(iii) In lieu of the rules provided in subdivisions (i) and (ii) of this subparagraph, the allocation of each annual payment between section 736 (a) and (b) may be made in any manner to which all the remaining partners and the withdrawing partner or his successor in interest agree, provided that the total amount allocated to property under section 736(b) does not exceed the fair market value of such property at the date of death or retirement.

(6) Except to the extent section 751(b) applies, the amount of any gain or loss with respect to payments under section 736(b) for a retiring or deceased partner's interest in property for each year

of payment shall be determined under section 731. However, where the total of section 736(b) payments is a fixed sum, a retiring partner or a deceased partner's successor in interest may elect (in his tax return for the first taxable year for which he receives such payments), to report and to measure the amount of any gain or loss by the difference between:

(i) The amount treated as a distribution under section 736(b) in that year, and

(ii) The portion of the adjusted basis of the partner for his partnership interest attributable to such distribution (i.e., the amount which bears the same proportion to the partner's total adjusted basis for his partnership interest as the amount distributed under section 736(b) in that year bears to the total amount to be distributed under section 736(b)).

A recipient who elects under this subparagraph shall attach a statement to his tax return for the first taxable year for which he receives such payments, indicating his election and showing the computation of the gain included in gross income.

(7) The provisions of this paragraph may be illustrated by the following examples:

Example 1. Partnership ABC is a personal service partnership and its balance sheet is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$13,000	$13,000
Unrealized receivables	0	30,000
Capital and section 1231 assets	20,000	23,000
Total	33,000	66,000

LIABILITIES AND CAPITAL

	Per books	Value
Liabilities	$3,000	$3,000
Capital:		
A	10,000	21,000
B	10,000	21,000
C	10,000	21,000
Total	33,000	66,000

Partner A retires from the partnership in accordance with an agreement whereby his share of liabilities ($1,000) is assumed. In addition he is to receive $9,000 in the year of retirement plus $10,000 in each of the two succeeding years. Thus, the total that A receives for his partnership interest is $30,000 ($29,000 in cash and $1,000 in liabilities assumed). Under the agreement terminating A's interest, the value of A's interest in section 736(b) partnership property is $12,000 (one-third of $36,000, the sum of $13,000 cash and $23,000, the fair market value of capital and section 1231 assets). A's share in unrealized receivables is not included in his interest in partnership property described in section 736(b). Since the basis of A's interest is $11,000 ($10,000 plus $1,000, his share of partnership liabilities), he will realize a capital gain of $1,000 ($12,000 minus $11,000) from the disposition of his interest in partnership property. The remaining $18,000 ($30,000 minus $12,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c). The payment for the first year is $10,000, consisting of $9,000 in cash, plus $1,000 in liability assumed (section 752(b)). Thus, unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, each annual payment of $10,000 will be allocated as follows: $6,000 (18,000/30,000 of $10,000) is a section 736(a)(2) payment and $4,000 (12,000/30,000 of $10,000) is a payment for an interest in section 736(b) partnership property. (The partnership may deduct the $6,000 guaranteed payment made to A in each of the 3 years.) The gain on the payments for partnership property will be determined under section 731, as provided in subparagraph (6) of this paragraph. A will treat only $4,000 of each payment as a distribution in a series in liquidation of his entire interest and, under section 731, will have a capital gain of $1,000 when the last payment is made. However, if A so elects, as provided in subparagraph (6) of this paragraph, he may treat such gain as follows: Of each $4,000 payment attributable to A's interest in partnership property, $333 is capital gain (one-third of the total capital gain of $1,000), and $3,667 is a return of capital.

Example 2. Assume the same facts as in example 1 of this subparagraph except that the agreement between the partners provides for payments to A for 3 years of a percentage of annual income instead of a fixed amount. Unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, all payments received by A up to $12,000 shall be treated under section 736(b) as payments for A's interest in partnership property. His gain of $1,000 will be taxed only after he has received his full basis under section 731. Since the payments are not fixed in amount, the election provided in subparagraph (6) of this paragraph is not available. Any payments in excess of $12,000 shall be treated as a distributive share of partnership income to A under section 736(a)(1).

Example 3. Assume the same facts as in example 1 of this subparagraph except that the partnership agreement provides that the payment for A's interest in partnership property shall include payment for his interest in the good will of the partnership. At the time of A's retirement, the partners determine the value of partnership good will to be $9,000. The value of A's interest in partnership property described in section 736(b) is thus $15,000 (one-third of $45,000, the sum of $13,000 cash, plus $23,000, the value of capital and section 1231 assets, plus $9,000 good will). From the disposition of his interest in partnership property, A will realize a capital gain of $4,000 ($15,000, minus $11,000) the basis of his interest. The remaining $15,000 ($30,000 minus $15,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

Example 4. Assume the same facts as in example 1 of this subparagraph except that the capital and section 1231 assets consist of an item of section 1245 property (as defined in section 1245(a)(3)). Assume further that under paragraph (c)(4) of §1.751–1 the section 1245 property is an unrealized receivable to the extent of $2,000. Therefore, the value of A's interest in section 736(b) partnership property is only $11,333 (one-third of $34,000, the sum of $13,000 cash and $21,000, the fair market value of section 1245 property to the extent not an unrealized receivable). From the disposition of his interest in partnership property, A will realize a capital gain of $333 ($11,333 minus $11,000, the basis of his interest). The remaining $18,667 ($30,000 minus $11,333) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

(c) *Cross reference.* See section 753 for treatment of payments under section 736(a) as income in respect of a decedent under section 691.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8574, July 7, 1965]

§1.737–1 Recognition of precontribution gain.

(a) *Determination of gain*—(1) *In general.* A partner that receives a distribution of property (other than money) must recognize gain under section 737 and this section in an amount equal to the lesser of the excess distribution (as defined in paragraph (b) of this section) or the partner's net precontribution gain (as defined in paragraph (c) of this section). Gain recognized under section 737 and this section is in addition to any gain recognized under section 731.

(2) *Transactions to which section 737 applies.* Section 737 and this section apply only to the extent that a distribution by a partnership is a distribution to a partner acting in the capacity of a partner within the meaning of section 731, except that section 737 and this section do not apply to the extent that section 751(b) applies to the distribution.

(b) *Excess distribution*—(1) *Definition.* The excess distribution is the amount (if any) by which the fair market value of the distributed property (other than money) exceeds the distributee partner's adjusted tax basis in the partner's partnership interest.

(2) *Fair market value of property.* The fair market value of the distributed property is the price at which the property would change hands between a willing buyer and a willing seller at the time of the distribution, neither being under any compulsion to buy or sell and both having reasonable knowledge of the relevant facts. The fair market value that a partnership assigns to distributed property will be regarded as correct, provided that the value is reasonably agreed to among the partners in an arm's-length negotiation and the partners have sufficiently adverse interests.

(3) *Distributee partner's adjusted tax basis*—(i) *General rule.* In determining the amount of the excess distribution, the distributee partner's adjusted tax basis in the partnership interest includes any basis adjustment resulting from the distribution that is subject to section 737 (for example, adjustments required under section 752) and from any other distribution or transaction that is part of the same distribution, except for—

(A) The increase required under section 737(c)(1) for the gain recognized by the partner under section 737; and

(B) The decrease required under section 733(2) for any property distributed to the partner other than property previously contributed to the partnership by the distributee partner. See §1.704–4(e)(1) for a rule in the context of section 704(c)(1)(B). See also §1.737–3(b)(2) for a special rule for determining a partner's adjusted tax basis in distributed property previously contributed by the partner to the partnership.

(ii) *Advances or drawings.* The distributee partner's adjusted tax basis in the partnership interest is determined as of the last day of the partnership's taxable year if the distribution to which section 737 applies is properly characterized as an advance or drawing against the partner's distributive share of income. See § 1.731–1(a)(1)(ii).

(c) *Net precontribution gain*—(1) *General rule.* The distributee partner's net precontribution gain is the net gain (if any) that would have been recognized by the distributee partner under section 704(c)(1)(B) and § 1.704–4 if all property that had been contributed to the partnership by the distributee partner within five years of the distribution and is held by the partnership immediately before the distribution had been distributed by the partnership to another partner other than a partner who owns, directly or indirectly, more than 50 percent of the capital or profits interest in the partnership. See § 1.704–4 for provisions determining a contributing partner's gain or loss under section 704(c)(1)(B) on an actual distribution of contributed section 704(c) property to another partner.

(2) *Special rules*—(i) *Property contributed on or before October 3, 1989.* Property contributed to the partnership on or before October 3, 1989, is not taken into account in determining a partner's net precontribution gain. See § 1.704–4(c)(1) for a similar rule in the context of section 704(c)(1)(B).

(ii) *Section 734(b)(1)(A) adjustments.* For distributions to a distributee partner of money by a partnership with a section 754 election in effect that are part of the same distribution as the distribution of property subject to section 737, for purposes of paragraph (a) and (c)(1) of this section the distributee partner's net precontribution gain is reduced by the basis adjustments (if any) made to section 704(c) property contributed by the distributee partner under section 734(b)(1)(A). See § 1.737–3(c)(4) for rules regarding basis adjustments for partnerships with a section 754 election in effect.

(iii) *Transfers of a partnership interest.* The transferee of all or a portion of a contributing partner's partnership interest succeeds to the transferor's net precontribution gain, if any, in an amount proportionate to the interest transferred. See § 1.704–3(a)(7) and § 1.704–4(d)(2) for similar provisions in the context of section 704(c)(1)(A) and section 704(c)(1)(B).

(iv) *Section 704(c)(1)(B) gain recognized in related distribution.* A distributee partner's net precontribution gain is determined after taking into account any gain or loss recognized by the partner under section 704(c)(1)(B) and § 1.704–4 (or that would have been recognized by the partner except for the like-kind exception in section 704(c)(2) and § 1.704–4(d)(3)) on an actual distribution to another partner of section 704(c) property contributed by the distributee partner that is part of the same distribution as the distribution to the distributee partner.

(v) *Section 704(c)(2) disregarded.* A distributee partner's net precontribution gain is determined without regard to the provisions of section 704(c)(2) and § 1.704–4(d)(3) in situations in which the property contributed by the distributee partner is not actually distributed to another partner in a distribution related to the section 737 distribution.

(d) *Character of gain.* The character of the gain recognized by the distributee partner under section 737 and this section is determined by, and is proportionate to, the character of the partner's net precontribution gain. For this purpose, all gains and losses on section 704(c) property taken into account in determining the partner's net precontribution gain are netted according to their character. Character is determined at the partnership level for this purpose, and any character with a net negative amount is disregarded. The character of the partner's gain under section 737 is the same as, and in proportion to, any character with a net positive amount. Character for this purpose is determined as if the section 704(c) property had been sold by the partnership to an unrelated third party at the time of the distribution and includes any item that would have been taken into account separately by the contributing partner under section 702(a) and § 1.702–1(a).

(e) *Examples.* The following examples illustrate the provisions of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

Example 1. Calculation of excess distribution and net precontribution gain. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, depreciable real property with a fair market value of $30,000 and an adjusted tax basis of $20,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of $30,000. C contributes $30,000 cash.

(ii) Property A has 10 years remaining on its cost recovery schedule and is depreciated using the straight-line method. The partnership uses the traditional method for allocating items under section 704(c) described in §1.704–3(b)(1) for Property A. The partnership has book depreciation of $3,000 per year (10 percent of the $30,000 book basis in Property A) and each partner is allocated $1,000 of book depreciation per year (one-third of the total annual book depreciation of $3,000). The partnership also has tax depreciation of $2,000 per year (10 percent of the $20,000 adjusted tax basis in Property A). This $2,000 tax depreciation is allocated equally between B and C, the noncontributing partners with respect to Property A.

(iii) At the end of 1997, the book value of Property A is $21,000 ($30,000 initial book value less $9,000 aggregate book depreciation) and its adjusted tax basis is $14,000 ($20,000 initial tax basis less $6,000 aggregate tax depreciation).

(iv) On December 31, 1997, Property B is distributed to A in complete liquidation of A's partnership interest. The adjusted tax basis of A's partnership interest at that time is $20,000. The amount of the excess distribution is $10,000, the difference between the fair market value of the distributed Property B ($30,000) and A's adjusted tax basis in A's partnership interest ($20,000). A's net precontribution gain is $7,000, the difference between the book value of Property A ($21,000) and its adjusted tax basis at the time of the distribution ($14,000). A recognizes gain of $7,000 on the distribution, the lesser of the excess distribution and the net precontribution gain.

Example 2. Determination of distributee partner's basis. (i) On January 1, 1995, A, B, and C form general partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $4,000. B and C each contributes $10,000 cash.

(ii) The partnership purchases Property B, nondepreciable real property with a fair market value of $9,000, subject to a $9,000 nonrecourse liability. This nonrecourse liability is allocated equally among the partners under section 752, increasing A's adjusted tax basis in A's partnership interest from $4,000 to $7,000.

(iii) On December 31, 1998, A receives $2,000 cash and Property B, subject to the $9,000 liability, in a current distribution.

(iv) In determining the amount of the excess distribution, the adjusted tax basis of A's partnership interest is adjusted to take into account the distribution of money and the shift in liabilities. A's adjusted tax basis is therefore increased to $11,000 for this purpose ($7,000 initial adjusted tax basis, less $2,000 distribution of money, less $3,000 (decrease in A's share of the $9,000 partnership liability), plus $9,000 (increase in A's individual liabilities)). As a result of this basis adjustment, the adjusted tax basis of A's partnership interest ($11,000) is greater than the fair market value of the distributed property ($9,000) and therefore, there is no excess distribution. A recognizes no gain under section 737.

Example 3. Net precontribution gain reduced for gain recognized under section 704(c)(1)(B). (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Properties A1 and A2, nondepreciable real properties located in the United States each with a fair market value of $10,000 and an adjusted tax basis of $6,000. B contributes Property B, nondepreciable real property located outside the United States, with a fair market value and adjusted tax basis of $20,000. C contributes $20,000 cash.

(ii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest and, as part of the same distribution, Property A1 is distributed to B in a current distribution.

(iii) A's net precontribution gain before the distribution is $8,000 ($20,000 fair market value of Properties A1 and A2 less $12,000 adjusted tax basis of such properties). A recognizes $4,000 of gain under section 704(c)(1)(B) and §1.704–4 on the distribution of Property A1 to B ($10,000 fair market value of Property A1 less $6,000 adjusted tax basis of Property A1). This gain is taken into account in determining A's excess distribution and net precontribution gain. As a result, A's net precontribution gain is reduced from $8,000 to $4,000, and the adjusted tax basis in A's partnership interest is increased by $4,000 to $16,000.

(iv) A recognizes gain of $4,000 on the receipt of Property B under section 737, an amount equal to the lesser of the excess distribution of $4,000 ($20,000 fair market value of Property B less $16,000 adjusted tax basis of A's interest in the partnership) and A's remaining net precontribution gain of $4,000.

Example 4. Character of gain. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable property to the partnership:

	Fair market value	Adjusted tax basis
Property A1	$30,000	$20,000
Property A2	30,000	38,000
Property A3	10,000	9,000

(ii) The character of gain or loss on Property A1 and Property A2 is long-term, U.S.-source capital gain or loss. The character of gain on Property A3 is long-term, foreign-source capital gain. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of $70,000. C contributes $70,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes $3,000 of gain under section 737, an amount equal to the excess distribution of $3,000 ($70,000 fair market value of Property B less $67,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of $3,000 ($70,000 aggregate fair market value of properties contributed by A less $67,000 aggregate adjusted tax basis of such properties).

(iv) In determining the character of A's gain, all gains and losses on property taken into account in determining A's net precontribution gain are netted according to their character and allocated to A's recognized gain under section 737 based on the relative proportions of the net positive amounts. U.S.-source and foreign-source gains must be netted separately because A would have been required to take such gains into account separately under section 702. As a result, A's net precontribution gain of $3,000 consists of $2,000 of net long-term, U.S.-source capital gain ($10,000 gain on Property A1 and $8,000 loss on Property A2) and $1,000 of net long-term, foreign-source capital gain ($1,000 gain on Property A3).

(v) The character of A's gain under paragraph (d) of this section is therefore $2,000 long-term, U.S.-source capital gain ($3,000 gain recognized under section 737 × $2,000 net long-term, U.S.-source capital gain/$3,000 total net precontribution gain) and $1,000 long-term, foreign-source capital gain ($3,000 gain recognized under section 737 × $1,000 net long-term, foreign-source capital gain/$3,000 total net precontribution gain).

[T.D. 8642, 60 FR 66733, Dec. 26, 1995]

§ 1.737–2 Exceptions and special rules.

(a) *Section 708(b)(1)(B) terminations.* Section 737 and this section do not apply to the deemed distribution of interests in a new partnership caused by the termination of a partnership under section 708(b)(1)(B). A subsequent distribution of property by the new partnership to a partner of the new partnership that was formerly a partner of the terminated partnership is subject to section 737 to the same extent that a distribution from the terminated partnership would have been subject to section 737. See also § 1.704–4(c)(3) for a similar rule in the context of section 704(c)(1)(B). This paragraph (a) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (a) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (a) to the termination in a consistent manner.

(b) *Transfers to another partnership*—(1) *Complete transfer.* Section 737 and this section do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement. See § 1.704–4(c)(4) for a similar rule in the context of section 704(c)(1)(B).

(2) *Certain divisive transactions.* Section 737 and this section do not apply to a transfer by a partnership (transferor partnership) of all of the section 704(c) property contributed by a partner to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the section 704(c) property to the transferor partnership.

(3) *Subsequent distributions.* A subsequent distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to section 737 to the same extent that a distribution

from the transferor partnership would have been subject to section 737.

(c) *Incorporation of a partnership.* Section 737 and this section do not apply to an incorporation of a partnership by any method of incorporation (other than a method involving an actual distribution of partnership property to the partners followed by a contribution of that property to a corporation), provided that the partnership is liquidated as part of the incorporation transaction. See §1.704–4(c)(5) for a similar rule in the context of section 704(c)(1)(B).

(d) *Distribution of previously contributed property*—(1) *General rule.* Any portion of the distributed property that consists of property previously contributed by the distributee partner (previously contributed property) is not taken into account in determining the amount of the excess distribution or the partner's net precontribution gain. The previous sentence applies on or after May 9, 1997. See §1.737–3(b)(2) for a special rule for determining the basis of previously contributed property in the hands of a distributee partner who contributed the property to the partnership.

(2) *Limitation for distribution of previously contributed interest in an entity.* An interest in an entity previously contributed to the partnership is not treated as previously contributed property to the extent that the value of the interest is attributable to property contributed to the entity after the interest was contributed to the partnership. The preceding sentence does not apply to the extent that the property contributed to the entity was contributed to the partnership by the partner that also contributed the interest in the entity to the partnership.

(3) *Nonrecognition transactions.* Property received by the partnership in exchange for contributed section 704(c) property in a nonrecognition transaction is treated as the contributed property with regard to the contributing partner for purposes of section 737 to the extent that the property received is treated as section 704(c) property under §1.704–3(a)(8). See §1.704–4(d)(1) for a similar rule in the context of section 704(c)(1)(B).

(4) *Undivided interests.* The distribution of an undivided interest in property is treated as the distribution of previously contributed property to the extent that the undivided interest does not exceed the undivided interest, if any, contributed by the distributee partner in the same property. See §1.704–4(c)(6) for the application of section 704(c)(1)(B) in a similar context. The portion of the undivided interest in property retained by the partnership after the distribution, if any, that is treated as contributed by the distributee partner, is reduced to the extent of the undivided interest distributed to the distributee partner.

(e) *Examples.* The following examples illustrate the rules of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

Example 1. Distribution of previously contributed property. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable real property to the partnership:

	Fair market value	Adjusted tax basis
Property A1	$20,000	$10,000
Property A2	10,000	6,000

(ii) A's total net precontribution gain on the contributed property is $14,000 ($10,000 on Property A1 plus $4,000 on Property A2). B contributes $10,000 cash and Property B, nondepreciable real property with a fair market value and adjusted tax basis of $20,000. C contributes $30,000 cash.

(iii) On December 31, 1998, Property A2 and Property B are distributed to A in complete liquidation of A's interest in the partnership. Property A2 was previously contributed by A and is therefore not taken into account in determining the amount of the excess distribution or A's net precontribution gain. The adjusted tax basis of Property A2 in the hands of A is also determined under section 732 as if that property were the only property distributed to A.

(iv) As a result of excluding Property A2 from these determinations, the amount of the excess distribution is $10,000 ($20,000 fair market value of distributed Property B less $10,000 adjusted tax basis in A's partnership interest). A's net precontribution gain is also $10,000 ($14,000 total net precontribution gain less $4,000 gain with respect to previously contributed Property A2). A therefore recognizes $10,000 of gain on the distribution, the lesser of the excess distribution and the net precontribution gain.

Example 2. Distribution of a previously contributed interest in an entity. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $5,000, and all of the stock of Corporation X with a fair market value and adjusted tax basis of $500. B contributes $500 cash and Property B, nondepreciable real property with a fair market value and adjusted tax basis of $10,000. Partner C contributes $10,500 cash. On December 31, 1996, ABC contributes Property B to Corporation X in a nonrecognition transaction under section 351.

(ii) On December 31, 1998, all of the stock of Corporation X is distributed to A in complete liquidation of A's interest in the partnership. The stock is treated as previously contributed property with respect to A only to the extent of the $500 fair market value of the Corporation X stock contributed by A. The fair market value of the distributed stock for purposes of determining the amount of the excess distribution is therefore $10,000 ($10,500 total fair market value of Corporation X stock less $500 portion treated as previously contributed property). The $500 fair market value and adjusted tax basis of the Corporation X stock is also not taken into account in determining the amount of the excess distribution and the net precontribution gain.

(iii) A recognizes $5,000 of gain under section 737, the amount of the excess distribution ($10,000 fair market value of distributed property less $5,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain ($10,000 fair market value of Property A less $5,000 adjusted tax basis in Property A).

Example 3. Distribution of undivided interest in property. (i) On January 1, 1995, A and B form partnership AB as equal partners. A contributes $500 cash and an undivided one-half interest in Property X. B contributes $500 cash and an undivided one-half interest in Property X.

(ii) On December 31, 1998, an undivided one-half interest in Property X is distributed to A in a current distribution. The distribution of the undivided one-half interest in Property X is treated as a distribution of previously contributed property because A contributed an undivided one-half interest in Property X. As a result, A does not recognize any gain under section 737 on the distribution.

[T.D. 8642, 60 FR 66735, Dec. 26, 1995, as amended by T.D. 8717, 62 FR 25501, May 9, 1997]

§ 1.737–3 Basis adjustments; Recovery rules.

(a) *Distributee partner's adjusted tax basis in the partnership interest.* The distributee partner's adjusted tax basis in the partnership interest is increased by the amount of gain recognized by the distributee partner under section 737 and this section. This increase is not taken into account in determining the amount of gain recognized by the partner under section 737(a)(1) and this section or in determining the amount of gain recognized by the partner under section 731(a) on the distribution of money in the same distribution or any related distribution. See § 1.704–4(e)(1) for a determination of the distributee partner's adjusted tax basis in a distribution subject to section 704(c)(1)(B).

(b) *Distributee partner's adjusted tax basis in distributed property*—(1) *In general.* The distributee partner's adjusted tax basis in the distributed property is determined under section 732 (a) or (b) as applicable. The increase in the distributee partner's adjusted tax basis in the partnership interest under paragraph (a) of this section is taken into account in determining the distributee partner's adjusted tax basis in the distributed property other than property previously contributed by the partner. See § 1.704–4(e)(2) for a determination of basis in a distribution subject to section 704(c)(1)(B).

(2) *Previously contributed property.* The distributee partner's adjusted tax basis in distributed property that the partner previously contributed to the partnership is determined as if it were distributed in a separate and independent distribution prior to the distribution that is subject to section 737 and § 1.737–1.

(c) *Partnership's adjusted tax basis in partnership property*—(1) *Increase in basis.* The partnership's adjusted tax basis in eligible property is increased by the amount of gain recognized by the distributee partner under section 737.

(2) *Eligible property.* Eligible property is property that——

(i) Entered into the calculation of the distributee partner's net precontribution gain;

(ii) Has an adjusted tax basis to the partnership less than the property's fair market value at the time of the distribution;

(iii) Would have the same character of gain on a sale by the partnership to an unrelated party as the character of any of the gain recognized by the distributee partner under section 737; and

(iv) Was not distributed to another partner in a distribution subject to section 704(c)(1)(B) and §1.704–4 that was part of the same distribution as the distribution subject to section 737.

(3) *Method of adjustment.* For the purpose of allocating the basis increase under paragraph (c)(2) of this section among the eligible property, all eligible property of the same character is treated as a single group. Character for this purpose is determined in the same manner as the character of the recognized gain is determined under §1.737–1(d). The basis increase is allocated among the separate groups of eligible property in proportion to the character of the gain recognized under section 737. The basis increase is then allocated among property within each group in the order in which the property was contributed to the partnership by the partner, starting with the property contributed first, in an amount equal to the difference between the property's fair market value and its adjusted tax basis to the partnership at the time of the distribution. For property that has the same character and was contributed in the same (or a related) transaction, the basis increase is allocated based on the respective amounts of unrealized appreciation in such properties at the time of the distribution.

(4) *Section 754 adjustments.* The basis adjustments to partnership property made pursuant to paragraph (c)(1) of this section are not elective and must be made regardless of whether the partnership has an election in effect under section 754. Any adjustments to the bases of partnership property (including eligible property as defined in paragraph (c)(2) of this section) under section 734(b) pursuant to a section 754 election (other than basis adjustments under section 734(b)(1)(A) described in the following sentence) must be made after (and must take into account) the adjustments to basis made under paragraph (a) and paragraph (c)(1) of this section. Basis adjustments under section 734(b)(1)(A) that are attributable to distributions of money to the distributee partner that are part of the same distribution as the distribution of property subject to section 737 are made before the adjustments to basis under paragraph (a) and paragraph (c)(1) of this section. See §1.737–1(c)(2)(ii) for the effect, if any, of basis adjustments under section 734(b)(1)(A) on a partner's net precontribution gain. See also §1.704–4(e)(3) for a similar rule regarding basis adjustments pursuant to a section 754 election in the context of section 704(c)(1)(B).

(d) *Recovery of increase to adjusted tax basis.* Any increase to the adjusted tax basis of partnership property under paragraph (c)(1) of this section is recovered using any applicable recovery period and depreciation (or other cost recovery) method (including first-year conventions) available to the partnership for newly purchased property (of the type adjusted) placed in service at the time of the distribution.

(e) *Examples.* The following examples illustrate the rules of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

Example 1. Partner's basis in distributed property. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $5,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of $10,000. C contributes $10,000 cash.

(ii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes $5,000 of gain under section 737, an amount equal to the excess distribution of $5,000

($10,000 fair market value of Property B less $5,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of $5,000 ($10,000 fair market value of Property A less $5,000 adjusted tax basis of such property).

(iii) A's adjusted tax basis in A's partnership interest is increased by the $5,000 of gain recognized under section 737. This increase is taken into account in determining A's basis in the distributed property. Therefore, A's adjusted tax basis in distributed Property B is $10,000 under section 732(b).

Example 2. Partner's basis in distributed property in connection with gain recognized under section 704(c)(1)(B). (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable real property located in the United States to the partnership:

	Fair market value	Adjusted tax basis
Property A1	$10,000	5,000
Property A2	10,000	2,000

(ii) B contributes $10,000 cash and Property B, nondepreciable real property located outside the United States, with a fair market value and adjusted tax basis of $10,000. C contributes $20,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in a current distribution and Property A1 is distributed to B in a current distribution. A recognizes $5,000 of gain under section 704(c)(1)(B) and § 1.704–4 on the distribution of Property A1 to B, the difference between the fair market value of such property ($10,000) and the adjusted tax basis in distributed Property A1 ($5,000). The adjusted tax basis of A's partnership interest is increased by this $5,000 of gain under section 704(c)(1)(B) and § 1.704–4(e)(1).

(iv) The increase in the adjusted tax basis of A's partnership interest is taken into account in determining the amount of the excess distribution. As a result, there is no excess distribution because the fair market value of Property B ($10,000) is less than the adjusted tax basis of A's interest in the partnership at the time of distribution ($12,000). A therefore recognizes no gain under section 737 on the receipt of Property B. A's adjusted tax basis in Property B is $10,000 under section 732(a)(1). The adjusted tax basis of A's partnership interest is reduced from $12,000 to $2,000 under section 733. See *Example 3* of § 1.737–1(e).

Example 3. Partnership's basis in partnership property after a distribution with section 737 gain. (i) On January 31, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable property to the partnership:

	Fair market value	Adjusted tax basis
Property A1	$1,000	$500
Property A2	4,000	1,500
Property A3	4,000	6,000
Property A4	6,000	4,000

(ii) The character of gain or loss on Properties A1, A2, and A3 is long-term, U.S.-source capital gain or loss. The character of gain on Property A4 is long-term, foreign-source capital gain. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of $15,000. C contributes $15,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes gain of $3,000 under section 737, an amount equal to the excess distribution of $3,000 ($15,000 fair market value of Property B less $12,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of $3,000 ($15,000 aggregate fair market value of the property contributed by A less $12,000 aggregate adjusted tax basis of such property).

(iv) $2,000 of A's gain is long-term, foreign-source capital gain ($3,000 total gain under section 737 x $2,000 net long-term, foreign-source capital gain/$3,000 total net precontribution gain). $1,000 of A's gain is long-term, U.S.-source capital gain ($3,000 total gain under section 737 x $1,000 net long-term, U.S.-source capital gain/$3,000 total net precontribution gain).

(v) The partnership must increase the adjusted tax basis of the property contributed by A by $3,000. All property contributed by A is eligible property. Properties A1, A2, and A3 have the same character and are grouped into a single group for purposes of allocating this basis increase. Property A4 is in a separate character group.

(vi) $2,000 of the basis increase must be allocated to long-term, foreign-source capital assets because $2,000 of the gain recognized by A was long-term, foreign-source capital gain. The adjusted tax basis of Property A4 is therefore increased from $4,000 to $6,000. $1,000 of the increase must be allocated to Properties A1 and A2 because $1,000 of the gain recognized by A is long-term, U.S.-source capital gain. No basis increase is allocated to Property A3 because its fair market value is less than its adjusted tax basis. The $1,000 basis increase is allocated between Properties A1 and A2 based on the unrealized appreciation in each asset before such basis adjustment. As a result, the adjusted tax basis of Property A1 is increased by $167 ($1,000 x $500/$3,000) and the adjusted tax basis of Property A2 is increased by $833 ($1,000 x $2,500/3,000).

[T.D. 8642, 60 FR 66736, Dec. 26, 1995; 61 FR 7214, Feb. 27, 1996]

§1.737–4 Anti-abuse rule.

(a) *In general.* The rules of section 737 and §§1.737–1, 1.737–2, and 1.737–3 must be applied in a manner consistent with the purpose of section 737. Accordingly, if a principal purpose of a transaction is to achieve a tax result that is inconsistent with the purpose of section 737, the Commissioner can recast the transaction for federal tax purposes as appropriate to achieve tax results that are consistent with the purpose of section 737. Whether a tax result is inconsistent with the purpose of section 737 must be determined based on all the facts and circumstances. See §1.704–4(f) for an anti-abuse rule and examples in the context of section 704(c)(1)(B). The anti-abuse rule and examples under section 704(c)(1)(B) and §1.704–4(f) are relevant to section 737 and §§1.737–1, 1.737–2, and 1.737–3 to the extent that the net precontribution gain for purposes of section 737 is determined by reference to section 704(c)(1)(B).

(b) *Examples.* The following examples illustrate the rules of this section. The examples set forth below do not delineate the boundaries of either permissible or impermissible types of transactions. Further, the addition of any facts or circumstances that are not specifically set forth in an example (or the deletion of any facts or circumstances) may alter the outcome of the transaction described in the example. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

Example 1. Increase in distributee partner's basis by temporary contribution; results inconsistent with the purpose of section 737. (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A1, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $1,000. B contributes Property B, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $10,000. C contributes $10,000 cash.

(ii) On January 1, 1999, pursuant to a plan a principal purpose of which is to avoid gain under section 737, A transfers to the partnership Property A2, nondepreciable real property with a fair market value and adjusted tax basis of $9,000. A treats the transfer as a contribution to the partnership pursuant to section 721 and increases the adjusted tax basis of A's partnership interest from $1,000 to $10,000. On January 1, 1999, the partnership agreement is amended and all other necessary steps are taken so that substantially all of the economic risks and benefits of Property A2 are retained by A. On February 1, 1999, Property B is distributed to A in a current distribution. If the contribution of Property A2 is treated as a contribution to the partnership for purposes of section 737, there is no excess distribution because the fair market value of distributed Property B ($10,000) does not exceed the adjusted tax basis of A's interest in the partnership ($10,000), and therefore section 737 does not apply. A's adjusted tax basis in distributed Property B is $10,000 under section 732(a)(1) and the adjusted tax basis of A's partnership interest is reduced to zero under section 733.

(iii) On March 1, 2000, A receives Property A2 from the partnership in complete liquidation of A's interest in the partnership. A recognizes no gain on the distribution of Property A2 because the property was previously contributed property. See §1.737–2(d).

(iv) Although A has treated the transfer of Property A2 as a contribution to the partnership that increased the adjusted tax basis of A's interest in the partnership, it would be inconsistent with the purpose of section 737 to recognize the transfer as a contribution to the partnership. Section 737 requires recognition of gain when the value of distributed property exceeds the distributee partner's adjusted tax basis in the partnership interest. Section 737 assumes that any contribution or other transaction that affects a partner's adjusted tax basis in the partnership interest is a contribution or transaction in substance and is not engaged in with a principal purpose of avoiding recognition of gain under section 737. Because the transfer of Property A2 to the partnership was not a contribution in substance and was made with a principal purpose of avoiding recognition of gain under section 737, the Commissioner can disregard the contribution of Property A2 for this purpose. As a result, A recognizes gain of $9,000 under section 737 on the receipt of Property B, an amount equal to the lesser of the excess distribution of $9,000 ($10,000 fair market value of distributed Property B less the $1,000 adjusted tax basis of A's partnership interest, determined without regard to the transitory contribution of Property A2) or A's net precontribution gain of $9,000 on Property A1.

Example 2. Increase in distributee partner's basis; section 752 liability shift; results consistent with the purpose of section 737. (i) On January 1, 1995, A and B form general partnership AB as equal partners. A contributes

Property A, nondepreciable real property with a fair market value of $10,000 and an adjusted tax basis of $1,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of $10,000. The partnership also borrows $10,000 on a recourse basis and purchases Property C. The $10,000 liability is allocated equally between A and B under section 752, thereby increasing the adjusted tax basis in A's partnership interest to $6,000.

(ii) On December 31, 1998, the partners agree that A is to receive Property B in a current distribution. If A were to receive Property B at that time, A would recognize $4,000 of gain under section 737, an amount equal to the lesser of the excess distribution of $4,000 ($10,000 fair market value of Property B less $6,000 adjusted tax basis in A's partnership interest) or A's net precontribution gain of $9,000 ($10,000 fair market value of Property A less $1,000 adjusted tax basis of Property A).

(iii) With a principal purpose of avoiding such gain, A and B agree that A will be solely liable for the repayment of the $10,000 partnership liability and take the steps necessary so that the entire amount of the liability is allocated to A under section 752. The adjusted tax basis in A's partnership interest is thereby increased from $6,000 to $11,000 to reflect A's share of the $5,000 of liability previously allocated to B. As a result of this increase in A's adjusted tax basis, there is no excess distribution because the fair market value of distributed Property B ($10,000) is less than the adjusted tax basis of A's partnership interest. Recognizing A's increased adjusted tax basis as a result of the shift in liabilities is consistent with the purpose of section 737 and this section. Section 737 requires recognition of gain only when the value of the distributed property exceeds the distributee partner's adjusted tax basis in the partnership interest. The $10,000 recourse liability is a bona fide liability of the partnership that was undertaken for a substantial business purpose and A's and B's agreement that A will assume responsibility for repayment of that debt has substance. Therefore, the increase in A's adjusted tax basis in A's interest in the partnership due to the shift in partnership liabilities under section 752 is respected, and A recognizes no gain under section 737.

[T.D. 8642, 60 FR 66738, Dec. 26, 1995]

§ 1.737–5 Effective date.

Sections 1.737–1, 1.737–2, 1.737–3, and 1.737–4 apply to distributions by a partnership to a partner on or after January 9, 1995.

[T.D. 8642, 60 FR 66739, Dec. 26, 1995]

TRANSFERS OF INTERESTS IN A PARTNERSHIP

§ 1.741–1 Recognition and character of gain or loss on sale or exchange.

(a) The sale or exchange of an interest in a partnership shall, except to the extent section 751(a) applies, be treated as the sale or exchange of a capital asset, resulting in capital gain or loss measured by the difference between the amount realized and the adjusted basis of the partnership interest, as determined under section 705. For treatment of selling partner's distributive share up to date of sale, see section 706(c)(2). Where the provisions of section 751 require the recognition of ordinary income or loss with respect to a portion of the amount realized from such sale or exchange, the amount realized shall be reduced by the amount attributable under section 751 to unrealized receivables and substantially appreciated inventory items, and the adjusted basis of the transferor partner's interest in the partnership shall be reduced by the portion of such basis attributable to such unrealized receivables and substantially appreciated inventory items. See section 751 and § 1.751–1.

(b) Section 741 shall apply whether the partnership interest is sold to one or more members of the partnership or to one or more persons who are not members of the partnership. Section 741 shall also apply even though the sale of the partnership interest results in a termination of the partnership under section 708(b). Thus, the provisions of section 741 shall be applicable (1) to the transferor partner in a 2-man partnership when he sells his interest to the other partner, and (2) to all the members of a partnership when they sell their interests to one or more persons outside the partnership.

(c) See section 351 for nonrecognition of gain or loss upon transfer of a partnership interest to a corporation controlled by the transferor.

(d) For rules relating to the treatment of liabilities on the sale or exchange of interests in a partnership see §§ 1.752–1 and 1.1001–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7741, 45 FR 81745, Dec. 12, 1980]

§1.742–1 Basis of transferee partner's interest.

The basis to a transferee partner of an interest in a partnership shall be determined under the general basis rules for property provided by part II (section 1011 and following), subchapter O, chapter 1 of the Code. Thus, the basis of a purchased interest will be its cost. The basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of his death or at the alternate valuation date, increased by his estate's or other successor's share of partnership liabilities, if any, on that date, and reduced to the extent that such value is attributable to items constituting income in respect of a decedent (see section 753 and paragraph (c)(3)(v) of §1.706–1 and paragraph (b) of §1.753–1) under section 691. See section 1014(c). For basis of contributing partner's interest, see section 722. The basis so determined is then subject to the adjustments provided in section 705.

§1.743–1 Optional adjustment to basis of partnership property.

(a) *General rule.* The basis of partnership property shall not be adjusted as the result of a transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, unless the election provided by section 754 (relating to optional adjustment to basis of partnership property) is in effect with respect to the partnership. However, whether or not the election provided in section 754 is in effect, the basis of partnership property shall not be adjusted as the result of a contribution of property, including money, to the partnership.

(b) *Adjustment to basis of partnership property*—(1) *Determination of adjustment.* In the case of a transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, a partnership as to which the election under section 754 is in effect shall:

(i) Increase the adjusted basis of partnership property by the excess of the transferee's basis for his partnership interest over his share of the adjusted basis to the partnership of all partnership property, or

(ii) Decrease the adjusted basis of partnership property by the excess of the transferee partner's share of the adjusted basis of all partnership property over his basis for his partnership interest.

The amount of the increase or decrease constitutes an adjustment affecting the basis of partnership property with respect to the transferee partner only. Thus, for purposes of depreciation, depletion, gain or loss, and distributions, the transferee partner will have a special basis for those partnership properties which are adjusted under section 743(b) and this paragraph. This special basis is his share of the common partnership basis (i.e., the adjusted basis of such properties to the partnership without regard to any special basis adjustments of any transferee) plus or minus his special basis adjustments. A partner's share of the adjusted basis of partnership property is equal to the sum of his interest as a partner in partnership capital and surplus, plus his share of partnership liabilities. Where an agreement with respect to contributed property is in effect under section 704(c)(2), such agreement shall be taken into account in determining a partner's share of the adjusted basis of partnership property. Generally, if a partner's interest in partnership capital and profits is one-third, his share of the adjusted basis of partnership property will be one-third of such basis. The provisions of this paragraph may be illustrated by the following examples:

Example 1. A is a member of partnership ABC in which the partners have equal interests in capital and profits. The partnership has made the election under section 754, relating to the optional adjustment to the basis of partnership property. A sells his interest to P for $22,000. The balance sheet of the partnership at the date of sale shows the following:

ASSETS

	Adjusted basis per books	Market value
Cash	$5,000	$5,000
Accounts receivable	10,000	10,000
Inventory	20,000	21,000
Depreciable assets	20,000	40,000
Total	55,000	76,000

LIABILITIES AND CAPITAL

	Adjusted basis per books	Value
Liabilities	$10,000	$10,000
Capital:		
A	15,000	22,000
B	15,000	22,000
C	15,000	22,000
Total	55,000	76,000

The amount of the adjustment under section 743(b) is the difference between the basis of the transferee's interest in the partnership and his share of the adjusted basis of partnership property. Under section 742, the basis of P's interest is $25,333 (the cash paid for A's interest, $22,000, plus $3,333, P's share of partnership liabilities). P's share of the adjusted basis of partnership property is $18,333, i.e., $15,000 plus $3,333. The amount to be added to the basis of partnership property is, therefore, $7,000, the difference between $25,333 and $18,333. This amount will be allocated to partnership properties in accordance with the rules set forth in section 755 and § 1.755–1.

Example 2. D is a member of partnership DEF in which the partners have equal interests in profits, but not in capital. The partnership has made the election under section 754. D dies and his interest passes to W, his widow. The balance sheet of the partnership at the date of D's death shows the following:

ASSETS

	Adjusted basis per books	Market value
Cash	$7,000	$7,000
Accounts receivable	10,000	10,000
Inventory	20,000	24,000
Depreciable assets	20,000	40,000
Total	57,000	81,000

LIABILITIES AND CAPITAL

	Adjusted basis per books	Value
Liabilities	$10,000	$10,000
Capital:		
D	18,000	26,000
E	15,000	23,000
F	14,000	22,000
Total	57,000	81,000

The amount of the adjustment under section 743(b) is the difference between the basis of the transferee's interest in the partnership and her share of the adjusted basis of partnership property. Under section 742, the basis of W's interest is $29,333 (the fair market value of D's interest at his death, $26,000, plus $3,333, his share of partnership liabilities). W's share of the adjusted basis of partnership property is $21,333 (i.e., $18,000 plus $3,333, her share of partnership liabilities). The amount to be added to the basis of partnership property is, therefore, $8,000, the difference between $29,333 and $21,333. This amount will be allocated to partnership properties in accordance with the rules set forth in section 755 and § 1.755–1.

Note that in examples 1 and 2 of this subparagraph the amount of the adjustment does not depend upon the adjusted basis to the transferor for his interest in partnership capital.

(2) *Determination of partner's share of adjusted basis of partnership property.* (i) Under the provisions of section 743(b), a partner's share of the adjusted basis of partnership property shall be determined by taking into account the effect of any partnership agreement with respect to contributed property as described in section 704(c)(2), or the effect of the contribution of undivided interests under section 704(c)(3). This rule may be illustrated by the following examples:

Example 1. A, B, and C form partnership ABC, to which A contributes land worth $1,000 (property X) with an adjusted basis to him of $400, and B and C each contributes $1,000 cash. Each partner has $1,000 credited to him on the books of the partnership as his capital contribution. The partners share in profits equally. During the partnership's first taxable year, property X appreciates in value to $1,300. A sells his one-third interest in the partnership to D for $1,100, when the election under section 754 is in effect. No agreement under section 704(c)(2) is in effect. The adjusted basis of the partnership property is increased with respect to D by the excess of his basis for his partnership interest, $1,100, over his share of the adjusted basis of partnership property, $800 (1/3 of $2,400, the total adjusted basis of partnership property). The amount of the adjustment, therefore, is $300 ($1,100 minus $800), which is an increase in the basis of partnership property with respect to D only. This special basis adjustment will be allocated to property X. (See section 755 and § 1.755–1.) If property X is sold for $1,600, the gain to the partnership is $1,200 ($1,600 received, less the adjusted common partnership basis of $400 for property X). Thus, each partner's distributive share of the gain on the sale is $400. However, D's recognized gain is only $100 (his $400 distributive share of the gain, reduced by $300, his special basis adjustment with respect to property X). If D purchased his interest from B or C, the partners who contributed cash, D's adjustment under section 743(b) would also be $300, computed in exactly the same manner as in the case of a purchase from A.

Example 2. Assume that partnership ABC described in example 1 of this subdivision has an agreement under section 704(c)(2) with respect to property X, stating that upon the sale of that property any gain, to the extent attributable to the precontribution appreciation of $600 (the difference between its value, $1,000, and its basis, $400, at the time of the contribution) is to be allocated entirely to A, who contributed property X. Upon the purchase of A's interest by D for $1,100, the computation of D's special basis would differ from that indicated in example 1 of this subdivision as follows: Under the partnership agreement, A's share of the $2,400 adjusted basis of partnership property is only $400 (his basis for property X prior to its contribution to the partnership), and B's and C's share is $1,000 each (the amount of the cash investment of each). The amount of the increase to D in the adjusted basis of partnership property under section 743(b)(1) is $700 (the excess of $1,100, D's cost basis for his interest, over $400, A's share of the adjusted basis of partnership property to which D succeeds). This amount constitutes an adjustment to the basis of partnership property with respect to D only. If X is sold by the partnership for $1,600, the gain is $1,200 ($1,600 received less the adjusted common partnership basis of $400). Under the partnership agreement, $600 of this gain, which is attributable to precontribution appreciation in value, is allocable to D, who is A's successor. The remaining $600 gain is not subject to the agreement and is allocable to the partners equally, $200 each. D's distributive share of the partnership gain is thus $600 plus $200, or $800. However, D has a special basis adjustment of $700 under section 743(b)(1), which reduces his gain from $800 to $100. B and C each has a gain of $200, which is unaffected by the transfer of A's interest to D.

Example 3. Assume the same facts as in example 2 of this subdivision, except that D has purchased his interest from B instead of from A. His special basis adjustment for partnership property in this case differs from that where he had purchased his interest from A, because of the effect of the agreement under section 704(c)(2). In this case, D is a successor to B, whose share of the adjusted basis of partnership property is $1,000, instead of A, whose share is only $400. As a result, the adjustment under section 743(b)(1) is the excess of D's cost basis for his interest, $1,100, over his share of the adjusted basis of partnership property, $1,000, or $100. In this case, if property X is sold for $1,600, the partnership gain is $1,200 ($1,600 less the adjusted partnership basis of $400). Of this gain, $600, representing precontribution appreciation, is allocable to A under the partnership agreement. The remaining $600 is allocable in the amount of $200 to each partner. Since D as a transferee has a special basis adjustment of $100 under section 743(b)(1), his gain is reduced from $200 to $100.

(ii) If a partner receives a distribution of property with respect to which another partner has a special basis adjustment, the distributee shall not take into account the special basis adjustment of the other partner. However, the partner with the special basis adjustment will reallocate it under section 755 to remaining partnership property of a like kind or, if he receives a distribution of like property, to such distributed property. If a partner receives a distribution of property with respect to which he has a special basis adjustment, such basis adjustment will be taken into account when relevant under section 732. See paragraph (b) of §1.732–2. If, at the time a partner receives property (whether or not he has a special basis adjustment with respect to such property), he relinquishes his interest in other property of a like kind with respect to which he has a special basis adjustment, the adjusted basis to the partnership of the distributed property shall include his special basis adjustment for the property in which he relinquished his interest. For the purposes of the preceding sentence, a partner will be considered as having relinquished his interest in any remaining partnership properties when his interest has been completely liquidated; however, when a partner receives a distribution not in liquidation, he will be considered as relinquishing his interest only in property distributed to other partners. For the purposes of this subdivision, like property means property of the same class, that is, stock in trade, property used in the trade or business, capital assets, etc. For certain adjustments to the basis of remaining partnership property after a distribution to a transferee partner, see paragraph (b) of §1.734–2. The provisions of this subdivision may be illustrated by the following examples:

Example 1. C is a transferee partner in partnership BC. The partnership owns, among other assets, X, a depreciable asset with a common basis to the partnership of $1,000 and a special basis adjustment to C of $200, and Y, another depreciable asset with a common basis of $800 and a special basis adjustment to C of $300. B and C agree that B will receive a distribution of property Y, and C will receive a distribution of property X, with all other property to remain in the partnership. With respect to B, the partnership basis of property Y is $800, the common partnership basis. Y will, therefore, have a basis of $800 in B's hands under section 732(a) which provides for the use of a carryover basis in the case of current distributions. With respect to C, however, the partnership basis of property X is $1,500, the common partnership basis of $1,000, plus C's special basis adjustment of $200 for property X, plus C's additional special basis adjustment of $300 for property Y, in which he has relinquished his interest.

Example 2. (a) Partner D acquired his one-third interest in partnership BCD for $14,000 from a previous partner when an election under section 754 was in effect. Therefore, under section 743(b), D has a special basis adjustment for certain partnership property. Assume that at the time of the distribution in paragraph (b) of this example, the partnership assets consist of cash and rental property and that such assets and D's special basis adjustments under section 743(b) are as follows:

Item	Fair market value	Common partnership basis	D's share	D's special basis adjustment	Partnership basis to D
Cash	$12,000	$12,000	$4,000	....	$4,000
House:					
U	9,000	1,200	400	....	400
V	6,000	4,500	1,500	....	1,500
W	8,000	1,500	500	....	500
X	9,000	4,800	1,600	$2,000	3,600
Y	9,000	6,000	2,000	....	2,000
Z	7,000	3,000	1,000	1,000	2,000
Total	60,000	33,000	11,000	3,000	14,000

(b) Assume further that D receives $4,000 in cash and houses Y and Z in complete liquidation of his interest in partnership BCD. In determining the basis to D of houses Y and Z under section 732 (b) and (c), D must allocate $10,000 basis ($14,000 basis for his interest, less $4,000 cash received) to houses Y and Z in proportion to their adjusted basis to the partnership. For purposes of section 732(c), the adjusted basis of house Y is $7,200. ($6,000 common partnership basis, plus $1,200, allocated share of D's special basis adjustment of $2,000 for house X, in which D relinquished his interest). The adjusted basis of house Z is $4,800 ($3,000 common partnership basis, plus $1,000, D's special basis for house Z, plus $800, allocated share of D's special basis of $2,000 for house X, in which D relinquished his interest). Under the rule of this subdivision, 6,000/10,000 of the $2,000 special basis adjustment for X is allocated to Y and 4,000/10,000 of such amount to Z. Therefore, $6,000 basis (7,200/12,000 of $10,000) is allocated to house Y and $4,000 basis (4,800/12,000 of $10,000) to house Z.

(c) Since houses Y and Z had $12,000 basis to the partnership, as computed in paragraph (b) of this example, and only $10,000 basis to D, as determined under section 732, the partnership, under section 734(b)(1)(B), must increase the basis of remaining partnership property (houses U, V, W, and X) by $2,000 (excess of $12,000 over $10,000). For allocation of this amount, see section 755 and § 1.755–1.

(iii) Where an adjustment is made under section 743(b) to the basis of partnership property subject to depletion, any depletion allowable shall be determined separately for each partner, including the transferee partner, based on his interest in such property. See paragraph (a)(8) of § 1.702–1. This rule may be illustrated by the following example:

Example. A, B, and C each contributes $5,000 cash to form partnership ABC, which purchases oil property for $15,000. C subsequently sells his partnership interest to D for $100,000 when the election under section 754 is in effect. D has a special basis adjustment for the oil property of $95,000 (the difference between D's basis, $100,000, and his share of the basis of partnership property, $5,000). Assume that the depletion allowance computed under the percentage method would be $21,000 for the taxable year so that each partner would be entitled to $7,000 as his share of the deduction for depletion. However, under the cost depletion method, at an assumed rate of 10 percent, the allowance with respect to D's one-third interest which has a basis to him of $100,000 ($5,000, plus his special basis adjustment of $95,000) is $10,000, although the cost depletion allowance with respect to the one-third interest of A and B in the oil property, each of which has a basis of $5,000, is only $500. For partners A and B, the percentage depletion is greater than cost depletion and each will deduct $7,000 based on the percentage depletion method. However, as to D, the transferee partner, the cost depletion method results in a greater allowance and D will, therefore, deduct $10,000 based on cost depletion. See section 613(a).

(iv) Where there has been more than one transfer of partnership interests, the last transferee's special basis adjustment, if any, under section 743(b) shall be determined by reference to the partnership common basis for its property without regard to any prior transferee's special basis adjustment. For example, A, B, and C form a partnership. A and B each contributes $1,000 cash and C contributes land with a basis and value of $1,000. When the land has appreciated in value to $1,300, A sells his interest to D for $1,100 (1/3 of $3,300, the value of the partnership property). The election under section 754 is in effect; therefore, D has a special basis adjustment of $100 with respect to the land under section 743(b). After the land has further appreciated in value to $1,600, D sells his interest to E for $1,200 (1/3 of $3,600, the value of the partnership property). Under section 743(b), E has a special basis adjustment of $200. This amount is determined without regard to any special basis adjustment that D may have had in the partnership assets.

(3) *Returns.* A transferee partner who has a special basis adjustment under section 743(b) shall attach a statement to his income tax return for the first taxable year in which the basis of any partnership property subject to the adjustment is pertinent in determining his income tax, showing the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

(c) *Allocation of basis.* For the allocation of basis among partnership properties where section 743 (b) applies, see section 755 and §1.755–1.

(d) *Section 708(b)(1)(B) terminations.* A partner with a special basis adjustment in property held by a partnership that terminates under section 708(b)(1)(B) will continue to have the same special basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership under §1.708–1(b)(1)(iv), regardless of whether the new partnership makes a section 754 election. This paragraph (d) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (d) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (d) to the termination in a consistent manner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8717, 62 FR 25501, May 9, 1997]

PROVISIONS COMMON TO PART II, SUBCHAPTER K, CHAPTER 1 OF THE CODE

§1.751–1 Unrealized receivables and inventory items.

(a) *Sale or exchange of interest in a partnership*—(1) *Character of amount realized.* To the extent that money or property received by a partner in exchange for all or part of his partnership interest is attributable to his share of the value of partnership unrealized receivables or substantially appreciated inventory items, the money or fair market value of the property received shall be considered as an amount realized from the sale or exchange of property other than a capital asset. The remainder of the total amount realized on the sale or exchange of the partnership interest is realized from the sale or exchange of a capital asset under section 741. For definition of ‘‘unrealized receivables'' and ‘‘inventory items which have appreciated substantially in value'', see section 751 (c) and (d). Unrealized receivables and substantially appreciated inventory items are hereafter in this section referred to as ‘‘section 751 property''. See paragraph (e) of this section.

(2) *Determination of gain or loss.* The income or loss realized by a partner upon the sale or exchange of his interest in section 751 property is the difference between (i) the portion of the total amount realized for the partnership interest allocated to section 751 property, and (ii) the portion of the selling partner's basis for his entire interest allocated to such property. Generally, the portion of the total amount

realized which the seller and the purchaser allocate to section 751 property in an arm's length agreement will be regarded as correct. The portion of the partner's adjusted basis for his partnership interest to be allocated to section 751 property shall be an amount equal to the basis such property would have had under section 732 (including subsection (d) thereof) if the selling partner had received his share of such properties in a current distribution made immediately before the sale. See §§ 1.732–1 and 1.732–2. Such basis shall reflect the rules of section 704(c)(3), if applicable, or any agreement under section 704(c)(2). Any gain or loss recognized which is attributable to section 751 property will be ordinary gain or loss. The difference between the remainder, if any, of the partner's adjusted basis for his partnership interest and the balance, if any, of the amount realized is the transferor's capital gain or loss on the sale of his partnership interest.

(3) *Statement required.* A transferor partner selling or exchanging any part of his interest in a partnership which has any section 751 property at the time of sale or exchange shall submit with his income tax return for the taxable year in which the sale or exchange occurs a statement setting forth separately the following information:

(i) The date of the sale or exchange, the amount of the transferor partner's adjusted basis for his partnership interest, and the portion thereof attributable to section 751 property under section 732; and

(ii) The amount of any money and the fair market value of any other property received or to be received for the transferred interest in the partnership, and the portion thereof attributable to section 751 property.

(iii) If the transferor partner computes his adjusted basis for section 751 property under the provisions of section 732(d), he must also include in the statement the information required byp-paragraph (d)(3) of§ 1.732–1.

(iv) If the transferor partner has a special basis adjustment under section 743(b), he must also include in the statement the computation of his special basis adjustment and the partnership properties to which the adjustment has been allocated.

(b) *Certain distributions treated as sales or exchanges*—(1) *In general.* (i) Certain distributions to which section 751(b) applies are treated in part as sales or exchanges of property between the partnership and the distributee partner, and not as distributions to which sections 731 through 736 apply. A distribution treated as a sale or exchange under section 751(b) is not subject to the provisions of section 707(b). Section 751(b) applies whether or not the distribution is in liquidation of the distributee partner's entire interest in the partnership. However, section 751(b) applies only to the extent that a partner either receives section 751 property in exchange for his relinquishing any part of his interest in other property, or receives other property in exchange for his relinquishing any part of his interest in section 751 property.

(ii) Section 751(b) does not apply to a distribution to a partner which is not in exchange for his interest in other partnership property. Thus, section 751(b) does not apply to the extent that a distribution consists of the distributee partner's share of section 751 property or his share of other property. Similarly, section 751(b) does not apply to current drawings or to advances against the partner's distributive share, or to a distribution which is, in fact, a gift or payment for services or for the use of capital. In determining whether a partner has received only his share of either section 751 property or of other property, his interest in such property remaining in the partnership immediately after a distribution must be taken into account. For example, the section 751 property in partnership ABC has a fair market value of $100,000 in which partner A has an interest of 30 percent, or $30,000. If A receives $20,000 of section 751 property in a distribution, and continues to have a 30-percent interest in the $80,000 of section 751 property remaining in the partnership after the distribution, only $6,000 ($30,000 minus $24,000 (30 percent of $80,000)) of the section 751 property received by him will be considered to be his share of such property. The remaining $14,000 ($20,000 minus $6,000) received is in excess of his share.

(iii) If a distribution is, in part, a distribution of the distributee partner's share of section 751 property, or of other property (including money) and, in part, a distribution in exchange of such properties, the distribution shall be divided for the purpose of applying section 751(b). The rules of section 751(b) shall first apply to the part of the distribution treated as a sale or exchange of such properties, and then the rules of sections 731 through 736 shall apply to the part of the distribution not treated as a sale or exchange. See paragraph (b)(4)(ii) of this section for treatment of payments under section 736(a).

(2) *Distribution of section 751 property (unrealized receivables or substantially appreciated inventory items).* (i) To the extent that a partner receives section 751 property in a distribution in exchange for any part of his interest in partnership property (including money) other than section 751 property, the transaction shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the income or loss to the partnership will be measured by the difference between the adjusted basis to the partnership of the section 751 property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in other partnership property which he relinquished in the exchange. In computing the partners' distributive shares of such ordinary income or loss, the income or loss shall be allocated only to partners other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes gain or loss measured by the difference between his adjusted basis for the property relinquished in the exchange (including any special basis adjustment which he may have) and the fair market value of the section 751 property received by him in exchange for his interest in other property which he has relinquished. The distributee's adjusted basis for the property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b). The character of the gain or loss to the distributee partner shall be determined by the character of the property in which he relinquished his interest.

(3) *Distribution of partnership property other than section 751 property.* (i) To the extent that a partner receives a distribution of partnership property (including money) other than section 751 property in exchange for any part of his interest in section 751 property of the partnership, the distribution shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes gain or loss on the sale or exchange of the property other than section 751 property. The amount of the gain to the partnership will be measured by the difference between the adjusted basis to the partnership of the distributed property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in section 751 property which he relinquished in the exchange. The character of the gain or loss to the partnership is determined by the character of the distributed property treated as sold or exchanged by the partnership. In computing the partners' distributive shares of such gain or loss, the gain or loss shall be allocated only to partners other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the distributee partner's income or loss shall be measured by the difference between his adjusted basis for the section 751 property relinquished in the exchange (including any special basis adjustment which he may have), and the fair market value of other property (including money) received by him in exchange for his interest in the section 751 property which he has relinquished. The distributee partner's adjusted basis for the section 751 property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b).

(4) *Exceptions.* (i) Section 751(b) does not apply to the distribution to a partner of property which the distributee partner contributed to the partnership. The distribution of such property is governed by the rules set forth in sections 731 through 736, relating to distributions by a partnership.

(ii) Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner's successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner's successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other property. Thus, payments to a retiring partner or to a deceased partner's successor in interest under section 736 must first be divided between payments under section 736(a) and section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736–1.

(5) *Statement required.* A partnership which distributes section 751 property to a partner in exchange for his interest in other partnership property, or which distributes other property in exchange for any part of the partner's interest in section 751 property, shall submit with its return for the year of the distribution a statement showing the computation of any income, gain, or loss to the partnership under the provisions of section 751(b) and this paragraph. The distributee partner shall submit with his return a statement showing the computation of any income, gain, or loss to him. Such statement shall contain information similar to that required under paragraph (a)(3) of this section.

(c) *Unrealized receivables.* (1) The term *unrealized receivables,* as used in subchapter K, chapter 1 of the Code, means any rights (contractual or otherwise) to payment for:

(i) Goods delivered or to be delivered (to the extent that such payment would be treated as received for property other than a capital asset), or

(ii) Services rendered or to be rendered,

to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Such rights must have arisen under contracts or agreements in existence at the time of sale or distribution, although the partnership may not be able to enforce payment until a later time. For example, the term includes trade accounts receivable of a cash method taxpayer, and rights to payment for work or goods begun but incomplete at the time of the sale or distribution.

(2) The basis for such unrealized receivables shall include all costs or expenses attributable thereto paid or accrued but not previously taken into account under the partnership method of accounting.

(3) In determining the amount of the sale price attributable to such unrealized receivables, or their value in a distribution treated as a sale or exchange, any arm's length agreement between the buyer and the seller, or between the partnership and the distributee partner, will generally establish the amount or value. In the absence of such an agreement, full account shall be taken not only of the estimated cost of completing performance of the contract or agreement, but also of the time between the sale or distribution and the time of payment.

(4)(i) With respect to any taxable year of a partnership ending after September 12, 1966 (but only in respect of expenditures paid or incurred after that date), the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from mining property defined in section 617(f)(2). With respect to each item of partnership mining property so defined, the potential gain is the amount that would be treated as gain to which section 617(d)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(ii) With respect to sales, exchanges, or other dispositions after December 31, 1975, in any taxable year of a partnership ending after that date, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from stock in a DISC as described in section 992(a). With respect to stock in such a DISC, the potential gain is the amount that would be treated as gain to which section 995(c) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the stock were sold by the partnership at its fair market value.

(iii) With respect to any taxable year of a partnership beginning after December 31, 1962, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from section 1245 property. With respect to each item of partnership section 1245 property (as defined in section 1245(a)(3)), potential gain from section 1245 property is the amount that would be treated as gain to which section 1245(a)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1245 property were sold by the partnership at its fair market value. See §1.1245–1(e)(1). For example, if a partnership would recognize under section 1245(a)(1) gain of $600 upon a sale of one item of section 1245 property and gain of $300 upon a sale of its only other item of such property, the potential section 1245 income of the partnership would be $900.

(iv) With respect to transfers after October 9, 1975, and to sales, exchanges, and distributions taking place after that date, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from stock in certain foreign corporations as described in section 1248. With respect to stock in such a foreign corporation, the potential gain is the amount that would be treated as gain to which section 1248(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the stock were sold by the partnership at its fair market value.

(v) With respect to any taxable year of a partnership ending after December 31, 1963, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from section 1250 property. With respect to each item of partnership section 1250 property (as defined in section 1250(c)), potential gain from section 1250 property is the amount that would be treated as gain to which section 1250(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1250 property were sold by the partnership at its fair market value. See §1.1250–1(f)(1).

(vi) With respect to any taxable year of a partnership beginning after December 31, 1969, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from farm recapture property as defined in section 1251(e)(1) (as in effect before enactment of the Tax Reform Act of 1984). With respect to each item of partnership farm recapture property so defined, the potential gain is the amount which would be treated as gain to which section 1251(c) (as in effect before enactment of the Tax Reform Act of 1984) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(vii) With respect to any taxable year of a partnership beginning after December 31, 1969, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from farm land as defined in section 1252(a)(2). With respect to each item of partnership farm land so defined, the potential gain is the amount that would be treated as gain to which section 1252(a)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(viii) With respect to transactions which occur after December 31, 1976, in any taxable year of a partnership ending after that date, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from franchises, trademarks, or trade names referred to in section 1253(a). With respect to each such item so referred to in section 1253(a), the potential gain is the amount that would be treated as gain to which section 1253(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the items were sold by the partnership at its fair market value.

(ix) With respect to any taxable year of a partnership ending after December 31, 1975, the term *unrealized receivables,* for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain under section 1254(a) from natural resource recapture property as defined in § 1.1254–1(b)(2). With respect to each separate partnership natural resource recapture property so described, the potential gain is the amount that would be treated as gain to which section 1254(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the property were sold by the partnership at its fair market value.

(x) For purposes of section 751(c) and this paragraph (c)(4), any arm's-length agreement between the buyer and seller, or between the partnership and distributee partner, will generally establish the fair market value of the property described in this paragraph (c)(4).

(5) For purposes of subtitle A of the Internal Revenue Code, the basis of any potential gain described in paragraph (c)(4) of this section is zero.

(6)(i) If (at the time of any transaction referred to in paragraph (c)(4) of this section) a partnership holds property described in paragraph (c)(4) of this section and if—

(A) A partner had a special basis adjustment under section 743(b) in respect of the property;

(B) The basis under section 732 of the property if distributed to the partner would reflect a special basis adjustment under section 732(d); or

(C) On the date a partner acquired a partnership interest by way of a sale or exchange (or upon the death of another partner) the partnership owned the property and an election under section 754 was in effect with respect to the partnership, the partner's share of any potential gain described in paragraph (c)(4) of this section is determined under paragraph (c)(6)(ii) of this section.

(ii) The partner's share of the potential gain described in paragraph (c)(4) of this section in respect of the property to which this paragraph (c)(6)(ii) applies is that amount of gain that the partner would recognize under section 617(d)(1), 995(c), 1245(a), 1248(a), 1250(a), 1251(c) (as in effect before the Tax Reform Act of 1984), 1252(a), 1253(a), or 1254(a) (as the case may be) upon a sale of the property by the partnership, except that, for purposes of this paragraph (c)(6) the partner's share of such gain is determined in a manner that is consistent with the manner in which the partner's share of partnership property is determined; and the amount of a potential special basis adjustment under section 732(d) is treated as if it were the amount of a special basis adjustment under section 743(b). For example, in determining, for purposes of this paragraph (c)(6), the amount of gain that a partner would recognize under section 1245 upon a sale of partnership property, the items allocated under §1.1245–1(e)(3)(ii) are allocated to the partner in the same manner as the partner's share of partnership property is determined. See §1.1250–1(f) for rules similar to those contained in §1.1245–1(e)(3)(ii).

(d) *Inventory items which have substantially appreciated in value*—(1) *Substantial appreciation.* Partnership inventory items shall be considered to have appreciated substantially in value if, at the time of the sale or distribution, the total fair market value of all the inventory items of the partnership exceeds 120 percent of the aggregate adjusted basis for such property in the hands of the partnership (without regard to any special basis adjustment of any partner) and, in addition, exceeds 10 percent of the fair market value of all partnership property other than money. The terms ''inventory items which have appreciated substantially in value'' or ''substantially appreciated inventory items'' refer to the aggregate of all partnership inventory items. These terms do not refer to specific partnership inventory items or to specific groups of such items. For example, any distribution of inventory items by a partnership the inventory items of which as a whole are substantially appreciated in value shall be a distribution of substantially appreciated inventory items for the purposes of section 751(b), even though the specific inventory items distributed may not be appreciated in value. Similarly, if the aggregate of partnership inventory items are not substantially appreciated in value, a distribution of specific inventory items, the value of which is more than 120 percent of their adjusted basis, will not constitute a distribution of substantially appreciated inventory items. For the purpose of this paragraph, the ''fair market value'' of inventory items has the same meaning as ''market'' value in the regulations under section 471, relating to general rule for inventories.

(2) *Inventory items.* The term *inventory items* as used in subchapter K, chapter 1 of the Code, includes the following types of property:

(i) Stock in trade of the partnership, or other property of a kind which would properly be included in the inventory of the partnership if on hand at the close of the taxable year, or property held by the partnership primarily for sale to customers in the ordinary course of its trade or business. See section 1221(1).

(ii) Any other property of the partnership which, on sale or exchange by the partnership, would be considered property other than a capital asset and other than property described in section 1231. Thus, accounts receivable acquired in the ordinary course of business for services or from the sale of stock in trade constitute inventory items (see section 1221(4)), as do any unrealized receivables.

(iii) Any other property retained by the partnership which, if held by the partner selling his partnership interest or receiving a distribution described in section 751(b), would be considered property described in subdivision (i) or (ii) of this subparagraph. Property actually distributed to the partner does not come within the provisions of section 751(d)(2)(C) and this subdivision.

(e) *Section 751 property and other property.* For the purposes of this section, *section 751 property* means unrealized receivables or substantially appreciated inventory items, and *other property* means all property (including money) except section 751 property.

(f) *Effective date.* Section 751 applies to gain or loss to a seller, distributee, or partnership in the case of a sale, exchange, or distribution occurring after March 9, 1954. For the purpose of applying this paragraph in the case of a taxable year beginning before January 1, 1955, a partnership or a partner may elect to treat as applicable any other section of subchapter K, chapter 1 of the Code. Any such election shall be made by a statement submitted not later than the time prescribed by law for the filing of the return for such taxable year, or August 21, 1956, whichever date is later (but not later than 6 months after the time prescribed by law for the filing of the return for such year). See section 771(b)(3) and paragraph (b)(3) of §1.771–1. See also section 771(c) and paragraph (c) of §1.771–1.

(g) *Examples.* Application of the provisions of section 751 may be illustrated by the following examples:

Example 1. C buys B's interest in personal service partnership AB for $15,000, when the balance sheet of the firm (reflecting a cash receipts and disbursements method of accounting) is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$3,000	$3,000
Loans receivable	10,000	10,000
Other assets	7,000	7,000
Unrealized receivables	0	12,000
Total	20,000	32,000

LIABILITIES AND CAPITAL

	Per books	Value
Liabilities	$2,000	$2,000
Capital:		
A	9,000	15,000
B	9,000	15,000
Total	20,000	32,000

Section 751(a) applies to the sale. The total amount realized by B is $16,000, consisting of the cash received, $15,000, plus $1,000, B's share of the partnership liabilities assumed by C. See section 752. B's undivided half interest in the partnership property includes a half-interest in the partnership's unrealized receivables which are worth $12,000. Consequently, $6,000 of the $16,000 realized by B shall be considered received in exchange for B's interest in the partnership attributable to its unrealized receivables. The remaining $10,000 realized by B is in exchange for a capital asset. B's basis for his partnership interest is $10,000 ($9,000, plus $1,000, B's share of partnership liabilities). No portion of this basis is attributable to B's share of the unrealized receivables of the partnership since such property has a zero basis in the hands of the partnership; therefore, B has a basis of zero for the unrealized receivables because the partnership basis for such receivables would have carried over to him under section 732 had they been distributed to him. The difference between the zero basis and the $6,000 B realized for the unrealized receivables is ordinary income to him. The entire $10,000 of B's basis is the basis for his interest in partnership property other than unrealized receivables and is applied against the remaining $10,000 ($16,000 minus $6,000) received from the sale of his interest. Therefore, B has no capital gain or loss. (If B's basis for his interest in partnership property, other than unrealized receivables, were $9,000, he would realize capital gain of $1,000. If his basis were $11,000, he would sustain a capital loss of $1,000).

Example 2. (a) *Facts.* Partnership ABC makes a distribution to partner C in liquidation of his entire one-third interest in the partnership. At the time of the distribution, the balance sheet of the partnership, which uses the accrual method of accounting, is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$15,000	$15,000
Accounts receivable	9,000	9,000
Inventory	21,000	30,000
Depreciable property	42,000	48,000
Land	9,000	9,000
Total	96,000	11,000

LIABILITIES AND CAPITAL

	Per books	Value
Current liabilities	$15,000	$15,000
Mortgage payable	21,000	21,000
Capital:		
A	20,000	25,000
B	20,000	25,000
C	20,000	25,000
Total	96,000	111,000

The distribution received by C consists of $10,000 cash and depreciable property with a fair market value of $15,000 and an adjusted basis to the partnership of $15,000.

(b) *Presence of section 751 property.* The partnership has no unrealized receivables, but the dual test provided in section 751(d)(1) must be applied to determine whether the inventory items of the partnership, in the aggregate, have appreciated substantially in value. The fair market value of all partnership inventory items, $39,000 (inventory $30,000, and accounts receivable $9,000), exceeds 120 percent of the $30,000 adjusted basis of such items to the partnership. The fair market value of the inventory items, $39,000, also exceeds 10 percent of the fair market value of all partnership property other than money (10 percent of $96,000 or $9,600). Therefore, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* Since C's entire partnership interest is to be liquidated, the provisions of section 736 are applicable. No part of the payment, however, is considered as a distributive share or as a guaranteed payment under section 736(a) because the entire payment is made for C's interest in partnership property. Therefore, the entire payment is for an interest in partnership property under section 736(b), and, to the extent applicable, subject to the rules of section 751. In the distribution, C received his share of cash ($5,000) and $15,000 in depreciable property ($1,000 less than his $16,000 share). In addition, he received other partnership property ($5,000 cash and $12,000 liabilities assumed, treated as money distributed under section 752(b)) in exchange for his interest in accounts receivable ($3,000), inventory ($10,000), land ($3,000), and the balance of his interest in depreciable property ($1,000). Section 751(b) applies only to the extent of the exchange of other property for section 751 property (i.e., inventory items, which include trade accounts receivable). The section 751 property exchanged has a fair market value of $13,000 ($3,000 in accounts receivable and $10,000 in inventory). Thus, $13,000 of the total amount C received is considered as received for the sale of section 751 property.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* C's share of the inventory items is treated as if he received them in a current distribution, and his basis for such items is $10,000 ($7,000 for inventory and $3,000 for accounts receivable) as determined under paragraph (b)(3)(iii) of this section. Then C is considered as having sold his share of inventory items to the partnership for $13,000. Thus, on the sale of his share of inventory items, C realizes $3,000 of ordinary income.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was $32,000 ($20,000 plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $10,000, the basis attributed to the section 751 property treated as distributed to C and sold by him to the partnership. Thus, C has a basis of $22,000 for the remainder of his partnership interest. The total distribution to C was $37,000 ($22,000 in cash and liabilities assumed, and $15,000 in depreciable property). Since C received no more than his share of the depreciable property, none of the depreciable property constitutes proceeds of the sale under section 751(b). C did receive more than his share of money. Therefore, the sale proceeds, treated separately in subparagraph (1) of this paragraph of this example, must consist of money and therefore must be deducted from the money distribution. Consequently, in liquidation of the balance of C's interest, he receives depreciable property and $9,000 in money ($22,000 less $13,000). Therefore, no gain or loss is recognized to C on the distribution. Under section 732(b), C's basis for the depreciable property is $13,000 (the remaining basis of his partnership interest, $22,000, reduced by $9,000, the money received in the distribution).

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining members has no ordinary income on the distribution since it did not give up any section 751 property in the exchange. Of the $22,000 money distributed (in cash and the assumption of C's share of liabilities), $13,000 was paid to acquire C's interest in inventory ($10,000 fair market value) and in accounts receivable ($3,000). Since under section 751(b) the partnership is treated as buying these properties, it has a new cost basis for the inventory and accounts receivable acquired from C. Its basis for C's share of inventory and accounts receivable is $13,000, the amount which the partnership is considered as having paid C in the exchange. Since the partnership is treated as having distributed C's share of inventory and accounts receivable to him, the partnership must decrease its basis for inventory and accounts receivable ($30,000) by $10,000, the basis of C's share treated as distributed to him, and then increase the basis for inventory and accounts receivable by $13,000 to reflect the purchase prices of the items acquired. Thus, the basis of the partnership inventory is increased from $21,000 to $24,000 in the transaction. (Note that the basis of property acquired in a section 751(b) exchange is determined under section 1012 without regard to any elections of the partnership. See paragraph (e) of § 1.732–1.) Further, the partnership realizes no capital gain or loss on the portion of the distribution treated as a sale under section 751(b) since, to acquire C's interest in the inventory and accounts receivable, it gave up money and assumed C's share of liabilities.

(2) *The part of the distribution not under section 751(b).* In the remainder of the distribution to C which was not in exchange for C's interest in section 751 property, C received only other property as follows: $15,000 in depreciable property (with a basis to the partnership of $15,000) and $9,000 in money ($22,000 less $13,000 treated under subparagraph (1) of this paragraph of this example). Since this part of the distribution is not an exchange of section 751 property for other property, section 751(b) does not apply. Instead, the provisions which apply are sections 731 through 736, relating to distributions by a partnership. No gain or loss is recognized to the partnership on the distribution. (See section 731(b).) Further, the partnership makes no adjustment to the basis of remaining depreciable property unless an election under section 754 is in effect. (See section 734(a).) Thus, the basis of the depreciable property before the distribution, $42,000, is reduced by

the basis of the depreciable property distributed, $15,000, leaving a basis for the depreciable property in the partnership of $27,000. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) as follows: Since the adjusted basis of the distributed property to the partnership had been $15,000, and is only $13,000 in C's hands (see paragraph (d)(2) of this example), the partnership will increase the basis of the depreciable property remaining in the partnership by $2,000 (the excess of the adjusted basis to the partnership of the distributed depreciable property immediately before the distribution over its basis to the distributee). Whether or not an election under section 754 is in effect, the basis for each of the remaining partner's partnership interests will be $38,000 ($20,000 original contribution, plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities each assumed).

(f) *Partnership trial balance.* A trial balance of the AB partnership after the distribution in liquidation of C's entire interest would reflect the results set forth in the schedule below. Column I shows the amounts to be reflected in the records if an election is in effect under section 754 with respect to an optional adjustment under section 734(b) to the basis of undistributed partnership property. Column II shows the amounts to be reflected in the records where an election under section 754 is not in effect. Note that in column II, the total bases for the partnership assets do not equal the total of the bases for the partnership interests.

Example 3. (a) *Facts.* Assume that the distribution to partner C in example 2 of this paragraph in liquidation of his entire interest in partnership ABC consists of $5,000 in cash and $20,000 worth of partnership inventory with a basis of $14,000.

	I		II	
	Sec.754, Election in effect		Sec.754, Election not in effect	
	Basis	Fair market value	Basis	Fair market value
Cash	$5,000	$5,000	$5,000	$5,000
Accounts receivable	9,000	9,000	9,000	9,000
Inventory	24,000	30,000	24,000	30,000
Depreciable property	29,000	33,000	27,000	33,000
Land	9,000	9,000	9,000	9,000
	76,000	86,000	74,000	86,000
Current liabilities	15,000	15,000	15,000	15,000
Mortgage	21,000	21,000	21,000	21,000
Capital:				
	20,000	25,000	20,000	25,000
	20,000	25,000	20,000	25,000
	76,000	86,000	76,000	86,000

(b) *Presence of section 751 property.* For the same reason as stated in paragraph (b) of example 2, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* In the distribution, C received his share of cash ($5,000) and his share of appreciated inventory items ($13,000). In addition, he received appreciated inventory with a fair market value of $7,000 (and with an adjusted basis to the partnership of $4,900) and $12,000 in money (liabilities assumed). C has relinquished his interest in $16,000 of depreciable property and $3,000 of land. Although C relinquished his interest in $3,000 of accounts receivable, such accounts receivable are inventory items and, therefore, that exchange was not an exchange of section 751 property for other property. Section 751(b) applies only to the extent of the exchange of other property for section 751 property (i.e., depreciable property or land for inventory items). Assume that the partners agree that the $7,000 of inventory in excess of C's share was received by him in exchange for $7,000 of depreciable property.

(d) *Distributee partner's tax consequences.* C's tax consequence on the distributions are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he had received his 7/16ths share of the depreciable property in a current distribution. His basis for that share is $6,125 (42,000/48,000 of $7,000), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/16ths share of depreciable property to the partnership for $7,000, realizing a gain of $875.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was $32,000 ($20,000, plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $6,125, the basis of property treated as distributed to C and sold by him to the partnership. Thus, C will have a basis of $25,875 for the remainder of his partnership interest. Of the $37,000 total distribution to C, $30,000 ($17,000 in money, including liabilities assumed, and $13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory with a fair market value of $13,000 (which had an adjusted basis to the partnership of $9,100) is limited to $8,875, the amount of the remaining basis for his partnership interest, $25,875, reduced by $17,000, the money received. Thus, C's total aggregate basis for the inventory received is $15,875 ($7,000 plus $8,875), and not its $14,000 basis in the hands of the partnership.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining

members has $2,100 of ordinary income on the sale of the $7,000 of inventory which had a basis to the partnership of $4,900 (21,000/30,000 of $7,000). This $7,000 of inventory was paid to acquire 7/16ths of C's interest in the depreciable property. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. Its basis for the depreciable property is $42,875 ($42,000 less $6,125, the basis of the 7/16ths share considered as distributed to C, plus $7,000, the partnership purchase price for this share).

(2) *The part of the distribution not under section 751 (b).* In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 9/16ths interest in depreciable property which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been $9,100, and C's basis for such inventory after distribution is only $8,875. The basis of the inventory remaining in the partnership must be increased by $225. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be $39,050 ($20,000 original contribution, plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities now assumed, plus $1,050, each partner's share of ordinary income realized by the partnership upon that part of the distribution treated as a sale or exchange).

Example 4. (a) *Facts.* Assume the same facts as in example 3 of this paragraph, except that the partners did not identify the property which C relinquished in exchange for the $7,000 of inventory which he received in excess of his share.

(b) *Presence of section 751 property.* For the same reasons stated in paragraph (b) of example 2 of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* The analysis stated in paragraph (c) of example 3 of this paragraph is the same in this example, except that, in the absence of a specific agreement among the partners as to the properties exchanged, C will be presumed to have sold to the partnership a proportionate amount of each property in which he relinquished an interest. Thus, in the absence of an agreement, C has received $7,000 of inventory in exchange for his release of 7/19ths of the depreciable property and 7/19ths of the land. ($7,000, fair market value of property released, over $19,000, the sum of the fair market values of C's interest in the land and C's interest in the depreciable property.)

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he had received his 7/19ths shares of the depreciable property and land in a current distribution. His basis for those shares is $6,263 (51,000/57,000 of $7,000, their fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/19ths shares of depreciable property and land to the partnership for $7,000, realizing a gain of $737.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution C's basis for his partnership interest was $32,000 ($20,000 plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $6,263, the bases of C's shares of depreciable property and land treated as distributed to him and sold by him to the partnership. Thus, C will have a basis of $25,737 for the remainder of his partnership interest. Of the total $37,000 distributed to C, $30,000 ($17,000 in money, including liabilities assumed, and $13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory (with a fair market value of $13,000 and an adjusted basis to the partnership of $9,100) is limited to $8,737, the amount of the remaining basis for his partnership interest ($25,737 less $17,000, money received. Thus, C's total aggregate basis for the inventory he received is $15,737 ($7,000 plus $8,737), and not the $14,000 basis it had in the hands of the partnership.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining members has $2,100 of ordinary income on the sale of $7,000 of inventory which had a basis to the partnership of $4,900 (21,000/30,000 of $7,000). This $7,000 of inventory was paid to acquire 7/19ths of C's interest in the depreciable property and land. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. The bases of the depreciable property and land would be $42,737 and $9,000, respectively. The basis for the depreciable property is computed as follows: The common partnership basis of $42,000 is reduced by the $5,158 basis (42,000/48,000 of $5,895) for C's 7/19ths interest constructively distributed and increased by $5,895 (16,000/19,000 of $7,000), the part of the purchase price allocated to the depreciable property. The basis of the land would be computed in the same way. The $9,000 original partnership basis is reduced by $1,105 basis ($9,000/9,000 of $1,105) of land constructively distributed to C, and increased by $1,105 (3,000/19,000

of $7,000), the portion of the purchase price allocated to the land.

(2) *The part of the distribution not under section 751(b).* In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 12/19ths interests in depreciable property and land which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been $9,100 and C's basis for such inventory after the distribution is only $8,737. The basis of the inventory remaining in the partnership must be increased by the difference of $363. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be $39,050 ($20,000 original contribution plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities assumed, plus $1,050, each partner's share of ordinary income realized by the partnership upon the part of the distribution treated as a sale or exchange).

Example 5. (a) *Facts.* Assume that partner C in example 2 of this paragraph agrees to reduce his interest in capital and profits from one-third to one-fifth for a current distribution consisting of $5,000 in cash, and $7,500 of accounts receivable with a basis to the partnership of $7,500. At the same time, the total liabilities of the partnership are not reduced. Therefore, after the distribution, C's share of the partnership liabilities has been reduced by $4,800 from $12,000 (1/3 of $36,000) to $7,200 (1/5 of $36,000).

(b) *Presence of section 751 property.* For the same reasons as stated in paragraph (b) of example 2 of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* C's interest in the fair market value of the partnership properties before and after the distribution can be illustrated by the following table:

Item	C's interest Fair Market Value		C received		C relinquished
	One-third before	One-fifth after	Distribution of share	In excess of share	
Cash	$5,000	$2,000	$3,000	$2,000	
Liabilities assumed	(12,000)	(7,200)		4,800	
Inventory items:					
Accounts receivable	3,000	300	2,700	4,800	
Inventory	10,000	6,000			$4,000
Depreciable property	16,000	9,600			6,400
Land	3,000	1,800			1,200
Total	25,000	12,500	5,700	11,600	11,600

Although C relinquished his interest in $4,000 of inventory and received $4,800 of accounts receivable, both items constitute section 751 property and C has received only $800 of accounts receivable for $800 worth of depreciable property or for an $800 undivided interest in land. In the absence of an agreement identifying the properties exchanged, it is presumed C received $800 for proportionate shares of his interests in both depreciable property and land. To the extent that inventory was exchanged for accounts receivable, or to the extent cash was distributed for the release of C's interest in the balance of the depreciable property and land, the transaction does not fall within section 751(b) and is a current distribution under section 732(a). Thus, the remaining $6,700 of accounts receivable are received in a current distribution.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* Assuming that the partners paid $800 worth of accounts receivable for $800 worth of depreciable property, C is treated as if he received the depreciable property in a current distribution, and his basis for the $800 worth of depreciable property is $700 (42,000/48,000 of $800, its fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his $800 share of depreciable property to the partnership for $800. On the sale of the depreciable property, C realizes a gain of $100. If, on the other hand, the partners had agreed that C exchanged an $800 interest in the land for $800 worth of accounts receivable, C would realize no gain or loss, because under paragraph (b)(2)(iii) of this section his basis for the land sold would be $800. In the absence of an agreement, the basis for the depreciable property and land (which C is considered as having received in a current distribution and then sold back to the partnership) would be $716 (51,000/57,000 of $800). In that case, on the sale of the balance of the $800 share of depreciable property and land, C would realize $84 of gain ($800 less $716).

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Under section 731, C does not realize either gain or loss on the balance of the distribution. The adjustments to the basis of C's interest are illustrated in the following table:

	If accounts receivable received for depreciable property	If accounts receivable received for land	If there is no agreement
Original basis for C's interest	$32,000	$32,000	$32,000
Less basis of property distributed prior to sec. 751 (b) sale or exchange	−700	−800	−716
	31,300	31,200	31,284
Less money received in distribution	−9,800	−9,800	−9,800
	21,500	21,400	21,484
Less basis of property received in a current distribution under sec. 732	−6,700	−6,700	−6,700
Resulting basis for C's interest	14,800	14,700	14,784

C's basis for the $1,500 worth of accounts receivable which he received in the distribution will be $7,500, composed of $800 for the portion purchased in the section 751(b) exchange, plus $6,700, the basis carried over under section 732(a) for the portion received in the current distribution.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership realizes no gain or loss in the section 751 sale or exchange because it had a basis of $800 for the accounts receivable for which it received $800 worth of other property. If the partnership agreed to purchase $800 worth of depreciable property, the partnership basis of depreciable property becomes $42,100 ($42,000 less $700 basis of property constructively distributed to C, plus $800, price of property purchased). If the partnership purchased land with the accounts receivable, there would be no change in the basis of the land to the partnership because the basis of land distributed was equal to its purchase price. If there were no agreement, the basis of the depreciable property and land would be $51,084 (depreciable property, $42,084 and land $9,000). The basis for the depreciable property is computed as follows: The common partnership basis of $42,000 is reduced by the $590 basis (42,000/48,000 of $674) for C's $674 interest constructively distributed, and increased by $674 (6,400/7,600 of $800), the part of the purchase price allocated to the depreciable property. The basis of the land would be computed in the same way. The $9,000 original partnership basis is reduced by $126 basis (9,000/9,000 of $126) of the land constructively distributed to C, and increased by $126 (1,200/7,600 of $800), the portion of the purchase price allocated to the land.

(2) *The part of the distribution not under section 751(b).* The partnership will realize no gain or loss in the balance of the distribution under section 731. Since the property in C's hands after the distribution will have the same basis it had in the partnership, the basis of partnership property remaining in the partnership after the distribution will not be adjusted (whether or not an election under 754 is in effect).

Example 6. (a) *Facts.* Partnership ABC distributes to partner C, in liquidation of his entire one-third interest in the partnership, a machine which is section 1245 property with a recomputed basis (as defined in section 1245(a)(2)) of $18,000. At the time of the distribution, the balance sheet of the partnership is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$3,000	$3,000
Machine (section 1245 property)	9,000	15,000
Land	18,000	27,000
Total	30,000	45,000

LIABILITIES AND CAPITAL

	Per books	Value
Liabilities	$0	$0
Capital:		
A	10,000	15,000
B	10,000	15,000
C	10,000	15,000
Total	30,000	45,000

(b) *Presence of section 751 property.* The section 1245 property is an unrealized receivable of the partnership to the extent of the potential section 1245 income in respect of the property. Since the fair market value of the property ($15,000) is lower than its recomputed basis ($18,000), the excess of the fair market value over its adjusted basis ($9,000), or $6,000, is the potential section 1245 income of the partnership in respect of the property. The partnership has no other section 751 property.

(c) *The properties exchanged.* In the distribution C received his share of section 751 property (potential section 1245 income of $2,000, i.e., 1/3 of $6,000) and his share of section 1245 property (other than potential section 1245 income) with a fair market value of $3,000, i.e., 1/3 of ($15,000 minus $6,000), and an adjusted basis of $3,000, i.e., 1/3 of $9,000. In addition he received $4,000 of section 751 property (consisting of $4,000 ($6,000 minus $2,000) of potential section 1245 income) and section 1245 property (other than potential section 1245 income) with a fair market value of $6,000 ($9,000 minus $3,000) and an adjusted basis of $6,000 ($9,000 minus $3,000). C relinquished his interest in $1,000 of cash and $9,000 of land. Assume that the partners agree that the $4,000 of section 751 property in excess of C's share was received by him in exchange for $4,000 of land.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distributions are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he received in a current distribution 4/9ths of his share of the land with a basis of $2,667 (18,000/27,000×$4,000). Then C is considered as having sold his 4/9ths share of the land to the partnership for $4,000, realizing a gain of $1,333. C's basis for the remainder of his partnership interest after the current distribution is $7,333, i.e., the basis of his partnership interest before the current distribution ($10,000) minus the basis of the land treated as distributed to him ($2,667).

(2) *The part of the distribution not under section 751(b).* Of the $15,000 total distribution to C, $11,000 ($2,000 of potential section 1245 income and $9,000 section 1245 property other than potential section 1245 income) is not within section 751(b). Under section 732(b) and (c), C's basis for his share of potential section 1245 income is zero (see paragraph (c)(5) of this section) and his basis for $9,000 of section 1245 property (other than potential section 1245 income) is $7,333, i.e., the amount of the remaining basis for his partnership interest ($7,333) reduced by the basis for his share of potential section 1245 income (zero). Thus C's total aggregate basis for the section 1245 property (fair market value of $15,000) distributed to him is $11,333 ($4,000 plus $7,333). For an illustration of the computation of his recomputed basis for the section 1245 property immediately after the distribution, see example 2 of paragraph (f)(3) of § 1.1245–4.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* Upon the sale of $4,000 potential section 1245 income, with a basis of zero, for 4/9ths of C's interest in the land, the partnership consisting of the remaining members has $4,000 ordinary income under sections 751(b) and 1245(a)(1). See section 1245(b)(3) and (6)(A). The partnership's new basis for the land is $19,333, i.e., $18,000, less the basis of the 4/9ths share considered as distributed to C ($2,667), plus the partnership purchase price for this share ($4,000).

(2) *The part of the distribution not under section 751(b).* The analysis under this subparagraph should be made in accordance with the principles illustrated in paragraph (e)(2) of examples 3, 4, and 5 of this paragraph.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8575, July 7, 1965; T.D. 7084, 36 FR 268, Jan. 8, 1971; T.D. 8586, 60 FR 2500, Jan. 10, 1995]

§ 1.752–1 Treatment of partnership liabilities.

(a) Definitions.
(1) Recourse liability defined.
(2) Nonrecourse liability defined.
(3) Related person.
(b) Increase in partner's share of liabilities.
(c) Decrease in partner's share of liabilities.
(d) Assumption of liability.
(e) Property subject to a liability.
(f) Netting of increases and decreases in liabilities resulting from same transaction.
(g) Example.
(h) Sale or exchange of partnership interest.
(i) Bifurcation of partnership liabilities.

§ 1.752–2 Partner's share of recourse liabilities.

(a) In general.
(b) Obligation to make a payment.
(1) In general.
(2) Treatment upon deemed disposition.
(3) Obligations recognized.
(4) Contingent obligations.
(5) Reimbursement rights.
(6) Deemed satisfaction or obligation.
(c) Partner or related person as lender.
(1) In general.
(2) Wrapped debt.
(d) De minimis exceptions.
(1) Partner as lender.
(2) Partner as guarantor.
(e) Special rule for nonrecourse liability with interest guaranteed by a partner.

(1) In general.
(2) Computation of present value.
(3) Safe harbor.
(4) De minimis exception.
(f) Examples.
(g) Time-value-of-money considerations.
(1) In general.
(2) Valuation of an obligation.
(3) Satisfaction of obligation with partner's promissory note.
(4) Example.
(h) Partner providing property as security for partnership liability.
(1) Direct pledge.
(2) Indirect pledge.
(3) Valuation.
(4) Partner's promissory note.
(i) Treatment of recourse liabilities in tiered partnerships.
(j) Anti-abuse rules.
(1) In general.
(2) Arrangements tantamount to a guarantee.
(3) Plan to circumvent or avoid the regulations.
(4) Examples.

§1.752–3 Partner's share of nonrecourse liabilities.

(a) In general.
(b) Examples.

§1.752–4 Special rules.

(a) Tiered partnerships.
(b) Related person definition.
(1) In general.
(2) Person related to more than one partner.
(i) In general.
(ii) Natural persons.
(iii) Related partner exception.
(iv) Special rule where entity structured to avoid related person status.
(A) In general.
(B) Ownership interest.
(C) Example.
(c) Limitation.
(d) Time of determination.

§1.752–5 Effective dates and transition rules.

(a) In general.
(b) Election.
(1) In general.
(2) Time and manner of election.
(c) Effect of section 708(b)(1)(B) termination on determining date liabilities are incurred or assumed.

[T.D. 8380, 56 FR 66350, Dec. 23, 1991]

§1.752–1 Treatment of partnership liabilities.

(a) *Definitions.* For purposes of section 752, the following definitions apply:

(1) *Recourse liability defined.* A partnership liability is a recourse liability to the extent that any partner or related person bears the economic risk of loss for that liability under §1.752–2.

(2) *Nonrecourse liability defined.* A partnership liability is a nonrecourse liability to the extent that no partner or related person bears the economic risk of loss for that liability under §1.752–2.

(3) *Related person.* Related person means a person having a relationship to a partner that is described in §1.752–4(b).

(b) *Increase in partner's share of liabilities.* Any increase in a partner's share of partnership liabilities, or any increase in a partner's individual liabilities by reason of the partner's assumption of partnership liabilities, is treated as a contribution of money by that partner to the partnership.

(c) *Decrease in partner's share of liabilities.* Any decrease in a partner's share of partnership liabilities, or any decrease in a partner's individual liabilities by reason of the partnership's assumption of the individual liabilities of the partner, is treated as a distribution of money by the partnership to that partner.

(d) *Assumption of liability.* Except as otherwise provided in paragraph (e) of this section, a person is considered to assume a liability only to the extent that:

(1) The assuming person is personally obligated to pay the liability; and

(2) If a partner or related person assumes a partnership liability, the person to whom the liability is owed knows of the assumption and can directly enforce the partner's or related person's obligation for the liability, and no other partner or person that is a related person to another partner would bear the economic risk of loss for the liability immediately after the assumption.

(e) *Property subject to a liability.* If property is contributed by a partner to the partnership or distributed by the partnership to a partner and the property is subject to a liability of the transferor, the transferee is treated as having assumed the liability, to the extent that the amount of the liability does not exceed the fair market value of the property at the time of the contribution or distribution.

(f) *Netting of increases and decreases in liabilities resulting from same transaction.* If, as a result of a single transaction, a partner incurs both an increase in the partner's share of the partnership liabilities (or the partner's individual liabilities) and a decrease in the partner's share of the partnership liabilities (or the partner's individual liabilities), only the net decrease is treated as a distribution from the partnership and only the net increase is treated as a contribution of money to the partnership. Generally, the contribution to or distribution from a partnership of property subject to a liability or the termination of the partnership under section 708(b) will require that increases and decreases in liabilities associated with the transaction be netted to determine if a partner will be deemed to have made a contribution or received a distribution as a result of the transaction.

(g) *Example.* The following example illustrates the principles of paragraphs (b), (c), (e), and (f) of this section.

Example. Property contributed subject to a liability; netting of increase and decrease in partner's share of liability. B contributes property with an adjusted basis of $1,000 to a general partnership in exchange for a one-third interest in the partnership. At the time of the contribution, the partnership does not have any liabilities outstanding and the property is subject to a recourse debt of $150 and has a fair market value in excess of $150. After the contribution, B remains personally liable to the creditor and none of the other partners bears any of the economic risk of loss for the liability under state law or otherwise. Under paragraph (e) of this section, the partnership is treated as having assumed the $150 liability. As a result, B's individual liabilities decrease by $150. At the same time, however, B's share of liabilities of the partnership increases by $150. Only the net increase or decrease in B's share of the liabilities of the partnership and B's individual liabilities is taken into account in applying section 752. Because there is no net change, B is not treated as having contributed money to the partnership or as having received a distribution of money from the partnership under paragraph (b) or (c) of this section. Therefore B's basis for B's partnership interest is $1,000 (B's basis for the contributed property).

(h) *Sale or exchange of a partnership interest.* If a partnership interest is sold or exchanged, the reduction in the transferor partner's share of partnership liabilities is treated as an amount realized under section 1001 and the regulations thereunder. For example, if a partner sells an interest in a partnership for $750 cash and transfers to the purchaser the partner's share of partnership liabilities in the amount of $250, the seller realizes $1,000 on the transaction.

(i) *Bifurcation of partnership liabilities.* If one or more partners bears the economic risk of loss as to part, but not all, of a partnership liability represented by a single contractual obligation, that liability is treated as two or more separate liabilities for purposes of section 752. The portion of the liability as to which one or more partners bear the economic risk of loss is a recourse liability and the remainder of the liability, if any, is a nonrecourse liability.

[T.D. 8380, 56 FR 66351, Dec. 23, 1991]

§ 1.752–2 Partner's share of resource liabilities.

(a) *In general.* A partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the economic risk of loss. The determination of the extent to which a partner bears the economic risk of loss for a partnership liability is made under the rules in paragraphs (b) through (j) of this section.

(b) *Obligation to make a payment.* (1) *In general.* Except as otherwise provided in this section, a partner bears the economic risk of loss for a partnership liability to the extent that, if the partnership constructively liquidated, the partner or related person would be obligated to make a payment to any person (or a contribution to the partnership) because that liability becomes due and payable and the partner or related person would not be entitled to reimbursement from another partner or person that is a related person to another partner. Upon a constructive liquidation, all of the following events are deemed to occur simultaneously:

(i) All of the partnership's liabilities become payable in full;

(ii) With the exception of property contributed to secure a partnership liability (see §1.752–2(h)(2)), all of the partnership's assets, including cash, have a value of zero;

(iii) The partnership disposes of all of its property in a fully taxable transaction for no consideration (except relief from liabilities for which the creditors's right to repayment is limited solely to one or more assets of the partnership);

(iv) All items of income, gain, loss, or deduction are allocated among the partners; and

(v) The partnership liquidates.

(2) *Treatment upon deemed disposition.* For purposes of paragraph (b)(1) of this section, gain or loss on the deemed disposition of the partnership's assets is computed in accordance with the following:

(i) If the creditor's right to repayment of a partnership liability is limited solely to one or more assets of the partnership, gain or loss is recognized in an amount equal to the difference between the amount of the liability that is extinguished by the deemed disposition and the tax basis (or book value to the extent section 704(c) or §1.704–1(b)(4)(i) applies) in those assets.

(ii) A loss is recognized equal to the remaining tax basis (or book value to the extent section 704(c) or §1.704–1(b)(4)(i) applies) of all the partnership's assets not taken into account in paragraph (b)(2)(i) of this section.

(3) *Obligations recognized.* The determination of the extent to which a partner or related person has an obligation to make a payment under paragraph (b)(1) of this section is based on the facts and circumstances at the time of the determination. All statutory and contractual obligations relating to the partnership liability are taken into account for purposes of applying this section, including:

(i) Contractual obligations outside the partnership agreement such as guarantees, indemnifications, reimbursement agreements, and other obligations running directly to creditors or to other partners, or to the partnership;

(ii) Obligations to the partnership that are imposed by the partnership agreement, including the obligation to make a capital contribution and to restore a deficit capital account upon liquidation of the partnership; and

(iii) Payment obligations (whether in the form of direct remittances to another partner or a contribution to the partnership) imposed by state law, including the governing state partnership statute.

To the extent that the obligation of a partner to make a payment with respect to a partnership liability is not recognized under this paragraph (b)(3), paragraph (b) of this section is applied as if the obligation did not exist.

(4) *Contingent obligations.* A payment obligation is disregarded if, taking into account all the facts and circumstances, the obligation is subject to contingencies that make it unlikely that the obligation will ever be discharged. If a payment obligation would arise at a future time after the occurrence of an event that is not determinable with reasonable certainty, the obligation is ignored until the event occurs.

(5) *Reimbursement rights.* A partner's or related person's obligation to make a payment with respect to a partnership liability is reduced to the extent that the partner or related person is entitled to reimbursement from another partner or a person who is a related person to another partner.

(6) *Deemed satisfaction of obligation.* For purposes of determining the extent to which a partner or related person has a payment obligation and the economic risk of loss, it is assumed that all partners and related persons who have obligations to make payments actually perform those obligations, irrespective of their actual net worth, unless the facts and circumstances indicate a plan to circumvent or avoid the obligation. See §1.752–2(j).

(c) *Partner or related person as lender*—(1) *In general.* A partner bears the economic risk of loss for a partnership liability to the extent that the partner or a related person makes (or acquires an interest in) a nonrecourse loan to the partnership and the economic risk of loss for the liability is not borne by another partner.

(2) *Wrapped debt.* If a partnership liability is owed to a partner or related person and that liability includes (*i.e.,*

is ‘‘wrapped’’ around) a nonrecourse obligation encumbering partnership property that is owed to another person, the partnership liability will be treated as two separate liabilities. The portion of the partnership liability corresponding to the wrapped debt is treated as a liability owed to another person.

(d) *De minimis exceptions*—(1) *Partner as lender.* The general rule contained in paragraph (c)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, makes a loan to the partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed).

(2) *Partner as guarantor.* The general rule contained in paragraph (b)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, guarantees a loan that would otherwise be a nonrecourse loan of the partnership and which would constitute qualified nonrecourse financing within the meaning of section 465(b)(6) (without regard to the type of activity financed) if the guarantor had made the loan to the partnership.

(e) *Special rule for nonrecourse liability with interest guaranteed by a partner*—(1) *In general.* For purposes of this section, if one or more partners or related persons have guaranteed the payment of more than 25 percent of the total interest that will accrue on a partnership nonrecourse liability over its remaining term, and it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if the partnership fails to do so, then the liability is treated as two separate partnership liabilities. If this rule applies, the partner or related person that has guaranteed the payment of interest is treated as bearing the economic risk of loss for the partnership liability to the extent of the present value of the guaranteed future interest payments. The remainder of the stated principal amount of the partnership liability constitutes a nonrecourse liability. Generally, in applying this rule, it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if, upon a default in payment by the partnership, the lender can enforce the interest guaranty without foreclosing on the property and thereby extinguishing the underlying debt. The guarantee of interest rule continues to apply even after the point at which the amount of guaranteed interest that will accrue is less than 25 percent of the total interest that will accrue on the liability.

(2) *Computation of present value.* The present value of the guaranteed future interest payments is computed using a discount rate equal to either the interest rate stated in the loan documents, or if interest is imputed under either section 483 or section 1274, the applicable federal rate, compounded semi-annually. The computation takes into account any payment of interest that the partner or related person may be required to make only to the extent that the interest will accrue economically (determined in accordance with section 446 and the regulations thereunder) after the date of the interest guarantee. If the loan document contains a variable rate of interest that is an interest rate based on current values of an objective interest index, the present value is computed on the assumption that the interest determined under the objective interest index on the date of the computation will remain constant over the term of the loan. The term ‘‘objective interest index’’ has the meaning given to it in section 1275 and the regulations thereunder (relating to variable rate debt instruments). Examples of an objective interest index include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), and the applicable federal rate under section 1274(d).

(3) *Safe harbor.* The general rule contained in paragraph (e)(1) of this section does not apply to a partnership nonrecourse liability if the guarantee of interest by the partner or related person is for a period not in excess of the lesser of five years or one-third of the term of the liability.

(4) *De minimis exception.* The general rule contained in paragraph (e)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent of less, guarantees the interest on a loan to that partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed). An allocation of interest to the extent paid by the guarantor is not treated as a partnership item of deduction or loss subject to the 10 percent or less rule.

(f) *Examples.* The following examples illustrate the principles of paragraphs (a) through (e) of this section.

Example 1. Determining when a partner bears the economic risk of loss. A and B form a general partnership with each contributing $100 in cash. The partnership purchases an office building on leased land for $1,000 from an unrelated seller, paying $200 in cash and executing a note to the seller for the balance of $800. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that all items are allocated equally except that tax losses are specially allocated 90% to A and 10% to B and that capital accounts will be maintained in accordance with the regulations under section 704(b), including a deficit capital account restoration obligation on liquidation. In a constructive liquidation, the $800 liability becomes due and payable. All of the partnership's assets, including the building, are deemed to be worthless. The building is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution	$100	$100
Loss on hypothetical sale	(900)	(100)
	($800)	$0

Other than the partners' obligation to fund negative capital accounts on liquidation, there are no other contractual or statutory payment obligations existing between the partners, the partnership and the lender. Therefore, $800 of the partnership liability is classified as a recourse liability because one or more partners bears the economic risk of loss for non-payment. B has no share of the $800 liability since the constructive liquidation produces no payment obligation for B. A's share of the partnership liability is $800 because A would have an obligation in that amount to make a contribution to the partnership.

Example 2. Recourse liability; deficit restoration obligation. C and D each contribute $500 in cash to the capital of a new general partnership, CD. CD purchases property from an unrelated seller for $1,000 in cash and a $9,000 mortgage note. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that profits and losses are to be divided 40% to C and 60% to D. C and D are required to make up any deficit in their capital accounts. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	C	D
Initial contribution	$500	$500
Loss on hypothetical sale	(4,000) ($3,500)	(6,000) ($5,500)

C's capital account reflects a deficit that C would have to make up to $3,500 and D's capital account reflects a deficit that D would have to make up of $5,500. Therefore, the $9,000 mortgage note is a recourse liability because one or more partners bear the economic risk of loss for the liability. C's share of the recourse liability is $3,500 and D's share is $5,500.

Example 3. Guarantee by limited partner; partner deemed to satisfy obligation. E and F form a limited partnership. E, the general partner, contributes $2,000 and F, the limited partner, contributes $8,000 in cash to the partnership. The partnership agreement allocates losses 20% to E and 80% to F until F's capital account is reduced to zero, after which all losses are allocated to E. The partnership purchases depreciable property for $25,000 using its $10,000 cash and a $15,000 recourse loan from a bank. F guarantees payment of the $15,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership.

In a constructive liquidation, the $15,000 liability becomes due and payable. All of the partnership's assets, including the depreciable property, are deemed to be worthless. The depreciable property is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	E	F
Initial contribution	$2,000	$8,000
Loss on hypothetical sale	(17,000)	(8,000)
	($15,000)	$0

E, as a general partner, would be obligated by operation of law to make a net contribution to the partnership of $15,000. Because E is assumed to satisfy that obligation, it is also assumed that F would not have to satisfy F's guarantee. The $15,000 mortgage is treated as a recourse liability because one or more partners bear the economic risk of loss. E's share of the liability is $15,000, and F's share is zero. This would be so even if E's net worth at the time of the determination is less than $15,000, unless the facts and circumstances indicate a plan to circumvent or avoid E's obligation to contribute to the partnership.

Example 4. Partner guarantee with right of subrogation. G, a limited partner in the GH partnership, guarantees a portion of a partnership liability. The liability is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. If under state law G is subrogated to the rights of the lender, G would have the right to recover the amount G paid to the recourse lender from the general partner. Therefore, G does not bear the economic risk of loss for the partnership liability.

Example 5. Bifurcation of partnership liability; guarantee of part of nonrecourse liability. A partnership borrows $10,000, secured by a mortgage on real property. The mortgage note contains an exoneration clause which provides that in the event of default, the holder's only remedy is to foreclose on the property. The holder may not look to any other partnership asset or to any partner to pay the liability. However, to induce the lender to make the loan, a partner guarantees payment of $200 of the loan principal. The exoneration clause does not apply to the partner's guarantee. If the partner paid pursuant to the guarantee, the partner would be subrogated to the rights of the lender with respect to $200 of the mortgage debt, but the partner is not otherwise entitled to reimbursement from the partnership or any partner. For purposes of section 752, $200 of the $10,000 mortgage liability is treated as a recourse liability of the partnership and $9,800 is treated as a nonrecourse liability of the partnership. The partner's share of the recourse liability of the partnership is $200.

Example 6. Wrapped debt. I, an individual, purchases real estate from an unrelated seller for $10,000, paying $1,000 in cash and giving a $9,000 purchase mortgage note on which I has no personal liability and as to which the seller can look only to the property for satisfaction. At a time when the property is worth $15,000, I sells the property to a partnership in which I is a general partner. The partnership pays for the property with a partnership purchase money mortgage note of $15,000 on which neither the partnership nor any partner (or person related to a partner) has personal liability. The $15,000 mortgage note is a wrapped debt that includes the $9,000 obligation to the original seller. The liability is a recourse liability to the extent of $6,000 because I is the creditor with respect to the loan and I bears the economic risk of loss for $6,000. I's share of the recourse liability is $6,000. The remaining $9,000 is treated as a partnership nonrecourse liability that is owed to the unrelated seller.

Example 7. Guarantee of interest by partner treated as part recourse and part nonrecourse. On January 1, 1992, a partnership obtains a $4,000,000 loan secured by a shopping center owned by the partnership. Neither the partnership nor any partner has any personal liability under the loan documents for repayment of the stated principal amount. Interest accrues at a 15 percent annual rate and is payable on December 31 of each year. The principal is payable in a lump sum on December 31, 2006. A partner guarantees payment of 50 percent of each interest payment required by the loan. The guarantee can be enforced without first foreclosing on the property. When the partnership obtains the loan, the present value (discounted at 15 percent, compounded annually) of the future interest payments is $3,508,422, and of the future principal payment is $491,578. If tested on that date, the loan would be treated as a partnership liability of $1,754,211 ($3,508,422 × .5) for which the guaranteeing partner bears the economic risk of loss and a partnership nonrecourse liability of $2,245,789 ($1,754,211 + $491,578).

Example 8. Contingent obligation not recognized. J and K form a general partnership with cash contributions of $2,500 each. J and K share partnership profits and losses equally. The partnership purchases an apartment building for its $5,000 of cash and a $20,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the building. The loan documents provide that the partnership will be liable for the outstanding balance of the loan on a recourse basis to the extent of any decrease in the value of the apartment building resulting from the partnership's failure properly to maintain the property. There are no facts that establish with reasonable certainty the existence of any liability on the part of the partnership (and its partners) for damages resulting from the partnership's failure properly to maintain the building. Therefore, no partner bears the economic risk of loss, and the liability constitutes a nonrecourse liability. Under §1.752–3, J and K share this nonrecourse liability equally because they share all profits and losses equally.

(g) *Time-value-of-money considerations*—(1) *In general.* The extent to which a partner or related person bears the economic risk of loss is determined by taking into account any delay in the time when a payment or contribution obligation with respect to a partnership liability is to be satisfied. If a payment obligation with respect to a partnership liability is not required to be satisfied within a reasonable time after the liability becomes due and payable, or if the obligation to make a contribution to the partnership is not required to be satisfied before the later of—

(i) The end of the year in which the partner's interest is liquidated, or

(ii) 90 days after the liquidation,

the obligation is recognized only to the extent of the value of the obligation.

(2) *Valuation of an obligation.* The value of a payment or contribution obligation that is not required to be satisfied within the time period specified in paragraph (g)(1) of this section equals the entire principal balance of the obligation only if the obligation bears interest equal to or greater than the applicable federal rate under section 1274(d) at the time of valuation, commencing on—

(i) In the case of a payment obligation, the date that the partnership liability to a creditor or other person to whom the obligation relates becomes due and payable, or

(ii) In the case of a contribution obligation, the date of the liquidation of the partner's interest in the partnership. If the obligation does not bear interest at a rate at least equal to the applicable federal rate at the time of valuation, the value of the obligation is discounted to the present value of all payments due from the partner or related person (*i.e.*, the imputed principal amount computed under section 1274(b)). For purposes of making this present value determination, the partnership is deemed to have constructively liquidated as of the date on which the payment obligation is valued and the payment obligation is assumed to be a debt instrument subject to the rules of section 1274 (*i.e.*, the debt instrument is treated as if it were issued for property at the time of the valuation).

(3) *Satisfaction of obligation with partner's promissory note.* An obligation is not satisfied by the transfer to the obligee of a promissory note by a partner or related person unless the note is readily tradeable on an established securities market.

(4) *Example.* The following example illustrates the principle of paragraph (g) of this section.

Example. Value of obligation not required to be satisfied within specified time period. A, the general partner, and B, the limited partner, each contributes $10,000 to partnership AB. AB purchases property from an unrelated seller for $20,000 in cash and a $70,000 recourse purchase money note. The partnership agreement provides that profits and losses are to be divided equally. A and B are required to make up any deficit in their capital accounts. While A is required to restore any deficit balance in A's capital account within 90 days after the date of liquidation of the partnership, B is not required to restore any deficit for two years following the date of liquidation. The deficit in B's capital account will not bear interest during that two-year period. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution	$10,000	$10,000
Loss on hypothetical sale	(45,000)	(45,000)
	(35,000)	(35,000)

A's and B's capital accounts each reflect deficits of $35,000. B's obligation to make a contribution pursuant to B's deficit restoration obligation is recognized only to the extent of the fair market value of that obligation at the time of the constructive liquidation because B is not required to satisfy that obligation by the later of the end of the partnership taxable year in which B's interest is liquidated or within 90 days after the date of the liquidation. Because B's obligation does not bear interest, the fair market value is deemed to equal the imputed principal amount under section 1274(b). Under section 1274(b), the imputed principal amount of a debt instrument equals the present value of all payments due under the debt instrument. Assume the applicable federal rate with respect to B's obligation is 10 percent compounded semiannually. Using this discount rate, the present value of the $35,000 payment that B would be required to make two years after the constructive liquidation to restore the deficit balance in B's capital account equals $28,795. To the extent that B's deficit restoration obligation is not recognized, it is assumed that B's obligation does not exist. Therefore, A, as the sole general partner, would be obligated by operation of law to contribute an additional $6,205 of capital to the partnership. Accordingly, under paragraph (g) of this section, B bears the economic risk of loss for $28,795 and A bears the economic risk of loss for $41,205 ($35,000 + $6,205).

(h) *Partner providing property as security for partnership liability*—(1) *Direct pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any the partner's or related person's separate property (other than a direct or indirect interest in the partnership) that is pledged as security for the partnership liability.

(2) *Indirect pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any property that the partner contributes to the partnership solely for the purpose of securing a partnership liability. Contributed property is not treated as contributed solely for the purpose of securing a partnership liability unless substantially all of the items of income, gain, loss, and deduction attributable to the contributed property are allocated to the contributing partner, and this allocation is generally greater than the partner's share of other significant items of partnership income, gain, loss, or deduction.

(3) *Valuation*. The extent to which a partner bears the economic risk of loss as a result of a direct pledge described in paragraph (h)(1) of this section or an indirect pledge described in paragraph (h)(2) of this section is limited to the fair market value of the property at the time of the pledge or contribution.

(4) *Partner's promissory note.* For purposes of paragraph (h)(2) of this section, a promissory note of the partner or related person that is contributed to the partnership shall not be taken into account unless the note is readily tradeable on an established securities market.

(i) *Treatment of recourse liabilities in tiered partnerships.* If a partnership (the ''upper-tier partnership'') owns (directly or indirectly through one or more partnerships) an interest in another partnership (the ''lower-tier partnership''), the liabilities of the lower-tier partnership are allocated to the upper-tier partnership in an amount equal to the sum of the following—

(1) The amount of the economic risk of loss that the upper-tier partnership bears with respect to the liabilities; and

(2) Any other amount of the liabilities with respect to which partners of the upper-tier partnership bear the economic risk of loss.

(j) *Anti-abuse rules*—(1) *In general.* An obligation of a partner or related person to make a payment may be disregarded or treated as an obligation of another person for purposes of this section if facts and circumstances indicate that a principal purpose of the arrangement between the parties is to eliminate the partner's economic risk of loss with respect to that obligation or create the appearance of the partner or related person bearing the economic risk of loss when, in fact, the substance of the arrangement is otherwise. Circumstances with respect to which a payment obligation may be disregarded include, but are not limited to, the situations described in paragraphs (j)(2) and (j)(3) of this section.

(2) *Arrangements tantamount to a guarantee.* Irrespective of the form of a contractual obligation, a partner is considered to bear the economic risk of loss with respect to a partnership liability, or a portion thereof, to the extent that:

(i) The partner or related person undertakes one or more contractual obligations so that the partnership may obtain a loan;

(ii) The contractual obligations of the partner or related person eliminate substantially all the risk to the lender that the partnership will not satisfy its obligations under the loan; and

(iii) One of the principal purposes of using the contractual obligations is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests.

The partners are considered to bear the economic risk of loss for the liability in accordance with their relative economic burdens for the liability pursuant to the contractual obligations. For example, a lease between a partner and a partnership which is not on commercially reasonable terms may be tantamount to a guarantee by the partner of a partnership liability.

(3) *Plan to circumvent or avoid the obligation.* An obligation of a partner to make a payment is not recognized if the facts and circumstances evidence a plan to circumvent or avoid the obligation.

(4) *Example.* The following example illustrates the principle of paragraph (j)(3) of this section.

Example. Plan to circumvent or avoid obligation. A and B form a general partnership. A, a corporation, contributes $20,000 and B contributes $80,000 to the partnership. A is obligated to restore any deficit in its partnership capital account. The partnership agreement allocates losses 20% to A and 80% to B until B's capital account is reduced to zero, after which all losses are allocated to A. The partnership purchases depreciable property for $250,000 using its $100,000 cash and a $150,000 recourse loan from a bank. B guarantees payment of the $150,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership. A is a subsidiary, formed by a parent of a consolidated group, with capital limited to $20,000 to allow the consolidated group to enjoy the tax losses generated by the property while at the same time limiting its monetary exposure for such losses. These facts, when considered together with B's guarantee, indicate a plan to circumvent or avoid A's obligation to contribute to the partnership. The rules of section 752 must be applied as if A's obligation to contribute did not exist. Accordingly, the $150,000 liability is a recourse liability that is allocated entirely to B.

[T.D. 8380, 56 FR 66351, Dec. 23, 1991; 57 FR 4913, Feb. 10, 1992; 57 FR 5054, Feb. 12, 1992; 57 FR 5511, Feb. 14, 1992]

§1.752–3 Partner's share of nonrecourse liabilities.

(a) *In general.* A partner's share of the nonrecourse liabilities of a partnership equals the sum of paragraphs (a)(1) through (a)(3) of this section as follows—

(1) The partner's share of partnership minimum gain determined in accordance with the rules of section 704(b) and the regulations thereunder;

(2) The amount of any taxable gain that would be allocated to the partner under section 704(c) (or in the same manner as section 704(c) in connection with a revaluation of partnership property) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of the liabilities and for no other consideration; and

(3) The partner's share of the excess nonrecourse liabilities (those not allocated under paragraphs (a)(1) and (a)(2) of this section) of the partnership as determined in accordance with the partner's share of partnership profits. The partner's interest in partnership profits is determined by taking into account all facts and circumstances relating to the economic arrangement of the partners. The partnership agreement may specify the partners' interests in partnership profits for purposes of allocating excess nonrecourse liabilities provided the interests so specified are reasonably consistent with allocations (that have substantial economic effect under the section 704(b) regulations) of some other significant item of partnership income or gain. Alternatively, excess nonrecourse liabilities may be allocated among the partners in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Excess nonrecourse liabilities are not required to be allocated under the same method each year.

(b) *Examples.* The following examples illustrate the principles of paragraph (a) of this section.

Example 1. Partner's share of nonrecourse liabilities. The AB partnership purchases depreciable property for a $1,000 purchase money note that is nonrecourse liability under the rules of this section. Assume that this is the only nonrecourse liability of the partnership, and that no principal payments are due on the purchase money note for a year. The partnership agreement provides that all items of income, gain, loss, and deduction are allocated equally. Immediately after purchasing the depreciable property, the partners share the nonrecourse liability equally because they have equal interests in partnership profits. A and B are each treated as if they contributed $500 to the partnership to reflect each partner's increase in his or her share of partnership liabilities (from $0 to $500). The minimum gain with respect to an item of partnership property subject to a nonrecourse liability equals the amount of gain that would be recognized if the partnership disposed of the property in full satisfaction of the nonrecourse liability and for no other consideration. Therefore, if the partnership claims a depreciation deduction of $200 for the depreciable property for the year it acquires that property, partnership minimum gain for the year will increase by $200 (the excess of the $1,000 nonrecourse liability over the $800 adjusted tax basis of the property). See section 704(b) and the regulations thereunder. A and B each have a $100 share of partnership minimum gain at the end of that year because the depreciation deduction is treated as a nonrecourse deduction. See section 704(b) and the regulation thereunder. Accordingly, at the end of that year, A and B are allocated $100 each of the nonrecourse liability to match their shares of partnership minimum gain. The remaining $800 of the nonrecourse liability will be allocated equally between A and B ($400 each).

Example 2. Excess nonrecourse liabilities allocated consistently with reasonably expected deductions. The facts are the same as in *Example 1* except that the partnership agreement provides that depreciation deductions will be allocated to A. The partners agree to allocate excess nonrecourse liabilities in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Assuming that the allocation of all of the depreciation deductions to A is valid under section 704(b), immediately after purchasing the depreciable property, A's share of the nonrecourse liability is $1,000. Accordingly, A is treated as if A contributed $1,000 to the partnership.

[T.D. 8380, 56 FR 66355, Dec. 23, 1991]

§ 1.752–4 Special rules.

(a) *Tiered partnerships.* An upper-tier partnership's share of the liabilities of a lower-tier partnership (other than any liability of the lower-tier partnership that is owed to the upper-tier partnership) is treated as a liability of the upper-tier partnership for purposes of applying section 752 and the regulations thereunder to the partners of the upper-tier partnership.

(b) *Related person definition*—(1) *In general.* A person is related to a partner if the person and the partner bear a relationship to each other that is specified in section 267(b) or 707(b)(1), subject to the following modifications:

(i) Substitute ''80 percent or more'' for ''more than 50 percent'' each place it appears in those sections;

(ii) A person's family is determined by excluding brothers and sisters; and

(iii) Disregard sections 267(e)(1) and 267(f)(1)(A).

(2) *Person related to more than one partner*—(i) *In general.* If, in applying the related person rules in paragraph (b)(1) of this section, a person is related to more than one partner, paragraph (b)(1) of this section is applied by treating the person as related only to the partner with whom there is the highest percentage of related ownership. If two or more partners have the same percentage of related ownership and no other partner has a greater percentage, the liability is allocated equally among the partners having the equal percentages of related ownership.

(ii) *Natural persons.* For purposes of determining the percentage of related ownership between a person and a partner, natural persons who are related by virtue of being members of the same family are treated as having a percentage relationship of 100 percent with respect to each other.

(iii) *Related partner exception.* Notwithstanding paragraph (b)(1) of this section (which defines related person), persons owning interests directly or indirectly in the same partnership are not treated as related persons for purposes of determining the economic risk of loss borne by each of them for the liabilities of the partnership. This paragraph (iii) does not apply when determining a partner's interest under the de minimis rules in §§ 1.752–2 (d) and (e).

(iv) *Special rule where entity structured to avoid related person status*—(A) *In general.* If—

(*1*) A partnership liability is owed to or guaranteed by another entity that is a partnership, an S corporation, a C corporation, or a trust;

(*2*) A partner or related person owns (directly or indirectly) a 20 percent or more ownership interest in the other entity; and

(*3*) A principal purpose of having the other entity act as a lender or guarantor of the liability was to avoid the determination that the partner that owns the interest bears the economic risk of loss for federal income tax purposes for all or part of the liability;

then the partner is treated as holding the other entity's interest as a creditor or guarantor to the extent of the partner's or related person's ownership interest in the entity.

(B) *Ownership interest.* For purposes of paragraph (b)(2)(iv)(A) of this section, a person's ownership interest in:

(*1*) A partnership equals the partner's highest percentage interest in any item of partnership loss or deduction for any taxable year;

(*2*) An S corporation equals the percentage of the outstanding stock in the S corporation owned by the shareholder;

(*3*) A C corporation equals the percentage of the fair market value of the issued and outstanding stock owned by the shareholder; and

(*4*) A trust equals the percentage of the actuarial interests owned by the beneficial owner of the trust.

(C) Example. Entity structured to avoid related person status. A, B, and C form a general partnership, ABC. A, B, and C are equal partners, each contributing $1,000 to the partnership. A and B want to loan money to ABC and have the loan treated as nonrecourse for purposes of section 752. A and B form partnership AB to which each contributes $50,000. A and B share losses equally in partnership AB. Partnership AB loans partnership ABC $100,000 on a nonrecourse basis secured by the property ABC buys with the loan. Under these facts and circumstances, A and B bear the economic risk of loss with respect to the partnership liability equally based on their percentage interest in losses of partnership AB.

(c) *Limitation.* The amount of an indebtedness is taken into account only once, even though a partner (in addition to the partner's liability for the indebtedness as a partner) may be separately liable therefor in a capacity other than as a partner.

(d) *Time of determination.* A partner's share of partnership liabilities must be determined whenever the determination is necessary in order to determine the tax liability of the partner or any other person. See §1.705–1(a) for rules regarding when the adjusted basis of a partner's interest in the partnership must be determined.

[T.D. 8380, 56 FR 66356, Dec. 23, 1991]

§1.752–5 Effective dates and transition rules.

(a) *In general.* Unless a partnership makes an election under paragraph (b)(1) of this section to apply the provisions of §§1.752–1 through 1.752–4 earlier, §§1.752–1 through 1.752–4 apply to any liability incurred or assumed by a partnership on or after December 28, 1991, other than a liability incurred or assumed by the partnership pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter. For liabilities incurred or assumed by a partnership prior to December 28, 1991 (or pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter), unless an election to apply these regulations has been made, see §§1.752–0T to 1.752–4T, set forth in 26 CFR 1.752–0T through 1.752–4T as contained in 26 CFR edition revised April 1, 1991, (TD 8237, TD 8274, and TD 8355) and §1.752–1, set forth in 26 CFR 1.752–1 as contained in 26 CFR edition revised April 1, 1988 (TD 6175 and TD 6500).

(b) *Election*—(1) *In general.* A partnership may elect to apply the provisions of §§1.752–1 through 1.752–4 to all of its liabilities to which the provisions of those sections do not otherwise apply as of the beginning of the first taxable year of the partnership ending on or after December 28, 1991.

(2) *Time and manner of election.* An election under this paragraph (b) is made by attaching a written statement to the partnership return for the first taxable year of the partnership ending on or after December 28, 1991. The written statement must include the name, address, and taxpayer identification number of the partnership making the statement and contain a declaration that an election is being made under this paragraph (b).

(c) *Effect of section 708(b)(1)(B) termination on determining date liabilities are* *incurred or assumed.* For purposes of applying this section, a termination of the partnership under section 708(b)(1)(B) will not cause partnership liabilities incurred or assumed prior to the termination to be treated as incurred or assumed on the date of the termination.

[T.D. 8380, 56 FR 66356, Dec. 23, 1991]

§ 1.753–1 Partner receiving income in respect of decedent.

(a) *Income in respect of a decedent under section 736(a).* All payments coming within the provisions of section 736(a) made by a partnership to the estate or other successor in interest of a deceased partner are considered income in respect of the decedent under section 691. The estate or other successor in interest of a deceased partner shall be considered to have received income in respect of a decedent to the extent that amounts are paid by a third person in exchange for rights to future payments from the partnership under section 736(a). When a partner who is receiving payments under section 736(a) dies, section 753 applies to any remaining payments under section 736(a) made to his estate or other successor in interest.

(b) *Other income in respect of a decedent.* When a partner dies, the entire portion of the distributive share which is attributable to the period ending with the date of his death and which is taxable to his estate or other successor constitutes income in respect of a decedent under section 691. This rule applies even though that part of the distributive share for the period before death which the decedent withdrew is not included in the value of the decedent's partnership interest for estate tax purposes. See paragraph (c) (3) of § 1.706–1.

(c) *Example.* The provisions of this section may be illustrated by the following example:

Example. A and the decedent B were equal partners in a business having assets (other than money) worth $40,000 with an adjusted basis of $10,000. Certain partnership business was well advanced towards completion before B's death and, after B's death but before the end of the partnership year, payment of $10,000 was made to the partnership for such work. The partnership agreement provided that, upon the death of one of the partners, all partnership property, including unfinished work, would pass to the surviving partner, and that the surviving partner would pay the estate of the decedent the undrawn balance of his share of partnership earnings to the date of death, plus $10,000 in each of the three years after death. B's share of earnings to the date of his death was $4,000, of which he had withdrawn $3,000. B's distributive share of partnership income of $4,000 to the date of his death is income in respect of a decedent (although only the $1,000 undrawn at B's death will be reflected in the value of B's partnership interest on B's estate tax return). Assume that the value of B's interest in partnership property at the date of his death was $22,000, composed of the following items: B's one-half share of the assets of $40,000, plus $2,000, B's interest in partnership cash. It should be noted that B's $1,000 undrawn share of earnings to the date of his death is not a separate item but will be paid from partnership assets. Under the partnership agreement, A is to pay B's estate a total of $31,000. The difference of $9,000 between the amount to be paid by A ($31,000) and the value of B's interest in partnership property ($22,000) comes within section 736(a) and, thus, also constitutes income in respect of a decedent. (However, the $17,000 difference between the $5,000 basis for B's share of the partnership property and its $22,000 value at the date of his death does not constitute income in respect of a decedent.) If, before the close of the partnership taxable year, A pays B's estate $11,000, of which they agree to allocate $3,000 as the payment under section 736(a), B's estate will include $7,000 in its gross income (B's $4,000 distributive share plus $3,000 payment under section 736(a)). In computing the deduction under section 691(c), this $7,000 will be considered as the value for estate tax purposes of such income in respect of a decedent, even though only $4,000 ($1,000 of distributive share not withdrawn, plus $3,000, payment under section 736(a)) of this amount can be identified on the estate tax return as part of the partnership interest.

(d) *Effective date.* The provisions of section 753 apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954. See section 771(b)(4) and paragraph (b)(4) of § 1.771–1.

§ 1.754–1 Time and manner of making election to adjust basis of partnership property.

(a) *In general.* A partnership may adjust the basis of partnership property under sections 734(b) and 743(b) if it files an election in accordance with the rules set forth in paragraph (b) of this section. An election may not be filed to make the adjustments provided in either section 734(b) or section 743(b) alone, but such an election must apply to both sections. An election made under the provisions of this section shall apply to all property distributions and transfers of partnership interests taking place in the partnership taxable year for which the election is made and in all subsequent partnership taxable years unless the election is revoked pursuant to paragraph (c) of this section.

(b) *Time and method of making election.* (1) An election under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b), with respect to a distribution of property to a partner or a transfer of an interest in a partnership, shall be made in a written statement filed with the partnership return for the taxable year during which the distribution or transfer occurs. For the election to be valid, the return must be filed not later than the time prescribed by paragraph (e) of §1.6031–1 (including extensions thereof) for filing the return for such taxable year (or before August 23, 1956, whichever is later). Notwithstanding the preceding two sentences, if a valid election has been made under section 754 and this section for a preceding taxable year and not revoked pursuant to paragraph (c) of this section, a new election is not required to be made. The statement required by this subparagraph shall (i) set forth the name and address of the partnership making the election, (ii) be signed by any one of the partners, and (iii) contain a declaration that the partnership elects under section 754 to apply the provisions of section 734(b) and section 743(b). For rules regarding extensions of time for filing elections, see §1.9100–1.

(2) The principles of this paragraph may be illustrated by the following example:

Example. A, a U.S. citizen, is a member of partnership ABC, which has not previously made an election under section 754 to adjust the basis of partnership property. The partnership and the partners use the calendar year as the taxable year. A sells his interest in the partnership to D on January 1, 1971. The partnership may elect under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b). Unless an extension of time to make the election is obtained under the provisions of §1.9100–1, the election must be made in a written statement filed with the partnership return for 1971 and must contain the information specified in subparagraph (1) of this paragraph. Such return must be filed by April 17, 1972 (unless an extension of time for filing the return is obtained). The election will apply to all distributions of property to a partner and transfers of an interest in the partnership occurring in 1971 and subsequent years, unless revoked pursuant to paragraph (c) of this section.

(c) *Revocation of election.* A partnership having an election in effect under this section may revoke such election with the approval of the district director for the internal revenue district in which the partnership return is required to be filed. A partnership which wishes to revoke such an election shall file with the district director for the internal revenue district in which the partnership return is required to be filed an application setting forth the grounds on which the revocation is desired. The application shall be filed not later than 30 days after the close of the partnership taxable year with respect to which revocation is intended to take effect and shall be signed by any one of the partners. Examples of situations which may be considered sufficient reason for approving an application for revocation include a change in the nature of the partnership business, a substantial increase in the assets of the partnership, a change in the character of partnership assets, or an increased frequency of retirements or shifts of partnership interests, so that an increased administrative burden would result to the partnership from the election. However, no application for revocation of an election shall be approved when the purpose of the revocation is primarily to avoid stepping down the basis of partnership assets upon a transfer or distribution.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972]

§1.755–1 Rules for allocation of basis.

(a) *General rule.* (1)(i) A partnership which has elected under section 754 must adjust the basis of partnership property under the provisions of section 734(b) (relating to the optional adjustment to the basis of undistributed partnership property) and section 743(b) (relating to the optional adjustment to the basis of partnership property where a partnership interest is transferred). The amount of the increase or decrease (as determined in those sections) in the adjusted basis of the partnership property shall first be divided, under paragraph (b) of this section, between the two classes of property described in section 755(b). Then, the portion of the increase or decrease allocated to each class shall be further allocated to the bases of the properties within the class in a manner which will reduce the difference between the fair market value and the adjusted basis of partnership properties. In the alternative, any increase or decrease may be allocated in any other manner approved by the district director under subparagraph (2) of this paragraph.

(ii) If there is an increase in basis to be allocated to partnership assets, such increase must be allocated only to assets whose values exceed their bases and in proportion to the difference between the value and basis of each. No increase shall be made to the basis of any asset the adjusted basis of which equals or exceeds its fair market value.

(iii) If there is a decrease in basis to be allocated to partnership assets, such decrease must be allocated to assets whose bases exceed their value and in proportion to the difference between the basis and value of each. No decrease shall be made to the basis of any asset, the fair market value of which equals or exceeds its adjusted basis.

(iv) The application of the rules with respect to the allocation of an adjustment in basis under subdivisions (ii) and (iii) of this subparagraph requires that a portion of such adjustment be allocated to partnership good will, to the extent that good will exists and is reflected in the value of the property distributed, the price at which the partnership interest is sold, or the basis of the partnership interest determined under section 1014, in accordance with the difference between such value of the good will and its adjusted basis at the time of the transaction.

(2) If a partnership (or a partner electing under section 732(d)) desires to adjust the basis of assets under section 734(b) or 743(b) in a manner other than that prescribed in subparagraph (1) of this paragraph, it must file an application for permission to use such method with the district director no later than 30 days after the close of the partnership taxable year in which the proposed adjustment is to be made. The application must describe the proposed adjustments in detail and set forth the reasons for the desired use of the other method. Under section 755(a)(2), the district director may permit the partnership to increase the bases of some partnership properties and decrease the bases of other partnership properties under section 734(b) or 743(b). Each increase or decrease to the basis of an asset must reduce or eliminate the difference between such basis and the value of the asset. The net amount of all such adjustments must equal the amount of the adjustment under section 734(b) or 743(b). Adjustments that both increase and decrease the basis of partnership assets will be permitted by the district director only upon a satisfactory showing of the values for partnership assets used by the parties to determine the price at which a partnership interest was sold, the value of the decedent's partnership interest at date of death (or at the alternate valuation date, if used), or the amount of a distribution.

(b) *Special rules.* For the purposes of applying section 755, all partnership property shall be classified into two categories: Capital assets and property described in section 1231(b) (certain property used in the trade or business), or any other property of the partnership.

(1) *Distributions.* (i) Where there is a distribution of partnership property resulting in an adjustment to the basis of undistributed partnership property under section 734(b)(1)(B) or (b)(2)(B), such adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose. Thus, when the partnership adjusted basis of distributed capital assets and section 1231(b)

property immediately prior to distribution exceeds the basis of such property to the distributee partner (as determined under section 732), the basis of the undistributed capital assets and section 1231(b) property remaining in the partnership shall be increased by an amount equal to such excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital assets and section 1231(b) property exceeds the partnership adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital assets and section 1231(b) property remaining in the partnership shall be decreased by an amount equal to such excess. Similarly, where there is a distribution of partnership property other than capital assets and section 1231(b) property, and the basis of such other property to the distributee partner (as determined under section 732) is not the same as the partnership adjusted basis of such property immediately prior to distribution, the adjustment shall be made only to undistributed property of the same category remaining in the partnership.

(ii) Where there is a distribution resulting in an adjustment under section 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, such adjustment must be allocated only to capital assets or section 1231(b) property.

(2) *Transfers.* Where there is a basis adjustment under section 743(b) arising from a transfer of an interest in a partnership by sale or exchange or upon the death of a partner, the amount of the adjustment shall be allocated between the two classes of property described in section 755(b) and then the amount allocated to each class shall be further allocated under the rules of paragraph (a)(1) of this section. Thus, to the extent that an amount paid by a purchaser of a partnership interest (or the basis of the partnership interest to the estate or other successor in interest of a deceased partner) is attributable to the value of capital assets and section 1231(b) property, any difference between the amount so attributable and the transferee partner's share of the partnership basis of such property shall constitute a special basis adjustment with respect to partnership capital assets and section 1231 (b) property. Similarly, any such difference attributable to any other property of the partnership shall constitute a special basis adjustment with respect to such property.

(3) *Limitation on decrease of basis.* Where a decrease in the basis of partnership assets is required under section 734(b)(2) and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of such property shall be reduced to zero (but not below zero), and the balance of the decrease in basis shall be made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(4) *Carryover of adjustment.* Where, in the case of a distribution, an increase or decrease required under paragraph (a) of this section in the basis of undistributed partnership property cannot be made because the partnership owns no property of the character required to be adjusted, or because the adjustment has been limited under subparagraph (3) of this paragraph, the adjustment shall be made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Assume that partnership ABC has three assets: X, a capital asset with an adjusted basis of $1,000 and a value of $1,500; Y, a depreciable asset with an adjusted basis of $1,000 and a value of $900; and Z, inventory items with an adjusted basis of $700 and a value of $600. A sells his interest to D (when an election under 754 is in effect) for $1,000 (1/3 of $3,000, the total value of partnership assets). D's share of the adjusted basis of partnership property is $900 (1/3 of $2,700). Therefore, under section 743(b), D has a special basis adjustment of $100 ($1,000 minus $900). This adjustment must be allocated entirely to property X, since such allocation will have the effect of reducing the difference between the value and basis of such asset. Therefore, D has a special basis adjustment of $100 with respect to property X, which now has a special basis to him of $1,100. No part of the adjustment is made to depreciable property Y or inventory items Z, since any such adjustment would increase the difference between the basis and value of each such asset.

Example (2). Assume the same facts as in example 1 of this paragraph, except that capital asset X has a value of $1,500, depreciable property Y has a value of $1,100, and inventory items Z have a value of only $400. Therefore, under section 743(b), D has a special basis adjustment of $100, the excess of D's basis for his interest in the partnership ($1,000) over his share of the adjusted basis of partnership property ($900). This $100 adjustment must be allocated entirely to capital asset X and depreciable property Y in proportion to the difference between the value and basis of each since such allocation has the effect of reducing the difference between the value and basis of each such asset. Therefore, D has a special basis adjustment of $83 ($500/$600 of $100) with respect to capital asset X, which now has a special basis to him of $1,083, and of $17 ($100/$600 of $100) with respect to depreciable property Y, which now has a special basis to him of $1,017. No part of the adjustment is made to inventory items Z, since any such adjustment would increase the difference between the basis of such asset and its value.

