basis of $48,000, and a fair market value of $67,500. On January 15, 1975, A, as a result of a condemnation action, receives $67,500 (its fair market value) for the land. The aggregate of the deductions allowable in respect of such land under sections 175 and 182 is

$18,000, with $5,000 of such aggregate attributable to 1970 and $13,000 of such aggregate attributable to 1970 and $13,000 of such aggregate attributable to 1975 and the four preceding taxable years. Thus, the potential gain (as defined in paragraph (b)(2)(ii) of § 1.1251–1) is limited to $13,000, since that amount is lower than $19,500 (the excess of the fair market value of the land, $67,500, over its adjusted basis, $48,000). The gain realized by A is also $19,500. At the end of A's taxable year (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A)) there is a balance of $21,000 in the excess deductions account of A. Since the potential gain, $13,000, is lower than both the excess deductions account balance, $21,000, and the gain realized, $19,500, A would recognize $13,000 as ordinary income under section 1251(c)(1) (determined without regard to subparagraph (1) of this paragraph).

(ii) Assume further that A spends the entire amount received, $67,500, to purchase stock in the acquisition of control of a corporation which owns property similar or related in service or use to A's condemned land which qualifies under section 1033(a)(3)(A), and A properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain to zero (that is, the amount by which the amount realized from the conversion, $67,500, exceeds the cost of the stock acquired to replace the converted land, $67,500). Thus, since no gain would be recognized under section 1033(a)(3) (determined without regard to section 1251), under subparagraph (1) of this paragraph, no gain is recognized under section 1251(c)(1). The stock purchased for $67,500 qualifies under paragraph (a)(1)(ii)(*b*) of § 1.1251–3 as farm recapture property. See example (1) of paragraph (d)(2) of § 1.1252–2 for a computation of gain recognized as ordinary income under section 1252(a)(1).

Example 3. B, an individual calendar year taxpayer, owns a herd of breeding cattle having an adjusted basis of $25,000 which he acquired on March 30, 1970. On March 15, 1976, the entire herd is destroyed by a blizzard and on March 20, 1976, B receives insurance proceeds of $90,000. Thus, the gain realized is $65,000 (that is, the excess of the amount realized, $90,000, over the adjusted basis, $25,000). B makes no other disposition of farm recapture property during 1976. B spends $60,000 of the insurance proceeds to purchase another breeding herd and retains cash of $30,000. The acquisition by B qualifies under section 1033(a)(3)(A), and B properly elects under section 1033(a)(3)(A) and the regulations thereunder to limit recognition of gain to $30,000 (that is, the amount by which the amount realized from the conversion, $90,000, exceeds the cost of the property acquired to replace the converted property, $60,000). Assume that the amount of gain recognized under section 1245(a)(1) is $20,000, and that as of the close of 1976 B has a balance of $100,000 in his excess deductions account (after making the applicable additions and subtractions under section 1251(b) (2) and (3)(A) which, under paragraph (b) of § 1.1251–3, is computed by treating the $20,000 of gain to which section 1245 applies as gross income derived from the trade or business of farming). The amount of gain recognized as ordinary income under section 1251(c)(1) is $10,000, computed as follows:

(1) Amount of gain under section 1251(c)(1) (determined without regard to subparagraph (1) of this paragraph):	
(a) Portion of gain realized ($65,000) in excess of amount recognized as ordinary income under section 1245(a)(1) ($20,000)	$45,000
(b) Excess deductions account balance	100,000
(c) Lower of (a) or (b)	45,000
(2) Limitation in subparagraph (1) of this paragraph:	
(a) Gain recognized (determined without regard to section 1251)	30,000
(b) Minus: Gain recognized as ordinary income under section 1245(a)(1)	$20,000
(c) Difference	10,000
(3) Lower of line (1)(c) or line (2)(c)	10,000

(3) *Application to single disposition of farm recapture property of one class and property of different class.* (i) If upon a sale of farm recapture property of one class gain would be recognized under section 1251(c)(1), and if such farm recapture property together with property of a different class or classes is disposed of in a single transaction in which gain is not recognized in whole or in part under section 1031 (without regard to section 1251(c)(1), then rules consistent with the principles of paragraph (d)(6) of § 1.1250–3 (relating to gain from disposition of certain depreciable realty) shall apply for purposes of allocating the amount realized to each of the classes of property disposed of and for purposes of determining what property the amount realized for each class consists of.

(ii) For purposes of this subparagraph, the classes of property other than farm recapture property are (*a*) section 1245 property, (*b*) section 1250 property, and (*c*) other property.

(iii) For purposes of this subparagraph, the classes of farm recapture property are (*a*) hand, (*b*) farm recapture property other than land which is section 1245 property and (*c*) farm recapture property other than land which is not section 1245 property.

(4) *Treatment of land received in like kind exchange or involuntary conversion.* The aggregate of the deductions allowed under sections 175 and 182 in respect of land acquired in a transaction described in subparagraph (1) of this paragraph shall include the aggregate of the deductions allowable under sections 175 and 182 in respect of the land transferred or converted (as the case may be) in such transaction minus the amount of gain taken into account under sections 1251(c) and 1252(a) with respect to the land transferred or converted. Upon a subsequent disposition of such land, such deductions shall be treated as having been allowable in the same taxable year as they were allowable with respect to the land transferred or converted.

(e) *Partnerships.* [Reserved]

(f) *Property transferred to controlled corporation.* [Reserved]

(g) *Treatment of land received by a transferee in a disposition by gift and certain tax-free transactions*—(1) *General rule.* If farm recapture property which is land is disposed of in a transaction which is either a gift to which paragraph (a)(1) of this section applies or a completely tax-free transfer to which section 1251(b)(5)(A) applies, then for purposes of section 1251:

(i) The aggregate of the deductions allowable under sections 175 and 182 in respect of the land in the hands of the transferee immediately after the disposition shall be an amount equal to the aggregate of such deductions for the taxable year and the four preceding taxable years in the hands of the transferor immediately before the disposition,

(ii) Upon a subsequent disposition by the transferee (including a computation of potential gain as defined in paragraph (b)(2)(ii) of §1.1251–1), such deductions in the hands of the transferee shall be treated as having been allowable with respect to the transferee in the same taxable year they were allowable to the transferor, and

(iii) If the taxable years of the transferor and transferee regularly end on different dates, then the aggregate of such deductions allowable for taxable year with respect to the transferor shall be treated in the hands of the transferee as allowable in the transferee's taxable year in which the taxable year of the transferor regularly ends.

(2) *Certain partially tax-free transfers.* If farm recapture property which is land is disposed of in a transaction which either is in part a sale or exchange and in part a gift to which paragraph (a)(2) of this section applies, or is a partially tax-free transfer to which section 1251(b)(5)(A) applies, then for purposes of section 1251:

(i) The amount determined under subparagraph (1)(i) of this paragraph shall be reduced by the amount of gain taken into account under sections 1251(c) and 1252(a) to the extent such gain is attributable to the sections 175 and 182 deductions for the taxable year and the preceding four taxable years (determined by attributing gain under section 1252(a) to the oldest years first) by the transferor upon the disposition, and

(ii) For purposes of subparagraph (1)(ii) of this paragraph, the amount of such gain recognized under sections 1251(c) and 1252(a) shall reduce the aggregate of deductions allowable under sections 175 and 182 for the taxable year and each of the preceding four taxable years on a pro rata basis.

(3) *Examples.* The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. Assume the same facts as in example (1) of paragraph (a)(4) of this section. Therefore, on the date B receives the land in the gift transaction, under subparagraph (1) (i) and (ii) of this paragraph, the aggregate of the deductions allowable under sections 175 and 182 in respect of the land in the hands of B is the amount in the hands of A, $24,000, and for purposes of applying section 1251 upon a subsequent disposition by B (including the computation of potential gain) such deductions in the hands of B shall be treated as allowable in the same year as they were allowable to A. Thus, in respect to the land in the hands of B, the allowable section 175 and 182 deductions of $3,000 shall be treated as allowable in 1975.

Example 2. Assume the same facts as in example (2) of Paragraph (a)(4) of this section. Under paragraph (2) of this paragraph, the aggregate of the allowable sections 175 and 182 deductions with respect to the land which pass over to B for purposes of section 1251 is zero ($3,000 deduction allowable under sections 175 and 182 for the taxable year and the four preceding taxable years minus $3,000 gain taken into account by A in accordance with example (2) of paragraph (a)(4) of this section).

[T.D. 7818, 41 FR 18828, May 7, 1976; 41 FR 23669, June 11, 1976]

§ 1.1252–1 General rule for treatment of gain from disposition of farm land.

(a) *Ordinary income*—(1) *General rule.* (i) Except as otherwise provided in this section and § 1.1252–2, if farm land is disposed of during a taxable year beginning after December 31, 1969, then under section 1252(a)(1) there shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231 (that is, shall be recognized as ordinary income) the lower of:

(*a*) The applicable percentage of the amount computed in subdivision (ii) of this subparagraph, or

(*b*) The amount computed in subdivision (iii) of this subparagraph.

(ii) The amount computed in this subdivision is an amount equal to:

(*a*) The aggregate of the deductions allowed, in any taxable year any day of which falls within the period the taxpayer held (or is considered to have held) the farm land, under sections 175 (relating to soil and water conservation expenditures) and 182 (relating to expenditures by farmers for clearing land) for expenditures paid or incurred after December 31, 1969, with respect to the farm land disposed of, minus

(*b*) The amount of gain recognized as ordinary income under section 1251(c)(1) (relating to gain from disposition of property used in farming where farm losses offset nonfarm income) upon such disposition of such land.

(iii) The amount computed in this subdivision is an amount equal to:

(*a*) The gain realized, that is, the excess of the amount realized (in the case of a sale, exchange, or involuntary conversion) or the fair market value of the farm land (in the case of any other disposition), over the adjusted basis of the farm land, minus

(*b*) The amount of gain recognized as ordinary income under section 1251(c)(1) upon such disposition of such land.

(iv) If a deduction under section 175 is allowed in respect of the farm land disposed of for a taxable year every day of which falls within the period after the taxpayer held (or is considered to have held) the farm land, and if the deduction is attributable to expenditures paid or incurred after December 31, 1969, with respect to such land during the period the taxpayer held (or is considered to have held) the land, then the amount of such deduction shall be applied to increase the amount computed (without regard to this subdivision) under subdivision (ii)(*a*) of this subparagraph.

(2) *Application of section.* Any gain treated as ordinary income under section 1252(a)(1) shall be recognized as ordinary income notwithstanding any other provision of subtitle A of the Code. For special rules with respect to the application of section 1252, see § 1.1252–2. For the relation of section 1252 to other provisions see paragraph (d) of this section.

(3) *Meaning of terms.* For purposes of section 1252:

(i) The term *farm land* means any land with respect to which deductions have been allowed under section 175 or 182. See section 1252(a)(2).

(ii) The period for which farm land shall be considered to be held shall be determined under section 1223.

(iii) The term *disposition* shall have the same meaning as in paragraph (a)(3) of § 1.1245–1.

(iv) The applicable percentage shall be determined as follows:

If the farm land is disposed of—	The applicable percentage is—
Within 5 years after the date it was acquired	100 percent.
Within the sixth year after it was acquired	80 percent.
Within the seventh year after it was acquired	60 percent.
Within the eighth year after it was acquired.	40 percent.
Within the ninth year after it was acquired.	20 percent.
Within the 10th year after it was acquired and thereafter.	0 percent.

(4) *Portion of parcel.* The amount of gain to be recognized as ordinary income under section 1252(a)(1) shall be determined separately for each parcel of farm land in a manner consistent

with the principles of subparagraphs (4) and (5) of §1.1245–1(a) (relating to gain from disposition of certain depreciable property). If (i) only a portion of a parcel of farm land is disposed of in a transaction, or if two or more portions of a single parcel are disposed of in one transaction, and (ii) the aggregate of the deductions allowed under sections 175 and 182 with respect to any such portion cannot be established to the satisfaction of the Commissioner or his delegate, then the aggregate of the deductions in respect of the entire parcel shall be allocated to each portion in proportion to the fair market value of each at the time of the disposition.

(b) *Instances of non-application*—(1) *In general.* Section 1252 does not apply if a taxpayer disposes of farm land for which the holding period is in excess of 9 years or with respect to which no deductions have been allowed under sections 175 and 182.

(2) *Losses.* Section 1252(a)(1) does not apply to losses. Thus, section 1252(a)(1) does not apply if a loss is realized upon a sale, exchange, or involuntary conversion of property, all of which is farm land, nor does the section apply to a disposition of such property other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(c) *Treatment of partnerships and partners.* [Reserved]

(d) *Relation of section 1252 to other provisions*—(1) *General.* The provisions of section 1252 apply notwithstanding any other provisions of subtitle A of the Code. Thus, unless an exception or limitation under §1.1252–2 applies, gain under section 1252(a)(1) is recognized notwithstanding any contrary nonrecognition provision or income characterizing provision. For example, since section 1252 overrides section 1231 (relating to property used in the trade or business), the gain recognized under section 1252(a)(1) upon a disposition of farm land will be treated as ordinary income and only the remaining gain, if any, from the disposition may be considered as gain from the sale or exchange of a capital asset if section 1231 is applicable. See example (1) of paragraph (e) of this section.

(2) *Nonrecognition sections overridden.* The nonrecognition of gain provisions of subtitle A of the Code which section 1252 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, and 512(b)(5). See §1.1252–2 for the extent to which section 1252(a)(1) overrides sections 332, 351, 361, 371(a), 374(a), 721, 731, 1031, and 1033.

(3) *Installment method.* Gain from a disposition to which section 1252(a)(1) applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall (i) first be deemed to consist of gain to which section 1251(c)(1) applies (if applicable) until all such gain has been reported, (ii) the next portion (if any) of such income shall be deemed to consist of gain to which section 1252(a)(1) applies until all such gain has been reported, and (iii) finally the remaining portion (if any) of such income shall be deemed to consist of gain to which neither section 1251(c)(1) nor 1252(a)(1) applies. For treatment of amounts as interest on certain deferred payments, see section 483.

(4) *Exempt income.* With regard to exempt income, the principles of paragraph (e) of §1.1245–6 shall be applicable.

(5) *Treatment of gain not recognized under section 1252(a)(1).* For treatment of gain not recognized under this section, the principles of paragraph (f) of §1.1245–6 shall be applicable.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Individual A uses the calendar year as his taxable year. On April 10, 1975, he sells for $75,000 a parcel of farm land which he had acquired on January 5, 1970, with an adjusted basis of $52,500 for a realized gain of $22,500. The aggregate of the deductions allowed under sections 175 and 182 with respect to such land is $18,000 and all of such amount was allowed for 1970. Under the stated facts, none of the $22,500 gain realized is recognized as ordinary income under section 1251(c)(1) as there is no potential gain (as defined in section 1251(e)(5)) with respect to the farm land. Since no gain is recognized as ordinary income under section 1251(c)(1), and since the applicable percentage, 80 percent, of the aggregate of the deductions allowed under sections 175 and 182, $18,000, or $14,400, is lower than the gain realized, $22,500, the amount of gain recognized as ordinary income under section 1252(a)(1) is $14,400. The remaining $8,100 of the gain may be treated as gain from the sale or exchange of property described in section 1231.

Example 2. Assume the same facts as in example (2) of paragraph (b)(6) of § 1.1251–1. Assume further that the aggregate of the amount of sections 175 and 182 deductions allowable to the M corporation is equal to the amount allowed. Under paragraph (a)(1) of the section, $5,000 is recognized as ordinary income under section 1252(a)(1) upon the disposition of the land as a dividend, computed as follows:

(1) Aggregate of deductions allowed under sections 175 and 182	$18,000
(2) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$13,000
(3) Difference	$5,000
(4) Multiply: Applicable percentage for property disposed of within the fifth year after it was acquired	100%
(5) Amount in paragraph (a)(1)(i)(*a*) of this section	$5,000
(6) Gain realized (fair market value $67,500, less adjusted basis, $45,000)	$22,500
(7) Minus: Amount in line (2)	$13,000
(8) Amount in paragraph (a)(1)(i)(b) of this section	$9,500
(9) Lower of line (5) or line (8)	$5,000

The *gain realized*, $22,500, minus the sum of the gain recognized as ordinary income under section 1251(c)(1), $13,000, and under section 1252(a)(1), $5,000, equals $4,500. Assuming section 311(d) (relating to certain distributions of appreciated property to redeem stock) does not apply, under section 311(a) the corporation does not recognize gain on account of the $4,500.

Example 3. Assume the same facts as in example (2) of this paragraph, except that M contracted to sell the land for $67,500 which would be paid in 10 equal payments of $6,750 each, plus a sufficient amount of interest so that section 483 does not apply. Assume further that the remaining gain of $4,500 is treated as gain from the sale or exchange of property described in section 1231. M properly elects under section 453 to report under the installment method gain of $13,000 to which section 1251(c)(1) applies, gain of $5,000 to which section 1252(a)(1) applies, and gain of $4,500 to which section 1231 applies. Since the total gain realized on the sale was $22,500, the gross profit realized on each installment payment is $2,250, i.e., $6,750×($67,500). Accordingly, the treatment of the income to be reported on each installment payment is as follows:

Payment No.	Applicable sections		
	1251	*1252*	*1231*
1	$2,250		
2	2,250		
3	2,250		
4	2,250		
5	2,250		
6	1,750	$500	
7		2,250	
8		2,250	
9			$2,250
10			2,250
Totals	13,000	5,000	4,500

[T.D. 7418, 41 FR 18831, May 7, 1976; 41 FR 23669, June 11, 1976]

§ 1.1252–2 Special rules.

(a) *Exception for gifts*—(1) *General rule.* In general, no gain shall be recognized under section 1252(a)(1) upon a disposition of farm land by gift. For purposes of section 1252 and this paragraph, the term *gift* shall have the same meaning as in paragraph (a) of § 1.1245–4 and, with respect to the application of this paragraph, principles illustrated by the examples of paragraph (a)(2) of § 1.1245–4 shall apply. For reduction in amount of charitable contribution in case of a gift of farm land, see section 170(e) and § 1.170A–4.

(2) *Disposition in part a sale or exchange and in part a gift.* Where a disposition of farm land is in part a sale or exchange and in part a gift, the amount of gain which shall be recognized as ordinary income under section 1252(a)(1) shall be computed under paragraph (a)(1) of § 1.1252–1, applied by treating the gain realized (for purposes of paragraph (a)(1)(iii)(*a*) of § 1.1252–1) as the excess of the amount realized over the adjusted basis of the farm land.

(3) *Treatment of farm land in hands of transferee.* See paragraph (f) of this section for treatment of the transferee in the case of a disposition to which this paragraph applies.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On March 2, 1976, A, a calendar year taxpayer, makes a gift to B of a parcel of land having an adjusted basis of $40,000, a fair market value of $65,000, and a holding period of 6 years (A, having purchased the land on January 15, 1971). On the date of such gift, the aggregate of the deductions allowed to A under sections 175 and 182 with respect to the land is $24,000 with $21,000 of such amount attributable to 1971. Upon making the gift, A recognizes no gain under section 1251(c)(1) or section 1252(a)(1). See paragraph (a)(1) of § 1.1251–4 and subparagraph 1 of this paragraph. For treatment of the farm land in the hands of B, see example (1) of paragraph (f)(3) of this section. For effect of the gift on the excess deductions accounts of A and of B, see paragraph (e)(2) of § 1.1251–2.

Example 2. (i) Assume the same facts as in example (1), except that A transfers the land to B for $50,000. Thus, the gain realized is $10,000 (amount realized, $50,000, minus adjusted basis, $40,000), and A has made a gift of $15,000 (fair market value, $65,000, minus amount realized, $50,000).

(ii) Upon the transfer of the land to B, A recognizes $3,000 of gain under section 1251(c)(1). See example (2) of paragraph (a)(4) of § 1.1251–4. Thus, A recognizes $7,000 as ordinary income under section 1252(a)(1), computed under subparagraph (2) of this paragraph as follows:

(1) Aggregate of deductions allowed under sections 175 and 182	$24,000
(2) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$3,000
(3) Difference	$21,000
(4) Multiply: Applicable percentage for land disposed of within sixth year after it was acquired	80%
(5) Amount in paragraph (a)(1)(i)(*a*) of § 1.1252–1	$16,800
(6) Gain realized (see subdivision (i) of this example)	$10,000
(7) Minus: Amount in line (2)	$3,000
(8) Amount in paragraph (a)(1)(i)(*b*) of § 1.1252–1, applied in accordance with subparagraph (2) of this paragraph	$7,000
(9) Lower of line (5) or line (8)	$7,000

Thus, the entire gain realized on the transfer, $10,000, is recognized as ordinary income since that amount is equal to the sum of the gain recognized as ordinary income under section 1251(c)(1), $3,000, and under section 1252(a)(1), $7,000. For treatment of the farm land in the hands of B, see example (2) of paragraph (f)(3) of this section.

(b) *Exception for transfers at death*—(1) *In general.* Except as provided in section 691 (relating to income in respect of a decedent), no gain shall be recognized under section 1252(a)(1) upon a transfer at death. For purposes of section 1252 and this paragraph, the term *transfer at death* shall have the same meaning as in paragraph (b) of § 1.1245–4 and, with respect to the application of this paragraph, principles illustrated by the examples of paragraph (b)(2) of § 1.1245–4 shall apply.

(2) *Treatment of farm land in hands of transferee.* If as of the date a person acquires farm land from a decedent such person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternative valuation date), then on such date the aggregate of the sections 175 and 182 deductions allowed with respect to the farm land in the hands of such transferee is zero.

(c) *Limitation for certain tax-free transactions*—(1) *Limitation on amount of gain.* Upon a transfer of farm land described in subparagraph (2) of this paragraph, the amount of gain recognized as ordinary income under section 1252(a)(1) shall not exceed an amount equal to the excess (if any) of (i) the amount of gain recognized to the transferor on the transfer (determined without regard to section 1252) over (ii) the amount (if any) of gain recognized as ordinary income under section 1251(c)(1). For purposes of this subparagraph, the principles of paragraph (c)(1) of § 1.1245–4 shall apply. Thus, in the case of a transfer of farm land and property other than farm land in one transaction, the amount realized from the disposition of the farm land (as determined in a manner consistent with the principles of paragraph (a)(5) of § 1.1245–1) shall be deemed to consist of that portion of the fair market value of each property acquired which bears the same ratio to the fair market value of such acquired property as the amount realized from the disposition of the farm land bears to the total amount realized. The preceding sentence shall be applied solely for purposes of computing the portion of the total gain (determined without regard to section 1252) which is eligible to be recognized as ordinary income under section 1252(a)(1). The provisions of this paragraph do not apply to a disposition of property to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by Chapter 1 of the Code.

(2) *Transfers covered.* The transfers referred to in subparagraph (1) of this paragraph are transfers of farm land in which the basis of such property in the

hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(i) Section 332 (relating to distributions in complete liquidation of an 80-percent-or-more controlled subsidiary corporation). For application of subparagraph (1) of this paragraph to such a complete liquidation, the principles of paragraph (c)(3) of § 1.1245–4 shall apply. Thus, for example, the provisions of subparagraph (1) of this paragraph do not apply to a liquidating distribution of farm land by an 80-percent-or-more controlled subsidiary to its parent if the parent's basis for the property is determined, under section 334(b)(2), by reference to its basis for the stock of the subsidiary.

(ii) Section 351 (relating to transfer to a corporation controlled by transferor).

(iii) Section 361 (relating to exchanges pursuant to certain corporate reorganizations).

(iv) Section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings).

(v) Section 374(a) (relating to exchanges pursuant to certain railroad reorganizations).

(vi) Section 721 (relating to transfers to a partnership in exchange for a partnership interest). See paragraph (e) of this section.

(vii) Section 731 (relating to distributions by a partnership to a partner). For special carryover of basis rule, see paragraph (e) of this section.

(3) *Treatment of farm land in the hands of tranferee.* See paragraph (f) of this section for treatment of the transferee in the case of a disposition to which this paragraph applies.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On January 4, 1975, A, an individual calendar year taxpayer, owns a parcel of farm land, which he acquired on March 25, 1970, having an adjusted basis of $15,000 and a fair market value of $40,000. On that date he transfers the parcel to corporation M in exchange for stock in the corporation worth $40,000 in a transaction qualifying under section 351. On the date of such transfer, the aggregate of the deductions allowed under sections 175 and 182 with respect to the land is $18,000. Without regard to section 1252, A would recognize no gain under section 351 upon the transfer and M's basis for the land would be determined under section 362(a) by reference to its basis in the hands of A. Thus, as a result of the disposition, no gain is recognized as ordinary income under section 1251(c)(1) or section 1252(a)(1) by A since the amount of gain recognized under such sections is limited to the amount of gain which is recognized under section 351 (determined without regard to sections 1251 and 1252). See paragraph (c)(1) of § 1.1251–4 and subparagraph (1) of this paragraph. For treatment of the farm land in the hands of B, see paragraph (f)(1) of this section. For effect of the transfer on the excess deductions account of A and of B, see paragraph (e)(1) of § 1.1251–2.

Example 2. Assume the same facts in example (1), except that A transferred the land to M for stock in the corporation worth $32,000 and $8,000 cash. The gain realized is $25,000 (amount realized, $40,000, minus adjusted basis, $15,000). Without regard to section 1252, A would recognize $8,000 of gain under section 351(b). Assume further that no gain is recognized as ordinary income under section 1251(c)(1). Therefore, since the applicable percentage, 100 percent, of the aggregate of the deductions allowed under sections 175 and 182, $18,000, is lower than the gain realized, $25,000, the amount of gain to be recognized as ordinary income under section 1252(a)(1) would be $18,000 if the provisions of subparagraph (1) of this paragraph do not apply. Since under section 351(b) gain in the amount of $8,000 would be recognized to the transferor without regard to section 1252, the limitation provided in subparagraph (1) of this paragraph limits the gain taken into account by A under section 1252(a)(1) to $8,000.