Example (3). Assume that partnership EFG has three assets: X, a capital asset with an adjusted basis of $1,000 and a value of $1,500; Y, a depreciable asset with an adjusted basis of $1,000 and a value of $700; and Z, inventory items with an adjusted basis of $700 and a value of $800. E sells his interest to H (when an election under section 754 is in effect) for $1,000 (1/3 of $3,000, the total value of the partnership assets). H's share of the adjusted basis of partnership is $900 (1/3 of $2,700). Therefore, H has a special basis adjustment of $100 ($1,000 minus $900) under section 743(b). Since, of the total $300 difference between the value and the adjusted basis of all partnership property, $200 ($500, appreciation in value of X, minus $300, depreciation in value of Y) is attributable to the class of capital assets and depreciable property, and $100 (appreciation in value of inventory items Z) to the class of other property, H's special basis adjustment of $100 must be allocated 2/3 to capital assets and depreciable property and 1/3 to other property (inventory). The $67 increase (2/3 of $100) to be allocated to capital assets and depreciable property must further be allocated so as to reduce the difference between the value and basis of such assets. This can be done only by allocating the entire $67 increase to capital asset X (the basis of which is less than its value), and no part of the increase to depreciable property Y (the basis of which exceeds its value). Therefore, H has a special basis adjustment of $67 for capital asset X, which now has a special basis to him of $1,067; he has no special basis adjustment for depreciable property Y. H also has a special basis adjustment of $33 (1/3 of $100) for inventory items Z, the special basis of which is now $733.

§ 1.755–2T Coordination of sections 755 and 1060 (temporary).

(a) *Coordination with section 1060*—(1) *In general.* If there is a basis adjustment to which this section applies—

(i) The fair market value of each item of partnership property must be determined under this section; and

(ii) The rules of § 1.755–1 must be applied using the values so determined.

(2) *Application of this section.* This section applies to any basis adjustment made under section 743(b) (relating to certain transfers of interests in a partnership) or section 732(d) (relating to certain partnership distributions), if assets of the partnership constitute a trade or business for purposes of section 1060(c).

(b) *Determining the fair market value of partnership property*—(1) *Property other than that in the nature of goodwill or going concern value.* For purposes of this section, the fair market value of each item of partnership property (other than property in the nature of goodwill or going concern value) shall be determined on the basis of all the facts and circumstances.

(2) *Property in the nature of goodwill or going concern value.* For purposes of paragraph (a) of this section, the fair market value of partnership property in the nature of goodwill or going concern value (referred to hereinafter in this section as goodwill) shall be deemed to equal the amount (not below zero) which if assigned to such property would result in a liquidating distribution to the transferee partner equal to such partner's basis for the transferred partnership interest immediately after the transfer (reduced by the amount, if any, of such basis that is attributable to partnership liabilities) if—

(i) All partnership property were sold immediately after such transfer for an amount equal to the fair market value of such property (as determined under this section), and

(ii) The proceeds of that sale were, after the payment of all partnership liabilities (within the meaning of section 752 and the regulations thereunder), distributed to the partners.

(c) *Cross-reference.* See §§1.732–1(d)(3) and 1.743–1(b)(3) for rules requiring a transferee partner to attach a statement to such partner's return showing the computation of the special basis adjustment and the partnership properties to which the adjustment is allocated under section 755.

(d) *Effective date.* This section applies to any basis adjustment under section 743(b) made as a result of any transfer of a partnership interest made after May 6, 1986, unless such transfer is made pursuant to a binding contract that was in effect on May 6, 1986, and at all times thereafter prior to such transfer. However, the requirements of this section shall be deemed to be satisfied with respect to any transfer made on or before July 15, 1988, if the amount of any basis adjustment under section 743(b) or section 732(d) made as a result of such transfer that is allocated to each item of partnership property (other than goodwill) does not exceed the amount equal to the difference between the transferee partner's share of the partnership basis of such property and such partner's share of the fair market value of such property.

(e) *Example.* The provisions of this section may be illustrated by the following example which assumes that the assets of the partnership constitute a trade or business under section 1060 and that the partnership has an election in effect under section 754 at the time of the sale of the partnership interest.

Example (1). A is a member of partnership ABC. ABC has three assets: a building with a fair market value of $2,000,000, equipment with a fair market value of $800,000 and goodwill. ABC has no liabilities. A has a one-third interest in partnership capital and profits. A sells his partnership interest to D for $1,000,000. Under paragraph (b)(2) of this section, the fair market value of goodwill is deemed to equal the value that must be assigned to goodwill in order for the partnership to distribute $1,000,000 to D if it were to sell all of its property at fair market value (in the case of goodwill, its assigned value) and completely liquidate after D's purchase of A's partnership interest. In order for D, a one-third partner, to receive a liquidation distribution of $1,000,000, the partnership would have to sell all partnership property for a total of $3,000,000. The fair market value of partnership property other than goodwill is $2,800,000. Therefore, goodwill must be assigned a value of $200,000 ($3,000,000 − $2,800,000) in order for D to receive a liquidating distribution of $1,000,000. Accordingly, D's section 743(b) basis adjustment must be allocated under §1.755–1 using a fair market value of $200,000 for goodwill.

[T.D. 8215, 53 FR 27044, July 18, 1988]

DEFINITIONS

§1.761–1 Terms defined.

(a) *Partnership.* The term *partnership* means a partnership as determined under §§301.7701–1, 301.7701–2, and 301.7701–3 of this chapter.

(b) *Partner.* The term *partner* means a member of a partnership.

(c) *Partnership agreement.* For the purposes of subchapter K, a partnership agreement includes the original agreement and any modifications thereof agreed to by all the partners or adopted in any other manner provided by the partnership agreement. Such agreement or modifications can be oral or written. A partnership agreement may be modified with respect to a particular taxable year subsequent to the close of such taxable year, but not later than the date (not including any extension of time) prescribed by law for the filing of the partnership return. As to any matter on which the partnership agreement, or any modification thereof, is silent, the provisions of local law shall be considered to constitute a part of the agreement.

(d) *Liquidation of partner's interest.* The term *liquidation of a partner's interest* means the termination of a partner's entire interest in a partnership by means of a distribution, or a series of distributions, to the partner by the partnership. A series of distributions will come within the meaning of this term whether they are made in one year or in more than one year. Where a partner's interest is to be liquidated by a series of distributions, the interest will not be considered as liquidated until the final distribution has been made. For the basis of property distributed in one liquidating distribution, or in a series of distributions in liquidation, see section 732(b). A distribution which is not in liquidation of a partner's entire interest, as defined in this paragraph, is a current distribution.

Current distributions, therefore, include distributions in partial liquidation of a partner's interest, and distributions of the partner's distributive share. See paragraph (a)(1)(ii) of § 1.731–1.

(e) *Distribution of partnership interest.* For purposes of section 708(b)(1)(B) and § 1.708–1(b)(1)(iv), the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is not a sale or exchange of an interest in the new partnership. However, the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is treated as an exchange of the interest in the new partnership for purposes of section 743. This paragraph (e) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (e) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (e) to the termination in a consistent manner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972; T.D. 8697, 61 FR 66588, Dec. 18, 1996; T.D. 8717, 62 FR 25501, May 9, 1997]

§ 1.761–2 Exclusion of certain unincorporated organizations from the application of all or part of subchapter K of chapter 1 of the Internal Revenue Code.

(a) *Exclusion of eligible unincorporated organizations*—(1) *In general.* Under conditions set forth in this section, an unincorporated organization described in subparagraph (2) or (3) of this paragraph may be excluded from the application of all or a part of the provisions of subchapter K of chapter 1 of the Code. Such organization must be availed of (i) for investment purposes only and not for the active conduct of a business, or (ii) for the joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted. The members of such organization must be able to compute their income without the necessity of computing partnership taxable income. Any syndicate, group, pool, or joint venture which is classifiable as an association, or any group operating under an agreement which creates an organization classifiable as an association, does not fall within these provisions.

(2) *Investing partnership.* Where the participants in the joint purchase, retention, sale, or exchange of investment property:

(i) Own the property as coowners,

(ii) Reserve the right separately to take or dispose of their shares of any property acquired or retained, and

(iii) Do not actively conduct business or irrevocably authorize some person or persons acting in a representative capacity to purchase, sell, or exchange such investment property, although each separate participant may delegate authority to purchase, sell, or exchange his share of any such investment property for the time being for his account, but not for a period of more than a year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section.

(3) *Operating agreements.* Where the participants in the joint production, extraction, or use of property:

(i) Own the property as coowners, either in fee or under lease or other form of contract granting exclusive operating rights, and

(ii) Reserve the right separately to take in kind or dispose of their shares of any property produced, extracted, or used, and

(iii) Do not jointly sell services or the property produced or extracted, although each separate participant may delegate authority to sell his share of the property produced or extracted for the time being for his account, but not for a period of time in excess of the minimum needs of the industry, and in no event for more than 1 year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section. However, the preceding sentence does not apply to any unincorporated organization one of whose principal purposes is cycling, manufacturing, or processing for persons who are not members of the organization. In addition, except as provided in paragraph (d)(2)(i) of this section, this paragraph (a)(3) does not apply to any unincorporated organization that produces natural gas under a joint operating agreement, unless all members of the unincorporated organization comply with paragraph (d) of this section.

(b) *Complete exclusion from subchapter K*—(1) *Time for making election for exclusion.* Any unincorporated organization described in subparagraph (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) not later than the time prescribed by paragraph (e) of §1.6031–1 (including extensions thereof) for filing the partnership return for the first taxable year for which exclusion from subchapter K is desired. Notwithstanding the prior sentence such organization may be deemed to have made the election in the manner prescribed in subparagraph (2)(ii) of this paragraph.

(2) *Method of making election.* (i) Except as provided in subdivision (ii) of this subparagraph, any unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) in a statement attached to, or incorporated in, a properly executed partnership return, Form 1065, which shall contain the information required in this subdivision. Such return shall be filed with the internal revenue officer with whom a partnership return, Form 1065, would be required to be filed if no election were made. Where, for the purpose of determining such officer, it is necessary to determine the internal revenue district (or service center serving such district) in which the electing organization has its principal office or place of business, the principal office or place of business of the person filing the return shall be considered the principal office or place of business of the organization. The partnership return must be filed not later than the time prescribed by paragraph (e) of §1.6031–1 (including extensions thereof) for filing the partnership return with respect to the first taxable year for which exclusion from subchapter K is desired. Such partnership return shall contain, in lieu of the information required by Form 1065 and by the instructions relating thereto, only the name or other identification and the address of the organization together with information on the return, or in the statement attached to the return, showing the names, addresses, and identification numbers of all the members of the organization; a statement that the organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section; a statement that all of the members of the organization elect that it be excluded from all of subchapter K; and a statement indicating where a copy of the agreement under which the organization operates is available (or if the agreement is oral, from whom the provisions of the agreement may be obtained).

(ii) If an unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section does not make the election provided in section 761(a) in the manner prescribed by subdivision (i) of this subparagraph, it shall nevertheless be deemed to have made the election if it can be shown from all the surrounding facts and circumstances that it was the intention of the members of such organization at the time of its formation to secure exclusion from all of subchapter K beginning with the first taxable year of the organization. Although the following facts are not exclusive, either one of such facts may indicate the requisite intent:

(a) At the time of the formation of the organization there is an agreement among the members that the organization be excluded from subchapter K beginning with the first taxable year of the organization, or

(b) The members of the organization owning substantially all of the capital interests report their respective shares of the items of income, deductions, and credits of the organization on their respective returns (making such elections as to individual items as may be appropriate) in a manner consistent with the exclusion of the organization from subchapter K beginning with the first taxable year of the organization.

(3) *Effect of election*—(i) *In general.* An election under this section to be excluded will be effective unless within 90

days after the formation of the organization (or by October 15, 1956, whichever is later) any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such election is irrevocable as long as the organization remains qualified under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, or unless approval of revocation of the election is secured from the Commissioner. Application for permission to revoke the election must be submitted to the Commissioner of Internal Revenue, Attention: T:I, Washington, DC 20224, no later than 30 days after the beginning of the first taxable year to which the revocation is to apply.

(ii) *Special rule.* Notwithstanding subdivision (i) of this subparagraph, an election deemed made pursuant to subparagraph (2)(ii) of this paragraph will not be effective in the case of an organization which had a taxable year ending on or before November 30, 1972, if any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such notification to the Commissioner must be made on or before January 2, 1973 and must include the names and addresses of all of the members of the organization.

(c) *Partial exclusion from subchapter K.* An unincorporated organization which wishes to be excluded from only certain sections of subchapter K must submit to the Commissioner, no later than 90 days after the beginning of the first taxable year for which partial exclusion is desired, a request for permission to be excluded from certain provisions of subchapter K. The request shall set forth the sections of subchapter K from which exclusion is sought and shall state that such organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, and that the members of the organization elect to be excluded to the extent indicated. Such exclusion shall be effective only upon approval of the election by the Commissioner and subject to the conditions he may impose.

(d) *Rules for gas producers that produce natural gas under joint operating agreements*—(1) *Joint operating agreements and gas balancing.* Co-owners of a property producing natural gas enter into a joint operating agreement (JOA) to define the rights and obligations of each co- producer of the gas in place. The JOA determines, among other things, each co-producer's proportionate share of the natural gas as it is produced from the reservoir, together with the associated production expenses. A gas imbalance arises when a co-producer does not take its proportionate share of current gas production under the JOA (underproducer) and another co-producer takes more than its proportionate share of current production (overproducer). The co-producers often enter into a gas balancing agreement (GBA) as an addendum to their JOA to establish their rights and obligations when a gas imbalance arises. A GBA typically allows the overproducer to take the amount of the gas imbalance (overproduced gas) and entitles the underproducer to recoup the overproduced gas either from the volume of the gas remaining in the reservoir or by a cash balancing payment.

(2) *Permissible gas balancing methods*—(i) *General requirement.* All co-producers of natural gas operating under the same JOA must use the cumulative gas balancing method, as described in paragraph (d)(3) of this section, unless they use the annual gas balancing method described in paragraph (d)(4) of this section. A co-producer's failure to comply with the provisions of this paragraph (d)(2)(i) generally constitutes the use of an impermissible method of accounting, requiring a change to a permissible method under § 1.446–1(e)(3) with any terms and conditions as may be imposed by the Commissioner. The co-producers' election to be excluded from all or part of subchapter K will not be revoked, unless the Commissioner determines that there was willful failure to comply with the requirements of this paragraph (d)(2)(i).

(ii) *Change in method of accounting; adoption of method of accounting*—(A) *In* *general.* The annual gas balancing method and the cumulative gas balancing method are methods of accounting. Accordingly, a change to or from either of these methods is a change in method of accounting that requires the consent of the Commissioner. See section 446(e) and §1.446–1(e). For purposes of this section, each JOA is treated as a separate trade or business. Paragraph (d)(2)(ii)(B) of this section provides rules for adopting either permissible method of accounting. Paragraph (d)(2)(ii)(C) of this section provides rules on the timing of required changes to either permissible method during the transitional period, and paragraph (d)(5) of this section contains the procedural provisions for making a change in method of accounting required in paragraph (d)(2)(ii)(C) of this section.

(B) *Adoption of method of accounting.* A co-producer must adopt a permissible method for each JOA entered into on or after the start of the co-producer's first taxable year beginning after December 31, 1994 (or, in the case of the use of the annual gas balancing method by co-producers not having the same taxable year, the start of the first taxable year beginning after December 31, 1994, of the co-producer whose taxable year begins latest in the calendar year). If a co-producer is adopting the cumulative method, the co-producer may adopt the method by using the method on its timely filed return for the taxable year of adoption. A co-producer may adopt the annual gas balancing method with the permission of the Commissioner under guidelines set forth in paragraph (d)(4)(ii) of this section.

(C) *Required change in method of accounting for certain joint operating agreements.* This paragraph (d)(2)(ii)(C) applies to certain JOAs entered into prior to 1996. Except in the case of a part-year change in method of accounting or in the case of the cessation of a JOA (both of which are described in this paragraph (d)(2)(ii)(C)), for each JOA entered into prior to a co-producer's first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year, the co-producer must change its method of accounting for sales of gas and its treatment of certain related deductions and credits to a permissible method as of the start of its first taxable year beginning after December 31, 1994. In the case of a JOA of co-producers that do not all have the same taxable year and that choose the annual gas balancing method, if the JOA is entered into prior to the first taxable year beginning after December 31, 1994 of the co-producer whose taxable year begins latest in the calendar year and the JOA is in effect as of January 1, 1996, a change to the annual gas balancing method by each co-producer under that JOA is made as of January 1, 1996 (part-year change in method of accounting). If the co-producers would have made a part-year change to the annual gas balancing method but for the fact that their JOA ceased to be in effect before January 1, 1996 (cessation of a JOA), the co-producers do not change their method of accounting with respect to the JOA. Rather, for their taxable years in which the JOA ceases to be in effect, the co-producers use their current method of accounting with respect to that JOA.

(3) *Cumulative gas balancing method*—(i) *In general.* The cumulative gas balancing method (cumulative method), solely for purposes of reporting income from gas sales and certain related deductions and credits, treats each co-producer under the same JOA as the sole owner of its percentage share of the total gas in the reservoir and disregards the ownership arrangement described in the JOA for gas as it is produced from the reservoir. Each co-producer is considered to be taking only its share of the total gas in the reservoir as long as the gas remaining in the reservoir is sufficient to satisfy the ownership rights of the co-producers in their percentage shares of the total gas in the reservoir. After a co-producer has taken its entire share of the total gas in the reservoir, any additional gas taken by that co-producer (taking co-producer) is treated as having been taken from its other co-producers' shares of the total gas in the reservoir. The effect of being treated as a taking co-producer under the cumulative method is that the taking co-producer generally may not claim an allowance for depletion and a production credit on its sales of its other co-producers'

percentage shares of the total gas in the reservoir.

(ii) *Requirements*—(A) *Reporting of income from sales of gas.* Under the cumulative method, each co-producer must include in gross income under its overall method of accounting the amount of its sales from all gas produced from the reservoir, including sales of gas taken from another co-producer's share of the gas in the reservoir.

(B) *Reporting of deduction of taking co-producer.* A taking co-producer deducts the amount of a payment (in cash or property, other than gas produced under the JOA) made to another co-producer for sales of that co-producer's gas, but only for the taxable year in which the payment is made. Thus, an accrual method taking co-producer is not permitted a deduction for any obligation it has to pay another co-producer for sales of that co-producer's gas until a payment is made. See paragraph (d)(3)(iii)(B) of this section for a rule requiring a reduction of the amount of the deduction described in this paragraph (d)(3)(ii)(B) if the taking co-producer had mistakenly claimed a depletion deduction relating to those sales.

(C) *Reporting of income by other co-producers.* Any co-producer that is entitled to receive a payment from a taking co-producer must include the amount of the payment in gross income as proceeds from the sale of its gas only for the taxable year that the payment is actually received, regardless of its overall method of accounting.

(D) *Reporting of production expenses.* Each co-producer deducts its proportionate share of production expenses, as provided in the JOA, under its regular method of accounting for the expenses.

(iii) *Special rules for production credits and depletion deductions under the cumulative method*—(A) *In general.* Under the cumulative method, a co-producer's depletion allowance and production credit for a taxable year are based on its income from gas sales and production of gas from its percentage share of the total gas in the reservoir, and are not based on its current proportionate share of income and production as determined under the JOA. Thus, in general, a taking co-producer is not allowed a production credit or an allowance for depletion on its sales of gas in excess of its percentage share of the total gas in the reservoir. However, the Service will not disallow depletion deductions or production credits claimed by a taking co-producer on the gas of other co-producers if the taking co-producer had a reasonable but mistaken belief that the deductions or credits were claimed with respect to the taking co-producer's percentage share of total gas in the reservoir and the taking co-producer makes the appropriate reductions and additions to tax required in paragraphs (d)(3)(iii)(B) and (d)(3)(iii)(C) of this section. The reasonableness of the mistaken belief is determined at the time of filing the return claiming the deductions or credits. A co-producer receiving a payment for sales of its gas from a taking co-producer claims a production credit and an allowance for depletion relating to those sales only for the taxable year in which the amount of the payment is included in its gross income.

(B) *Reduction of taking co-producer's payment deduction for depletion claimed on another co-producer's gas.* If a taking co-producer claims an allowance for depletion on another co-producer's gas, the taking co-producer must reduce its deduction claimed in a later year for making a payment to the other co-producer for sales of that co-producer's gas by the amount of any percentage depletion deduction allowed on the gas sales to which the payment relates. If the percentage limitation of section 613A(d)(1) applied to disallow a depletion deduction for a previous year, the taking co-producer must reduce the amount of any carried over depletion deduction allowable in the year of the payment or in a future year by the portion of the carried over depletion deduction, if any, that relates to another co-producer's gas.

(C) *Addition to tax of taking co-producer for production credit claimed on another co-producer's gas.* If a taking co-producer claims a production credit on another co-producer's gas, the taking co-producer must add to its tax for the taxable year that it makes a payment to the other co-producer for sales of that co-producer's gas any production credit allowed in an earlier taxable year on the gas sales to which the payment relates, but only to the extent the credit allowed actually reduced the taking co- producer's tax in any earlier year. The taking co-producer also must reduce the amount of its minimum tax credit allowable by reason of section 53(d)(1)(B)(iii) in the year of the payment or in a future year by the portion of the credit, if any, that relates to another co-producer's gas.

(iv) *Anti-abuse rule.* If the Commissioner determines that co-producers using the cumulative method have arranged or altered their taking of production for a taxable year with a principal purpose of shifting the income, deductions, or credits relating to that production to avoid tax, the co- producers' election to be excluded from all or part of subchapter K will be revoked for that year and for subsequent years. In determining that a principal purpose was to avoid tax, the Commissioner will examine all the facts and circumstances surrounding the use of the cumulative method by the co-producers. See *Examples 3* and *4* of paragraph (d)(6) of this section.

(4) *Annual gas balancing method*—(i) *In general.* The annual gas balancing method (annual method) takes into account each co-producer's ownership rights and obligations, as described in the JOA, with respect to the co-producer's current proportionate share of gas as it is produced from the reservoir. Under the annual method, gas imbalances relating to a JOA must be eliminated annually through a balancing payment, which may be in the form of cash, gas produced under the same JOA, or other property. If all the co-producers under a JOA have the same taxable year, any gas imbalance remaining at the end of a taxable year must be eliminated by a balancing payment from the overproducer to the underproducer by the due date of the overproducer's tax return for that taxable year (including extensions). If all the co-producers under a JOA do not have the same taxable year, any gas imbalance remaining at the end of a calendar year must be eliminated by a balancing payment from the overproducer to the underproducer by September 15 of the following calendar year. The annual method may be used only if the Commissioner's permission is obtained. Paragraph (d)(4)(ii) of this section provides guidelines for applying for this permission. The annual method is not available for a JOA with respect to which any co-producer made an election under paragraph (d)(5)(i)(B)(*3*) of this section (to take an aggregate section 481(a) adjustment for all JOAs of a co-producer into account in the year of change).

(ii) *Obtaining the Commissioner's permission to use the annual method.* A request for the Commissioner's permission to adopt the annual method for a new JOA must be in writing and must set forth the names of all the co-producers under the JOA and the respective taxable year of adoption. See paragraphs (d)(2)(ii) and (d)(5)(ii) of this section for the rules for a change in method of accounting to the annual method. In addition, the request must contain an explanation of how the co-producers will report income from gas sales, the making or receiving of a balancing payment, production expenses, depletion deductions, and production credits. Permission will be granted under appropriate conditions, including, but not limited to, an agreement in writing by all co-producers to use the annual method and to eliminate any gas imbalances annually in accordance with paragraph (d)(4)(i) of this section.

(5) *Transitional rules for making a change in method of accounting required in paragraph (d)(2)(ii)(C) of this section*—(i) *Change in method of accounting to the cumulative method*—(A) *Automatic consent to change in method of accounting to the cumulative method.* A co-producer changing to the cumulative method for any JOA entered into prior to its first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year is granted the consent of the Commissioner to change its method of accounting with respect to each JOA to the cumulative method, provided the co-producer—

(*1*) Makes the change on its timely filed return for its first taxable year beginning after December 31, 1994;

(*2*) Attaches a completed and signed Form 3115 to the co-producer's tax return for the year of change, stating that, pursuant to §1.761–2(d)(2)(ii) of the regulations, the co-producer is changing its method of accounting for sales of gas and its treatment of certain related deductions and credits under each JOA to the cumulative method;

(*3*) In the case of a co-producer making an election under paragraph (d)(5)(i)(B)(*3*) of this section to take the aggregate section 481(a) adjustment into account in the year of change, attaches the statement described in paragraph (d)(5)(i)(B)(*3*)(*ii*) of this section; and

(*4*) In the case of a co-producer not making an election under paragraph (d)(5)(i)(B)(*3*) of this section, attaches a list of each JOA with respect to which there is a section 481(a) adjustment computed in accordance with paragraph (d)(5)(i)(B)(*2*)(*i*) of this section.

(B) *Section 481(a) adjustment*—(*1*) *Application of section 481(a).* A change in method of accounting to the cumulative method under the automatic consent procedure in paragraph (d)(5)(i)(A) of this section is a change in method of accounting to which the provisions of section 481(a) apply. Thus, a section 481(a) adjustment must be taken into account in the manner provided by this paragraph (d)(5)(i)(B) to prevent the omission or duplication of income. Paragraph (d)(5)(i)(B)(*2*) of this section provides the general rules for computing the amount of the section 481(a) adjustment of a co-producer relating to a particular JOA and for taking the section 481(a) adjustment into account. Paragraph (d)(5)(i)(B)(*3*) of this section provides rules for electing to take a co-producer's section 481(a) adjustment computed on an aggregate basis for all JOAs into account in the year of change. Paragraph (d)(5)(i)(C) of this section provides rules to coordinate the taking of a depletion deduction or a production credit with the inclusion of a section 481(a) adjustment arising from a change in method of accounting to the cumulative method under this paragraph (d)(5)(i).

(*2*) *Computation of the section 481(a) adjustment relating to a joint operating agreement*—(*i*) *In general.* The section 481(a) adjustment of a co-producer relating to a JOA is computed as of the first day of the co-producer's year of change and is equal to the difference between the amount of income reported under the co-producer's former method of accounting for all taxable years prior to the year of change and the amount of income that would have been reported if the co-producer's new method had been used in all those taxable years.

(*ii*) *Section 481(a) adjustment period.* Except to the extent that paragraph (d)(5)(i)(B)(*3*) of this section applies, a co-producer's section 481(a) adjustment relating to a JOA, whether positive or negative, is taken into account in computing taxable income ratably over the 6-taxable-year period beginning with the year of change (the section 481(a) adjustment period). If the co-producer has been in existence less than 6 taxable years, the adjustment is taken into account over the number of years the co-producer has been in existence. If the co-producer ceases to engage in the trade or business that gave rise to the section 481(a) adjustment at any time during the section 481(a) adjustment period, the entire remaining balance of the section 481(a) adjustment relating to that trade or business must be taken into account in the year of the cessation. For purposes of this paragraph (d)(5)(i)(B)(*2*)(*ii*), production under each JOA is treated as a separate trade or business. The determination as to whether the co-producer ceases to engage in its trade or business is to be made under the principles of § 1.446-–1(e)(3)(ii) and its underlying administrative procedures. For example, the permanent cessation of production under a co-producer's JOA constitutes the cessation of a trade or business of the co-producer. Accordingly, for the year that production under a JOA permanently ceases, the remaining balance of the section 481(a) adjustment relating to the JOA must be taken into account.

(*3*) *Election to take aggregate section 481(a) adjustment for all joint operating agreements into account in the year of change*—(*i*) *In general.* A co-producer may elect to take into account its section 481(a) adjustment, computed on an aggregate basis for all of its JOAs, whether negative or positive, in the year of change, provided the co-producer uses the cumulative method for all of its JOAs entered into prior to its first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year. The aggregate section 481(a) adjustment of a co-producer is equal to the difference between the amount of income reported under the co-producer's former method of accounting for all taxable years prior to the year of change and the amount of income that would have been reported if the co-producer's new method had been used in all of those taxable years for all JOAs for which the co-producer changes its method of accounting. An election made under this paragraph (d)(5)(i)(B)(*3*) is irrevocable. If any person who, together with another person, would be treated as a single taxpayer under section 41(f)(1) (A) or (B) makes an election under this paragraph (d)(5)(i)(B)(*3*), all persons within that single taxpayer group will be treated as if they had made an election under this paragraph (d)(5)(i)(B)(*3*) and, as such, will be irrevocably bound by that election. If a co-producer does not make an election under this paragraph, each JOA entered into prior to the start of its first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year must be accounted for separately in computing the section 481(a) adjustment and taxable income of the co-producer for any year to which this paragraph (d) applies.

(*ii*) *Time and manner for making the election*. An election under this paragraph (d)(5)(i)(B)(*3*) is made by attaching a statement to the co-producer's timely filed return for its year of change indicating that the co- producer is electing under §1.761–2(d)(5)(i)(B)(*3*) to take its aggregate section 481(a) adjustment into account in the year of change.

(C) *Treatment of section 481(a) adjustment as a sale for purposes of computing a production credit and as gross income from the property for purposes of depletion deductions.* Any positive section 481(a) adjustment arising as a result of a change in method of accounting for gas imbalances under this paragraph (d)(5)(i) and taken into account in computing taxable income under paragraph (d)(5)(i)(B) of this section is considered a sale by the taxpayer for purposes of computing any production credit in the year that the adjustment is taken into account. Similarly, the positive section 481(a) adjustment is considered *gross income from the property* and *taxable income from the property* for purposes of computing depletion deductions in the year the adjustment is taken into account. Sales amounts used in computing any production credit in any year in which a negative section 481(a) adjustment is taken into account in computing taxable income under paragraph (d)(5)(i)(B) of this section must be reduced by the amount of the negative section 481(a) adjustment taken into account in that year. Similarly, gross income from the property and taxable income from the property used in computing any depletion deduction in any year in which the negative section 481(a) adjustment is taken into account must be reduced by the amount of the negative adjustment. For these purposes, any taxpayer that makes an aggregate section 481(a) adjustment election under paragraph (d)(5)(i)(B)(*3*) of this section must allocate the adjustment among its properties in any reasonable manner that prevents a duplication or omission of depletion deductions.

(ii) *Change in method of accounting to the annual method*—(A) *In general.* A co-producer changing to the annual method in accordance with paragraph (d)(2)(ii) of this section must request a change under §1.446–1(e)(3) and will be subject to any terms and conditions as may be imposed by the Commissioner.

(B) *Section 481(a) adjustment.* A change in method of accounting to the annual method is a change in method of accounting to which the provisions of section 481(a) apply. Thus, a section 481(a) adjustment must be taken into account to prevent the omission or duplication of income. If all the co-producers under a JOA have the same taxable year, the section 481(a) adjustment involved in a change to the annual method by a co-producer relating to the JOA is computed as of the first day of the co-producer's year of change. If the co-producers under a JOA do not all have the same taxable year (that is, in the case of a part-year change described in paragraph (d)(2)(ii)(C) of this section), the change in method of accounting occurs on January 1, 1996, and the section 481(a) adjustment is computed on that date.

(iii) *Untimely change in method of accounting to comply with this section.* Unless a co-producer required by this section to change its method of accounting complies with the provisions of this paragraph (d)(5) for its first applicable taxable year within the time prescribed by this paragraph (d)(5), the co-producer must take the section 481(a) adjustment into account under the provisions of any applicable administrative procedure that is prescribed by the Commissioner specifically for purposes of complying with this section. Absent such an administrative procedure, a co-producer must request a change under § 1.446–1(e)(3) and will be subject to any terms and conditions as may be imposed by the Commissioner.

(6) *Examples.* The following examples illustrate the application of the cumulative method described in paragraph (d)(3) of this section.

Example 1. Operation of the cumulative method. (i) L, a corporation using the cash receipts and disbursements method of accounting, and M, a corporation using an accrual method, file returns on a calendar year basis. On January 1, 1995, L and M enter into a JOA to produce natural gas as an unincorporated organization from a reservoir located in State Y. The JOA allocates reservoir production 60 percent to L and 40 percent to M. L and M enter into a GBA as an addendum to the JOA. L and M agree to use the cumulative method to account for gas sales from the reservoir and elect under section 761(a) and this section to exclude the organization from the application of subchapter K. Production from the reservoir is eligible for the section 29 credit for producing fuel from a nonconventional source. L and M produce and sell the following amounts of natural gas (in mmcf) until 2000 during which year production from the reservoir ceases:

	1995	1996	1997	1998	1999	2000
L	720	480	600	–0–	–0–	–0–
M	240	60	120	160	80	40

(ii) By the end of 1996, neither L nor M has fully produced its percentage share of the total gas in the reservoir. In 1997, L produces a total of 600 mmcf of gas at the rate of 50 mmcf per month. Prior to filing its return for 1997, L determines that it fully produced its percentage share of gas in the reservoir as of June 30, 1997. Pursuant to the GBA executed by L and M, L pays M at the end of 2000 for the 300 mmcf of M's gas (as determined under the cumulative method) that L sold in the last half of 1997.

(iii) For 1995, L and M must include in their gross income the amounts relating to gas sales of 720 mmcf and 240 mmcf, respectively. For 1996, L and M must include the amounts relating to gas sales of 480 mmcf and 60 mmcf, respectively. For both 1995 and 1996, L and M compute an allowance for depletion and a section 29 credit based upon gas taken and sold by each from the reservoir for each taxable year.

(iv) For 1997, L and M must include in gross income the amounts relating to their gas sales of 600 mmcf and 120 mmcf, respectively. Under paragraph (d)(3)(iii)(A) of this section, L computes an allowance for depletion and the section 29 credit based only on production from L's proportionate share of gas in the reservoir (that is, based on L's production through June 30, 1997). Accordingly, for 1997, L claims depletion and the section 29 credit only with respect to 300 mmcf of gas (50 mmcf per month x 6 months). For 1997, because M has not fully produced from its percentage share of the total gas in the reservoir as of the end of 1997, M claims depletion and the section 29 credit on the 120 mmcf that M produced in 1997.

(v) In 1998 and 1999, M must include in gross income the amounts relating to M's sales of gas, that is, 160 mmcf for 1998 and 80 mmcf for 1999. For 2000, M must include in gross income the amount relating to sales of 340 mmcf of gas, which consists of its own sales of 40 mmcf plus the payment for 300 mmcf of gas that L made to M for having sold from M's share of the total gas in the reservoir during the last half of 1997. Because M produced from its percentage share of the total gas in the reservoir during 1998, 1999, and 2000, M claims a depletion deduction and a section 29 credit on its income and production for those years, that is, 160 mmcf for 1998, 80 mmcf for 1999, and 40 mmcf for 2000. Additionally, for 2000, M claims depletion and the section 29 credit relating to the payment that M received from L for the 300 mmcf of M's gas that L sold in the last half of 1997. Under paragraph (d)(3)(ii)(B) of this section, L's deduction for its payment to M for the 300 mmcf of M's gas that L sold in 1997 is allowable only for 2000.

Example 2. Adjustments under the cumulative method for depletion deductions and production credits that were claimed for sales in excess of a co-producer's percentage share of total gas in the reservoir. (i) L, a corporation using the cash receipts and disbursements method of accounting, and M, a corporation using an accrual method, file returns on a calendar year basis. On January 1, 1995, L and M enter into a JOA to produce natural gas as an unincorporated organization from a reservoir located in State Y. The JOA allocates reservoir production 60 percent to L and 40 percent to M. L and M enter into a GBA as an addendum to the JOA. L and M agree to use the cumulative method to account for gas sales from the reservoir and elect under section 761(a) and this section to exclude the organization from the application of subchapter K. Production from the reservoir is eligible for the section 29 credit for producing fuel from a nonconventional source. L and M produce and sell the following amounts of natural gas (in mmcf) until 2000 during which year production from the reservoir ceases:

	1995	1996	1997	1998	1999	2000
L	720	480	600	60	60	–0–
M	240	60	120	60	60	40

(ii) In addition, L does not realize until December 31, 1999, that L fully produced its percentage share of the total gas in the reservoir as of June 30, 1997. At the time of filing its returns for 1997 and 1998, L reasonably believes that during 1997 and 1998, respectively, it did not fully produce its percentage share of the total gas in the reservoir. Thus, L claims depletion and the section 29 credit for its total sales of 600 mmcf in 1997 and 60 mmcf in 1998. Pursuant to the GBA executed by L and M, L pays M at the end of 2000 for the 420 mmcf of M's gas (as determined under the cumulative method) that L sold (300 mmcf in the last half of 1997 (assuming that production was at a rate of 50 mmcf per month), 60 mmcf in 1998, and 60 mmcf in 1999).

(iii) In 1997 and 1998, L and M include in gross income the amounts relating to their respective sales of gas, that is, for L 600 mmcf for 1997 and 60 mmcf for 1998, and for M 120 mmcf for 1997 and 60 mmcf for 1998.

(iv) For 1999, L must include in gross income the amount of its sales of 60 mmcf, but may not claim depletion or the section 29 credit on those sales. For 1999, M must include in gross income the amount of its sales of 60 mmcf and claims depletion and the section 29 credit with respect to those 60 mmcf.

(v) For 2000, M must include in gross income the amount relating to gas sales of 460 mmcf, that is, the amount of M's own gas sales of 40 mmcf and the amount of the payment received from L for the 420 mmcf of M's gas that L sold (consisting of 300 mmcf in 1997, 60 mmcf in 1998, and 60 mmcf in 1999). Under paragraph (d)(3)(iii)(A) of this section, M computes a depletion deduction and a production credit relating to the amount of M's actual gas sales for 2000 and the payment received from L, that is, relating to a total of 460 mmcf of gas (M's sales of 40 mmcf for 2000, plus L's payment for 420 mmcf of gas). Under paragraph (d)(3)(ii)(B) of this section, L's deduction for making its payment to M for 420 mmcf of gas is allowable only for 2000. Under paragraph (d)(3)(iii)(B) of this section, L must reduce its deduction by the amount of any percentage depletion deductions allowed on its sales of M's gas, that is, relating to 360 mmcf of gas (300 mmcf for 1997 and 60 mmcf for 1998). In addition, under paragraph (d)(3)(iii)(C) of this section, L must increase its tax for 2000 by the amount of any section 29 credit L claimed on its sales of M's gas, but only to the extent that the credit claimed actually reduced L's tax in any earlier year.

Example 3. Non-abusive altering of the taking of production for a taxable year. (i) C and D enter into a JOA and a GBA on December 1, 1994, for gas production from a reservoir. The JOA allocates production at 50 percent to C and 50 percent to D. C and D agree in writing to use the cumulative method to account for gas sales. Additionally, C and D elect under section 761(a) and this section to exclude their organization from the application of subchapter K. C and D arrange to sell all their production under annually renewable contracts. In 1995, C and D each sell 480 mmcf of gas from the reservoir.

(ii) In November 1995, D is notified that its contract with its purchaser will not be renewed for 1996. D is unable to find a new purchaser for its gas for 1996. In December 1995, D notifies C that it will not be taking production from the reservoir in 1996. Pursuant to the GBA, C then contracts with its current gas purchaser to sell an additional 20 mmcf per month in 1996. Accordingly, C sells 720 mmcf in 1996 (60 mmcf per month x 12 months). Under the facts described in this example, a principal purpose of altering the taking of production is not to avoid tax. Accordingly, the co-producers' election under section 761(a) will not be revoked by reason of altering the taking of production.

Example 4. Abusive altering of the taking of production for a taxable year. The facts are the same as in *Example 3*(i). For 1996, C anticipates that C's regular tax (reduced by the credits allowable under sections 27 and 28) will not exceed C's tentative minimum tax. Accordingly, under section 29(b)(6), C's credit allowed under section 29(a) for sales of its gas will be zero. For 1997, C anticipates that its credit allowed under section 29(a) will not be limited by section 29(b)(6). On the other hand, D anticipates that any credit it may claim under section 29(a) for 1996, even including a credit based on sales of C's share of current production under the JOA, will not be limited by section 29(b)(6). However, for 1997, D anticipates that its credit under section 29(a) will be limited by section 29(b)(6). On January 1, 1996, C and D agree that D will contract with its purchaser to sell the entire 960 mmcf produced from the reservoir in 1996 and that C will contract with its purchaser to sell the entire 960 mmcf produced from the reservoir in 1997. Under these facts, a principal purpose of altering the taking of production is to avoid tax. Accordingly, the co-producers' election under section 761(a) will be revoked for 1996 and for subsequent years.

(7) *Effective date.* Except in the case of a part-year change to the annual method or the cessation of a JOA, both of which are described in paragraph (d)(2)(ii)(C) of this section, the provisions of this paragraph (d) apply to all taxable years beginning after December 31, 1994, of any producer that is a member of an unincorporated organization that produces natural gas under a JOA in effect on or after the start of the producer's first taxable year beginning after December 31, 1994. In the case of a part-year change, the provisions of this paragraph (d) apply on and after January 1, 1996. In the case of the cessation of a JOA, the co-producers use their current method of accounting with respect to that JOA until the JOA ceases to be in effect.

(e) *Cross reference.* For requirements with respect to the filing of a return on Form 1065 by a partnership, see § 1.6031–1.

[T.D. 7208, 37 FR 20687, Oct. 3, 1972; 37 FR 23161, Oct. 31, 1972, as amended by T.D. 8578, 59 FR 66183, Dec. 23, 1994; 60 FR 11028, Mar. 1, 1995]

EFFECTIVE DATE FOR SUBCHAPTER K, CHAPTER 1 OF THE CODE

§ 1.771–1 Effective date.

(a) *General rule.* Except as provided in paragraph (b) or (c) of this section, the provisions of subchapter K, chapter 1 of the Code, shall apply to any taxable year of a partnership beginning after December 31, 1954, and to any part of a partner's taxable year falling within such partnership taxable year. The provisions of the Internal Revenue Code of 1939 relating to partnerships shall apply to any taxable year of a partnership beginning before January 1, 1955, and to any part of a partner's taxable year falling within such partnership taxable year. If a partnership and the partners are on different taxable years, subchapter K shall become effective at the same time both for the partnership and for the partners.

(b) *Special rules.* Certain provisions of section 771 apply after specific dates in 1954, as follows:

(1) *Adoption of taxable year.* Section 706(b) (relating to the adoption of taxable years by partners and partnerships), shall apply to any partnership which adopts or changes to, and any partner who changes to, a taxable year beginning on or after April 2, 1954. For the purpose of applying this subparagraph, the rules of section 708 (relating to the continuation of partnerships) shall apply. For example, if two or more partnerships merge after April 1, 1954, and the new partnership uses the taxable year of the partnership of which it is deemed to be the successor under section 708(b)(2)(A), it will not need prior approval to continue to use such taxable year even though such year may be different from the taxable years of the partners. Such a partnership is not ''adopting'' or ''changing'' its taxable year.

(2) *Property distributed by a partnership.* Section 735(a), relating to the character of gain or loss on disposition of property distributed by a partnership to a partner, shall apply only to property distributed after March 9, 1954. Although a partnership whose taxable year begins before January 1, 1955, generally will be subject to the provisions of the Internal Revenue Code of 1939, any unrealized receivables or inventory items distributed by any such partnership after March 9, 1954, will be subject to the provisions of section 735(a), and the gain or loss on the subsequent disposition of such property will be ordinary gain or loss rather than capital gain or loss. In the case of property distributed before March 10, 1954, section 735(a) will not apply, even though the property is disposed of by the distributee partner after that date, unless the partnership elects under paragraph (c) of this section to apply section 735.

(3) *Unrealized receivables and inventory items.* Section 751 (providing for the realization of ordinary income on certain transfers or distributions of unrealized receivables or substantially appreciated inventory items) shall be applicable to any such transfer or distribution occurring after March 9, 1954. For the purpose of applying section 751 in the case of a taxable year beginning before January 1, 1955, a partnership or partner may elect to treat as applicable any other section of subchapter K. See paragraph (f) of § 1.751–1.

(4) *Partner receiving income in respect of a decedent.* Section 753, which provides that the amount includible in the gross income of a successor in interest of a deceased partner under section 736(a) shall be considered income in respect of a decedent under section 691, shall apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954.

(c) *Optional treatment of certain distributions.* (1) For a partnership taxable year beginning after December 31, 1953, and before January 1, 1955, a partnership may elect to apply the rules of certain sections of subchapter K with respect to current distributions made by the partnership in such year. These sections are 731, 732 (a), (c), and (e), 733, 735, and 751 (b), (c), and (d). If an election is made, it shall apply to the partnership and all its members for all current distributions made by the partnership during the taxable year. Such distributions shall also be subject to the rules of section 705 (relating to determination of basis of a partner's interest), 752 (relating to treatment of certain liabilities), and 761(d) (relating to the definition of liquidation of a partner's interest), to the extent that such sections apply to current distributions.

(2) An election under this paragraph shall be made by a statement filed with the partnership return for the taxable year to which such election applies, or before August 23, 1956, whichever date is later. The statement shall be signed by all members of the partnership and the election once made shall be binding on the partnership and on all of its members.

INSURANCE COMPANIES

Life Insurance Companies

DEFINITION; TAX IMPOSED

§1.801–1 Definitions.

(a) *Life insurance company.* The term *life insurance company* as used in subtitle A of the Code is defined in section 801. For the purpose of determining whether a company is a ''life insurance company'' within the meaning of that term as used in section 801, it must first be determined whether the company is taxable as an insurance company under the Code. For the definition of an ''insurance company'', see paragraph (b) of this section. In determining whether an insurance company is a life insurance company, the life insurance reserves (as defined in section 803(b)) plus any unearned premiums and unpaid losses on noncancellable life, health, or accident policies, not included in ''life insurance reserves'' must comprise more than 50 percent of its total reserves (as defined in section 801). An insurance company writing only noncancellable life, health, or accident policies and having no ''life insurance reserves'' may qualify as a life insurance company if its unearned premiums and unpaid losses on such policies comprise more than 50 percent of its total reserves. A noncancellable insurance policy means a contract which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premium must be carried to cover that obligation. For the purpose of the preceding sentence, the term ''unearned premium'' means the amount which will cover the cost of carrying the insurance risk for the period for which the premium has been paid in advance. A burial or funeral benefit insurance company qualifying as a life insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services will be taxable under section 821 or section 831 as an insurance company other than life.

(b) *Insurance companies.* (1) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. A voluntary unincorporated association of employees formed for the purpose of relieving sick and aged members and the dependents of deceased members is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees is not required to file a separate return for such fund, but the income therefrom shall be included in the return of the corporation.

(2) Though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a corporation is authorized and intends to carry on, the character of the business actually done in the taxable year determines whether it is taxable as an insurance company under the Code. For example, during the year 1954 the M Corporation, incorporated under the insurance laws of the State of R, carried on the business of lending money in addition to guaranteeing the payment of principal and interest of mortgage loans. Of its total income for the year, one-third was derived from its insurance business of guaranteeing the payment of principal and interest of mortgage loans and two-thirds was derived from its noninsurance business of lending money. The M Corporation is not an insurance company for the year 1954 within the meaning of the Code and the regulations thereunder.

§ 1.801–2 Taxable years affected.

Section 1.801–1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.801–3 through 1.801–7 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). Section 1.801–8 is applicable only to taxable years beginning after December 31, 1961, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8681, June 23, 1966]

§ 1.801–3 Definitions.

For purposes of part I, subchapter L, chapter 1 of the Code, this section defines the following terms, which are to be used in determining if a taxpayer is a life insurance company (as defined in section 801(a) and paragraph (b) of this section):

(a) *Insurance company.* (1) The term *insurance company* means a company whose primary and predominant business activity during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies. Thus, though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a company is authorized and intends to carry on, it is the character of the business actually done in the taxable year which determines whether a company is taxable as an insurance company under the Internal Revenue Code.

(2) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. For taxable years beginning before January 1, 1970, a voluntary unincorporated association of employees, including an association fulfilling the requirements of section 801(b)(2)(B) (as in effect for such years), formed for the purpose of relieving sick and aged members and the dependents of deceased members, is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees is not an insurance company, and the income from such fund shall be included in the return of the corporation.

(b) *Life insurance company.* (1) The term *life insurance company*, as used in subtitle A of the Code, is defined in section 801(a). For the purpose of determining whether a company is a ‘‘life insurance company’’ within the meaning of that term as used in section 801(a), it must first be determined whether the company is taxable as an insurance company (as defined in paragraph (a) of this section). An insurance company shall be taxed as a life insurance company if it is engaged in the business of issuing life insurance and annuity contracts (either separately or combined with health and accident insurance), or noncancellable contracts of health and accident insurance, and its life insurance reserves (as defined in section 801(b) and §1.801–4), plus unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable life, health, or accident policies not included in life insurance reserves, comprise more than 50 percent of its total reserves (as defined in section 801(c) and §1.801–5). For purposes of determining whether it satisfies the percentage requirements of the preceding sentence, a company shall first make any adjustments to life insurance reserves and total reserves required by section 806(a) (relating to adjustments for certain changes in reserves and assets) and then as required by section 801(d) (relating to adjustments in reserves for policy loans). For examples of the adjustments required under section 806(a), see paragraph (b)(4) of §1.806–3. For an example of the adjustments required under section 801(d), see paragraph (c) of §1.801–6. Furthermore, if an insurance company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such revalued basis shall be disregarded for purposes of section 801.

(2) An insurance company writing only noncancellable life, health, or accident policies and having no ‘‘life insurance reserves’’ may qualify as a life insurance company if its unearned premiums, and unpaid losses (whether or not ascertained), on such policies comprise more than 50 percent of its total reserves.

(3) Section 801(f) provides that a burial or funeral benefit insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services shall not be taxable under section 802 but shall be taxable under section 821 or section 831 as an insurance company other than life.

(c) *Noncancellable life, health, or accident insurance policy.* The term *noncancellable life, health, or accident insurance policy* means a health and accident contract, or a health and accident contract combined with a life insurance or annuity contract, which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Such a health and accident contract shall be considered noncancellable even though it states a termination date at a stipulated age, if, with respect to the health and accident contract, such age termination date is 60 or over. Such a contract, however, shall not be considered to be noncancellable after the age termination date stipulated in the contract has passed. However, if the age termination date stipulated in the contract occurs during the period covered by a premium received by the life insurance company prior to such date, and the company cannot cancel or modify the contract during such period, the age termination date shall be deemed to occur at the expiration of the period for which the premium has been received.

(d) *Guaranteed renewable life, health, and accident insurance policy.* The term *guaranteed renewable life, health, and accident insurance policy* means a health and accident contract, or a health and accident contract combined with a life insurance or annuity contract, which is not cancellable by the company but under which the company reserves the right to adjust premium rates by classes in accordance with its experience under the type of policy involved, and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Section 801(e) provides that such policies shall be treated in the same manner as noncancellable life, health, and accident insurance policies. For example, the age termination date requirements applicable to noncancellable health and accident insurance policies shall also apply to guaranteed renewable life, health, and accident insurance policies. See paragraph (c) of this section.

(e) *Unearned premiums.* The term *unearned premiums* means those amounts which shall cover the cost of carrying the insurance risk for the period for which the premiums have been paid in advance. Such term includes all unearned premiums, whether or not required by law.

(f) *Life insurance reserves.* For the definition of the term ''life insurance reserves'', see section 801(b) and § 1.801–4.

(g) *Unpaid losses (whether or not ascertained).* The term *unpaid losses (whether or not ascertained)* means a reasonable estimate of the amount of the losses (based upon the facts in each case and the company's experience with similar cases):

(1) Reported and ascertained by the end of the taxable year but where the amount of the loss has not been paid by the end of the taxable year,

(2) Reported by the end of the taxable year but where the amount thereof has not been either ascertained or paid by the end of the taxable year, or

(3) Which have occurred by the end of the taxable year but which have not been reported or paid by the end of the taxable year.

(h) *Total reserves.* For the definition of the term *total reserves,* see section 801(c) and § 1.801–5.

(i) *Amount of reserves.* For purposes of subsections (a), (b), and (c) of section 801 and this section, section 801(b)(5) provides that the amount of any reserve (or portion thereof) for any taxable year shall be the mean of such reserve (or portion thereof) at the beginning and end of the taxable year.

[T.D. 6513, 25 FR 12655, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

§ 1.801–4 Life insurance reserves.

(a) *Life insurance reserves defined.* For purposes of part I, subchapter L, chapter 1 of the Code, the term *life insurance reserves* (as defined in section 801(b)) means those amounts:

(1) Which are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest;

(2) Which are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies; and

(3) Which, except as otherwise provided by section 801(b)(2) and paragraphs (b) and (c) of this section, are required by law. For the meaning of the term ''reserves required by law'', see paragraph (b) of § 1.801–5.

For purposes of determining life insurance reserves, only those amounts shall be taken into account which must be reserved either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute. Moreover, such amounts must actually be held by the company during the taxable year for which the reserve is claimed. However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. For example, if an ordinary life policy with a reserve of $100 is reinsured in another solvent company on a yearly renewable term basis, and the reserve on such yearly renewable term policy is $10, the reinsured company shall include $90 ($100 minus $10) in determining its life insurance reserves. Generally, life insurance reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. For examples of reserves which qualify as life insurance reserves, see paragraph (d) of this section. For examples of reserves which do not qualify as life insurance reserves, see paragraph (e) of this section.

(b) *Certain reserves which need not be required by law.* Section 801(b)(2) sets forth certain reserves which, though not required by law, may still qualify as life insurance reserves, provided, however, that they first satisfy the requirements of section 801(b)(1) (A) and (B) and paragraph (a) (1) and (2) of this section. Thus, reserves need not be required by law:

(1) In the case of policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, and

(2) For taxable years beginning before January 1, 1970, in the case of policies issued by an organization which met the requirements of section 501(c)(9) (as it existed prior to amendment by the Tax Reform Act of 1969) other than the requirement of subparagraph (B) thereof.

(c) *Assessment companies.* Section 801(b)(3) provides that in the case of an assessment life insurance company or association, the term *life insurance reserves* includes:

(1) Sums actually deposited by such company or association with officers of a State or Territory pursuant to law as guaranty or reserve funds, and

(2) Any funds maintained, under the charter or articles of incorporation or association of such company or association (or bylaws approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

For purposes of part I, subchapter L, chapter 1 of the Code, the reserves described in this paragraph shall be included as life insurance reserves even though such reserves do not meet the requirements of section 801(b) and paragraph (a) of this section. However, for such reserves to be included as life insurance reserves, they must be deposited or maintained to liquidate future unaccrued claims arising from life insurance, annuity, or noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is deposited or maintained, life, health, or accident contingencies. The rate of interest assumed in calculating the reserves described in this paragraph shall be 3 percent, regardless of the rate of interest (if any) specified in the contract in respect of such reserves.

(d) *Reserves which qualify as life insurance reserves.* The following reserves, provided they meet the requirements of section 801(b) and paragraph (a) of this section, are illustrative of reserves which shall be included as life insurance reserves:

(1) Reserves held under life insurance contracts.

(2) Reserves held under annuity contracts (including reserves held under variable annuity contracts as described in section 801(g)(1)).

(3) Reserves held under noncancellable health and accident insurance contracts (as defined in paragraph (c) of §1.801–3) and reserves held under guaranteed renewable health and accident insurance contracts (as defined in paragraph (d) of §1.801–3).

(4) Reserves held either separately or combined under contracts described in subparagraphs (1), (2), or (3) of this paragraph.

(5) Reserves held under deposit administration contracts. Generally, the reserves held by a life insurance company on both the active and retired lives under deposit administration contracts will meet the requirements of section 801(b) and paragraph (a) of this section.

However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. See paragraph (a) of this section.

(e) *Reserves and liabilities which do not qualify as life insurance reserves.* The following are illustrative of reserves and liabilities which do not meet the requirements of section 801(b) and paragraph (a) of this section and, accordingly, shall not be included as life insurance reserves:

(1) Liability for supplementary contracts not involving at the time with respect to which the liability is computed, life, health, or accident contingencies.

(2) In the case of cancellable health and accident policies and similar cancellable contracts, the unearned premiums and unpaid losses (whether or not ascertained).

(3) The unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable life, health, or accident policies (and guaranteed renewable life, health, and accident policies) not included in life insurance reserves. (However, such amounts

shall be taken into account under section 801(a)(2) for purposes of determining whether an insurance company is a life insurance company.)

(4) The deficiency reserve (as defined in section 801(b)(4)) for each individual contract, that is, that portion of the reserve for such contract equal to the amount (if any) by which:

(i) The present value of the future net premiums required for such contract, exceeds

(ii) The present value of the future actual premiums and consideration charged for such contract.

(5) Reserves required to be maintained to provide for the ordinary operating expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage.

(6) Liability for premiums received in advance.

(7) Liability for premium deposit funds.

(8) Liability for annual and deferred dividends declared or apportioned.

(9) Liability for dividends left on deposit at interest.

(10) Liability for accrued but unsettled policy claims whether known or unreported.

(11) A mandatory securities valuation reserve.

(f) *Adjustments to life insurance reserves.* In the event it is determined on the basis of the facts of a particular case that premiums deferred and uncollected and premiums due and unpaid are not properly accruable for the taxable year under section 809 and, accordingly, are not properly includible under assets (as defined in section 805(b)(4)) for the taxable year, appropriate reduction shall be made in the life insurance reserves. This reduction shall be made when the insurance company has calculated life insurance reserves on the assumption that the premiums on all policies are paid annually or that all premiums due on or prior to the date of the annual statement have been paid.

[T.D. 6513, 25 FR 12656, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

§1.801–5 Total reserves.

(a) *Total reserves defined.* For purposes of section 801(a) and §1.801–3, the term ''total reserves'' is defined in section 801(c) as the sum of:

(1) Life insurance reserves (as defined in section 801(b) and §1.801–4),

(2) Unearned premiums (as defined in paragraph (e) of §1.801–3), and unpaid losses (whether or not ascertained) (as defined in paragraph (g) of §1.801–3), not included in life insurance reserves, and

(3) All other insurance reserves required by law.

The term ''total reserves'' does not, however, include deficiency reserves (within the meaning of section 801(b)(4), and paragraph (e)(4) of §1.801–4), even though such deficiency reserves are required by State law. In determining total reserves, a company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held during the taxable year for which the reserve is claimed. For example, during the taxable year 1958 a life insurance company sells life insurance and annuity contracts in States A and B. State A requires reserves of 10 against the life and 5 against the annuity business. State B requires reserves of 9 against the life and 7 against the annuity business. Assuming the company actually holds these reserves during the taxable year 1958, its highest aggregate reserve for such taxable year is the 16 required by State B. Thus, the company is not permitted to compute its highest aggregate reserve by taking State A's requirement of 10 against its life insurance business and adding it to State B's requirement of 7 against its annuity business.

(b) *Reserves required by law defined.* For purposes of part I, subchapter L, chapter 1 of the Code, the term *reserves required by law* means reserves which are required either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute, and which are reported in the annual statement of the company and accepted by state regulatory authorities as held for the fulfillment of the claims of policyholders or beneficiaries.

(c) *Information to be filed.* In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. See section 6012 and paragraph (c) of §1.6012–2. If the basis (for Federal income tax purposes) for determining the amount of any of the life insurance reserves as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year then the following information must be filed with respect to all such changes in basis:

(1) The nature of the life insurance reserve (i.e., life, annuity, etc.);

(2) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the old basis, and the amount of such reserve at the beginning and close of the taxable year computed on the old basis;

(3) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the new basis, and the amount of such reserve at the close of the taxable year computed on the new basis;

(4) The deviation, if any, from recognized mortality or morbidity tables, or recognized methods of computation;

(5) The reasons for the change in basis of such reserve; and

(6) Whether such change in the reserve has been approved or accepted by the regulatory authorities of the State of domicile, and if so, a copy of the letter, certificate, or other evidence of such approval or acceptance.

(d) *Illustration of principles.* The provisions of section 801 relating to the percentage requirements for qualification as a life insurance company may be illustrated by the following example:

Example. The books of Y, an insurance company, selling life insurance, noncancellable health and accident insurance, and cancellable accident and health insurance, reflect (after adjustment under sections 806(a) and 801(d)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves	$3,000	$5,000	$4,000
2. Unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable accident and health insurance not included in life insurance reserves	400	600	500
3. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance	1,800	2,200	2,000
4. All other insurance reserves required by law	900	1,100	1,000
5. Total reserves	....	....	7,500

The rules provided by section 801 require that the sum of the mean of the year figures in items 1 and 2 comprise more than 50 percent of the mean of the year figure in item 5 for an insurance company to qualify as a life insurance company. Thus, Y would qualify as a life insurance company for the taxable year 1958 as the sum of the mean of the year figures in items 1 and 2 ($4,500) comprise 60 percent of the mean of the year figure in item 5 ($7,500).

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

§1.801–6 Adjustments in reserves for policy loans.

(a) *In general.* Section 801(d) provides that for purposes only of determining whether or not an insurance company is a life insurance company (as defined in section 801(a) and paragraph (b) of §1.801–3), the life insurance reserves (as defined in section 801(b) and §1.801–4), and the total reserves (as defined in section 801(c) and paragraph (a) of §1.801–5), shall each be reduced by an amount equal to the mean of the aggregates, at the beginning and end of the taxable year, of the policy loans outstanding with respect to contracts for which life insurance reserves are maintained. Such reduction shall be made after any adjustments required under section 806(a) and §1.806–3 have been made.

(b) *Policy loans defined.* The term *policy loans* includes loans made by the insurance company, by whatever name called, for which the reserve on a contract is the collateral.

(c) *Illustration of principles.* The provisions of section 801(d) and this section may be illustrated by the following example:

Example. The books of T, an insurance company, selling only life insurance and cancellable accident and health insurance, reflect (after adjustment under section 806 (a)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves	$1,000	$2,000	$1,500
2. Policy loans	50	850	450
3. Life insurance reserves less policy loans	....	....	1,050
4. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance	900	1,600	1,250
5. Total reserves adjusted for policy loans (item 3 plus item 4)	....	....	2,300

As the rules provided by section 801 (a) and (d) require that the figure in item 3 ($1,050) be more than 50 percent of the mean of the year figure in item 5 ($2,300) for an insurance company to qualify as a life insurance company, T would not qualify as a life insurance company for the taxable year 1958.

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

§ 1.801–7 Variable annuities.

(a) *In general.* (1) Section 801(g)(1) provides that for purposes of part I, subchapter L, chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) The reserves held with respect to the annuity contracts described in section 801(g)(1) and subparagraph (1) of this paragraph shall qualify as life insurance reserves within the meaning of section 801(b)(1) and paragraph (a) of § 1.801–4 provided such reserves are required by law (as defined in paragraph (b) of § 1.801–5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing variable annuity contracts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of § 1.801–3.

(b) *Special rules for variable annuities*—(1) *Adjusted reserves rate; assumed rate.* The adjusted reserves rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section, and the rate of interest assumed by the taxpayer for any taxable year in calculating the reserve on any such contract, shall be a rate equal to the current earnings rate determined under section 801(g)(3) and subparagraph (2) of this paragraph. However, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a variable annuity contract for any taxable year which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810 (d)(1) (relating to adjustment for change in computing reserves).

(2) *Current earnings rate.* (i) The current earnings rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section shall be the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805–5 with respect to such contracts, reduced by the percentage obtained by dividing *(a)* the amount of the actuarial margin charge on all such variable annuity contracts issued by the taxpayer, by *(b)* the mean of the reserves for such contracts.

(ii) For purposes of section 801(g)(3) and subdivision (i) of this subparagraph, the term *actuarial margin charge* means any amount retained by the company from gross investment income pursuant to the terms of the variable annuity contract in excess of any portion of the investment expenses which is attributable to such contract and which is deductible under section 804(c) and paragraph (b) of § 1.804–4.

(3) *Increases and decreases in reserves.* (i) Section 801(g)(4) provides that for purposes of section 810 (a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of §1.810–2 taken into account as of the close of the taxable year shall be adjusted:

(a) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves for variable annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section by reason of realized or unrealized appreciation in the value of the assets held in relation thereto, and

(b) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(ii) The application of section 801(g)(4) and subdivision (i) of this subparagraph may be illustrated by the following example:

Example. Company M, a life insurance company issuing only variable annuity contracts of the type described in section 801(g)(1) and paragraph (a)(1) of this section, increased its life insurance reserves held with respect to such contracts during the taxable year 1959 by $275,000. Of the total increase in the reserves, $100,000 was attributable to premium receipts, $50,000 to dividends and interest, $100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and $25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1959, the reserves held by company M with respect to all variable annuity contracts amounted to $1,275,000. However, under section 801(g)(4) and subdivision (i) of this subparagraph, this amount must be reduced by the $100,000 unrealized asset value appreciation and the $25,000 of realized capital gains. Accordingly, for purposes of section 810 (a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1959 under section 810(c) is $1,150,000 ($1,275,000 less $125,000).

(c) *Companies issuing variable annuities and other contracts.* (1) In the case of a life insurance company which issues both annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section and other contracts, the policy and other contract liability requirements (as defined in section 805(a) and paragraph (b) of §1.805–4) of such a company for any taxable year shall be considered to be the sum of:

(i) The policy and other contract liability requirements computed with respect to the items which relate to such variable annuity contracts, and

(ii) The policy and other contract liability requirements computed by excluding the items taken into account under subdivision (i) of this subparagraph.

(2) [Reserved for regulations to be issued under section 801(g)(5)(B).]

(d) *Termination.* Paragraphs (1), (2), (3), (4), and (5) of section 801(g) and paragraphs (a), (b), (c), and (d) of this section shall not apply with respect to any taxable year beginning after December 31, 1962.

[T.D. 6610, 27 FR 8717, Aug. 31, 1962]

§1.801–8 Contracts with reserves based on segregated asset accounts.

(a) *Definitions*—(1) *Annuity contracts include variable annuity contracts.* Section 801(g)(1)(A) provides that for purposes of part I, subchapter L, chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) *Contracts with reserves based on a segregated asset account.* (i) For purposes of part I, section 801(g)(1)(B) defines the term *contract with reserves based on a segregated asset account* as a contract (individual or group):

(a) Which provides for the allocation of all or part of the amounts received under the contract to an account which, pursuant to State law or regulation, is segregated from the general asset accounts of the company,

(b) Which provides for the payment of annuities, and

(c) Under which the amounts paid in, or the amount paid as annuities, reflect the investment return and the market value of the segregated asset account.

(ii) The term *contract with reserves based on a segregated asset account* includes a contract such as a variable annuity contract, which reflects the investment return and the market value of the segregated asset account, even though such contract provides for the payment of an annuity computed on the basis of recognized mortality tables, but the term includes such contract only for the period during which it satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph. However, such term does not include a pension contract written on the basis of the so-called new-money concept. Thus, for example, such term does not include a pension contract whereby reserves are credited on the basis of the company's new high yield investments. Furthermore, such term does not include a contract which during the taxable year contains a right to participate in the divisible surplus of the company where such right merely reflects the company's investment return. Nevertheless, the term does include a contract which meets the requirements of section 801(g)(1)(B) and of this subparagraph even if part of the amounts received are, for example, allocated to reserves under provisions of the contract which are written on the basis of the new-money concept. However, such reserves do not qualify as a segregated asset account referred to in section 801(g) and this section.

(iii) If at any time during the taxable year a contract otherwise satisfying the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph ceases to reflect current investment return and current market value, such contract shall not be considered as meeting the requirements of section 801(g)(1)(B)(iii) and subdivision (i) *(c)* of this subparagraph after such cessation. Thus, a contract with reserves based on a segregated asset account includes a contract under which the reflection of investment return and market value terminates at the beginning of the annuity payments, but only for the period prior to such termination. For example, if the purchaser of a variable annuity contract which meets such requirements elects an option which provides for the payment of a fixed dollar annuity, then such contract shall be considered as satisfying such requirements only for the period prior to the time such contract ceases to reflect current investment return and current market value. Furthermore, a group annuity contract which satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph shall be considered as continuing to meet such requirements even though a certificate holder under the group contract elects an option which provides for the payment of a fixed dollar annuity. However, the annuity attributable to such certificate holder shall not be considered as satisfying such requirements as of the time such annuity ceases to reflect current investment return and current market value. On the other hand, a group annuity contract which does not reflect current market value shall not be considered as satisfying such requirements even though a certificate holder under the group contract elects an option which provides for the payment of a variable annuity. However, the variable annuity attributable to such certificate holder shall be considered as satisfying such requirements as of the time such variable annuity commences to reflect current investment return and current market value.

(b) *Life insurance reserves.* Section 801(g)(2) provides that for purposes of section 801(b)(1)(A), the reflection of the investment return and the market value of the segregated asset account shall be considered an assumed rate of interest. Thus, the reserves held with respect to contracts described in section 801(g)(1) and paragraph (a) of this section shall qualify as life insurance reserves within the meaning of section 801(b)(1) and paragraph (a) of §1.801–4 provided such reserves are required by law (as defined in paragraph (b) of §1.801–5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts with reserves based on segregated asset accounts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing contracts with reserves based on segregated asset accounts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of §1.801–3.

(c) *Separate accounting.* (1) For purposes of part I, section 801(g)(3) provides that a life insurance company (as defined in section 801(a) and paragraph (b) of §1.801–3) which issues contracts with reserves based on segregated asset accounts (as defined in section 801 (g)(1)(B) and paragraph (a)(2) of this section) shall separately account for each and every income, exclusion, deduction, asset, reserve, and other liability item which is properly attributable to such segregated asset accounts. In those cases where such items are not directly accounted for, separate accounting shall be made:

(i) According to the method regularly employed by the company, if such method is reasonable, and

(ii) In all other cases in a manner which, in the opinion of the district director, is reasonable.

A method of separate accounting for such items as are not accounted for directly will be deemed ‘‘regularly employed’’ by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before issued contracts with reserves based on segregated asset accounts, the company initiates in the first taxable year for which it issues such contracts a reasonable method of separate accounting for such items and consistently follows such method thereafter. Ordinarily, a company regularly employs a method of accounting in accordance with the statute of the State, Territory, or the District of Columbia, in which it operates.

(2) Every life insurance company issuing contracts with reserves based on segregated asset accounts shall keep such permanent records and other data relating to such contracts as is necessary to enable the district director to determine the correctness of the application of the rules prescribed in section 301(g) and this section and to ascertain the accuracy of the computations involved.

(d) *Investment yield.* (1) For purposes of part I, section 801(g)(4)(A) provides that the policy and other contract liability requirements (as determined under section 805), and the life insurance company’s share of investment yield (as determined under sections 804(a) or 809(b)), shall be separately computed:

(i) With respect to the items separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section, and

(ii) Excluding the items taken into account under subdivision (i) of this subparagraph.

Thus, for purposes of determining both taxable investment income and gain or loss from operations, a life insurance company shall separately compute the life insurance company’s share of the investment yield on the assets in its segregated asset account without regard to the policy and other contract liability requirements of, and the investment income attributable to, contracts with reserves that are not based on the segregated asset account. Such separate computations shall be made after any allocation required under section 801(g)(4)(B) and subparagraph (2) of this paragraph.

(2)(i) Section 801(g)(4)(B) provides that if the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), determined without regard to any separate computations under section 801(g)(4)(A) and subparagraph (1) of this paragraph, then such excess shall be allocated between section 801(g)(4)(A) (i) and (ii) and subparagraph (1) (i) and (ii) of this paragraph. Such allocation shall be in proportion to the respective contributions to such excess of the items taken into account under each such section and subparagraph. The allocation under this subparagraph shall be made before the separate computations prescribed by section 801(g)(4)(A) and subparagraph (1) of this paragraph.

(ii) The operation of the allocation required under section 801(g)(4)(B) and subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. For the taxable year 1962, T, a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on segregated asset accounts, had (without regard to section 801(g)(4)(A)) realized short-term capital gains of $10,000 and short-term capital losses of $10,000 attributable to its general asset accounts and realized short-term capital gains of $12,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain ($10,000+$12,000−$10,000, or $12,000) over the net long-term capital loss (0) was $12,000. Of the excess of $12,000, 100 percent was contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B), T would allocate the entire $12,000 to its segregated asset accounts for such taxable year.

Example 2. The facts are the same as in example 1 except that for the taxable year 1962, T had (without regard to section 801(g)(4)(A)) realized short-term capital losses of $8,000 attributable to its general asset accounts and realized long-term capital gains of $1,000 and long-term capital losses of $5,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain ($10,000+$12,000−$8,000, or $14,000) over the net long-term capital loss ($5,000−$1,000, or $4,000) was $10,000. Of the excess of $10,000, the general asset accounts contributed 20 percent ($2,000 ($10,000−$8,000)÷$10,000) and the segregated asset accounts contributed 80 percent ($8,000 ($12,000−$4,000)÷$10,000). Applying the provisions of section 801(g)(4)(B), T would allocate $2,000 ($10,000×20 percent) to its general asset accounts and $8,000 ($10,000×80 percent) to its segregated asset accounts for such taxable year.

Example 3. W is a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on either of two segregated asset accounts, Separate Account C or Separate Account D. For the taxable year 1962, W had (without regard to section 801(g)(4)(A)) realized short-term capital gains of $16,000 and long-term capital losses of $15,000 attributable to its general asset accounts, long-term capital gains of $12,000 and short-term capital losses of $6,000 attributable to Separate Account C and long-term capital gains of $7,000 and short-term capital losses of $5,000 attributable to Separate Account D. For the taxable year 1962, the excess of the net short-term capital gain ($16,000−$6,000−$5,000) over the net long-term capital loss (0) was $5,000. Of the $5,000 excess, 20 percent ($16,000−$15,000÷$5,000) was contributed by the general asset accounts, leaving 80 percent as the amount contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B) W would allocate $1,000 (20 percent of $5,000) to the general asset accounts, leaving $4,000 (80 percent of $5,000) to be allocated among the segregated asset accounts, Separate Account C and Separate Account D. W would allocate $3,000 of the $4,000 to Separate Account C computed as follows:

$$\$3{,}000 = \frac{(\$4{,}000)\times(\$12{,}000-\$6{,}000)}{(\$12{,}000-\$6{,}000)+(\$7{,}000-\$5{,}000)}$$

W would allocate $1,000 of the $4,000 to Separate Account D computed as follows:

$$\$1{,}000 = \frac{(\$4{,}000)\times(\$7{,}000-\$5{,}000)}{(\$12{,}000-\$6{,}000)+(\$7{,}000-\$5{,}000)}$$

(e) *Policy and other contract liability requirements.* (1) For purposes of part I, section 801(g)(5)(A) provides that with respect to life insurance reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section), the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed by the taxpayer for purposes of sections 805(c) and 809(a)(2), shall be a rate equal to the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805–5 with respect to the items separately accounted for in accordance with section 801(g)(3), reduced by the percentage obtained by dividing:

(i) Any amount retained with respect to all of the reserves based on a segregated asset account by the life insurance company from gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804–3) on segregated assets, to the extent such retained amount exceeds the deductions allowable under section 804(c) which are attributable to such reserves, by

(ii) The means of such reserves.

(2) For purposes of part I, section 801 (g)(5)(B) provides that with respect to reserves based on segregated asset accounts other than life insurance reserves, there shall be included as interest paid within the meaning of section 805(e)(1) and paragraph (b)(1) of § 1.805–8, an amount equal to the product of the means of such reserves multiplied by the rate of interest assumed as defined in section 801(g)(5)(A) and subparagraph (1) of this paragraph.

(3) For purposes of this paragraph, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a contract with reserves based on a segregated asset account for any taxable year beginning after December 31, 1961, which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810 (d)(1) (relating to adjustment for change in computing reserves).

(4) The provisions of section 801(g) (3) through (5) may be illustrated by the following example. For purposes of this example, it is assumed that all computations have been carried out to a sufficient number of decimal places to insure substantial accuracy and to eliminate any significant error in the resulting tax liability.

Example. The books of R, a life insurance company, discloses the following facts with respect to items of investment yield, deductions, assets, and reserves for the taxable year 1962:

(a) *Excerpts from Company Financial Statements.*

(1) Investment yield	Company regular account	Separate account A	Separate account B
Interest wholly tax-exempt	$100,000	$3,000	$1,000
Interest—other	10,000,000	8,000	15,000
Dividends received	200,000	25,000	27,000
Other items of investment yield	100,000	2,000	1,000
Gross investment income	10,400,000	38,000	44,000
Less deductions (sec. 804(c))	1,000,000	4,000	4,400
Investment yield	9,400,000	34,000	39,600
(2) Assets and reserves:			
(i) Assets:			
Jan. 1, 1962 ...	190,000,000	....	....
Dec. 31, 1962	210,000,000	1,600,000	1,800,000
Mean	200,000,000	800,000	900,000
(ii) Life insurance reserves:			
Jan. 1, 1962 ...	152,000,000	....	....
Dec. 31, 1962	168,000,000	1,600,000	1,640,000
Mean	160,000,000	800,000	820,000
(iii) Reserves based on segregated asset accounts other than life insurance reserves:			
Jan. 1, 1962 ...	....	....	....
Dec. 31, 1962	....	....	120,000
Mean	....	....	60,000

(b) *Additional facts.* In addition to the facts assumed in (a) above, assume the following: The company retained with respect to reserves based upon segregated asset accounts a total of $4,720 from gross investment income on Separate Account A and $5,720 from gross investment income on Separate Account B. With respect to the Company Regular Account computed without regard to the items in either of the separate accounts, the policy and other contract liability requirement is $6,580,000 and the required interest is $5,640,000. There are no items of interest paid with respect to the separate accounts other than those computed under section 801(g)(5)(B). Based on these facts, the current earnings rate (sec. 805(b)); adjusted reserves rate (sec. 805 (b)); and rate of interest assumed (secs. 805(c) and 809(a)(2)); and the policy and other contract liability requirements are determined for each of the Separate Accounts A and B (and the policy and other contract liability requirements for the Company Regular Account) as set forth in items (c) through (1) below.

(c) *Separate Account A.* The current earnings rate determined under section 805 (b)(2) with respect to the items separately accounted for under Separate Account A, prior to the reduction provided for under section 801(g)(5)(A), is 4.25 percent (the investment yield, $34,000, divided by the mean of the assets, $800,000). The company retained with respect to such reserves from gross investment income on Separate Account A a total of $4,720. The company had deductions allowable under section 804(c) with respect to such account of $4,000. Accordingly, for purposes of section 801(g)(5)(A)(i), the amount retained by the company was $720 (the total amount retained of $4,720 less the deductions allowable under section 804(c) of $4,000). The reduction percentage for purposes of section 801(g)(5)(A) is 0.09 percent (the amount retained of $720 divided by the mean of the life insurance reserves of $800,000). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of sections 805(c) and 809(a)(2) is equal to 4.16 percent (the current earnings rate of 4.25 percent less the reduction percentage of 0.09 percent).

The policy and other contract liability requirements with respect to Separate Account A is determined as follows: For purposes of section 805(a) (1) and (2), the amount is $33,280 (the mean of the life insurance reserves, $800,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.16 percent). Thus, the policy and other contract liability requirement for Separate Account A is $33,280.

(d) *Separate Account B.* The current earnings rate determined under section 805 (b)(2) with respect to the items separately accounted for under Separate Account B, prior to the reduction provided for under section 801(g)(5)(A), is 4.40 percent (the investment yield, $39,600 divided by the mean of the assets, $900,000). The company retained with respect to such reserves from gross investment income on Separate Account B a total of $5,720. The company had deductions allowable under section 804(c) with respect to such account of $4,400. Accordingly, for purposes of section 801(g)(5)(A)(i) the amount retained by the company was $1,320 (the total amount retained of $5,720 less the deductions allowable under section 804(c) of $4,400). The reduction percentage for purposes of section 801(g)(5)(A) is 0.15 percent (the amount retained of $1,320 divided by the mean of the reserves based on Separate Account B of $880,000 ($820,000 plus $60,000)). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of section 805(c) and 809(a)(2) is equal to 4.25 percent (the current earnings rate of 4.40 percent less the reduction percentage of 0.15 percent).

With respect to reserves based on segregated asset accounts other than life insurance reserves, Separate Account B had such reserves at December 31, 1962, of $120,000. The mean of such reserves was $60,000. The rate of interest assumed with respect to such reserves is 4.25 percent, as computed above. Accordingly, there shall be included as interest paid within the meaning of section 805(e)(1) the amount of $2,550 (the mean of such reserves, $60,000 multiplied by the rate of interest assumed of 4.25 percent).

The policy and other contract liability requirements with respect to Separate Account B is determined as follows:

(1) For purposes of section 805(a)(1) and (2), the amount is $34,850 (the mean of the life insurance reserves, $820,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.25 percent).

(2) For purposes of section 805(a)(3), the amount is $2,550 (the mean of the reserves based on Separate Account B other than life insurance reserves, $60,000, multiplied by the rate of interest assumed, as determined under section 801(g)(5)(A), 4.25 percent). It has been assumed that there was no other interest paid on Separate Account B within the meaning of section 805(e). If there was other interest paid with respect to Separate Account B that met the requirements of section 805(e), however, then such interest would be included under section 805(a)(3). Thus, the policy and other contract liability requirement for Separate Account B is $37,400 ($34,850+$2,550).

(e) *Company Regular Account.* The policy and other contract liability requirements with respect to the Company Regular Account is $6,580,000 (this amount is determined by the company in the manner provided by section 805 (and the regulations thereunder) without regard to either Separate Account A or Separate Account B).

(f) *Policyholders' share and company's share of investment yield—section 804.* The policyholders' and company's share of investment yield and taxable investment income are computed as follows:

(1) Company Regular Account

Policyholders' share of investment yield.	70% ($6,580,000÷$9,400,000).
Company's share of investment yield (100% less 70%).	30%.

(2) Separate Account A

Policyholders' share of investment yield.	97.8824% ($33,280 ÷$34,000).
Company's share of investment yield (100% less 97.8824%).	2.1176%.

(3) Separate Account B

Policyholders' share of investment yield.	94.444% ($37,400 ÷$39,600).
Company's share of investment yield (100% less 94.444%).	5.556%.

(g) *The company's share of investment yield under section 804 is determined as follows:*

Investment yield (from item (a)(1))	Company regular account (30 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt	$30,000	$63.53	$55.56
Interest—other	3,000,000	169.41	833.40
Dividends received	60,000	529.40	1,500.12
Other items of gross investment income.	30,000	42.35	55.56
	3,120,000	804.69	2,444.64

Investment yield (from item (a)(1))	Company regular account (30 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Less deductions	300,000	84.70	244.46
Investment yield	2,820,000	719.99	2,200.18

(h) *Taxable investment income.* The company's taxable investment income (without regard to any excess of net long-term capital gain over net short-term capital loss) is determined as follows:

Life insurance company's share of investment yield ($2,820,000+$719.99+ $2,200.18)	$2,822,920.17
Less:	
Company's share of interest wholly tax-exempt ($30,000+ $63.53+$55.56)=$30,119.09	
85 percent of company's share of dividends received (but not to exceed 85% of taxable investment income computed without regard to this deduction) (85%×$62,029.52) ($60,000+ $529.40+$1,500.12)=$52,725.09	
Small business deduction (10% of investment yield, $9,473,600, not to exceed $25,000) =$25,000.00	107,844.18
Taxable investment income	2,715,075.99

(i) *Required interest—section 809(a)(2)*— (1) *Separate Account A.* The rate of interest assumed by the company, with respect to Separate Account A is 4.16 percent (see (c) above). The required interest for purposes of section 809(a)(2) is determined as follows:

Life insurance reserves: 4.16% (rate assumed) times $800,000 (mean of life insurance reserves)	$33,280.00

(2) *Separate Account B.* The rate of interest assumed by the company with respect to Separate Account B is 4.25 percent (see (d) above). The required interest for purposes of section 809(a)(2) is determined as follows:

(i) Life insurance reserves: 4.25% (rate assumed) times $820,000 (mean of life insurance reserves)	$34,850.00
(ii) Other section 810(c) reserves: 4.25% (rate assumed) times $60,000 (mean of reserves other than life insurance reserves)	$2,550.00
	$37,400.00

(3) *Company Regular Account.* The required interest with respect to the Company Regular Account is $5,640,000 (this amount is assumed for purposes of this example, but it would be determined by the company in the manner provided by section 809 without regard to either Separate Account A or Separate Account B).

(j) *Policyholders' share and company's share of investment yield—section 809.* The policyholders' share and the company's share of investment yield for purposes of section 809 is determined as follows:

(1) *Company Regular Account:*	
Policyholders' share of investment yield	60% ($5,640,000÷$9,400,000).
Company's share of investment yield (100 percent—60%).	40%.
(2) *Separate Account A:*	
Policyholders' share of investment yield	97.8824% ($33,280÷$34,000).
Company's share of investment yield (100%—97.8824 percent).	2.1176%.
(3) *Separate Account B:*	
Policyholders' share of investment yield	94.444% ($37,400÷$39,600).
Company's share of investment yield (100%—94.444%).	5.556%.

(k) *The company's share of investment yield under section 809 is determined as follows:*

Investment yield (from item (a)(1))	Company regular account (40 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt	$40,000	$63.53	$55.56
Interest—other	4,000,000	169.41	833.40
Dividends received	80,000	529.40	1,500.12
Other items of gross investment income	40,000	42.35	55.56
	4,160,000	804.69	2,444.64

Investment yield (from item (a)(1))	Company regular account (40 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Less deductions	400,000	84.70	244.46
Investment yield	3,760,000	719.99	2,200.18

(1) *Deductions under section 809(d)(8).* For purposes of section 809(d)(8), the life insurance company's share of each of such items is determined as follows:

(1) Wholly tax-exempt interest ($40,000+$63.53+$55.56)	$40,119.09
(2) Dividends received 85%× $82,029.52 ($80,000+$529.40+$1,500.12) (it is assumed for purposes of this example that this amount does not exceed 85% of the gain from operations as computed under sec. 809(d)(8)(B))	69,725.09

(f) *Increases and decreases in reserves.* (1) Section 801(g)(6) provides that for purposes of section 810 (a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of § 1.810–2 taken into account as of the close of the taxable year shall be adjusted:

(i) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section by reason of realized or unrealized appreciation in value of the assets held in relation thereto, and

(ii) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Company M, a life insurance company issuing only contracts with reserves based on segregated asset accounts as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section (other than contracts described in section 805(d)(1) (A), (B), (C), or (D)), increased its life insurance reserves held with respect to such contracts during the taxable year 1962 by $275,000. Of the total increase in the reserves, $100,000 was attributable to premium receipts, $50,000 to dividends and interest, $100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and $25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1962, the reserves held by company M with respect to all such contracts amounted to $1,275,000. However, under section 801(g)(6) and this subparagraph, this amount must be reduced by the $100,000 unrealized asset value appreciation and the $25,000 of realized capital gains. Accordingly, for purposes of section 810(a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1962 under section 810(c) is $1,150,000 ($1,275,000 less $125,000). However, for purposes of section 810 (a) and (b), the amount of these reserves which is to be taken into account as of the beginning of the taxable year 1963 under section 810(c) is $1,275,000 (the amount as of the close of the taxable year 1962 before reduction of $125,000 for unrealized appreciation and realized capital gains).

(3)(i) Under section 801(g)(6), the deduction allowable for items described in section 809(d) (1) and (7) (relating to death benefits and assumption reinsurance, respectively) with respect to segregated asset accounts shall be reduced to the extent that the amount of such items is increased for the taxable year by appreciation (or shall be increased to the extent that the amount of such items is decreased for the taxable year by depreciation) not reflected in adjustments required to be made under subparagraph (1) of this paragraph.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. On June 30, 1962, X, a life insurance company, reinsured a portion of its insurance contracts with reserves based on segregated asset accounts with Y, a life insurance company, under an agreement whereby Y agreed to assume and become solely liable under the contracts reinsured. The reserves on the contracts reinsured by X were $90,000, of which $10,000 was attributable to unrealized appreciation in the value of the assets held in relation to such reserves. However, no amounts had been added to the reserves by reason of the unrealized appreciation of $10,000 and consequently, the $10,000 was not reflected in adjustments to reserves under section 809(g)(6) or subparagraph (1) of this paragraph. Under the reinsurance agreement, X made a payment of $90,000 in cash to

Y for assuming such contracts. Applying the provisions of section 809(d)(7), and assuming no other such reinsurance transactions by X during the taxable year, X would have an allowable deduction of $90,000 as a result of this payment on June 30, 1962. However, applying the provisions of section 801(g)(6) and this subparagraph, the actual deduction allowed would be $80,000 ($90,000 less $10,000). See section 806 (a) and §1.806–3 for the adjustments in reserves and assets to be made by X and Y as a result of this transaction. For the treatment by Y of this $90,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of §1.809–4.

(g) *Basis of assets held for certain pension plan contracts.* Section 801(g)(7) provides that in the case of contracts described in section 805(d)(1) (A), (B), (C), (D), or (E) (relating to the definition of pension plan reserves), the basis of each asset in a segregated asset account shall (in addition to all other adjustments to basis) be (i) increased by the amount of any appreciation in value, and (ii) decreased by the amount of any depreciation in value; but only to the extent that such appreciation and depreciation are reflected in the increases and decreases in reserves, or other items described in section 801(g)(6), with respect to such contracts. Thus, there shall be no capital gains tax payable by a life insurance company on appreciation realized on assets in a segregated asset account to the extent such appreciation has been reflected in reserves, or other items described in section 801(g)(6), for contracts described in section 805(d)(1) (A), (B), (C), (D), or (E) based on segregated asset accounts.

(h) *Additional separate computation*—(1) *Assets and total insurance liabilities.* A life insurance company which issues contracts with reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section) shall separately compute and report with its return the assets and total insurance liabilities which are properly attributable to all of such segregated asset accounts. Each foreign corporation carrying on a life insurance business which issues such contracts shall separately compute and report with its return assets held in the United States and total insurance liabilities on United States business which are properly attributable to all of such segregated asset accounts.

(2) *Foreign life insurance companies.* For adjustment under section 819 in the case of a foreign life insurance company which issues contracts based on segregated asset accounts under section 801(g), see §1.819–2(b)(4).

[T.D. 6886, 31 FR 8681, June 23, 1966, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968; T.D. 7501, 42 FR 42341, Aug. 23, 1977]

§1.802(b)–1 Tax on life insurance companies.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, section 802(b) imposes a tax on the 1954 life insurance company taxable income of all life insurance companies (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801). The tax so imposed is equal to 3 3/4 percent of the amount of such income not in excess of $200,000, plus 6 1/2 percent of the amount of such income in excess of $200,000. For the definition of the term ‘‘1954 life insurance company taxable income’’, see §1.805–1.

(b) The taxable income of life insurance companies differs from the taxable income of other corporations. See section 803. Life insurance companies are entitled, in computing life insurance company taxable income, to the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. The gross income, the deduction under section 803 (g)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. See section 803 (i) and §1.803–6. Such companies are not subject to the provisions of subchapter P (section 1201 and following), chapter 1 of the Code, relating to capital gains and losses, nor to the provisions of section 171 (amortizable bond premium).

(c) All provisions of the Code and of the regulations in this part not inconsistent with the specific provision of sections 801 to 807, inclusive, are applicable to the assessment and collection of the tax imposed by section 802, and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(d) Foreign life insurance companies not carrying on an insurance business within the United States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

§ 1.802–2 Taxable years affected.

Section 1.802(b)–1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.802–3 through 1.802–5 (other than paragraph (f)(2) of § 1.802–3), except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126). Paragraph (f)(2) of § 1.802–3 is applicable only to taxable years beginning after December 31, 1961, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), section 3 of the Act of October 23, 1962 (76 Stat. 1134) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126).

[T.D. 6886, 31 FR 8685, June 23, 1966]

§ 1.802–3 Tax imposed on life insurance companies.

(a) *In general.* For taxable years beginning after December 31, 1957, section 802(a)(1) imposes a tax on the life insurance company taxable income (as defined in section 802(b) and paragraph (a) of § 1.802–4) of every life insurance company (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801(a)). The tax imposed by section 802(a)(1) is payable upon the basis of returns rendered by the life insurance companies liable thereto. See subchapter A, chapter 61 (section 6001 and following) of the Code.

(b) *Tax imposed.* The tax imposed by section 802(a)(1) consists of a normal tax and a surtax computed as provided in section 11 as though the life insurance company taxable income (as defined in section 802(b)) were the taxable income referred to in section 11.

(c) *Normal tax.* The normal tax is computed by applying to the life insurance company taxable income the regular corporate normal tax rate (as in effect for the taxable year) provided by section 11(b).

(d) *Surtax.* The surtax is computed by applying the regular corporate surtax rate (as in effect for the taxable year) provided by section 11(c) to the amount by which the life insurance company taxable income exceeds the surtax exemption for the taxable year as determined under section 11(d). See sections 269 and 1551 and the regulations thereunder, for certain circumstances in which the surtax exemption may be disallowed in whole or in part.

(e) *Special rule for 1959 and 1960.* See section 802(a)(3) and paragraph (a) of § 1.802–5 for a transitional rule applicable in certain cases in determining tax liability for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3).

(f) *Tax imposed in case of certain capital gains*—(1) *Taxable years beginning after December 31, 1958, and before January 1, 1962.* For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes a separate tax equal to 25 percent of such excess. This separate 25 percent tax rate applies whether or not there is life insurance company taxable income, taxable investment income, or a gain or loss from operations for the taxable year. For taxable years beginning after December 31, 1958, and before January 1, 1962, only the excess (if any) of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) shall be taken into account in computing taxable investment income and gain or loss from operations. See sections 804(b) and 809(b). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization, and treatment thereof) shall apply with respect to life insurance companies.

(2) *Alternative tax in case of capital gains for taxable years beginning after December 31, 1961.* For taxable years beginning after December 31, 1961, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). The alternative tax is the sum of:

(i) A partial tax, computed as provided by section 802(a)(1), on the life insurance company taxable income determined by reducing the taxable investment income, and the gain from operations, by the amount of the excess of its net long-term capital gain over its net short-term capital loss, and

(ii)*(a)* In the case of a taxable year beginning before January 1, 1970, an amount equal to 25 percent of such excess, or

(b) In the case of a taxable year beginning after December 31, 1969, an amount determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201–1 on such excess.

In the computation of the partial tax, the deductions provided by sections 170 (as modified by section 809(a)(3)), 243, 244, 245 (as modified by sections 804 (a)(5) and 809(d)(8)(B)), and the limitation provided by section 809(f), shall not be recomputed as a result of the reduction of taxable investment income, and gain from operations, by the amount of such excess. Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization and treatment thereof) shall apply with respect to life insurance companies.

(g) *Foreign life insurance companies.* Foreign life insurance companies not carrying on an insurance business within the United States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

(h) *Assessment and collection of tax imposed.* All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of sections 801 to 820, inclusive, are applicable to the assessment and collection of the tax imposed by section 802(a), and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(i) *Illustration of principles.* The provisions of section 802(a), other than paragraph (3) thereof, and this section may be illustrated by the following example:

Example. For the taxable year 1959, T, a life insurance company, has life insurance company taxable income of $300,000 (including $25,000 of net short-term capital gain) and $80,000 of net long-term capital gain. The tax of T under section 802(a) for 1959 is $170,500 ($90,000 normal tax, $60,500 surtax, and $20,000 capital gains tax) computed as follows:

COMPUTATION OF NORMAL TAX	
Life insurance company taxable income	$300,000
Normal tax (30% of $300,000)	90,000
COMPUTATION OF SURTAX	
Life insurance company taxable income	$300,000
Less: Exemption from surtax	25,000
Excess of life insurance company taxable income subject to surtax	275,000
Surtax (22% of $275,000)	60,500
COMPUTATION OF CAPITAL GAINS TAX	
Excess of net long-term capital gain over net short-term capital loss	$80,000
Capital gains tax (25% of $80,000)	20,000

(j) *Cross reference.* In the case of a taxable year of a life insurance company ending after December 31, 1963, for which an election under section 1562(a)(1) by a controlled group of corporations is effective, the additional tax imposed by section 1562 may apply. See section 1562 and the regulations thereunder.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960, as amended by T.D. 6845, 30 FR 9740, Aug. 5, 1965; T.D. 6886, 31 FR 8685, June 23, 1966; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

§ 1.802–4 Life insurance company taxable income.

(a) *Life insurance company taxable income defined.* Section 802(b) defines the term *life insurance company taxable income,* for purposes of part I, subchapter L, chapter 1 of the Code, as the sum of:

(1) The taxable investment income (as defined in section 804), or, if smaller, the gain from operations (as defined in section 809),

(2) If the gain from operations exceeds the taxable investment income, an amount equal to 50 percent of such excess, plus

(3) The amount subtracted from the policyholders surplus account for the taxable year, as determined under section 815.

If for any taxable year there is a loss from operations (as defined in section 809(b)(2)), the amount taken into account under paragraphs (1) and (2) of section 802(b) and subparagraphs (1) and (2) of this paragraph shall be zero. However, even in such a case, there may still be an amount includible in life insurance company taxable income (and hence an amount subject to tax) by reason of an amount includible under section 802(b)(3) and subparagraph (3) of this paragraph.

(b) *Illustration of principles.* The provisions of section 802(b) and this section may be illustrated by the following examples:

Example 1. For the taxable year 1959, Y, a life insurance company, has taxable investment income of $250,000, and a gain from operations of $175,000. Y made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, Y has life insurance company taxable income of $175,000.

Example 2. The facts are the same as in example 1 except that for the taxable year 1959, Y has a gain from operations of $400,000. For the taxable year 1959, Y has life insurance company taxable income of $325,000, computed by adding taxable investment income ($250,000) and 50 percent ($75,000) of the amount ($150,000) by which the gain from operations ($400,000) exceeds the taxable investment income ($250,000).

Example 3. For the taxable year 1959, W, a life insurance company, has taxable investment income of zero (0) and a gain from operations of $90,000. W made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, W has life insurance company taxable income of $45,000, computed by adding taxable investment income (0) and 50 percent ($45,000) of the amount ($90,000) by which the gain from operations ($90,000) exceeds the taxable investment income (0).

Example 4. For the taxable year 1961, Z, a life insurance company, has taxable investment income of $100,000, a policyholders surplus account of $50,000 as of the beginning of such taxable year, a loss from operations (as defined in section 809(b)(2)) of $25,000, and subtractions from the policyholders surplus account in the amount of $20,000. For the taxable year 1961, Z has life insurance company taxable income of $20,000, as only the amount ($20,000) subtracted from the policyholders surplus account is taken into account.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960]

§ 1.802–5 Special rule for 1959 and 1960.

(a) *Transitional rule.* Section 802(a)(3) provides a transitional rule for the determination of the tax liability of a life insurance company for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3). Except as limited by section 802(a)(3) and paragraph (b) of this section, any increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) is taken into account only to the extent of one-third and two-thirds for the taxable years 1959 and 1960, respectively. To the extent there is an increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the transitional rule provided by section 802(a)(3) and this paragraph, such amounts shall be included in ''other accounts'' under section 815(a)(3). For taxable years commencing after December 31, 1960, the full amount of any increase in tax due to the operation of section 802(b)(3) shall be imposed without any further transitional reduction.

(b) *Limitations.* The transitional rule provided by section 802(a)(3) is limited solely to an increase in tax under section 802(b)(3) that is occasioned by the operation of section 815(c)(3) (relating to subtractions from the policyholders surplus account by reason of distributions to shareholders). This rule is further limited to actual distributions that are made by life insurance companies in 1959 or 1960 and does not extend to other distributions that are treated under section 815(d)(2)(B) as made by life insurance companies in 1959 or 1960. Furthermore, section 802(a)(3) shall not apply to any increase in tax under section 802(b)(3) that is attributable to other subtractions from the policyholders surplus account by reason of the operation of the special rules contained in section 815(d). However, the transitional rule provided by section 802(a)(3) does apply in the case of a distribution to which section 815(e)(1)(B)(ii) applies.

(c) *Illustration of principles.* The provisions of section 802(a)(3) and this section may be illustrated by the following example:

Example. For the taxable year 1960, X, a life insurance company, had taxable investment income of $9,000, gain from operations of $27,000, and subtractions from the policyholders surplus account of $22,000. Based upon these figures, X had life insurance company taxable income of $40,000 for 1960, of which $18,000 was includible under section 802(b) (1) and (2) and $22,000 under section 802(b)(3). Applying the tax imposed by section 802(a)(1) (at rates as in effect for 1960), without regard to the transitional rule of section 802(a)(3), X would have a tax liability of $15,300 ($40,000 multiplied by 52 percent, less $5,500). However, applying the transitional rule of section 802(a)(3), the actual tax liability of X, for 1960, would be $12,000, computed as follows:

(1) Total tax liability (without regard to sec. 802(a)(3))		$15,300
(2) Life insurance company taxable income	$40,000	
(3) Amount subtracted from policyholders surplus account	22,000	
(4) Item (2) less item (3)	18,000	
(5) Tax on amount includible under sec. 802(b) (1) and (2) (30% of $18,000)		5,400
(6) Tax attributable to sec. 802(b)(3) (item (1) less item (5))		9,900
(7) Less: 33 1/3 percent of tax attributable to sec. 802(b)(3) (1/3 of $9,900)		3,300
(8) Tax liability for 1960 after application of sec. 802(a)(3) (item (1) less item (7))		12,000

[T.D. 6513, 25 FR 12659, Dec. 10, 1960]

§1.803–1 Life insurance reserves.

(a) The term ‘‘life insurance reserves’’ is defined in section 803(b). Generally, such reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. In the case of cancellable health and accident policies and similar cancellable contracts, the unearned premiums held to cover the risk for the unexpired period covered by the premiums are not included in life insurance reserves. Unpaid loss reserves for noncancellable health and accident policies are included in life insurance reserves if they are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest.

(b) In the case of an assessment life insurance company or association, life insurance reserves include sums actually deposited by such company or association with State or Territorial officers pursuant to law as guaranty or reserve funds, and any funds maintained under the charter or articles of incorporation or association of such company or association, or bylaws (approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

(c) Life insurance reserves, except as otherwise provided in section 803(b), must be required by law either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute but such requirement, without more, is not conclusive; for example, life insurance reserves do not include reserves required to be maintained to provide for the ordinary running expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage; nor do they include the net value of risks reinsured in other solvent companies; liability for premiums paid in advance; liability for annual and deferred dividends declared or apportioned; liability for dividends left on deposit at interest; liability for accrued but unsettled policy claims whether known or unreported; liability for supplementary contracts not involving, at the time with respect to which the liability is computed, life, health, or accident contingencies.

(d) In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. Only reserves which are required by law or insurance department ruling, which are peculiar to insurance companies, and which are dependent upon interest earnings for their maintenance will, except as otherwise specifically provided in section 803(b), be considered as life insurance reserves. A company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held.

(e) In the case of life insurance companies issuing policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, it is required that reserve funds thereon be based upon recognized mortality or morbidity tables covering disability benefits of the kind contained in policies issued by this particular class of companies but they need not be required by law.

§1.803–2 Adjusted reserves.

For the purpose of determining ‘‘required interest’’ for taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, certain reserves computed on a preliminary term method are to be adjusted by increasing such reserves by 7 percent. The reserves to be thus adjusted are reserves computed on preliminary term methods, such as the Illinois Standard, or the Select and Ultimate methods. Only reserves on policies in the modification period are to be so adjusted. Where reserves under a preliminary term method are the same as on the level premium method, and in the case of reserves for extended or paid-up insurance, no adjustment is to be made. The reserves are thus adjusted, and the rate of interest on which they are computed, should be reported in Schedule A, Form 1120L.

§1.803–3 Interest paid or accrued.

Interest paid or accrued is one of the elements to be used in computing the amount of ‘‘required interest’’ for purposes of determining the reserve interest credit provided in section 805. See §1.805–1. Interest paid or accrued consists of (a) interest paid or accrued on indebtedness (except indebtedness incurred or continued to purchase or carry tax-exempt securities as set forth in section 803(f)(1)) and (b) amounts in the nature of interest paid or accrued on certain contracts, as provided in section 803(f)(2). Interest on indebtedness includes interest on dividends held on deposit and surrendered during the taxable year but does not include interest paid or accrued on deferred dividends. Life insurance reserves as defined in §1.803–1 are not indebtedness. Dividends left with the company to accumulate at interest are a debt and not a reserve liability. Amounts in the nature of interest include so-called excess-interest dividends as well as guaranteed interest paid or accrued within the taxable year on insurance or annuity contracts (or contracts arising out of insurance or annuity contracts) which, at the time of payment, do not involve life, health, or accident contingencies. It is immaterial whether the optional mode of settlement specified in the insurance or annuity contract arises from an option exercised by the insured during his or her lifetime or from an option exercised by a beneficiary after the policy has matured, frequently referred to as a supplementary contract not involving life contingencies; for example, a contract to pay the insurance benefit in 10 annual installments. No distinction is made based on the person choosing the method of payment, and the full amount of the interest paid or accrued and not merely the guaranteed interest is considered as interest paid or accrued.

§1.803–4 Taxable income and deductions.

(a) *In general.* The taxable income of a life insurance company is its gross amount of income received or accrued during the taxable year from interest, dividends, and rents, less the deductions provided in section 803(g) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, and the special deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a life insurance company provided in section 803(h), the limitations on the adjustment for amortization of premium and accrual of discount provided in section 803(i), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 803(g)(2), life insurance companies are subject to the limitations on deductions relating to wholly tax-exempt income provided in section 265. Life insurance companies are not entitled to the net operating loss deduction provided in section 172.

(b) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross income of a life insurance company by section 803(a)(2) is allowed as a deduction from gross income by section 803(g)(1).

(c) *Investment expenses.* (1) As used in the Code, the term *general expenses* means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. Any assignment of such expense to the investment department of the company for which a deduction is claimed under section 803(g)(2) subjects the entire deduction for investment expenses to the limitation provided in that section. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes.

(2) If no general expenses are assigned to or included in investment expenses the deduction may consist of investment expenses paid or incurred during the taxable year in which case an itemized schedule of such expenses must be appended to the return.

(3) Invested assets for the purpose of section 803(g)(2) and this section are those which are owned and used, and to the extent used, for the purpose of producing the income specified in section 803(a)(2). They do not include real estate owned and occupied, and to the extent owned and occupied, by the company. If general expenses are assigned to or included in investment expenses, the maximum allowance will not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses.

(d) *Taxes and expenses with respect to real estate.* The deduction for taxes and expenses under section 803(g)(3) includes taxes and expenses paid or accrued during the taxable year exclusively upon or with respect to real estate owned by the company and any sum representing taxes imposed upon a shareholder of the company upon his interest as shareholder which is paid or accrued by the company without reimbursement from the shareholder. No deduction shall be allowed, however, for taxes, expenses, and depreciation upon or with respect to any real estate owned by the company except to the extent used for the purpose of producing investment income. See paragraph (c) of this section. As to real estate owned and occupied by the company, see §1.803–5.

(e) *Depreciation.* The deduction allowed for depreciation is, except as provided in section 803(h), identical with that allowed other corporations by section 167. The amount allowed by section 167 in the case of life insurance companies is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 803(a)(2).

§ 1.803–5 Real estate owned and occupied.

The amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a life insurance company is limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

§ 1.803–6 Amortization of premium and accrual of discount.

(a) Section 803(i) provides for certain adjustments on account of amortization of premium and accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases, and for accrual of discount increases, (1) the gross income, (2) the deduction for wholly tax-exempt interest, and (3) the deduction for partially tax-exempt interest.

(b) The premium for any such security is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, then its fair market value. The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest call date specified therein as a day certain, the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(c) The adjustments for amortization of premium and accrual of discount will be determined:

(1) According to the method regularly employed by the company, if such method is reasonable, or

(2) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed ‘‘regularly employed’’ by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(d) The method of amortization and accrual prescribed by this section is as follows:

(1) The premium (or discount) shall be determined in accordance with this section; and

(2) The appropriate amortization of premium (or accrual of discount) attributable to the taxable year shall be an amount which bears the same ratio to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For the purpose of this section, a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered as a month.

§1.803–7 Taxable years affected.

Sections 1.803–1 through 1.803–6 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments.

[T.D. 6513, 25 FR 12660, Dec. 10, 1960]

INVESTMENT INCOME

§1.804–3 Gross investment income of a life insurance company.

(a) *Gross investment income defined.* For purposes of part I, subchapter L, chapter 1 of the Code, section 804(b) defines the term *gross investment income* of a life insurance company as the sum of the following:

(1) The gross amount of income from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in §1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(ii) Dividends, as described in §1.61–9.

(iii) Rents and royalties, as described in §1.61–8.

(iv) The entering into of any lease, mortgage, or other instrument or agreement from which the life insurance company may derive interest, rents, or royalties.

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph.

For example, gross investment income includes amounts received as commitment fees, as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage.

(2) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), and

(3) The gross income from any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner.

(b) *No double inclusion of income.* In computing the gross income from any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, any item described in section 804(b)(1) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business or partnership, but shall be taken into account under section 804(b)(1) and paragraph (a)(1) of this section.

(c) *Exclusion of net long-term capital gains.* Any net long-term capital gains from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the gross investment income of a life insurance company. However, section 804(b)(2) and paragraph (a)(2) of this section provide that the amount (if any) by which the net short-term capital gain exceeds the net long-term capital loss shall be included in the gross investment income of a life insurance company.

[T.D. 6513, 25 FR 12661, Dec. 10, 1960]

§1.804–4 Investment yield of a life insurance company.

(a) *Investment yield defined.* Section 804(c) defines the term ‘‘investment yield’’ of a life insurance company for purposes of part I, subchapter L, chapter 1 of the Code. Investment yield means gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804–3), less the deductions provided in section 804(c) and paragraph (b) of this section for investment expenses, real estate expenses, depreciation, depletion, and trade or business (other than an insurance business) expenses. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162, and under section 265, no deduction is allowable for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from taxation under chapter 1 of the Code. A deduction shall not be permitted with respect to the same item more than once.

(b) *Deductions from gross investment income*—(1) *Investment expenses.* (i) Section 804(c)(1) provides for the deduction of investment expenses by a life insurance company in determining investment yield. ''Investment expenses'' are those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a life insurance company for which a deduction is claimed under section 804(c)(1) subjects the entire deduction for investment expenses to the limitation provided in that section and subdivision (iii) of this subparagraph. As used in section 804(c)(1), the term *general expenses* means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if real estate taxes, depreciation, or other expenses attributable to office space owned by the company and utilized by it in connection with its investment function are assigned to investment expenses, such items shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. Similarly, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expenses are allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 804(c)(1)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any. In cases where the investment expenses allowable as deductions under section 804(c)(1) exceed the limitation contained therein, see section 809(d)(9).

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 804(c)(1) shall not exceed the sum of:

(a) One-fourth of one percent of the mean of the assets (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805–5) held at the beginning and end of the taxable year,

(b) The amount of the mortgage service fees for the taxable year, plus

(c) Whichever of the following is the greater:

(1) One-fourth of the amount by which the investment yield (computed without any deduction for investment expenses allowed by section 804(c)(1)) exceeds 3 3/4 percent of the mean of the assets (as defined in section 805(b)(4)) held at the beginning and end of the

taxable year, reduced by the amount of the mortgage service fees for the taxable year, or

(2) One-fourth of one percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees for the taxable year. For purposes of the preceding sentence, the term *mortgages held* refers to mortgages, and other similar liens, on real property which are held by the company as security for ''mortgage loans''.

For purposes of section 804(c)(1)(B) and (C)(i) and (*b*) and (*c*)(*1*) of this subdivision, the term *mortgage service fees* includes mortgage origination fees. Such mortgage origination fees shall be amortized in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(iv) The operation of the limitation contained in section 804(c)(1) and subdivision (iii) of this subparagraph may be illustrated by the following example:

Example. The books of S, a life insurance company, reflect the following items for the taxable year 1958:

Investment expenses (including general expenses assigned to or included in investment expenses)	$125,000
Mean of the assets held at the beginning and end of the taxable year	20,000,000
Mortgage service fees	25,000
Investment yield computed without regard to investment expenses	1,200,000
Mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees	6,000,000

In order to determine the limitation on investment expenses, S would make up the following schedule:

1. Mean of the assets held at the beginning and end of the taxable year	$20,000,000	
2. One-fourth of 1 percent of item 1 (1/4 of 1% of $20,000,000)	50,000	
3. Mortgage service fees	25,000	
4. The greater of (a) or (b):		
(a)(i) Investment yield computed without regard to investment expenses	$1,200,000	
(ii) Three and three-fourths percent of item 1 (3 3/4% × $20,000,000)	750,000	
(iii) Excess of (i) over (ii) ($1,200,000 minus $750,000)	450,000	
(iv) One-fourth of (iii) (1/4 × $450,000)	112,500	
(v) Less: Mortgage service fees (item 3)	25,00	
(vi) Excess of (iv) over (v) ($112,500 minus $25,000)	87,500	
(b) One-fourth of 1 percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees (1/4 of 1% × $6,000,000)	15,000	
5. The greater of item 4 (a) or (b)		87,500
6. Limitation on investment expenses (items 2, 3, and 4(a))		162,500

As the investment expenses (including general expenses assigned to or included in investment expenses) of S for the taxable year 1958 ($125,000) do not exceed the limitation on such expenses ($162,500), S would be entitled to deduct the entire $125,000 under section 804(c)(1).

(2) *Real estate expenses and taxes.* The deduction for expenses and taxes under section 804(c)(2) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 804(c)(2) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 804(c)(2) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See subparagraph (4) of this paragraph for limitation of such deduction.

(3) *Depreciation.* The deduction allowed for depreciation is, except as provided in section 804(c)(3) and subparagraph (4) of this paragraph, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining investment yield is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). An election with respect to any of the methods of depreciation provided in section 167 shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). However, in appropriate cases, the method of depreciation may be changed with the

consent of the Commissioner. See section 167(e) and § 1.167(e)–1. See subparagraph (4) of this paragraph for limitation of such deduction. See section 809(d)(12) and the regulations thereunder for the treatment of depreciable property used in the operation of a life insurance business.

(4) *Limitation on deductions allowable under section 804 (c)(2) and (c)(3).* Section 804(c)(3) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied for insurance purposes in whole or in part by a life insurance company shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, T, a life insurance company, owns a twenty-story downtown home office building. The rental value of each floor of the building is identical. T rents nine floors to various tenants, one floor is utilized by it in operating its investment department, and the remaining ten floors are occupied by it in carrying on its insurance business. Since floor space equivalent to eleven-twentieths, or 55 percent, of the rental value of the entire property is owned and occupied for insurance purposes by the company, the deductions allowable under section 804(c)(2) and (3) for taxes, depreciation, and other real estate expenses shall be limited to nine-twentieths, or 45 percent, of the taxes, depreciation, and other real estate expenses on account of the entire property. However, the portion of such allowable deductions attributable to the operation of the investment department (one-twentieth, or 5 percent) may be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitations of section 804(c)(1). Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company in carrying on its insurance business, together with the respective rental values thereof, must be shown in a schedule accompanying the return.

(5) *Depletion.* The deduction for depletion (and depreciation) provided in section 804(c)(4) is identical to that allowed other corporations by section 611. The amount allowed by section 611 in the case of a life insurance company is limited to depletion (and depreciation) sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). See section 611 and § 1.611–5 for special rules relating to the depreciation of improvements in the case of mines, oil and gas wells, other natural deposits, and timber.

(6) *Trade or business deductions.* (i) Under section 804(c)(5), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner are, subject to the limitations in subdivisions (ii), (iii), and (iv) of this subparagraph, allowable as deductions from the gross investment income of a life insurance company in determining its investment yield. Such deductions are allowable, however, only to the extent that they are attributable to the production of income which is included in the life insurance company's gross investment income by reason of section 804(b)(3). However, since any interest, dividends, rents, and royalties received by any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, is included in the life insurance company's gross investment income by reason of section 804(b)(1) and paragraph (b) of § 1.804–3, any expenses fairly chargeable against the production of such income may be deductible under section 804(c) (1), (2), (3), or (4). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 804(c)(5), there shall be excluded losses:

(a) From (or considered as from) sales or exchanges of capital assets,

(b) From sales or exchanges of property used in the trade or business (as defined in section 1231(b)), and

(c) From the compulsory or involuntary conversion (as a result of destruction, in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of property used in the trade or business (as so defined).

(iii) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if a life insurance company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(iv) The deduction for net operating losses provided in section 172, and the special deductions for corporations provided in part VIII, subchapter B, chapter 1 of the Code, shall not be allowed.

[T.D. 6513, 25 FR 12662, Dec. 10, 1960]

§1.806–1 Adjustment for certain reserves.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, a life insurance company writing contracts other than life insurance or annuity contracts (either separately or combined with noncancellable health and accident insurance contracts) must add to its life insurance company taxable income (as a factor in determining 1954 adjusted taxable income) an amount equal to eight times the amount of the adjustment for certain reserves provided in paragraph (b) of this section.

(b) The adjustment for certain reserves referred to in paragraph (a) of this section shall be an amount equal to 3 1/4 percent of the mean of the unearned premiums and unpaid losses at the beginning and end of the taxable year on such other contracts as are not included in life insurance reserves. If such unearned premiums, however, are less than 25 percent of the net premiums written during the taxable year on such other contracts, then the adjustment shall be 3 1/4 percent of 25 percent of the net premiums written during the taxable year on such other contracts plus 3 1/4 percent of the mean of the unpaid losses at the beginning and end of the taxable year on such other contracts. As used in this section, the term ‘‘unearned premiums’’ has the same meaning as in section 832(b)(4) and§1.832–1.

§1.806–2 Taxable years affected.

Section 1.806–1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.806–3 and 1.806–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6513, 25 FR 12668, Dec. 10, 1960]

§1.806–3 Certain changes in reserves and assets.

(a) *In general.* For purposes of part I, subchapter L, chapter 1 of the Code, section 806(a) provides that if there is a change in life insurance reserves (as defined in section 801(b)), during the taxable year, which is attributable to the transfer between the taxpayer and another person of liabilities under contracts taken into account in computing such life insurance reserves, then the means of such reserves, and the mean of the assets, shall be appropriately adjusted to reflect the amounts involved in such transfer. For example, the adjustments required under section 806(a) are applicable to transfers in which one life insurance company purchases or acquires a part or all of the business of another life insurance company under an arrangement whereby the purchaser or transferee becomes solely liable on the contracts transferred. This provision shall apply in the case of assumption reinsurance but not in the case of indemnity reinsurance or reinsurance ceded. Thus, no adjustments shall be required under section 806(a) when, in the ordinary course of business, an indemnity reinsurance contract is entered into with another company (on a yearly renewable term basis, on a coinsurance basis, or otherwise) whereby there is a sharing of risks under one or more individual contracts. It will be necessary for each life insurance company participating in a transfer described in section 806(a) to make the adjustments required by such section. Such adjustments shall be made without regard to whether or not the transferor of the liabilities was the original insurer.

(b) *Manner in which adjustments shall be made*—(1) *Daily basis.* The means of the life insurance reserves, and the mean of the assets, shall be appropriately adjusted, on a daily basis, to reflect the amounts involved in a transfer described in section 806(a) and paragraph (a) of this section. The transferor and the transferee shall be treated as having held such life insurance reserves and assets for a fraction of the year in which the transfer occurs.

(2) *Determination of period held.* In determining the fraction which represents the fractional year that such reserves and assets were held, the numerator shall be the number of days during the taxable year which such reserves and assets were actually held, and the denominator shall be the number of days in the calendar year of the transfer. In computing the period held for purposes of the numerator, the day on which such reserves and assets are transferred is included by the transferor and excluded by the transferee.

(3) *Adjustments to the means of life insurance reserves and assets not transferred.* All life insurance reserves and assets transferred during the taxable year, within the meaning of section 806(a), shall be excluded from the beginning and end of the taxable year balances of the transferor and transferee, respectively. The amount of assets to be excluded from the beginning of the taxable year balance of the transferor shall be an amount equal to the value of such reserves at the beginning of the taxable year. The amount of assets to be excluded from the end of the taxable year balance of the transferee shall be an amount equal to the value of such reserves at the end of the taxable year. The means of the life insurance reserves and assets not so transferred shall be determined in the ordinary manner, that is, the arithmetic means. There shall be added to these means an amount to appropriately adjust them, on a daily basis, for the life insurance reserves and assets that were transferred during the taxable year. This adjustment shall be determined by multiplying (i) the mean of the transferred life insurance reserves (or assets, as the case may be) at the beginning of the taxable year (or, if acquired later, at the beginning of the period held as defined in subparagraph (2) of this paragraph) and the end of the period held as defined in subparagraph (2) of this paragraph (or at the end of the taxable year, if held at such time) by (ii) the fraction determined under subparagraph (2) of this paragraph.

(4) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. On March 14, 1958, the M Company, a life insurance company, transferred to the N Company, a life insurance company, pursuant to an assumption reinsurance agreement, all of its life insurance reserves, and related assets, on one block of policies. The reserves (and assets) for this block were held by the M Company on January 1, 1958, and totaled $60,000; on March 14, the reserves (and assets) totaled $64,000. The M Company had life insurance reserves of $1,000,000 at the beginning of 1958 (including those subsequently transferred) and $1,040,000 at the end of 1958. The M Company had assets of $1,300,000 at the beginning of 1958 (including those subsequently transferred) and $1,380,000 at the end of 1958. The mean of M's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1–1–58	$1,000,000	
Exclude reserves (at beginning of year) on contracts transferred to N	60,000	
Recomputed amount at 1–1–58		$940,000
Reserves at 12–31–58		1,040,000
Sum		1,980,000
Mean		990,000
Adjustment for reserves transferred on 8–14–58:		
Reserves at 1–1–58 on contracts transferred to N	$60,000	
Reserves at 3–14–58 on such contracts	64,000	

Sum	124,000	
Mean	62,000	
Fraction taken into account	73/365	
Adjustment (73/365×$62,000)		$12,400
Mean of M's life insurance reserves after section 806(a) adjustment		1,002,400

Example 2. Assuming the facts to be the same as in example 1, the mean of M's assets for the taxable year 1958 is computed as follows:

Assets at 1–1–58	$1,300,000	
Exclude assets (at beginning of year) on contracts transferred to N	60,000	
Recomputed amount at 1–1–58		$1,240,000
Assets at 12–31–58		1,380,000
Sum		2,620,000
Mean		1,310,000
Adjustments for assets transferred on 3–14–58:		
Assets at 1–1–58 on contracts transferred to N	$60,000	
Assets at 3–14–58 on such contracts	64,000	
Sum	124,000	
Mean	62,000	
Fraction taken into account	73/365	
Adjustment (73/365×$62,000)–		$12,400
Mean of M's assets after section 806(a) adjustment		1,322,400

Example 3. Assume the facts are the same as in example 1. At the end of 1958, N Company had life insurance reserves (and assets) of $80,000 on the contracts transferred on March 14, 1958. The N Company had life insurance reserves of $6,000,000 at the beginning of 1958 and $6,400,000 at the end of 1958 (including those transferred). The N Company had assets of $6,800,000 at the beginning of 1958 and $7,300,000 at the end of 1958 (including those on the contracts transferred). The mean of N's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1–1–58		$6,000,000
Reserves at 12–31–58	$6,400,000	
Exclude reserves (at end of year) on contracts transferred from M	80,000	
Recomputed amount at 12–31–58		6,320,000
Sum		12,320,000
Mean		6,160,000
Adjustment for reserves transferred on 3–14–58:		
Reserves at 3–14–58 on contracts transferred from M	$64,000	
Reserves at 12–31–58 on such contracts	80,000	
Sum	144,000	
Mean	72,000	
Fraction taken into account	292/365	
Adjustment (292/365×$72,000)		57,600
Mean of N's life insurance reserves after section 806(a) adjustment		6,217,600

Example 4. Assuming the facts to be the same as in example 3, the mean of N's assets for the taxable year 1958 is computed as follows:

Assets at 1–1–58		$6,800,000
Assets at 12–31–58	$7,300,000	
Exclude assets (at end of year) on contracts transferred from M	80,000	
Recomputed amount at 12–31–58		7,220,000
Sum		14,020,000
Mean		7,010,000
Adjustments for assets transferred on 3–14–58:		
Assets at 3–14–58 on contracts transferred from M	$64,000	
Assets at 12–31–58 on such contracts	80,000	
Sum	144,000	
Mean	72,000	
Fraction taken into account	292/365	
Adjustment (292/365×$72,000)		$57,600
Mean of N's assets after section 806(a) adjustment		7,067,600

Example 5. The facts are the same as in example 1, except that on October 19, 1958, company N transfers to company P, a life insurance company, all of the life insurance reserves, and related assets, on the block of policies it had received from company M on March 14, 1958. The reserves (and assets) for this block totaled $76,000 on October 19, 1958. The means of company M's life insurance reserves and assets, as computed in examples 1 and (2), respectively, would be unchanged by the transfer of October 19, 1958. Since company N did not own this block of policies at either the beginning or end of the taxable year, it would not have to recompute its beginning or end of the taxable year reserves or assets. Company N will, however, have to adjust (or increase) the mean of its life insurance reserves and assets on account of the policies it received from company M. This adjustment will be $42,000, which is determined by multiplying the means of the life insurance reserves (or assets) on these policies as of March 15, 1958, and October 19, 1958, $70,000 ($64,000+$76,000=$140,000÷2) by the fraction 219/365 (the numerator of 219 is determined by excluding the day of the transfer to N, March 14, 1958, and including the day of the transfer from N to P, October 19, 1958). Company P will have to recompute its end of the year life insurance reserves and assets (in the same manner as illustrated in examples 3 and 4). Assuming the end of the year

reserves (and assets) on this block of policies is $80,000, company P will have an adjustment under section 806 (a) of $15,600, which is determined by multiplying the means of the reserves on these policies as of October 20, 1958, and December 31, 1958, $78,000 ($76,000+$80,000= $156,000÷2) by the fraction 73/365.

[T.D. 6513, 25 FR 12663, Dec. 10, 1960]

§ 1.806–4 Change of basis in computing reserves.

(a) *In general.* For purposes of subpart B, part I, subchapter L, chapter 1 of the Code, section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) (relating to items taken into account) as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then in determining taxable investment income the amount of the item as of the close of the taxable year shall be the amount computed on the old basis, and the amount of the item as of the beginning of the next taxable year shall be the amount computed on the new basis. For purposes of the preceding sentence, an election under section 818(c) shall not be treated as a change in basis for determining the amount of an item referred to in section 810(c). A change of basis in computing any of the items referred to in section 810(c) is not a change of accounting method requiring the consent of the Secretary or his delegate under section 446(e).

(b) *Illustration of change of basis in computing reserves.* The application of section 806(b) and paragraph (a) of this section may be illustrated by the following examples:

Example 1. Assume that the life insurance reserves of Y, a life insurance company, at the beginning of the taxable year 1959 are $100 and that during such taxable year a portion of the reserves is strengthened (by reason of a change in mortality or interest assumptions, or otherwise), so that at the end of the taxable year 1959 the reserves (computed on the new basis) are $130 but computed on the old basis would be $120. Assume further that at the close of the next taxable year, 1960, the reserves (computed on the new basis) are $142. Under the provisions of section 806(b) and paragraph (a) of this section, the mean of such reserves for the taxable year of the reserve strengthening, namely 1959, is $110 (the mean of $100, the balance at the beginning of the taxable year 1959, and $120, the balance at the end of the taxable year 1959 computed on the old basis). The mean of such reserves for the next taxable year, 1960, is $136 (the mean of $130, the balance at the beginning of the taxable year 1960 computed on the new basis, and $142, the balance at the end of the taxable year 1960 computed on the new basis).

Example 2. The life insurance reserves of S, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to $50 on January 1, 1959, and $80 on December 31, 1959. For the taxable year 1959, S elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to $60 on January 1, 1959, and $96 on December 31, 1959. Under the provisions of paragraph (a) of this section, the mean of such reserves for the taxable year 1959 is $78 (the mean of $60, the balance at the beginning of the taxable year 1959 computed under section 818(c), and $96, the balance at the end of the taxable year 1959 computed under section 818(c).

[T.D. 6513, 25 FR 12669, Dec. 10, 1960]

§ 1.807–1 Mortality and morbidity tables.

(a) *Tables to be used.* If there are no commissioners' standard tables applicable to an insurance contract when the contract is issued, then the mortality and morbidity tables set forth in this subsection are used to compute reserves under section 807(d)(2) for the contract.

Type of Contract	Table
1. Group term life insurance (active life reserves).	1960 Commissioners' Standard Group Mortality Table.
2. Group life insurance (active life reserves); accidental death benefits.	1959 Accidental Death Benefits Table.
3. Permanent and paid-up group life insurance (active life reserves).	Same table as are applicable to males for ordinary life insurance.
4a. Group life insurance disability income benefits (active life reserves).	The tables of period 2 disablement rates and the 1930 to 1950 termination rates of the 1952 Disability Study of the Society of Actuaries.
4b. Group life insurance disability income benefits (disabled life reserves).	The 1930 to 1950 termination rates of the 1952 Disability study of the Society of Actuaries.
5. Group life insurance; survivor income benefits insurance.	Same tables as are applicable to group annuities.
6. Group life insurance; extended death benefits for disabled lives.	1970 Intercompany Group life Disability Valuation Table.
7. Credit life insurance	1958 Commissions' Extended Term Table.

Type of Contract	Table
8. Supplementary contracts involving life contingencies.	Same tables as are applicable to individual immediate annuities.
9. Noncancellable accident and health insurance (active life reserves); benefits issued before 1984.	Tables used for NAIC annual statement reserves as of December 31, 1983.
10a. Noncancellable accident and health insurance (active life reserves); group disability benefits issued after 1983 and individual disability benefits issued after 1983 and before 1989.	1964 Commissioners' Disability Tables.
10b. Noncancellable accident and health insurance (active life reserves); individual disability benefits issued after 1988.	1985 Commissioners' Individual Disability Table A or Commissioners' Individual Disability Table B.
11. Noncancellable accident and health insurance (active life reserves); accidental death benefits issued after 1983.	1959 Accidental Death Benefits Tables.
12. Noncancellable accident and health insurance (active life reserves); all benefits issued after 1983 other than disability and accidental death.	Tables used for NAIC annual statement reserves.
13a. Noncancellable accident and health insurance (claim reserves); group disability benefits for all years of issue and individual disability benefits for years before 1989.	1964 Commissioners' Disability Tables.
13b. Noncancellable accident and health insurance (claim reserves); individual disability benefits for years after 1988.	1985 Commissioners' Individual Disability Table A or Commissioners' Individual Disability Table B.
14. Noncancellable accident and health insurance (claim reserves); all benefits other than disability for all years of issue.	Tables used for annual statement reserves.

(b) *Adjustments.* An appropriate adjustment may be made to the tables in paragraph (a) of this section to reflect risks (such as substandard risks) incurred under the contract which are not otherwise taken into account.

(c) *Special rule where more than 1 table or option applicable.* If, with respect to any category of risks, there are 2 or more tables (or options under 1 or more tables) in paragraph (a) of this section, the table (and option thereunder) which generally yields the lowest reserves shall be used to compute reserves under section 807(d)(2) for the contract.

(d) *Effective date.* This section is effective for taxable years beginning after December 31, 1983, except that the 1985 Commissioners' Individual Disability Tables A and B shall be treated (for purposes of section 807(d)(5)(B) and for purposes of determining the issue dates of contracts for which they shall be used) as if the tables were new prevailing commissioners' standard tables adopted by the twenty-sixth State on December 26, 1989.

[T.D. 8278, 54 FR 52934, Dec. 26, 1989; 55 FR 1768, Jan. 18, 1990]

GAIN AND LOSS FROM OPERATIONS

§1.809–1 Taxable years affected.

Sections 1.809 through 1.809–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of June 27, 1961 (75 Stat. 120), the Act of October 10, 1962 (76 Stat. 808); the Act of October 23, 1962 (76 Stat. 1134), and section 214(b)(4) of the Revenue Act of 1964 (78 Stat. 55).

[T.D. 6992, 34 FR 827, Jan. 18, 1969]

§1.809–2 Exclusion of share of investment yield set aside for policyholders.

(a) *In general.* Section 809 provides the rules for determining the gain or loss from operations of a life insurance company, which amount is necessary to determine life insurance company taxable income. In order to determine gain or loss from operations, a life insurance company must first determine the share of each and every item of its investment yield (as defined in section 804(c) and paragraph (a) of §1.804–4) set aside for policyholders (as computed under section 809(a)(1) and paragraph (b) of this section), as this share is excluded from gain or loss from operations (as defined in section 809(b) (1) and (2) and paragraphs (a) and (b) of §1.809–3, respectively). The life insurance company shall then add its share of each and every item of its investment yield to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of §1.809–4). In addition, the life insurance company shall, for taxable years beginning after December 31, 1961, add the amount (if any) by which its net long-term capital gain exceeds its net short-term loss. From the sum so computed (which includes the capital gains item only for taxable years beginning after December 31, 1961) there shall then be subtracted the deductions provided in section 809(d) and paragraph (a) of § 1.809–5. The amount thus obtained is the gain or loss from operations for the taxable year.

(b) *Computation of share of investment yield set aside for policyholders.* Section 809(a)(1) provides that the share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) of any life insurance company set aside for policyholders shall not be included in gain or loss from operations. For this purpose, the percentage used in determining the share of each of these items comprising the investment yield set aside for policyholders shall be determined by dividing the required interest (as defined in section 809(a)(2) and paragraph (d) of this section) by the investment yield (as defined in section 804(c) and paragraph (a) of § 1.804–4). The percentage thus obtained is then applied to each and every item of the investment yield so that the share of each and every item of investment yield set aside for policyholders shall be excluded from gain or loss from operations. However, if in any case the required interest exceeds the investment yield, then the share of any item set aside for policyholders shall be 100 percent.

(c) *Computation of life insurance company's share of investment yield.* For purposes of subpart C, part I, subchapter L, chapter 1 of the Code, section 809(b)(3) provides that the percentage used in determining the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be obtained by subtracting the percentage obtained under paragraph (b) of this section from 100 percent. For example, if the policyholders' percentage (as determined under section 809(a)(1) and paragraph (b) of this section) is 72.38 percent, then the life insurance company's share is 27.62 percent (100 percent minus 72.38 percent). In such a case, if the amount of a particular item is $200, then the life insurance company's share of such item included in determining gain or loss from operations is $55.24 ($200 multiplied by 27.62 percent) and the share of such item set aside for policyholders (which is excluded from gain or loss from operations) is $144.76 ($200 multiplied by 72.38 percent). For purposes of determining gain or loss from operations, the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be added to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of § 1.809–4).

(d) *Required interest defined.* (1) For purposes of part I, section 809(a)(2) defines the term *required interest* for any taxable year as the sum of the products obtained by multiplying (i) each rate of interest required, or assumed by the taxpayer, in calculating the reserves described in section 810(c), by (ii) the means of the amount of such reserves computed at that rate at the beginning and end of the taxable year. In the case of the reserves described in section 810(c)(1), such rate of interest shall be the same as that used by the taxpayer for purposes of paragraph (b) of § 1.801–5 (relating to the definition of reserves required by law) with respect to such reserves. In the case of the reserves described in section 810(c)(2) through (5), such rate of interest shall be the same as that actually paid, credited, or accrued by the taxpayer with respect to such reserves. Thus, the required interest for any taxable year includes the elements of interest paid (as defined in section 805(e)) with respect to the reserves described in section 810(c).

(2) For purposes of computing required interest under section 809(a)(2) and subparagraph (1) of this paragraph, the amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets) before applying the rate of interest required, or assumed by

the taxpayer, thereto. However, in the case of the adjustments required by section 810(d) as a result of a change in the basis of computing reserves, the adjustments to any of the reserves described in section 810(c) shall be taken into account in accordance with the rules prescribed in section 810(d) and §1.810–3.

[T.D. 6535, 26 FR 525, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 23, 1966]

§1.809–3 Gain and loss from operations defined.

(a) *Gain from operations.* For purposes of part I, subchapter L, chapter 1 of the Code, section 809(b)(1) defines the term *gain from operations* as the excess of the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of §1.809–4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, over the sum of the deductions provided by section 809(d) and §1.809–5.

(b) *Loss from operations.* For purposes of part I, section 809(b)(2) defines the term *loss from operations* as the excess of the sum of the deductions provided by section 809(d) and §1.809–5 over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of §1.809–4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss.

(c) *Illustration of principles.* The provisions of section 809(b) (1) through (3) and paragraphs (a) and (b) of this section may be illustrated by the following example:

Example. For the taxable year 1958, T, a life insurance company, had investment yield of $900,000, including $150,000 of dividends received from domestic corporations subject to taxation under chapter 1 of the Code, $10,000 of wholly tax-exempt interest, and $78,000 of partially tax-exempt interest. T also had items of gross amount under section 809(c) in the amount of $12,000,000 and deductions under section 809(d) of $6,963,500 (exclusive of any deductions for wholly tax-exempt interest, partially tax-exempt interest, and dividends received). For such taxable year, the share of each and every item of investment yield set aside for policyholders was 80 percent and the company's share of each and every item of investment yield was 20 percent. Based upon these figures, T had a gain from operations of $5,180,000 for the taxable year 1958, computed as follows:

	Col. 1	Col. 2 (80%×Col. 1) exclusion of policyholder's share	Col. 3 (20%×Col. 1) company's share
Interest wholly tax-exempt	$10,000	$8,000	$2,000
Interest partially tax-exempt	78,000	62,400	15,600
Dividends received ...	50,000	120,000	30,000
Other items of investment yield	662,000	529,600	132,400
Investment yield	900,000	720,000	180,000
Gross amount (sum of items under sec. 809(c))			$12,000,000
Total			12,180,000
Less:			
Deductions under sec. 809(d)(8):			
Company's share of interest wholly tax-exempt		$2,000	
30/52 of company's share of interest partially tax-exempt (30/52 ×$15,600)		9,000	
85% of company's share of dividends received (but not to exceed 85% of gain from operations as computed under sec. 809(d)(8)(B)) (85%×$30,000)		25,500	
All other deductions under sec. 809(d)		6,963,500	
			7,000,000
Gain from operations			5,180,000

(d) *Exception.* (1) In accordance with section 809(b)(4), if it is established in any case to the satisfaction of the Commissioner, or by a determination of The Tax Court of the United States, or of any other court of competent jurisdiction, which has become final, that the application of the definition of gain from operations contained in section 809(b)(1) results in the imposition of tax on:

(i) Any interest which under section 103 is excluded from gross income,

(ii) Any amount of interest which under section 242 (as modified by section 804(a)(3)) is allowable as a deduction, or

(iii) Any amount of dividends received which under sections 243, 244, and 245 (as modified by section 809(d)(8)(B)) is allowable as a deduction,

adjustment shall be made to the extent necessary to prevent such imposition.

(2) For the date upon which a decision by the Tax Court becomes final, see section 7481. For the date upon which a judgment of any other court becomes final, see paragraph (c) of § 1.1313(a)–1.

[T.D. 6535, 26 FR 526, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 28, 1966]

§ 1.809–4 Gross amount.

(a) *Items taken into account.* For purposes of determining gain or loss from operations under section 809(b) (1) and (2), respectively, section 809(c) specifies three categories of items which shall be taken into account. Such items are in addition to the life insurance company's share of the investment yield (as determined under section 809(a)(1) and paragraph (c) of § 1.809–2), and the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (such capital gains item is included in determining gain or loss from operations only for taxable years beginning after December 31, 1961). The additional three categories of items taken into account are:

(1) *Premiums.* (i) The gross amount of all premiums and other consideration on insurance and annuity contracts (including contracts supplementary thereto); less return premiums and premiums and other consideration arising out of reinsurance ceded. The term *gross amount of all premiums* means the premiums and other consideration provided in the insurance or annuity contract. Thus, the amount to be taken into account shall be the total of the premiums and other consideration provided in the insurance or annuity contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction as defined in paragraph (a)(7)(ii) of § 1.809–5). The term also includes amounts a life insurance company charges itself representing premiums with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)).

(ii) The term *return premiums* means amounts returned or credited which are fixed by contract and do not depend on the experience of the company or the discretion of the management. Thus, such term includes amounts refunded due to policy cancellations or erroneously computed premiums. Furthermore, amounts of premiums or other consideration returned to another life insurance company in respect of reinsurance ceded shall be included in return premiums. For the treatment of amounts which do not meet the requirements of return premiums, see section 811 (relating to dividends to policyholders).

(iii) For purposes of section 809(c)(1) and this subparagraph, the term *reinsurance ceded* means an arrangement whereby the taxpayer (the reinsured) remains solely liable to the policyholder, whether all or only a portion of the risk has been transferred to the reinsurer. Such term includes indemnity reinsurance transactions but does not include assumption reinsurance transactions. See paragraph (a)(7)(ii) of §1.809–5 for the definition of assumption reinsurance.

(2) *Decreases in certain reserves.* Each net decrease in reserves which is required by section 810 (a) and (d)(1) or 811(b)(2) to be taken into account for the taxable year as a net decrease for purposes of section 809(c)(2).

(3) *Other amounts.* All amounts, not included in computing investment yield and not otherwise taken into account under section 809(c) (1) or (2), shall be taken into account under section 809(c)(3) to the extent that such amounts are includible in gross income under subtitle A of the Code. See section 61 (relating to gross income defined) and the regulations thereunder.

(b) *Treatment of net long-term capital gains.* For taxable years beginning before January 1, 1962, any net long-term capital gains (as defined in section 1222(7)) from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the determination of gain or loss from operations of a life insurance company. On the other hand, with respect to taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (as defined in section 1222(6)) shall be taken into account in determining gain or loss from operations under section 809. However, for any taxable year beginning after December 31, 1958, the excess of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) is included in computing investment yield (as defined in section 804(c)) and, to that extent, is taken into account in determining gain or loss from operations under section 809.

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962, T.D. 6886, 31 FR 8687, June 23, 1966]

§1.809–5 Deductions.

(a) *Deductions allowed.* Section 809(d) provides the following deductions for purposes of determining gain or loss from operations under section 809(b) (1) and (2), respectively:

(1) *Death benefits, etc.* All claims and benefits accrued (less reinsurance recoverable), and all losses incurred (whether or not ascertained), during the taxable year on insurance and annuity contracts (including contracts supplementary thereto). The term *all claims and benefits accrued* includes, for example, matured endowments and amounts allowed on surrender. The term *losses incurred (whether or not ascertained)* includes a reasonable estimate of the amount of the losses (based upon the facts in each case and the company's experience with similar cases) incurred but not reported by the end of the taxable year as well as losses reported but where the amount thereof cannot be ascertained by the end of the taxable year.

(2) *Increases in certain reserves.* The net increase in reserves which is required by section 810 (b) and (d)(1) to be taken into account for the taxable year as a net increase for purposes of section 809(d)(2).

(3) *Dividends to policyholders.* The deduction for dividends to policyholders as determined under section 811(b) and §1.811–2. Except as provided in section 809(d)(3) and this subparagraph, no amount shall be allowed as a deduction in respect of dividends to policyholders under section 809(d). See section 809(f) and §1.809–7 for limitation of such deduction.

(4) *Operations loss deduction.* The operations loss deduction as determined under section 812.

(5) *Certain nonparticipating contracts.* (i) An amount equal to the greater of:

(a) 10 percent of the increase for the taxable year in certain life insurance reserves for nonparticipating contracts (other than group contracts); or

(b) 3 percent of the premiums for the taxable year attributable to nonparticipating contracts (other than group contracts) which are issued or renewed for periods of 5 years or more.

(ii) For purposes of section 809(d)(5) and this subparagraph, the term *nonparticipating contracts* means those contracts which during the taxable year contain no right to participate in the divisible surplus of the company. For example, if at any time during the taxable year for which the deduction allowed under section 809(d)(5) and this subparagraph is claimed such contracts have rights to dividends or similar distributions (as defined in section 811(a) and paragraph (a) of § 1.811–2), such contracts shall no longer be deemed nonparticipating contracts and, therefore, no deduction shall be allowed. Thus, if a class of contracts having no right to participate in the divisible surplus of the company is in force for nine years and on March 10, 1958, it is announced that such contracts shall be accorded dividend rights as of August 1, 1958, no deduction shall be allowed under section 809(d)(5) and this subparagraph for the taxable year 1958 or any succeeding taxable year, whether or not dividends are actually paid on such contracts. However, if the announcement of March 10, 1958, states that such contracts shall be accorded dividend rights as of January 1, 1959, a deduction under section 809(d)(5) and this subparagraph shall be allowed for the taxable year 1958 but not for any succeeding taxable year.

(iii) For purposes of section 809(d)(5) and this subparagraph, the term *reserves for nonparticipating contracts* means such part of the life insurance reserves (as defined in section 801(b) and § 1.801–4), other than that portion of such reserves which is allocable to annuity features, as relates to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph). The amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets). In the case of the adjustments required by section 810(d) (relating to adjustment for change in computing reserves), the increase in life insurance reserves attributable to reserve strengthening shall be taken into account in accordance with the rules prescribed in section 810(d) and § 1.810–3.

(iv) For purposes of section 809(d)(5) and this subparagraph, the term *premiums* means the net amount of the premiums and other consideration attributable to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph) which are taken into account under section 809(c)(1). For this purpose, premiums include only such amounts attributable to such contracts which are issued or renewed for periods of 5 years or more, but does not include that portion of the premiums which is allocable to annuity features. No portion of a premium shall be deemed allocable to annuity features solely because a contract, such as an endowment contract, provides that at maturity the insured shall have an option to take an annuity. The determination of whether a contract meets the 5-year requirement shall be made as of the date the contract is issued, or as of the date it is renewed, whichever is applicable. Thus, a 20-year nonparticipating endowment policy shall qualify for the deduction under section 809(d)(5), even though the insured subsequently dies at the end of the second year, since the policy is issued for a period of 5 years or more. However, a 1-year renewable term contract shall not qualify, since as of the date it is issued (or of any renewal date) it is not issued (or renewed) for a period of 5 years or more. In like manner, a policy originally issued for a 3-year period and subsequently renewed for an additional 3-year period shall not qualify. However, if this policy is renewed for a period of 5 years or more, the policy shall qualify for the deduction under section 809(d)(5) from the date it is renewed.

(v) The provisions of section 809(d)(5) and this subparagraph may be illustrated by the following example:

Example. Assume the following facts with respect to X, a life insurance company, for the taxable year 1958:

Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1–1–58	$150,000
Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12–31–58	225,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 1–1–58	48,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 12–31–58	57,000
Premiums on nonparticipating contracts without annuity features (other than group contracts) issued or renewed for 5 years or more	85,000

Premiums on nonparticipating contracts allocable to annuity features (other than group contracts) issued or renewed for 5 years or more	14,000
Return premiums on nonparticipating contracts without annuity features (other than group contracts)	5,000

In order to determine the deduction under section 809(d)(5) (without regard to the limitation of section 809(f)), X would make up the following schedule:

(1) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12–31–58	$225,000	
(2) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1–1–58	150,000	
(3) Excess of item (1) over item (2) ($225,000 minus $150,000)	75,000	
(4) 10 percent of item (3) (10%×$75,000)		7,500
(5) Net premiums on nonparticipating contracts without annuity features issued or renewed for 5 years or more (other than group contracts) (gross premiums on such contracts ($85,000) minus return premiums ($5,000) on such contracts)	80,000	
(6) 3 percent of item (5) (3%×$80,000)		2,400
(7) The greater of item (4) or item (6)		7,500
(8) Tentative deduction under sec. 809(d)(5) (computed without regard to the limitation of sec. 809(f))		7,500

(vi) See section 809(f) and §1.809–7 for limitation of the deduction provided by this subparagraph.

(6) *Certain accident and health insurance and group life insurance.* (i) For taxable years beginning before January 1, 1963, an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, group accident and health insurance contracts, or group accident and health insurance contracts with a life feature. For taxable years beginning after December 31, 1962, the deduction shall be an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, accident and health insurance contracts (other than those to which section 809(d)(5) applies), or accident and health insurance contracts with a life feature (other than those to which section 809(d)(5) applies). For purposes of section 809(d)(6) and this subparagraph, the term ‘‘premiums’’ means the net amount of the premiums and other consideration attributable to such contracts taken into account under section 809(c)(1). The deduction allowed by section 809(d)(6) and this subparagraph for the taxable year and all preceding taxable years shall not exceed 50 percent of the net amount of the premiums attributable to such contracts for the taxable year. For example, assume that premiums attributable to group life insurance and group accident and health insurance contracts are $103,000 for the taxable year 1962. Assume further that there are $3,000 of return premiums attributable to such contracts for the taxable year. Under the provisions of section 809(d)(6) and this subparagraph, a deduction (determined without regard to section 809(f) of $2,000 (2 percent of $100,000 ($103,000−$3,000)) is allowed. Assuming that the company continues to receive net premiums of $100,000 attributable to such contracts for 15 years, the cumulative amount of these deductions is $30,000 ($2,000 for 15 years). If, in the sixteenth year, net premiums attributable to such contracts amount to $60,000, no deduction shall be allowed under section 809(d)(6) and this subparagraph since the cumulative amount of these deductions ($30,000) equals 50 percent of the current year’s premiums ($60,000) from such contracts.

(ii) In computing the deduction under section 809(d)(6), the determination as to when the 50 percent limitation on such deduction has been reached shall be based upon the amount allowed as a deduction for the taxable year and all preceding taxable years after the application of the limitation provided in section 809(f) and §1.809–7. Thus, if in the example set forth in paragraph (c) of §1.809–7 the application of the limitation provided by section 809(f) limited the deduction allowed for the taxable year under section 809(d)(6) to $3,250,000, then for purposes of determining the 50 percent limitation on such deduction, only $3,250,000 (the amount allowed) shall be taken into account.

(iii) For purposes of determining whether the 50 percent limitation applies to any taxable year, the deduction provided by section 809(d)(6) for all preceding taxable years shall be taken into account, irrespective of whether or not the life insurance company claimed a deduction for these amounts for such preceding taxable years.

(iv) See section 809(f) and § 1.809–7 for limitation of the deduction provided by this subparagraph.

(7) *Assumption by another person of liabilities under insurance, etc., contracts.* (i) The consideration (other than consideration arising out of reinsurance ceded as defined in paragraph (a)(1)(iii) of § 1.809–4) in respect of the assumption by another person of liabilities under insurance and annuity contracts (including contracts supplementary thereto) of the taxpayer.

(ii) For purposes of section 809(d)(7) and this subparagraph, the term *assumption reinsurance* means an arrangement whereby another person (the reinsurer) becomes solely liable to the policyholders on the contracts transferred by the taxpayer. Such term does not include indemnity reinsurance or reinsurance ceded (as defined in paragraph (a)(1)(iii) of § 1.809–4).

(iii) The provisions of section 809(d)(7) and this subparagraph may be illustrated by the following example:

Example. During the taxable year 1958, T, a life insurance company, transferred a block of insurance policies and made a payment of $50,000 to R, a life insurance company, under an arrangement whereby R became solely liable to the policyholders on the policies transferred by T. Under the provisions of section 809(d)(7) and this subparagraph, T is allowed a deduction of $50,000 for the taxable year 1958. For the treatment by R of this $50,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of § 1.809–4. See section 806(a) and § 1.806–3 for the adjustments in reserves and assets to be made by T and R as a result of this transaction.

(8) *Tax-exempt interest, dividends, etc.* (i) Each of the following items:

(a) The life insurance company's share of interest which under section 103 is excluded from gross income;

(b) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3) and paragraph (d)(2)(i) of § 1.804–2) computed with respect to the life insurance company's share of such interest; and

(c) The deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B) and subdivision (ii) of this subparagraph) computed with respect to the life insurance company's share of the dividends received.

(ii) The modification contained in section 809(d)(8)(B) provides the method for applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of section 809(d)(8)(A)(iii) and subdivision (i)*(c)* of this subparagraph. Under this method, the sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations) shall be limited to 85 percent of the gain from operations computed without regard to:

(a) The deductions provided by section 809(d) (3), (5), and (6);

(b) The operations loss deductions provided by section 812; and

(c) The deductions allowed by sections 243(a)(1), 244(a), and 245.

If a life insurance company has a loss from operations (as determined under sec. 812) for the taxable year, the limitation provided in section 809(d)(8)(B) and this subdivision shall not be applicable for such taxable year. In that event, the deductions provided by sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the life insurance company for such taxable year without regard to such limitation. If the life insurance company does not have a loss from operations for the taxable year, however, the limitation shall be applicable for all tax purposes for such taxable year. In determining whether a life insurance company has a loss from operations for the taxable year under section 812, the deductions allowed by sections 243(a)(1), 244(a), and 245 shall be computed without regard to the limitation provided in section 809(d)(8)(B) and this subdivision.

(9) *Investment expenses, etc.* (i) The amount of investment expenses to the extent not allowed as a deduction under section 804(c)(1) in computing investment yield. For example, if a deduction in the amount of $100,000 is claimed for investment expenses,

which amount includes general expenses assigned to or included in investment expenses, and due to the operation of the limitation provided by section 804(c)(1) only $85,000 is allowed, then the excess ($15,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(ii) The amount (if any) by which the sum of the deductions allowable under section 804(c) exceeds the gross investment income. For example, if gross investment income under section 804(b) equals $400,000, and the sum of the deductions allowable under section 804(c) equals $425,000, then the excess ($25,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(iii) In determining the amount of the deductions allowed under subdivisions (i) and (ii) of this subparagraph, a life insurance company shall first take such deductions to the full extent allowable under section 804(c)(1), and any amount which is allowed as a deduction under section 804(c) shall not again be allowed as a deduction under section 809(d)(9).

(10) *Small business deduction.* The small business deduction as determined under section 804(a)(4).

(11) *Certain mutualization distributions.* The amount of distributions to shareholders actually made by the life insurance company in 1958, 1959, 1960, and 1961 in acquisition of stock pursuant to a plan of mutualization adopted by the company before January 1, 1958. If such deduction is claimed, there must be attached to the return of the company claiming such deduction a certified copy of the plan of mutualization and proof that such plan was adopted prior to January 1, 1958. See section 809(g) and §1.809–8 for limitation of such deduction.

(12) *Other deductions.* Except as modified by section 809(e) and §1.809–6, all other deductions allowed under subtitle A of the Code for purposes of computing taxable income to the extent not allowed as a deduction in computing investment yield. For example, a life insurance company shall be allowed a deduction under section 809(d)(12) and this subparagraph for amounts representing premiums charged itself with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)) in accordance with the rules prescribed in sections 162 and 404 and the regulations thereunder, to the extent that a deduction for such amounts is not allowed under section 804(c)(1) and paragraph (b)(1) of §1.804–4 or section 809(d)(9) and subparagraph (9) of this paragraph.

(b) *Denial of double deduction.* Nothing in section 809(d) shall permit the same item to be deducted more than once in determining gain or loss from operations. For example, if an item is allowed as a deduction for the taxable year by reason of its being a loss incurred within such taxable year (whether or not ascertained) under section 809(d)(1), such item, or any portion thereof, shall not also be allowed as a deduction for such taxable year under section 809(d)(2).

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962; T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 827, Jan. 18, 1969]

§1.809–6 Modifications.

Under section 809(e), the deductions allowed under section 809(d)(12) and paragraph (a)(12) of §1.809–5 (relating to other deductions) are subject to the following modifications:

(a) *Interest.* No deduction shall be allowed under section 163 for interest in respect of items described in section 810(c) since such interest is taken into account in the determination of required interest under section 809.

(b) *Bad debts.* No deduction shall be allowed for an addition to reserves for bad debts under section 166(c). However, a deduction for specific bad debts shall be allowed to the extent that such deduction is allowed under section 166 and the regulations thereunder. In the case of a loss incurred on the sale of mortgaged or pledged property, see §1.166–6 of this chapter.

(c) *Charitable, etc., contributions and gifts.* (1) The deduction by a life insurance company in any taxable year for a charitable contribution (as defined in section 170(c)) shall be limited to 5 percent of the gain from operations (as determined under section 809(b)(1)), computed without regard to any deductions for:

(i) Charitable contributions under section 170;

(ii) Dividends to policyholders under section 811(b);

(iii) Certain nonparticipating contracts under section 809(d)(5);

(iv) Group life insurance contracts and group accident and health insurance contracts under section 809(d)(6);

(v) Tax-exempt interest, dividends, etc., under section 809(d)(8); and

(vi) Any operations loss carryback to the taxable year under section 812.

(2) In applying the first sentence of section 170(b)(2) as contained in section 170 or, in the case of taxable years beginning after December 31, 1969, section 170(d)(2)(B) as contained in section 170A, any excess of the charitable contributions made by a life insurance company in a taxable year over the amount deductible in such year under the limitation contained in subparagraph (1) of this paragraph, shall be reduced to the extent that such excess:

(i) Reduces life insurance company taxable income (computed without regard to section 802(b)(3)) for the purpose of determining the offsets referred to in section 812(b)(2); and

(ii) Increases an operations loss carryover under section 812 for a succeeding taxable year.

(3) The application of the rules provided in section 809(e)(3) and this paragraph may be illustrated by the following example:

Example. Assume that life insurance company P is organized on January 1, 1958, and has a loss from operations for that year in the amount of $100,000 which is an operations loss carryover to 1959. In 1959, company P has a gain from operations and tax base (computed without regard to section 802(b)(3)) of $100,000 before the allowance of a deduction for a $5,000 charitable contribution made in 1959 and before the application of the operations loss carryover from 1958. Under section 170(b)(2), the operations loss carryover from 1958 is first applied to eliminate the $100,000 gain from operations and tax base in 1959 and the $5,000 charitable contribution carryover would (except for the limitation contained in this paragraph) become a charitable contribution carryover to 1960. However, for the purpose of computing the offsets referred to in section 812(b)(2), the $5,000 charitable contribution is applied to reduce the gain from operations and tax base for 1959 to $95,000 before the application of the operations carryover from 1958. Since only $95,000 of the $100,000 loss from operations in 1958 is an offset for 1959, the remaining $5,000 becomes an operations loss carryover to 1960. Accordingly, under the limitation contained in this paragraph, the charitable contributions carryover provided under the second sentence of section 170(b)(2) is eliminated.

(d) *Amortizable bond premium.* No deduction shall be allowed under section 171 for the amortization of bond premiums since a special deduction for such premiums is specifically taken into account under section 818(b).

(e) *Net operating loss deduction.* No deduction shall be allowed under section 172 since section 812 allows an ‘‘operations loss deduction’’.

(f) *Partially tax-exempt interest.* No deduction shall be allowed under section 242 for partially tax-exempt interest since section 809(d)(8) allows a deduction for such interest.

(g) *Dividends received.* No deduction shall be allowed under sections 243, 244, and 245 for dividends received since section 809(d)(8) allows a deduction for such dividends.

[T.D. 6535, 26 FR 529, Jan. 20, 1961, as amended by T.D. 7207, 37 FR 20797, Oct. 5, 1972]

§ 1.809–7 Limitation on certain deductions.

(a) *In general.* Section 809(f)(1) limits the deductions under section 809(d) (3), (5), and (6), relating to deductions for dividends to policyholders, certain nonparticipating contracts, and group life, accident, and health insurance contracts, respectively. This limitation provides that the amount of such deductions shall not exceed the sum of (1) the amount (if any) by which the gain from operations for the taxable year (determined without regard to such deductions) exceeds the taxpayer’s taxable investment income for such year, plus (2) $250,000.

(b) *Application of limitation.* Section 809(f)(2) provides a priority system for applying the limitation contained in section 809(f)(1) and paragraph (a) of this section. Under this priortity system, the limitation shall be applied in the following order:

(1) For taxable years beginning before January 1, 1962:

(i) First to the amount of the deduction under section 809(d)(6) (relating to group life, accident, and health insurance);

(ii) Then to the amount of the deduction under section 809(d)(5) (relating to certain nonparticipating contracts); and

(iii) Finally to the amount of the deduction under section 809(d)(3) (relating to dividends to policyholders).

(2) For taxable years beginning after December 31, 1961, the limitation shall be applied in the following order:

(i) First to the amount of the deduction under section 809(d)(3);

(ii) Then to the amount of the deduction under section 809(d)(6); and

(iii) Finally to the amount of the deduction under section 809(d)(5).

Thus, for taxable years beginning after December 31, 1961, the limitation and priority system would operate first to disallow a deduction under section 809(d)(5), then a deduction under section 809(d)(6), and finally a deduction under section 809(d)(3). For purposes of applying the 50 percent limitation contained in section 809(d)(6) with respect to a taxable year beginning after December 31, 1961, the amount of the deductions for taxable years beginning before January 1, 1962, shall be determined by applying the priortity system contained in subparagraph (1) of this paragraph.

(c) *Illustration of principles.* The operation of the limitation and priority system provided by section 809(f) and this section may be illustrated by the following examples:

Example 1. Assume the following facts with respect to M, a life insurance company, for the taxable year 1958:

Gain from operations computed without regard to the deductions under sec. 809(d) (3), (5), and (6)	$100,000,000
Taxable investment income	83,000,000
Tentative deduction for group life, accident, and health insurance under sec. 809(d)(6)	4,000,000
Tentative deduction for certain nonparticipating contracts under sec. 809(d)(5)	6,000,000
Tentative deduction for dividends to policyholders under sec. 809(d)(3)	10,000,000

In order to determine the limitation on the deductions under section 809(d) (3), (5), and (6), M would make up the following schedule:

(1) Statutory amount provided under sec. 809(f)(1)		$250,000
(2) Gain from operations computed without regard to the deductions under sec. 809(d) (3), (5), and (6)	$100,000,000	
(3) Taxable investment income	83,000,000	
(4) Excess of item (2) over item (3)		17,000,000
(5) Limitation on deductions under sec. 809(d) (3), (5), and (6) (item (1) plus item (4))		17,250,000

Since the total tentative deductions under section 809(d) (3), (5), and (6) ($20,000,000) exceeds the limitation on such deductions ($17,250,000), M would make up the following schedule to determine the application of the priority system:

(6) Maximum possible deduction under sec. 809(d) (3), (5), and (6) (item (5))	$17,250,000
(7) Deduction for group life, accident, and health insurance under sec. 809(d)(6) (not in excess of item (6))	4,000,000
(8) Maximum possible deduction under sec. 809(d)(5) (item (6) less item (7))	13,250,000
(9) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (8))	6,000,000
(10) Maximum possible deduction under sec. 809(d)(3) (item (8) less item (9))	7,250,000
(11) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (10))	7,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1958, M shall be allowed a deduction of $4,000,000 under section 809(d)(6), $6,000,000 under section 809(d)(5), and only $7,250,000 of the $10,000,000 tentative deduction under section 809(d)(3).

Example 2. The facts are the same as in example 1, except that the taxable year is 1962. Since the total tentative deductions under section 809(d) (3), (5), and (6) ($20,000,000) exceeds the limitation on such deductions ($17,250,000), M would make up the following schedule to determine the application of the priority system:

(1) Maximum possible deductions under sec. 809(d) (3), (5), and (6) (item (5) in example 1)	$17,250,000

(2) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (1))	10,000,000
(3) Maximum possible deduction under sec. 809(d)(6) (item (1) less item (2))	7,250,000
(4) Deduction for certain accident, health, and group life insurance under sec. 809(d)(6) (not in excess of item (3))	4,000,000
(5) Maximum possible deduction under sec. 809(d)(5) (item (4) less item (5))	3,250,000
(6) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (5))	3,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1962, M shall be allowed a deduction of $10,000,000 under section 809(d)(3), $4,000,000 under section 809(d)(6), and only $3,250,000 of the $6,000,000 tentative deduction under section 809(d)(5).

[T.D. 6535, 26 FR 530, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8688, June 23, 1966]

§ 1.809–8 Limitation on deductions for certain mutualization distributions.

(a) *Deduction not to reduce taxable investment income.* Section 809(g)(1) limits the deduction under section 809(d)(11) for certain mutualization distributions. This limitation provides that such deduction shall not exceed the amount (if any) by which the gain from operations for the taxable year, computed without regard to such deduction (but after the application of the limitation contained in section 809(f) and § 1.809–7), exceeds the taxpayer's taxable investment income for such year.

(b) *Deduction not to reduce tax below that imposed by 1957 law.* Section 809(g)(2) further limits the deduction under section 809(d)(11). Under section 809(g)(2), such deduction shall be allowed only to the extent that it (after the application of all other deductions) does not reduce the tax imposed by section 802(a)(1) for the taxable year below the amount of tax which would have been imposed for such taxable year if the law in effect for 1957 applied for such taxable year. If such deduction is claimed for 1958 (or 1959), the company shall attach to its return a schedule showing what its tax for 1958 (or 1959) would have been had such tax been computed under the law in effect for 1957.

(c) *Application of section 815.* Section 809(g)(3) provides that any portion of a distribution which is allowed as a deduction under section 809(d)(11) shall not be treated as a distribution to shareholders for purposes of section 815; except that in the case of any distributions made in 1959, such portion shall be treated as a distribution with respect to which a reduction is required under section 815(e)(2)(B) (relating to adjustment in allocation ratio for certain distributions after December 31, 1958).

[T.D. 6535, 26 FR 530, Jan. 20, 1961]

§ 1.809–9 Computation of the differential earnings rate and the recomputed differential earnings rate.

(a) *In general.* Neither the differential earnings rate under section 809(c) nor the recomputed differential earnings rate that is used in computing the recomputed differential earnings amount under section 809(f)(3) may be less than zero.

(b) *Definitions*—(1) *Recomputed differential earnings amount.* The recomputed differential earnings amount, with respect to any taxable year, is the amount equal to the product of—

(i) The life insurance company's average equity base for the taxable year; multiplied by

(ii) The recomputed differential earnings rate for that taxable year.

(2) *Recomputed differential earnings rate.* The recomputed differential earnings rate for any taxable year equals the excess of—

(i) The imputed earnings rate for the taxable year; over

(ii) The average mutual earning rate for the calendar year in which the taxable year begins.

(c) *Effective date.* The regulations are effective for all taxable years beginning after December 31, 1986.

[T.D. 8499, 58 FR 64899, Dec. 10, 1993]

§ 1.809–10 Computation of equity base.

(a) *In general.* For purposes of section 809, the equity base of a life insurance company includes the amount of any asset valuation reserve and the amount of any interest maintenance reserve.

(b) *Effective date.* This section is effective for taxable years ending after December 31, 1991.

[T.D. 8484, 58 FR 47061, Sept. 7, 1993, as amended by T.D. 8564, 59 FR 49579, Sept. 29, 1994]

§1.810–1 Taxable years affected.

Sections 1.810–2 through 1.810–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 531, Jan. 20, 1961]

§1.810–2 Rules for certain reserves.

(a) *Adjustment for decrease or increase in certain reserve items*—(1) *Adjustment for decrease.* Section 810(a) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year exceeds the sum of such items at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)), the amount of such excess shall be taken into account as a net decrease referred to in section 809(c)(2) and paragraph (a)(2) of §1.809–4 in determining gain or loss from operations.

(2) *Adjustment for increase.* Section 810(b) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)) exceeds the sum of such items at the beginning of the taxable year, the amount of such excess shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of §1.809–5 in determining gain or loss from operations.

(b) *Items taken into account.* The items described in section 810(c) and referred to in section 810 (a) and (b) and paragraph (a) of this section are:

(1) The life insurance reserves (as defined in section 801(b) and §1.801–4);

(2) The unearned premiums and unpaid losses included in total reserves under section 801(c)(2) and §1.801–5;

(3) The amounts (discounted at the rates of interest assumed by the company) necessary to satisfy the obligations under insurance or annuity contracts (including contracts supplementary thereto), but only if such obligations do not involve (at the time with respect to which the computation is made under this subparagraph) life, health, or accident contingencies;

(4) Dividend accumulations, and other amounts, held at interest in connection with insurance or annuity contracts (including contracts supplementary thereto); and

(5) Premiums received in advance, and liabilities for premium deposit funds.

(6) Special contingency reserves under contracts of group term life insurance or group health and accident insurance which are established and maintained for the provision of insurance on retired lives, for premium stabilization, or for a combination thereof.

For purposes of this paragraph, the same item shall be counted only once and deficiency reserves (as defined in section 801(b)(4) and paragraph (e)(4) of §1.801–4) shall not be taken into account.

(c) *Special rules.* For purposes of section 810 (a) and (b) and paragraph (a) of this section, in determining whether there is a net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year, the following rules shall apply:

(1) *Computation of net increase or decrease in reserves.* The sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year shall be the aggregate of the sums of each of such items at the beginning of the taxable year. The sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year shall be the aggregate of the sums of each of such items at the end of the taxable year. However, in order to determine whether there is a net increase or decrease in such items for the taxable year, the aggregate of the sums of

the items at the end of the taxable year must first be reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1).

(2) *Effect of change in basis in computing reserves.* Any increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810 (a) or (b) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of § 1.810–3.

(3) *Effect of section 818(c) election.* If a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), the sum of such reserves at the beginning and end of all taxable years (including the first taxable year) for which the election applies shall be the sum of such reserves computed on such net level premium basis.

(4) *Cross references.* For taxable years beginning before January 1, 1970, see section 810(e) (as in effect for such years) and § 1.810–4 for special rules for determining the net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section in the case of certain voluntary employees' beneficiary associations. For similar special rules in the case of life insurance companies issuing variable annuity contracts, see section 801(g)(4) and the regulations thereunder.

(d) *Illustration of principles.* The provisions of section 810 (a) and (b) and this section may be illustrated by the following examples:

Example 1. Assume the following facts with respect to R, a life insurance company:

Sum of items described in section 810(c) (1) through (6) at beginning of taxable year	$940
Sum of items described in section 810(c) (1) through (6) at end of taxable year	1,060
Required interest (as defined in section 809(a)(2))	70
Investment yield (as defined in section 804(c)) ..	100
Amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)	70

In order to determine the adjustment for decrease or increase in the sum of the items described in section 810(c) for the taxable year, R must first reduce the sum of such items at the end of the taxable year ($1,060) by the amount of investment yield ($70) not included in gain or loss from operations for the taxable year by reason of section 809(a)(1). Since the adjusted sum of such items at the end of the taxable year, $990 ($1,060 minus $70), exceeds the sum of such items at the beginning of the taxable year, $940, the excess of $50 ($990 minus $940) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations.

Example 2. Assume the facts are the same as in example 1, except that the sum of the items described in section 810(c) at the beginning of the taxable year is $1000. Since the sum of the items described in section 810(c) at the beginning of taxable year, $1000, exceeds the sum of such items at the end of the taxable year after adjustment for the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), $990 ($1060 minus $70), the excess of $10 ($1000 minus $990) shall be taken into account as a net decrease under section 809 (c)(2) and paragraph (a)(2) of § 1.809–4 in determining gain or loss from operations.

Example 3. Assume the following facts with respect to S, a life insurance company:

Sum of items described in section 810(c) (1) through (6) at beginning of taxable year	$1,970
Sum of items described in section 810(c) (1) through (6) at the end of taxable year	2,040
Required interest (as defined in section 809(a)(2))	60
Investment yield (as defined in section 804(c)) ..	40
Amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1)	40

Under the provisions of section 809(a)(1), since the required interest ($60) exceeds the investment yield ($40), the share of each and every item of investment yield set aside for policyholders and not included in gain or loss from operations for the taxable year shall be 100 percent. Thus, applying the provisions of section 810 (a) and (b), the sum of the items described in section 810(c) at the end of the taxable year ($2,040) must first be reduced by the entire amount of the investment yield ($40) in order to determine the net increase or decrease in the sum of such items for the taxable year. Since the adjusted sum of such items at the end of the taxable year, $2,000 ($2,040 minus $40), is greater than the sum of such items at the beginning of the taxable year, $1,970, the excess of $30 ($2,000 minus $1,970) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations. No additional deduction is allowed under section 809(d) for the amount ($20) by which the required interest exceeds the investment yield for the taxable year.

Example 4. Assume the facts are the same as in example 1, except that as a result of a change in the basis used in computing an item described in section 810(c) during the taxable year, the sum of such items at the end of the taxable year is $1,200. Under the provisions of paragraph (c)(2) of this section, any increase or decrease in the sum of the section 810(c) items for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810 (a) and (b). Thus, for purposes of section 810 (a) and (b), the sum of the items described in section 810(c) at the end of the taxable year shall be $1,060 (the amount computed without regard to the change in basis) and S shall treat the $50 computed in the manner described in example 1 as a net increase under section 809(d)(2) and paragraph (a)(2) of §1.809–5 in determining its gain or loss from operations for the taxable year. The amount of the increase in the section 810(c) items which is attributable to the change in basis during the taxable year, $140 ($1,200 minus $1,060), shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of §1.810–3.

Example 5. The life insurance reserves of M, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to $100 on January 1, 1960, and $110 on December 31, 1960. For the taxable year 1960, M elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to $115 on January 1, 1960, and $127 on December 31, 1960. Under the provisions of paragraph (c)(3) of this section, a company which makes the section 818(c) election must use the net level premium basis in computing the sum of its life insurance reserves at the beginning and end of all taxable years for which the election applies. Thus, for purposes of section 810 (a) and (b), in determining whether there is a net increase or decrease in the sum of the section 810(c) items for the taxable year 1960, M shall include $115 as its reserves with respect to such contracts under section 810(c)(1) at the beginning of the taxable year and $127 as its reserves with respect to such contracts under section 810(c)(1) at the end of the taxable year.

[T.D. 6535, 26 FR 531, Jan. 20, 1961, as amended by T.D. 7163, 37 FR 4189, Feb. 29, 1972; T.D. 7172, 37 FR 5619, Mar. 17, 1972]

§1.810–3 Adjustment for change in computing reserves.

(a) *Reserve strengthening or weakening.* Section 810(d)(1) provides that if the basis for determining any item referred to in section 810(c) and paragraph (b) of §1.810–2 at the end of any taxable year differs from the basis for such determination at the end of the preceding taxable year, then so much of the difference between:

(1) The amount of the item at the end of the taxable year, computed on the new basis, and

(2) The amount of the item at the end of the taxable year, computed on the old basis,

as is attributable to contracts issued before the taxable year shall be taken into account as follows:

(i) If the amount of the item at the end of the taxable year computed on the new basis exceeds the amount of the item at the end of the taxable year computed on the old basis, 1/10 of such excess shall be taken into account, for each of the succeeding 10 taxable years as a net increase to which section 809(d)(2) and paragraph (a)(2) of §1.809–5 applies; or

(ii) If the amount of the item at the end of the taxable year computed on the old basis exceeds the amount of the item at the end of the taxable year computed on the new basis, 1/10 of such excess shall be taken into account, for each of the 10 succeeding taxable years, as a net decrease to which section 809 (c)(2) and paragraph (a)(2) of §1.809–4 applies.

(b) *Illustration of principles.* The provisions of section 810(d)(1) and paragraph (a) of this section may be illustrated by the following examples:

Example 1. Assume that the amount of an item described in section 810(c) of L, a life insurance company, at the beginning of the taxable year 1959 is $100. Assume that at the end of the taxable year 1959, as a result of a change in the basis used in computing such item during the taxable year, the amount of the item (computed on the new basis) is $200 but computed on the old basis would have been $150. Since the amount of the item at the end of the taxable year computed on the new basis, $200, exceeds the amount of the item at the end of the taxable year computed on the old basis, $150, by $50, 1/10 of the amount of such excess, or $5, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1959. Any increase (or decrease) in the sum of the section 810(c) items computed on the old basis at the end of the taxable year 1959 ($150) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items computed on the old basis at the beginning of the taxable year 1959 ($100), shall be taken into account in the manner prescribed in section 810 (a) or (b) and § 1.810–2 for purposes of determining L's gain or loss from operations for 1959.

Example 2. Assume the facts are the same as in example 1, and that the sum of the items described in section 810(c) (computed on the new basis) is $200 on January 1, 1960, and $260 on December 31, 1960. Under the provisions of section 810(d)(1), as a result of the reserve strengthening attributable to the change in basis which occurred in 1959, L would include $5 (computed in the manner described in example 1) as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining its gain or loss from operations for 1960. In addition to this amount, any increase (or decrease) in the sum of the items described in section 810(c) at the end of the taxable year 1960 ($260) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items at the beginning of the taxable year 1960 ($200), shall be taken into account in the manner prescribed in section 810 (a) or (b) and § 1.810–2 for purposes of determining L's gain or loss from operations for 1960.

(c) *Termination as life insurance company.* Section 810(d)(2) provides, subject to the provisions of section 381(c)(22) and the regulations thereunder (relating to carryovers in certain corporate readjustments), that if for any taxable year a company which previously was a life insurance company no longer meets the requirements of section 801(a) and paragraph (b) of § 1.801–3 (relating to the definition of a life insurance company), the balance of any adjustments remaining to be made under section 810(d)(1) and paragraph (a) of this section shall be taken into account for the preceding taxable year.

(d) *Illustration of principles.* The provisions of section 810(d)(2) and paragraph (c) of this section may be illustrated by the following example:

Example. Assume the facts are the same as in example 1 of paragraph (b) of this section, except that for the taxable year 1962, L no longer meets the requirements of section 801(a) (relating to the definition of a life insurance company) and that the provisions of section 381(c)(22) are not applicable. Under the provisions of section 810 (d)(2), the entire balance of the adjustment remaining to be made with respect to the change in basis which occurred in 1959, 8/10 of $50, or $40, shall be taken into account for the taxable year 1961, the last year L was a life insurance company. Thus, for the taxable year 1961, the total amount to be taken into account by L as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining its gain or loss from operations shall be $45. Of this amount, $5 (1/10 of $50) represents the amount determined under the provisions of section 810(d)(1), and $40 represents the amount determined under the provisions of section 810(d)(2).

(e) *Effect of preliminary term election.* (1) Section 810(d)(3) provides that if a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such election shall not be treated as a change in basis within the meaning of section 810(d)(1) and paragraph (a) of this section. Thus, any increase or decrease in reserves attributable to such election shall not be taken into account under section 810(d)(1) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810 (a) and (b) and paragraph (a) of § 1.810–2. See paragraph (c)(3) of § 1.810–2.

(2) Section 810(d)(3) further provides that where an election under section 818(c) would apply to an item referred to in section 810(c) but for the fact that the basis used in computing such item has actually been changed, any increase or decrease in such item attributable to such actual change in basis shall be subject to the adjustment required under section 810(d)(1) and paragraph (a) of this section. In such a case, however, for purposes of section 810(d)(1)(B) and paragraph (a)(2) of this section, the amount of such item at the end of the taxable year computed on the old basis shall be the amount of such item at the end of the taxable year computed as if the election under section 818(c) applied in respect of such item for the taxable year.

(f) *Illustration of principles.* The provisions of section 810(d)(3) and paragraph (e) of this section may be illustrated by the following examples:

Example 1. Assume that S, a life insurance company which computes its life insurance reserves on a 3-percent assumed rate and the Commissioner's reserve valuation method (one of the recognized preliminary term reserve methods), elects to revalue such reserves on a net level premium method under section 818(c) and that the significant facts are as follows:

	Jan. 1, 1958	Dec. 31, 1958
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	100	118
Reserves at 3-percent assumed rate, after restatement under section 818(c)	110	131

Under the provisions of section 810(d)(3), an election under section 818(c) is not treated as a change in basis for purposes of section 810(d)(1). Accordingly, the increase of $21 ($131 minus $110) attributable to such election shall not be subject to the adjustment provided by section 810(d)(1) but shall be taken into account in the manner prescribed in section 810(b). For purposes of determining the amount to be taken into account under section 810(b), the reserves with respect to the contracts subject to the section 818(c) election shall be $110 at the beginning of the taxable year 1958 and $131 at the end of the taxable year 1958. However, as a result of making the election under section 818(c), the difference ($10) between the reserves computed on the preliminary term basis on January 1, 1958 ($100) and the reserves restated on the net level premium basis on January 1, 1958 ($110) shall not be taken into account under section 809(d) for the year 1958, or for any subsequent taxable year.

Example 2. Assume the facts are the same as in example 1, except that during the taxable year 1959, S actually changed from the preliminary term basis to a net level premium basis which was identical with the net level premium basis used under the section 818(c) election and that the significant facts are as follows:

	Jan. 1, 1959	Dec. 31, 1959
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	118	127
Reserves at 3-percent assumed rate, after restatement under section 818(c)	131	142
Strengthened reserves at 3-percent assumed rate and net level premium method	…………	142

Under the provisions of section 810(d)(3), if a company which has made an election under section 818(c) which has not been revoked actually changes the basis used by it in computing the reserves subject to such election, any increase or decrease in reserves attributable to such change in basis shall be taken into account in the manner prescribed in section 810(d)(1). Since S actually changed to the same basis which it used in computing its reserves under section 818(c), the reserves at the end of the taxable year computed on the new basis ($142) are the same as the reserves at the end of the taxable year computed on the old basis ($142), i.e., the basis which would have applied under section 818(c) if the election applied for 1959. Accordingly, no adjustment under section 810(d)(1) is required.

Example 3. Assume the facts are the same as in example 1, except that during the taxable year 1960, S actually changed the basis used by it in computing its reserves on a certain block of contracts subject to the election under section 818(c) and that the significant facts with respect to this block of contracts are as follows:

	Jan. 1, 1960	Dec. 31, 1960
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	50	63
Reserves at 3-percent assumed rate, after restatement under section 818(c)	60	75
Strengthened reserves at 2-percent assumed rate and net level premium method	…………	95

Under the provisions of section 810(d)(3), the amount of the reserves subject to the section 818(c) election at the end of the taxable year computed on the old basis shall be the amount of such reserves at the end of the taxable year determined under section 818(c) ($75). Since the reserves at the end of the taxable year computed on the new basis, $95, exceed the reserves at the end of the taxable year computed on the old basis, $75, by $20, 1/10 of the excess of $20, or $2, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of §1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1960. For purposes of determining whether there is a net increase or decrease in the sum of the items described in section 810(c) for the taxable year 1960 under section 810 (a) or (b), the sum of the reserves with respect to such block of contracts shall be $60 at the beginning of the taxable year and $75 at the end of the taxable year (the amount of such reserves computed under section 818(c) at the beginning and end of the taxable year). The difference ($10) between the reserves computed on the preliminary term basis on January 1, 1960 ($50) and the reserves restated on the net level premium basis on January 1, 1960 ($60) shall not be taken into account under section 809(d) for the year 1960, or for any subsequent taxable year.

[T.D. 6535, 26 FR 532, Jan. 20, 1961]

§ 1.810–4 Certain decreases in reserves of voluntary employees' beneficiary associations.

(a) *Decreases due to voluntary lapses of policies issued before January 1, 1958.* (1) Section 810(e) provides that if for any taxable year a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes an election in the manner provided in section 810(e)(3) and paragraph (b) of this section, only 11½ percent of any decrease in life insurance reserves (as defined in section 801(b) and § 1.801–4) attributable to the voluntary lapse on or after January 1, 1958, of any policy issued prior to that date shall be taken into account under section 810 (a) or (b) and paragraph (a) of § 1.810–2 in determining the net increase or decrease in the sum of the items described in section 810(c) during the taxable year. In applying the preceding sentence, the decrease in the reserve for any policy shall be determined by reference to the amount of such reserve at the beginning of the taxable year, reduced by any amount allowable as a deduction under section 809(d)(1) and paragraph (a)(1) of § 1.809–5 in respect of such policy by reason of such lapse. The election under section 810(e) shall be adhered to in computing the company's gain or loss from operation for the taxable year for which the election is made and for all subsequent taxable years, unless consent to revoke such election is obtained from the Commissioner.

(2) The application of the election provided under section 810(e) and subparagraph (1) of this paragraph may be illustrated by the following example:

Example. For the taxable year 1960, M, a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes the election under section 810(e). Assume the following facts with respect to a policy issued in 1955 which voluntarily lapsed during the taxable year:

(1) Life insurance reserve on January 1, 1960	$600
(2) Amount allowable as a deduction under sec. 809(d)(1)	200
(3) Decrease in life insurance reserves for sec. 810(e) purposes (item (1) minus item (2))	400
(4) Amount taken into account under sec. 810 (a) and (b) by reason of sec. 810(e) election (11 1/2%×$400)	46

Under the provisions of section 810(e) and subparagraph (1) of this paragraph, M would include $46 as its life insurance reserve with respect to such policy under section 810(c)(1) at the beginning of the taxable year 1960 for purposes of determining the net increase or decrease in the sum of the items described in section 810(c) for the taxable year under section 810 (a) or (b).

(b) *Time and manner of making election.* The election provided by section 810(e)(3) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before January 20, 1961, the election provided by section 810(e)(3) may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before April 21, 1961. The statement shall indicate that the company meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, and has made the election provided under section 810(e) and paragraph (a) of this section. The statement shall set forth the following information with respect to each policy described in paragraph (a) of this section which has voluntarily lapsed during such year:

(1) Type of policy.

(2) Date issued.

(3) Date lapsed.

(4) Reason for lapse.

(5) Policy reserve as of beginning of taxable year.

(6) Deduction allowable under section 809(d)(1) and paragraph (a)(1) of § 1.809–

5 during taxable year by reason of lapse.

(7) Decrease in policy reserve for section 810(e) purposes (excess of (5) over (6)).

In addition, the statement shall set forth the total of the amounts referred to in subparagraph (7) of this paragraph with respect to all policies described in paragraph (a) of this section which have voluntarily lapsed during the taxable year.

(c) *Scope of election.* An election made under section 810(e)(3) and paragraph (a) of this section shall be effective for the taxable year for which made and for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to January 20, 1961, a company may revoke the election provided by section 810(e)(3) without obtaining consent from the Commissioner by filing, before April 21, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) *Disallowance of carryovers from pre-1958 losses from operations.* For any taxable year for which the election provided under section 810(e)(3) and paragraph (b) of this section is effective, the provisions of section 812(b)(1) and §1.812–4 shall not apply with respect to any loss from operations for any taxable year beginning before January 1, 1958.

(e) *Effective date; cross reference.* The provisions of section 810(e) (as in effect for such years) and this section apply only with respect to taxable years beginning before January 1, 1970. For provisions relating to certain funded pension trusts applicable to taxable years beginning after December 31, 1969, see section 501(c)(18) and the regulations thereunder.

[T.D. 6535, 26 FR 533, Jan. 20, 1961, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

§1.811–1 Taxable years affected.

Section 1.811–2, except as otherwise provided therein, is applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

§1.811–2 Dividends to policyholders.

(a) *Dividends to policyholders defined.* Section 811(a) defines the term *dividends to policyholders,* for purposes of part I, subchapter L, chapter 1 of the Code, to mean dividends and similar distributions to policyholders in their capacity as such. The term includes amounts returned to policyholders where the amount is not fixed in the contract but depends on the experience of the company or the discretion of the management. In general, any payment not fixed in the contract which is made with respect to a participating contract (that is, a contract which during the taxable year contains a right to participate in the divisible surplus of the company) shall be treated as a dividend to policyholders. Similarly, any amount refunded or allowed as a rate credit with respect to either a participating or a nonparticipating contract shall be treated as a dividend to policyholders if such amount depends on the experience of the company. However, the term does not include interest paid (as defined in section 805(e) and paragraph (b) of §1.805–8) or return premiums (as defined in section 809(c) and paragraph (a)(1)(ii) of §1.809–4). Thus, so-called excess-interest dividends and amounts returned by one life insurance company to another in respect of reinsurance ceded shall not be treated as dividends to policyholders even though such amounts are not fixed in the contract but depend upon the experience of the company or the discretion of the management.

(b) *Amount of deduction*—(1) *In general.* Section 811(b)(1) provides, subject to the limitation of section 809(f), that the deduction for dividends to policyholders for any taxable year shall be an amount equal to the dividends to policyholders paid during the taxable year:

(i) Increased by the excess of the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, or

(ii) Decreased by the excess of the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year.

For the rule as to when dividends are considered paid, see section 561 and the regulations thereunder. For the determination of the amounts held as reserves for dividends to policyholders, see paragraph (c) of this section. For special provisions relating to the treatment of dividends to policyholders paid with respect to policies reinsured under modified coinsurance contracts, see section 820(c)(5) and the regulations thereunder.

(2) *Certain amounts to be treated as net decreases.* Section 811(b)(2) provides that if the amount determined under subparagraph (1)(ii) of this paragraph exceeds the dividends to policyholders paid during the taxable year, the amount of such excess shall be a net decrease referred to in section 809(c)(2).

(c) *Reserves for dividends to policyholders defined*—(1) *In general.* The term *reserves for dividends to policyholders,* as used in section 811(b)(1) (A) and (B) and paragraph (b)(1) of this section, means only those amounts:

(i) Actually held, or set aside as provided in subparagraph (2) of this paragraph and thus treated as actually held, by the company at the end of the taxable year, and

(ii) With respect to which, at the end of the taxable year or, if set aside, within the period prescribed in subparagraph (2) of this paragraph, the company is under an obligation, which is either fixed or determined according to a formula which is fixed and not subject to change by the company, to pay such amounts as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following the taxable year.

(2) *Amounts set aside.* (i) In the case of a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), all amounts set aside before the 16th day of the 3d month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(ii) In the case of a mutual savings bank subject to the tax imposed by section 594, all amounts set aside before the 16th day of the 4th month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(3) *1958 reserve for dividends to policyholders.* For purposes of section 811(b) and paragraph (b) of this section, the amounts held at the end of 1957 as reserves for dividends to policyholders payable during 1958 shall be determined as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied for 1957. Any adjustment in the reserves for dividends to policyholders at the beginning of 1957 required as a result of an understatement or overstatement of such reserves by the company shall be made to the balance of such reserves as of the beginning of 1957. For example, if at the beginning of 1957 the reserves for dividends to policyholders are stated to be $100 and it is subsequently determined that such reserves should have been $90, the reserves at the beginning of 1957 shall be reduced by $10. Under no circumstances shall an adjustment required with regard to the beginning 1957 reserves be made to the reserves at the end of 1957.

(4) *Information to be filed.* Every company claiming a deduction for dividends to policyholders shall keep such permanent records as are necessary to establish the amount of dividends actually paid during the taxable year. Such company shall also keep a copy of the dividend resolution and any necessary supporting data relating to the amounts of dividends declared and to the amounts held or set aside as reserves for dividends to policyholders during the taxable year. The company

shall file with its return a concise statement of the pertinent facts relating to its dividend policy for the year, the amount of dividends actually paid during the taxable year, and the amounts held or set aside as reserves for dividends to policyholders during the taxable year.

(d) *Illustration of principles.* The provisions of section 811(b) and this section may be illustrated by the following examples:

Example 1. On December 31, 1959, M, a life insurance company, held $200 as reserves for dividends to policyholders due and payable in 1960. On March 10, 1960, M set aside an additional $50 as reserves for dividends to policyholders due and payable in 1960. During the taxable year 1960, M paid $240 as dividends to its policyholders and at the end of the taxable year 1960, held $175 as reserves for dividends to policyholders due and payable in 1961. No additional amount was set aside before March 16, 1961, as reserves for dividends to policyholders due and payable in 1961. For the taxable year 1960, subject to the limitation of section 809(f), M's deduction for dividends to policyholders is $165, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1960		$240
(2) Decreased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12–31–59 (including amounts set aside as provided in paragraph (c)(2) of this section)	$250	
(b) Reserves for dividends to policyholders as of 12–31–60 –	175	
		75
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f))		$165

Example 2. On December 31, 1960, S, a life insurance company, held $100 as reserves for dividends to policyholders due and payable in 1961. During the taxable year 1961, S paid $125 as dividends to its policyholders and at the end of the taxable year 1961, held $110 as reserves for dividends to policyholders due and payable in 1962. No additional amount was set aside for dividends to policyholders as provided in paragraph (c)(2) of this section before March 16, 1961, or March 16, 1962. For the taxable year 1961, subject to the limitation of section 809(f), S's deduction for dividends to policyholders is $135, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961		$125
(2) Increased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12–31–61	$110	
(b) Reserves for dividends to policyholders as of 12–31–60	100	
		10
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f))		$135

Example 3. Assume the facts are the same as in example 2, except that on December 31, 1960, the amount held as reserves for dividends to policyholders due and payable in 1961 is $250. For the taxable year 1961, S's deduction for dividends to policyholders is zero, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961		$125
(2) Decreased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12–31–60	$250	
(b) Reserves for dividends to policyholders as of 12–31–61	110	
		140
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f))		$0

Under the provisions of section 811(b)(2) and paragraph (b)(2) of this section, since the decrease in the reserves for dividends to policyholders during the taxable year, $140 ($250 minus $110), exceeds the dividends to policyholders paid during the taxable year 1961, $125, S shall include $15 (the amount of such excess) as a net decrease under section 809(c)(2) and paragraph (a)(2) of §1.809–4 in determining its gain or loss from operations for 1961.

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

§1.812–1 Taxable years affected.

Sections 1.812–2 through 1.812–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

§1.812–2 Operations loss deduction.

(a) *Allowance of deduction.* Section 812 provides that a life insurance company shall be allowed a deduction in computing gain or loss from operations for any taxable year beginning after December 31, 1957, in an amount equal to the aggregate of the operations loss carryovers and operations loss carrybacks to such taxable year. This deduction is referred to as the operations loss deduction. The loss from operations (computed under section 809), is the basis for the computation of the operations loss carryovers and operations loss carrybacks and ultimately for the operations loss deduction itself. Section 809(e)(5) provides that the net operating loss deduction provided in section 172 shall not be allowed a life insurance company since the operations loss deduction provided in section 812 and this paragraph shall be allowed in lieu thereof.

(b) *Steps in computation of operations loss deduction.* The three steps to be taken in the ascertainment of the operations loss deduction for any taxable year beginning after December 31, 1957, are as follows:

(1) Compute the loss from operations for any preceding or succeeding taxable year from which a loss from operations may be carried over or carried back to such taxable year.

(2) Compute the operations loss carryovers to such taxable year from such preceding taxable years and the operations loss carrybacks to such taxable year from such succeeding taxable years.

(3) Add such operations loss carryovers and carrybacks in order to determine the operations loss deduction for such taxable year.

(c) *Statement with tax return.* Every life insurance company claiming an operations loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the operations loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the operations loss deduction.

(d) *Ascertainment of deduction dependent upon operations loss carryback.* If a life insurance company is entitled in computing its operations loss deduction to a carryback which it is not able to ascertain at the time its return is due, it shall compute the operations loss deduction on its return without regard to such operations loss carryback. When the life insurance company ascertains the operations loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the operations loss deduction for the taxable year with the inclusion of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(e) *Law applicable to computations.* The following rules shall apply to all taxable years beginning after December 31, 1957:

(1) In determining the amount of any operations loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The loss from operations for any taxable year shall be determined under the law applicable to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the operations loss deduction.

(3) The amount of the operations loss deduction which shall be allowed for any taxable year shall be determined under the law applicable for that year.

(f) *Special rules.* For purposes of taxable years beginning after December 31, 1954, and before January 1, 1958:

(1) The amount of any:

(i) Loss from operations;

(ii) Operations loss carryback; and

(iii) Operations loss carryover

shall be computed as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) and section 381(c)(22) applied to such taxable years.

(2) A loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph) for such taxable years shall in no way affect the tax liability of any life insurance company for such taxable years. However, such loss may, to the extent allowed as an operations loss carryover under section 812, affect the tax liability of a life insurance company for a taxable year beginning after December 31, 1957. For example, for the taxable year 1956, X, a life insurance company, has a loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph). Such loss shall in no way affect X's tax liability for the taxable years 1956 (the year of the

loss), 1955 (a year to which such loss shall be carried back), or 1957 (a year to which such loss shall be carried forward). However, to the extent allowed under section 812, any amount of the loss for 1956 remaining after such carryback and carryforward shall be taken into account in determining X's tax liability for taxable years beginning after December 31, 1957.

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

§1.812–3 Computation of loss from operations.

(a) *Modification of deductions.* A loss from operations is sustained by a life insurance company in any taxable year, if and to the extent that, for such year, there is an excess of the sum of the deductions provided by section 809(d) over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) as determined under section 809(b)(3), and (2) the sum of the items of gross amount taken into account under section 809(c). In determining the loss from operations for purposes of section 812:

(i) No deduction shall be allowed under section 812 for the operations loss deduction.

(ii) The 85 percent limitation on dividends received provided by section 246 (b) as modified by section 809(d)(8)(B) shall not apply to the deductions otherwise allowed under:

(a) Section 243(a) in respect to dividends received by corporations,

(b) Section 244 in respect of dividends received on certain preferred stock of public utilities, and

(c) Section 245 in respect of dividends received from certain foreign corporations.

(b) *Illustration of principles.* The application of paragraph (a) of this section may be illustrated by the following example:

Example. For the taxable year 1960, X, a life insurance company, has items taken into account under section 809(c) amounting to $150,000, its share of the investment yield amounts to $250,000, and total deductions allowed by section 809(d) of $375,000, exclusive of any operations loss deduction and exclusive of any deduction for dividends received. In 1960, X received as its share of dividends entitled to the benefits of section 243(a) the amount of $100,000. These dividends are included in X's share of the investment yield. X has no other deductions to which section 812(c) applies. On the basis of these facts, X has a loss from operations for the taxable year 1960 of $60,000, computed as follows:

Deductions for 1960	$375,000
Plus: Deduction for dividends received computed without regard to the limitation provided by sec. 246(b), as modified by sec. 809(d)(8)(B) (85% of $100,000)	85,000
Total deductions as modified by sec. 812(c)	460,000
Less: Sum of sec. 809(c) items and X's share of investment yield (including $100,000 of dividends)	400,000
Loss from operations for 1960	(60,000)

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

§1.812–4 Operations loss carrybacks and operations loss carryovers.

(a) *In general*—(1) *Years to which loss may be carried.* In order to compute the operations loss deduction of a life insurance company the company must first determine the part of any losses from operations for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. Except as otherwise provided by this paragraph, a loss from operations for taxable years beginning after December 31, 1954, shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 5 taxable years succeeding the loss year. Except as limited by section 812(e)(2) and paragraph (b) of §1.812–6, if the life insurance company is a new company (as defined in section 812(e)(1)) for the loss year, the loss from operations shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 8 taxable years succeeding the loss year. In determining the span of years for which a loss from operations may be carried, taxable years in which a company does not qualify as a life insurance company (as defined in section 801(a)), or is not treated as a new company, shall be taken into account.

(2) *Special transitional rules.* (i) A loss from operations for any taxable year beginning before January 1, 1958, shall not be carried back to any taxable year

beginning before January 1, 1955. Furthermore, a loss from operations for any taxable year beginning after December 31, 1957, shall not be carried back to any taxable year beginning before January 1, 1958.

(ii) If for any taxable year a life insurance company has made an election under section 810(e) (relating to certain decreases in reserves for voluntary employees' beneficiary associations) which is effective for such taxable year, the provisions of section 812(b)(1) and subparagraph (1) of this paragraph shall not apply with respect to any loss from operations for any taxable year beginning before January 1, 1958.

(3) *Illustration of principles.* The provisions of section 812(b)(1) and of this paragraph may be illustrated by the following examples:

Example 1. P, a life insurance company, organized in 1940, has a loss from operations of $1,000 in 1958. This loss cannot be carried back, but shall be carried forward to each of the 5 taxable years following 1958.

Example 2. Q, a life insurance company, organized in 1940, has a loss from operations of $1,200 in 1959. This loss shall be carried back to the taxable year 1958 and then shall be carried forward to each of the 5 taxable years following 1959.

Example 3. R, a life insurance company, organized in 1940, has a loss from operations of $1,300 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then shall be carried forward to each of the 5 taxable years following 1956. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied to such taxable years.

Example 4. S, a life insurance company, organized in 1958 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of $1,400 for the taxable year 1958. This loss cannot be carried back, but shall be carried forward to each of the 8 taxable years following 1958, provided, however, S is not a nonqualified corporation at any time during the loss year (1958) or any taxable year thereafter.

Example 5. T, a life insurance company, organized in 1954 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of $1,500 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then carried forward to each of the 8 taxable years following 1956, provided, however, T is not a nonqualified corporation at any time during the loss year (1956) or any taxable year thereafter. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I of subchapter L (as in effect for 1958) applied to such taxable years.

(4) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 812 the first, second, etc., preceding or succeeding taxable year. For the determination of the loss from operations for periods of less than 12 months, see section 818(d) and the regulations thereunder.

(5) *Amount of loss to be carried.* The amount which is carried back or carried over to any taxable year is the loss from operations to the extent it was not absorbed in the computation of gain from operations for other taxable years, preceding such taxable year, to which it may be carried back or carried over. For the purpose of determining the gain from operations for any such preceding taxable year, the various operations loss carryovers and carrybacks to such taxable year are considered to be applied in reduction of the gain from operations in the order of the taxable years from which such losses are carried over or carried back, beginning with the loss for the earliest taxable year.

(6) *Corporate acquisitions.* For the computation of the operations loss carryovers in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

(b) *Portion of loss from operations which is a carryback or a carryover to the taxable year in issue*—(1) *Manner of computation.* (i) A loss from operations shall first be carried back to the earliest taxable year permissible under section 812(b) and paragraph (a) of this section for which such loss is allowable as a carryback or a carryover. The entire amount of the loss from operation shall be carried back to such earliest year.

(ii) Section 812(b)(2) provides that the portion of the loss from operations which shall be carried to each of the taxable years subsequent to the earliest taxable year shall be the excess (if any) of the amount of the loss from operations over the sum of the offsets (as defined in section 812(d) and paragraph (a) of §1.812–5) for all prior taxable years to which the loss from operations may be carried.

(2) *Illustration of principles.* The application of this paragraph may be illustrated by the following example:

Example. T, a life insurance company (which is not a new company as defined in section 812(e)(1)), has a loss from operations for 1960. The entire amount of the loss from operations for 1960 shall first be carried back to 1958. The amount of the carryback to 1959 is the excess (if any) of the 1960 loss over the offset for 1958. The amount of the carryover to 1961 is the excess (if any) of the 1960 loss over the sum of the offsets for 1958 and 1959. The amount of the 1960 loss remaining (if any) to be carried over to 1962, 1963, or 1964 shall be computed in a like manner.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

§1.812–5 Offset.

(a) *Offset defined.* Section 812(d) defines the term ''offset'' for purposes of section 812(b)(2) and paragraph (b)(1)(ii) of §1.812–4. For any taxable year the offset is only that portion of the increase in the operations loss deduction for the taxable year which is necessary to reduce the life insurance company taxable income (computed without regard to section 802(b)(3)) for such year to zero. For purposes of the preceding sentence, the offset shall be determined with the modifications prescribed in paragraph (b) of this section. Such modifications shall be made independently of, and without reference to, the modifications required by paragraph (a) of §1.812–3 for purposes of computing the loss from operations itself.

(b) *Modifications*—(1) *Operations loss deduction*—(i) *In general.* Section 812(d)(2) provides that for purposes of section 812(d)(1) (relating to the definition of offset), the operations loss deduction for any taxable year shall be computed by taking into account only such losses from operations otherwise allowable as carryovers or as carrybacks to such taxable year as were sustained in taxable years preceding the taxable year in which the life insurance company sustained the loss from operations from which the offset is to be deducted. Thus, for such purposes the loss from operations for the loss year or for any taxable year thereafter shall not be taken into account.

(ii) *Illustration of principles.* The provisions of this subparagraph may be illustrated by the following example:

Example. In computing the operations loss deduction for 1960, Y, a life insurance company, has a carryover from 1958 of $9,000, a carryover from 1959 of $6,000, a carryback from 1961 of $18,000, and a carryback from 1962 of $10,000, or an aggregate of $43,000 in carryovers and carrybacks. Thus, the operations loss deduction for 1960, for purposes of determining the tax liability for 1960, is $43,000. However, in computing the offset for 1960 which is subtracted from the loss from operations for 1961 for the purpose of determining the portion of such loss which may be carried over to subsequent taxable years, the operations loss deduction for 1960 is $15,000, that is, the aggregate of the $9,000 carryover from 1958 and the $6,000 carryover from 1959. In computing the operations loss deduction for such purpose, the $18,000 carryback from 1961 and the $10,000 carryback from 1962 are disregarded. In computing the offset for 1960, however, which is subtracted from the loss from operations for 1962 for the purpose of determining the portion of such 1962 loss which may be carried over for subsequent taxable years, the operations loss deduction for 1960 is $33,000, that is, the aggregate of the $9,000 carryover from 1958, the $6,000 carryover from 1959, and the $18,000 carryback from 1961. In computing the operations loss deduction for such purpose, the $10,000 carryback from 1962 is disregarded.

(2) *Recomputation of deductions limited by section 809(f)*—(i) *In general.* If in any taxable year a life insurance company has deductions under section 809(d) (3), (5), and (6), as limited by section 809(f), and sustains a loss from operations in a succeeding taxable year which may be carried back as an operations loss deduction, such limitation and deductions shall be recomputed. This recomputation is required since the carryback must be taken into account for purposes of determining such limitation and deductions.

(ii) *Illustration of principles.* The provisions of this subparagraph may be illustrated by the following example:

(a) Facts. The books of P, a life insurance company, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1959	$9,000,000	$10,000,000	....

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1960	....	....	($9,800,000)

The gain from operations thus shown is computed without regard to any operations loss deduction or deductions under section 809(d) (3), (5), and (6), as limited by section 809(f). Assume that for the taxable year 1959, P has (without regard to the limitation of section 809(f) or the operations loss deduction for 1959) a deduction under section 809(d)(3) of $2,500,000 for dividends to policyholders and no deductions under section 809(d) (5) or (6).

(*b*) *Determination of section 809(f) limitation and deduction for dividends to policyholders without regard to the operations loss deduction for 1959.* In order to determine gain or loss from operations for 1959, P must determine the deduction for dividends to policyholders for such year. Under the provisions of section 809(f), the amount of such deduction shall not exceed the sum of *(1)* the amount (if any) by which the gain from operations for such year (determined without regard to such deduction) exceeds P's taxable investment income for such year, plus *(2)* $250,000. Since the gain from operations as thus determined ($10,000,000) exceeds the taxable investment income ($9,000,000) by $1,000,000, the limitation on such deduction is $1,250,000 ($1,000,000 plus $250,000). Accordingly, only $1,250,000 of the $2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year is $8,750,000 ($10,000,000 minus $1,250,000).

(c) Recomputation of section 809(f) limitation and deduction for dividends to policyholders after application of the operations loss deduction for 1959. Since P has sustained a loss from operations for 1960 which shall be carried back to 1959 as an operations loss deduction, it must recompute the section 809(f) limitation and deduction for dividends to policyholders. Taking into account the $9,800,000 operations loss deduction for 1959 reduces gain from operations for such year to $200,000 ($10,000,000 minus $9,800,000). Since the gain from operations as thus determined ($200,000) is less than the taxable investment income ($9,000,000), the limitation on the deduction for dividends to policyholders is $250,000. Thus, only $250,000 of the $2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year as thus determined is $9,750,000 ($10,000,000 minus $250,000) since for purposes of this determination the operations loss deduction for 1959 is not taken into account (see section 812(c)(1)). Accordingly, the offset for 1959 is $9,750,000 (the increase in the operations loss deduction for 1959, computed without regard to the carryback for 1960, which reduces life insurance company taxable income for 1959 to zero); thus, the portion of the 1960 loss from operations which shall be carried forward to 1961 is $50,000 (the excess of the 1960 loss ($9,800,000) over the offset for 1959 ($9,750,000)).

(3) *Minimum limitation.* The life insurance company taxable income, as modified under this paragraph, shall in no case be considered less than zero.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

§ 1.812–6 New company defined.

Section 812(e) provides that for purposes of part I, subchapter L, chapter 1 of the Code, a life insurance company is a ''new company'' for any taxable year only if such taxable year begins not more than 5 years after the first day on which it (or any predecessor if section 381(c)(22) applies or would have applied if in effect) was authorized to do business as an insurance company.

[T.D. 7326, 39 FR 35354, Oct. 1, 1974]

§ 1.812–7 Application of subtitle A and subtitle F.

Section 812(f) provides that except as modified by section 809(e) (relating to modifications of deduction items otherwise allowable under subtitle A of the Code) subtitles A and F of the Code shall apply to operations loss carrybacks and carryovers, and to the operations loss deduction, in the same manner and to the same extent that such subtitles apply in respect of net operation loss carrybacks, net operating loss carryovers, and the net operating loss deduction of corporations generally. For the computation of the operations loss carrybacks and carryovers, and of the operations loss deduction in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

[T.D. 6535, 26 FR 539, Jan. 20, 1961]

§ 1.812–8 Illustration of operations loss carrybacks and carryovers.

The application of § 1.812–4 may be illustrated by the following example:

(a) *Facts.* The books of M, a life insurance company, organized in 1940, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1958	$11,000	$15,000	
1959	23,000	30,000	
1960			($75,000)
1961	25,000	20,000	
1962			(150,000)
1963	22,000	30,000	
1964	40,000	35,000	
1965	62,000	75,000	
1966	25,000	17,000	
1967	39,000	53,000	

The gain from operations thus shown is computed without regard to any operations loss deduction. The assumption is also made that none of the other modifications prescribed in paragraph (b) of § 1.812–5 apply. There are no losses from operations for 1955, 1956, 1957, 1968, 1969, 1970.

(b) *Loss sustained in 1960.* The portions of the $75,000 loss from operations for 1960 which shall be used as carrybacks to 1958 and 1959 and as carryovers to 1961, 1962, 1963, 1964, and 1965 are computed as follows:

(1) *Carryback to 1958.* The carryback to this year is $75,000, that is, the amount of the loss from operations.

(2) *Carryback to 1959.* The carryback to this year is $60,000 (the excess of the loss for 1960 over the offset for 1958), computed as follows:

Loss from operations	$75,000
Less:	
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	15,000
Carryback	60,000

(3) *Carryover to 1961.* The carryover to this year is $30,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958 and 1959), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	30,000	
Sum of offsets		45,000
Carryover		30,000

(4) *Carryover to 1962.* The carryover to this year is $10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, and 1961), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	80,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Sum of offsets		65,000
Carryover		10,000

(5) *Carryover to 1963.* The carryover to this year is $10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, 1961, and 1962), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	30,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Sum of offsets		65,000
Carryover		10,000

(6) *Carryover to 1964.* The carryover to this year is $0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, and 1963), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	30,000	

Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Offset for 1963 (the $30,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryover from 1962)	30,000	
Sum of offsets		95,000
Carryover		0

(7) *Carryover to 1965.* The carryover to this year is $0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, 1963, and 1964), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction for the carryback from 1960 or the carryback from 1962)	30,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Offset for 1963 (the $30,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryover from 1962)	30,000	
Offset for 1964 (the $35,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryover from 1962)	35,000	
Sum of offsets		130,000
Carryover		0

(c) *Loss sustained in 1962.* The portions of the $150,000 loss from operations for 1962 which shall be used as carrybacks to 1959, 1960, and 1961 and as carryovers to 1963, 1964, 1965, 1966, and 1967 are computed as follows:

(1) *Carryback to 1959.* The carryback to this year is $150,000, that is, the amount of the loss from operations.

(2) *Carryback to 1960.* The carryback to this year is $150,000 (the excess, if any, of the loss from 1962 over the offset for 1959), computed as follows:

Loss from operations	$150,000
Less:	
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0
Carryback	150,000

(3) *Carryback to 1961.* The carryback to this year is $150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959 and 1960), computed as follows:

Loss from operations	$150,000
Less:	
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0
Offset for 1960 (a year in which a loss from operations was sustained)	0
Sum of offsets	0
Carryback	150,000

(4) *Carryover to 1963.* The carryover to this year is $150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, and 1961), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Sum of offsets		0
Carryover		150,000

(5) *Carryover to 1964.* The carryover to this year is $130,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, and 1963), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	

Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Sum of offsets		20,000
Carryover		130,000

(6) *Carryover to 1965.* The carryover to this year is $95,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, and 1964), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960 the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1964 not being taken into account)	35,000	
Sum of offsets		55,000
Carryover		95,000

(7) *Carryover to 1966.* The carryover to this year is $20,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, 1964, and 1965), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover for such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1964 not being taken into account)	35,000	
Offset for 1965 (the $75,000 gain from operations for such year reduced by the carryover to such year of $0 to 1960, the carryover from 1962 to 1965 not being taken into account)	$75,000	
Sum of offsets		$130,000
Carryover		20,000

(8) *Carryover to 1967.* The carryover to this year is $3,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, 1964, 1965, and 1966), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	

Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1964 not being taken into account)	35,000	
Offset for 1965 (the $75,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1965 not being taken into account)	75,000	
Offset for 1966 (the $17,000 gain from operations for such year computed without the deduction of the carryover from 1962)	17,000	
Sum of offsets		147,000
Carryover		3,000

(d) *Determination of operations loss deduction for each year.* The carryovers and carrybacks computed under paragraphs (b) and (c) of this section are used as a basis for the computation of the operations loss deduction in the following manner:

Taxable year	Carryover		Carryback		Operations loss deductions
	From 1960	From 1962	From 1960	From 1962	
1958			$75,000		$75,000
1959			60,000	$150,000	210,000
1961	$30,000			150,000	180,000
1963	10,000	$150,000			160,000
1964		130,000			130,000
1965		95,000			95,000
1966		20,000			20,000
1967		3,000			3,000

[T.D. 6535, 26 FR 539, Jan. 20, 1961]

DISTRIBUTIONS TO SHAREHOLDERS

§ 1.815–1 Taxable years affected.

Sections 1.815–2 through 1.815–6, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of October 10, 1962 (76 Stat. 808), and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.815–2 Distributions to shareholders.

(a) *In general.* Section 815 provides that every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain two special surplus accounts for Federal income tax purposes. These special accounts are the shareholders surplus account (as defined in section 815(b) and § 1.815–3) and the policyholders surplus account (as defined in section 815(c) and § 1.815–4). To the extent that a distribution to shareholders (as defined in paragraph (c) of this section) is treated as being made out of the shareholders surplus account, no tax is imposed on the company with respect to such distribution. However, to the extent that a distribution to shareholders is treated as being made out of the policyholders surplus account, the amount subtracted from the policyholders surplus account by reason of such distribution shall be taken into account in determining life insurance company taxable income under section 802(b).

(b) *Priority system for distributions to shareholders.* (1) For purposes of section 815 (other than subsection (e) thereof relating to certain mutualizations) and section 802(b)(3) (relating to the determination of life insurance company taxable income), any distribution made to shareholders after December 31, 1958, shall be treated in the following manner:

(i) Distributions shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and §1.815–3);

(ii) Once the shareholders surplus account has been reduced to zero, distributions shall then be treated as being made out of the policyholders surplus account (as defined in section 815(c) and §1.815–4) until that account has been reduced to zero; and

(iii) Finally, any distributions in excess of the amounts in the shareholders surplus account and the policyholders surplus account shall be treated as being made out of other accounts (as defined in §1.815–5).

(2) For purposes of subparagraph (1) of this paragraph, in order to determine whether a distribution (or any portion thereof) shall be treated as being made out of the shareholders surplus account, policyholders surplus account, or other accounts, the amount in such accounts at the end of any taxable year shall be the cumulative balance in such accounts at the end of the taxable year, computed without diminution by reason of a distribution (or any portion thereof) during the taxable year which is treated as being made out of such accounts. For example, on January 1, 1960, S, a stock life insurance company, had $1,000 in its shareholders surplus account and $3,000 in its policyholders surplus account. On November 1, 1960, S distributed $4,000 to its shareholders. Under the provisions of section 815(b)(2) and paragraph (b) of §1.815–3, S added $5,000 to its shareholders surplus account for the taxable year 1960. Since the distributions to shareholders during the taxable year 1960, $4,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions treated as made out of such account during the taxable year, $6,000 ($1,000 plus $5,000), the entire distribution is treated as being made out of the shareholders surplus account.

(3) Except in the case of a distribution in cash and as otherwise provided herein, the amount to be charged to the special surplus accounts referred to in subparagraph (1) of this paragraph with respect to any distributions to shareholders (as defined in section 815(a) and paragraph (c) of this section) shall be the fair market value of the property distributed, determined as of the date of distribution. However, for the amount of the adjustment to earnings and profits reflecting such distributions, see section 312 and the regulations thereunder. For a special rule relating to the determination of the amount to be charged to such special surplus accounts in the case of a distribution by a foreign life insurance company carrying on a life insurance business within the United States, see section 819(c)(1) and the regulations thereunder.

(c) *Distributions to shareholders defined.* (1) Except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, the term *distribution*, as used in section 815(a) and paragraph (b) of this section, means any distribution of property made by a life insurance company to its shareholders. For purposes of the preceding sentence, the term *property* means any property (including money, securities, and indebtedness to the company) other than stock, or rights to acquire stock, in the company making the distribution. Thus, for example, the term includes a distribution which is considered a dividend under section 316, but is not limited to the extent that such distribution must be made out of the accumulated or current earnings and profits of the company making the distribution. For example, except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, there is a distribution within the meaning of this paragraph in any case in which a corporation acquires the stock of a shareholder in exchange for property in a redemption treated as a distribution in exchange for stock under section 302(a) or treated as a distribution of property under section 302(d). For special rules relating to distributions to shareholders in acquisition of stock pursuant to a plan of mutualization, see section 815(e) and paragraph (e) of §1.815–6.

(2) The term *distribution*, as used in section 815(a) and paragraph (b) of this section, does not (except for purposes of section 815(a)(3) and (e)(2)(B)) include any distribution in redemption of

stock issued prior to January 1, 1958, where such stock was at all times on and after the date of its issuance and on and before the date of its redemption limited as to the amount of dividends payable and was callable, at the option of the issuer, at a price not in excess of 105 percent of the sum of its issue price plus the amount of contribution to surplus (if any) made by the original purchaser at the time of his purchase.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

§ 1.815–3 Shareholders surplus account.

(a) *In general.* Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a shareholders surplus account. This account shall be established as of January 1, 1958, and the beginning or opening balance of the shareholders surplus account on that date shall be zero.

(b) *Additions to shareholders surplus account.* (1) The amount added to the shareholders surplus account for any taxable year beginning after December 31, 1957, shall be the amount by which the sum of:

(i) The life insurance company taxable income (computed without regard to section 802(b)(3)),

(ii) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, reduced (in the case of a taxable year beginning after December 31, 1961) by the amount referred to in subdivision (i) of this subparagraph,

(iii) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3)), the deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B)), and the amount of interest excluded from gross income under section 103, and

(iv) The small business deduction provided by section 809(d)(10). Exceeds the taxes imposed for the taxable year by section 802(a), computed without regard to section 802(b)(3).

(c) *Subtractions from shareholders surplus account*—(1) *In general.* There shall be subtracted from the cumulative balance in the shareholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the taxable year, the amount which is treated as being distributed out of such account under section 815(a) and paragraph (b) of § 1.815–2.

(2) *Special rule; distributions in 1958.* There shall be subtracted from the shareholders surplus account (to the extent thereof) for any taxable year beginning in 1958 the amount of the distributions to shareholders made by the company during 1958. For example, assume S, a stock life insurance company, had additions to its shareholders surplus account (as determined under section 815(b)(2) and paragraph (b) of this section) for the taxable year 1958 of $10,000, and actually distributed as dividends to its shareholders $8,000 during the year 1958. The balance in S's shareholders surplus account as of January 1, 1959, shall be $2,000. If S had distributed $12,000 as dividends in 1958, the balance in its shareholders surplus account as of January 1, 1959, would be zero and the other accounts referred to in section 815(a)(3) and paragraph (b)(1)(iii) of § 1.815–2 would be reduced by $2,000.

(d) *Illustration of principles.* The application of section 815(b) and this section may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960.

Balance in shareholders surplus account as of 1–1–60	$5,000
Life insurance company taxable income computed without regard to sec. 802(b)(3)	4,000
Excess of net long-term capital gain over net short-term capital loss	1,700
Tax-exempt interest included in gross investment income under sec. 804(b)	100
Small business deduction (determined under sec. 809(d)(10))	200
Tax liability under sec. 802(a) (1) and (2) computed without regard to sec. 802(b)(3)	1,625
Amount distributed to shareholders	9,000

For purposes of determining the amount to be subtracted from its shareholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in shareholders surplus account as of 1–1–60		$5,000
(2) Additions to account:		
(a) Life insurance company taxable income computed without regard to sec. 802(b)(3)	$4,000	
(b) Excess of net long-term capital gain over net short-term capital loss	1,700	
(c) Tax-exempt interest included in gross investment income under sec. 804(b)	100	
(d) Small business deduction (determined under sec. 809(d)(10))	200	
Total	6,000	
Less:		
Tax liability under sec. 802(a)(1) and (2) computed without regard to sec. 802(b)(3)	1,625	
		4,375
(3) Cumulative balance in shareholders surplus account as of 12–31–60 (item (1) plus item (2))		9,375

Since the amount distributed to shareholders during the taxable year, $9,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year, $9,375, under the provisions of section 815(a), the entire distribution shall be treated as being made out of the shareholders surplus account. Thus, $9,000 shall be subtracted from the shareholders surplus account (leaving a balance of $375 in such account at the end of the taxable year) and S shall incur no additional tax liability by reason of the distribution to its shareholders during the taxable year 1960.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

§1.815–4 Policyholders surplus account.

(a) *In general.* Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a policyholders surplus account. This account shall be established as of January 1, 1959, and the beginning or opening balance of the policyholders surplus account on that date shall be zero.

(b) *Additions to policyholders surplus account.* The amount added to the policyholders surplus account for any taxable year beginning after December 31, 1958, shall be the sum of:

(1) An amount equal to 50 percent of the amount by which the gain from operations for the taxable year exceeds the taxable investment income,

(2) The deduction allowed or allowable under section 809(d)(5) (as limited by section 809(f)) for certain nonparticipating contracts, and

(3) The deduction allowed or allowable under section 809(d)(6) (as limited by section 809(f)) for taxable years beginning before January 1, 1963, for group life and group accident and health insurance contracts, and for taxable years beginning after December 31, 1962, for accident and health insurance and group life insurance contracts.

(c) *Subtractions from policyholders surplus account*—(1) *In general.* There shall be subtracted from the cumulative balance in the policyholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the taxable year, an amount equal to the sum of:

(i) The amount which (without regard to subdivision (ii) of this subparagraph) is treated under section 815(a) as distributed out of the policyholders surplus account for the taxable year, plus

(ii) The amount (determined without regard to section 802(a)(3)) by which the tax imposed for taxable years beginning before January 1, 1962, by section 802(a)(1), and for taxable years beginning after December 31, 1961, by section 802(a), is increased by reason of section 802(b)(3).

In addition, there shall be subtracted from the policyholders surplus account for the taxable year those amounts which, at the close of the taxable year, are subtracted or treated as subtracted from the policyholders surplus account under section 815(d) (1) and (4) and paragraphs (a) and (d) of §1.815–6. For purposes of this paragraph, the subtractions from the policyholders surplus account shall be treated as made in the following order:

(a) First the amount determined under section 815(c)(3) by reason of distributions to shareholders during the taxable year which are treated as being made out of the policyholders surplus account;

(b) Next the amount elected to be subtracted from the policyholders surplus account for the taxable year under section 815(d)(1);

(c) Then the amount which is treated as a subtraction from the policyholders surplus account for the taxable year by reason of the limitation provided in section 815(d)(4); and

(d) Finally the amount taken into account upon termination as a life insurance company as provided in section 815(d)(2).

(2) *Method of computing amount subtracted from policyholders surplus account*—(i) *Where life insurance company taxable income, computed without regard to section 802(b)(3), exceeds $25,000.* If the life insurance company taxable income for any taxable year computed under section 802(b), computed without regard to section 802(b)(3), exceeds $25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate for the taxable year.

(ii) *Where life insurance company taxable income does not exceed $25,000.* If the life insurance company taxable income for any taxable year, computed under section 802(b), does not exceed $25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the normal tax rate for the taxable year.

(iii) *Where life insurance company taxable income, computed without regard to section 802(b)(3) does not exceed $25,000, but computed with regard to section 802(b)(3) does exceed $25,000.* If the life insurance company taxable income for any taxable year, computed without regard to section 802(b)(3) does not exceed $25,000, but computed with regard to section 802(b)(3) does exceed $25,000, the amount subtracted from the policyholders surplus account shall be determined in the following manner:

(a) First, determine the amount by which $25,000 exceeds the amount determined under section 802(b) (1) and (2);

(b) Then, multiply the amount determined under *(a)* by a ratio, the numerator of which is 100 percent minus the normal tax rate and the denominator of which is 100 percent;

(c) Next, determine the amount by which the amount treated as distributed out of the policyholders surplus account exceeds the amount determined under *(b)* and multiply such excess by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate; and

(d) Finally, add the amounts determined under *(a)* and *(c)*.

(3) *Illustration of principles.* The application of section 815(c)(3) and subparagraph (2) of this paragraph may be illustrated by the following examples:

Example 1. The life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds $25,000 for the taxable year 1959. Assume that of the amount distributed by S to its shareholders during the taxable year, $9,600 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the sum of the normal tax rate (30%) and the surtax rate (22%) in effect for 1959 is 52 percent. S shall subtract $20,000 from its policyholders surplus account for the taxable year 1959, computed as follows:

$$\$9{,}600\times100/(100-52)=\$9{,}600\times100/48=\$20{,}000$$

Of this amount, $9,600 is due to the application of section 815(c)(3)(A) and $10,400 to the application of section 815(c)(3)(B).

Example 2. Assume that for the taxable year 1960, S, a stock life insurance company, has taxable investment income of $1,000 and a gain from operations of $2,000. Assume further that of the amount distributed by S to its shareholders during the taxable year, $3,500 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since S's life insurance company taxable income does not exceed $25,000 for the taxable year and the normal tax rate in effect for 1960 is 30 percent, S shall subtract $5,000 from its policyholders surplus account for the taxable year 1960, computed as follows:

$$\$3{,}500\times100/(100-30)=\$3{,}500\times100/70=\$5{,}000$$

Of this amount, $3,500 is due to the application of section 815(c)(3)(A), and $1,500 to the application of section 815(c)(3)(B).

Example 3. For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), is $10,000. Assume that of the amount distributed by S to its shareholders during the taxable year, $12,000 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the life insurance company taxable income of S, computed with regard to section 802(b)(3), exceeds $25,000, in order to determine the amount to be subtracted from its policyholders surplus account, S would make up the following schedule:

(1) $25,000 minus life insurance company taxable income, computed without regard to sec. 802(b)(3) ($25,000 minus $10,000	$15,000
(2) Item (1) multiplied by 100 percent minus the normal tax rate as in effect for 1960, over 100 percent ($15,000×(100−30)÷100)	10,500
(3) Amount by which the amount treated as distributed out of policyholders surplus account ($12,000) exceeds item (2) ($10,500), multiplied by 100 percent over 100 percent minus the sum of the normal tax rate and the surtax rate as in effect for 1960 ($1,500×100÷(100−52))	3,125
(4) Item (1) plus item (3) ($15,000 plus $3,125)	18,125

For the taxable year 1960, S shall subtract $18,125 from its policyholders surplus account. Of this amount, $10,500 represents the distribution from the policyholders surplus account which is taxed at a 30 percent tax rate and $1,500 the distribution from the policyholders surplus account which is taxed at a 52 percent tax rate. Thus, of the amount subtracted from the policyholders surplus account for the taxable year 1960, $12,000 is due to the application of section 815(c)(3) (A), and $6,125 to the application of section 815(c)(3)(B).

(d) *Illustration of principles.* The application of section 815(c) and this section may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Taxable investment income	$25,000
Gain from operations	30,000
Tax base (sec. 802(b)(1) and (2))	27,500
Deduction for certain nonparticipating policies provided by sec. 809(d)(5) (as limited by sec. 809(f))	600
Deduction for group policies provided by sec. 809(d)(6) (as limited by sec. 809(f))	400
Amount distributed to shareholders	60,000
Cumulative balance in shareholders surplus account as of 12–31–60	36,000
Balance in policyholders surplus account as of 1–1–60	48,000

For purposes of determining the amount to be subtracted from its policyholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the policyholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in policyholders surplus account as of 1–1–60		$48,000
(2) Additions to account:		
(a) 50 percent of the amount by which the gain from operations ($30,000) exceeds the taxable investment income ($25,000) (1/2 ×$5,000)	$2,500	
(b) The deduction for certain nonparticipating contracts provided by sec. 809(d)(5) (as limited by sec. 809(f))	600	
(c) The deduction for group contracts provided by sec. 809(d)(6) (as limited by sec. 809(f))	400	
		3,500
(3) Cumulative balance in policyholders account as of 12–31–60 (item (1) plus item (2))		51,500

Under the provisions of section 815(a), since the amount distributed to shareholders during the taxable year, $60,000, exceeds the cumulative balance in the shareholders surplus at the end of the taxable year, computed without diminution by reason of distributions during the taxable year, $36,000, the shareholders surplus account shall first be reduced to zero. The remaining $24,000 ($60,000 minus $36,000) of the distribution shall then be treated as made out of the policyholders surplus account. Thus, since the tax base under section 802(b)(1) and (2) is in excess of $25,000, the total amount to be subtracted from the policyholders surplus account at the end of the taxable year would be $50,000 ($24,000×100÷(100−52)). Of this amount $26,000 ($50,000 minus $24,000) represents the tax on the portion of the distribution to shareholders which is treated as being out of the policyholders surplus account.

(e) *Special rule for 1959 and 1960.* For a special transitional rule applicable to any increase in tax liability under section 802(b)(3) for the taxable years 1959 and 1960 which is due solely to the operation of section 815(c)(3) and this section, see section 802(a)(3) and §1.802–5.

[T.D. 6535, 26 FR 543, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§1.815–5 Other accounts defined.

The term *other accounts*, as used in section 815(a)(3) and paragraph (b) of §1.815–2, means all amounts which are not specifically included in the shareholders surplus account under section 815(b) and paragraph (b) of §1.815–3, or in the policyholders surplus account under section 815(c) and paragraph (b) of §1.815–4. Thus, for example, other accounts includes amounts representing the increase in tax due to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the special transitional rule provided in section 802(a)(3) and § 1.802–5, earnings and profits accumulated prior to January 1, 1958, paid-in surplus, capital, etc. To the extent that a distribution (or any portion thereof) is treated as being made out of other accounts, no tax is imposed on the company with respect to such distribution.

[T.D. 6535, 26 FR 544, Jan. 20, 1961]

§ 1.815–6 Special rules.

(a) *Election to transfer amounts from policyholders surplus account to shareholders surplus account*—(1) *In general.* Section 815(d)(1) permits a life insurance company to elect, after the close of any taxable year for which it is a life insurance company, to subtract any amount (or any portion thereof) in its policyholders surplus account as of the close of the taxable year. The effect of such election is to subject the company to tax on the amounts elected to be subtracted for the taxable year for which the election applies. The amount so subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account as of the beginning of the taxable year following the taxable year for which the election applies and no further tax shall be imposed upon the company if the amount elected to be transferred to the shareholders surplus account is subsequently distributed to shareholders.

(2) *Manner and effect of election.* (i) The election provided by section 815(d)(1) and this section shall be made in a statement attached to the life insurance company's income tax return for any taxable year for which the company desires the election to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or his duly authorized representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. In addition, the statement shall indicate that the company has made the election provided under section 815(d)(1) for the taxable year and the amount elected to be subtracted from the policyholders surplus account.

(ii) An election made under section 815(d)(1)(B) and subdivision (i) of this subparagraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such an election has been made for any taxable year it may not be revoked.

(3) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds $25,000. Assume that S elects to subtract $20,000 from its policyholders surplus account under section 815(d)(1) for the taxable year. Since S is subject to a 52 percent tax rate, the tax on the amount elected to be subtracted from the policyholders surplus account (as of the close of the taxable year 1960) is $10,400 ($20,000×52 percent). Thus, the amount to be added to the shareholders surplus account as of January 1, 1961, is $9,600 (the amount subtracted from the policyholders surplus account by virtue of the section 815(d)(1) election, less the tax imposed upon such amount by reason of section 802(b)(3), or $20,000 minus $10,400).

(b) *Termination as life insurance company*—(1) *Effect of termination.* Except as provided in section 381(c)(22) (relating to carryovers in certain corporate readjustments), section 815(d)(2)(A) provides that if for any taxable year the taxpayer is not an insurance company (as defined in paragraph (a) of § 1.801–3), or if for any two successive taxable years the taxpayer is not a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), the amount taken into account under section 802(b)(3) for the last preceding year for which the company was a life insurance company shall be increased (after the application of section 815(d)(2)(B)) by the entire balance in the policyholders surplus account at the close of such last preceding taxable year.

(2) *Effect of certain distributions.* If for any taxable year the taxpayer is an insurance company (as defined in paragraph (a) of § 1.801–3) but is not a life

insurance company (as defined in section 801(a) and paragraph (b) of §1.801–3), section 815(d)(2)(B) provides that any distribution to shareholders during such taxable year shall be treated as having been made on the last day of the last preceding taxable year for which the company was a life insurance company.

(3) *Examples.* The application of section 815(d)(2) and this paragraph may be illustrated by the following examples:

Example 1. At the end of the taxable year 1959, the balance in the policyholders surplus account of S, a life insurance company within the meaning of section 801(a) and paragraph (b) of §1.801–3, is $12,000. If S fails to qualify as an insurance company (as defined in paragraph (a) of §1.801–3) for the taxable year 1960, and section 381(c)(22) does not apply, under the provisions of section 815(d)(2)(A), the entire balance of $12,000 in the policyholders surplus account at the end of 1959, the last year S was a life insurance company, shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

Example 2. Assume the facts are the same as in example 1, except that for the taxable years 1960 and 1961, S qualifies as an insurance company (as defined in paragraph (a) of §1.801–3) but does not qualify as a life insurance company within the meaning of section 801(a) and paragraph (b) of §1.801–3. Assume further that as a result of a distribution by S to its shareholders in 1960, $4,800 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Under the provisions of section 815(d)(2)(B), if section 381(c)(22) does not apply, any distribution to shareholders during the taxable years 1960 and 1961 shall be treated as having been made on December 31, 1959 (the last day of the last preceding taxable year for which S was a life insurance company). Thus, assuming S is subject to a 52 percent tax rate on additions to life insurance company taxable income, $10,000 ($4,800 plus $5,200, the tax on the portion of the distribution treated as made out of the policyholders surplus account) shall be treated as being subtracted from the policyholders surplus account at the end of 1959 and shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959. Under the provisions of section 815(d)(2)(A), the entire balance of $2,000 ($12,000 minus $10,000) in the policyholders surplus account at the end of 1959 (after the application of section 815(d)(2)(B)), shall also be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

(c) *Treatment of certain indebtedness.* Section 815(d)(3) provides that if a taxpayer makes any payment in discharge of its indebtedness and such indebtedness is attributable to a distribution by the taxpayer to its shareholders after February 9, 1959, the amount of such payment shall be treated as a distribution in cash to shareholders both for purposes of section 802(b)(3) and section 815. However, this paragraph shall only apply to the extent that the distribution of such indebtedness to shareholders was treated as being out of accounts other than the shareholders and policyholders surplus accounts at the time of distribution.

(d) *Limitation on amount in policyholders surplus account*—(1) *In general.* Section 815(d)(4) provides a limitation on the amount that any life insurance company may accumulate in its policyholders surplus account. If the policyholders surplus account at the end of any taxable year (computed without regard to this paragraph) exceeds whichever of the following is the greatest:

(i) 15 percent of life insurance reserves (as defined in section 801(b) and paragraph (a) of §1.801–4) at the end of the taxable year.

(ii) 25 percent of the amount by which the life insurance reserves at the end of the taxable year exceed the life insurance reserves at the end of 1958, or

(iii) 50 percent of the net amount of the premiums and other consideration taken into account for the taxable year under section 809(c)(1),

then such excess shall be treated as a subtraction from the policyholders surplus account as of the end of such taxable year. The amount so treated as subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account at the beginning of the succeeding taxable year.

(2) *Example.* The application of the limitation contained in subparagraph (1) of this paragraph may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Balance in policyholders surplus account, computed without regard to sec. 815(d)(4), as of 12–31–60	$175
Life insurance reserves (as defined in sec. 801(b)) as of 12–31–60	4,500
Life insurance reserves (as defined in sec. 801(b)) as of 12–31–58	3,900
Premiums and other consideration taken into account for the taxable year under sec. 809(c)(1)	310

In order to determine the limitations on the amount that it may accumulate in its policyholders surplus account at the end of the taxable year under section 815(d)(4), S would make up the following schedule:

(1) 15 percent of life insurance reserves at the end of the taxable year (15%×$4,500)	$675
(2) 25 percent of amount by which life insurance reserves at the end of the taxable year ($4,500) exceed life insurance reserves as of 12–31–58 ($3,900) (25%×$600)	150
(3) 50 percent of premiums and other consideration taken into account under sec. 809(c)(1) for the taxable year (50%×$310)	155
(4) Limitation on policyholders surplus account (the greatest of items (1), (2), or (3))	675

Since the balance in the policyholders surplus account at the end of the taxable year 1960, $175, does not exceed the limitation provided by section 815(d)(4), $675, S is not required to make any further adjustment to its policyholders surplus account at the end of the taxable year.

(e) *Special rule for certain mutualizations*—(1) *In general.* Section 815(e) provides a rule for determining priorities which shall operate in place of section 815(a) and paragraph (b) of § 1.815–2 where a life insurance company makes any distribution to its shareholders after December 31, 1958, in acquisition of stock pursuant to a plan of mutualization. Section 815(e)(1) provides that such a distribution shall first be treated as being made out of paid-in capital and paid-in surplus, and, to the extent thereof, no tax shall be imposed on the company with respect to such distribution. Thereafter, distributions made pursuant to such plan of mutualization shall be treated as made in two allocable parts. One part shall be treated as being made out of other accounts (as defined in § 1.815–5) and the company shall incur no tax with respect to such portion of the distribution. The other part shall be treated as a distribution to which section 815(a) and paragraph (b) of § 1.815–2 applies. Thus, such portion of the distribution shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and § 1.815–3), to the extent thereof, and then out of the policyholders surplus account (as defined in section 815(c) and § 1.815–4), to the extent thereof. See paragraph (a) of § 1.815–2. For purposes of this paragraph, a distribution shall be considered as being made pursuant to a plan of mutualization only if the requirements of applicable State law for the adoption of such plan (as, for example, approval by the requisite majority of the board of directors, shareholders, and policyholders) have been fulfilled.

(2) *Allocation ratio.* Section 815(e)(2)(A) provides an allocation ratio which when applied to the amount distributed under a plan of mutualization in excess of the balance in the paid-in capital and paid-in surplus accounts determines the portion of such excess to be treated as distributed out of the shareholders surplus account, policyholders surplus account, or other accounts. The numerator of this ratio is the excess of the assets of the company (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805–5) over the total liabilities (including reserves), both determined as of December 31, 1958, and adjusted in the manner provided in subparagraph (3) of this paragraph. The denominator of this ratio is the amount included in the numerator plus the amounts in the shareholders surplus account and policyholders surplus account, all determined as of the beginning of the year of the distribution.

(3) *Adjustment for certain distributions.* Section 815(e)(2)(B) provides that if between 1958 and the year of distribution the taxpayer has been treated as having made a distribution (under a plan of mutualization or otherwise) which is treated as a return of paid-in capital and paid-in surplus or as out of other accounts (as defined in § 1.815–5), the aggregate amount of any such prior distributions must be subtracted from the numerator and denominator in all cases where the allocation ratio provided by subparagraph (2) of this paragraph applies.

(f) *Recomputation required as a result of a subsequent loss from operations under section 812*—(1) *In general.* Any amounts added to or subtracted from the special surplus accounts referred to in section 815(a) and paragraph (b) of

§ 1.815–2 for any taxable year shall be adjusted to the extent necessary to properly reflect a subsequent loss from operations which under section 812 is carried back to the taxable year for which such additions or subtractions were made.

(2) *Example.* The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Assume that for the taxable years 1959 through 1961, the books of S, a stock life insurance company subject to a 30 percent tax rate for all taxable years involved, reflect the following items:

	1959	1960	1961
Taxable investment income	$40.00	$40.00	$40.00
Gain from operations	60.00	60.00	60.00
Tax base (sec. 802(b)(1) and (2))	50.00	50.00	50.00
Tax (sec. 802(b)(1) and (2) base)	15.00	15.00	15.00
Shareholders surplus account—			
At beginning of year	0	35.00	37.00
Added at beginning of year by reason of election under sec. 815(d)(1)	0	7.00	0
Added for year (without regard to election under sec. 815(d)(1))	35.00	35.00	35.00
Subtracted (distributions)	0	40.00	40.00
Policyholders surplus account—			
At beginning of year	0	0	10.00
Added for year	10.00	10.00	10.00
Subtracted (distributions)	0	0	0
Subtracted (by reason of election under sec. 815(d)(1))	10.00	0	0
Tax base (sec. 802(b)(3))	10.00	0	0
Tax (sec. 802(b)(3) base)	3.00	0	0

Assume further that S has a loss from operations for the taxable year 1962 of $25. Under the provisions of section 812, the $25 loss from operations would be carried back to the taxable year 1959 and would reduce the 1959 tax base under section 802(b)(1) and (2) to $35 ($60 minus $25). After adjustments reflecting the 1962 loss from operations, the results for the taxable years 1959 through the beginning of 1962 would be as follows:

	1959	1960	1961	1962
Taxable investment income	$40.00	$40.00	$40.00	....
Gain from operations	35.00	60.00	60.00	....
Tax base (sec. 802(b)(1) and (2))	35.00	50.00	50.00	....
Tax (sec. 802(b)(1) and (2) base)	10.50	15.00	15.00	....
Shareholders surplus account—				
At beginning of year	0	24.50	19.50	$14.50
Added for year (without regard to election under sec. 815(d)(1))	24.50	35.00	35.00	....
Added by reason of election under sec. 815(d)(1	0	0	0	....
Subtracted (distributions)	0	40.00	40.00	....
Policyholders surplus account—				
At beginning of year	0	0	10.00	20.00
Added for year	0	10.00	10.00	....
Subtracted (distributions)	0	0	0	....
Subtracted (by reason of election under sec. 815(d)(1))	0	0	0	....
Tax base (sec. 802(b)(3))	0	0	0	....
Tax (sec. 802(b)(3) base)	0	0	0	....

As a result of the loss from operations for 1962, the election under section 815(d)(1) for the taxable year 1959 has become inapplicable in its entirety since the balance in the policyholders surplus account at the end of 1959, as recomputed, is zero. Thus, S would be entitled to a total refund of $7.50 for the taxable year 1959. Of this amount, $4.50 is due to the recomputation of the section 802(b)(1) and (2) tax base and $3 to the amount of tax paid by reason of the election under section 815(d)(1).

[T.D. 6535, 26 FR 545, Jan. 20, 1961]

MISCELLANEOUS PROVISIONS

§ 1.817–1 Taxable years affected.

Except as otherwise provided therein, §§ 1.817–2 through 1.817–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.817–2 Treatment of capital gains and losses.

(a) *In general.* For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) prior to its amendment by section 3 of the Act of October 23, 1962 (76 Stat. 1134), imposes a separate tax equal to 25 percent of such excess. For taxable years beginning after December 31, 1961, if the net long-term capital gain of any life insurance company exceeds its net short-term capital loss, section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses, such as subchapter O (relating to gain or loss on disposition of property), subchapter P (relating to capital gains and losses), etc., shall apply with respect to life insurance companies.

(b) *Modification of section 1221 and 1231.* (1) In the case of a life insurance company, section 817(a)(1) provides that for purposes of applying section 1231(a) (relating to property used in the trade or business and involuntary conversions), the term *property used in the trade or business* shall be treated as including only:

(i) Property used in carrying on an insurance business, of a character subject to the allowance for depreciation under section 167 (even though fully depreciated), held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977), and real property used in carrying on an insurance business, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977), and which is not:

(a) Property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year;

(b) Property held by the taxpayer primarily for sale to customers in the ordinary course of business; or

(c) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property held by a taxpayer described in section 1221(3). In the case of a letter, memorandum, or property similar to a letter or memorandum, this subdivision *(c)* applies only to sales and other dispositions occurring after July 25, 1969.

(ii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(2) In the case of a life insurance company, section 817(a)(2) provides that for purposes of applying section 1221(2) (relating to the exclusion of certain property from the term capital asset), the reference to property used in trade or business shall be treated as including only property used in carrying on an insurance business.

(3) Section 1231(a), as modified by section 817(a)(1) and subparagraph (1) of this paragraph, shall apply to recognized gains and losses from the following:

(i) The sale, exchange, or involuntary conversion of the following property, if held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977):

(a) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(b) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company; and

(c) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(ii) The involuntary conversion of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977).

(iii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(4) Section 1221(2), as modified by section 817(a)(2) and subparagraph (2) of

this paragraph, shall include only the following property;

(i) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(ii) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company; and

(iii) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(5) If an asset described in subparagraph (3) (i)(*a*), (*b*), or (*c*) or subparagraph (4) of this paragraph, or any portion thereof, is also an ''investment asset'' (an asset from which gross investment income, as defined in section 804(b), is derived), such asset, or portion thereof, shall not be treated as an asset used in carrying on an insurance business. Accordingly, the gains or losses from the sale or exchange (or considered as from the sale or exchange) of depreciable assets attributable to any trade or business, other than the insurance trade or business, carried on by the life insurance company, such as operating a radio station, housing development, or a farm, or renting various pieces of real estate shall be treated as gains or losses from the sale or exchange of a capital asset unless such asset is involuntarily converted (within the meaning of paragraph (e) of §1.123–1).

(c) *Illustration of principles.* The provisions of section 817(a) and this section may be illustrated by the following examples:

Example 1. L, a life insurance company, has recognized gains and losses for the taxable year 1959 from the sale or involuntary conversion of the following items:

	Gains	*Losses*
Stocks, held for more than 6 months	$100,000	....
Bonds, held for more than 6 months	....	$5,000
Housing development, held for more than 6 months	....	400,000
Branch office building owned and occupied by L, held for more than 6 months	....	115,000
Furniture and equipment used in the investment department, held for more than 6 months	30,000	....
Radio station, held for more than 6 months	200,000	....
Involuntary conversion of apartment building, held for more than 6 months	7,000	....

The recognized gains and losses from the sale of the stocks, bonds, housing development, and radio station shall be treated as gains and losses from the sale of capital assets since such items are capital assets within the meaning of section 1221 (as modified by section 817(a)(2)). Accordingly, the provisions of section 1231 shall not apply to the sale of such capital assets. However, the provisions of section 1231 (as modified by section 817(a)(1)) shall apply to the sale of the branch office building and the furniture and equipment, and the apartment building involuntarily converted. Since the aggregate of the recognized losses ($115,000) exceeds the aggregate of the recognized gains ($37,000), the gains and losses are treated as ordinary gains and losses.

Example 2. Y, a life insurance company, owns a twenty-story home office building, having an adjusted basis of $15,000,000, ten floors of which it rents to various tenants, one floor of which is utilized by it in operating its investment department, and the remaining nine floors of which are occupied by it in carrying on its insurance business. If in 1960, Y sells the building for $10,000,000, Y must first apportion its basis between that portion of the building (one-half) used in carrying on an insurance business, and that portion of the building (one-half) classified as an ''investment asset'', before it can determine the character of the loss attributable to each portion of the building. For such purpose, the one floor utilized by Y in operating its investment department is treated as used in carrying on an insurance business. Assuming that each portion of the building bears an equal (one-half) relation to the basis of the entire building, Y (without regard to section 817(b)) would have a $2,500,000 ordinary loss on that portion used in carrying on an insurance business (assuming that Y had no gains subject to section 1231), and a $2,500,000 capital loss on that portion of the building classified as an investment asset.

[T.D. 6558, 26 FR 2782, Apr. 4, 1961, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 7369, 40 FR 29840, July 16, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.817–3 Gain on property held on December 31, 1958, and certain substituted property acquired after 1958.

(a) *Limitation on gain recognized on property held on December 31, 1958.* (1) Section 817(b)(1) limits the amount of gain that shall be recognized on the sale or other disposition of property other than insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property) if:

(i) The property was held (or treated as held within the meaning of paragraph (c)(1) of this section) by a life insurance company on December 31, 1958;

(ii) The taxpayer has been a life insurance company at all times on and after December 31, 1958, including the date of the sale or other disposition of the property; and

(iii) The fair market value of the property on December 31, 1958, exceeds the adjusted basis for determining gain as of such date.

The gain on the sale or other disposition of such property shall be limited to an amount (but not less than zero) equal to the amount by which the gain (determined without regard to section 817(b)(1)) exceeds the difference between fair market value of such property on December 31, 1958, and the adjusted basis for determining gain as of such date. Accordingly, the tax imposed under section 802(a) shall apply with respect to the amount of gain so limited. In addition, in the case of a stock life insurance company, the amount of such gain shall be taken into account under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to the shareholders surplus account (as defined in section 815(b) and § 1.815–3) for the taxable year. Furthermore, the amount of the gain (determined without regard to section 817(b)(1) and this paragraph) which is not taken into account under section 802(a) and under paragraph (f) of § 1.802–3 by reason of the application of section 817(b)(1) shall be included in other accounts (as defined in § 1.815–5) by such a company for the taxable year.

(2) Section 817(b)(1) and subparagraph (1) of this paragraph shall not apply for purposes of determining loss with respect to property held on December 31, 1958.

(b) *Illustration of principles.* The application of section 817(b)(1) and paragraph (a) of this section may be illustrated by the following examples:

Example 1. On December 31, 1958, J, a stock life insurance company, owned stock of Z Corporation and on such date the stock had an adjusted basis for determining gain of $5,000 and a fair market value of $6,000. On August 1, 1959, the company sells such stock for $8,000. Assuming J qualifies as a life insurance company for the taxable year 1959, and applying the provisions of section 817(b)(1) and paragraph (a) of this section, the gain recognized (assuming no adjustment to basis for the period since December 31, 1958) on the sale shall be limited to $2,000 (the amount by which the gain realized, $3,000, exceeds the difference, $1,000, between the fair market value, $6,000, and the adjusted basis, $5,000, for determining gain on December 31, 1958). Thus, J shall take into account $2,000 under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to its shareholders surplus account for the taxable year and shall include $1,000 in other accounts for the taxable year.

Example 2. The facts are the same as in example 1, except that the selling price is $5,800. In such case, no gain shall be recognized even though there is a realized gain of $800 since such realized gain does not exceed the difference ($1,000) between the fair market value ($6,000) and the adjusted basis ($5,000) for determining gain on December 31, 1958. Furthermore, no loss shall be realized or recognized as a result of this transaction. Thus, J shall include $800 in other accounts for the taxable year and shall not take into account any amount under section 815(b)(2)(A)(ii).

Example 3. The facts are the same as in example 1, except that the adjusted basis for determining loss is $5,000 and the selling price is $4,500. In such case, since J has sustained a loss, section 817(b)(1) does not apply.

(c) *Certain substituted property acquired after December 31, 1958.* Section 817(b)(2) provides that if a life insurance company acquires property after December 31, 1958, in exchange for property actually held by the company on December 31, 1958, and the property acquired has a substituted basis within the meaning of section 1016(b) and § 1.1016–10, the following rules shall apply:

(1) For purposes of section 817(b)(1), such acquired property shall be deemed as having been held continuously by

the taxpayer since the beginning of the holding period thereof as determined under section 1223;

(2) The fair market value and adjusted basis referred to in section 817(b)(1) shall be that of that property for which the holding period taken into account includes December 31, 1958;

(3) Section 817(b)(1) shall apply only if the property or properties, the holding periods of which are taken into account, were held only by life insurance companies after December 31, 1958, during the holding periods so taken into account;

(4) The difference between the fair market value and adjusted basis referred to in section 817(b)(1) shall be reduced (but not below zero) by the excess of (i) the gain that would have been recognized but for section 817(b) on all prior sales or other dispositions after December 31, 1958, of properties referred to in section 817(b)(2)(C) over (ii) the gain that was recognized on such sales or other dispositions; and

(5) The basis of such acquired property shall be determined as if the gain which would have been recognized but for section 817(b) were recognized gain.

For purposes of section 817(b)(2) and this paragraph, the term *property* does not include insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property). Furthermore, the provisions of section 817(b)(1) and paragraph (a)(1) of this section shall not apply for purposes of determining loss with respect to property described in section 817(b)(2) and this paragraph.

(d) *Illustration of principles.* The application of section 817(b)(2) and paragraph (c) of this section may be illustrated by the following example:

Example. Assume that W, a life insurance company, owns property B on December 31, 1958, at which time its adjusted basis was $1,000 and its fair market value was $1,800. On January 31, 1960, in a transaction to which section 1031 (relating to exchange of property held for productive use or investment) applies, W receives property H having a fair market value of $1,700 plus $300 in cash in exchange for property B. The gain realized on the transaction, without regard to section 817(b) is $1,000 (assuming no adjustments to basis for the period since December 31, 1958). Under the provisions of section 817(b)(1) the gain is limited to $200. The entire $200 shall be recognized since such amount is less than the amount of gain ($300) which would be recognized under section 1031. Applying the provisions of section 817(b)(2) and paragraph (c) of this section, the basis of property H shall be determined as if the entire $300 of cash received is recognized gain. Thus, the basis of property H under section 1031 is $1,000 ($1,000 (the basis of property B) minus $300 (the amount of money received) plus $300 (the recognized gain of $200 plus $100 which would have been recognized but for section 817(b)). If W later sells property H for $2,200 cash, and assuming no further adjustments to its basis of $1,000, the gain realized is $1,200, but due to the application of section 817(b)(2) the amount of gain recognized is $500, computed as follows:

Selling price		$2,200
Less: Adjusted basis as of date of sale		1,000
Gain realized		1,200
Fair market value as of 12–31–58	$1,800	
Adjusted basis as of 12–31–58	1,000	
Excess of fair market value over adjusted basis	800	
Less: Excess of gain which would have been recognized on all prior dispositions but for sec. 817(b) over gain recognized on all prior dispositions ($300 minus $200)	100	
		$700
Gain recognized	500	

[T.D. 6558, 26 FR 2783, Apr. 4, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.817–4 Special rules.

(a) *Limitation on capital loss carryovers.* Section 817(c) provides that a net capital loss (as defined in section 1222(10)) for any taxable year beginning before January 1, 1959, shall not be taken into account. For any taxable year beginning after December 31, 1958, the provisions of part II, subchapter P, chapter 1 of the Code (relating to the treatment of capital losses) shall be applicable to life insurance companies for purposes of determining the tax imposed by section 802(a) and § 1.802–3 (relating to the imposition of tax in case of capital gains).

(b) *Gain on transactions occurring prior to January 1, 1959.* For purposes of part I, subchapter L, chapter 1 of the Code, section 817(d) provides that:

(1) There shall be excluded from tax any gain from the sale or exchange of a capital asset, and any gain considered as gain from sale or exchange of a

capital asset, which results from sales or other dispositions of property prior to January 1, 1959; and

(2) Any gain after December 31, 1958, resulting from the sale or other disposition of property prior to January 1, 1959, which, but for this subparagraph would be taken into account under section 1231, shall not be taken into account under section 1231.

For example, if a life insurance company makes an installment sale of a capital asset prior to January 1, 1959, and payments are received after such date, any capital gain attributable to such sale shall not be taken into account for purposes of section 802(a). Furthermore, any gain referred to in subparagraphs (1) and (2) and the preceding sentence shall not be taken into account in determining the excess of the net short-term capital gain over the net long-term capital loss (and for taxable years beginning after December 31, 1961, the excess of the net long-term capital gain over the net short-term capital loss) for purposes of computing taxable investment income under section 804(a)(2) or gain or loss from operations under section 809(b).

(c) *Certain reinsurance transactions in 1958.* For purposes of part I, section 817(e) provides that where a life insurance company reinsures (or sells) all of its insurance contracts of a particular type, such as an entire industrial department, in either a single transaction, or in a series of related transactions, all of which occurred during 1958, and the reinsuring (or purchasing) company or companies assume all liabilities under such contracts, such reinsurance (or sale) shall be treated as the sale of a capital asset. However, such transaction shall be subject to the provisions of section 806(a) and § 1.806–3 (relating to adjustments for certain changes in reserves and assets).

(d) *Certain other reinsurance transactions.* (1) For any taxable year beginning after December 31, 1958, the reinsurance of all or a part of the insurance contracts of a particular type by a life insurance company, in either a single transaction, or in a series of related transactions, occurring in any such taxable year, whereby the reinsuring company or companies assume all liabilities under such contracts, shall not be treated as the sale or exchange of a capital asset but shall be subject to the provisions of section 806(a) and 809 and the regulations thereunder. However, if in connection with a transaction described in the preceding sentence the reinsured or reinsurer transfers an asset which is a capital asset within the meaning of section 1221 (as modified by section 817(a)(2)), such transfer shall be treated as the sale or exchange of a capital asset by the transferor.

(2)(i) The consideration paid by the reinsured to the reinsurer in connection with a transaction described in subparagraph (1) of this paragraph shall be treated as an item of deduction under section 809(d)(7). However any amount received by the reinsured from the reinsurer shall be applied against and reduce (but not below zero) the amount of such consideration, and to the extent that it exceeds such consideration, shall be treated as an item of gross amount under section 809(c)(3).

(ii) In connection with an assumption reinsurance (as defined in paragraph (a)(7)(ii) of § 1.809–5) transaction, a reinsurer shall in any taxable year beginning after December 31, 1957:

(A) Treat the consideration received from the reinsured in any such taxable year as an item of gross amount under section 809(c)(1), and

(B) Treat any amount paid to the reinsured for the purchase of such contracts, to the extent such amount meets the requirements of section 162, as a deferred expense that may be amortized over the reasonably estimated life (as defined in paragraph (d)(2)(iv) of this section) of the contracts reinsured and treat the portion of the expense so amortized in each taxable year as a deduction under section 809(d)(12) irrespective of the taxable year in which such amount was paid to the reinsured.

(iii) For purposes of paragraph (d)(2)(ii) of this section where the reinsured transfers to the reinsurer in connection with the assumption reinsurance transaction a net amount which is less than the increase in the reinsurer's reserves resulting from the transaction, the reinsurer shall be treated as:

(A) Having received from the reinsured consideration in an amount equal to the net amount of the increase in the reinsurer's reserves resulting from the transaction, and

(B) Having paid the reinsured an amount for the purchase of the contracts equal to the excess of the amount of such increase in the reinsurer's reserves over the net amount received from the reinsured.

(iv) For purposes of this subparagraph, the term *reasonably estimated life* means the period during which the contract reinsured remains in force. Such period shall be based on the facts in each case (such as age, health, and sex of the insured, type of contract reinsured, etc.) and the assuming company's experience (such as mortality, lapse rate, etc.) with similar risks.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example 1. On June 30, 1959, X, a life insurance company, reinsured a portion of its insurance contracts with Y, a life insurance company, under an agreement whereby Y agreed to assume and to become solely liable under the contracts reinsured. The reserves on the contracts reinsured by X were $100,000. Under the reinsurance agreement X agreed to pay Y $100,000 for assuming such contracts and Y agreed to pay X $17,000 for the right to receive future premium payments under this block of contracts. Rather than exchange payments of money, X agreed to pay Y a net amount of $83,000 in cash. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, that there are no other insurance transactions by X or Y during the taxable year, and assuming that X and Y compute the reserves on the contracts reinsured on the same basis, X has income of $100,000 under section 809(c)(2) as a result of the net decrease in its reserves. X has a net deduction of $83,000 ($100,000−$17,000) under section 809(d)(7). For the taxable year 1959, Y has income of $100,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of $100,000 under section 809(d)(2) for the net increase in reserves and $1,000 ($17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining $16,000 shall be amortized over the next 16 succeeding taxable years (16×$1,000=$16,000) under section 809(d)(12) at the rate of $1,000 for each such taxable year.

Example 2. The facts are the same as in example 1, except X agreed to pay Y a consideration of $100,000 in cash for assuming these contracts and Y paid X a bonus of $17,000 in cash and that this bonus meets the requirements of section 162. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, X has income of $100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of $83,000 under section 809(d)(7) for the amount of the consideration ($100,000) paid to Y for assuming these contracts, reduced by the bonus ($17,000) received from Y. For the taxable year 1959, Y has income of $100,000 under section 809(c)(1) as a result of the consideration received from X and deductions of $100,000 under section 809(d)(2) for the net increase in reserves and $1,000 (the bonus of $17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining amount of the bonus ($16,000) shall be amortized over the next 16 succeeding taxable years (16×$1,000=$16,000) under section 809(d)(12) at the rate of $1,000 for each such taxable year.

Example 3. The facts are the same as in Example 1, except that the reinsurance agreement does not specifically provide that X agreed to pay Y $100,000 for assuming the contracts reinsured and Y agreed to pay X $17,000 for the right to receive future premium payments under such contracts. Instead, X agreed to pay Y a net amount of $83,000 in cash for assuming such contracts. Nevertheless, Y is treated as having received from X consideration equal to $100,000, the amount of the increase in Y's reserves, and as having paid $17,000 ($100,000 less $83,000) for the purchase of such contracts. Therefore, for the taxable year 1959, Y has income of $100,000 under section 809(c)(1). Y also has a deduction of $100,000 under section 809(d)(2) for the net increase in its reserves and an amortization deduction under section 809(d)(12) of $1,000 ($17,000 divided by 17, the reasonably estimated life of the contracts reinsured). The remaining $16,000 shall be amortized by Y over the next 16 succeeding years at the rate of $1,000 for each such year. For 1959, X has income of $100,000 under section 809(c)(2) as a result of the net decrease in its reserves and a deduction of $83,000 under section 809(d)(7) for the net amount of consideration paid to Y for assuming the contracts reinsured.

Example 4. The facts are the same as in example 1, except that X agreed to pay Y a consideration of $130,000 in cash for assuming such contracts. Based upon these facts, X has income of $100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of $130,000 under section 809(d)(7) for the amount of the consideration paid to Y for assuming these contracts. Y has income of $130,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of $100,000 under section 809(d)(2) for the net increase in its reserves.

Example 5. On August 1, 1960, R, a life insurance company, reinsured all of its insurance policies with S, a life insurance company, under an agreement whereby S agreed to assume and become solely liable under the contracts reinsured. The reserves on the contracts reinsured by R were $3,000,000. Under the reinsurance agreement, R agreed to pay S a consideration of $3,000,000 in stocks and bonds for assuming such contracts. Assuming no other insurance transactions by R or S during the taxable year, that R and S compute the reserves on the contracts reinsured on the same basis, and that R has a recognized gain (after the application of the limitation of section 817(b)(1)) of $20,000 due to appreciation in value of the assets transferred, the results to each company are as follows:

Company R (reinsured)	
Net decrease in reserves (sec. 809(c) (2))	$3,000,000
Capital gain (as limited by sec. 817(b) (1)) to be taxed separately under sec. 802(a)(2)	20,000
Consideration paid by R to S in respect of S's assuming liabilities under contracts issued by R (sec. 809(d)(7))	$3,000,000
INCOME	
Company S (reinsurer)	
Consideration received by S in respect of assuming liabilities under contracts issued by R (sec. 809(c)(1))	$3,000,000
DEDUCTIONS	
Net increase in reserves (sec.809(d)(2))	$3,000,000

[T.D. 6558, 26 FR 2783, Apr. 4, 1961, as amended by T.D. 6625, 27 FR 12543, Dec. 19, 1962; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 41 FR 5100, Feb. 4, 1976]

§ 1.817–5 Diversification requirements for variable annuity, endowment, and life insurance contracts.

(a) *Consequences of nondiversification*—(1) *In general.* Except as provided in paragraph (a)(2) of this section, for purposes of subchapter L, section 72, and section 7702(a), a variable contract (as defined in section 817(d)), other than a pension plan contract (as defined in section 818(a)), which is based on one or more segregated asset accounts shall not be treated as an annuity, endowment, or life insurance contract for any calendar quarter period for which the investments of any such account are not adequately diversified. For this purpose, a variable contract shall be treated as based on a segregated asset account for a calendar quarter period if amounts received under the contract (or earnings thereon) are allocated to the segregated asset account at any time during the period. In addition, a variable contract that is not treated as an annuity, endowment, or life insurance contract for any period by reason of this paragraph (a)(1) shall not be treated as an annuity, endowment, or life insurance contract for any subsequent period even if the investments are adequately diversified for such subsequent period. If a variable contract which is a life insurance or endowment contract under other applicable (e.g., State or foreign) law is not treated as a life insurance or endowment contract under section 7702(a), the income on the contract for any taxable year of the policyholder is treated as ordinary income received or accrued by the policyholder during such year in accordance with section 7702 (g) and (h). Likewise, if a variable contract is not treated as an annuity contract under section 72, the income on the contract for any taxable year of the policyholder shall be treated as ordinary income received or accrued by the policyholder during such year in the same manner as a life insurance or endowment contract under section 7702 (g) and (h).

(2) *Inadvertent failure to diversify.* The investments of a segregated asset account shall be treated as satisfying the requirements of paragraph (b) of this section for one or more periods, provided the following conditions are satisfied—

(i) The issuer or holder must show the Commissioner that the failure of the investments to satisfy the requirements of paragraph (b) of this section for such period or periods was inadvertent,

(ii) The investments of the account must satisfy the requirements of paragraph (b) of this section within a reasonable time after the discovery of such failure, and

(iii) The issuer or holder of the variable contract must agree to make such adjustments or pay such amounts as may be required by the Commissioner with respect to the period or periods during which the investments of the account did not satisfy the requirements of paragraph (b) of this section. The amount required by the Commissioner to be paid shall be an amount based upon the tax that would have been owed by the policyholders if they were treated as receiving the income on the contract (as defined in section

7702(g)(1)(B), without regard to section 7702(g)(1)(C)) for such period or periods.

(b) *Diversification of investments*—(1) *In general.* (i) Except as otherwise provided in this paragraph and paragraph (c) of this section, the investments of a segregated asset account shall be considered adequately diversified for purposes of this section and section 817(h) only if—

(A) No more than 55% of the value of the total assets of the account is represented by any one investment;

(B) No more than 70% of the value of the total assets of the account is represented by any two investments;

(C) No more than 80% of the value of the total assets of the account is represented by any three investments; and

(D) No more than 90% of the value of the total assets of the account is represented by any four investments.

(ii) For purposes of this section—

(A) All securities of the same issuer, all interests in the same real property project, and all interests in the same commodity are each treated as a single investment; and

(B) In the case of government securities, each government agency or instrumentality shall be treated as a separate issuer.

(iii) See paragraph (f) of this section for circumstances in which a segregated asset account is treated as the owner of assets held indirectly through certain pass-through entities and corporations taxed under subchapter M, chapter 1 of the Code.

(2) *Safe harbor.* A segregated asset account will be considered adequately diversified for purposes of this section and section 817(h) if—

(i) The account meets the requirements of section 851 (b)(4) and the regulations thereunder; and

(ii) No more than 55% of the value of the total assets of the account is attributable to cash, cash items (including receivables), government securities, and securities of other regulated investment companies.

(3) *Alternative diversification requirements for variable life insurance contracts.* (i) A segregated asset account with respect to variable life insurance contracts will be considered adequately diversified for purposes of this section and section 817(h) if the requirements of paragraph (b)(1) or (b)(2) of this section are satisfied or if the assets of such account, other than Treasury securities, satisfy the percentage limitations prescribed in paragraph (b)(1) of this section increased by the product of (A) .5 and (B) the percentage of the value of the total assets of the account that is represented by Treasury securities. In determining whether the assets of an account, other than Treasury securities, satisfy the increased percentage limitations, such limitations are applied as if the Treasury securities were not included in the account (*i.e.*, the increased percentage limitations are not applied to Treasury securities and the value of the total assets of the account is reduced by the value of the Treasury securities).

(ii) The provisions of this paragraph (b)(3) may be illustrated by the following examples:

Example 1. On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $90,000 and securities of Corporation A having a total value of $10,000. The 55% limit described in paragraph (b)(1)(i) of this section would be increased by 45% (0.5×90%) to 100%, and would then be applied to the assets of the account other than Treasury securities. Because no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporation A, the investments of the account will be considered adequately diversified.

Example 2. On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $60,000, securities of Corporation A having a total value of $30,000, and securities of Corporation B having a total value of $10,000. The 55% and 70% limits described in paragraph (b)(1)(i) of this section would be increased by 30% (0.5×60%) to 85% and 100%, respectively, and would then be applied to the assets of the account other than Treasury securities. Securities of Corporation A represent 75%, and securities of Corporation B represent 25%, of the value of the assets of the account other than Treasury securities. Because no more than 85% of the value of the assets other than Treasury securities is represented by securities of Corporation A or B and no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporations A and B, the investments of the account will be considered adequately diversified.

(c) *Periods for which an account is adequately diversified*—(1) *In general.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the last day of a quarter of a calendar year (*i.e.,* March 31, June 30, September 30, and December 31) or within 30 days after such last day shall be considered adequately diversified for such quarter.

(2) *Start-up period.* (i) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is not a real property account on its first anniversary shall be considered adequately diversified until such first anniversary.

(ii) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is a real property account on its first anniversary shall be considered adequately diversified until the earlier of its fifth anniversary or the anniversary on which the account ceases to be a real property account.

(iii) For purposes of paragraph (c)(2) (i) and (ii) of this section, the anniversary of a segregated asset account is the anniversary of the date on which any amount received under a life insurance or annuity contract, other than a pension plan contract (as defined in section 818 (a)), is first allocated to the account.

(iv) If more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, paragraph (c)(2)(i) of this section shall not apply to the segregated asset account for any period after such date. Similarly, if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than 5 years before such date, paragraph (c)(2)(ii) of this section shall not apply to the segregated asset account for any period after such date. For purposes of this paragraph (c)(2), amounts transferred to the account from a diversified account (determined without regard to this paragraph (c)(2)) or as a result of an exchange pursuant to section 1035 in which the issuer of the contract received in the exchange is not related in a manner specified in section 267(b) to the issuer of the contract transferred in the exchange are not treated as—

(A) Amounts attributable to contracts entered into more than one year before such date, in the case of accounts subject to paragraph (c)(2)(i) of this section, or

(B) Amounts attributable to contracts entered into more than five years before such date, in the case of accounts subject to paragraph (c)(2)(ii) of this section.

(3) *Liquidation period.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the date a plan of liquidation is adopted shall be considered adequately diversified for—

(i) The one-year period beginning on the date the plan of liquidation is adopted if the account is not a real property account on such date; or

(ii) The two-year period beginning on the date the plan of liquidation is adopted if the account is a real property account on such date.

(d) *Market fluctuations.* A segregated asset account that satisfies the requirements of paragraph (b) of this section at the end of any calendar quarter (or within 30 days after the end of such calendar quarter) shall not be considered nondiversified in a subsequent quarter because of a discrepancy between the value of its assets and the diversification requirements unless such discrepancy exists immediately after the acquisition of any asset and such discrepancy is wholly or partly the result of such acquisition.

(e) *Segregated asset account.* For purposes of section 817(h) and this section, a segregated asset account shall consist of all assets the investment return and market value of each of which must be allocated in an identical manner to any variable contract invested in any of such assets. See paragraph (g) for examples illustrating the application of this paragraph (e).

(f) *Look-through rule for assets held through certain investment companies, partnerships, or trusts*—(1) *In general.* If this paragraph (f) applies, a beneficial interest in a regulated investment company, a real estate investment trust, a partnership, or a trust that is treated under sections 671 through 679 as owned by the grantor or another person (''investment company, partnership, or trust'') shall not be treated as a single investment of a segregated asset account. Instead, a pro rata portion of each asset of the investment company, partnership, or trust shall be treated, for purposes of this section, as an asset of the segregated asset account. For purposes of this section, the ratable interest of a partner in a partnership's assets shall be determined in accordance with the partner's capital interest in the partnership.

(2) *Applicability*—(i) *Certain investment companies, partnerships, and trusts.* This paragraph (f) shall apply to an investment company, partnership, or trust if—

(A) All the beneficial interests in the investment company, partnership, or trust (other than those described in paragraph (f)(3) of this section) are held by one or more segregated asset accounts of one or more insurance companies; and

(B) Public access to such investment company, partnership, or trust is available exclusively (except as otherwise permitted in paragraph (f)(3) of this section) through the purchase of a variable contract. Solely for this purpose, the status of a contract as a variable contract will be determined without regard to section 817(h) and this section.

(ii) *Nonregistered partnerships.* This paragraph (f) shall also apply to a partnership interest if the partnership interest is not registered under a Federal or State law regulating the offering or sale of securities.

(iii) *Trusts holding Treasury securities.* This paragraph (f) shall also apply to a trust that is treated under section 671 through 679 as owned by the grantor or another person if substantially all of the assets of the trust are represented by Treasury securities.

(3) *Interests not held by segregated asset accounts.* Satisfaction of the requirements of paragraph (f)(2)(i) of this section shall not be prevented by reason of beneficial interests in the investment company, partnership, or trust that are—

(i) Held by the general account of a life insurance company or a corporation related in a manner specified in section 267(b) to a life insurance company, but only if the return on such interests is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), there is no intent to sell such interests to the public, and a segregated asset account of such life insurance company also holds or will hold a beneficial interest in the investment company, partnership, or trust;

(ii) Held by the manager, or a corporation related in a manner specified in section 267(b) to the manager, of the investment company, partnership, or trust, but only if the holding of the interests is in connection with the creation or management of the investment company, partnership, or trust, the return on such interest is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), and there is no intent to sell such interests to the public;

(iii) Held by the trustee of a qualified pension or retirement plan; or

(iv) Held by the public, or treated as owned by policyholders pursuant to Rev. Rul. 81–225, 1981–2 C.B. 12, but only if (A) the investment company, partnership, or trust was closed to the public in accordance with Rev. Rul. 82–55, 1982–1 C.B. 12, or (B) all the assets of the segregated asset account are attributable to premium payments made by policyholders prior to September 26, 1981, to premium payments made in connection with a qualified pension or retirement plan, or to any combination of such premium payments.

(g) *Examples.* The provisions of paragraphs (e) and (f) of this section may be illustrated by the following examples.

Example 1. (i) The assets underlying variable contracts issued by a life insurance company consist of two groups of assets: (a) a diversified portfolio of debt securities and

(b) interests in P, a partnership that is publicly registered. All of the beneficial interests in P are held by one or more segregated asset accounts of one or more insurance companies and public access to P is available exclusively through the purchase of a variable contract. The variable contracts provide that policyholders may specify which portion of each premium is to be invested in the debt securities and which portion is to be invested in P interests. The portfolio of debt securities and the assets of P, considered separately, each satisfy the diversification requirements of paragraph (b) of this section.

(ii) As a result of the ability of policyholders to allocate premiums among the two groups of assets, the investment return and market value of the interests in P and the debt securities may be allocated to different variable contracts in a non-identical manner. Accordingly, under paragraph (e) of this section, the interests in P are treated as part of a single segregated asset account (''Account 1'') and the debt securities are treated as part of a different segregated asset account (''Account 2'').

(iii) Since P is described in paragraph (f)(2)(i) of this section, interests in P will not be treated as a single investment of Account 1. Rather, Account 1 is treated as owning a pro rata portion of the assets of P.

(iv) Since Account 1 and Account 2 each satisfy the requirements of paragraph (b) of this section, variable contracts that are based on either or both accounts are treated as annuity, endowment, or life insurance contracts.

Example 2. The facts are the same as in example 1 except that some of the beneficial interests in P are held by persons not described in paragraph (f)(3) of this section. Since P is not described in paragraph (f)(2) of this section, interests in P will be treated as a single investment of Account 1. As a result, Account 1 does not satisfy the requirements of paragraph (b) of this section. Variable contracts based in whole or in part on Account 1 are not treated as annuity, endowment, or life insurance contracts. Variable contracts that are not based on Account 1 at any time during the period in which such account fails to satisfy the requirements of paragraph (b) of this section (*i.e.*, contracts based entirely on Account 2), are treated as annuity, endowment, or life insurance contracts. See paragraph (a)(1).

Example 3. The facts are the same as in example 2 except that P is not publicly registered. Since P is described in paragraph (e)(2)(ii) of this section, the result is the same as in example 1.

Example 4. The facts are the same as in example 2 except that the variable contracts do not permit policyholders to allocate premiums between or among the debt securities and interests in P. Thus, the investment return and market value of the interests in P and the debt securities must be allocated to the same variable contracts and in an identical manner. Under paragraph (e) of this section, the interests in P and the debt securities are treated as part of a single segregated asset account. If the interests in P and the debt securities, considered together, satisfy the requirements of paragraph (b) of this section, contracts based on this segregated asset account will be treated as annuity, endowment, or life insurance contracts.

(h) *Definitions.* The terms defined below shall, for purposes of this section, have the meanings set forth in such definitions:

(1) *Government security*—(i) *General rule.* The term *government security* shall mean any security issued or guaranteed or insured by the United States or an instrumentality of the United States; or any certificate of deposit for any of the foregoing. Any security or certificate or deposit insured or guaranteed only in part by the United States or an instrumentality thereof is treated as issued by the United States or its instrumentality only to the extent so insured or guaranteed, and as issued by the direct obligor to the extent not so insured or guaranteed. For purposes of this paragraph (h)(1), an instrumentality of the United States shall mean any person that is treated for purposes of 15 U.S.C. 80a–2 (16), as amended, as a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States.

(ii) *Example.* A segregated asset account purchases a certificate of deposit in the amount of $150,000 from bank A. Deposits in bank A are insured by the Federal Deposit Insurance Corporation, an instrumentality of the United States, to the extent of $100,000 per depositor. The certificate of deposit is treated as a government security to the extent of the $100,000 insured amount and is treated as a security issued by bank A to the extent of the $50,000 excess of the value of the certificate of deposit over the insured amount.

(2) *Treasury security*—(i) *General rule.* For purposes of paragraph (b)(3) of this section and section 817(h)(3), the term *Treasury security* shall mean a security

the direct obligor of which is the United States Treasury.

(ii) *Example.* A segregated asset account purchases put and call options on U.S. Treasury securities issued by the Options Clearing Corporation. The options are not Treasury securities for purposes of paragraph (b)(3) and section 817(h)(3) because the direct obligor of the options is not the United States Treasury.

(3) *Real property.* The term *real property* shall mean any property that is treated as real property under 1.856–3 (d) except that it shall not include interests in real property.

(4) *Real property account.* A segregated asset account is a real property account on an anniversary of the account (within the meaning of paragraph (c)(2)(iii) of this section) or on the date a plan of liquidation is adopted if not less than the applicable percentage of the total assets of the account is represented by real property or interests in real property on such anniversary or date. For this purpose, the applicable percentage is 40% for the period ending on the first anniversary of the date on which premium income is first received, 50% for the year ending on the second anniversary, 60% for the year ending on the third anniversary, 70% for the year ending on the fourth anniversary, and 80% thereafter. A segregated asset account will also be treated as a real property account on its first anniversary if on or before such first anniversary the issuer has stated in the contract or prospectus or in a submission to a regulatory agency, an intention that the assets of the account will be primarily invested in real property or interests in real property, provided that at least 40% of the total assets of the account are so invested within six months after such first anniversary.

(5) *Commodity.* The term *commodity* shall mean any type of personal property other than a security.

(6) *Security.* The term *security* shall include a cash item and any partnership interest registered under a Federal or State law regulating the offering or sale of securities. The term shall not include any other partnership interest, any interest in real property, or any interest in a commodity.

(7) *Interest in real property.* The term *interest in real property* shall include the ownership and co-ownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term shall not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term ‘‘interest in real property’’ also shall include options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(8) *Interest in a commodity.* The term *interest in a commodity* shall include the ownership and co-ownership of any type of personal property other than a security, and any leaseholds thereof. Such term shall include mineral, oil, and gas royalty interests, including any fractional undivided interest therein. Such term also shall include any put, call, straddle, option, or privilege on any type of personal property other than a security.

(9) *Value.* The term *value* shall mean, with respect to investments for which market quotations are readily available, the market value of such investments; and with respect to other investments, fair value as determined in good faith by the managers of the segregated asset account.

(10) *Terms used in section 851.* To the extent not inconsistent with this paragraph (h) all terms used in this section shall have the same meaning as when used in section 851.

(i) *Effective date*—(1) *In general.* This section is effective for taxable years beginning after December 31, 1983.

(2) *Exceptions.* (i) If, at all times after December 31, 1983, an insurance company would be considered the owner of the assets of a segregated asset account under the principles of Rev. Rul. 81–225, 1981–2 C.B. 12, this section will not apply to such account until December 15, 1986.

(ii) This section will not apply to any variable contract to which Rev. Rul. 77–85, 1977–1 C.B. 12, or Rev. Rul. 81–225, 1981–2 C.B. 12, did not apply by reason of the limited retroactive effect of such rulings.

(iii) In determining whether a segregated asset account is adequately diversified for any calendar quarter ending before July 1, 1988, debt instruments that are issued, guaranteed, or insured by the United States or an instrumentality of the United States shall not be treated as government securities if such debt instruments are secured by a mortgage on real property (other than real property owned by the United States or an instrumentality of the United States) or represent an interest in a pool of debt instruments secured by such mortgages.

(iv) This section shall not apply until January 1, 1989, with respect to a variable contract (as defined in section 817(d)) that (1) provides for the payment of an immediate annuity (as defined in section 72(u)(4)); (2) was outstanding on September 12, 1986; and (3) the segregated asset account on which it was based was, on September 12, 1986, wholly invested in deposits insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

[T.D. 8242, 54 FR 8730, Mar. 2, 1989; T.D. 8242, 54 FR 11866, Mar. 22, 1989]

§ 1.818–1 Taxable years affected.

Sections 1.818–2 through 1.818–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2785, Apr. 4, 1961 as amended by T.D. 7469, 42 FR 12181, Mar. 3, 1977]

§ 1.818–2 Accounting provisions.

(a) *Method of accounting.* (1) Section 818(a)(1) provides the general rule that all computations entering into the determination of taxes imposed by part I, subchapter L, chapter 1 of the Code, shall be made under an accrual method of accounting. Thus, the over-all method of accounting for life insurance companies shall be the accrual method. Except as otherwise provided in part I, the term ‘‘accrual method’’ shall have the same meaning and application in section 818 as it does under section 446 (relating to general rule for methods of accounting) and the regulations thereunder. For general rules relating to the taxable year for inclusion of income and deduction of expenses under an accrual method of accounting, see sections 451 and 461 and the regulations thereunder.

(2) Section 818(a)(2) provides that, to the extent permitted under this section, a life insurance company's method of accounting may be a combination of the accrual method with any other method of accounting permitted by chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. Thus, section 818(a)(2) specifically prohibits the use by a life insurance company of the cash receipts and disbursements method either separately or in combination with a permissible method of accounting. The term ‘‘method of accounting’’ includes not only the over-all method of accounting of the taxpayer but also the accounting treatment of any item. For purposes of section 818(a)(2), a life insurance company may elect to compute its taxable income under an over-all method of accounting consisting of the accrual method combined with the special methods of accounting for particular items of income and expense provided under other sections of chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. These methods of accounting for special items include the accounting treatment provided for depreciation (section 167), research and experimental expenditures (section 174), soil and water conservation expenditures (section 175), organizational expenditures (section 248), etc. In addition, a life insurance company may, where applicable, use the crop method of accounting (as provided in the regulations under sections 61 and 162), and the installment method of accounting for sales of realty and casual sales of personalty (as provided in section 453(b)). To the extent not inconsistent with the provisions of the Internal Revenue Code of 1954 or the regulations thereunder and the method of accounting adopted by the taxpayer pursuant

to this section, all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(3)(i) An election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provisions of the Internal Revenue Code of 1954 or prior revenue laws for purposes of determining a company's tax liabilities for prior years, shall have the same force and effect in determining the items of gross investment income under section 804(b) and the items of deduction under section 804(c) of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) as if such Act had not been enacted.

(ii) For purposes of determining gain or loss from operations under section 809(b), in computing the life insurance company's share of investment yield under section 809(b) (1)(A) and (2)(A), an election with respect to any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provision of the Internal Revenue Code of 1954 or prior revenue laws, shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

(iii) For purposes of determining gain or loss from operations under section 809(b), in computing the items of gross amount under section 809(c) and the deduction items under section 809(d), an election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph must be made in accordance with the specific statutory provisions of the sections containing such elections and the regulations thereunder. However, where a particular election may be made only with the consent of the Commissioner (either because the time for making the election without the consent of the Commissioner has expired or because the particular section contained no provision for making an election without consent), and the time prescribed by the applicable regulations for submitting a request for permission to make such an election for the taxable year 1958 has expired, a life insurance company may make such an election for the year 1958 at the time of filing its return for that year (including extensions thereof). For example, a life insurance company may elect any of the methods of depreciation prescribed in section 167 (to the extent permitted under that section and the regulations thereunder) with respect to those assets, or any portion thereof, for which no depreciation was allowable under prior revenue laws, for example, furniture and fixtures used in the underwriting department. Similarly, a life insurance company shall be permitted to make an election under section 461(c) (relating to the accrual of real property taxes) with respect to real property for which no deduction was allowable under prior revenue laws. Any such election shall be made in the manner and form prescribed in the applicable regulations.

(iv) For purposes of subdivision (ii) of this subparagraph, the method used under section 1016(a)(3)(C) (relating to adjustments to basis) in determining the amount of exhaustion, wear and tear, obsolescence, and amortization actually sustained shall not preclude a taxpayer from electing any of the methods prescribed in section 167 in accordance with the provisions of that section and the regulations thereunder for determining the amount of such exhaustion, wear and tear, obsolescence, and amortization for the year 1958. For example, if the amount of depreciation actually sustained, under section 1016(a)(3)(C), on a life insurance company's home office building (other than that portion for which depreciation was allowable under prior revenue laws) is determined on the straight line method, the life insurance company may elect for the year 1958 to use any of the methods prescribed in section 167 for determining its depreciation allowance for 1958. However, such election shall be binding for 1958, and for all subsequent taxable years, unless consent to change such election, if required, is obtained from the Commissioner in accordance with the provisions of section 167 and the regulations thereunder.

(4)(i) For purposes of section 805(b)(3)(B)(i) (relating to the determination of the current earnings rate for any taxable year beginning before January 1, 1958), the determination for any year of the investment yield and the assets shall be made as though the taxpayer had been on the accrual method prescribed in subparagraph (1) of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in determining the investment yield and assets for the taxable year 1958. However, where the method used for determining the deduction under section 167 for the year 1958 differs from the method used in prior years, the amount of the deduction actually allowed or allowable for such prior years for purposes of section 1016(a)(2) (relating to adjustments to basis) shall be the amount to be taken into account in determining the current earnings rate under section 805(b)(3)(B)(i).

(ii) For purposes of section 812(b)(1)(C) (relating to operations loss carrybacks and carryovers for years prior to 1958), the determination for those years of the gain or loss from operations shall be made as though the taxpayer had been on the accrual method of accounting prescribed in subparagraph (1) of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in the determination of gain or loss from operations for the taxable year 1958. However, where any adjustment to basis is required under section 1016(a)(3)(C) on account of exhaustion, wear and tear, obsolescence, amortization, and depletion sustained, the amount actually sustained as determined under section 1016(a)(3)(C) for each of the years involved shall be the amount allowed in the determination of gain or loss from operations for purposes of section 812(b)(1)(C).

(b) *Adjustments required if accrual method of accounting was not used in 1957.* The items of gross amount taken into account under section 809(c) and the items of deductions allowed under section 809(d) for the taxable year 1958 shall be determined as though the taxpayer had been on the accrual method of accounting prescribed in paragraph (a) of this section for all prior years. Thus, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957, those items of gross amount which would have been properly taken into account for the year 1957 if the company had been on the accrual method described in section 818(a). Likewise, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957, those items of deductions which would have been properly allowed for the year 1957 if the company had been on the accrual method described in section 818(a). For example, if certain premium amounts were received during the year 1958 but such amounts would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be required to take such premium amounts into account for the year 1958. If, for example, certain claims, benefits, and losses were paid during the year 1958 but such items would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be permitted to deduct such expense items for the year 1958. For a special transitional rule applicable with respect to changes in method of accounting required by section 818(a) and paragraph (a) of this section, see section 818(e) and § 1.818–6.