Example 3. Assume the same facts as in example (2), except that $5,000 of gain is recognized as ordinary income under section 1251(c)(1). The amount of gain recognized as ordinary income under section 1252(a)(1) is $3,000 computed as follows:

(1) Amount of gain under section 1252(a)(1) (determined without regard to subparagraph (1) of this paragraph):	
(a) Aggregate of deductions allowed under sections 175 and 182	$18,000
(b) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$5,000
(c) Difference	$13,000
(d) Multiply: Applicable percentage for property disposed of within the fifth year after it was acquired	100%
(e) Amount in paragraph (a)(1)(i)*(a)* of § 1.1252–1	$13,000
(f) Gain realized (amount realized $40,000, less adjusted basis, $15,000)	$25,000
(g) Minus: Amount in line (b)	$5,000
(h) Amount in paragraph (a)(1)(i)(*b*) of § 1.1252–1	$20,000
(i) Lower of line (e) or (h)	$13,000

(2) Limitation in subparagraph (1) of this paragraph:	
(a) Gain recognized (determined without regard to section 1252)	$8,000
(b) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$5,000
(c) Difference	$3,000
(3) Lower of line (1)(i) or line (2)(c)	$3,000

Thus, the entire gain recognized under section 351(b) (determined without regard to sections 1251 and 1252), $8,000, is recognized as ordinary income since that amount is equal to the sum of the gain recognized as ordinary income under section 1251(c)(1), $5,000, and under section 1252(a)(1), $3,000.

(d) *Limitation for like kind exchanges and involuntary conversions*—(1) *General rule.* If farm land is disposed of and gain (determined without regard to section 1252) is not recognized in whole or in part under section 1031 (relating to like kind exchanges) or section 1033 (relating to involuntary conversions), then the amount of gain recognized as ordinary income by the transferor under section 1252(a)(1) shall not exceed the sum of:

(i) The excess (if any) of (*a*) the amount of gain recognized on such disposition (determined without regard to section 1252) over (*b*) the amount (if any) of gain recognized as ordinary income under section 1251(c)(1), plus

(ii) The fair market value of property acquired which is not farm land and which is not taken into account under subdivision (i) of this subparagraph (that is, the fair market value of property other than farm land acquired which is qualifying property under section 1031 or 1033, as the case may be).

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. (i) Assume the same facts as in example (2)(ii) of paragraph (d)(3) of § 1.1251–4. Assume further that the aggregate of the amount of sections 175 and 182 deductions allowable is equal to the amount allowed. Under paragraph (a)(1) of § 1.1252–1, $18,000 would be recognized as ordinary income under section 1252(a)(1) (determined without regard to subparagraph (1) of this paragraph), computed as follows:

(1) Aggregate of deductions allowed under sections 175 and 182	$18,000
(2) Minus: Gain recognized as ordinary income under section 1251(c)(1)	0
(3) Difference	$18,000
(4) Multiply: Applicable percentage for property disposed of within the fifth year after it was acquired	100%
(5) Amount in paragraph (a)(1)(i)(*a*) of § 1.1252–1	$18,000
(6) Gain realized (amount realized, $67,500, less adjusted basis, $48,000)	$19,500
(7) Minus: Amount in line (2)	0
(8) Amount in paragraph (a)(1)(i)(*b*) of § 1.1252–1	$19,500
(9) Lower of line (5) or line (8)	$18,000

(ii) Although no gain was recognized under section 1251(c)(1) and the stock purchased by A for $67,500 is farm recapture property for purposes of section 1251, it is not farm land for purposes of section 1252. Nevertheless, although no gain would be recognized under sections 1033(a)(3) and 1251(c)(1) (determined without regard to section 1252), the limitation under subparagraph (1) of this paragraph is $67,500 (that is, the fair market value of property other than farm land acquired which is qualifying property under section 1033). Since the amount of gain which would be recognized as ordinary income under section 1252(a)(1) (determined without regard to subparagraph (1) of this paragraph), $18,000 (as computed in subdivision (i) of this example), is lower than the amount of such limitation, $67,500, accordingly, only $18,000 is recognized as ordinary income under section 1252(a)(1). For determination of basis of the stock acquired, see subparagraph (5) of this paragraph.

Example 2. (i) Assume the same facts as in example (1) of this subparagraph, except that the cost of the stock was $62,500 (its fair market value). Thus, the amount of gain recognized on the disposition under section 1033(a)(3) (determined without regard to sections 1251 and 1252) is $5,000, that is, $67,500 minus $62,500. Assume further that $5,000 (the amount of gain recognized under section 1033(a)(3) (so determined)) was recognized as ordinary income under section 1251(c)(1). The amount of gain recognized as ordinary income under section 1252(a)(1) is $13,000, computed as follows:

(1) Amount of gain under section 1252(a)(1) (determined without regard to subparagraph (1) of this paragraph):	
(a) Aggregate of deductions allowed under sections 175 and 182	$18,000
(b) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$5,000
(c) Difference	$13,000
(d) Multiply: Applicable percentage for property disposed of within the fifth year after it was acquired	100%
(e) Amount in paragraph (a)(1)(i)(*a*) of § 1.1252–1	$13,000
(f) Gain realized (amount realized, $67,500 (less adjusted basis, $48,000))	$19,500
(g) Minus: Amount in line (b)	$5,000

(h) Amount in paragraph (a)(1)(i)(*b*) of § 1.1252–1	$14,500
(i) Lower of line (e) or (h)	$13,000
(2) Limitation in subparagraph (1) of this paragraph:	
(a) Gain recognized (determined without regard to section 1252)	$5,000
(b) Minus: Gain recognized as ordinary income under section 1251(c)(1)	$5,000
(c) Difference	0
(d) Plus; The fair market value of property other than farm land acquired which is qualifying property under section 1033	$62,500
(e) Sum of lines (c) and (d)	$62,500
(3) Lower of line (1)(i) or line (2)(e)	$13,000

(3) *Application to single disposition of farm land and property of different class.* (i) If upon a sale of farm land gain would be recognized under section 1252(a)(1), and if such land together with property of a different class or classes is disposed of in one transaction in which gain is not recognized in whole or in part under section 1031 or 1033 (without regard to section 1252(a)(1)), then rules consistent with the principles of paragraph (d)(6) of § 1.1250–3 (relating to gain from disposition of certain depreciable realty) shall apply for purposes of allocating the amount realized to each of the classes of property disposed of and for purposes of determining what property the amount realized for each class consists of.

(ii) For purposes of this subparagraph, the classes of property other than farm recapture property (as defined in section 1251(e) and paragraph (a)(1) of § 1.1251–3) are (*a*) section 1245 property, (*b*) section 1250 property, and (*c*) other property.

(iii) For purposes of this subparagraph, the classes of farm recapture property are (*a*) land, (*b*) section 1245 property, and (*c*) other property.

(4) *Treatment of farm land received in like kind exchange or involuntary conversion.* The aggregate of the deductions allowed under sections 175 and 182 in respect of land acquired in a transaction described in subparagraph (1) of this paragraph shall include the aggregate of the deductions allowed under sections 175 and 182 in respect of the land transferred or converted (as the cr sections 175 and 182 in respect of land acquired in a transaction described in subparagraph (1) of this paragraph shall include the aggregate of the deductions allowed under sections 175 and 182 in respect of the land transferred or converted (as the case may be) in such transaction minus the amount of gain taken into account under sections 1251(c) and 1252(a) with respect to the land transferred or converted. Upon a subsequent disposition of such land, the holding period shall include the holding period with respect to the land transferred or converted.

(5) *Basis adjustment.* In order to reflect gain recognized under section 1252(a)(1) if property is acquired in a transaction to which subparagraph (1) of this paragraph applies, its basis shall be determined under the rules of section 1031(d) or 1033(c).

(e) *Partnerships.* [Reserved]

(f) *Treatment of farm land received by a transferee in a disposition by gift and certain tax-free transactions*—(1) *General rule.* If farm land is disposed of in a transaction which is either a gift to which paragraph (a)(1) of this section applies, or a completely tax-free transfer to which paragraph (c)(1) of this section applies, then for purposes of section 1252:

(i) The aggregate of the deductions allowed under sections 175 and 182 in respect of the land in the hands of the tranferee immediately after the disposition shall be an amount equal to the amount of such aggregate in the hands of the transferor immediately before the disposition, and

(ii) For purposes of applying section 1252 upon a subsequent disposition by the transferee (including a computation of the applicable percentage), the holding period of the transferee shall include the holding period of the transferor.

(2) *Certain partially tax-free transfers.* If farm land is disposed of in a transaction which either is in part a sale or exchange and in part a gift to which paragraph (a)(2)of this section applies, or is a partially tax-free transfer to which paragraph (c)(1) of this section applies, then for purposes of section 1252 the amount determined under subparagraph (1)(i) of this paragraph shallbe reduced by the amount of gain taken into account under sections

1251(c) and 1252(a) by the transferor upon the disposition. Upon a subsequent disposition by the transferee, the holding period for purposes of computing the amount under section 1252(a)(1)(A), with respect to the 175 and 182 deductions taken by the transferor, shall include the holding period of the transferor. With respect to the 1975 and 182 deductions taken by the transferee, the holding period shall not include the holding period of the transferor.

(3) *Examples.* The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. Assume the same facts as in example (1) of paragraph (a)(4) of this section. Therefore, on the date B receives the farm land in the gift transaction, under subparagraph (1) of this paragraph the aggregate of the deductions allowed under sections 175 and 182 in respect of the farm land in the hands of B is the amount in the hands of A, $24,000, and for purposes of applying section 1252 upon a subsequent disposition by B (including a computation of the applicable percentage) the holding period of B includes the holding period of A.

Example 2. Assume the same facts as in example (2) of paragraph (a)(4) of this section. Under subparagraph (2) of this paragraph, the aggregate of the sections 175 and 182 deductions which pass over to B for purposes of section 1252 is $14,000 ($24,000 deductions allowable under sections 175 and 182 minus $3,000 gain recognized under section 1251(c) in accordance with example (2) of paragraph (a)(4) of §1.1251–4, minus $7,000 gain recognized under section 1252(a) in acordance with example (2) of paragraph (a)(4) of this section), B's holding period includes the holding period of A (i.e., the period back to January 15, 1971) with respect to A's deductions.

(g) *Disposition of farm land not specifically covered.* If farm land is disposed of in a transaction not specifically covered under §1.1252–1 and this section, then the principles of section 1245 shall apply.

[T.D. 7418, 41 FR 18832, May 7, 1976; 41 FR 23669, June 11, 1976]

§1.1254–0 Table of contents for section 1254 recapture rules.

This section lists the major captions contained in §§1.1254–1 through 1.1254–6.

§1.1254–1 Treatment of gain from disposition of natural resource recapture property.

(a) In general.
(b) Definitions.
(1) Section 1254 costs.
(2) Natural resource recapture property.
(3) Disposition.
(c) Disposition of a portion of natural resource recapture property.
(1) Disposition of a portion (other than an undivided interest) of natural resource recapture property.
(2) Disposition of an undivided interest.
(3) Alternative allocation rule.
(d) Installment method.

§1.1254–2 Exceptions and limitations.

(a) Exception for gifts and section 1041 transfers.
(1) General rule.
(2) Part gift transactions.
(b) Exception for transfers at death.
(c) Limitation for certain tax-free transactions.
(1) General rule.
(2) Special rule for dispositions to certain tax exempt organizations.
(3) Transfers described.
(4) Special rules for section 332 transfers.
(d) Limitation for like kind exchanges and involuntary conversions.
(1) General rule.
(2) Disposition and acquisition of both natural resource recapture property and other property.

§1.1254–3 Section 1254 costs immediately after certain acquisitions.

(a) Transactions in which basis is determined by reference to cost or fair market value of property transferred.
(1) Basis determined under section 1012.
(2) Basis determined under section 301(d), 334(a), or 358(a)(2).
(3) Basis determined solely under former section 334(b)(2) or former section 334(c).
(4) Basis determined by reason of the application of section 1014(a).
(b) Gifts and certain tax-free transactions.
(1) General rule.
(2) Transactions covered.
(c) Certain transfers at death.
(d) Property received in a like kind exchange or involuntary conversion.
(1) General rule.
(2) Allocation of section 1254 costs among multiple natural resource recapture property acquired.
(e) Property transferred in cases to which section 1071 or 1081(b) applies.

§1.1254–4 Special rules for S corporations and their shareholders.

(a) In general.

(b) Determination of gain treated as ordinary income under section 1254 upon a disposition of natural resource recapture property by an S corporation.

(1) General rule.

(2) Examples.

(c) Character of gain recognized by a shareholder upon a sale or exchange of S corporation stock.

(1) General rule.

(2) Exceptions.

(3) Examples.

(d) Section 1254 costs of a shareholder.

(e) Section 1254 costs of an acquiring shareholder after certain acquisitions.

(1) Basis determined under section 1012.

(2) Basis determined under section 1014(a).

(3) Basis determined under section 1014(b)(9).

(4) Gifts and section 1041 transfers.

(f) Special rules for a corporation that was formerly an S corporation or formerly a C corporation.

(1) Section 1254 costs of an S corporation that was formerly a C corporation.

(2) Examples.

(3) Section 1254 costs of a C corporation that was formerly an S corporation.

(g) Determination of a shareholder's section 1254 costs upon certain stock transactions

(1) Issuance of stock.

(2) Natural resource recapture property acquired in exchange for stock.

(3) Treatment of nonvested stock.

(4) Exception.

(5) Aggregate of S corporation shareholders' section 1254 costs with respect to natural resource recapture property held by the S corporation

(6) Examples.

§ 1.1254–5 Special rules for partnerships and their partners.

(a) In general.

(b) Determination of gain treated as ordinary income under section 1254 upon the disposition of natural resource recapture property by a partnership.

(1) General rule.

(2) Exception to partner level recapture in the case of abusive allocations.

(3) Examples.

(c) Section 1254 costs of a partner.

(1) General rule.

(2) Section 1254 costs of a transferee partner after certain acquisitions.

(d) Property distributed to a partner.

(1) In general.

(2) Aggregate of partners' section 1254 costs with respect to natural resource recapture property held by a partnership.

§ 1.1254–6 Effective date of regulations.

[T.D. 8586, 60 FR 2501, Jan. 10, 1995, as amended by T.D. 8684, 61 FR 53063, Oct. 10, 1996]

§ 1.1254–1 Treatment of gain from disposition of natural resource recapture property.

(a) *In general.* Upon any disposition of section 1254 property or any disposition after December 31, 1975 of oil, gas, or geothermal property, gain is treated as ordinary income in an amount equal to the lesser of the amount of the section 1254 costs (as defined in paragraph (b)(1) of this section) with respect to the property, or the amount, if any, by which the amount realized on the sale, exchange, or involuntary conversion, or the fair market value of the property on any other disposition, exceeds the adjusted basis of the property. However, any amount treated as ordinary income under the preceding sentence is not included in the taxpayer's *gross income from the property* for purposes of section 613. Generally, the lesser of the amounts described in this paragraph (a) is treated as ordinary income even though, in the absence of section 1254(a), no gain would be recognized upon the disposition under any other provision of the Internal Revenue Code. For the definition of the term *section 1254 costs,* see paragraph (b)(1) of this section. For the definition of the terms *section 1254 property, oil, gas, or geothermal property,* and *natural resource recapture property,* see paragraph (b)(2) of this section. For rules relating to the *disposition* of natural resource recapture property, see paragraphs (b)(3), (c), and (d) of this section. For exceptions and limitations to the application of section 1254(a), see § 1.1254–2.

(b) *Definitions*—(1) *Section 1254 costs*—(i) *Property placed in service after December 31, 1986.* With respect to any property placed in service by the taxpayer after December 31, 1986, the term *section 1254 costs* means—

(A) The aggregate amount of expenditures that have been deducted by the taxpayer or any person under section 263, 616, or 617 with respect to such property and that, but for the deduction, would have been included in the adjusted basis of the property or in the adjusted basis of certain depreciable property associated with the property; and

(B) The deductions for depletion under section 611 that reduced the adjusted basis of the property.

(ii) *Property placed in service before January 1, 1987.* With respect to any property placed in service by the taxpayer before January 1, 1987, the term *section 1254 costs* means—

(A) The aggregate amount of costs paid or incurred after December 31, 1975, with respect to such property, that have been deducted as intangible drilling and development costs under section 263(c) by the taxpayer or any other person (except that section 1254 costs do not include costs incurred with respect to geothermal wells commenced before October 1, 1978) and that, but for the deduction, would be reflected in the adjusted basis of the property or in the adjusted basis of certain depreciable property associated with the property; reduced by

(B) The amount (if any) by which the deduction for depletion allowed under section 611 that was computed either under section 612 or sections 613 and 613A, with respect to the property, would have been increased if the costs (paid or incurred after December 31, 1975) had been charged to capital account rather than deducted.

(iii) *Deductions under section 59 and section 291.* Amounts capitalized pursuant to an election under section 59(e) or pursuant to section 291(b) are treated as section 1254 costs in the year in which an amortization deduction is claimed under section 59(e)(1) or section 291(b)(2).

(iv) *Suspended deductions.* If a deduction of a section 1254 cost has been suspended as of the date of disposition of section 1254 property, the deduction is not treated as a section 1254 cost if it is included in basis for determining gain or loss on the disposition. On the other hand, if the deduction will eventually be claimed, it is a section 1254 cost as of the date of disposition. For example, a deduction suspended pursuant to the 65 percent of taxable income limitation of section 613A(d)(1) may either be included in basis upon disposition of the property or may be deducted in a year after the year of disposition. See §1.613A–4(a)(1). If it is included in the basis then it is not a section 1254 cost, but if it is deductible in a later year it is a section 1254 cost as of the date of the disposition.

(v) *Previously recaptured amounts.* If an amount has been previously treated as ordinary income pursuant to section 1254, it is not a section 1254 cost.

(vi) *Nonproductive wells.* The aggregate amount of section 1254 costs paid or incurred on any property includes the amount of intangible drilling and development costs incurred on nonproductive wells, but only to the extent that the taxpayer recognizes income on the foreclosure of a nonrecourse debt the proceeds from which were used to finance the section 1254 costs with respect to the property. For this purpose, the term nonproductive well means a well that does not produce oil or gas in commercial quantities, including a well that is drilled for the purpose of ascertaining the existence, location, or extent of an oil or gas reservoir (e.g., a delineation well). The term *nonproductive well* does not include an injection well (other than an injection well drilled as part of a project that does not result in production in commercial quantities).

(vii) *Calculation of amount described in paragraph (b)(1)(ii)(B) of this section (hypothetical depletion offset)*—(A) *In general.* In calculating the amount described in paragraph (b)(1)(ii)(B) of this section, the taxpayer shall apply the following rules. The taxpayer may use the 65-percent-of-taxable-income limitation of section 613A(d)(1). If the taxpayer uses that limitation, the taxpayer is not required to recalculate the effect of such limitation with respect to any property not disposed of. That is, the taxpayer may assume that the hypothetical capitalization of intangible drilling and development costs with respect to any property disposed of does not affect the allowable depletion with respect to property retained by the taxpayer. Any intangible drilling and development costs that, if they had not been treated as expenses under section 263(c), would have properly been capitalized under §1.612–4(b)(2) (relating to items recoverable through depreciation under section 167 or cost recovery under section 168) are treated as costs described in §1.612–4(b)(1) (relating to items recoverable through depletion). The increase in depletion attributable to the capitalization of intangible drilling and development costs is computed by subtracting the amount of cost or percentage depletion actually claimed from the amount of cost or percentage depletion that would have been allowable if intangible drilling and development costs had been capitalized. If the remainder is zero or less than zero, the entire amount of intangible drilling and development costs attributable to the property is recapturable.

(B) *Example.* The following example illustrates the principles of paragraph (b)(1)(vii)(A).

Example: Hypothetical depletion offset. In 1976, A purchased undeveloped property for $10,000. During 1977, A incurred $200,000 of productive well intangible drilling and development costs with respect to the property. A deducted the intangible drilling and development costs as expenses under section 263(c). Estimated reserves of 150,000 barrels of recoverable oil were discovered in 1977 and production began in 1978. In 1978, A produced and sold 30,000 barrels of oil at $8 per barrel, resulting in $240,000 of gross income. A had no other oil or gas production in 1978. A claimed a percentage depletion deduction of $52,800 (i.e., 22% of $240,000 gross income from the property). If A had capitalized the intangible drilling and development costs, assume that $200,000 of the costs would have been allocated to the depletable property and none to depreciable property. A's cost depletion deduction if the intangible drilling and development costs had been capitalized would have been $42,000 (i.e., (($200,000 intangible drilling and development costs + $10,000 acquisition costs) × 30,000 barrels of production)/ 150,000 barrels of estimated recoverable reserves). Since this amount is less than A's depletion deduction of $52,800 (percentage depletion), no reduction is made to the amount of intangible drilling and development costs ($200,000). On January 1, 1979, A sold the oil property to B for $360,000 and calculated section 1254 recapture without reference to the 65-percent-of-taxable-income limitation. A's gain on the sale is the entire $360,000, because A's basis in the property at the beginning of 1979 is zero (i.e., $10,000 cost less $52,800 depletion deduction for 1978). Since the section 1254 costs ($200,000) are less than A's gain on the sale, $200,000 is treated as ordinary income under section 1254(a). The remaining amount of A's gain ($160,000) is not subject to section 1254(a).

(2) *Natural resource recapture property*—(i) *In general.* The term *natural resource recapture property* means section 1254 property or oil, gas, or geothermal property as those terms are defined in this section.

(ii) *Section 1254 property.* The term *section 1254 property* means any property (within the meaning of section 614) that is placed in service by the taxpayer after December 31, 1986, if any expenditures described in paragraph (b)(1)(i)(A) of this section (relating to costs under section 263, 616, or 617) are properly chargeable to such property, or if the adjusted basis of such property includes adjustments for deductions for depletion under section 611.

(iii) *Oil, gas, or geothermal property.* The term *oil, gas, or geothermal property* means any property (within the meaning of section 614) that was placed in service by the taxpayer before January 1, 1987, if any expenditures described in paragraph (b)(1)(ii)(A) of this section are properly chargeable to such property.

(iv) *Property to which section 1254 costs are properly chargeable.* (A) An expenditure is properly chargeable to property if—

(*1*) The property is an operating mineral interest with respect to which the expenditure has been deducted;

(*2*) The property is a nonoperating mineral interest (e.g., a net profits interest or an overriding royalty interest) burdening an operating mineral interest if the nonoperating mineral interest is carved out of an operating mineral interest described in paragraph (b)(2)(iv)(A)(*1*) of this section;

(*3*) The property is a nonoperating mineral interest retained by a lessor or sublessor if such lessor or sublessor held, prior to the lease or sublease, an operating mineral interest described in paragraph (b)(2)(iv)(A)(*1*) of this section; or

(*4*) The property is an operating or a nonoperating mineral interest held by a taxpayer if a party related to the taxpayer (within the meaning of section 267(b) or section 707(b)) held an operating mineral interest (described in paragraph (b)(2)(iv)(A)(*1*) of this section) in the same tract or parcel of land that terminated (in whole or in part) without being disposed of (e.g., a working interest which terminated after a specified period of time or a given amount of production), but only if there exists between the related parties an arrangement or plan to avoid recapture under section 1254. In such a case, the taxpayer's section 1254 costs with respect to the property include those of the related party.

(B) *Example.* The following example illustrates the provisions of paragraph (2)(iv)(A)(*4*) of this section:

Example: Arrangement or plan to avoid recapture. C, an individual, owns 100% of the stock of both X Co. and Y Co. On January 1, 1998, X Co. enters into a standard oil and gas lease. X Co. immediately assigns to Y Co. 1% of the working interest for one year, and 99% of the working interest thereafter. In 1998, X Co. and Y Co. expend $300 in intangible drilling and development costs developing the tract, of which $297 are deducted by X Co. under section 263(c). On January 1, 1999, Y Co. sells its 99% share of the working interest to an unrelated person. Based on all the facts and circumstances, the arrangement between X Co. and Y Co. is part of a plan or arrangement to avoid recapture under section 1254. Therefore, Y Co. must include in its section 1254 costs the $297 of intangible drilling and development costs deducted by X Co.

(v) *Property the basis of which includes adjustments for depletion deductions.* The adjusted basis of property includes adjustments for depletion under section 611 if—

(A) The basis of the property has been reduced by reason of depletion deductions; or

(B) The property has been carved out of or is a portion of property the basis of which has been reduced by reason of depletion deductions.

(vi) *Property held by a transferee.* Property held by a transferee is natural resource recapture property if the property was natural resource recapture property in the hands of the transferor and the transferee's basis in the property is determined with reference to the transferor's basis in the property (e.g., a gift) or is determined under section 732.

(vii) *Property held by a transferor.* Property held by a transferor of natural resource recapture property is natural resource recapture property if the transferor's basis in the property received is determined with reference to the transferor's basis in the property transferred by the transferor (e.g., a like kind exchange). For purposes of this paragraph (b)(2), property described in this paragraph (b)(2)(vii) is treated as placed in service at the time the property transferred by the transferor was placed in service by the transferor.

(3) *Disposition*—(i) *General rule.* The term *disposition* has the same meaning as in section 1245, relating to gain from dispositions of certain depreciable property.

(ii) *Exceptions.* The term *disposition* does not include—

(A) Any transaction that is merely a financing device, such as a mortgage or a production payment that is treated as a loan under section 636 and the regulations thereunder;

(B) Any abandonment (except that an abandonment is a disposition to the extent the taxpayer recognizes income on the foreclosure of a nonrecourse debt);

(C) Any creation of a lease or sublease of natural resource recapture property;

(D) Any termination or election of the status of an S corporation;

(E) Any unitization or pooling arrangement;

(F) Any expiration or reversion of an operating mineral interest that expires or reverts by its own terms, in whole or in part; or

(G) Any conversion of an overriding royalty interest that, at the option of the grantor or successor in interest, converts to an operating mineral interest after a certain amount of production.

(iii) *Special rule for carrying arrangements.* In a carrying arrangement, liability for section 1254 costs attributable to the entire operating mineral interest held by the carrying party prior to reversion or conversion remains attributable to the reduced operating mineral interest retained by the carrying party after a portion of the operating mineral interest has reverted to the carried party or after the conversion of an overriding royalty interest that, at the option of the grantor or successor in interest, converts to an operating mineral interest after a certain amount of production.

(c) *Disposition of a portion of natural resource recapture property*—(1) *Disposition of a portion (other than an undivided interest) of natural resource recapture property*—(i) *Natural resource recapture property subject to the general rules of §1.1254–1.* For purposes of section

1254(a)(1) and paragraph (a) of this section, except as provided in paragraphs (c) (1)(ii) and (3) of this section, in the case of the disposition of a portion (that is not an undivided interest) of natural resource recapture property, the entire amount of the section 1254 costs with respect to the natural resource recapture property is treated as allocable to that portion of the property to the extent of the amount of gain to which section 1254(a)(1) applies. If the amount of the gain to which section 1254(a)(1) applies is less than the amount of the section 1254 costs with respect to the natural resource recapture property, the balance of the section 1254 costs remaining after allocation to the portion of the property that was disposed of remains subject to recapture by the taxpayer under section 1254(a)(1) upon disposition of the remaining portion of the property. For example, assume that A owns an 80-acre tract of land with respect to which A has deducted intangible drilling and development costs under section 263(c). If A sells the north 40 acres, the entire amount of the section 1254 costs with respect to the 80-acre tract is treated as allocable to the 40-acre portion sold (to the extent of the amount of gain to which section 1254(a)(1) applies).