(c) *Change of basis in computing reserves.* (1) Section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then for purposes of subpart B, part I, subchapter L, chapter 1 of the Code (relating to the determination of taxable investment income), the amount of such item shall be the amount computed on the old basis as of the close of the taxable year and the amount computed on the new basis as of the beginning of the next taxable year. Similarly, section 810(d)(1) provides rules for determining the amount of the adjustment to be made for purposes of subpart C, part I, subchapter L, chapter 1 of the Code (relating to the determination of gain or loss from operations), if the basis for determining any item referred to in section 810(c) as of the close of any taxable year differs from the basis for such determination as of the close of the preceding taxable year. Under an accrual method of accounting, a change in the basis or method of computing the amount of liability of any item referred to in section 810(c) occurs in the taxable year in which all the events have occurred which determine the change in the basis or method of computing the amount of such liability and, in which, the amount thereof (whether increased or decreased) can be determined with reasonable accuracy.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. Assume that during the taxable year 1960, M, a life insurance company, determines that the amount of its life insurance reserves held with respect to a particular block of contracts is understated on the present basis being used in valuing such liability and that such liability can be more accurately reflected by changing from the present basis to a particular new basis. Assume that M uses such new basis in computing its reserves under such contracts at the end of the taxable year 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine the change in basis and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy. Such change shall be treated as having occurred during the taxable year 1960 whether M determines that its liability under such contracts was understated for the first time during 1960, or that its liability under such contracts has, in fact, been understated for a number of prior years.

Example 2. Assume the facts are the same as in example 1, except that during the taxable year 1960 the insurance department of State X issues a ruling, pursuant to authority conferred by statute, requiring M to use the particular new basis which more accurately reflects its liability with respect to such contracts and that as a result of such ruling, M uses the new basis in computing its reserves under such contracts for the taxable years 1958, 1959, and 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine that a change in basis should be made and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy.

[T.D. 6558, 26 FR 2785, Apr. 4, 1961]

§1.818–3 Amortization of premium and accrual of discount.

(a) *In general.* Section 818(b) provides that the appropriate items of income, deductions, and adjustments under part I, subchapter L, chapter 1 of the Code, shall be adjusted to reflect the appropriate amortization of premium and the appropriate accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. The adjustment for accrual of discount increases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. However, for taxable years beginning after May 31, 1960, only the accrual of discount relating to issue discount will increase the exclusion and reduction for wholly tax-exempt interest. See section 103.

(b) *Acquisitions before January 1, 1958.* (1) In the case of any such security acquired before January 1, 1958, the premium is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, its then fair market value. The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(2) The adjustments for amortization of premium and accrual of discount will be determined:

(i) According to the method regularly employed by the company, if such method is reasonable, or

(ii) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed ''regularly employed'' by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(3) The method of amortization and accrual prescribed by this section is as follows:

(i) The premium (or discount) shall be determined in accordance with this section; and

(ii) The appropriate amortization of premium (or accrual of discount) attributable to the taxable year shall be an amount which bears the same ratio to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For purposes of this section, a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered a month.

(c) *Acquisitions after December 31, 1957.* (1) In the case of:

(i) Any bond, as defined in section 171(d), acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under section 171(b) and the regulations thereunder, as if the election set forth in section 171(c) had been made, and

(ii) Any bond, note, debenture, or other evidence of indebtedness not described in subdivision (i) of this subparagraph and acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under paragraph (b) of this section.

(2) In the case of any bond, note, debenture, or other evidence of indebtedness acquired after December 31, 1957, the amount of the discount and the accrual of discount attributable to the taxable year shall be determined under paragraph (b) of this section.

(d) *Convertible evidences of indebtedness.* Section 818(b)(2)(B) provides that in no case shall the amount of premium on a convertible evidence of indebtedness (including any bond, note, or debenture) include any amount attributable to the conversion features of the evidence of indebtedness. This provision is the same as the one contained in section 171(b), and the rules prescribed in paragraph (c) of § 1.171–2 shall be applicable for purposes of section 818(b)(2)(B). This provision is to be applied without regard to the date upon which the evidence of indebtedness was acquired. Thus, where a convertible evidence of indebtedness was acquired before January 1, 1958, and a portion or all of the premium attributable to the conversion features of the evidence of indebtedness has been amortized for taxable years beginning before January 1, 1958, no adjustment for such amortization will be required by reason of section 818(b)(2)(B). Such amortization will, however, require an adjustment to the basis of the evidence of indebtedness under section 1016(a)(17). For taxable years beginning after December 31, 1957, no further amortization of the premium attributable to the conversion features of such an evidence of indebtedness will be taken into account.

(e) *Adjustments to basis.* Section 1016(a)(17) (relating to adjustments to basis) provides that in the case of any evidence of indebtedness referred to in section 818(b) and this section, the basis shall be adjusted to the extent of the adjustments required under section 818(b) (or the corresponding provisions of prior income tax laws) for the taxable year and all prior taxable years. The basis of any evidence of indebtedness shall be reduced by the amount of the adjustment required under section 818(b) (or the corresponding provision of prior income tax laws) on account of amortizable premium and shall be increased by the amount of the adjustment required under section 818(b) on account of accruable discounts.

(f) *Denial of double inclusion.* Any amount which is includible in gross investment income by reason of section 818(b) and paragraph (a) of this section shall not be includible in gross income under section 1232(a) (relating to the taxation of bonds and other evidences of indebtedness). See section 1232(a)(2)(C) and the regulations thereunder.

[T.D. 6558, 26 FR 2786, Apr. 4, 1961]

§1.818–4 Election with respect to life insurance reserves computed on preliminary term basis.

(a) *In general.* Section 818(c) permits a life insurance company issuing contracts with respect to which the life insurance reserves are computed on one of the recognized preliminary term bases to elect to revalue such reserves on a net level premium basis for the purpose of determining the amount which may be taken into account as life insurance reserves for purposes of part I, subchapter L, chapter 1 of the Code, other than section 801 (relating to the definition of a life insurance company). If such an election is made, the method to be used in making this revaluation of reserves shall be either the exact revaluation method (as described in section 818(c)(1) and paragraph (b)(1) of this section) or the approximate revaluation method (as described in section 818(c)(2) and paragraph (b)(2) of this section).

(b) *Revaluation of reserves computed on preliminary term basis.* If a life insurance company makes an election under section 818(c) in the manner provided in paragraph (e) of this section, the amount to be taken into account as life insurance reserves with respect to contracts for which such reserves are computed on a preliminary term basis may be determined on either of the following bases:

(1) *Exact revaluation method.* As if the reserves for all such contracts had been computed on a net level premium basis (using the same mortality or morbidity assumptions and interest rates for both the preliminary term basis and the net level premium basis).

(2) *Approximate revaluation method.* The amount computed without regard to section 818(c):

(i) Increased by $21 per $1,000 of insurance in force (other than term insurance) under such contracts, less 2.1 percent of reserves under such contracts, and

(ii) Increased by $5 per $1,000 of term insurance in force under such contracts which at the time of issuance cover a period of more than 15 years, less 0.5 percent of reserves under such contracts.

(c) *Exception.* If a life insurance company which makes an election under section 818(c)(2) and paragraph (b)(2) of this section has life insurance reserves with respect to both life insurance and noncancellable accident and health contracts for which such reserves are computed on a preliminary term basis, it shall use the approximate revaluation method for all its life insurance reserves other than that portion of such reserves held with respect to its noncancellable accident and health contracts, and shall use the exact revaluation method for all its life insurance reserves held with respect to such noncancellable accident and health contracts.

(d) *Reserves subject to recomputation.* (1) For the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the end of such taxable year on the basis elected under section 818(c) and paragraph (b) of this section. However, for purposes of the preceding sentence, an election under section 818(c) shall not apply with respect to such reserves which would not be treated as being computed on the preliminary term basis at the end of such taxable year except for the provisions of section 810 (a) or (b). See paragraph (c)(2) of §1.810–2. For example, if S, a life insurance company which computes its life insurance reserves on a recognized preliminary term basis at the beginning of the taxable year 1958, strengthens a portion of such reserves during the taxable year by actually changing to a net level premium basis in computing such reserves, and then makes the election under section 818(c) and paragraph (b) of this section for 1958, such election shall not apply with respect to the strengthened contracts.

(2) For any taxable year other than the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the beginning or end of the taxable year on the basis elected under section 818(c) and paragraph (b) of this section. For example, if M, a life insurance company which made a valid outstanding election under section 818(c) in the manner provided in paragraph (e) of this section for the taxable year 1959, sells a block of contracts subject to such election on September 1, 1960, M would value such contracts on the basis elected under section 818(c) and paragraph (b) of this section on January 1, 1960, for purposes of determining the net decrease or increase in the sum of the items described in section 810(c) for the taxable year under section 810 (a) or (b).

(3) For the effect of an election under section 818(c) and paragraph (b) of this section in determining gain or loss from operations for the taxable year, see paragraph (c)(3) of §1.810–2 and paragraph (e) of §1.810–3.

(e) *Time and manner of making election.* The election provided by section 818(c) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before April 4, 1961, the election provided by section 818(c) may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before July 4, 1961. The statement shall indicate whether the exact or the approximate method of revaluation has been adopted. The statement shall also set forth sufficient information as to mortality and morbidity asumptions; interest rates; the valuation method used; the amount of the reserves and the amount and type of insurance in force under all contracts for which reserves are computed on a preliminary term basis; and such other pertinent data as will enable the Commissioner to determine the correctness of the application of the revaluation method adopted and the accuracy of the computations involved in revaluing the reserves. The election to use either the exact revaluation method or the approximate revaluation method shall, except for the purposes of section 801, be adhered to in making the computations under part I for the taxable year for which such election is made and for all subsequent taxable years.

(f) *Scope of election.* An election made under section 818(c) and paragraph (b) of this section to use either the exact or the approximate method of revaluing the company's life insurance reserves shall be binding for the taxable year for which made, and, except as provided in paragraph (g) of this section, shall be binding for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 818(c) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(g) *Special rule for 1958.* If an election is made for a taxable year beginning in 1958 to use the approximate revaluation method described in section 818(c)(2) and paragraph (b)(2) of this section the company may, for its first taxable year beginning after 1958, elect to change to the exact revaluation method described in section 818(c)(1) and paragraph (b)(1) of this section without obtaining the consent of the Commissioner. In such case, the election to change shall be made in a statement attached to the company's income tax return for such taxable year and filed not later than the date prescribed by law (including extensions thereof) for filing the return for such year. The statement shall indicate that the company has elected to change from the approximate to the exact revaluation method for such taxable year and shall include such information and data referred to in paragraph (e) of this section as will enable the Commissioner to determine the correctness and accuracy of the computations involved.

[T.D. 6558, 26 FR 2787, Apr. 4, 1961; 26 FR 3276, Apr. 18, 1961]

§1.818–5 Short taxable years.

(a) *In general.* Section 818(d) provides that if any return of a corporation made under part I, subchapter L, chapter 1 of the Code, is for a period of less than the entire calendar year, then section 443 (relating to returns for a period of less than 12 months) shall not apply. This section further provides certain rules to be used in determining the life insurance company taxable income for a period of less than the entire calendar year.

(b) *Returns for periods of less than the entire calendar year.* A return for a short period, that is, for a taxable year consisting of a period of less than the entire calendar year, shall be made only under the following circumstances:

(1) If a company which qualifies as a life insurance company is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence. For example, a life insurance company organized on August 1, is required to file a return for the short period from August 1 to December 31, and returns for each calendar year thereafter. Similarly, if a company which qualifies as a life insurance company completely dissolves during the taxable year it is required to file a return for the short period from January 1 to the date it goes out of existence. All items entering into the computation of taxable investment income and gain or loss from operations for the short period shall be determined on a consistent basis and in the manner provided in paragraph (c) of this section.

(2) A return must be filed for a short period resulting from the termination by the district director of a taxpayer's taxable year for jeopardy. See section 6851 and the regulations thereunder.

A company which was an insurance company for the preceding taxable year (but not a life insurance company as defined in section 801(a) and paragraph (b) of §1.801–3) and which for the current taxable year qualifies as a life insurance company shall not file a return for the short period from the time during the taxable year that it first qualifies as a life insurance company to the end of the taxable year. Similarly, an insurance company which was a life insurance company for the preceding taxable year but which for the current taxable year does not qualify as a life insurance company shall not file a return for the short period from the beginning of the taxable year to the time during the taxable year that it no longer qualifies as a life insurance company.

(c) *Computation of life insurance company taxable income for short period.* (1) If a return is made for a short period, section 818(d)(1) provides that the taxable investment income and the gain or loss from operations shall be determined on an annual basis by a ratable daily projection of the appropriate figures for the short period. The appropriate figures for the short period shall be determined on an annual basis by multiplying such figures by a fraction, the numerator of which is the number of days in the calendar year in which the short period occurs and the denominator of which is the number of days in the short period.

(2)(i) In computing taxable investment income for a short period, the investment yield, the policy and other contract liability requirements, the policyholders' share of each and every item of investment yield, and the company's share of any item of investment yield shall be determined on an annual basis.

(ii) For purposes of determining the investment yield on an annual basis, each item of gross investment income under section 804(b) and each item of deduction under section 804(c) shall be annualized in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 804(c), the limitation shall apply to the item of deduction computed on an annual basis.

(iii) The policy and other contract liability requirements shall be determined on an annual basis in the following manner:

(a) The interest paid (as defined in section 805(e) and § 1.805–8) for the short period shall be annualized in the manner prescribed in subparagraph (1) of this paragraph.

(b) The current earnings rate for the taxable year in which the short period occurs shall be determined by dividing the taxpayer's investment yield, as determined on an annual basis under subdivision (ii) of this subparagraph, by the mean of the taxpayer's assets at the beginning and end of the short period. For purposes of section 805, any reference to the current earnings rate for the taxable year in which the short period occurs means the current earnings rate as determined under this subdivision.

(c) The adjusted life insurance reserves shall be determined as provided in section 805(c), and the pension plan reserves shall be determined as provided in section 805(d).

(iv) The policyholders' share of each and every item of investment yield (as defined in section 804(a)) shall be that percentage obtained by dividing the policy and other contract liability requirements, determined under subdivision (iii) of this subparagraph, by the investment yield, determined under subdivision (ii) of this subparagraph.

(v) The taxable investment income for the short period shall be an amount (not less than zero) equal to the life insurance company's share of each and every item of investment yield, as determined under subdivision (ii) of this subparagraph, reduced by the items described in section 804(a)(2) (A) and (B). In determining these reductions under section 804(a)(2)(A) the amount of the respective items shall be the amount that is determined on an annual basis under subdivision (ii) of this subparagraph. The small business deduction, under section 804(a)(2)(B) shall be an amount (not to exceed $25,000) equal to 10 percent of the investment yield, determined under subdivision (ii) of this subparagraph, for the short period.

(vi) Except as provided in this paragraph, the determination of taxable investment income under subpart B, part I, subchapter L, chapter 1 of the Code, shall be made in accordance with all the provisions of that subpart.

(3)(i) In computing gain or loss from operations for a short period, the share of each and every item of investment yield set aside for policyholders, the life insurance company's share of each and every item of investment yield, the items of gross amount, and the items of deduction shall, except as modified by this subparagraph, be determined on an annual basis in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 809, the limitation shall apply to the item of deduction computed on an annualized basis.

(ii) For purposes of sections 809 and 810, the investment yield shall be determined in the manner provided in subparagraph (2)(ii) of this paragraph. The share of any item of investment yield set aside for policyholders shall be that percentage obtained by dividing the required interest as determined under section 809(a)(2), by the investment yield, as determined in this subparagraph, except that if the required interest exceeds the investment yield then the share of any item of investment yield set aside for policyholders shall be 100 percent.

(iii) The items of gross amount and the items of deduction, other than the operations loss deduction under section 809(d)(4), shall be determined on an annual basis. See subdivision (iv) of this subparagraph for the manner in which the net decrease or net increase in reserves under section 810 shall be annualized.

(iv) For purposes of determining either a net decrease in reserves under section 810(a) or a net increase in reserves under section 810(b), the sum of the items described in section 810(c) as of the end of the short period shall be reduced by the amount of the investment yield not included in gain or loss from operations for the short period by reason of section 809(a)(1). The amount of investment yield excluded under section 809(a)(1) has been determined upon an annualized basis while the sum of the items described in section 180(c) at the end of the short period has been determined on an actual basis. In order to place these on the same basis, the amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1), determined under subdivision (ii) shall, for purposes of section 810(a) and section 810(b), be reduced to an amount which bears the same ratio to the full amount as the number of days in the short period bears to the number of days in the entire calendar year. The net decrease or the net increase of the items referred to in section 810(c) for the short period shall then be determined, as provided in section 810(a) and section 810(b), respectively, and the result annualized.

(4) The portion of the life insurance company taxable income described in section 802(b) (1) and (2) (relating to taxable investment income and gain or loss from operations) shall be determined on an annual basis by treating the amounts ascertained under subparagraph (2) of this paragraph as the taxable investment income, and the amount ascertained under subparagraph (3) of this paragraph as the gain or loss from operations, for the taxable year.

(5) The portion of the life insurance company taxable income described in section 802(b) (1) and (2) for the short period shall be the amount which bears the same ratio to the amount ascertained under section 818(d) (2) and subparagraph (4) of this paragraph as the number of days in the short period bears to the number of days in the entire year.

(d) *Special rules.* (1) For purposes of determining the average earnings rate (as defined in section 805(b)(3)) for subsequent taxable years, the current earnings rate for the taxable year in which the short period occurs shall be the rate determined under paragraph (c)(2) of this section.

(2) For purposes of determining an operations loss deduction under section 812, the loss from operations for the short period shall be the loss from operations determined under paragraph (c)(5) of this section.

[T.D. 6558, 26 FR 2788, Apr. 4, 1961]

§1.818–6 Transitional rule for change in method of accounting.

(a) *In general.* Section 818(e) prescribes the rules to be followed in recomputing the taxes of a life insurance company for the taxable year 1957 in cases where the method of accounting required to be used in computing the company's taxes for 1958 under section 818(a) and paragraph (a) of §1.818–2 is different from the method used in 1957.

(b) *Recomputation of 1957 taxes.* (1) For purposes of recomputing its taxes for 1957, a life insurance company must ascertain the net amount of those adjustments which are determined (as of the close of 1957) to be necessary solely by reason of the change to the method of accounting required by section 818(a) and paragraph (a) of § 1.818–2 in order to prevent amounts from being duplicated or omitted. Thus, for example, life insurance companies not on the accrual method of accounting for the year 1957 shall accrue, as of December 31, 1957, those items of gross investment income under section 803(b) and those items of deduction under section 803(c), as in effect for 1957, which would have been properly accruable for the year 1957 if the company had been on the accrual method of accounting.

(2) In the case of a change in the over-all method of accounting, the term ''net amount of those adjustments'' means the consolidation of adjustments (whether the amounts thereof represent increases or decreases in items of income or deductions) arising with respect to balances in the various accounts on December 31, 1957. In the case of a change in the treatment of a single material item, the amount of the adjustment shall be determined with reference only to the net dollar balances in that particular account.

(3)(i) The amount of the taxpayer's tax for 1957 shall be recomputed (under the law applicable to 1957, modified as provided in section 818(e) (4) and paragraph (e) of this section) by taking into account an amount equal to one-tenth of the net amount of the adjustments determined under subparagraph (1) of this paragraph. The increase or decrease in tax attributable to the adjustments for such year is the difference between the tax for such year computed with the allocation of one-tenth of the net amount of the adjustments to such taxable year over the tax computed without the allocation of any part of the adjustments to such year.

(ii) The amount of increase or decrease (as the case may be) referred to in section 818(e) (2) or (3) and paragraphs (c) or (d) of this section, shall be the amount of the increase or decrease in tax ascertained in the manner described in subdivision (i) of this subparagraph, multiplied by 10.

(c) *Treatment of decrease.* Section 818(e) (2) provides that for purposes of subtitle F of the Code, if the recomputation under paragraph (b) (3) (ii) of this section results in a decrease, the amount of such decrease shall be treated as a decrease in the tax imposed for 1957; except that for purposes of computing the period of limitation on the making of refunds or the allowance of credits with respect to such overpayments, the amount of such decrease shall be treated as an overpayment of tax for 1959. No interest shall be paid, for any period before March 16, 1960, on any overpayment of the tax imposed for 1957 which is attributable to such decrease.

(d) *Treatment of increase*—(1) *In general.* Section 818(e) (3) (A) provides that for purposes of subtitle F of the Code, other than section 6016 (relating to declarations of estimated income tax by corporations) and section 6655 (relating to failure by corporations to pay estimated income tax), if the recomputation under paragraph (b) (3) (ii) of this section results in an increase, the amount of such increase shall be treated as a tax imposed for 1959. Such tax shall be payable in 10 equal annual installments, beginning with March 15, 1960.

(2) *Special rules.* Section 818(e) (3) (B) provides that for purposes of section 818(e) (3) (A) and subparagraph (1) of this paragraph:

(i) No interest shall be paid on any installment described in section 818(e) (3) (A) and subparagraph (1) of this paragraph before the time prescribed therein for the payment of such installment.

(ii) Section 6152(c) (relating to proration of deficiencies to installments) and the regulations thereunder shall apply. However, section 6152(a) (relating to the election to make installment payments) and the regulations thereunder shall not apply.

(iii) In applying section 6502(a) (1) (relating to collection after assessment) and the regulations thereunder, the assessment of any installment described in section 818(e) (3) (A) and subparagraph (1) of this paragraph shall be treated as made at the time prescribed therein for the payment of such installment.

(iv) If for any taxable year the taxpayer is not a life insurance company, the amount of the increase in tax (as determined under paragraph (b) (3) (ii) of this section), to the extent not taken into account for prior taxable years, shall be payable on the date the return for such taxable year is due (determined without regard to any extensions of time for filing such return), unless such amount is required to be taken into account by the acquiring corporation under section 381(c) (22) and the regulations thereunder.

(e) *Modifications of 1957 tax computation.* Section 818(e) (4) provides that in recomputing the taxpayer's tax for 1957 for purposes of section 818(e) (1) and paragraph (b) of this section:

(1) Section 804(b), as in effect for 1957 (relating to the maximum reserve and other policy liability deduction), shall not apply with respect to any amount required to be taken into account by reason of section 818(e) (1) and paragraph (b) of this section; and

(2) The amount of the deduction allowed by section 805, as in effect for 1957 (relating to the special interest deduction), shall not be reduced by reason of any amount required to be taken into account under section 818(e) (1) and paragraph (b) of this section.

(f) *Illustration of principles.* The application of section 818(e) and this section may be illustrated by the following examples:

Example 1. For the taxable year 1957, the life insurance taxable income of M, a life insurance company, is $200,000 computed on the cash receipts and disbursements method of accounting. The net amount of the adjustments required under section 818(e)(1) by reason of the change to the accrual method of accounting for 1958, increases M's life insurance taxable income for 1957 by $50,000. The increase in tax attributable to the change in method of accounting required by section 818(a) is $26,000, computed as follows:

(1) Life insurance taxable income before adjustments	$200,000
(2) Adjustments required by sec. 818(e) (1) (1/10×$50,000)	5,000
(3) Life insurance taxable income after adjustments (item (1) plus item (2))	205,000
(4) Tax liability after adjustments (52%×$205,000, minus $5,500)	101,100
(5) Tax liability before adjustments (52%×$200,000, minus $5,500)	98,500
(6) Excess of item (4) over item (5)	2,600
(7) Increase in tax for purposes of sec. 818(e) (3) (item (6) multiplied by 10)	26,000

Under the provisions of section 818(e)(3), one-tenth of the increase in tax for 1957 attributable to the change in method of accounting required by section 818(a), $2,600 (1/10×$26,000), was due and payable on March 15, 1960, and the balance, $23,400 (9/10×$26,000), is due and payable in equal installments on March 15th of the nine succeeding taxable years. However, if for the taxable year 1965, M is no longer a life insurance company, and section 381(c)(22) does not apply, the balance of the installments not paid in prior taxable years, $10,400 (4/10×$26,000), shall be due and payable on March 15, 1966.

Example 2. Assume the facts are the same as in example 1, except that the net amount of the adjustments required by section 818(e)(1) decreases M's life insurance taxable income for 1957 by $25,000. The decrease in tax attributable to the change in method of accounting required by section 818(a) is $13,000, computed as follows:

(1) Life insurance taxable income before adjustments	$200,000
(2) Adjustments required by sec. 818(e) (1) (1/10×$25,000)	2,500
(3) Life insurance taxable income after adjustments (item (1) minus item (2))	197,500
(4) Tax liability after adjustments (52%×$197,500, minus $5,500)	97,200
(5) Tax liability before adjustments (52%×$200,000, minus $5,500)	98,500
(6) Excess of item (5) over item (4)	1,300
(7) Decrease in tax for purposes of sec. 818(e)(2) (item (6) multiplied by 10)	13,000

Under the provisions of section 818(e)(2), the entire $13,000 decrease in tax for 1957 attributable to the change in method of accounting required by section 818(a) shall be treated as an overpayment of tax for the taxable year 1959.

[T.D. 6558, 26 FR 2789, Apr. 4, 1961]

§ 1.818–7 Denial of double deductions.

Section 818(f) provides that the same item may not be deducted more than once under subpart B, part I, subchapter L, chapter 1 of the Code (relating to the determination of taxable investment income), and more than once under subpart C, part I, subchapter L, chapter 1 of the Code (relating to the determination of gain or loss from operations).

[T.D. 6558, 26 FR 2790, Apr. 4, 1961]

§ 1.818–8 Special rules relating to consolidated returns and certain capital losses.

Section 818(g) provides that, in the case of a life insurance company filing or required to file a consolidated return under section 1501 for a taxable year, the computations of the policyholders' share of investment yield under subparts B and C, part I, subchapter L, chapter 1 of the Code (including all determinations and computations incident thereto) shall be made as if such company were not filing a consolidated return. Thus, for example, if X and Y are life insurance companies which are entitled to file a consolidated return for 1975 and X has paid dividends to Y during such taxable year, Y must include such dividends in the computation of gross investment income under section 804(b). For other rules relating to the filing of consolidated returns, see sections 1501 through 1504 and the regulations thereunder.

[T.D. 7469, 42 FR 12181, Mar. 3, 1977]

§ 1.819–1 Taxable years affected.

Section 1.819–2 is applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code, are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2791, Apr. 4, 1961]

§ 1.819–2 Foreign life insurance companies.

(a) *Carrying on United States insurance business.* Section 819(a) provides that a foreign life insurance company carrying on a life insurance business within the United States, if with respect to its United States business it would qualify as a life insurance company under section 801, shall be taxable on its United States business under section 802 in the same manner as a domestic life insurance company. Thus, the life insurance company taxable income of such a foreign life insurance company shall not be determined in the manner provided by part I, subchapter N, chapter 1 of the Code (relating to determination of sources of income), but shall be determined in the manner provided by part I, subchapter L, chapter 1 of the Code (relating to life insurance companies). See section 842. Accordingly, in determining its life insurance company taxable income from its United States business, such a foreign life insurance company shall take into account the appropriate items of income irrespective of whether such items of income are from sources within or without the United States. A foreign life insurance company shall take into account the appropriate items of expenses, losses, and other deductions properly allocable to such items of income from its United States business. To the extent not inconsistent with the provisions of this paragraph, section 818(a), and section 819(b), all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(b) *Adjustment where surplus held in the United States is less than specified minimum*—(1) *In general.* Section 819(b)(1) provides that if the minimum figure for the taxable year determined under section 819(b)(2) and subparagraph (2)(i) of this paragraph exceeds the surplus held in the United States as of the end of the taxable year (as defined in section 819(b)(2)(B) and subparagraph (2)(ii) of this paragraph) by a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, then:

(i) The amount of the policy and other contract liability requirements (determined under section 805 and § 1.805–4 without regard to this subparagraph), and

(ii) The amount of the required interest (determined under section 809(a)(2) and paragraph (d) of § 1.809–2 without regard to this subparagraph),

shall each be reduced by an amount determined by multiplying such excess by the current earnings rate (as defined in section 805(b)(2) and paragraph (a)(2) of § 1.805–5) of such company. Such current earnings rate shall be determined by reference to the assets held by the company in the United States.

(2) *Definitions.* For purposes of section 819(b)(1) and subparagraph (1) of this paragraph:

(i) The term *minimum figure,* in the case of a taxable year beginning after December 31, 1957, but before January 1, 1959, means the amount obtained by multiplying the company's total insurance liabilities on United States business by 9 percent. In the case of any taxable year beginning after December 31, 1958, such term means the amount obtained by multiplying the company's total insurance liabilities on United

States business by the percentage determined and proclaimed by the Secretary as being applicable for such year.

(ii) The term *surplus held in the United States* means the excess of the assets held in the United States (as of the end of the taxable year) over the total insurance liabilities on United States business (as of the end of the taxable year).

(iii) The term *total insurance liabilities* means the sum of the total reserves (as defined in section 801(c) and paragraph (a) of §1.801–5) as of the end of the taxable year plus (to the extent not included in total reserves) the items referred to in section 810(c) (3), (4), and (5) of paragraph (b) (3), (4), and (5) of §1.810–2 as of the end of the taxable year; and

(iv) The term *assets* shall have the same meaning as that contained in section 805(b)(4) and paragraph (a)(4) of §1.805–5.

(3) *Illustration of principles.* The provisions of section 819(b) and this paragraph may be illustrated by the following example:

Example. For the taxable year 1958, P, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has total insurance liabilities on United States business (as of the end of the taxable year) of $940,000, assets held in the United States of $1,000,000 (as of the end of the taxable year), policy and other contract liability requirements in the amount of $30,000 required interest in the amount of $20,000, and a current earnings rate of 4 percent. In order to determine whether section 819(b) applies for the taxable year 1958, P must first compute its minimum figure, for if the minimum figure is less than the surplus held in the United States (as of the end of the taxable year), no section 819(b) adjustments need be made. Since the minimum figure, $84,600 ($940,000, the total insurance liabilities on United States business multiplied by 9 percent, the percentage applicable for 1958), exceeds the surplus held in the United States, $60,000 (the excess of the assets held in the United States, $1,000,000, over the total insurance liabilities on United States business, $940,000), by $24,600, section 819(b) applies for the taxable year 1958. Thus, the amount of the policy and other contract liability requirements, $30,000, and the amount of the required interest, $20,000, shall each be reduced by $984 ($24,600, the amount of such excess, multiplied by 4 percent, the current earnings rate).

(4) *Segregated asset accounts.* For taxable years beginning after December 31, 1967, pursuant to the provisions of section 801(g):

(i) A foreign corporation carrying on a life insurance business which issues contracts based on segregated asset accounts shall separately compute in a manner consistent with this subparagraph the adjustment (if any) under section 819 to the amount of policy and other contract liability requirements and the amount of required interest properly attributable to each of such segregated asset accounts. The ‘‘minimum figure’’ used in section 819 in making the adjustment with respect to each of the segregated asset accounts shall be computed as provided in subdivision (ii) of this subparagraph in lieu of the manner provided in subparagraphs (1), (2), and (3) of this paragraph.

(ii) The minimum figure applicable to a segregated asset account referred to in subdivision (i) of this subparagraph is the amount determined by multiplying the total insurance liabilities on U.S. business attributable to such a segregated asset account, by 1 percent.

(iii) The minimum figure as computed under subdivision (ii) of this subparagraph shall be compared only with the surplus held in the United States attributable to each segregated asset account referred to in subdivision (i) of this subparagraph. Such surplus is the excess of assets held in the United States properly attributable to such segregated asset account over the total insurance liabilities on U.S. business properly attributable to such account.

(iv) If the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States attributable to such other accounts, for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the company’s overall excess, as defined in this subdivision. No adjustment under section 819 or this paragraph shall be made with respect to any account if there is no such overall excess. For purposes of this subdivision and of subdivision (v) of this subparagraph, the term "overall excess" means the amount, if any, by which the aggregate minimum figures applicable to segregated asset accounts plus the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States with respect to the company's entire U.S. life insurance business, including segregated asset accounts as well as other accounts.

(v) In the case of a company which issues contracts based on one or more than one segregated asset account, if the minimum figure applicable to a segregated asset account exceeds the surplus held in the United States attributable to such account, then for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the account limitation figure, as defined in this subdivision. Therefore, no adjustment under section 819 or under this subparagraph shall be made with respect to any segregated asset account if the aggregate of the account limitation figures is zero, but nothing in this subdivision shall preclude an adjustment under section 819 with respect to accounts other than segregated asset accounts. For purposes of this subdivision, the term "account limitation figure" is a segregated assets account's proportionate share of the aggregate of the account limitation figures. Such aggregate of the account limitation figures is equal to the lesser of either the company's overall excess as defined in subdivision (iv) of this subparagraph, or the amount, if any, by which the aggregate of the minimum figures applicable to segregated asset accounts exceeds the surplus held in the United States with respect to all such segregated asset accounts. For purposes of this subdivision, a segregated asset account's proportionate share of the aggregate of the account limitation figures is determined by multiplying the amount of such aggregate of account limitation figures by a percentage, the numerator of which is the amount by which the minimum figure applicable to such account exceeds the surplus held in the United States attributable to such account, and the denominator of which is the aggregate of the amounts by which the minimum figure applicable to each segregated asset account exceeds the surplus held in the United States attributable to such account.

(vi) Subdivisions (i), (ii), (iii), (iv), and (v) of this subparagraph may be illustrated by the following examples:

Example 1. (a) For the taxable year 1968, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has the following assets and total insurance liabilities with respect to such U.S. business:

	Regular account	Separate account A	Separate account B
Assets	$9,300,000	$1,810,000	$515,000
Total insurance liabilities	8,000,000	1,800,000	500,000

It is further assumed that the percentage determined and proclaimed by the Secretary under section 819(a)(2)(A) for the taxable year 1968 is 15 percent.

(b) In order to determine whether any adjustment under section 819 must be made, T must compute the minimum figure applicable to its Regular Account as well as each of its Separate Accounts. The minimum figure for the Regular Account is $1,200,000 (15 percent of $8,000,000). The minimum figure applicable to Separate Account A is $18,000 (1 percent of $1,800,000). The minimum figure applicable to Separate Account B is $5,000 (1 percent of $500,000). The aggregate of the minimum figures is $1,223,000 ($1,200,000+$18,000+$5,000). The surplus held in the United States with respect to the Regular Account is $1,300,000 ($9,300,000−$8,000,000), with respect to Separate Account A is $10,000 ($1,810,000−$1,800,000) and with respect to Separate Account B is $15,000 ($515,000−$500,000). The surplus held in the United States with respect to T's entire U.S. life insurance business is $1,325,000 ($1,300,000+$10,000+$15,000).

(c) Since the aggregate of the minimum figures ($1,223,000) does not exceed the surplus held in the United States attributable to T's entire U.S. life insurance business ($1,325,000), under subdivision (iv) of this subparagraph no adjustment under section 819 shall be made with respect to the Regular Account or either of the Separate Accounts.

Example 2. (a) The facts are the same as in example 1 except that the assets held in the United States with respect to the Regular Account is $8,300,000 instead of $9,300,000. Thus, the surplus held in the United States with respect to the Regular Account is $300,000 ($8,300,000−$8,000,000), and the surplus held in the United States with respect to T's entire U.S. life insurance business is $325,000 ($300,000+$10,000 +$15,000).

(b) Since the aggregate of the minimum figures with respect to the Separate Accounts, $23,000 ($18,000+$5,000), does not exceed the surplus held in the United States with respect to both of such Separate Accounts, $25,000 ($10,000+$15,000), under subdivision (v) of this subparagraph, no adjustment under section 819 must be made with respect to either of the Separate Accounts.

(c) The excess of the minimum figure for the Regular Account ($1,200,000) over the surplus held in the United States with respect to the Regular Account ($300,000) is equal to $900,000 ($1,200,000−$300,000). However, the company's overall excess as defined in subdivision (iv) of this subparagraph, is $898,000 ($1,223,000−$325,000). Under subdivision (iv) of this subparagraph the excess with respect to the Regular Account ($900,000) is limited to the amount of overall excess ($898,000). Thus, the amount of policy and other contract liability requirements with respect to T's Regular Account and the amount of required interest with respect to T's Regular Account (both computed without regard to section 819) shall each be reduced by an amount equal to the product of $898,000 and the current earnings rate computed only with respect to T's Regular Account.

(c) *Distributions to shareholders*—(1) *In general.* In the case of a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, section 819(c)(1) provides alternative methods for determining the amount of distributions to shareholders for purposes of section 815 (relating to distributions to shareholders) and section 802(b)(3) (relating to life insurance company taxable income). Such a foreign life insurance company may elect (in the manner provided by subparagraph (4) of this paragraph) for each taxable year whichever of the alternative methods provided by section 819(c)(1) and this subparagraph it desires, and the method elected for any one taxable year shall be effective only with respect to the taxable year for which the election is made. Such alternative methods are:

(i) The amount of the distributions to shareholders shall be the amount determined by multiplying the total amount of distributions to shareholders by the percentage which the minimum figure for the taxable year is of the excess of the assets of the company over the total insurance liabilities; or

(ii) The amount of the distributions for shareholders shall be the amount determined by multiplying the total amount of distributions for shareholders by the percentage which the total insurance liabilities on United States business for the taxable year is of the total insurance liabilities of the company.

(2) *Definitions.* For purposes of section 819(c)(1) and subparagraph (1) of this paragraph:

(i) The term *total amount of the distributions to shareholders* means all distributions (within the meaning of section 815 and §1.815–2) by a foreign life insurance company to all of its shareholders whether or not in the United States;

(ii) The term *minimum figure for the taxable year* means the amount determined under section 819(b)(2)(A) and paragraph (b)(2) of this section;

(iii) The term *assets of the company* means all of the assets (as defined in section 805(b) (4) and paragraph (a) (4) of §1.805–5) of the foreign life insurance company whether or not in the United States (as of the end of the taxable year); and

(iv) The term *total insurance liabilities of the company* means the total insurance liabilities (as defined in section 819(b)(2) and paragraph (b)(2) of this section) on all of its business whether or not in the United States (as of the end of the taxable year).

(3) *Illustration of principles.* The provisions of section 819(c)(1) and subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example 1. For the taxable year 1958, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has a minimum figure of $40,000, total amount of distributions to all shareholders (within the meaning of section 815) of $5,000, assets (as of the end of the year) of $500,000, total insurance liabilities (as of the end of the year) of $450,000, and total insurance liabilities on United States business (as of the end of the year) of $180,000. Based upon these facts, if T elects the method provided in section 819(c)(1)(A) and subparagraph (1)(i) of this paragraph, the amount of T's distributions to shareholders for the taxable year 1958 is $4,000, that is, $5,000 (the total amount of distributions to shareholders) multiplied by 80 percent (the percentage which the minimum figure for the taxable year, $40,000, is of $50,000, the excess of the assets of the company ($500,000) over the total insurance liabilities ($450,000)).

Example 2. The facts are the same as in example 1, except that for the taxable year 1958, T elects the method provided in section 819(c)(1)(B) and subparagraph (1)(ii) of this paragraph. Based upon these facts, the amount of T's distributions to shareholders for the taxable year 1958 is $2,000, that is, $5,000 (the total amount of distributions to shareholders) multiplied by 40 percent (the percentage which the total insurance liabilities on United States business ($180,000) is of the total insurance liabilities of the company ($450,000)).

(4) *Manner and effect of election.* (i) The election provided by section 819(c)(1) shall be made in a statement attached to the foreign life insurance company's income tax return for any taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. The statement shall indicate the method elected, the name and address of the taxpayer, and shall be signed by the taxpayer (or his duly authorized representative).

(ii) An election made under section 819(c)(1) and this paragraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such election has been made for any taxable year it may not be revoked. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 819(c)(1) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation and the selection of the other percentage must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(5) *Application of section 815.* Once the amount of distributions to shareholders is determined under the provisions of section 819(c)(1) and this paragraph, the rules of section 815 (relating to distributions to shareholders) shall apply to the shareholders surplus account and the policyholders surplus account of a foreign stock life insurance company in the same manner as they would apply to a domestic stock life insurance company.

(d) *Distributions pursuant to certain mutualizations.* Section 819(c)(2) provides that for purposes of applying section 815(e) and paragraph (e) of § 1.815–6 (relating to a special rule for certain mutualizations) in the case of a foreign life insurance company subject to tax under section 802:

(1) The paid-in capital and paid-in surplus referred to in section 815(e)(1)(A) of a foreign life insurance company is the portion of such capital and surplus determined by multiplying such amounts by the percentage selected for the taxable year under section 819(c)(1) and paragraph (c)(1) of this section; and

(2) The excess referred to in section 815(e)(2)(A)(i) (without the adjustment provided by section 815(e)(2)(B)), is whichever of the following is the greater:

(i) The minimum figure for 1958 determined under section 819(b)(2)(A); or

(ii) The surplus held in the United States (as defined in section 819(b)(2)(B)) determined as of December 31, 1958.

(e) *No United States insurance business.* Foreign life insurance companies not carrying on an insurance business within the United States shall not be taxable under part I, subchapter L, chapter 1 of the Code, but shall be taxable as other foreign corporations. See section 881 and the regulations thereunder.

[T.D. 6558, 26 FR 2791, Apr. 4, 1961; 26 FR 3276, Apr. 18, 1961, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968]

EDITORIAL NOTE: For a determination with respect to the percentage to be used by foreign life insurance companies in computing income tax for the taxable year 1984 and the estimated tax for taxable year 1985, see 51 FR 883, Jan. 9, 1986.

MUTUAL INSURANCE COMPANIES (OTHER THAN LIFE AND CERTAIN MARINE INSURANCE COMPANIES AND OTHER THAN FIRE OR FLOOD INSURANCE COMPANIES WHICH OPERATE ON BASIS OF PERPETUAL POLICIES OR PREMIUM DEPOSITS)

§1.821–1 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.

(a) *In general.* (1) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 801 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821 (a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and §1.822–3.

(3) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821 (a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821 (a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $3,000 or with gross amounts of income from interest, dividends, rents, and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of $75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $50,000 are subject to a tax computed under section 821(b).

(b) *Rates of tax.* (1) The normal tax under section 821(a)(1)(A) and 821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for purposes of the surtax in excess of $25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) Under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over $3,000 and not over $6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of $3,000. The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income from interest dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over $75,000 and not over $150,000 pay a tax equal to 2 percent of that portion in excess of $75,000.

(4) Under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over $50,000 and not over $100,000 pay a normal tax computed on that portion of such income in excess of $50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over $50,000 and not over $100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of $50,000.

(5) Section 821(c) provides for an adjustment of the amount computed under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable year from interest, dividends, rents, and premiums (including deposits and assessments) is over $75,000 and less than $125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over $75,000 bears to $50,000.

(c) *Application.* The application of section 821 (a) to (c) inclusive, may be illustrated by the following examples:

Example 1. The W Company, a mutual casualty insurance company, for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of $5,500 and, due to partially tax-exempt interest of $800, has income for purposes of the normal tax of $4,700. The gross amount of income of the W Company from interest, dividends, rents and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $150,000. Its normal tax under section 821(a)(1) for the calendar year 1954 is 60 percent of $1,700 ($4,700 minus $3,000) or $1,020, since its income subject to normal tax is not over $6,000. It is not liable for surtax for the calendar year 1954 as its mutual insurance company taxable income for purposes of the surtax does not exceed $25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of $1,020. The tax under section 821(a)(2) is 2 percent of $75,000 ($150,000 − $75,000), or $1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is $1,500, namely, that imposed by section 821(a)(2).

Example 2. If in example 1 the income for purposes of the normal tax were not over $3,000, the income for purposes of the surtax were not over $25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) were $90,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, were $70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

Example 3. The X Company, a mutual casualty insurance company, for the calendar year 1954 has mutual insurance company taxable income for surtax purposes of $28,000 and, due to partially tax-exempt interest of $5,000, has income for normal tax purposes of $23,000. The gross amount of income of the X Company from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1954 is 30 percent of $23,000, or $6,900, and the surtax is 22 percent of $3,000 ($28,000 − $25,000), or $660. The combined tax under section 821(a)(1) is $7,560 ($6,900 plus $660). The tax under section 821(a)(2) is 1 percent of $1,200,000, or $12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is $12,000, namely, that imposed by section 821(a)(2).

Example 4. The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of $35,000 and, due to partially tax-exempt interest of $5,000, has income for purposes of the normal tax of $30,000. The gross amount received from interest, dividends, rents and premiums (including deposits and assessments) is $120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of $30,000, or $9,000, since this is less than $16,200, 60 percent of $27,000 (excess of $30,000 over $3,000); and the surtax would be 22 percent of $10,000 (excess of $35,000 over $25,000), or $2,200. The combined tax of $11,200 ($9,000 plus $2,200) would then be reduced by applying section 821(c), since the gross receipts are between $75,000 and $125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of $11,200, or $10,080, since $45,000 (excess of $120,000 over $75,000) is 90 percent of $50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of $25,000 (excess of $100,000 over $75,000), or $500, since this is less than $1,000, 1 percent of $100,000. Applying section 821(c) reduces this to $450, or 90 percent of $500. Since $10,080, the tax under section 821(a)(1), as adjusted, exceeds $450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal taxing and surtax of $10,080.

Example 5. The Z Exchange, an interinsurer, for the calendar year 1954 has mutual insurance company taxable income for purposes of the surtax of $60,000 and, due to partially tax-exempt interest of $12,000, has income for purposes of the normal tax of $48,000. The gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) is $2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar year 1954 as its mutual insurance company taxable income for purposes of the normal tax does not exceed $50,000. Its surtax is 33 percent of $10,000 ($60,000 minus $50,000), or $3,300, since that amount is less than $7,700, 22 percent of $35,000 (excess of $60,000 over $25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(a) is $3,300.

§1.821–2 Taxable years affected.

Section 1.821–1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Section 1.821–3 is applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.821–4 and 1.821–5 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to sections of the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11110, Oct. 17, 1963]

§1.821–3 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.

(a) *In general.* (1) For taxable years beginning after December 31, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821 (a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and §1.822–7. However, for taxable years beginning after May 31, 1960,

only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. In the case of any such evidence of indebtedness, adjustment shall be made to basis in the same manner as that made by life insurance companies under section 1016(a)(17) and the regulations thereunder.

(3) All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821 (a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821 (a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $3,000 or with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of $75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $50,000 are subject to a tax computed under section 821(b).

(b) *Rates of tax.* (1) For taxable years beginning before July 1, 1963, the normal tax under section 821(a)(1)(A) and 821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for the purposes of the surtax in excess of $25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) For taxable years beginning before July 1, 1963, under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over $3,000 and not over $6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of $3,000. The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over $75,000 and not over $150,000 pay a tax equal to 2 percent of that portion in excess of $75,000.

(4) For taxable years beginning before July 1, 1963, under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over $50,000 and not over $100,000 pay a normal tax computed on that portion of such income in excess of $50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over $50,000 and not over $100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of $50,000.

(5) Section 821(c) provides for an adjustment of the amount computed under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable

year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is over $75,000 and less than $125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over $75,000 bears to $50,000.

(c) *Application.* The application of section 821 (a) to (c) inclusive, may be illustrated by the following examples:

Example 1. The W Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of $5,500 and, due to partially tax-exempt interest of $800, has income for purposes of the normal tax of $4,700. The gross amount of income of the W Company from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $150,000. Its normal tax under section 821(a)(1) for the calendar year 1958 is 60 percent of $1,700 ($4,700 minus $3,000) or $1,020, since its income subject to normal tax is not over $6,000. It is not liable for surtax for the calendar year 1958 as its mutual insurance company taxable income for purposes of the surtax does not exceed $25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of $1,020. The tax under section 821(a)(2) is 2 percent of $75,000 ($150,000−$75,000), or $1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is $1,500, namely, that imposed by section 821(a)(2).

Example 2. If in the above example the income for purposes of the normal tax were not over $3,000, the income for purposes of the surtax were not over $25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) were $90,000, and the gross amount of income from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest were $70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

Example 3. The X Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for surtax purposes of $28,000 and, due to partially tax-exempt interest of $5,000, has income for normal tax purposes of $23,000. The gross amount of income of the X Company received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1958 is 30 percent of $23,000, or $6,900, and the surtax is 22 percent of $3,000 ($28,000−$25,000), or $660. The combined tax under section 821(a)(1) is $7,560 ($6,900 plus $660). The tax under section 821(a)(2) is 1 percent of $1,200,000, or $12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is $12,000, namely, that imposed by section 821(a)(2).

Example 4. The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of $35,000 and, due to partially tax-exempt interest of $5,000, has income for purposes of the normal tax of $30,000. The gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is $120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of $30,000, or $9,000, since this is less than $16,200, 60 percent of $27,000 (excess of $30,000 over $3,000); and the surtax would be 22 percent of $10,000 (excess of $35,000 over $25,000), or $2,200. The combined tax of $11,200 ($9,000 plus $2,200) would then be reduced by applying section 821(c), since the gross receipts are between $75,000 and $125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of $11,200, or $10,080, since $45,000 (excess of $120,000 over $75,000) is 90 percent of $50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of $25,000 (excess of $100,000 over $75,000), or $500, since this is less than $1,000, 1 percent of $100,000. Applying section 821(c) reduces this to $450, or 90 percent of $500. Since $10,080, the tax under section 821(a)(1), as adjusted, exceeds $450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal tax and surtax of $10,080.

Example 5. The Z Exchange, an inter-insurer, for the calendar year 1958 has mutual insurance company taxable income for purposes of the surtax of $60,000 and, due to partially tax-exempt interest of $12,000, has income for purposes of the normal tax of $48,000. The gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is $2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar year 1958 as its mutual insurance company taxable income for purposes of the normal tax does not exceed $50,000. Its surtax is 33 percent of $10,000 ($60,000 minus $50,000), or $3,300, since that amount is less than $7,700, 22 percent of $35,000 (excess of $60,000 over $25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(b) is $3,300.

[T.D. 6610, 27 FR 8718, Aug. 31, 1962]

§ 1.821–4 Tax on mutual insurance companies other than life insurance companies and other than fire, flood, or marine insurance companies, subject to tax imposed by section 831.

(a) *In general*—(1) *Tax imposed.* (i) For taxable years beginning after December 31, 1962, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831, and not specifically exempt under the provisions of section 501(c)(15), are subject either to the tax imposed by section 821(a) on mutual insurance company taxable income or, in the case of certain small companies, to the tax imposed by section 821(c) on taxable investment income. The determination of whether a mutual insurance company is taxable under section 821 (a) or (c) for the taxable year is dependent upon the gross amount received by the company during such taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments). If such gross amount received exceeds $150,000, but does not exceed $500,000 for the taxable year, the company is subject to the tax imposed by section 821(c) on taxable investment income, unless (*a*) the company elects under section 821(d) in the manner provided in paragraph (f) of this section to be subject to the tax imposed by section 821(a), or (*b*) there is a balance in its protection against loss account at the beginning of the taxable year. A company having a gross amount received in excess of $500,000 is subject to the tax imposed by section 821(a). For exemption from income tax of companies having a gross amount received not in excess of $150,000, see section 501(c)(15). For the alternative tax, in lieu of the tax imposed by section 821 (a) or (c), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder. For the definition of an insurance company, see paragraph (a) of § 1.801–3.

(ii) The term ''premiums'' as used in section 821 and this section has the same meaning as in section 501(c)(15) and § 1.501(c)(15)–1, and means the total amount of the premiums and other consideration provided in the insurance contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction), but does not include amounts received from other insurance companies for losses paid under reinsurance contracts.

(2) *Tax base.* The taxable income of mutual insurance companies taxable under section 821 differs from the taxable income of other corporations. See sections 821(b) and 822. Mutual insurance companies have special items of income and special deductions not provided for other corporations. See, for example, sections 821(b)(1)(C), 822(d), 823(b), 824(a), and 825(a). Thus, the computation of mutual insurance company taxable income for a company taxable under section 821(a), and the computation of taxable investment income for a company taxable under section 821(c), must be made in strict accordance with the provisions of part II of subchapter L of the Code.

(3) *Applicability of other provisions.* All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of part II of

subchapter L of the Code are applicable to the assessment and collection of the tax imposed by section 821 (a) or (c), and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) *Certain foreign companies.* Foreign mutual insurance companies (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831) not carrying on an insurance business within the United States are not taxable under section 821 (a) or (c), but are taxable as other foreign corporations. See section 881.

(b) *Rates of tax imposed by section 821(a)*—(1) *Normal tax.* For taxable years beginning before January 1, 1964, the normal tax imposed under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income, or 60 percent of the amount by which mutual insurance company taxable income exceeds $6,000. In the case of taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of mutual insurance company taxable income, or 44 percent of the amount by which mutual insurance company taxable income exceeds $6,000, whichever is the lesser. For example, a company subject to tax under section 821(a) will file a return but will pay no normal tax if mutual insurance company taxable income does not exceed $6,000. When mutual insurance company taxable income exceeds $6,000 but does not exceed $12,000, the company will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of the amount by which mutual insurance company taxable income exceeds $6,000. When mutual insurance company taxable income exceeds $12,000, the company will pay normal tax at the rate of 22 percent (30 percent in the case of taxable years beginning before Jan. 1, 1964), of such income.

(2) *Surtax*—(i) *Taxable years beginning before January 1, 1964.* For taxable years beginning before January 1, 1964, companies taxable under section 821(a) are subject to a surtax equal to 22 percent of so much of their mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) as exceeds $25,000. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the $25,000 surtax exemption otherwise provided by this subparagraph, and without regard to whether the company is liable for any normal tax under subparagraph (1) of this paragraph. See section 826(f) and §1.826–2.

(ii) *Taxable years beginning after December 31, 1963.* For taxable years beginning after December 31, 1963, companies taxable under section 821(a) are subject to a surtax at the rates and with the exemptions provided in section 11(c) on their mutual insurance company taxable income. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the surtax exemption otherwise provided by section 11(d), and without regard to whether the company is liable for any normal tax under section 821(a)(1) and subparagraph (1) of this paragraph. See section 826(f) and §1.826–2.

(c) *Mutual insurance company taxable income defined.* The tax imposed by section 821(a) with respect to any taxable year is computed upon mutual insurance company taxable income for the taxable year. Section 821(b) provides that in the case of a mutual insurance company subject to the tax imposed by section 821(a), mutual insurance company taxable income means the amount by which:

(1) The sum of:

(i) The taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of §1.822–8).

(ii) The statutory underwriting income (as defined in section 823(a)(1) and paragraph (b)(1) of §1.823–6), and

(iii) The amounts required by section 824(d) and paragraph (b)(3) of § 1.824–1 to be subtracted from the protection against loss account, exceeds.

(2) The sum of:

(i) The investment loss (as defined in section 822(a)(2) and paragraph (a)(2) of § 1.822–8),

(ii) The statutory underwriting loss (as defined in section 823(a)(2) and paragraph (b)(2) of § 1.823–6), and

(iii) The unused loss deduction provided by section 825(a) and paragraph (a) of § 1.825–1.

If for any taxable year the amount determined under subparagraph (2) of this paragraph equals or exceeds the amount determined under subparagraph (1) of this paragraph, the mutual insurance company taxable income for such year shall be zero.

(d) *Examples.* The application of the tax imposed by section 821(a) may be illustrated by the following examples:

Example 1. (a) M, a mutual casualty insurance company, for the calendar year 1963 has gross receipts from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) in excess of $500,000, and therefore is subject to the tax imposed by section 821(a). M's taxable investment income, computed under section 822, is $30,000 and its statutory underwriting income, computed under section 823, is $15,000. M subtracts $3,000 from its protection against loss account in accordance with the computation made under section 824(d). M has no unused loss deduction. M received no partially tax exempt interest. If M is not subject to section 826, its mutual insurance company taxable income for the taxable year 1963 is $48,000, computed as follows:

(1) Taxable investment income	$30,000
(2) Statutory underwriting income	15,000
(3) Subtractions from protection against loss account	3,000
(4) Total income items	48,000
(5) Investment loss	0
(6) Statutory underwriting loss	0
(7) Unused loss deduction	0
(8) Total loss items	0
(9) Mutual insurance company taxable income (item (4) minus item (8))	48,000

(b) Since M's mutual insurance company taxable income is in excess of $12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 30 percent. In addition, since M's mutual insurance company taxable income exceeds $25,000, M will pay surtax on such excess at a rate of 22 percent. M's total tax liability for the taxable year 1963 is $19,460, computed as follows:

(1) Mutual insurance company taxable income as computed in item (a)(9)	$48,000
(2) Normal tax; 30 percent of mutual insurance company taxable income	14,400
(3) Surtax exemption	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3))	23,000
(5) Surtax: 22 percent of mutual insurance company taxable income subject to the surtax	5,060
(6) Total tax (item (2) plus item (5))	19,460

Example 2. If in example 1, M's mutual insurance company taxable income for 1963 had been in excess of $6,000 but not in excess of $12,000, M would pay normal tax in an amount equal to 60 percent of the amount by which such income exceeded $6,000. Thus, if M had mutual insurance company taxable income of $11,000, M's total tax liability for the taxable year 1963 would be $3,000, computed as follows:

(1) Mutual insurance company taxable income	$11,000
(2) Mutual insurance company taxable income in excess of $6,000 ($11,000 minus $6,000)	5,000
(3) 30 percent of item (1)	3,800
(4) 60 percent of item (2)	3,000
(5) Normal tax (lesser of items (3) or (4))	3,000
(6) Surtax exemption	25,000

Since the surtax exemption exceeds the mutual insurance company taxable income for purposes of the surtax, there is no surtax liability. Since the normal tax under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income or 60 percent of the amount by which such income exceeds $6,000, M's normal tax (and total income tax liability) is $3,000. If M's mutual insurance company taxable income was not in excess of $6,000, M would be required to file a return, but would not be liable for any normal tax, since, in such a case, 60 percent of M's mutual insurance company taxable income in excess of $6,000 would be zero.

Example 3. Assume the same income as in example 1 in the 1965 calendar year and that M is not a corporation to which section 1561 (with respect to certain controlled corporations) applies. Since M's mutual insurance company taxable income is in excess of $12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 22 percent. In addition, since M's mutual insurance company taxable income exceeds the surtax exemption provided in section 11(d) of $25,000, M will pay a surtax on such excess at the rate provided in section 11(c), 26 percent. M's total liability for the taxable year 1964 is $16,540, computed as follows:

(1) Mutual insurance company taxable income as computed in example (1)	$48,000
(2) Normal tax: 22 percent of mutual insurance company taxable income for normal tax purposes	10,560
(3) Surtax exemption provided by section 11(d)	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3))	23,000
(5) Surtax: at rates provided in section 11(c): 26 percent of mutual insurance company taxable income subject to the surtax	5,980
(6) Total tax (item (2) plus item (5))	16,540

(e) *Alternative tax for certain small mutual insurance companies*—(1) *In general.* (i) Section 821(c) provides an alternative tax for certain small mutual insurance companies. This alternative tax, which is in lieu of the tax imposed by section 821(a), is imposed on taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of §1.822–8) and consists of a normal tax and a surtax. The tax provided by section 821(c) is imposed on every mutual insurance company (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831) which received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) a gross amount in excess of $150,000 but not in excess of $500,000, except a company which has properly elected under section 821(d) and paragraph (f) of this section to be subject to the tax imposed by section 821(a), or a company which has a balance in its protection against loss account at the beginning of the taxable year.

(ii) Any company which would be taxable under section 821(c) but for the presence of an amount in its protection against loss account at the beginning of the taxable year may elect to subtract the balance from such account. See section 824(d)(5) and §1.824–3. If such an election is made in such a case, the company shall not be subject to the tax imposed by section 821(a), but shall be subject to the tax imposed by section 821(c).

(2) *Rates of tax imposed by section 821(c)*—(i) *Normal tax.* The normal tax for taxable years beginning before January 1, 1964, is the lesser of 30 percent of taxable investment income or 60 percent of the amount by which taxable investment income exceeds $3,000. For taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of taxable investment income, or 44 percent of the amount by which taxable investment income exceeds $3,000, whichever is the lesser. Thus, a company subject to tax under section 821(c) will file a return but will pay no tax if for the taxable year its taxable investment income does not exceed $3,000; or will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of taxable investment income in excess of $3,000 when such income exceeds $3,000 but does not exceed $6,000. When taxable investment income exceeds $6,000, the normal tax is imposed at the rate of 22 percent (30 percent in the case of taxable years beginning before Jan. 1, 1964) of such income.

(ii) *Surtax.* For taxable years beginning before January 1, 1964, a surtax is imposed at the rate of 22 percent of taxable investment income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) in excess of $25,000. For taxable years beginning after December 31, 1963, a surtax is imposed at the rate provided in section 11(c) on taxable investment income in excess of the surtax exemption provided in section 11(d).

(f) *Election to be taxed under section 821(a)*—(1) *In general.* Section 821(d) provides that any mutual insurance company taxable under section 821(c) may elect, in the manner provided by subparagraph (3) of this paragraph, to be taxed under section 821(a).

(2) *Scope of election.* Except as otherwise provided herein, an election made under section 821(d) and this paragraph to be taxable under section 821(a) shall be binding for the taxable year for which made and for all succeeding taxable years unless the Commissioner consents to a revocation of such election. If for any taxable year the gross

amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) does not exceed $150,000, a company's prior election made under section 821(d) to be taxable under section 821(a) will automatically terminate and any balance in the protection against loss account will be taken into account for the preceding taxable year. (See section 824(d)(4) and § 1.824–2 for automatic termination of protection against loss account if company is not subject to the tax imposed by section 821(a).) If for any taxable year thereafter the gross amount received exceeds $150,000 but does not exceed $500,000, the company shall be taxable under section 821(c) unless it makes a new election to be taxable under section 821(a). If a company subject to tax under section 821(c) for a taxable year elects under section 821(d) and this section to be taxed under section 821(a) and, in a subsequent taxable year, the gross receipts of such company exceed $500,000, the election made for such earlier taxable year shall be considered as continuing in effect. Thus, such a company will continue to be taxable under section 821(a) notwithstanding that its gross receipts subsequently fall below $500,000 (so long as they do not fall below $150,000) unless the Commissioner consents to a revocation of the prior election. Whether revocation is permissible in any case will depend on the facts and circumstances of the particular case, but in no case will revocation be granted in the absence of a showing that the election creates an undue burden or material hardship on the company due to a substantial change in the character of its operations.

(3) *Time and manner of making election.* The election provided by section 821(d) shall be made in a statement attached to the company's income tax return for the first taxable year for which the election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year.

(g) *Examples.* The application of the tax imposed by section 821(c) may be illustrated by the following examples:

Example 1. M, a mutual casualty insurance company, for the calendar year 1963 has a gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of $400,000. Since M's gross amount received exceeds $150,000, but does not exceed $500,000, M is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed on mutual insurance company taxable income by section 821(a). M computes its taxable investment income under section 822 to be $35,000. In computing taxable investment income, M deducted $2,000 of partially tax-exempt interest under section 242. If M does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is $13,140 computed as follows:

(1) Taxable investment income as computed under section 822	$35,000
(2) 30 percent of taxable investment income	10,500
(3) 60 percent of taxable investment income in excess of $3,000	19,200
(4) Normal tax (lesser of items (2) or (3))	10,500
(5) Partially tax-exempt interest deducted in computing taxable investment income	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5))	37,000
(7) Surtax exemption	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7))	12,000
(9) Surtax (22 percent of item (8))	2,640
(10) Total tax liability (item (4) plus item (9))	13,140

Example 2. N, a mutual casualty insurance company, for the taxable year 1963 has a gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of $210,000. Since N's gross amount received exceeds $150,000 but does not exceed $500,000, N is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed by section 821(a). Furthermore, since the gross amount received by N does not exceed $250,000, N is entitled to the special tax reduction provided by section 821(c)(2). N computes its taxable investment income under section 822 to be $24,000. In computing taxable investment income, N deducted $2,000 of partially tax-exempt interest under section 242. If N does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is $4,452 computed as follows:

(1) Taxable investment income as computed under section 822	$24,000
(2) 30 percent of taxable investment income	7,200
(3) 60 percent of taxable investment income in excess of $3,000	12,600
(4) Normal tax (lesser of items (2) or (3))	7,200

(5) Partially tax-exempt interest deducted in computing taxable investment income	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5))	26,000
(7) Surtax exemption	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7))	1,000
(9) Surtax 22 percent of item (8)	220
(10) Tax liability computed without regard to special reduction (item (4) plus item (9))	7,420
(11) Amount by which gross receipts exceed $150,000 ($210,000 gross receipts minus $150,000)	60,000
(12) Percentage which item (1) bears to $100,000 ($60,000 over $100,000)	0.60
(13) Tax as adjusted (percentage determined in item (12) applied to item (10))	4,452

If N's taxable investment income for purposes of the surtax did not exceed $3,000, N would file a return but would pay no tax. Had N elected (under section 821(d)) to be subject to tax under section 821(a), N would not be entitled to the special reduction afforded by section 821(c)(2), since that provision applies only to companies taxable under section 821(c).

[T.D. 6681, 28 FR 11110, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5333, Mar. 20, 1971; 36 FR 5846, Mar. 30, 1971]

§1.821–5 Special transitional underwriting loss.

(a) *In general.* Section 821(f) provides a special reduction in the statutory underwriting income (as defined by section 823(a)(1) and paragraph (b)(1) of §1.823–6) of any company taxable under section 821(a) which was taxable under section 821 for the five taxable years immediately preceding January 1, 1962, and which incurred an underwriting loss (as defined in section 821(f)(3) and paragraph (c) of this section) for each of such five taxable years.

(b) *Amount of reduction.* In the case of a company described in section 821(f)(1) and paragraph (a) of this section the statutory underwriting income for the taxable year (determined without regard to this paragraph) shall be reduced by an amount equal to the amount by which:

(1) The sum of the underwriting losses of such company for the five taxable years immediately preceding January 1, 1962, exceeds

(2) The total amount by which the company's statutory underwriting income was reduced by reason of section 821(f) and this section for prior taxable years.

(c) *Underwriting loss defined.* For purposes of computing the amount of the reduction available under section 821(f) and paragraph (a) of this section, the term underwriting loss means statutory underwriting loss (as defined by section 823(a)(2) and paragraph (b)(2) of §1.823–6) computed without any deduction under section 824(a) and paragraph (a) of §1.824–1 (relating to deduction to provide protection against losses) and without any deduction under section 832(c)(11) (relating to dividends and similar distributions paid or declared to policyholders). For rules relating to the definition of dividends and similar distributions paid or declared to policyholders, see paragraph (a) of §1.832–5.

(d) *Years of applicability.* Section 821(f)(4) provides that the special reduction of statutory underwriting income allowed by section 821(f)(2) and paragraph (b) of this section shall apply to any taxable year beginning after December 31, 1962, and before January 1, 1968, for which the taxpayer is subject to the tax imposed by section 821(a).

[T.D. 6681, 28 FR 11112, Oct. 17, 1963]

§1.822–1 Taxable income and deductions.

(a) *In general.* For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, the taxable income of a mutual insurance company subject to the tax imposed by section 821 is its gross investment income, namely, the gross amount of income during the taxable year from interest, dividends, rents, and gains from sales or exchanges of capital assets, less the deductions provided in section 822(c) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses to the extent provided in subchapter P (sec. 1201 and following), chapter 1 of the Code, and the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section

822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172.

(b) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(c) *Investment expenses.* The deduction allowed by section 822(c)(2) for investment expenses is the same as that allowed life insurance companies by section 803(g)(2). See paragraph (c) of § 1.803–4.

(d) *Taxes and expenses with respect to real estate.* The deduction allowed by section 822(c)(3) for taxes and expenses with respect to real estate owned by the company is the same as that allowed life insurance companies by section 803(g)(3). See paragraph (d) of § 1.803–4.

(e) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is the same as that allowed life insurance companies by section 803(g)(4). See paragraph (e) of § 1.803–4.

(f) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(g) *Capital losses.* (1) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(2) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of interest, dividends, rents, and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(3) The application of section 822(c)(6) may be illustrated by the following examples:

Example 1. The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1954 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, rents of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of interest, dividends, rents, and net premiums received ($125,000) is $75,000. As the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income.

Example 2. If in example 1 the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of interest, dividends, rents, and net premiums received ($125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example 3. If in example 1 the X Company had mutual insurance company taxable income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1954, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,000 are added to capital gains of $10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable income for purposes of the surtax plus $20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(h) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

§1.822–2 Real estate owned and occupied.

The limitation in section 822(d)(1) on the amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 is the same as that provided in the case of life insurance companies by section 803(h). See §1.803–5.

§1.822–3 Amortization of premium and accrual of discount.

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such amortization and accrual is the same as that provided for life insurance companies by section 803(i) and shall be determined in accordance with §1.803–6, except that in determining the premium and discount of a mutual insurance company subject to the tax imposed by section 821 the basis provided in section 1012 shall be used in lieu of the acquisition value.

§1.822–4 Taxable years affected.

Sections 1.822–1 through 1.822–3 are applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.822–5 through 1.822–7 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.822–8 through 1.822–12 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11113, Oct. 17, 1963]

§1.822–5 Mutual insurance company taxable income.

(a) *Mutual insurance company taxable income defined.* Section 822(a) defines the term ‘‘mutual insurance company taxable income’’ for purposes of part II, subchapter L, chapter 1 of the Code. Mutual insurance company taxable income means gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than in insurance business) expenses, and depletion. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172, and a deduction shall not be permitted with respect to the same item more than once.

(b) *Gross investment income defined.* For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term ‘‘gross investment income’’ of a mutual insurance company subject to the tax imposed by section 821 as the sum of the following:

(1) The gross amount of income during the taxable year from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822–7;

(ii) Dividends, as described in § 1.61–9;

(iii) Rents and royalties, as described in § 1.61–8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses), chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821, or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) *Deductions from gross investment income*—(1) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) *Investment expenses.* (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized

schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subparagraph. As used in section 822(c)(2), the term ‘‘general expenses’’ means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c) (3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of:

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus.

(b) One-fourth of the amount by which mutual insurance company taxable income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 33/4 percent of the book value of the mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term ‘‘invested assets’’ means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate owned and occupied, and to the extent owned and occupied, by the company.

(3) *Real estate expenses and taxes.* The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See §1.822–6 for limitation of such deduction.

(4) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and §1.822–6, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining mutual insurance company taxable income is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 822(b).

(5) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(6) *Capital losses.* (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

Example 1. The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1958 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, royalties of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000) is $75,000. As the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income.

Example 2. If in example 1 the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example 3. If in example 1 the X Company had mutual insurance company taxable income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1958, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,000 are added to capital gains of $10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable income for purposes of the surtax plus $20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(7) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except

section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

(8) *Trade or business deductions.* (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing mutual insurance company taxable income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b) (2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8):

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) *Depletion.* The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of §1.804–4.

[T.D. 6610, 27 FR 8720, Aug. 31, 1962, as amended by T.D. 6631, 28 FR 219, Jan. 9, 1963]

§1.822–6 Real estate owned and occupied.

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§1.822–7 Amortization of premium and accrual of discount.

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of §1.818–3, except in the case of a mutual insurance company subject to the tax imposed by section 821, paragraph (b) of §1.818–3 shall apply without regard to the date of acquisition and the basis provided in section 1012 shall be used in lieu of the acquisition value.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§1.822–8 Determination of taxable investment income.

(a) *In general*—(1) *Taxable investment income defined.* Section 822(a)(1) defines the term ‘‘taxable investment income’’ for purposes of part II, subchapter L, chapter 1 of the Code as the gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than an insurance business) expenses, and depletion. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code.

For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 (a) or (c) are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172. See, however, section 825 and paragraph (a) of § 1.825–1 for unused loss deduction allowed companies taxable under section 821(a). A deduction shall not be permitted with respect to the same item more than once.

(2) *Investment loss defined.* The term ''investment loss'' is defined by section 822(a)(2) as the amount by which the deductions allowable under section 822(c) and paragraph (c) of this section exceed the gross investment income (as defined in section 822(b) and paragraph (b) of this section).

(b) *Gross investment income defined.* For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term ''gross investment income'' of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) as the sum of the following:

(1) The gross amount of income during the taxable year from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822–10;

(ii) Dividends, as described in § 1.61–9;

(iii) Rents and royalties, as described in § 1.61–8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses) chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821 (a) or (c), or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) *Deductions from gross investment income—*(1) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) *Investment expenses.* (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subparagraph. As used in section 822(c)(2), the term ‘‘general expenses’’ means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 (a) or (c) shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c) (3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of:

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus

(b) One-fourth of the amount by which taxable investment income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 33/4 percent of the book value of the mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term ‘‘invested assets’’ means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate owned and occupied, and to the extent owned and occupied, by the company.

(3) *Real estate expenses and taxes.* The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See §1.822–9 for limitation of such deduction.

(4) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and § 1.822–9, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining taxable investment income is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 822(b).

(5) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(6) *Capital losses.* (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

Example 1. The X Company, a mutual fire insurance company subject to tax under section 821, in the taxable year 1963 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, royalties of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000) is $75,000. Since the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income in computing taxable investment income under section 822.

Example 2. If in example 1 the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example 3. If in example 1 the X Company had taxable investment income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1963, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,000 are added to capital gains of $10,000, since they are less than taxable investment income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable investment income for purposes of the surtax plus $20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(7) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received. In applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of this subparagraph, the reference in such section to ''taxable income'' shall be treated as a reference to ''taxable investment income''.

(8) *Trade or business deductions.* (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing taxable investment income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b)(2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8):

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) *Depletion.* The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of §1.804–4.

[T.D. 6681, 28 FR 11113, Oct. 17, 1963]

§1.822–9 Real estate owned and occupied.

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 (a) or (c) shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§1.822–10 Amortization of premium and accrual of discount.

(a) *In general.* In computing taxable investment income for the taxable year, the gross amount of income from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section

242 for partially tax-exempt interest, are, under the provisions of section 822(d)(2), each to be decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821 (a) or (c). However, only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of § 1.818–3, except as provided by paragraph (b) of this section.

(b) *Modifications.* (1) Paragraph (b) of § 1.818–3 shall apply to mutual casualty insurance companies subject to the tax imposed by section 821 (a) or (c) without regard to the date of acquisition of the particular securities to which the amortization of premium or accrual of discount is attributable.

(2) In computing the amount of premium or discount for purposes of section 822(d)(2) with respect to securities held by a company taxable under section 821, the basis provided by section 1012 shall be used in lieu of the acquisition value provided by paragraph (b) of § 1.818–3. In the case of a company subject to the tax imposed by section 821(c), adjustments to basis to reflect the accrual of discount and the amortization of premium shall be made in the manner provided by paragraphs (a) and (b) of § 1.818–3. However, for purposes of determining statutory underwriting income or loss for the taxable year under section 823, a company subject to the tax imposed by section 821(a) is not required to accrue discount or to amortize premium in computing its income under section 832 as if it were subject to the tax imposed by section 831. Thus, the accrual of discount and amortization of premium required in the computation of taxable investment income by a company subject to the tax imposed by section 821(a) neither increases nor decreases the mutual insurance company taxable income of such a company and, except to the extent such a company actually accrues discount or amortizes premium for purposes of making the section 832 computation, no adjustment shall be made to the basis of obligations held by it to reflect accrual of discount or amortization of premium.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.822–11 Net premiums.

The term ‘‘net premiums’’, defined in section 822(f)(1), includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 822(f)(2). Net premiums are used in sections 822(c)(6) and 832(c)(5) in determining the limitation on certain capital losses and in the application of section 1212.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.822–12 Dividends to policyholders.

(a) Dividends to policyholders are used in determining the ‘‘underwriting loss’’ for purposes of the special transitional underwriting loss deduction provided by section 821(f), and the limitation on capital losses under section 822(c)(6); in computing statutory underwriting income or loss under section 823, and the subtractions from the protection against loss account under section 824(d). The term ‘‘dividends to policyholders’’ is defined in section 822(f)(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 822(f)(1). Savings credited to the individual accounts of the subscribers of a reciprocal underwriter or interinsurer under section 823(b)(2) are not dividends paid or declared within the meaning of this paragraph. However, distributions in respect of such credits shall be considered as dividends paid. See section 823(b)(2) and paragraph (c)(2) of § 1.823–6. The term ‘‘paid or declared’’ is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed by adding the amount of dividends and similar distributions declared but unpaid at the end of the taxable year to dividends and similar distributions paid during the taxable year and deducting dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§1.823–1 Net premiums.

Net premiums are one of the items used, together with interest, dividends, and rents, less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term ‘‘net premiums’’ is defined in section 823(1) and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

§1.823–2 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term ‘‘dividends to policyholders’’ is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term ‘‘paid or declared’’ is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows:

To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year.

If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

§ 1.823–3 Taxable years affected.

Sections 1.823–1 and 1.823–2 are applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.823–4 and 1.823–5 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.823–6 through 1.823–8 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11116, Oct. 17, 1963]

§ 1.823–4 Net premiums.

Net premiums are one of the items used, together with the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof), less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term ''net premiums'' is defined in section 823(1) and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§ 1.823–5 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term ''dividends to policyholders'' is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term ''paid or declared'' is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows: To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§1.823–6 Determination of statutory underwriting income or loss.

(a) *In general.* Section 823(a) and this section provide that for purposes of determining statutory underwriting income or loss for the taxable year, a mutual insurance company subject to the tax imposed by section 821(a) must first take into account the same gross income and deduction items (except as modified by section 823(b) and paragraph (c) of this section) as a taxpayer subject to tax under section 831 would take into account for purposes of determining its taxable income under section 832. These items are then reduced to the extent that they include amounts which are included in determining taxable investment income or loss under section 822(a) and §1.822–8. In addition, in computing its statutory underwriting income or loss for the taxable year, a company taxable under section 821(a) is allowed to deduct the amount determined under section 824(a) (relating to deduction to provide protection against losses) and, if its gross amount received is less than $1,100,000, is allowed to deduct the amount determined under section 823(c) and paragraph (d) of this section (relating to special deduction for certain small companies), subject to the limitations provided therein.

(b) *Definitions*—(1) *Statutory underwriting income defined.* Section 823(a) (1) defines the term ''statutory underwriting income'' for purposes of part II of subchapter L of the Code. Subject to the modifications provided by section 823(b) and paragraph (c) of this section, statutory underwriting income is defined as the amount by which:

(i) The gross income which would be taken into account in computing taxable income under section 832 if the taxpayer were subject to the tax imposed by section 831, reduced by the gross investment income (as determined under section 822(b)), exceeds

(ii) The sum of:

(a) The deductions which would be taken into account in computing taxable income if the taxpayer were subject to the tax imposed by section 831, reduced by the deductions provided in section 822(c) (relating to deductions allowed in computing taxable investment income), plus

(b) The deductions provided in section 823(c) (relating to special deduction for small company having gross amount of less than $1,100,000) and section 824(a) (relating to deduction to provide protection against losses).

For purposes of subdivision (ii)*(a)* of this subparagraph, the limitations on the amounts deductible under paragraphs (9) (relating to charitable, etc., contributions) and (12) (relating to partially tax-exempt interest and to dividends received) of section 832(c) shall be computed by reference to taxable income as defined by section 832(a), and as modified by section 823(b) and paragraph (c) of this section.

(2) *Statutory underwriting loss defined.* ''Statutory underwriting loss'' is defined in section 823(a)(2) as the amount by which the amount determined under section 823(a)(1)(B) and subparagraph (1)(ii) of this paragraph exceeds the amount determined under section 823(a)(1)(A) and subparagraph (1)(i) of this paragraph.

(c) *Modifications*—(1) *Net operating losses.* In applying section 832 for purposes of determining statutory underwriting income or loss under section 823(a) and paragraph (b) of this section, the deduction for net operating losses provided by section 172 is not allowed. However, see section 825(a) and §1.825–1 for unused loss deduction allowed companies taxable under section 821(a) in computing mutual insurance company taxable income under section 821(b).

(2) *Interinsurers and reciprocal underwriters*—(i) *In general.* Section 823(b)(2) provides that in computing the statutory underwriting income or loss of a mutual insurance company which is an interinsurer or reciprocal underwriter, there shall be allowed as a deduction the increase for the taxable year in savings credited to subscriber accounts, or there shall be included as an item of gross income the decrease for the taxable year in savings credited to subscriber accounts. For purposes of this subparagraph, the term ''savings credited to subscriber accounts'' means such portion of the surplus for the taxable year as is credited to the individual accounts of subscribers before the 16th day of the third month following the close of the taxable year,

but only if the company would be obligated to pay such amount promptly to such subscriber if he terminated his contract at the close of the company's taxable year, and only if the company mails notification to such subscriber of the amount credited to his individual account in the manner provided by subdivision (v) of this subparagraph.

(ii) *Limitations.* Amounts representing return premiums (as defined in paragraph (a)(1)(ii) of § 1.809–4) which the company would be obligated to pay to any subscriber terminating his contract at the close of the company's taxable year are not savings credited to subscriber accounts within the meaning of section 823(b)(2) and subdivision (i) of this subparagraph. The deduction for savings credited to individual subscriber accounts is allowed only in the case of reciprocal underwriters or interinsurers where the subscriber or policyholder has not only a legally enforceable right to receive the amount so credited if he withdraws from the exchange, but where the amounts credited, as a matter of actual practice, are paid to subscribers or policyholders who terminate their contracts. Thus, no deduction shall be allowed for savings credited to subscriber accounts if such savings are not in fact promptly returned to subscribers when they terminate their contracts.

(iii) *Computation of increase or decrease in savings credited to subscriber accounts.* For purposes of determining the increase or decrease for the taxable year in savings credited to subscriber accounts, every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this section shall establish and maintain an account for savings credited to subscriber accounts. The opening balance in such account for the first taxable year for which a deduction is claimed under section 823(b)(2) and this section shall be zero. In each taxable year there shall be added to such account the total amount of savings credited to subscriber accounts for the taxable year, and there shall be subtracted from such account the total amount of savings subtracted from subscriber accounts for the taxable year. However, in no case may the amount added to the account exceed the total amount of savings to subscribers for the taxable year, irrespective of the amount of savings credited to subscriber accounts for the taxable year. Credits made to subscriber accounts after the close of the taxable year and before the 16th day of the third month following the close of the taxable year will be taken into account as if such amounts had been credited on the last day of the taxable year to the extent such amounts would have become fixed and determinable legal obligations due subscribers if such subscribers had terminated their contracts on the last day of the company's taxable year unless, at the time the amounts are credited, the company specifically designates such amounts as being from surplus for the taxable year in which the amounts were actually credited. Such a designation, once made, shall be irrevocable. However, if a company credited savings to subscriber accounts after December 31, 1962, and before March 16, 1963, and failed to designate such credits as being from surplus for the taxable year 1963, such company may designate such credits as being from surplus for the taxable year 1963 for purposes of determining the total amount of credits to subscriber accounts for such year. In determining the total amount of savings subtracted from subscriber accounts for the taxable year, only amounts subtracted from savings credited for taxable years beginning with the first taxable year for which a deduction was claimed under section 823(b)(2) and this subparagraph will be taken into account. The method of accounting regularly employed by the taxpayer in keeping its books of account will be used for purposes of determining whether the amounts subtracted from the subscriber accounts are from savings for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings for taxable years beginning with such first taxable year. Where the method of accounting regularly employed by the taxpayer in keeping its books of account does not clearly indicate whether an amount was subtracted from savings credited to subscriber accounts for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings credited for such first taxable year and subsequent taxable years, the amount subtracted will be deemed to have come from savings credited to subscriber accounts for all taxable years, on a pro rata basis. Where an amount is subtracted from a subscriber's account for record purposes, but such subtraction does not reflect the discharge of the company's legal obligation to pay the amount subtracted promptly to the subscriber if he terminates his contract, then such subtraction shall not be taken into account for purposes of section 823(b)(2) and this subparagraph. On the other hand, where the company ceases to be under a legal obligation to pay promptly to any subscriber the amount credited to his individual account, then such amount shall be considered as having been subtracted from such subscriber's account at the time such obligation ceased to exist. For purposes of section 823(b)(2) and this subparagraph, the increase (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the taxable year exceeds the balance in such account as of the close of the preceding taxable year; and the decrease (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the preceding taxable year exceeds the balance in such account as of the close of the taxable year.

(iv) *Legal obligation.* For purposes of this subparagraph, the existence of a legal obligation on the part of the company to pay to the subscriber the savings credited to him will be determined under the insurance contract pursuant to which the credits are made. Where it appears that the company is otherwise legally obligated to pay amounts credited to its subscribers, the requisite legal obligation will not be considered absent merely because a subscriber's credits remain subject to absorption by future losses incurred if left on deposit with the company.

(v) *Notification to subscribers.* Every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this subparagraph for amounts credited to the individual accounts of its subscribers must mail to each such subscriber written notification of the amount credited to the subscriber's account for the taxable year, the date on which such amount was credited, and the date on which the subscriber's right to such amount first would have become fixed if such subscriber had terminated his contract at the close of the company's taxable year. As an alternative to providing each subscriber with specific information relating to the amount of savings credited to his individual account, the notification required by this subdivision may be provided in the form of a table or formula mailed to the subscribers. However, a table or formula may not be used in lieu of the specific notification required by this subdivision unless such table or formula has been approved by the Commissioner. Generally, a table or formula will be approved if it enables the subscriber to simply and readily ascertain the amount of savings credited to his individual account for the taxable year, the date on which such amount was credited, and the date on which his right to such amount first would have become fixed if he had terminated his contract at the close of the company's taxable year. A reciprocal underwriter or interinsurer which desires to use such a table or formula should direct a written request for approval of such table or formula to the Commissioner of Internal Revenue, Attention: T:R, Washington, DC, 20224. Such request must set forth a copy of the table or formula proposed to be used, together with sufficient information to permit the Commissioner to determine the basis upon which such table or formula was prepared and the manner in which the subscribers will use such table or formula in determining the amounts credited to their individual accounts. Once a table or formula has been approved, the use of such table or formula with respect to savings credited for subsequent taxable years will not require further approval unless the basis upon which such table or formula was prepared, or the manner in which such table or formula is to be applied, is substantially changed. The table or formula method of notification may be used with respect to all or less than all of the company's subscribers. For example, the company might provide the notification required by this subdivision to one class of subscribers in the form of a table or formula mailed to the individual subscribers, while providing another class of subscribers with specific statements of the amounts credited to their individual accounts. The notification required by this subdivision must be mailed before the 16th day of the third month following the close of the reciprocal's taxable year for which the account was credited. Where for any taxable year a reciprocal underwriter or interinsurer claims a deduction under section 823(b) and this subparagraph and fails to give notice as required by this subdivision, such deduction shall not be allowed unless the reciprocal establishes to the satisfaction of the district director that the failure to mail such notice within the prescribed period was due to reasonable cause.

(d) *Special deduction for small company having gross amount of less than $1,100,000*—(1) *In general.* In the case of a taxpayer subject to the tax imposed by section 821(a), section 823(c) provides that if the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is less than $1,100,000, then, subject to the limitation provided in section 823(c)(2) and subparagraph (2) of this paragraph, there shall be allowed an additional deduction for purposes of determining statutory underwriting income or loss under section 823(a) for the taxable year. The amount of the additional deduction is $6,000; except that if the gross amount received for the taxable year exceeds $500,000, the additional deduction is limited to an amount equal to 1 percent of the amount by which $1,100,000 exceeds such gross amount.

(2) *Limitation.* The amount of the deduction provided by section 823(c)(1) may not exceed the statutory underwriting income for the taxable year, computed without regard to the deduction allowed under section 823(c)(1) and subparagraph (1) of this paragraph, and the deduction allowed under section 824(a) (relating to deduction for protection against losses).

(3) *Example.* The application of section 823(c) and this paragraph may be illustrated by the following example:

M, a mutual insurance company subject to the tax imposed by section 821(a), has the following items for the taxable year 1963:

Gross amount for purposes of section 823(c)(1)	$800,000
Gross investment income (including capital gains)	150,000
Capital gains	100,000
Gross income under section 832	900,000
Deductions under section 822(c)	22,000
Deductions under section 832 (as modified by section 823(b)(2))	746,000

Under the provisions of section 823(c), M's special small company deduction for the taxable year 1963 would be $3,000, computed as follows:

(1) Gross amount for purposes of section 823(c)(1)	$800,000
(2) Amount by which $1,100,000 exceeds item (1) ($1,100,000 minus $800,000)	300,000
(3) 1 percent of item (2) (not to exceed $6,000)	3,000
(4) Gross income under section 832, reduced by gross investment income ($900,000 minus $150,000)	750,000
(5) Deductions under section 832 (as modified by section 823(b)), reduced by deductions under section 822(c) ($746,000 minus $22,000)	724,000
(6) Limitation on deduction under section 823(c)(1) (excess, if any, of item (4) over item (5))	26,000
(7) Deduction under section 823(c)(1) (item (3) or item (6), whichever is the lesser)	3,000

[T.D. 6681, 28 FR 11116, Oct. 17, 1963]

§ 1.823–7 Subscribers of reciprocal underwriters and interinsurers.

A subscriber or policyholder of a reciprocal underwriter or interinsurer entitled to the deduction allowed by section 823(b)(2) and paragraph (c)(2) of § 1.823–6 shall treat amounts representing savings credit to his individual account for the taxable year as a dividend paid or declared for purposes of computing his taxable income. If a reciprocal credits savings to subscriber accounts after the close of its taxable year, but before the 16th day of the third month following the close of the taxable year, and the reciprocal takes such credits into account as if they had been made on the last day of its taxable year, the subscribers of such reciprocal must take such savings into account as if they had in fact been credited on the last day of the company's taxable year. The subscriber shall take savings credited to his account into account without regard to whether the amounts credited are actually distributed to him in cash. To the extent the insurance premium constituted a deductible expense when paid or accrued, the subscriber's taxable income for the taxable year will be increased and any loss for the taxable year will be decreased, by the amount credited to his account. Amounts credited to a subscriber's account which are taken into income by him and which subsequently are used to absorb losses of the reciprocal shall be treated by the subscriber as an additional insurance expense for the taxable year in which the amounts are absorbed. Such amounts may be deducted in computing taxable income to the extent insurance constitutes an otherwise properly deductible expense for such taxable year.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

§1.823–8 Special transitional underwriting loss; cross reference.

With respect to taxable years beginning after December 31, 1962, and before January 1, 1968, section 821(f) provides, for any company subject to the tax imposed by section 821(a), a special reduction in the statutory underwriting income if such company was subject to tax under section 821 for the five taxable years immediately preceding January 1, 1962, and incurred an underwriting loss in each of such five taxable years. For rules relating to the determination of the amount of such reduction, see section 821(f) and §1.821–5.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

§1.825–1 Unused loss deduction; in general.

(a) *Amount of deduction.* Section 825(a) provides that the unused loss deduction of a mutual insurance company subject to the tax imposed by section 821(a) shall be an amount equal to the sum of the unused loss carryovers and carrybacks to the taxable year. The amount so determined is used in the computation of mutual insurance company taxable income for the taxable year. See section 821(b) and §1.821–4.

(b) *Unused loss defined.* Section 825(b) defines the term ''unused loss'' as the amount (if any) by which:

(1) The sum of the statutory underwriting loss (as defined in section 823(a)(2)) and the investment loss (as defined in section 822(a)(2)) exceeds

(2) The sum of:

(i) The taxable investment income (as defined in section 822(a)(1)),

(ii) The statutory underwriting income (as defined in section 823(a)(1)), and

(iii) The amounts required to be subtracted from the protection against loss account under section 824(d).

(c) *Steps in computation of unused loss deduction.* The three steps to be taken in the ascertainment of the unused loss deduction for any taxable year are as follows:

(1) Compute the unused loss for any preceding or succeeding taxable year from which an unused loss may be carried over or carried back to the taxable year.

(2) Compute the unused loss carryovers to the taxable year from such preceding taxable years and the unused loss carrybacks to the taxable year from such succeeding taxable years.

(3) Add such unused loss carryovers and carrybacks in order to determine the unused loss deduction for the taxable year.

(d) *Statement with tax return.* Every mutual insurance company taxable under section 821(a) claiming an unused loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the unused loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the unused loss deduction.

(e) *Ascertainment of deduction dependent upon unused loss carryback.* If a mutual insurance company taxable under section 821(a) is entitled in computing its unused loss deduction to a carryback which it is not able to ascertain at the time its return is due, it shall compute the unused loss deduction on its return without regard to such unused loss carryback. When the company ascertains the unused loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the unused loss deduction for the taxable year with the inclusion of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(f) *Law applicable to computations.* The following rules shall apply to taxable years for which the taxpayer is subject to the tax imposed by section 821(a):

(1) In determining the amount of any unused loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The unused loss for any taxable year shall be determined under the law applicable to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the unused loss deduction.

(3) The amount of the unused loss deduction which shall be allowed for any taxable year shall be determined under the law applicable for that year.

[T.D. 6681, 28 FR 11122, Oct. 17, 1963]

§ 1.825–2 Unused loss carryovers and carrybacks.

(a) *Years to which loss may be carried*—(1) *In general.* In order to determine its unused loss deduction for any taxable year, a mutual insurance company taxable under section 821(a) must first determine the part of any unused losses for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. An unused loss is to be an unused loss carryback to each of the 3 taxable years preceding the loss year, and an unused loss carryover to each of the 5 taxable years following the loss year, subject to the limitations provided in section 825(g) and subparagraph (2) of this paragraph.

(2) *Limitations.* An unused loss may not be carried:

(i) To or from any taxable year beginning before January 1, 1963,

(ii) To or from any taxable year for which the taxpayer is not subject to the tax imposed by section 821(a), nor

(iii) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the taxpayer was not subject to the tax imposed by section 821(a).

(3) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 825 the first, second, etc., preceding or succeeding taxable year.

(b) *Loss year defined.* The term ‘‘loss year’’ as used in this section means any taxable year for which a company subject to the tax imposed by section 821(a) has an unused loss in excess of zero.

(c) *Amount of carrybacks and carryovers.* Section 825(e) provides that in the case of a loss year for a company taxable under section 821(a), the entire amount of the unused loss shall be carried to the earliest taxable year to which such loss may be carried under section 825(d) (subject to the limitations of section 825(g)). The amount of the unused loss carried to each of the other taxable years to which such loss may be carried under section 825(d) following such earliest taxable year shall be the excess (if any) of such loss over the sum of the offsets for each taxable year preceding the taxable year to which the unused loss is carried.

(d) *Offset defined*—(1) *In general.* Section 825(f) defines the term ‘‘offset’’ and provides that the taxable year to which an unused loss is carried shall be referred to as the ‘‘offset year’’. The definition of the term offset in the case of an unused loss carryback to an offset year, differs from the definition of such term in the case of an unused loss carryover to an offset year.

(2) *Offset in case of carryback.* In the case of an unused loss carryback from the loss year to the offset year, the offset is the mutual insurance company taxable income for the offset year, computed without regard to any unused loss carryback from the loss year or any taxable year thereafter.

(3) *Offset in case of carryover.* In the case of an unused loss carryover from the loss year to the offset year, the offset is equal to the sum of:

(i) The amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) (relating to amounts equal to the unused loss carryovers to the offset year), plus

(ii) The mutual insurance company taxable income for the taxable year, computed without regard to any unused loss carryback or carryover from the loss year or any taxable year thereafter.

[T.D. 6681, 28 FR 11123, Oct. 17, 1963]

§1.825–3 Examples.

The application of section 825 may be illustrated by the following examples:

Example 1. For the taxable year 1967, F, a mutual insurance company subject to the tax imposed by section 821(a), has the following items:

Taxable investment income	1
Underwriting loss	59
Addition to protection against loss account	8
Statutory underwriting loss	67

The subtractions from the protection against loss account are as follows:

Amount subtracted from amounts in account with respect to taxable years 1963 through 1966	18
Amount subtracted from amounts in account with respect to taxable year 1967	8
Total subtractions from protection against loss account under section 824(d)	26

The application of section 825 in this case may be illustrated by the facts and results shown in the following table and explained below:

TAXABLE YEAR

	1963	1964	1965	1966	1967	1968
Protection against loss account:						
Addition to account during taxable year	6	2	3	7	8	7
Subtraction from account during taxable year	0	0	0	0	8	7
Protection against loss account (at end of year)	6	2	3	7	0	0
Protection against loss account (at end of taxable year 1968)	0	0	0	0	0	0
Unused loss	0	0	0	0	40	0
Unused loss carryback	0	40	35	25	0	0
Unused loss carryover	0	0	0	0	0	18
Unused loss deduction	0	40	35	25	0	18
Mutual insurance company taxable income (computed without regard to unused loss)	13	5	10	7	0	2
Mutual insurance company taxable income (computed with regard to unused loss)	13	0	0	0	0	0
Offset for year	0	5	10	7	0	9
Offset total	0	5	15	22	22	31

1967: Under the provisions of section 825(b), F's unused loss for 1967 is 40, the amount by which the sum of the statutory underwriting loss and the investment loss, 67 (67 plus 0), exceeds the sum of the taxable investment income, the statutory underwriting income, and the amounts required to be subtracted from the protection against loss account under section 824(d) for the taxable year, 27 (the sum of 1, 0, and 26, respectively).

1967 carryback to 1964: Under the provisions of section 825(e), the entire unused loss for 1967 of 40 is carried back to 1964, the earliest year to which the loss may be carried under section 825(d). Since there are no other amounts carried to 1964, the unused loss deduction for 1964 is 40. Thus, after taking the unused loss deduction into account, the mutual insurance company taxable income for 1964 is zero, and the offset for 1964 is 5 (the mutual insurance company taxable income for 1964 determined without regard to the unused loss carryback from 1967 or any year thereafter).

1967 carryback to 1965: The portion of the unused loss for 1967 which is carried back to 1965 is 35 (40 minus 5, the offset for 1964). After taking the unused loss deduction into account, the mutual insurance company taxable income for 1965 is zero. The offset for 1965 is 10, the mutual insurance company taxable income for 1965 determined without regard to any unused loss carryback from 1967 or any year thereafter.

1967 carryback to 1966: The portion of the unused loss for 1967 which is carried back to 1966 is 25. This amount is the excess of the unused loss for 1967 of 40 over the sum of the offset for 1964 (5) and the offset for 1965 (10). As a result of the unused loss deduction the mutual insurance company taxable income for 1966 is reduced to zero. The offset for 1966 is 7.

1967 carryover to 1968: Under the provisions of section 825(d), the portion of the unused loss for 1967 which is carried forward to 1968 is 18 (40 minus the sum of 5, 10, and 7, the offsets for 1964, 1965, and 1966, respectively).

Under section 825(f)(2), this amount is first applied against any amounts in the protection against loss account at the end of 1968, and is then applied against the mutual insurance company taxable income for 1968 (computed without regard to any unused loss carryovers or carrybacks from 1967 or any taxable year thereafter). Thus, assuming that there are no other subtractions from its protection against loss account under section 824(d) for 1968, F's protection against loss account of 7 is reduced to zero by reason of the subtraction under section 824(d)(1)(C). The remaining portion of the unused loss for 1967 which is carried to 1968, 11 (18 minus 7, the amount of the unused loss carryover to 1968 which is subtracted from the protection against loss account under section 824(d)(1)(C)), is then applied against the mutual insurance company taxable income for 1968 computed without regard to any unused carryback or carryover from the loss year (1967) or any taxable year thereafter. After the application of the unused loss deduction for 1968, the mutual insurance company taxable income for 1968 is zero. The offset for 1968 is 9, the sum of the amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) for 1968 (7), plus the mutual insurance company taxable income for 1968, determined without regard to any unused loss carryover or carryback from 1967 or any year thereafter (2). The remaining 9 of the unused loss for 1967 (40 minus the sum of 5, 10, 7, and 9, the offsets for 1964, 1965, 1966, and 1968, respectively), is carried forward to 1969, and to the extent not used in that year or any year thereafter, may be carried forward to 1970, 1971, and 1972, in that order.

Example 2. If in example 1 F had an unused loss in 1966 of 22, then, with respect to F's 1967 unused loss of 40, the offset for 1964 would be zero; the offset for 1965 would be 6—the 1965 mutual insurance company taxable income of 10 less an unused loss carryback of 4 from 1966 (the 1966 unused loss of 22 minus the 1963 offset of 13 and the 1964 offset of 5); the offset for the loss year 1966 would be zero, and 34 (the 1967 unused loss of 40 minus the offset for 1965 of 6) would remain as an unused loss carryover to 1968, 1969, 1970, 1971, 1972, in that order. Thus, the unused loss carrybacks or carryovers to an offset year are applied against the mutual insurance company taxable income for such year in the order in which the losses occurred, with the earliest loss being offset first.

Example 3. For the taxable year 1963, M, a mutual insurance company subject to tax imposed by section 821(a), has an unused loss (as defined in section 825(b)) of $65,000. Under section 825(g), the loss may not be carried back to any taxable year beginning before 1963. However, the loss may be carried forward to each of the 5 taxable years following 1963 provided that for each of such succeeding taxable years M is subject to the tax imposed by section 821(a).

Example 4. Assume the facts are the same as in example 3, except that for the taxable year 1964, the gross amount received by M from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) exceeds $150,000 but does not exceed $500,000. If M does not make the election under section 821(d) (relating to election to be taxed under section 821(a)) for 1964, M's 1963 unused loss of $65,000 will not be allowed as an unused loss carryover or carryback since, by reason of section 825(g)(3), the unused loss may not be carried to any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 821(a), and by reason of section 825(g)(1), the unused loss may not be carried to any taxable year beginning before 1963.

[T.D. 6681, 28 FR 11123, Oct. 17, 1963]

§ 1.826–1 Election by reciprocal underwriters and interinsurers.

(a) *In general.* Except as otherwise provided in section 826(c), any mutual insurance company which is an interinsurer or reciprocal underwriter taxable under section 821(a) may elect under section 826(a) to limit its deductions for amounts paid or incurred to its attorney-in-fact to the deductions of its attorney-in-fact which are allocable to income received by the attorney-in-fact from the reciprocal during the taxable year. See § 1.826–4 for rules relating to allocation of expenses. In no case may such an election increase the amount deductible by the reciprocal for amounts paid or due its attorney-in-fact for the taxable year. The election allowed by section 826(a) and this section in effect increases the income of the reciprocal by the net income of the attorney-in-fact attributable to its business with the reciprocal. A reciprocal making the election is allowed a credit for the amount of tax paid by the attorney-in-fact for the taxable year which is attributable to income received by the attorney-in-fact from the reciprocal. See section 826(e) and § 1.826–5.

(b) *Companies eligible to elect under section 826(a).* Any mutual insurance company which is a reciprocal underwriter or interinsurer subject to the tax imposed by section 821(a) may elect (in the manner prescribed by paragraph (c) of this section) to be subject to the limitation provided by section 826(b) and paragraph (a) of this section provided the attorney-in-fact of the electing reciprocal:

(1) Is subject to the taxes imposed by section 11 (b) and (c) and the regulations thereunder;

(2) Consents (in the manner provided by paragraph (a) of §1.826–3) to provide the information required under paragraph (b) of §1.826–3 during the period in which the election made under section 826(a) and this section is in effect;

(3) Reports the income received from the reciprocal and the deductions allocable thereto under the same method of accounting used by the reciprocal in reporting its deductions for amounts paid or due its attorney-in-fact; and

(4) Files its income tax return on a calendar year basis.

(c) *Manner of making election.* The election provided by section 826(a) and this section shall be made in a statement attached to the taxpayer's income tax return for the first taxable year for which such election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized representative), and shall be filed not later than the time prescribed by law for filing the income tax return (including extensions thereof) for the first taxable year for which such election is to apply. For information required of an electing reciprocal, see paragraph (e) of this section.

(d) *Scope of election.* The election allowed by section 826(a) is binding for the taxable year for which made and all succeeding taxable years unless the Commissioner consents to a revocation of such election. Whether revocation will be permitted will depend upon the facts and circumstances of each particular case.

(e) *Information required of an electing company.* Every reciprocal underwriter or interinsurer making the election provided by section 826(a) and this section shall, in the manner provided by paragraph (f) of this section, furnish the following information for each taxable year during which such election is in effect:

(1) The name and address of the attorney-in-fact with respect to which the election allowed by section 826(a) and this section is in effect; the district in which such attorney-in-fact filed its return for the taxable year; and a copy of the consent required by section 826 and §1.826–3 and the date and district in which such consent was filed;

(2) The deductible amount paid or due to such attorney-in-fact from the reciprocal computed without regard to the limitation provided by section 826(b);

(3) The total amount claimed as a deduction by the reciprocal for amounts paid to its attorney-in-fact after giving effect to the limitation provided by section 826(b);

(4) The amount of the increase (if any) in underwriting gain (as defined in section 824(a)) attributable to the election allowed by section 826(a);

(5) The amount of the increase (if any) in the deduction allowed by section 824(a) (relating to deduction to provide protection against losses) attributable to the election allowed by section 826(a);

(6) The amount of any increase or decrease in the statutory underwriting income or loss for the taxable year (as computed under section 823) attributable to the election allowed by section 826(a);

(7) The amount of any increase or decrease in the mutual insurance company taxable income or unused loss for the taxable year attributable to the election allowed by section 826(a);

(8) The amount of the increase (if any) in the tax liability of the reciprocal for the taxable year attributable to the election allowed by section 826(a) before taking into account the credit provided by section 826(e);

(9) The amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year (as determined under §1.826–5) claimed (under section 826(e) and paragraph (a) of this section) by the reciprocal as a credit for the taxable year; and

(10) The information which the attorney-in-fact is required to submit to the reciprocal under paragraphs (b) and (c) of §1.826–3.

(f) *Manner in which information is to be provided.* The information required by paragraph (e) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which such information is required. Such statement shall include the name and address of the taxpayer; and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year with respect to which such information is being provided.

[T.D. 6681, 28 FR 11124, Oct. 17, 1963]

§ 1.826–2 Special rules applicable to electing reciprocals.

(a) *Protection against loss account.* Section 826(d) provides that for purposes of determining the amount to be subtracted from the protection against loss account under section 824(d)(1)(D) and the regulations thereunder (relating to amounts added to the account for the fifth preceding taxable year) for any taxable year, any amount which was added to such account by reason of the election under section 826(a) and paragraph (a) of § 1.826–1 shall be treated as having been added by reason of section 824(a)(1)(A) and the regulations thereunder (relating to amounts equal to 1 percent of losses incurred during the taxable year). Thus, no amount added to the protection against loss account by reason of an election made under section 826(a) may remain in such account beyond the end of the fifth taxable year following the taxable year with respect to which such amount was added. See section 824(d)(1)(D) and paragraph (b)(3) of § 1.824–1. The amount added to the protection against loss account by reason of an election under section 826(a) is that amount which is equal to 25 percent (plus, in the case of a reciprocal which qualifies as a concentrated risk company under section 824(a), so much of the concentrated wind-storm, etc., premium percentage as exceeds 40 percent) of the amount by which:

(1) The underwriting gain (as defined by section 824(a)(1)) computed after taking into account the limitation provided by section 826(b) and § 1.826–1, exceeds

(2) The underwriting gain computed without regard to the limitation provided by section 826(b) and § 1.826–1.

(b) *Denial of surtax exemption.* Section 826(f) provides that the tax imposed upon any increase in the mutual insurance company taxable income of a reciprocal which is attributable to the limitation provided by section 826(b) shall be computed without regard to the surtax exemption provided by section 821(a)(2) and the regulations thereunder. Thus, a company making the election provided under section 826(a) will be subject to surtax, as well as normal tax, on the increase in its mutual insurance company taxable income for the taxable year which is attributable to such election. Similarly, any amount which was added to the protection against loss account by reason of an election under section 826(a) and § 1.826–1, and which is subtracted from such account in accordance with section 826(d) and paragraph (a) of this section, will be subject to surtax, as well as normal tax, to the extent such amount increases mutual insurance company taxable income in the year in which the subtraction is made. Furthermore, the company will be subject to surtax on such increases notwithstanding the fact that it may have no normal tax liability for the taxable year, because its mutual insurance company taxable income (after giving effect to the election provided by section 826(a)) does not exceed $6,000.

(c) *Adjustment for refunds.* Section 826(g) provides that if for any taxable year an attorney-in-fact is allowed a credit or refund for taxes paid with respect to which credit or refund to the reciprocal resulted under section 826(e), the taxes of such reciprocal for such taxable year shall be properly adjusted. The reciprocal shall make the adjustment required by section 826(g) by increasing its income tax liability for its taxable year in which the credit or refund is allowed to the attorney-in-fact by the amount of such credit or refund which is attributable to taxes paid by the attorney-in-fact on income received from the reciprocal, as determined under § 1.826–6, but only to the extent that the payment of such amount by the attorney-in-fact resulted in a credit or refund to the reciprocal. However, if the refund or credit to the attorney-in-fact is the result of an error in determining its items of income or deduction for the taxable year with respect to which the refund or credit is allowed, and such error affects the amount of deductions allocable to its reciprocal for such taxable year, then, if the reciprocal's period for filing an amended return has not otherwise expired, the preceding sentence shall not apply and the reciprocal shall make the adjustment required by section 826(g) by filing an amended return for such taxable year and all subsequent taxable years for which an adjustment is required. The reciprocal's amended return or returns shall give effect to the change in the deductions of the attorney-in-fact allocable to income received from the reciprocal and the tax paid by the attorney-in-fact attributable to such income. The amount of any adjustment required by section 826(g) and this section and the computation thereof shall be set forth in a statement attached to and filed with the taxpayer's income tax return for the taxable year for which the adjustment is made. Such statement shall include the name and address of the taxpayer, and a copy of the notification received by the attorney-in-fact indicating that it has been allowed the credit or refund requiring adjustment of the reciprocal's taxes.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5334, Mar. 20, 1971]

§1.826–3 Attorney-in-fact of electing reciprocals.

(a) *Manner of making consent.* Section 826(c)(2) provides that a reciprocal may not elect to be subject to the limitation provided by section 826(b) unless its attorney-in-fact consents to make certain information available. See paragraph (b) of this section. The attorney-in-fact of a reciprocal making the election provided by section 826(a) shall signify the consent required by section 826(c) in a statement attached to its income tax return for the first taxable year for which the reciprocal's election is to apply. Such statement shall include the name and address of the consenting taxpayer; the name and address of the reciprocal with respect to which such consent is to apply; shall be signed by the taxpayer (or its duly authorized representative); and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which such consent is to apply. In addition, such statement shall specify that the taxpayer is subject to the taxes imposed by section 11 (b) and (c); the method of accounting used in reporting income received from its reciprocal and the deductions allocable thereto; and that its return is filed on the calendar year basis. Consent, once given, shall be irrevocable for the period during which the election provided for the reciprocal by section 826(a) is in effect. See paragraph (e) of §1.826–1.

(b) *Information required of consenting attorney-in-fact.* Every attorney-in-fact making the consent provided by section 826(c)(2) and paragraph (a) of this section shall, in the manner prescribed by paragraph (c) of this section, furnish the following information for each taxable year during which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect:

(1) The name and address of the reciprocal with respect to which the consent required by section 826(c)(2) and paragraph (a) of this section is to apply;

(2) Gross income in total and by sources, adjusted for returns and allowances;

(3) Deductions (itemized to the same extent as on taxpayer's income tax return and accompanying schedules) allocable to each source of gross income and in total (see §1.826–4);

(4) Method of allocation used in subparagraph (3) of this paragraph;

(5) Taxable income (if any) in total and by sources, as in subparagraph (2) of this paragraph (income by sources from subparagraph (2) of this paragraph minus expenses allocable thereto under subparagraph (3) of this paragraph);

(6) Total income tax liability (if any) for the taxable year;

(7) Taxes paid attributable (under §1.826–5) to income earned by the taxpayer in dealing with the reciprocal;

(8) Such other information as may be required by the district director.

(c) *Manner in which information is to be provided.* (1) The information required by paragraph (b) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for each taxable year for which such information is required.

(2) A copy of the statement containing the information required by paragraph (b) of this section shall be submitted to the board of advisors (or other comparable body) of the reciprocal on whose behalf the consent provided under section 826(c)(2) is given. The copy shall be executed in the same manner as the original and shall be delivered to such board not later than 10 days before the last date prescribed by law (including extensions thereof) for filing the reciprocal's income tax return for the taxable year for which the information is required unless the attorney-in-fact establishes to the satisfaction of the district director that the failure to furnish such copy or the failure to furnish such copy within the prescribed 10 day period was due to circumstances beyond its control. In addition, there shall be attached to and made a part of such copy, a copy of the income tax return of the attorney-in-fact (including accompanying schedules) for each taxable year for which such statement is required.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963]

§ 1.826–4 Allocation of expenses.

An attorney-in-fact allocating expenses as required by section 826(b) and paragraph (b) of § 1.826–3 shall allocate each expense itemized in its income tax return (and accompanying schedules) for the taxable year to each source of gross income (as set forth pursuant to paragraph (b)(2) of § 1.826–3). However, no portion of the net operating loss deduction allowed by section 172 shall be allocated to income received or due from the reciprocal, and no expenses, other than those directly related thereto, shall be allocated to capital gains. Where the method of allocation used by the taxpayer does not reasonably reflect the expenses of the taxpayer allocable to income received or due from the reciprocal, the district director may require the taxpayer to use such other method of allocation as is reasonable under the circumstances.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§ 1.826–5 Attribution of tax.

(a) *In general.* Section 826(e) provides that a reciprocal making the election allowed by section 826(a) shall be credited with so much of the tax paid by the attorney-in-fact as is attributable to the income received by the attorney-in-fact from the reciprocal in such taxable year.

(b) *Computation.* For purposes of section 826(e) and paragraph (a) of this section, the amount of tax attributable to income received by the attorney-in-fact from the reciprocal in the taxable year shall be computed in the following manner:

(1) First, compute the taxable income (if any) from each source of gross income set forth in paragraph (b)(2) of § 1.826–3 by deducting from each such amount the expenses allocable thereto under § 1.826–4;

(2) Second, compute the normal tax on each amount of taxable income computed in subparagraph (1) of this paragraph at the rate provided by section 11(b) of the Code;

(3) Third, deduct from each amount determined in subparagraph (1) of this paragraph an amount which bears the same proportion to the surtax exemption provided by section 11(c) of the Code as each amount computed under subparagraph (1) of this paragraph bears to the total of the amounts computed under subparagraph (1) of this paragraph;

(4) Fourth, compute the surtax on each remainder computed in subparagraph (3) of this paragraph at the rate provided by section 11(c) of the Code;

(5) Fifth, add the normal tax computed under subparagraph (2) of this paragraph to the surtax computed

under subparagraph (4) of this paragraph for each amount computed under subparagraph (1) of this paragraph;

(6) Sixth, deduct from each amount of tax computed under subparagraph (5) of this paragraph any tax credits (other than those arising from payments made with respect to the tax liability for the taxable year or other taxable years) allocable (in the same manner as provided for expenses under §1.826–4) to such amount;

(7) Seventh, compute that amount which bears the same proportion to the tax actually paid with respect to the taxable year as each individual amount computed under subparagraph (6) of this paragraph bears to the total of the amounts computed under subparagraph (6) of this paragraph. The amount so determined with respect to each amount computed under subparagraph (6) of this paragraph is the tax paid which is attributable to the amount computed under subparagraph (1) of this paragraph.

To the extent the amounts determined under subparagraph (1) of this paragraph are attributable to amounts received from the reciprocal for the taxable year, the tax attributable to such amounts (as determined under subparagraph (7) of this paragraph) shall be the amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year.

(c) *Taxes of attorney-in-fact unaffected.* Nothing in section 826 or the regulations thereunder shall increase or decrease the taxes imposed on the income of the attorney-in-fact.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§1.826–6 Credit or refund.

(a) *Notification required.* In any case where a taxpayer applies for a credit or refund of taxes paid by it in respect of a taxable year for which the taxpayer was the consenting attorney-in-fact of a reciprocal making the election provided by section 826(a), such taxpayer shall give notice to its reciprocal for such taxable year, first, upon applying for the credit or refund; and again, within 10 days from the date on which a final determination is made that such credit or refund has been allowed or denied.

(b) *Notice form.* The notices required by this section shall include the name and address of the taxpayer and shall be signed by the taxpayer or its duly authorized representative. In addition, there shall be attached to and made a part of each first notice a concise statement of the claim upon which the application for refund or credit is based; and there shall be attached to and made a part of each second notice:

(1) A copy of the notification (if any) received by the taxpayer indicating that the credit or refund has been allowed; and

(2) A statement setting forth the amount of such credit or refund attributable to taxes paid by the taxpayer on income received from the reciprocal, and the computation by which such amount was determined.

(c) *Manner of apportioning refund or credit.* The taxpayer shall determine the amount of the refund or credit attributable to taxes paid on income received from its reciprocal by reallocating its income and expense items for the taxable year, with respect to which the refund or credit is allowed, in the manner provided by §§1.826–3 and 1.826–4 so as to reflect the adjustments (if any) in such items which resulted in the credit or refund of tax for the taxable year. The taxpayer shall then recompute the tax attributable to income received from its reciprocal for such taxable year in the manner provided by §1.826–5. The district director may require such additional information as may be necessary in the circumstances to verify the computations required by this paragraph.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§1.826–7 Examples.

The application of section 826 may be illustrated by the following examples:

Example 1. For the taxable year 1963, R, a reciprocal underwriter subject to the taxes imposed by section 821(a), has the following items (determined before applying any election under section 826):

Gross income under sec. 832		$578
Gross investment income		50
Deductions under sec. 832 (as modified by sec. 823(b)):		
Deduction for amounts paid by R to attorney-in-fact A	$100	
All other deductions	500	

Total deductions under sec. 832	600	
Deductions under sec. 822(c)		40
Incurred losses		400
Protection against loss deduction		4
Underwriting gain		0
Mutual insurance company taxable income		0
Unused loss		22
Credit or refund for taxes paid		0

Assume that the deductions of attorney-in-fact A allocable to the income received by A from R are 60 and the tax paid by A allocable to the income received from R is 16. If R elects to be subject to the limitation provided in section 826(b), the results for 1963 would be as follows:

Gross income under sec. 832		$578
Gross investment income		50
Deductions under sec. 832 (as modified by sec. 823(b)):		
Deduction for amounts paid by R to attorney-in-fact A	$60	
All other deductions	500	
Total deduction under sec. 832	560	
Deductions under sec. 822(c)		40
Incurred losses		400
Underwriting gain		8
Protection against loss deduction		6
Mutual insurance company taxable income		12
Unused loss		0
Credit or refund for taxes paid		16

Under the provisions of section 826(b), R's deduction for amounts paid or incurred to the attorney-in-fact in the taxable year 1963 would be limited to the deductions of A allocable to the income received by A from R. Thus, R's deductions under section 832 (as modified by section 823(b)) for 1963 would be 60 (the deductions of A which are allocable to the income received by A from R). As a result of making the election under section 826(a) for the taxable year 1963, R's underwriting gain would be 8, and its statutory underwriting income would be 2 (the underwriting gain of 8 minus the protection against loss deduction of 6—of which 4 represents the amount determined under section 824(a)(1)(A)—and 2 represents the amount determined under section 824(a)(1)(B)—or 8 minus 6). R's mutual insurance company taxable income for 1963 would be 12, consisting of taxable investment income of 10 (gross investment income minus deductions under section 822(c), or 50 minus 40) plus statutory underwriting income of 2. Since all of R's mutual insurance company taxable income of 12 is attributable to the limitation under section 826(b), the entire amount is subject to the surtax under section 821(a)(2) without regard to the $25,000 surtax exemption. The credit of 16, representing that part of the tax paid by A which is allocable to the income received by A from R, may be applied by R against its taxes with respect to its mutual insurance company taxable income of 12 for 1963, and R would be entitled to a refund of any excess of the amount of such credit over its tax liability for 1963.

Under the provisions of section 826(d), no portion of the amount added to the protection against loss account in 1963 by reason of the election under section 826(a), 2 (25 percent of the amount by which the consolidated underwriting gain exceeds 25 percent of the underwriting gain determined without regard to the election under section 826(a), or the amount by which 25 percent of 8 exceeds 25 percent of 0), may remain in such account beyond the taxable year 1968.

Example 2. For the taxable year 1963, F is a corporate attorney-in-fact subject to the taxes imposed by section 11(b) and (c) of the Code. F files its return on the calendar year basis and reports income received from its reciprocal and the deductions allocable thereto under the same method of accounting used by its reciprocal in reporting its deductions for amounts paid to R. F properly consents to provide the information required by paragraph (b) of § 1.826–3. In addition to its attorney-in-fact business, F owns real estate for investment purposes, and operates a real estate management service. For the taxable year 1963, F has gross income from these various sources as follows:

Attorney-in-fact fees	$85,000
Real estate management fees	18,000
Rental income	25,000

F allocates its expenses for the taxable year on the basis of their direct relation to each source of income. During 1963, F acquired property for use in its attorney-in-fact operations which entitled F to an investment credit of $800 under section 38. For 1963, F determines that the tax paid by it which is attributable to its reciprocal is $21,863, computed as follows:

	Attorney-in-fact fees	Real estate management	Rental income	Total
Gross income	$85,000	$18,000	$25,000	$128,000
Allocable expenses	25,000	3,000	35,000	63,000
Taxable income (loss)	60,000	15,000	(10,000)	65,000
Normal tax (30 percent)	18,000	4,500	0	19,500
Surtax exemption	20,000	5,000	0	25,000
Income subject to surtax	40,000	10,000	0	40,000
Surtax (22 percent)	8,800	2,200	0	8,800
Total tax	26,800	6,700	0	28,300
Investment credit	800	0	0	800
1963 tax liability	26,000	6,700	0	27,500

	Attorney-in-fact fees	Real estate management	Rental income	Total
1963 tax paid	....	....	....	27,500
Allocation of tax paid ..	21,863	5,637	0	27,500

Under paragraph (b)(1) of §1.826–5, F computes its taxable income from its attorney-in-fact fees to be $60,000 ($85,000 minus $25,000), and its taxable income from its real estate management to be $15,000 ($18,000 minus $3,000). Since F's rental operations resulted in a $10,000 loss for the taxable year ($25,000 minus $35,000), F's taxable income from its rental operations is zero. Using the 30 percent rate provided by section 11(b), F computes its normal tax to be $18,000 on its attorney-in-fact fees and $4,500 on its real estate management operations. F's normal tax on total income is $19,500. The $3,000 difference between the normal tax on F's total income and the normal taxes on F's profitable operations results from the loss on F's rental operations. Under paragraph (b)(3) of §1.826–5, F allocates its surtax exemption as follows: $20,000 ($60,000/$75,000×$25,000) to its attorney-in-fact fees; and $5,000 ($15,000/$75,000×$25,000) to its real estate management operations. F computes its surtax on its profitable operations at the 22 percent rate provided by section 11(c) as follows: $8,800 (22 percent of $40,000) on attorney-in-fact fees; and $2,200 (22 percent of $10,000) on real estate management income. F adds its normal tax and surtax on its profitable operations and determines its total tax to be $26,800 on its attorney-in-fact operations; $6,700 on its real estate management operations; and $28,300 on its total income. F must allocate its investment credit on the same basis as it used to allocate its expenses. Thus, F's entire investment credit must be allocated to its attorney-in-fact operations. Accordingly, F's 1963 tax liability is $26,000 on its attorney-in-fact fees; $6,700 on its real estate management operations; $0 on its rental operations; and $27,500 on its total income. Under paragraph (b)(7) of §1.826–5, F allocates $21,863 ($26,000/$32,700×$27,500) of its 1963 tax paid to its attorney-in-fact fees; and $5,637 ($6,700/$32,700×$27,500) of its 1963 tax paid to its real estate management business. F's reciprocal will be allowed a credit or refund of $21,863 for taxes paid by F which are attributable to F's income received from its reciprocal.

Example 3. Assume the same facts as in example 2, and assume further that in 1966 F sustains a net operating loss on its overall operations of $5,000. In carrying the loss back to 1963 as a net operating loss deduction under section 172, F must allocate the deduction under the same method it used in allocating its 1963 deductions. Thus, if the loss was entirely attributable to F's rental operations for the taxable year 1966, F would reduce its taxable income attributable to those operations by the entire amount of the loss and would recompute the tax attributable to those operations under paragraph (b) of §1.826–5. As recomputed in the table below, F's 1963 tax liability from attorney-in-fact fees would be $19,800 and F's total tax liability would be $24,900.

	Attorney-in-fact fees	Real estate management	Rental income	Total
Gross income	$85,000	$18,000	$25,000	$128,000
Allocable expenses	25,000	3,000	35,000	63,000
Net operating loss deduction	0	0	5,000	5,000
Taxable income (loss)	60,000	15,000	(15,000)	60,000
Normal tax (30 percent)	18,000	4,500	0	18,000
Surtax exemption ..	20,000	5,000	0	25,000
Income subject to surtax	40,000	10,000	0	35,000
Surtax (22 percent) ..	8,800	2,200	0	7,700
Total tax	26,800	6,700	0	25,700
Investment credit	800	0	0	800
1963 tax liability	26,000	6,700	0	24,900
1963 tax paid	....	....	....	24,900
Allocation of tax paid ..	19,800	5,100	0	24,900

As a result of its 1966 net operating loss, F would be entitled to a refund of $2,600 (1963 taxes paid of $27,500 minus recomputed 1963 taxes of $24,900). Under paragraph (a) of §1.826–6, F would be required to notify its reciprocal of its claim for refund and of the amount of the refund or credit attributable to taxes paid on income received from the reciprocal. Since the 1963 tax paid by F attributable to its reciprocal (as recomputed) is less than the amount claimed in 1963 by F's reciprocal as a credit, F's reciprocal would be required, under section 826(g), to add the difference—$2,063 ($21,863 minus $19,800), to its tax liability for 1966. Thus, F's reciprocal would first compute its tax liability for 1966 without regard to section 826(g) and then would increase such liability by $2,063.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

OTHER INSURANCE COMPANIES

§ 1.831–1 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, and mutual fire insurance companies issuing perpetual policies.

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire insurance companies exclusively issuing either perpetual policies, or policies for which the sole premium charged is a single deposit which, except for such deduction of underwriting costs as may be provided, is refundable upon cancellation or expiration of the policy, are subject to the tax imposed by section 831. As used in this section and §§ 1.832–1 and 1.832–2, the term ‘‘insurance companies’’ means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of § 1.801–1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the $25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

§ 1.831–2 Taxable years affected.

Section 1.831–1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Section 1.831–3 is applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended. Section 1.831–4 is applicable only with respect to the companies described therein, and only with respect to taxable years beginning after December 31, 1961.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§ 1.831–3 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, mutual fire insurance companies issuing perpetual policies, and mutual fire or flood insurance companies operating on the basis of premium deposits; taxable years beginning after December 31, 1962.

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire or flood insurance companies exclusively issuing perpetual policies or whose principal business is the issuance of policies for which the premium deposits are the same regardless of the length of the term for which the policies are written, are subject to the tax imposed by section 831 if the unabsorbed portion of such premium deposits not required for losses, expenses or reserves is returned or credited to the policyholder on cancellation or expiration of the policy. For purposes of section 831 and this section, in the case of a mutual flood insurance company, the premium deposits will be considered to be the same if the payment of a premium increases the total insurance under the policy in an amount equal to the amount of such premium and the omission of any annual premium does not result in the reduction or suspension of coverage under the policy. As used in this section and section 832 and the regulations thereunder, the term ''insurance companies'' means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of §1.801–1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the $25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§1.831–4 Election of multiple line companies to be taxed on total income.

(a) *In general.* Section 831(c) provides that any mutual insurance company engaged in writing marine, fire, and casualty insurance which, for any 5-year period beginning after December 31, 1941, and ending before January 1, 1962, was subject to the tax imposed by section 831 (or the tax imposed by corresponding provisions of prior law) may elect, in the manner provided by paragraph (b) of this section, to be subject to the tax imposed by section 831, whether or not marine insurance is its predominant source of premium income. A company making an election under section 831(c) and this section will be subject to the tax imposed by section 831 for taxable years beginning after December 31, 1961, rather than subject to the tax imposed by section 821.

(b) *Time and manner of making election.* The election provided by section 831(c) and paragraph (a) of this section shall be made in a statement attached to the taxpayer's return for the taxable year 1962. The statement shall indicate that the taxpayer has made the election provided by section 831(c) and this section; shall include the name and address of the taxpayer, and shall be signed by the taxpayer or his duly authorized representative. In addition, the statement shall list the 5 consecutive taxable years prior to 1962 for which the taxpayer was subject to tax under section 831 (or the corresponding provisions of prior law); the types of insurance written by the company; and the percentage of marine insurance to total insurance written. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for the taxable year 1962. However, if the last date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year 1962 falls before October 17, 1963, the election provided by section 831(c) and this section may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before January 16, 1964.

(c) *Scope of election.* An election made under section 831(c) and paragraph (b) of this section shall be binding for all taxable years beginning after December 31, 1961, unless consent to revoke the election is obtained from the Commissioner. However, if a taxpayer made the election provided by section 831(c) and this section for taxable years beginning prior to October 17, 1963, the taxpayer may revoke such election without obtaining consent from the Commissioner by filing, before January 16, 1964, a statement that the taxpayer desires to revoke such election. Such statement shall be signed by the taxpayer or its duly authorized representative. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) *Limitation on certain net operating loss carryovers and carrybacks.* In the case of a taxpayer making the election allowed under section 831(c) and this section, a net operating loss shall not be carried:

(1) To or from any taxable year for which the insurance company is not subject to the tax imposed by section 831(a) (or predecessor sections); or

(2) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 831(a) (or predecessor sections).

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§ 1.832–1 Gross income.

(a) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in § 1.831–1 the amount of single deposit premiums received, but not assessments, shall be excluded from gross income. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets. The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year. In computing ‘‘premiums earned on insurance contracts during the taxable year’’ the amount of the unearned premiums shall include (1) life insurance reserves as defined in section 803(b) and § 1.803–1 pertaining to the life, burial, or funeral insurance, or annuity business of an insurance company subject to the tax imposed by section 831 and not qualifying as a life insurance company under section 801, and (2) liability for return premiums under a rate credit or retrospective rating plan based on experience, such as the ''War Department Insurance Rating Plan,'' and which return premiums are therefore not earned premiums. In computing ''losses incurred'' the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for ''losses incurred'' which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, can be said to represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of such losses which, in the opinion of the district director are in excess of the actual liability determined as provided in the preceding sentence will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for ''losses incurred.''

(c) That part of the deduction for ''losses incurred'' which represents an adjustment to losses paid for salvage and reinsurance recoverable shall, except as hereinafter provided, include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash), real or personal, tangible or intangible, except that which may not be included by reason of express statutory provisions (or rules and regulations of an insurance department) of any State or Territory or the District of Columbia in which the company transacts business. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash received during the taxable year with respect to items of salvage or reinsurance shall be taken into account in computing losses paid during such taxable year.

§1.832–2 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, ''gross income'' shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulations thereunder. Insurance companies, other than mutual fire insurance companies described in §1.831–1, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 823(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6867, 30 FR 15094, Dec. 12, 1965]

§1.832–3 Taxable years affected.

Sections 1.832–1 and 1.832–2 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Sections 1.832–4, 1.832–5, and 1.832–6 are applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended.

[T.D. 6681, 28 FR 11129, Oct. 17, 1963]

§1.832–4 Gross income.

(a)(1) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in section 831(a)(3)(A) the amount of single deposit premiums received, but not assessments, shall be excluded from gross income. Section 832(b)(1)(D) provides that in the case of a mutual fire or flood insurance company described in section 831(a)(3)(B), there shall be included in gross income an amount equal to 2 percent of the premiums earned during the taxable year on contracts described in section 831(a)(3)(B) after deduction of premium deposits returned or credited during such taxable year with respect to such contracts. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets.

(2) The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year.

(3) In computing ''premiums earned on insurance contracts during the taxable year'' the amount of the unearned premiums shall include:

(i) Life insurance reserves as defined in section 803(b) and §1.803–1 pertaining to the life, burial, or funeral insurance, or annuity business of an insurance company subject to the tax imposed by section 831 and not qualifying as a life insurance company under section 801;

(ii) Liability for return premiums under a rate credit or retrospective rating plan based on experience, such as the ''War Department Insurance Rating Plan,'' and which return premiums are therefore not earned premiums; and

(iii) In the case of a mutual fire or flood insurance company described in section 831(a)(3)(B) (with respect to the contracts described therein), the amount of unabsorbed premium deposits which the company would be obligated to return to its policyholders at the close of the company's taxable year if all of its policies were terminated at such time.

(4) In computing the amount of unabsorbed premium deposits which a mutual fire or flood insurance company described in section 831(a)(3)(B) would be obligated to return to its policyholders at the close of its taxable year, the company must use its own schedule of unabsorbed premium deposit returns then in effect. A copy of the applicable schedule must be filed with the company's income tax return for each taxable year for which a computation based upon such schedule is made. In addition, a taxpayer making such a computation must provide the following information for each taxable year for which the computation is made:

(i) The amount of gross premiums received during the taxable year, and the amount of premiums paid for reinsurance during the taxable year, on the policies described in section 831(a)(3)(B) and on other policies;

(ii) The amount of insurance written during the taxable year under the policies described in section 831(a)(3)(B) and under other policies, and the amount of such insurance written which was reinsured during the taxable year. The information required under this subdivision shall only be submitted upon the specific request of the district director for a statement setting forth such information, and, if required, such statement shall be filed in the manner provided by this subparagraph or in such other manner as is satisfactory to the district director;

(iii) The amount of premiums earned during the taxable year on the policies described in section 831(a)(3)(B) and on other policies and the computations by which such amounts were determined, including sufficient information to support the taxpayer's determination of the amount of unearned premiums on premium deposit plan and other policies at the beginning and end of the taxable year, and the amount of unabsorbed premium deposits at the beginning and end of the taxable year on policies described in section 831(a)(3)(B).

The information required by this subparagraph shall be set forth in a statement attached to the taxpayer's income tax return for the taxable year for which such information is being provided. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year.

(5) In computing ''losses incurred'' the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) *Losses incurred.* Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for ''losses incurred'' which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses. See section 846 for rules relating to the determination of discounted unpaid losses. These losses must be stated in amounts which, based upon the facts in each case and the company's experience with similar cases, represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of unpaid losses which, in the opinion of the district director, are in excess of a fair and reasonable estimate will be disallowed as a deduction. The district director may require any insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for ''losses incurred.''

(c) *Losses incurred are reduced by salvage.* Under section 832(b)(5)(A), losses incurred are computed by taking into account losses paid reduced by salvage and reinsurance recovered, the change in discounted unpaid losses, and the change in estimated salvage and reinsurance recoverable. For purposes of section 832(b)(5)(A)(iii), estimated salvage recoverable includes all anticipated recoveries on account of salvage, whether or not the salvage is treated, or may be treated, as an asset for state statutory accounting purposes. Estimates of salvage recoverable must be based on the facts of each case and the company's experience with similar cases. Except as otherwise provided in guidance published by the Commissioner in the Internal Revenue Bulletin, estimated salvage recoverable must be discounted either—

(1) By using the applicable discount factors published by the Commissioner for estimated salvage recoverable; or

(2) By using the loss payment pattern for a line of business as the salvage recovery pattern for that line of business and by using the applicable interest rate for calculating unpaid losses under section 846(c). For purposes of section 832(b)(5)(A) and the regulations thereunder, the term ''salvage recoverable'' includes anticipated recoveries on account of subrogation claims arising with respect to paid or unpaid losses.

(d) *Increase in unpaid losses shown on annual statement in certain circumstances*—(1) *In general.* An insurance company that takes estimated salvage recoverable into account in determining the amount of its unpaid losses shown on its annual statement is allowed to increase its unpaid losses by the amount of estimated salvage recoverable taken into account if the company complies with the disclosure requirement of paragraph (d)(2) of this section. This adjustment shall not be used in determining under section 846(d) the loss payment pattern for a line of business.

(2) *Disclosure requirement.* (i) *In general.* A company described in paragraph (d)(1) of this section is allowed to increase the unpaid losses shown on its annual statement only if the company either—

(A) Discloses on its annual statement, by line of business and accident year, the extent to which estimated salvage recoverable is taken into account in computing the unpaid losses shown on the annual statement filed by the company for the calendar year ending with or within the taxable year of the company; or

(B) Files a statement on or before the due date of its Federal income tax return (determined without regard to extensions) with the appropriate state regulatory authority of each state to which the company is required to submit an annual statement. The statement must be contained in a separate document captioned ''DISCLOSURE CONCERNING LOSS RESERVES'' and must disclose, by line of business and accident year, the extent to which estimated salvage recoverable is taken into account in computing the unpaid losses shown on the annual statement filed by the company for the calendar year ending with or within the taxable year of the company.

(ii) *Transitional rule.* For a taxable year ending before December 31, 1991, a taxpayer is deemed to satisfy the disclosure requirement of paragraph (d)(2)(i)(B) of this section if the taxpayer files the statement described in paragraph (d)(2)(i)(B) of this section before March 17, 1992.

(3) *Failure to disclose in a subsequent year.* If a company that claims the increase permitted by paragraph (d)(1) of this section fails in a subsequent taxable year to make the disclosure described in paragraph (d)(2) of this section, the company cannot claim an increase under paragraph (d)(1) of this section in any subsequent taxable year without the consent of the Commissioner.

(e) *Treatment of estimated salvage recoverable*—(1) *In general.* An insurance company is required to take estimated salvage recoverable (including that which cannot be treated as an asset for state statutory accounting purposes) into account in computing the deduction for losses incurred. Except as provided in paragraph (e)(2)(iii) of this section, an insurance company must apply this method of accounting to estimated salvage recoverable for all lines of business and for all accident years.

(2) *Change in method of accounting*—(i) If an insurance company did not take estimated salvage recoverable into account as required by paragraph (c) of this section for its last taxable year beginning before January 1, 1990, taking estimated salvage recoverable into account as required by paragraph (c) of this section is a change in method of accounting.

(ii) If a company does not claim the deduction under section 11305(c)(3) of the 1990 Act, the company must take into account 13 percent of the adjustment that would otherwise be required under section 481 for pre-1990 accident years as a result of the change in accounting method. This paragraph (e)(2)(ii) applies only to an insurance company subject to tax under section 831.

(iii) If a company claims the deduction under section 11305(c)(3) of the 1990 Act and paragraph (f) of this section, the company must implement the change in method of accounting for estimated salvage recoverable for post-1989 taxable years pursuant to a ‘‘cut-off’’ method.

(3) *Rule for overestimates.* An insurance company is required under section 11305(c)(4) of the 1990 Act to include in gross income 87 percent of any amount (adjusted for discounting) by which the section 481 adjustment is overestimated. The rule is applied by comparing the amount of the section 481 adjustment (determined without regard to paragraph (e)(2)(ii) of this section and any discounting) to the sum of the actual salvage recoveries and remaining undiscounted estimated salvage recoverable that are attributable to losses incurred in accident years beginning before 1990. For any taxable year beginning after December 31, 1989, any excess of the section 481 adjustment over this sum (reduced by amounts treated as overestimates in prior taxable years pursuant to this paragraph (e)(3)) is an overestimate. To determine the amount to be included in income, it is necessary to discount this excess and multiply the resulting amount by 87 percent.

(f) *Special deduction*—(1) *In general.* Under section 11305(c)(3) of the 1990 Act, an insurance company may deduct an amount equal to 87 percent of the discounted amount of estimated salvage recoverable that the company took into account in determining the deduction for losses incurred under section 832(b)(5) in the last taxable year beginning before January 1, 1990. A company that claims the special deduction must establish to the satisfaction of the district director that the deduction represents only the discounted amount of estimated salvage recoverable that was actually taken into account by the company in computing losses incurred for that taxable year.

(2) *Safe harbor.* The requirements of paragraph (f)(1) of this section are deemed satisfied and the amount that the company reports as bona fide estimated salvage recoverable is not subject to adjustment by the district director, if—

(i) The company files with the insurance regulatory authority of the company’s state of domicile, on or before September 16, 1991, a statement disclosing the extent to which losses incurred for each line of business reported on its 1989 annual statement were reduced by estimated salvage recoverable,

(ii) The company attaches a statement to its Federal income tax return filed for the first taxable year beginning after December 31, 1989, agreeing to apply the special rule for overestimates under section 11305(c)(4) of the 1990 Act to the amount of estimated salvage recoverable for which it has taken the special deduction, and

(iii) In the case of a company that is a member of a consolidated group, each insurance company subject to tax under section 831 that is included in the consolidated group complies with paragraph (f)(2)(ii) of this section with respect to its special deduction, if any.

(3) *Limitations on special deduction*—(i) The special deduction under section 11305(c)(3) of the 1990 Act is available only to an insurance company subject to tax under section 831.

(ii) An insurance company that claimed the benefit of the ‘‘fresh start’’ with respect to estimated salvage recoverable under section 1023(e) of the Tax Reform Act of 1986 may not claim the special deduction allowed by section 11305(c)(3) of the 1990 Act to the extent of the estimated salvage recoverable for which a fresh start benefit was previously claimed.

(iii) A company that claims the special deduction is precluded from also claiming the section 481 adjustment provided in paragraph (e)(2)(ii) of this section for pre-1990 accident years.

(g) *Effective date.* Paragraphs (b) through (f) of this section are effective for taxable years beginning after December 31, 1989.

[T.D. 6681, 28 FR 11129, Oct. 17, 1963, as amended by T.D. 8171, 53 FR 118, Jan. 5, 1988; T.D. 8293, 55 FR 9425, Mar. 14, 1990. Redesignated and amended by T.D. 8390, 57 FR 3132, Jan. 28, 1992; 57 FR 6353, Feb. 24, 1992]

§ 1.832–5 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, ‘‘gross income’’ shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulation thereunder. Insurance companies, other than mutual fire insurance companies described in section 831(a)(3)(A) and the regulations thereunder, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual insurance companies. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(f)(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963, as amended by T.D. 6867, 30 FR 15094, Dec. 7, 1965]

§ 1.832–6 Policyholders of mutual fire or flood insurance companies operating on the basis of premium deposits.

For purposes of determining his taxable income for any taxable year, a taxpayer insured by a mutual fire or flood insurance company under a policy for which the premium deposit is the same regardless of the length of the term for which the policy is written, and who is entitled to have returned or credited to his on the cancellation or expiration of such policy the unabsorbed portion of the premium deposit not required for losses, expenses, or establishment of reserves, may, if such amount is otherwise deductible under this chapter, deduct so much of his premium deposit as was absorbed by the company during the taxpayer's taxable year. The amount of the premium deposit absorbed during the taxpayer's taxable year shall be determined in accordance with the schedule of unabsorbed premium deposit returns in effect for the company during such taxable year. If the taxpayer is unable to determine the applicable rate of absorption in effect during his taxable year, he shall compute his deduction on the basis of the rate of absorption in effect at the end of the company's taxable year which next preceded the end of the taxpayer's taxable year. In such a case, an appropriate adjustment will be made upon the final determination of the rate of absorption applicable to the taxable year.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963]

§1.832–7T Treatment of salvage and reinsurance in computing "losses incurred" deduction, taxable years beginning before January 1, 1990 (temporary).