(ii) *Natural resource recapture property subject to the exceptions and limitations of § 1.1254–2.* For purposes of section 1254(a)(1) and paragraph (a) of this section, except as provided in paragraph (b)(3) of this section, in the case of the disposition of a portion (that is not an undivided interest) of natural resource recapture property to which section 1254(a)(1) does not apply by reason of the application of § 1.1254–2 (certain nonrecognition transactions), the following rule for allocation of costs applies. An amount of the section 1254 costs that bears the same ratio to the entire amount of such costs with respect to the entire natural resource recapture property as the value of the property transferred bears to the value of the entire natural resource recapture property is treated as allocable to the portion of the natural resource recapture property transferred. The balance of the section 1254 costs remaining after allocation to that portion of the transferred property remains subject to recapture by the taxpayer under section 1254(a)(1) upon disposition of the remaining portion of the property. For example, assume that A owns an 80-acre tract of land with respect to which A has deducted intangible drilling and development costs under section 263(c). If A gives away the north 40 acres, and if 60 percent of the value of the 80-acre tract were attributable to the north 40 acres given away, 60 percent of the section 1254 costs with respect to the 80-acre tract is allocable to the north 40 acres given away.

(2) *Disposition of an undivided interest*—(i) *Natural resource recapture property subject to the general rules of § 1.1254–1.* For purposes of section 1254(a)(1), except as provided in paragraphs (b)(2)(ii) and (b)(3) of this section, in the case of the disposition of an undivided interest in natural resource recapture property (or a portion thereof), a proportionate part of the section 1254 costs with respect to the natural resource recapture property is treated as allocable to the transferred undivided interest to the extent of the amount of gain to which section 1254(a)(1) applies. For example, assume that A owns an 80-acre tract of land with respect to which A has deducted intangible drilling and development costs under section 263(c). If A sells an undivided 40 percent interest in the 80-acre tract, 40 percent of the section 1254 costs with respect to the 80-acre tract is allocable to the transferred 40 percent interest in the 80-acre tract. However, if the amount of gain recognized on the sale of the 40 percent undivided interest were equal to only 35 percent of the amount of section 1254 costs attributable to the 80-acre tract, only 35 percent of the section 1254 costs would be treated as attributable to the undivided 40 percent interest. See paragraph (c)(3) of this section for an alternative allocation rule.

(ii) *Natural resource recapture property subject to the exceptions and limitations of § 1.1254–2.* For purposes of section 1254(a)(1) and paragraph (a) of this section, except as provided in paragraph (b)(3) of this section, in the case of a disposition of an undivided interest in natural resource recapture property (or a portion thereof) to which section 1254 (a)(1) does not apply by reason of §1.1254–2, a proportionate part of the section 1254 costs with respect to the natural resource recapture property is treated as allocable to the transferred undivided interest. See paragraph (c)(3) of this section for an alternative allocation rule.

(3) *Alternative allocation rule*—(i) *In general.* The rules for the allocation of costs set forth in section 1254(a)(2) and paragraphs (c) (1) and (2) of this section do not apply with respect to section 1254 costs that the taxpayer establishes to the satisfaction of the Commissioner do not relate to the transferred property. Except as provided in paragraphs (c)(3) (ii) and (iii) of this section, a taxpayer may satisfy this requirement only by receiving a private letter ruling from the Internal Revenue Service that the section 1254 costs do not relate to the transferred property.

(ii) *Portion of property.* Upon the transfer of a portion of a natural resource recapture property (other than an undivided interest) with respect to which section 1254 costs have been incurred, a taxpayer may treat section 1254 costs as not relating to the transferred portion if the transferred portion does not include any part of any deposit with respect to which the costs were incurred.

(iii) *Undivided interest.* Upon the transfer of an undivided interest in a natural resource recapture property with respect to which section 1254 costs have been incurred, a taxpayer may treat costs as not relating to the transferred interest if the undivided interest is an undivided interest in a portion of the natural resource recapture property, and the portion would be eligible for the alternative allocation rule under paragraph (c)(3)(ii) of this section.

(iv) *Substantiation.* If a taxpayer treats section 1254 costs incurred with respect to a natural resource recapture property as not relating to a transferred interest in a portion of the property, the taxpayer must indicate on his or her tax return that the costs do not relate to the transferred portion and maintain the records and supporting evidence that substantiate this position.

(d) *Installment method.* Gain from a disposition to which section 1254(a)(1) applies is reported on the installment method if that method otherwise applies under section 453 or 453A of the Internal Revenue Code and the regulations thereunder. The portion of each installment payment as reported that represents income (other than interest) is treated as gain to which section 1254(a)(1) applies until all of the gain (to which section 1254(a)(1) applies) has been reported, and the remaining portion (if any) of the income is then treated as gain to which section 1254(a)(1) does not apply. For treatment of amounts as interest on certain deferred payments, see sections 483, 1274, and the regulations thereunder.

[T.D. 8586, 60 FR 2502, Jan. 10, 1995]

§1.1254–2 Exceptions and limitations.

(a) *Exception for gifts and section 1041 transfers*—(1) *General rule.* No gain is recognized under section 1254(a)(1) upon a disposition of natural resource recapture property by a gift or by a transfer in which no gain or loss is recognized pursuant to section 1041 (relating to transfers between spouses). For purposes of this paragraph (a), the term *gift* means, except to the extent that paragraph (a)(2) of this section applies, a transfer of natural resource recapture property that, in the hands of the transferee, has a basis determined under the provisions of sections 1015 (a) or (d) (relating to basis of property acquired by gift). For rules concerning the potential reduction in the amount of the charitable contribution in the case of natural resource recapture property, see section 170(e) and §1.170A–4. See §1.1254–3(b)(1) for determination of potential recapture of section 1254 costs on property acquired by gift. See §1.1254–1 (c)(1)(ii) and (c)(2)(ii) for apportionment of section 1254 costs on a gift of a portion of natural resource recapture property.

(2) *Part gift transactions.* If a disposition of natural resource recapture property is in part a sale or exchange and in part a gift, the gain that is treated as ordinary income pursuant to section 1254(a)(1) is the lower of the section 1254 costs with respect to the property or the excess of the amount realized upon the disposition of the

property over the adjusted basis of the property. In the case of a transfer subject to section 1011(b) (relating to bargain sales to charitable organizations), the adjusted basis for purposes of the preceding sentence is the adjusted basis for determining gain or loss under section 1011(b).

(b) *Exception for transfers at death.* Except as provided in section 691 (relating to income in respect of a decedent), no gain is recognized under section 1254(a)(1) upon a transfer at death. For purposes of this paragraph, the term *transfer at death* means a transfer of natural resource recapture property that, in the hands of the transferee, has a basis determined under the provisions of section 1014(a) (relating to basis of property acquired from a decedent) because of the death of the transferor. See § 1.1254–3 (a)(4) and (c) for the determination of potential recapture of section 1254 costs on property acquired in a transfer at death.

(c) *Limitation for certain tax-free transactions*—(1) *General rule.* Upon a transfer of property described in paragraph (c)(3) of this section, the amount of gain treated as ordinary income by the transferor under section 1254(a)(1) may not exceed the amount of gain recognized to the transferor on the transfer (determined without regard to section 1254). In the case of a transfer of both natural resource recapture property and property that is not natural resource recapture property in one transaction, the amount realized from the disposition of the natural resource recapture property is deemed to be equal to the amount that bears the same ratio to the total amount realized as the fair market value of the natural resource recapture property bears to the aggregate fair market value of all the property transferred. The preceding sentence is applied solely for purposes of computing the portion of the total gain (determined without regard to section 1254) that may be recognized as ordinary income under section 1254(a)(1).

(2) *Special rule for dispositions to certain tax-exempt organizations.* Paragraph (c)(1) of this section does not apply to a disposition of natural resource recapture property to an organization (other than a cooperative described in section 521) that is exempt from the tax imposed by chapter I of the Internal Revenue Code. The preceding sentence does not apply to a disposition of natural resource recapture property to an organization described in section 511 (a)(2) or (b)(2) (relating to imposition of tax on unrelated business income of charitable, etc., organizations) if, immediately after the disposition, the organization uses the property in an unrelated trade or business as defined in section 513. If any property with respect to which gain is not recognized by reason of the exception of this paragraph (c)(2) ceases to be used in an unrelated trade or business of the organization acquiring the property, that organization is, for purposes of section 1254, treated as having disposed of the property on the date of the cessation.

(3) *Transfers described.* The transfers referred to in paragraph (c)(1) of this section are transfers of natural resource recapture property in which the basis of the natural resource recapture property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of any of the following provisions:

(i) Section 332 (relating to certain liquidations of subsidiaries). See paragraph (c)(4) of this section.

(ii) Section 351 (relating to transfer to a corporation controlled by transferor).

(iii) Section 361 (relating to exchanges pursuant to certain corporate reorganizations).

(iv) Section 721 (relating to transfers to a partnership in exchange for a partnership interest).

(v) Section 731 (relating to distributions by a partnership to a partner). For purposes of this paragraph, the basis of natural resource recapture property distributed by a partnership to a partner is deemed to be determined by reference to the adjusted basis of such property to the partnership.

(4) *Special rules for section 332 transfers.* In the case of a distribution in complete liquidation of a subsidiary to which section 332 applies, the limitation provided in this paragraph (c) is confined to instances in which the basis of the natural resource recapture

property in the hands of the transferee is determined, under section 334(b)(1), by reference to its basis in the hands of the transferor. Thus, for example, the limitation may apply in respect of a liquidating distribution of natural resource recapture property by a subsidiary corporation to the parent corporation, but does not apply in respect of a liquidating distribution of natural resource recapture property to a minority shareholder. This paragraph (c) does not apply to a liquidating distribution of natural resource recapture property by a subsidiary to its parent if the parent's basis for the property is determined under section 334(b)(2) (as in effect before enactment of the Tax Reform Act of 1986), by reference to its basis for the stock of the subsidiary. This paragraph (c) does not apply to a liquidating distribution under section 332 of natural resource recapture property by a subsidiary to its parent if gain is recognized and there is a corresponding increase in the parent's basis in the property (e.g., certain distributions to a tax-exempt or foreign corporation).

(d) *Limitation for like kind exchanges and involuntary conversions*—(1) *General rule.* If natural resource recapture property is disposed of and gain (determined without regard to section 1254) is not recognized in whole or in part under section 1031 (relating to like kind exchanges) or section 1033 (relating to involuntary conversions), the amount of gain taken into account by the transferor under section 1254(a)(1) may not exceed the sum of—

(i) The amount of gain recognized on the disposition (determined without regard to section 1254); plus

(ii) The fair market value of property acquired that is not natural resource recapture property (determined without regard to §1.1254–1(b)(2)(vii)) and is not taken into account under paragraph (d)(1)(i) of this section (that is, qualifying property under section 1031 or 1033 that is not natural resource recapture property).

(2) *Disposition and acquisition of both natural resource recapture property and other property.* For purposes of this paragraph (d), if both natural resource recapture property and property that is not natural resource recapture property are acquired as the result of one disposition in which both natural resource recapture property and property that is not natural resource recapture property are disposed of—

(i) The total amount realized upon the disposition is allocated between the natural resource recapture property and the property that is not natural resource recapture property disposed of in proportion to their respective fair market values;

(ii) The amount realized upon the disposition of the natural resource recapture property is deemed to consist of so much of the fair market value of the natural resource recapture property acquired as is not in excess of the amount realized from the natural resource recapture property disposed of, and the remaining portion (if any) of the amount realized upon the disposition of such property is deemed to consist of so much of the fair market value of the property that is not natural resource recapture property acquired as is not in excess of the remaining portion; and

(iii) The amount realized upon the disposition of the property that is not natural resource recapture property is deemed to consist of so much of the fair market value of all the property acquired which was not taken into account under paragraph (d)(2)(ii) of this section. Except as provided in section 1060 and the regulations thereunder, if a buyer and seller have adverse interests as to such allocation of the amount realized, any arm's-length agreement between the buyer and seller is used to establish the allocation. In the absence of such an agreement, the allocation is made by taking into account the appropriate facts and circumstances.

[T.D. 8586, 60 FR 2505, Jan. 10, 1995, as amended by T.D. 8684, 61 FR 53063, Oct. 10, 1996]

§1.1254–3 Section 1254 costs immediately after certain acquisitions.

(a) *Transactions in which basis is determined by reference to cost or fair market value of property transferred*—(1) *Basis determined under section 1012.* If, on the date a person acquires natural resource recapture property, the person's basis for the property is determined solely by reference to its cost (within the meaning of section 1012), the amount of section 1254 costs with respect to the natural resource recapture property in the person's hands is zero on the acquisition date.

(2) *Basis determined under section 301(d), 334(a), or 358(a)(2).* If, on the date a person acquires natural resource recapture property, the person's basis for the property is determined solely by reason of the application of section 301(d) (relating to basis of property received in a corporate distribution), section 334(a) (relating to basis of property received in a liquidation in which gain or loss is recognized), or section 358(a)(2) (relating to basis of other property received in certain exchanges), the amount of the section 1254 costs with respect to the natural resource recapture property in the person's hands is zero on the acquisition date.

(3) *Basis determined solely under former section 334(b)(2) or former section 334(c).* If, on the date a person acquires natural resource recapture property, the person's basis for the property is determined solely under the provisions of section 334(b)(2) (prior to amendment of that section by the Tax Equity and Fiscal Responsibility Act of 1982) or (c) (prior to repeal of that section by the Tax Reform Act of 1986) (relating to basis of property received in certain corporate liquidations), the amount of section 1254 costs with respect to the natural resource recapture property in the person's hands is zero on the acquisition date.

(4) *Basis determined by reason of the application of section 1014(a).* If, on the date a person acquires natural resource recapture property from a decedent, the person's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the property on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), the amount of section 1254 costs with respect to the natural resource recapture property in the person's hands is zero on the acquisition date. See paragraph (c) of this section for the treatment of certain transfers at death.

(b) *Gifts and certain tax-free transactions*—(1) *General rule.* If natural resource recapture property is transferred in a transaction described in paragraph (b)(2) of this section, the amount of section 1254 costs with respect to the natural resource recapture property in the hands of the transferee immediately after the disposition is an amount equal to—

(i) The amount of section 1254 costs with respect to the natural resource recapture property in the hands of the transferor immediately before the disposition (and in the case of an S corporation or partnership transferor, the section 1254 costs of the shareholders or partners with respect to the natural resource recapture property); minus

(ii) The amount of any gain taken into account as ordinary income under section 1254(a)(1) by the transferor upon the disposition (and in the case of an S corporation or partnership transferor, any such gain taken into account as ordinary income by the shareholders or partners).

(2) *Transactions covered.* The transactions to which paragraph (b)(1) of this section apply are—

(i) A disposition that is a gift or in part a sale or exchange and in part a gift;

(ii) A transaction described in section 1041(a); or

(iii) A disposition described in § 1.1254–2(c)(3) (relating to certain tax-free transactions).

(c) *Certain transfers at death.* If natural resource recapture property is acquired in a transfer at death, the amount of section 1254 costs with respect to the natural resource recapture property in the hands of the transferee immediately after the transfer includes the amount, if any, of the section 1254 costs deducted by the transferee before the decedent's death, to the extent that the basis of the natural resource recapture property (determined under section 1014(a)) is required to be reduced under the second sentence of section 1014(b)(9) (relating to adjustments to basis where the property is acquired from a decedent prior to death).

(d) *Property received in a like kind exchange or involuntary conversion*—(1) *General rule.* If natural resource recapture property is disposed of in a like kind exchange under section 1031 or involuntary conversion under section

1033, then immediately after the disposition the amount of section 1254 costs with respect to any natural resource recapture property acquired for the property transferred is an amount equal to—

(i) The amount of section 1254 costs with respect to the natural resource recapture property disposed of (including the section 1254 costs of the shareholders of an S corporation or of the partners of a partnership with respect to the natural resource recapture property); minus

(ii) The amount of any gain taken into account as ordinary income under section 1254(a)(1) by the transferor upon the disposition (and in the case of an S corporation or partnership transferor, any such gain taken into account as ordinary income by the shareholders or partners).

(2) *Allocation of section 1254 costs among multiple natural resource recapture properties acquired.* If more than one parcel of natural resource recapture property is acquired at the same time from the same person in a transaction referred to in paragraph (d)(1) of this section, the total amount of section 1254 costs with respect to the parcels is allocated to the parcels in proportion to their respective adjusted bases.

(e) *Property transferred in cases to which section 1071 or 1081(b) applies.* Rules similar to the rules of section 1245(b)(5) shall apply under section 1254.

[T.D. 8586, 60 FR 2506, Jan. 10, 1995, as amended by T.D. 8684, 61 FR 53063, Oct. 10, 1996]

§1.1254–4 Special rules for S corporations and their shareholders.

(a) *In general.* This section provides rules for applying the provisions of section 1254 to S corporations and their shareholders upon the disposition by an S corporation (and a corporation that was formerly an S corporation) of natural resource recapture property and upon the disposition by a shareholder of stock of an S corporation that holds natural resource recapture property.

(b) *Determination of gain treated as ordinary income under section 1254 upon a disposition of natural resource recapture property by an S corporation*—(1) *General rule.* Upon a disposition of natural resource recapture property by an S corporation, the amount of gain treated as ordinary income under section 1254 is determined at the shareholder level. Each shareholder must recognize as ordinary income under section 1254 the lesser of—

(i) The shareholder's section 1254 costs with respect to the property disposed of; or

(ii) The shareholder's share of the amount, if any, by which the amount realized on the sale, exchange, or involuntary conversion, or the fair market value of the property upon any other disposition (including a distribution), exceeds the adjusted basis of the property.

(2) *Examples.* The following examples illustrate the provisions of paragraph (b)(1) of this section:

Example 1. Disposition of natural resource recapture property other than oil and gas property. A and B are equal shareholders in X, an S corporation. On January 1, 1997, X acquires for $90,000 an undeveloped mineral property, its sole property. During 1997, X expends and deducts $100,000 in developing the property. On January 15, 1998, X sells the property for $250,000 when X's basis in the property is $90,000. Thus, X recognizes gain of $160,000 on the sale. A and B's share of the $160,000 gain recognized is $80,000 each. Each shareholder has $50,000 of section 1254 costs with respect to the property. Under these circumstances, A and B each are required to recognize $50,000 of the $80,000 of gain on the sale of the property as ordinary income under section 1254.

Example 2. Disposition of oil and gas property the adjusted basis of which is allocated to the shareholders under section 613A(c)(11). C and D are equal shareholders in Y, an S corporation. On January 1, 1997, Y acquires for $150,000 an undeveloped oil and gas property, its sole property. During 1997, Y expends in developing the property $40,000 in intangible drilling costs which it elects to expense under section 263(c). On January 15, 1998, Y sells the property for $200,000. C and D's share of the $200,000 amount realized on the sale is $100,000 each. C and D each have a basis of $75,000 in the property and $20,000 of section 1254 costs with respect to the property. Under these circumstances, C and D each are required to recognize $20,000 of the $25,000 gain on the sale of the property as ordinary income under section 1254.

(c) *Character of gain recognized by a shareholder upon a sale or exchange of S corporation stock*—(1) *General rule.* Except as provided in paragraph (c)(2) of this section, if an S corporation shareholder recognizes gain upon a sale or exchange of stock in the S corporation (determined without regard to section 1254), the gain is treated as ordinary income under section 1254 to the extent of the shareholder's section 1254 costs (with respect to the shares sold or exchanged).

(2) *Exceptions*—(i) *Gain not attributable to section 1254 costs*—(A) *General rule.* Paragraph (c)(1) of this section does not apply to any portion of the gain recognized on the sale or exchange of the stock that the taxpayer establishes is not attributable to section 1254 costs. The portion of the gain recognized that is not attributable to section 1254 costs is that portion of the gain recognized that exceeds the amount of ordinary income that the shareholder would have recognized under section 1254 (with respect to the shares sold or exchanged) if, immediately prior to the sale or exchange of the stock, the corporation had sold at fair market value all of the corporation's property the disposition of which would result in the recognition by the shareholder of ordinary income under section 1254.

(B) *Substantiation.* To establish that a portion of the gain recognized is not attributable to a shareholder's section 1254 costs so as to qualify for the exception contained in paragraph (c)(2)(i)(A) of this section, the shareholder must attach to the shareholder's tax return a statement detailing the shareholder's share of the fair market value and basis, and the shareholder's section 1254 costs, for each of the S corporation's natural resource recapture properties held immediately before the sale or exchange of stock.

(ii) *Transactions entered into as part of a plan to avoid recognition of ordinary income under section 1254.* In the case of a contribution of property prior to a sale or exchange of stock pursuant to a plan a principal purpose of which is to avoid recognition of ordinary income under section 1254, paragraph (c)(1) of this section does not apply. Instead, the amount recognized as ordinary income under section 1254 is the amount of ordinary income the selling or exchanging shareholder would have recognized under section 1254 (with respect to the shares sold or exchanged) had the S corporation sold its natural resource recapture property the disposition of which would have resulted in the recognition of ordinary income under section 1254. The amount recognized as ordinary income under the preceding sentence reduces the amount realized on the sale or exchange of the stock.

This reduced amount realized is used in determining any gain or loss on the sale or exchange.

(3) *Examples.* The following examples illustrate the provisions of this paragraph (c):

Example 1. Application of general rule upon a sale of S corporation stock. C and D are equal shareholders in Y, an S corporation. As of January 1, 1997, Y holds two mining properties: Blackacre, with an adjusted basis of $5,000 and a fair market value of $35,000, and Whiteacre, with an adjusted basis of $20,000 and a fair market value of $15,000. Y also holds securities with a basis of $5,000 and a fair market value of $10,000. On January 1, 1997, D sells 50 percent of D's Y stock to E for $15,000. As of the date of the sale, D's adjusted basis in the Y stock sold is $7,500, and D has $18,000 of section 1254 costs with respect to Blackacre and $12,000 of section 1254 costs with respect to Whiteacre. Under this paragraph (c), the gain recognized by D upon the sale of Y stock is treated as ordinary income to the extent of D's section 1254 costs with respect to the stock sold, unless D establishes that a portion of such excess is not attributable to D's section 1254 costs. However, because D would recognize $7,500 in ordinary income under section 1254 with respect to the stock sold if Y sold Blackacre (the only asset the disposition of which would result in ordinary income to D under section 1254), the $7,500 of gain recognized by D upon the sale of D's Y stock is attributable to D's section 1254 costs. Therefore, upon the sale of stock to E, D recognizes $7,500 of ordinary income under this paragraph (c).

Example 2. Sale of S corporation stock where gain is not entirely attributable to section 1254 costs. Assume the same facts as in *Example 1*, except that Blackacre has a fair market value of $25,000, and the securities have a fair market value of $20,000. Immediately prior to the sale of stock to E, if Y had sold Blackacre (its only asset the disposition of which would result in the recognition of ordinary income to D under section 1254), D would recognize $5,000 in ordinary income with respect to the stock sold under section 1254. D attaches a statement to D's tax return for 1997 detailing D's share of the fair market values and bases, and D's section 1254 costs with respect to Blackacre and Whiteacre. Therefore, upon the sale of stock to E, of the $7,500 gain recognized by D, $5,000 is ordinary income under this paragraph (c).

Example 3. Contribution of property prior to sale of S corporation stock as part of a plan to avoid recognition of ordinary income under section 1254. H owns all of the stock of Z, an S corporation. As of January 1, 1997, H has $3,000 of section 1254 costs with respect to property P, which is natural resource recapture property and Z's only asset. Property P has an adjusted basis of $5,000 and a fair market value of $8,000. H has a basis of $5,000 in Z stock, which has a fair market value of $8,000. On January 1, 1997, H contributes securities to Z which have a basis of $7,000 and a fair market value of $4,000. On April 15, 1997, H sells all of the Z stock to J for $12,000. On that date, H's adjusted basis in the Z stock is also $12,000. Based on all the facts and circumstances, the sale of stock is part of a plan (along with the contribution by H of the securities to Z) that has a principal purpose to avoid recognition of ordinary income under section 1254. Consequently, under paragraph (c)(2)(ii) of this section, H must recognize $3,000 as ordinary income under section 1254, the amount of ordinary income that H would recognize as ordinary income under section 1254 if property P were sold at fair market value. In addition, H reduces the amount realized on the sale of the stock ($12,000) by $3,000. As a result, H also recognizes a $3,000 capital loss on the sale of the stock ($9,000 amount realized less $12,000 adjusted basis).

(d) *Section 1254 costs of a shareholder.* An S corporation shareholder's section 1254 costs with respect to any natural resource recapture property held by the corporation include all of the shareholder's section 1254 costs with respect to the property in the hands of the S corporation. See §1.1254–1(b)(1) for the definition of section 1254 costs.

(e) *Section 1254 costs of an acquiring shareholder after certain acquisitions*—(1) *Basis determined under section 1012.* If stock in an S corporation that holds natural resource recapture property is acquired and the acquiring shareholder's basis for the stock is determined solely by reference to its cost (within the meaning of section 1012), the amount of section 1254 costs with respect to the property held by the corporation in the acquiring shareholder's hands is zero on the acquisition date.

(2) *Basis determined under section 1014(a).* If stock in an S corporation that holds natural resource recapture property is acquired from a decedent and the acquiring shareholder's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the stock on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), the amount of section 1254 costs with respect to the property held by the corporation in the acquiring shareholder's hands is zero on the acquisition date.

(3) *Basis determined under section 1014(b)(9).* If stock in an S corporation that holds natural resource recapture property is acquired before the death of the decedent, the amount of section 1254 costs with respect to the property held by the corporation in the acquiring shareholder's hands includes the amount, if any, of the section 1254 costs deducted by the acquiring shareholder before the decedent's death, to the extent that the basis of the stock (determined under section 1014(a)) is required to be reduced under section 1014(b)(9) (relating to adjustments to basis when the property is acquired before the death of the decedent).

(4) *Gifts and section 1041 transfers.* If stock is acquired in a transfer that is a gift, in a transfer that is a part sale or exchange and part gift, or in a transfer that is described in section 1041(a), the amount of section 1254 costs with respect to the property held by the corporation in the acquiring shareholder's hands immediately after the transfer is an amount equal to—

(i) The amount of section 1254 costs with respect to the property held by the corporation in the hands of the transferor immediately before the transfer; minus

(ii) The amount of any gain recognized as ordinary income under section 1254 by the transferor upon the transfer.

(f) *Special rules for a corporation that was formerly an S corporation or formerly a C corporation*—(1) *Section 1254 costs of an S corporation that was formerly a C corporation.* In the case of a C corporation that holds natural resource recapture property and that elects to be an S corporation, each shareholder's section 1254 costs as of the beginning of the corporation's first taxable year as an S corporation include a pro rata share of the section 1254 costs of the corporation as of the close of the last taxable year that the corporation was a C corporation.

(2) *Examples.* The following examples illustrate the application of the provisions of paragraph (f)(1) of this section:

Example 1. Sale of natural resource recapture property held by an S corporation that was formerly a C corporation—(i) Y is a C corporation that elects to be an S corporation effective January 1, 1997. On that date, Y owns Oil Well, which is natural resource recapture property and a capital asset. Y has section 1254 costs of $20,000 as of the close of the last taxable year that it was a C corporation. On January 1, 1997, Oil Well has a value of $200,000 and a basis of $100,000. Thus, under section 1374, Y's net unrealized built-in gain is $100,000. Also on that date, Y's basis in Oil Well is allocated to A, Y's sole shareholder, under section 613A(c)(11) and the section 1254 costs are allocated to A under paragraph (f)(1) of this section. In addition, A has a basis in A's Y stock of $100,000.

(ii) On November 1, 1997, Y sells Oil Well for $250,000. During 1997, Y has taxable income greater than $100,000, and no other transactions or items treated as recognized built-in gain or loss. Under section 1374, Y has net recognized built-in gain of $100,000. Assuming a tax rate of 35 percent on capital gain, Y has a tax of $35,000 under section 1374. The tax of $35,000 is treated as a capital loss under section 1366(f)(2). A has a realized gain on the sale of $150,000 ($250,000 minus $100,000) of which $20,000 is recognized as ordinary income under section 1254, and $130,000 is recognized as capital gain. Consequently, A recognizes ordinary income of $20,000 and net capital gain of $95,000 ($130,000 minus $35,000) on the sale.

Example 2. Sale of stock followed by sale of natural resource recapture property held by an S corporation that was formerly a C corporation—(i) Assume the same facts as in *Example 1*(i). On November 1, 1997, A sells all of A's Y stock to P for $250,000. A has a realized gain on the sale of $150,000 ($250,000 minus $100,000) of which $20,000 is recognized as ordinary income under section 1254, and $130,000 is recognized as capital gain.

(ii) On November 2, 1997, Y sells Oil Well for $250,000. During 1997, Y has taxable income greater than $100,000, and no other transactions or items treated as recognized built-in gain or loss. Under section 1374, Y has net recognized built-in gain of $100,000. Assuming a tax rate of 35 percent on capital gain, Y has a tax of $35,000 under section 1374. The tax of $35,000 is treated as a capital loss under section 1366(f)(2). P has a realized gain on the sale of $150,000 ($250,000 minus $100,000), which is recognized as capital gain. Consequently, P recognizes net capital gain of $115,000 ($150,000 minus $35,000) on the sale.

(3) *Section 1254 costs of a C corporation that was formerly an S corporation.* In the case of an S corporation that becomes a C corporation, the C corporation's section 1254 costs with respect to any natural resource recapture property held by the corporation as of the beginning of the corporation's first taxable year as a C corporation include the sum of its shareholders' section 1254 costs with respect to the property as of the close of the last taxable year that the corporation was an S corporation. In the case of an S termination year as defined in section 1362(e)(4), the shareholders' section 1254 costs are determined as of the close of the S short year as defined in section 1362(e)(1)(A). See paragraph (g)(5) of this section for rules on determining the aggregate amount of the shareholders' section 1254 costs.

(g) *Determination of a shareholder's section 1254 costs upon certain stock transactions*—(1) *Issuance of stock.* Upon an issuance of stock (whether such stock is newly-issued or had been held as treasury stock) by an S corporation in a reorganization described in section 368 or otherwise—

(i) Each recipient of shares must be allocated a pro rata share (determined solely with respect to the shares issued in the transaction) of the aggregate of the S corporation shareholders' section 1254 costs with respect to natural resource recapture property held by the S corporation immediately before the issuance (as determined pursuant to paragraph (g)(5) of this section); and

(ii) Each pre-existing shareholder must reduce his or her section 1254 costs with respect to natural resource recapture property held by the S corporation immediately before the issuance by an amount equal to the pre-existing shareholder's section 1254 costs immediately before the issuance multiplied by the percentage of stock of the corporation issued in the transaction.

(2) *Natural resource recapture property acquired in exchange for stock.* If natural resource recapture property is transferred to an S corporation in exchange for stock of the S corporation (for example, in a section 351 transaction, or in a reorganization described in section 368), the S corporation must allocate to

its shareholders a pro rata share of the S corporation's section 1254 costs with respect to the property immediately after the transaction (as determined under §1.1254–3(b)(1)).

(3) *Treatment of nonvested stock.* Stock issued in connection with the performance of services that is substantially nonvested (within the meaning of §1.83–3(b)) is treated as issued for purposes of this section at the first time it is treated as outstanding stock of the S corporation for purposes of section 1361.

(4) *Exception.* Paragraph (g)(1) of this section does not apply to stock issued in exchange for stock of the same S corporation (as for example, in a recapitalization described in section 368(a)(1)(E)).

(5) *Aggregate of S corporation shareholders' section 1254 costs with respect to natural resource recapture property held by the S corporation*—(i) *In general.* The aggregate of S corporation shareholders' section 1254 costs is equal to the sum of each shareholder's section 1254 costs. The S corporation must determine each shareholder's section 1254 costs under either paragraph (g)(5)(ii) (written data) or paragraph (g)(5)(iii) (assumptions) of this section. The S corporation may determine the section 1254 costs of some shareholders under paragraph (g)(5)(ii) of this section and of others under paragraph (g)(5)(iii) of this section.

(ii) *Written data.* An S corporation may determine a shareholder's section 1254 costs by using written data provided by a shareholder showing the shareholder's section 1254 costs with respect to natural resource recapture property held by the S corporation unless the S corporation knows or has reason to know that the written data is inaccurate. If an S corporation does not receive written data upon which it may rely, the S corporation must use the assumptions provided in paragraph (g)(5)(iii) of this section in determining a shareholder's section 1254 costs.

(iii) *Assumptions.* An S corporation that does not use written data pursuant to paragraph (g)(5)(ii) of this section to determine a shareholder's section 1254 costs must use the following assumptions to determine the shareholder's section 1254 costs—

(A) The shareholder deducted his or her share of the amount of deductions under sections 263(c), 616, and 617 in the first year in which the shareholder could claim a deduction for such amounts, unless in the case of expenditures under sections 263(c) or 616 the S corporation elected to capitalize such amounts;

(B) The shareholder was not subject to the following limitations with respect to the shareholder's depletion allowance under section 611, except to the extent a limitation applied at the corporate level: the taxable income limitation of section 613(a); the depletable quantity limitations of section 613A(c); or the limitations of sections 613A(d)(2), (3), and (4) (exclusion of retailers and refiners).

(6) *Examples.* The following examples illustrate the provisions of this paragraph (g):

Example 1. Transfer of natural resource recapture property to an S corporation in a section 351 transaction. As of January 1, 1997, A owns all the stock (20 shares) in X, an S corporation. X holds property that is not natural resource recapture property that has a fair market value of $2,000 and an adjusted basis of $2,000. On January 1, 1997, B transfers natural resource recapture property, Property P, to X in exchange for 80 shares of X stock in a transaction that qualifies under section 351. Property P has a fair market value of $8,000 and an adjusted basis of $5,000. Pursuant to section 351, B does not recognize gain on the transaction. Immediately prior to the transaction, B's section 1254 costs with respect to Property P equaled $6,000. Under §1.1254–2(c)(1), B does not recognize any gain under section 1254 on the section 351 transaction and, under §1.1254–3(b)(1), X's section 1254 costs with respect to Property P immediately after the contribution equal $6,000. Under paragraph (g)(2) of this section, each shareholder is allocated a pro rata share of X's section 1254 costs. The pro rata share of X's section 1254 costs that is allocated to A equals $1,200 (20 percent interest in X multiplied by X's $6,000 of section 1254 costs). The pro rata share of X's section 1254 costs that is allocated to B equals $4,800 (80 percent interest in X multiplied by X's $6,000 of section 1254 costs).

Example 2. Contribution of money in exchange for stock of an S corporation holding natural resource recapture property. As of January 1, 1997, A and B each own 50 percent of the stock (50 shares each) in X, an S corporation. X holds natural resource recapture property, Property P, which has a fair market value of $20,000 and an adjusted basis of

$14,000. A's and B's section 1254 costs with respect to Property P are $4,000 and $1,500, respectively. On January 1, 1997, C contributes $20,000 to X in exchange for 100 shares of X's stock. Under paragraph (g)(1)(i) of this section, X must allocate to C a pro rata share of its shareholders' section 1254 costs. Using the assumptions set forth in paragraph (g)(5)(iii) of this section, X determines that A's section 1254 costs with respect to natural resource recapture property held by X equal $4,500. Using written data provided by B, X determines that B's section 1254 costs with respect to Property P equal $1,500. Thus, the aggregate of X's shareholders' section 1254 costs equals $6,000. C's pro rata share of the $6,000 of section 1254 costs equals $3,000 (C's 50 percent interest in X multiplied by $6,000). Under paragraph (g)(1)(ii) of this section, A's section 1254 costs are reduced by $2,000 (A's actual section 1254 costs ($4,000) multiplied by 50 percent). B's section 1254 costs are reduced by $750 (B's actual section 1254 costs ($1,500) multiplied by 50 percent).

Example 3. Merger involving an S corporation that holds natural resource recapture property. X, an S corporation with one shareholder, A, holds as its sole asset natural resource recapture property that has a fair market value of $120,000 and an adjusted basis of $40,000. A has section 1254 costs with respect to the property of $60,000. For valid business reasons, X merges into Y, an S corporation with one shareholder, B, in a reorganization described in section 368(a)(1)(A). Y holds property that is not natural resource recapture property that has a fair market value of $120,000 and basis of $120,000. Under paragraph (c) of this section, A does not recognize ordinary income under section 1254 upon the exchange of stock in the merger because A did not otherwise recognize gain on the merger. Under paragraph (g)(2) of this section, Y must allocate to A and B a pro rata share of its $60,000 of section 1254 costs. Thus, A and B are each allocated $30,000 of section 1254 costs (50 percent interest in X, each, multiplied by $60,000).

[T.D. 8684, 61 FR 53063, Oct. 10, 1996]

§ 1.1254–5 Special rules for partnerships and their partners.

(a) *In general.* This section provides rules for applying the provisions of section 1254 to partnerships and their partners upon the disposition of natural resource recapture property by the partnership and certain distributions of property by a partnership. See section 751 and the regulations thereunder for rules concerning the treatment of gain upon the transfer of a partnership interest.

(b) *Determination of gain treated as ordinary income under section 1254 upon the disposition of natural resource recapture property by a partnership*—(1) *General rule.* Upon a disposition of natural resource recapture property by a partnership, the amount treated as ordinary income under section 1254 is determined at the partner level. Each partner must recognize as ordinary income under section 1254 the lesser of—

(i) The partner's section 1254 costs with respect to the property disposed of; or

(ii) The partner's share of the amount, if any, by which the amount realized upon the sale, exchange, or involuntary conversion, or the fair market value of the property upon any other disposition, exceeds the adjusted basis of the property.

(2) *Exception to partner level recapture in the case of abusive allocations.* Paragraph (b)(1) of this section does not apply in determining the amount treated as ordinary income under section 1254 upon a disposition of section 1254 property by a partnership if the partnership has allocated the amount realized or gain recognized from the disposition with a principal purpose of avoiding the recognition of ordinary income under section 1254. In such case, the amount of gain on the disposition recaptured as ordinary income under section 1254 is determined at the partnership level.

(3) *Examples.* The provisions of paragraphs (a) and (b) of this section are illustrated by the following examples which assume that capital accounts are maintained in accordance with section 704(b) and the regulations thereunder:

Example 1. Partner level recapture—In general. A, B, and C, have equal interests in capital in Partnership ABC that was formed on January 1, 1985. The partnership acquired an undeveloped domestic oil property on January 1, 1985, for $120,000. The partnership allocated the property's basis to each partner in proportion to the partner's interest in partnership capital, so each partner was allocated $40,000 of basis. In 1985, the partnership incurred $60,000 of productive well intangible drilling and development costs with respect to the property. The partnership elected to deduct the intangible drilling and development costs as expenses under section 263(c). Each partner deducted $20,000 of the intangible drilling and development costs. Assume that depletion allowable under section

613A(c)(7)(D) for each partner for 1985 was $10,000. On January 1, 1986, the partnership sold the oil property to an unrelated third party for $210,000. Each partner's allocable share of the amount realized is $70,000. Each partner's basis in the oil property at the end of 1985 is $30,000 ($40,000 cost—$10,000 depletion deductions claimed). Each partner has a gain of $40,000 on the sale of the oil property ($70,000 amount realized—$30,000 adjusted basis in the oil property). Assume that each partner's depletion allowance would not have been increased if the intangible drilling and development costs had been capitalized. Each partner's section 1254 costs with respect to the property are $20,000. Thus, A, B, and C each must treat $20,000 of gain recognized as ordinary income under section 1254(a).

Example 2. Special allocation of intangible drilling and development costs. K and L form a partnership on January 1, 1997, to acquire and develop a geothermal property as defined under section 613(e)(2). The partnership agreement provides that all intangible drilling and development costs will be allocated to partner K, and that all other items of income, gain, or loss will be allocated equally between the two partners. Assume these allocations have substantial economic effect under section 704(b) and the regulations thereunder. The partnership acquires a lease covering undeveloped acreage located in the United States for $50,000. In 1997, the partnership incurs $50,000 of intangible drilling and development costs that are allocated to partner K. The partnership also has $30,000 of depletion deductions, which are allocated equally between K and L. On January 1, 1998, the partnership sells the geothermal property to an unrelated third party for $160,000 and recognizes a gain of $140,000 ($160,000 amount realized less $20,000 adjusted basis ($50,000 unadjusted basis less $30,000 depletion deductions)). This gain is allocated equally between K and L. Because K's section 1254 costs are $65,000 and L's section 1254 costs are $15,000, K recognizes $65,000 as ordinary income under section 1254(a) and L recognizes $15,000 as ordinary income under section 1254(a). The remaining $5,000 of gain allocated to K and $55,000 of gain allocated to L is characterized without regard to section 1254.

Example 3. Section 59(e) election to capitalize intangible drilling and development costs. Partnership DK has 50 equal partners. On January 1, 1995, the partnership purchases an undeveloped oil and gas property for $100,000. The partnership allocates the property's basis equally among the partners, so each partner is allocated $2,000 of basis. In January 1995, the partnership incurs $240,000 of intangible drilling and development costs with respect to the property. The partnership elects to deduct the intangible drilling and development costs as expenses under section 263(c). Each partner is allocated $4,800 of intangible drilling and development costs. One of the partners, H, elects under section 59(e) to capitalize his $4,800 share of intangible drilling and development costs. Therefore, H is permitted to amortize his $4,800 share of intangible drilling and development costs over 60 months. H takes a $960 amortization deduction in 1995. Each of the remaining 49 partners deducts his $4,800 share of intangible drilling and development costs in 1995. Assume that depletion allowable for each partner under section 613A(c)(7)(D) for 1995 is $1,000. On December 31, 1995, the partnership sells the property for $300,000. Each partner is allocated $6,000 of amount realized. Each partner that deducted the intangible drilling and development costs has a basis in the oil property at the end of 1995 of $1,000 ($2,000 cost − $1,000 depletion deductions claimed). Each of these partners has a gain of $5,000 on the sale of the oil property ($6,000 amount realized − $1,000 adjusted basis in the property). The section 1254 costs of each partner that deducted intangible drilling and development costs are $5,800 ($4,800 intangible drilling and development costs deducted + $1,000 depletion deductions claimed). Because each partner's section 1254 costs ($5,800) exceed each partner's share of amount realized less each partner's adjusted basis ($5,000), each partner must treat his $5,000 gain recognized on the sale of the oil property as ordinary income under section 1254(a). Because H elected under section 59(e) to capitalize the $4,800 of intangible drilling and development costs and amortized only $960 of the costs in 1995, the $3,840 of unamortized intangible drilling and development costs are included in H's basis in the oil property. Therefore, at the end of 1995 H's basis in the oil property is $4,840 (($2,000 cost + $4,800 capitalized intangible drilling and development costs) − ($960 intangible drilling and development costs amortized + $1,000 depletion deduction claimed)). H's gain on the sale of the oil property is $1,160 ($6,000 amount realized − $4,840 adjusted basis). H's section 1254 costs are $1,960 ($960 intangible drilling and development costs amortized + $1,000 depletion deductions claimed). Because H's section 1254 costs ($1,960) exceed H's share of amount realized less H's adjusted basis ($1,160), H must treat the $1,160 of gain recognized as ordinary income under section 1254(a).

(c) *Section 1254 costs of a partner*—(1) *General rule.* A partner's section 1254 costs with respect to property held by a partnership include all of the partner's section 1254 costs with respect to the property in the hands of the partnership. In the case of property contributed to a partnership in a transaction described in section 721, a partner's section 1254 costs include all of the partner's section 1254 costs with respect to the property prior to contribution. Section 1.1254–1(b)(1)(iv), which provides rules concerning the treatment of suspended deductions, applies to amounts not deductible pursuant to section 704(d).

(2) *Section 1254 costs of a transferee partner after certain acquisitions*—(i) *Basis determined under section 1012.* If a person acquires an interest in a partnership that holds natural resource recapture property (transferee partner) and the transferee partner's basis for the interest is determined by reference to its cost (within the meaning of section 1012), the amount of the transferee partner's section 1254 costs with respect to the property held by the partnership is zero on the acquisition date.

(ii) *Basis determined by reason of the application of section 1014(a).* If a transferee partner acquires an interest in a partnership that holds natural resource recapture property from a decedent and the transferee partner's basis is determined, by reason of the application of section 1014(a), solely by reference to the fair market value of the partnership interest on the date of the decedent's death or on the applicable date provided in section 2032 (relating to alternate valuation date), the amount of the transferee partner's section 1254 costs with respect to property held by the partnership is zero on the acquisition date.

(iii) *Basis determined by reason of the application of section 1014(b)(9).* If an interest in a partnership that holds natural resource recapture property is acquired before the death of the decedent, the amount of the transferee partner's section 1254 costs with respect to property held by the partnership shall include the amount, if any, of the section 1254 costs deducted by the transferee partner before the decedent's death, to the extent that the basis of the partner's interest (determined under section 1014(a)) is required to be reduced under section 1014(b)(9) (relating to adjustments to basis when the property is acquired before the death of the decedent).

(iv) *Gifts and section 1041 transfers.* If an interest in a partnership is transferred in a transfer that is a gift, a part sale or exchange and part gift, or a transfer that is described in section 1041(a), the amount of the transferee partner's section 1254 costs with respect to property held by the partnership immediately after the transfer is an amount equal to—

(A) The amount of the transferor partner's section 1254 costs with respect to the property immediately before the transfer; minus

(B) The amount of any gain recognized as ordinary income under section 1254 by the transferor partner upon the transfer.

(d) *Property distributed to a partner*—(1) *In general.* The section 1254 costs for any natural resource recapture property received by a partner in a distribution with respect to part or all of an interest in a partnership include—

(i) The aggregate of the partners' section 1254 costs with respect to the natural resource recapture property immediately prior to the distribution; reduced by

(ii) The amount of any gain taken into account as ordinary income under section 751 by the partnership or the partners (as constituted after the distribution) on the distribution of the natural resource recapture property.

(2) *Aggregate of partners' section 1254 costs with respect to natural resource recapture property held by a partnership*—(i) *In general.* The aggregate of partners' section 1254 costs is equal to the sum of each partner's section 1254 costs. The partnership must determine each partner's section 1254 costs under either paragraph (d)(2)(i)(A) (written data) or paragraph (d)(2)(i)(B) (assumptions) of this section. The partnership may determine the section 1254 costs of some of the partners under paragraph (d)(2)(i)(A) of this section and of others under paragraph (d)(2)(i)(B) of this section.

(A) *Written data.* A partnership may determine a partner's section 1254 costs by using written data provided by a partner showing the partner's section 1254 costs with respect to natural resource recapture property held by the partnership unless the partnership knows or has reason to know that the written data is inaccurate. If a partnership does not receive written data upon which it may rely, the partnership must use the assumptions provided in paragraph (d)(2)(i)(B) of this section in determining a partner's section 1254 costs.

(B) *Assumptions.* A partnership that does not use written data pursuant to paragraph (d)(2)(i)(A) of this section to determine a partner's section 1254 costs must use the following assumptions to determine the partner's section 1254 costs:

(*1*) The partner deducted his or her share of deductions under section 263(c), 616, or 617 for the first year in which the partner could claim a deduction for such amounts, unless in the case of expenditures under section 263(c) or 616, the partnership elected to capitalize such amounts;

(*2*) The partner was not subject to the following limitations with respect to the partner's depletion allowance under section 611, except to the extent a limitation applied at the partnership level: the taxable income limitation of section 613(a); the depletable quantity limitations of section 613A(c); or the limitations of section 613A(d)(2), (3), and (4) (exclusion of retailers and refiners).

[T.D. 8586, 60 FR 2507, Jan. 10, 1995]

§1.1254–6 Effective date of regulations.

Sections 1.1254–1 through 1.1254–3 and §1.1254–5 are effective with respect to any disposition of natural resource recapture property occurring after March 13, 1995. The rule in §1.1254–1(b)(2)(iv)(A)(*2*), relating to a nonoperating mineral interest carved out of an operating mineral interest with respect to which an expenditure has been deducted, is effective with respect to any disposition occurring after March 13, 1995 of property (within the meaning of section 614) that is placed in service by the taxpayer after December 31, 1986. Section 1.1254–4 applies to dispositions of natural resource recapture property by an S corporation (and a corporation that was formerly an S corporation) and dispositions of S corporation stock occurring on or after October 10, 1996. Sections 1.1254–2(d)(1)(ii) and 1.1254–3 (b)(1) (i) and (ii) and (d)(1) (i) and (ii) are effective for dispositions of property occurring on or after October 10, 1996.

[T.D. 8586, 60 FR 2508, Jan. 10, 1995, as amended by T.D. 8684, 61 FR 53066, Oct. 10, 1996]

§1.1256(e)–1 Identification of hedging transactions.

(a) *Identification and recordkeeping requirements.* Under section 1256(e)(2)(C), a taxpayer that enters into a hedging transaction must identify the transaction as a hedging transaction before the close of the day on which the taxpayer enters into the transaction.

(b) *Requirements for identification.* The identification of a hedging transaction for purposes of section 1256(e)(2)(C) must satisfy the requirements of §1.1221–2(e)(1). Solely for purposes of section 1256(f)(1), however, an identification that does not satisfy all of the requirements of §1.1221–2(e)(1) is nevertheless treated as an identification under section 1256(e)(2)(C).

(c) *Consistency with §1.1221–2.* Any identification for purposes of §1.1221–2(e)(1) is also an identification for purposes of this section. If a taxpayer satisfies the requirements of paragraph (f)(1)(ii) of §1.1221–2, the transaction is treated as if it were not identified as a hedging transaction for purposes of section 1256(e)(2)(C).

(d) *Effective date.* This section applies to transactions entered into on or after October 1, 1994.

[T.D. 8555, 59 FR 36367, July 18, 1994]

§1.1258–1 Netting rule for certain conversion transactions.

(a) *Purpose.* The purpose of this section is to provide taxpayers with a method to net certain gains and losses from positions of the same conversion transaction before determining the amount of gain treated as ordinary income under section 1258(a).

(b) *Netting of gain and loss for identified transactions*—(1) *In general.* If a taxpayer disposes of or terminates all the positions of an identified netting transaction (as defined in paragraph (b)(2) of this section) within a 14-day period in a single taxable year, all gains and losses on those positions taken into account for Federal tax purposes within that period (other than built-in losses as defined in paragraph (c) of this section) are netted solely for purposes of determining the amount of gain treated as ordinary income under section 1258(a). For purposes of the preceding sentence, a taxpayer is treated as disposing of any position that is treated as sold under any provision of the Code or regulations thereunder (for example, under section 1256(a)(1)).

(2) *Identified netting transaction.* For purposes of this section, an identified netting transaction is a conversion transaction (as defined in section 1258(c)) that the taxpayer identifies as an identified netting transaction on its books and records. Identification of each position of the conversion transaction must be made before the close of the day on which the position becomes part of the conversion transaction. No particular form of identification is necessary, but all the positions of a single conversion transaction must be identified as part of the same transaction and must be distinguished from all other positions.

(c) *Definition of built-in loss.* For purposes of this section, built-in loss means—

(1) Built-in loss as defined in section 1258(d)(3)(B); and

(2) If a taxpayer realizes gain or loss on any one position of a conversion transaction (for example, under section 1256), as of the date that gain or loss is realized, any unrecognized loss in any other position of the conversion transaction that is not disposed of, terminated, or treated as sold under any provision of the Code or regulations thereunder within 14 days of and within the same taxable year as the realization event.

(d) *Examples.* These examples illustrate this section:

Example 1. Identified netting transaction with simultaneous actual dispositions. (i) On December 1, 1995, A purchases 1,000 shares of XYZ stock for $100,000 and enters into a forward contract to sell 1,000 shares of XYZ stock on November 30, 1997, for $110,000. The XYZ stock is actively traded as defined in § 1.1092(d)–1(a) and is a capital asset in A's hands. A maintains books and records on which, on December 1, 1995, it identifies the two positions as all the positions of a single conversion transaction. A owns no other XYZ stock. On December 1, 1996, when the applicable imputed income amount for the transaction is $7,000, A sells the 1,000 shares of XYZ stock for $95,000. On the same day, A terminates its forward contract with its counterparty, receiving $10,200. No dividends were received on the stock during the time it was part of the conversion transaction.