(a) In computing ''losses incurred'' the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for ''losses incurred'' which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, can be said to represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of such losses which in the opinion of the district director are in excess of the actual liability determined as provided in the preceding sentence will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for ''losses incurred''.

(c) That part of the deduction for ''losses incurred'' which represents an adjustment to losses paid for salvage and reinsurance recoverable shall, except as hereinafter provided, include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash), real or personal, tangible or intangible, except that which may not be included by reason of express statutory provisions (or rules and regulations of an insurance department) of any State or Territory or the District of Columbia in which the company transacts business. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash received during the taxable year with respect to items of salvage or reinsurance shall be taken into account in computing losses paid during such taxable year.

(d) This section is effective for taxable years beginning before January 1, 1990.

[T.D. 8266, 54 FR 38970, Sept. 22, 1989; T.D. 8293, 55 FR 9425, Mar. 14, 1990]

§1.846–0 Outline of provisions.

The following is a list of the headings in §§1.846–1 through 1.846–4.

§1.846–1 Application of discount factors.

(a) In general.

(1) Rules.

(2) Examples.

(3) Increase in discounted unpaid losses shown on the annual statement.

(4) Increase in unpaid losses which take into account estimated salvage recoverable.

(b) Applicable discount factors.

(1) In general.

(i) Discount factors published by the Service.

(ii) Composite discount factors.

(iii) Annual statement changes.

(2) Title insurance company reserves.

(3) Reinsurance business.

(i) Proportional reinsurance for accident years after 1987.

(ii) Non-proportional reinsurance.

(A) Accident years after 1991.

(B) Accident years 1988 through 1991.

(iii) Reinsurance for accident years before 1988.

(iv) 90 percent exception.

(4) International business.

(5) Composite discount factors.

§1.846–2 Election by taxpayer to use its own historical loss payment pattern.

(a) In general.

(b) Eligible line of business.

(1) In general.

(2) Other published guidance.

(3) Special rule for 1987 determination year.

(c) Anti-abuse rule.

§1.846–3 Fresh start and reserve strengthening.

(a) In general.

(b) Applicable discount factors.

(1) Calculation of beginning balance.

(2) Example.

(c) Rules for determining the amount of reserve strengthening.

(1) In general.

(2) Accident years after 1985.

(i) In general.

(ii) Hypothetical unpaid loss reserve.

(3) Accident years before 1986.

(i) In general.

(ii) Exceptions.

(iii) Certain transactions deemed to be reinsurance assumed (ceded) in 1986.

(d) Section 845.

(e) Treatment of reserve strengthening.

(f) Examples.

§1.846–4 Effective date.

[T.D. 8433, 57 FR 40843, Sept. 8, 1992; 57 FR 48563, Oct. 27, 1992]

§1.846–1 Application of discount factors.

(a) *In general*—(1) *Rules.* A separate series of discount factors are computed for, and applied, to undiscounted unpaid losses attributable to each accident year of each line of business shown on the annual statement (as defined by section 846(f)(3)) filed by that taxpayer for the calendar year ending with or within the taxable year of the taxpayer. See §1.832–4(b) relating to the determination of unpaid losses. Paragraph (b) of this section provides rules relating to applicable discount factors and §1.846–3(b) contains guidance relating to discount factors applicable to accident years prior to the 1987 accident year. Once a taxpayer applies a series of discount factors to unpaid losses attributable to an accident year of a line of business, that series of discount factors must be applied to discount the unpaid losses for that accident year for that line of business for all future taxable years. The discount factors cannot be changed to reflect a change in the taxpayer's loss payment pattern during a subsequent year or to reflect a different interest rate assumption. However, discount factors may be changed for taxpayers who elect to use their own historical loss payment pattern, if information upon which the pattern is based is adjusted upon examination by the district director.

(2) *Examples.* The following examples illustrate the principles of paragraph (a)(1) of this section:

Example 1. A taxpayer discounts unpaid losses attributable to all accident years prior to 1992 using discount factors published by the Service. In 1992, the taxpayer elects, under §1.846–2, to compute discount factors using its own historical loss payment pattern. The taxpayer must continue to discount unpaid losses attributable to pre-1992 accident years using the discount factors published for those accident years by the Service.

Example 2. On its annual statements through 1987, a taxpayer did not allocate unpaid losses attributable to proportional reinsurance to the line of business associated with the risks being reinsured. Beginning with the 1988 annual statement, the taxpayer allocated those losses for all accident years to the line of business being reinsured. The taxpayer must continue to discount the unpaid losses attributable to proportional reinsurance from pre-1988 accident years using the discount factors that were used in determining tax reserves for the 1987 tax year. (See paragraph (b)(3) of this section for rules relating to the application of discount factors to reinsurance unpaid losses.)

(3) *Increase in discounted unpaid losses shown on the annual statement.* If the amount of unpaid losses shown on the annual statement is determined on a discounted basis, and the extent to which the unpaid losses were discounted can be determined on the basis of information disclosed on or with the annual statement, the amount of the unpaid losses to which the discount factors are applied shall be determined

without regard to any reduction attributable to the discounting reflected on the annual statement.

(4) *Increase in unpaid losses which take into account estimated salvage recoverable.* If the amount of unpaid losses shown on the annual statement reflects a reduction for estimated salvage recoverable and the extent to which the unpaid losses were reduced by estimated salvage recoverable is appropriately disclosed as required by §1.832–4(d)(2), the amount of unpaid losses shall be determined without regard to the reduction for salvage recoverable.

(b) *Applicable discount factors*—(1) *In general.* Except as otherwise provided in section 846(f)(6) (relating to certain accident and health lines of business), in §1.846–2 (relating to a taxpayer's election to use its own historical loss payment pattern), in this paragraph (b), or in other guidance published in the Internal Revenue Bulletin, the following factors must be used—

(i) *Discount factors published by the Service.* If the Service has published discount factors for a line of business, a taxpayer must discount unpaid losses attributable to that line by applying those discount factors; and

(ii) *Composite discount factors.* If the Service has not published discount factors for a line of business, a taxpayer must discount unpaid losses attributable to that line by applying composite discount factors.

(iii) *Annual statement changes.* If the groupings of individual lines of business on the annual statement changes, taxpayers must discount the unpaid losses on the resulting lines of business with the discounting patterns that would have applied to those unpaid losses based on their annual statement classification prior to the change.

(2) *Title insurance company reserves.* A title insurance company may only take into account case reserves (relating to claims which have been reported to the insurance company). Unless the Service publishes other guidance, the reserves must be discounted using the ‘‘Miscellaneous Casualty’’ discount factors published by the Service. Section 832(b)(8) provides rules for determining the discounted unearned premiums of a title insurance company.

(3) *Reinsurance business*—(i) *Proportional reinsurance for accident years after 1987.* For the 1988 accident year and subsequent accident years, unpaid losses for proportional reinsurance must be discounted using discount factors applicable to the line of business to which those unpaid losses are allocated as required on the annual statement.

(ii) *Non-proportional reinsurance*—(A) *Accident years after 1991.* For the 1992 accident year and subsequent accident years, unpaid losses for non-proportional reinsurance must be discounted using the applicable discount factors published by the Service for the appropriate reinsurance line of business.

(B) *Accident years 1988 through 1991.* For the 1988, 1989, 1990, and 1991 accident years unpaid losses for non-proportional reinsurance must be discounted using composite discount factors.

(iii) *Reinsurance for accident years before 1988.* If on its annual statement a taxpayer does not allocate unpaid losses to the applicable line of business for proportional or nonproportional reinsurance attributable to the 1987 accident year or a prior accident year, those losses must be discounted using composite discount factors. If on its annual statement a taxpayer allocates to the underlying line of business reinsurance unpaid losses that are attributable to the 1987 accident year or a prior accident year, those losses must be discounted using discount factors applicable to the underlying line of business.

(iv) *90 percent exception.* For purposes of §1.846–1(b)(3) (ii) and (iii), if more than 90 percent of all the unallocated losses of a taxpayer for an accident year relate to one underlying line of business, the taxpayer must discount all unallocable reinsurance unpaid losses attributable to that accident year using the discount factors published by the Service for the underlying line of business.

(4) *International business.* For any accident year, unpaid losses which are attributable to international business must be discounted using composite discount factors unless more than 90 percent of all losses for that accident year relate to one underlying line of

business. If more than 90 percent of all losses for an accident year relate to one underlying line of business, the taxpayer must discount the losses attributable to that accident year using discount factors published by the Service for the underlying line of business.

(5) *Composite discount factors.* For purposes of the regulations under section 846, ‘‘composite discount factors’’ means the series of discount factors published annually by the Service determined on the basis of the appropriate composite loss payment pattern.

[T.D. 8433, 57 FR 40844, Sept. 8, 1992]

§ 1.846–2 Election by taxpayer to use its own historical loss payment pattern.

(a) *In general.* If a taxpayer has one or more eligible lines of business in a determination year, the taxpayer may elect on the taxpayer's timely filed Federal income tax return for the determination year to discount unpaid losses using its own historical loss payment pattern instead of the industry-wide pattern determined by the Secretary. A taxpayer making the election must use its own historical loss payment pattern in discounting unpaid losses for each line of business that is an eligible line of business in that determination year. The election applies to accident years ending with the determination year and to each of the four succeeding accident years. If a taxpayer makes the election for the 1987 determination year, the taxpayer must use its 1987 loss payment pattern (determined by reference to its 1985 annual statement) to discount unpaid losses attributable to all accident years prior to 1988.

(b) *Eligible line of business*—(1) *In general.* A line of business is an eligible line of business in a determination year if, on the most recent annual statement filed by the taxpayer before the beginning of that determination year, the taxpayer reports losses and loss expenses incurred (in Schedule P, part 1, column 24 of the 1990 annual statement or comparable location in an earlier or subsequently revised blank) for at least the number of accident years for which losses and loss expenses incurred for that line of business are required to be separately reported on that annual statement. For example, for the 1987 determination year, the 1985 annual statement is used. The annual statement to be used to determine eligibility in subsequent determination years is the annual statement for each fifth year after 1985 (e.g., 1990, 1995, etc.).

(2) *Other published guidance.* A line of business is also an eligible line of business for purposes of the election if the line is an eligible line under requirements published for this purpose in the Internal Revenue Bulletin.

(3) *Special rule for 1987 determination year.* A line of business is an eligible line of business in the 1987 determination year if it is eligible under paragraph (b) (1) or (2) of this section, or if on the most recent annual statement filed by the taxpayer before the beginning of the 1987 determination year, the taxpayer reports written premiums for the line of business for at least the number of accident years that unpaid losses for that line of business are required to be separately reported on that annual statement.

(c) *Anti-abuse rule.* To prevent avoidance of the requirement that the election to use historical loss payment patterns apply to all eligible lines of business of a taxpayer, the district director may—

(1) Nullify a taxpayer's election to compute discounted unpaid losses based on its historical loss payment pattern;

(2) Adjust a taxpayer's historical loss payment pattern; or

(3) Make other proper adjustments.

[T.D. 8433, 57 FR 40845, Sept. 8, 1992]

§ 1.846–3 Fresh start and reserve strengthening.

(a) *In general.* Section 1023(e) of the Tax Reform Act of 1986 (‘‘the 1986 Act’’) provides rules relating to fresh start and reserve strengthening. For purposes of section 1023(e) of the 1986 Act, a taxpayer must discount its unpaid losses as of the end of the last taxable year beginning before January 1, 1987. The excess of undiscounted unpaid losses over discounted unpaid losses as of that time is not required to be included in income, except (as provided in paragraph (e) of this section) to the extent of any ‘‘reserve strengthening’’ in a taxable year beginning in 1986. The exclusion from income of this excess is known as ‘‘fresh start.’’ The amount of fresh start is, however, included in earnings and profits for the first taxable year beginning after December 31, 1986.

(b) *Applicable discount factors*—(1) *Calculation of beginning balance.* For purposes of section 1023(e) of the 1986 Act, a taxpayer discounts unpaid losses as of the end of the last taxable year beginning before January 1, 1987—

(i) By using the same discount factors that are used in the succeeding taxable year to discount unpaid losses attributable to the 1987 accident year and prior accident years (see section 1023(e)(2) of the 1986 Act); and

(ii) By applying those discount factors as if the 1986 accident year were the 1987 accident year.

(2) *Example.* The following example illustrates the principles of this paragraph (b):

Example. X, a calendar year taxpayer, does not make an election in 1987 to use its own historical loss payment pattern. When X computes discounted unpaid losses for its last taxable year beginning before January 1, 1987, the discount factor for AY+0 published in Rev. Rul. 87–34, 1987–1 C.B. 168, must be applied to unpaid losses attributable to the 1986 accident year; the discount factor for AY+1 is applied to unpaid losses attributable to the 1985 accident year; etc.

(c) *Rules for determining the amount of reserve strengthening (weakening)*—(1) *In general.* The amount of reserve strengthening (weakening) is the amount that is determined under paragraph (c)(2) or (3) to have been added to (subtracted from) an unpaid loss reserve in a taxable year beginning in 1986. For purposes of section 1023(e)(3)(B) of the 1986 Act, the amount of reserve strengthening (weakening) must be determined separately for each unpaid loss reserve by applying the rules of this paragraph (c). This determination is made without regard to the reasonableness of the amount of the unpaid loss reserve and without regard to the taxpayer’s discretion, or lack thereof, in establishing the amount of the unpaid loss reserve. The amount of reserve strengthening for an unpaid loss reserve may not exceed the amount of the reserve, including any undiscounted strengthening amount, as of the end of the last taxable year beginning before January 1, 1987. For purposes of this section, an ‘‘unpaid loss reserve’’ is the aggregate of the unpaid loss estimate for losses (whether or not reported) incurred in an accident year of a line of business.

(2) *Accident years after 1985*—(i) *In general.* The amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year after 1985 is the amount by which that reserve at the end of the last taxable year beginning in 1986 exceeds (is less than) a hypothetical unpaid loss reserve.

(ii) *Hypothetical unpaid loss reserve.* For purposes of this paragraph (c)(2), the term ‘‘hypothetical unpaid loss reserve’’ means a reserve computed for losses the estimates of which were included, at the end of the last taxable year beginning in 1986, in the unpaid loss reserve for which reserve strengthening (weakening) is being determined. The hypothetical unpaid loss reserve must be computed using the same assumptions, other than the assumed interest rates in the case of reserves determined on a discounted basis for annual statement reporting purposes, that were used to determine the 1985 accident year reserve, if any, for the line of business for which the hypothetical reserve is being computed. If there was no 1985 accident year reserve for that line of business, the hypothetical unpaid loss reserve is the reserve, at the end of the last taxable year beginning in 1986, for which reserve strengthening (weakening) is being determined (and thus there is no reserve strengthening or weakening).

(3) *Accident years before 1986*—(i) *In general.* For each taxable year beginning in 1986, the amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year before 1986 is the amount by which the reserve at the end of that taxable year exceeds (is less than)—

(A) The reserve at the end of the immediately preceding taxable year; reduced by

(B) Claims paid and loss adjustment expenses paid (‘‘loss payments’’) in the taxable year beginning in 1986 with respect to losses that are attributable to the reserve. The amount by which a reserve is reduced as a result of reinsurance ceded during a taxable year beginning in 1986 is treated as a loss payment made in that taxable year.

(ii) *Exceptions.* Notwithstanding paragraph (c)(3)(i) of this section, the amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year before 1986 does not include—

(A) An amount added to the reserve in a taxable year beginning in 1986 as a result of a loss reported to the taxpayer from a mandatory state or federal assigned risk pool if the amount of the loss reported is not discretionary with the taxpayer; or

(B) Payments made with respect to reinsurance assumed during a taxable year beginning in 1986 or amounts added to the reserve to take into account reinsurance assumed for a line of business during a taxable year beginning in 1986, but only to the extent that the amount does not exceed the amount of a hypothetical reserve for the reinsurance assumed. The amount of the hypothetical reserve is determined using the same assumptions (other than the assumed interest rates) that were used to determine a reserve for reinsurance assumed for the line of business in a taxable year beginning in 1985.

(iii) *Certain transactions deemed to be reinsurance assumed (ceded) in 1986.* For purposes of this paragraph (c)(3), reinsurance assumed (ceded) in a taxable year beginning in 1985 is treated as assumed (ceded) during the succeeding taxable year if the appropriate unpaid loss reserve is not adjusted to take into account the reinsurance transaction until that succeeding taxable year.

(d) *Section 845.* Any reinsurance transaction that has as one of its purposes the avoidance of the reserve strengthening limitation is subject to section 845.

(e) *Treatment of reserve strengthening.* The fresh start provision of section 1023(e)(3)(A) of the 1986 Act does not apply to the portion of the taxpayer's unpaid losses attributable to reserve strengthening. Thus, the difference between the undiscounted unpaid losses attributable to reserve strengthening and the discounted unpaid losses attributable to reserve strengthening must be included in income and, therefore, included in earnings and profits for the first taxable year beginning after December 31, 1986. The amount that a taxpayer must include in income for its first taxable year beginning after December 31, 1986, as a result of reserve strengthening is equal to the excess (if any) of—

(*1*) The sum of each amount of reserve strengthening multiplied by the difference between 100 percent and the discount factor that, under paragraph (b) of this section, is applicable to the unpaid loss reserve which was strengthened; over

(*2*) The sum of each reserve weakening multiplied by the difference between 100 percent and the discount factor that, under paragraph (b) of this section, is applicable to the unpaid loss reserve which was weakened.

(f) *Examples.* The following examples illustrate the principles of this section. For purposes of these examples, it is assumed that the taxpayers are property and casualty insurance companies that in 1987 did not elect to use their own historical loss payment patterns.

Example 1. (i) As of the end of 1985, X, a calendar year taxpayer, had undiscounted unpaid losses of $1,000,000 in the workers' compensation line of business for the 1984 accident year. The same reserve had undiscounted unpaid losses of $900,000 at the end of 1986. During 1986, X's loss payments for this reserve were $300,000. Accordingly, under paragraph (c)(3)(i) of this section, X has a reserve strengthening of $200,000 ($900,000–($1,000,000–$300,000)).

(ii) This was X's only reserve strengthening or weakening. Thus, under paragraph (e) of this section, for 1987 X must include in income $54,361.40 ($200,000 × (100%–72.8193%)). The factor of 72.8193% is the AY+2 factor from the workers' compensation series of discount factors published in Rev. Rul. 87–34, 1987–1 C.B. 168.

Example 2. The facts are the same as in *Example 1,* except that X's 1986 loss payments for the reserve were $1,100,000. If only paragraph (c)(3)(i) of this section were applied, X would have a $1,000,000 reserve strengthening ($900,000–($1,000,000–$1,100,000)). Under paragraph (c)(1) of this section, however, the amount of reserve strengthening for the reserve is limited to the amount of the reserve at the end of 1986. Accordingly, X has a reserve strengthening of $900,000 and for 1987 must include in income $244,626.30 ($900,000 × (100%–72.1893%)).

Example 3. (i) As of the end of 1985, Y, a calendar year taxpayer, had undiscounted unpaid losses of $1,000,000 in the auto physical damage line of business for the 1985 accident year. The same reserve included undiscounted unpaid losses of $600,000 at the end of 1986. During 1986, Y had loss payments of $300,000 for this line of business. Under paragraph (c)(3)(i) of this section Y has a $100,000 reserve weakening ($600,000–($1,000,000–$300,000)).

(ii) Under paragraph (e) of this section, the only effect of the reserve weakening is to reduce the amount that Y is required to include in income as a result of any strengthening of another reserve.

Example 4. The facts are the same as in *Example 1* except that X also has a $100,000 reserve weakening for the 1985 accident year in its auto physical damage line of business. Under paragraph (b) of this section, the reserve discount factor for the reserve is 93.3400, the AY+1 factor from the auto physical damage series of discount factors published in Rev. Rul. 87–34. Thus, under paragraph (e) of this section, the amount that X is required to include in income in 1987 is reduced by $6,660 ($100,000 × (100%–93.3400%)), resulting in an amount of $47,761.40 ($54,361.40–$6,660).

Example 5. (i) At the end of 1985, Z, a calendar year taxpayer, had undiscounted unpaid losses of $1,000,000 in the workers' compensation line of business for the 1984 accident year. On May 1, 1986, Z ceded $130,000 of the reserve to an unrelated reinsurer. Z added $250,000 to the 1985 year end reserve to take into account workers' compensation risks for the 1984 accident year that Z assumed in a reinsurance transaction on September 1, 1986. Z had $230,000 of 1986 loss payments related to the 1984 accident year of its workers' compensation line, $60,000 of which was attributable to the reinsurance assumed by Z. At the end of 1986, Z's reserve for the workers' compensation line for the 1984 accident year was $1,100,000.

(ii) If only paragraph (c)(3)(i) of this section were applied, Z would have a $460,000 reserve strengthening ($1,100,000–($1,000,000–$230,000–$130,000)). Under paragraph (c)(3)(ii)(B) of this section, however, reserve strengthening does not include the $250,000 that Z added to the reserve to take into account the reinsurance assumed. Also, none of the $60,000 of loss payments attributable to the reinsurance assumed in 1986 are taken into account. Accordingly, Z has $150,000 of reserve strengthening ($460,000–$250,000–$60,000). If this is Z's only reserve strengthening or weakening, then the amount that Z must include in income for 1987 under paragraph (e) of this section is $40,771.05 ($150,000 × (100%–72.8193%)). The factor of 72.8193% is the AY+2 factor from the workers' compensation series of discount factors published in Rev. Rul. 87–34.

Example 6. (i) X was a calendar year taxpayer before July 1, 1986, the date on which X became a member of an affiliated group of corporations that files a consolidated return with a June 30 year end. Thus, X had two taxable years beginning in 1986: a short taxable year ending June 30, 1986, and a fiscal taxable year ending June 30, 1987.

(ii) As of the end of 1985, X had undiscounted unpaid losses of $800,000 in the automobile liability line of business for the 1983 accident year. At the end of the short taxable year, X had reserves of $700,000 of undiscounted unpaid losses, and on June 30, 1987, had reserves of $600,000 of undiscounted unpaid losses. During the short taxable year, ending June 30, 1986, X's loss payments for this reserve were $120,000. During the taxable year ending June 30, 1987, X's loss payments for this reserve were $180,000. Under paragraph (c)(3)(i) of this section, X has a $100,000 reserve strengthening: of which $20,000 ($700,000–($800,000–$120,000)) is attributable to the short taxable year ending June 30, 1986 and $80,000 ($600,000–($700,000–$180,000)) is attributable to the taxable year ending June 30, 1987.

(iii) The amount of reserve strengthening for this line of business is determined pursuant to the principles of paragraph (c)(2) of this section.

[T.D. 8433, 57 FR 40845, Sept. 8, 1992; 57 FR 48563, Oct. 27, 1992; 57 FR 57531, Dec. 4, 1992]

§1.846–4 Effective date.

Sections 1.846–1 through Sections 1.846–3 apply to taxable years beginning after December 31, 1986.

[T.D. 8433, 57 FR 40847, Sept. 8, 1992]

§1.848–0 Outline of regulations under section 848.

This section lists the paragraphs in §§1.848–1 through 1.848–3.

1.848–1 Definitions and special provisions.

(a) Scope and effective date.

(b) Specified insurance contract.

(1) In general.

(2) Exceptions.

(i) In general.

(ii) Reinsurance of qualified foreign contracts.

(c) Life insurance contract.

(d) Annuity contract.

(e) Noncancellable accident and health insurance contract.

(f) Guaranteed renewable accident and health insurance contract.

(g) Combination contract.

(1) Definition.

(2) Treatment of premiums on a combination contract.

(i) In general.

(ii) De minimis premiums.
(3) Example.
(h) Group life insurance contract.
(1) In general.
(2) Group affiliation requirement.
(i) In general.
(ii) Employee group.
(iii) Debtor group.
(iv) Labor union group.
(v) Association group.
(vi) Credit union group.
(vii) Multiple group.
(viii) Certain discretionary groups.
(ix) Employees treated as members.
(x) Class or classes of a group determined without regard to individual health characteristics.
(A) In general.
(B) Limitation of coverage based on certain work and age requirements permissible.
(3) Premiums determined on a group basis.
(i) In general.
(ii) Exception for substandard premium rates for certain high risk insureds.
(iii) Flexible premium contracts.
(iv) Determination of actual age.
(4) Underwriting practices used by company. [Reserved]
(5) Disqualification of group.
(i) In general.
(ii) Exception for de minimis failures.
(6) Supplemental life insurance coverage.
(7) Special rules relating to the payment of proceeds.
(i) Contracts issued to a welfare benefit fund.
(ii) Credit life insurance contracts.
(iii) ‘‘Organization or association’’ limited to the sponsor of the contract or the group policyholder.
(i) General deductions.

1.848–2 Determination of net premiums.

(a) Net premiums.
(1) In general.
(2) Separate determination of net premiums for certain reinsurance agreements.
(b) Gross amount of premiums and other consideration.
(1) General rule.
(2) Items included.
(3) Treatment of premium deposits.
(i) In general.
(ii) Amounts irrevocably committed to the payment of premiums.
(iii) Retired lives reserves.
(4) Deferred and uncollected premiums.
(c) Policy exchanges.
(1) General rule.
(2) External exchanges.
(3) Internal exchanges resulting in fundamentally different contracts.
(i) In general.
(ii) Certain modifications treated as not changing the mortality, morbidity, interest, or expense guarantees.
(iii) Exception for contracts restructured by a court supervised rehabilitation or similar proceeding.
(4) Value of the contract.
(i) In general.
(ii) Special rule for group term life insurance contracts.
(iii) Special rule for certain policy enhancement and update programs.
(A) In general.
(B) Policy enhancement or update program defined.
(5) Example.
(d) Amounts excluded from the gross amount of premiums and other consideration.
(1) In general.
(2) Amounts received or accrued from a guaranty association.
(3) Exclusion not to apply to dividend accumulations.
(e) Return premiums.
(f) Net consideration for a reinsurance agreement.
(1) In general.
(2) Net consideration determined by a ceding company.
(i) In general.
(ii) Net negative and net positive consideration.
(3) Net consideration determined by the reinsurer.
(i) In general.
(ii) Net negative and net positive consideration.
(4) Timing consistency required.
(5) Modified coinsurance and funds-withheld reinsurance agreements.
(i) In general.
(ii) Special rule for certain funds-withheld reinsurance agreements.
(6) Treatment of retrocessions.
(7) Mixed reinsurance agreements.
(8) Treatment of policyholder loans.
(9) Examples.
(g) Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.
(1) In general.
(2) Application to reinsurance agreements subject to the interim rules.
(3) Amount of reduction.
(4) Capitalization shortfall.
(5) Required capitalization amount.
(i) In general.
(ii) Special rule with respect to net negative consideration.
(6) General deductions allocable to reinsurance agreements.
(7) Allocation of capitalization shortfall among reinsurance agreements.
(8) Election to determine specified policy acquisition expenses for an agreement without regard to general deductions limitation.
(i) In general.
(ii) Manner of making election.
(iii) Election statement.

(iv) Effect of election.

(9) Examples.

(h) Treatment of reinsurance agreements with parties not subject to U.S. taxation.

(1) In general.

(2) Agreements to which this paragraph (h) applies.

(i) In general.

(ii) Parties subject to U.S. taxation.

(A) In general.

(B) Effect of a closing agreement.

(3) Election to separately determine the amounts required to be capitalized for reinsurance agreements with parties not subject to U.S. taxation.

(i) In general.

(ii) Manner of making the election.

(4) Amount taken into account for purposes of determining specified policy acquisition expenses.

(5) Net foreign capitalization amount.

(i) In general.

(ii) Foreign capitalization amounts by category.

(6) Treatment of net negative foreign capitalization amount.

(i) Applies as a reduction to previously capitalized amounts.

(ii) Carryover of remaining net negative foreign capitalization amount.

(7) Reduction of net positive foreign capitalization amount by carryover amounts allowed.

(8) Examples.

(i) Carryover of excess negative capitalization amount.

(1) In general.

(2) Excess negative capitalization amount.

(3) Treatment of excess negative capitalization amount.

(4) Special rule for the treatment of an excess negative capitalization amount of an insolvent company.

(i) When applicable.

(ii) Election to forego carryover of excess negative capitalization amount.

(iii) Amount of reduction to the excess negative capitalization amount and specified policy acquisition expenses.

(iv) Manner of making election.

(v) Presumptions relating to the insolvency of an insurance company undergoing a court supervised rehabilitation or similar state proceeding.

(vi) Example.

(j) Ceding commissions with respect to reinsurance of contracts other than specified insurance contracts.

(k) Effective dates.

(1) In general.

(2) Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.

(3) Net consideration rules.

(4) Determination of the date on which a reinsurance agreement is entered into.

(5) Special rule for certain reinsurance agreements with parties not subject to U.S. taxation.

(6) Carryover of excess negative capitalization amount.

1.848–3 Interim rules for certain reinsurance agreements.

(a) Scope and effective dates.

(b) Interim rules.

(c) Adjustments and special rules.

(1) Assumption reinsurance.

(2) Reimbursable dividends.

(3) Ceding commissions.

(i) In general.

(ii) Amount of ceding commission.

(4) Termination payments.

(5) Modified coinsurance agreements.

(d) Examples.

[T.D. 8456, 57 FR 61818, Dec. 29, 1992]

§1.848–1 Definitions and special provisions.

(a) *Scope and effective date.* The definitions and special provisions in this section apply solely for purposes of determining specified policy acquisition expenses under section 848 of the Internal Revenue Code, this section, and §§1.848–2 and 1.848–3. Unless otherwise specified, the rules of this section are effective for the taxable years of an insurance company beginning after November 14, 1991.

(b) *Specified insurance contract*—(1) *In general.* A ‘‘specified insurance contract’’ is any life insurance contract, annuity contract, noncancellable or guaranteed renewable accident and health insurance contract, or combination contract. A reinsurance agreement that reinsures the risks under a specified insurance contract is treated in the same manner as the reinsured contract.

(2) *Exceptions*—(i) *In general.* A ‘‘specified insurance contract’’ does not include any pension plan contract (as defined in section 818(a)), flight insurance or similar contract, or qualified foreign contract (as defined in section 807(e)(4)).

(ii) *Reinsurance of qualified foreign contracts.* The exception for qualified foreign contracts does not apply to reinsurance agreements that reinsure qualified foreign contracts.

(c) *Life insurance contract.* A ‘‘life insurance contract’’ is any contract—

(1) Issued after December 31, 1984, that qualifies as a life insurance contract under section 7702(a) (including an endowment contract as defined in 7702(h)); or

(2) Issued prior to January 1, 1985, if the premiums on the contract are reported as life insurance premiums on the insurance company's annual statement (or could be reported as life insurance premiums if the company were required to file the annual statement for life and accident and health companies).

(d) *Annuity contract.* An ''annuity contract'' is any contract (other than a life insurance contract as defined in paragraph (c) of this section) if amounts received under the contract are subject to the rules in section 72(b) or section 72(e) (determined without regard to section 72(u)). The term ''annuity contract'' also includes a contract that is a qualified funding asset under section 130(d).

(e) *Noncancellable accident and health insurance contract.* The term ''noncancellable accident and health insurance contract'' has the same meaning for purposes of section 848 as the term has for purposes of section 816(b).

(f) *Guaranteed renewable accident and health insurance contract.* The term ''guaranteed renewable accident and health insurance contract'' has the same meaning for purposes of section 848 as the term has for purposes of section 816(e).

(g) *Combination contract*—(1) *Definition.* A ''combination contract'' is a contract (other than a contract described in section 848(e)(3)) that provides two or more types of insurance coverage, at least one of which if offered separately would be a life insurance contract, an annuity contract, or a noncancellable or guaranteed renewable accident and health insurance contract.

(2) *Treatment of premiums on a combination contract*—(i) *In general.* If the premium allocable to each type of insurance coverage is separately stated on the insurance company's annual statement (or could be separately stated if the insurance company were required to file the annual statement for life and accident and health companies), the premium allocable to each type of insurance coverage in a combination contract is subject to the capitalization rate, if any, that would apply if that coverage was provided in a separate contract. If the premium allocable to each type of insurance coverage in a combination contract is not separately stated, the entire premium is subject to the highest capitalization percentage applicable to any of the coverages provided.

(ii) *De minimis premiums.* For purposes of this paragraph (g)(2)—

(A) A de minimis premium is not required to be separately stated;

(B) In determining the highest capitalization percentage applicable to a combination contract, the coverage to which a de minimis premium is allocable is disregarded;

(C) If the separate statement requirement of this paragraph (g)(2) is satisfied, a de minimis premium is treated in accordance with its characterization on the insurance company's annual statement; and

(D) Whether a premium for an insurance coverage is de minimis is determined by comparing that premium with the aggregate of the premiums for the combination contract. A premium that is not more than 2 percent of the premium for the entire contract is considered de minimis. Whether a premium that is more than 2 percent is de minimis is determined based on all the facts and circumstances.

(3) *Example.* The principles of this paragraph (g) are illustrated by the following example.

Example. A life insurance company (L1) issues a contract to an employer (X) which provides cancellable accident and health insurance coverage and group term life insurance coverage to X's employees. L1 charges a premium of $1,000 for the contract, $950 of which is attributable to the cancellable accident and health insurance coverage and $50 of which is attributable to the group term life insurance coverage. On its annual statement, L1 reports the premiums attributable to the accident and health insurance coverage separately from the premiums attributable to the group term life insurance coverage. The contract issued by L1 is a combination contract as defined in paragraph (g)(1) of this section. Pursuant to paragraph (g)(2)(i) of this section, only the premiums attributable to the group term life insurance coverage ($50) are subject to the provisions of section 848. The premiums attributable to the cancellable accident and health insurance coverage ($950) are not subject to the provisions of section 848.

(h) *Group life insurance contract*—(1) *In general*. A life insurance contract (as defined in paragraph (c) of this section) is group life insurance contract if—

(i) The contract is a group life insurance contract under the applicable law;

(ii) The coverage is provided under a master contract issued to the group policyholder, which may be a trust, trustee, or agent;

(iii) The premiums on the contract are reported either as group life insurance premiums or credit life insurance premiums on the insurance company's annual statement (or could be reported as group life insurance premiums or credit life insurance premiums if the company were required to file the annual statement for life and accident and health companies);

(iv) The group affiliation requirement of paragraph (h)(2) of this section is satisfied;

(v) The premiums on the contract are determined on a group basis within the meaning of paragraph (h)(3) of this section; and

(vi) The proceeds of the contract are not payable to or for the benefit of the insured's employer, an organization or association to which the insured belongs, or other similar person. (See paragraph (h)(7) of this section for special rules that apply in determining if this requirement is satisfied.)

(2) *Group affiliation requirement*—(i) *In general*. The group affiliation requirement of section 848(e)(2)(A) and this paragraph (h)(2) is satisfied only if all of the individuals eligible for coverage under the contract constitute a group described in paragraphs (h)(2) (ii) through (viii) of this section.

(ii) *Employee group*. An employee group consists of all of the employees (including statutory employees within the meaning of section 3121(d)(3) and individuals who are treated as employed by a single employer under section 414 (b), (c), or (m)), or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of an employer. For this purpose, the term ‘‘employee’’ includes—

(A) A retired or former employee;

(B) The sole proprietor, if the employer is a sole proprietorship;

(C) A partner of the partnership, if the employer is a partnership;

(D) A director of the corporation, if the employer is a corporation; and

(E) An elected or appointed official of the public body, if the employer is a public body.

(iii) *Debtor group*. A debtor group consists of all of the debtors, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a creditor. For this purpose, the term ‘‘debtor’’ includes a borrower of money or purchaser or lessee of goods, services, or property for which payment is arranged through a credit transaction.

(iv) *Labor union group*. A labor union group consists of all of the members, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a labor union or similar employee organization.

(v) *Association group*. An association group consists of all of the members, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of an association that, at the time the master contract is issued—

(A) Is organized and maintained for purposes other than obtaining insurance;

(B) Has been in active existence for at least two years (including, in the case of a merged or successor association, the years of active existence of any predecessor association); and

(C) Has at least 100 members.

(vi) *Credit union group*. A credit union group consists of all of the members or borrowers, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a credit union.

(vii) *Multiple group*. A multiple group consists of two or more groups from any single category described in paragraphs (h)(2) (ii) through (vi) of this section. A multiple group may not include two or more groups from different categories described in paragraph (h)(2) (ii) through (vi) of this section.

(viii) *Certain discretionary groups*. Provided that the contract otherwise satisfies the requirements of paragraph (h)(1) of this section, a contract issued to one of the following discretionary groups is treated as satisfying the group affiliation requirement of this paragraph (h)(2)—

(A) A contract issued to a group consisting of students of one or more universities or other educational institutions;

(B) A contract issued to a group consisting of members or former members of the U.S. Armed Forces;

(C) A contract issued to a group of individuas for the payment of future funeral expenses; and

(D) A contract issued to any other discretionary group as specified by the Commissioner in subsequent guidance published in the Internal Revenue Bulletin. (See § 601.601(d)(2)(ii)(*b*) of this chapter.)

(ix) *Employees treated as members.* In determining whether the group affiliation requirement of paragraph (h)(2) of this section is satisfied, the employees of a labor union, credit union, or association may be treated as members of a labor union group, a credit union group, or an association group, respectively.

(x) *Class or classes of a group determined without regard to individual health characteristics*—(A) *In general.* A class or classes of a group described in paragraphs (h)(2) (ii) through (viii) of this section may be determined using any reasonable characteristics (for example, amount of insurance, location, or occupation) other than individual health characteristics. The employees of a single employer covered under a policy issued to a multi-employer trust are considered a class of a group described in paragraph (h)(2)(ii) of this section.

(B) *Limitation of coverage based on certain work and age requirements permissible.* A limitation of coverage under a group contract to persons who are actively at work or of a pre-retirement age (for example, age 65 or younger) is not treated as based on individual health characteristics.

(3) *Premiums determined on a group basis*—(i) *In general.* Premiums for a contract are determined on a group basis for purposes of section 848(e)(2)(B) and this paragraph (h) only if the premium charged by the insurance company for each member of the group (or any class thereof) is determined on the basis of the same rates for the corresponding amount of coverage (for example, per $1,000 of insurance) or on the basis of rates which differ only because of the gender, smoking habits, or age of the member.

(ii) *Exception for substandard premium rates for certain high risk insureds.* Any difference in premium rates is disregarded for purposes of this paragraph (h)(3) if the difference is charged for an individual who was accepted for coverage at a substandard rate prior to January 1, 1993.

(iii) *Flexible premium contracts.* In the case of a group universal life insurance contract, the identical premium requirement is satisfied if the premium rates used by the insurance company in determining the periodic mortality charges applied to the policy account value of any member insured by the contract differ from those of other members (within the same class) only because of the gender, smoking habits, or age of the member.

(iv) *Determination of actual age.* For purposes of this paragraph (h)(3), determinations of actual age may be made using any reasonable method, provided that this method is applied consistently for all members of the group.

(4) *Underwriting practices used by company.* [Reserved]

(5) *Disqualification of group*—(i) *In general.* Except as otherwise provided in this paragraph (h)(5), if the requirements of paragraphs (h)(1), (2), and (3) of this section are not satisfied with respect to one or more members of the group, or of a class within a group (within the meaning of paragraph (h)(2)(x) of this section), the premiums for the entire group (or class) are treated as individual life insurance premiums.

(ii) *Exception for de minimis failures.* If the requirements of paragraphs (h) (1), (2), or (3) of this section are not satisfied with respect to one or more members of the group (or class), but the sum of the premiums charged by the insurance company for those individuals is no more than 5 percent of the aggregate premiums for the group (or class), only the premiums charged for those individuals are treated as premiums for an individual life insurance contract.

(6) *Supplemental life insurance coverage.* For purposes of determining whether the requirement in paragraph (h)(3)(i) of this section is satisfied, any supplemental life insurance coverage (including optional coverage for members of the group, their spouses, or their dependent children) is (or is treated as) a separate contract. In determining whether the group affiliation requirement of paragraph (h)(2) of this section is satisfied for the supplemental coverage, a member's spouse and dependent children are treated as members of the group if they are eligible for coverage.

(7) *Special rules relating to the payment of proceeds.* The following rules apply for purposes of section 848(e)(2) and paragraph (h)(1)(vi) of this section.

(i) *Contracts issued to a welfare benefit fund.* If a contract issued to a welfare benefit fund (as defined in section 419) provides for payment of proceeds to the welfare benefit fund, the proceeds of the contract are not considered payable to or for the benefit of the insured's employer, an organization or association to which the insured belongs, or other similar person, provided the proceeds are paid as benefits to the employee or the employee's beneficiary.

(ii) *Credit life insurance contracts.* If a credit life insurance contract provides for payment of proceeds to the insured's creditor, the proceeds of the contract are not treated as payable to or for the benefit of the insured's employer, an organization or association to which the insured belongs, or other similar person, provided the proceeds are applied against an outstanding indebtedness of the insured.

(iii) *''Organization or association'' limited to the sponsor of the contract or the group policyholder.* The term ''organization or association'' means the organization or association that is either the sponsor of the contract or the group policyholder.

(i) *General deductions.* The term ''general deductions'' is defined in section 848(c)(2). An insurance company determines its general deductions for the taxable year without regard to amounts capitalized or amortized under section 848(a). The amount of a company's general deductions is also determined without regard to the rules of §1.848–2(f), which apply only for purposes of determining net consideration for reinsurance agreements.

[T.D. 8456, 57 FR 61819, Dec. 29, 1992; 58 FR 9245, Feb. 19, 1993]

§1.848–2 Determination of net premiums.

(a) *Net premiums*—(1) *In general.* An insurance company must use the accrual method of accounting (as prescribed by section 811(a)(1)) to determine the net premiums with respect to each category of specified insurance contracts. With respect to any category of contracts, net premiums means—

(i) The gross amount of premiums and other consideration (see paragraph (b) of this section); reduced by

(ii) The sum of—

(A) The return premiums (see paragraph (e) of this section); and

(B) The net negative consideration for a reinsurance agreement (other than an agreement described in paragraph (h)(2) of this section). See paragraphs (f) and (g) of this section for rules relating to the determination of net negative consideration.

(2) *Separate determination of net premiums for certain reinsurance agreements.* Net premiums with respect to reinsurance agreements for which an election under paragraph (h)(3) of this section has been made (certain reinsurance agreements with parties not subject to United States taxation) are treated separately and are subject to the rules of paragraph (h) of this section.

(b) *Gross amount of premiums and other consideration*—(1) *General rule.* The term ''gross amount of premiums and other consideration'' means the sum of—

(i) All premiums and other consideration (other than amounts on reinsurance agreements); and

(ii) The net positive consideration for any reinsurance agreement (other than an agreement for which an election under paragraph (h)(3) of this section has been made).

(2) *Items included.* The gross amount of premiums and other consideration includes—

(i) Advance premiums;

(ii) Amounts in a premium deposit fund or similar account, to the extent provided in paragraph (b)(3) of this section;

(iii) Fees;

(iv) Assessments;

(v) Amounts that the insurance company charges itself representing premiums with respect to benefits for its employees (including full-time life insurance salesmen treated as employees under section 7701(a)(20)); and

(vi) The value of a new contract issued in an exchange described in paragraph (c)(2) or (c)(3) of this section.

(3) *Treatment of premium deposits*—(i) *In general.* An amount in a premium deposit fund or similar account is taken into account in determining the gross amount of premiums and other consideration at the earlier of the time that the amount is applied to, or irrevocably committed to, the payment of a premium on a specified insurance contract. If an amount is irrevocably committed to the payment of a premium on a specified insurance contract, then neither that amount nor any earnings allocable to that amount are included in the gross amount of premiums and other consideration when applied to the payment of a premium on the same contract.

(ii) *Amounts irrevocably committed to the payment of premiums.* Except as provided in paragraph (b)(3)(iii) of this section, an amount in a premium deposit fund or similar account is irrevocably committed to the payment of premiums on a contract only if neither the amount nor any earnings allocable to that amount may be—

(A) Returned to the policyholder or any other person (other than on surrender of the contract); or

(B) Used by the policyholder to fund another contract.

(iii) *Retired lives reserves.* Premiums received by an insurance company under a retired lives reserve arrangement are treated as irrevocably committed to the payment of premiums on a specified insurance contract.

(4) *Deferred and uncollected premiums.* The gross amount of premiums and other consideration does not include deferred and uncollected premiums.

(c) *Policy exchanges*—(1) *General rule.* Except as otherwise provided in this paragraph (c), an exchange of insurance contracts (including a change in the terms of a specified insurance contract) does not result in any amount being included in the gross amount of premiums and other consideration.

(2) *External exchanges.* If a contract is exchanged for a specified insurance contract issued by another insurance company, the company that issues the new contract must include the value of the new contract in the gross amount of premiums and other consideration.

(3) *Internal exchanges resulting in fundamentally different contracts*—(i) *In general.* If a contract is exchanged for a specified insurance contract issued by the same insurance company that issued the original contract, the company must include the value of the new contract in the gross amount of premiums and other consideration if the new contract—

(A) Relates to a different category of specified insurance contract than the original contract;

(B) Does not cover the same insured as the original contract; or

(C) Changes the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided in the original contract.

(ii) *Certain modifications treated as not changing the mortality, morbidity, interest, or expense guarantees.* For purposes of paragraph (c)(3)(i)(C) of this section, the following items are not treated as changing the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided in the contract—

(A) A change in a temporary guarantee with respect to the amounts to be credited as interest to the policyholder's account, or charged as mortality, morbidity, or expense charges, if the new guarantee applies for a period of ten years or less;

(B) The determination of benefits on annuitization using rates which are more favorable to the policyholder than the permanently guaranteed rates; and

(C) Other items as specified by the Commissioner in subsequent guidance published in the Internal Revenue Bulletin.

(iii) *Exception for contracts restructured by a court supervised rehabilitation* *or similar proceeding.* No amount is included in the gross amount of premiums and other consideration with respect to any change made to the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits of contracts of an insurance company that is the subject of a rehabilitation, conservatorship, insolvency, or similar state proceeding. This treatment applies only if the change—

(A) Occurs as part of the rehabilitation, conservatorship, insolvency, or similar state proceeding; and

(B) Is approved by the state court, the state insurance department, or other state official with authority to act in the rehabilitation, conservatorship, insolvency, or similar state proceeding.

(4) *Value of the contract*—(i) *In general.* For purposes of paragraph (c)(2) or (c)(3) of this section, the value of the new contract is established through the most recent sale by the company of a comparable contract. If the value of the new contract is not readily ascertainable, the value may be approximated by using the interpolated terminal reserve of the original contract as of the date of the exchange.

(ii) *Special rule for group term life insurance contracts.* In the case of any exchange involving a group term life insurance contract without cash value, the value of the new contract is deemed to be zero.

(iii) *Special rule for certain policy enhancement and update programs*—(A) *In general.* If the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits of a specified insurance contract are changed pursuant to a policy enhancement or update program, the value of the contract included in the gross amount of premiums and other consideration equals 30 percent of the value determined under paragraph (c)(4) of this section.

(B) *Policy enhancement or update program defined.* For purposes of paragraph (c)(4)(iii)(A) of this section, a policy enhancement or update program means any offer or commitment by the insurance company to all of the policyholders holding a particular policy form to change the interest, mortality, morbidity, or expense guarantees used to determine the contract's nonforfeiture benefits.

(5) *Example.* The principles of this paragraph (c) are illustrated by the following example.

Example. (i) An individual (A) owns a life insurance policy issued by a life insurance company (L1). On January 1, 1993, A purchases additional term insurance for $250, which is added as a rider to A's life insurance policy. The purchase of the additional term insurance does not change the interest mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided by A's life insurance policy.

(ii) A's purchase of the term insurance rider is not considered to result in a fundamentally different contract under paragraph (c)(3) of this section because the addition of the rider did not change the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture values of A's original life insurance policy. Therefore, L1 includes only the $250 received from A in the gross amount of premiums and other consideration.

(d) *Amounts excluded from the gross amount of premiums and other consideration*—(1) *In general.* The following items are not included in the gross amount of premiums and other consideration—

(i) Items treated by section 808(e) as policyholder dividends that are paid to the policyholder and immediately returned to the insurance company as a premium on the same contract that generated the dividends, including—

(A) A policyholder dividend applied to pay a premium under the contract that generated the dividend;

(B) Excess interest accumulated within the contract;

(C) A policyholder dividend applied for additional coverage (for example, a paid-up addition, extension of the period for which insurance protection is provided, or reduction of the period for which premiums are paid) on the contract that generated the dividend;

(D) A policyholder dividend applied to reduce premiums otherwise payable on the contract that generated the dividend;

(E) An experience-rated refund applied to pay a premium on the group contract that generated the refund; and

(F) An experience-rated refund applied to a premium stabilization reserve held with respect to the group contract that generated the refund;

(ii) Premiums waived as a result of the disability of an insured or the disability or death of a premium payor;

(iii) Premiums considered to be paid on a contract as the result of a partial surrender or withdrawal from the contract, or as a result of the surrender or withdrawal of a paid-up addition previously issued with respect to the same contract; and

(iv) Amounts treated as premiums upon the selection by a policyholder or by a beneficiary of a settlement option provided in a life insurance contract.

(2) *Amounts received or accrued from a guaranty association.* Amounts received or accrued from a guaranty association relating to an insurance company that is subject to an insolvency, delinquency, conservatorship, rehabilitation, or similar proceeding are not included in the gross amount of premiums and other consideration.

(3) *Exclusion not to apply to dividend accumulations.* For purposes of section 848(d)(3) and paragraph (d)(1) of this section, amounts applied from a dividend accumulation account to pay premiums on a specified insurance contract are not amounts treated as paid to, and immediately returned by, the policyholder.

(e) *Return premiums.* For purposes of section 848(d)(1)(B) and this section, return premiums do not include policyholder dividends (as defined in section 808), claims or benefits payments, or amounts returned to another insurance company under a reinsurance agreement. For the treatment of amounts returned to another insurance company under a reinsurance agreement, see paragraph (f) of this section.

(f) *Net consideration for a reinsurance agreement*—(1) *In general.* For purposes of section 848, the ceding company and the reinsurer must treat amounts arising from the reinsurance of a specified insurance contract consistently in determining their net premiums. See paragraph (g) of this section for restrictions on the amount of the net negative consideration for any reinsurance agreement that may be taken into account. See paragraph (h) of this section for special rules applicable to reinsurance agreements with parties not subject to United States taxation.

(2) *Net consideration determined by a ceding company*—(i) *In general.* The net consideration determined by a ceding company for a reinsurance agreement equals—

(A) The gross amount incurred by the reinsurer with respect to the reinsurance agreement, including any ceding commissions, annual allowances, reimbursements of claims and benefits, modified coinsurance reserve adjustments under paragraph (f)(5) of this section, experience-rated adjustments, and termination payments; less

(B) The gross amount of premiums and other consideration incurred by the ceding company with respect to the reinsurance agreement.

(ii) *Net negative and net positive consideration.* If the net consideration is less than zero, the ceding company has net negative consideration for the reinsurance agreement. If the net consideration is greater than zero, the ceding company has net positive consideration for the reinsurance agreement.

(3) *Net consideration determined by the reinsurer*—(i) *In general.* The net consideration determined by a reinsurer for a reinsurance agreement equals—

(A) The amount described in paragraph (f)(2)(i)(B) of this section; less

(B) The amount described in paragraph (f)(2)(i)(A) of this section.

(ii) *Net negative and net positive consideration.* If the net consideration is less than zero, the reinsurer has net negative consideration for the reinsurance agreement. If the net consideration is greater than zero, the reinsurer has net positive consideration for the reinsurance agreement.

(4) *Timing consistency required.* For purposes of determining the net consideration of a party for a reinsurance agreement, an income or expense item is taken into account for the first taxable year for which the item is required to be taken into account by either party. Thus, the ceding company and the reinsurer must take the item into account for the same taxable year (or for the same period if the parties have different taxable years).

(5) *Modified coinsurance and funds-withheld reinsurance agreements*—(i) *In*

general. In the case of a modified coinsurance or funds-withheld reinsurance agreement, the net consideration for the agreement includes the amount of any payments or reserve adjustments, as well as any related loan transactions between the ceding company and the reinsurer. The amount of any investment income transferred between the parties as the result of a reserve adjustment or loan transaction is treated as an item of consideration under the reinsurance agreement.

(ii) *Special rule for certain funds-withheld reinsurance agreements.* In the case of a funds-withheld reinsurance agreement that is entered into after November 14, 1991, but before the first day of the first taxable year beginning after December 31, 1991, and is terminated before January 1, 1995, the parties' net consideration in the year of termination must include the amount of the original reserve for any reinsured specified insurance contract that, in applying the provisions of subchapter L, was treated as premiums and other consideration incurred for reinsurance for the taxable year in which the agreement became effective.

(6) *Treatment of retrocessions.* For purposes of this paragraph (f), a retrocession agreement is treated as a separate reinsurance agreement. The party that is relieved of liability under a retrocession agreement is treated as the ceding company.

(7) *Mixed reinsurance agreement.* If a reinsurance agreement includes more than one category of specified insurance contracts (or specified insurance contracts and contracts that are not specified insurance contracts), the portion of the agreement relating to each category of reinsured specified insurance contracts is treated as a separate agreement. The portion of the agreement relating to reinsured contracts that are not specified insurance contracts is similarly treated as a separate agreement.

(8) *Treatment of policyholder loans.* For purposes of determining the net consideration under a reinsurance agreement, the transfer of a policyholder loan receivable is treated as an item of consideration under the agreement. The interest credited with respect to a policyholder loan receivable is treated as investment income earned directly by the party holding the receivable. The amounts taken into account as claims and benefit reimbursements under the agreement must be determined without reduction for the policyholder loan.

(9) *Examples.* The principles of this paragraph (f) are illustrated by the following examples.

Example 1. On July 1, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement whereby L2 becomes solely liable to the policyholders under the contracts reinsured. L1 and L2 are calendar year taxpayers. Under the assumption reinsurance agreement, L1 agrees to pay L2 $100,000 for assuming the life insurance contracts, and L2 agrees to pay L1 a $17,000 ceding commission. Under paragraph (f)(2) of this section, L1 has net negative consideration of ($83,000) ($17,000 ceding commission incurred by L2—$100,000 incurred by L1 for reinsurance). Under paragraph (f)(3) of this section, L2 has net positive consideration of $83,000. Under paragraph (b)(1)(ii) of this section, L2 includes the net positive consideration in its gross amount of premiums and other consideration.

Example 2. (i) On July 1, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement whereby L1 remains liable to the policyholders under the reinsured contracts. L1 and L2 are calendar year taxpayers. Under the indemnity reinsurance agreement, L1 agrees to pay L2 $100,000 for reinsuring the life insurance contracts, and L2 agrees to pay L1 a $17,000 ceding commission. L1 agrees to pay L2 an amount equal to the future premiums on the reinsured contracts. L2 agrees to indemnify L1 for claims and benefits and administrative expenses incurred by L1 while the reinsurance agreement is in effect.

(ii) For the period beginning July 1, 1992, and ending December 31, 1992, the following income and expense items are determined with respect to the reinsured contracts:

Item	Income	Expense
Premiums	$25,000	
Death benefits		$10,000
Surrender benefits		8,000
Premium taxes and other expenses		2,000
Total		20,000

(iii) Under paragraph (f)(2) of this section, L1's net negative consideration equals ($88,000), which is determined by subtracting the $125,000 ($100,000 + $25,000) incurred by L1 from the $37,000 incurred by L2 under the reinsurance agreement ($17,000 + $10,000 + $8,000 + $2,000). L2's net positive consideration is $88,000. Under paragraph (b)(1)(ii) of this section, L2 includes the $88,000 net positive consideration in its gross amount of premiums and other consideration.

Example 3. (i) Assume that the reinsurance agreement referred to in *Example 2* is terminated on December 31, 1993. During the period from January 1, 1993 through December 31, 1993, the following income and expense items are determined with respect to the reinsured contracts:

Item	Income	Expense
Premiums	$45,000	
Death benefits		$18,000
Surrender benefits		6,000
Premium taxes and other expenses		8,000
Total		32,000

(ii) On the termination of the reinsurance agreement, L1 receives a payment of $70,000 from L2 as consideration for releasing L2 from liability with respect to the reinsured contracts.

(iii) L1's net positive consideration equals $57,000, which is the excess of the $102,000 incurred by L2 for the year ($18,000 + $6,000 + $8,000 + $70,000) over the $45,000 incurred by L1. L2's net negative consideration is ($57,000). L1 includes the net positive consideration in its gross amount of premiums and other consideration.

Example 4. (i) On January 1, 1993, an insurance company (L1) enters into a modified coinsurance agreement with another insurance company (L2), covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with an initial reinsurance premium equal to L1's reserves on the reinsured contracts at the inception of the agreement, any new premiums received with respect to the reinsured contracts, any decrease in L1's reserves on the reinsured contracts, and an amount of investment income determined by reference to L1's reserves on the reinsured contracts. L2 is charged for all claims and expenses incurred with respect to the reinsured contracts plus an amount reflecting any increase in L1's reserves. The agreement further provides that cash settlements between the parties are made at the inception and termination of the agreement, as well as at the end of each calendar year while the agreement is in effect. The cash settlement is determined by netting the sum of the amounts credited to L2 against the sum of the amounts charged to L2 with respect to the reinsured policies. L1's reserves on the reinsured policies at the inception of the reinsurance agreement are $375,000.

(ii) Under the cash settlement formula, L2 is credited with an initial reinsurance premium equal to L1's reserves on the reinsured policies ($375,000), but is charged an amount reflecting L1's policy reserve requirements ($375,000).

(iii) For the period ending December 31, 1993, L2 is also credited and charged the following amounts with respect to the reinsured contracts.

Item	Income	Expense
Premiums	$100,000	
Investment income	39,000	
Death benefits		$65,000
Increase in reserves		75,000

(iv) Under paragraph (f)(5) of this section, L2's net negative consideration for the 1993 taxable year equals ($1,000) which is determined by subtracting the sum of the amounts charged to L2 ($375,000 + $65,000 + $75,000 = $515,000) from the sum of the amounts credited to L2 ($375,000 + $100,000 + $39,000 = $514,000). L1's net positive consideration for calendar year 1993 equals $1,000. Under paragraph (b)(1)(ii) of this section, L1 includes the $1,000 net positive consideration in its gross amount of premiums and other consideration.

Example 5. (i) On January 1, 1993, an insurance company (L1) enters into a coinsurance agreement with another insurance company (L2) covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with an initial reinsurance premium equal to L1's reserves on the effective date of the agreement, any new premiums received on the reinsured contracts, but must indemnify L1 of all claims and expenses incurred with respect to the contracts. As part of the agreement, L2 makes a loan to L1 equal to the amount of the reserves on the reinsured contracts. L1's reserves on the reinsured contracts on the effective date of the agreement are $375,000. Thus, on the inception date of the reinsurance agreement, L1 transfers to L2 its note for $375,000 as consideration for reinsurance.

(ii) The reinsurance agreement between L1 and L2 is a funds-withheld reinsurance agreement. Under paragraph (f)(5) of this section, the amount of any loan transaction is taken into account in determining the parties' net consideration. At the inception of the reinsurance agreement, L2 is credited with a reinsurance premium equal to L1's reserves on the reinsured contracts ($375,000). L2's $375,000 loan to L1 is treated as an amount returned to L1 under the agreement.

(iii) For the period ending December 31, 1993, L2 is credited and charged the following amounts with respect to the reinsured contracts and the loan transaction with L1.

Item	Income	Expense
Premiums	$100,000	

Item	Income	Expense
Accrued interest	39,000	
Death benefits		$65,000
Increase in loan to L1		75,000

(iv) Under paragraph (f)(5) of this section, L2's net negative consideration for the 1993 taxable year equals ($1,000), which is determined by subtracting the sum of amounts incurred by L2 with respect to death benefits and the loan transaction ($375,000 + $65,000 + $75,000 = $515,000) from the sum of the amounts credited to L2 as reinsurance premiums and interest on the loan transaction ($375,000 + $100,000 + 39,000 = $514,000). L1's net positive consideration for calendar year 1993 equals $1,000. Under paragraph (b)(1)(ii) of this section, L1 includes the $1,000 net positive consideration in its gross amount of premiums and other consideration.

Example 6. (i) On December 31, 1993, an insurance company (L1) enters into a reinsurance agreement with another insurance company (L2) covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with L1's reserves on the reinsured contracts on the effective date of the agreement, plus any new premiums received on the reinsured contracts, but must indemnify L1 for all claims and expenses incurred with respect to the contracts. Under the agreement, L1 transfers cash of $325,000 to L2 plus rights to its policyholder loan receivables on the reinsured contracts ($50,000). L2 reports the reinsurance agreement by including the transferred policyholder loan receivables as an asset on its books.

(ii) For the period beginning January 1, 1994 and ending December 31, 1994, the following income and expense items are incurred with respect to the reinsured contracts.

Item	Income	Expense
Premiums	$100,000	
Death benefits		$25,000
Surrender benefits		5,000
Premium taxes and other expenses		8,000
Total		38,000

(iii) These amounts are net of the outstanding policyholder loans held by L2 of $20,000 with respect to death benefits and $15,000 with respect to surrender benefits.

(iv) Under paragraph (f)(8) of this section, the transferred policyholder loan receivables are treated as an item of consideration under the reinsurance agreement. In determining the parties' net consideration for the agreement, the transferred policyholder loan receivables ($50,000) are treated as an item of consideration incurred by L1 under paragraph (f)(2)(i)(B) of this section. Therefore, for the 1993 taxable year, L1 has net negative consideration of ($375,000). L2 has net positive consideration of $375,000. Under paragraph (b)(1)(ii) of this section, L2 includes the $375,000 net positive consideration in its gross amount of premiums and other consideration.

(v) For the 1994 taxable year, L2 has net positive consideration for the reinsurance agreement of $62,000 before adjustment for the transferred policyholder loans. Under paragraph (f)(8) of this section, the amounts taken into account as claim and benefit payments must be adjusted by the amount of any transferred policyholder loan receivables which are netted against the reinsurer's claim and benefit reimbursements. Therefore, L2 takes into account $45,000 ($25,000+$20,000=$45,000) as reimbursements for death benefits, and $20,000 ($5,000+$15,000=$20,000) as reimbursements for surrender benefits. After adjustment for these items, L2 has net positive consideration of $27,000, which is determined by subtracting the sum of the amounts charged to L2 ($45,000+$20,000+$8,000=$73,000) from the sum of the amounts credited to L2 ($100,000). L1 has net negative consideration of ($27,000) under the agreement. Under paragraph (b)(1)(ii) of this section, L2 includes the $27,000 net positive consideration in its gross amount of premiums and other consideration. The amount of any interest earned on the policyholder loan receivables after their transfer to L2 is treated as investment income earned directly by L2, and is not taken into account as an item of consideration under the agreement.

(g) *Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements*—(1) *In general.* Paragraph (g)(3) of this section provides for a reduction in the amount of net negative consideration that a party to a reinsurance agreement (other than a reinsurance agreement described in paragraph (h)(2) of this section) may take into account in determining net premiums under paragraph (a)(2)(ii) of this section if the party with net positive consideration has a capitalization shortfall (as defined in paragraph (g)(4) of this section). Unless the party with net negative consideration demonstrates that the party with net positive consideration does not have a capitalization shortfall or demonstrates the amount of the other party's capitalization shortfall which is allocable to the reinsurance agreement, the net negative consideration that may be taken into account under paragraph (a)(2)(ii) of this section is zero. However, the reduction of paragraph (g)(3) of this section does not apply to a reinsurance agreement if the parties make a joint election under paragraph (g)(8) of this section. Under the election, the party with net positive consideration capitalizes specified policy acquisition expenses with respect to the agreement without regard to the general deductions limitation of section 848(c)(1).

(2) *Application to reinsurance agreements subject to the interim rules.* In applying this paragraph (g) to a reinsurance agreement that is subject to the interim rules of §1.848–3, the term ''premiums and other consideration incurred for reinsurance under section 848(d)(1)(B)'' is substituted for ''net negative consideration,'' and the term ''gross amount of premiums and other consideration under section 848(d)(1)(A)'' is substituted for ''net positive consideration.'' If an insurance company has ''premiums and other consideration incurred for reinsurance under section 848(d)(1)(B)'' and a ''gross amount of premiums and other consideration under section 848(d)(1)(A)'' for the same agreement, the net of these amounts is taken into account for purposes of this paragraph (g).

(3) *Amount of reduction.* The reduction required by this paragraph (g)(3) equals the amount obtained by dividing—

(i) The portion of the capitalization shortfall (as defined in paragraph (g)(4) of this section) allocated to the reinsurance agreement under paragraph (g)(7) of this section; by

(ii) The applicable percentage set forth in section 848(c)(1) for the category of specified insurance contracts reinsured by the agreement.

(4) *Capitalization shortfall.* A ''capitalization shortfall'' equals the excess of—

(i) The sum of the required capitalization amounts (as defined in paragraph (g)(5) of this section) for all reinsurance agreements (other than reinsurance agreements for which an election has been made under paragraph (h)(3) of this section); over

(ii) The general deductions allocated to those reinsurance agreements, as determined under paragraph (g)(6) of this section.

(5) *Required capitalization amount*—(i) *In general.* The ''required capitalization amount'' for a reinsurance agreement (other than a reinsurance agreement for which an election has been made under paragraph (h)(3) of this section) equals the amount (either positive or negative) obtained by multiplying—

(A) The net positive or negative consideration for an agreement not described in paragraph (h)(2) of this section, and the net positive consideration for an agreement described in paragraph (h)(2) of this section, but for which an election under paragraph (h)(3) of this section has not been made; by

(B) The applicable percentage set forth in section 848(c)(1) for that category of specified insurance contracts.

(ii) *Special rule with respect to net negative consideration.* Solely for purposes of computing a party's required capitalization amount under this paragraph (g)(5)—

(A) If either party to the reinsurance agreement is the direct issuer of the reinsured contracts, the party computing its required capitalization amount takes into account the full amount of any net negative consideration without regard to any potential reduction under paragraph (g)(3) of this section; and

(B) If neither party to the reinsurance agreement is the direct issuer of the reinsured contracts, any net negative consideration is deemed to equal zero in computing a party's required capitalization amount except to the extent that the party with the net negative consideration establishes that the other party to that reinsurance agreement capitalizes the appropriate amount.

(6) *General deductions allocable to reinsurance agreements.* An insurance company's general deductions allocable to its reinsurance agreements equals the excess, if any, of—

(i) The company's general deductions (excluding additional amounts treated as general deductions under paragraph (g)(8) of this section); over

(ii) The amount determined under section 848(c)(1) on specified insurance contracts that the insurance company has issued directly (determined without regard to any reinsurance agreements).

(7) *Allocation of capitalization shortfall among reinsurance agreements.* The capitalization shortfall is allocated to each reinsurance agreement for which the required capitalization amount (as determined in paragraph (g)(5) of this section) is a positive amount. The portion of the capitalization shortfall allocable to each agreement equals the amount which bears the same ratio to the capitalization shortfall as the required capitalization amount for the reinsurance agreement bears to the sum of the positive required capitalization amounts.

(8) *Election to determine specified policy acquisition expenses for an agreement without regard to general deductions limitation*—(i) *In general.* The reduction specified by paragraph (g)(3) of this section does not apply if the parties to a reinsurance agreement make an election under this paragraph (g)(8). The election requires the party with net positive consideration to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation of section 848(c)(1). That party must reduce its deductions under section 805 or section 832(c) by the amount, if any, of the party's capitalization shortfall allocable to the reinsurance agreement. The additional capitalized amounts are treated as specified policy acquisition expenses attributable to premiums and other consideration on the reinsurance agreement, and are deductible in accordance with section 848(a)(2).

(ii) *Manner of making election.* To make an election under paragraph (g)(8) of this section, the ceding company and the reinsurer must include an election statement in the reinsurance agreement, either as part of the original terms of the agreement or by an addendum to the agreement. The parties must each attach a schedule to their federal income tax returns which identifies the reinsurance agreement for which the joint election under this paragraph (g)(8) has been made. The schedule must be attached to each of the parties' federal income tax returns filed for the later of—

(A) The first taxable year ending after the election becomes effective; or

(B) The first taxable year ending on or after December 29, 1992.

(iii) *Election statement.* The election statement in the reinsurance agreement must—

(A) Provide that the party with net positive consideration for the reinsurance agreement for each taxable year will capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation of section 848(a)(1);

(B) Set forth the agreement of the parties to exchange information pertaining to the amount of net consideration under the reinsurance agreement each year to ensure consistency;

(C) Specify the first taxable year for which the election is effective; and

(D) Be signed by both parties.

(iv) *Effect of election.* An election under this paragraph (g)(8) is effective for the first taxable year specified in the election statement and for all subsequent taxable years for which the reinsurance agreement remains in effect. The election may not be revoked without the consent of the Commissioner.

(9) *Example.* The principles of this paragraph (g) are illustrated by the following examples.

Example 1. (i) On December 31, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement in which L2 becomes solely liable to the policyholders on the reinsured contracts. L1 transfers $105,000 to L2 as consideration for the reinsurance of the contracts.

(ii) L1 and L2 do not make an election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. L2 has no other insurance business, and its general deductions for the taxable year are $3,500.

(iii) Under paragraph (f)(2) of this section, L1's net negative consideration is ($105,000). Under paragraph (f)(3) of this section, L2's net positive consideration is $105,000. Pursuant to paragraph (b)(1)(ii) of this section, L2 includes the net positive consideration in its gross amount of premiums and other consideration.

(iv) The required capitalization amount under paragraph (g)(5) of this section for the reinsurance agreement is $8,085 ($105,000 × .077). L2's general deductions, all of which are allocable to the reinsurance agreement with L1, are $3,500. The $4,585 difference between the required capitalization amount ($8,085) and the general deductions allocable to the reinsurance agreement ($3,500) represents L2's capitalization shortfall under paragraph (g)(4) of this section.

(v) Since L2 has a capitalization shortfall allocable to the agreement, the rules of paragraph (g)(1) of this section apply for purposes of determining the amount by which L1 may reduce its net premiums. Under paragraph (g)(3) of this section, L1 must reduce the amount of net negative consideration that it takes into account under paragraph (a)(2)(ii) of this section by $59,545 ($4,585/.077). Thus, of the $105,000 net negative consideration under the reinsurance agreement, L1 may take into account only $45,455 as a reduction of its net premiums.

Example 2. The facts are the same as *Example 1,* except that L1 and L2 make the election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. Pursuant to this election, L2 must capitalize as specified policy acquisition expenses an amount equal to $8,085 ($105,000 × .077). L1 may reduce its net premiums by the $105,000 of net negative consideration.

Example 3. (i) A life insurance company (L1) is both a direct issuer and a reinsurer of life insurance and annuity contracts. For 1993, L1's net premiums under section 848 (d)(1) for directly issued individual life insurance and annuity contracts are as follows:

Category	Net premiums
Life insurance contracts	$17,000,000
Annuity contracts	8,000,000

(ii) L1's general deductions for 1993 are $1,500,000.

(iii) For 1993, L1 is a reinsurer under four separate indemnity reinsurance agreements with unrelated insurance companies (L2, L3, L4, and L5). The agreements with L2, L3, and L4 cover life insurance contracts issued by those companies. The agreement with L5 covers annuity contracts issued by L5, The parties to the reinsurance agreements have not made the election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to these agreements without regard to the general deductions limitation.

(iv) L1's net consideration for 1993 with respect to its reinsurance agreements is as follows:

Agreement	Net consideration
L2	$1,200,000
L3	(350,000)
L4	300,000
L5	600,000

(v) To determine whether a reduction under paragraph (g)(3) of this section applies with respect to these reinsurance agreements, L1 must determine the required capitalization amounts for its reinsurance agreements and the amount of its general deductions allocable to these agreements.

(vi) Pursuant to paragraph (g)(5) of this section, the required capitalization amount for each reinsurance agreement is determined as follows:

L2	$1,200,000×.077=$92,400
L3	($350,000)×.077=($26,950)
L4	$300,000×.077=$23,100
L5	$600,000×.0175=$10,500

(vii) Thus, the sum of L1's required capitalization amounts on its reinsurance agreements equals $99,050.

(viii) Pursuant to paragraph (g)(6) of this section, L1 determines its general deductions allocable to its reinsurance agreements. The amount determined under section 848(c)(1) on its directly issued contracts is:

REQUIRED CAPITALIZATION AMOUNT

Category:		
Annuity contracts	$8,000,000×.0175 =	$140,000
Life insurance contracts	$17,000,000×.077 =	1,309,000
		$1,449,000

(ix) L1's general deductions allocable to its reinsurance agreements are $51,000 ($1,500,000 − $1,449,000).

(x) Pursuant to paragraph (g)(4) of this section, L1's capitalization shortfall equals $48,050, reflecting the excess of L1's required capitalization amounts for its reinsurance agreements ($99,050) over the general deductions allocable to its reinsurance agreements ($51,000).

(xi) Pursuant to paragraph (g)(7) of this section, the capitalization shortfall of $48,050 must be allocated between each of L1's reinsurance agreements with net positive consideration in proportion to their respective required capitalization amounts. The allocation of the shortfall between L1's reinsurance agreements is determined as follows:

L2=$35,237 ($48,050×92,400/126,000)
L4=$8,809 ($48,050×23,100/126,000)
L5=$4,004 ($48,050×10,500/126,000)

(xii) Accordingly, the reduction under paragraph (g)(3) of this section that applies to the amount of net negative consideration that may be taken into account by L2, L4, and L5 under paragraph (a)(1)(ii)(B) of this section is determined as follows:

L2=$457,623 ($35,237/.077)
L4=$114,403 ($8,809/.077)

L5=$228,800 ($4,004/.0175)

Example 4. The facts are the same as *Example 3,* except that L1 and L4 make a joint election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. Pursuant to this election, L1 must reduce its deductions under section 805 by an amount equal to the capitalization shortfall allocable to the reinsurance agreement with L4 ($8,809). L1 treats the additional capitalized amounts as specified policy acquisition expenses allocable to premiums and other consideration under the agreement. L4 may reduce its net premiums by the $300,000 net negative consideration. The election by L1 and L4 does not change the amount of the capitalization shortfall allocable under paragraph (g)(7) of this section to the reinsurance agreements with L2 and L5. Thus, the reduction required by paragraph (g)(3) of this section with respect to the amount of the net negative consideration that L2 and L5 may recognize under paragraph (a)(2)(ii) of this section is $457,623 and $228,800, respectively.

(h) *Treatment of reinsurance agreements with parties not subject to U.S. taxation*—(1) *In general.* Unless an election under paragraph (h)(3) of this section is made, an insurance company may not reduce its net premiums by the net negative consideration for the taxable year (or, with respect to a reinsurance agreement that is subject to the interim rules of § 1.848–3, by the premiums and other consideration incurred for reinsurance) under a reinsurance agreement to which this paragraph (h) applies.

(2) *Agreements to which this paragraph (h) applies*—(i) *In general.* This paragraph (h) applies to a reinsurance agreement if, with respect to the premiums and other consideration under the agreement, one party to that agreement is subject to United States taxation and the other party is not.

(ii) *Parties subject to U.S. taxation*—(A) *In general.* A party is subject to United States taxation for this purpose if the party is subject to United States taxation either directly under the provisions of subchapter L of chapter 1 of the Internal Revenue Code (subchapter L), or indirectly under the provisions of subpart F of part III of subchapter N of chapter 1 of the Internal Revenue Code (subpart F).

(B) *Effect of a closing agreement.* If a reinsurer agrees in a closing agreement with the Internal Revenue Service to be subject to tax under rules equivalent to the provisions of subchapter L on its premiums and other consideration from reinsurance agreements with parties subject to United States taxation, the reinsurer is treated as an insurance company subject to tax under subchapter L.

(3) *Election to separately determine the amounts required to be capitalized for reinsurance agreements with parties not subject to U.S. taxation*—(i) *In general.* This paragraph (h)(3) authorizes an insurance company to make an election to separately determine the amounts required to be capitalized for the taxable year with respect to reinsurance agreements with parties that are not subject to United States taxation. If this election is made, an insurance company separately determines a net foreign capitalization amount for the taxable year for all reinsurance agreements to which this paragraph (h) applies.

(ii) *Manner of making the election.* An insurance company makes the election authorized by this paragraph (h)(3) by attaching an election statement to the federal income tax return (including an amended return) for the taxable year for which the election becomes effective. The election applies to that taxable year and all subsequent taxable years unless permission to revoke the election is obtained from the Commissioner.

(4) *Amount taken into account for purposes of determining specified policy acquisition expenses.* If for a taxable year an insurance company has a net positive foreign capitalization amount (as defined in paragraph (h)(5)(i) of this section), any portion of that amount remaining after the reduction described in paragraph (h)(7) of this section is treated as additional specified policy acquisition expenses for the taxable year (determined without regard to amounts taken into account under this paragraph (h)). A net positive capitalization amount is treated as an amount otherwise required to be capitalized for the taxable year for purposes of the reduction under section 848(f)(1)(A).

(5) *Net foreign capitalization amount*—(i) *In general.* An insurance company's net foreign capitalization amount equals the sum of the foreign capitalization amounts (netting positive and negative amounts) determined under paragraph (h)(5)(ii) of this section for each category of specified insurance contracts reinsured by agreements described in paragraph (h)(2) of this section. If the amount is less than zero, the company has a net negative foreign capitalization amount. If the amount is greater than zero, the company has a net positive foreign capitalization amount.

(ii) *Foreign capitalization amounts by category.* The foreign capitalization amount for a category of specified insurance contracts is determined by—

(A) Combining the net positive consideration and the net negative consideration for the taxable year (or, with respect to a reinsurance agreement that is subject to the interim rules of § 1.848–3, by combining the gross amount of premiums and other consideration and the premiums and other consideration incurred for reinsurance) for all agreements described in paragraph (h)(2) of this section which reinsure specified insurance contracts in that category; and

(B) Multiplying the result (either positive or negative) by the percentage for that category specified in section 848(c)(1).

(6) *Treatment of net negative foreign capitalization amount*—(i) *Applied as a reduction to previously capitalized amounts.* If for a taxable year an insurance company has a net negative foreign capitalization amount, the negative amount reduces (but not below zero) the unamortized balances of the amounts previously capitalized (beginning with the amount capitalized for the most recent taxable year) to the extent attributable to prior years' net positive foreign capitalization amounts. The amount by which previously capitalized amounts is reduced is allowed as a deduction for the taxable year.

(ii) *Carryover of remaining net negative foreign capitalization amount.* The net negative foreign capitalization amount, if any, remaining after the reduction described in paragraph (h)(6)(i) of this section is carried over to reduce a future net positive capitalization amount. The remaining net negative foreign capitalization amount may only offset a net positive foreign capitalization amount in a future year, and may not be used to reduce the amounts otherwise required to be capitalized under section 848(a) for the taxable year, or to reduce the unamortized balances of specified policy acquisition expenses from preceding taxable years, with respect to directly written business or reinsurance agreements other than agreements for which the election under paragraph (h)(3) of this section has been made.

(7) *Reduction of net positive foreign capitalization amount by carryover amounts allowed.* If for a taxable year an insurance company has a net positive foreign capitalization amount, that amount is reduced (but not below zero) by any carryover of net negative foreign capitalization amounts from preceding taxable years. Any remaining net positive foreign capitalization amount is taken into account as provided in paragraph (h)(4) of this section.

(8) *Examples.* The principles of this paragraph (h) are illustrated by the following examples.

Example 1. (i) On January 1, 1993, a life insurance company (L1) enters into a reinsurance agreement with a foreign corporation (X) covering a block of annuity contracts issued to residents of the United States. X is not subject to taxation either directly under subchapter L or indirectly under subpart F on the premiums for the reinsurance agreement with L1. L1 makes the election under paragraph (h)(3) of this section to separately determine the amounts required to be capitalized for the taxable year with respect to parties not subject to United States taxation.

(ii) For the taxable year ended December 31, 1993, L1 has net negative consideration of ($25,000) under its reinsurance agreement with X. L1 has no other reinsurance agreements with parties not subject to United States taxation.

(iii) Under paragraph (h)(5) of this section, L1's net negative foreign capitalization amount for the 1993 taxable year equals ($437.50), which is determined by multiplying L1's net negative consideration on the agreement with X ($25,000) by the percentage in section 848(c)(1) for the reinsured specified insurance contracts (1.75%). Under paragraph (h)(6)(ii) of this section, L1 carries over the net negative foreign capitalization amount of $437.50) to future taxable years. The net negative foreign capitalization amount may not be used to reduce the amounts which L1 is required to capitalize on directly written business or reinsurance agreements other than those agreements described in paragraph (h)(2) of this section.

Example 2. (i) The facts are the same as *Example 1* except that L1 terminates its reinsurance agreement with X and receives $35,000 on December 31, 1994. For the 1994 taxable year, L1 has net positive consideration of $35,000 under its agreement with X. L1 has no other reinsurance agreements with parties not subject to United States taxation.

(ii) Under paragraph (h)(5) of this section, L1's net positive net foreign capitalization amount for the 1984 taxable year equals $612.50, which is determined by multiplying the net positive consideration on the agreement with X ($35,000) by the percentage in section 848(c)(1) for the reinsured specified insurance contracts (1.75%). Under paragraph (h)(4) of this section, L1 reduces the net positive foreign capitalization amount for the taxable year by the net negative foreign capitalization amount carried over from preceding taxable years ($437.50). After this reduction, L1 includes $175 ($612.50–$437.50) as specified policy acquisition expenses for the 1994 taxable year.

(i) *Carryover of excess negative capitalization amount*—(1) *In general.* This paragraph (i) authorizes a carryover of an excess negative capitalization amount (as defined in paragraph (i)(2) of this section) to reduce amounts otherwise required to be capitalized under section 848. Paragraph (i)(4) provides special rules for the treatment of excess negative capitalization amounts of insolvent insurance companies.

(2) *Excess negative capitalization amount.* The excess negative capitalization amount with respect to a category of specified insurance contracts for a taxable year is equal to the excess of—

(A) The negative capitalization amount with respect to that category; over

(B) The amount that can be utilized under section 848(f)(1).

(3) *Treatment of excess negative capitalization amount.* The excess negative capitalization amount for a taxable year reduces the amounts that are otherwise required to be capitalized by an insurance company under section 848(c)(1) for future years.

(4) *Special rule for the treatment of an excess negative capitalization amount of an insolvent company*—(i) *When applicable.* This paragraph (i)(4) applies only for the taxable year in which an insolvent insurance company has an excess negative capitalization amount and has net negative consideration under a reinsurance agreement. See paragraph (i)(4)(v) of this section for the definition of ''insolvent.''

(ii) *Election to forego carryover of excess negative capitalization amount.* At the joint election of the insolvent insurance company and the other party to the reinsurance agreement—

(A) The insolvent insurance company reduces the excess negative capitalization amount which would otherwise be carried over under paragraph (i)(1) of this section by the amount determined under paragraph (i)(4)(iii) of this section; and

(B) The other party reduces the amount of its specified policy acquisition expenses for the taxable year by the amount determined under paragraph (i)(4)(iii) of this section.

(iii) *Amount of reduction to the excess negative capitalization amount and specified policy acquisition expenses.* To determine the reduction to the carryover of an insolvent insurance company's excess negative capitalization amount and the specified policy acquisition expenses of the other party with respect to a reinsurance agreement—

(A) Multiply the net negative consideration for each reinsurance agreement of the insolvent insurer for which there is net negative consideration for the taxable year by the appropriate percentage specified in section 848(c)(1) for the category of specified insurance contracts reinsured by the agreement;

(B) Sum the results for each agreement;

(C) Calculate the ratio between the results in paragraphs (i)(4)(iii) (A) and (B) of this section for each agreement; and

(D) Multiply that result by the increase in the excess negative capitalization amount of the insolvent insurer for the taxable year.

(iv) *Manner of making election.* To make an election under paragraph (i)(4) of this section, each party to the reinsurance agreement must attach an election statement to its federal income tax return (including an amended return) for the taxable year for which the election is effective. The election statement must identify the reinsurance agreement for which the joint election under this paragraph (i)(4) has been made, state the amount of the reduction to the insolvent insurance company's excess negative capitalization amount that is attributable to the agreement, and be signed by both parties. An election under this paragraph (i)(4) is effective for the taxable year specified in the election statement, and may not be revoked without the consent of the Commissioner.

(v) *Presumptions relating to the insolvency of an insurance company undergoing a court supervised rehabilitation or similar state proceeding.* For purposes of this paragraph (i)(4), an insurance company which is undergoing a rehabilitation, conservatorship, or similar state proceeding shall be presumed to be insolvent if the state proceeding results in—

(A) An order of the state court finding that the fair market value of the insurance company's assets is less than its liabilities;

(B) The use of funds, guarantees, or reinsurance from a guaranty association;

(C) A reduction of the policyholders' available account balances; or

(D) A substantial limitation on access to funds (for example, a partial or total moratorium on policyholder withdrawals or surrenders that applies for a period of 5 years).

(vi) *Example.* The principles of this paragraph (i)(4) are illustrated by the following example.

Example. (i) An insurance company (L1) is the subject of a rehabilitation proceeding under the supervision of a state court. The state court has made a finding that the fair market value of L1's assets is less than its liabilities. On December 31, 1993, L1 transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an assumption reinsurance agreement whereby L2 becomes solely liable to the policyholders under the contracts reinsured. Under the agreement, L1 agrees to pay L2 $2,000,000 for assuming the life insurance contracts. This negative net consideration causes L1 to incur an excess negative capitalization amount of $138,600 for the 1993 taxable year. L1 has no other reinsurance agreements for the taxable year.

(ii) As part of the reinsurance agreement, L1 and L2 agree to make an election under paragraph (i)(4) of this section. Under the election, L1 agrees to forgo the carryover of the $138,600 excess negative capitalization amount for future taxable years. L2 must include the $2,000,000 net positive consideration for the reinsurance agreement in its gross amount of premiums and other consideration. L2 reduces its specified policy acquisition expenses for the 1993 taxable year by $138,600.

(j) *Ceding commissions with respect to reinsurance of contracts other than specified insurance contracts.* A ceding commission incurred with respect to the reinsurance of an insurance contract that is not a specified insurance contract is not subject to the provisions of section 848(g).

(k) *Effective dates*—(1) *In general.* Unless otherwise specified in this paragraph, the rules of this section are effective for the taxable years of an insurance company beginning after November 14, 1991.

(2) *Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.* Section 1.848–2(g) (which provides for an adjustment to ensure consistency) is effective for—

(i) All amounts arising under any reinsurance agreement entered into after November 14, 1991; and

(ii) All amounts arising under any reinsurance agreement for taxable years beginning after December 31, 1991, without regard to the date on which the reinsurance agreement was entered into.

(3) *Net consideration rules.* Section 1.848–2(f) (which provides rules for determining the net consideration for a reinsurance agreement) applies to—

(i) Amounts arising in taxable years beginning after December 31, 1991, under a reinsurance agreement entered into after November 14, 1991; and

(ii) Amounts arising in taxable years beginning after December 31, 1994, under a reinsurance agreement entered into before November 15, 1991.

(4) *Determination of the date on which a reinsurance agreement is entered into.* A reinsurance agreement is considered entered into at the earlier of—

(i) The date of the reinsurance agreement; or

(ii) The date of a binding written agreement to enter into a reinsurance transaction if the written agreement evidences the parties' agreement on substantially all material items relating to the reinsurance transaction.

(5) *Special rule for certain reinsurance agreements with parties not subject to U.S. taxation.* The election and special rules in paragraph (h) of this section relating to the determination of amounts required to be capitalized on reinsurance agreements with parties not subject to United States taxation apply to taxable years ending on or after September 30, 1990.

(6) *Carryover of excess negative capitalization amount.* The provisions of paragraph (i) of this section, including the special rule for the treatment of excess negative capitalization amounts of insolvent insurance companies, are affected with respect to amounts arising in taxable years ending on or after September 30, 1990.

[T.D. 8456, 57 FR 61821, Dec. 29, 1992; 58 FR 7987, Feb. 11, 1993; 59 FR 947, Jan. 7, 1994]

§1.848–3 Interim rules for certain reinsurance agreements.

(a) *Scope and effective dates.* The rules of this section apply in determining net premiums for a reinsurance agreement with respect to—

(1) Amounts arising in taxable years beginning before January 1, 1992, under a reinsurance agreement entered into after November 14, 1991; and

(2) Amounts arising in taxable years beginning before January 1, 1995, under a reinsurance agreement entered into before November 15, 1991.

(b) *Interim rules.* In determining a company's gross amount of premiums and other consideration under section 848(d)(1)(A) and premiums and other consideration incurred for reinsurance under section 848(d)(1)(B), the general rules of subchapter L of the Internal Revenue Code apply with the adjustments and special rules set forth in paragraph (c) of this section. Except as provided in paragraph (c)(5) of this section (which applies to modified coinsurance transactions), the gross amount of premiums and other consideration is determined without any reduction for ceding commissions, annual allowances, reimbursements of claims and benefits, or other amounts incurred by a reinsurer with respect to reinsured contracts.

(c) *Adjustment and special rules.* This paragraph sets forth certain adjustments and special rules that apply for reinsurance agreements in determining the gross amount of premiums and other consideration under section 848(d)(1)(A) and premiums and other considerations incurred for reinsurance under section 848(d)(1)(B).

(1) *Assumption reinsurance.* The ceding company must treat the gross amount of consideration incurred with respect to an assumption reinsurance agreement as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The reinsurance must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). For rules relating to the determination and treatment of ceding commissions, see paragraph (c)(3) of this section.

(2) *Reimbursable dividends.* The reinsurer must treat the amount of policyholder dividends reimbursable to the ceding company (other than under a modified coinsurance agreement covered by paragraph (c)(5) of this section) as a return premium under section 848(d)(1)(B). The ceding company must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). The amount of any experience-related refund due the ceding company is treated as a policyholder dividend reimbursable to the ceding company.

(3) *Ceding commissions*—(i) *In general.* The reinsurer must treat ceding commissions as a general deduction. The ceding company must treat ceding commissions as non-premium related income under section 803(a)(3). The ceding company may not reduce its general deductions by the amount of the ceding commission.

(ii) *Amount of ceding commission.* For purposes of this section, the amount of a ceding commission equals the excess, if any, of—

(A) The increase in the reinsurer's tax reserves resulting from the reinsurance agreement (computed in accordance with section 807(d)); over

(B) The gross consideration incurred by the ceding company for the reinsurance agreement, less any amount incurred by the reinsurer as part of the reinsurance agreement.

(4) *Termination payments.* The reinsurer must treat the gross amount of premiums and other consideration payable as a termination payment to the ceding company (including the tax reserves on the reinsured contracts) as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The ceding company must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). This paragraph does not apply to modified coinsurance agreements.

(5) *Modified coinsurance agreements.* In the case of a modified coinsurance agreement, the parties must determine their net premiums on a net consideration basis as described in § 1.848–2(f)(5).

(D) *Examples.* The principles of this section are illustrated by the following examples.

Example 1. On July 1, 1991, an insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policy holder under the contracts reinsured. The tax reserves on the reinsured contracts are $100,000. Under the assumption reinsurance agreement, L1 pays L2 $83,000 for assuming the life insurance contracts. Under paragraph (c)(3) of this section, since the increase in L2's tax reserves ($100,000) exceeds the net consideration transferred by L1 ($83,000), the reinsurance agreement provides for a ceding commission. The ceding commission equals $17,000 ($100,000-$83,000). Under paragraph (c)(3) of this section, L1 reduces its gross amount of premiums and other consideration for the 1991 taxable year under section 848(d)(1)(B) by the $100,000 premium incurred for reinsurance, and L2 includes the $100,000 premium for reinsurance in its gross amount of premiums and other consideration under section 848(d)(1)(A). L1 treats the $17,000 ceding commission as non-premium related income and section 803 (a)(3).

Example 2. On July 1, 1991, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policyholder under the contracts reinsured. The tax reserves on the reinsured contracts are $100,000. Under the assumption reinsurance agreement, L1 pays L2 $100,000 for assuming the contracts, and L2 pays L1 a $17,000 ceding commission. Under paragraph (c)(1) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by $100,000. L2 includes $100,000 in its gross amount of premiums and other consideration under section 848(d)(1)(A). Under paragraph (c)(3) of this section, since the increase in L2's tax reserves ($100,000) exceeds the net consideration transferred by L1, the reinsurance agreement provides for a ceding commission. The ceding commission equals $17,000 ($100,000 increase in L2's tax reserves less $83,000 net consideration transferred by L1). L1 treats the $17,000 ceding commission as non-premium related income under section 803(a)(3).

Example 3. On July 1, 1991, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policyholder under the contracts reinsured. Under the assumption reinsurance agreement, L1 transfers assets of $105,000 to L2. The tax reserves on the reinsured contracts are $100,000. Under paragraph (c)(1) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by $105,000, and L2 increases its gross amount of premiums and other consideration under section 848(d)(1)(A) by $105,000. Since the net consideration transferred by L1 exceeds the increase in L2's tax reserves, there is no ceding commission under paragraph (c)(3) of this section.

Example 4. (i) On June 30, 1991, a life insurance company (L1) reinsures 40% of certain individual life insurance contracts to be issued after that date with an unrelated insurance company (L2) under an agreement whereby L1 remains directly liable to the policyholders with respect to the contracts reinsured. The agreement provides that L2 is credited with 40% of any premiums received with respect to the reinsured contracts, but must indemnify L1 for 40% of any claims, expenses, and policyholder dividends. During the period from July 1 through December 31, 1991, L1 has the following income and expense items with respect to the reinsured policies:

Item	Income	Expense
Premiums	$8,000	
Benefits paid		$1,000
Commissions		6,000
Policyholder dividends		500
Total		7,500

(ii) Under paragraphs (b) and (c)(2) of this section, L1 includes $8,200 in its gross amount of premiums and other consideration under section 848(d)(1)(A) ($8,000 gross premiums on the reinsured contracts plus $200 of policyholder dividends reimbursed by L2 ($500 × 40%). L1 reduces its gross amount of premiums and other consideration by $3,200 (40% × $8,000) as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The benefits and commissions incurred by L1 with respect to the reinsured contracts do not reduce L1's gross amount of premiums and other consideration under section 848(d)(1)(B). L2 includes $3,200 in its gross amount of premiums and other consideration (40% × $8,000) and is treated as having paid return premiums of $200 (the amount of reimbursable dividends paid to L1). L2 is also treated as having incurred the following expenses with respect to the reinsured contracts: $400 as benefits paid (40% × $1,000) and $2,400 as commissions expense (40% × $6,000). Under paragraph (b) of this section, these expenses do not reduce L2's gross amount of premiums and other consideration under section 848(d)(1)(A).

Example 5. On December 31, 1991, an insurance company (L1) terminates a reinsurance agreement with an unrelated insurance company (L2). The termination applies to a reinsurance agreement under which L1 had ceded 40% of its liability on a block of individual life insurance contracts to L2. Upon termination of the reinsurance agreement, L2 makes a final payment of $116,000 to L1 for assuming full liability under the contracts. The tax reserves attributable to L2's portion of the reinsured contracts are $120,000. Under paragraph (c)(4) of this section, L2 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by $120,000. L1 includes $120,000 in its gross amount of premiums and other consideration under section 848(d)(1)(A).

Example 6. (i) On June 30, 1991, an insurance company (L1) reinsures 40% of its existing life insurance contracts with an unrelated life insurance company (L2) under a modified coinsurance agreement. For the period July 1, 1991 through December 31, 1991, L1 reports the following income and expense items with respect to L2's 40% share of the reinsured contracts:

Item	Income	Expense
Premiums	$10,000	
Benefits paid	....	$4,000
Policyholder dividends	....	500
Reserve adjustment	....	1,500
Total	....	6,000

(ii) Pursuant to paragraph (c)(5) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by the $4,000 net consideration for the modified coinsurance agreement ($10,000–$6,000). L2 includes the $4,000 net consideration in its gross amount of premiums and other consideration under section 848(d)(1)(A).

[T.D. 8456, 57 FR 61829, Dec. 29, 1992]

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES

Normal Taxes and Surtaxes (Continued)

REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS

Sec.
1.851–1 Definition of regulated investment company.
1.851–2 Limitations.
1.851–3 Rules applicable to section 851(b)(4).
1.851–4 Determination of status.
1.851–5 Examples.
1.851–6 Investment companies furnishing capital to development corporations.
1.851–7 Certain unit investment trusts.
1.852–1 Taxation of regulated investment companies.
1.852–2 Method of taxation of regulated investment companies.
1.852–3 Investment company taxable income.
1.852–4 Method of taxation of shareholders of regulated investment companies.
1.852–5 Earnings and profits of a regulated investment company.
1.852–6 Records to be kept for purpose of determining whether a corporation claiming to be a regulated investment company is a personal holding company.
1.852–7 Additional information required in returns of shareholders.
1.852–8 Information returns.
1.852–9 Special procedural requirements applicable to designation under section 852(b)(3)(D).
1.852–10 Distributions in redemption of interests in unit investment trusts.
1.852–11 Treatment of certain losses attributable to periods after October 31 of a taxable year.
1.852–12 Non-RIC earnings and profits.
1.853–1 Foreign tax credit allowed to shareholders.
1.853–2 Effect of election.
1.853–3 Notice to shareholders.
1.853–4 Manner of making election.
1.854–1 Limitations applicable to dividends received from regulated investment company.
1.854–2 Notice to shareholders.
1.854–3 Definitions.
1.855–1 Dividends paid by regulated investment company after close of taxable year.

REAL ESTATE INVESTMENT TRUSTS

1.856–0 Revenue Act of 1978 amendments not included.
1.856–1 Definition of real estate investment trust.
1.856–2 Limitations.
1.856–3 Definitions.
1.856–4 Rents from real property.
1.856–5 Interest.
1.856–6 Foreclosure property.
1.856–7 Certain corporations, etc., that are considered to meet the gross income requirements.
1.856–8 Revocation or termination of election.
1.857–1 Taxation of real estate investment trusts.
1.857–2 Real estate investment trust taxable income and net capital gain.
1.857–3 Net income from foreclosure property.
1.857–4 Tax imposed by reason of the failure to meet certain source-of-income requirements.
1.857–5 Net income and loss from prohibited transactions.
1.857–6 Method of taxation of shareholders of real estate investment trusts.
1.857–7 Earnings and profits of a real estate investment trust.
1.857–8 Records to be kept by a real estate investment trust.
1.857–9 Information required in returns of shareholders.
1.857–10 Information returns.
1.857–11 Non-REIT earnings and profits.
1.858–1 Dividends paid by a real estate investment trust after close of taxable year.
1.860–1 Deficiency dividends.
1.860–2 Requirements for deficiency dividends.
1.860–3 Interest and additions to tax.
1.860–4 Claim for credit or refund.
1.860–5 Effective date.
1.860A–0 Outline of REMIC provisions.
1.860A–1 Effective dates and transition rules.
1.860C–1 Taxation of holders of residual interests.
1.860C–2 Determination of REMIC taxable income or net loss.
1.860D–1 Definition of a REMIC.
1.860E–1 Treatment of taxable income of a residual interest holder in excess of daily accruals.
1.860E–2 Tax on transfers of residual interests to certain organizations.
1.860F–1 Qualified liquidations.
1.860F–2 Transfers to a REMIC.
1.860F–4 REMIC reporting requirements and other administrative rules.
1.860G–1 Definition of regular and residual interests.
1.860G–2 Other rules.
1.860G–3 Treatment of foreign persons.

TAX BASED ON INCOME FROM SOURCES WITHIN OR WITHOUT THE UNITED STATES

DETERMINATION OF SOURCES OF INCOME

1.861–1 Income from sources within the United States.
1.861–2 Interest.
1.861–3 Dividends.
1.861–4 Compensation for labor or personal services.
1.861–5 Rentals and royalties.
1.861–6 Sale of real property.
1.861–7 Sale of personal property.
1.861–8 Computation of taxable income from sources within the United States and from other sources and activities.
1.861–8T Computation of taxable income from sources within the United States and from other sources and activities (temporary).
1.861–9T Allocation and apportionment of interest expense (temporary regulations).
1.861–10 Special allocations of interest expense.
1.861–10T Special allocations of interest expense (temporary regulations).
1.861–11T Special rules for allocating and apportioning interest expense of an affiliated group of corporations (temporary regulations).
1.861–12T Characterization rules and adjustments for certain assets (temporary regulations).
1.861–13T Transition rules for interest expenses (temporary regulations).
1.861–14T Special rules for allocating and apportioning certain expenses (other than interest expense) of an affiliated group of corporations (temporary regulations).
1.861–15 Income from certain aircraft or vessels first leased on or before December 28, 1980.
1.861–16 Income from certain craft first leased after December 28, 1980.
1.861–17 Allocation and apportionment of research and experimental expenditures.
1.861–18 Classification of transactions involving computer programs.
1.862–1 Income specifically from sources without the United States.
1.863–0 Table of contents.
1.863–1 Allocation of gross income under section 863(a).
1.863–2 Allocation and apportionment of taxable income.
1.863.3 Allocation and apportionment of income from certain sales of inventory.

REGULATIONS APPLICABLE TO TAXABLE YEARS PRIOR TO DECEMBER 30, 1996

1.863–3A Income from the sale of personal property derived partly from within and partly from without the United States.
1.863–3AT Income from the sale of personal property derived partly from within and partly from without the United States (temporary regulations).
1.863–4 Certain transportation services.
1.863–6 Income from sources within a foreign country or possession of the United States.
1.863–7 Allocation of income attributable to certain notional principal contracts under section 863(a).
1.864–1 Meaning of sale, etc.
1.864–2 Trade or business within the United States.
1.864–3 Rules for determining income effectively connected with U.S. business of nonresident aliens or foreign corporations.
1.864–4 U.S. source income effectively connected with U.S. business.
1.864–5 Foreign source income effectively connected with U.S. business.
1.864–6 Income, gain, or loss attributable to an office or other fixed place of business in the United States.
1.864–7 Definition of office or other fixed place of business.
1.864–8T Treatment of related person factoring income (temporary).
1.865–1T Loss with respect to personal property other than stock (temporary).
1.865–2 Loss with respect to stock.
1.865–2T Loss with respect to stock (temporary).

NONRESIDENT ALIENS AND FOREIGN CORPORATIONS

NONRESIDENT ALIEN INDIVIDUALS

1.871–1 Classification and manner of taxing alien individuals.
1.871–2 Determining residence of alien individuals.
1.871–3 Residence of alien seamen.
1.871–4 Proof of residence of aliens.
1.871–5 Loss of residence by an alien.
1.871–6 Duty of withholding agent to determine status of alien employees.
1.871–7 Taxation of nonresident alien individuals not engaged in U.S. business.
1.871–8 Taxation of nonresident alien individuals engaged in U.S. business or treated as having effectively connected income.
1.871–9 Nonresident alien students or trainees deemed to be engaged in U.S. business.
1.871–10 Election to treat real property income as effectively connected with U.S. business.
1.871–11 Gains from sale or exchange of patents, copyrights, or similar property.
1.871–12 Determination of tax on treaty income.
1.871–13 Taxation of individuals for taxable year of change of U.S. citizenship or residence.

1.871–14 Rules relating to repeal of tax on interest of nonresident alien individuals and foreign corporations received from certain portfolio debt investments.
1.872–1 Gross income of nonresident alien individuals.
1.872–2 Exclusions from gross income of nonresident alien individuals.
1.873–1 Deductions allowed nonresident alien individuals.
1.874–1 Allowance of deductions and credits to nonresident alien individuals.
1.875–1 Partnerships.
1.875–2 Beneficiaries of estates or trusts.
1.876–1 Alien residents of Puerto Rico.
1.879–1 Treatment of community income.

FOREIGN CORPORATIONS

1.881–0 Table of contents.
1.881–1 Manner of taxing foreign corporations.
1.881–2 Taxation of foreign corporations not engaged in U.S. business.
1.881–3 Conduit financing arrangements.
1.881–4 Recordkeeping requirements concerning conduit financing arrangements.
1.882–0 Table of contents.
1.882–1 Taxation of foreign corporations engaged in U.S. business or of foreign corporations treated as having effectively connected income.
1.882–2 Income of foreign corporations treated as effectively connected with U.S. business.
1.882–3 Gross income of a foreign corporation.
1.882–4 Allowance of deductions and credits to foreign corporations.
1.882–5 Determination of interest deduction.
1.883–1 Exclusions from gross income of foreign corporations.
1.884–0 Overview of regulation provisions for section 884.
1.884–1 Branch profits tax.
1.884–2 Special rules for termination or incorporation of a U.S. trade or business or liquidation or reorganization of a foreign corporation or its domestic subsidiary.
1.884–2T Special rules for termination or incorporation of a U.S. trade or business or liquidation or reorganization of a foreign corporation or its domestic subsidiary (temporary).
1.884–3T Coordination of branch profits tax with second–tier withholding (temporary). [Reserved]
1.884–4 Branch-level interest tax.
1.884–5 Qualified resident.

MISCELLANEOUS PROVISIONS

1.891 Statutory provisions; doubling of rates of tax on citizens and corporations of certain foreign countries.
1.892–1T Purpose and scope of regulations (temporary regulations).
1.892–2T Foreign government defined (temporary regulations).
1.892–3T Income of foreign governments (temporary regulations).
1.892–4T Commercial activities (temporary regulations).
1.892–5T Controlled commercial entity (temporary regulations).
1.892–6T Income of international organizations (temporary regulations).
1.892–7T Relationship to other Internal Revenue Code sections (temporary regulations).
1.893–1 Compensation of employees of foreign governments or international organizations.
1.894–1 Income affected by treaty.
1.894–1T Income affected by treaty (temporary).
1.895–1 Income derived by a foreign central bank of issue, or by Bank for International Settlements, from obligations of the United States or from bank deposits.
1.897–1 Taxation of foreign investment in United States real property interests, definition of terms.
1.897–2 United States real property holding corporations.
1.897–3 Election by foreign corporation to be treated as a domestic corporation under section 897(i).
1.897–4AT Table of contents (temporary).
1.897–5T Corporate distributions (temporary).
1.897–6T Nonrecognition exchanges applicable to corporations, their shareholders, and other taxpayers, and certain transfers of property in corporate reorganizations (temporary).
1.897–7T Treatment of certain partnership interests as entirely U.S. real property interests under sections 897(g) and 1445(e) (temporary).
1.897–8T Status as a U.S. real property holding corporation as a condition for electing section 897(i) pursuant to §1.897–3 (temporary).
1.897–9T Treatment of certain interest in publicly traded corporations, definition of foreign person, and foreign governments and international organizations (temporary).

INCOME FROM SOURCES WITHOUT THE UNITED STATES

FOREIGN TAX CREDIT

1.901–1 Allowance of credit for taxes.
1.901–2 Income, war profits, or excess profits tax paid or accrued.
1.901–2A Dual capacity taxpayers.
1.901–3 Reduction in amount of foreign taxes on foreign mineral income allowed as a credit.
1.902–0 Outline of regulations provisions for section 902.

1.902–1 Credit for domestic corporate shareholder of a foreign corporation for foreign income taxes paid by the foreign corporation.
1.902–2 Treatment of deficits in post-1986 undistributed earnings and pre-1987 accumulated profits of a first-, second-, or third-tier corporation for purposes of computing an amount of foreign taxes deemed paid under §1.902–1.
1.902–3 Credit for domestic corporate shareholder of a foreign corporation for foreign income taxes paid with respect to accumulated profits of taxable years of the foreign corporation beginning before January 1, 1987.
1.902–4 Rules for distributions attributable to accumulated profits for taxable years in which a first-tier corporation was a less developed country corporation.
1.903–1 Taxes in lieu of income taxes.
1.904–0 Outline of regulation provisions for section 904.
1.904–1 Limitation on credit for foreign taxes.
1.904–2 Carryback and carryover of unused foreign tax.
1.904–3 Carryback and carryover of unused foreign tax by husband and wife.
1.904–4 Separate application of section 904 with respect to certain categories of income.
1.904–5 Look-through rules as applied to controlled foreign corporations and other entities.
1.904–5T Look-through rules as applied to controlled foreign corporations and other entities (temporary).
1.904–6 Allocation and apportionment of taxes.
1.904–7 Transition rules.
1.904(b)–1 Treatment of capital gains for corporations.
1.904(b)–2 Treatment of capital gains for other taxpayers.
1.904(b)–3 Sale of personal property.
1.904(b)–4 Effective date.
1.904(f)–1 Overall foreign loss and the overall foreign loss account.
1.904(f)–2 Recapture of overall foreign losses.
1.904(f)–3 Allocation of net operating losses and net capital losses.
1.904(f)–4 Recapture of foreign losses out of accumulation distributions from a foreign trust.
1.904(f)–5 Special rules for recapture of overall foreign losses of a domestic trust.
1.904(f)–6 Transitional rule for recapture of FORI and general limitation overall foreign losses incurred in taxable years beginning before January 1, 1983, from foreign source taxable income subject to the general limitation in taxable years beginning after December 31, 1982.
1.904(f)–7—1.904(f)–11 [Reserved]
1.904(f)–12 Transition rules.
1.904(i)–1 Limitation on use of deconsolidation to avoid foreign tax credit limitations.
1.905–1 When credit for taxes may be taken.
1.905–2 Conditions of allowance of credit.
1.905–3T Adjustments to the pools of foreign taxes and earnings and profits when the allowable foreign tax credit changes (temporary).
1.905–4T Notification and redetermination of United States tax liability (temporary).
1.905–5T Foreign tax redeterminations and currency translation rules for foreign tax redeterminations occurring in taxable years beginning prior to January 1, 1987 (temporary).
1.907–0 Outline of regulation provisions for section 907.
1.907(a)–0 Introduction (for taxable years beginning after December 31, 1982).
1.907(a)–1 Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982).
1.907(b)–1 Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982).
1.907(c)–1 Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982).
1.907(c)–2 Section 907(c)(3) items (for taxable years beginning after December 31, 1982).
1.907(c)–3 FOGEI and FORI taxes (for taxable years beginning after December 31, 1982).
1.907(d)–1 Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982).
1.907(e)–1 [Reserved].
1.907(f)–1 Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982).

AUTHORITY: 26 U.S.C. 7805.

Revenue Service, Treasury

REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS

§ 1.851–1 Definition of regulated investment company.

(a) *In general.* The term ‘‘regulated investment company’’ is defined to mean any domestic corporation (other than a personal holding company as defined in section 542) which meets (1) the requirements of section 851(a) and paragraph (b) of this section, and (2) the limitations of section 851(b) and § 1.851–2. As to the definition of the term ‘‘corporation’’, see section 7701(a)(3).

(b) *Requirement.* To qualify as a regulated investment company, a corporation must be:

(1) Registered at all times during the taxable year, under the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 to 80b–2), either as a management company or a unit investment trust, or

(2) A common trust fund or similar fund excluded by section 3(c)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a–3(c)) from the definition of ‘‘investment company’’ and not included in the definition of ‘‘common trust fund’’ by section 584(a).

§ 1.851–2 Limitations.

(a) *Election to be a regulated investment company.* Under the provisions of section 851(b)(1), a corporation, even though it satisfies the other requirements of part I, subchapter M, chapter 1 of the Code, for the taxable year, will not be considered a regulated investment company for such year, within the meaning of such part I, unless it elects to be a regulated investment company for such taxable year, or has made such an election for a previous taxable year which began after December 31, 1941. The election shall be made by the taxpayer by computing taxable income as a regulated investment company in its return for the first taxable year for which the election is applicable. No other method of making such election is permitted. An election once made is irrevocable for such taxable year and all succeeding taxable years.

(b) *Gross income requirement*—(1) *General rule.* Section 851(b) (2) and (3) provides that (i) at least 90 percent of the corporation's gross income for the taxable year must be derived from dividends, interest, and gains from the sale or other disposition of stocks or securities, and (ii) less than 30 percent of its gross income must have been derived from the sale or other disposition of stock or securities held for less than three months. In determining the gross income requirements under section 851(b) (2) and (3), a loss from the sale or other disposition of stock or securities does not enter into the computation. A determination of the period for which stock or securities have been held shall be governed by the provisions of section 1223 insofar as applicable.

(2) *Special rules.* (i) For purposes of section 851(b)(2), there shall be treated as dividends amounts which are included in gross income for the taxable year under section 951(a)(1)(A)(i) to the extent that (*a*) a distribution out of a foreign corporation's earnings and profits of the taxable year is not included in gross income by reason of section 959 (a)(1), and (*b*) the earnings and profits are attributable to the amounts which were so included in gross income under section 951(a)(1)(A)(i). For allocation of distributions to earnings and profits of foreign corporations, see § 1.959–3. The provisions of this subparagraph shall apply with respect to taxable years of controlled foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (within the meaning of section 951(b) within which or with which such taxable years of such controlled foreign corporations end.

(ii) For purposes of subdivision (i) of this subparagraph, if by reason of section 959(a)(1) a distribution of a foreign corporation's earnings and profits for a taxable year described in section 959(c)(2) is not included in a shareholder's gross income, then such distribution shall be allocated proportionately between amounts attributable to amounts included under each clause of section 951(a)(1)(A). Thus, for example, M is a United States shareholder in X Corporation, a controlled foreign corporation. M and X each use the calendar year as the taxable year. For 1977, M is required by section 951(a)(1)(a) to include $3,000 in its gross income, $1,000 of which is included under clause (i) thereof. In 1977, M received a distribution described in section 959(c)(2) of $2,700 out of X's earnings and profits for 1977, which is, by reason of section 959(a)(1), excluded from M's gross income. The amount of the distribution attributable to the amount included under section 951(a)(1)(A)(i) is $900, i.e., $2,700 multiplied by ($1,000/$3,000).

(c) *Diversification of investments.* (1) Subparagraph (A) of section 851(b)(4) requires that at the close of each quarter of the taxable year at least 50 percent of the value of the total assets of the taxpayer corporation be represented by one or more of the following:

(i) Cash and cash items, including receivables;

(ii) Government securities;

(iii) Securities of other regulated investment companies; or

(iv) Securities (other than those described in subdivisions (ii) and (iii) of this subparagraph) of any one or more issuers which meet the following limitations: *(a)* The entire amount of the securities of the issuer owned by the taxpayer corporation is not greater in value than 5 percent of the value of the total assets of the taxpayer corporation, and *(b)* the entire amount of the securities of such issuer owned by the taxpayer corporation does not represent more than 10 percent of the outstanding voting securities of such issuer. For the modification of the percentage limitations applicable in the case of certain venture capital investment companies, see section 851(e) and §1.851–6.

Assuming that at least 50 percent of the value of the total assets of the corporation satisfies the requirements specified in this subparagraph, and that the limiting provisions of subparagraph (B) of section 851(b)(4) and subparagraph (2) of this paragraph are not violated, the corporation will satisfy the requirements of section 851(b)(4), notwithstanding that the remaining assets do not satisfy the diversification requirements of subparagraph (A) of section 851(b)(4). For example, a corporation may own all the stock of another corporation, provided it otherwise meets the requirements of subparagraphs (A) and (B) of section 851(b)(4).

(2) Subparagraph (B) of section 851(b)(4) prohibits the investment at the close of each quarter of the taxable year of more than 25 percent of the value of the total assets of the corporation (including the 50 percent or more mentioned in subparagraph (A) of section 851(b)(4)) in the securities (other than Government securities or the securities of other regulated investment companies) of any one issuer, or of two or more issuers which the taxpayer company controls and which are engaged in the same or similar trades or businesses or related trades or businesses, including such issuers as are merely a part of a unit contributing to the completion and sale of a product or the rendering of a particular service. Two or more issuers are not considered as being in the same or similar trades or businesses merely because they are engaged in the broad field of manufacturing or of any other general classification of industry, but issuers shall be construed to be engaged in the same or similar trades or businesses if they are engaged in a distinct branch of business, trade, or manufacture in which they render the same kind of service or produce or deal in the same kind of product, and such service or products fulfill the same economic need. If two or more issuers produce more than one product or render more than one type of service, then the chief product or service of each shall be the basis for determining whether they are in the same trade or business.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4090, Apr. 28, 1962; T.D. 7555, 43 FR 32753, July 28, 1978]

§1.851–3 Rules applicable to section 851(b)(4).

In determining the value of the taxpayer's investment in the securities of any one issuer, for the purposes of subparagraph (B) of section 851(b)(4), there shall be included its proper proportion of the investment of any other corporation, a member of a controlled group, in the securities of such issuer. See example 4 in §1.851–5. For purposes of §§1.851–2, 1.851–4, 1.851–5, and 1.851–6, the terms ‘‘controls’’, ‘‘controlled group’’, and ‘‘value’’ have the meaning assigned to them by section 851(c). All other terms used in such sections have the same meaning as when used in the Investment Company Act of 1940 (15 U.S.C., chapter 2D) or that act as amended.

§1.851–4 Determination of status.

With respect to the effect which certain discrepancies between the value of its various investments and the requirements of section 851(b)(4) and paragraph (c) of §1.851–2, or the effect that the elimination of such discrepancies will have on the status of a company as a regulated investment company for purposes of part I, subchapter M, chapter 1 of the Code, see section 851(d). A company claiming to be a regulated investment company shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 851 during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

[T.D. 6598, 27 FR 4090, Apr. 28, 1962]

§ 1.851–5 Examples.

The provisions of section 851 may be illustrated by the following examples:

Example 1. Investment Company W at the close of its first quarter of the taxable year has its assets invested as follows:

	Percent
Cash	5
Government securities	10
Securities of regulated investment companies	20
Securities of Corporation A	10
Securities of Corporation B	15
Securities of Corporation C	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	20
Total	100

Investment Company W owns all of the voting stock of Corporations A and B, 15 percent of the voting stock of Corporation C, and less than 10 percent of the voting stock of the other corporations. None of the corporations is a member of a controlled group. Investment Company W meets the requirements under section 851(b)(4) at the end of its first quarter. It complies with subparagraph (A) of section 851(b)(4) since it has 55 percent of its assets invested as provided in such subparagraph. It complies with subparagraph (B) of section 851(b)(4) since it does not have more than 25 percent of its assets invested in the securities of any one issuer, or of two or more issuers which it controls.

Example 2. Investment Company V at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash	10
Government securities	35
Securities of Corporation A	7
Securities of Corporation B	12
Securities of Corporation C	15
Securities of Corporation D	21
Total	100

Investment Company V fails to meet the requirements of subparagraph (A) of section 851(b)(4) since its assets invested in Corporations A, B, C, and D exceed in each case 5 percent of the value of the total assets of the company at the close of the particular quarter.

Example 3. Investment Company X at the close of the particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	20
Securities of Corporation A	5
Securities of Corporation B	10
Securities of Corporation C	25
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	40
Total	100

Investment Company X owns more than 20 percent of the voting power of Corporations B and C and less than 10 percent of the voting power of all of the other corporations. Corporation B manufactures radios and Corporation C acts as its distributor and also distributes radios for other companies. Investment Company X fails to meet the requirements of subparagraph (B) of section 851(b)(4) since it has 35 percent of its assets invested in the securities of two issuers which it controls and which are engaged in related trades or businesses.

Example 4. Investment Company Y at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	15
Securities of Corporation K (a regulated investment company)	30
Securities of Corporation A	10
Securities of Corporation B	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	25
Total	100

Corporation K has 20 percent of its assets invested in Corporation L and Corporation L has 40 percent of its assets invested in Corporation B. Corporation A also has 30 percent of its assets invested in Corporation B, and owns more than 20 percent of the voting power in Corporation B. Investment Company Y owns more than 20 percent of the voting power of Corporations A and K. Corporation K owns more than 20 percent of the voting power of Corporation L, and Corporation L owns more than 20 percent of the voting power of Corporation L. Investment Company Y is disqualified under subparagraph (B) of section 851(b)(4) since more than 25 percent of its assets are considered invested in Corporation B as shown by the following calculation:

	Percent
Percentage of assets invested directly in Corporation B	20.0
Percentage invested through the controlled group, Y-K-L-B (40 percent of 20 percent of 30 percent)	2.4
Percentage invested in the controlled group, Y-A-B (30 percent of 10 percent)	3.0
Total percentage of assets of investment Company Y invested in Corporation B	25.4

Example 5. Investment Company Z, which keeps its books and makes its returns on the basis of the calendar year, at the close of the first quarter of 1955 meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation A. Later during the taxable year it makes distributions

to its shareholders and because of such distributions it finds at the close of the taxable year that it has more than 25 percent of its remaining assets invested in Corporation A. Investment Company Z does not lose its status as a regulated investment company for the taxable year 1955 because of such distributions, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such distributions.

Example 6. Investment Company Q, which keeps its books and makes its returns on the basis of a calendar year, at the close of the first quarter of 1955, meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation P. At the close of the taxable year 1955, it finds that it has more than 25 percent of its assets invested in Corporation P. This situation results entirely from fluctuations in the market values of the securities in Investment Company Q's portfolio and is not due in whole or in part to the acquisition of any security or other property. Corporation Q does not lose its status as a regulated investment company for the taxable year 1955 because of such fluctuations in the market values of the securities in its portfolio, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such market value fluctuations.

§1.851–6 Investment companies furnishing capital to development corporations.

(a) *Qualifying requirements.* (1) In the case of a regulated investment company which furnishes capital to development corporations, section 851 (e) provides an exception to the rule relating to the diversification of investments, made applicable to regulated investment companies by section 851(b)(4)(A). This exception (as provided in paragraph (b) of this section) is available only to registered management investment companies which the Securities and Exchange Commission determines, in accordance with regulations issued by it, and certifies to the Secretary or his delegate, not earlier than 60 days before the close of the taxable year of such investment company, to be principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available.

(2) For the purpose of the aforementioned determination and certification, unless the Securities and Exchange Commission determines otherwise, a corporation shall be considered to be principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available, for at least 10 years after the date of the first acquisition of any security in such corporation or any predecessor thereof by such investment company if at the date of such acquisition the corporation or its predecessor was principally so engaged, and an investment company shall be considered at any date to be furnishing capital to any company whose securities it holds if within 10 years before such date it had acquired any of such securities, or any securities surrendered in exchange therefor, from such other company or its predecessor.

(b) *Exception to general rule.* (1) The registered management investment company, which for the taxable year meets the requirements of paragraph (a) of this section, may (subject to the limitations of section 851(e)(2) and paragraph (c) of this section) in the computation of 50 percent of the value of its assets under section 851(b)(4)(A) and paragraph (c)(1) of §1.851–2 for any quarter of such taxable year, include the value of any securities of an issuer (whether or not the investment company owns more than 10 percent of the outstanding voting securities of such issuer) if at the time of the latest acquisition of any securities of such issuer the basis of all such securities in the hands of the investment company does not exceed 5 percent of the value of the total assets of the investment company at that time. The exception provided by section 851(e)(1) and this subparagraph is not applicable to the securities of an issuer if the investment company has continuously held any security of such issuer or of any predecessor company (as defined in paragraph (d) of this section) for 10 or more years preceding such quarter of the taxable year. The rule of section 851(e)(1) with respect to the relationship of the basis of the securities of an issuer to the value of the total assets of the investment company is, in substance, a qualification of the 5-percent limitation in section 851(b)(4)(A)(ii) and paragraph (c)(1)(iv) of § 1.851–2. All other provisions and requirements of section 851 and §§ 1.851–1 through 1.851–6 are applicable in determining whether such registered management investment company qualifies as a regulated investment company.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. (i) The XYZ Corporation, a regulated investment company, qualified under section 851(e) as an investment company furnishing capital to development corporations. On June 30, 1954, the XYZ Corporation purchased 1,000 shares of the stock of the A Corporation at a cost of $30,000. On June 30, 1954, the value of the total assets of the XYZ Corporation was $1,000,000. Its investment in the stock of the A Corporation ($30,000) comprised 3 percent of the value of its total assets, and it therefore met the requirements prescribed by section 851(b)(4)(A)(ii) as modified by section 851(e)(1).

(ii) On June 30, 1955, the value of the total assets of the XYZ Corporation was $1,500,000 and the 1,000 shares of stock of the A Corporation which the XYZ Corporation owned appreciated in value so that they were then worth $60,000. On that date, the XYZ Investment Company increased its investment in the stock of the A Corporation by the purchase of an additional 500 shares of that stock at a total cost of $30,000. The securities of the A Corporation owned by the XYZ Corporation had a value of $90,000 (6 percent of the value of the total assets of the XYZ Corporation) which exceeded the limit provided by section 851(b)(4)(A)(ii). However, the investment of the XYZ Corporation in the A Corporation on June 30, 1955, qualified under section 851(b)(4)(A) as modified by section 851(e)(1), since the basis of those securities to the investment company did not exceed 5 percent of the value of its total assets as of June 30, 1955, illustrated as follows:

Basis to the XYZ Corporation of the A Corporation's stock acquired on June 30, 1954	$30,000
Basis of the 500 shares of the A Corporation's stock acquired by the XYZ Corporation on June 30, 1955	30,000
Basis of all stock of A Corporation	60,000

Basis of stock of A Corporation ($60,000)/ Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition ($1,500,000)=4 percent

Example 2. The same facts existed as in example 1, except that on June 30, 1955, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 1,000 shares of that stock (instead of 500 shares) at a total cost of $60,000. No part of the investment of the XYZ Corporation in the A Corporation qualified under the 5 percent limitation provided by section 851(b)(4)(A) as modified by section 851(e)(1), illustrated as follows:

Basis to the XYZ Corporation of the 1,000 shares of the A Corporation's stock acquired on June 30, 1954	$30,000
Basis of the 1,000 shares of the A Corporation's stock acquired on June 30, 1955	60,000
Total	90,000

Basis of stock of A Corporation ($90,000)/ Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition ($1,500,000)= 6 percent

Example 3. The same facts existed as in example 2 and on June 30, 1956, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 100 shares of that stock at a total cost of $6,000. On June 30, 1956, the value of the total assets of the XYZ Corporation was $2,000,000 and on that date the investment in the A Corporation qualified under section 851(b)(4)(A) as modified by section 851(e)(1) illustrated as follows:

Basis to the XYZ Corporation of investments in the A Corporation's stock:	
1,000 shares acquired June 30, 1954	$30,000
1,000 shares acquired June 30, 1955	60,000
100 shares acquired June 30, 1956	6,000
Total	96,000

Basis of stock of A Corporation ($96,000)/ Value of XYZ Corporation's total assets at June 30, 1956, time of the latest acquisition ($2,000,000)=4.8 percent

(c) *Limitation.* Section 851(e) and this section do not apply in the quarterly computation of 50 percent of the value of the assets of an investment company under subparagraph (A) of section 851(b)(4) and paragraph (c)(1) of § 1.851–2 for any taxable year if at the close of any quarter of such taxable year more than 25 percent of the value of its total assets (including the 50 percent or more mentioned in such subparagraph (A)) is represented by securities (other than Government securities or the securities of other regulated investment companies) of issuers as to each of which such investment company (1) holds more than 10 percent of the outstanding voting securities of such issuer, and (2) has continuously held any security of such issuer (or any security of a predecessor of such issuer) for 10 or more years preceding such quarter, unless the value of its total assets so represented is reduced to 25 percent or less within 30 days after the close of such quarter.

(d) *Definition of predecessor company.* As used in section 851(e) and this section, the term ‘‘predecessor company’’ means any corporation the basis of whose securities in the hands of the investment company was, under the provisions of section 358 or corresponding provisions of prior law, the same in whole or in part as the basis of any of the securities of the issuer and any corporation with respect to whose securities any of the securities of the issuer were received directly or indirectly by the investment company in a transaction or series of transactions involving nonrecognition of gain or loss in whole or in part. The other terms used in this section have the same meaning as when used in section 851(b)(4). See paragraph (c) of §1.851–2 and §1.851–3.

§1.851–7 Certain unit investment trusts.

(a) *In general.* For purposes of the Internal Revenue Code, a unit investment trust (as defined in paragraph (d) of this section) shall not be treated as a person (as defined in section 7701(a)(1)) except for years ending before January 1, 1969. A holder of an interest in such a trust will be treated as directly owning the assets of such trust for taxable years of such holder which end with or within any year of the trust to which section 851(f) and this section apply.

(b) *Treatment of unit investment trust.* A unit investment trust shall not be treated as an individual, a trust estate, partnership, association, company, or corporation for purposes of the Internal Revenue Code. Accordingly, a unit investment trust is not a taxpayer subject to taxation under the Internal Revenue Code. No gain or loss will be recognized by the unit investment trust if such trust distributes a holder's proportionate share of the trust assets in exchange for his interest in the trust. Also, no gain or loss will be recognized by the unit investment trust if such trust sells the holder's proportionate share of the trust assets and distributes the proceeds from such share to the holder in exchange for his interest in the trust.

(c) *Treatment of holder of interest in unit investment trust.* (1) Each holder of an interest in a unit investment trust shall be treated (to the extent of such interest) as owning a proportionate share of the assets of the trust. Accordingly, if the trust distributes to the holder of an interest in such trust his proportionate share of the trust assets in exchange for his interest in the trust, no gain or loss shall be recognized by such holder (or by any other holder of an interest in such trust). For purposes of this paragraph, each purchase of an interest in the trust by the holder will be considered a separate interest in the trust. Items of income, gain, loss, deduction, or credit received by the trust or a custodian thereof shall be taxed to the holders of interests in the trust (and not to the trust) as though they had received their proportionate share of the items directly on the date such items were received by the trust or custodian.

(2) The basis of the assets of such trust which are treated under subparagraph (1) of this paragraph as being owned by the holder of an interest in such trust shall be the same as the basis of his interest in such trust. Accordingly, the amount of the gain or loss recognized by the holder upon the sale by the unit investment trust of the holder's pro rata share of the trust assets shall be determined with reference the basis, of his interest in the trust. Also, the basis of the assets received by the holder, if the trust distributes a holder's pro rata share of the trust assets in exchange for his interest in the trust, will be the same as the basis of his interest in the trust. If the unit investment trust sells less than all of the holder's pro rata share of the trust assets and the holder retains an interest in the trust, the amount of the gain or loss recognized by the holder upon the sale shall be determined with reference to the basis of his interest in the assets sold by the trust, and the basis of his interest in the trust shall be reduced accordingly. If the trust distributes a portion of the holder's pro rata share of the trust assets in exchange for a portion of his interest in

the trust, the basis of the assets received by the holder shall be determined with reference to the basis of his interest in the assets distributed by the trust, and the basis of his interest in the trust shall be reduced accordingly. For purposes of this subparagraph the basis of the holder's interest in assets sold by the trust or distributed to him shall be an amount which bears the same relationship to the basis of his total interest in the trust that the fair market value of the assets so sold or distributed bears to the fair market value of such total interest in the trust, such fair market value to be determined on the date of such sale or distribution.

(3) The period for which the holder of an interest in such trust has held the assets of the trust which are treated under subparagraph (1) of this paragraph as being owned by him is the same as the period for which such holder has held his interest in such trust. Accordingly, the character of the gain, loss, deduction, or credit recognized by the holder upon the sale by the unit investment trust of the holder's proportionate share of the trust assets shall be determined with reference to the period for which he has held his interest in the trust. Also, the holding period of the assets received by the holder if the trust distributes the holder's proportionate share of the trust assets in exchange for his interest in the trust will include the period for which the holder has held his interest in the trust.

(4) The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered a periodic payment plan of a unit investment trust (as defined in paragraph (d) of this section) with X Bank as custodian and Z as plan sponsor. Under this plan, upon B's demand, X must either redeem B's interest at a price substantially equal to the fair market value of the number of shares in Y, a management company, which are credited to B's account by X in connection with the unit investment trust, or at B's option distribute such shares of Y to B. B's plan provides for quarterly payments of $1,000. On October 1, 1969, B made his initial quarterly payment of $1,000 and X credited B's account with 110 shares of Y. On December 1, 1969, Y declared and paid a dividend of 25 cents per share, 5 cents of which was designated as a capital gain dividend pursuant to section 852(b)(3) and § 1.852–4. X credited B's account with $27.50 but did not distribute the money to B in 1969. On December 31, 1969, X charged B's account with $1 for custodial fees for calendar year 1969. On January 1, 1970, B paid X $1,000 and X credited B's account with 105 shares of Y. On April 1, 1970, B paid X $1,000 and X credited B's account with 100 shares of Y. B must include in his tax return for 1969 a dividend of $22 and a long-term capital gain of $5.50. In addition, B is entitled to deduct the annual custodial fee of $1 under section 212 of the Code.

(a) On April 4, 1970, at B's request, X sells the shares of Y credited to B's account (315 shares) for $10 per share and distributes the proceeds ($3,150) to B together with the remaining balance of $26.50 in B's account. The receipt of the $26.50 does not result in any tax consequences to B. B recognizes a long-term capital gain of $100 and a short- term capital gain of $50, computed as follows:

(1) B is treated as owning 110 shares of Y as of October 1, 1969. The basis of these shares is $1,000, and they were sold for $1,100 (110 shares at $10 per share). Therefore, B recognizes a gain from the sale or exchange of a capital asset held for more than 6 months in the amount of $100.

(2) B is treated as owning 105 shares of Y as of January 1, 1970, and 100 shares as of April 1, 1970. With respect to the shares acquired on April 1, 1970, there is no gain recognized as the shares were sold for $1,000, which is B's basis of the shares. The shares acquired on January 1, 1970, were sold for $1,050 (105 shares at $10 per share), and B's basis of these shares is $1,000. Therefore, B recognizes a gain of $50 from the sale or exchange of a capital asset held for not more than 6 months.

(b) On April 4, 1970, at B's request, X distributes to B the shares of Y credited to his account and $26.50 in cash. The receipt of the $26.50 does not result in any tax consequences to B. B does not recognize gain or loss on the distribution of the shares of Y to him. The bases and holding periods of B's interests in Y are as follows:

Number of shares	Date acquired	Basis
110	10–1–69	$9.09
105	1–1–70	9.52
100	4–1–70	10.00

(d) *Definition.* A unit investment trust to which this section refers is a business arrangement (other than a segregated asset account, whether or not it holds assets pursuant to a variable annuity contract, under the insurance laws or regulations of a State) which (except for taxable years ending before Jan. 1, 1969)—

(1) Is a unit investment trust (as defined in the Investment Company Act of 1940);

(2) Is registered under such Act;

(3) Issues periodic payment plan certificates (as defined in such Act) in one or more series;

(4) Possesses, as substantially all of its assets, as to all such series, securities issued by—

(i) A single management company (as defined in such Act), and securities acquired pursuant to subparagraph (5) of this paragraph, or

(ii) A single other corporation; and

(5) Has no power to invest in any other securities except securities issued by a single other management company, when permitted by such Act or the rules and regulations of the Securities and Exchange Commission.

(e) *Investment in two single management companies.* (1) A unit investment trust may possess securities issued by two or more separate single management companies (as defined in such Act) if—

(i) The trust issues a separate series of periodic payment plan certificates (as defined in such Act) with respect to the securities of each separate single management company which it possesses; and

(ii) None of the periodic payment plan certificates issued by the trust permits joint acquisition of an interest in each series nor the application of payments in whole or in part first to a series issued by one of the single management companies and then to any other series issued by any other single management company.

(2) If a unit investment trust possesses securities of two or more separate single management companies as described in subparagraph (1) of this paragraph and issues a separate series of periodic payment plan certificates with respect to the securities of each such management company, then the holder of an interest in a series shall be treated as the owner of the securities in the single management company represented by such interest.

(i) A holder of an interest in a series of periodic payment plan certificates of a trust who transfers or sells his interest in the series in exchange for an interest in another series of periodic payment plan certificates of the trust shall recognize the gain or loss realized from the transfer or sale as if the trust had sold the shares credited to his interests in the series at fair market value and distributed the proceeds of the sale to him.

(ii) The basis of the interests in the series so acquired by the holder shall be the fair market value of his interests in the series transferred or sold.

(iii) The period for which the holder has held his interest in the series so acquired shall be measured from the date of his acquisition of his interest in that series.

(f) *Cross references.* (1) For reporting requirements imposed on custodians of unit investment trusts described in this section, see §§1.852–4, 1.852–9, 1.853–3, 1.854–2, and 1.6042–2.

(2) For rules relating to redemptions of certain unit investment trusts not described in this section, see §1.852–10.

[T.D. 7187, 37 FR 13254, July 6, 1972, as amended by T.D. 7187, 37 FR 20688, Oct. 3, 1972]

§1.852–1 Taxation of regulated investment companies.

(a) *Requirements applicable thereto*—(1) *In general.* Section 852(a) denies the application of the provisions of part I, subchapter M, chapter 1 of the Code (other than section 852(c), relating to earnings and profits), to a regulated investment company for a taxable year beginning after February 28, 1958, unless—

(i) The deduction for dividends paid for such taxable year as defined in section 561 (computed without regard to capital gain dividends) is equal to at least 90 percent of its investment company taxable income for such taxable year (determined without regard to the provisions of section 852(b)(2)(D) and paragraph (d) of §1.852–3); and

(ii) The company complies for such taxable year with the provisions of §1.852–6 (relating to records required to be maintained by a regulated investment company).

See section 853(b)(1)(B) and paragraph (a) of §1.853–2 for amounts to be added to the dividends paid deduction, and section 855 and §1.855–1, relating to dividends paid after the close of the taxable year.

(2) *Special rule for taxable years of regulated investment companies beginning before March 1, 1958.* The provisions of part I of subchapter M (including section 852(c)) are not applicable to a regulated investment company for a taxable year beginning before March 1, 1958, unless such company meets the requirements of section 852(a) and subparagraph (1) (i) and (ii) of this paragraph.

(b) *Failure to qualify.* If a regulated investment company does not meet the requirements of section 852(a) and paragraph (a)(1) (i) and (ii) of this section for the taxable year, it will, even though it may otherwise be classified as a regulated investment company, be taxed in such year as an ordinary corporation and not as a regulated investment company. In such case, none of the provisions of part I of subchapter M (other than section 852(c) in the case of taxable years beginning after February 28, 1958) will be applicable to it. For the rules relating to the applicability of section 852(c), see § 1.852–5.

[T.D. 6598, 27 FR 4091, Apr. 28, 1962]

§ 1.852–2 Method of taxation of regulated investment companies.

(a) *Imposition of normal tax and surtax.* Section 852(b)(1) imposes a normal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the investment company taxable income, as defined in section 852(b)(2) and § 1.852–3, for each taxable year of a regulated investment company. The tax is imposed as if the investment company taxable income were the taxable income referred to in section 11. In computing the normal tax under section 11, the regulated investment company's taxable income and the dividends paid deduction (computed without regard to the capital gains dividends) shall both be reduced by the deduction for partially tax-exempt interest provided by section 242.

(b) *Taxation of capital gains*—(1) *In general.* Section 852(b)(3)(A) imposes (i) in the case of a taxable year beginning before January 1, 1970, a tax of 25 percent, or (ii) in the case of a taxable year beginning after December 31, 1969, a tax determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201–1, on the excess, if any, of the net long-term capital gain of a regulated investment company (subject to tax under part I, subchapter M, chapter 1 of the Code) over the sum of its net short-term capital loss and its deduction for dividends paid (as defined in section 561) determined with reference to capital gain dividends only. For the definition of capital gain dividend paid by a regulated investment company, see section 852(b)(3)(C) and paragraph (c) of § 1.852–4. In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, such deduction for dividends paid shall first be made from the amount subject to tax in accordance with section 1201(a)(1)(B), to the extent thereof, and then from the amount subject to tax in accordance with section 1201(a)(1)(A). See § 1.852–10, relating to certain distributions in redemption of interests in unit investment trusts which, for purposes of the deduction for dividends paid with reference to capital gain dividends only, are not considered preferential dividends under section 562(c). See section 855 and § 1.855–1, relating to dividends paid after the close of the taxable year.

(2) *Undistributed capital gains*—(i) *In general.* A regulated investment company (subject to tax under part I of subchapter M) may, for taxable years beginning after December 31, 1956, designate under section 852(b)(3)(D) an amount of undistributed capital gains to each shareholder of the company. For the definition of the term ''undistributed capital gains'' and for the treatment of such amounts by a shareholder, see paragraph (b)(2) of § 1.852–4. For the rules relating to the method of making such designation, the returns to be filed, and the payment of the tax in such cases, see paragraph (a) of § 1.852–9.

(ii) *Effect on earnings and profits of a regulated investment company.* If a regulated investment company designates an amount as undistributed capital gains for a taxable year, the earnings and profits of such regulated investment company for such taxable year shall be reduced by the total amount of the undistributed capital gains so designated. In such case, its capital account shall be increased—

(a) In the case of a taxable year ending before January 1, 1970, by 75 percent of the total amount designated,

(b) In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, by the total amount designated decreased by the amount of tax imposed by section 852(b)(3)(A) with respect to such amount, or

(c) In the case of a taxable year beginning after December 31, 1974, by 70 percent of the total amount designated. The earnings and profits of a regulated investment company shall not be reduced by the amount of tax which is imposed by section 852(b)(3)(A) on an amount designated as undistributed capital gains and which is paid by the corporation but deemed paid by the shareholder.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4091, Apr. 28, 1962; T.D. 6921, 32 FR 8754, June 20, 1967; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

§1.852–3 Investment company taxable income.

Section 852(b)(2) requires certain adjustments to be made to convert taxable income of the investment company to investment company taxable income, as follows:

(a) The excess, if any, of the net long-term capital gain over the net short-term capital loss shall be excluded;

(b) The net operating loss deduction provided in section 172 shall not be allowed;

(c) The special deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code, shall not be allowed. Those not allowed are the deduction for partially tax-exempt interest provided by section 242, the deductions for dividends received provided by sections 243, 244, and 245, and the deduction for certain dividends paid provided by section 247. However, the deduction provided by section 248 (relating to organizational expenditures), otherwise allowable in computing taxable income, shall likewise be allowed in computing the investment company taxable income. See section 852(b)(1) and paragraph (a) of §1.852–2 for treatment of the deduction for partially tax-exempt interest (provided by section 242) for purposes of computing the normal tax under section 11;

(d) The deduction for dividends paid (as defined in section 561) shall be allowed, but shall be computed without regard to capital gains dividends (as defined in section 852(b)(3)(C) and paragraph (c) of §1.852–4); and

(e) The taxable income shall be computed without regard to section 443(b). Thus, the taxable income for a period of less than 12 months shall not be placed on an annual basis even though such short taxable year results from a change of accounting period.

§1.852–4 Method of taxation of shareholders of regulated investment companies.

(a) *Ordinary income.* (1) Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a regulated investment company shall include such dividends in gross income for the taxable year in which they are received.

(2) See section 853 (b)(2) and (c) and paragraph (b) of §1.853–2 and §1.853–3 for the treatment by shareholders of dividends received from a regulated investment company which has made an election under section 853(a) with respect to the foreign tax credit. See section 854 and §§1.854–1 through 1.854–3 for limitations applicable to dividends received from regulated investment companies for the purpose of the credit under section 34 (for dividends received on or before December 31, 1964), the exclusion from gross income under section 116, and the deduction under section 243. See section 855 (b) and (d) and paragraphs (c) and (f) of §1.855–1 for treatment by shareholders of dividends paid by a regulated investment company after the close of the taxable year in the case of an election under section 855(a).

(b) *Capital gains*—(1) *In general.* Under section 852(b)(3)(B), shareholders of a regulated investment company who receive capital gain dividends (as defined in paragraph (c) of this section), in respect of the capital gains of an investment company for a taxable year for which it is taxable under part I, subchapter M, chapter 1 of the Code, as a regulated investment company, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend to which section 1201(d) (1) or (2) applies is the portion so designated by the regulated investment company pursuant to paragraph (c)(2) of this section.