(ii) The XYZ stock and forward contract are positions of a conversion transaction. Under section 1258(c)(1), substantially all of A's expected return from the overall transaction is attributable to the time value of the net investment in the transaction. Under section 1258(c)(2)(B), the transaction is an applicable straddle as defined in section 1258(d)(1).

(iii) A disposed of or terminated all the positions of the conversion transaction within 14 days and within the same taxable year as required by paragraph (b)(1) of this section. The transaction is an identified netting transaction because it meets the identification requirement of paragraph (b)(2) of this section. Solely for purposes of section 1258(a), the $5,000 loss realized ($100,000 basis less $95,000 amount realized) on the disposition of the XYZ stock is netted against the $10,200 gain recognized on the disposition of the forward contract. Thus, the net gain from the conversion transaction for purposes of section 1258(a) is $5,200 ($10,200 gain less $5,000 loss). Only the $5,200 net gain is recharacterized as ordinary income under section 1258(a) even though the applicable imputed income amount is $7,000. For Federal tax purposes other than section 1258(a), A has recognized a $10,200 gain on the disposition of the forward contract ($5,200 of which is treated as ordinary income) and realized a separate $5,000 loss on the sale of the XYZ stock.

Example 2. Identified netting transaction with built-in loss. (i) The facts are the same as in *Example 1,* except that A had purchased the XYZ stock for $104,000 on May 15, 1995. The XYZ stock had a fair market value of $100,000 on December 1, 1995, the date it became part of a conversion transaction.

(ii) The results are the same as in *Example 1,* except that A has built-in loss (in addition to the $5,000 loss that arose economically during the period of the conversion transaction), as defined in section 1258(d)(3)(B), of $4,000 on the XYZ stock. That $4,000 built-in loss is not netted against the $10,200 gain on the forward contract for purposes of section 1258(a). Thus, the net gain from the conversion transaction for purposes of section 1258(a) is $5,200, the same as in *Example 1.* The $4,000 built-in loss is recognized and has a character determined without regard to section 1258.

(e) *Effective date and transition rule*—(1) *In general.* These regulations are effective for conversion transactions that are outstanding on or after December 21, 1995.

(2) *Transition rule for identification requirements.* In the case of a conversion transaction entered into before February 20, 1996, paragraph (b)(2) of this section is treated as satisfied if the identification is made before the close of business on February 20, 1996.

[T.D. 8649, 60 FR 66084, Dec. 21, 1995]

§1.1271–0 Original issue discount; effective date; table of contents.

(a) *Effective date.* Except as otherwise provided, §§1.1271–1 through 1.1275–5 apply to debt instruments issued on or after April 4, 1994. Taxpayers, however, may rely on these sections (as contained in 26 CFR part 1 revised April 1, 1996) for debt instruments issued after December 21, 1992, and before April 4, 1994.

(b) *Table of contents.* This section lists captioned paragraphs contained in §§1.1271–1 through 1.1275–7T.

§1.1271–1 Special rules applicable to amounts received on retirement, sale, or exchange of debt instruments.

(a) Intention to call before maturity.
(1) In general.
(2) Exceptions.
(b) Short-term obligations.
(1) In general.
(2) Method of making elections.
(3) Counting conventions.

§1.1272–1 Current inclusion of OID in income.

(a) Overview.
(1) In general.
(2) Debt instruments not subject to OID inclusion rules.
(b) Accrual of OID.
(1) Constant yield method.
(2) Exceptions.
(3) Modifications.
(4) Special rules for determining the OID allocable to an accrual period.
(c) Yield and maturity of certain debt instruments subject to contingencies.
(1) Applicability.
(2) Payment schedule that is significantly more likely than not to occur.
(3) Mandatory sinking fund provision.
(4) Consistency rule. [Reserved]
(5) Treatment of certain options.
(6) Subsequent adjustments.
(7) Effective date.
(d) Certain debt instruments that provide for a fixed yield.
(e) Convertible debt instruments.
(f) Special rules to determine whether a debt instrument is a short-term obligation.
(1) Counting of either the issue date or maturity date.
(2) Coordination with paragraph (c) of this section for certain sections of the Internal Revenue Code.
(g) Basis adjustment.
(h) Debt instruments denominated in a currency other than the U.S. dollar.
(i) [Reserved]
(j) Examples.

§1.1272–2 Treatment of debt instruments purchased at a premium.

(a) In general.
(b) Definitions and special rules.
(1) Purchase.
(2) Premium.
(3) Acquisition premium.
(4) Acquisition premium fraction.
(5) Election to accrue discount on a constant yield basis.
(6) Special rules for determining basis.
(c) Examples.

§1.1272–3 Election by a holder to treat all interest on a debt instrument as OID.

(a) Election.
(b) Scope of election.
(1) In general.
(2) Exceptions, limitations, and special rules.
(c) Mechanics of the constant yield method.
(1) In general.
(2) Special rules to determine adjusted basis.
(d) Time and manner of making the election.
(e) Revocation of election.
(f) Effective date.

§1.1273–1 Definition of OID.

(a) In general.
(b) Stated redemption price at maturity.
(c) Qualified stated interest.
(1) Definition.
(2) Debt instruments subject to contingencies.
(3) Variable rate debt instrument.
(4) Stated interest in excess of qualified stated interest.
(5) Short-term obligations.
(d) De minimis OID.
(1) In general.
(2) De minimis amount.
(3) Installment obligations.
(4) Special rule for interest holidays, teaser rates, and other interest shortfalls.
(5) Treatment of de minimis OID by holders.
(e) Definitions.
(1) Installment obligation.
(2) Self-amortizing installment obligation.
(3) Weighted average maturity.
(f) Examples.

§1.1273–2 Determination of issue price and issue date.

(a) Debt instruments issued for money.

(1) Issue price.
(2) Issue date.
(b) Publicly traded debt instruments issued for property.
(1) Issue price.
(2) Issue date.
(c) Debt instruments issued for publicly traded property.
(1) Issue price.
(2) Issue date.
(d) Other debt instruments.
(1) Issue price.
(2) Issue date.
(e) Special rule for certain sales to bond houses, brokers, or similar persons.
(f) Traded on an established market (publicly traded).
(1) In general.
(2) Exchange listed property.
(3) Market traded property.
(4) Property appearing on a quotation medium.
(5) Readily quotable debt instruments.
(6) Effect of certain temporary restrictions on trading.
(7) Convertible debt instruments.
(g) Treatment of certain cash payments incident to lending transactions.
(1) Applicability.
(2) Payments from borrower to lender.
(3) Payments from lender to borrower.
(4) Payments between lender and third party.
(5) Examples.
(h) Investment units.
(1) In general.
(2) Consistent allocation by holders and issuer.
(i) [Reserved]
(j) Convertible debt instruments.
(k) Below-market loans subject to section 7872(b).
(l) [Reserved]
(m) Treatment of amounts representing pre-issuance accrued interest.
(1) Applicability.
(2) Exclusion of pre-issuance accrued interest from issue price.
(3) Example.

§ 1.1274–1 Debt instruments to which section 1274 applies.

(a) In general.
(b) Exceptions.
(1) Debt instrument with adequate stated interest and no OID .
(2) Exceptions under sections 1274(c)(1)(B), 1274(c)(3), 1274A(c), and 1275(b)(1).
(3) Other exceptions to section 1274.
(c) Examples.

§ 1.1274–2 Issue price of debt instruments to which section 1274 applies.

(a) In general.
(b) Issue price.
(1) Debt instruments that provide for adequate stated interest; stated principal amount.
(2) Debt instruments that do not provide for adequate stated interest; imputed principal amount.
(3) Debt instruments issued in a potentially abusive situation; fair market value.
(c) Determination of whether a debt instrument provides for adequate stated interest.
(1) In general.
(2) Determination of present value.
(d) Treatment of certain options.
(e) Mandatory sinking funds.
(f) Treatment of variable rate debt instruments.
(1) Stated interest at a qualified floating rate.
(2) Stated interest at a single objective rate.
(g) Treatment of contingent payment debt instruments.
(h) Examples.
(i) [Reserved]
(j) Special rules for tax-exempt obligations.
(1) Certain variable rate debt instruments.
(2) Contingent payment debt instruments.
(3) Effective date.

§ 1.1274–3 Potentially abusive situations defined.

(a) In general.
(b) Operating rules.
(1) Debt instrument exchanged for nonrecourse financing.
(2) Nonrecourse debt with substantial down payment.
(3) Clearly excessive interest.
(c) Other situations to be specified by Commissioner.
(d) Consistency rule.

§ 1.1274–4 Test rate.

(a) Determination of test rate of interest.
(1) In general.
(2) Test rate for certain debt instruments.
(b) Applicable Federal rate.
(c) Special rules to determine the term of a debt instrument for purposes of determining the applicable Federal rate.
(1) Installment obligations.
(2) Certain variable rate debt instruments.
(3) Counting of either the issue date or the maturity date.
(4) Certain debt instruments that provide for principal payments uncertain as to time.
(d) Foreign currency loans.
(e) Examples.

§ 1.1274–5 Assumptions.

(a) In general.
(b) Modifications of debt instruments.
(1) In general.
(2) Election to treat buyer as modifying the debt instrument.
(c) Wraparound indebtedness.

(d) Consideration attributable to assumed debt.

§1.1274A–1 Special rules for certain transactions where stated principal amount does not exceed $2,800,000.

(a) In general.
(b) Rules for both qualified and cash method debt instruments.
(1) Sale-leaseback transactions.
(2) Debt instruments calling for contingent payments.
(3) Aggregation of transactions.
(4) Inflation adjustment of dollar amounts.
(c) Rules for cash method debt instruments.
(1) Time and manner of making cash method election.
(2) Successors of electing parties.
(3) Modified debt instrument.
(4) Debt incurred or continued to purchase or carry a cash method debt instrument.

§1.1275–1 Definitions.

(a) Applicability.
(b) Adjusted issue price.
(1) In general.
(2) Adjusted issue price for subsequent holders.
(c) OID.
(d) Debt instrument.
(e) Tax-exempt obligations.
(f) Issue.
(g) Debt instruments issued by a natural person.
(h) Publicly offered debt instrument.
(i) [Reserved]
(j) Life annuity exception under section 1275(a)(1)(B)(i).
(1) Purpose.
(2) General rule.
(3) Availability of a cash surrender option.
(4) Availability of a loan secured by the contract.
(5) Minimum payout provision.
(6) Maximum payout provision.
(7) Decreasing payout provision.
(8) Effective dates.

§1.1275–2 Special rules relating to debt instruments.

(a) Payment ordering rule.
(1) In general.
(2) Exceptions.
(b) Debt instruments distributed by corporations with respect to stock.
(1) Treatment of distribution.
(2) Issue date.
(c) Aggregation of debt instruments.
(1) General rule.
(2) Exception if separate issue price established.
(3) Special rule for debt instruments that provide for the issuance of additional debt instruments.
(4) Examples.
(d) Special rules for Treasury securities.
(1) Issue price and issue date.
(2) Reopenings of Treasury securities.
(e) Disclosure of certain information to holders.
(f) Treatment of pro rata prepayments.
(1) Treatment as retirement of separate debt instrument.
(2) Definition of pro rata prepayment.
(g) Anti-abuse rule.
(1) In general.
(2) Unreasonable result.
(3) Examples.
(4) Effective date.
(h) Remote and incidental contingencies.
(1) In general.
(2) Remote contingencies.
(3) Incidental contingencies.
(4) Aggregation rule.
(5) Consistency rule.
(6) Subsequent adjustments.
(7) Effective date.
(i) [Reserved]
(j) Treatment of certain modifications.

§1.1275–3 OID information reporting requirements.

(a) In general.
(b) Information required to be set forth on face of debt instruments that are not publicly offered.
(1) In general.
(2) Time for legending.
(3) Legend must survive reissuance upon transfer.
(4) Exceptions.
(c) Information required to be reported to Secretary upon issuance of publicly offered debt instruments.
(1) In general.
(2) Time for filing information return.
(3) Exceptions.
(d) Application to foreign issuers and U.S. issuers of foreigntargeted debt instruments.
(e) Penalties.
(f) Effective date.

§1.1275–4 Contingent payment debt instruments.

(a) Applicability.
(1) In general.
(2) Exceptions.
(3) Insolvency and default.
(4) Convertible debt instruments.
(5) Remote and incidental contingencies.
(b) Noncontingent bond method.
(1) Applicability.
(2) In general.
(3) Description of method.
(4) Comparable yield and projected payment schedule.
(5) Qualified stated interest.
(6) Adjustments.
(7) Adjusted issue price, adjusted basis, and retirement.
(8) Character on sale, exchange, or retirement.
(9) Operating rules.

(c) Method for debt instruments not subject to the noncontingent bond method.
(1) Applicability.
(2) Separation into components.
(3) Treatment of noncontingent payments.
(4) Treatment of contingent payments.
(5) Basis different from adjusted issue price.
(6) Treatment of a holder on sale, exchange, or retirement.
(7) Examples.
(d) Rules for tax-exempt obligations.
(1) In general.
(2) Certain tax-exempt obligations with interest-based or revenue-based payments
(3) All other tax-exempt obligations.
(4) Basis different from adjusted issue price.
(e) Amounts treated as interest under this section.
(f) Effective date.

§ 1.1275–5 Variable rate debt instruments.

(a) Applicability.
(1) In general.
(2) Principal payments.
(3) Stated interest.
(4) Current value.
(5) No contingent principal payments.
(6) Special rule for debt instruments issued for nonpublicly traded property.
(b) Qualified floating rate.
(1) In general.
(2) Certain rates based on a qualified floating rate.
(3) Restrictions on the stated rate of interest.
(c) Objective rate.
(1) Definition.
(2) Other objective rates to be specified by Commissioner.
(3) Qualified inverse floating rate.
(4) Significant front-loading or back-loading of interest.
(5) Tax-exempt obligations.
(d) Examples.
(e) Qualified stated interest and OID with respect to a variable rate debt instrument.
(1) In general.
(2) Variable rate debt instrument that provides for annual payments of interest at a single variable rate.
(3) All other variable rate debt instruments except for those that provide for a fixed rate.
(4) Variable rate debt instrument that provides for a single fixed rate.
(f) Special rule for certain reset bonds.

§ 1.1275–6 Integration of qualifying debt instruments.

(a) In general.
(b) Definitions.
(1) Qualifying debt instrument.
(2) Section 1.1275–6 hedge.
(3) Financial instrument.
(4) Synthetic debt instrument.
(c) Integrated transaction.
(1) Integration by taxpayer.
(2) Integration by Commissioner.
(d) Special rules for legging into and legging out of an integrated transaction.
(1) Legging into.
(2) Legging out.
(e) Identification requirements.
(f) Taxation of integrated transactions.
(1) General rule.
(2) Issue date.
(3) Term.
(4) Issue price.
(5) Adjusted issue price.
(6) Qualified stated interest.
(7) Stated redemption price at maturity.
(8) Source of interest income and allocation of expense.
(9) Effectively connected income.
(10) Not a short-term obligation.
(11) Special rules in the event of integration by the Commissioner.
(12) Retention of separate transaction rules for certain purposes.
(13) Coordination with consolidated return rules.
(g) Predecessors and successors.
(h) Examples.
(i) [Reserved]
(j) Effective date.

§ 1.1275–7T Inflation-indexed debt instruments (temporary).

(a) Overview.
(b) Applicability.
(1) In general.
(2) Exceptions.
(c) Definitions.
(1) Inflation-indexed debt instrument.
(2) Reference index.
(3) Qualified inflation index.
(4) Inflation-adjusted principal amount.
(5) Minimum guarantee payment.
(d) Coupon bond method.
(1) In general.
(2) Applicability.
(3) Qualified stated interest.
(4) Inflation adjustments.
(5) Example.
(e) Discount bond method.
(1) In general.
(2) No qualified stated interest.
(3) OID.
(4) Example.
(f) Special rules.
(1) Deflation adjustments.
(2) Adjusted basis.
(3) Subsequent holders.
(4) Minimum guarantee.
(5) Temporary unavailability of a qualified inflation index.
(g) Reopenings.
(h) Effective date.

[T.D. 8517, 59 FR 4808, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30139, June 14, 1996; T.D. 8709, 62 FR 617, Jan. 6, 1997; T.D. 8754, 63 FR 1057, Jan. 8, 1998]

§1.1271–1 Special rules applicable to amounts received on retirement, sale, or exchange of debt instruments.

(a) *Intention to call before maturity*—(1) *In general.* For purposes of section 1271(a)(2), all or a portion of gain realized on a sale or exchange of a debt instrument to which section 1271 applies is treated as interest income if there was an intention to call the debt instrument before maturity. An intention to call a debt instrument before maturity means a written or oral agreement or understanding not provided for in the debt instrument between the issuer and the original holder of the debt instrument that the issuer will redeem the debt instrument before maturity. In the case of debt instruments that are part of an issue, the agreement or understanding must be between the issuer and the original holders of a substantial amount of the debt instruments in the issue. An intention to call before maturity can exist even if the intention is conditional (e.g., the issuer's decision to call depends on the financial condition of the issuer on the potential call date) or is not legally binding. For purposes of this section, original holder means the first holder (other than an underwriter or dealer that purchased the debt instrument for resale in the ordinary course of its trade or business).

(2) *Exceptions.* In addition to the exceptions provided in sections 1271(a)(2)(B) and 1271(b), section 1271(a)(2) does not apply to—

(i) A debt instrument that is publicly offered (as defined in §1.1275–1(h));

(ii) A debt instrument to which section 1272(a)(6) applies (relating to certain interests in or mortgages held by a REMIC, and certain other debt instruments with payments subject to acceleration); or

(iii) A debt instrument sold pursuant to a private placement memorandum that is distributed to more than ten offerees and that is subject to the sanctions of section 12(2) of the Securities Act of 1933 (15 U.S.C. 77l) or the prohibitions of section 10(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78j).

(b) *Short-term obligations*—(1) *In general.* Under sections 1271 (a)(3) and (a)(4), all or a portion of the gain realized on the sale or exchange of a short-term government or nongovernment obligation is treated as interest income. Sections 1271 (a)(3) and (a)(4), however, do not apply to any short-term obligation subject to section 1281. See §1.1272–1(f) for rules to determine if an obligation is a short-term obligation.

(2) *Method of making elections.* Elections to accrue on a constant yield basis under sections 1271 (a)(3)(E) and (a)(4)(D) are made on an obligation-by-obligation basis by reporting the transaction on the basis of daily compounding on the taxpayer's timely filed Federal income tax return for the year of the sale or exchange. These elections are irrevocable.

(3) *Counting conventions.* In computing the ratable share of acquisition discount under section 1271(a)(3) or OID under section 1271(a)(4), any reasonable counting convention may be used (e.g., 30 days per month/360 days per year).

[T.D. 8517, 59 FR 4809, Feb. 2, 1994]

§1.1272–1 Current inclusion of OID in income.

(a) *Overview*—(1) *In general.* Under section 1272(a)(1), a holder of a debt instrument includes accrued OID in gross income (as interest), regardless of the holder's regular method of accounting. A holder includes qualified stated interest (as defined in §1.1273–1(c)) in income under the holder's regular method of accounting. See §§1.446–2 and 1.451–1.

(2) *Debt instruments not subject to OID inclusion rules.* Sections 1272(a)(2) and 1272(c) list exceptions to the general inclusion rule of section 1272(a)(1). For purposes of section 1272(a)(2)(E) (relating to certain loans between natural persons), a loan does not include a stripped bond or stripped coupon within the meaning of section 1286(e), and the rule in section 1272(a)(2)(E)(iii), which treats a husband and wife as 1 person, does not apply to loans made between a husband and wife.

(b) *Accrual of OID*—(1) *Constant yield method.* Except as provided in paragraphs (b)(2) and (b)(3) of this section, the amount of OID includible in the income of a holder of a debt instrument for any taxable year is determined using the constant yield method as described under this paragraph (b)(1).

(i) *Step one: Determine the debt instrument's yield to maturity.* The yield to maturity or yield of a debt instrument is the discount rate that, when used in computing the present value of all principal and interest payments to be made under the debt instrument, produces an amount equal to the issue price of the debt instrument. The yield must be constant over the term of the debt instrument and, when expressed as a percentage, must be calculated to at least two decimal places. See paragraph (c) of this section for rules relating to the yield of certain debt instruments subject to contingencies.

(ii) *Step two: Determine the accrual periods.* An accrual period is an interval of time over which the accrual of OID is measured. Accrual periods may be of any length and may vary in length over the term of the debt instrument, provided that each accrual period is no longer than 1 year and each scheduled payment of principal or interest occurs either on the final day of an accrual period or on the first day of an accrual period. In general, the computation of OID is simplest if accrual periods correspond to the intervals between payment dates provided by the terms of the debt instrument. In computing the length of accrual periods, any reasonable counting convention may be used (e.g., 30 days per month/360 days per year).

(iii) *Step three: Determine the OID allocable to each accrual period.* Except as provided in paragraph (b)(4) of this section, the OID allocable to an accrual period equals the product of the adjusted issue price of the debt instrument (as defined in § 1.1275–1(b)) at the beginning of the accrual period and the yield of the debt instrument, less the amount of any qualified stated interest allocable to the accrual period. In performing this calculation, the yield must be stated appropriately taking into account the length of the particular accrual period. *Example 1* in paragraph (j) of this section provides a formula for converting a yield based upon an accrual period of one length to an equivalent yield based upon an accrual period of a different length.

(iv) *Step four: Determine the daily portions of OID.* The daily portions of OID are determined by allocating to each day in an accrual period the ratable portion of the OID allocable to the accrual period. The holder of the debt instrument includes in income the daily portions of OID for each day during the taxable year on which the holder held the debt instrument.

(2) *Exceptions.* Paragraph (b)(1) of this section does not apply to—

(i) A debt instrument to which section 1272(a)(6) applies (certain interests in or mortgages held by a REMIC, and certain other debt instruments with payments subject to acceleration);

(ii) A debt instrument that provides for contingent payments, other than a debt instrument described in paragraph (c) or (d) of this section or except as provided in § 1.1275–4; or

(iii) A variable rate debt instrument to which § 1.1275–5 applies, except as provided in § 1.1275–5.

(3) *Modifications.* The amount of OID includible in income by a holder under paragraph (b)(1) of this section is adjusted if—

(i) The holder purchased the debt instrument at a premium or an acquisition premium (within the meaning of § 1.1272–2); or

(ii) The holder made an election for the debt instrument under § 1.1272–3 to treat all interest as OID.

(4) *Special rules for determining the OID allocable to an accrual period.* The following rules apply to determine the OID allocable to an accrual period under paragraph (b)(1)(iii) of this section.

(i) *Unpaid qualified stated interest allocable to an accrual period.* In determining the OID allocable to an accrual period, if an interval between payments of qualified stated interest contains more than 1 accrual period—

(A) The amount of qualified stated interest payable at the end of the interval (including any qualified stated interest that is payable on the first day of the accrual period immediately following the interval) is allocated on a pro rata basis to each accrual period in the interval; and

(B) The adjusted issue price at the beginning of each accrual period in the interval must be increased by the amount of any qualified stated interest that has accrued prior to the first day of the accrual period but that is not payable until the end of the interval. See *Example 2* of paragraph (j) of this section for an example illustrating the rules in this paragraph (b)(4)(i).

(ii) *Final accrual period.* The OID allocable to the final accrual period is the difference between the amount payable at maturity (other than a payment of qualified stated interest) and the adjusted issue price at the beginning of the final accrual period.

(iii) *Initial short accrual period.* If all accrual periods are of equal length, except for either an initial shorter accrual period or an initial and a final shorter accrual period, the amount of OID allocable to the initial accrual period may be computed using any reasonable method. See *Example 3* in paragraph (j) of this section.

(iv) *Payment on first day of an accrual period.* The adjusted issue price at the beginning of an accrual period is reduced by the amount of any payment (other than a payment of qualified stated interest) that is made on the first day of the accrual period.

(c) *Yield and maturity of certain debt instruments subject to contingencies*—(1) *Applicability.* This paragraph (c) provides rules to determine the yield and maturity of certain debt instruments that provide for an alternative payment schedule (or schedules) applicable upon the occurrence of a contingency (or contingencies). This paragraph (c) applies, however, only if the timing and amounts of the payments that comprise each payment schedule are known as of the issue date and the debt instrument is subject to paragraph (c)(2), (3), or (5) of this section. A debt instrument does not provide for an alternative payment schedule merely because there is a possibility of impairment of a payment (or payments) by insolvency, default, or similar circumstances. See §1.1275–4 for the treatment of a debt instrument that provides for a contingency that is not described in this paragraph (c). See §1.1273–1(c) to determine whether stated interest on a debt instrument subject to this paragraph (c) is qualified stated interest.

(2) *Payment schedule that is significantly more likely than not to occur.* If, based on all the facts and circumstances as of the issue date, a single payment schedule for a debt instrument, including the stated payment schedule, is significantly more likely than not to occur, the yield and maturity of the debt instrument are computed based on this payment schedule.

(3) *Mandatory sinking fund provision.* Notwithstanding paragraph (c)(2) of this section, if a debt instrument is subject to a mandatory sinking fund provision, the provision is ignored for purposes of computing the yield and maturity of the debt instrument if the use and terms of the provision meet reasonable commercial standards. For purposes of the preceding sentence, a mandatory sinking fund provision is a provision that meets the following requirements:

(i) The provision requires the issuer to redeem a certain amount of debt instruments in an issue prior to maturity.

(ii) The debt instruments actually redeemed are chosen by lot or purchased by the issuer either in the open market or pursuant to an offer made to all holders (with any proration determined by lot).

(iii) On the issue date, the specific debt instruments that will be redeemed on any date prior to maturity cannot be identified.

(4) *Consistency rule.* [Reserved]

(5) *Treatment of certain options.* Notwithstanding paragraphs (c) (2) and (3) of this section, the rules of this paragraph (c)(5) determine the yield and maturity of a debt instrument that provides the holder or issuer with an unconditional option or options, exercisable on one or more dates during the term of the debt instrument, that, if exercised, require payments to be made on the debt instrument under an alternative payment schedule or schedules (e.g., an option to extend or an option to call a debt instrument at a fixed premium). Under this paragraph (c)(5), an issuer is deemed to exercise or not exercise an option or combination of options in a manner that minimizes the yield on the debt instrument, and a

holder is deemed to exercise or not exercise an option or combination of options in a manner that maximizes the yield on the debt instrument. If both the issuer and the holder have options, the rules of this paragraph (c)(5) are applied to the options in the order that they may be exercised. See paragraph (j) *Example 5* through *Example 8* of this section.

(6) *Subsequent adjustments.* If a contingency described in this paragraph (c) (including the exercise of an option described in paragraph (c)(5) of this section) actually occurs or does not occur, contrary to the assumption made pursuant to this paragraph (c) (a change in circumstances), then, solely for purposes of sections 1272 and 1273, the debt instrument is treated as retired and then reissued on the date of the change in circumstances for an amount equal to its adjusted issue price on that date. See paragraph (j) *Example 5* and *Example 7* of this section. If, however, the change in circumstances results in a substantially contemporaneous pro-rata prepayment as defined in § 1.1275–2(f)(2), the pro-rata prepayment is treated as a payment in retirement of a portion of the debt instrument, which may result in gain or loss to the holder. See paragraph (j) *Example 6* and *Example 8* of this section.

(7) *Effective date.* This paragraph (c) applies to debt instruments issued on or after August 13, 1996.

(d) *Certain debt instruments that provide for a fixed yield.* If a debt instrument provides for one or more contingent payments but all possible payment schedules under the terms of the instrument result in the same fixed yield, the yield of the debt instrument is the fixed yield. For example, the yield of a debt instrument with principal payments that are fixed in total amount but that are uncertain as to time (such as a demand loan) is the stated interest rate if the issue price of the instrument is equal to the stated principal amount and interest is paid or compounded at a fixed rate over the entire term of the instrument. This paragraph (d) applies to debt instruments issued on or after August 13, 1996.

(e) *Convertible debt instruments.* For purposes of section 1272, an option is ignored if it is an option to convert a debt instrument into the stock of the issuer, into the stock or debt of a related party (within the meaning of section 267(b) or 707(b)(1)), or into cash or other property in an amount equal to the approximate value of such stock or debt.

(f) *Special rules to determine whether a debt instrument is a short-term obligation*—(1) *Counting of either the issue date or maturity date.* For purposes of determining whether a debt instrument is a short-term obligation (i.e., a debt instrument with a fixed maturity date that is not more than 1 year from the date of issue), the term of the debt instrument includes either the issue date or the maturity date, but not both dates.

(2) *Coordination with paragraph (c) of this section for certain sections of the Internal Revenue Code.* Notwithstanding paragraph (c) of this section, solely for purposes of determining whether a debt instrument is a short-term obligation under sections 871(g)(1)(B)(i), 881, 1271(a)(3), 1271(a)(4), 1272(a)(2)(C), and 1283(a)(1), the maturity date of a debt instrument is the last possible date that the instrument could be outstanding under the terms of the instrument. For purposes of the preceding sentence, the last possible date that the debt instrument could be outstanding is determined without regard to § 1.1275–2(h) (relating to payments subject to remote or incidental contingencies).

(g) *Basis adjustment.* The basis of a debt instrument in the hands of the holder is increased by the amount of OID included in the holder's gross income and decreased by the amount of any payment from the issuer to the holder under the debt instrument other than a payment of qualified stated interest. See, however, § 1.1275–2(f) for rules regarding basis adjustments on a pro rata prepayment.

(h) *Debt instruments denominated in a currency other than the U.S. dollar.* Section 1272 and this section apply to a debt instrument that provides for all payments denominated in, or determined by reference to, the functional currency of the taxpayer or qualified business unit of the taxpayer (even if that currency is other than the U.S.

dollar). See §1.988–2(b) to determine interest income or expense for debt instruments that provide for payments denominated in, or determined by reference to, a nonfunctional currency.

(i) [Reserved]

(j) *Examples.* The following examples illustrate the rules of this section. Each example assumes that all taxpayers use the calendar year as the taxable year. In addition, each example assumes a 30-day month, 360-day year, and that the initial accrual period begins on the issue date and the final accrual period ends on the day before the stated maturity date. Although, for purposes of simplicity, the yield as stated is rounded to two decimal places, the computations do not reflect any such rounding convention.

Example 1. Accrual of OID on zero coupon debt instrument; choice of accrual periods—(i) *Facts.* On July 1, 1994, A purchases at original issue, for $675,564.17, a debt instrument that matures on July 1, 1999, and provides for a single payment of $1,000,000 at maturity.

(ii) *Determination of yield.* Under paragraph (b)(1)(i) of this section, the yield of the debt instrument is 8 percent, compounded semiannually.

(iii) *Determination of accrual period.* Under paragraph (b)(1)(ii) of this section, accrual periods may be of any length, provided that each accrual period is no longer than 1 year and each scheduled payment of principal or interest occurs either on the first or final day of an accrual period. The yield to maturity to be used in computing OID accruals in any accrual period, however, must reflect the length of the accrual period chosen. A yield based on compounding b times per year is equivalent to a yield based on compounding c times per year as indicated by the following formula:

$$r = c\{(1 + i / b)^{b/c} - 1\}$$

In which:

i = The yield based on compounding b times per year expressed as a decimal
r = The equivalent yield based on compounding c times per year expressed as a decimal
b = The number of compounding periods in a year on which i is based (for example, 12, if i is based on monthly compounding)
c = The number of compounding periods in a year on which r is based

(iv) *Determination of OID allocable to each accrual period.* Assume that A decides to compute OID on the debt instrument using semiannual accrual periods. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first semiannual accrual period is $27,022.56: the product of the issue price ($675,564.17) and the yield properly adjusted for the length of the accrual period (8 percent/2), less qualified stated interest allocable to the accrual period ($0). The daily portion of OID for the first semiannual accrual period is $150.13 ($27,022.56/180).

(v) *Determination of OID if monthly accrual periods are used.* Alternatively, assume that A decides to compute OID on the debt instrument using monthly accrual periods. Using the above formula, the yield on the debt instrument reflecting monthly compounding is 7.87 percent, compounded monthly ($12\{(1 + .08 / 2)^{2/12} - 1\}$). Under paragraph (b)(1)(iii) of this section, the OID allocable to the first monthly accrual period is $4,430.48: the product of the issue price ($675,564.17) and the yield properly adjusted for the length of the accrual period (7.87 percent/12), less qualified stated interest allocable to the accrual period ($0). The daily portion of OID for the first monthly accrual period is $147.68 ($4,430.48/30).

Example 2. Accrual of OID on debt instrument with qualified stated interest—(i) *Facts.* On September 1, 1994, A purchases at original issue, for $90,000, B corporation's debt instrument that matures on September 1, 2004, and has a stated principal amount of $100,000, payable on that date. The debt instrument provides for semiannual payments of interest of $3,000, payable on September 1 and March 1 of each year, beginning on March 1, 1995.

(ii) *Determination of yield.* The debt instrument is a 10-year debt instrument with an issue price of $90,000 and a stated redemption price at maturity of $100,000. The semiannual payments of $3,000 are qualified stated interest payments. Under paragraph (b)(1)(i) of this section, the yield is 7.44 percent, compounded semiannually.

(iii) *Accrual of OID if semiannual accrual periods are used.* Assume that A decides to compute OID on the debt instrument using semiannual accrual periods. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first semiannual accrual period equals the product of the issue price ($90,000) and the yield properly adjusted for the length of the accrual period (7.44 percent/2), less qualified stated interest allocable to the accrual period ($3,000). Therefore, the amount of OID for the first semiannual accrual period is $345.78 ($3,345.78–$3,000).

(iv) *Adjustment for accrued but unpaid qualified stated interest if monthly accrual periods are used.* Assume, alternatively, that A decides to compute OID on the debt instrument using monthly accrual periods. The yield, compounded monthly, is 7.32 percent. Under paragraph (b)(1)(iii) of this section, the OID allocable to the first monthly accrual period is the product of the issue price ($90,000) and the yield properly adjusted for the length of the accrual period (7.32 percent/12), less qualified stated interest allocable to the accrual period. Under paragraph (b)(4)(i)(A) of this section, the qualified stated interest allocable to the first monthly accrual period is the pro rata amount of qualified stated interest allocable to the interval between payment dates ($3,000×⅙, or $500). Therefore, the amount of OID for the first monthly accrual period is $49.18 ($549.18–$500). Under paragraph (b)(4)(i)(B) of this section, the adjusted issue price of the debt instrument for purposes of determining the amount of OID for the second monthly accrual period is $90,549.18 ($90,000 + $49.18 + $500). Although the adjusted issue price of the debt instrument for this purpose includes the amount of qualified stated interest allocable to the first monthly accrual period, A includes the qualified stated interest in income based on A's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method).

Example 3. Accrual of OID for debt instrument with initial short accrual period—(i) *Facts.* On May 1, 1994, G purchases at original issue, for $80,000, H corporation's debt instrument maturing on July 1, 2004. The debt instrument provides for a single payment at maturity of $250,000. G computes its OID using 6-month accrual periods ending on January 1 and July 1 of each year and an initial short 2-month accrual period from May 1, 1994, through June 30, 1994.

(ii) *Determination of yield.* The yield on the debt instrument is 11.53 percent, compounded semiannually.

(iii) *Determination of OID allocable to initial short accrual period.* Under paragraph (b)(4)(iii) of this section, G may use any reasonable method to compute OID for the initial short accrual period. One reasonable method is to calculate the amount of OID pursuant to the following formula:

$$OID_{short}=IP\times(i/k)\times f$$

In which:

OID_{short}=The amount of OID allocable to the initial short accrual period
IP=The issue price of the debt instrument
i=The yield to maturity expressed as a decimal
k=The number of accrual periods in a year
f=A fraction whose numerator is the number of days in the initial short accrual period, and whose denominator is the number of days in a full accrual period

(iv) *Amount of OID for the initial short accrual period.* Under this method, the amount of OID for the initial short accrual period is $1,537 ($80,000×(11.53 percent/2) × (60/180)).

(v) *Alternative method.* Another reasonable method is to calculate the amount of OID for the initial short accrual period using the yield based on bi-monthly compounding, computed pursuant to the formula set forth in *Example 1* of paragraph (j) of this section. Under this method, the amount of OID for the initial short accrual period is $1,508.38 ($80,000×(11.31 percent/6)).

Example 4. Impermissible accrual of OID using a method other than constant yield method—(i) *Facts.* On July 1, 1994, B purchases at original issue, for $100,000, C corporation's debt instrument that matures on July 1, 1999, and has a stated principal amount of $100,000. The debt instrument provides for a single payment at maturity of $148,024.43. The yield of the debt instrument is 8 percent, compounded semiannually.

(ii) *Determination of yield.* Assume that C uses 6 monthly accrual periods to compute its OID for 1994. The yield must reflect monthly compounding (as determined using the formula described in *Example 1* of paragraph (j) of this section). As a result, the monthly yield of the debt instrument is 7.87 percent, divided by 12. C may not compute its monthly yield for the last 6 months in 1994 by dividing 8 percent by 12.

Example 5. Debt instrument subject to put option—(i) *Facts.* On January 1, 1995, G purchases at original issue, for $70,000, H corporation's debt instrument maturing on January 1, 2010, with a stated principal amount of $100,000, payable at maturity. The debt instrument provides for semiannual payments of interest of $4,000, payable on January 1 and July 1 of each year, beginning on July 1, 1995. The debt instrument gives G an unconditional right to put the bond back to H, exercisable on January 1, 2005, in return for $85,000 (exclusive of the $4,000 of stated interest payable on that date).

(ii) *Determination of yield and maturity.* Yield determined without regard to the put option is 12.47 percent, compounded semiannually. Yield determined by assuming that the put option is exercised (i.e., by using January 1, 2005, as the maturity date and $85,000 as the stated principal amount payable on that date) is 12.56 percent, compounded semiannually. Thus, under paragraph (c)(5) of this section, it is assumed that G will exercise the put option, because exercise of the option would increase the yield of the debt instrument. Thus, for purposes of calculating OID, the debt instrument is assumed to be a 10-year debt instrument with an issue price of $70,000, a stated redemption price at maturity of $85,000, and a yield of 12.56 percent, compounded semiannually.

(iii) *Consequences if put option is, in fact, not exercised.* If the put option is, in fact, not exercised, then, under paragraph (c)(6) of this section, the debt instrument is treated, solely for purposes of sections 1272 and 1273, as if it were reissued on January 1, 2005, for an amount equal to its adjusted issue price on that date, $85,000. The new debt instrument matures on January 1, 2010, with a stated principal amount of $100,000 payable on that date and provides for semiannual payments of interest of $4,000. The yield of the new debt instrument is 12.08 percent, compounded semiannually.

Example 6. Debt instrument subject to partial call option—(i) *Facts.* On January 1, 1995, H purchases at original issue, for $95,000, J corporation's debt instrument that matures on January 1, 2000, and has a stated principal amount of $100,000, payable on that date. The debt instrument provides for semiannual payments of interest of $4,000, payable on January 1 and July 1 of each year, beginning on July 1, 1995. On January 1, 1998, J has an unconditional right to call 50 percent of the principal amount of the debt instrument for $55,000 (exclusive of the $4,000 of stated interest payable on that date). If the call is exercised, the semiannual payments of interest made after the call date will be reduced to $2,000.

(ii) *Determination of yield and maturity.* Yield determined without regard to the call option is 9.27 percent, compounded semiannually. Yield determined by assuming J exercises its call option is 10.75 percent, compounded semiannually. Thus, under paragraph (c)(5) of this section, it is assumed that J will not exercise the call option because exercise of the option would increase the yield of the debt instrument. Thus, for purposes of calculating OID, the debt instrument is assumed to be a 5-year debt instrument with a single principal payment at maturity of $100,000, and a yield of 9.27 percent, compounded semiannually.

(iii) *Consequences if the call option is, in fact, exercised.* If the call option is, in fact, exercised, then under paragraph (c)(6) of this section, the debt instrument is treated as if the issuer made a pro rata prepayment of $55,000 that is subject to §1.1275–2(f). Consequently, under §1.1275–2(f)(1), the instrument is treated as consisting of two debt instruments, one that is retired on the call date and one that remains outstanding after the call date. The adjusted issue price, adjusted basis in the hands of the holder, and accrued OID of the original debt instrument is allocated between the two instruments based on the portion of the original instrument treated as retired. Since each payment remaining to be made after the call date is reduced by one-half, one-half of the adjusted issue price, adjusted basis, and accrued OID is allocated to the debt instrument that is treated as retired. The adjusted issue price of the original debt instrument immediately prior to the call date is $97,725.12, which equals the issue price of the original debt instrument ($95,000) increased by the OID previously includible in gross income ($2,725.12). One-half of this adjusted issue price is allocated to the debt instrument treated as retired, and the other half is allocated to the debt instrument that is treated as remaining outstanding. Thus, the debt instrument treated as remaining outstanding has an adjusted issue price immediately after the call date of $97,725.12/2, or $48,862.56. The yield of this debt instrument continues to be 9.27 percent, compounded semiannually. In addition, the portion of H's adjusted basis allocated to the debt instrument treated as retired is $97,725.12/2 or $48,862.56. Accordingly, under section 1271, H realizes a gain on the deemed retirement equal to $6,137.44 ($55,000 − $48,862.56).

Example 7. Debt instrument issued at par that provides for payment of interest in kind—(i) *Facts.* On January 1, 1995, A purchases at original issue, for $100,000, X corporation's debt instrument maturing on January 1, 2000, at a stated principal amount of $100,000, payable on that date. The debt instrument provides for annual payments of interest of $6,000 on January 1 of each year, beginning on January 1, 1996. The debt instrument gives X the unconditional right to issue, in lieu of the first interest payment, a second debt instrument (PIK instrument) maturing on January 1, 2000, with a stated principal amount of $6,000. The PIK instrument, if issued, would provide for annual payments of interest of $360 on January 1 of each year, beginning on January 1, 1997.

(ii) *Aggregation of PIK instrument with original debt instrument.* Under §1.1275–2(c)(3), the issuance of the PIK instrument is not considered a payment made on the original debt instrument, and the PIK instrument is aggregated with the original debt instrument. The issue date of the PIK instrument is the same as the original debt instrument.

(iii) *Determination of yield and maturity.* The right to issue the PIK instrument is treated as an option to defer the initial interest payment until maturity. Yield determined without regard to the option is 6 percent, compounded annually, Yield determined by assuming X exercises the option is 6 percent, compounded annually. Thus, under paragraph (c)(5) of this section, it is assumed that X will not exercise the option by issuing the PIK instrument because exercise of the option would not decrease the yield of the debt instrument. For purposes of calculating OID, the debt instrument is assumed to be a 5-year debt instrument with a single principal payment at maturity of $100,000 and ten semiannual interest payments of $6,000, beginning on January 1, 1996. As a result, the debt instrument's yield is 6 percent, compounded annually.

(iv) *Determination of OID.* Under the payment schedule that would result if the option was exercised, none of the interest on the debt instrument would be qualified stated interest. Accordingly, under §1.1273–1(c)(2), no payments on the debt instrument are qualified stated interest payments. Thus, $6,000 of OID accrues during the first annual accrual period. If the PIK instrument is not issued, $6,000 of OID accrues during each annual accrual period.

(v) *Consequences if the PIK instrument is issued.* Under paragraph (c)(6) of this section, if X issues the PIK instrument on January 1, 1996, the issuance of the PIK instrument is not a payment on the debt instrument. Solely for purposes of sections 1272 and 1273, the debt instrument is deemed reissued on January 1, 1996, for an issue price of $106,000. The recomputed yield is 6 percent, compounded annually. The OID for the first annual accrual period after the deemed reissuance is $6,360. The adjusted issue price of the debt instrument at the beginning of the next annual accrual period is $106,000 ($106,000 + $6,360 − $6,360). The OID for each of the four remaining annual accrual periods is $6,360.

Example 8. Debt instrument issued at a discount that provides for payment of interest in kind—(i) *Facts.* On January 1, 1995, T purchases at original issue, for $75,500, U corporation's debt instrument maturing on January 1, 2000, at a stated principal amount of $100,000, payable on that date. The debt instrument provides for annual payments of interest of $4,000 on January 1 of each year, beginning on January 1, 1996. The debt instrument gives U the unconditional right to issue, in lieu of the first interest payment, a second debt instrument (PIK instrument) maturing on January 1, 2000, with a stated principal amount of $4,000. The PIK instrument, if issued, would provide for annual payments of interest of $160 on January 1 of each year, beginning on January 1, 1997.

(ii) *Aggregation of PIK instrument with original debt instrument.* Under § 1.1275–2(c)(3), the issuance of the PIK instrument is not considered a payment made on the original debt instrument, and the PIK instrument is aggregated with the original debt instrument. The issue date of the PIK instrument is the same as the original debt instrument.

(iii) *Determination of yield and maturity.* The right to issue the PIK instrument is treated as an option to defer the initial interest payment until maturity. Yield determined without regard to the option is 10.55 percent, compounded annually. Yield determined by assuming U exercises the option is 10.32 percent, compounded annually. Thus, under paragraph (c)(5) of this section, it is assumed that U will exercise the option by issuing the PIK instrument because exercise of the option would decrease the yield of the debt instrument. For purposes of calculating OID, the debt instrument is assumed to be a 5-year debt instrument with a single principal payment at maturity of $104,000 and four annual interest payments of $4,160, beginning on January 1, 1997. As a result, the yield is 10.32 percent, compounded annually.

(iv) *Consequences if the PIK instrument is not issued.* Assume that T chooses to compute OID accruals on the basis of an annual accrual period. On January 1, 1996, the adjusted issue price of the debt instrument, and T's adjusted basis in the instrument, is $83,295.15. Under paragraph (c)(6) of this section, if U actually makes the $4,000 interest payment on January 1, 1996, the debt instrument is treated as if U made a pro rata prepayment (within the meaning of § 1.1275–2(f)(2)) of $4,000, which reduces the amount of each payment remaining on the instrument by a factor of 4/104, or 1/26. Thus, under § 1.1275–2(f)(1) and section 1271, T realizes a gain of $796.34 ($4,000 − ($83,295.15/26)). The adjusted issue price of the debt instrument and T's adjusted basis immediately after the payment is $80,091.49 ($83,295.15 × 25/26) and the yield continues to be 10.32 percent, compounded annually.

Example 9. Debt instrument with stepped interest rate—(i) *Facts.* On July 1, 1994, G purchases at original issue, for $85,000, H corporation's debt instrument maturing on July 1, 2004. The debt instrument has a stated principal amount of $100,000, payable on the maturity date and provides for semiannual interest payments on January 1 and July 1 of each year, beginning on January 1, 1995. The amount of each payment is $2,000 for the first 5 years and $5,000 for the final 5 years.

(ii) *Determination of OID.* Assume that G computes its OID using 6-month accrual periods ending on January 1 and July 1 of each year. The yield of the debt instrument, determined under paragraph (b)(1)(i) of this section, is 8.65 percent, compounded semiannually. Interest is unconditionally payable at a fixed rate of at least 4 percent, compounded semiannually, for the entire term of the debt instrument. Consequently, under § 1.1273–1(c)(1), the semiannual payments are qualified stated interest payments to the extent of $2,000. The amount of OID for the first 6-month accrual period is $1,674.34 (the issue price of the debt instrument ($85,000) times the yield of the debt instrument for that accrual period (.0865/2) less the amount of any qualified stated interest allocable to that accrual period ($2,000)).

Example 10. Debt instrument payable on demand that provides for interest at a constant rate—(i) *Facts.* On January 1, 1995, V purchases at original issue, for $100,000, W corporation's debt instrument. The debt instrument calls for interest to accrue at a rate of 9 percent, compounded annually. The debt instrument is redeemable at any time at the option of V for an amount equal to $100,000, plus accrued interest. V uses annual accrual periods to accrue OID on the debt instrument.

(ii) *Amount of OID.* Pursuant to paragraph (d) of this section, the yield of the debt instrument is 9 percent, compounded annually. If the debt instrument is not redeemed during 1995, the amount of OID allocable to the year is $9,000.

[T.D. 8517, 59 FR 4810, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30140, June 14, 1996]

§1.1272–2 Treatment of debt instruments purchased at a premium.

(a) *In general.* Under section 1272(c)(1), if a holder purchases a debt instrument at a premium, the holder does not include any OID in gross income. Under section 1272(a)(7), if a holder purchases a debt instrument at an acquisition premium, the holder reduces the amount of OID includible in gross income by the fraction determined under paragraph (b)(4) of this section.

(b) *Definitions and special rules*—(1) *Purchase.* For purposes of section 1272 and this section, purchase means any acquisition of a debt instrument, including the acquisition of a newly issued debt instrument in a debt-for-debt exchange or the acquisition of a debt instrument from a donor.

(2) *Premium.* A debt instrument is purchased at a premium if its adjusted basis, immediately after its purchase by the holder (including a purchase at original issue), exceeds the sum of all amounts payable on the instrument after the purchase date other than payments of qualified stated interest (as defined in §1.1273–1(c)).

(3) *Acquisition premium.* A debt instrument is purchased at an acquisition premium if its adjusted basis, immediately after its purchase (including a purchase at original issue), is—

(i) Less than or equal to the sum of all amounts payable on the instrument after the purchase date other than payments of qualified stated interest (as defined in §1.1273–1(c)); and

(ii) Greater than the instrument's adjusted issue price (as defined in §1.1275–1(b)).

(4) *Acquisition premium fraction.* In applying section 1272(a)(7), the cost of a debt instrument is its adjusted basis immediately after its acquisition by the purchaser. Thus, the numerator of the fraction determined under section 1272(a)(7)(B) is the excess of the adjusted basis of the debt instrument immediately after its acquisition by the purchaser over the adjusted issue price of the debt instrument. The denominator of the fraction determined under section 1272(a)(7)(B) is the excess of the sum of all amounts payable on the debt instrument after the purchase date, other than payments of qualified stated interest, over the instrument's adjusted issue price.

(5) *Election to accrue discount on a constant yield basis.* Rather than applying the acquisition premium fraction, a holder of a debt instrument purchased at an acquisition premium may elect under §1.1272–3 to compute OID accruals by treating the purchase as a purchase at original issuance and applying the mechanics of the constant yield method.

(6) *Special rules for determining basis*—(i) *Debt instruments acquired in exchange for other property.* For purposes of section 1272(a)(7), section 1272(c)(1), and this section, if a debt instrument is acquired in an exchange for other property (other than in a reorganization defined in section 368) and the basis of the debt instrument is determined, in whole or in part, by reference to the basis of the other property, the basis of the debt instrument may not exceed its fair market value immediately after the exchange. For example, if a debt instrument is distributed by a partnership to a partner in a liquidating distribution and the partner's basis in the debt instrument would otherwise be determined under section 732, the partner's basis in the debt instrument may not exceed its fair market value for purposes of this section.

(ii) *Acquisition by gift.* For purposes of this section, a donee's adjusted basis in a debt instrument is the donee's basis for determining gain under section 1015(a).

(c) *Examples.* The following examples illustrate the rules of this section.

Example 1. Debt instrument purchased at an acquisition premium—(i) *Facts.* On July 1, 1994, A purchased at original issue, for $500, a debt instrument issued by Corporation X. The debt instrument matures on July 1, 1999, and calls for a single payment at maturity of $1,000. Under section 1273(a), the debt instrument has a stated redemption price at maturity of $1,000 and, thus, OID of $500. On July 1, 1996, when the debt instrument's adjusted issue price is $659.75, A sells the debt instrument to B for $750 in cash.

(ii) *Acquisition premium fraction.* Because the cost to B of the debt instrument is less than the amount payable on the debt instrument after the purchase date, but is greater than the debt instrument's adjusted issue price, B has paid an acquisition premium for the debt instrument. Accordingly, the daily portion of OID for any day that B holds the debt instrument is reduced by a fraction, the numerator of which is $90.25 (the excess of the cost of the debt instrument over its adjusted issue price) and the denominator of which is $340.25 (the excess of the sum of all payments after the purchase date over its adjusted issue price).

Example 2. Debt-for-debt exchange where holder is considered to purchase new debt instrument at a premium—(i) *Facts.* On January 1, 1995, H purchases at original issue, for $1,000, a debt instrument issued by Corporation X. On July 1, 1997, when H's adjusted basis in the debt instrument is $1,000, Corporation X issues a new debt instrument with a stated redemption price at maturity of $750 to H in exchange for the old debt instrument. Assume that the issue price of the new debt instrument is $600. Thus, under section 1273(a), the debt instrument has OID of $150. The exchange qualifies as a recapitalization under section 368(a)(1)(E), with the consequence that, under sections 354 and 358, H recognizes no loss on the exchange and has an adjusted basis in the new debt instrument of $1,000.