(2) *Undistributed capital gains.* (i) A person who is a shareholder of a regulated investment company at the close of a taxable year of such company for which it is taxable under part I of subchapter M shall include in his gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) any amount of undistributed capital gains. The term ''undistributed capital gains'' means the amount designated as undistributed capital gains in accordance with paragraph (a) of §1.852–9, but the amount so designated shall not exceed the shareholder's proportionate part of the amount subject to tax under section 852(b)(3)(A). Such amount shall be included in gross income for the taxable year of the shareholder in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount of such gains designated under paragraph (a) of §1.852–9 as gain described in section 1201(d) (1) or (2) shall be included in the shareholder's gross income as gain described in section 1201(d) (1) or (2). For certain administrative provisions relating to undistributed capital gains, see §1.852–9.

(ii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall be deemed to have paid for his taxable year for which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, a tax equal to 25 percent of such amount.

(b) In the case of a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, a tax equal to the tax designated under paragraph (a)(1) of §1.852–9 by the regulated investment company as his proportionate share of the capital gains tax paid with respect to such amount, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, a tax equal to 30 percent of such amount.

Such shareholder is entitled to a credit or refund of the tax so deemed paid in accordance with the rules provided in paragraph (c)(2) of §1.852–9.

(iii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall increase the adjusted basis of the shares of stock with respect to which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, by 75 percent of such amount.

(b) In the case of an amount designated with respect to a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, by the amount designated under paragraph (a)(1)(iv) of §1.852–9 by the regulated investment company, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, by 70 percent of such amount.

(iv) For purposes of determining whether the purchaser or seller of a share or regulated investment company stock is the shareholder at the close of such company's taxable year who is required to include an amount of undistributed capital gains in gross income, the amount of the undistributed capital gains shall be treated in the same manner as a cash dividend payable to shareholders of record at the close of the company's taxable year. Thus, if a cash dividend paid to shareholders of record as of the close of the regulated investment company's taxable year would be considered income to the purchaser, then the purchaser is also considered to be the shareholder of such company at the close of its taxable year for purposes of including an amount of undistributed capital gains in gross income. If, in such a case, notice on Form 2439 is, pursuant to paragraph (a)(1) of §1.852–9, mailed by the regulated investment company to the seller, then the seller shall be considered the nominee of the purchaser and, as such, shall be subject to the provisions in paragraph (b) of §1.852–9. For rules for determining whether a dividend is income to the purchaser or seller of a share of stock, see paragraph (c) of §1.61–9.

(3) *Partners and partnerships.* If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a partnership, such amount shall be included in the gross income of the partnership for the taxable year of the partnership in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount so includible by the partnership shall be taken into account by the partners as distributive shares of the partnership gains and losses from sales or exchanges of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) pursuant to section 702(a)(2) and paragraph (a)(2) of §1.702–1. The tax with respect to the undistributed capital gains is deemed paid by the partnership (under section 852(b)(3)(D)(ii) and subparagraph (2)(ii) of this paragraph), and the credit or refund of such tax shall be taken into account by the partners in accordance with section 702(a)(8) and paragraph (a)(8)(ii) of §1.702–1 and paragraph (c)(2) of §1.852–9. In accordance with section 705(a), the partners shall increase the basis of their partnership interests under section 705(a)(1) by the distributive shares of such gains, and shall decrease the basis of their partnership interests by the distributive shares of the amount of the tax under section 705(a)(2)(B) (relating to certain nondeductible expenditures) and paragraph (a)(3) of §1.705–1.

(4) *Nonresident alien individuals.* If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a nonresident alien individual, such shareholder shall be treated, for purposes of section 871 and the regulations thereunder, as having realized a long-term capital gain in such amount on the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated.

(5) *Effect on earnings and profits of corporate shareholders of a regulated investment company.* If a shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a corporation, such corporation, in computing its earnings and profits for the taxable year for which such amount is so includible, shall treat such amount as if it had actually been received and the taxes paid shall include any amount of tax liability satisfied by a credit under section 852(b)(3)(D) and subparagraph (2) of this paragraph.

(c) *Definition of capital gain dividend*—(1) *General rule.* A capital gain dividend, as defined in section 852(b)(3)(C), is any dividend or part thereof which is designated by a regulated investment company as a capital gain dividend in a written notice mailed to its shareholders within the period specified in paragraph (c)(4) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855) is greater than the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate amount so designated. For example, a regulated investment company making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1955, that of a distribution of $500,000 made December 15, 1955, $200,000 constituted a capital gain dividend, amounting to $2 per share. It was later discovered that an error had been made in determining the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, and that such excess was $100,000 instead of $200,000. In such case each shareholder would have received a capital gain dividend of $1 per share instead of $2 per share.

(2) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to subparagraph (1) of this paragraph by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970, to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the capital gain dividend shown on the notice received by the nominee pursuant to subparagraph (1) of this paragraph. The notice shall include the name and address of the nominee identified as such. This subparagraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of subparagraph (1) of this paragraph with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and, not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this subparagraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this subparagraph within 30 days of such notice. If a notice under paragraph (c)(1) of this section is mailed within the 120-day period following the date of a determination pursuant to paragraph (c)(4)(ii) of this section, the 120-day period and the 130-day period following the date of the determination shall be substituted for the 45-day period and the 55-day period following the close of the regulated investment company's taxable year prescribed by this subparagraph (2).

(3) *Subsection (d) gain for certain taxable years.* In the case of capital gain dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855), the company must include in its written notice under paragraph (c)(1) of this section a statement showing the shareholder's proportionate share of the capital gain dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d) (1) or (2), the regulated investment company shall consider that capital gain dividends for a taxable year are first made from its

long-term capital gains for such year which are not described in section 1201(d) (1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d) (1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the company's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of each capital gain dividend (to which this paragraph applies) which is gain described in section 1201(d) (1) or (2). If, for his taxable year, a shareholder must include in his gross income a capital gain dividend to which this paragraph applies, he shall attach to his income tax return for such taxable year a statement showing, with respect to the total of such dividends for such taxable year received from each regulated investment company, the name and address of the regulated investment company from which such dividends are received, the amount of such dividends, the portion of such dividends which was designated as gain described in section 1201(d)(1), and the portion of such dividends which was designated as gain described in section 1201(d)(2).

(4) *Mailing of written notice to shareholders.* (i) Except as provided in paragraph (c)(4)(ii) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year of the regulated investment company.

(ii) If a determination (as defined in section 860(e)) after November 6, 1978, increases the excess for the taxable year of the net capital gain over the deduction for capital gains dividends paid, then a regulated investment company may designate all or part of any dividend as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determination. The aggregate amount designated during this period may not exceed this increase. A dividend may be designated if it is actually paid during the taxable year, is one paid after the close of the taxable year to which section 855 applies, or is a deficiency dividend (as defined in section 860(f)), including a deficiency dividend paid by an acquiring corporation to which section 381(c)(25) applies. The date of a determination is established under §1.860–2(b)(1).

(d) *Special treatment of loss on the sale or exchange of regulated investment company stock held less than 31 days*—(1) *In general.* Under section 852(b)(4), if any person, with respect to a share of regulated investment company stock acquired by such person after December 31, 1957, and held for a period of less than 31 days, is required by section 852(b)(3) (B) or (D) to include in gross income as a gain from the sale or exchange of a capital asset held for more than six months—

(i) The amount of a capital gain dividend, or

(ii) An amount of undistributed capital gains,

then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share of stock as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). Such special treatment with respect to the sale of regulated investment company stock held for a period of less than 31 days is applicable to losses for taxable years ending after December 31, 1957.

(2) *Determination of holding period.* The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 852(b)(4) and this paragraph, a share of regulated investment company stock has been held for a period of less than 31 days. In applying those rules, however, ''30 days'' shall be

substituted for the number of days specified in subparagraph (B) of section 246(c)(3).

(3) *Example.* The application of section 852(b)(4) and this paragraph may be illustrated by the following example:

Example. On December 15, 1958, A purchased a share of stock in the X regulated investment company for $20. The X regulated investment company declared a capital gain dividend of $2 per share to shareholders of record on December 31, 1958. A, therefore, received a capital gain dividend of $2 which, pursuant to section 852(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than 6 months. On January 5, 1959, A sold his share of stock in the X regulated investment company for $17.50, which sale resulted in a loss of $2.50. Under section 852(b)(4) and this paragraph, A must treat $2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than 6 months.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6531, 26 FR 413, Jan. 19, 1961; T.D. 6598, 27 FR 4091, Apr. 28, 1962; T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7337, 39 FR 44972, Dec. 30, 1974; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.852–5 Earnings and profits of a regulated investment company.

(a) Any regulated investment company, whether or not such company meets the requirements of section 852(a) and paragraphs (a)(1) (i) and (ii) of § 1.852–1, shall apply paragraph (b) of this section in computing its earnings and profits for a taxable year beginning after February 28, 1958. However, for a taxable year of a regulated investment company beginning before March 1, 1958, paragraph (b) of this section shall apply only if the regulated investment company meets the requirements of section 852(a) and paragraphs (a)(1) (i) and (ii) of § 1.852–1.

(b) In the determination of the earnings and profits of a regulated investment company, section 852(c) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a corporation would have had earnings and profits of $500,000 for the taxable year except for the fact that it had a net capital loss of $100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a regulated investment company would be $500,000. If the regulated investment company had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year, the earnings and profits for the taxable year to be considered in such computation would amount to $400,000 assuming that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, $500,000, the corporation would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and would begin such year with its paid-in capital reduced by $100,000, an amount equal to the excess of the $500,000 distributed over the $400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year.

§ 1.852–6 Records to be kept for purpose of determining whether a corporation claiming to be a regulated investment company is a personal holding company.

(a) Every regulated investment company shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from the shareholders. The actual owner of stock includes the person who is required to include in gross income in his return the dividends received on the stock. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) For the purpose of determining whether a domestic corporation claiming to be a regulated investment company is a personal holding company as defined in section 542, the permanent records of the company shall show the maximum number of shares of the corporation (including the number and face value of securities convertible into stock of the corporation) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the corporation's taxable year, as provided in section 544.

(c) Statements setting forth the information (required by paragraph (b) of this section) shall be demanded not later than 30 days after the close of the corporation's taxable year as follows:

(1) In the case of a corporation having 2,000 or more record owners of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a corporation having less than 2,000 and more than 200 record owners of its stock, on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a corporation having 200 or less record owners of its stock, on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

When making demand for the written statements required of each shareholder by this paragraph, the company shall inform each of the shareholders of his duty to submit as a part of his income tax return the statements which are required by §1.852–7 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with a company's demand shall be maintained as a part of its record required by this section. A company which fails to keep such records to show the actual ownership of its outstanding stock as are required by this section shall be taxable as an ordinary corporation and not as a regulated investment company.

§1.852–7 Additional information required in returns of shareholders.

Any person who fails or refuses to comply with the demand of a regulated investment company for the written statements which §1.852–6 requires the company to demand from its shareholders shall submit as a part of his income tax return a statement showing, to the best of his knowledge and belief—

(a) The number of shares actually owned by him at any and all times during the period for which the return is filed in any company claiming to be a regulated investment company;

(b) The dates of acquisition of any such stock during such period and the names and addresses of persons from whom it was acquired;

(c) The dates of disposition of any such stock during such period and the names and addresses of the transferees thereof;

(d) The names and addresses of the members of his family (as defined in section 544(a)(2)); the names and addresses of his partners, if any, in any partnership; and the maximum number of shares, if any, actually owned by each in any corporation claiming to be a regulated investment company, at any time during the last half of the taxable year of such company;

(e) The names and addresses of any corporation, partnership, association, or trust in which he had a beneficial interest to the extent of at least 10 percent at any time during the period for which such return is made, and the number of shares of any corporation claiming to be a regulated investment company actually owned by each;

(f) The maximum number of shares (including the number and face value of securities convertible into stock of the corporation) in any domestic corporation claiming to be a regulated investment company to be considered as constructively owned by such individual at any time during the last half of the corporation's taxable year, as provided in section 544 and the regulations thereunder; and

(g) The amount and date of receipt of each dividend received during such period from every corporation claiming to be a regulated investment company.

§1.852–8 Information returns.

Nothing in §§1.852–6 and 1.852–7 shall be construed to relieve regulated investment companies or their shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.

§1.852–9 Special procedural requirements applicable to designation under section 852(b)(3)(D).

(a) *Regulated investment company*—(1) *Notice to shareholders.* (i) A designation of undistributed capital gains under section 852(b)(3)(D) and paragraph (b)(2)(i) of §1.852–2 shall be made by notice on Form 2439 mailed by the regulated investment company to each person who is a shareholder of record of the company at the close of the company's taxable year. The notice on Form 2439 shall show the name, address, and employer identification number of the regulated investment company; the taxable year of the company for which the designation is made; the name, address, and identifying number of the shareholder; the amount designated by the company for inclusion by the shareholder in computing his long-term capital gains; and the tax paid with respect thereto by the company which is deemed to have been paid by the shareholder.

(ii) In the case of a designation of undistributed capital gains with respect to a taxable year of the regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show the shareholder's proportionate share of such gains which is gain described in section 1201(d)(1), his proportionate share of such gains which is gain described in section 1201(d)(2), and the amount (determined pursuant to subdivision (iv) of this subparagraph) by which the shareholder's adjusted basis in his shares shall be increased.

(iii) In determining under subdivision (ii) of this subparagraph the portion of the undistributed capital gains which, in the hands of the shareholder, is gain described in section 1201(d) (1) or (2), the company shall consider that capital gain dividends for a taxable year are made first from its long-term capital gains for such year which are not described in section 1201(d) (1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d) (1) or (2). A shareholder's proportionate share of undistributed capital gains for a taxable year which is gain described in section 1201(d)(1) is the amount which bears the same ratio to the amount included in his income as designated undistributed capital gains for such year as *(a)* the aggregate amount of the company's gains for such year which are described in section 1201(d)(1) and designated as undistributed capital gains bears to *(b)* the aggregate amount of the company's gains for such year which are designated as undistributed capital gains. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of undistributed capital gains (to which this subdivision applies) which is gain described in section 1201(d) (1) or (2).

(iv) In the case of a designation of undistributed capital gains for any taxable year ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show with respect to the undistributed capital gains of each shareholder the amount by which such shareholder's adjusted basis in his shares shall be increased under section 852(b)(3)(D)(iii). The amount by which each shareholders' adjusted basis in his shares shall be increased is the amount includible in his gross income with respect to such shares under section 852(b)(3)(D)(i) less the tax which the shareholder is deemed to have paid with respect to such shares. The tax which each shareholder is deemed to have paid with respect to such shares is the amount which bears the same ratio to the amount of the tax imposed by section 852(b)(3)(A) for such year with respect to the aggregate amount of the designated undistributed capital gains as the amount of such gains includible in the shareholder's gross income bears to the aggregate amount of such gains so designated.

(v) Form 2439 shall be prepared in triplicate, and copies B and C of the form shall be mailed to the shareholder on or before the 45th day (30th day for a taxable year ending before February 26, 1964) following the close of the company's taxable year. Copy A of each Form 2439 must be associated with the duplicate copy of the undistributed capital gains tax return of the company (Form 2438), as provided in subparagraph (2)(ii) of this paragraph.

(2) *Return of undistributed capital gains tax*—(i) *Form 2438.* Every regulated investment company which designates undistributed capital gains for any taxable year beginning after December 31, 1956, in accordance with subparagraph (1) of this paragraph, shall file for such taxable year an undistributed capital gains tax return on Form 2438 including on such return the total of its undistributed capital gains so designated and the tax with respect thereto. The return on Form 2438 shall be prepared in duplicate and shall set forth fully and clearly the information required to be included therein. The original of Form 2438 shall be filed on or before the 30th day after the close of the company's taxable year with the internal revenue officer designated in instructions applicable to Form 2438. The duplicate copy of form 2438 for the taxable year shall be attached to and filed with the income tax return of the company on Form 1120 for such taxable year.

(ii) *Copies A of Form 2439.* For each taxable year which ends on or before December 31, 1965, there shall be submitted with the company's return on Form 2438 all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. For each taxable year which ends after December 31, 1965, there shall be submitted with the duplicate copy of the company's return on Form 2438, which is attached to and filed with the income tax return of the company on Form 1120 for the taxable year, all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. The copies A of Form 2439 shall be accompanied by lists (preferably in the form of adding machine tapes) of the amounts of undistributed capital gains and of the tax paid with respect thereto shown on such forms. The totals of the listed amounts of undistributed capital gains and of tax paid with respect thereto must agree with the corresponding entries on Form 2438.

(3) *Payment of tax.* The tax required to be returned on Form 2438 shall be paid by the regulated investment company on or before the 30th day after the close of the company's taxable year to the internal revenue officer with whom the return on Form 2438 is filed.

(b) *Shareholder of record not actual owner*—(1) *Notice to actual owner.* In any case in which a notice on Form 2439 is mailed pursuant to paragraph (a)(1) of this section by a regulated investment company to a shareholder of record who is a nominee of the actual owner or owners of the shares of stock to which the notice relates, the nominee shall furnish to each such actual owner notice of the owner's proportionate share of the amounts of undistributed capital gains and tax with respect thereto, as shown on the Form 2439 received by the nominee from the regulated investment company. The nominee's notice to the actual owner shall be prepared in triplicate on Form 2439 and shall contain the information prescribed in paragraph (a)(1) of this section, except that the name and address of the nominee, identified as such, shall be entered on the form in addition to, and in the space provided for, the name and address of the regulated investment company, and the amounts of undistributed capital gains and tax with respect thereto entered on the form shall be the actual owner's proportionate share of the corresponding items shown on the nominee's notice from the regulated investment company. Copies B and C of the Form 2439 prepared by the nominee shall be mailed to the actual owner—

(i) For taxable years of regulated investment companies ending after February 25, 1964, on or before the 75th day (55th day in the case of a nominee who is acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of §1.851–7 for taxable years of regulated investment companies ending after December 8, 1970, and 135th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year, or

(ii) For taxable years of regulated investment companies ending before February 26, 1964, on or before the 60th day (120th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year.

(2) *Transmittal of Form 2439.* The nominee shall enter the word ''Nominee'' in the upper right hand corner of copy B of the notice on Form 2439 received by him from the regulated investment company, and on or before the appropriate day specified in subdivision (i) or (ii) of subparagraph (1) of this paragraph shall transmit such copy B, together with all copies A of Form 2439 prepared by him pursuant to subparagraph (1) of this paragraph, to the internal revenue officer with whom his income tax return is required to be filed.

(3) *Custodian of certain unit investment trusts.* The requirements of this paragraph shall not apply to a nominee who is acting as a custodian of the unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7 provided that the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by such nominee as custodian and on or before the 45th day following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

(c) *Shareholders*—(1) *Return requirements.* The copy B of the Form 2439 furnished to a shareholder by the regulated investment company or by a nominee, as provided in paragraph (a) or (b), respectively, of this section, shall be attached to the return of income made by the shareholder for his taxable year in which the amount of undistributed capital gains is includible in gross income, as provided in paragraph (b)(2) of § 1.852–4.

(2) *Credit or refund*—(i) *In general.* The amount of the tax paid by the regulated investment company with respect to the undistributed capital gains required under section 852(b)(3)(D) and paragraph (b)(2) of § 1.852–4 to be included by a shareholder in his computation of long-term capital gains for any taxable year is deemed paid by such shareholder under section 852(b)(3)(D)(ii) and such payment constitutes, for purposes of section 6513(a) (relating to time tax considered paid), an advance payment in like amount of the tax imposed under chapter 1 of the Code for such taxable year. In the case of an overpayment of tax within the meaning of section 6401, see section 6402 and the regulations in part 301 of this chapter (Regulations on Procedure and Administration) for rules applicable to the treatment of an overpayment of tax and section 6511 and the regulations in part 301 of this chapter (Regulations on Procedure and Administration) with respect to the limitations applicable to the credit or refund of an overpayment of tax.

(ii) *Form to be used.* Claim for refund or credit of the tax deemed to have been paid by a shareholder with respect to an amount of undistributed capital gains shall be made on the shareholder's income tax return for the taxable year in which such amount of undistributed capital gains is includable in gross income. In the case of a shareholder which is a partnership, claim shall be made by the partners on their income tax returns for refund or credit of their distributive shares of the tax deemed to have been paid by the partnership. In the case of a shareholder which is exempt from tax under section 501(a) and to which section 511 does not apply for the taxable year, claim for refund of the tax deemed to have been paid by such shareholder on an amount of undistributed capital gains for such year shall be made on Form 843 and copy B of Form 2439 furnished to such shareholder shall be attached to its claim. For other rules applicable to the filing of claims for credit or refund of an overpayment of tax, see §301.6402–2 of this chapter (Regulations on Procedure and Administration), relating to claims for credit or refund, and §301.6402–3 of this chapter, relating to special rules applicable to income tax.

(3) *Records.* The shareholder is required to keep copy C of the Form 2439 furnished for the regulated investment company's taxable years ending after December 31, 1969, and beginning before January 1, 1975, as part of his records to show increases in the adjusted basis of his shares in such company.

(d) *Penalties.* For criminal penalties for willful failure to file a return, supply information, or pay tax, and for filing a false or fraudulent return, statement, or other document, see sections 7203, 7206, and 7207.

[T.D. 6500, 25 FR 11710, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7012, 34 FR 7688, May 15, 1969; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7332, 39 FR 44217, Dec. 23, 1974; T.D. 7337, 39 FR 44973, Dec. 30, 1974]

§1.852–10 Distributions in redemption of interests in unit investment trusts.

(a) *In general.* In computing that part of the excess of its net long-term capital gain over net short-term capital loss on which it must pay a capital gains tax, a regulated investment company is allowed under section 852(b)(3)(A)(ii) a deduction for dividends paid (as defined in section 561) determined with reference to capital gains dividends only. Section 561(b) provides that in determining the deduction for dividends paid, the rules provided in section 562 are applicable. Section 562(c) (relating to preferential dividends) provides that the amount of any distribution shall not be considered as a dividend unless such distribution is pro-rata, with no preference to any share of stock as compared with other shares of the same class except to the extent that the former is entitled to such preference.

(b) *Redemption distributions made by unit investment trust*—(1) *In general.* Where a unit investment trust (as defined in paragraph (c) of this section) liquidates part of its portfolio represented by shares in a management company in order to make a distribution to a holder of an interest in the trust in redemption of part or all of such interest, and by so doing, the trust realizes net long-term capital gain, that portion of the distribution by the trust which is equal to the amount of the net long-term capital gain realized by the trust on the liquidation of the shares in the management company will not be considered a preferential dividend under section 562(c). For example, where the entire amount of net long-term capital gain realized by the trust on such a liquidation is distributed to the redeeming interest holder, the trust will be allowed the entire amount of net long-term capital gain so realized in determining the deduction under section 852(b)(3)(A)(ii) for dividends paid determined with reference to capital gains dividends only. This paragraph and section 852(d) shall apply only with respect to the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) realized by the trust which is attributable to a redemption by a holder of an interest in such trust. Such dividend may be designated as a capital gain dividend by a written notice to the certificate holder. Such designation should clearly indicate to the holder that the holder's gain or loss on the redemption of the certificate may differ from such designated amount, depending upon the holder's basis for the redeemed certificate, and that the holder's own records are to be used in computing the holder's gain or loss on the redemption of the certificate.

(2) *Example.* The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered into a periodic payment plan contract with X as custodian and Z as plan sponsor under which he purchased a plan certificate of X. Under this contract, upon B's demand, X must redeem B's certificate at a price substantially equal to the value of the number of shares in Y, a management company, which are credited to B's account by X in connection with the unit investment trust. Except for a small amount of cash which X is holding to satisfy liabilities and to invest for other plan certificate holders, all of the assets held by X in connection with the trust consist of shares in Y. Pursuant to the terms of the periodic payment plan contract, 100 shares of Y are credited to B's account. Both X and Y have elected to be treated as regulated investment companies. On March 1, 1965, B notified X that he wished to have his entire interest in the unit investment trust redeemed. In order to redeem B's interest, X caused Y to redeem 100 shares of Y which X held. At the time of redemption, each share of Y had a value of $15. X then distributed the $1,500 to B. X's basis for each of the Y shares which was redeemed was $10. Therefore, X realized a long-term capital gain of $500 ($5×100 shares) which is attributable to the redemption by B of his interest in the trust. Under section 852(d), the $500 capital gain distributed to B will not be considered a preferential dividend. Therefore, X is allowed a deduction of $500 under section 852(b)(3)(A)(ii) for dividends paid determined with reference to capital gains dividends only, with the result that X will not pay a capital gains tax with respect to such amount.

(c) *Definition of unit investment trust.* A unit investment trust to which paragraph (a) of this section refers is a business arrangement which—

(1) Is registered under the Investment Company Act of 1940 as a unit investment trust;

(2) Issues periodic payment plan certificates (as defined in such Act);

(3) Possesses, as substantially all of its assets, securities issued by a management company (as defined in such Act);

(4) Qualifies as a regulated investment company under section 851; and

(5) Complies with the requirements provided for by section 852(a).

Paragraph (a) of this section does not apply to a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7.

[T.D. 6921, 32 FR 8755, June 20, 1967, as amended by T.D. 7187, 37 FR 13527, July 6, 1972; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.852–11 Treatment of certain losses attributable to periods after October 31 of a taxable year.

(a) *Outline of provisions.* This paragraph lists the provisions of this section.

(a) Outline of provisions.
(b) Scope.
(1) In general.
(2) Limitation on application of section.
(c) Post-October capital loss defined.
(1) In general.
(2) Methodology.
(3) October 31 treated as last day of taxable year for purpose of determining taxable income under certain circumstances.
(i) In general.
(ii) Effect on gross income.
(d) Post-October currency loss defined.
(1) Post-October currency loss.
(2) Net foreign currency loss.
(3) Foreign currency gain or loss.
(e) Limitation on capital gain dividends.
(1) In general.
(2) Amount taken into account in current year.
(i) Net capital loss.
(ii) Net long-term capital loss.
(3) Amount taken into account in succeeding year.
(f) Regulated investment company may elect to defer certain losses for purposes of determining taxable income.
(1) In general.
(2) Effect of election in current year.
(3) Amount of loss taken into account in current year.
(i) If entire amount of net capital loss deferred.
(ii) If part of net capital loss deferred.
(A) In general.
(B) Character of capital loss not deferred.
(iii) If entire amount of net long-term capital loss deferred.
(iv) If part of net long-term capital loss deferred.
(v) If entire amount of post-October currency loss deferred.
(vi) If part of post-October currency loss deferred.
(4) Amount of loss taken into account in succeeding year and subsequent years.
(5) Effect on gross income.
(g) Earnings and profits.
(1) General rule.
(2) Special rule—treatment of losses that are deferred for purposes of determining taxable income.
(h) Examples.

(i) Procedure for making election.

(1) In general.

(2) When applicable instructions not available.

(j) Transition rules.

(1) In general.

(2) Retroactive election.

(i) In general.

(ii) Deadline for making election.

(3) Amended return required for succeeding year in certain circumstances.

(i) In general.

(ii) Time for filing amended return.

(4) Retroactive dividend.

(i) In general.

(ii) Method of making election.

(iii) Deduction for dividends paid.

(A) In general.

(B) Limitation on ordinary dividends.

(C) Limitation on capital gain dividends.

(D) Effect on other years.

(iv) Earnings and profits.

(v) Receipt by shareholders.

(vi) Foreign tax election.

(vii) Example.

(5) Certain distributions may be designated retroactively as capital gain dividends.

(k) Effective date.

(b) *Scope*—(1) *In general.* This section prescribes the manner in which a regulated investment company must treat a post-October capital loss (as defined in paragraph (c) of this section) or a post-October currency loss (as defined in paragraph (d)(1) of this section) for purposes of determining its taxable income, its earnings and profits, and the amount that it may designate as capital gain dividends for the taxable year in which the loss is incurred and the succeeding taxable year (the ‘‘succeeding year’’).

(2) *Limitation on application of section.* This section shall not apply to any post-October capital loss or post-October currency loss of a regulated investment company attributable to a taxable year for which an election is in effect under section 4982(e)(4) of the Code with respect to the company.

(c) *Post-October capital loss defined*—(1) *In general.* For purposes of this section, the term *post-October capital loss* means—

(i) Any net capital loss attributable to the portion of a regulated investment company's taxable year after October 31; or

(ii) If there is no such net capital loss, any net long-term capital loss attributable to the portion of a regulated investment company's taxable year after October 31.

(2) *Methodology.* The amount of any net capital loss or any net long-term capital loss attributable to the portion of the regulated investment company's taxable year after October 31 shall be determined in accordance with general tax law principles (other than section 1212) by treating the period beginning on November 1 of the taxable year of the regulated investment company and ending on the last day of such taxable year as though it were the taxable year of the regulated investment company. For purposes of this paragraph (c)(2), any item (other than a capital loss carryover) that is required to be taken into account or any rule that must be applied, for purposes of section 4982, on October 31 as if it were the last day of the regulated investment company's taxable year must also be taken into account or applied in the same manner as required under section 4982, both on October 31 and again on the last day of the regulated investment company's taxable year.

(3) *October 31 treated as last day of taxable year for purpose of determining taxable income under certain circumstances*—(i) *In general.* If a regulated investment company has a post-October capital loss for a taxable year, any item that must be marked to market for purposes of section 4982 on October 31 as if it were the last day of the regulated investment company's taxable year must also be marked to market on October 31 and again on the last day of the regulated investment company's taxable year for purposes of determining its taxable income. If the regulated investment company does not have a post-October capital loss for a taxable year, the regulated investment company must treat items that must be marked to market for purposes of section 4982 on October 31 as if it were the last day of the regulated investment company's taxable year as marked to market only on the last day of its taxable year for purposes of determining its taxable income.

(ii) *Effect on gross income.* The marking to market of any item on October 31 of a regulated investment company's taxable year for purposes of determining its taxable income under paragraph (c)(3)(i) of this section shall not affect the amount of the gross income of such company for such taxable year for purposes of section 851(b) (2) or (3).

(d) *Post-October currency loss defined.* For purposes of this section—

(1) *Post-October currency loss.* The term *post-October currency loss* means any net foreign currency loss attributable to the portion of a regulated investment company's taxable year after October 31. For purposes of the preceding sentence, principles similar to those of paragraphs (c)(2) and (c)(3) of this section shall apply.

(2) *Net foreign currency loss.* The term ''net foreign currency loss'' means the excess of foreign currency losses over foreign currency gains.

(3) *Foreign currency gain or loss.* The terms ''foreign currency gain'' and ''foreign currency loss'' have the same meaning as provided in section 988(b).

(e) *Limitation on capital gain dividends*—(1) *In general.* For purposes of determining the amount a regulated investment company may designate as capital gain dividends for a taxable year, the amount of net capital gain for the taxable year shall be determined without regard to any post-October capital loss for such year.

(2) *Amount taken into account in current year*—(i) *Net capital loss.* If the post-October capital loss referred to in paragraph (e)(1) of this section is a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the net capital gain of the company for the taxable year in which the loss arose shall be determined without regard to any capital gains or losses (both long-term and short-term) taken into account in computing the post-October capital loss for the taxable year.

(ii) *Net long-term capital loss.* If the post-October capital loss referred to in paragraph (e)(1) of this section is a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the net capital gain of the company for the taxable year in which the loss arose shall be determined without regard to any long-term capital gain or loss taken into account in computing the post-October capital loss for the taxable year.

(3) *Amount taken into account in succeeding year.* If a regulated investment company has a post-October capital loss (as defined in paragraph (c)(1)(i) or (c)(1)(ii) of this section) for any taxable year, then, for purposes of determining the amount the company may designate as capital gain dividends for the succeeding year, the net capital gain for the succeeding year shall be determined by treating all gains and losses taken into account in computing the post-October capital loss as arising on the first day of the succeeding year.

(f) *Regulated investment company may elect to defer certain losses for purposes of determining taxable income*—(1) *In general.* A regulated investment company may elect, in accordance with the procedures of paragraph (i) of this section, to compute its taxable income for a taxable year without regard to part or all of any post-October capital loss or post-October currency loss for that year.

(2) *Effect of election in current year.* The taxable income of a regulated investment company for a taxable year to which an election under paragraph (f)(1) of this section applies shall be computed without regard to that part of any post-October capital loss or post-October currency loss to which the election applies.

(3) *Amount of loss taken into account in current year*—(i) *If entire amount of net capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any capital gains or losses (both long-term and short-term) taken into account in computing the post-October capital loss for the taxable year.

(ii) *If part of net capital loss deferred*—(A) *In general.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of capital loss taken into account in computing the post-October capital loss for the taxable year equal to the amount of the post-October capital loss that is not deferred. No amount of capital gain taken into account in computing the post-October capital loss for the taxable year shall be taken into account in the determination.

(B) *Character of capital loss not deferred.* The capital loss includible in the taxable income of the company under this paragraph (f)(3)(ii) for the taxable year in which the loss arose shall consist first of any short-term capital losses to the extent thereof, and then of any long-term capital losses, taken into account in computing the post-October capital loss for the taxable year.

(iii) *If entire amount of net long-term capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any long-term capital gains or losses taken into account in computing the post-October capital loss for the taxable year.

(iv) *If part of net long-term capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of long-term capital loss taken into account in computing the post-October capital loss for the taxable year equal to the amount of the post-October capital loss that is not deferred. No amount of long term capital gain taken into account in computing the post-October capital loss for the taxable year shall be taken into account in the determination.

(v) *If entire amount of post-October currency loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October currency loss, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any foreign currency gains or losses taken into account in computing the post-October currency loss for the taxable year.

(vi) *If part of post-October currency loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October currency loss, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of foreign currency loss taken into account in computing the post-October currency loss for the taxable year equal to the amount of the post-October currency loss that is not deferred. No amount of foreign currency gain taken into account in computing the post-October currency loss for the taxable year shall be taken into account in the determination.

(4) *Amount of loss taken into account in succeeding year and subsequent years.* If a regulated investment company has a post-October capital loss or a post-October currency loss for any taxable year and an election under paragraph (f)(1) is made for that year, then, for purposes of determining the taxable income of the company for the succeeding year and all subsequent years, all capital gains and losses taken into account in determining the post-October capital loss, and all foreign currency gains and losses taken into account in determining the post-October currency loss, that are not taken into account under the rules of paragraph (f)(3) of this section in determining the taxable income of the regulated investment company for the taxable year in which the loss arose shall be treated as arising on the first day of the succeeding year.

(5) *Effect on gross income.* An election by a regulated investment company to defer any post-October capital loss or any post-October currency loss for a taxable year under paragraph (f)(1) of this section shall not affect the amount of the gross income of such company for such taxable year (or the succeeding year) for purposes of section 851(b) (2) or (3).

(g) *Earnings and profits*—(1) *General rule.* The earnings and profits of a regulated investment company for a taxable year are determined without regard to any post-October capital loss or post-October currency loss for that year. If a regulated investment company distributes with respect to a calendar year amounts in excess of the limitation described in the succeeding sentence, then, with respect to those excess amounts, for the taxable year with respect to which the amounts are distributed, the earnings and profits of the company are computed without regard to the preceding sentence. The limitation described in this sentence is the amount that would be the required distribution for that calendar year under section 4982 if ‘‘100 percent’’ were substituted for each percentage set forth in section 4982(b)(1).

(2) *Special Rule—Treatment of losses that are deferred for purposes of determining taxable income.* If a regulated investment company elects to defer, under paragraph (f)(1) of this section, any part of a post-October capital loss or post-October currency loss arising in a taxable year, then, for both the taxable year in which the loss arose and the succeeding year, both the earnings and profits and the accumulated earnings and profits of the company are determined as if the part of the loss so deferred had arisen on the first day of the succeeding year.

(h) *Examples.* The provisions of paragraphs (e), (f), and (g) of this section may be illustrated by the following examples. For each example, assume that X is a regulated investment company that computes its income on a calendar year basis, and that no election is in effect under section 4982(e)(4).

Example 1. X has a $25 net foreign currency gain, a $50 net short-term capital loss, and a $75 net long-term capital gain for the post-October period of 1988. X has no post-October currency loss and no post-October capital loss for 1988, and this section does not apply.

Example 2. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	75 (150)	150 (50)
	(75)	100
01/01 to 10/31/89	30 (5)	40 (20)
	25	20
11/01 to 12/31/89	35 (0)	100 (50)
	35	50

X has a post-October capital loss of $75 for its 1988 taxable year due to a net long-term capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to $100 as a capital gain dividend for 1988 because X must disregard the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for the purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may not designate any amount as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the $75 long-term capital gain and the $150 long-term capital loss for its post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X’s taxable income for 1988 will include a net capital gain of $25 and a net short-term capital gain of $160. X’s taxable income for 1989 will include a net capital gain of $60 and a net short-term capital gain of $70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988. X must, however, include the $75 long-term capital gain and $150 long-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes $260 of capital gain in its earnings and profits for 1988, includes $185 in its accumulated earnings and profits for 1988, and includes $130 of capital gain in its earnings and profits for 1989.

Example 3. Same facts as example 2, except that X elects to defer the entire $75 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 2.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988 because it made an election to defer the entire $75 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $100 and a net short-term capital gain of $160. X must include the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net long-term capital loss of $15 and a net short-term capital gain of $70.

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the $75 long-term capital gain and $150 long-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $75 long-term capital gain and $150 long-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include $260 of capital gain in its earnings and profits for 1988 and $55 of capital gain in its earnings and profits for 1989.

Example 4. Same facts as example 2, except that X elects to defer only $50 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same results as in example 2.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the $75 long-term capital gain and $125 of the $150 long-term capital loss for the post-October period of 1988 because it made an election to defer $50 of the $75 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $75 and a net short-term capital gain of $160. X must include the $75 long-term capital gain and $125 of the $150 long-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of $10 and a net short-term capital gain of $70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $75 long-term capital gain and the $150 long-term capital loss for the post-October period of 1988. X must include $25 of the $150 long-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $75 long-term capital gain and $125 of the $150 long-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes $260 of capital gain in its earnings and profits for 1988, includes $235 in its accumulated earnings and profits for 1988, and includes $80 of capital gain in its earnings and profits for 1989.

Example 5. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	150 (75)	50 (150)
	75	(100)
01/01 to 10/31/89	30 (5)	40 (20)
	25	20
11/01 to 12/31/89	35 (0)	100 (50)
	35	50

X has a post-October capital loss of $25 for its 1988 taxable year due to a net capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to $100 as a capital gain dividend for 1988 because X must disregard the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may designate up to $105 as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X's taxable income for 1988 will include a net capital gain of $135 (consisting of a net long-term capital gain of $175 and a net short-term capital loss of $40). X's taxable income for 1989 will include a net capital gain of $60 and a net short-term capital gain of $70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988. X must, however, include the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes $160 of capital gain in its earnings and profits for 1988, includes $135 in its accumulated earnings and profits for 1988, and includes $130 of capital gain in its earnings and profits for 1989.

Example 6. Same facts as example 5, except that X elects to defer the entire $25 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 5.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 because it made an election to defer the entire $25 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $100 and a net short-term capital gain of $60. X must include the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of $105 (consisting of a net long-term capital gain of $135 and a net short-term capital loss of $30).

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include $160 of capital gain in its earnings and profits for 1988 and $105 of capital gain in its earnings and profits for 1989.

Example 7. Same facts as example 5, except that X elects to defer only $20 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 5.

(ii) *Taxable income.* X must compute its taxable income for 1988 by including $5 of the $150 short-term capital loss for the post-October period of 1988, but without regard to the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and $145 of the $150 short-term capital loss for the post-October period of 1988 because it made an election to defer $20 of the $25 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $100 and a net short-term capital gain of $55. X must include the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and $145 of the $150 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of $110 (consisting of a long-term capital gain of $135 and a net short-term capital loss of $25).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and the $150 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1988, X must include $5 of the $150 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $150 long-term capital gain, the $75 long-term capital loss, the $50 short-term capital gain, and $145 of the $150 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes $160 of capital gain in its earnings and profits for 1988, includes $155 in its accumulated earnings and profits for 1988, and includes $110 of capital gain in its earnings and profits for 1989.

Example 8. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	15 (75)	25 (10)
	(60)	15
01/01 to 10/31/89	80 (5)	50 (100)
	75	(50)
11/01 to 12/31/89	85 (0)	40 (20)
	85	20

X has a post-October capital loss of $45 for its 1988 taxable year due to a net capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to $100 as a capital gain dividend for 1988 because X must disregard the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may designate up to $85 as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X's taxable income for 1988 will include a net capital gain of $40 and a net short-term capital gain of $75. X's taxable income for 1989 will include a net capital gain of $130 for 1989 (consisting of a net long-term capital gain of $160 and a net short-term capital loss of $30).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988. X must, however, include the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes $160 of capital gain in its earnings and profits for 1988, includes $115 in its accumulated earnings and profits for 1988, and includes $130 of capital gain in its earnings and profits for 1989.

Example 9. Same facts as example 8, except that X elects to defer the entire $45 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 8.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 because it made an election to defer the entire $45 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $100 and a net short-term capital gain of $60. X must include the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of $85 (consisting of a net long-term capital gain of $100 and a net short-term capital loss of $15).

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include $160 of capital gain in its earnings and profits for 1988 and $85 of capital gain in its earnings and profits for 1989.

Example 10. Same facts as example 8, except that X elects to defer only $30 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 8.

(ii) *Taxable income.* X must compute its taxable income for 1988 by including $5 of the $75 long-term capital loss and the $10 short-term capital loss for the post-October period of 1988, but without regard to the $15 long-term capital gain, $70 of the $75 long-term capital loss, and the $25 short-term capital gain for the post-October period of 1988 because it made an election to defer $30 of the $45 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of $95 and a net short-term capital gain of $50. X must include the $15 long-term capital gain, $70 of the $75 long-term capital loss, and the $25 short-term capital gain for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of $100 (consisting of a net long-term capital gain of $105 and a net short-term capital loss of $5).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $15 long-term capital gain, the $75 long-term capital loss, the $25 short-term capital gain, and the $10 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1988, X must include $5 of the $75 long-term capital loss and the $10 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the $15 long-term capital gain, $70 of the $75 long-term capital loss, and the $25 short-term capital gain for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes $160 of capital gain in its earnings and profits for 1988, includes $145 in its accumulated earnings and profits for 1989, and includes $100 of capital gain in its earnings and profits for 1989 (consisting of a net long-term capital gain of $105 and a net short-term capital loss of $5).

Example 11. X has the following foreign currency gains and losses attributable to the periods indicated:

01/01 to 10/31/88	200
11/01 to 12/31/88	(100)
01/01 to 10/31/89	110
11/01 to 12/31/89	40

X has a $100 post-October currency loss for its 1988 taxable year due to a net foreign currency loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Taxable income.* X must compute its taxable income for 1988 by including the $100 foreign currency loss for the post-October period of 1988 because it did not make an election under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of $100. X's taxable income for 1989 will include a net foreign currency gain of $150.

(ii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the foreign currency loss for the post-October period of 1988. X must, however, include the $100 foreign currency loss for the post-October period 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes $200 of foreign currency gain in its earnings and profits for 1988, includes $100 in its accumulated earnings and profits for 1988, and includes $150 of foreign currency gain in its earnings and profits for 1989.

Example 12. Same facts as example 11, except that X elects to defer the entire $100 post-October currency loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Taxable income.* X must compute its taxable income for 1988 without regard to the $100 foreign currency loss for the post-October period of 1988 because it made an election to defer the entire $100 post-October currency loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of $200. X's taxable income for 1989 will include a net foreign currency gain of $50 because X must compute its taxable income for 1989 by including the $100 foreign currency loss for the post-October period of 1988 in addition to the foreign currency gains and losses for 1989.

(ii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the $100 foreign currency loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the foreign currency gains and losses for 1989) the $100 foreign currency loss for the post-October period 1988 as if that deferred loss arose on January 1, 1989. Thus, X will include $200 of foreign currency gain in its earnings and profits for 1988 and $50 of foreign currency gain in its earnings and profits for 1989.

Example 13. Same facts as example 11, except that X elects to defer only $75 of the post-October currency loss under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Taxable income.* X must compute its taxable income for 1988 by including $25 of the $100 foreign currency loss for the post-October period of 1988, but without regard to $75 of the $100 foreign currency loss for the post-October period of 1988 because it made an election to defer $75 of the $100 post-October currency loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of $175. X's taxable income will include a net foreign currency gain of $75 for

1989 because X must compute its taxable income for 1989 by including $75 of the $100 foreign currency loss for the post-October period of 1988 in addition to the foreign currency gains and losses for 1989.

(ii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the $100 foreign currency loss for the post-October period of 1988. X must, however, inlcude $25 of the $100 foreign currency loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the foreign currency gains and losses for 1989) the $75 of the $100 foreign currency loss for the post-October period of 1988 as if that loss arose on January 1, 1989. Thus, X includes $200 of foreign currency gain in its earnings and profits for 1988, includes $175 in its accumulated earnings and profits for 1988, and includes $75 of foreign currency gain in its earnings and profits for 1989.

(i) *Procedure for making election*—(1) *In general.* Except as provided in paragraph (i)(2) of this section, a regulated investment company may make an election under paragraph (f)(1) of this section for a taxable year to which this section applies by completing its income tax return (including any necessary schedules) for that taxable year in accordance with the instructions for the form that are applicable to the election.

(2) *When applicable instructions not available.* If the instructions for the income tax returns of regulated investment companies for a taxable year to which this section applies do not reflect the provisions of this section, a regulated investment company may make an election under paragraph (f)(1) of this section for that year by entering the appropriate amounts on its income tax return (including any necessary schedules) for that year, and by attaching a written statement to the return that states—

(i) The taxable year for which the election under this section is made;

(ii) The fact that the regulated investment company elects to defer all or a part of its post-October capital loss or post-October currency loss for that taxable year for purposes of computing its taxable income under the terms of this section;

(iii) The amount of the post-October capital loss or post-October currency loss that the regulated investment company elects to defer for that taxable year; and

(iv) The name, address, and employer identification number of the regulated investment company.

(j) *Transition rules*—(1) *In general.* For a taxable year ending before March 2, 1990 in which a regulated investment company incurred a post-October capital loss or post-October currency loss, the company may use any method that is consistently applied and in accordance with reasonable business practice to determine the amounts taken into account in that taxable year for purposes of paragraphs (e)(2), (f)(3), and (g) of this section and to determine the amount taken into account in the succeeding year for purposes of paragraphs (e)(3), (f)(4), and (g) of this section. For example, for purposes of paragraph (e), a taxpayer may use a method that treats as incurred in a taxable year all capital gains taken into account in computing the post–October capital loss for that year and an amount of capital loss for such period equal to the amount of such gains and that treats the remaining amount of capital loss for such period as arising on the first day of the succeeding year.

Similarly, for purposes of paragraph (e)(3), a taxpayer may use a method that treats as arising on the first day of the succeeding year only the excess of the capital losses from sales or exchanges after October 31 over the capital gains for such period (that is, the net capital loss or net long-term capital loss for such period).

(2) *Retroactive election*—(i) *In general.* A regulated investment company may make an election (a ‘‘retroactive election’’) under paragraph (f)(1) for a taxable year with respect to which it has filed an income tax return on or before May 1, 1990 (a ‘‘retroactive election year’’) by filing an amended return (including any necessary schedules) for the retroactive election year reflecting the appropriate amounts and by attaching a written statement to the return that complies with the requirements of paragraph (i)(2) of this section.

(ii) *Deadline for making election.* A retroactive election may be made no later than December 31, 1990.

(3) *Amended return required for succeeding year in certain circumstances*—(i) *In general.* If, at the time a regulated investment company makes a retroactive election under this section, it has already filed an income tax return for the succeeding year, the company must file an amended return for such succeeding year reflecting the appropriate amounts.

(ii) *Time for filing amended return.* An amended return required under paragraph (j)(3)(i) of this section must be filed together with the amended return described in paragraph (j)(2)(i).

(4) *Retroactive dividend*—(i) *In general.* A regulated investment company that makes a retroactive election under this section for a retroactive election year may elect to treat any dividend (or portion thereof) declared and paid (or treated as paid under section 852(b)(7)) by the regulated investment company after the retroactive election year and on or before December 31, 1990 as having been paid during the retroactive election year (a ‘‘retroactive dividend’’). This election shall be irrevocable with respect to the retroactive dividend to which it applies.

(ii) *Method of making election.* The election under this paragraph (j)(4) must be made by the regulated investment company by treating the dividend (or portion thereof) to which the election applies as a dividend paid during the retroactive election year in computing its deduction for dividends paid in its tax returns for all applicable years (including the amended return(s) required to be filed under paragraphs (j)(2) and (3) of this section).

(iii) *Deduction for dividends paid*—(A) *In general.* Subject to the rules of sections 561 and 562, a regulated investment company shall include the amount of any retroactive dividend in computing its deduction for dividends paid for the retroactive election year. No deduction for dividends paid shall be allowed under this paragraph (j)(4)(iii)(A) for any amount not paid (or treated as paid under section 852(b)(7)) on or before December 31, 1990.

(B) *Limitation on ordinary dividends.* The amount of retroactive dividends (other than retroactive dividends qualifying as capital gain dividends) paid for a retroactive election year under this section shall not exceed the increase, if any, in the investment company taxable income of the regulated investment company (determined without regard to the deduction for dividends paid (as defined in section 561)) that is attributable solely to the regulated investment company having made the retroactive election.

(C) *Limitation on capital gain dividends.* The amount of retroactive dividends qualifying as capital gain dividends paid for a retroactive election year under this section shall not exceed the increase, if any, in the amount of the excess described in section 852(b)(3)(A) (relating to the excess of the net capital gain over the deduction for capital gain dividends paid) that is attributable solely to the regulated investment company having made the retroactive election.

(D) *Effect on other years.* A retroactive dividend shall not be includible in computing the deduction for dividends paid for—

(*1*) The taxable year in which such distribution is actually paid (or treated as paid under section 852(b)(7)); or

(*2*) Under section 855(a), the taxable year preceding the retroactive election year.

(iv) *Earnings and profits.* A retroactive dividend shall be considered as paid out of the earnings and profits of the retroactive election year (computed with the application of sections 852(c) and 855, § 1.852–5, § 1.855–1, and this section), and not out of the earnings and profits of the taxable year in which the distribution is actually paid (or treated as paid under section 852(b)(7)).

(v) *Receipt by shareholders.* Except as provided in section 852(b)(7), a retroactive dividend shall be included in the gross income of the shareholders of the regulated investment company for the taxable year in which the dividend is received by them.

(vi) *Foreign tax election.* If a regulated investment company to which section 853 (relating to foreign taxes) is applicable for a retroactive election year elects to treat a dividend paid (or treated as paid under section 852(b)(7)) during the taxable year as a retroactive dividend, the shareholders of the regulated investment company shall consider the amounts described in section 853(b)(2) allocable to such distribution as paid or received, as the case may be, in the shareholder's taxable year in which the distribution is made.

(vii) *Example.* The provisions of this paragraph (j)(4) may be illustrated by the following example:

Example. X is a regulated investment company that computes its income on a calendar year basis. No election is in effect under section 4982(e)(4). X has the following income for 1988:

FOREIGN CURRENCY GAINS AND LOSSES

Gains and Losses

Jan. 1–Oct. 31—100
Nov. 1–Dec. 31—(75)

CAPITAL GAINS AND LOSSES

Jan. 1–Oct. 31—short term, 100; long term, 100
Nov. 1–Dec. 31—short term, 50; long term, (100)

(A) X had investment company taxable income of $175 and no net capital gain for 1988 for taxable income purposes. X distributed $175 of investment company taxable income as an ordinary dividend for 1988.

(B) If X makes a retroactive election under this section to defer the entire $75 post-October currency loss and the entire $50 post-October capital loss for the post-October period of its 1988 taxable year for purposes of computing its taxable income, that deferral increases X's investment company taxable income for 1988 by $25 (due to an increase in foreign currency gain of $75 and a decrease in short-term capital gain of $50) to $200 and increases the excess described in section 852(b)(3)(A) for 1988 by $100 from $0 to $100. The amount that X may treat as a retroactive ordinary dividend is limited to $25, and the amount that X may treat as a retroactive capital gain dividend is limited to $100.

(5) *Certain distributions may be designated retroactively as capital gain dividends.* To the extent that a regulated investment company designated as capital gain dividends for a taxable year less than the maximum amount permitted under paragraph (e) of this section for that taxable year, the regulated investment company may designate an additional amount of dividends paid (or treated as paid under sections 852(b)(7) or 855, or paragraph (j)(4) of this section) for the taxable year as capital gain dividends, notwithstanding that a written notice was not mailed to its shareholders within 60 days after the close of the taxable year in which the distribution was paid (or treated as paid under section 852(b)(7)).

(k) *Effective date.* the provisions of this section shall apply to taxable years ending after October 31, 1987.

[T.D. 8287, 55 FR 3213, Jan. 31, 1990; 55 FR 7891, Mar. 6, 1990; 55 FR 11110, Mar. 26, 1990. Redesignated and amended by T.D. 8320, 55 FR 50176, Dec. 5, 1990; 56 FR 2808, Jan. 24, 1991; 56 FR 8130, Feb. 27, 1991]

§ 1.852–12 Non-RIC earnings and profits.

(a) *Applicability of section 852(a)(2)(A)*—(1) *In general.* An investment company does not satisfy section 852(a)(2)(A) unless—

(i) Part I of subchapter M applied to the company for all its taxable years ending on or after November 8, 1983; and

(ii) For each corporation to whose earnings and profits the investment company succeeded by the operation of section 381, part I of subchapter M applied for all the corporation's taxable years ending on or after November 8, 1983.

(2) *Special rule.* See section 1071(a)(5)(D) of the Tax Reform Act of 1984, Public Law 98–369 (98 Stat. 1051), for a special rule which treats part I of subchapter M as having applied to an investment company's first taxable year ending after November 8, 1983.

(b) *Applicability of section 852(a)(2)(B)*—(1) *In general.* An investment company does not satisfy section 852(a)(2)(B) unless, as of the close of the taxable year, it has no earnings and profits other than earnings and profits that—

(i) Were earned by a corporation in a year for which part I of subchapter M applied to the corporation and, at all times thereafter, were the earnings and profits of a corporation to which part I of subchapter M applied;

(ii) By the operation of section 381 pursuant to a transaction that occurred before December 22, 1992, became the earnings and profits of a corporation to which part I of subchapter M applied and, at all times thereafter, were the earnings and profits of a corporation to which part I of subchapter M applied;

(iii) Were accumulated in a taxable year ending before January 1, 1984, by a corporation to which part I of subchapter M applied for any taxable year ending before November 8, 1983; or

(iv) Were accumulated in the first taxable year of an investment company that began business in 1983 and that was not a successor corporation.

(2) *Prior law.* For purposes of paragraph (b) of this section, a reference to part I of subchapter M includes a reference to the corresponding provisions of prior law.

(c) *Effective date.* This regulation is effective for taxable years ending on or after December 22, 1992.

[T.D. 8483, 58 FR 43798, Aug. 18, 1993; 58 FR 49352, Sept. 22, 1993]

§ 1.853–1 Foreign tax credit allowed to shareholders.

(a) *In general.* Under section 853, a regulated investment company, meeting the requirements set forth in section 853(a) and paragraph (b) of this section, may make an election with respect to the income, war-profits, and excess profits taxes described in section 901(b)(1) which it pays to foreign countries or possessions of the United States during the taxable year, including such taxes as are deemed paid by it under the provisions of any income tax convention to which the United States is a party. If an election is made, the shareholders of the regulated investment company shall apply their proportionate share of such foreign taxes paid, or deemed to have been paid by it pursuant to any income tax convention, as either a credit (under section 901) or as a deduction (under section 164(a)) as provided by section 853(b)(2) and paragraph (b) of § 1.853–2. The election is not applicable with respect to taxes deemed to have been paid under section 902 (relating to the credit allowed to corporate stockholders of a foreign corporation for taxes paid by such foreign corporation).

(b) *Requirements.* To qualify for the election provided in section 853(a), a regulated investment company (1) must have more than 50 percent of the value of its total assets, at the close of the taxable year for which the election is made, invested in stocks and securities of foreign corporations, and (2) must also, for that year, comply with the requirements prescribed in section 852(a) and paragraph (a) of § 1.852–1. The term ‘‘value’’, for purposes of the first requirement, is defined in section 851(c)(4). For the definition of foreign corporation, see section 7701(a).

§ 1.853–2 Effect of election.

(a) *Regulated investment company.* A regulated investment company making a valid election with respect to a taxable year under the provisions of section 853(a) is, for such year, denied both the deduction for foreign taxes provided by section 164(a) and the credit for foreign taxes provided by section 901 with respect to all income, war-profits, and excess profits taxes (described in section 901(b)(1)) which it has paid to any foreign country or possession of the United States. See section 853(b)(1)(A). However, under section 853(b)(1)(B), the regulated investment company is permitted to add the amount of such foreign taxes paid to its dividends paid deduction for that taxable year. See paragraph (a) of § 1.852–1.

(b) *Shareholder.* Under section 853(b)(2), a shareholder of an investment company, which has made the election under section 853, is, in effect, placed in the same position as a person directly owning stock in foreign corporations, in that he must include in his gross income (in addition to taxable dividends actually received) his proportionate share of such foreign taxes paid and must treat such amount as foreign taxes paid by him for the purposes of the deduction under section 164(a) and the credit under section 901. For such purposes he must treat as gross income from a foreign country or possession of the United States (1) his proportionate share of the taxes paid by the regulated investment company to such foreign country or possession and (2) the portion of any dividend paid by the investment company which represents income derived from such sources.

(c) *Dividends paid after the close of the taxable year.* For additional rules applicable to certain distributions made after the close of the taxable year which may be designated as income received from sources within and taxes paid to foreign countries or possessions of the United States, see section 855(d) and paragraph (f) of §1.855–1.

(d) *Example.* This section may be illustrated as follows:

(1) The X Corporation, a regulated investment company, has total assets, at the close of the taxable year, of $10 million invested as follows:

Domestic corporations		$4,000,000
Foreign corporations in:		
Country A	$3,500,000	
Country B	2,500,000	
		6,000,000
Total assets		10,000,000

(2) The dividend income of X Corporation is received from the following sources:

Domestic corporations		$300,000
Foreign corporations:		
Country A	$250,000	
Country B	250,000	
		500,000
Total dividend income		800,000
Operation and management expenses		80,000
Net dividend income		720,000
Taxes withheld by Country B on dividends of $250,000 at a rate of 10 percent	25,000	
Taxes withheld by Country B on dividends of $250,000 at a rate of 20 percent	50,000	
Total foreign taxes withheld		75,000
Income available for distribution		$645,000

(3) X Corporation has 250,000 shares of common stock outstanding and distributes the entire $645,000 as a dividend of $2.58 per share of stock.

(4) The X Corporation meets the 50 percent requirement of section 851(b)(4) and the requirements of section 852(a). It notifies each shareholder by mail, within the time prescribed by section 853(c), that by reason of the election they are to treat as foreign taxes paid $0.30 per share of stock ($75,000 of foreign taxes paid, divided by the 250,000 shares of stock outstanding), of which $0.20 represents taxes paid to Country B and $0.10 taxes paid to Country A. The shareholders must report as income $2.88 per share ($2.58 of dividends actually received plus the $0.30 representing foreign taxes paid). Of the $2.88 per share, $1.80 per share ($450,000 (which represents such part of the net dividend income of $720,000 as the foreign dividend income of $500,000 bears to the total dividend income of $800,000) divided by 250,000 shares) is to be considered as received from foreign sources. Ninety cents is to be considered as received from Country A, and ninety cents from Country B.

§1.853–3 Notice to shareholders.

(a) *General rule.* If a regulated investment company makes an election under section 853(a), in the manner provided in §1.853–4, the investment company is required, under section 853(c), to furnish its shareholders with a written notice mailed not later than 45 days (30 days for taxable years ending before February 26, 1964) after the close of its taxable year. The notice must designate the shareholder's portion of foreign taxes paid to each such country or possession and the portion of the dividend which represents income derived from sources within each such country or possession. For purposes of section 853(b)(2) and paragraph (b) of §1.853–2, the amount that a shareholder may treat as his proportionate share of foreign taxes paid and the amount to be included as gross income derived from any foreign country or possession of the United States shall not exceed the amounts so designated by the company in such written notice. If, however, the amount designated by the company in the notice exceeds the shareholder's proper proportionate share of foreign taxes or gross income from sources within any foreign country or possession, the shareholder is limited to the amount correctly ascertained.

(b) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (b) of §1.851–7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts of foreign taxes paid to each such country or possession and the holder's proportionate share of the dividend which represents income derived from sources within each country or possession shown on the notice received by the nominee pursuant to paragraph (a) of this section. The notice shall include the name and address of the nominee identified as such. This paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return for the taxable year is to be filed, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period: *Provided however,* if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

[T.D. 7187, 37 FR 13257, July 6, 1972]

§ 1.853–4 Manner of making election.

(a) *General rule.* A regulated investment company, to make a valid election under section 853, must—

(1) File with Form 1099 and Form 1096 a statement as part of its return which sets forth the following information:

(i) The total amount of income received from sources within foreign countries and possessions of the United States;

(ii) The total amount of income, war profits, or excess profits taxes (described in section 901(b)(1)) paid, or deemed to have been paid under the provisions of any treaty to which the United States is a party, to such foreign countries or possessions;

(iii) The date, form, and contents of the notice to its shareholders;

(iv) The proportionate share of such taxes paid during the taxable year and foreign income received during such year attributable to one share of stock of the regulated investment company; and

(2) File as part of its return for the taxable year a Form 1118 modified so that it becomes a statement in support of the election made by a regulated investment company for taxes paid to a foreign country or a possession of the United States.

(b) *Irrevocability of the election.* The election is applicable only with respect to taxable years subject to the Code, shall be made with respect to all such foreign taxes, and must be made not later than the time prescribed for filing the return (including extensions thereof). Such election, if made, shall be irrevocable with respect to the dividend (or portion thereof), and the foreign taxes paid with respect thereto, to which the election applies.

§ 1.854–1 Limitations applicable to dividends received from regulated investment company.

(a) *In general.* Section 854 provides special limitations applicable to dividends received from a regulated investment company for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporations, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34.

(b) *Capital gain dividend.* Under the provisions of section 854(a) a capital gain dividend as defined in section 852(b)(3) and paragraph (c) of § 1.852–4 shall not be considered a dividend for purposes of the exclusion under section 116, the deduction under section 243, and, in the case of taxable years ending before January 1, 1965, the credit under section 34.

(c) *Rule for dividends other than capital gain dividends.* (1) Section 854(b)(1) limits the amount that may be treated as a dividend (other than a capital gain dividend) by the shareholder of a regulated investment company, for the purposes of the credit, exclusion, and deduction specified in paragraph (b) of this section, where the investment company receives substantial amounts of income (such as interest, etc.) from sources other than dividends from domestic corporations, which dividends qualify for the exclusion under section 116.

(2) Where the ‘‘aggregate dividends received’’ (as defined in section 854(b)(3)(B) and paragraph (b) of §1.854–3) during the taxable year by a regulated investment company (which meets the requirements of section 852(a) and paragraph (a) of §1.852–1 for the taxable year during which it paid such dividend) are less than 75 percent of its gross income for such taxable year (as defined in section 854(b)(3)(A) and paragraph (a) of §1.854–3), only that portion of the dividend paid by the regulated investment company which bears the same ratio to the amount of such dividend paid as the aggregate dividends received by the regulated investment company, during the taxable year, bears to its gross income for such taxable year (computed without regard to gains from the sale or other disposition of stocks or securities) may be treated as a dividend for purposes of such credit, exclusion, and deduction.

(3) Subparagraph (2) of this paragraph may be illustrated by the following example:

Example. The XYZ regulated investment company meets the requirements of section 852(a) for the taxable year and has received income from the following sources:

Capital gains (from the sale of stock or securities)	$100,000
Dividends (from domestic sources other than dividends described in section 116(b))	70,000
Dividend (from foreign corporations)	5,000
Interest	25,000
Total	200,000
Expenses	20,000
Taxable income	180,000

The regulated investment company decides to distribute the entire $180,000. It distributes a capital gain dividend of $100,000 and a dividend of ordinary income of $80,000. The aggregate dividends received by the regulated investment company from domestic corporations ($70,000) is less than 75 percent of its gross income ($100,000) computed without regard to capital gains from sales of securities. Therefore, an apportionment is required. Since $70,000 is 70 percent of $100,000, out of every $1 dividend of ordinary income paid by the regulated investment company only 70 cents would be available for the credit, exclusion, or deduction referred to in section 854(b)(1). The capital gains dividend and the dividend received from foreign corporations are excluded from the computation.

(d) *Dividends received from a regulated investment company during taxable years of shareholders ending after July 31, 1954, and subject to the Internal Revenue Code of 1939.* For the application of section 854 to taxable years of shareholders of a regulated investment company ending after July 31, 1954, and subject to the Internal Revenue Code of 1939, see §1.34–5 and §1.116–2.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8756, June 20, 1967]

§1.854–2 Notice to shareholders.

(a) *General rule.* Section 854(b)(2) provides that the amount that a shareholder may treat as a dividend for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporation, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34, shall not exceed the amount so designated by the company in a written notice to its shareholders mailed not later than 45 days (30 days for a taxable year ending before Feb. 26, 1964) after the close of the company’s taxable year. If, however, the amount so designated by the company in the notice exceeds the amount which may be treated by the shareholder as a dividend for such purposes, the shareholder is limited to the amount as correctly ascertained under section 854(b)(1) and paragraph (c) of §1.854–1.

(b) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts that may be treated as a dividend for purposes of the exclusion under section 116 for dividends received by individuals and the deduction under section 243 for dividends received by corporations shown on the notice received by the nominee pursuant to paragraph (a) of this section. This notice shall include the name and address of the nominee identified as such. This paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

[T.D. 7187, 37 FR 13257, July 6, 1972]

§ 1.854–3 Definitions.

(a) For the purpose of computing the limitation prescribed by section 854(b)(1)(B) and paragraph (c) of § 1.854–1, the term ''gross income'' does not include gain from the sale or other disposition of stock or securities. However, capital gains arising from the sale or other disposition of capital assets, other than stock or securities, shall not be excluded from gross income for this purpose.

(b) The term ''aggregate dividends received'' includes only dividends received from domestic corporations other than dividends described in section 116(b) (relating to dividends not eligible for exclusion from gross income). Accordingly, dividends received from foreign corporations will not be included in the computation of ''aggregate dividends received''. In determining the amount of any dividend for purposes of this section, the rules provided in section 116(c) (relating to certain distributions) shall apply.

§ 1.855–1 Dividends paid by regulated investment company after close of taxable year.

(a) *General rule.* In—

(1) Determining under section 852(a) and paragraph (a) of § 1.852–1 whether the deduction for dividends paid during the taxable year (without regard to capital gain dividends) by a regulated investment company equals or exceeds 90 percent of its investment company taxable income (determined without regard to the provisions of section 852(b)(2)(D)),

(2) Computing its investment company taxable income (under section 852(b)(2) and § 1.852–3), and

(3) Determining the amount of capital gain dividends (as defined in section 852(b)(3) and paragraph (c) of § 1.852–4 paid during the taxable year,

any dividend (or portion thereof) declared by the investment company either before or after the close of the taxable year but in any event before the time prescribed by law for the filing of its return for the taxable year (including the period of any extension of time granted for filing such return) shall, to the extent the company so elects in such return, be treated as having been paid during such taxable year. This rule is applicable only if the entire amount of such dividend is actually distributed to the shareholders in the 12-month period following the close of such taxable year and not later than the date of the first regular dividend payment made after such declaration.

(b) *Election*—(1) *Method of making election*. The election must be made in the return filed by the company for the taxable year. The election shall be made by the taxpayer (the regulated investment company) by treating the dividend (or portion thereof) to which such election applies as a dividend paid during the taxable year in computing its investment company taxable income, or if the dividend (or portion thereof) to which such election applies is to be designated by the company as a capital gain dividend, in computing the amount of capital gain dividends paid during such taxable year. The election provided in section 855(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of section 852(c) and §1.852–5) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year (not including distributions with respect to which an election has been made for a prior year under section 855(a)). The dividend or portion thereof, with respect to which the regulated investment company has made a valid election under section 855(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(2) *Irrevocability of the election*. After the expiration of the time for filing the return for the taxable year for which an election is made under section 855(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) *Receipt by shareholders*. Under section 855(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includible in the gross income of the shareholders of the regulated investment company for the taxable year in which the dividend is received by them.

(d) *Examples*. The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example 1. The X Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of $100,000. During that year the company distributed to shareholders taxable dividends aggregating $88,000. On March 10, 1955, the company declared a dividend of $37,000 payable to shareholders on March 20, 1955. Such dividend consisted of the first regular quarterly dividend for 1955 of $25,000 plus an additional $12,000 representing that part of the taxable income for 1954 which was not distributed in 1954. On March 15, 1955, the X Company filed its federal income tax return and elected therein to treat $12,000 of the total dividend of $37,000 to be paid to shareholders on March 20, 1955, as having been paid during the taxable year 1954. Assuming that the X Company actually distributed the entire amount of the dividend of $37,000 on March 20, 1955, an amount equal to $12,000 thereof will be treated for the purposes of section 852(a) as having been paid during the taxable year 1954. Such amount ($12,000) will be considered by the X Company as a distribution out of the earnings and profits for the taxable year 1954, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them.

Example 2. The Y Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of $100,000, and for 1955 taxable income (and earnings or profits) of $125,000. On January 1, 1954, the company had a deficit in its earnings and profits accumulated since February 28, 1913, of $115,000. During the year 1954 the company distributed to shareholders taxable dividends aggregating $85,000. On March 5, 1955, the company declared a dividend of $65,000 payable to shareholders on March 31, 1955. On March 15, 1955, the Y Company filed its federal income tax return in which it included $40,000 of the total dividend of $65,000 payable to shareholders on March 31, 1955, as a dividend paid by it during the taxable year 1954. On March 31, 1955, the Y Company distributed the entire amount of the dividend of $65,000 declared on March 5, 1955. The election under section 855(a) is valid only to the extent of $15,000, the amount of the undistributed earnings and profits for 1954 ($100,000 earnings and profits less $85,000 distributed during 1954). The remainder ($50,000) of the $65,000 dividend paid on March 31, 1955, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Company out of earnings and profits for the taxable year 1955. Assuming that the only other distribution by the Y Company during 1955 was a distribution of $75,000 paid as a dividend on October 31, 1955, the total amount of the distribution of $65,000 paid on March 31, 1955, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Company will treat the amount of $15,000 as a distribution of the earnings or profits of the company for the taxable year 1954, and the remaining $50,000 as a distribution of the earnings or profits for the year 1955. The distribution of $75,000 on October 31, 1955, is, of course, a taxable dividend out of the earnings and profits for the year 1955.

(e) *Notice to shareholders.* Section 855(c) provides that in the case of dividends, with respect to which a regulated investment company has made an election under section 855(a), any notice to shareholders required under subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. Thus, the notice requirements of section 852(b)(3)(C) and paragraph (c) of § 1.852–4 with respect to capital gain dividends, section 853(c) and § 1.853–3 with respect to allowance to shareholder of foreign tax credit, and section 854(b)(2) and § 1.854–2 with respect to the amount of a distribution which may be treated as a dividend, may be satisfied with respect to amounts to which section 855(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. If the notice under section 855(c) relates to an election with respect to any capital gain dividends, such capital gain dividends shall be aggregated by the investment company with the designated capital gain dividends actually paid during the taxable year to which the election applies (not including such dividends with respect to which an election has been made for a prior year under section 855) for the purpose of determining whether the aggregate of the designated capital gain dividends with respect to such taxable year of the company is greater than the excess of the net long-term capital gain over the net short-term capital loss of the company. See section 852(b)(3)(C) and paragraph (c) of § 1.852–4.

(f) *Foreign tax election.* Section 855(d) provides that in the case of an election made under section 853 (relating to foreign taxes), the shareholder of the investment company shall consider the foreign income received, and the foreign tax paid, as received and paid, respectively, in the shareholder's taxable year in which distribution is made.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8757, June 20, 1967]

REAL ESTATE INVESTMENT TRUSTS

§ 1.856–0 Revenue Act of 1978 amendments not included.

The regulations under part II of subchapter M of the Code do not reflect the amendments made by the Revenue Act of 1978, other than the changes made by section 362 of the Act, relating to deficiency dividends.

[T.D. 7767, 46 FR 11265, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.856–1 Definition of real estate investment trust.

(a) *In general.* The term ''real estate investment trust'' means a corporation, trust, or association which (1) meets the status conditions in section 856(a) and paragraph (b) of this section, and (2) satisfies the gross income and asset diversification requirements under the limitations of section 856(c) and § 1.856–2. (See, however, paragraph

(f) of this section, relating to the requirement that, for taxable years beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association).

(b) *Qualifying conditions.* To qualify as a ''real estate investment trust'', an organization must be one—

(1) Which is managed by one or more trustees or directors,

(2) The beneficial ownership of which is evidenced by transferable shares or by transferable certificates of beneficial interest,

(3) Which would be taxable as a domestic corporation but for the provisions of part II, subchapter M, chapter 1 of the Code,

(4) Which, in the case of a taxable year beginning before October 5, 1976, does not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business,

(5) Which is neither (i) a financial institution to which section 585, 586, or 593 applies, nor (ii) an insurance company to which subchapter L applies,

(6) The beneficial ownership of which is held by 100 or more persons, and

(7) Which would not be a personal holding company (as defined in section 542) if all of its gross income constituted personal holding company income (as defined in section 543).

(c) *Determination of status.* The conditions described in subparagraphs (1) through (5) of paragraph (b) of this section must be met during the entire taxable year and the condition described in subparagraph (6) of paragraph (b) of this section must exist during at least 335 days of a taxable year of 12 months or during a proportionate part of a taxable year of less than 12 months. The days during which the latter condition must exist need not be consecutive. In determining the minimum number of days during which the condition described in paragraph (b)(6) of this section is required to exist in a taxable year of less than 12 months, fractional days shall be disregarded. For example, in a taxable year of 310 days, the actual number of days prescribed would be 284 $^{38}/_{73}$ days ($^{310}/_{365}$ of 335). The fractional day is disregarded so that the required condition in such taxable year need exist for only 284 days.

(d) *Rules applicable to status requirements.* For purposes of determining whether an organization meets the conditions and requirements in section 856(a), the following rules shall apply.

(1) *Trustee.* The term ''trustee'' means a person who holds legal title to the property of the real estate investment trust, and has such rights and powers as will meet the requirement of ''centralization of management'' under paragraph (c) of §301.7701–2 of this chapter (Regulations on Procedure and Administration). Thus, the trustee must have continuing exclusive authority over the management of the trust, the conduct of its affairs, and (except as limited by section 856(d)(3) and §1.856–4) the management and disposition of the trust property. For example, such authority will be considered to exist even though the trust instrument grants to the shareholders any or all of the following rights and powers: To elect or remove trustees; to terminate the trust; and to ratify amendments to the trust instrument proposed by the trustee. The existence of a mere fiduciary relationship does not, in itself, make one a trustee for purposes of section 856(a)(1). The trustee will be considered to hold legal title to the property of the trust, for purposes of this subparagraph, whether the title is held in the name of the trust itself, in the name of one or more of the trustees, or in the name of a nominee for the exclusive benefit of the trust.

(2) *Beneficial ownership.* Beneficial ownership shall be evidenced by transferable shares, or by transferable certificates of beneficial interest, and (subject to the provisions of paragraph (c) of this section) must be held by 100 or more persons, determined without reference to any rules of attribution. Provisions in the trust instrument or corporate charter or bylaws which permit the trustee or directors to redeem shares or to refuse to transfer shares in any case where the trustee or directors, in good faith, believe that a failure to redeem shares or that a transfer of shares would result in the loss of status as a real estate investment trust

will not render the shares ‘‘non-transferable.’’ For purposes of the regulations under part II of subchapter M, the terms ‘‘stockholder,’’ ‘‘stockholders,’’ ‘‘shareholder,’’ and ‘‘shareholders’’ include holders of beneficial interest in a real estate investment trust, the terms ‘‘stock,’’ ‘‘shares,’’ and ‘‘shares of stock’’ include certificates of beneficial interest, and the term ‘‘shares’’ includes shares of stock.

(3) *Unincorporated organization taxable as a domestic corporation.* The determination of whether an unincorporated organization would be taxable as a domestic corporation, in the absence of the provisions of part II of subchapter M, shall be made in accordance with the provisions of section 7701(a) (3) and (4) and the regulations thereunder and for such purposes an otherwise qualified real estate investment trust is deemed to satisfy the ‘‘objective to carry on business’’ requirement of paragraph (a) of §301.7701–2 of this chapter. (Regulations on Procedure and Administration).

(4) *Property held for sale to customers.* In the case of a taxable year beginning before October 5, 1976, a real estate investment trust may not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business. Whether property is held for sale to customers in the ordinary course of the trade or business of a real estate investment trust depends upon the facts and circumstances in each case.

(5) *Personal holding company.* A corporation, trust, or association, even though it may otherwise meet the requirements of part II of subchapter M, will not be a real estate investment trust if, by considering all of its gross income as personal holding company income under section 543, it would be a personal holding company as defined in section 542. Thus, if at any time during the last half of the trust’s taxable year more than 50 percent in value of its outstanding stock is owned (directly or indirectly under the provisions of section 544) by or for not more than 5 individuals, the stock ownership requirement in section 542(a)(2) will be met and the trust would be a personal holding company. See §1.857–8, relating to record requirements for purposes of determining whether the trust is a personal holding company.

(e) *Other rules applicable.* To the extent that other provisions of chapter 1 of the Code are not inconsistent with those under part II of subchapter M there of and the regulations thereunder, such provisions will apply with respect to both the real estate investment trust and its shareholders in the same manner that they would apply to any other organization which would be taxable as a domestic corporation. For example:

(1) Taxable income of a real estate investment trust is computed in the same manner as that of a domestic corporation;

(2) Section 301, relating to distributions of property, applies to distributions by a real estate investment trust in the same manner as it would apply to a domestic corporation;

(3) Sections 302, 303, 304, and 331 are applicable in determining whether distributions by a real estate investment trust are to be treated as in exchange for stock;

(4) Section 305 applies to distributions by a real estate investment trust of its own stock;

(5) Section 311 applies to distributions by a real estate investment trust;

(6) Except as provided in section 857(d), earnings and profits of a real estate investment trust are computed in the same manner as in the case of a domestic corporation;

(7) Section 316, relating to the definition of a dividend, applies to distributions by a real estate investment trust; and

(8) Section 341, relating to collapsible corporations, applies to gain on the sale or exchange of, or a distribution which is in exchange for, stock in a real estate investment trust in the same manner that it would apply to a domestic corporation.

(f) *Unincorporated status required for certain taxable years.* In the case of a taxable year beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association. Accordingly, in applying the regulations under part II of subchapter M of the Code with respect to such a taxable year, the term ''an unincorporated trust or unincorporated association'' is to be substituted for the term ''a corporation, trust, or association'' each place it appears, and the references to ''directors'' and ''corporate charter or bylaws'' are to be disregarded.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917, 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6598, 27 FR 4082, Apr. 28, 1962, as amended by T.D. 6928, 32 FR 13221, Sept. 19, 1967; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§1.856–2 Limitations.

(a) *Effective date.* The provisions of part II, subchapter M, chapter 1 of the Code, and the regulations thereunder apply only to taxable years of a real estate investment trust beginning after December 31, 1960.

(b) *Election.* Under the provisions of section 856(c)(1), a trust, even though it satisfies the other requirements of part II of subchapter M for the taxable year, will not be considered a ''real estate investment trust'' for such year, within the meaning of such part II, unless it elects to be a real estate investment trust for such taxable year, or has made such an election for a previous taxable year which has not been terminated or revoked under section 856(g)(1) or (2). The election shall be made by the trust by computing taxable income as a real estate investment trust in its return for the first taxable year for which it desires the election to apply, even though it may have otherwise qualified as a real estate investment trust for a prior year. No other method of making such election is permitted. An election cannot be revoked with respect to a taxable year beginning before October 5, 1976. Thus, the failure of an organization to be a qualified real estate investment trust for a taxable year beginning before October 5, 1976, does not have the effect of revoking a prior election by the organization to be a real estate investment trust, even though the organization is not taxable under part II of subchapter M for such taxable year. See section 856(g) and §1.856–8 for rules under which an election may be revoked with respect to taxable years beginning after October 4, 1976.

(c) *Gross income requirements.* Section 856(c) (2), (3), and (4), provides that a corporation, trust, or association is not a ''real estate investment trust'' for a taxable year unless it meets certain requirements with respect to the sources of its gross income for the taxable year. In determining whether the gross income of a real estate investment trust satisfies the percentage requirements of section 856(c) (2), (3), and (4), the following rules shall apply:

(1) *Gross income.* For purposes of both the numerator and denominator in the computation of the specified percentages, the term ''gross income'' has the same meaning as that term has under section 61 and the regulations thereunder. Thus, in determining the gross income requirements under section 856(c) (2), (3), and (4), a loss from the sale or other disposition of stock, securities, real property, etc. does not enter into the computation.

(2) *Lapse of options.* Under section 856(c)(6)(C), the term ''interests in real property'' includes options to acquire land or improvements thereon, and options to acquire leaseholds of land and improvements thereon. However, where a corporation, trust, or association writes an option giving the holder the right to acquire land or improvements thereon, or writes an option giving the holder the right to acquire a leasehold of land or improvements thereon, any income that the corporation, trust, or association recognizes because the option expires unexercised is not considered to be gain from the sale or other disposition of real property (including interests in real property) for purposes of section 856(c) (2)(D) and (3)(C). The rule in the preceding sentence also applies for purposes of section 856(c)(4)(C) in determining gain from the sale or other disposition of real property for the 30-percent-of-gross-income limitation.

(3) *Commitment fees.* For purposes of section 856(c) (2)(G) and (3)(G), if consideration is received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property, or for an agreement to purchase or lease both real property and other property, an apportionment of the consideration is required. The apportionment of consideration received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property shall be made under the principles of § 1.856–5(c), relating to the apportionment of interest income.

(4) *Holding period of property.* For purposes of the 30-percent limitation of section 856(c)(4), the determination of the period for which property described in such section has been held is governed by the provisions of section 1223 and the regulations thereunder.

(5) *Rents from real property and interest.* See §§ 1.856–4 and 1.856–5 for rules relating to rents from real property and interest.

(d) *Diversification of investment requirements*—(1) *75-percent test.* Section 856(c)(5)(A) requires that at the close of each quarter of the taxable year at least 75 percent of the value of the total assets of the trust be represented by one or more of the following:

(i) Real estate assets;

(ii) Government securities; and

(iii) Cash and cash items (including receivables).

For purposes of this subparagraph the term ''receivables'' means only those receivables which arise in the ordinary course of the trust's operation and does not include receivables purchased from another person. Subject to the limitations in section 856(c)(5)(B) and subparagraph (2) of this paragraph, the character of the remaining 25 percent (or less) of the value of the total assets is not restricted.

(2) *Limitations on certain securities.* Under section 856(c)(5)(B), not more than 25 percent of the value of the total assets of the trust may be represented by securities other than those described in section 856(c)(5)(A). The ownership of securities under the 25-percent limitation in section 856(c)(5)(B) is further limited in respect of any one issuer to an amount not greater in value than 5 percent of the value of the total assets of the trust and to not more than 10 percent of the outstanding voting securities of such issuer. Thus, if the real estate investment trust meets the 75-percent asset diversification requirement in section 856(c)(5)(A), it will also meet the first test under section 856(c)(5)(B) since it will, of necessity, have not more than 25 percent of its total assets represented by securities other than those described in section 856(c)(5)(A). However, the trust must also meet two additional tests under section 856(c)(5)(B), i.e. it cannot own the securities of any one issuer in an amount (i) greater in value than 5 percent of the value of the trust's total assets, or (ii) representing more than 10 percent of the outstanding voting securities of such issuer.

(3) *Determination of investment status.* The term ''total assets'' means the gross assets of the trust determined in accordance with generally accepted accounting principles. In order to determine the effect, if any, which an acquisition of any security or other property may have with respect to the status of a trust as a real estate investment trust, section 856(c)(5) requires a revaluation of the trust's assets at the end of the quarter in which such acquisition was made. A revaluation of assets is not required at the end of any quarter during which there has been no acquisition of a security or other property since the mere change in market value of property held by the trust does not, of itself, affect the status of the trust as a real estate investment trust. A change in the nature of ''cash items'', for example, the prepayment of insurance or taxes, does not constitute the acquisition of ''other property'' for purposes of this subparagraph. A real estate investment trust shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 856(c)(5) during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(4) *Illustrations.* The application of section 856(c)(5) and this paragraph may be illustrated by the following examples:

Example 1. Real Estate Investment Trust M, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	6
Government securities	7
Real estate assets	63
Securities of various corporations (not exceeding, with respect to any one issuer, 5 percent of the value of the total assets of the trust nor 10 percent of the outstanding voting securities of such issuer)	24
Total	100

Trust M meets the requirements of section 856(c)(5) for that quarter of its taxable year.

Example 2. Real Estate Investment Trust P, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	6
Government securities	7
Real estate assets	63
Securities of Corporation Z	20
Securities of Corporation X	4
Total	100

Trust P meets the requirement of section 856(c)(5)(A) since at least 75 percent of the value of the total assets is represented by cash, Government securities, and real estate assets. However, Trust P does not meet the diversification requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation Z exceeds 5 percent of the value of the trust's total assets.

Example 3. Real Estate Investment Trust G, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	4
Government securities	9
Real estate assets	70
Securities of Corporation S	5
Securities of Corporation L	4
Securities of Corporation U	4
Securities of Corporation M (which equals 25 percent of Corporation M's outstanding voting securities)	4
Total	100

Trust G meets the 75-percent requirement of section 856(c)(5)(A), but does not meet the requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation M exceeds 10 percent of Corporation M's outstanding voting securities.

Example 4. Real Estate Investment Trust R, at the close of the first quarter of its taxable year (i.e. calendar year), is a qualified real estate investment trust and has its assets invested as follows:

Cash	$5,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities of Corporation P	4,000
Securities of Corporation O	5,000
Securities of Corporation U	5,000
Securities of Corporation T	5,000
Total assets	100,000

During the second calendar quarter the stock in Corporation P increases in value to $50,000 while the value of the remaining assets has not changed. If Real Estate Investment Trust R has made no acquisition of stock or other property during such second quarter it will not lose its status as a real estate investment trust merely by reason of the appreciation in the value of P's stock. If, during the third quarter, Trust R acquires stock of Corporation S worth $2,000, such acquisition will necessitate a revaluation of all of the assets of Trust R as follows:

Cash	$3,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	50,000
Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	2,000
Total assets	146,000

Because of the discrepancy between the value of its various investments and the 25-percent limitation in section 856(c)(5), resulting in part from the acquisition of the stock of Corporation S, Trust R, at the end of the third quarter, loses its status as a real estate investment trust. However, if Trust R, within 30 days after the close of such quarter, eliminates the discrepancy so that it meets the 25-percent limitation, the trust will be considered to have met the requirements of section 856(c)(5) at the close of the third quarter, even though the discrepancy between the value of its investment in Corporation P and the 5-percent limitation in section 856(c)(5) (resulting solely from appreciation) may still exist. If instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P, then because of the discrepancy between the value of its investments and both the 5-percent and the 25-percent limitations in section 856(c)(5) resulting in part from this acquisition, trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter both of the discrepancies are eliminated.

Example 5. If, in the previous example, the stock of Corporation P appreciates only to $10,000 during the second quarter and, in the third quarter, Trust R acquires stock of Corporation S worth $1,000, the assets as of the end of the third quarter would be as follows:

Cash	$4,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	10,000
Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	1,000
Total assets	106,000

Because the discrepancy between the value of its investment in Corporation P and the 6-percent limitation in section 856(c)(5) results solely from appreciation, and because there is no discrepancy between the value of its various investments and the 25-percent limitation, Trust R, at the end of the third quarter, does not lose its status as a real estate investment trust. If, instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P worth $1,000, then, because of the discrepancy between the value of its investment in Corporation P and the 5-percent limitation resulting in part from this acquisition, Trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter this discrepancy is eliminated.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001); (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6598, 27 FR 4083, Apr. 28, 1962 as amended by T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.856–3 Definitions.

For purposes of the regulations under part II, subchapter M, chapter 1 of the Code, the following definitions shall apply.

(a) *Value.* The term ‘‘value’’ means, with respect to securities for which market quotations are readily available, the market value of such securities; and with respect to other securities and assets, fair value as determined in good faith by the trustees of the real estate investment trust. In the case of securities of other qualified real estate investment trusts, fair value shall not exceed market value or asset value, whichever is higher.

(b) *Real estate assets*—(1) *In general.* The term ‘‘real estate assets’’ means real property, interests in mortgages on real property (including interests in mortgages on leaseholds of land or improvements thereon), and shares in other qualified real estate investment trusts. The term ‘‘mortgages on real property’’ includes deeds of trust on real property.

(2) *Treatment of REMIC interests as real estate assets*—(i) *In general.* If, for any calendar quarter, at least 95 percent of a REMIC's assets (as determined in accordance with § 1.860F–4(e)(1)(ii) or § 1.6049–7(f)(3)) are real estate assets (as defined in paragraph (b)(1) of this section), then, for that calendar quarter, all the regular and residual interests in that REMIC are treated as real estate assets and, except as provided in paragraph (b)(2)(iii) of this section, any amount includible in gross income with respect to those interests is treated as interest on obligations secured by mortgages on real property. If less than 95 percent of a REMIC's assets are real estate assets, then the real estate investment trust is treated as holding directly its proportionate share of the assets and as receiving directly its proportionate share of the income of the REMIC. See §§ 1.860F–4(e)(1)(ii)(B) and 1.6049–7(f)(3) for information required to be provided to regular and residual interest holders if the 95-percent test is not met.

(ii) *Treatment of REMIC assets for section 856 purposes*—(A) *Manufactured housing treated as real estate asset.* For purposes of paragraphs (b) (1) and (2) of this section, the term ‘‘real estate asset’’ includes manufactured housing treated as a single family residence under section 25(e)(10).

(B) *Status of cash flow investments.* For purposes of this paragraph (b)(2), cash flow investments (as defined in section 860G(a)(6) and § 1.860G–2(g)(1)) are real estate assets.

(iii) *Certain contingent interest payment obligations held by a REIT.* If a REIT holds a residual interest in a REMIC for a principal purpose of avoiding the limitation set out in section 856(f) (concerning interest based on mortgagor net profits) or section 856(j) (concerning shared appreciation provisions), then, even if the REMIC satisfies the 95-percent test of paragraph (b)(i) of this section, the REIT is treated as receiving directly the REMIC's items of income for purposes of section 856.

(c) *Interests in real property.* The term ''interests in real property'' includes fee ownership and co-ownership of land or improvements thereon, leaseholds of land or improvements thereon, options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon. The term also includes timeshare interests that represent an undivided fractional fee interest, or undivided leasehold interest, in real property, and that entitle the holders of the interests to the use and enjoyment of the property for a specified period of time each year. The term also includes stock held by a person as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216). Such term does not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply.

(d) *Real property.* The term ''real property'' means land or improvements thereon, such as buildings or other inherently permanent structures thereon (including items which are structural components of such buildings or structures). In addition, the term ''real property'' includes interests in real property. Local law definitions will not be controlling for purposes of determining the meaning of the term ''real property'' as used in section 856 and the regulations thereunder. The term includes, for example, the wiring in a building, plumbing systems, central heating, or central air-conditioning machinery, pipes or ducts, elevators or escalators installed in the building, or other items which are structural components of a building or other permanent structure. The term does not include assets accessory to the operation of a business, such as machinery, printing press, transportation equipment which is not a structural component of the building, office equipment, refrigerators, individual air-conditioning units, grocery counters, furnishings of a motel, hotel, or office building, etc., even though such items may be termed fixtures under local law.

(e) *Securities.* The term ''securities'' does not include ''interests in real property'' or ''real estate assets'' as those terms are defined in section 856 and this section.

(f) *Qualified real estate investment trusts.* The term ''qualified real estate investment trust'' means a real estate investment trust within the meaning of part II of subchapter M which is taxable under such part as a real estate investment trust. For purposes of the 75-percent requirement in section 856(c)(5)(A), the trust whose stock has been included by another trust as ''real estate assets'' must be a ''qualified real estate investment trust'' for its full taxable year in which falls the close of each quarter of the trust's taxable year for which the computation is made. For example, Real Estate Investment Trust Z for its taxable year ending December 31, 1963, holds as ''real estate assets'' stock in Real Estate Investment Trust Y, which is also on a calendar year. If Trust Y is not a qualified real estate investment trust for its full taxable year ending December 31, 1963, Trust Z may not include the stock of Trust Y as ''real estate assets'' in computing the 75-percent requirement as of the close of any quarter of its taxable year ending December 31, 1963.

(g) *Partnership interest.* In the case of a real estate investment trust which is a partner in a partnership, as defined in section 7701(a)(2) and the regulations thereunder, the trust will be deemed to own its proportionate share of each of the assets of the partnership and will be deemed to be entitled to the income of the partnership attributable to such share. For purposes of section 856, the interest of a partner in the partnership's assets shall be determined in accordance with his capital interest in the partnership. The character of the various assets in the hands of the partnerhsip and items of gross income of the partnership shall retain the same character in the hands of the partners for all purposes of section 856.

Thus, for example, if the trust owns a 30-percent capital interest in a partnership which owns a piece of rental property the trust will be treated as owning 30 percent of such property and as being entitled to 30 percent of the rent derived from the property by the partnership. Similarly, if the partnership holds any property primarily for sale to customers in the ordinary course of its trade or business, the trust will be treated as holding its proportionate share of such property primarily for such purpose. Also, for example, where a partnership sells real property or a trust sells its interest in a partnership which owns real property, any gross income realized from such sale, to the extent that it is attributable to the real property, shall be deemed gross income from the sale or disposition of real property held for either the period that the partnership has held the real property of the period that the trust was a member of the partnership, whichever is the shorter.

(h) *Net capital gain.* The term ''net capital gain'' means the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for the taxable year.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6598, 27 FR 4084, Apr. 28, 1962, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 7767, 46 FR 11266, Feb. 6, 1981; T.D. 8458, 57 FR 61298, Dec. 24, 1992]

§ 1.856–4 Rents from real property.

(a) *In general.* Subject to the exceptions of section 856(d) and paragraph (b) of this section, the term ''rents from real property'' means, generally, the gross amounts received for the use of, or the right to use, real property of the real estate investment trust.

(b) *Amounts specifically included or excluded*—(1) *Charges for customary services.* For taxable years beginning after October 4, 1976, the term ''rents from real property'', for purposes of paragraphs (2) and (3) of section 856(c), includes charges for services customarily furnished or rendered in connection with the rental of real property, whether or not the charges are separately stated. Services furnished to the tenants of a particular building will be considered as customary if, in the geographic market in which the building is located, tenants in buildings which are of a similar class (such as luxury apartment buildings) are customarily provided with the service. The furnishing of water, heat, light, and air-conditioning, the cleaning of windows, public entrances, exits, and lobbies, the performance of general maintenance and of janitorial and cleaning services, the collection of trash, and the furnishing of elevator services, telephone answering services, incidental storage space, laundry equipment, watchman or guard services, parking facilities, and swimming pool facilities are examples of services which are customarily furnished to the tenants of a particular class of buildings in many geographic marketing areas. Where it is customary, in a particular geographic marketing area, to furnish electricity or other utilities to tenants in buildings of a particular class, the submetering of such utilities to tenants in such buildings will be considered a customary service. To qualify as a service customarily furnished, the service must be furnished or rendered to the tenants of the real estate investment trust or, primarily for the convenience or benefit of the tenant, to the guests, customers, or subtenants of the tenant. The service must be furnished through an independent contractor from whom the trust does not derive or receive any income. See paragraph (b)(5) of this section. For taxable years beginning before October 5, 1976, the rules in paragraph (b)(3) of 26 CFR 1.856–4 (revised as of April 1, 1977), relating to the furnishing of services, shall continue to apply.

(2) *Amounts received with respect to certain personal property*—(i) *In general.* In the case of taxable years beginning after October 4, 1976, rent attributable to personal property that is leased under, or in connection with, the lease

of real property is treated under section 856(d)(1)(C) as ‘‘rents from real property’’ (and thus qualified for purposes of the income source requirements) if the rent attributable to the personal property is not more than 15 percent of the total rent received or accrued under the lease for the taxable year. If, however, the rent attributable to personal property is greater than 15 percent of the total rent received or accrued under the lease for the taxable year, then the portion of the rent from the lease that is attributable to personal property will not qualify as ‘‘rents from real property’’.

(ii) *Application.* In general, the 15-percent test in section 856(d)(1)(C) is applied separately to each lease of real property. However, where the real estate investment trust rents all (or a portion of all) the units in a multiple unit project under substantially similar leases (such as the leasing of apartments in an apartment building or complex to individual tenants), the 15-percent test may be applied with respect to the aggregate rent received or accrued for the taxable year under the similar leases of the property, by using the average of the trust’s aggregate adjusted bases of all of the personal property subject to such leases, and the average of the trust’s aggregate adjusted bases of all real and personal property subject to such leases. A lease of a furnished apartment is not considered to be substantially similar to a lease of an unfurnished apartment (including an apartment where the trust provides only personal property, such as major appliances, that is commonly provided by a landlord in connection with the rental of unfurnished living quarters).

(iii) *Taxable years beginning before October 5, 1976.* In the case of taxable years beginning before October 5, 1976, any amount of rent that is attributable to personal property does not qualify as rent from real property.

(3) *Disqualification of rent which depends on income or profits of any person.* Except as provided in paragraph (b)(6)(ii) of this section, no amount received or accrued, directly or indirectly, with respect to any real property (or personal property leased under, or in connection with, real property) qualifies as ‘‘rents from real property’’ where the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. However, any amount so accured or received shall not be excluded from the term ‘‘rents from real property’’ solely by reason of being based on a fixed percentage or percentages of receipts or sales (whether or not receipts or sales are adjusted for returned merchandise, or Federal, State, or local sales taxes). Thus, for example, ‘‘rents from real property’’ would include rents where the lease provides for differing percentages or receipts or sales from different departments or from separate floors of a retail store so long as each percentage is fixed at the time of entering into the lease and a change in such percentage is not renegotiated during the term of the lease (including any renewal periods of the lease, in a manner which has the effect of basing the rent on income of profits. See paragraph (b)(6) of this section for rules relating to certain amounts received or accrued by a trust which are considered to be based on the income or profits of a sublessee of the prime tenant. The amount received or accrued as rent for the taxable year which is based on a fixed percentage or percentages of the lessee’s receipts or sales reduced by escalation receipts (including those determined under a formula clause) will qualify as ‘‘rents from real property’’. Escalation receipts include amounts received by a prime tenant from subtenants by reason of an agreement that rent shall be increased to reflect all or a portion of an increase in real estate taxes, property insurance, operating costs of the prime tenant, or similar items customarily included in lease escalation clauses. Where in accordance with the terms of an agreement an amount received or accrued as rent for the taxable year includes both a fixed rental and a percentage of all or a portion of the lessee’s income or profits, neither the fixed rental nor the additional amount will qualify as ‘‘rents from real property’’. However, where the amount received or accrued for the taxable year under such an agreement includes only the fixed rental, the determination of which does not depend in whole

or in part on the income or profits derived by the lessee, such amount may qualify as ‘‘rents from real property’’. An amount received or accrued as rent for the taxable year which consists, in whole or in part, of one or more percentages of the lessee's receipts or sales in excess of determinable dollar amounts may qualify as ‘‘rents from real property’’, but only if two conditions exist. First, the determinable amounts must not depend in whole or in part on the income or profits of the lessee. Second, the percentages and, in the case of leases entered into after July 7, 1978, the determinable amounts, must be fixed at the time the lease is entered into and a change in percentages and determinable amounts is not renegotiated during the term of the lease (including any renewal periods of the lease) in a manner which has the effect of basing rent on income or profits. In any event, an amount will not qualify as ‘‘rents from real property’’ if, considering the lease and all the surrounding circumstances, the arrangement does not conform with normal business practice but is in reality used as a means of basing the rent on income or profits. The provisions of this subparagraph may be illustrated by the following example:

Example. A real estate investment trust owns land underlying an office building. On January 1, 1975, the trust leases the land for 50 years to a prime tenant for an annual rental of $100x plus 20 percent of the prime tenant's annual gross receipts from the office building in excess of a fixed base amount of $5,000x and 10 percent of such gross receipts in excess of $10,000x. For this purpose the lease defines gross receipts as all amounts received by the prime tenant from occupancy tenants pursuant to leases of space in the office building reduced by the amount by which real estate taxes, property insurance, and operating costs related to the office building for a particular year exceed the amount of such items for 1974. The exclusion from gross receipts of increases since 1974 in real estate taxes, property insurance, and other expenses relating to the office building reflects the fact that the prime tenant passes on to occupancy tenants by way of a customary lease escalation provision the risk that such expenses might increase during the term of an occupancy lease. The exclusion from gross receipts of these expense escalation items will not cause the rental received by the real estate investment trust from the prime tenant to fail to qualify as ‘‘rents from real property’’ for purposes of section 856(c).

(4) *Disqualification of amounts received from persons owned in whole or in part by the trust.* ‘‘Rents from real property’’ does not include any amount received or accrued, directly or indirectly, from any person in which the real estate investment trust owns, at any time during the taxable year, the specified percentage or number of shares of stock (or interest in the assets or net profits) of that person. Any amount received from such person will not qualify as ‘‘rents from real property’’ if such person is a corporation and the trust owns 10 percent or more of the total combined voting power of all classes of its stock entitled to vote or 10 percent or more of the total number of shares of all classes of its outstanding stock, or if such person is not a corporation and the trust owns a 10-percent-or-more interest in its assets or net profits. For example, a trust leases an office building to a tenant for which it receives rent of $100,000 for the taxable year 1962. The lessee of the building subleases space to various subtenants for which it receives gross rent of $500,000 for the year 1962. The trust owns 15 percent of the total assets of an unincorporated subtenant. The rent paid by this subtenant for the taxable year is $50,000. Therefore, $10,000 (50,000/500,000×$100,000) of the rent paid to the trust does not qualify as ‘‘rents from real property’’. Where the real estate investment trust receives, directly or indirectly, any amount of rent from any person in which it owns any proprietary interest, the trust shall submit, at the time it files its return for the taxable year (or before June 1, 1962, whichever is later), a schedule setting forth—

(i) The name and address of such person and the amount received as rent from such person; and

(ii) If such person is a corporation, the highest percentage of the total combined voting power of all classes of its stock entitled to vote, and the highest percentage of the total number of shares of all classes of its outstanding stock, owned by the trust at any time during the trust's taxable year; or

(iii) If such person is not a corporation, the highest percentage of the trust's interest in the assets or net profits of such person, owned by the trust at any time during its taxable year.

(5) *Furnishing of services or management of property must be through an independent contractor*—(i) *In general.* No amount received or accrued, directly or indirectly, with respect to any real property (or any personal property leased under, or in connection with, the real property) qualifies as ''rents from real property'' if the real estate investment trust furnishes or renders services to the tenants of the property or manages or operates the property, other than through an independent contractor from whom the trust itself does not derive or receive any income. The prohibition against the trust deriving or receiving any income from the independent contractor applies regardless of the source from which the income was derived by the independent contractor. Thus, for example, the trust may not receive any dividends from the independent contractor. The requirement that the trust not receive any income from an independent contractor requires that the relationship between the two be an arm's-length relationship. The independent contractor must be adequately compensated for any services which are performed for the trust. Compensation to an independent contractor determined by reference to an unadjusted percentage of gross rents will generally be considered to be adequate where the percentage is reasonable taking into account the going rate of compensation for managing similar property in the same locality, the services rendered, and other relevant factors. The independent contractor must not be an employee of the trust (*i.e.,* the manner in which he carries out his duties as independent contractor must not be subject to the control of the trust). Although the cost of services which are customarily rendered or furnished in connection with the rental of real property may be borne by the trust, the services must be furnished or rendered through an independent contractor. Furthermore, the facilities through which the services are furnished must be maintained and operated by an independent contractor. For example, if a heating plant is located in the building, it must be maintained and operated by an independent contractor. To the extent that services (other than those customarily furnished or rendered in connection with the rental of real property) are rendered to the tenants of the property by the independent contractor, the cost of the services must be borne by the independent contractor, a separate charge must be made for the services, the amount of the separate charge must be received and retained by the independent contractor, and the independent contractor must be adequately compensated for the services.

(ii) *Trustee or director functions.* The trustees or directors of the real estate investment trust are not required to delegate or contract out their fiduciary duty to manage the trust itself, as distinguished from rendering or furnishing services to the tenants of its property or managing or operating the property. Thus, the trustees or directors may do all those things necessary, in their fiduciary capacities, to manage and conduct the affairs of the trust itself. For example, the trustees or directors may establish rental terms, choose tenants, enter into and renew leases, and deal with taxes, interest, and insurance, relating to the trust's property. The trustees or directors may also make capital expenditures with respect to the trust's property (as defined in section 263) and may make decisions as to repairs of the trust's property (of the type which would be deductible under section 162), the cost of which may be borne by the trust.

(iii) *Independent contractor defined.* The term ''independent contractor'' means—

(a) A person who does not own, directly or indirectly, at any time during the trust's taxable year more than 35 percent of the shares in the real estate investment trust, or

(b) A person—

(1) If a corporation, not more than 35 percent of the total combined voting power of whose stock (or 35 percent of the total shares of all classes of whose stock), or

(2) If not a corporation, not more than 35 percent of the interest in whose assets or net profits is owned, directly or indirectly, at any time during the

trust's taxable year by one or more persons owning at any time during such taxable year 35 percent or more of the shares in the trust.

(iv) *Information required.* The real estate investment trust shall submit with its return for the taxable year (or before June 1, 1962, whichever is later) a statement setting forth the name and address of each independent contractor; and

(a) The highest percentage of the outstanding shares in the trust owned at any time during its taxable year by such independent contractor and by any person owning at any time during such taxable year any shares of stock or interest in the independent contractor.

(b) If the independent contractor is a corporation such statement shall set forth the highest percentage of the total combined voting power of its stock and the highest percentage of the total number of shares of all classes of its stock owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(c) If the independent contractor is not a corporation such statement shall set forth the highest percentage of any interest in its assets or net profits owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(6) *Amounts based on income or profits of subtenants.* (i) Except as provided in paragraph (b)(6)(ii) of this section, if a trust leases real property to a tenant under terms other than solely on a fixed sum rental (for example, a percentage of the tenant's gross receipts), and the tenant subleases all or a part of such property under an agreement which provides for a rental based in whole or in part on the income or profits of the sublessee, the entire amount of the rent received by the trust from the prime tenant with respect to such property is disqualified as ‘‘rents from real property’’.

(ii) *Exception.* For taxable years beginning after October 4, 1976, section 856(d)(4) provides an exception to the general rule that amounts received or accrued, directly or indirectly, by a real estate investment trust do not qualify as rents from real property if the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. This exception applies where the trust rents property to a tenant (the prime tenant) for a rental which is based, in whole or in part, on a fixed percentage or percentages of the receipts or sales of the prime tenant, and the rent which the trust receives or accrues from the prime tenant pursuant to the lease would not qualify as ‘‘rents from real property’’ solely because the prime tenant receives or accrues from subtenants (including concessionaires) rents or other amounts based on the income or profits derived by a person from the property. Under the exception, only a proportionate part of the rent received or accrued by the trust does not qualify as ‘‘rents from real property’’. The proportionate part of the rent received or accrued by the trust which is nonqualified is the lesser of the following two amounts:

(A) The rent received or accrued by the trust from the prime tenant pursuant to the lease, that is based on a fixed percentage or percentages of receipts or sales, or

(B) The product determined by multiplying the total rent which the trust receives or accrues from the prime tenant pursuant to the lease by a fraction, the numerator of which is the rent or other amount received by the prime tenant that is based, in whole or in part, on the income or profits derived by any person from the property, and the denominator of which is the total rent or other amount received by the prime tenant from the property. For example, assume that a real estate investment trust owns land underlying a shopping center. The trust rents the land to the owner of the shopping center for an annual rent of $10x plus 2 percent of the gross receipts which the prime tenant receives from subtenants who lease space in the shopping center. Assume further that, for the year in question, the prime tenant derives total rent from the shopping center of $100x and, of that amount, $25x is received from subtenants whose rent is based, in whole or in part, on the income or profits derived from the property. Accordingly, the trust will receive a total rent of $12x, of which $2x is based on a percentage of the gross receipts of the prime tenant. The portion of the rent which is disqualified is the lesser of $2x (the rent received by the trust which is based on a percentage of gross receipts), or $3x, ($12x multiplied by $25x/$100x). Accordingly, $10x of the rent received by the trust qualifies as ''rents from real property'' and $2x does not qualify.

(7) *Attribution rules.* Paragraphs (2) and (3) of section 856(d) relate to direct or indirect ownership of stock, assets, or net profits by the persons described therein. For purposes of determining such direct or indirect ownership, the rules prescribed by section 318(a) (for determining the ownership of stock) shall apply except that ''10 percent'' shall be substituted for ''50 percent'' in section 318(a) (2)(C) and (3)(C).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4085, Apr. 28, 1962, as amended by T.D. 6969, 33 FR 12000, Aug. 23, 1968; T.D. 7767, 46 FR 11266, Feb. 6, 1981]

§1.856–5 Interest.

(a) *In general.* In computing the percentage requirements in section 856(c) (2)(B) and (3)(B), the term ''interest'' includes only an amount which constitutes compensation for the use or forbearance of money. For example, a fee received or accrued by a lender which is in fact a charge for services performed for a borrower rather than a charge for the use of borrowed money is not includable as interest.

(b) *Where amount depends on income or profits of any person.* Except as provided in paragraph (d) of this section, any amount received or accrued, directly or indirectly, with respect to an obligation is not includable as interest for purposes of section 856(c) (2)(B) and (3)(B) if, under the principles set forth in paragraphs (b)(3) and (6)(i) of §1.856–4, the determination of the amount depends in whole or in part on the income or profits of any person (whether or not derived from property secured by the obligation). Thus, for example, if in accordance with a loan agreement an amount is received or accrued by the trust with respect to an obligation which includes both a fixed amount of interest and a percentage of the borrower's income or profits, neither the fixed interest nor the amount based upon the percentage will qualify as interest for purposes of section 856(c) (2)(B) and (3)(B). This paragraph and paragraph (d) of this section apply only to amounts received or accrued in taxable years beginning after October 4, 1976, pursuant to loans made after May 27, 1976. For purposes of the preceding sentence, a loan is considered to be made before May 28, 1976, if it is made pursuant to a binding commitment entered into before May 28, 1976.

(c) *Apportionment of interest*—(1) *In general.* Where a mortgage covers both real property and other property, an apportionment of the interest income must be made for purposes of the 75-percent requirement of section 856(c)(3). For purposes of the 75-percent requirement, the apportionment shall be made as follows:

(i) If the loan value of the real property is equal to or exceeds the amount of the loan, then the entire interest income shall be apportioned to the real property.

(ii) If the amount of the loan exceeds the loan value of the real property, then the interest income apportioned to the real property is an amount equal to the interest income multiplied by a fraction, the numerator of which is the loan value of the real property, and the denominator of which is the amount of the loan. The interest income apportioned to the other property is an amount equal to the excess of the total interest income over the interest income apportioned to the real property.

(2) *Loan value.* For purposes of this paragraph, the loan value of the real property is the fair market value of the property, determined as of the date on

which the commitment by the trust to make the loan becomes binding on the trust. In the case of a loan purchased by the trust, the loan value of the real property is the fair market value of the property, determined as of the date on which the commitment by the trust to purchase the loan becomes binding on the trust. However, in the case of a construction loan or other loan made for purposes of improving or developing real property, the loan value of the real property is the fair market value of the land plus the reasonably estimated cost of the improvements or developments (other than personal property) which will secure the loan and which are to be constructed from the proceeds of the loan. The fair market value of the land and the reasonably estimated cost of improvements or developments shall be determined as of the date on which a commitment to make the loan becomes binding on the trust. If the trust does not make the construction loan but commits itself to provide long-term financing following completion of construction, the loan value of the real property is determined by using the principles for determining the loan value for a construction loan. Moreover, if the mortgage on the real property is given as additional security (or as a substitute for other security) for the loan after the trust's commitment is binding, the real property loan value is its fair market value when it becomes security for the loan (or, if earlier, when the borrower makes a binding commitment to add or substitute the property as security).

(3) *Amount of loan.* For purposes of this paragraph, the amount of the loan means the highest principal amount of the loan outstanding during the taxable year.

(d) *Exception.* Section 856(f)(2) provides an exception to the general rule that amounts received, directly or indirectly, with respect to an obligation do not qualify as ''interest'' where the determination of the amounts depends in whole or in part on the income or profits of any person. The exception applies where the trust receives or accrues, with respect to the obligation of its debtor, an amount that is based in whole or in part on a fixed percentage or percentages of receipts or sales of the debtor, and the amount would not qualify as interest solely because the debtor has receipts or sale proceeds that are based on the income or profits of any person. Under this exception only a proportionate part of the amount received or accrued by the trust fails to qualify as interest for purposes of the percentage-of-income requirements of section 856(c) (2) and (3). The proportionate part of the amount received or accrued by the trust that is non-qualified is the lesser of the following two amounts:

(1) The amount received or accrued by the trust from the debtor with respect to the obligation that is based on a fixed percentage or percentages of receipts or sales, or

(2) The product determined by multiplying by a fraction the total amount received or accrued by the trust from the debtor with respect to the obligation. The numerator of the fraction is the amount of receipts or sales of the debtor that is based, in whole or in part, on the income or profits of any person and the denominator is the total amount of the receipts or sales of the debtor. For purposes of the preceding sentence, the only receipts or sales to be taken into account are those taken into account in determining the payment to the trust pursuant to the loan agreement.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 7767, 46 FR 11268, Feb. 6, 1981]

§ 1.856–6 Foreclosure property.

(a) *In general.* Under section 856(e) a real estate investment trust may make an irrevocable election to treat as ''foreclosure property'' certain real property (including interests in real property), and any personal property incident to the real property, acquired by the trust after December 31, 1973.

This section prescribes rules relating to the election, including rules relating to property eligible for the election. This section also prescribes rules relating to extensions of the general two-year period (hereinafter the ‘‘grace period’’) during which property retains its status as foreclosure property, as well as rules relating to early termination of the grace period under section 856(e)(4). The election to treat property as foreclosure property does not alter the character of the income derived therefrom (other than for purposes of section 856(c)(2)(F) and (3)(F)). For example, if foreclosure property is sold, the determination of whether it is property described in section 1221(1) will not be affected by the fact that it is foreclosure property.

(b) *Property eligible for the election*—(1) *Rules relating to acquisitions.* In general, the trust must acquire the property after December 31, 1973, as the result of having bid in the property at foreclosure, or having otherwise reduced the property to ownership or possession by agreement or process of law, after there was default (or default was imminent) on a lease of the property (where the trust was the lessor) or on an indebtedness owed to the trust which the property secured. Foreclosure property which secured an indebtedness owed to the trust is acquired for purposes of section 856(e) on the date on which the trust acquires ownership of the property for Federal income tax purposes. Foreclosure property which a trust owned and leased to another is acquired for purposes of section 856(e) on the date on which the trust acquires possession of the property from its lessee. A trust will not be considered to have acquired ownership of property for purposes of section 856(e) where it takes control of the property as a mortgagee-in-possession and cannot receive any profit or sustain any loss with respect to the property except as a creditor of the mortgagor. A trust may be considered to have acquired ownership of property for purposes of section 856(e) even through legal title to the property is held by another person. For example, where, upon foreclosure of a mortgage held by the trust, legal title to the property is acquired in the name of a nominee for the exclusive benefit of the trust and the trust is the equitable owner of the property, the trust will be considered to have acquired ownership of the property for purposes of section 856(e). Generally, the fact that under local law the mortgagor has a right of redemption after foreclosure is not relevant in determining whether the trust has acquired ownership of the property for purposes of section 856(e). Property is not ineligible for the election solely because the property, in addition to securing an indebtedness owed to the trust, also secures debts owed to other creditors. Property eligible for the election includes a building or other improvement which has been constructed on land owned by the trust and which is acquired by the trust upon default of a lease of the land.

(2) *Personal property.* Personal property (including personal property not subject to a mortgage or lease of the real property) will be considered incident to a particular item of real property if the personal property is used in a trade or business conducted on the property or the use of the personal property is otherwise an ordinary and necessary corollary of the use to which the real property is put. In the case of a hotel, such items as furniture, appliances, linens, china, food, etc. would be examples of incidental personal property. Personal property incident to the real property is eligible for the election even though it is acquired after the real property is acquired or is placed in the building or other improvement in the course of the completion of construction.

(3) *Property with respect to which default is anticipated.* Property is not eligible for the election to be treated as foreclosure property if the loan or lease with respect to which the default occurs (or is imminent) was made or entered into (or the lease or indebtedness was acquired) by the trust with an intent to evict or foreclose, or when the trust knew or had reason to know that default would occur (‘‘improper knowledge’’). For purposes of the preceding sentence, a trust will not be considered to have improper knowledge with respect to a particular lease or loan, if the lease or loan was made pursuant to a binding commitment entered into by

the trust at a time when it did not have improper knowledge. Moreover, if the trust, in an attempt to avoid default or foreclosure, advances additional amounts to the borrower in excess of amounts contemplated in the original loan commitment or modifies the lease or loan, such advance or modification will be considered not to have been made with an intent to evict or foreclose, or with improper knowledge, unless the original loan or lease was entered into with that intent or knowledge.

(c) *Election*—(1) *In general.* (i) An election to treat property as foreclosure property applies to all of the eligible real property acquired in the same taxable year by the trust upon the default (or as a result of the imminence of default) on a particular lease (where the trust is the lessor) or on a particular indebtedness owed to the trust. For example, if a loan made by a trust is secured by two separate tracts of land located in different cities, and in the same taxable year the trust acquires both tracts on foreclosure upon the default (or imminence of default) of the loan, the trust must include both tracts in the election. For a further example, the trust may choose to make a separate election for only one of the tracts if they are acquired in different taxable years or were not security for the same loan. If real property subject to the same election is acquired at different times in the same taxable year, the grace period for a particular property begins when that property is acquired.

(ii) If the trust acquires separate pieces of real property that secure the same indebtedness (or are under the same lease) in different taxable years because the trust delays acquiring one of them until a later taxable year, and the primary purpose for the delay is to include only one of them in an election, then if the trust makes an election for one piece it must also make an election for the other piece. A trust will not be considered to have delayed the acquisition of property for this purpose if there is a legitimate business reason for the delay (such as an attempt to avoid foreclosure by further negotiations with the debtor or lessee).

(iii) All of the eligible personal property incident to the real property must also be included in the election.

(2) *Time for making election.* The election to treat property as foreclosure property must be made on or before the due date (including extensions of time) for filing the trust's income tax return for the taxable year in which the trust acquires the property with respect to which the election is being made, or April 3, 1975, whichever is later.

(3) *Manner of making the election.* An election made after February 6, 1981, shall be made by a statement attached to the income tax return for the taxable year in which the trust acquired the property with respect to which the election is being made. The statement shall indicate that the election is made under section 856(e) and shall identify the property to which the election applies. The statement shall also set forth—

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired by the trust, and

(iii) A brief description of how the real property was acquired, including the name of the person or persons from whom the real property was acquired and a description of the lease or indebtedness with respect to which default occurred or was imminent.

An election made on or before February 6, 1981 shall be filed in the manner prescribed in 26 CFR 10.1(f) (revised as of April 1, 1977) (temporary regulations relating to the election to treat property as foreclosure property) as in effect when the election is made.

(4) *Status of taxpayer.* In general, a taxpayer may make an election with respect to an acquisition of property only if the taxpayer is a qualified real estate investment trust for the taxable year in which the acquisition occurs. If, however, the taxpayer establishes, to the satisfaction of the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for a taxable year was to due to reasonable cause and not due to willful neglect, the taxpayer may make the election with respect to property acquired

in such taxable year. The principles of §§1.856.7(c) and 1.856.8(d) (including the principles relating to expert advice) will apply in determining whether, for purposes of this subparagraph, the failure of the taxpayer to be a qualified real estate investment trust for the taxable year in which the property is acquired was due to reasonable cause and not due to willful neglect. If a taxpayer makes a valid election to treat property as foreclosure property, the property will not lose its status as foreclosure property solely because the taxpayer is not a qualified real estate investment trust for a subsequent taxable year (including a taxable year which encompasses an extension of the grace period). However, the rules relating to the termination of foreclosure property status in section 856(e)(4) (but not the tax on income from foreclosure property imposed by section 857(b)(4)) apply to the year in which the property is acquired and all subsequent years, even though the taxpayer is not a qualified real estate investment trust for such year.

(d) *Termination of 2-year grace period; subsequent leases*—(1) *In general.* Under section 856(e)(4)(A), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which the trust either—

(i) Enters into a lease with respect to any of the property which, by its terms, will give rise to income of the trust which is not described in section 856(c)(3) (other than section 856(c)(3)(F)), or

(ii) Receives or accrues, directly or indirectly, any amount which is not described in section 856(c)(3) (other than section 856(c)(3)(F)) pursuant to a lease with respect to any of the real property entered into by the trust on or after the day the trust acquired the property.

For example, assume the trust acquires, in a particular taxable year, a shopping center upon the default of an indebtedness owed to the trust. Also assume that the trust subsequently enters into a lease with respect to one of several stores in the shopping center that requires the lessee to pay rent to the trust which is not income described in section 856(c)(3) (other than section 856(c)(3)(F)). In such case, the entire shopping center will cease to be foreclosure property on the day the trust enters into the lease.

(2) *Extensions or renewals of leases.* Generally, the extension or renewal of a lease of foreclosure property will be treated as the entering into of a new lease only if the trust has a right to renegotiate the terms of the lease. If, however, by operation of law or by contract, the acquisition of the foreclosure property by the trust terminates a preexisting lease of the property, or gives the trust a right to terminate the lease, then for purposes of section 856(e)(4)(A), a trust, in such circumstances, will not be considered to have entered into a lease with respect to the property solely because the terms of the preexisting lease are continued in effect after foreclosure without substantial modification. The letting of rooms in a hotel or motel does not constitute the entering into a lease for purposes of section 856(e)(4)(A).

(3) *Rent attributable to personal property.* Solely for the purposes of section 856(e)(4)(A), if a trust enters into a lease with respect to real property on or after the day upon which the trust acquires such real property by foreclosure, and a portion of the rent from such lease is attributable to personal property which is foreclosure property incident to such real property, such rent attributable to the incidental personal property will not be considered to terminate the status of such real property (or such incidental personal property) as foreclosure property.

(e) *Termination of 2-year grace period; completion of construction*—(1) *In general.* Under section 856(e)(4)(B), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which any construction takes place on the property, other than completion of a building (or completion of any other improvement) where more than 10 percent of the construction of the building (or other improvement) was completed before default became imminent. If more than one default occurred with respect to an indebtedness or lease in respect of which there is an acquisition, the more-than-10-percent test (including the rule prescribed in this paragraph relating to the test) will not be applied at the time a particular default became imminent if it is clear that the acquisition did not occur as the result of such default. For example, if the debtor fails to make four consecutive payments of principal and interest on the due dates, and the trust takes action to acquire the property securing the debt only after the fourth default becomes imminent, the 10-percent test is applied at the time the fourth default became imminent (even though the trust would not have foreclosed on the property had not all four defaults occurred).

(2) *Determination of percentage of completion.* The determination of whether the construction of a building or other improvement was more than 10 percent complete when default became imminent shall be made by comparing the total direct costs of construction incurred with respect to the building or other improvement as of the date default became imminent with the estimated total direct costs of construction as of such date. If the building or other improvement qualifies as more than 10 percent complete under this method, the building or other improvement shall be considered to be more than 10 percent complete. For purposes of this subparagraph, direct costs of construction include the cost of labor and materials which are directly connected with the construction of the building or improvement.

Thus, for example, direct costs of construction incurred as of the date default became imminent would include amounts paid, or for which liability has been incurred, for labor which has been performed as of such date that is directly connected with the construction of the building or other improvement and for building materials and supplies used or consumed in connection with the construction as of such date. For purposes of applying the 10-percent test the trust may also take into account the cost of building materials and supplies which have been delivered to the construction site as of the date default became imminent and which are to be used or consumed in connection with the construction. On the other hand, architect's fees, administrative costs of the developer or builder, lawyers' fees, and expenses incurred in connection with obtaining zoning approval or building permits are not considerd to be direct costs of construction. Any construction by the trust as mortgagee-in-possession is considered to have taken place after default resulting in acquisition of the property became imminent. Generally, the trust's estimate of the total direct costs of completing construction as of the date the default became imminent will be accepted, provided that the estimate is reasonable, in good faith, and is based on all of the data reasonably available to the trust when the trust undertakes completion of construction of the building or other improvement. Appropriate documentation which shows that construction was more than 10 percent complete when default became imminent must be available at the principal place of business of the trust for inspection in connection with an examination of the income tax return. Construction includes the renovation of a building, such as the remodeling of apartments, or the renovation of an apartment building to convert rental units to a condominium. The renovation must be more than 10 percent complete (determined by comparing the total direct cost of the physical renovation which has been incurred when default became imminent with the estimated total direct cost of renovation as of such date) when default became immiment in order for the property not to lose its status as foreclosure property if the trust undertakes the renovation.

(3) *Modification of a building or improvement.* Generally, the terms ''building'' and ''improvement'' in section 856(e)(4)(B) mean the building or improvement (including any intergral part thereof) as planned by the mortgagor or lessee (or other person in possession of the property, if appropriate)

as of the date default became imminent. The trust, however, may estimate the total direct costs of construction and complete the construction of the building or other improvement by modifying the building or other improvement as planned as of the date default became imminent so as to reduce the estimated direct cost of construction of the building or improvement. If the trust does so modify the planned construction of the building or improvement, the 10-percent test is to be applied by comparing the direct costs of construction incurred as of the date default became imminent that are attributable to the building or improvement as modified, with the estimated total direct costs (as of such date) of construction of the building or other improvement as modified. The trust, in order to meet the 10-percent test, may not, however, modify the planned building or improvement by reducing the estimated direct cost of construction to such an extent that the building or improvement is not functional.

Also, the trust may make subsequent modifications which increase the direct cost of construction of the building or improvement if such modifications—

(i) Are required by a Federal, State, or local agency, or

(ii) Are alterations that are either required by a prospective lessee or purchaser as a condition of leasing or buying the property or are necessary for the property to be used for the purpose planned at the time default became imminent.

Subdivision (ii) of the preceding sentence applies, however, only if the building or improvement, as modified, was more than 10 percent complete when default became imminent. A building completed by the trust will not cease to be foreclosure property solely because the building is used in a manner other than that planed by the defaulting mortgagor or lessee. Thus, for example, assume a trust acquired on foreclosure a planned apartment building which was 20 percent complete when default became imminent and that the trust completes the building without modifications which increase the direct cost of construction. The property will not cease to be foreclosure property by reason of section 856(e)(4)(B) solely because the trust sells the dwelling units in the building as condominium units, rather than holding them for rent as planned by the defaulting mortgagor. (See, however, section 856(e)(4)(C) and paragraph (f)(2) of this section for rules relating to the requirement that where foreclosure property is used in a trade or business (including a trade or business of selling the foreclosure property), the trade or business must be conducted through an independent contractor after 90 days after the property is acquired.)

(4) *Application on building-by-building basis.* Generally the more than 10 percent test is to be applied on a building-by-building basis. Thus, for example, if a trust has foreclosed on land held by a developer building a housing subdivision, the trust may complete construction of the houses which were more than 10 percent complete when default became imminent. The trust, however, may not complete construction of houses which were only 10 percent (or less) complete, nor may the trust begin construction of other houses planned for the subdivision on which construction has not begun. The trust, however, may construct an additional building or improvement (whether or not the construction thereof has begun) which is an integral part of another building or other improvement that was more than 10 percent complete when default became imminent if the additional building or improvement and the other building or improvement, taken together as a unit, meet the more than 10 percent test. For purposes of this paragraph, an additional building or other improvement will be considered to be an integral part of another building or improvement if—

(i) It is ancillary to the other building or improvement and its principal intended use is to furnish services or facilities which either supplement the use of such other building or improvement or are necessary for such other building or improvement to be utilized in the manner or for the purpose for which it is intended, or

(ii) The buildings or improvements are intended to comprise constituent parts of an interdependent group of buildings or other improvements.

However, a building or other improvement will not be considered to be an integral part of another building or improvement unless the buildings or improvements were planned as part of the same overall construction plan or project before default became imminent. An additional building or other improvement (such as, for example, an outdoor swimming pool or a parking garage) may be considered to be an integral part of another building or improvement, even though the additional building or improvement was also intended to be used to provide facilities or services for use in connection with several other buildings or improvements which will not be completed. If the trust chooses not to undertake the construction of an additional building or other improvement which qualifies as an integral part of another building or improvement, so much of the costs of construction (including both the direct costs of construction incurred before the default became imminent and the estimated costs of completion) as are attributable to that ''integral part'' shall not be taken into account in determining whether any other building or improvement was more than 10 percent complete when default became imminent. For example, assume the trust acquires on foreclosure a property on which the defaulting mortgagor has begun construction of a motel. The motel, as planned by the mortgagor, was to consist of a two-story building containing 30 units, and two detached one-story wings, each of which was to contain 20 units. At the time default became imminent, the defaulting mortgagor had completed more than 10 percent of the construction of the two-story structure but the two wings, an access road, a parking lot, and an outdoor swimming pool planned for the motel were each less than 10 percent complete. The trust may construct the two wings of the motel, the access road, the parking lot, and the swimming pool: *Provided,* That the motel and the other improvements which the trust undertakes to construct, taken together as a unit, were more than 10 percent complete when default became imminent. If, however, the trust chooses not to undertake construction of the swimming pool, the cost of construction attributable to the swimming pool, whether incurred before default became imminent or estimated as the cost of completion, shall not be taken into account in determining whether the trust can complete construction of the other buildings and improvements. For another example, assume that the trust acquires a planned shopping center on foreclosure. At the time default became imminent several large buildings intended to house shops and stores in the shopping center were more than 10 percent complete. Less than 10 percent of the construction, however, had been completed on a separate structure intended to house a bank. The bank was planned as a component of the shopping center in order to provide, in conjunction with the other shops and stores, a specific range and variety of goods and services with which to attract customers to the shopping center. The trust may complete construction of the bank: *Provided,* That the bank and the other buildings and improvements which the trust undertakes to complete, taken together as a unit, were more than 10 percent complete when default became imminent. If the trust chooses not to construct the bank, no actual or estimated construction costs attributable to the bank are to be taken into account in applying the 10-percent test with respect to the other buildings and improvements in the shopping center. For a third example, assume that a defaulting mortgagor had planned to construct two identical apartment buildings, A and B, on the same tract of land, that neither building is to provide substantial facilities or services to be used in connection with the other, and that only building A was more than 10 percent complete when default became imminent. The trust, in this case, may not complete building B. On the other hand, if the facts are the same except that pursuant to the plans of the defaulting mortgagor, one of the buildings is to contain the furnace and central air conditioning machinery for both buildings A and B, the trust may complete both buildings A and B: *Provided,* That, taken together as a unit, the two buildings meet the more-than-10-percent test.

(5) *Repair and maintenance.* Under this paragraph (e), ‘‘construction’’ does not include—

(i) The repair or maintenance of a building or other improvement (such as the replacement of worn or obsolete furniture and appliances) to offset normal wear and tear or obsolescence, and the restoration of property required because of damage from fire, storm, vandalism or other casualty,

(ii) The preparation of leased space for a new tenant which does not substantially extend the useful life of the building or other improvement or significantly increase its value, even though, in the case of commercial space, this preparation includes adapting the property to the conduct of a different business, or

(iii) The performing of repair or maintenance described in paragraph (e)(5)(i) of this section after property is acquired that was deferred by the defaulting party and that does not constitute renovation under paragraph (e)(2) of this section.

(6) *Independent contractor required.* If any construction takes place on the foreclosure property more than 90 days after the day on which such property was acquired by the trust, such construction must be performed by an independent contractor (as defined in section 856(d)(3) and §1.856–4(b)(5)(iii)) from whom the trust does not derive or receive any income. Otherwise, the property will cease to be foreclosure property.

(7) *Failure to complete construction.* Property will not cease to be foreclosure property solely because a trust which undertakes the completion of construction of a building or other improvement on the property that was more than 10 percent complete when default became imminent does not complete the construction. Thus, for example, if a trust continues construction of a building that was 20 percent complete when default became imminent, and the trust constructs an additional 40 percent of the building and then sells the property, the property will not lose its status as foreclosure property solely because the trust fails to complete construction of the building.

(f) *Termination of 2-year grace period; use of foreclosure property in a trade or business*—(1) *In general.* Under section 856(e)(4)(C), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring more than 90 days after the day on which the trust acquired the property) on which the property is used in a trade or business conducted by the trust, other than a trade or business conducted by the trust through an independent contractor from whom the trust itself does not derive or receive any income. (See section 856(d)(3) for the definition of independent contractor.)

(2) *Property held primarily for sale to customers.* For the purposes of section 856(e)(4)(C), foreclosure property held by the trust primarily for sale to customers in the ordinary course of a trade or business is considered to be property used in a trade or business conducted by the trust. Thus, if a trust holds foreclosure property (whether real property or personal property incident to real property) for sale to customers in the ordinary course of a trade or business more than 90 days after the day on which the trust acquired the real property, the trade or business of selling the property must be conducted by the trust through an independent contractor from whom the trust does not derive or receive any income. Otherwise, after such 90th day the property will cease to be foreclosure property.

(3) *Change in use.* Foreclosure property will not cease to be foreclosure property solely because the use of the property in a trade or business by the trust differs from the use to which the property was put by the person from whom it was acquired. Thus, for example, if a trust acquires a rental apartment building on foreclosure, the property will not cease to be foreclosure property solely because the trust converts the building to a condominium apartment building and, through an independent contractor from whom the trust derives no income, engages in the trade or business of selling the individual condominium units.

(g) *Extension of 2-year grace period*—(1) *In general.* A real estate investment trust may apply to the district director of the internal revenue district in which is located the principal place of business (or principal office or agency) of the trust for an extension of the 2-year grace period. If the trust establishes to the satisfaction of the district director that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in foreclosure property, or for an orderly renegotiation of a lease or leases of the property, the district director may extend the 2-year grace period. See section 856(e)(3) (as in effect with respect to the particular extension) for rules relating to the maximum length of an extension, and the number of extensions which may be granted. An extension of the grace period may be granted by the district director either before or after the date on which the grace period, but for the extension, would expire. The extension shall be effective as of the date on which the grace period, but for the extension, would expire.

(2) *Showing required.* Generally, in order to establish the necessity of an extension, the trust must demonstrate that it has made good faith efforts to renegotiate leases with respect to, or dispose of, the foreclosure property. In certain cases, however, the trust may establish the necessity of an extension even though it has not made such efforts. For example, if the trust demonstrates that, for valid business reasons, construction of the foreclosure property could not be completed before the expiration of the grace period, the necessity of the extension could be established even though the trust had made no effort to sell the property. For another example, if the trust demonstrates that due to a depressed real estate market, it could not sell the foreclosure property before the expiration of the grace period except at a distress price, the necessity of an extension could be established even though the trust had made no effort to sell the property. The fact that property was acquired as foreclosure property prior to January 3, 1975 (the date of enactment of section 856(e)), generally will be considered as a factor (but not a controlling factor) which tends to establish that an extension of the grace period is necessary.

(3) *Time for requesting an extension of the grace period.* A request for an extension of the grace period must be filed with the appropriate district director more than 60 days before the day on which the grace period would otherwise expire. In the case of a grace period which would otherwise expire before August 6, 1976, a request for an extension will be considered to be timely filed if filed on or before June 7, 1976.

(4) *Information required.* The request for an extension of the grace period shall identify the property with respect to which the request is being made and shall also include the following information:

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired as foreclosure property by the trust,

(iii) The taxable year of the trust in which the property was acquired,

(iv) If the trust has been previously granted an extension of the grace period with respect to the property, a statement to that effect (which shall include the date on which the grace period, as extended, expires) and a copy of the information which accompanied the request for the previous extension,

(v) A statement of the reasons why the grace period should be extended,

(vi) A description of any efforts made by the trust after the acquisition of the property to dispose of the property or to renegotiate any lease with respect to the property, and

(vii) A description of any other factors which tend to establish that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in the property, or for an orderly renegotiation of a lease or leases of the property.

The trust shall also furnish any additional information requested by the district director after the request for extension is filed.

(5) *Automatic extension.* If a real estate investment trust files a request for an extension with the district director more than 60 days before the expiration of the grace period, the grace period shall be considered to be extended until the end of the 30th day after the

date on which the district director notifies the trust by certified mail sent to its last known address that the period of extension requested by the trust is not granted. In no event, however, shall the rule in the preceding sentence extend the grace period beyond the expiration of (i) the period of extension requested by the trust, or (ii) the 1-year period following the date that the grace period (but for the automatic extension) would expire. The date of the postmark on the sender's receipt is considered to be the date of the certified mail for purposes of this subparagraph. This subparagraph does not apply, however, if the date of the notification by certified mail described in the first sentence is more than 30 days before the date that the grace period (determined without regard to this subparagraph) expires. Moreover, this subparagraph shall not operate to allow any period of extension that is prohibited by the last sentence of section 856(e)(3) (as in effect with respect to the particular extension).

(6) *Extension of time for filing.* If a real estate investment trust fails to file the request for an extension of the grace period within the time provided in paragraph (g)(3) of this section, then the district director shall grant a reasonable extension of time for filing such request, provided (i) it is established to the satisfaction of the district director that there was reasonable cause for failure to file the request within the prescribed time and (ii) a request for such extension is filed within such time as the district director considers reasonable under the circumstances.

(7) *Status of taxpayer.* The reference to "real estate investment trust" or "trust" in this paragraph (g) shall be considered to include a taxpayer that is not a qualified real estate investment trust, if the taxpayer establishes to the satisfaction of the district director that its failure to be a qualified real estate investment trust for the taxable year was due to reasonable cause and not due to willful neglect. The principles of §1.856–7(c) and §1.856–8(d) (including the principles relating to expert advice) shall apply for determining reasonable cause (and absence of willful neglect) for this purpose.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11269, Feb. 6, 1981; 46 FR 15263, Mar. 5, 1981]

§1.856–7 Certain corporations, etc., that are considered to meet the gross income requirements.

(a) *In general.* A corporation, trust, or association which fails to meet the requirements of paragraph (2) or (3) of section 856(c), or of both such paragraphs, for any taxable year nevertheless is considered to have satisfied these requirements if the corporation, trust, or association meets the requirements of subparagraphs (A), (B), and (C) of section 856(c)(7) (relating to a schedule attached to the return, the absence of fraud, and reasonable cause).

(b) *Contents of the schedule.* The schedule required by subparagraph (A) of section 856(c)(7) must contain a breakdown, or listing, of the total amount of gross income falling under each of the separate subparagraphs of section 856(c) (2) and (3). Thus, for example, the real estate investment trust, for purposes of listing its income from the sources described in section 856(c)(2), would list separately the total amount of dividends, the total amount of interest, the total amount of rents from real property, etc. The listing is not required to be on a lease-by-lease, loan-by-loan, or project-by-project basis, but the real estate investment trust must maintain adequate records on such a basis with which to substantiate each total amount listed in the schedule.

(c) *Reasonable cause*—(1) *In general.* The failure to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs) will be considered due to reasonable cause and not due to willful neglect if the real estate investment trust exercised ordinary business care and prudence in attempting to satisfy the requirements. Such care and prudence must be exercised at the time each transaction is entered into by the trust. However, even if the trust exercised ordinary business care and prudence in entering into a transaction, if the trust later determines that the transaction results in the receipt or accrual of nonqualified income and that the amounts of such nonqualified income, in the context of the trust's overall portfolio, reasonably can be expected to cause a source-of-income requirement to be failed, the trust must use ordinary business care and prudence in an effort to renegotiate the terms of the transaction, dispose of property acquired or leased in the transaction, or alter other elements of its portfolio. In any case, failure to meet an income source requirement will be considered due to willful neglect and not due to reasonable cause if the failure is willful and the trust could have avoided such failure by taking actions not inconsistent with ordinary business care and prudence. For example, if the trust enters into a lease knowing that it will produce nonqualified income which reasonably can be expected to cause a source-of-income requirement to be failed, the failure is due to willful neglect even if the trust has a legitimate business purpose for entering into the lease.

(2) *Expert advice*—(i) *In general.* The reasonable reliance on a reasoned, written opinion as to the characterization for purposes of section 856 of gross income to be derived (or being derived) from a transaction generally constitutes ''reasonable cause'' if income from that transaction causes the trust to fail to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs). The absence of such a reasoned, written opinion with respect to a transaction does not, by itself, give rise to any inference that the failure to meet a percentage of income requirement was without reasonable cause. An opinion as to the character of income from a transaction includes an opinion pertaining to the use of a standard form of transaction or standard operating procedure in a case where such standard form or procedure is in fact used or followed.

(ii) If the opinion indicates that a portion of the income from a transaction will be nonqualifed income, the trust must still exercise ordinary business care and prudence with respect to the nonqualified income and determine that the amount of that income, in the context of its overall portfolio, reasonably cannot be expected to cause a source-of-income requirement to be failed. Reliance on an opinion is not reasonable if the trust has reason to believe that the opinion is incorrect (for example, because the trust withholds facts from the person rendering the opinion).

(iii) *Reasoned written opinion.* For purposes of this subparagraph (2), a written opinion means an opinion, in writing, rendered by a tax advisor (including house counsel) whose opinion would be relied on by a person exercising ordinary business care and prudence in the circumstances of the particular transaction. A written opinion is considered ''reasoned'' even if it reaches a conclusion which is subsequently determined to be incorrect, so long as the opinion is based on a full disclosure of the factual situation by the real estate investment trust and is addressed to the facts and law which the person rendering the opinion believes to be applicable. However, an opinion is not considered ''reasoned'' if it does nothing more than recite the facts and express a conclusion.

(d) *Application of section 856(c)(7) to taxable years beginning before October 5, 1976.* Pursuant to section 1608(b) of the Tax Reform Act of 1976, paragraph (7) of section 856(c) and this section apply to a taxable year of a real estate investment trust which begins before October 5, 1976, only if as the result of a determination occurring after October 4, 1976, the trust does not meet the requirements of paragraph (2) or (3) of section 856(c), or both paragraphs, as in effect for the taxable year. The requirement that the schedule described in subparagraph (A) of section 856(c)(7) be attached to the income tax return of a real estate investment trust in order for section 856(c)(7) to apply is not applicable to taxable years beginning before October 5, 1976. For purposes of section 1608(b) of the Tax Reform Act of 1976 and this paragraph, the rules relating to determinations prescribed in section 860(e) and §1.860–2(b)(1) (other than the second, third, and last sentences of §1.860–2(b)(1)(ii)) shall apply. However, a determination consisting of an agreement between the taxpayer and the district director (or other official to whom authority to sign the agreement is delegated) shall set forth the amount of gross income for the taxable year to which the determination applies, the amount of the 90 percent and 75 percent source-of-income requirements for the taxable year to which the determination applies, and the amount by which the real estate investment trust failed to meet either or both of the requirements. The agreement shall also set forth the amount of tax for which the trust is liable pursuant to section 857(b)(5). The agreement shall also contain a finding as to whether the failure to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs) was due to reasonable cause and not due to willful neglect.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. [T.D. 7767, 46 FR 11274, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§1.856–8 Revocation or termination of election.