(ii) *Application of section 1272(c)(1).* Under paragraphs (b)(1) and (b)(2) of this section, H purchases the new debt instrument at a premium of $250. Accordingly, under section 1272(c)(1), H is not required to include OID in income with respect to the new debt instrument.

Example 3. Debt-for-debt exchange where holder is considered to purchase new debt instrument at an acquisition premium—(i) *Facts.* The facts are the same as in *Example 2* of paragraph (c) of this section, except that H purchases the old debt instrument from another holder on July 1, 1995, and on July 1, 1997, H's adjusted basis in the old debt instrument is $700. Under section 1273(a), the new debt instrument is issued with OID of $150.

(ii) *Application of section 1272(a)(7).* Under paragraphs (b)(1) and (b)(3) of this section, H purchases the new debt instrument at an acquisition premium of $100. Accordingly, the daily portion of OID that is includible in H's income is reduced by the fraction determined under section 1272(a)(7).

Example 4. Treatment of acquisition premium for debt instrument acquired by gift—(i) *Facts.* On July 1, 1994, D receives as a gift a debt instrument with a stated redemption price at maturity of $1,000 and an adjusted issue price of $800. On that date, the fair market value of the debt instrument is $900 and the donor's adjusted basis in the debt instrument is $950.

(ii) *Application of section 1272(a)(7).* Under paragraphs (b)(1), (b)(3), and (b)(6)(ii) of this section, D is considered to have purchased the debt instrument at an acquisition premium of $150. Accordingly, the daily portion of OID that is includible in D's income is reduced by the fraction determined under section 1272(a)(7).

[T.D. 8517, 59 FR 4814, Feb. 2, 1994]

§ 1.1272–3 Election by a holder to treat all interest on a debt instrument as OID.

(a) *Election.* A holder of a debt instrument may elect to include in gross income all interest that accrues on the instrument by using the constant yield method described in paragraph (c) of this section. For purposes of this election, interest includes stated interest, acquisition discount, OID, de minimis OID, market discount, de minimis market discount, and unstated interest, as adjusted by any amortizable bond premium or acquisition premium.

(b) *Scope of election*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a holder may make the election for any debt instrument.

(2) *Exceptions, limitations, and special rules*—(i) *Debt instrument with amortizable bond premium (as determined under section 171).* (A) A holder may make the election for a debt instrument with amortizable bond premium only if the instrument qualifies as a bond under section 171(d).

(B) If a holder makes the election under this section for a debt instrument with amortizable bond premium, the holder is deemed to have made the election under section 171(c)(2) for the taxable year in which the instrument was acquired. If the holder has previously made the election under section 171(c)(2), the requirements of that election with respect to any debt instrument are satisfied by electing to amortize the bond premium under the rules provided by this section.

(ii) *Debt instrument with market discount.* (A) A holder may make the election under this section for a debt instrument with market discount only if the holder is eligible to make an election under section 1278(b).

(B) If a holder makes the election under this section for a debt instrument with market discount, the holder is deemed to have made both the election under section 1276(b)(2) for that instrument and the election under section 1278(b) for the taxable year in which the instrument was acquired. If the holder has previously made the election under section 1278(b), the requirements of that election with respect to any debt instrument are satisfied by electing to include the market discount in income in accordance with the rules provided by this section.

(iii) *Tax-exempt debt instrument.* A holder may not make the election for a tax-exempt obligation as defined in section 1275(a)(3).

(c) *Mechanics of the constant yield method*—(1) *In general.* For purposes of this section, the amount of interest that accrues during an accrual period is determined under rules similar to those under section 1272 (the constant yield method). In applying the constant yield method, however, a debt instrument subject to the election is treated as if—

(i) The instrument is issued for the holder's adjusted basis immediately after its acquisition by the holder;

(ii) The instrument is issued on the holder's acquisition date; and

(iii) None of the interest payments provided for in the instrument are qualified stated interest payments.

(2) *Special rules to determine adjusted basis.* For purposes of paragraph (c)(1)(i) of this section—

(i) If the debt instrument is acquired in an exchange for other property (other than in a reorganization defined in section 368) and the basis of the debt instrument is determined, in whole or in part, by reference to the basis of the other property, the adjusted basis of the debt instrument may not exceed its fair market value immediately after the exchange; and

(ii) If the debt instrument was acquired with amortizable bond premium (as determined under section 171), the adjusted basis of the debt instrument is reduced by an amount equal to the value attributable to any conversion feature.

(d) *Time and manner of making the election.* The election must be made for the taxable year in which the holder acquires the debt instrument. A holder makes the election by attaching to the holder's timely filed Federal income tax return a statement that the holder is making an election under this section and that identifies the debt instruments subject to the election. A holder may make the election for a class or group of debt instruments by attaching a statement describing the type or types of debt instruments being designated for the election.

(e) *Revocation of election.* The election may not be revoked unless approved by the Commissioner.

(f) *Effective date.* This section applies to debt instruments acquired on or after April 4, 1994.

[T.D. 8517, 59 FR 4815, Feb. 2, 1994]

§ 1.1273–1 Definition of OID.

(a) *In general.* Section 1273(a)(1) defines OID as the excess of a debt instrument's stated redemption price at maturity over its issue price. Section 1.1273–2 defines issue price, and paragraph (b) of this section defines stated redemption price at maturity. Paragraph (d) of this section provides rules for de minimis amounts of OID. Although the total amount of OID for a debt instrument may be indeterminate, § 1.1272–1(d) provides a rule to determine OID accruals on certain debt instruments that provide for a fixed yield. See *Example 10* in § 1.1272–1(j).

(b) *Stated redemption price at maturity.* A debt instrument's stated redemption price at maturity is the sum of all payments provided by the debt instrument other than qualified stated interest payments. If the payment schedule of a debt instrument is determined under § 1.1272–1(c) (relating to certain debt instruments subject to contingencies), that payment schedule is used to determine the instrument's stated redemption price at maturity.

(c) *Qualified stated interest*—(1) *Definition*—(i) *In general.* Qualified stated interest is stated interest that is unconditionally payable in cash or in property (other than debt instruments of the issuer), or that will be constructively received under section 451, at least annually at a single fixed rate (within the meaning of paragraph (c)(1)(iii) of this section).

(ii) *Unconditionally payable.* Interest is unconditionally payable only if reasonable legal remedies exist to compel timely payment or the debt instrument otherwise provides terms and conditions that make the likelihood of late payment (other than a late payment that occurs within a reasonable grace period) or nonpayment a remote contingency (within the meaning of § 1.1275–2(h)). For purposes of the preceding sentence, remedies or other terms and conditions are not taken into account if the lending transaction does not reflect arm's length dealing and the holder does not intend to enforce the remedies or other terms and conditions. For purposes of determining whether interest is unconditionally payable, the possibility of nonpayment due to default, insolvency, or similar circumstances, or due to the exercise of a conversion option described in § 1.1272–1(e) is ignored. This paragraph (c)(1)(ii) applies to debt instruments issued on or after August 13, 1996.

(iii) *Single fixed rate*—(A) *In general.* Interest is payable at a single fixed rate only if the rate appropriately takes into account the length of the interval between payments. Thus, if the interval between payments varies during the term of the debt instrument, the value of the fixed rate on which a payment is based generally must be adjusted to reflect a compounding assumption that is consistent with the length of the interval preceding the payment. See *Example 1* in paragraph (f) of this section.

(B) *Special rule for certain first and final payment intervals.* Notwithstanding paragraph (c)(1)(iii)(A) of this section, if a debt instrument provides for payment intervals that are equal in length throughout the term of the instrument, except that the first or final payment interval differs in length from the other payment intervals, the first or final interest payment is considered to be made at a fixed rate if the value of the rate on which the payment is based is adjusted in any reasonable manner to take into account the length of the interval. See *Example 2* of paragraph (f) of this section. The rule in this paragraph (c)(1)(iii)(B) also applies if the lengths of both the first and final payment intervals differ from the length of the other payment intervals.

(2) *Debt instruments subject to contingencies.* The determination of whether a debt instrument described in § 1.1272–1(c) (a debt instrument providing for an alternative payment schedule (or schedules) upon the occurrence of one or more contingencies) provides for qualified stated interest is made by analyzing each alternative payment schedule (including the stated payment schedule) as if it were the debt instrument's sole payment schedule. Under this analysis, the debt instrument provides for qualified stated interest to the extent of the lowest fixed rate at which qualified stated interest would be payable under any payment schedule. See *Example (4)* of paragraph (f) of this section.

(3) *Variable rate debt instrument.* In the case of a variable rate debt instrument, qualified stated interest is determined under § 1.1275–5(e).

(4) *Stated interest in excess of qualified stated interest.* To the extent that stated interest payable under a debt instrument exceeds qualified stated interest, the excess is included in the debt instrument's stated redemption price at maturity.

(5) *Short-term obligations.* In the case of a debt instrument with a term that is not more than 1 year from the date of issue, no payments of interest are treated as qualified stated interest payments.

(d) *De minimis OID*—(1) *In general.* If the amount of OID with respect to a debt instrument is less than the de minimis amount, the amount of OID is treated as zero, and all stated interest (including stated interest that would otherwise be characterized as OID) is treated as qualified stated interest.

(2) *De minimis amount.* The de minimis amount is an amount equal to 0.0025 multiplied by the product of the stated redemption price at maturity and the number of complete years to maturity from the issue date.

(3) *Installment obligations.* In the case of an installment obligation (as defined in paragraph (e)(1) of this section), paragraph (d)(2) of this section is applied by substituting for the number of complete years to maturity the weighted average maturity (as defined in paragraph (e)(3) of this section). Alternatively, in the case of a debt instrument that provides for payments of principal no more rapidly than a self-amortizing installment obligation (as defined in paragraph (e)(2) of this section), the de minimis amount defined in paragraph (d)(2) of this section may

be calculated by substituting 0.00167 for 0.0025.

(4) *Special rule for interest holidays, teaser rates, and other interest shortfalls*—(i) *In general.* This paragraph (d)(4) provides a special rule to determine whether a debt instrument with a teaser rate (or rates), an interest holiday, or any other interest shortfall has de minimis OID. This rule applies if—

(A) The amount of OID on the debt instrument is more than the de minimis amount as otherwise determined under paragraph (d) of this section; and

(B) All stated interest provided for in the debt instrument would be qualified stated interest under paragraph (c) of this section except that for 1 or more accrual periods the interest rate is below the rate applicable for the remainder of the instrument's term (e.g., if as a result of an interest holiday, none of the stated interest is qualified stated interest).

(ii) *Redetermination of OID for purposes of the de minimis test.* For purposes of determining whether a debt instrument described in paragraph (d)(4)(i) of this section has de minimis OID, the instrument's stated redemption price at maturity is treated as equal to the instrument's issue price plus the greater of the amount of foregone interest or the excess (if any) of the instrument's stated principal amount over its issue price. The amount of foregone interest is the amount of additional stated interest that would be required to be payable on the debt instrument during the period of the teaser rate, holiday, or shortfall so that all stated interest would be qualified stated interest under paragraph (c) of this section. See *Example 5* and *Example 6* of paragraph (f) of this section. In addition, for purposes of computing the de minimis amount of OID, the weighted average maturity of the debt instrument is determined by treating all stated interest payments as qualified stated interest payments.

(5) *Treatment of de minimis OID by holders*—(i) *Allocation of de minimis OID to principal payments.* The holder of a debt instrument includes any de minimis OID (other than de minimis OID treated as qualified stated interest under paragraph (d)(1) of this section, such as de minimis OID attributable to a teaser rate or interest holiday) in income as stated principal payments are made. The amount includible in income with respect to each principal payment equals the product of the total amount of de minimis OID on the debt instrument and a fraction, the numerator of which is the amount of the principal payment made and the denominator of which is the stated principal amount of the instrument.

(ii) *Character of de minimis OID*—(A) *De minimis OID treated as gain recognized on retirement.* Any amount of de minimis OID includible in income under this paragraph (d)(5) is treated as gain recognized on retirement of the debt instrument. See section 1271 to determine whether a retirement is treated as an exchange of the debt instrument.

(B) *Treatment of de minimis OID on sale or exchange.* Any gain attributable to de minimis OID that is recognized on the sale or exchange of a debt instrument is capital gain if the debt instrument is a capital asset in the hands of the seller.

(iii) *Treatment of subsequent holders.* If a subsequent holder purchases a debt instrument issued with de minimis OID at a premium (as defined in § 1.1272–2(b)(2)), the subsequent holder does not include the de minimis OID in income. Otherwise, a subsequent holder includes any discount in income under the market discount rules (sections 1276 through 1278) rather than under the rules of this paragraph (d)(5).

(iv) *Cross-reference.* See § 1.1272–3 for an election by a holder to treat de minimis OID as OID.

(e) *Definitions*—(1) *Installment obligation.* An installment obligation is a debt instrument that provides for the payment of any amount other than qualified stated interest before maturity.

(2) *Self-amortizing installment obligation.* A self-amortizing installment obligation is an obligation that provides for equal payments composed of principal and qualified stated interest that are unconditionally payable at least annually during the entire term of the debt instrument with no significant additional payment required at maturity.

(3) *Weighted average maturity.* The weighted average maturity of a debt

instrument is the sum of the following amounts determined for each payment under the instrument (other than a payment of qualified stated interest)—

(i) The number of complete years from the issue date until the payment is made; multiplied by

(ii) A fraction, the numerator of which is the amount of the payment and the denominator of which is the debt instrument's stated redemption price at maturity.

(f) *Examples.* The following examples illustrate the rules of this section.

Example 1. Qualified stated interest—(i) *Facts.* On January 1, 1995, A purchases at original issue, for $100,000, a debt instrument that matures on January 1, 1999, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for interest payments of $8,000 on January 1, 1996, and January 1, 1997, and quarterly interest payments of $1,942.65, beginning on April 1, 1997.

(ii) *Amount of qualified stated interest.* The annual payments of $8,000 and the quarterly payments of $1,942.65 are payable at a single fixed rate because 8 percent, compounded annually, is equivalent to 7.77 percent, compounded quarterly. Consequently, all stated interest payments under the debt instrument are qualified stated interest payments.

Example 2. Qualified stated interest with short initial payment interval. On October 1, 1994, A purchases at original issue, for $100,000, a debt instrument that matures on January 1, 1998, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for an interest payment of $2,000 on January 1, 1995, and interest payments of $8,000 on January 1, 1996, January 1, 1997, and January 1, 1998. Under paragraph (c)(1)(iii)(B) of this section, all stated interest payments on the debt instrument are computed at a single fixed rate and are qualified stated interest payments.

Example 3. Stated interest in excess of qualified stated interest—(i) *Facts.* On January 1, 1995, B purchases at original issue, for $100,000, C corporation's 5-year debt instrument. The debt instrument provides for a principal payment of $100,000, payable at maturity, and calls for annual interest payments of $10,000 for the first 3 years and annual interest payments of $10,600 for the last 2 years.

(ii) *Payments in excess of qualified stated interest.* All of the first three interest payments and $10,000 of each of the last two interest payments are qualified stated interest payments within the meaning of paragraph (c)(1) of this section. Under paragraph (c)(4) of this section, the remaining $600 of each of the last two interest payments is included in the stated redemption price at maturity, so that the stated redemption price at maturity is $101,200. Pursuant to paragraph (e)(3) of this section, the weighted average maturity of the debt instrument is 4.994 years [(4 years×$600/$101,200)+(5 years×$100,600/$101,200)]. The de minimis amount, or one-fourth of 1 percent of the stated redemption price at maturity multiplied by the weighted average maturity, is $1,263.50. Because the actual amount of discount, $1,200, is less than the de minimis amount, the instrument is treated as having no OID, and, under paragraph (d)(1) of this section, all of the interest payments are treated as qualified stated interest payments.

Example 4. Qualified stated interest on a debt instrument that is subject to an option—(i) *Facts.* On January 1, 1997, A issues, for $100,000, a 10-year debt instrument that provides for a $100,000 principal payment at maturity and for annual interest payments of $10,000. Under the terms of the debt instrument, A has the option, exercisable on January 1, 2002, to lower the annual interest payments to $8,000. In addition, the debt instrument gives the holder an unconditional right to put the debt instrument back to A, exercisable on January 1, 2002, in return for $100,000.

(ii) *Amount of qualified stated interest.* Under paragraph (c)(2) of this section, the debt instrument provides for qualified stated interest to the extent of the lowest fixed rate at which qualified stated interest would be payable under any payment schedule. If the payment schedule determined by assuming that the issuer's option will be exercised and the put option will not be exercised were treated as the debt instrument's sole payment schedule, only $8,000 of each annual interest payment would be qualified stated interest. Under any other payment schedule, the debt instrument would provide for annual qualified stated interest payments of $10,000. Accordingly, only $8,000 of each annual interest payment is qualified stated interest. Any excess of each annual interest payment over $8,000 is included in the debt instrument's stated redemption price at maturity.

Example 5. De minimis OID; interest holiday—(i) *Facts.* On January 1, 1995, C purchases at original issue, for $97,561, a debt instrument that matures on January 1, 2007, and has a stated principal amount of $100,000, payable at maturity. The debt instrument provides for an initial interest holiday of 1 quarter and quarterly interest payments of $2,500 thereafter (beginning on July 1, 1995). The issue price of the debt instrument is $97,561. C chooses to accrue OID based on quarterly accrual periods.

(ii) *De minimis amount of OID.* But for the interest holiday, all stated interest on the debt instrument would be qualified stated interest. Under paragraph (d)(4) of this section, for purposes of determining whether the debt instrument has de minimis OID, the stated redemption price at maturity of the instrument is $100,061 ($97,561 (issue price) plus $2,500 (the greater of the amount of foregone interest ($2,500) and the amount equal to the excess of the instrument's stated principal amount over its issue price ($2,439)). Thus, the debt instrument is treated as having OID of $2,500 ($100,061 minus $97,561). Because this amount is less than the de minimis amount of $3,001.83 (0.0025 multiplied by $100,061 multiplied by 12 complete years to maturity), the debt instrument is treated as having no OID, and all stated interest is treated as qualified stated interest.

Example 6. De minimis OID; teaser rate—(i) *Facts.* The facts are the same as in *Example 5* of this paragraph (f) except that C uses an initial semiannual accrual period rather than an initial quarterly accrual period.

(ii) *De minimis amount of OID.* The debt instrument provides for an initial teaser rate because the interest rate for the semiannual accrual period is less than the interest rate applicable to the subsequent quarterly accrual periods. But for the initial teaser rate, all stated interest on the debt instrument would be qualified stated interest. Under paragraph (d)(4) of this section, for purposes of determining whether the debt instrument has de minimis OID, the stated redemption price at maturity of the instrument is $100,123.50 ($97,561 (issue price) plus $2,562.50 (the greater of the amount of foregone interest ($2,562.50) and the amount equal to the excess of the instrument's stated principal amount over its issue price ($2,439)). Thus, the debt instrument is treated as having OID of $2,562.50 ($100,123.50 minus $97,561). Because this amount is less than the de minimis amount of $3,003.71 (0.0025 multiplied by $100,123.50 multiplied by 12 complete years to maturity), the debt instrument is treated as having no OID, and all stated interest is treated as qualified stated interest.

[T.D. 8517, 59 FR 4815, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30141, June 14, 1996]

§1.1273–2 Determination of issue price and issue date.

(a) *Debt instruments issued for money*—(1) *Issue price.* If a substantial amount of the debt instruments in an issue is issued for money, the issue price of each debt instrument in the issue is the first price at which a substantial amount of the debt instruments is sold for money. Thus, if an issue consists of a single debt instrument that is issued for money, the issue price of the debt instrument is the amount paid for the instrument. For example, in the case of a debt instrument evidencing a loan to a natural person, the issue price of the instrument is the amount loaned. See §1.1275–2(d) for rules regarding Treasury securities. For purposes of this paragraph (a), money includes functional currency and, in certain circumstances, nonfunctional currency. See §1.988–2(b)(2) for circumstances when nonfunctional currency is treated as money rather than as property.

(2) *Issue date.* The issue date of an issue described in paragraph (a)(1) of this section is the first settlement date or closing date, whichever is applicable, on which a substantial amount of the debt instruments in the issue is sold for money.

(b) *Publicly traded debt instruments issued for property*—(1) *Issue price.* If a substantial amount of the debt instruments in an issue is traded on an established market (within the meaning of paragraph (f) of this section) and the issue is not described in paragraph (a)(1) of this section, the issue price of each debt instrument in the issue is the fair market value of the debt instrument, determined as of the issue date (as defined in paragraph (b)(2) of this section).

(2) *Issue date.* The issue date of an issue described in paragraph (b)(1) of this section is the first date on which a substantial amount of the traded debt instruments in the issue is issued.

(c) *Debt instruments issued for publicly traded property*—(1) *Issue price.* If a substantial amount of the debt instruments in an issue is issued for property that is traded on an established market (within the meaning of paragraph (f) of this section) and the issue is not described in paragraph (a)(1) or (b)(1) of this section, the issue price of each debt instrument in the issue is the fair market value of the property, determined as of the issue date (as defined in paragraph (c)(2) of this section). For purposes of the preceding sentence, property means a debt instrument, stock, security, contract, commodity, or nonfunctional currency. But see §1.988–2(b)(2) for circumstances when nonfunctional currency is treated as money rather than as property.

(2) *Issue date.* The issue date of an issue described in paragraph (c)(1) of this section is the first date on which a

substantial amount of the debt instruments in the issue is issued for traded property.

(d) *Other debt instruments*—(1) *Issue price.* If an issue of debt instruments is not described in paragraph (a)(1), (b)(1), or (c)(1) of this section, the issue price of each debt instrument in the issue is determined as if the debt instrument were a separate issue. If the issue price of a debt instrument that is treated as a separate issue under the preceding sentence is not determined under paragraph (a)(1), (b)(1), or (c)(1) of this section, and if section 1274 applies to the debt instrument, the issue price of the instrument is determined under section 1274. Otherwise, the issue price of the debt instrument is its stated redemption price at maturity under section 1273(b)(4). See section 1274(c) and § 1.1274–1 to determine if section 1274 applies to a debt instrument.

(2) *Issue date.* The issue date of an issue described in paragraph (d)(1) of this section is the date on which the debt instrument is issued for money or in a sale or exchange.

(e) *Special rule for certain sales to bond houses, brokers, or similar persons.* For purposes of determining the issue price and issue date of a debt instrument under this section, sales to bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents, or wholesalers are ignored.

(f) *Traded on an established market (publicly traded)*—(1) *In general.* Property (including a debt instrument described in paragraph (b)(1) of this section) is traded on an established market for purposes of this section if, at any time during the 60-day period ending 30 days after the issue date, the property is described in paragraph (f)(2), (f)(3), (f)(4), or (f)(5) of this section.

(2) *Exchange listed property.* Property is described in this paragraph (f)(2) if it is listed on—

(i) A national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);

(ii) An interdealer quotation system sponsored by a national securities association registered under section 15A of the Securities Exchange Act of 1934 (15 U.S.C. 78o–3); or

(iii) The International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited, the Frankfurt Stock Exchange, the Tokyo Stock Exchange, or any other foreign exchange or board of trade that is designated by the Commissioner in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii) of this chapter).

(3) *Market traded property.* Property is described in this paragraph (f)(3) if it is property of a kind that is traded either on a board of trade designated as a contract market by the Commodities Futures Trading Commission or on an interbank market.

(4) *Property appearing on a quotation medium.* Property is described in this paragraph (f)(4) if it appears on a system of general circulation (including a computer listing disseminated to subscribing brokers, dealers, or traders) that provides a reasonable basis to determine fair market value by disseminating either recent price quotations (including rates, yields, or other pricing information) of one or more identified brokers, dealers, or traders or actual prices (including rates, yields, or other pricing information) of recent sales transactions (a quotation medium). A quotation medium does not include a directory or listing of brokers, dealers, or traders for specific securities, such as yellow sheets, that provides neither price quotations nor actual prices of recent sales transactions.

(5) *Readily quotable debt instruments*—(i) *In general.* A debt instrument is described in this paragraph (f)(5) if price quotations are readily available from dealers, brokers, or traders.

(ii) *Safe harbors.* A debt instrument is not considered to be described in paragraph (f)(5)(i) of this section if—

(A) No other outstanding debt instrument of the issuer (or of any person who guarantees the debt instrument) is described in paragraph (f)(2), (f)(3), or (f)(4) of this section (other traded debt);

(B) The original stated principal amount of the issue that includes the debt instrument does not exceed $25 million;

(C) The conditions and covenants relating to the issuer's performance with respect to the debt instrument are materially less restrictive than the conditions and covenants included in all of the issuer's other traded debt (e.g., the debt instrument is subject to an economically significant subordination provision whereas the issuer's other traded debt is senior); or

(D) The maturity date of the debt instrument is more than 3 years after the latest maturity date of the issuer's other traded debt.

(6) *Effect of certain temporary restrictions on trading.* If there is any temporary restriction on trading a purpose of which is to avoid the characterization of the property as one that is traded on an established market for Federal income tax purposes, then the property is treated as traded on an established market. For purposes of the preceding sentence, a temporary restriction on trading need not be imposed by the issuer.

(7) *Convertible debt instruments.* A debt instrument is not treated as traded on an established market solely because the debt instrument is convertible into property that is so traded.

(g) *Treatment of certain cash payments incident to lending transactions*—(1) *Applicability.* The provisions of this paragraph (g) apply to cash payments made incident to private lending transactions (including seller financing).

(2) *Payments from borrower to lender*—(i) *Money lending transaction.* In a lending transaction to which section 1273(b)(2) applies, a payment from the borrower to the lender (other than a payment for property or for services provided by the lender, such as commitment fees or loan processing costs) reduces the issue price of the debt instrument evidencing the loan. However, solely for purposes of determining the tax consequences to the borrower, the issue price is not reduced if the payment is deductible under section 461(g)(2).

(ii) *Section 1274 transaction.* In a lending transaction to which section 1274 applies, a payment from the buyer-borrower to the seller-lender that is designated as interest or points reduces the stated principal amount of the debt instrument evidencing the loan, but is included in the purchase price of the property. If the payment is deductible under section 461(g)(2), however, the issue price of the debt instrument (as otherwise determined under section 1274 and the rule in the preceding sentence) is increased by the amount of the payment to compute the buyer-borrower's interest deductions under section 163.

(3) *Payments from lender to borrower.* A payment from the lender to the borrower in a lending transaction is treated as an amount loaned.

(4) *Payments between lender and third party.* If, as part of a lending transaction, a party other than the borrower (the third party) makes a payment to the lender, that payment is treated in appropriate circumstances as made from the third party to the borrower followed by a payment in the same amount from the borrower to the lender and governed by the provisions of paragraph (g)(2) of this section. If, as part of a lending transaction, the lender makes a payment to a third party, that payment is treated in appropriate circumstances as an additional amount loaned to the borrower and then paid by the borrower to the third party. The character of the deemed payment between the borrower and the third party depends on the substance of the transaction.

(5) *Examples.* The following examples illustrate the rules of this paragraph (g).

Example 1. Payments from borrower to lender in a cash transaction—(i) *Facts.* A lends $100,000 to B for a term of 10 years. At the time the loan is made, B pays $4,000 in points to A. Assume that the points are not deductible by B under section 461(g)(2) and that the stated redemption price at maturity of the debt instrument is $100,000.

(ii) *Payment results in OID.* Under paragraph (g)(2)(i) of this section, the issue price of B's debt instrument evidencing the loan is $96,000. Because the amount of OID on the debt instrument ($4,000) is more than a de minimis amount of OID, A accounts for the OID under §1.1272–1. B accounts for the OID under §1.163–7.

Example 2. Payments from borrower to lender in a section 1274 transaction—(i) *Facts.* A sells property to B for $1,000,000 in a transaction that is not a potentially abusive situation (within the meaning of §1.1274–3). In consideration for the property, B gives A $300,000 and issues a 5-year debt instrument that has a stated principal amount of $700,000, payable at maturity, and that calls for semiannual payments of interest at a rate of 8.5 percent. In addition to the cash downpayment, B pays A $14,000 designated as points on the loan. Assume that the points are not deductible under section 461(g)(2).

(ii) *Issue price.* Under paragraph (g)(2)(ii) of this section, the stated principal amount of B's debt instrument is −$686,000 ($700,000 minus $14,000). Assuming a test rate of 9 percent, compounded semiannually, the imputed principal amount of B's debt instrument under § 1.1274–2(c)(1) is $686,153. Under § 1.1274–2(b)(1), the issue price of B's debt instrument is the stated principal amount of $686,000. Because the amount of OID on the debt instrument ($700,000 − $686,000, or $14,000) is more than a de minimis amount of OID, A accounts for the OID under § 1.1272–1 and B accounts for the OID under § 1.163–7. B's basis in the property purchased is $1,000,000 ($686,000 debt instrument plus $314,000 cash payments).

Example 3. Payments between lender and third party (seller-paid points)—(i) *Facts.* A sells real property to B for $500,000 in a transaction that is not a potentially abusive situation (within the meaning of § 1.1274–3). B makes a cash down payment of $100,000 and borrows $400,000 of the purchase price from a lender, L, repayable in annual installments over a term of 15 years calling for interest at a rate of 9 percent, compounded annually. As part of the transaction, A makes a payment of $8,000 to L to facilitate the loan to B.

(ii) *Payment results in a de minimis amount of OID.* Under the provisions of paragraphs (g)(2)(i) and (g)(4) of this section, B is treated as having made an $8,000 payment directly to L and a payment of only $492,000 to A for the property. Thus, B's basis in the property is $492,000. The payment to L reduces the issue price of B's debt instrument to $392,000, resulting in $8,000 of OID ($400,000 − $392,000). Because the amount of OID is de minimis under § 1.1273–1(d), L accounts for the de minimis OID under § 1.1273–1(d)(5). But see § 1.1272–3 (election to treat de minimis OID as OID). B accounts for the de minimis OID under § 1.163–7.

(h) *Investment units*—(1) *In general.* Under section 1273(c)(2), an investment unit is treated as if the investment unit were a debt instrument. The issue price of the investment unit is determined under paragraph (a)(1), (b)(1), or (c)(1) of this section, if applicable. The issue price of the investment unit is then allocated between the debt instrument and the property right (or rights) that comprise the unit based on their relative fair market values. If paragraphs (a)(1), (b)(1), and (c)(1) of this section are not applicable, however, the issue price of the debt instrument that is part of the investment unit is determined under section 1273(b)(4) or 1274, whichever is applicable.

(2) *Consistent allocation by holders and issuer.* The issuer's allocation of the issue price of the investment unit is binding on all holders of the investment unit. However, the issuer's determination is not binding on a holder that explicitly discloses that its allocation is different from the issuer's allocation. Unless otherwise provided by the Commissioner, the disclosure must be made on a statement attached to the holder's timely filed Federal income tax return for the taxable year that includes the acquisition date of the investment unit. See § 1.1275–2(e) for rules relating to the issuer's obligation to disclose certain information to holders.

(i) [Reserved]

(j) *Convertible debt instruments.* The issue price of a debt instrument includes any amount paid for an option to convert the instrument into stock (or another debt instrument) of either the issuer or a related party (within the meaning of section 267(b) or 707(b)(1)) or into cash or other property in an amount equal to the approximate value of such stock (or debt instrument).

(k) *Below-market loans subject to section 7872(b).* The issue price of a below-market loan subject to section 7872(b) (a term loan other than a gift loan) is the issue price determined under this section, reduced by the excess amount determined under section 7872(b)(1).

(l) [Reserved]

(m) *Treatment of amounts representing pre-issuance accrued interest*—(1) *Applicability.* Paragraph (m)(2) of this section provides an alternative to the general rule of this section for determining the issue price of a debt instrument if—

(i) A portion of the initial purchase price of the instrument is allocable to interest that has accrued prior to the issue date (pre-issuance accrued interest); and

(ii) The instrument provides for a payment of stated interest on the first payment date within 1 year of the issue date that equals or exceeds the amount of the pre-issuance accrued interest.

(2) *Exclusion of pre-issuance accrued interest from issue price.* If a debt instrument meets the requirements of paragraph (m)(1) of this section, the instrument's issue price may be computed by subtracting from the issue price (as otherwise computed under this section) the amount of pre-issuance accrued interest. If the issue price of the debt instrument is computed in this manner, a portion of the stated interest payable on the first payment date must be treated as a return of the excluded pre-issuance accrued interest, rather than as an amount payable on the instrument.

(3) *Example.* The following example illustrates the rule of paragraph (m) of this section.

Example: (i) *Facts.* On January 15, 1995, A purchases at original issue, for $1,005, B corporation's debt instrument. The debt instrument provides for a payment of principal of $1,000 on January 1, 2005, and provides for semiannual interest payments of $60 on January 1 and July 1 of each year, beginning on July 1, 1995.

(ii) *Determination of pre-issuance accrued interest.* Under paragraphs (m)(1) and (m)(2) of this section, $5 of the $1,005 initial purchase price of the debt instrument is allocable to pre-issuance accrued interest. Accordingly, the debt instrument's issue price may be computed by subtracting the amount of pre-issuance accrued interest ($5) from the issue price otherwise computed under this section ($1,005), resulting in an issue price of $1,000. If the issue price is computed in this manner, $5 of the $60 payment made on July 1, 1995, must be treated as a repayment by B of the pre-issuance accrued interest.

[T.D. 8517, 59 FR 4817, Feb. 2, 1994]

§1.1274–1 Debt instruments to which section 1274 applies.

(a) *In general.* Subject to the exceptions and limitations in paragraph (b) of this section, section 1274 and this section apply to any debt instrument issued in consideration for the sale or exchange of property. For purposes of section 1274, property includes debt instruments and investment units, but does not include money, services, or the right to use property. For the treatment of certain obligations given in exchange for services or the use of property, see sections 404 and 467. For purposes of this paragraph (a), money includes functional currency and, in certain circumstances, nonfunctional currency. See §1.988–2(b)(2) for circumstances when nonfunctional currency is treated as money rather than as property.

(b) *Exceptions*—(1) *Debt instrument with adequate stated interest and no OID.* Section 1274 does not apply to a debt instrument if—

(i) All interest payable on the instrument is qualified stated interest;

(ii) The stated rate of interest is at least equal to the test rate of interest (as defined in §1.1274–4);

(iii) The debt instrument is not issued in a potentially abusive situation (as defined in §1.1274–3); and

(iv) No payment from the buyer-borrower to the seller-lender designated as points or interest is made at the time of issuance of the debt instrument.

(2) *Exceptions under sections 1274(c)(1)(B), 1274(c)(3), 1274A(c), and 1275(b)(1)*—(i) *In general.* Sections 1274(c)(1)(B), 1274(c)(3), 1274A(c), and 1275(b)(1) describe certain transactions to which section 1274 does not apply. This paragraph (b)(2) provides certain rules to be used in applying those exceptions.

(ii) *Special rules for certain exceptions under section 1274(c)(3)*—(A) *Determination of sales price for certain sales of farms.* For purposes of section 1274(c)(3)(A), the determination as to whether the sales price cannot exceed $1,000,000 is made without regard to any other exception to, or limitation on, the applicability of section 1274 (e.g., without regard to the special rules regarding sales of principal residences and land transfers between related persons). In addition, the sales price is determined without regard to section 1274 and without regard to any stated interest. The sales price includes the amount of any liability included in the amount realized from the sale or exchange. See §1.1001–2.

(B) *Sales involving total payments of $250,000 or less.* Under section 1274(c)(3)(C), the determination of the amount of payments due under all debt instruments and the amount of other consideration to be received is made as of the date of the sale or exchange or, if earlier, the contract date. If the precise amount due under any debt instrument or the precise amount of any other consideration to be received cannot be determined as of that date, section 1274(c)(3)(C) applies only if it can be determined that the maximum of the aggregate amount of payments due under the debt instruments and other consideration to be received cannot exceed $250,000. For purposes of section 1274(c)(3)(C), if a liability is assumed or property is taken subject to a liability, the aggregate amount of payments due includes the outstanding principal balance or adjusted issue price (in the case of an obligation originally issued at a discount) of the obligation.

(C) *Coordination with section 1273 and § 1.1273–2.* In accordance with section 1274(c)(3)(D), section 1274 and this section do not apply if the issue price of a debt instrument issued in consideration for the sale or exchange of property is determined under paragraph (a)(1), (b)(1), or (c)(1) of § 1.1273–2.

(3) *Other exceptions to section 1274*—(i) *Holders of certain below-market instruments.* Section 1274 does not apply to any holder of a debt instrument that is issued in consideration for the sale or exchange of personal use property (within the meaning of section 1275(b)(3)) in the hands of the issuer and that evidences a below-market loan described in section 7872(c)(1).

(ii) *Transactions involving certain demand loans.* Section 1274 does not apply to any debt instrument that evidences a demand loan that is a below-market loan described in section 7872(c)(1).

(iii) *Certain transfers subject to section 1041.* Section 1274 does not apply to any debt instrument issued in consideration for a transfer of property subject to section 1041 (relating to transfers of property between spouses or incident to divorce).

(c) *Examples.* The following examples illustrate the rules of this section.

Example 1. Single stated rate paid semiannually. A debt instrument issued in consideration for the sale of nonpublicly traded property in a transaction that is not a potentially abusive situation calls for the payment of a principal amount of $1,000,000 at the end of a 10-year term and 20 semiannual interest payments of $60,000. Assume that the test rate of interest is 12 percent, compounded semiannually. The debt instrument is not subject to section 1274 because it provides for interest equal to the test rate and all interest payable on the instrument is qualified stated interest.

Example 2. Sale of farm for debt instrument with contingent interest—(i) *Facts.* On July 1, 1995, A, an individual, sells to B land used as a farm within the meaning of section 6420(c)(2). As partial consideration for the sale, B issues a debt instrument calling for a single $500,000 payment due in 10 years unless profits from the land in each of the 10 years preceding maturity of the debt instrument exceed a specified amount, in which case B is to make a payment of $1,200,000. The debt instrument does not provide for interest.

(ii) *Total payments may exceed $1,000,000.* Even though the total payments ultimately payable under the contract may be less than $1,000,000, at the time of the sale or exchange it cannot be determined that the sales price cannot exceed $1,000,000. Thus, the sale of the land used as a farm is not an excepted transaction described in section 1274(c)(3)(A).

Example 3. Sale between related parties subject to section 483(e)—(i) *Facts.* On July 1, 1995, A, an individual, sells land (not used as a farm within the meaning of section 6420(c)(2)) to A's child B for $650,000. In consideration for the sale, B issues a 10-year debt instrument to A that calls for a payment of $650,000. No other consideration is given. The debt instrument does not provide for interest.

(ii) *Treatment of debt instrument.* For purposes of section 483(e), the $650,000 debt instrument is treated as two separate debt instruments: a $500,000 debt instrument and a $150,000 debt instrument. The $500,000 debt instrument is subject to section 483(e), and accordingly is covered by the exception from section 1274 described in section 1274(c)(3)(F). Because the amount of the payments due as consideration for the sale exceeds $250,000, however, the $150,000 debt instrument is subject to section 1274.

[T.D. 8517, 59 FR 4820, Feb. 2, 1994]

§ 1.1274–2 Issue price of debt instruments to which section 1274 applies.

(a) *In general.* If section 1274 applies to a debt instrument, section 1274 and this section determine the issue price of the debt instrument. For rules relating to the determination of the amount and timing of OID to be included in income, see section 1272 and the regulations thereunder.

(b) *Issue price*—(1) *Debt instruments that provide for adequate stated interest; stated principal amount.* The issue price of a debt instrument that provides for adequate stated interest is the stated principal amount of the debt instrument. For purposes of section 1274, the stated principal amount of a debt instrument is the aggregate amount of all payments due under the debt instrument, excluding any amount of stated interest. Under §1.1273–2(g)(2)(ii), however, the stated principal amount of a debt instrument is reduced by any payment from the buyer- borrower to the seller-lender that is designated as interest or points. See *Example 2* of §1.1273–2(g)(5).

(2) *Debt instruments that do not provide for adequate stated interest; imputed principal amount.* The issue price of a debt instrument that does not provide for adequate stated interest is the imputed principal amount of the debt instrument.

(3) *Debt instruments issued in a potentially abusive situation; fair market value.* Notwithstanding paragraphs (b)(1) and (b)(2) of this section, in the case of a debt instrument issued in a potentially abusive situation (as defined in §1.1274–3), the issue price of the debt instrument is the fair market value of the property received in exchange for the debt instrument, reduced by the fair market value of any consideration other than the debt instrument issued in consideration for the sale or exchange.

(c) *Determination of whether a debt instrument provides for adequate stated interest*—(1) *In general.* A debt instrument provides for adequate stated interest if its stated principal amount is less than or equal to its imputed principal amount. Imputed principal amount means the sum of the present values, as of the issue date, of all payments, including payments of stated interest, due under the debt instrument (determined by using a discount rate equal to the test rate of interest as determined under §1.1274–4). If a debt instrument has a single fixed rate of interest that is paid or compounded at least annually, and that rate is equal to or greater than the test rate, the debt instrument has adequate stated interest.

(2) *Determination of present value.* The present value of a payment is determined by discounting the payment from the date it becomes due to the date of the sale or exchange at the test rate of interest. To determine present value, a compounding period must be selected, and the test rate must be based on the same compounding period.

(d) *Treatment of certain options.* This paragraph (d) provides rules for determining the issue price of a debt instrument to which section 1274 applies (other than a debt instrument issued in a potentially abusive situation) that is subject to one or more options described in both paragraphs (c)(1) and (c)(5) of §1.1272–1. Under this paragraph (d), an issuer will be deemed to exercise or not exercise an option or combination of options in a manner that minimizes the instrument's imputed principal amount, and a holder will be deemed to exercise or not exercise an option or combination of options in a manner that maximizes the instrument's imputed principal amount. If both the issuer and the holder have options, the rules of this paragraph (d) are applied to the options in the order that they may be exercised. Thus, the deemed exercise of one option may eliminate other options that are later in time. See §1.1272–1(c)(5) to determine the debt instrument's yield and maturity for purposes of determining the accrual of OID with respect to the instrument.

(e) *Mandatory sinking funds.* In determining the issue price of a debt instrument to which section 1274 applies (other than a debt instrument issued in a potentially abusive situation) and that is subject to a mandatory sinking fund provision described in §1.1272–1(c)(3), the mandatory sinking fund provision is ignored.

(f) *Treatment of variable rate debt instruments*—(1) *Stated interest at a qualified floating rate*—(i) *In general.* For purposes of paragraph (c) of this section, the imputed principal amount of a variable rate debt instrument (within the meaning of §1.1275–5(a)) that provides for stated interest at a qualified floating rate (or rates) is determined by assuming that the instrument provides for a fixed rate of interest for each accrual period to which a qualified floating rate applies. For purposes of the preceding sentence, the assumed fixed rate in each accrual period is the greater of—

(A) The value of the applicable qualified floating rate as of the first date on which there is a binding written contract that substantially sets forth the terms under which the sale or exchange is ultimately consummated; or

(B) The value of the applicable qualified floating rate as of the date on which the sale or exchange occurs.

(ii) *Interest rate restrictions.* Notwithstanding paragraph (f)(1)(i) of this section, if, as a result of interest rate restrictions (such as an interest rate cap), the expected yield of the debt instrument taking the restrictions into account is significantly less than the expected yield of the debt instrument without regard to the restrictions, the interest payments on the debt instrument (other than any fixed interest payments) are treated as contingent payments. Reasonably symmetric interest rate caps and floors, or reasonably symmetric governors, that are fixed throughout the term of the debt instrument do not result in the debt instrument being subject to this rule.

(2) *Stated interest at a single objective rate.* For purposes of paragraph (c) of this section, the imputed principal amount of a variable rate debt instrument (within the meaning of § 1.1275–5(a)) that provides for stated interest at a single objective rate is determined by treating the interest payments as contingent payments.

(g) *Treatment of contingent payment debt instruments.* Notwithstanding paragraph (b) of this section, if a debt instrument subject to section 1274 provides for one or more contingent payments, the issue price of the debt instrument is the lesser of the instrument's noncontingent principal payments and the sum of the present values of the noncontingent payments (as determined under paragraph (c) of this section). However, if the debt instrument is issued in a potentially abusive situation, the issue price of the debt instrument is the fair market value of the noncontingent payments. For additional rules relating to a debt instrument that provides for one or more contingent payments, see § 1.1275–4. This paragraph (g) applies to debt instruments issued on or after August 13, 1996.

(h) *Examples.* The following examples illustrate the rules of this section. Each example assumes a 30-day month, 360-day year. In addition, each example assumes that the debt instrument is not a qualified debt instrument (as defined in section 1274A(b)) and is not issued in a potentially abusive situation.

Example 1. Debt instrument without a fixed rate over its entire term—(i) *Facts.* On January 1, 1995, A sells nonpublicly traded property to B for a stated purchase price of $3,500,000. In consideration for the sale, B makes a down payment of $500,000 and issues a 10-year debt instrument with a stated principal amount of $3,000,000, payable at maturity. The debt instrument calls for no interest in the first 2 years and interest at a rate of 15 percent payable annually over the remaining 8 years of the debt instrument. The first interest payment of $450,000 is due on December 31, 1997, and the last interest payment is due on December 31, 2004, together with the $3,000,000 payment of principal. Assume that the test rate of interest applicable to the debt instrument is 10.5 percent, compounded annually.

(ii) *Applicability of section 1274.* Because the debt instrument does not provide for any interest during the first 2 years, none of the interest on the debt instrument is qualified stated interest. Therefore, the issue price of the debt instrument is determined under section 1274. See § 1.1274–1(b)(1). If the debt instrument has adequate stated interest, the issue price of the instrument is its stated principal amount. Otherwise, the issue price of the debt instrument is its imputed principal amount. The debt instrument has adequate stated interest only if the stated principal amount is less than or equal to the imputed principal amount.

(iii) *Determination of imputed principal amount.* To compute the imputed principal amount of the debt instrument, all payments due under the debt instrument are discounted back to the issue date at 10.5 percent, compounded annually, as follows:

(A) The present value of the $3,000,000 principal payment payable on December 31, 2004, is $1,105,346.59, determined as follows:

$$\$1{,}105{,}346.59 = \frac{\$3{,}000{,}000}{(1+.105/1)^{10}}$$

(B) The present value of the eight interest payments of $450,000 as of January 1, 1997, is $2,357,634.55, determined as follows:

$$\$2{,}357{,}634.55 = \$450{,}000 \times \frac{1-(1+.105/1)^{-8}}{(.105/1)}$$

(C) The present value of this interim amount as of January 1, 1995, is $1,930,865.09, determined as follows:

$$\$1{,}930{,}865.09 = \frac{\$2{,}357{,}634.55}{(1+.105/1)^{2}}$$

(iv) *Determination of issue price.* The debt instrument's imputed principal amount (that is, the present value of all payments due under the debt instrument) is $3,036,211.68 ($1,105,346.59+$1,930,865.09). Because the stated principal amount ($3,000,000) is less than the imputed principal amount, the debt instrument provides for adequate stated interest. Therefore, the issue price of the debt instrument is its stated principal amount ($3,000,000).

Example 2. Debt instrument subject to issuer call option—(i) *Facts.* On January 1, 1995, in partial consideration for the sale of nonpublicly traded property, H corporation issues to G a 10-year debt instrument, maturing on January 1, 2005, with a stated principal amount of $10,000,000, payable on that date. The debt instrument provides for annual payments of interest of 8 percent for the first 5 years and 14 percent for the final 5 years, payable on January 1 of each year, beginning on January 1, 1996. In addition the debt instrument provides H with the unconditional option to call (prepay) the debt instrument at the end of 5 years for its stated principal amount of $10,000,000. Assume that the Federal mid-term and long-term rates applicable to the sale based on annual compounding are 9 percent and 10 percent, respectively.

(ii) *Option presumed exercised.* Assuming exercise of the call option, the imputed principal amount as determined under paragraph (d) of this section is $9,611,034.87 (the present value of all of the payments due within a 5-year term discounted at a test rate of 9 percent, compounded annually). Assuming nonexercise of the call option, the imputed principal amount is $10,183,354.78 (the present value of all of the payments due within a 10-year term discounted at a test rate of 10 percent, compounded annually). For purposes of determining the imputed principal amount, the option is presumed exercised because the imputed principal amount, assuming exercise of the option, is less than the imputed principal amount, assuming the option is not exercised. Because the option is presumed exercised, the debt instrument fails to provide for adequate stated interest because the imputed principal amount ($9,611,034.87) is less than the stated principal amount ($10,000,000). Thus, the issue price of the debt instrument is $9,611,034.87.

Example 3. Variable rate debt instrument with a single rate over its entire term—(i) *Facts.* On January 1, 1995, A sells B nonpublicly traded property. In partial consideration for the sale, B issues a debt instrument in the principal amount of $1,000,000, payable in 5 years. The debt instrument calls for interest payable monthly at a rate of 1 percentage point above the average prime lending rate of a major bank for the month preceding the month of the interest payment. Assume that the test rate of interest applicable to the debt instrument is 10.5 percent, compounded monthly. Assume also that 1 percentage point above the prime lending rate of the designated bank on the date of the sale is 12.5 percent, compounded monthly, which is greater than 1 percentage point above the prime lending rate of the designated bank on the first date on which there is a binding written contract that substantially sets forth the terms under which the sale is consummated.

(ii) *Debt instrument has adequate stated interest.* The debt instrument is a variable rate debt instrument (within the meaning of §1.1275–5) that provides for stated interest at a qualified floating rate. Under paragraph (f)(1)(i) of this section, the debt instrument is treated as if it provided for a fixed rate of interest equal to 12.5 percent, compounded monthly. Because the test rate of interest is 10.5 percent, compounded monthly, the debt instrument provides for adequate stated interest.

Example 4. Debt instrument with a capped variable rate. On July 1, 1995, A sells nonpublicly traded property to B in return for a debt instrument with a stated principal amount of $10,000,000, payable on July 1, 2005. Interest is payable on July 1 of each year, beginning on July 1, 1996, at the Federal short-term rate for June of the same year. The debt instrument provides, however, that the interest rate cannot rise above 8.5 percent, compounded annually. Assume that, as of the date the test rate of interest for the debt instrument is determined, the Federal short-term rate is 8 percent, compounded annually. Assume further that, as a result of the interest rate cap of 8.5 percent, compounded annually, the expected yield of the debt instrument is significantly less than the expected yield of the debt instrument if it did not include the interest rate cap. Under paragraph (f)(1)(ii) of this section, the variable payments are treated as contingent payments for purposes of this section.

(i) [Reserved]

(j) *Special rules for tax-exempt obligations*—(1) *Certain variable rate debt instruments.* Notwithstanding paragraph (b) of this section, if a tax-exempt obligation (as defined in section 1275(a)(3)) is a variable rate debt instrument (within the meaning of §1.1275–5) that pays interest at an objective rate and is subject to section 1274, the issue price of the obligation is the greater of the obligation's fair market value and its stated principal amount.

(2) *Contingent payment debt instruments.* Notwithstanding paragraphs (b) and (g) of this section, if a tax-exempt obligation (as defined in section 1275(a)(3)) is subject to section 1274 and § 1.1275–4, the issue price of the obligation is the fair market value of the obligation. However, in the case of a tax-exempt obligation that is subject to § 1.1275–4(d)(2) (an obligation that provides for interest-based or revenue-based payments), the issue price of the obligation is the greater of the obligation's fair market value and its stated principal amount.

(3) *Effective date.* This paragraph (j) applies to debt instruments issued on or after August 13, 1996.

[T.D. 8517, 59 FR 4821, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30141, June 14, 1996]

§ 1.1274–3 Potentially abusive situations defined.

(a) *In general.* For purposes of section 1274, a potentially abusive situation means-—

(1) A tax shelter (as defined in section 6662(d)(2)(C)(ii)); or

(2) Any other situation involving—

(i) A recent sales transaction;

(ii) Nonrecourse financing;

(iii) Financing with a term in excess of the useful life of the property; or

(iv) A debt instrument with clearly excessive interest.

(b) *Operating rules*—(1) *Debt instrument exchanged for nonrecourse financing.* Nonrecourse financing does not include an exchange of a nonrecourse debt instrument for an outstanding recourse or nonrecourse debt instrument.

(2) *Nonrecourse debt with substantial down payment.* Nonrecourse financing does not include a sale or exchange of a real property interest financed by a nonrecourse debt instrument if, in addition to the nonrecourse debt instrument, the purchaser makes a down payment in money that equals or exceeds 20 percent of the total stated purchase price of the real property interest. For purposes of the preceding sentence, a real property interest means any interest, other than an interest solely as a creditor, in real property.

(3) *Clearly excessive interest.* Interest on a debt instrument is clearly excessive if the interest, in light of the terms of the debt instrument and the creditworthiness of the borrower, is clearly greater than the arm's length amount of interest that would have been charged in a cash lending transaction between the same two parties.