(a) *Revocation of an election to be a real estate investment trust.* A corporation, trust, or association that has made an election under section 856(c)(1) to be a real estate investment trust may revoke the election for any taxable year after the first taxable year for which the election is effective. The revocation must be made by filing a statement with the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency. The statement must be filed on or before the 90th day after the first day of the first taxable year for which the revocation is to be effective. The statement must be signed by an official authorized to sign the income tax return of the taxpayer and must—

(1) Contain the name, address, and taxpayer identification number of the taxpayer,

(2) Specify the taxable year for which the election was made, and

(3) Include a statement that the taxpayer, pursuant to section 856(g)(2), revokes its election under section 856(c)(1) to be a real estate investment trust.

The revocation may be made only with respect to a taxable year beginning after October 4, 1976, and is effective for the taxable year in which made and for all succeeding taxable years. A revocation with respect to a taxable year beginning after October 4, 1976, that is filed before February 6, 1981, in the time and manner prescribed in §7.856(g)–1 of this chapter (as in effect when the revocation was filed) is considered to meet the requirements of this paragraph.

(b) *Termination of election to be a real estate investment trust.* An election of a corporation, trust, or association under section 856(c)(1) to be a real estate investment trust shall terminate if the corporation, trust, or association is not a qualified real estate investment trust for any taxable year (including the taxable year with respect to which the election is made) beginning after October 4, 1976. (This election terminates whether the failure to be a qualified real estate investment trust is intentional or inadvertent.) The term ‘‘taxable year’’ includes a taxable year of less than 12 months for which a return is made under section 443. The termination of the election is effective for the first taxable year beginning after October 4, 1976, for which the corporation, trust, or association is not a qualified real estate investment trust and for all succeeding taxable years.

(c) *Restrictions on election after termination or revocation*—(1) *General rule.* Except as provided in paragraph (d) of this section, if a corporation, trust, or association has made an election under section 856(c)(1) to be a real estate investment trust and the election has been terminated or revoked under section 856(g)(1) or (2), the corporation, trust, or association (and any successor corporation, trust, or association) is not eligible to make a new election under section 856(c)(1) for any taxable year prior to the fifth taxable year which begins after the first taxable year for which the termination or revocation is effective.

(2) *Successor corporation.* The term ‘‘successor corporation, trust, or association'', as used in section 856(g)(3), means a corporation, trust, or association which meets both a continuity of ownership requirement and a continuity of assets requirement with respect to the corporation, trust, or association whose election has been terminated under section 856(g)(1) or revoked under section 856(g)(2). A corporation, trust, or association meets the continuity of ownership requirement only if at any time during the taxable year the persons who own, directly or indirectly, 50 percent or more in value of its outstanding shares owned, at any time during the first taxable year for which the termination or revocation was effective, 50 percent or more in value of the outstanding shares of the corporation, trust, or association whose election has been terminated or revoked. A corporation, trust, or association meets the continuity of assets requirement only if either (i) a substantial portion of its assets were assets of the corporation, trust, or association whose election has been revoked or terminated, or (ii) it acquires a substantial portion of the assets of the corporation, trust, or association whose election has been terminated or revoked.

(3) *Effective date.* Section 856(g)(3) does not apply to the termination of an election that was made by a taxpayer pursuant to section 856(c)(1) on or before October 4, 1976, unless the taxpayer is a qualified real estate investment trust for a taxable year ending after October 4, 1976, for which the pre-October 5, 1976, election is in effect. For example, assume that Trust X, a calendar year taxpayer, files a timely election under section 856(c)(1) with respect to its taxable year 1974, and is a qualified real estate investment trust for calendar years 1974 and 1975. Assume further that Trust X is not a qualified real estate investment trust for 1976 and 1977 because it willfully fails to meet the asset diversification requirements of section 856(c)(5) for both years. The failure (whether or not willful) to meet these requirements in 1977 terminates the election to be a real estate investment trust made with respect to 1974. (See paragraph (b) of this section.) The termination is effective for 1977 and all succeeding taxable years. However, under section 1608(d)(3) of the Tax Reform Act of 1976, Trust X is not prohibited by section 856(g)(3) from making a new election under section 856(c)(1) with respect to 1978.

(d) *Exceptions*— Section 856(g)(4) provides an exception to the general rule of section 856(g)(3) that the termination of an election to be a real estate investment trust disqualifies the corporation, trust, or association from making a new election for the 4 taxable years following the first taxable year for which the termination is effective. This exception applies where the corporation, trust, or association meets the requirements of section 856(g)(4)(A), (B) and (C) (relating to the timely filing of a return, the absence of fraud, and reasonable cause, respectively) for the taxable year with respect to which the termination of election occurs. In order to meet the requirements of section 856(g)(4)(C), the corporation, trust, or association must establish, to the satisfaction of the district director for the internal revenue district in which the corporation, trust, or association maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for the taxable year in question was due to reasonable cause and not due to willful neglect. The principles of § 1.856–7(c) (including the principles relating to expert advice) will apply in determining whether, for purposes of section 856(g)(4), the failure of a corporation, trust, or association to be a qualified real estate investment trust for a taxable year was due to reasonable cause and not due to willful neglect. Thus, for example, the corporation, trust, or association must exercise ordinary business care and prudence in attempting to meet the status conditions of section 856(a) and the distribution and recordkeeping requirements of section 857(a), as well as the gross income requirements of section 856(c). The provisions of section 856(g)(4) do not apply to a taxable year in which the corporation, trust, or association makes a valid revocation, under section 856(g)(2), of an election to be a real estate investment trust.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. [T.D. 7767, 46 FR 11275, Feb. 6, 1981; 46 FR 15263, Mar. 5, 1981]

§1.857–1 Taxation of real estate investment trusts.

(a) *Requirements applicable thereto.* Section 857(a) denies the application of the provisions of part II, subchapter M, chapter 1 of the Code (other than sections 856(g), relating to the revocation or termination of an election, and 857(d), relating to earnings and profits) to a real estate investment trust for a taxable year unless—

(1) The deduction for dividends paid for the taxable year as defined in section 561 (computed without regard to capital gain dividends) equals or exceeds the amount specified in section 857(a)(1), as in effect for the taxable year; and

(2) The trust complies for such taxable year with the provisions of §1.857–8 (relating to records required to be maintained by a real estate investment trust).

See section 858 and §1.858–1, relating to dividends paid after the close of the taxable year.

(b) *Failure to qualify.* If a real estate investment trust does not meet the requirements of section 857(a) and paragraph (a) of this section for the taxable year, it will, even though it may otherwise be classified as a real estate investment trust, be taxed in such year as an ordinary corporation and not as a real estate investment trust. In such case, none of the provisions of part II of subchapter M (other than sections 856(g) and 857(d)) will be applicable to it. For the rules relating to the applicability of sections 856(g) and 857(d), see §1.857–7.

(856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4087, Apr. 28, 1962, as amended by T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§1.857–2 Real estate investment trust taxable income and net capital gain.

(a) *Real estate investment trust taxable income.* Section 857(b)(1) imposes a nominal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the ‘‘real estate investment trust taxable income’’, as defined in section 857(b)(2). Section 857(b)(2) requires certain adjustments to be made to convert taxable income of the real estate investment trust to ‘‘real estate investment trust taxable income’’. The adjustments are as follows:

(1) *Net capital gain.* In the case of taxable years ending before October 5, 1976, the net capital gain, if any, is excluded.

(2) *Special deductions disallowed.* The special deductions provided in part VIII, subchapter B, chapter 1 of the Code (except the deduction under section 248) are not allowed.

(3) *Deduction for dividends paid*—(i) *General rule.* The deduction for dividends paid (as defined in section 561) is allowed. In the case of taxable years

ending before October 5, 1976, the deduction for dividends paid is computed without regard to capital gains dividends.

(ii) *Deduction for dividends paid if there is net income from foreclosure property.* If for any taxable year the trust has net income from foreclosure property (as defined in section 857(b)(4)(B) and § 1.857–3), the deduction for dividends paid is an amount equal to the amount which bears the same proportion to the total dividends paid or considered as paid during the taxable year that otherwise meet the requirements for the deduction for dividends paid (as defined in section 561) as the real estate investment trust taxable income (determined without regard to the deduction for dividends paid) bears to the sum of—

(A) The real estate investment trust taxable income (determined without regard to the deduction for dividends paid), and

(B) The amount by which the net income from foreclosure property exceeds the tax imposed on such income by section 857(b)(4)(A).

For purposes of the preceding sentence, the term ‘‘total dividends paid or considered as paid during the taxable year’’ includes deficiency dividends paid with respect to the taxable year that are not otherwise excluded under this subdivision or section 857(b)(3)(A). The term, however, does not include either deficiency dividends paid during the taxable year with respect to a preceding taxable year ending before October 5, 1976, capital gains dividends.

(iii) *Deduction for dividends paid for purposes of the alternative tax.* The rules in section 857(b)(3)(A) apply in determining the amount of the deduction for dividends paid that is taken into account in computing the alternative tax. Thus, for example, if a real estate investment trust has net income from foreclosure property for a taxable year ending after October 4, 1976, then for purposes of determining the partial tax described in section 857(b)(3)(A)(i), the amount of the deduction for dividends paid is computed pursuant to paragraph (a)(3)(ii) of this section, except that capital gains dividends are excluded from the dividends paid or considered as paid during the taxable year, and the net capital gain is excluded in computing real estate investment trust taxable income.

(4) *Section 443(b) disregarded.* The taxable income is computed without regard to seciton 443(b). Thus, the taxable income for a period of less than 12 months is not placed on an annual basis even though the short taxable year results from a change of accounting period.

(5) *Net operating loss deduction.* In the case of a taxable year ending before October 5, 1976, the net operating loss deduction provided in section 172 is not allowed.

(6) *Net income from foreclosure property.* An amount equal to the net income from foreclosure property (as defined in section 857(b)(4)(B) and paragraph (a) of § 1.857–3), if any, is excluded.

(7) *Tax imposed by section 857(b)(5).* An amount equal to the tax (if any) imposed on the trust by section 857(b)(5) for the taxble year is excluded.

(8) *Net income or loss from prohibited transactions.* An amount equal to the amount of any net income derived from prohibited transactions (as defined in section 857(b)(6)(B)(i)) is excluded. On the other hand, an amount equal to amount of any net loss derived from prohibited transactions (as defined in section 857(b)(6)(B)(ii)) is included. Because the amount of the net loss derived from prohibited transactions is taken into account in computing taxable income before the adjustments required by section 857(b)(2) and this section are made, the effect of including an amount equal to the amount of the loss is to disallow a deduction for the loss.

(b) *Net capital gain in taxable years ending October 5, 1976.* The rules relating to the taxation of capital gains in 26 CFR 1.857–2(b) (revised as of April 1,

1977) apply to taxable years ending before October 5, 1976.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§1.857–3 Net income from foreclosure property.

(a) *In general.* For purposes of section 857(b)(40(B), net income from foreclosure property means the aggregate of—

(1) All gains and losses from sales or other dispositions of foreclosure property described in section 1221(1), and,

(2) The difference (hereinafter called ‘‘net gain or loss from operations’’) between (i) the gross income derived from foreclosure property (as defined in section 856(e)) to the extent such gross income is not described in subparagraph (A), (B), (C), (D), (E), or (G) of section 856(c)(3), and (ii) the deductions allowed by chapter 1 of the Code which are directly connected with the production of such gross income.

Thus, the sum of the gains and losses from sales or other dispositions of foreclosure property described in section 1221(1) is aggregated with the net gain or loss from operations in arriving at net income from foreclosure property. For example, if for a taxable year a real estate investment trust has gain of $100 from the sale of an item of foreclosure property described in section 1221(1), a loss of $50 from the sale of an item of foreclosure property described in section 1221(1), gross income of $25 from the rental of foreclosure property that is not gross income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3), and deductions of $35 allowed by chapter 1 of the Code which are directly connected with the production of the rental income, the net income from foreclosure property for the taxable years is $40 (($100−$50)+($25−$35)).

(b) *Directly connected deductions.* A deduction which is otherwise allowed by chapter 1 of the Code is ‘‘directly connected’’ with the production of gross income from the foreclosure property if it has a proximate and primary relationship to the earning of the income. Thus, in the case of gross income from real property that is foreclosure property, ‘‘directly connected’’ deductions would include depreciation on the property, interest paid or accrued on the indebtedness of the trust (whether or not secured by the property) to the extent attributable to the carrying of the property, real estate taxes, and fees paid to an independent contractor hired to manage the property. On the other hand, general overhead and administrative expenses of the trust are not ‘‘directly connected’’ deductions. Thus, salaries of officers and other administrative employees of the trust are not ‘‘directly connected’’ deductions. The net operating loss deduction provided by section 172 is not allowed in computing net income from foreclosure property.

(c) *Net loss from foreclosure property.* The tax imposed by section 857(b)(4) applies only if there is net income from foreclosure property. If there is a net loss from foreclosure property (that is, if the aggregate computed under paragraph (a) of this section results in a negative amount) the loss is taken into account in computing real estate investment trust taxable income under section 857(b)(2).

(d) *Gross income not subject to tax on foreclosure property.* If the gross income derived from foreclosure property consists of two classes, a deduction directly connected with the production of both classes (including interest attributable to the carrying of the property) must be apportioned between them. The two classes are:

(1) Gross income which is taken into account in computing net income from foreclosure property and

(2) Other income (such as income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3)).

The apportionment may be made on any reasonable basis.

(e) *Allocation and apportionment of interest.* For purposes of determining the amount of interest attributable to the carrying of foreclosure property under paragraph (b) of this section, the following rules apply:

(1) *Deductible interest.* Interest is taken into account under this paragraph (e) only if it is otherwise deductible under chapter 1 of the Code.

(2) *Interest specifically allocated to property.* Interest that is specifically allocated to an item of property is attributable only to the carrying of that property. Interest is specifically allocated to an item of property if (i) the indebtedness on which the interest is paid or accrued is secured only by that property, (ii) such indebtedness was specifically incurred for the purpose of purchasing, constructing, maintaining, or improving that property, and (iii) the proceeds of the borrowing were applied for that purpose.

(3) *Other interest.* Interest which is not specifically allocated to property is apportioned between foreclosure property and other property under the principles of § 1.861–8(e)(2)(v).

(4) *Effective date.* The rules in this paragraph (e) are mandatory for all taxable years ending after February 6, 1981.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857–4 Tax imposed by reason of the failure to meet certain source-of-income requirements.

Section 857(b)(5) imposes a tax on a real estate investment trust that is considered, by reason of section 856(c)(7), as meeting the source-of-income requirements of paragraph (2) or (3) of section 856(c) (or both such paragraphs). The amount of the tax is determined in the manner prescribed in section 857(b)(5).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11278, Feb. 2, 1981]

§ 1.857–5 Net income and loss from prohibited transactions.

(a) *In general.* Section 857(b)(6) imposes, for each taxable year, a tax equal to 100 percent of the net income derived from prohibited transactions. A prohibited transaction is a sale or other disposition of property described in section 1221(1) that is not foreclosure property. The 100-percent tax is imposed to preclude a real estate investment trust from retaining any profit from ordinary retailing activities such as sales to customers of condominium units or subdivided lots in a development tract. In order to prevent a trust from receiving any tax benefit from such activities, a net loss from prohibited transactions effectively is disallowed in compting real estate investment trust taxable income. See § 1.857–2(a)(8). Such loss, however, does reduce the amount which a trust is required to distribute as dividends. For purposes of applying the provisions of the Code, other than those provisions of part II of subchapter M which relate to prohibited transactions, no inference is to be drawn from the fact that a type of transaction does not constitute a prohibited transaction.

(b) *Special rules.* In determining whether a particular transaction constitutes a prohibited transaction, the activities of a real estate investment trust with respect to foreclosure property and its sales of such property are disregarded. Also, if a real estate investment trust enters into a purchase and leaseback of real property with an option in the seller-lessee to repurchase the property at the end of the lease period, and the seller exercises the option pursuant to its terms, income from the sale generally will not be considered to be income from a prohibited transaction solely because the purchase and leaseback was entered into with an option in the seller to repurchase and because the option was exercised pursuant to its terms. Other facts and circumstances, however, may require a conclusion that the property is held primarily for sale to customers in the ordinary course of a trade or business. Gain from the sale or other disposition of property described in section 1221(1) (other than foreclosure property) that is included in gross income for a taxable year of a qualified real estate investment trust constitutes income from a prohibited transaction, even though the sale or other disposition from which the gain is derived occurred in a prior taxable year. For example, if a corporation that is a qualified real estate investment trust for the current taxable year elected to report the income from the sale of an item of section 1221(1) property (other than foreclosure property) on the installment method of reporting income, the gain from the sale that is taken into income by the real estate investment trust for the current taxable year is income from a prohibited transaction. This result follows even though the sale occurred in a prior taxable year for which the corporation did not qualify as a real estate investment trust. On the other hand, if the gain is taken into income in a taxable year for which the taxpayer is not a qualifed real estate investment trust, the 100-percent tax does not apply.

(c) *Net income or loss from prohibited transactions.* Net income or net loss from prohibited transactions is determined by aggregating all gains from the sale or other disposition of property (other than foreclosure property) described in section 1221(1) with all losses from the sale or other disposition of such property. Thus, for example, if a real estate investment trust sells two items of property described in section 1221(1) (other than foreclosure property) and recognizes a gain of $100 on the sale of one item and a loss of $40 on the sale of the second item, the net income from prohibited transactions will be $60.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11278, Feb. 6, 1981]

§1.857–6 Method of taxation of shareholders of real estate investment trusts.

(a) *Ordinary income.* Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a real estate investment trust shall include such dividends in gross income for the taxable year in which they are received. See section 858(b) and paragraph (c) of §1.858–1 for treatment by shareholders of dividends paid by a real estate investment trust after the close of its taxable year in the case of an election under section 858(a).

(b) *Capital gains.* Under section 857(b)(3)(B), shareholders of a real estate investment trust who receive capital gain dividends (as defined in paragraph (e) of this section), in respect of the capital gains of a corporation, trust, or association for a taxable year for which it is taxable under part II of subchapter M as a real estate investment trust, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend which in his hands is gain to which section 1201(d) (1) or (2) applies is the portion so designated by the real estate investment trust pursuant to paragraph (e)(2) of this section.

(c) *Special treatment of loss on the sale or exchange of real estate investment trust stock held less than 31 days*—(1) *In general.* Under section 857(b)(7), if any person with respect to a share of real estate investment trust stock held for a period of less than 31 days, is required by section 857(b)(3)(B) to include in gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) the amount of a capital gains dividend, then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(2) *Determination of holding period.* The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 857(b)(7)(B) and this paragraph, a share of real estate investment trust stock has been held for a period of less than 31 days. In applying those rules, however, ‘‘30 days’’ shall be substituted for the number of days specified in subparagraph (B) of such section.

(3) *Illustration.* The application of section 857(b)(7) and this paragraph may be illustrated by the following example:

Example. On December 15, 1961, A purchased a share of stock in the S Real Estate Investment Trust for $20. The S trust declared a capital gains dividend of $2 per share to shareholders of record on December 31, 1961. A, therefore, received a capital gain dividend of $2 which, pursuant to section 857(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than six months. On January 5, 1962, A sold his share of stock in the S trust for $17.50, which sale resulted in a loss of $2.50. Under section 857(b)(4) and this paragraph, A must treat $2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than six months.

(d) *Dividend received credit, exclusion, and deduction not allowed.* Any dividend received from a real estate investment trust which, for the taxable year to which the dividend relates, is a qualified real estate investment trust, shall not be eligible for the dividend received credit (for dividends received on or before December 31, 1964) under section 34(a), the dividend received exclusion under section 116, or the dividend received deduction under section 243.

(e) *Definition of capital gain dividend.* (1)(i) A capital gain dividend, as defined in section 857(b)(3)(C), is any dividend or part thereof which is designated by a real estate investment trust as a capital gain dividend in a written notice mailed to its shareholders within the period specified in section 857(b)(3)(C) and paragraph (f) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858) is greater than the net capital gain of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate of the amount so designated. For example, a real estate investment trust making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1961, that $200,000 of a distribution of $500,000 made December 15, 1961, constituted a capital gain dividend, amounting to $2 per share. It was later discovered that an error had been made in determining the net capital gain of the taxable year and the net capital gain was $100,000 instead of $200,000. In such case, each shareholder would have received a capital gain dividend of $1 per share instead of $2 per share.

(ii) For purposes of section 857(b)(3)(C) and this paragraph, the net capital gain for a taxable year ending after October 4, 1976, is deemed not to exceed the real estate investment trust taxable income determined by taking into account the net operating loss deduction for the taxable year but not the deduction for dividends paid. See example 2 in §1.172–5(a)(4).

(2) In the case of capital gain dividends designated with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858), the real estate investment trust must include in its written notice designating the capital gain dividend a statement showing the shareholder's proportionate share of such dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d) (1) or (2), the real estate investment trust shall consider that capital gain dividends for a taxable year are first made from its long-term capital gains which are not described in section 1201(d) (1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d) (1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the trust's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every real estate investment trust shall keep a record of the proportion of each capital gain divided (to which this subparagraph applies) which is gain described in section 1201(d) (1) or (2).

(f) *Mailing of written notice to shareholders*—(1) *General rule.* Except as provided in paragraph (f)(2) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 30 days after the close of the taxable year of the real estate investment trust.

(2) *Net capital gain resulting from a determination.* If, as a result of a determination (as defined in section 860(e)), occurring after October 4, 1976, there is an increase in the amount by which the net capital gain exceeds the deduction for dividends paid (determined with reference to capital gains dividends only) for the taxable year, then a real estate investment trust may designate a dividend (or part thereof) as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determination. The designation may be made with respect to a dividend (or part thereof) paid during the taxable year to which the determination applies (including a dividend considered as paid during the taxable year pursuant to section 858). A deficiency dividend (as defined in section 860(f)), or a part thereof, that is paid with respect to the taxable year also may be designated as a capital gain dividend by the real estate investment trust (or by the acquiring corporation to which section 381(c)(25) applies) before the expiration of the 120-day period immediately following the determination. However, the aggregate amount of the dividends (or parts thereof) that may be designated as capital gain dividends after the date of the determination shall not exceed the amount of the increase in the excess of the net capital gain over the deduction for dividends paid (determined with reference to capital gains dividends only) that results from the

determination. The date of a determination shall be established in accordance with §1.860–2(b)(1).

Redesignated and amended by T.D. 7767, 46 FR 11277, 11279, and 11283, Feb. 6, 1981; T.D. 7936, 49 FR 2107, Jan. 18, 1984; T.D. 8107, 51 FR 43347, Dec. 2, 1986]

§1.857–7 Earnings and profits of a real estate investment trust.

(a) Any real estate investment trust whether or not such trust meets the requirements of section 857(a) and paragraph (a) of §1.857–1 for any taxable year beginning after December 31, 1960 shall apply paragraph (b) of this section in computing its earnings and profits for such taxable year.

(b) In the determination of the earnings and profits of a real estate investment trust, section 857(d) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a trust would have had earnings and profits of $500,000 for the taxable year except for the fact that it had a net capital loss of $100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a real estate investment trust would be $500,000. If the real estate investment trust had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year, the earnings and profits for the taxable year to be considered in such computation would amount to $400,000 assuming that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, $500,000, the trust would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and would begin such year with its paid-in capital reduced by $100,000, an amount equal to the excess of the $500,000 distributed over the $400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year. For purposes of section 857(d) and this section, if an amount equal to any net loss derived from prohibited transactions is included in real estate investment trust taxable income pursuant to section 857(b)(2)(F), that amount shall be considered to be an amount which is not allowable as a deduction in computing taxable income for the taxable year. The earnings and profits for the taxable year (but not the accumulated earnings and profits) shall not be considered to be less than (i) in the case of a taxable year ending before October 5, 1976, the amount (if any) of the net capital gain for the taxable year, or (ii) in the case of a taxable year ending after December 31, 1973, the amount (if any), of the excess of the net income from foreclosure property for the taxable year over the tax imposed thereon by section 857(b)(4)(A).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4088, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§1.857–8 Records to be kept by a real estate investment trust.

(a) *In general.* Under section 857(a)(2) a real estate investment trust is required to keep such records as will disclose the actual ownership of its outstanding stock. Thus, every real estate investment trust shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from its shareholders. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) *Actual owner of stock.* The actual owner of stock of a real estate investment trust is the person who is required to include in gross income in his return the dividends received on the stock. Generally, such person is the shareholder of record of the real estate investment trust. However, where the shareholder of record is not the actual owner of the stock, the stockholding record of the real estate investment trust may not disclose the actual ownership of such stock. Accordingly, the real estate investment trust shall demand written statements from shareholders of record disclosing the actual owners of stock as required in paragraph (d) of this section.

(c) *Stock ownership for personal holding company determination.* For the purpose of determining under section 856(a)(6) whether a trust, claiming to be a real estate investment trust, is a personal holding company, the permanent records of the trust shall show the maximum number of shares of the trust (including the number and face value of securities convertible into stock of the trust) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the trust's taxable year, as provided in section 544.

(d) *Statements to be demanded from shareholders.* The information required by paragraphs (b) and (c) of this section shall be set forth in written statements which shall be demanded from shareholders of record as follows:

(1) In the case of a trust having 2,000 or more shareholders of record of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a trust having less than 2,000 and more than 200 shareholders of record of its stock on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a trust having 200 or less shareholders of record of its stock on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

(e) *Demands for statements.* The written statements from shareholders of record shall be demanded by the real estate investment trust in accordance with paragraph (d) of this section within 30 days after the close of the real estate investment trust's taxable year (or before June 1, 1962, whichever is later). When making demand for such written statements, the trust shall inform each such shareholder of his duty to submit at the time he files his income tax return (or before July 1, 1962, whichever is later) the statements which are required by §1.857–9 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with the trust's demand for statements under this section shall be maintained as a part of the trust's records required by this section. A trust which fails to keep such records to show, to the extent required by this section, the actual ownership of its outstanding stock shall be taxable as an ordinary corporation and not as a real estate investment trust.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4088, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857–9 Information required in returns of shareholders.

(a) *In general.* Any person who fails or refuses to submit to a real estate investment trust the written statements required under § 1.857–8 to be demanded by such trust from its shareholders of record shall submit at the time he files his income tax return for his taxable year which ends with, or includes, the last day of the trust's taxable year (or before July 1, 1962, whichever is later) a statement setting forth the information required by this section.

(b) *Information required*—(1) *Shareholder of record not actual owner.* In the case of any person holding shares of stock in any trust claiming to be a real estate investment trust who is not the actual owner of such stock, the name and address of each actual owner, the number of shares owned by each actual owner at any time during such person's taxable year, and the amount of dividends belonging to each actual owner.

(2) *Actual owner of shares.* In the case of an actual owner of shares of stock in any trust claiming to be a real estate investment trust—

(i) The name and address of each such trust, the number of shares actually owned by him at any and all times during his taxable year, and the amount of dividends from each such trust received during his taxable year;

(ii) If shares of any such trust were acquired or disposed of during such person's taxable year, the name and address of the trust, the number of shares acquired or disposed of, the dates of acquisition or disposition, and the names and addresses of the persons from whom such shares were acquired or to whom they were transferred;

(iii) If any shares of stock (including securities convertible into stock) of any such trust are also owned by any member of such person's family (as defined in section 544(a)(2)), or by any of his partners, the name and address of the trust, the names and addresses of such members of his family and his partners, and the number of shares owned by each such member of his family or partner at any and all times during such person's taxable year; and

(iv) The names and addresses of any corporation, partnership, association, or trust, in which such person had a beneficial interest of 10 percent or more at any time during his taxable year.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4089, Apr. 28, 1962, as amended by T.D. 6628, 27 FR 12794, Dec. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857–10 Information returns.

Nothing in §§ 1.857–8 and 1.857–9 shall be construed to relieve a real estate investment trust or its shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. [T.D. 6598, 27 FR 4089, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§1.857–11 Non-REIT earnings and profits.

(a) *Applicability of section 857(a)(3)(A).* A real estate investment trust does not satisfy section 857(a)(3)(A) unless—

(1) Part II of subchapter M applied to the trust for all its taxable years beginning after February 28, 1986; and

(2) For each corporation to whose earnings and profits the trust succeeded by the operation of section 381, part II of subchapter M applied for all the corporation's taxable years beginning after February 28, 1986.

(b) *Applicability of section 857(a)(3)(B); in general.* A real estate investment trust does not satisfy section 857(a)(3)(B) unless, as of the close of the taxable year, it has no earnings and profits other than earnings and profits that—

(1) Were earned by a corporation in a year for which part II of subchapter M applied to the corporation and, at all times thereafter, were the earnings and profits of a corporation to which part II of subchapter M applied; or

(2) By the operation of section 381 pursuant to a transaction that occurred before December 22, 1992, became the earnings and profits of a corporation to which part II of subchapter M applied and, at all times thereafter, were the earnings and profits of a corporation to which part II of subchapter M applied.

(c) *Distribution procedures similar to those for regulated investment companies to apply.* Distribution procedures similar to those in section 852(e) for regulated investment companies apply to non-REIT earnings and profits of real estate investment trusts.

(d) *Effective date.* This regulation is effective for taxable years ending on or after December 22, 1992.

[T.D. 8483, 58 FR 43798, Aug. 18, 1993]

§1.858–1 Dividends paid by a real estate investment trust after close of taxable year.

(a) *General rule.* Under section 858, a real estate investment trust may elect to treat certain dividends that are distributed within a specified period after the close of a taxable year as having been paid during the taxable year. The dividend is taken into account in determining the deduction for dividends paid for the taxable year in which it is treated as paid. The dividend may be an ordinary dividend or, subject to the requirements of sections 857(b)(3)(C) and 858(c), a capital gain dividend. The trust may make the dividend declaration required by section 858(a)(1) either before or after the close of the taxable year as long as the declaration is made before the time prescribed by law for filing its return for the taxable year (including the period of any extension of time granted for filing the return).

(b) *Election*—(1) *Method of making election.* The election must be made in the return filed by the trust for the taxable year. The election shall be made by treating the dividend (or portion thereof) to which the election applies as a dividend paid during the taxable year of the trust in computing its real estate investment trust taxable income and, if applicable, the alternative tax imposed by section 857(b)(3)(A). (In the case of an election with respect to a taxable year ending before October 5, 1976, if the dividend (or portion thereof) to which the election is to apply is a capital gain dividend, the trust shall treat the dividend as paid during such taxable year in computing the amount of capital gains dividends paid during the taxable year.) In the case of an election with respect to a taxable year beginning after October 4, 1976, the trust must also specify in its return (or in a statement attached to its return) the exact dollar amount that is to be treated as having been paid during the taxable year.

(2) *Limitation based on earnings and profits.* The election provided in section 858(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of sections 857(d) and § 1.857–7) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year. For purposes of the preceding sentence, deficiency dividends and distributions with respect to which an election has been made for a prior year under section 858(a) are disregarded in determining the total amount of distributions out of earnings and profits actually made during the taxable year. The dividend or portion thereof, with respect to which the real estate investment trust has made a valid election under section 858(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(3) *Additional limitation based on amount specified.* The amount treated under section 858(a) as having been paid in a taxable year beginning after October 4, 1976, cannot exceed the lesser of (i) the dollar amount specified by the trust in its return (or a statement attached thereto) in making the election or (ii) the amount allowable under the limitation prescribed in paragraph (b)(2) of this section.

(4) *Irrevocability of the election.* After the expiration of the time for filing the return for the taxable year for which an election is made under section 858(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) *Receipt by shareholders.* Under section 858(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includable in the gross income of the shareholders of the real estate investment trust for the taxable year in which the dividend is received by them.

(d) *Illustrations.* The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example 1. The X Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar year 1961 of $100,000. During that year the trust distributed to shareholders taxable dividends aggregating $88,000. On March 10, 1962, the trust declared a dividend of $37,000 payable to shareholders on March 20, 1962. Such dividend consisted of the first regular quarterly dividend for 1962 of $25,000 plus an additional $12,000 representing that part of the taxable income for 1961 which was not distributed in 1961. On March 15, 1962, the X Trust filed its Federal income tax return and elected therein to treat $12,000 of the total dividend of $37,000 to be paid to shareholders on March 20, 1962, as having been paid during the taxable year 1961. Assuming that the X Trust actually distributed the entire amount of the dividend of $37,000 on March 20, 1962, an amount equal to $12,000 thereof will be treated for the purposes of section 857(a) as having been paid during the taxable year 1961. Upon distribution of such dividend the trust becomes a qualified real estate investment trust for the taxable year 1961. Such amount ($12,000) will be considered by the X Trust as a distribution out of the earnings and profits for the taxable year 1961, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them. However, assuming that the X Trust is not a qualified real estate investment trust for the calendar year 1962, nevertheless, the $12,000 portion of the dividend (paid on March 20, 1962) which the trust elected to relate to the calendar year 1961, will not qualify as a dividend for purposes of section 34, 116, or 243.

Example 2. The Y Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar year 1964 of $100,000, and for 1965 taxable income (and earnings and profits) of $125,000. On January 1, 1964, the trust had a deficit in its earnings and profits accumulated since February 28, 1913, of $115,000. During the year 1964 the trust distributed to shareholders taxable dividends aggregating $85,000. On March 5, 1965, the trust declared a dividend of $65,000 payable to shareholders on March 31, 1965. On March 15, 1965, the Y Trust filed its Federal income tax return in which it included $40,000 of the total dividend of $65,000 payable to shareholders on March 31, 1965, as a dividend paid by it during the taxable year 1964. On March 31, 1965, the Y Trust distributed the entire amount of the dividend of $65,000 declared on March 5, 1965. The election under section 858(a) is valid only to the extent of $15,000, the amount of the undistributed earnings and profits for 1964 ($100,000 earnings and profits less $85,000 distributed during 1964). The remainder ($50,000) of the $65,000 dividend paid on March 31, 1965, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Trust out of earnings and profits for the taxable year 1965. Assuming that the only other distribution by the Y Trust during 1965 was a distribution of $75,000 paid as a dividend on October 31, 1965, the total amount of the distribution of $65,000 paid on March 31, 1965, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Trust will treat the amount of $15,000 as a distribution of the earnings or profits of the trust for the taxable year 1964, and the remaining $50,000 as a distribution of the earnings or profits for the year 1965. The distribution of $75,000 on October 31, 1966, is, of course, a taxable dividend out of the earnings and profits for the year 1965.

Example 3. Assume the facts are the same as in example 2, except that the taxable years involved are calendar years 1977 and 1978, and Y Trust specified in its Federal income tax return for 1977 that the dollar amount of $40,000 of the $65,000 distribution payable to shareholders on March 31, 1978, is to be treated as having been paid in 1977. The result will be the same as in example 2, since the amount of the undistributed earnings and profits for 1977 is less than the $40,000 amount specified by Y Trust in making its election. Accordingly, the election is valid only to the extent of $15,000. Y Trust will treat the amount of $15,000 as a distribution, in 1977, of earnings and profits of the trust for the taxable year 1977 and the remaining $50,000 as a distribution, in 1978, of the earnings and profits for 1978.

(e) *Notice to shareholders.* Section 858(c) provides that, in the case of dividends with respect to which a real estate investment trust has made an election under section 858(a), any notice to shareholders required under part II, subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 30 days after the close of the taxable year in which the distribution is made. Thus, the notice requirement of section 857(b)(3)(C) and paragraph (f) of §1.857–6 with respect to capital gains dividends may be satisfied with respect to amounts to which section 858(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 30 days after the close of the taxable year in which the distribution is made. If the notice under section 858(c) reltes to an election with respect to any capital gains dividends, such capital gains dividends shall be aggregated by the real estate investment trust with the designated capital gains dividends actually paid during the taxable year to which the election applies (not including deficiency dividends or dividends with respect to which an election has been made for a prior taxable year under section 858) to determine whether the aggregate of the designated capital gains dividends with respect to such taxable year exceeds the net capital gain of the trust. See section 857(b)(3)(C) and paragraph (f) of §1.857–6.

[T.D. 6598, 27 FR 4089, Apr. 28, 1962, as amended by T.D. 7767, 46 FR 11279, Feb. 6, 1981]

§1.860–1 Deficiency dividends.

Section 860 allows a qualified investment entity to be relieved from the payment of a deficiency in (or to be allowed a credit or refund of) certain taxes. ‘‘Qualified investment entity’’ is defined in section 860(b). The taxes referred to are those imposed by sections 852(b) (1) and (3), 857(b) (1) or (3), the minimum tax on tax preferences imposed by section 56 and, if the entity fails the distribution requirements of section 852(a)(1)(A) or 857(a)(1) (as applicable), the corporate income tax imposed by section 11(a) or 1201(a). The method provided by section 860 is to allow an additional deduction for a dividend distribution (that meets the requirements of section 860 and §1.860–2) in computing the deduction for dividends paid for the taxable year for which the deficiency is determined. A deficiency divided may be an ordinary dividend or, subject to the limitations of sections 852(b)(3)(C), 857(b)(3)(C), and 860(f)(2)(B), may be a capital gain dividend.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2107, Jan. 18, 1984]

§ 1.860–2 Requirements for deficiency dividends.

(a) *In general*—(1) *Determination, etc.* A qualified investment entity is allowed a deduction for a deficiency dividend only if there is a determination (as defined in section 860(e) and paragraph (b)(1) of this section) that results in an adjustment (as defined in section 860(d) (1) or (2)) for the taxable year for which the deficiency dividend is paid. An adjustment does not include an increase in the excess of (i) the taxpayer's interest income excludable from gross income under section 103(a) over (ii) its deductions disallowed under sections 265 and 171(a)(2).

(2) *Payment date and claim.* The deficiency dividend must be paid on, or within 90 days after, the date of the determination and before the filing of a claim under section 860(g) and paragraph (b)(2) of this section. This claim must be filed within 120 days after the date of the determination.

(3) *Nature and amount of distribution.* (i) The deficiency dividend must be a distribution of property (including money) that would have been properly taken into account in computing the dividends paid deduction under section 561 for the taxable year for which tax liability resulting from the determination exists if the property had been distributed during that year. Thus, if the distribution would have been a dividend under section 316(a) if it had been made during the taxable year for which the determination applies, and the distribution may qualify under sections 316(b)(3), 562(a), and 860(f)(1), even though the distributing corporation, trust, or association has no current or accumulated earnings and profits for the taxable year in which the distribution is actually made. The amount of the distribution is determined under section 301 as of the date of the distribution.

The amount of the deduction is subject to the applicable limitations under sections 562 and 860(f)(2). Thus, if the entity distributes to an individual shareholder property (other than money) which on the date of the distribution has a fair market value in excess of its adjusted basis in the hands of the entity, the amount of the deficiency dividend in the individual's hands for purposes of section 316(b)(3) is determined by using the property's fair market value on that date. Nevertheless, the amount of the deficiency dividend the entity may deduct is limited, under § 1.562–1(a), to the adjusted basis of the property and the amount taxable to the individual as a dividend is determined by reference to the current and accumulated earnings and profits for the year to which the determination applies.

(ii) The qualified investment entity does not have to distribute the full amount of the adjustment in order to pay a deficiency dividend. For example, assume that in 1983 a determination with respect to a calendar year regulated investment company results in an increase of $100 in investment company taxable income (computed without the dividends paid deduction) for 1981 and no other change. The regulated investment company may choose to pay a deficiency dividend of $100 or of any lesser amount and be allowed a dividends paid deduction for 1981 for the amount of that deficiency dividend.

(4) *Status of distributor.* The corporation, trust, or association that pays the deficiency dividend does not have to be a qualified investment entity at the time of payment.

(5) *Certain definitions to apply.* For purposes of sections 860(d) (defining adjustment) and (f)(2) (limitations) the definitions of the terms ''investment company taxable income,'' ''real estate investment trust taxable income,'' and ''capital gains dividends'' in sections 852(b)(2), 857(b)(2), 852(b)(3)(C), and 857(b)(3)(C) apply, as appropriate to the particular entity.

(b) *Determination and claim for deduction*—(1) *Determination.* For purposes of applying section 860(e), the following rules apply:

(i) The date of determination by a decision of the United States Tax Court, the date upon which a judgment of a court becomes final, and the date of determination by a closing agreement shall be determined under the rules in § 1.547–2(b)(1) (ii), (iii), and (iv).

(ii) A determination under section 860(e)(3) may be made by an agreement signed by the district director or another official to whom authority to sign the agreement is delegated, and by or on behalf of the taxpayer. The agreement shall set forth the amount, if any, of each adjustment described in subparagraphs (A), (B), and (C) of section 860(d) (1) or (2) (as appropriate) for the taxable year and the amount of the liability for any tax imposed by section 11(a), 56(a), 852(b)(1), 852(b)(3)(A), 857(b)(1), 857(b)(3)(A), or 1201(a) for the taxable year. The agreement shall also set forth the amount of the limitation (determined under section 860(f)(2)) on the amount of deficiency dividends that can qualify as capital gain dividends and ordinary dividends, respectively, for the taxable year. An agreement under this subdivision (ii) which is signed by the district director (or other delegate) shall be sent to the taxpayer at its last known address by either registered or certified mail. If registered mail is used, the date of registration is the date of determination. If certified mail is used, the date of the postmark on the sender's receipt is the date of determination. However, if a dividend is paid by the taxpayer before the registration or postmark date, but on or after the date the agreement is signed by the district director (or other delegate), the date of determination is the date of signing.

(2) *Claim for deduction.* A claim for deduction for a deficiency dividend shall be made, with the requisite declaration, on Form 976 and shall contain the following information and have the following attachments:

(i) The name, address, and taxpayer identification number of the corporation, trust, or association;

(ii) The amount of the deficiency and the taxable year or years involved;

(iii) The amount of the unpaid deficiency or, if the deficiency has been paid in whole or in part, the date of payment and the amount thereof;

(iv) A statement as to how the deficiency was established (*i.e.*, by an agreement under section 860(e)(3), by a closing agreement under section 7121, or by a decision of the Tax Court or court judgment);

(v) Any date or other information with respect to the determination that is required by Form 976;

(vi) The amount and date of payment of the dividend with respect to which the claim for the deduction for deficiency dividends is filed;

(vii) The amount claimed as a deduction for deficiency dividends;

(viii) If the amount claimed as a deduction for deficiency dividends includes any amount designated (or to be designated) as capital gain dividends, the amount of capital gain dividends for which a deficiency dividend deduction is claimed;

(ix) Any other information required by the claim form;

(x) A certified copy of the resolution of the trustees, directors, or other authority authorizing the payment of the dividend with respect to which the claim is filed; and

(xi) A copy of any court decision, judgment, agreement, or other document required by Form 976.

(3) *Filing claim.* The claim, together with the accompanying documents, shall be filed with the district director, or director of the internal revenue service center, with whom the income tax return for the taxable year for which the determination applies was filed. In the event that the determination is an agreement with the district director (or other delegate) described in section 860(e)(3) and paragraph (b)(1)(ii) of this section, the claim may be filed with the district director with whom (or pursuant to whose delegation) the agreement was made.

(The reporting requirements of this section were approved by the Office of Management and Budget under control number 1545–0045)

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2107, Jan. 18, 1984; 49 FR 3177, Jan. 26, 1984]

§1.860–3 Interest and additions to tax.

(a) *In general.* If a qualified investment entity is allowed a deduction for deficiency dividends with respect to a taxable year, under section 860(c)(1) the tax imposed on the entity by chapter 1 of the Code (computed by taking into account the deduction) for that year is deemed to be increased by the amount of the deduction. This deemed increase in tax, however, applies solely for purposes of determining the liability of the entity for interest under subchapter A of chapter 67 of the Code and for additions to tax and additional amounts under chapter 68 of the Code. For purposes of applying subchapter A of chapter 67 and 68, the last date prescribed for payment of the deemed increase in tax is considered to be the last date prescribed for the payment of tax (determined in the manner provided in section 6601(b)) for the taxable year for which the deduction for deficiency dividends is allowed. The deemed increase in tax is considered to be paid as of the date that the claim for the deficiency dividend deduction described in section 860(g) is filed.

(b) *Overpayments of tax.* If a qualified investment entity is entitled to a credit or refund of an overpayment of the tax imposed by chapter 1 of the Code for the taxable year for which the deficiency dividend deduction is allowed, then, for purposes of computing interest, additions to tax, and additional amounts, the payment (or payments) that result in the overpayment and that precede the filing of the claim described in section 860(g) will be applied against and reduce the increase in tax that is deemed to occur under section 860(c)(1).

(c) *Examples.* This section is illustrated by the following examples:

Example 1. Corporation X is a real estate investment trust that files its income tax return on a calendar year basis. X receives an extension of time until June 15, 1978, to file its 1977 income tax return and files the return on May 15, 1978. X does not elect to pay any tax due in installments. For 1977, X reports real estate investment trust taxable income (computed without the dividends paid deduction) of $100, a dividends paid deduction of $100, and no tax liability. Following an examination of X's 1977 return, the district director and X enter into an agreement which is a determination under section 860(e)(3). The determination is dated November 1, 1979, and increases X's real estate investment trust taxable income (computed without the dividends paid deduction) by $20 to $120. Thus, taking into account the $100 of dividends paid in 1977, X has undistributed real estate investment trust taxable income of $20 as a result of the determination. X pays a dividend of $20 on November 10, 1979, files a claim for a deficiency dividend deduction of this $20 pursuant to section 860(g) on November 15, 1979, and is allowed a deficiency dividend deduction of $20 for 1977. After taking into account this deduction, X has no real estate investment trust taxable income and meets the distribution requirements of section 857(a)(1). However, for purposes of section 6601 (relating to interest on underpayment of tax), the tax imposed by chapter 1 of the Code on X for 1977 is deemed increased by this $20, and the last date prescribed for payment of the tax is March 15, 1978 (the due date of the 1977 return determined without any extension of time). The tax of $20 is deemed paid on November 15, 1979, the date the claim for the deficiency dividend deduction is filed. Thus, X is liable for interest on $20, at the rate established under section 6621, for the period from March 15, 1978, to November 15, 1979. Also, for purposes of determining whether X is liable for any addition to tax or additional amount imposed by chapter 68 of the Code (including the penalty prescribed by section 6697), the amount of tax imposed on X by chapter 1 of the Code is deemed to be increased by $20 (the amount of the deficiency dividend deduction allowed), the last date prescribed for payment of such tax is March 15, 1978, and the tax of $20 is deemed to be paid on November 15, 1979. X, however, is not subject to interest and penalties for the amount of any tax for which it would have been liable under section 11(a), 56(a), 1201(a), or 857(b) had it not been allowed the $20 deduction for deficiency dividends.

Example 2. Assume the facts are the same as in example (1) except that the district director, upon examining X's income tax return, asserts an income tax deficiency of $4, based on an asserted increase of $10 in real estate investment trust taxable income, and no agreement is entered into between the parties. X pays the $4 on June 1, 1979, and files suit for refund in the United States District Court. The District Court, in a decision which becomes final on November 1, 1980, holds that X did fail to report $10 of real estate investment trust taxable income and is not entitled to any refund. (No other item of income or deduction is in issue.) X pays a dividend of $10 on November 10, 1980, files a claim for a deficiency dividend deduction of this $10 on November 15, 1980, and is allowed a deficiency dividend deduction of $10 for 1977. Assume further that $4 is refunded to X on December 31, 1980, as the result of the $10 deficiency dividend deduction being allowed. Also assume that any assessable penalties, additional amounts, and additions to tax (including the penalty imposed by section 6697) for which X is liable are paid within 10 days of notice and demand, so that no interest is imposed on such penalties, etc. X's liability for interest for the period March 15, 1978, to June 1, 1979, is determined with respect to $10 (the amount of the deficiency dividend deduction allowed). X's liability for interest for the period June 1, 1979, to November 15, 1980, is determined with respect to $6, *i.e.*, $10 minus the $4 payment. X is entitled to interest on the $4 overpayment for the period described in section 6611(b)(2), beginning on November 15, 1980.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2108, Jan. 18, 1984]

§1.860–4 Claim for credit or refund.

If the allowance of a deduction for a deficiency dividend results in an overpayment of tax, the taxpayer, in order to secure credit or refund of the overpayment, must file a claim on Form 1120X in addition to the claim for the deficiency dividend deduction required under section 860(g). The credit or refund will be allowed as if on the date of the determination (as defined in section 860(e)) two years remained before the expiration of the period of limitations on the filing of claim for refund for the taxable year to which the overpayment relates.

(The reporting requirements of this section were approved by the Office of Management and Budget under control number 1545–0045)

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2109, Jan. 18, 1984]

§1.860–5 Effective date.

(a) *In general.* Section 860 and §§1.860–1 through 1.860–4 apply with respect to determinations after November 6, 1978.

(b) *Prior determination of real estate investments trusts.* Section 859 (as in effect before the enactment of the Revenue Act of 1978) applies to determinations with respect to real estate investment trusts occurring after October 4, 1976, and before November 7, 1978. In the case of such a determination, the rules in §§1.860–1 through 1.860–4 apply, a reference in this chapter 1 to section 860 (or to a particular provision of section 860) shall be considered to be a reference to section 859 (or to the corresponding substantive provision of section 859), as in effect before enactment of the Revenue Act of 1978, and "qualified investment entity" in §§1.381(c)25–1(a) and 1.860–1 through 1.860–3 means a real estate investment trust.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2109, Jan. 18, 1984]

§1.860A–0 Outline of REMIC provisions.

This section lists the paragraphs contained in §§1.860A–1 through 1.860G–3.

Section 1.860A–1 Effective dates and transition rules.

(a) In general.
(b) Exceptions.
(1) Reporting regulations.
(2) Tax avoidance rules.
(i) Transfers of certain residual interests.
(ii) Transfers to foreign holders.
(iii) Residual interests that lack significant value.
(3) Excise taxes.
(4) Rate based on current interest rate.
(i) In general.
(ii) Rate based on index.
(iii) Transition obligations.

Section 1.860C–1 Taxation of holders of residual interests.

(a) Pass-thru of income or loss.
(b) Adjustments to basis of residual interests.
(1) Increase in basis.
(2) Decrease in basis.
(3) Adjustments made before disposition.
(c) Counting conventions.

Section 1.860C–2 Determination of REMIC taxable income or net loss.

(a) Treatment of gain or loss.
(b) Deductions allowable to a REMIC.
(1) In general.
(2) Deduction allowable under section 163.
(3) Deduction allowable under section 166.
(4) Deduction allowable under section 212.
(5) Expenses and interest relating to tax-exempt income.

Section 1.860D–1 Definition of a REMIC.

(a) In general.
(b) Specific requirements.
(1) Interests in a REMIC.
(i) In general.
(ii) De minimis interests.
(2) Certain rights not treated as interests.
(i) Payments for services.
(ii) Stripped interests.
(iii) Reimbursement rights under credit enhancement contracts.
(iv) Rights to acquire mortgages.
(3) Asset test.
(i) In general.

(ii) Safe harbor.
(4) Arrangements test.
(5) Reasonable arrangements.
(i) Arrangements to prevent disqualified organizations from holding residual interests.
(ii) Arrangements to ensure that information will be provided.
(6) Calendar year requirement.
(c) Segregated pool of assets.
(1) Formation of REMIC.
(2) Identification of assets.
(3) Qualified entity defined.
(d) Election to be treated as a real estate mortgage investment conduit.
(1) In general.
(2) Information required to be reported in the REMIC's first taxable year.
(3) Requirement to keep sufficient records.

Section 1.860E–1 Treatment of taxable income of a residual interest holder in excess of daily accruals.

(a) Excess inclusion cannot be offset by otherwise allowable deductions.
(1) In general.
(2) Affiliated groups.
(3) Special rule for certain financial institutions.
(i) In general.
(ii) Ordering rule.
(A) In general.
(B) Example.
(iii) Significant value.
(iv) Determining anticipated weighted average life.
(A) Anticipated weighted average life of the REMIC.
(B) Regular interests that have a specified principal amount.
(C) Regular interests that have no specified principal amount or that have only a nominal principal amount, and all residual interests.
(D) Anticipated payments.
(b) Treatment of a residual interest held by REITs, RICs, common trust funds, and subchapter T cooperatives. [Reserved]
(c) Transfers of noneconomic residual interests.
(1) In general.
(2) Noneconomic residual interest.
(3) Computations.
(4) Safe harbor for establishing lack of improper knowledge.
(d) Transfers to foreign persons.

Section 1.860E–2 Tax on transfers of residual interest to certain organizations.

(a) Transfers to disqualified organizations.
(1) Payment of tax.
(2) Transitory ownership.
(3) Anticipated excess inclusions.
(4) Present value computation.
(5) Obligation of REMIC to furnish information.
(6) Agent.
(7) Relief from liability.
(i) Transferee furnishes information under penalties of perjury.
(ii) Amount required to be paid.
(b) Tax on pass-thru entities.
(1) Tax on excess inclusions.
(2) Record holder furnishes information under penalties of perjury.
(3) Deductibility of tax.
(4) Allocation of tax.

Section 1.860F–1 Qualified liquidations.

Section 1.860F–2 Transfers to a REMIC.

(a) Formation of a REMIC.
(1) In general.
(2) Tiered arrangements.
(i) Two or more REMICs formed pursuant to a single set of organizational documents.
(ii) A REMIC and one or more investment trusts formed pursuant to a single set of documents.
(b) Treatment of sponsor.
(1) Sponsor defined.
(2) Nonrecognition of gain or loss.
(3) Basis of contributed assets allocated among interests.
(i) In general.
(ii) Organizational expenses.
(A) Organizational expense defined.
(B) Syndication expenses.
(iii) Pricing date.
(4) Treatment of unrecognized gain or loss.
(i) Unrecognized gain on regular interests.
(ii) Unrecognized loss on regular interests.
(iii) Unrecognized gain on residual interests.
(iv) Unrecognized loss on residual interests.
(5) Additions to or reductions of the sponsor's basis.
(6) Transferred basis property.
(c) REMIC's basis in contributed assets.

Section 1.860F–4 REMIC reporting requirements and other administrative rules.

(a) In general.
(b) REMIC tax return.
(1) In general.
(2) Income tax return.
(c) Signing of REMIC return.
(1) In general.
(2) REMIC whose startup day is before November 10, 1988.
(i) In general.
(ii) Startup day.
(iii) Exception.
(d) Designation of tax matters person.
(e) Notice to holders of residual interests.
(1) Information required.
(i) In general.
(ii) Information with respect to REMIC assets.
(A) 95 percent asset test.
(B) Additional information required if the 95 percent test not met.

(C) For calendar quarters in 1987.
(D) For calendar quarters in 1988 and 1989.
(iii) Special provisions.
(2) Quarterly notice required.
(i) In general.
(ii) Special rule for 1987.
(3) Nominee reporting.
(i) In general.
(ii) Time for furnishing statement.
(4) Reports to the Internal Revenue Service.
(f) Information returns for persons engaged in a trade or business.

Section 1.860G–1 Definition of regular and residual interests.

(a) Regular interest.
(1) Designation as a regular interest.
(2) Specified portion of the interest payments on qualified mortgages.
(i) In general.
(ii) Specified portion cannot vary.
(iii) Defaulted or delinquent mortgages.
(iv) No minimum specified principal amount is required.
(v) Specified portion includes portion of interest payable on regular interest.
(vi) Examples.
(3) Variable rate.
(i) Rate based on current interest rate.
(ii) Weighted average rate.
(A) In general.
(B) Reduction in underlying rate.
(iii) Additions, subtractions, and multiplications.
(iv) Caps and floors.
(v) Funds-available caps.
(A) In general.
(B) Facts and circumstances test.
(C) Examples.
(vi) Combination of rates.
(4) Fixed terms on the startup day.
(5) Contingencies prohibited.
(b) Special rules for regular interests.
(1) Call premium.
(2) Customary prepayment penalties received with respect to qualified mortgages.
(3) Certain contingencies disregarded.
(i) Prepayments, income, and expenses.
(ii) Credit losses.
(iii) Subordinated interests.
(iv) Deferral of interest.
(v) Prepayment interest shortfalls.
(vi) Remote and incidental contingencies.
(4) Form of regular interest.
(5) Interest disproportionate to principal.
(i) In general.
(ii) Exception.
(6) Regular interest treated as a debt instrument for all Federal income tax purposes.
(c) Residual interest.
(d) Issue price of regular and residual interests.
(1) In general.
(2) The public.

Section 1.860G–2 Other rules.

(a) Obligations principally secured by an interest in real property.
(1) Tests for determining whether an obligation is principally secured.
(i) The 80-percent test.
(ii) Alternative test.
(2) Treatment of liens.
(3) Safe harbor.
(i) Reasonable belief that an obligation is principally secured.
(ii) Basis for reasonable belief.
(iii) Later discovery that an obligation is not principally secured.
(4) Interests in real property; real property.
(5) Obligations secured by an interest in real property.
(6) Obligations secured by other obligations; residual interests.
(7) Certain instruments that call for contingent payments are obligations.
(8) Defeasance.
(9) Stripped bonds and coupons.
(b) Assumptions and modifications.
(1) Significant modifications are treated as exchanges of obligations.
(2) Significant modification defined.
(3) Exceptions.
(4) Modifications that are not significant modifications.
(5) Assumption defined.
(6) Pass-thru certificates.
(c) Treatment of certain credit enhancement contracts.
(1) In general.
(2) Credit enhancement contracts.
(3) Arrangements to make certain advances.
(i) Advances of delinquent principal and interest.
(ii) Advances of taxes, insurance payments, and expenses.
(iii) Advances to ease REMIC administration.
(4) Deferred payment under a guarantee arrangement.
(d) Treatment of certain purchase agreements with respect to convertible mortgages.
(1) In general.
(2) Treatment of amounts received under purchase agreements.
(3) Purchase agreement.
(4) Default by the person obligated to purchase a convertible mortgage.
(5) Convertible mortgage.
(e) Prepayment interest shortfalls.
(f) Defective obligations.
(1) Defective obligation defined.
(2) Effect of discovery of defect.
(g) Permitted investments.
(1) Cash flow investment.
(i) In general.
(ii) Payments received on qualified mortgages.

(iii) Temporary period.
(2) Qualified reserve funds.
(3) Qualified reserve asset.
(i) In general.
(ii) Reasonably required reserve.
(A) In general.
(B) Presumption that a reserve is reasonably required.
(C) Presumption may be rebutted.
(h) Outside reserve funds.
(i) Contractual rights coupled with regular interests in tiered arrangements.
(1) In general.
(2) Example.
(j) Clean-up call.
(1) In general.
(2) Interest rate changes.
(3) Safe harbor.
(k) Startup day.

Section 1.860G–3 Treatment of foreign persons.

(a) Transfer of a residual interest with tax avoidance potential.
(1) In general.
(2) Tax avoidance potential.
(i) Defined.
(ii) Safe harbor.
(3) Effectively connected income.
(4) Transfer by a foreign holder.
(b) [Reserved]

[T.D. 8458, 57 FR 61299, Dec. 24, 1992; 58 FR 15089, Mar. 19, 1993, as amended by T.D. 8614, 60 FR 42787, Aug. 17, 1995]

§ 1.860A–1 Effective dates and transition rules.

(a) *In general.* Except as otherwise provided in paragraph (b) of this section, the regulations under sections 860A through 860G are effective only for a qualified entity (as defined in § 1.860D–1(c)(3)) whose startup day (as defined in section 860G(a)(9) and § 1.860G–2(k)) is on or after November 12, 1991.

(b) *Exceptions*—(1) *Reporting regulations*—(i) Sections 1.860D–1(c) (1) and (3), and § 1.860D–1(d) (1) through (3) are effective after December 31, 1986.

(ii) Sections 1.860F–4 (a) through (e) are effective after December 31, 1986 and are applicable after that date except as follows:

(A) Section 1.860F–4(c)(1) is effective for REMICs with a startup day on or after November 10, 1988.

(B) Sections 1.860F–4(e)(1)(ii) (A) and (B) are effective for calendar quarters and calendar years beginning after December 31, 1988.

(C) Section 1.860F–4(e)(1)(ii)(C) is effective for calendar quarters and calendar years beginning after December 31, 1986 and ending before January 1, 1988.

(D) Section 1.860F–4(e)(1)(ii)(D) is effective for calendar quarters and calendar years beginning after December 31, 1987 and ending before January 1, 1990.

(2) *Tax avoidance rules*—(i) *Transfers of certain residual interests.* Section 1.860E–1(c) (concerning transfers of noneconomic residual interests) and § 1.860G–3(a)(4) (concerning transfers by a foreign holder to a United States person) are effective for transfers of residual interests on or after September 27, 1991.

(ii) *Transfers to foreign holders.* Generally, § 1.860G–3(a) (concerning transfers of residual interests to foreign holders) is effective for transfers of residual interests after April 20, 1992. However, § 1.860G–3(a) does not apply to a transfer of a residual interest in a REMIC by the REMIC's sponsor (or by another transferor contemporaneously with formation of the REMIC) on or before June 30, 1992, if—

(A) The terms of the regular interests and the prices at which regular interests were offered had been fixed on or before April 20, 1992;

(B) On or before June 30, 1992, a substantial portion of the regular interests in the REMIC were transferred, with the terms and at the prices that were fixed on or before April 20, 1992, to investors who were unrelated to the REMIC's sponsor at the time of the transfer; and

(C) At the time of the transfer of the residual interest, the expected future distributions on the residual interest were equal to at least 30 percent of the anticipated excess inclusions (as defined in § 1.860E–2(a)(3)), and the transferor reasonably expected that the transferee would receive sufficient distributions from the REMIC at or after the time at which the excess inclusions accrue in an amount sufficient to satisfy the taxes on the excess inclusions.

(iii) *Residual interests that lack significant value.* The significant value requirement in § 1.860E–1(a) (1) and (3) (concerning excess inclusions accruing to organizations to which section 593 applies) generally is effective for residual interests acquired on or after September 27, 1991. The significant value requirement in §1.860E–1(a) (1) and (3) does not apply, however, to residual interests acquired by an organization to which section 593 applies as a sponsor at formation of a REMIC in a transaction described in §1.860F–2(a)(1) if more than 50 percent of the interests in the REMIC (determined by reference to issue price) were sold to unrelated investors before November 12, 1991. The exception from the significant value requirement provided by the preceding sentence applies only so long as the sponsor owns the residual interests.

(3) *Excise taxes.* Section 1.860E–2(a)(1) is effective for transfers of residual interests to disqualified organizations after March 31, 1988. Section 1.860E–2(b)(1) is effective for excess inclusions accruing to pass-thru entities after March 31, 1988.

(4) *Rate based on current interest rate*—(i) *In general.* Section 1.860G–1(a)(3)(i) applies to obligations (other than transition obligations described in paragraph (b)(4)(iii) of this section) intended to qualify as regular interests that are issued on or after April 4, 1994.

(ii) *Rate based on index.* Section 1.860G–1(a)(3)(i) (as contained in 26 CFR part 1 revised as of April 1, 1994) applies to obligations intended to qualify as regular interests that—

(A) Are issued by a qualified entity (as defined in §1.860D–1(c)(3)) whose startup date (as defined in section 860G(a)(9) and §1.860G–2(k)) is on or after November 12, 1991; and

(B) Are either—

(*1*) Issued before April 4, 1994; or

(*2*) Transition obligations described in paragraph (b)(4)(iii) of this section.

(iii) *Transition obligations.* Obligations are described in this paragraph (b)(4)(iii) if—

(A) The terms of the obligations and the prices at which the obligations are offered are fixed before April 4, 1994; and

(B) On or before June 1, 1994, a substantial portion of the obligations are transferred, with the terms and at the prices that are fixed before April 4, 1994, to investors who are unrelated to the REMIC's sponsor at the time of the transfer.

[T.D. 8458, 57 FR 61300, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; 58 FR 15089, Mar. 19, 1993; T.D. 8614, 60 FR 42787, Aug. 17, 1995]

§1.860C–1 Taxation of holders of residual interests.

(a) *Pass-thru of income or loss.* Any holder of a residual interest in a REMIC must take into account the holder's daily portion of the taxable income or net loss of the REMIC for each day during the taxable year on which the holder owned the residual interest.

(b) *Adjustments to basis of residual interests*—(1) *Increase in basis.* A holder's basis in a residual interest is increased by—

(i) The daily portions of taxable income taken into account by that holder under section 860C(a) with respect to that interest; and

(ii) The amount of any contribution described in section 860G(d)(2) made by that holder.

(2) *Decrease in basis.* A holder's basis in a residual interest is reduced (but not below zero) by—

(i) First, the amount of any cash or the fair market value of any property distributed to that holder with respect to that interest; and

(ii) Second, the daily portions of net loss of the REMIC taken into account under section 860C(a) by that holder with respect to that interest.

(3) *Adjustments made before disposition.* If any person disposes of a residual interest, the adjustments to basis prescribed in paragraph (b) (1) and (2) of this section are deemed to occur immediately before the disposition.

(c) *Counting conventions.* For purposes of determining the daily portion of REMIC taxable income or net loss under section 860C(a)(2), any reasonable convention may be used. An example of a reasonable convention is ''30 days per month/90 days per quarter/360 days per year.''

[T.D. 8458, 57 FR 61301, Dec. 24, 1992]

§1.860C–2 Determination of REMIC taxable income or net loss.

(a) *Treatment of gain or loss.* For purposes of determining the taxable income or net loss of a REMIC under section 860C(b), any gain or loss from the disposition of any asset, including a qualified mortgage (as defined in section 860G(a)(3)) or a permitted investment (as defined in section 860G(a)(5) and § 1.860G–2(g)), is treated as gain or loss from the sale or exchange of property that is not a capital asset.

(b) *Deductions allowable to a REMIC*—(1) *In general.* Except as otherwise provided in section 860C(b) and in paragraph (b) (2) through (5) of this section, the deductions allowable to a REMIC for purposes of determining its taxable income or net loss are those deductions that would be allowable to an individual, determined by taking into account the same limitations that apply to an individual.

(2) *Deduction allowable under section 163.* A REMIC is allowed a deduction, determined without regard to section 163(d), for any interest expense accrued during the taxable year.

(3) *Deduction allowable under section 166.* For purposes of determining a REMIC's bad debt deduction under section 166, debt owed to the REMIC is not treated as nonbusiness debt under section 166(d).

(4) *Deduction allowable under section 212.* A REMIC is not treated as carrying on a trade or business for purposes of section 162. Ordinary and necessary operating expenses paid or incurred by the REMIC during the taxable year are deductible under section 212, without regard to section 67. Any expenses that are incurred in connection with the formation of the REMIC and that relate to the organization of the REMIC and the issuance of regular and residual interests are not treated as expenses of the REMIC for which a deduction is allowable under section 212. See § 1.860F–2(b)(3)(ii) for treatment of those expenses.

(5) *Expenses and interest relating to tax-exempt income.* Pursuant to section 265(a), a REMIC is not allowed a deduction for expenses and interest allocable to tax-exempt income. The portion of a REMIC's interest expense that is allocable to tax-exempt interest is determined in the manner prescribed in section 265(b)(2), without regard to section 265(b)(3).

[T.D. 8458, 57 FR 61301, Dec. 24, 1992]

§ 1.860D–1 Definition of a REMIC.

(a) *In general.* A real estate mortgage investment conduit (or REMIC) is a qualified entity, as defined in paragraph (c)(3) of this section, that satisfies the requirements of section 860D(a). See paragraph (d)(1) of this section for the manner of electing REMIC status.

(b) *Specific requirements*—(1) *Interests in a REMIC*—(i) *In general.* A REMIC must have one class, and only one class, of residual interests. Except as provided in paragraph (b)(1)(ii) of this section, every interest in a REMIC must be either a regular interest (as defined in section 860G(a)(1) and § 1.860G–1(a)) or a residual interest (as defined in section 860G(a)(2) and § 1.860G–1(c)).

(ii) *De minimis interests.* If, to facilitate the creation of an entity that elects REMIC status, an interest in the entity is created and, as of the startup day (as defined in section 860G(a)(9) and § 1.860G–2(k)), the fair market value of that interest is less than the lesser of $1,000 or 1/1,000 of one percent of the aggregate fair market value of all the regular and residual interests in the REMIC, then, unless that interest is specifically designated as an interest in the REMIC, the interest is not treated as an interest in the REMIC for purposes of section 860D(a) (2) and (3) and paragraph (B)(1)(i) of this section.

(2) *Certain rights not treated as interests.* Certain rights are not treated as interests in a REMIC. Although not an exclusive list, the following rights are not interests in a REMIC.

(i) *Payments for services.* The right to receive from the REMIC payments that represent reasonable compensation for services provided to the REMIC in the ordinary course of its operation is not an interest in the REMIC. Payments made by the REMIC in exchange for services may be expressed as a specified percentage of interest payments due on qualified mortgages or as a specified percentage of earnings from permitted investments. For example, a mortgage servicer's right to receive reasonable compensation for servicing the mortgages owned by the REMIC is not an interest in the REMIC.

(ii) *Stripped interests.* Stripped bonds or stripped coupons not held by the

REMIC are not interests in the REMIC even if, in a transaction preceding or contemporaneous with the formation of the REMIC, they and the REMIC's qualified mortgages were created from the same mortgage obligation. For example, the right of a mortgage servicer to receive a servicing fee in excess of reasonable compensation from payments it receives on mortgages held by a REMIC is not an interest in the REMIC. Further, if an obligation with a fixed principal amount provides for interest at a fixed or variable rate and for certain contingent payment rights (*e.g.*, a shared appreciation provision or a percentage of mortgagor profits provision), and the owner of the obligation contributes the fixed payment rights to a REMIC and retains the contingent payment rights, the retained contingent payment rights are not an interest in the REMIC.

(iii) *Reimbursement rights under credit enhancement contracts.* A credit enhancer's right to be reimbursed for amounts advanced to a REMIC pursuant to the terms of a credit enhancement contract (as defined in §1.860G–2 (c)(2)) is not an interest in the REMIC even if the credit enhancer is entitled to receive interest on the amounts advanced.

(iv) *Rights to acquire mortgages.* The right to acquire or the obligation to purchase mortgages and other assets from a REMIC pursuant to a clean-up call (as defined in §1.860G–2(j)) or a qualified liquidation (as defined in section 860F(a)(4)), or on conversion of a convertible mortgage (as defined in §1.860G–2(d)(5)), is not an interest in the REMIC.

(3) *Asset test*—(i) *In general.* For purposes of the asset test of section 860D(a)(4), substantially all of a qualified entity's assets are qualified mortgages and permitted investments if the qualified entity owns no more than a de minimis amount of other assets.

(ii) *Safe harbor.* The amount of assets other than qualified mortgages and permitted investments is de minimis if the aggregate of the adjusted bases of those assets is less than one percent of the aggregate of the adjusted bases of all of the REMIC's assets. Nonetheless, a qualified entity that does not meet this safe harbor may demonstrate that it owns no more than a de minimis amount of other assets.

(4) *Arrangements test.* Generally, a qualified entity must adopt reasonable arrangements designed to ensure that—

(i) Disqualified organizations (as defined in section 860E(e)(5)) do not hold residual interests in the qualified entity; and

(ii) If a residual interest is acquired by a disqualified organization, the qualified entity will provide to the Internal Revenue Service, and to the persons specified in section 860E(e)(3), information needed to compute the tax imposed under section 860E(e) on transfers of residual interests to disqualified organizations.

(5) *Reasonable arrangements*—(i) *Arrangements to prevent disqualified organizations from holding residual interests.* A qualified entity is considered to have adopted reasonable arrangements to ensure that a disqualified organization (as defined in section 860E(e)(5)) will not hold a residual interest if—

(A) The residual interest is in registered form (as defined in §5f.103–1(c) of this chapter); and

(B) The qualified entity's organizational documents clearly and expressly prohibit a disqualified organization from acquiring beneficial ownership of a residual interest, and notice of the prohibition is provided through a legend on the document that evidences ownership of the residual interest or through a conspicuous statement in a prospectus or private offering document used to offer the residual interest for sale.

(ii) *Arrangements to ensure that information will be provided.* A qualified entity is considered to have made reasonable arrangements to ensure that the Internal Revenue Service and persons specified in section 860E(e)(3) as liable for the tax imposed under section 860E(e) receive the information needed to compute the tax if the qualified entity's organizational documents require that it provide to the Internal Revenue Service and those persons a computation showing the present value of the total anticipated excess inclusions with respect to the residual interest for periods after the transfer. See

§ 1.860E–2(a)(5) for the obligation to furnish information on request.

(6) *Calendar year requirement.* A REMIC's taxable year is the calendar year. The first taxable year of a REMIC begins on the startup day and ends on December 31 of the same year. If the startup day is other than January 1, the REMIC has a short first taxable year.

(c) *Segregated pool of assets*—(1) *Formation of REMIC.* A REMIC may be formed as a segregated pool of assets rather than as a separate entity. To constitute a REMIC, the assets identified as part of the segregated pool must be treated for all Federal income tax purposes as assets of the REMIC and interests in the REMIC must be based solely on assets of the REMIC.

(2) *Identification of assets.* Formation of the REMIC does not occur until—

(i) The sponsor identifies the assets of the REMIC, such as through execution of an indenture with respect to the assets; and

(ii) The REMIC issues the regular and residual interests in the REMIC.

(3) *Qualified entity defined.* For purposes of this section, the term ''qualified entity'' includes an entity or a segregated pool of assets within an entity.

(d) *Election to be treated as a real estate mortgage investment conduit*—(1) *In general.* A qualified entity, as defined in paragraph (c)(3) of this section, elects to be treated as a REMIC by timely filing, for the first taxable year of its existence, a Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, signed by a person authorized to sign that return under § 1.860F–4(c). See § 1.9100–1 for rules regarding extensions of time for making elections. Once made, this election is irrevocable for that taxable year and all succeeding taxable years.

(2) *Information required to be reported in the REMIC's first taxable year.* For the first taxable year of the REMIC's existence, the qualified entity, as defined in paragraph (c)(3) of this section, must provide either on its return or in a separate statement attached to its return—

(i) The REMIC's employer identification number, which must not be the same as the identification number of any other entity,

(ii) Information concerning the terms and conditions of the regular interests and the residual interest of the REMIC, or a copy of the offering circular or prospectus containing such information,

(iii) A description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6) and the regulations thereunder, including a statement supporting the selection of the prepayment assumption,

(iv) The form of the electing qualified entity under State law or, if an election is being made with respect to a segregated pool of assets within an entity, the form of the entity that holds the segregated pool of assets, and

(v) Any other information required by the form.

(3) *Requirement to keep sufficient records.* A qualified entity, as defined in paragraph (c)(3) of this section, that elects to be a REMIC must keep sufficient records concerning its investments to show that it has complied with the provisions of sections 860A through 860G and the regulations thereunder during each taxable year.

[T.D. 8366, 56 FR 49516, Sept. 30, 1991; T.D. 8458, 57 FR 61301, Dec. 24, 1992]

§ 1.860E–1 Treatment of taxable income of a residual interest holder in excess of daily accruals.

(a) *Excess inclusion cannot be offset by otherwise allowable deductions*—(1) *In general.* Except as provided in paragraph (a)(3) of this section, the taxable income of any holder of a residual interest for any taxable year is in no event less than the sum of the excess inclusions attributable to that holder's residual interests for that taxable year. In computing the amount of a net operating loss (as defined in section 172(c)) or the amount of any net operating loss carryover (as defined in section 172(b)(2)), the amount of any excess inclusion is not included in gross income or taxable income. Thus, for example, if a residual interest holder has $100 of gross income, $25 of which is an excess inclusion, and $90 of business deductions, the holder has taxable income of $25, the amount of the excess inclusion, and a net operating loss of $15 ($75 of other income – $90 of business deductions).

(2) *Affiliated groups.* If a holder of a REMIC residual interest is a member of an affiliated group filing a consolidated income tax return, the taxable income of the affiliated group cannot be less than the sum of the excess inclusions attributable to all residual interests held by members of the affiliated group.

(3) *Special rule for certain financial institutions*—(i) *In general.* If an organization to which section 593 applies holds a residual interest that has significant value (as defined in paragraph (a)(3)(iii) of this section), section 860E(a)(1) and paragraph (a)(1) of this section do not apply to that organization with respect to that interest. Consequently, an organization to which section 593 applies may use its allowable deductions to offset an excess inclusion attributable to a residual interest that has significant value, but, except as provided in section 860E(a)(4)(A), may not use its allowable deductions to offset an excess inclusion attributable to a residual interest held by any other member of an affiliated group, if any, of which the organization is a member. Further, a net operating loss of any other member of an affiliated group of which the organization is a member may not be used to offset an excess inclusion attributable to a residual interest held by that organization.

(ii) *Ordering rule*—(A) *In general.* In computing taxable income for any year, an organization to which section 593 applies is treated as having applied its allowable deductions for the year first to offset that portion of its gross income that is not an excess inclusion and then to offset that portion of its income that is an excess inclusion.

(B) *Example.* The following example illustrates the provisions of paragraph (a)(3)(ii) of this section:

Example. Corp. *X,* a corporation to which section 593 applies, is a member of an affiliated group that files a consolidated return. For a particular taxable year, Corp. *X* has gross income of $1,000, and of this amount, $150 is an excess inclusion attributable to a residual interest that has significant value. Corp. *X* has $975 of allowable deductions for the taxable year. Corp. *X* must apply its allowable deductions first to offset the $850 of gross income that is not an excess inclusion, and then to offset the portion of its gross income that is an excess inclusion. Thus, Corp. *X* has $25 of taxable income ($1,000 − $975), and that $25 is an excess inclusion that may not be offset by losses sustained by other members of the affiliated group.

(iii) *Significant value.* A residual interest has significant value if—

(A) The aggregate of the issue prices of the residual interests in the REMIC is at least 2 percent of the aggregate of the issue prices of all residual and regular interests in the REMIC; and

(B) The anticipated weighted average life of the residual interests is at least 20 percent of the anticipated weighted average life of the REMIC.

(iv) *Determining anticipated weighted average life*—(A) *Anticipated weighted average life of the REMIC.* The anticipated weighted average life of a REMIC is the weighted average of the anticipated weighted average lives of all classes of interests in the REMIC. This weighted average is determined under the formula in paragraph (a)(3)(iv)(B) of this section, applied by treating all payments taken into account in computing the anticipated weighted average lives of regular and residual interests in the REMIC as principal payments on a single regular interest.

(B) *Regular interests that have a specified principal amount.* Generally, the anticipated weighted average life of a regular interest is determined by—

(*1*) Multiplying the amount of each anticipated principal payment to be made on the interest by the number of years (including fractions thereof) from the startup day (as defined in section 860G(a)(9) and §1.860G–2(k)) to the related principal payment date;

(*2*) Adding the results; and

(*3*) Dividing the sum by the total principal paid on the regular interest.

(C) *Regular interests that have no specified principal amount or that have only a nominal principal amount, and all residual interests.* If a regular interest has no specified principal amount, or if the interest payments to be made on a regular interest are disproportionately high relative to its specified principal amount (as determined by reference to §1.860G–1(b)(5)(i)), then, for purposes of computing the anticipated weighted average life of the interest, all anticipated payments on that interest, regardless of their designation as principal or interest, must be taken into account in applying the formula set out in paragraph (a)(3)(iv)(B) of this section. Moreover, for purposes of computing the weighted average life of a residual interest, all anticipated payments on that interest, regardless of their designation as principal or interest, must be taken into account in applying the formula set out in paragraph (a)(3)(iv)(B) of this section.

(D) *Anticipated payments.* The anticipated principal payments to be made on a regular interest subject to paragraph (a)(3)(iv)(B) of this section, and the anticipated payments to be made on a regular interest subject to paragraph (a)(3)(iv)(C) of this section or on a residual interest, must be determined based on—

(*1*) The prepayment and reinvestment assumptions adopted under section 1272(a)(6), or that would have been adopted had the REMIC's regular interests been issued with original issue discount; and

(*2*) Any required or permitted clean up calls or any required qualified liquidation provided for in the REMIC's organizational documents.

(b) *Treatment of residual interests held by REITs, RICs, common trust funds, and subchapter T cooperatives.* [Reserved]

(c) *Transfers of noneconomic residual interests*—(1) *In general.* A transfer of a noneconomic residual interest is disregarded for all Federal tax purposes if a significant purpose of the transfer was to enable the transferor to impede the assessment or collection of tax. A significant purpose to impede the assessment or collection of tax exists if the transferor, at the time of the transfer, either knew or should have known (had ''improper knowledge'') that the transferee would be unwilling or unable to pay taxes due on its share of the taxable income of the REMIC.

(2) *Noneconomic residual interest.* A residual interest is a noneconomic residual interest unless, at the time of the transfer—

(i) The present value of the expected future distributions on the residual interest at least equals the product of the present value of the anticipated excess inclusions and the highest rate of tax specified in section 11(b)(1) for the year in which the transfer occurs; and

(ii) The transferor reasonably expects that, for each anticipated excess inclusion, the transferee will receive distributions from the REMIC at or after the time at which the taxes accrue on the anticipated excess inclusion in an amount sufficient to satisfy the accrued taxes.

(3) *Computations.* The present value of the expected future distributions and the present value of the anticipated excess inclusions must be computed under the procedure specified in § 1.860E–2(a)(4) for determining the present value of anticipated excess inclusions in connection with the transfer of a residual interest to a disqualified organization.

(4) *Safe harbor for establishing lack of improper knowledge.* A transferor is presumed not to have improper knowledge if—

(i) The transferor conducted, at the time of the transfer, a reasonable investigation of the financial condition of the transferee and, as a result of the investigation, the transferor found that the transferee had historically paid its debts as they came due and found no significant evidence to indicate that the transferee will not continue to pay its debts as they come due in the future; and

(ii) The transferee represents to the transferor that it understands that, as the holder of the noneconomic residual interest, the transferee may incur tax liabilities in excess of any cash flows generated by the interest and that the transferee intends to pay taxes associated with holding the residual interest as they become due.

(d) *Transfers to foreign persons.* Paragraph (c) of this section does not apply to transfers of residual interests to which § 1.860G–3(a)(1), concerning transfers to certain foreign persons, applies.

[T.D. 8458, 57 FR 61302, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993]

§ 1.860E–2 Tax on transfers of residual interests to certain organizations.

(a) *Transfers to disqualified organizations*—(1) *Payment of tax.* Any excise tax due under section 860E(e)(1) must be paid by the later of March 24, 1993, or April 15th of the year following the calendar year in which the residual interest is transferred to a disqualified organization. The Commissioner may prescribe rules for the manner and method of collecting the tax.

(2) *Transitory ownership.* For purposes of section 860E (e) and this section, a transfer of a residual interest to a disqualified organization in connection with the formation of a REMIC is disregarded if the disqualified organization has a binding contract to sell the interest and the sale occurs within 7 days of the startup day (as defined in section 860G(a)(9) and § 1.860G–2(k)).

(3) *Anticipated excess inclusions.* The anticipated excess inclusions are the excess inclusions that are expected to accrue in each calendar quarter (or portion thereof) following the transfer of the residual interest. The anticipated excess inclusions must be determined as of the date the residual interest is transferred and must be based on—

(i) Events that have occurred up to the time of the transfer;

(ii) The prepayment and reinvestment assumptions adopted under section 1272(a)(6), or that would have been adopted had the REMIC's regular interests been issued with original issue discount; and

(iii) Any required or permitted clean up calls, or required qualified liquidation provided for in the REMIC's organizational documents.

(4) *Present value computation.* The present value of the anticipated excess inclusions is determined by discounting the anticipated excess inclusions from the end of each remaining calendar quarter in which those excess inclusions are expected to accrue to the date the disqualified organization acquires the residual interest. The discount rate to be used for this present value computation is the applicable Federal rate (as specified in section 1274(d)(1)) that would apply to a debt instrument that was issued on the date the disqualified organization acquired the residual interest and whose term ended on the close of the last quarter in which excess inclusions were expected to accrue with respect to the residual interest.

(5) *Obligation of REMIC to furnish information.* A REMIC is not obligated to determine if its residual interests have been transferred to a disqualified organization. However, upon request of a person designated in section 860E(e)(3), the REMIC must furnish information sufficient to compute the present value of the anticipated excess inclusions. The information must be furnished to the requesting party and to the Internal Revenue Service within 60 days of the request. A reasonable fee charged to the requestor is not income derived from a prohibited transaction within the meaning of section 860F(a).

(6) *Agent.* For purposes of section 860E(e)(3), the term ''agent'' includes a broker (as defined in section 6045(c) and § 1.6045–1(a)(1)), nominee, or other middleman.

(7) *Relief from liability*—(i) *Transferee furnishes information under penalties of perjury.* For purposes of section 860E(e)(4), a transferee is treated as having furnished an affidavit if the transferee furnishes—

(A) A social security number, and states under penalties of perjury that the social security number is that of the transferee; or

(B) A statement under penalties of perjury that it is not a disqualified organization.

(ii) *Amount required to be paid.* The amount required to be paid under section 860E(e)(7)(B) is equal to the product of the highest rate specified in section 11(b)(1) for the taxable year in which the transfer described in section 860E(e)(1) occurs and the amount of excess inclusions that accrued and were allocable to the residual interest during the period that the disqualified organization held the interest.

(b) *Tax on pass-thru entities*—(1) *Tax on excess inclusions.* Any tax due under section 860E(e)(6) must be paid by the later of March 24, 1993, or by the fifteenth day of the fourth month following the close of the taxable year of the pass-thru entity in which the disqualified person is a record holder. The Commissioner may prescribe rules for the manner and method of collecting the tax.

(2) *Record holder furnishes information under penalties of perjury.* For purposes of section 860E(e)(6)(D), a record holder is treated as having furnished an affidavit if the record holder furnishes—

(i) A social security number and states, under penalties of perjury, that the social security number is that of the record holder; or

(ii) A statement under penalties of perjury that it is not a disqualified organization.

(3) *Deductibility of tax.* Any tax imposed on a pass-thru entity pursuant to section 860E(e)(6)(A) is deductible against the gross amount of ordinary income of the pass-thru entity. For example, in the case of a REIT, the tax is deductible in determining real estate investment trust taxable income under section 857(b)(2).

(4) *Allocation of tax.* Dividends paid by a RIC or by a REIT are not preferential dividends within the meaning of section 562(c) solely because the tax expense incurred by the RIC or REIT under section 860E(e)(6) is allocated solely to the shares held by disqualified organizations.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992]

§ 1.860F–1 Qualified liquidations.

A plan of liquidation need not be in any special form. If a REMIC specifies the first day in the 90-day liquidation period in a statement attached to its final return, then the REMIC will be considered to have adopted a plan of liquidation on the specified date.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992]

§ 1.860F–2 Transfers to a REMIC.

(a) *Formation of a REMIC*—(1) *In general.* For Federal income tax purposes, a REMIC formation is characterized as the contribution of assets by a sponsor (as defined in paragraph (b)(1) of this section) to a REMIC in exchange for REMIC regular and residual interests. If, instead of exchanging its interest in mortgages and related assets for regular and residual interests, the sponsor arranges to have the REMIC issue some or all of the regular and residual interests for cash, after which the sponsor sells its interests in mortgages and related assets to the REMIC, the transaction is, nevertheless, viewed for Federal income tax purposes as the sponsor's exchange of mortgages and related assets for regular and residual interests, followed by a sale of some or all of those interests. The purpose of this rule is to ensure that the tax consequences associated with the formation of a REMIC are not affected by the actual sequence of steps taken by the sponsor.

(2) *Tiered arrangements*—(i) *Two or more REMICs formed pursuant to a single set of organizational documents.* Two or more REMICs can be created pursuant to a single set of organizational documents even if for state law purposes or for Federal securities law purposes those documents create only one organization. The organizational documents must, however, clearly and expressly identify the assets of, and the interests in, each REMIC, and each REMIC must satisfy all of the requirements of section 860D and the related regulations.

(ii) *A REMIC and one or more investment trusts formed pursuant to a single set of documents.* A REMIC (or two or more REMICs) and one or more investment trusts can be created pursuant to a single set of organizational documents and the separate existence of the REMIC(s) and the investment trust(s) will be respected for Federal income tax purposes even if for state law purposes or for Federal securities law purposes those documents create only one organization. The organizational documents for the REMIC(s) and the investment trust(s) must, however, require both the REMIC(s) and the investment trust(s) to account for items of income and ownership of assets for Federal tax purposes in a manner that respects the separate existence of the multiple entities. See § 1.860G–2(i) concerning issuance of regular interests coupled with other contractual rights for an illustration of the provisions of this paragraph.

(b) *Treatment of sponsor*—(1) *Sponsor defined.* A sponsor is a person who directly or indirectly exchanges qualified mortgages and related assets for regular and residual interests in a REMIC. A person indirectly exchanges interests in qualified mortgages and related assets for regular and residual interests in a REMIC if the person transfers, other than in a nonrecognition transaction, the mortgages and related assets to another person who acquires a transitory ownership interest in those assets before exchanging them for interests in the REMIC, after which the transitory owner then transfers some or all of the interests in the REMIC to the first person.

(2) *Nonrecognition of gain or loss.* The sponsor does not recognize gain or loss on the direct or indirect transfer of any property to a REMIC in exchange for regular or residual interests in the REMIC. However, the sponsor, upon a subsequent sale of the REMIC regular or residual interests, may recognize gain or loss with respect to those interests.

(3) *Basis of contributed assets allocated among interests*—(i) *In general.* The aggregate of the adjusted bases of the regular and residual interests received by the sponsor in the exchange described in paragraph (a) of this section is equal to the aggregate of the adjusted bases of the property transferred by the sponsor in the exchange, increased by the amount of organizational expenses (as described in paragraph (b)(3)(ii) of this section). That total is allocated among all the interests received in proportion to their fair market values on the pricing date (as defined in paragraph (b)(3)(iii) of this section) if any, or, if none, the startup day (as defined in section 860G(a)(9) and §1.860G–2(k)).

(ii) *Organizational expenses*—(A) *Organizational expense defined.* An organizational expense is an expense that is incurred by the sponsor or by the REMIC and that is directly related to the creation of the REMIC. Further, the organizational expense must be incurred during a period beginning a reasonable time before the startup day and ending before the date prescribed by law for filing the first REMIC tax return (determined without regard to any extensions of time to file). The following are examples of organizational expenses: legal fees for services related to the formation of the REMIC, such as preparation of a pooling and servicing agreement and trust indenture; accounting fees related to the formation of the REMIC; and other administrative costs related to the formation of the REMIC.

(B) *Syndication expenses.* Syndication expenses are not organizational expenses. Syndication expenses are those expenses incurred by the sponsor or other person to market the interests in a REMIC, and, thus, are applied to reduce the amount realized on the sale of the interests. Examples of syndication expenses are brokerage fees, registration fees, fees of an underwriter or placement agent, and printing costs of the prospectus or placement memorandum and other selling or promotional material.

(iii) *Pricing date.* The term ‘‘pricing date’’ means the date on which the terms of the regular and residual interests are fixed and the prices at which a substantial portion of the regular interests will be sold are fixed.

(4) *Treatment of unrecognized gain or loss*—(i) *Unrecognized gain on regular interests.* For purposes of section 860F(b)(1)(C)(i), the sponsor must include in gross income the excess of the issue price of a regular interest over the sponsor’s basis in the interest as if the excess were market discount (as defined in section 1278(a)(2)) on a bond and the sponsor had made an election under section 1278(b) to include this market discount currently in gross income. The sponsor is not, however, by reason of this paragraph (b)(4)(i), deemed to have made an election under section 1278(b) with respect to any other bonds.

(ii) *Unrecognized loss on regular interests.* For purposes of section 860F(b)(1)(D)(i), the sponsor treats the excess of the sponsor’s basis in a regular interest over the issue price of the interest as if that excess were amortizable bond premium (as defined in section 171(b)) on a taxable bond and the sponsor had made an election under section 171(c). The sponsor is not, however, by reason of this paragraph (b)(4)(ii), deemed to have made an election under section 171(c) with respect to any other bonds.

(iii) *Unrecognized gain on residual interests.* For purposes of section 860F(b)(1)(C)(ii), the sponsor must include in gross income the excess of the issue price of a residual interest over the sponsor’s basis in the interest ratably over the anticipated weighted average life of the REMIC (as defined in §1.860E–1(a)(3)(iv)).

(iv) *Unrecognized loss on residual interests.* For purposes of section 860F(b)(1)(D)(ii), the sponsor deducts the excess of the sponsor’s basis in a residual interest over the issue price of the interest ratably over the anticipated weighted average life of the REMIC.

(5) *Additions to or reductions of the sponsor's basis.* The sponsor's basis in a regular or residual interest is increased by any amount included in the sponsor's gross income under paragraph (b)(4) of this section. The sponsor's basis in a regular or residual interest is decreased by any amount allowed as a deduction and by any amount applied to reduce interest payments to the sponsor under paragraph (b)(4)(ii) of this section.

(6) *Transferred basis property.* For purposes of paragraph (b)(4) of this section, a transferee of a regular or residual interest is treated in the same manner as the sponsor to the extent that the basis of the transferee in the interest is determined in whole or in part by reference to the basis of the interest in the hands of the sponsor.

(c) *REMIC's basis in contributed assets.* For purposes of section 860F(b)(2), the aggregate of the REMIC's bases in the assets contributed by the sponsor to the REMIC in a transaction described in paragraph (a) of this section is equal to the aggregate of the issue prices (determined under section 860G(a)(10) and § 1.86G–1(d)) of all regular and residual interests in the REMIC.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993]

§ 1.860F–4 REMIC reporting requirements and other administrative rules.

(a) *In general.* Except as provided in paragraph (c) of this section, for purposes of subtitle F of the Internal Revenue Code, a REMIC is treated as a partnership and any holder of a residual interest in the REMIC is treated as a partner. A REMIC is not subject, however, to the rules of subchapter C of chapter 63 of the Internal Revenue Code, relating to the treatment of partnership items, for a taxable year if there is at no time during the taxable year more than one holder of a residual interest in the REMIC.

(b) *REMIC tax return*—(1) *In general.* To satisfy the requirement under section 6031 to make a return of income for each taxable year, a REMIC must file the return required by paragraph (b)(2) of this section. The due date and any extensions for filing the REMIC's annual return are determined as if the REMIC were a partnership.

(2) *Income tax return.* The REMIC must make a return, as required by section 6011(a), for each taxable year on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return. The return must include—

(i) The amount of principal outstanding on each class of regular interests as of the close of the taxable year,

(ii) The amount of the daily accruals determined under section 860E(c), and

(iii) The information specified in § 1.860D–1(d)(2) (i), (iv), and (v).

(c) *Signing of REMIC return*—(1) *In general.* Although a REMIC is generally treated as a partnership for purposes of subtitle F, for purposes of determining who is authorized to sign a REMIC's income tax return for any taxable year, the REMIC is not treated as a partnership and the holders of residual interests in the REMIC are not treated as partners. Rather, the REMIC return must be signed by a person who could sign the return of the entity absent the REMIC election. Thus, the return of a REMIC that is a corporation or trust under applicable State law must be signed by a corporate officer or a trustee, respectively. The return of a REMIC that consists of a segregated pool of assets must be signed by a person who could sign the return of the entity that owns the assets of the REMIC under applicable State law.

(2) *REMIC whose startup day is before November 10, 1988*—(i) *In general.* The income tax return of a REMIC whose startup day is before November 10, 1988, may be signed by any person who held a residual interest during the taxable year to which the return relates, or, as provided in section 6903, by a fiduciary, as defined in section 7701(a)(6), who is acting for the REMIC and who has furnished adequate notice in the manner prescribed in § 301.6903–1(b) of this chapter.

(ii) *Startup day.* For purposes of paragraph (c)(2) of this section, startup day means any day selected by a REMIC that is on or before the first day on which interests in such REMIC are issued.

(iii) *Exception.* A REMIC whose startup day is before November 10, 1988, may elect to have paragraph (c)(1) of this section apply, instead of paragraph (c)(2) of this section, in determining who is authorized to sign the REMIC return. See section 1006(t)(18)(B) of the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3426) and §5h.6(a)(1) of this chapter for the time and manner for making this election.

(d) *Designation of tax matters person.* A REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under §301.6231(a)(7)–1T of this chapter. For purposes of applying that section, all holders of residual interests in the REMIC are treated as general partners.

(e) *Notice to holders of residual interests*—(1) *Information required.* As of the close of each calendar quarter, a REMIC must provide to each person who held a residual interest in the REMIC during that quarter notice on Schedule Q (Form 1066) of information specified in paragraphs (e)(1) (i) and (ii) of this section.

(i) *In general.* Each REMIC must provide to each of its residual interest holders the following information—

(A) That person's share of the taxable income or net loss of the REMIC for the calendar quarter;

(B) The amount of the excess inclusion (as defined in section 860E and the regulations thereunder), if any, with respect to that person's residual interest for the calendar quarter;

(C) If the holder of a residual interest is also a pass-through interest holder (as defined in §1.67–3T(a)(2)), the allocable investment expenses (as defined in §1.67–3T(a)(4)) for the calendar quarter, and

(D) Any other information required by Schedule Q (Form 1066).

(ii) *Information with respect to REMIC assets*—(A) *95 percent asset test.* For calendar quarters after 1988, each REMIC must provide to each of its residual interest holders the following information—

(*1*) The percentage of REMIC assets that are qualifying real property loans under section 593,

(*2*) The percentage of REMIC assets that are assets described in section 7701(a)(19), and

(*3*) The percentage of REMIC assets that are real estate assets defined in section 856(c)(6)(B), computed by reference to the average adjusted basis (as defined in section 1011) of the REMIC assets during the calendar quarter (as described in paragraph (e)(1)(iii) of this section). If the percentage of REMIC assets represented by a category is at least 95 percent, then the REMIC need only specify that the percentage for that category was at least 95 percent.

(B) *Additional information required if the 95 percent test not met.* If, for any calendar quarter after 1988, less than 95 percent of the assets of the REMIC are real estate assets defined in section 856(c)(6)(B), then, for that calendar quarter, the REMIC must also provide to any real estate investment trust (REIT) that holds a residual interest the following information—

(*1*) The percentage of REMIC assets described in section 856(c)(5)(A), computed by reference to the average adjusted basis of the REMIC assets during the calendar quarter (as described in paragraph (e)(1)(iii) of this section),

(*2*) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3)(A) through (E), computed as of the close of the calendar quarter, and

(*3*) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3)(F), computed as of the close of the calendar quarter. For purposes of this paragraph (e)(1)(ii)(B)(*3*), the term ''foreclosure property'' contained in section 856(c)(3)(F) has the meaning specified in section 860G(a)(8).

In determining whether a REIT satisfies the limitations of section 856(c)(2), all REMIC gross income is deemed to be derived from a source specified in section 856(c)(2).

(C) *For calendar quarters in 1987.* For calendar quarters in 1987, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by reference to the fair market value of the assets of the REMIC as of the close of the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis during the calendar quarter.

(D) *For calendar quarters in 1988 and 1989.* For calendar quarters in 1988 and 1989, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by reference to the average fair market value of the assets of the REMIC during the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis of the assets of the REMIC during the calendar quarter.

(iii) *Special provisions.* For purposes of paragraph (e)(1)(ii) of this section, the percentage of REMIC assets represented by a specified category computed by reference to average adjusted basis (or fair market value) of the assets during a calendar quarter is determined by dividing the average adjusted bases (or for calendar quarters before 1990, fair market value) of the assets in the specified category by the average adjusted basis (or, for calendar quarters before 1990, fair market value) of all the assets of the REMIC as of the close of each month, week, or day during that calendar quarter. The monthly, weekly, or daily computation period must be applied uniformly during the calendar quarter to all categories of assets and may not be changed in succeeding calendar quarters without the consent of the Commissioner.

(2) *Quarterly notice required*—(i) *In general.* Schedule Q must be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter.

(ii) *Special rule for 1987.* Notice to any holder of a REMIC residual interest of the information required in paragraph (e)(1) of this section for any of the four calendar quarters of 1987 must be mailed (or otherwise delivered) to each holder no later than March 28, 1988.

(3) *Nominee reporting*—(i) *In general.* If a REMIC is required under paragraphs (e) (1) and (2) of this section to provide notice to an interest holder who is a nominee of another person with respect to an interest in the REMIC, the nominee must furnish that notice to the person for whom it is a nominee.

(ii) *Time for furnishing statement.* The nominee must furnish the notice required under paragraph (e)(3)(i) of this section to the person for whom it is a nominee no later than 30 days after receiving this information.

(4) *Reports to the Internal Revenue Service.* For each person who was a residual interest holder at any time during a REMIC's taxable year, the REMIC must attach a copy of Schedule Q to its income tax return for that year for each quarter in which that person was a residual interest holder. Quarterly notice to the Internal Revenue Service is not required.

(f) *Information returns for persons engaged in a trade or business.* See §1.6041–1(b)(2) for the treatment of a REMIC under sections 6041 and 6041A.

[T.D. 8366, 56 FR 49516, Sept. 30, 1991, as amended by T.D. 8458, 57 FR 61306, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993]

§1.860G–1 Definition of regular and residual interests.

(a) *Regular interest*—(1) *Designation as a regular interest.* For purposes of section 860G(a)(1), a REMIC designates an interest as a regular interest by providing to the Internal Revenue Service the information specified in §1.860D–1(d)(2)(ii) in the time and manner specified in §1.860D–1(d)(2).

(2) *Specified portion of the interest payments on qualified mortgages*—(i) *In general.* For purposes of section 860G(a)(1)(B)(ii), a specified portion of the interest payments on qualified mortgages means a portion of the interest payable on qualified mortgages, but only if the portion can be expressed as—

(A) A fixed percentage of the interest that is payable at either a fixed rate or at a variable rate described in paragraph (a)(3) of this section on some or all of the qualified mortgages;

(B) A fixed number of basis points of the interest payable on some or all of the qualified mortgages; or

(C) The interest payable at either a fixed rate or at a variable rate described in paragraph (a)(3) of this section on some or all of the qualified mortgages in excess of a fixed number of basis points or in excess of a variable rate described in paragraph (a)(3) of this section.

(ii) *Specified portion cannot vary.* The portion must be established as of the startup day (as defined in section 860G(a)(9) and §1.860G–2(k)) and, except as provided in paragraph (a)(2)(iii) of this section, it cannot vary over the period that begins on the startup day and ends on the day that the interest holder is no longer entitled to receive payments.

(iii) *Defaulted or delinquent mortgages.* A portion is not treated as varying over time if an interest holder's entitlement to a portion of the interest on some or all of the qualified mortgages is dependent on the absence of defaults or delinquencies on those mortgages.

(iv) *No minimum specified principal amount is required.* If an interest in a REMIC consists of a specified portion of the interest payments on the REMIC's qualified mortgages, no minimum specified principal amount need be assigned to that interest. The specified principal amount can be zero.

(v) *Specified portion includes portion of interest payable on regular interest.* (A) The specified portions that meet the requirements of paragraph (a)(2)(i) of this section include a specified portion that can be expressed as a fixed percentage of the interest that is payable on some or all of the qualified mortgages where—

(*1*) Each of those qualified mortgages is a regular interest issued by another REMIC; and

(*2*) With respect to that REMIC in which it is a regular interest, each of those regular interests bears interest that can be expressed as a specified portion as described in paragraph (a)(2)(i)(A), (B), or (C) of this section.

(B) See §1.860A–1(a) for the effective date of this paragraph (a)(2)(v).

(vi) *Examples.* The following examples, each of which describes a pass-thru trust that is intended to qualify as a REMIC, illustrate the provisions of this paragraph (a)(2).

Example 1. (i) A sponsor transferred a pool of fixed rate mortgages to a trustee in exchange for two classes of certificates. The Class A certificate holders are entitled to all principal payments on the mortgages and to interest on outstanding principal at a variable rate based on the current value of One-Month LIBOR, subject to a lifetime cap equal to the weighted average rate payable on the mortgages. The Class B certificate holders are entitled to all interest payable on the mortgages in excess of the interest paid on the Class A certificates. The Class B certificates are subordinate to the Class A certificates so that cash flow shortfalls due to defaults or delinquencies on the mortgages will be borne first by the Class B certificate holders.

(ii) The Class B certificate holders are entitled to all interest payable on the pooled mortgages in excess of a variable rate described in paragraph (a)(3)(vi) of this section. Moreover, the portion of the interest payable to the Class B certificate holders is not treated as varying over time solely because payments on the Class B certificates may be reduced as a result of defaults or delinquencies on the pooled mortgages. Thus, the Class B certificates provide for interest payments that consist of a specified portion of the interest payable on the pooled mortgages under paragraph (a)(2)(i)(C) of this section.

Example 2. (i) A sponsor transferred a pool of variable rate mortgages to a trustee in exchange for two classes of certificates. The mortgages call for interest payments at a variable rate based on the current value of the One-Year Constant Maturity Treasury Index (hereinafter "CMTI") plus 200 basis points, subject to a lifetime cap of 12 percent. Class C certificate holders are entitled to all principal payments on the mortgages and interest on the outstanding principal at a variable rate based on the One-Year CMTI plus 100 basis points, subject to a lifetime cap of 12 percent. The interest rate on the Class C certificates is reset at the same time the rate is reset on the pooled mortgages.

(ii) The Class D certificate holders are entitled to all interest payments on the mortgages in excess of the interest paid on the Class C certificates. So long as the One-Year CMTI is at 10 percent or lower, the Class D certificate holders are entitled to 100 basis points of interest on the pooled mortgages. If, however, the index exceeds 10 percent on a reset date, the Class D certificate holders' entitlement shrinks, and it disappears if the index is at 11 percent or higher.

(iii) The Class D certificate holders are entitled to all interest payable on the pooled mortgages in excess of a qualified variable rate described in paragraph (a)(3) of this section. Thus, the Class D certificates provide for interest payments that consist of a specified portion of the interest payable on the qualified mortgages under paragraph (a)(2)(i)(C) of this section.

Example 3. (i) A sponsor transferred a pool of fixed rate mortgages to a trustee in exchange for two classes of certificates. The fixed interest rate payable on the mortgages varies from mortgage to mortgage, but all rates are between 8 and 10 percent. The Class E certificate holders are entitled to receive all principal payments on the mortgages and interest on outstanding principal at 7 percent. The Class F certificate holders are entitled to receive all interest on the mortgages in excess of the interest paid on the Class E certificates.

(ii) The Class F certificates provide for interest payments that consist of a specified portion of the interest payable on the mortgages under paragraph (a)(2)(i) of this section. Although the portion of the interest payable to the Class F certificate holders varies from mortgage to mortgage, the interest payable can be expressed as a fixed percentage of the interest payable on each particular mortgage.

(3) *Variable rate.* A regular interest may bear interest at a variable rate. For purposes of section 860G(a)(1)(B)(i), a variable rate of interest is a rate described in this paragraph (a)(3).

(i) *Rate based on current interest rate.* A qualified floating rate as defined in § 1.1275–5(b)(1) (but without the application of paragraph (b)(2) or (3) of that section) set at a current value, as defined in § 1.1275–5(a)(4), is a variable rate. In addition, a rate equal to the highest, lowest, or average of two or more qualified floating rates is a variable rate. For example, a rate based on the average cost of funds of one or more financial institutions is a variable rate.

(ii) *Weighted average rate*—(A) *In general.* A rate based on a weighted average of the interest rates on some or all of the qualified mortgages held by a REMIC is a variable rate. The qualified mortgages taken into account must, however, bear interest at a fixed rate or at a rate described in this paragraph (a)(3). Generally, a weighted average interest rate is a rate that, if applied to the aggregate outstanding principal balance of a pool of mortgage loans for an accrual period, produces an amount of interest that equals the sum of the interest payable on the pooled loans for that accrual period. Thus, for an accrual period in which a pool of mortgage loans comprises $300,000 of loans bearing a 7 percent interest rate and $700,000 of loans bearing a 9.5 percent interest rate, the weighted average rate for the pool of loans is 8.75 percent.

(B) *Reduction in underlying rate.* For purposes of paragraph (a)(3)(ii)(A) of this section, an interest rate is considered to be based on a weighted average rate even if, in determining that rate, the interest rate on some or all of the qualified mortgages is first subject to a cap or a floor, or is first reduced by a number of basis points or a fixed percentage. A rate determined by taking a weighted average of the interest rates on the qualified mortgage loans net of any servicing spread, credit enhancement fees, or other expenses of the REMIC is a rate based on a weighted average rate for the qualified mortgages. Further, the amount of any rate reduction described above may vary from mortgage to mortgage.

(iii) *Additions, subtractions, and multiplications.* A rate is a variable rate if it is—

(A) Expressed as the product of a rate described in paragraph (a)(3)(i) or (ii) of this section and a fixed multiplier;

(B) Expressed as a constant number of basis points more or less than a rate described in paragraph (a)(3)(i) or (ii) of this section; or

(C) Expressed as the product, plus or minus a constant number of basis points, of a rate described in paragraph (a)(3)(i) or (ii) of this section and a fixed multiplier (which may be either a positive or a negative number).

(iv) *Caps and floors.* A rate is a variable rate if it is a rate that would be described in paragraph (a)(3)(i) through (iii) of this section except that it is—

(A) Limited by a cap or ceiling that establishes either a maximum rate or a maximum number of basis points by which the rate may increase from one accrual or payment period to another or over the term of the interest; or

(B) Limited by a floor that establishes either a minimum rate or a maximum number of basis points by which the rate may decrease from one accrual or payment period to another or over the term of the interest.

(v) *Funds-available caps*—(A) *In general.* A rate is a variable rate if it is a rate that would be described in paragraph (a)(3)(i) through (iv) of this section except that it is subject to a ‘‘funds-available’’ cap. A funds-available cap is a limit on the amount of interest to be paid on an instrument in any accrual or payment period that is based on the total amount available for the distribution, including both principal and interest received by an issuing entity on some or all of its qualified mortgages as well as amounts held in a reserve fund. The term ‘‘funds-available cap’’ does not, however, include any cap or limit on interest payments used as a device to avoid the standards of paragraph (a)(3)(i) through (iv) of this section.

(B) *Facts and circumstances test.* In determining whether a cap or limit on interest payments is a funds-available cap within the meaning of this section and not a device used to avoid the standards of paragraph (a)(3)(i) through (iv) of this section, one must consider all of the facts and circumstances. Facts and circumstances that must be taken into consideration are—

(*1*) Whether the rate of the interest payable to the regular interest holders is below the rate payable on the REMIC's qualified mortgages on the start-up day; and

(*2*) Whether, historically, the rate of interest payable to the regular interest holders has been consistently below that payable on the qualified mortgages.

(C) *Examples.* The following examples, both of which describe a pass-thru trust that is intended to qualify as a REMIC, illustrate the provisions of this paragraph (a)(3)(v).

Example 1. (i) A sponsor transferred a pool of mortgages to a trustee in exchange for two classes of certificates. The pool of mortgages has an aggregate principal balance of $100*x*. Each mortgage in the pool provides for interest payments based on the eleventh district cost of funds index (hereinafter COFI) plus a margin. The initial weighted average rate for the pool is COFI plus 200 basis points. The trust issued a Class X certificate that has a principal amount of $100*x* and that provides for interest payments at a rate equal to One-Year LIBOR plus 100 basis points, subject to a cap described below. The Class R certificate, which the sponsor designated as the residual interest, entitles its holder to all funds left in the trust after the Class X certificates have been retired. The Class R certificate holder is not entitled to current distributions.

(ii) At the time the certificates were issued, COFI equalled 4.874 percent and One-Year LIBOR equalled 3.375 percent. Thus, the initial weighted average pool rate was 6.874 percent and the Class X certificate rate was 4.375 percent. Based on historical data, the sponsor does not expect the rate paid on the Class X certificate to exceed the weighted average rate on the pool.

(iii) Initially, under the terms of the trust instrument, the excess of COFI plus 200 over One-Year LIBOR plus 100 (excess interest) will be applied to pay expenses of the trust, to fund any required reserves, and then to reduce the principal balance on the Class X certificate. Consequently, although the aggregate principal balance of the mortgages initially matched the principal balance of the Class X certificate, the principal balance on the Class X certificate will pay down faster than the principal balance on the mortgages as long as the weighted average rate on the mortgages is greater than One-Year LIBOR plus 100. If, however, the rate on the Class X certificate (One-Year LIBOR plus 100) ever exceeds the weighted average rate on the mortgages, then the Class X certificate holders will receive One-Year LIBOR plus 100 subject to a cap based on the current funds that are available for distribution.

(iv) The funds available cap here is not a device used to avoid the standards of paragraph (a)(3) (i) through (iv) of this section. First, on the date the Class X certificates were issued, a significant spread existed between the weighted average rate payable on the mortgages and the rate payable on the Class X certificate. Second, historical data suggest that the weighted average rate payable on the mortgages will continue to exceed the rate payable on the Class X certificate. Finally, because the excess interest will be applied to reduce the outstanding principal balance of the Class X certificate more rapidly than the outstanding principal balance on the mortgages is reduced, One-Year LIBOR plus 100 basis points would have to exceed the weighted average rate on the mortgages by an increasingly larger amount before the funds available cap would be triggered. Accordingly, the rate paid on the Class X certificates is a variable rate.

Example 2. (i) The facts are the same as those in *Example 1,* except that the pooled mortgages are commercial mortgages that provide for interest payments based on the gross profits of the mortgagors, and the rate on the Class X certificates is 400 percent on One-Year LIBOR (a variable rate under paragraph (a)(3)(iii) of this section), subject to a cap equal to current funds available to the trustee for distribution.

(ii) Initially, 400 percent of One-Year LIBOR exceeds the weighted average rate payable on the mortgages. Furthermore, historical data suggest that there is a significant possibility that, in the future, 400 percent of One-Year LIBOR will exceed the weighted average rate on the mortgages.

(iii) The facts and circumstances here indicate that the use of 400 percent of One-Year LIBOR with the above-described cap is a device to pass through to the Class X certificate holder contingent interest based on mortgagor profits. Consequently, the rate paid on the Class X certificate here is not a variable rate.

(vi) *Combination of rates.* A rate is a variable rate if it is based on—

(A) One fixed rate during one or more accrual or payment periods and a different fixed rate or rates, or a rate or rates described in paragraph (a)(3) (i) through (v) of this section, during other accrual or payment periods; or

(B) A rate described in paragraph (a)(3) (i) through (v) of this section during one or more accrual or payment periods and a fixed rate or rates, or a different rate or rates described in paragraph (a)(3) (i) through (v) of this section in other periods.

(4) *Fixed terms on the startup day.* For purposes of section 860G(a)(1), a regular interest in a REMIC has fixed terms on the startup day if, on the startup day, the REMIC's organizational documents irrevocably specify—

(i) The principal amount (or other similar amount) of the regular interest;

(ii) The interest rate or rates used to compute any interest payments (or other similar amounts) on the regular interest; and

(iii) The latest possible maturity date of the interest.

(5) *Contingencies prohibited.* Except for the contingencies specified in paragraph (b)(3) of this section, the principal amount (or other similar amount) and the latest possible maturity date of the interest must not be contingent.

(b) *Special rules for regular interests*—(1) *Call premium.* An interest in a REMIC does not qualify as a regular interest if the terms of the interest entitle the holder of that interest to the payment of any premium that is determined with reference to the length of time that the regular interest is outstanding and is not described in paragraph (b)(2) of this section.

(2) *Customary prepayment penalties received with respect to qualified mortgages.* An interest in a REMIC does not fail to qualify as a regular interest solely because the REMIC's organizational documents provide that the REMIC must allocate among and pay to its regular interest holders any customary prepayment penalties that the REMIC receives with respect to its qualified mortgages. Moreover, a REMIC may allocate prepayment penalties among its classes of interests in any manner specified in the REMIC's organizational documents. For example, a REMIC could allocate all or substantially all of a prepayment penalty that it receives to holders of an interest-only class of interests because that class would be most significantly affected by prepayments.

(3) *Certain contingencies disregarded.* An interest in a REMIC does not fail to qualify as a regular interest solely because it is issued subject to some or all of the contingencies described in paragraph (b)(3) (i) through (vi) of this section.

(i) *Prepayments, income, and expenses.* An interest does not fail to qualify as a regular interest solely because—

(A) The timing of (but not the right to or amount of) principal payments (or other similar amounts) is affected by the extent of prepayments on some or all of the qualified mortgages held by the REMIC or the amount of income from permitted investments (as defined in § 1.860G–2(g)); or

(B) The timing of interest and principal payments is affected by the payment of expenses incurred by the REMIC.

(ii) *Credit losses.* An interest does not fail to qualify as a regular interest solely because the amount or the timing of payments of principal or interest (or other similar amounts) with respect to a regular interest is affected by defaults on qualified mortgages and permitted investments, unanticipated expenses incurred by the REMIC, or lower than expected returns on permitted investments.

(iii) *Subordinated interests.* An interest does not fail to qualify as a regular interest solely because that interest bears all, or a disproportionate share, of the losses stemming from cash flow shortfalls due to defaults or delinquencies on qualified mortgages or permitted investments, unanticipated expenses incurred by the REMIC, lower than expected returns on permitted investments, or prepayment interest shortfalls before other regular interests or the residual interest bear losses occasioned by those shortfalls.

(iv) *Deferral of interest.* An interest does not fail to qualify as a regular interest solely because that interest, by its terms, provides for deferral of interest payments.

(v) *Prepayment interest shortfalls.* An interest does not fail to qualify as a regular interest solely because the amount of interest payments is affected by prepayments of the underlying mortgages.

(vi) *Remote and incidental contingencies.* An interest does not fail to qualify as a regular interest solely because the amount or timing of payments of principal or interest (or other similar amounts) with respect to the interest is subject to a contingency if there is only a remote likelihood that the contingency will occur. For example, an interest could qualify as a regular interest even though full payment of principal and interest on that interest is contingent upon the absence of significant cash flow shortfalls due to the operation of the Soldiers and Sailors Civil Relief Act, 50 U.S.C. app. 526 (1988).

(4) *Form of regular interest.* A regular interest in a REMIC may be issued in the form of debt, stock, an interest in a partnership or trust, or any other form permitted by state law. If a regular interest in a REMIC is not in the form of debt, it must, except as provided in paragraph (a)(2)(iv) of this section, entitle the holder to a specified amount that would, were the interest issued in debt form, be identified as the principal amount of the debt.

(5) *Interest disproportionate to principal*—(i) *In general.* An interest in a REMIC does not qualify as a regular interest if the amount of interest (or other similar amount) payable to the holder is disproportionately high relative to the principal amount or other specified amount described in paragraph (b)(4) of this section (specified principal amount). Interest payments (or other similar amounts) are considered disproportionately high if the issue price (as determined under paragraph (d) of this section) of the interest in the REMIC exceeds 125 percent of its specified principal amount.

(ii) *Exception.* A regular interest in a REMIC that entitles the holder to interest payments consisting of a specified portion of interest payments on qualified mortgages qualifies as a regular interest even if the amount of interest is disproportionately high relative to the specified principal amount.

(6) *Regular interest treated as a debt instrument for all Federal income tax purposes.* In determining the tax under chapter 1 of the Internal Revenue Code, a REMIC regular interest (as defined in section 860G(a)(1)) is treated as a debt instrument that is an obligation of the REMIC. Thus, sections 1271 through 1288, relating to bonds and other debt instruments, apply to a regular interest. For special rules relating to the accrual of original issue discount on regular interests, see section 1272(a)(6).

(c) *Residual interest.* A residual interest is an interest in a REMIC that is issued on the startup day and that is designated as a residual interest by providing the information specified in §1.860D–1(d)(2)(ii) at the time and in the manner provided in §1.860D–1(d)(2). A residual interest need not entitle the holder to any distributions from the REMIC.

(d) *Issue price of regular and residual interests*—(1) *In general.* The issue price of any REMIC regular or residual interest is determined under section 1273(b) as if the interest were a debt instrument and, if issued for property, as if the requirements of section 1273(b)(3) were met. Thus, if a class of interests is publicly offered, then the issue price of an interest in that class is the initial offering price to the public at which a substantial amount of the class is sold. If the interest is in a class that is not publicly offered, the issue price is the price paid by the first buyer of that interest regardless of the price paid for the remainder of the class. If the interest is in a class that is retained by the sponsor, the issue price is its fair market value on the pricing date (as defined in §1.860F–2(b)(3)(iii)), if any, or, if none, the startup day, regardless of whether the property exchanged therefor is publicly traded.

(2) *The public.* The term ‘‘the public’’ for purposes of this section does not include brokers or other middlemen, nor does it include the sponsor who acquires all of the regular and residual

interests from the REMIC on the startup day in a transaction described in § 1.860F–2(a).

[T.D. 8458, 57 FR 61306, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; 58 FR 15089, Mar. 19, 1993; T.D. 8614, 60 FR 42787, Aug. 17, 1995]

§ 1.860G–2 Other rules.

(a) *Obligations principally secured by an interest in real property*—(1) *Tests for determining whether an obligation is principally secured.* For purposes of section 860G(a)(3)(A), an obligation is principally secured by an interest in real property only if it satisfies either the test set out in paragraph (a)(1)(i) or the test set out in paragraph (a)(1)(ii) of this section.

(i) *The 80-percent test.* An obligation is principally secured by an interest in real property if the fair market value of the interest in real property securing the obligation—

(A) Was at least equal to 80 percent of the adjusted issue price of the obligation at the time the obligation was originated (see paragraph (b)(1) of this section concerning the origination date for obligations that have been significantly modified); or

(B) Is at least equal to 80 percent of the adjusted issue price of the obligation at the time the sponsor contributes the obligation to the REMIC.

(ii) *Alternative test.* For purposes of section 860G(a)(3)(A), an obligation is principally secured by an interest in real property if substantially all of the proceeds of the obligation were used to acquire or to improve or protect an interest in real property that, at the origination date, is the only security for the obligation. For purposes of this test, loan guarantees made by the United States or any state (or any political subdivision, agency, or instrumentality of the United States or of any state), or other third party credit enhancement are not viewed as additional security for a loan. An obligation is not considered to be secured by property other than real property solely because the obligor is personally liable on the obligation.

(2) *Treatment of liens.* For purposes of paragraph (a)(1)(i) of this section, the fair market value of the real property interest must be first reduced by the amount of any lien on the real property interest that is senior to the obligation being tested, and must be further reduced by a proportionate amount of any lien that is in parity with the obligation being tested.

(3) *Safe harbor*—(i) *Reasonable belief that an obligation is principally secured.* If, at the time the sponsor contributes an obligation to a REMIC, the sponsor reasonably believes that the obligation is principally secured by an interest in real property within the meaning of paragraph (a)(1) of this section, then the obligation is deemed to be so secured for purposes of section 860G(a)(3). A sponsor cannot avail itself of this safe harbor with respect to an obligation if the sponsor actually knows or has reason to know that the obligation fails both of the tests set out in paragraph (a)(1) of this section.

(ii) *Basis for reasonable belief.* For purposes of paragraph (a)(3)(i) of this section, a sponsor may base a reasonable belief concerning any obligation on—

(A) Representations and warranties made by the originator of the obligation; or

(B) Evidence indicating that the originator of the obligation typically made mortgage loans in accordance with an established set of parameters, and that any mortgage loan originated in accordance with those parameters would satisfy at least one of the tests set out in paragraph (a)(1) of this section.

(iii) *Later discovery that an obligation is not principally secured.* If, despite the sponsor's reasonable belief concerning an obligation at the time it contributed the obligation to the REMIC, the REMIC later discovers that the obligation is not principally secured by an interest in real property, the obligation is a defective obligation and loses its status as a qualified mortgage 90 days after the date of discovery. See paragraph (f) of this section, relating to defective obligations.

(4) *Interests in real property; real property.* The definition of ''interests in real property'' set out in § 1.856–3(c), and the definition of ''real property'' set out in § 1.856–3(d), apply to define those terms for purposes of section 860G(a)(3) and paragraph (a) of this section.

(5) *Obligations secured by an interest in real property*. Obligations secured by interests in real property include the following: mortgages, deeds of trust, and installment land contracts; mortgage pass-thru certificates guaranteed by GNMA, FNMA, FHLMC, or CMHC (Canada Mortgage and Housing Corporation); other investment trust interests that represent undivided beneficial ownership in a pool of obligations principally secured by interests in real property and related assets that would be considered to be permitted investments if the investment trust were a REMIC, and provided the investment trust is classified as a trust under §301.7701–4(c) of this chapter; and obligations secured by manufactured housing treated as single family residences under section 25(e)(10) (without regard to the treatment of the obligations or the properties under state law).

(6) *Obligations secured by other obligations; residual interests*. Obligations (other than regular interests in a REMIC) that are secured by other obligations are not principally secured by interests in real property even if the underlying obligations are secured by interests in real property. Thus, for example, a collateralized mortgage obligation issued by an issuer that is not a REMIC is not an obligation principally secured by an interest in real property. A residual interest (as defined in section 860G(a)(2)) is not an obligation principally secured by an interest in real property.

(7) *Certain instruments that call for contingent payments are obligations*. For purposes of section 860G(a)(3) and (4), the term ''obligation'' includes any instrument that provides for total noncontingent principal payments that at least equal the instrument's issue price even if that instrument also provides for contingent payments. Thus, for example, an instrument that was issued for $100*x* and that provides for noncontingent principal payments of $100*x*, interest payments at a fixed rate, and contingent payments based on a percentage of the mortgagor's gross receipts, is an obligation.

(8) *Defeasance*. If a REMIC releases its lien on real property that secures a qualified mortgage, that mortgage ceases to be a qualified mortgage on the date the lien is released unless—

(i) The mortgagor pledges substitute collateral that consists solely of government securities (as defined in section 2(a)(16) of the Investment Company Act of 1940 as amended (15 U.S.C. 80a–1));

(ii) The mortgage documents allow such a substitution;

(iii) The lien is released to facilitate the disposition of the property or any other customary commercial transaction, and not as part of an arrangement to collateralize a REMIC offering with obligations that are not real estate mortgages; and

(iv) The release is not within 2 years of the startup day.

(9) *Stripped bonds and coupons*. The term ''qualified mortgage'' includes stripped bonds and stripped coupons (as defined in section 1286(e) (2) and (3)) if the bonds (as defined in section 1286(e)(1)) from which such stripped bonds or stripped coupons arose would have been qualified mortgages.

(b) *Assumptions and modifications*—(1) *Significant modifications are treated as exchanges of obligations*. If an obligation is significantly modified in a manner or under circumstances other than those described in paragraph (b)(3) of this section, then the modified obligation is treated as one that was newly issued in exchange for the unmodified obligation that it replaced. Consequently—

(i) If such a significant modification occurs after the obligation has been contributed to the REMIC and the modified obligation is not a qualified replacement mortgage, the modified obligation will not be a qualified mortgage and the deemed disposition of the unmodified obligation will be a prohibited transaction under section 860F(a)(2); and

(ii) If such a significant modification occurs before the obligation is contributed to the REMIC, the modified obligation will be viewed as having been originated on the date the modification occurs for purposes of the tests set out in paragraph (a)(1) of this section.

(2) *Significant modification defined*. For purposes of paragraph (b)(1) of this section, a ''significant modification'' is

any change in the terms of an obligation that would be treated as an exchange of obligations under section 1001 and the related regulations.

(3) *Exceptions.* For purposes of paragraph (b)(1) of this section, the following changes in the terms of an obligation are not significant modifications regardless of whether they would be significant modifications under paragraph (b)(2) of this section—

(i) Changes in the terms of the obligation occasioned by default or a reasonably foreseeable default;

(ii) Assumption of the obligation;

(iii) Waiver of a due-on-sale clause or a due on encumbrance clause; and

(iv) Conversion of an interest rate by a mortgagor pursuant to the terms of a convertible mortgage.

(4) *Modifications that are not significant modifications.* If an obligation is modified and the modification is not a significant modification for purposes of paragraph (b)(1) of this section, then the modified obligation is not treated as one that was newly originated on the date of modification.

(5) *Assumption defined.* For purposes of paragraph (b)(3) of this section, a mortgage has been assumed if—

(i) The buyer of the mortgaged property acquires the property subject to the mortgage, without assuming any personal liability;

(ii) The buyer becomes liable for the debt but the seller also remains liable; or

(iii) The buyer becomes liable for the debt and the seller is released by the lender.

(6) *Pass-thru certificates.* If a REMIC holds as a qualified mortgage a pass-thru certificate or other investment trust interest of the type described in paragraph (a)(5) of this section, the modification of a mortgage loan that backs the pass-thru certificate or other interest is not a modification of the pass-thru certificate or other interest unless the investment trust structure was created to avoid the prohibited transaction rules of section 860F(a).

(c) *Treatment of certain credit enhancement contracts*—(1) *In general.* A credit enhancement contract (as defined in paragraph (c) (2) and (3) of this section) is not treated as a separate asset of the REMIC for purposes of the asset test set out in section 860D(a)(4) and § 1.860D–1(b)(3), but instead is treated as part of the mortgage or pool of mortgages to which it relates. Furthermore, any collateral supporting a credit enhancement contract is not treated as an asset of the REMIC solely because it supports the guarantee represented by that contract. See paragraph (g)(1)(ii) of this section for the treatment of payments made pursuant to credit enhancement contracts as payments received under a qualified mortgage.

(2) *Credit enhancement contracts.* For purposes of this section, a credit enhancement contract is any arrangement whereby a person agrees to guarantee full or partial payment of the principal or interest payable on a qualified mortgage or on a pool of such mortgages, or full or partial payment on one or more classes of regular interests or on the class of residual interests, in the event of defaults or delinquencies on qualified mortgages, unanticipated losses or expenses incurred by the REMIC, or lower than expected returns on cash flow investments. Types of credit enhancement contracts may include, but are not limited to, pool insurance contracts, certificate guarantee insurance contracts, letters of credit, guarantees, or agreements whereby the REMIC sponsor, a mortgage servicer, or other third party agrees to make advances described in paragraph (c)(3) of this section.

(3) *Arrangements to make certain advances.* The arrangements described in this paragraph (c)(3) are credit enhancement contracts regardless of whether, under the terms of the arrangement, the payor is obligated, or merely permitted, to advance funds to the REMIC.

(i) *Advances of delinquent principal and interest.* An arrangement by a REMIC sponsor, mortgage servicer, or other third party to advance to the REMIC out of its own funds an amount to make up for delinquent payments on qualified mortgages is a credit enhancement contract.

(ii) *Advances of taxes, insurance payments, and expenses.* An arrangement by a REMIC sponsor, mortgage servicer, or other third party to pay taxes and hazard insurance premiums on, or other expenses incurred to protect the

REMIC's security interest in, property securing a qualified mortgage in the event that the mortgagor fails to pay such taxes, insurance premiums, or other expenses is a credit enhancement contract.

(iii) *Advances to ease REMIC administration.* An agreement by a REMIC sponsor, mortgage servicer, or other third party to advance temporarily to a REMIC amounts payable on qualified mortgages before such amounts are actually due to level out the stream of cash flows to the REMIC or to provide for orderly administration of the REMIC is a credit enhancement contract. For example, if two mortgages in a pool have payment due dates on the twentieth of the month, and all the other mortgages have payment due dates on the first of each month, an agreement by the mortgage servicer to advance to the REMIC on the fifteenth of each month the payments not yet received on the two mortgages together with the amounts received on the other mortgages is a credit enhancement contract.

(4) *Deferred payment under a guarantee arrangement.* A guarantee arrangement does not fail to qualify as a credit enhancement contract solely because the guarantor, in the event of a default on a qualified mortgage, has the option of immediately paying to the REMIC the full amount of mortgage principal due on acceleration of the defaulted mortgage, or paying principal and interest to the REMIC according to the original payment schedule for the defaulted mortgage, or according to some other deferred payment schedule. Any deferred payments are payments pursuant to a credit enhancement contract even if the mortgage is foreclosed upon and the guarantor, pursuant to subrogation rights set out in the guarantee arrangement, is entitled to receive immediately the proceeds of foreclosure.

(d) *Treatment of certain purchase agreements with respect to convertible mortgages*—(1) *In general.* For purposes of sections 860D(a)(4) and 860G(a)(3), a purchase agreement (as described in paragraph (d)(3) of this section) with respect to a convertible mortgage (as described in paragraph (d)(5) of this section) is treated as incidental to the convertible mortgage to which it relates. Consequently, the purchase agreement is part of the mortgage or pool of mortgages and is not a separate asset of the REMIC.

(2) *Treatment of amounts received under purchase agreements.* For purposes of sections 860A through 860G and for purposes of determining the accrual of original issue discount and market discount under sections 1272(a)(6) and 1276, respectively, a payment under a purchase agreement described in paragraph (d)(3) of this section is treated as a prepayment in full of the mortgage to which it relates. Thus, for example, a payment under a purchase agreement with respect to a qualified mortgage is considered a payment received under a qualified mortgage within the meaning of section 860G(a)(6) and the transfer of the mortgage is not a disposition of the mortgage within the meaning of section 860F(a)(2)(A).

(3) *Purchase agreement.* A purchase agreement is a contract between the holder of a convertible mortgage and a third party under which the holder agrees to sell and the third party agrees to buy the mortgage for an amount equal to its current principal balance plus accrued but unpaid interest if and when the mortgagor elects to convert the terms of the mortgage.

(4) *Default by the person obligated to purchase a convertible mortgage.* If the person required to purchase a convertible mortgage defaults on its obligation to purchase the mortgage upon conversion, the REMIC may sell the mortgage in a market transaction and the proceeds of the sale will be treated as amounts paid pursuant to a purchase agreement.

(5) *Convertible mortgage.* A convertible mortgage is a mortgage that gives the obligor the right at one or more times during the term of the mortgage to elect to convert from one interest rate to another. The new rate of interest must be determined pursuant to the terms of the instrument and must be intended to approximate a market rate of interest for newly originated mortgages at the time of the conversion.

(e) *Prepayment interest shortfalls.* An agreement by a mortgage servicer or other third party to make payments to the REMIC to make up prepayment interest shortfalls is not treated as a separate asset of the REMIC and payments made pursuant to such an agreement are treated as payments on the qualified mortgages. With respect to any mortgage that prepays, the prepayment interest shortfall for the accrual period in which the mortgage prepays is an amount equal to the excess of the interest that would have accrued on the mortgage during that accrual period had it not prepaid, over the interest that accrued from the beginning of that accrual period up to the date of the prepayment.

(f) *Defective obligations*—(1) *Defective obligation defined.* For purposes of sections 860G(a)(4)(B)(ii) and 860F(a)(2), a defective obligation is a mortgage subject to any of the following defects.

(i) The mortgage is in default, or a default with respect to the mortgage is reasonably foreseeable.

(ii) The mortgage was fraudulently procured by the mortgagor.

(iii) The mortgage was not in fact principally secured by an interest in real property within the meaning of paragraph (a)(1) of this section.

(iv) The mortgage does not conform to a customary representation or warranty given by the sponsor or prior owner of the mortgage regarding the characteristics of the mortgage, or the characteristics of the pool of mortgages of which the mortgage is a part. A representation that payments on a qualified mortgage will be received at a rate no less than a specified minimum or no greater than a specified maximum is not customary for this purpose.

(2) *Effect of discovery of defect.* If a REMIC discovers that an obligation is a defective obligation, and if the defect is one that, had it been discovered before the startup day, would have prevented the obligation from being a qualified mortgage, then, unless the REMIC either causes the defect to be cured or disposes of the defective obligation within 90 days of discovering the defect, the obligation ceases to be a qualified mortgage at the end of that 90 day period. Even if the defect is not cured, the defective obligation is, nevertheless, a qualified mortgage from the startup day through the end of the 90 day period. Moreover, even if the REMIC holds the defective obligation beyond the 90 day period, the REMIC may, nevertheless, exchange the defective obligation for a qualified replacement mortgage so long as the requirements of section 860G(a)(4)(B) are satisfied. If the defect is one that does not affect the status of an obligation as a qualified mortgage, then the obligation is always a qualified mortgage regardless of whether the defect is or can be cured. For example, if a sponsor represented that all mortgages transferred to a REMIC had a 10 percent interest rate, but it was later discovered that one mortgage had a 9 percent interest rate, the 9 percent mortgage is defective, but the defect does not affect the status of that obligation as a qualified mortgage.

(g) *Permitted investments*—(1) *Cash flow investment*—(i) *In general.* For purposes of section 860G(a)(6) and this section, a cash flow investment is an investment of payments received on qualified mortgages for a temporary period between receipt of those payments and the regularly scheduled date for distribution of those payments to REMIC interest holders. Cash flow investments must be passive investments earning a return in the nature of interest.

(ii) *Payments received on qualified mortgages.* For purposes of paragraph (g)(1) of this section, the term ‘‘payments received on qualified mortgages’’ includes—

(A) Payments of interest and principal on qualified mortgages, including prepayments of principal and payments under credit enhancement contracts described in paragraph (c)(2) of this section;

(B) Proceeds from the disposition of qualified mortgages;

(C) Cash flows from foreclosure property and proceeds from the disposition of such property;

(D) A payment by a sponsor or prior owner in lieu of the sponsor's or prior owner's repurchase of a defective obligation, as defined in paragraph (f) of this section, that was transferred to the REMIC in breach of a customary warranty; and

(E) Prepayment penalties required to be paid under the terms of a qualified mortgage when the mortgagor prepays the obligation.

(iii) *Temporary period.* For purposes of section 860G(a)(6) and this paragraph (g)(1), a temporary period generally is that period from the time a REMIC receives payments on qualified mortgages and permitted investments to the time the REMIC distributes the payments to interest holders. A temporary period may not exceed 13 months. Thus, an investment held by a REMIC for more than 13 months is not a cash flow investment. In determining the length of time that a REMIC has held an investment that is part of a commingled fund or account, the REMIC may employ any reasonable method of accounting. For example, if a REMIC holds mortgage cash flows in a commingled account pending distribution, the first-in, first-out method of accounting is a reasonable method for determining whether all or part of the account satisfies the 13 month limitation.

(2) *Qualified reserve funds.* The term qualified reserve fund means any reasonably required reserve to provide for full payment of expenses of the REMIC or amounts due on regular or residual interests in the event of defaults on qualified mortgages, prepayment interest shortfalls (as defined in paragraph (e) of this section), lower than expected returns on cash flow investments, or any other contingency that could be provided for under a credit enhancement contract (as defined in paragraph (c) (2) and (3) of this section).

(3) *Qualified reserve asset*—(i) *In general.* The term ''qualified reserve asset'' means any intangible property (other than a REMIC residual interest) that is held both for investment and as part of a qualified reserve fund. An asset need not generate any income to be a qualified reserve asset.

(ii) *Reasonably required reserve*—(A) *In general.* In determining whether the amount of a reserve is reasonable, it is appropriate to consider the credit quality of the qualified mortgages, the extent and nature of any guarantees relating to either the qualified mortgages or the regular and residual interests, the expected amount of expenses of the REMIC, and the expected availability of proceeds from qualified mortgages to pay the expenses. To the extent that a reserve exceeds a reasonably required amount, the amount of the reserve must be promptly and appropriately reduced. If at any time, however, the amount of the reserve fund is less than is reasonably required, the amount of the reserve fund may be increased by the addition of payments received on qualified mortgages or by contributions from holders of residual interests.

(B) *Presumption that a reserve is reasonably required.* The amount of a reserve fund is presumed to be reasonable (and an excessive reserve is presumed to have been promptly and appropriately reduced) if it does not exceed—

(*1*) The amount required by a nationally recognized independent rating agency as a condition of providing the rating for REMIC interests desired by the sponsor; or

(*2*) The amount required by a third party insurer or guarantor, who does not own directly or indirectly (within the meaning of section 267(c)) an interest in the REMIC (as defined in §1.860D–1(b)(1)), as a condition of providing credit enhancement.

(C) *Presumption may be rebutted.* The presumption in paragraph (g)(3)(ii)(B) of this section may be rebutted if the amounts required by the rating agency or by the third party insurer are not commercially reasonable considering the factors described in paragraph (g)(3)(ii)(A) of this section.

(h) *Outside reserve funds.* A reserve fund that is maintained to pay expenses of the REMIC, or to make payments to REMIC interest holders is an outside reserve fund and not an asset of the REMIC only if the REMIC's organizational documents clearly and expressly—

(1) Provide that the reserve fund is an outside reserve fund and not an asset of the REMIC;

(2) Identify the owner(s) of the reserve fund, either by name, or by description of the class (*e.g.*, subordinated regular interest holders) whose membership comprises the owners of the fund; and

(3) Provide that, for all Federal tax purposes, amounts transferred by the REMIC to the fund are treated as amounts distributed by the REMIC to

the designated owner(s) or transferees of the designated owner(s).

(i) *Contractual rights coupled with regular interests in tiered arrangements*—(1) *In general.* If a REMIC issues a regular interest to a trustee of an investment trust for the benefit of the trust certificate holders and the trustee also holds for the benefit of those certificate holders certain other contractual rights, those other rights are not treated as assets of the REMIC even if the investment trust and the REMIC were created contemporaneously pursuant to a single set of organizational documents. The organizational documents must, however, require that the trustee account for the contractual rights as property that the trustee holds separate and apart from the regular interest.

(2) *Example.* The following example, which describes a tiered arrangement involving a pass-thru trust that is intended to qualify as a REMIC and a pass-thru trust that is intended to be classified as a trust under §301.7701–4(c) of this chapter, illustrates the provisions of paragraph (i)(1) of this section.

Example. (i) A sponsor transferred a pool of mortgages to a trustee in exchange for two classes of certificates. The pool of mortgages has an aggregate principal balance of $100*x*. Each mortgage in the pool provides for interest payments based on the eleventh district cost of funds index (hereinafter COFI) plus a margin. The trust (hereinafter REMIC trust) issued a Class N bond, which the sponsor designates as a regular interest, that has a principal amount of $100*x* and that provides for interest payments at a rate equal to One-Year LIBOR plus 100 basis points, subject to a cap equal to the weighted average pool rate. The Class R interest, which the sponsor designated as the residual interest, entitles its holder to all funds left in the trust after the Class N bond has been retired. The Class R interest holder is not entitled to current distributions.

(ii) On the same day, and under the same set of documents, the sponsor also created an investment trust. The sponsor contributed to the investment trust the Class N bond together with an interest rate cap contract. Under the interest rate cap contract, the issuer of the cap contract agrees to pay to the trustee for the benefit of the investment trust certificate holders the excess of One-Year LIBOR plus 100 basis points over the weighted average pool rate (COFI plus a margin) times the outstanding principal balance of the Class N bond in the event One-Year LIBOR plus 100 basis points ever exceeds the weighted average pool rate. The trustee (the same institution that serves as REMIC trust trustee), in exchange for the contributed assets, gave the sponsor certificates representing undivided beneficial ownership interests in the Class N bond and the interest rate cap contract. The organizational documents require the trustee to account for the regular interest and the cap contract as discrete property rights.

(iii) The separate existence of the REMIC trust and the investment trust are respected for all Federal income tax purposes. Thus, the interest rate cap contract is an asset beneficially owned by the several certificate holders and is not an asset of the REMIC trust. Consequently, each certificate holder must allocate its purchase price for the certificate between its undivided interest in the Class N bond and its undivided interest in the interest rate cap contract in accordance with the relative fair market values of those two property rights.

(j) *Clean-up call*—(1) *In general.* For purposes of section 860F(a)(5)(B), a clean-up call is the redemption of a class of regular interests when, by reason of prior payments with respect to those interests, the administrative costs associated with servicing that class outweigh the benefits of maintaining the class. Factors to consider in making this determination include—

(i) The number of holders of that class of regular interests;

(ii) The frequency of payments to holders of that class;

(iii) The effect the redemption will have on the yield of that class of regular interests;

(iv) The outstanding principal balance of that class; and

(v) The percentage of the original principal balance of that class still outstanding.

(2) *Interest rate changes.* The redemption of a class of regular interests undertaken to profit from a change in interest rates is not a clean-up call.

(3) *Safe harbor.* Although the outstanding principal balance is only one factor to consider, the redemption of a class of regular interests with an outstanding principal balance of no more than 10 percent of its original principal balance is always a clean-up call.

(k) *Startup day.* The term ‘‘startup day’’ means the day on which the REMIC issues all of its regular and residual interests. A sponsor may, however, contribute property to a REMIC in exchange for regular and residual interests over any period of 10 consecutive days and the REMIC may designate any one of those 10 days as its startup day. The day so designated is then the startup day, and all interests are treated as issued on that day.

[T.D. 8458, 57 FR 61309, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993]

§1.860G–3 Treatment of foreign persons.

(a) *Transfer of a residual interest with tax avoidance potential*—(1) *In general.* A transfer of a residual interest that has tax avoidance potential is disregarded for all Federal tax purposes if the transferee is a foreign person. Thus, if a residual interest with tax avoidance potential is transferred to a foreign holder at formation of the REMIC, the sponsor is liable for the tax on any excess inclusion that accrues with respect to that residual interest.

(2) *Tax avoidance potential*—(i) *Defined.* A residual interest has tax avoidance potential for purposes of this section unless, at the time of the transfer, the transferor reasonably expects that, for each excess inclusion, the REMIC will distribute to the transferee residual interest holder an amount that will equal at least 30 percent of the excess inclusion, and that each such amount will be distributed at or after the time at which the excess inclusion accrues and not later than the close of the calendar year following the calendar year of accrual.

(ii) *Safe harbor.* For purposes of paragraph (a)(2)(i) of this section, a transferor has a reasonable expectation if the 30-percent test would be satisfied were the REMIC's qualified mortgages to prepay at each rate within a range of rates from 50 percent to 200 percent of the rate assumed under section 1272(a)(6) with respect to the qualified mortgages (or the rate that would have been assumed had the mortgages been issued with original issue discount).

(3) *Effectively connected income.* Paragraph (a)(1) of this section will not apply if the transferee's income from the residual interest is subject to tax under section 871(b) or section 882.

(4) *Transfer by a foreign holder.* If a foreign person transfers a residual interest to a United States person or a foreign holder in whose hands the income from a residual interest would be effectively connected income, and if the transfer has the effect of allowing the transferor to avoid tax on accrued excess inclusions, then the transfer is disregarded and the transferor continues to be treated as the owner of the residual interest for purposes of section 871(a), 881, 1441, or 1442.

(b) [Reserved]

[T.D. 8458, 57 FR 61313, Dec. 24, 1992]

TAX BASED ON INCOME FROM SOURCES WITHIN OR WITHOUT THE UNITED STATES

DETERMINATION OF SOURCES OF INCOME

§1.861–1 Income from sources within the United States.

(a) *Categories of income.* Part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder determine the sources of income for purposes of the income tax. These sections explicitly allocate certain important sources of income to the United States or to areas outside the United States, as the case may be; and, with respect to the remaining income (particularly that derived partly from sources within and partly from sources without the United States), authorize the Secretary or his delegate to determine the income derived from sources within the United States, either by rules of separate allocation or by processes or formulas of general apportionment. The statute provides for the following three categories of income:

(1) *Within the United States.* The gross income from sources within the United States, consisting of the items of gross income specified in section 861(a) plus the items of gross income allocated or apportioned to such sources in accordance with section 863(a). See §§1.861–2 to 1.861–7, inclusive, and §1.863–1. The taxable income from sources within the United States, in the case of such income, shall be determined by deducting therefrom, in accordance with sections 861(b) and 863(a), the expenses, losses, and other deductions properly apportioned or allocated thereto and a ratable part of any other expenses, losses, or deductions which cannot definitely

be allocated to some item or class of gross income. See §§ 1.861–8 and 1.863–1.

(2) *Without the United States.* The gross income from sources without the United States, consisting of the items of gross income specified in section 862(a) plus the items of gross income allocated or apportioned to such sources in accordance with section 863(a). See §§ 1.862–1 and 1.863–1. The taxable income from sources without the United States, in the case of such income, shall be determined by deducting therefrom, in accordance with sections 862(b) and 863(a), the expenses, losses, and other deductions properly apportioned or allocated thereto and a ratable part of any other expenses, losses, or deductions which cannot definitely be allocated to some item or class of gross income. See §§ 1.862–1 and 1.863–1.

(3) *Partly within and partly without the United States.* The gross income derived from sources partly within and partly without the United States, consisting of the items specified in section 863(b) (1), (2), and (3). The taxable income allocated or apportioned to sources within the United States, in the case of such income, shall be determined in accordance with section 863 (a) or (b). See §§ 1.863–2 to 1.863–5, inclusive.

(4) *Exceptions.* An owner of certain aircraft or vessels first leased on or before December 28, 1980, may elect to treat income in respect of these aircraft or vessels as income from sources within the United States for purposes of sections 861(a) and 862(a). See § 1.861–9. An owner of certain aircraft, vessels, or spacecraft first leased after December 28, 1980, must treat income in respect of these craft as income from sources within the United States for purposes of sections 861(a) and 862(a). See § 1.861–9A.

(b) *Taxable income from sources within the United States.* The taxable income from sources within the United States shall consist of the taxable income described in paragraph (a)(1) of this section plus the taxable income allocated or apportioned to such sources, as indicated in paragraph (a)(3) of this section.

(c) *Computation of income.* If a taxpayer has gross income from sources within or without the United States, together with gross income derived partly from sources within and partly from sources without the United States, the amounts thereof, together with the expenses and investment applicable thereto, shall be segregated; and the taxable income from sources within the United States shall be separately computed therefrom.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7928, 48 FR 55845, Dec. 16, 1983]

§ 1.861–2 Interest.

(a) *In general.* (1) Gross income consisting of interest from the United States or any agency or instrumentality thereof (other than a possession of the United States or an agency or instrumentality of a possession), a State or any political subdivision thereof, or the District of Columbia, and interest from a resident of the United States on a bond, note, or other interest-bearing obligation issued, assumed or incurred by such person shall be treated as income from sources within the United States. Thus, for example, income from sources within the United States includes interest received on any refund of income tax imposed by the United States, a State or any political subdivision thereof, or the District of Columbia. Interest other than that described in this paragraph is not to be treated as income from sources within the United States. See paragraph (a)(7) of this section for special rules concerning substitute interest paid or accrued pursuant to a securities lending transaction.

(2) The term ‘‘resident of the United States’’, as used in this paragraph, includes (i) an individual who at the time of payment of the interest is a resident of the United States, (ii) a domestic corporation, (iii) a domestic partnership which at any time during its taxable year is engaged in trade or business in the United States, or (iv) a foreign corporation or a foreign partnership, which at any time during its taxable year is engaged in trade or business in the United States.

(3) The method by which, or the place where, payment of the interest is made is immaterial in determining whether interest is derived from sources within the United States.

(4) For purposes of this section, the term ‘‘interest’’ includes all amounts treated as interest under section 483, and the regulations thereunder. It also includes original issue discount, as defined in section 1232(b)(1), whether or not the underlying bond, debenture, note, certificate, or other evidence of indebtedness is a capital asset in the hands of the taxpayer within the meaning of section 1221.

(5) If interest is paid on an obligation of a resident of the United States by a nonresident of the United States acting in the nonresident's capacity as a guarantor of the obligation of the resident, the interest will be treated as income from sources within the United States.

(6) In the case of interest received by a nonresident alien individual or foreign corporation this paragraph (a) applies whether or not the interest is effectively connected for the taxable year with the conduct of a trade or business in the United States by such individual or corporation.

(7) A substitute interest payment is a payment, made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction, of an amount equivalent to an interest payment which the owner of the transferred security is entitled to receive during the term of the transaction. A securities lending transaction is a transfer of one or more securities that is described in section 1058(a) or a substantially similar transaction. A sale-repurchase transaction is an agreement under which a person transfers a security in exchange for cash and simultaneously agrees to receive a substantially identical securities from the transferee in the future in exchange for cash. A substitute interest payment shall be sourced in the same manner as the interest accruing on the transferred security for purposes of this section and §1.862–1. See also §§1.864–5(b)(2)(iii), 1.871–7(b)(2), 1.881–2(b)(2) and for the character of such payments and §1.894–1(c) for the application tax treaties to these transactions.

(b) *Interest not derived from U.S. sources.* Notwithstanding paragraph (a) of this section, interest shall be treated as income from sources without the United States to the extent provided by subparagraphs (A) through (H), of section 861(a)(1) and by the following subparagraphs of this paragraph.

(1) *Interest on bank deposits and on similar amounts.* (i) Interest paid or credited before January 1, 1977, to a nonresident alien individual or foreign corporation on—

(a) Deposits with persons, including citizens of the United States or alien individuals and foreign or domestic partnerships or corporations, carrying on the banking business in the United States,

(b) Deposits or withdrawable accounts with savings institutions chartered and supervised as savings and loan or similar associations under Federal or State law, or

(c) Amounts held by an insurance company under an agreement to pay interest thereon, shall be treated as income from sources without the United States if such interest is not effectively connected for the taxable year with the conduct of a trade or business in the United States by such nonresident alien individual or foreign corporation. If such interest is effectively connected for the taxable year with the conduct of a trade or business in the United States by such nonresident alien individual or foreign corporation, it shall be treated as income from sources within the United States under paragraph (a) of this section unless it is treated as income from sources without the United States under another subparagraph of this paragraph. For a special rule for determining whether such interest is effectively connected for the taxable year with the conduct of a trade or business in the United States, see paragraph (c)(1)(ii) or §1.864–4.

(ii) Paragraph (b)(1)(i)*(b)* of this section applies to interest on deposits or withdrawable accounts described therein only to the extent that the interest paid or credited by the savings institution described therein is deductible under section 591 in determining the taxable income of such institution; and, for this purpose, whether an amount is deductible under section 591 shall be determined without regard to section 265, relating to deductions allocable to tax-exempt income. Thus, for example, such subdivision does not apply to amounts paid by a savings and loan or similar association on or with respect to its nonwithdrawable capital stock or on or with respect to funds held in restricted accounts which represent a proprietary interest in such association. Paragraph (b)(1)(i)*(b)* of this section also applies to so-called dividends paid or credited on deposits or withdrawable accounts if such dividends are deductible under section 591 without reference to section 265.

(iii) For purposes of paragraph (b)(1)(i)*(c)* of this section, amounts held by an insurance company under an agreement to pay interest thereon include policyholder dividends left with the company to accumulate, prepaid insurance premiums, proceeds of policies left on deposit with the company, and overcharges of premiums. Such subdivision does not apply to *(a)* the so-called ''interest element'' in the case of annuity or installment payments under life insurance or endowment contracts or *(b)* interest paid by an insurance company to its creditors on notes, bonds, or similar evidences of indebtedness, if the debtor-creditor relationship does not arise by virtue of a contract of insurance with the insurance company.

(iv) For purposes of paragraph (b)(1)(i) of this section, interest received by a partnership shall be treated as received by each partner of such partnership to the extent of his distributive share of such item.

(2) *Interest from a resident alien individual or domestic corporation deriving substantial income from sources without the United States.* Interest received from a resident alien individual or a domestic corporation shall be treated as income from sources without the United States when it is shown to the satisfaction of the district director (or, if applicable, the Director of International Operations) that less than 20 percent of the gross income from all sources of such individual or corporation has been derived from sources within the United States, as determined under the provisions of sections 861 to 863, inclusive, and the regulations thereunder, for the 3-year period ending with the close of the taxable year of such individual or corporation preceding its taxable year in which such interest is paid or credited, or for such part of such period as may be applicable. If 20 percent or more of the gross income from all sources of such individual or corporation has been derived from sources within the United States, as so determined, for such 3-year period (or part thereof), the entire amount of the interest from such individual or corporation shall be treated as income from sources within the United States.

(3) *Interest from a foreign corporation not deriving major portion of its income from a U.S. business.* (i) Interest from a foreign corporation which, at any time during the taxable year, is engaged in trade or business in the United States shall be treated as income from sources without the United States when it is shown to the satisfaction of the district director (or, if applicable, the Director of International Operations) that *(a)* less than 50 percent of the gross income from all sources of such foreign corporation for the 3-year period ending with the close of its taxable year preceding its taxable year in which such interest is paid or credited (or for such part of such period as the corporation has been in existence) was effectively connected with the conduct by such corporation of a trade or business in the United States, as determined under section 864(c) and § 1.864–3, or *(b)* such foreign corporation had gross income for such 3-year period (or part thereof) but none was effectively connected with the conduct of a trade or business in the United States.

(ii) If 50 percent or more of the gross income from all sources of such foreign corporation for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States, see section 861(a)(1)(D) and paragraph (c)(1) of this section for determining the portion of interest from such corporation which is treated as income from sources within the United States.

(iii) For purposes of this paragraph the gross income which is effectively connected with the conduct of a trade or business in the United States includes the gross income which, pursuant to section 882 (d) or (e) and the regulations thereunder, is treated as income which is effectively connected with the conduct of a trade or business in the United States.

(iv) This paragraph does not apply to interest paid or credited after December 31, 1969, by a branch in the United States of a foreign corporation if, at the time of payment or crediting, such branch is engaged in the commercial banking business in the United States; furthermore, such interest is treated under paragraph (a) of this section as income from sources within the United States unless it is treated as income from sources without the United States under paragraph (b) (1) or (4) of this section.

(4) *Bankers' acceptances.* Interest derived by a foreign central bank of issue from bankers' acceptances shall be treated as income from sources without the United States. For this purpose, a foreign central bank of issue is a bank which is by law or government sanction the principal authority, other than the government itself, issuing instruments intended to circulate as currency. Such a bank is generally the custodian of the banking reserves of the country under whose laws it is organized.

(5) *Foreign banking branch of a domestic corporation or partnership.* Interest paid or credited on deposits with a branch outside the United States (as defined in section 7701(a)(9)) of a domestic corporation or of a domestic partnership shall be treated as income from sources without the United States, if, at the time of payment or crediting, such branch is engaged in the commercial banking business. For purposes of applying this paragraph, it is immaterial (i) whether the domestic corporation or domestic partnership is carrying on a banking business in the United States, (ii) whether the recipient of the interest is a citizen or resident of the United States, a foreign corporation, or a foreign partnership, (iii) whether the interest is effectively connected with the conduct of a trade or business in the United States by the recipient, or (iv) whether the deposits with the branch located outside the United States are payable in the currency of a foreign country. Notwithstanding the provisions of §1.863–6, interest to which this paragraph applies shall be treated as income from sources within the foreign country, possession of the United States, or other territory in which the branch is located.

(6) *Section 4912(c) debt obligations*— (i) *In general.* Under section 861(a)(1)(G), interest on a debt obligation shall not be treated as income from sources within the United States if—

(a) The debt obligation was part of an issue of debt obligations with respect to which an election has been made under section 4912(c) (relating to the treatment of such debt obligations as debt obligations of a foreign obligor for purposes of the interest equalization tax),

(b) The debt obligation had a maturity not exceeding 15 years (within the meaning of paragraph (b)(6)(ii) of this section) on the date it is originally issued or on the date it is treated under section 4912(c)(2) as issued by reason of being assumed by a certain domestic corporation,

(c) The debt obligation, when originally issued, was purchased by one or more underwriters (within the meaning of paragraph (b)(6)(iii) of this section) with a view to distribution through resale (within the meaning of paragraph (b)(6)(iv) of this section), and

(d) The interest on the debt obligation is attributable to periods after the effective date of an election under section 4912(c) to treat such debt obligations as debt obligations of a foreign obligor for purposes of the interest equalization tax.

(ii) *Maturity not exceeding 15 years.* The date the debt obligation is issued or treated as issued is not included in the 15 year computation, but the date of maturity of the debt, obligation is included in such computation.

(iii) *Purchased by one or more underwriters.* For purposes of this paragraph, the debt obligation when originally issued will not be treated as purchased by one or more underwriters unless the underwriter purchases the debt obligation for his own account and bears the risk of gain or loss on resale. Thus, for example, a debt obligation, when originally issued, will not be treated as purchased by one or more underwriters if the underwriter acts only in the capacity of an agent of the issuer. Neither will a debt obligation, when originally issued, be treated as purchased by one or more underwriters if the agreement between the underwriter and issuer is merely for a ‘‘best efforts’’ underwriting, for the purchase by the underwriter of all or a portion of the debt obligations remaining unsold at the expiration of a fixed period of time, or for any other arrangement under the terms of which the debt obligations are not purchased by the underwriter with a view to distribution through resale. The fact that an underwriter is related to the issuer will not prevent the underwriter from meeting the requirements of this paragraph. In determining whether a related underwriter meets the requirements of this paragraph consideration shall be given to whether the purchase by the underwriter of the debt obligation from the issuer for resale was effected by a transaction subject to conditions similar to those which would have been imposed between independent persons.

(iv) *With a view to distribution through resale. (a)* An underwriter who purchased a debt obligation shall be deemed to have purchased it with a view to distribution through resale if the requirements of paragraph (b)(6)(iv) *(b)* or *(c)* of this section are met.

(b) The requirements of this paragraph *(b)* is that—

(1) The debt obligation is registered, approved, or listed for trading on one or more foreign securities exchanges or foreign established securities markets within 4 months after the date on which the underwriter purchases the debt obligation, or by the date of the first interest payment on the debt obligation, whichever is later, or

(2) The debt obligation, or any substantial portion of the issue of which the debt obligation is a part, is actually traded on one or more foreign securities markets on or within 15 calendar days after the date on which the underwriter purchases the debt obligation.

For purposes of this paragraph (b)(6)(iv), a foreign established securities market includes any foreign over-the-counter market as reflected by the existence of an inter-dealer quotation system for regularly disseminating to brokers and dealers quotations of obligations by identified brokers or dealers, other than quotations prepared and distributed by a broker or dealer in the regular course of his business and containing only quotations of such broker or dealer.

(c) The requirements of this paragraph *(c)* are that, except as provided in paragraph (b)(6)(iv)*(d)* of this section, the underwriter is under no written or implied restriction imposed by the issuer with respect to whom he may resell the debt obligation and either—

(1) Within 30 calendar days after he purchased the debt obligation the underwriter or underwriters either *(i)* sold it or *(ii)* sold at least 95 percent of the face amount of the issue of which the debt obligation is a part, or

(2)(i) The debt obligation is evidenced by an instrument which, under the laws of the jurisdiction in which it is issued, is either negotiable or transferable by assignment (whether or not it is registered for trading), and *(ii)* it appears from all the relevant facts and circumstances, including any written statements or assurances made by the purchasing underwriter or underwriters, that such debt obligation was purchased with a view to distribution through resale.

(d) The requirements of paragraph (b)(6)(iv)*(c)* of this paragraph may be met whether or not the underwriter is restricted from reselling the debt obligations—

(1) To a United States person (as defined in section 7701(a)(30)) or

(2) To any particular person or persons pursuant to a restriction imposed by, or required to be met in order to comply with, United States or foreign securities or other law.

(v) *Statement with return.* Any taxpayer who is required to file a tax return and who excludes from gross income interest of the type specified in this subparagraph must comply with the requirements of paragraph (d) of this section.

(vi) *Effect of termination of IET.* If the interest equalization tax expires, the provisions of section 861(a)(1)(G) and this subparagraph shall apply to interest paid on debt obligations only with respect to which a section 4912(c) election was made.

(vii) *Definition of term underwriter.* For purposes of section 861(a)(1)(G) and this paragraph, the term ''underwriter'' shall mean any underwriter as defined in section 4919(c)(1).

(c) *Special rules*—(1) *Proration of interest from a foreign corporation deriving major portion of its income from a U.S. business.* If, after applying the first sentence of paragraph (b)(3) of this section to interest to which that paragraph applies, it is determined that the interest may not be treated as income from sources without the United States, the amount of the interest from the foreign corporation which at some time during the taxable year is engaged in trade or business in the United States which is to be treated as income from sources within the United States shall be the amount that bears the same ratio to such interest as the gross income of such foreign corporation for the 3-year period ending with the close of its taxable year preceding its taxable year in which such interest is paid or credited (or for such part of such period as the corporation has been in existence) which was effectively connected with the conduct by such corporation of a trade or business in the United States bears to its gross income from all sources for such period.

(2) *Payors having no gross income for period preceding taxable year of payment.* If the resident alien individual, domestic corporation, or foreign corporation, as the case may be, paying interest has no gross income from any source for the 3-year period (or part thereof) specified in paragraph (b) (2) or (3) of this section, or paragraph (c)(1) of this section, the 20-percent test or the 50-percent test, or the apportionment formula, as the case may be, described in such paragraph shall be applied solely with respect to the taxable year of the payor in which the interest is paid or credited. This paragraph applies whether the lack of gross income for the 3-year period (or part thereof) stems from the business inactivity of the payor, from the fact that the payor is a corporation which is newly created or organized, or from any other cause.

(3) *Transitional rule.* For purposes of applying paragraph (b)(3) of this section, and paragraph (c)(1) of this section, the gross income of the foreign corporation for any period before the first taxable year beginning after December 31, 1966, which is from sources within the United States (determined as provided by sections 861 through 863, and the regulations thereunder, as in effect immediately before amendment by section 102 of the Foreign Investors Tax Act of 1966 (Pub. L. 89–809, 80 Stat. 1541)) shall be treated as gross income for such period which is effectively connected with the conduct of a trade or business in the United States by such foreign corporation.

(4) *Gross income determinations.* In making determinations under paragraph (b) (2) or (3) of this section, or paragraph (c) (1) or (3) of this section—

(i) The gross income of a domestic corporation or a resident alien individual is to be determined by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(ii) The gross income of a foreign corporation which is effectively connected with the conduct of a trade or business in the United States is to be determined under section 882(b)(2) and by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(iii) The gross income from all sources of a foreign corporation is to be determined without regard to section 882(b) and without excluding any items otherwise specifically excluded from gross income under chapter 1 of the Code.

(d) *Statement with return.* Any taxpayer who is required to file a return and applies any provision of this section to exclude an amount of interest from his gross income must file with his return a statement setting forth the amount so excluded, the date of its receipt, the name and address of the obligor of the interest, and, if known, the location of the records which substantiate the amount of the exclusion. A statement from the obligor setting forth such information and indicating the amount of interest to be treated as income from sources without the United States may be used for this purpose. See §§1.6012–1(b)(1)(i) and 1.6012–2(g)(1)(i).

(e) *Effective dates.* Except as otherwise provided, this section applies with respect to taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, (see 26 CFR part 1 revised April 1, 1971). Paragraph (a)(7) of this section is applicable to payments made after November 13, 1997.

[T.D. 7378, 40 FR 45429, Oct. 2, 1975; 40 FR 48508, Oct. 16, 1975, as amended by T.D. 8257, 54 FR 31819, Aug. 2, 1989; T.D. 8735, 62 FR 53500, Oct. 14, 1997]

§ 1.861–3 Dividends.

(a) *General*—(1) *Dividends included in gross income.* Gross income from sources within the United States includes a dividend described in subparagraph (2), (3), (4), or (5) of this paragraph. For purposes of subparagraphs (2), (3), and (4) of this paragraph, the term ''dividend'' shall have the same meaning as set forth in section 316 and the regulations thereunder. See subparagraph (5) of this paragraph for special rules with respect to certain dividends from a DISC or former DISC. See also paragraph (a)(6) of this section for special rules concerning substitute dividend payments received pursuant to a securities lending transaction.

(2) *Dividend from a domestic corporation.* A dividend described in this subparagraph is a dividend from a domestic corporation other than a domestic corporation entitled to the benefits of section 931, and other than a domestic corporation less than 20 percent of the gross income of which is shown to the satisfaction of the district director (or, if applicable, the Director of International Operations) to have been derived from sources within the United States, as determined under the provisions of sections 861 to 864, inclusive, and the regulations thereunder, for the 3-year period ending with the close of the taxable year of such corporation preceding the declaration of such dividend, or for such part of such period as the corporation has been in existence. See subparagraph (5) of this paragraph for the treatment of certain dividends from a DISC or former DISC.

(3) *Dividend from a foreign corporation*—(i) *In general. (a)* A dividend described in this subparagraph is a dividend from a foreign corporation (other than a dividend to which subparagraph (4) of this paragraph applies) unless less than 50 percent of the gross income from all sources of such foreign corporation for the 3-year period ending with the close of its taxable year preceding the taxable year in which occurs the declaration of such dividend (or for such part of such period as the corporation has been in existence) was effectively connected with the conduct by such corporation of a trade or business in the United States, as determined under section 864(c) and § 1.864–3. Thus, no portion of a dividend from a foreign corporation shall be treated as income from sources within the United States under section 861(a)(2)(B) if less than 50 percent of the gross income of such foreign corporation from all sources for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States or if such foreign corporation had gross income for such 3-year period (or part thereof) but none was effectively connected with the conduct by such corporation of a trade or business in the United States.

(b) If 50 percent or more of the gross income from all sources of such foreign corporation for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States, the amount of the dividend which is to be treated as income from sources within the United States under section 861(a)(2)(B) shall be the amount that bears the same ratio to such dividend as the gross income of such foreign corporation for such 3-year period (or part thereof) which was effectively connected with the conduct by such corporation of a trade or business in the United States bears to its gross income from all sources for such period.

(c) For purposes of this subdivision (i), the gross income which is effectively connected with the conduct of a trade or business in the United States includes the gross income which, pursuant to section 882 (d) or (e), is treated as income which is effectively connected with the conduct of a trade or business in the United States.

(ii) *Rule applicable in applying limitation on amount of foreign tax credit.* For purposes of determining under section 904 the limitation upon the amount of the foreign tax credit—

(a) So much of a dividend from a foreign corporation as exceeds (and only to the extent it so exceeds) the amount which is 100/85ths of the amount of the deduction allowable under section 245(a) in respect of such dividend, plus

(b) An amount which bears the same proportion to any section 78 dividend to which the dividend from the foreign corporation gives rise as the amount of the excess determined under *(a)* of this subdivision bears to the total amount of the dividend from the foreign corporation, shall, notwithstanding subdivision (i) of this subparagraph, be treated as income from sources without the United States. This subdivision applies to a dividend for which no dividends-received deduction is allowed under section 245 or for which the 85 percent dividends-received deduction is allowed under section 245(a) but does not apply to a dividend for which a deduction is allowable under section 245(b). All of a dividend for which the 100 percent dividends-received deduction is allowed under section 245(b) shall be treated as income from sources within the United States for purposes of determining under section 904 the limitation upon the amount of the foreign tax credit. If the amount of a distribution of property other than money (constituting a dividend under section 316) is determined by applying section 301(b)(1)(C), such amount must be used as the dividend for purposes of applying *(a)* of this subdivision even though the amount used for purposes of section 245(a) is determined by applying section 301(b)(1)(D). In making determinations under this subdivision, a dividend (other than a section 78 dividend referred to in *(b)* of this subdivision) shall be determined without regard to section 78.

(iii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. D, a domestic corporation, owns 80 percent of the outstanding stock of M, a foreign manufacturing corporation. M, which makes its returns on the basis of the calendar year, has earnings and profits of $200,000 for 1971 and 60 percent of its gross income for that year is effectively connected for 1971 with the conduct of a trade or business in the United States. For an uninterrupted period of 36 months ending on December 31, 1970, M has been engaged in trade or business in the United States and has received gross income effectively connected with the conduct of a trade or business in the United States amounting to 60 percent of its gross income from all sources for such period. The only distribution by M to D for 1971 is a cash dividend of $100,000; of this amount, $60,000 ($100,000×60%) is treated under subdivision (i) of this subparagraph as income from sources within the United States, and $40,000 ($100,000−$60,000) is treated under §1.862–1(a)(2) as income from sources without the United States. Accordingly, under section 245(a), D is entitled to a dividends-received deduction of $51,000 ($60,000×85%), and under subdivision (ii) of this subparagraph $40,000 ($100,000−[$51,000×100/85]) is treated as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

Example 2. (a) The facts are the same as in example (1) except that the distribution for 1971 consists of property which has a fair market value of $100,000 and an adjusted basis of $30,000 in M's hands immediately before the distribution. The amount of the dividend under section 316 is $58,000, determined by applying secton 301(b)(1)(C) as follows:

Portion of adjusted basis of property attributable to gross income of M effectively connected for 1971 with conduct of trade or business in United States ($30,000×60%)	$18,000
Portion of fair market value of property attributable to gross income of M not effectively connected for 1971 with conduct of trade or business in United States ($100,000×40%)	40,000
Total dividend	58,000

(b) Of the total dividend, $34,800 ($58,000×60% (percentage applicable to 3-year period)) is treated under subdivision (i) of this subparagraph as income from sources within the United States, and $23,200 ($58,000×40%) is treated under §1.862–1(a)(2) as income from sources without the United States. However, by reason of section 245(c) the adjusted basis of the property ($30,000) is used under section 245(a) in determining the dividends-received deduction. Thus, under section 245(a), D is entitled to a dividends-received deduction of $15,300 ($30,000×60%×85%).

(c) Under subdivision (ii) of this subparagraph, the amount of the dividend for purposes of applying *(a)* of that subdivision is the amount ($58,000) determined by applying section 301(b)(1)(C) rather than the amount ($30,000) determined by applying section 301(b)(1)(B). Accordingly, under subdivision (ii) of this subparagraph $40,000 ($58,000−[$15,300×100/85]) is treated as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

Example 3. (a) D, a domestic corporation which makes its returns on the basis of the calendar year, owns 100 percent of the outstanding stock of N, a foreign corporation which is not a less developed country corporation under section 902(d). N, which makes its returns on the basis of the calendar year, has total gross income for 1971 of $100,000, of which $80,000 (including $60,000 from sources within foreign country X) is effectively connected for that year with the conduct of a trade or business in the United States. For 1971 N is assumed to have paid $27,000 of income taxes to country X and to have accumulated profits of $81,000 for purposes of section 902(c)(1)(A). N's accumulated profits in excess of foreign income taxes amount to $54,000. For 1971 D receives a cash dividend of $42,000 from N, which is D's only income for that year.

(b) For 1971 D chooses the benefits of the foreign tax credit under section 901, and as a result is required under section 78 to include in gross income an amount equal to the foreign income taxes of $21,000 ($27,000×$42,000/$54,000) it is deemed to have paid under section 902(a)(1). Thus, assuming no other deductions for the taxable year, D has gross income of $63,000 ($42,000+$21,000) for 1971 less a dividends-received deduction under section 245(a) of $28,560 ([$42,000×$80,000/$100,000]×85%), or taxable income for 1971 of $34,440.

(c) Under subdivision (ii) of this subparagraph, for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit, $12,600 is treated as income from sources without the United States, determined as follows:

Excess of dividend from N over amount which is 100/85ths of amount of sec. 245(a) deduction ($42,000 − [$28,560× 100/85])	$8,400
Proportionate part of sec. 78 dividend ($21,000×$8,400/$42,000)	4,200
Taxable income from sources without the United States	12,600

Example 4. A, an individual citizen of the United States who makes his return on the basis of the calendar year, receives in 1971 a cash dividend of $10,000 from M, a foreign corporation, which makes its return on the basis of the calendar year. For the 3-year period ending with 1970 M has been engaged in trade or business in the United States and has received gross income effectively connected with the conduct of a trade or business in the United States amounting to 80 percent of its gross income from all sources for such period. Of the total dividend, $8,000 ($10,000×80%) is treated under subdivision (i) of this subparagraph as income from sources within the United States and $2,000 ($10,000 − $8,000) is treated under § 1.862–1(a)(2) as income from sources without the United States. Since under section 245 no dividends received-deduction is allowable to an individual, A is entitled under subdivision (ii) of this subparagraph to treat the entire dividend of $10,000 ($10,000 − [$0×100/85]) as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

(4) *Dividend from a foreign corporation succeeding to earnings of a domestic corporation.* A dividend described in this subparagraph is a dividend from a foreign corporation, if such dividend is received by a corporation after December 31, 1959, but only to the extent that such dividend is treated by such recipient corporation under the provisions of § 1.243–3 as a dividend from a domestic corporation subject to taxation under chapter 1 of the Code. To the extent that this subparagraph applies to a dividend received from a foreign corporation, subparagraph (3) of this paragraph shall not apply to such dividend.

(5) *Certain dividends from a DISC or former DISC*—(i) *General rule.* A dividend described in this subparagraph is a dividend from a corporation that is a DISC or former DISC (as defined in section 992(a)) other than a dividend that—

(*a*) Is deemed paid by a DISC, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) to the extent provided in subdivision (iii) of this subparagraph or

(b) Reduces under § 1.996–3(b)(3) accumulated DISC income (as defined in subdivision (ii)*(b)* of this subparagraph) to the extend provided in subdivision (iv) of this subparagraph.

Thus, a dividend deemed paid under section 995(b)(1) (A), (B), or (C) (relating to certain deemed distributions in qualified years) will be treated in full as gross income from sources within the United States. To the extent that a dividend from a DISC or former DISC is paid out of other earnings and profits (as defined in § 1.996–3(d)), subparagraph (2) of this paragraph shall apply. To the extent that a dividend from a DISC or former DISC is paid out of previously taxed income (as defined in § 1.996–3(c)), see section 996(a)(3) (relating to the exclusion from gross income of amounts distributed out of previously taxed income). In determining the source of income of certain dividends from a DISC or former DISC, the source of income from any transaction which gives rise to gross receipts (as defined in §1.993–6), in the hands of the DISC or former DISC, is immaterial.

(ii) *Definitions.* For purposes of this subparagraph, the term—

(a) ''Dividend from'' means any amount actually distributed which is a dividend within the meaning of section 316 (including distributions to meet qualification requirements under section 992(c)) and any amount treated as a distribution taxable as a dividend pursuant to section 995(b) (relating to deemed distributions in qualified years or upon disqualification) or included in gross income as a dividend pursuant to section 995(c) (relating to gain on certain dispositions of stock in a DISC or former DISC), and

(b) ''Accumulated DISC income'' means the amount of accumulated DISC income as of the close of the taxable year immediately preceding the taxable year in which the dividend was made increased by the amount of DISC income for the taxable year in which the dividend was made (as determined under §1.996–3(b)(2)).

(*c*) ''Nonqualified export taxable income'' means the taxable income of a DISC from any transaction which gives rise to gross receipts (as defined in §1.993–6) which are not qualified export receipts (as defined in §1.993–1) other than a transaction giving rise to gain described in section 995(b)(1) (B) or (C). For purposes of subdivisions (i)*(b)* and (iv) of this subparagraph, if by reason of section 995(c), gain is included in the shareholder's gross income as a dividend, accumulated DISC income shall be treated as if it were reduced under §1.996–3(b)(3).

(iii) *Determination of source of income for deemed distributions, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F). (a*) If for its taxable year a DISC does not have any nonqualified export taxable income, then for such year the entire amount treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) as a deemed distribution taxable as a dividend will be treated as gross income from sources without the United States.

(*b*) If for its taxable year a DISC has any nonqualified export taxable income, then for such year the portion of the amount treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) as a deemed distribution taxable as a dividend that will be treated as income from sources within the United States shall be equal to the amount of such nonqualified export taxable income multiplied by the following fraction. The numerator of the fraction is the sum of the amounts treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) as deemed distributions taxable as dividends. The denominator of the fraction is the taxable income of the DISC for the taxable year, reduced by the amounts treated under section 995(b)(1) (A), (B), and (C) as deemed distributions taxable as dividends. However, in no event shall the numerator exceed the denominator. The remainder of such dividend will be treated as gross income from sources without the United States.

(iv) *Determination of source of income for dividends that reduce accumulated DISC income. (a)* If no portion of the accumulated DISC income of a DISC or former DISC is attributable to nonqualified export taxable income from any transaction during a year for which it is (or is treated as) a DISC, then the entire amount of any dividend that reduces under §1.996–3(b)(3) accumulated DISC income will be treated as income from sources without the United States.

(*b*) If any portion of the accumulated DISC income of a DISC or former DISC is attributable to nonqualified export taxable income from any transaction during a year for which it is (or is treated as) a DISC, then the portion of any dividend during its taxable year that reduces under § 1.996–3(b)(3) accumulated DISC income that will be treated as income from sources within the United States shall be equal to the amount of such dividend multiplied by a fraction (determined as of the close of such year) the numerator of which is the amount of accumulated DISC income attributable to nonqualified export taxable income, and the denominator of which is the total amount of accumulated DISC income. The remainder of such dividend will be treated as gross income from sources without the United States.

(v) *Special rules.* For purposes of subdivisions (iii) and (iv) of this subparagraph—

(a) Taxable income shall be determined under § 1.992–3(b)(2)(i) (relating to the computation of deficiency distribution), and

(*b*) The portion of any deemed distribution taxable as a dividend, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1)(D), (E), and (F) or amount under § 1.996–3(b)(3) (i) through (iv) that is treated as gross income from sources within the United States during the taxable year shall be considered to reduce the amount of nonqualified export taxable income as of the close of such year.

(vi) *Illustrations.* This subparagraph may be illustrated by the following examples:

Example 1. (a) Y is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. X is its sole shareholder. In 1973, Y has $18,000 of taxable income from qualified export receipts (none of which are interest and gains described in section 995(b)(1)(A), (B), and (C)) and $1,000 of nonqualified export taxable income. Under these facts, X is deemed to have received a distribution under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, of $9,500, *i.e.*, $19,000 X ½. X is treated under subdivision (iii)(*b*) of this subparagraph as having $500, *i.e.*, $1,000 X $9,500/ $19,000, from sources within the United States and $9,000 from sources without the United States.

(b) For 1972, assume that Y did not have any nonqualified export taxable income. Pursuant to subdivision (v)*(b)* of this subparagraph, at the beginning of 1974, $500 of Y's accumulated DISC income is attributable to nonqualified export taxable income (iii)*(a)* of this subparagraph), i.e., $1,000—$500.

Example 2. The facts are the same as in example (1) except that in 1973, in addition to the taxable income described in such example, Y has $450 of taxable income from gross interest from producer's loans described in section 995(b)(1)(A). Under these facts, the deemed distribution of $450 under section 995(b)(1)(A) is treated in full under subdivision (i) of this subparagraph as gross income from sources within the United States. The deemed distribution under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, of $9,500 will be treated in the same manner as in example (1), *i.e.*, $1,000 X $9,500/($19,450 − $450).

Example 3. (a) The facts are the same as in example (1) except that in 1973, in addition to the distribution described in such example, Y makes a deemed distribution taxable as a dividend of $100 under section 995(b)(1)(G) (relating to foreign investment attributable to producer's loans) and actual distributions of all of its previously taxed income and of $2,000 taxable as a dividend which reduces accumulated DISC income (as defined in subdivision (ii)(*b*) of this subparagraph). Under § 1.996–3(b)(3), accumulated DISC income is first reduced by the deemed distribution of $100 and then by the actual distribution taxable as a dividend of $2,000. As indicated in example (1), for 1972 Y did not have any nonqualified export taxable income. Assume that Y had accumulated DISC income of $12,000 at the end of 1973, $500 of which under example (1) is attributable to nonqualified export taxable income.

(b) The distribution from previously taxed income is excluded from gross income pursuant to section 996(a)(3).

(c) Of the deemed distribution of $100, X is treated under subdivision (iv)*(b)* as having $4.17, i.e., $100×500/12,000, from sources within the United States and $95.83, i.e., $100—$4.17, from sources without the United States.

(d) Of the actual distribution taxable as a dividend of $2,000, X is treated under subdivision (iv)*(b)* as having $83.33, i.e., $2,000×500/ 12,000, from sources within the United States and $1,916.67, i.e., $2,000—$83.33, from sources without the United States.

(e) The sum of the amounts deemed and actually distributed as dividends for 1973 that are treated as gross income from sources within the United States is as follows:

	Total dividend	Amount of dividend from sources within the United States
Deemed distribution under sec. 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976	$9,500	$500.00
Deemed distribution under section 995(b)(1)(G)	100	4.17
Actual distribution that reduces accumulated DISC income	2,000	83.33
Totals	$11,600	$587.50

Thus, pursuant to subdivision (v)(*b*) of this subparagraph, at the beginning of 1974 Y has $412.50, *i.e.*, $1,000—$587.50, of nonqualified export taxable income.

(f) The result would be the same if Y made an actual distribution taxable as a dividend of $1,500 on March 30, 1973, and another distribution of $500 on December 31, 1973.

Example 4. (a) Z is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. W is its sole shareholder. At the end of the 1976 Z has previously taxed income of $12,000 and accumulated DISC income of $4,000, $900 of which is attributable to nonqualified export taxable income. In 1977, Z has $20,050 of taxable income from qualified export receipts, of which $550 is from gross income from producer's loans described in section 995(b)(1)(A); Z has $950 of taxable income giving rise to gross receipts which are not qualified export receipts, of which $450 is gain described in section 995(b)(1)(B). Of its total taxable income of $21,000 (which is equal to its earnings and profits for 1977), $1,000 is attributable to sales of military property. Z has an international boycott factor (determined under section 999) of .10, and made an illegal bribe (within the meaning of section 162(c)) of $1,265. The proportion which the amount of Z's adjusted base period export receipts bears to Z's export gross receipts for 1977 is .40 (see section 995(e)(1)). Z makes a deemed distribution taxable as a dividend of $1,000 under section 995(b)(1)(G) (relating to foreign investment attributable to producer's loans) and actual distributions of $32,000.

(b) The deemed distributions of $550 under section 995(b)(1)(A) and $450 under section 995(b)(1)(B) are treated in full under subdivision (i) of this subparagraph as gross income from sources within the United States.

(c) Under these facts, Z has also made the following deemed distributions taxable as dividends to W under the following subdivisions of section 995(b)(1):

(D)	$500,	*i.e.*, ½×$1,000.
(E)	7,800,	*i.e.*,.40×[$21,000–$(550+450+500)].
(F)(i)	5,850,	*i.e.*, ½×[$21,000–$550+450+500+ 7,800)].
(ii)	585,	*i.e.*, $5,850×.10
(iii)	1,265	
Total	16,000	

(d) The portion of the total amount of these deemed distributions ($16,000 that is treated under the subdivision (iii)(*b*) as gross income from sources within the United States is computed as follows:

(1) The amount of nonqualified export taxable income is $500, i.e., taxable income giving rise to gross receipts which are not qualified export receipts ($950) minus gain described in section 995(b)(1) (B) or (C) ($450).

(2) $500×($16,000/$[21,000–(550+450)]) =$400.

The remainder of these distributions, $15,600 ($16,000 minus $400), is treated under subdivision (iii)(*b*) of this subparagraph as gross income from sources without the United States.

(e) The earnings and profits accounts of Z at the end of 1977 are computed as follows:

	Total earnings and profits	Previously taxed income	Accumulated DISC income attributable to taxable income from translations which give rise to gross receipts which—	
			Are qualified export receipts	Are not qualified export receipts
(1) Balance: January 1, 1977	$16,000	$12,000	$3,100	$900
(2) Earnings and profits for 1977, before actual and section 955(b)(1)(G) distributions	21,000	17,000	3,900	[1] 100
(3) Balance: December 31, 1977	37,000	29,000	7,000	1,000
(4) Distribution under section 995(b)(1)(G)		1,000	(875)	[2] (125)
(5) Balance	37,000	30,000	6,125	875
(6) Actual distribution	(32,000)	(30,000)	(1,750)	[3] (250)
(7) Balance: January 1, 1978	5,000		4,375	625

[1] The total of nonqualified export taxable income ($500) minus the portion of such income, under subdivision (iii)(*b*) of this subparagraph, deemed distributed pursuant to section 995(b)(1)(D), (E), and (F) ($400), as computed under (d)(2) of this example.

[2] Under subdivision (iv)(*b*) of this subparagraph, $1,000/$8,000×$1,000.

[3] Under subdivision (iv)(*b*) of this subparagraph, $1,000/$8,000×$2,000 (amount of actual distribution that reduces accumulated DISC income).

(6) *Substitute dividend payments.* A substitute dividend payment is a payment, made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction, of an amount equivalent to a dividend distribution which the owner of the transferred security is entitled to receive during the term of the transaction. A securities lending transaction is a transfer of one or more securities that is described in section 1058(a) or a substantially similar transaction. A sale-repurchase transaction is an agreement under which a person transfers a security in exchange for cash and simultaneously agrees to receive substantially identical securities from the transferee in the future in exchange for cash. A substitute dividend payment shall be sourced in the same manner as the distributions with respect to the transferred security for purposes of this section and § 1.862–1. See also §§ 1.864–5(b)(2)(iii), 1.871–7(b)(2) and 1.881–2(b)(2) for the character of such payments and § 1.894–1(c) for the application of tax treaties to these transactions.

(b) *Special rules*—(1) *Foreign corporation having no gross income for period preceding declaration of dividend.* If the foreign corporation has no gross income from any source for the 3-year period (or part thereof) specified in paragraph (a)(3)(i) of this section, the 50-percent test, or the apportionment formula, as the case may be, described in such paragraph shall be applied solely with respect to the taxable year of such corporation in which the declaration of the dividend occurs. This subparagraph applies whether the lack of gross income for the 3-year period (or part thereof) stems from the business inactivity of the foreign corporation, from the fact that such corporation is newly created or organized, or from any other cause.

(2) *Transitional rule.* For purposes of applying paragraph (a)(3)(i) of this section, the gross income of the foreign corporation for any period before the first taxable year beginning after December 31, 1966, which is from sources within the United States (determined as provided by sections 861 through 863, and the regulations thereunder, as in effect immediately before amendment by section 102 of the Foreign Investors Tax Act of 1966 (Pub. L. 89–809, 80 Stat. 1541)) shall be treated as gross income for such period which is effectively connected with the conduct of a trade or business within the United States by such foreign corporation.

(3) *Gross income determinations.* In making determinations under subparagraph (2) or (3) of paragraph (a) of this section, or subparagraph (2) of this paragraph—

(i) The gross income of a domestic corporation is to be determined by excluding any items specifically excluded from gross income under chapter 1 of the Code.

(ii) The gross income of a foreign corporation which is effectively connected with the conduct of a trade or business in the United States is to be determined under section 882(b)(2) and by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(iii) The gross income from all sources of a foreign corporation is to be determined without regard to section 882(b) and without excluding any items otherwise specifically excluded from gross income under chapter 1 of the Code.

(c) *Statement with return.* Any taxpayer who is required to file a return and applies any provision of this section to exclude any dividend from his gross income must file with his return a statement setting forth the amount so excluded, the date of its receipt, the name and address of the corporation paying the dividend, and, if known, the location of the records which substantiate the amount of the exclusion. A statement from the paying corporation setting forth such information and indicating the amount of the dividend to be treated as income from sources within the United States may be used for this purpose. See §§ 1.6012–1(b)(1)(i) and 1.6012–2 (g)(1)(i).

(d) *Effective date.* Except as otherwise provided in this paragraph this section applies with respect to dividends received or accrued after December 31,

1966. Paragraph (a)(5) of this section applies to certain dividends from a DISC or former DISC in taxable years ending after December 31, 1971. Paragraph (a)(6) of this section is applicable to payments made after November 13, 1997. For purposes of paragraph (a)(5) of this section, any reference to a distribution taxable as a dividend under section 995(b)(1)(F) (ii) and (iii) for taxable years beginning after December 31, 1975, shall also constitute a reference to any distribution taxable as a dividend under section 995(b)(1)(F) (ii) and (iii) for taxable years beginning after November 30, 1975, but before January 1, 1976. For corresponding rules applicable with respect to dividends received or accrued before January 1, 1967, see 26 CFR 1.861–3 (Revised as of January 1, 1972).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6830, 30 FR 8046, June 23, 1965; T.D. 7378, 40 FR 45432, Oct. 2, 1975; 40 FR 48508, Oct. 16, 1975; T.D. 7472, 42 FR 12179, Mar. 3, 1977; T.D. 7591, 44 FR 5116, Jan. 25, 1979; T.D. 7854, 47 FR 51738, Nov. 17, 1982; T.D. 8735, 62 FR 53501, Oct. 14, 1997]

§1.861–4 Compensation for labor or personal services.

(a) *In general.* (1) Gross income from sources within the United States includes compensation for labor or personal services performed in the United States irrespective of the residence of the payer, the place in which the contract for service was made, or the place or time of payment; except that such compensation shall be deemed not to be income from sources within the United States, if—

(i) The labor or services are performed by a nonresident alien individual temporarily present in the United States for a period or periods not exceeding a total of 90 days during his taxable year,

(ii) The compensation for such labor or services does not exceed in the aggregate a gross amount of $3,000, and

(iii) The compensation is for labor or services performed as an employee of, or under any form of contract with—

(a) A nonresident alien individual, foreign partnership, or foreign corporation, not engaged in trade or business within the United States, or

(b) An individual who is a citizen or resident of the United States, a domestic partnership, or a domestic corporation, if such labor or services are performed for an office or place of business maintained in a foreign country or in a possession of the United States by such individual, partnership, or corporation.

(2) As a general rule, the term ‘‘day’’, as used in subparagraph (1)(i) of this paragraph, means a calendar day during any portion of which the nonresident alien individual is physically present in the United States.

(3) Solely for purposes of applying this paragraph, the nonresident alien individual, foreign partnership, or foreign corporation for which the nonresident alien individual is performing personal services in the United States shall not be considered to be engaged in trade or business in the United States by reason of the performance of such services by such individual.

(4) In determining for purposes of subparagraph (1)(ii) of this paragraph whether compensation received by the nonresident alien individual exceeds in the aggregate a gross amount of $3,000, any amounts received by the individual from an employer as advances or reimbursements for travel expenses incurred on behalf of the employer shall be omitted from the compensation received by the individual, to the extent of expenses incurred, where he was required to account and did account to his employer for such expenses and has met the tests for such accounting provided in §1.162–17 and paragraph (e)(4) of §1.274–5. If advances or reimbursements exceed such expenses, the amount of the excess shall be included as compensation for personal services for purposes of such subparagraph. Pensions and retirement pay attributable to labor or personal services performed in the United States are not to be taken into account for purposes of subparagraph (1)(ii) of this paragraph. (5) For definition of the term ‘‘United States’’, when used in a geographical sense, see sections 638 and 7701(a)(9).

(b) *Amount includible in gross income—* (1) *Taxable years beginning after December 31, 1975.* (i) If a specific amount is paid for labor or personal services performed in the United States, that amount (if income from sources within the United States) shall be included in the gross income. If no accurate allocation or segregation of compensation for labor or personal services performed in the United States can be made, or when such labor or service is performed partly within and partly without the United States, the amount to be included in the gross income shall be determined on the basis that most correctly reflects the proper source of income under the facts and circumstances of the particular case. In many cases the facts and circumstances will be such that an apportionment on the time basis will be acceptable, that is, the amount to be included in gross income will be that amount which bears the same relation to the total compensation as the number of days of performance of the labor or services within the United States bears to the total number of days of performance of labor or services for which the payment is made. In other cases, the facts and circumstances will be such that another method of apportionment will be acceptable.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. B, a nonresident alien individual, was employed by M from March 1, 1976, to June 12, 1976, a total of 104 days, for which he received compensation in the amount of $12,240. During that period B was present in the United States 59 days. Under his contract B was subject to call at all times by his employer and was in a payment status on a 7-day week basis. There was no specific agreement as to the amount of pay for services performed within the United States; moreover, he received his stipulated salary payments regardless of the number of days per week he actually performed services. Under these circumstances the amount of compensation to be included in gross income as income from sources within the United States will be $6,943.85 ($12,240 × 59/104).

Example 2. C, a citizen of the United States, was a resident of a foreign country during his entire taxable year. He is employed by N, a domestic corporation, and paid a salary of $17,600 per annum. Under his contract C is required to work only on a 5-day week basis, Monday through Friday. During 1976 he was in the United States for 6 weeks, performing services therein for N for 30 work days. During the year he worked 240 days for N for which payment was made, determined by eliminating his vacation period for which no payment was made. Under these circumstances the amount of compensation for personal services performed in the United States is $2,200 ($17,600×30/240).

(2) *Taxable years beginning before January 1, 1976.* If a specific amount is paid for labor or personal services performed in the United States, that amount (if income from sources within the United States) shall be included in the gross income. If no accurate allocation or segregation of compensation for labor or personal services performed in the United States can be made, or when such labor or service is performed partly within and partly without the United States, the amount to be included in the gross income shall be determined by an apportionment on the time basis; that is, there shall be included in the gross income an amount which bears the same relation to the total compensation as the number of days of performance of the labor or services within the United States bears to the total number of days of performance of labor or services for which the payment is made.

(c) *Coastwise travel.* Except as to income excluded by paragraph (a) of this section, wages received for services rendered inside the territorial limits of the United States and wages of an alien seaman earned on a coastwise vessel are to be regarded as from sources within the United States.

(d) *Effective date.* This section applies with respect to taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.861–4 (Revised as of January 1, 1972).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7378, 40 FR 45433, Oct. 2, 1975; 40 FR 48508, Oct. 16, 1975]

§ 1.861–5 Rentals and royalties.

Gross income from sources within the United States includes rentals or royalties from property located in the United States or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, in the United States, patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like property. The income arising from the rental of property, whether tangible or intangible, located within the United States, or from the use of property, whether tangible or intangible, within the United States, is from sources within the United States. For taxable years beginning after December 31, 1966, gains described in section 871(a)(1)(D) and section 881(a)(4) from the sale or exchange after October 4, 1966, of patents, copyrights, and other like property shall be treated, as provided in section 871(e)(2), as rentals or royalties for the use of, or privilege of using, property or an interest in property. See paragraph (e) of §1.871–11.

[T.D. 7378, 40 FR 45434, Oct. 2, 1975]

§1.861–6 Sale of real property.

Gross income from sources within the United States includes gain, computed under the provisions of section 1001 and the regulations thereunder, derived from the sale or other disposition of real property located in the United States. For the treatment of capital gains and losses, see subchapter P (section 1201 and following), chapter 1 of the Code, and the regulations thereunder.

§1.861–7 Sale of personal property.

(a) *General.* Gains, profits, and income derived from the purchase and sale of personal property shall be treated as derived entirely from the country in which the property is sold. Thus, gross income from sources within the United States includes gains, profits, and income derived from the purchase of personal property without the United States and its sale within the United States.

(b) *Purchase within a possession.* Notwithstanding paragraph (a) of this section, income derived from the purchase of personal property within a possession of the United States and its sale within the United States shall be treated as derived partly from sources within and partly from sources without the United States. See section 863(b)(3) and §1.863–2.

(c) *Country in which sold.* For the purposes of part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder, a sale of personal property is consummated at the time when, and the place where, the rights, title, and interest of the seller in the property are transferred to the buyer. Where bare legal title is retained by the seller, the sale shall be deemed to have occurred at the time and place of passage to the buyer of beneficial ownership and the risk of loss. However, in any case in which the sales transaction is arranged in a particular manner for the primary purpose of tax avoidance, the foregoing rules will not be applied. In such cases, all factors of the transaction, such as negotiations, the execution of the agreement, the location of the property, and the place of payment, will be considered, and the sale will be treated as having been consummated at the place where the substance of the sale occurred.

(d) *Production and sale.* For provisions respecting the source of income derived from the sale of personal property produced by the taxpayer, see section 863(b)(2) and paragraphs (b) of §§1.863–1 and 1.863–2.

(e) *Section 306 stock.* For determining the source of gain on the disposition of section 306 stock, see section 306(f) and the regulations thereunder.

§1.861–8 Computation of taxable income from sources within the United States and from other sources and activities.

(a) *In general*—(1) *Scope.* Sections 861(b) and 863(a) state in general terms how to determine taxable income of a taxpayer from sources within the United States after gross income from sources within the United States has been determined. Sections 862(b) and 863(a) state in general terms how to determine taxable income of a taxpayer from sources without the United States after gross income from sources without the United States has been determined. This section provides specific guidance for applying the cited Code sections by prescribing rules for the allocation and apportionment of expenses, losses, and other deductions (referred to collectively in this section as ‘‘deductions’’) of the taxpayer. The rules contained in this section apply in determining taxable income of the taxpayer from specific sources and activities under other sections of the Code, referred to in this section as operative sections. See paragraph (f)(1) of this section for a list and description of operative sections. The operative sections include, among others, sections 871(b) and 882 (relating to taxable income of a nonresident alien individual or a foreign corporation which is effectively connected with the conduct of a trade or business in the United States), section 904(a)(1) (as in effect before enactment of the Tax Reform Act of 1976, relating to taxable income from sources within specific foreign countries), and section 904(a)(2) (as in effect before enactment of the Tax Reform Act of 1976, or section 904(a) after such enactment, relating to taxable income from all sources without the United States).

(2) *Allocation and apportionment of deductions in general.* A taxpayer to which this section applies is required to allocate deductions to a class of gross income and, then, if necessary to make the determination required by the operative section of the Code, to apportion deductions within the class of gross income between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income. Except for deductions, if any, which are not definitely related to gross income (see paragraphs (c)(2) and (e)(9) of this section) and which, therefore, are ratably apportioned to all gross income, all deductions of the taxpayer (except the deductions for personal exemptions enumerated in paragraph (e)(11) of this section) must be so allocated and apportioned. As further detailed below, allocations and apportionments are made on the basis of the factual relationship of deductions to gross income.

(3) *Class of gross income.* For purposes of this section, the gross income to which a specific deduction is definitely related is referred to as a ''class of gross income'' and may consist of one or more items (or subdivisions of these items) of gross income enumerated in section 61, namely:

(i) Compensation for services, including fees, commissions, and similar items;

(ii) Gross income derived from business;

(iii) Gains derived from dealings in property;

(iv) Interest;

(v) Rents;

(vi) Royalties;

(vii) Dividends;

(viii) Alimony and separate maintenance payments;

(ix) Annuities;

(x) Income from life insurance and endowment contracts;

(xi) Pensions;

(xii) Income from discharge of indebtedness;

(xiii) Distributive share of partnership gross income;

(xiv) Income in respect of a decedent;

(xv) Income from an interest in an estate or trust.

(4) *Statutory grouping of gross income and residual grouping of gross income.* For purposes of this section, the term ''statutory grouping of gross income'' or ''statutory grouping'' means the gross income from a specific source or activity which must first be determined in order to arrive at ''taxable income'' from which specific source or activity under an operative section. (See paragraph (f)(1) of this section.) Gross income from other sources or activities is referred to as the ''residual grouping of gross income'' or ''residual grouping.'' For example, for purposes of determining taxable income from sources within specific foreign countries and possessions of the United States, in order to apply the per-country limitation to the foreign tax credit (as in effect before enactment of the Tax Reform Act of 1976), the statutory groupings are the separate gross incomes from sources within each country and possession. Moreover, if the taxpayer has income subject to section 904(d) (as in effect after enactment of the Tax Reform Act of 1976), such income constitutes one or more separate statutory groupings. In the case of the per-country limitation, the residual grouping is the aggregate of gross income from sources within the United States. In some instances, where the operative section so requires, the statutory grouping or the residual grouping may include, or consist entirely of, excluded income. See paragraph (d)(2)

of this section with respect to the allocation and apportionment of deductions to excluded income.

(5) *Effective date*—(i) *Taxable years beginning after December 31, 1976.* The provisions of this section apply to taxable years beginning after December 31, 1976.

(ii) *Taxable years beginning before January 1, 1977.* For taxable years beginning before January 1, 1977, §1.861–8 applies as in effect on October 23, 1957 (T.D. 6258), as amended on August 22, 1966 (T.D. 6892) and on September 29, 1975 (T.D. 7378). The specific rules for allocation and apportionment of deductions set forth in this section may, at the option of the taxpayer, apply to those taxable years on a deduction-by-deduction basis if the rules are applied consistently to all taxable years with respect to which action by the Internal Revenue Service is not barred by any statute of limitations. Thus, for example, a calendar year taxpayer may choose to have the rules of paragraph (e)(2) of this section apply for the allocation and apportionment of all interest expenses for the two taxable years ending December 31, 1975 and 1976, which are open years under examination, and may justify the allocation and apportionment of all research and development expenses for those years on a basis supportable under §1.861–8 as in effect for 1975 and 1976 without regard to the rules of paragraph (e)(3) of this section.

(b) *Allocation*—(1) *In general.* For purposes of this section, the gross income to which a specific deduction is definitely related is referred to as a ‘‘class of gross income’’ and may consist of one or more items of gross income. The rules emphasize the factual relationship between the deduction and a class of gross income. See paragraph (d)(1) of this section which provides that in a taxable year there may be no item of gross income in a class or less gross income than deductions allocated to the class, and paragraph (d)(2) of this section which provides that a class of gross income may include excluded income. Allocation is accomplished by determining, with respect to each deduction, the class of gross income to which the deduction is definitely related and then allocating the deduction to such class of gross income (without regard to the taxpayable year in which such gross income is received or accrued or is expected to be received or accrued). The classes of gross income are not predetermined but must be determined on the basis of the deductions to be allocated. Although most deductions will be definitely related to some class of a taxpayer’s total gross income, some deductions are related to all gross income. In addition, some deductions are treated as not definitely related to any gross income and are ratably apportioned to all gross income. (See paragraph (e)(9) of this section.) In allocating deductions it is not necessary to differentiate between deductions related to one item of gross income and deductions related to another item of gross income where both items of gross income are exclusively within the same statutory grouping or exclusively within the residual grouping.

(2) *Relationship to activity or property.* A deduction shall be considered definitely related to a class of gross income and therefore allocable to such class if it is incurred as a result of, or incident to, an activity or in connection with property from which such class of gross income is derived. Where a deduction is incurred as a result of, or incident to, an activity or in connection with property, which activity or property generates, has generated, or could reasonably have been expected to generate gross income, such deduction shall be considered definitely related to such gross income as a class whether or not there is any item of gross income in such class which is received or accrued during the taxable year and whether or not the amount of deductions exceeds the amount of the gross income in such class. See paragraph (d)(1) of this section and example 17 of paragraph (g) of this section with respect to cases in which there is an excess of deductions. In some cases, it will be found that this subparagraph can most readily be applied by determining, with respect to a deduction, the categories of gross income to which it is not related and concluding that it is definitely related to a class consisting of all other gross income.

(3) *Supportive functions.* [Reserved] For guidance, see § 1.861–8T(b)(3).

(4) *Deductions related to a class of gross income.* See paragraph (e) of this section for rules relating to the allocation and apportionment of certain specific deductions definitely related to a class of gross income. See paragraph (c)(1) of this section for rules relating to the apportionment of deductions.

(5) *Deductions related to all gross income.* If a deduction does not bear a definite relationship to a class of gross income constituting less than all of gross income, it shall ordinarily be treated as definitely related and allocable to all of the taxpayer's gross income except where provided to the contrary under paragraph (e) of this section. Paragraph (e)(9) of this section lists various deductions which generally are not definitely related to any gross income and are ratably apportioned to all gross income.

(c) *Apportionment of deductions*—(1) *Deductions definitely related to a class of gross income.* [Reserved] For guidance, see § 1.861–8T(c)(1).

(2) *Apportionment based on assets.* [Reserved] For guidance, see § 1.861–8T(c)(2).

(3) *Deductions not definitely related to any gross income.* If a deduction is not definitely related to any gross income (see paragraph (e)(9) of this section), the deduction must be apportioned ratably between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping. Thus, the amount apportioned to each statutory grouping shall be equal to the same proportion of the deduction which the amount of gross income in the statutory grouping bears to the total amount of gross income. The amount apportioned to the residual grouping shall be equal to the same proportion of the deduction which the amount of the gross income in the residual grouping bears to the total amount of gross income.

(d) *Excess of deductions and excluded and eliminated income*—(1) *Excess of deductions.* Each deduction which bears a definite relationship to a class of gross income shall be allocated to that class in accordance with paragraph (b)(1) of this section even though, for the taxable year, no gross income in such class is received or accrued or the amount of the deduction exceeds the amount of such class of gross income. In apportioning deductions, it may be that, for the taxable year, there is no gross income in the statutory grouping (or residual grouping), or that deductions exceed the amount of gross income in the statutory grouping (or residual grouping). If there is no gross income in a statutory grouping or the amount of deductions allocated and apportioned to a statutory grouping exceeds the amount of gross income in the statutory grouping, the effects are determined under the operative section. If the taxpayer is a member of a group filing a consolidated return, such excess of deductions allocated or apportioned to a statutory grouping of income of such member is taken into account in determining the consolidated taxable income from such statutory grouping, and such excess of deductions allocated or apportioned to the residual grouping of income is taken into account in determining the consolidated taxable income from the residual grouping. See § 1.1502–4(d)(1) and the last sentence of § 1.1502–12. For an illustration of the principles of this paragraph (d)(1), see example 17 of paragraph (g) of this section.

(2) *Allocation and apportionment to exempt, excluded, or eliminated income.* [Reserved] For guidance, see § 1.861–8T(d)(2).

(e) *Allocation and apportionment of certain deductions*—(1) *In general.* Subparagraphs (2) and (3) of this paragraph contain rules with respect to the allocation and apportionment of interest expense and research and development expenditures, respectively. Subparagraphs (4) through (8) of this paragraph contain rules with respect to the allocation of certain other deductions. Subparagraph (9) of this paragraph lists those deductions which are ordinarily considered as not being definitely related to any class of gross income. Subparagraph (10) of this paragraph lists special deductions of corporations which must be allocated and apportioned. Subparagraph (11) of this paragraph lists personal exemptions which are neither allocated nor apportioned. Examples of allocation and apportionment are contained in paragraph (g) of this section.

(2) *Interest.* [Reserved] For guidance, see §1.861–8T(e)(2).

(3) *Research and experimental expenditures.* For rules regarding the allocation and apportionment of research and experimental expenditures, see §1.861–17.

(4) *Stewardship expenses attributable to dividends received.* If a corporation renders services for the benefit of a related corporation and the corporation charges the related corporation for such services (see section 482 and the regulations thereunder which provide for an allocation where the charge is not on an arm's length basis as determined therein), the deductions for expenses of the corporation attributable to the rendering of such services are considered definitely related to the amounts so charged and are to be allocated to such amounts. However, the regulations under section 482 (§1.482–2(b)(2)(ii) recognize a type of activity which is not considered to be for the benefit of a related corporation but is considered to constitute ‘‘stewardship’’ or ‘‘overseeing’’ functions undertaken for the corporation's own benefit as an investor in the related corporation, and therefore, a charge to the related corporation for such stewardship or overseeing functions is not provided for. Services undertaken by a corporation of a stewardship or overseeing character generally represent a duplication of services which the related corporation has independently performed for itself. For example, assume that a related corporation, which has a qualified financial staff, makes an analysis to determine the amount and source of its borrowing needs and submits a report of its findings and a plan of borrowing to the parent corporation, and the parent corporation's financial staff reviews the findings and plans to determine whether to advise the related corporation to reconsider its plan. The services of review performed by the parent corporation for its own benefit are of a stewardship or overseeing character. The deductions resulting from stewardship or overseeing functions are incurred as a result of, or incident to, the ownership of the related corporation and, thus, shall be considered definitely related and allocable to dividends received or to be received from the related corporation. If a corporation has a foreign or international department which exercises stewardship or overseeing functions with respect to related foreign corporations and, in addition, the department has other functions which are attributable to other foreign-source income (such as fees for services rendered outside of the United States for the benefit of foreign related corporations, foreign royalties, and gross income of foreign branches) to which its deductions are also to be allocated, some part of the deductions with respect to that department are considered definitely related to the other foreign-source income. In some instances, the operations of a foreign or international department will also be attributable to United States source income (such as fees for services performed in the United States) to which its deductions are to be allocated. Methods of apportionment which could possibly be utilized with respect to stewardship expenses include comparisons of time spent by employees weighted to take into account differences in compensation, or comparisons of each related corporation's gross receipts, gross income, or unit sales volume, assuming that stewardship activities are not substantially disproportionate to such factors. See paragraph (f)(5) of this section for the type of verification that may be required in this respect. See examples 17 and (18) of paragraph (g) of this section for the allocation and apportionment of stewardship expenses. See paragraph (b)(3) of this section for the allocation and apportionment of deductions attributable to supportive functions other than stewardship activities.

(5) *Legal and accounting fees and expenses.* Fees and other expenses for legal and accounting services are ordinarily definitely related and allocable to specific classes of gross income or to all the taxpayer's gross income, depending on the nature of the services rendered (and are apportioned as provided in paragraph (c)(1) of this section). For example, accounting fees for the preparation of a study of the costs

involved in manufacturing a specific product will ordinarily be definitely related to the class of gross income derived from (or which could reasonably have been expected to be derived from) that specific product. The taxpayer is not relieved from his responsibility to make a proper allocation and apportionment of fees on the grounds that the statement of services rendered does not identify the services performed beyond a generalized designation such as ''professional,'' or does not provide any type of allocation, or does not properly allocate the fees involved.

(6) *Income taxes*—(i) *In general.* The deduction for state, local, and foreign income, war profits and excess profits taxes (''state income taxes'') allowed by section 164 shall be considered definitely related and allocable to the gross income with respect to which such state income taxes are imposed. For example, if a domestic corporation is subject to state income taxation and the state income tax is imposed in part on an amount of foreign source income, then that part of the taxpayer's deduction for state income tax that is attributable to foreign source income is definitely related and allocable to foreign source income. In allocating and apportioning the deduction for state income tax for purposes including (but not limited to) the computation of the foreign tax credit limitation under section 904 of the Code and the consolidated foreign tax credit under § 1.1502–4 of the regulations, the income upon which the state income tax is imposed is determined by reference to the law of the jurisdiction imposing the tax. Thus, if a state attributes taxable income to a corporate taxpayer by applying an apportionment formula that takes into consideration the income and factors of one or more corporations related by ownership to the corporate taxpayer and engaging in activities related to the business of the corporate taxpayer, then the income so attributed is the income upon which the state income tax is imposed. If the income so attributed to the corporate taxpayer includes foreign source income, then, in computing the taxpayer's foreign tax credit limitation under section 904, for example, the taxpayer's deduction for state income tax will be considered definitely related and allocable to a class of gross income that includes the statutory grouping of foreign source income. When the law of the state includes dividends that are treated under section 862(a)(2) as income from sources without the United States in taxable income apportionable to the state, but does not include factors of the corporation paying such dividends in the apportionment formula used to determine state taxable income, an appropriate portion of the deduction for state income tax will be considered definitely related and allocable to a class of gross income consisting solely of foreign source dividend income. A deduction for state income tax will not be considered definitely related to a hypothetical amount of income calculated under federal tax principles when the jurisdiction imposing the tax computes taxable income under different principles. A corporate taxpayer's deduction for a state franchise tax that is computed on the basis of income attributable to business activities conducted within the state must be allocated and apportioned in the same manner as the deduction for state income taxes. In determining, for example, both the foreign tax credit under section 904 of the Code and the consolidated foreign tax credit limitation under § 1.1502–4 of the regulations, the deduction for state income tax may be allocable and apportionable to foreign source income in a statutory grouping described in section 904(d) in a taxable year in which the taxpayer has no foreign source income in such statutory grouping. Alternatively, such an allocation or apportionment may be appropriate if a taxpayer corporation has no foreign source income in a statutory grouping, but its deduction is attributable to foreign source income in such grouping that is attributed to the taxpayer corporation under the law of a state which attributes taxable income to a corporation by applying an apportionment formula that takes into consideration the income and factors of one or more corporations related by ownership to the taxpayer corporation and engaging in activities related to the business of the taxpayer corporation. Example 30 of paragraph (g) of

this section illustrates the application of this last rule.

(ii) *Methods of allocation and apportionment*—(A) *In general.* A taxpayer's deduction for a state income tax is to be allocated (and then apportioned, if necessary, subject to the rules of §1.861–8(d)) by reference to the taxable income that the law of the taxing jurisdiction attributes to the taxpayer (''state taxable income'').

(B) *Effect of subsequent recomputations of state income tax.* [Reserved]

(C) *Illustrations*—(*1*) *In general.* Examples 25 through 32 of paragraph (g) of §1.861–8 illustrate, in the given factual situations, the application of this paragraph (e)(6) and the general rule of paragraph (b)(1) of this section that a deduction must be allocated to the class of gross income to which the deduction is factually related. In general, these examples employ a presumption that state income taxes are allocable to a class of gross income that includes the statutory grouping of income from sources without the United States when the total amount of taxable income determined under state law exceeds the amount of taxable income determined under the Code (without taking into account the deduction for state income taxes) in the residual grouping of income from sources within the United States. A taxpayer that allocates and apportions the deduction for state income tax in accordance with the methodology of Example 25 of paragraph (g) of this section must also apply the modifications illustrated in Examples 26 and 27 of paragraph (g) of this section, when applicable. The modification illustrated in *Example 26* is applicable when the deduction for state income tax is attributable in part to taxes imposed by a state which factually excludes foreign source income (as determined for federal income tax purposes) from state taxable income. The modification illustrated in *Example 27* is applicable when the taxpayer has income-producing activities in a state which does not impose a corporate income tax. The specific allocation of state income tax illustrated in Example 28 follows the rule in paragraph (e)(6)(i) of this section, and must be applied whenever a taxpayer's state taxable income includes dividends apportioned to the state under a formula that does not take into account the factors of the corporations paying those dividends, regardless of whether the taxpayer uses the methodology of Example 25 with respect to the remainder of the deduction for state income taxes.

(*2*) *Modifications.* Before applying a method of allocation and apportionment illustrated in the examples, the computation of state taxable income under state law may be modified, subject to the approval of the District Director, to reflect more accurately the income with respect to which the state income tax is imposed. Any modification to the state law computation of state taxable income must yield an allocation and apportionment of the deduction for state income taxes that is consistent with the rules contained in this paragraph (e)(6), and that accurately reflects the factual relationship between the state income tax and the income on which that tax is imposed. For example, a modification to the computation of taxable income under state law might be appropriate to compensate for differences between the state law definition of taxable income and the federal definition of taxable income, due to a difference in the rate of allowable depreciation or the amount of another deduction that is allowable under both systems. This rule is illustrated in Example 31 of paragraph (g) of this section. However, a modification to the computation of taxable income under state law will not be appropriate, and will not more accurately reflect the factual relationship between the state tax and the income on which the tax is imposed, to the extent such modification reflects the fact that the state does not follow federal tax principles in attributing income to the taxpayer's activities in the state. This rule is illustrated in Example 32 of paragraph (g) of this section. A taxpayer may not modify the methods illustrated in the examples, or use an alternative method of allocation and apportionment of the deduction for state income taxes, if the modification or alternative method would be inconsistent with the rules of paragraph (e)(6)(i) of this section. A taxpayer that uses a method of allocation and apportionment other than one illustrated in Example 25 (as modified by Examples 26 and 27), or 29 with respect to a factual situation similar to those of the examples, must describe the alternative method on an attachment to its federal income tax return and establish to the satisfaction of the District Director, upon examination, that the result of the alternative method more accurately reflects the factual relationship between the state income tax and the income on which the tax is imposed.

(D) *Elective safe harbor methods.* (*1*) *In general.* In lieu of applying the rules set forth in paragraphs (e)(6)(ii) (A) through (C) of this section, a taxpayer may elect to allocate and apportion the deduction for state income tax in accordance with one of the two safe harbor methods described in paragraph (e)(6)(ii)(D) (*2*) and (*3*) of this section. A taxpayer shall make this election for a taxable year by filing a timely tax return for that year that reflects an allocation and apportionment of the deduction for state income tax under one of the safe harbor methods and attaching to such return a statement that the taxpayer has elected to use the safe harbor method provided in either paragraph (e)(6)(ii)(D) (*2*) or (*3*) of this section, as appropriate. Once made, this election is effective for the taxable year for which made and all subsequent taxable years, and may be revoked only with the consent of the Commissioner. Example 33 of paragraph (g) of this section illustrates the application of these safe harbor methods.

(*2*) *Method One.* (*i*) *Step One—Specific allocation to foreign source portfolio dividends and other income.* If any portion of the deduction for state income tax is attributable to tax imposed by a state which includes in a corporate taxpayer's taxable income apportionable to the state, portfolio dividends (as defined in paragraph (i) of Example 28 of paragraph (g) of this section) that are treated under section 862(a)(2) as income from sources without the United States, but does not include factors of the corporations paying the portfolio dividends in the apportionment formula used to determine state taxable income, the taxpayer shall allocate an appropriate portion of the deduction to a class of gross income consisting solely of foreign source portfolio dividends. The portion of the deduction so allocated, and the amount of foreign source portfolio dividends included in such class, shall be determined in accordance with the methodology illustrated in paragraph (ii) of Example 28 of paragraph (g). If a state income tax is determined based upon formulary apportionment of the total taxable income attributable to the taxpayer's unitary business, the taxpayer must also apply the methodology illustrated in paragraph (ii) (C) through (G) of Example 29 of paragraph (g) of this section to make specific allocations of appropriate portions of the deduction for state income tax on the basis of income that, under separate accounting, would have been attributed to other members of the unitary group. The taxpayer shall reduce its aggregate state taxable income by the amount of foreign source portfolio dividends and other income to which a specific allocation is made (the reduced amount being referred to hereinafter as ‘‘adjusted state taxable income’’).

(*ii*) *Step Two—Adjustment of U.S. source federal taxable income.* If the taxpayer has significant income-producing activities in a state which does not impose a corporate income tax or other state tax measured by income derived from business activities in the state, the taxpayer shall reduce its U.S. source federal taxable income (solely for purposes of this safe harbor method) by the amount of federal taxable income attributable to its activities in such state. This amount shall be determined in accordance with the methodology illustrated in paragraph (ii) of Example 27 of paragraph (g) of this section, provided that the taxpayer shall be required to use the rules of the Uniform Division of Income for Tax Purposes Act to attribute income to the relevant state. The taxpayer's U.S. source federal taxable income, as so reduced, is referred to hereinafter as ‘‘adjusted U.S. source federal taxable income.’’

(*iii*) *Step Three—Allocation.* The taxpayer shall allocate the remainder of the deduction for state income tax (after reduction by the portion allocated to foreign source portfolio dividends and other income under Step One) in accordance with the methodology illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section. However, the taxpayer shall substitute for the comparison of aggregate state taxable income to U.S. source federal taxable income, illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section, a comparison of its adjusted state taxable income to an amount equal to 110% of its adjusted U.S. source federal taxable income.

(*iv*) *Step Four—Apportionment.* In the event that apportionment of the remainder of the deduction for state income tax is required, the taxpayer shall apportion that remaining deduction to U.S. source income in accordance with the methodology illustrated in paragraph (iii) of Example 25 of paragraph (g) of this section, substituting for domestic source income in that paragraph an amount equal to 110% of the taxpayer's adjusted U.S. source federal taxable income. The remaining portion of the deduction shall be apportioned to the statutory groupings of foreign source income described in section 904(d) of the Code in accordance with the proportion of the income in each statutory grouping of foreign source income described in section 904(d) to the taxpayer's total foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above).

(*3*) *Method Two.* (*i*) *Step One—Specific allocation to foreign source portfolio dividends and other income.* Step One of this method is the same as Step One of Method One (as described in paragraph (e)(6)(ii)(D)(*2*)(*i*) of this section).

(*ii*) *Step Two—Adjustment of U.S. source federal taxable income.* Step Two of this method is the same as Step Two of Method One (as described in paragraph (e)(6)(ii)(D)(*2*)(*ii*) of this section).

(*iii*) *Step Three—Allocation.* The taxpayer shall allocate the remainder of the deduction for state income tax (after reduction by the portion allocated to foreign source portfolio dividends and other income under Step One) in accordance with the methodology illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section. However, the taxpayer shall substitute for the comparison of aggregate state taxable income to U.S. source federal taxable income, illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section, a comparison of its adjusted state taxable income to its adjusted U.S. source federal taxable income.

(*iv*) *Step Four—Apportionment.* In the event that apportionment of the deduction is required, the taxpayer shall apportion to U.S. source income that portion of the deduction that is attributable to state income taxes imposed upon an amount of state taxable income equal to adjusted U.S. source federal taxable income. The taxpayer shall apportion the remaining amount of the deduction to U.S. and foreign source income in the same proportions that the taxpayer's adjusted U.S. source federal taxable income and foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above) bear to its total federal taxable income (taking into account the adjustment of U.S. source federal taxable income under Step Two and after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One). The portion of the deduction apportioned to foreign source income shall be apportioned among the statutory groupings described in section 904(d) of the Code in accordance with the proportions of the taxpayer's total foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above) in each grouping.

(iii) *Effective dates.* The rules of §1.861–8(e)(6)(i) and the language preceding the examples in §1.861–8(g) are effective for taxable years beginning after December 31, 1976. The rules of §1.861–8(e)(6)(ii) (other than §1.861–8(e)(6)(ii)(D)) and Examples 25 through 32 of §1.861–8(g) are effective for taxable years beginning on or after January 1, 1988. The rules of §1.861–8(e)(6)(ii)(D) and Example 33 of § 1.861–8(g) are effective for taxable years ending after March 12, 1991. At the option of the taxpayer, however, the rules of § 1.861–8(e)(6)(ii) (other than § 1.861–8(e)(6)(ii)(D)) and Examples 25 through 32 of § 1.861–8(g) may be applied with respect to deductions for state taxes incurred in taxable years beginning before January 1, 1988.

(7) *Losses on the sale, exchange, or other disposition of property*—(i) *Allocation.* The deduction allowed for loss recognized on the sale, exchange, or other disposition of a capital asset or property described in section 1231(b) shall be considered a deduction which is definitely related and allocable to the class of gross income to which such asset or property ordinarily gives rise in the hands of the taxpayer. Where the nature of gross income generated from the asset or property has varied significantly over several taxable years of the taxpayer, such class of gross income shall generally be determined by reference to gross income generated from the asset or property during the taxable year or years immediately preceding the sale, exchange, or other dispostion of such asset or property. Thus, for example, where an asset generates primarily sales income from domestic sources in the early years of its operation and then is leased by the taxpayer to a foreign subsidiary in later years, the class of gross income to which the asset gives rise will be considered to be the rental income derived from the lease and will not include sales income from domestic sources.

(ii) *Apportionment of losses.* Where in the unusual circumstances that an apportionment of a deduction for losses on the sale, exchange, or other disposition of a capital asset or property described in section 1231(b) is necessary, the amount of such deduction shall be apportioned between the statutory grouping (or among the statutory groupings) of gross income (within the class of gross income) and the residual grouping (within the class of gross income) in the same proportion that the amount of gross income within such statutory grouping (or statutory groupings) and such residual grouping bear, respectively, to the total amount of gross income within the class of gross income. Apportionment will be necessary where, for example, the class of gross income to which the deduction is allocated consists of gross income (such as royalties) attributable to an intangible asset used both within and without the United States, or gross income (such as from sales or services) attributable to a tangible asset used both within and without the United States.

(iii) *Allocation of loss recognized in taxable years after 1986.* See §§ 1.865–1T, 1.865–2, and 1.865–2T for rules regarding the allocation of certain loss recognized in taxable years beginning after December 31, 1986.

(8) *Net operating loss deduction.* [Reserved] For guidance, see § 1.861–8T(e)(8).

(9) *Deductions which are not definitely related.* Deductions which shall generally be considered as not definitely related to any gross income, and therefore are ratably apportioned as provided in paragraph (c)(2) of this section, are—

(i) The deduction allowed by section 163 for interest described in subparagraph (2)(iii) of this paragraph (e);

(ii) The deduction allowed by section 164 for real estate taxes on a personal residence or for sales tax on the purchase of items for personal use;

(iii) The deduction for medical expenses allowed by section 213;

(iv) The deduction for charitable contributions allowed by sections 170, 873(b)(2), and 882(c)(1)(B); and

(v) The deduction for alimony payments allowed by section 215.

(10) *Special deductions.* The special deductions allowed in the case of a corporation by section 241 (relating to the deductions for partially tax exempt interest, dividends received, etc.), section 922 (relating to Western Hemisphere trade corporations), and section 941 (relating to China Trade Act corporations) shall be allocated and apportioned consistent with the principles of this section.

(11) *Personal exemptions.* The deductions for the personal exemptions allowed by section 151, 642(b), or 873(b)(3) shall not be taken into account for purpose of allocation and apportionment under this section.

(f) *Miscellaneous matters*—(1) *Operative sections.* The operative sections of the Code which require the determination of taxable income of the taxpayer from specific sources or activities and which give rise to statutory groupings to which this section is applicable include the sections described below.

(i) *Overall limitation to the foreign tax credit.* Under the overall limitation to the foreign tax credit, as provided in section 904(a)(2) (as in effect before enactment of the Tax Reform Act of 1976, or section 904(a) after such enactment) the amount of the foreign tax credit may not exceed the tentative U.S. tax (i.e., the U.S. tax before application of the foreign tax credit) multiplied by a fraction, the numerator of which is the taxable income from sources without the United States and the denominator of which is the entire taxable income. Accordingly, in this case, the statutory grouping is foreign source income (including, for example, interest received from a domestic corporation which meets the tests of section 861(a)(1)(B), dividends received from a domestic corporation which has an election in effect under section 936, and other types of income specified in section 862). Pursuant to sections 862(b) and 863(a) and §§1.862–1 and 1.863–1, this section provides rules for identifying the deductions to be taken into account in determining taxable income from sources without the United States. See section 904(d) (as in effect after enactment of the Tax Reform Act of 1976) and the regulations thereunder which require separate treatment of certain types of income. See example 3 of paragraph (g) of this section for one example of the application of this section to the overall limitation.

(ii) [Reserved]

(iii) *DISC and FSC taxable income.* Sections 925 and 994 provide rules for determining the taxable income of a FSC and DISC, respectively, with respect to qualified sales and leases of export property and qualified services. The combined taxable income method available for determining a DISC's taxable income provides, without consideration of export promotion expenses, that the taxable income of the DISC shall be 50 percent of the combined taxable income of the DISC and the related supplier derived from sales and leases of export property and from services. In the FSC context, the taxable income of the FSC equals 23 percent of the combined taxable income of the FSC and the related supplier. Pursuant to regulations under section 925 and 994, this section provides rules for determining the deductions to be taken into account in determining combined taxable income, except to the extent modified by the marginal costing rules set forth in the regulations under sections 925(b)(2) and 994(b)(2) if used by the taxpayer. See *Examples* (22) and (23) of paragraph (g) of this section. In addition, the computation of combined taxable income is necessary to determine the applicability of the section 925(d) limitation and the ''no loss'' rules of the regulations under sections 925 and 994.

(iv) *Effectively connected taxable income.* Nonresident alien individuals and foreign corporations engaged in trade or business within the United States, under sections 871(b)(1) and 882(a)(1), on taxable income which is effectively connected with the conduct of a trade or business within the United States. Such taxable income is determined in most instances by initially determining, under section 864(c), the amount of gross income which is effectively connected with the conduct of a trade or business within the United States. Pursuant to sections 873 and 882(c), this section is applicable for purposes of determining the deductions from such gross income (other than the deduction for interest expense allowed to foreign corporations (see §1.882–5)) which are to be taken into account in determining taxable income. See example 21 of paragraph (g) of this section.

(v) *Foreign base company income.* Section 954 defines the term ''foreign base company income'' with respect to controlled foreign corporations. Section 954(b)(5) provides that in determining foreign base company income the gross income shall be reduced by the deductions of the controlled foreign corporation ''properly allocable to such income''. This section provides rules for identifying which deductions are properly allocable to foreign base company income.

(vi) *Other operative sections.* The rules provided in this section also apply in determining—

(A) The amount of foreign source items of tax preference under section 58(g) determined for purposes of the minimum tax;

(B) The amount of foreign mineral income under section 901(e);

(C) [Reserved]

(D) The amount of foreign oil and gas extraction income and the amount of foreign oil related income under section 907;

(E) The tax base for citizens entitled to the benefits of section 931 and the section 936 tax credit of a domestic corporation which has an election in effect under section 936;

(F) The exclusion for income from Puerto Rico for residents of Puerto Rico under section 933;

(G) The limitation under section 934 on the maximum reduction in income tax liability incurred to the Virgin Islands;

(H) The income derived from Guam by an individual who is subject to section 935;

(I) The special deduction granted to China Trade Act corporations under section 941;

(J) The amount of certain U.S. source income excluded from the subpart F income of a controlled foreign corporation under section 952(b);

(K) The amount of income from the insurance of U.S. risks under section 953(b)(5);

(L) The international boycott factor and the specifically attributable taxes and income under section 999; and

(M) The taxable income attributable to the operation of an agreement vessel under section 607 of the Merchant Marine Act of 1936, as amended, and the Capital Construction Fund Regulations thereunder (26 CFR, part 3). See 26 CFR 3.2(b)(3).

(2) *Application to more than one operative section.* (i) Where more than one operative section applies, it may be necessary for the taxpayer to apply this section separately for each applicable operative section. In such a case, the taxpayer is required to use the same method of allocation and the same principles of apportionment for all operative sections.

(ii) When expenses, losses, and other deductions that have been properly allocated and apportioned between combined gross income of a related supplier and a DISC or former DISC and residual gross income, regardless of which of the administrative pricing methods of section 994 has been applied, such deductions are not also allocated and apportioned to gross income consisting of distributions from the DISC or former DISC attributable to income of the DISC or former DISC as determined under the administrative pricing methods with respect to DISC or former DISC taxable years beginning after December 31, 1986. Accordingly, *Example* (22) of paragraph (g) of this section does not apply to distributions from a DISC or former DISC with respect to DISC or former DISC taxable years beginning after December 31, 1986. This rule does not apply to the extent that the taxable income of the DISC or former DISC is determined under the section 994(a)(3) transfer pricing method. In addition, for taxable years beginning after December 31, 1986, in the case of expenses, losses, and other deductions that have been properly allocated and apportioned between combined gross income of a related supplier and a FSC and residual gross income, regardless of which of the administrative pricing methods of section 925 has been applied, such deductions are not also allocated and apportioned to gross income consisting of distributions from the FSC or former FSC which are attributable to the foreign trade income of the FSC or former FSC as determined under the administrative pricing methods. This rule does not apply to the extent that the foreign trade income of the FSC or former FSC is determined under the section 925(a)(3) transfer pricing method. See *Example* (23) of paragraph (g) of this section.

(3) *Special rules of section 863(b)*—(i) *In general.* Special rules under section 863(b) provide for the application of rules of general apportionment provided in §§ 1.863–3 to 1.863–5, to worldwide taxable income in order to attribute part of such worldwide taxable income to U.S. sources and the remainder of such worldwide taxable income

to foreign sources. The activities specified in section 863(b) are—

(A) Transportation or other services rendered partly within and partly without the United States,

(B) Sales of personal property produced by the taxpayer within and sold without the United States, or produced by the taxpayer without and sold within the United States, and

(C) Sales within the United States of personal property purchased within a possession of the United States.

In the instances provided in §§1.863–3 and 1.863–4 with respect to the activities described in (A), (B), and (C) of this subdivision, this section is applicable only in determining worldwide taxable income attributable to these activities.

(ii) *Relationship of sections 861, 862, 863(a), and 863(b).* Sections 861, 862, 863(a), and 863(b) are the four provisions applicable in determining taxable income from specific sources. Each of these four provisions applies independently. Where a deduction has been allocated and apportioned to income under one of these four provisions, the deduction shall not again be allocated and apportioned to gross income under any of the other three provisions. However, two or more of these provisions may have to be applied at the same time to determine the proper allocation and apportionment of a deduction. The special rules under section 863(b) take precedence over the general rules of Code sections 861, 862 and 863(a). For example, where a deduction is allocable in whole or in part to gross income to which section 863(b) applies, such deduction or part thereof shall not otherwise be allocated under section 861, 862, or 863(a). However, where the gross income to which the deduction is allocable includes both gross income to which section 863(b) applies and gross income to which section 861, 862, or 863(a) applies, more than one section must be applied at the same time in order to determine the proper allocation and apportionment of the deduction.

(4) *Adjustments made under other provisions of the Code*—(i) *In general.* If an adjustment which affects the taxpayer is made under section 482 or any other provision of the Code, it may be necessary to recompute the allocations and apportionments required by this section in order to reflect changes resulting from the adjustment. The recomputation made by the District Director shall be made using the same method of allocation and apportionment as was originally used by the taxpayer, provided such method as originally used conformed with paragraph (a)(5) of this section and, in light of the adjustment, such method does not result in a material distortion. In addition to adjustments which would be made aside from this section, adjustments to the taxpayer’s income and deductions which would not otherwise be made may be required before applying this section in order to prevent a distortion in determining taxable income from a particular source of activity. For example, if an item included as a part of the cost of goods sold has been improperly attributed to specific sales, and, as a result, gross income under one of the operative sections referred to in paragraph (f)(1) of this section is improperly determined, it may be necessary for the District Director to make an adjustment to the cost of goods sold, consistent with the principles of this section, before applying this section. Similarly, if a domestic corporation transfers the stock in its foreign subsidiaries to a domestic subsidiary and the parent continues to incur expenses in connection with the supervision of the foreign subsidiaries (see paragraph (e)(4) of this section), it may be necessary for the District Director to make an allocation under section 482 with respect to such expenses before making allocations and apportionments required by this section, even though the section 482 allocation might not otherwise be made.

(ii) *Example.* X, a domestic corporation, purchases and sells consumer items in the United States and foreign markets. Its sales in foreign markets are made to related foreign subsidiaries. X reported $1,500,000 as sales during the taxable year of which $1,000,000 was domestic sales and $500,000 was foreign sales. X took a deduction for expenses incurred by its marketing department during the taxable year in the amount of $150,000. These expenses were determined to be allocable to both domestic and foreign sales and are apportionable between such sales. Thus, X allocated and apportioned the marketing department deduction as follows:

To gross income from domestic sales: $150,000×($1,000,000/$1,500,000)	$100,000
To gross income from foreign sales: $150,000×($500,000/$1,500,000)	50,000
Total	150,000

On audit of X's return for the taxable year, the District Director adjusted, under section 482, X's sales to related foreign subsidiaries by increasing the sales price by a total of $100,000, thereby increasing X's foreign sales and total sales by the same amount. As a result of the section 482 adjustment, the apportionment of the deduction for the marketing department expenses is redetermined as follows:

To gross income from domestic sales: $150,000×($1,000,000/$1,600,000)	$93,750
To gross income from foreign sales: $150,000×($600,000/$1,600,000)	56,250
Total	150,000

(5) *Verification of allocations and apportionments.* Since, under this section, allocations and apportionments are made on the basis of the factual relationship between deductions and gross income, the taxpayer is required to furnish, at the request of the District Director, information from which such factual relationships can be determined. In reviewing the overall limitation to the foreign tax credit of a domestic corporation, for example, the District Director should consider information which would enable him to determine the extent to which deductions attributable to functions performed in the United States are related to earning foreign source income, United States source income, or income from both sources. In addition to functions with a specific international purpose, consideration should be given to the functions of management, the direction and results of an acquisition program, the functions of operating units and personnel located at the head office, the functions of support units (including but not limited to engineering, legal, budget, accounting, and industrial relations), the functions of selling and advertising units and personnel, the direction and uses of research and development and the direction and uses of services furnished by independent contractors. Thus, for example when requested by the District Director, the taxpayer shall make available any of its organization charts, manuals, and other writings which relate to the manner in which its gross income arises and to the functions of organizational units, employees, and assets of the taxpayer and arrange for the interview of such of its employees as the District Director deems desirable in order to determine the gross income to which deductions relate. See section 7602 and the regulations thereunder which generally provide for the examination of books and witnesses. See also section 905(b) and the regulations thereunder which require proof of foreign tax credits to the satisfaction of the Secretary or his delegate.

(g) *General examples.* The following examples illustrate the principles of this section. In each example, unless otherwise specified, the operative section which is applied and gives rise to the statutory grouping of gross income is the overall limitation to the foreign tax credit under section 904(a). In addition, in each example, where a method of allocation or apportionment is illustrated as an acceptable method, it is assumed that such method is used by the taxpayer on a consistent basis from year to year (except in the case of the optional method for apportioning research and development expense under paragraph (e)(3)(iii) of § 1.861–8). Further, it is assumed that each party named in each example operates on a calendar year accounting basis and, where the party is a U.S. taxpayer, files returns on a calendar year basis.

Examples 1—16 —[Reserved]

Example 17— Stewardship Expenses (Consolidation)—(i) *Facts.* X, a domestic corporation, wholly owns M, N, and O, also domestic corporations. X, M, N, and O file a consolidated income tax return. All the income of X and O is from sources within the United States, all of M's income is from sources within South America, and all of N's income is from sources within Africa. X receives no dividends from M, N, or O. During the taxable year, the consolidated group of corporations earned consolidated gross income of $550,000 and incurred total deductions of $370,000 as follows:

	Gross income	Deductions
Corporations:		
X	$100,000	$50,000
M	250,000	100,000
N	150,000	200,000

	Gross income	Deductions
O	50,000	20,000
Total	550,000	370,000

Of the $50,000 of deductions incurred by X, $15,000 relates to X's ownership of M; $10,000 relates to X's ownership of N; $5,000 relates to X's ownership of O; and the entire $30,000 constitute stewardship expenses. The remainder of X's deductions ($20,000) relates to production of income from its plant in the United States.

(ii) *Allocation.* In accordance with §1.1502–4, each corporation must first compute its separate taxable income for purposes of computing the limitation on the foreign tax credit. X's deductions of $50,000 are definitely related and thus allocable to the types of gross income to which they give rise, namely $25,000 wholly to income from sources outside the United States ($15,000 for stewardship of M and $10,000 for stewardship of N) and the remainder ($25,000) wholly to gross income from sources within the United States. Expenses incurred by M and N are entirely related and thus wholly allocable to income earned from sources without the United States and expenses incurred by O are entirely related and thus wholly allocable to income earned within the United States. Hence, no apportionment of expenses of X, M, N, or O is necessary. For purposes of applying the overall limitation, the statutory grouping is gross income from sources without the United States and the residual grouping is gross income from sources within the United States. As a result of the allocation of deductions, X, M, and N have separate taxable income (losses) from sources without the United States in the amounts of ($25,000), $150,000, and ($50,000), respectively, computed as follows:

	X	M	N
Foreign gross income	....	$250,000	$150,000
Less: Deductions allocable to foreign gross income	$25,000	100,000	200,000
Total, taxable income (loss)	(25,000)	150,000	(50,000)

Thus, in the combined computation of the overall limitation, the numerator of the limiting fraction (taxable income from sources outside the United States) is $75,000 ($150,000 of separate taxable income of M less $50,000 of losses of N and less $25,000 of losses of X).

Example 18— Stewardship and Supportive Expenses—(i) *Facts.* X, a domestic corporation, manufactures and sells pharmaceuticals in the United States. X's domestic subsidiary S, and X's foreign subsidiaries T, U, and V perform similar functions in the United States and foreign countries T, U, and V, respectively. Each corporation derives substantial net income during the taxable year. X's gross income for the taxable year consists of:

Domestic sales income	$32,000,000
Dividends from S (before dividends received deduction)	3,000,000
Dividends from T	2,000,000
Dividends from U	1,000,000
Dividends from V	0
Royalties from T and U	1,000,000
Fees from U for services performed in the United States	1,000,000
Total gross income	40,000,000
Among other deductions, X incurs the following:	
Expenses of supervision department	1,600,000
Charitable contributions	100,000

X's Supervision Department (the Department) is responsible for the supervision of its four subsidiaries and for rendering certain services to the subsidiaries, and this Department provides all the supportive functions necessary for X's foreign activities. The Department performs three principal types of activities. The first type consists of services for the direct benefit of U for which a fee is paid by U to X. The cost of the services for U is $1,000,000. The second type consists of stewardship activities which are in the nature of a management review and generally duplicate functions performed by the subsidiaries' own employees (and are, therefore, of a type described in §1.482–2(b)(2)(ii) which would not be subject to an allocation under section 482). For example, a team of auditors from X's accounting department periodically audits the subsidiaries' books and prepares internal reports for use by X's management. Similarly, X's treasurer periodically reviews for the board of directors of X the subsidiaries' financial policies. The cost of the duplicative services and related supportive expenses is $540,000. The third type of activity consists of providing services which are ancillary to the license agreements which X maintains with subsidiaries T and U. The cost of the ancillary services is $60,000.

(ii) *Allocation.* The Department's outlay of $1,000,000 is the basis for the charge to U for services rendered, and therefore $1,000,000 is allocated to the fees paid by U. The remaining $600,000 in the Department's deductions are definitely related to the types of gross income to which they give rise, namely dividends from subsidiaries S, T, U and V and royalties from t and U. However, $60,000 of the $600,000 in deductions are found to be attributable to the ancillary serivces and are definitely related (and therefore allocable) solely to royalties received from T and U, while the remaining $540,000 in deductions are definitely related (and therefore allocable) to dividends received from all the subsidiaries.

(iii) *Apportionment.* For purposes of applying the overall limitation, the statutory grouping is gross income from sources outside the United States and the residual grouping is gross income from sources within the United States. X's deduction of $540,000 for the Supervision Department expenses and related supportive expenses which is allocable to dividends received from the subsidiaries must be apportioned between the statutory and residual groupings before the overall limitation may be applied. In determining an appropriate method for apportioning the $540,000, a basis other than X's gross income must be used since the dividend payment policies of the subsidiaries bear no relationship either to the activities of the Department or to the amount of income earned by each subsidiary. This is evidenced by the fact that V paid no dividends during the year, whereas S, T, and U paid dividends of $1 million or more each. In the absence of facts that would indicate a material distortion resulting from the use of such method, the stewardship expenses ($540,000) may be apportioned on the basis of the gross receipts of each subsidiary.

The gross receipts of the subsidiaries were as follows:	
S	$4,000,000
T	3,000,000
U	500,000
V	1,500,000
Total	9,000,000

Thus, the expenses of the Department are apportioned for purposes of the overall limitation as follows:

Apportionment of stewardship expenses to the statutory grouping of gross income: 540,000×[($3,000,000+$500,000+ $1,500,000)/ $9,000,000]	$300,000
Apportionment of supervisory expenses to the residual grouping of gross income: $540,000×$4,000,000/9,000,000	240,000
Total: Apportioned stewardship expense	$540,000

(iv) *Allocation and apportionment of charitable contributions.* Pursuant to paragraph (e)(9) of this section, charitable contributions are generally treated as deductions which are not definitely related to any gross income and are, accordingly, apportioned ratably on the basis of gross income for purposes of the overall limitation as follows:

Apportionment of charitable contributions to the statutory grouping of gross income: $100,000×[($2,000,000 + $1,000,000 + $1,000,000)/$40,000,000]	$10,000
Apportionment of charitable contributions to the residual grouping of gross income: $100,000×[($32,000,000 + $3,000,000 + $1,000,000)/$40,000,000]	90,000
Total apportioned charitable contributions	100,000

Example 19— Supportive Expense—(i) *Facts.* X, a domestic corporation, purchases and sells products both in the United States and in foreign countries. X has no foreign subsidiary and no international department. During the taxable year, X incurs the following expenses with respect to its worldwide activities:

Personnel department expenses	$50,000
Training department expenses	35,000
General and administrative expenses	55,000
President's salary	40,000
Sales manager's salary	20,000
Total	200,000

X has domestic gross receipts from sales of $750,000 and foreign gross receipts from sales of $500,000 and has gross income from such sales in the same ratio, namely $300,000 from domestic sources and $200,000 from foreign sources.

(ii) *Allocation.* The above expenses are definitely related and allocable to all of X's gross income derived from both domestic and foreign markets.

(iii) *Apportionment.* For purposes of applying the overall limitation, the statutory grouping is gross income from sources outside the United States and the residual grouping is gross income from sources within the United States. X's deductions for its worldwide sales activities must be apportioned between these groupings. Company X in this example (unlike Company X in example 18) does not have a separate international division which performs essentially all of the functions required to manage and oversee its foreign activities. The president and sales manager do not maintain time records. The division of their time between domestic and foreign activities varies from day to day and cannot be estimated on an annual basis with any reasonable degree of accuracy. Similarly, there are no facts which would justify a method of apportionment of their salaries or of one of the other listed deductions based on more specific factors than gross receipts or gross income. An acceptable method of apportionment would be on the basis of gross receipts. The apportionment of the $200,000 deduction is as follows:

Apportionment of the $200,000 expense to the statutory grouping of gross income: $200,000×[$500,000/($500,000+$750,000)]	$80,000
Apportionment of the $200,000 expense to the residual grouping of gross income: $200,000×[$750,000/($500,000+$750,000)]	120,000
Total apportioned supportive expense	200,000

Example 20— Supportive Expense—(i) *Facts.* Assume the same facts as above except that X's president devotes only 5 percent of his time to the foreign operations and 95 percent of his time to the domestic operations and that X's sales manager devotes approximately 10 percent of his time to foreign sales and 90 percent of his time to domestic sales.

(ii) *Allocation.* The expenses incurred by X with respect to its worldwide activities are definitely related, and therefore allocable to

X's gross income from both its foreign and domestic markets.

(iii) *Apportionment.* On the basis of the additional facts it is not acceptable to apportion the salaries of the president and the sales manager on the basis of gross receipts. It is acceptable to apportion such salaries between the statutory grouping (gross income from sources without the United States) and residual grouping (gross income from sources within the United States) on the basis of time devoted to each sales activity. Remaining expenses may still be apportioned on the basis of gross receipts. The apportionment is as follows:

Apportionment of the $200,000 expense to the statutory grouping of gross income:	
President's salary: $40,000×5 pct	$2,000
Sales manager's salary: $20,000×10 pct	2,000
Remaining expenses: $140,000×[$500,000/($500,000+$750,000)]	56,000
Subtotal: Apportionment of expense to statutory grouping	60,000
Apportionment of the $200,000 expense to the residual grouping of gross income:	
President's salary: $40,000×95 pct	38,000
Sales manager's salary: $20,000×90 pct	18,000
Remaining expenses: $140,000×[$750,000/($500,000+$750,000)]	84,000
Subtotal: Apportionment of expense to residual grouping	140,000
Total: Apportioned general and administrative expense	200,000

Example 21— Supportive Expense—(i) *Facts.* X, a foreign corporation doing business in the United States, is a manufacturer of metal stamping machines. X has no United States subsidiaries and no separate division to manage and oversee its business in the United States. X manufactures and sells these machines in the United States and in foreign countries A and B and has a separate manufacturing facility in each country. Sales of these machines are X's only source of income. In 1977, X incurs general and administrative expenses related to both its U.S. and foreign operations of $100,000. It has machine sales of $500,000, $1,000,000 and $1,000,000 on which it earns gross income of $200,000, $400,000 and $400,000 in the United States, country A, and country B, respectively. The income from the manufacture and sale of the machines in countries A and B is not effectively connected with X's business in the United States.

(ii) *Allocation.* The $100,000 of general and administrative expense is definitely related to the income to which it gives rise, namely a part of the gross income from sales of machines in the United States, in country A, and in country B. The expenses are allocable to this class of income, even though X's gross income from sources outside the United States is excluded income since it is not effectively connected with a U.S. trade or business.

(iii) *Apportionment* Since X is a foreign corporation, the statutory grouping is gross income effectively connected with X's trade of business in the United States, namely gross income from sources within the United States, and the residual grouping is gross income not effectively connected with a trade or business in the United States, namely gross income from countries A and B. Since there are no facts which would require a method of apportionment other than on the basis of sales or gross income, the amount may be apportioned between the two groupings on the basis of amounts of gross income as follows:

Apportionment of general and administrative expense to the statutory grouping, gross income from sources within the United States: $100,000×[$200,000/($200,000 + $400,000 + $400,000)]	$20,000
Apportionment of general and administrative expense to the residual grouping, gross income from sources without the United States: $100,000×[($400,000 + $400,000)/($200,000 + $400,000 + $400,000)]	80,000
Total apportioned general and administrative expense	100,000

Example 22— Domestic International Sales Corporations—(i) *Facts.* X, a domestic corporation, manufactures a line of kitchenware and sells it to retailers in the United States, France, and the United Kingdom. After the Domestic International Sales Corporation (DISC) legislation was passed in 1971, X established, as of January 1, 1972, a DISC and thereafter did all of its foreign marketing through sales by the DISC. In 1977 the DISC has total sales of $7,700,000 for which X's cost of goods sold is $6,000,000. Thus, the gross income attributable to exports through the DISC is $1,700,000 ($7,700,000−$6,000,000). Moreover, X has U.S. domestic sales of kitchenware of $12,000,000 on which it earned gross income of $900,000, and X receives royalty income from the foreign license of its kitchenware technology in the amount of $800,000. The DISC's expenses attributable to the resale of export property are $400,000 of which $300,000 qualify as export promotion expenses. X also incurs $125,000 of general and administrative expenses in connection with its domestic and foreign sales activities, and its foreign licensing activities. X and the DISC determine transfer prices charged on the basis of a single product grouping and the ''50–50'' combined taxable income method (without marginal costing) which permits the DISC to have a taxable income equal to 50 percent of the combined taxable income attributable to the production and sales of the export property, plus 10 percent of the DISC's export promotion expenses.

(ii) *Allocation.* For purposes of determining combined taxable income of X and the DISC from export sales, general and administrative expenses of $125,000 must be allocated to and apportioned between gross income resulting from the production and sale of kitchenware for export, and from the production and sale of kitchenware for the domestic market. The deduction of $400,000 for expenses attributable to the resale of export property is allocated solely to gross income from the production and sale of kitchenware in foreign markets.

(iii) *Apportionment.* Apportionment of expense takes place in two stages. In the first stage, for computing conbined taxable income from the production and sale of export property, the general and administrative expense should be apportioned between the statutory grouping of gross income from the export of kitchenware and the residual grouping of gross income from domestic sales and foreign licenses. In the second stage, since the limitation on the foreign tax credit requires the use of a separate limitation with respect to dividends from a DISC (section 904(d)), the general and administrative expense should be apportioned between two statutory groupings, DISC dividends and foreign royalty income (for which the overall limitation is used), and the residual grouping of gross income from sales within the United States. In the first stage, in the absence of more specific or contrary information, the general and administrative expense may be apportioned on the basis of gross income in the respective groupings, as follows:

Apportionment of general and administrative expense to the statutory grouping, gross income from exports of kitchenware: $125,000×[$1,700,000/($1,700,000 + $900,000 + $800,000)]	$62,500
Apportionment of general and administrative expense to the residual grouping, gross income from domestic sales of kitchenware and foreign royalty income from licensing kitchenware technology: $125,000×[($900,000 + $800,000)/($1,700,000 + $900,000 + $800,000)]	62,500
Total apportionment of general and administrative expense	125,000

On the basis of this apportionment, the combined taxable income, and the DISC portion of taxable income may be calculated as follows:

Gross income from exports	$1,700,000	
Less:		
DISC expense for resale of export property	400,000	
Apportioned general and administrative expense	62,500	
		$462,500
Combined taxable income from production and export of kitchenware		1,237,500
DISC income:		
50 pct of combined taxable income		618,750
10 pct of export promotion expense of $300,000		30,000
Total DISC income		648,750
DISC income as a percentage of combined taxable income		52.4

In the second stage, in the absence of more specific or contrary information, the general and administrative expense may also be apportioned on the basis of gross income in the respective groupings. Since DISC taxable income is 52.4 percent of combined taxable income, DISC gross income is treated as 52.4 percent of the gross income from exports $1,700,000. The apportionment follows:

Apportionment of general and administrative expense to the statutory grouping, DISC dividends: $125,000×[(0.524×$1,700,000)/($1,700,000 + $900,000 + $800,000)]	$32,750
Apportionment of general and administrative expense to the statutory grouping, foreign royalty income: $125,000×[$800,000/($1,700,000 + 900,000 + $800,000)]	29,412
Apportionment of general and administrative expense to the residual grouping, gross income from sources within the United States: $125,000×[($900,000 + (0.476 ×$1,700,000))/($1,700,000 + $900,000 + $800,000)]	62,838
Total apportioned general and administrative expense	125,000

(iv) This *Example* 22 applies only to DISC taxable years ending before January 1, 1987, and to distributions from a DISC or former DISC with respect to DISC or former DISC taxable years ending before January 1, 1987.

Example 23— [Reserved]

Example 24— [Reserved] For guidance, see § 1.861–8T(g) *Example* 24.

Example 25— Income Taxes—(i) *Facts.* X, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states A, B, and C. X also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In 1988, X has taxable income from these activities, as described under the Code (without taking into account the deduction for state income taxes), of $1,000,000, of which $200,000 is foreign source general limitation income subject to a separate limitation under section 904(d)(1)(I) (''general limitation income'') and $800,000 is domestic source income. States A, B, and C each determine X's income subject to tax within their state by making adjustments to X's taxable income as determined under the Code, and then apportioning the adjusted taxable income on the basis of the relative amounts of X's payroll, property, and sales within each state as compared to X's worldwide payroll, property, and sales. The adjustments made by states A, B, and C all involve adding and subtracting enumerated items from taxable income as determined under the Code. However, in making these adjustments to taxable income, none of the states specifically exempts foreign source income as determined under the Code. On this basis, it is determined that X has taxable income of $550,000, $200,000, and $200,000 in states A, B, and C, respectively. The corporate tax rates in states A, B, and C are 10 percent, 5 percent, and 2 percent, respectively, and X has total state income tax liabilities of $69,000 ($55,000 + $10,000 + $4,000), which it deducts as an expense for federal income tax purposes.

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since the statutes of states A, B, and C do not specifically exempt foreign source income (as determined under the Code) from taxation and since, in the aggregate, states A, B, and C tax $950,000 of X's income while only $800,000 is domestic source income under the Code, it is presumed that state income taxes are imposed on $150,000 of foreign source income. The deduction for state income taxes is therefore related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The state income tax deduction of $69,000 must be apportioned between these two groupings. Corporation X calculates the apportionment on the basis of the relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, state income taxes are presumed to be imposed on $800,000 of domestic source income and $150,000 of foreign source general limitation income.

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $69,000 × ($150,000/$950,000)	$10,895
State income tax deduction apportioned to income from sources within the United States (residual grouping): $69,000 × ($800,000/$950,000)	58,105
Total apportioned state income tax deduction	$69,000

Example 26— Income Taxes—(i) *Facts.* Assume the same facts as in Example 25 except that the language of state A's statute and the statute's operation exempt from taxation all foreign source income, as determined under the Code, so that foreign source income is not included in adjusted taxable income subject to apportionment in state A (and factors relating to X's country Y branch are not taken into account in computing the state A apportionment fraction).

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since state A exempts all foreign source income by statute, state A is presumed to impose tax on $550,000 of X's $800,000 of domestic source income. X's state A tax of $55,000 is allocable, therefore, solely to domestic source income. Since the statutes of states B and C do not specifically exclude all foreign source income as determined under the Code, and since states B and C impose tax on $400,000 ($200,000 + $200,000) of X's income of which only $250,000 ($800,000 − $550,000) is presumed to be domestic source, the deduction for the $14,000 of income taxes imposed by states B and C is related and allocable to both foreign source and domestic source income.

(iii) *Apportionment.* (A) For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The deduction of $14,000 for income taxes of states B and C must be apportioned between these two groupings.

(B) Corporation X calculates the apportionment on the basis of the relative amounts of foreign source general limitation income and U.S. source income subject to state taxation.

States B and C income tax deduction apportioned to foreign source general limitation income (statutory grouping): $14,000 × ($150,000/$400,000)	$5,250
States B and C income tax deduction apportioned to income from sources within the United States (residual grouping): $14,000 × ($250,000/$400,000)	8,750
Total apportioned state income tax deduction	$14,000

(C) Of X's total income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $5,250. The total amount of state income taxes allocated and apportioned to U.S. source income equals $63,750 ($55,000 + $8,750).

Example 27— Income Tax—(i) *Facts.* Assume the same facts as in Example 25 except that state A, in which X has significant income-producing activities, does not impose a corporate income tax or other state tax computed on the basis of income derived from business activities conducted in state A. X therefore has a total state income tax liability in 1988 of $14,000 ($10,000 paid to state B plus $4,000 paid to state C), all of which is subject to allocation and apportionment under paragraph (b) of this section.

(ii) *Allocation.* (A) X's deduction of $14,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. However, in these facts, an adjustment is necessary before the aggregate state taxable incomes can be compared with U.S. source income on the federal income tax return in the manner described in Examples 25 and 26. Unlike the facts in Examples 25 and 26, state A imposes no income tax and does not define taxable income attributable to activities in state A. The total amount of X's income subject to state taxation is, therefore, $400,000 ($200,000 in state B and $200,000 in state C). This total presumptively does not include any income attributable to activities performed in state A and therefore can not properly be compared to total U.S. source taxable income reported by X for federal income tax purposes, which does include income attributable to state A activities.

(B)(*1*) Accordingly, before applying the method used in Examples 25 and 26 to the facts of this example, it is necessary first to estimate the amount of taxable income that state A could reasonably attribute to X's activities in state A, and then to reduce federal taxable income by that amount.

(*2*) Any reasonable method may be used to attribute taxable income to X's activities in state A. For example, the rules of the Uniform Division of Income for Tax Purposes Act (''UDITPA'') attribute income to a state on the basis of the average of three ratios that are based upon the taxpayer's facts—property within the state over total property, payroll within the state over total payroll, and sales within the state over total sales—and, with adjustments, provide a reasonable method for this purpose. When applying the rules of UDITPA to estimate U.S. source income derived from state A activities, the taxpayer's UDITPA factors must be adjusted to eliminate both taxable income and factors attributable to a foreign branch. Therefore, in this example all taxable income as well as UDITPA apportionment factors (property, payroll, and sales) attributable to X's country Y branch must be eliminated.

(C)(*1*) Since it is presumed that, if state A had had an income tax, state A would not attempt to tax the income derived by X's country Y branch, any reasonable estimate of the income that would be taxed by state A must exclude any foreign source income.

(*2*) When using the rules of UDITPA to estimate the income that would have been taxable by state A in these facts, foreign source income is excluded by starting with federally defined taxable income (before deduction for state income taxes) and subtracting any income derived by X's country Y branch. The hypothetical state A taxable income is then determined by multiplying the resulting difference by the average of X's state A property, payroll, and sales ratios, determined using the principles of UDITPA (after adjustment by eliminating the country Y branch factors). The resulting product is presumed to be exclusively U.S. source income, and the allocation and apportionment method described in Example 26 must then be applied.

(*3*) If, for example, state A taxable income were determined to equal $550,000, then $550,000 of U.S. source income for federal income tax purposes would be presumed to constitute state A taxable income. Under Example 26, the remaining $250,000 ($800,000 − $550,000) of U.S. source income for federal income tax purposes would be presumed to be subject to tax in states B and C. Since states B and C impose tax on $400,000, the application of Example 25 would result in a presumption that $150,000 is foreign source income and $250,000 is domestic source income. The deduction for the $14,000 of income taxes of states B and C would therefore be related and allocable to both foreign source and domestic source income and would be subject to apportionment.

(iii) *Apportionment.* The deduction of $14,000 for income taxes of states B and C is apportioned in the same manner as in Example 26. As a result, $5,250 of the $14,000 of state B and state C income taxes is apportioned to foreign source general limitation income ($14,000 × $150,000/$400,000), and $8,750 ($14,000 × $250,000/$400,000) of the $14,000 of state B and state C income taxes is apportioned to U.S. source income.

Example 28— Income Tax—(i) *Facts.* (A) Assume the same facts as in Example 25 (X has $1,000,000 of taxable income for federal income tax purposes, $800,000 of which is U.S. source income and $200,000 of which is foreign source general limitation income), except that $100,000 of X's $200,000 of foreign source general limitation income consists of dividends from first-tier controlled foreign corporations (''CFCs'') (as defined in section 957(a) of the Code) which derive exclusively foreign source general limitation income. X owns stock representing 10 to 50 percent of the vote and value in such CFCs.

(B) State A taxable income is computed by first making adjustments to X's federal taxable income. These adjustments result in X having a total of $1,100,000 of apportionable taxable income for state A tax purposes. None of the $100,000 of adjustments made by state A relate to the dividends paid by the CFCs. As in Example 25, the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the ''state apportionment fraction'') that compares the relative amounts of X's payroll, property, and sales within state A with X's worldwide payroll, property and sales. An analysis of state A law indicates that state A law includes in its definition of the taxable business income of X which is apportionable to X's state A activities, dividends paid to X by its subsidiaries that are in the same business as X, but are less than 50 percent owned by X (‘‘portfolio dividends’’). The dividends received by X from the 10 to 50 percent owned first-tier CFCs, therefore, are considered to be portfolio dividends includable in apportionable business income for state A tax purposes. However, the factors of these CFCs are not included in the state A apportionment fraction for purposes of apportioning income to X’s activities in the state. The comparison of X’s state A factors with X’s worldwide factors results in a state apportionment fraction of 50 percent. Applying this fraction to apportionable taxable income of $1,100,000, as determined under state law, results in attributing 50 percent of apportionable taxable income to state A, and produces total state A taxable income of $550,000. State A imposes an income tax at a rate of 10 percent on the amount of income that is attributed to state A, which results in $55,000 of tax imposed by state A.

(ii) *Allocation*. (A) States A, B, and C impose income taxes of $69,000 which must be allocated to the classes of gross income upon which the taxes are imposed. A portion of X’s federal income tax dedution of $55,000 for state A income tax is definitely related and thus allocable to the class of gross income consisting of foreign source portfolio dividends. A definite relationship exists between a deduction for state income tax and portfolio dividends when a state includes portfolio dividends in state taxable income apportionable to the state, but determines state taxable income by applying an apportionment fraction that excludes the factors of the corporations paying those dividends. By applying a state apportionment fraction that excludes factors of the corporations paying portfolio dividends to apportionable taxable income that includes the $100,000 of foreign source portfolio dividends, $50,000 (50 percent of the $100,000) of the portfolio dividends is attributed to X’s activities in state A and subjected to state A income tax. Applying the state A income tax rate of 10 percent to the $50,000 of foreign source portfolio dividends subjected to state A income tax, $5,000 of X’s $55,000 total state A income tax liability is definitely related and allocable to a class of gross income consisting of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends from the first-tier CFCs are included within the general limitation described in section 904(d)(1)(I), the $5,000 of state A tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned. (If the total amount of state A tax imposed on foreign source portfolio dividends were to exceed the actual amount of X’s state A income tax liability (for example, due to net operating losses), the actual amount of state A tax would be allocated entirely to those foreign source portfolio dividends.) After allocation of a portion of the state A tax to portfolio dividends, $50,000 ($55,000 − $5,000) of state A tax remains to be allocated.

(B) A total of $64,000 (the aggregate of the $50,000 remaining state A tax, and the $10,000 and $4,000 of taxes imposed by states B and C, respectively) is to be allocated (as provided in Example 25) by comparing U.S. source taxable income (as determined under the Code) with the aggregate of the state taxable incomes determined by states A, B, and C (after reducing state apportionable taxable incomes by the amount of any portfolio dividends included in apportionable taxable income to which tax has been specifically allocated). X’s state A taxable income, after reduction by the $50,000 of portfolio dividends taxed by state A, equals $500,000. X also has taxable income of $200,000 and $200,000 in states B and C, respectively. In the aggregate, therefore, states A, B, and C tax $900,000 of X’s income, after excluding state taxable income attributable to portfolio dividends. Since X has only $800,000 of U.S. source taxable income for federal income tax purposes, it is presumed that state income taxes are imposed on $100,000 of foreign source income. The remaining deduction of $64,000 for state income taxes is therefore related and allocable to both foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment*. For purposes of computing the foreign tax credit limitation, X’s income is comprised of one statutory grouping, foreign source general limitation income, and one residual grouping, gross income from sources within the United States. The remaining state income tax deduction of $64,000 must be apportioned between these two groupings on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, the $64,000 of state income taxes is considered to be imposed on $800,000 of domestic source income and $100,000 of foreign source general limitation income and is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $64,000 × ($100,000/$900,000)	$7,111
State income tax deduction apportioned to income from sources within the United States (residual grouping): $64,000 × ($800,000/$900,000)	56,889
Total apportioned state income tax deduction	$64,000

Of the total state income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $12,111 ($5,000 + $7,111). The total amount of state income taxes allocated and apportioned to U.S. source income equals $56,889.

Example 29— Income Taxes—(i) *Facts.* (A) P, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states F, G, and H. P also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In addition, P has three wholly owned subsidiaries, US1, US2, and FS, the latter a controlled foreign corporation (''CFC'') as defined in section 957(a) of the Code. P also owns stock representing 10 to 50 percent of the vote and value of various other first-tier CFCs that derive exclusively foreign source general limitation income.

(B) In 1988, P derives $1,000,000 of federal taxable income (without taking into account the deduction for state income taxes), which consists of $250,000 of foreign source general limitation income and $750,000 of U.S. source income. The foreign source general limitation income consists of a $25,000 subpart F inclusion with respect to FS, $150,000 of dividends from the other first-tier CFCs deriving exclusively foreign source general limitation income, in which P owns stock representing 10 to 50 percent of the vote and value, and $75,000 of manufacturing and sales income derived by P's U.S. operations and country Y branch. The $750,000 of U.S. source income consists of manufacturing and sales income derived by P's U.S. operations.

(C) For federal income tax purposes, US1 derives $75,000 of taxable income, before deduction for state income taxes, which consists entirely of U.S. source income. US2, a so-called ''80/20'' corporation described in section 861(c)(1), derives $250,000 of federal taxable income before deduction for state or foreign income taxes, all of which is derived from foreign operations and consists entirely of foreign source general limitation income. FS is not engaged in a U.S. trade or business and derives $550,000 of foreign source general limitation income before deduction for foreign income taxes.

(D) State F imposes a corporate income tax of 10 percent of P's state F taxable income, which is determined by formulary apportionment of the total taxable income attributable to P's worldwide unitary business. State F determines P's taxable income for state F tax purposes by first making adjustments to the taxable income, as determined for federal income tax purposes, of the members of the unitary business group to determine the total taxable income of the group. State F then computes P's state taxable income by attributing a portion of that unitary business taxable income to activities of P that are conducted in state F. State F does this by multiplying the unitary business taxable income (federal taxable income with state adjustments) by a fraction (the ''state apportionment fraction'') that compares the relative amounts of the unitary business group's payroll, property, and sales (the ''factors'') in state F with the payroll, property, and sales of the unitary business group. P is the only member of its unitary business group that has state F factors and that is thereby subject to state F income tax and filing requirements. State F defines the unitary business group to include any corporation more than 50 percent of which is directly or indirectly owned by a state F taxpayer and is engaged in the same unitary business. P's unitary business group, therefore, includes P, US1, US2, and FS, but does not include the 10 to 50 percent owned CFCs. The income of the unitary business group excludes intercompany dividends between members of the unitary business group and subpart F inclusions with respect to a member of the unitary business group. Dividends paid from nonmembers of the unitary group (the 10 to 50 percent owned CFCs) for state F tax purposes are referred to as ''portfolio dividends'' and are included in taxable income of the unitary business. None of the factors (in state F or worldwide) of the corporations paying portfolio dividends are included in the state F apportionment fraction for purposes of apportioning total taxable income of the unitary business to P's state F activities.

(E) After state adjustments to the taxable income of the unitary business group, as determined under federal tax principles, the total taxable income of P's unitary business group equals $2,000,000, consisting of $1,050,000 of P's income ($100,000 of foreign source manufacturing and sales income, $150,000 of foreign source portfolio dividends, and $800,000 of U.S. source manufacturing and sales income, but excluding the $25,000 subpart F inclusion attributable to FS since FS is a member of the unitary business group), $100,000 of US1's income (from sales made in the United States), $275,000 of US2's income (from an active business outside the United States), and $575,000 of FS's income. The differences between taxable income under federal tax principles and state F apportionable taxable income for P, US1, US2, and FS represent adjustments to taxable income under federal tax principles that are made pursuant to the tax laws of state F.

(F) The taxable income for each member of the unitary business group under federal tax principles and state law principles is summarized in the following table. (The items of income listed in the ''Federal'' column of the table refer to taxable income before deduction for state income tax.)

	Federal	State F
P		
U.S. source income	$750,000	$800,000
Foreign source general limitation income:		
Portfolio dividends	150,000	150,000
Subpart F income	25,000	0
Manufacturing and sales income	75,000	100,000
Total taxable income	1,000,000	1,050,000
US1		
U.S. source income	75,000	100,000
US2		
Foreign source general limitation income	250,000	275,000
FS		
Foreign source general limitation income	550,000	575,000
Taxable income of the unitary business group	....	2,000,000

(G) State F deems P to have state F taxable income of $500,000, which is determined by multiplying the total taxable income of the unitary business group ($2,000,000) by the group's state F apportionment fraction, which is assumed to be 25 percent in these facts. P's state F taxable income is then multiplied by the state F tax rate of 10 percent, resulting in a state F tax liability of $50,000. State G and state H, unlike state F, do not tax portfolio dividends. Although state G and state H apportion taxable income, respectively, on the basis of an apportionment fraction that compares state factors to total factors, state G and state H, unlike state F, do not apply a unitary business theory and consider only P's taxable income and factors in computing P's taxable income. P's taxable income under state G law equals $300,000, which is subject to a 5 percent tax rate resulting in a state G tax liability of $15,000. P's taxable income under state H law is $300,000, which is subject to a tax rate of 2 percent resulting in a state H tax liability of $6,000. P has a total federal income tax deduction for state income taxes of $71,000 ($50,000 + 15,000 + 6,000).

(ii) *Allocation.* (A) P's deduction of $71,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. Adjustments may be necessary, however, before aggregate state taxable incomes can be compared with U.S. source taxable income on the federal income tax return in the manner described in Examples 25 and 26. In allocating P's deduction for state income taxes, it is necessary first to determine the portion, if any, of the deduction that is definitely related and allocable to a particular class of gross income. A definite relationship exists between a deduction for state income tax and dividend income when a state includes portfolio dividends in state taxable income apportionable to the taxpayer's activities in the state, but determines state taxable income by applying an apportionment formula that excludes the factors of the corporations paying portfolio dividends.

(B) In this case, $150,000 of foreign source portfolio dividends are subject to a state F apportionment fraction of 25 percent, which results in a total of $37,500 of state F taxable income attributable to such dividends. As illustrated in Example 28, $3,750 ($150,000 × 25 percent state F apportionment percentage × 10 percent state F tax rate) of P's state F income tax is definitely related and allocable to a class of gross income consisting entirely of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends paid by first-tier CFCs are included within the general limitation described in section 904(d)(1)(I), the $3,750 of state F tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned.

(C) After reducing state F taxable income of the unitary business group by the taxable income attributable to portfolio dividends, P's remaining state F taxable income equals $462,500 ($500,000 − $37,500), the portion of the taxable income of the unitary business that state F attributes to P's activities in state F. Accordingly, in order to allocate and apportion the remaining $46,250 of state F tax ($50,000 of state F tax minus the $3,750 of state F tax allocated to foreign source portfolio dividends), it is necessary first to determine if state F is taxing only P's non-unitary taxable income (as defined below) or is imposing its tax partly on other unitary business income that is attributed under state F law to P's activities in state F. P's state F non-unitary taxable income is computed by applying the state F apportionment formula, solely on the basis of P's income (excluding portfolio dividends) and state F apportionment factors. If the state F taxable income (after reduction by the portfolio dividends attributed to state F) attributed to P under state F law exceeds P's non-unitary taxable income, a portion of the state F tax must be allocated and apportioned on the basis of the other unitary business income that is attributed to and taxable to P under state F law. If P's non-unitary taxable income equals or exceeds the $462,500 of remaining state F taxable income, it is presumed that state F is only taxing P's non-unitary taxable income, so that the entire amount of the remaining state F tax should be allocated and apportioned in the manner described in Example 25.

(D) If P's non-unitary taxable income is less than the $462,500 of remaining state F taxable income (after reduction for the

$37,500 of state F taxable income attributable to portfolio dividends), it is presumed that state F is attributing to P, and taxing P upon, other unitary business income. In such a case, it is necessary to determine if state F is attributing to P, and imposing its income tax on, a part of the foreign source income that would be generally presumed under separate accounting to be the income of foreign affiliates and 80/20 companies included in the unitary group, or whether state F is limiting the income it attributes to P, and its taxation of P, to the U.S. source income that would be generally presumed under separate accounting to be the income of domestic members of the unitary group.

(E) Assume for purposes of this example that the non-unitary taxable income attributable to P equals $396,000, computed by multiplying P's state F taxable income of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) by P's non-unitary state F apportionment fraction, which is assumed to be 44 percent. Because P's non-unitary taxable income of $396,000 is less than the $462,500 of remaining state F taxable income, state F is presumed to be attributing to P and taxing the income that would have been generally attributed under separate accounting to P's affiliates in the unitary group. To determine if state F tax is being imposed on members of the unitary group (other that P) that produce foreign source income, it is necessary to compute a hypothetical state F taxable income for all companies in the unitary group with significant U.S. operations. (For this purpose, the hypothetical group of companies with significant domestic operations is referred to as the ''water's edge group.'') State F is presumed to be attributing to P and taxing income that would have been generally attributable under separate accounting to foreign corporations and 80/20 companies to the extent that the remaining state F taxable income ($462,500) of P exceeds the hypothetical state F taxable income that would have been attributed under state F law to P if state F had defined the unitary group to be the water's edge group.

(F) The members of the water's edge group would have been P and US1. The unitary business income of this water's edge group is $1,000,000, the sum of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) and $100,000 (US1's state F taxable income). For purposes of this example, the state F apportionment fraction determined on a unitary basis for this water's edge group is assumed to equal 40 percent, the average of P and US1's state F payroll, property, and sales factor ratios (the water's edge group's state F factors over its worldwide factors). Applying this apportionment fraction to the $1,000,000 of unitary business income of the water's edge group yields state F water's edge taxable income of $400,000. The excess of the remaining $462,500 of P's state F taxable income over the $400,000 of P's state F water's edge taxable income equals $62,500, and is attributable to the inclusion of US2 and FS in the unitary group. The state F tax attributable to the $62,500 of taxable income attributed to P under state F law, and that would have generally been attributed to US2 and FS under non-unitary accounting, equals $6,250 and is allocated entirely to a class of gross income consisting of foreign source general limitation income, because the income of FS and US2 consists entirely of such income. After the $6,250 of state F tax attributable to US2 and FS is subtracted from the remaining $46,250 of net state F tax, P has $40,000 of state F tax remaining to be allocated and apportioned.

(G) To the extent that the remainder of P's state F taxable income ($400,000) exceeds P's non-unitary state F taxable income ($396,000), it is presumed that state F is attributing to and imposing on P a tax on U.S. source income that would have been attributed under separate accounting to members of the water's edge group other than P. In these facts, the $4,000 difference in P's state F taxable income results from the inclusion of US1 in the unitary group. The $400 of P's state F tax attributable to this $4,000 is allocated entirely to P's U.S. source income. P's remaining $39,600 of state F tax ($40,000 of P's state F tax resulting from the attribution of P of income that would have been attributed under non-unitary accounting to other members of the water's edge group, minus $400 of state F tax attributable to US1 and allocated to P's U.S. source income) is the state F tax attributable to P's non-unitary state F taxable income that is to be allocated and apportioned together with P's state G tax of $15,000 and state H tax of $6,000 as illustrated in Example 25.

(H) In allocating the $60,600 of state tax liabilities ($39,600 state F tax attributable to P's non-unitary state F income + $15,000 state G tax + $6,000 state H tax) under Example 25, P's state taxable income in state G and state H ($300,000 + $300,000) must be added to P's non-unitary state F taxable income ($396,000). The resulting $996,000 of combined state taxable incomes is compared with $750,000 of U.S. source income on P's federal income tax return. Because P's combined state taxable incomes exceeds P's federal U.S. source taxable income, it is presumed that the remaining $60,600 of P's total state income taxes is imposed in part on foreign source income. Accordingly, P's remaining deduction of $60,600 ($39,600 + $15,000 + $6,000) for state income taxes is related and allocable to both P's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* The $60,600 of state taxes (the remaining $39,600 of state F tax + $15,000 of state G tax + $6,000 of state H tax) must be apportioned between foreign source general limitation income and U.S. source income for federal income tax purposes. This apportionment is based upon the relative amounts of foreign source general limitation taxable income and U.S. source taxable income comprising the $996,000 of income subject to tax by the states, after reducing the total amount of income subject to tax by the portfolio dividends and the income attributed to P under state F law that would have been attributed under arm's length principles to other members of P's state F unitary business group. The deduction for the $60,600 of state income taxes is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $60,600 x ($246,000/$996,000)	$14,967
State income tax deduction apportioned to income from sources within the United States (residual grouping): $60,600 x ($750,000/$996,000)	45,633
Total apportioned state income tax deduction	60,600

Of the total state income taxes of $71,000, the amount allocated and apportioned to foreign source general limitation income is $24,967—the sum of $14,967 of state F, state G, and state H taxes apportioned to foreign source general limitation income, $3,750 of state F tax allocated to foreign source apportionable dividend income, and the $6,250 of state F tax allocated to foreign source general limitation income as the result of state F's worldwide unitary business theory of taxation. The total amount of state income taxes allocated and apportioned to U.S. source income equals $46,033—the sum of the $400 of state F tax attributable to the inclusion of US1 in the state F unitary business group and $45,633 of combined state F, G, and H tax apportioned under the method provided in Example 25.

Example 30— Income Taxes—(i) *Facts.* (A) As in Example 17 of §1.861–8(g), X is a domestic corporation that wholly owns M, N, and O, also domestic corporations. X, M, N, and O file a consolidated income tax return. All the income of X and O is from sources within the United States, all of M's income is from sources within South America, and all of N's income is from sources within Africa. X receives no dividends from M, N, or O. During the taxable year, the consolidated group of corporations earned consolidated gross income of $550,000 and incurred total deductions of $370,000. X has gross income of $100,000 and deductions of $50,000, without regard to its deduction for state income tax. Of the $50,000 of deductions incurred by X, $15,000 relates to X's ownership of M; $10,000 relates to X's ownership of N; $5,000 relates to X's ownership of O; and the entire $30,000 constitutes stewardship expenses. The remainder of X's $20,000 of deductions (which is assumed not to include state income tax) relates to production of income from its plant in the United States. M has gross income of $250,000 and deductions of $100,000, which yield foreign source taxable income of $150,000. N has gross income of $150,000 and deductions of $200,000, which yield a foreign source loss of $50,000. O has gross income of $50,000 and deductions of $20,000, which yield U.S. source taxable income of $30,000.

(B) Unlike Example 17 of §1.861–8(g), however, X also has a deduction of $1,800 for state A income taxes. X's state A taxable income is computed by first making adjustments to the federal taxable income of X to derive apportionable taxable income for state A tax purposes. An analysis of state A law indicates that state A law also includes in its definition of the taxable business income of X which is apportionable to X's state A activities, the taxable income of M, N, and O, which is related to X's business. As in Example 25, the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the ''state apportionment fraction'') that compares the relative amounts of payroll, property, and sales within state A with worldwide payroll, property and sales. Assuming that X's apportionable taxable income equals $180,000, $100,000 of which is from sources without the United States, and $80,000 is from sources within the United States, and that the state apportionment fraction is equal to 10 percent, X has state A taxable income of $18,000. The state A income tax of $1,800 is then derived by applying the state A income tax rate of 10 percent to the $18,000 of state A taxable income.

(ii) *Allocation and apportionment.* In accordance with §1.1502–4, each corporation must first compute its separate taxable income for purposes of computing the consolidated limitation on the foreign tax credit. Assume that under Example 29, it is determined that X's deduction for state A income tax is definitely related to a class of gross income consisting of income from sources both within and without the United States, and that the state A tax is apportioned $1,000 to sources without the United States, and $800 to sources within the United States. Under Example 17, without regard to the deduction for X's state A income tax, X has a separate loss of ($25,000) from sources without the United States. After taking into account the deduction for state A income tax, X's separate loss from sources without the United States is increased by the $1,000 state A tax apportioned to sources without the United States, and equals a loss of ($26,000), for purposes of computing the numerator of the consolidated foreign tax credit limitation.

Example 31— Income Taxes—(i) *Facts.* Assume that the facts are the same as in Example 29, except that state G requires P to adjust its federal taxable income by depreciating an asset at a different rate than is allowed P under the Internal Revenue Code for the same asset. Before using the methodology of Example 25 to determine whether a portion of its deduction for state income taxes is allocable to a class of gross income that includes foreign source income, P recomputes its taxable income under state G law by using the rate of depreciation that it is entitled to use under the Code, and uses this recomputed amount in applying the methodology of Example 25.

(ii) *Allocation.* P's modification of its state G taxable income is permissible. Under the methdology of Example 25, this modification of state G taxable income will produce a reasonable determination of the portion (if any) of P's state income taxes that is allocable to a class of gross income that includes foreign sources income.

Example 32— Income Taxes—(i) *Facts.* Assume the facts are the same as Example 29, except that P's state F taxable income differs from the amount of its U.S. source income under federal income tax principles solely because state F determines P's state taxable income under a worldwide unitary business theory instead of the arm's length principles applied in the Code. Before using the methodology of Example 25 to determine whether a portion of its deduction for state income taxes is allocable to a class of gross income that includes foreign source income, P recomputes state F taxable income under the arm's length principles applied in the Code. P substitutes that recomputed amount for the amount of taxable income actually determined under state F law in applying the methodology of Example 25.

(ii) *Allocation.* P's modification of state F taxable income does not accurately reflect the factual relationship between the deduction for state F income tax and the income on which the tax is imposed, because there is no factual relationship between the state F income tax and the state F taxable income as recomputed under Code principles. State F does not impose its income tax upon P's income as it might have been defined under the Internal Revenue Code. Consequently, P's modification of state F taxable income is impermissible because it will not produce a reasonable determination of the portion (if any) of P's state income taxes that is allocable to a class of gross income that includes foreign source income.

Example 33— Income Taxes—(i) *Facts.* Assume the same facts as in Example 29, except that state G does not impose an income tax on corporations, and P's non-unitary state F taxable income equals $462,500. Thus only $56,000 of state income taxes ($50,000 of state F income tax and $6,000 of state H income tax) are deductible and required to be allocated and (if necessary) apportioned. As in Example 29, P has $800,000 of aggregate state taxable income ($500,000 of state F taxable income and $300,000 of state H taxable income).

(ii) *Method One.* Assume that P has elected to allocate and apportion its deduction for state income tax under the safe harbor method provided in § 1.861–8 (e)(6)(ii)(D)(*2*) (''Method One'').

(A) *Step One—Specific allocation to foreign source portfolio dividends.* P applies the methodology of paragraph (ii) of *Example 28* to determine the portion of the deduction that must be allocated to a class of gross income consisting solely of foreign source portfolio dividends. As illustrated in paragraphs (ii)(A) and (B) of Example 29, $3,750 of the deduction for state F income tax is attributable to the $37,500 of foreign source portfolio dividends attributed under state F law to P's activities in state F. Thus $3,750 of P's deduction for state income tax must be specifically allocated to a class of gross income consisting solely of $37,500 of foreign source portfolio dividends. No apportionment of the $3,750 is necessary. P's adjusted state taxable income is $762,500 (aggregate state taxable income of $800,000 reduced by $37,500 of foreign source portfolio dividends). Because the remaining amount of state F taxable income ($462,500) equals P's non-unitary state F taxable income, no further specific allocation of state tax is required.

(B) *Step Two—Adjustment of U.S. source federal taxable income.* P applies the methodology illustrated in paragraph (ii) of Example 27 (including the rules of UDITPA described therein) to determine the amount of its federal taxable income attributable to its activities in state G. Assume that P determines under this methodology that $300,000 of its federal taxable income is attributable to activities in state G. P's adjusted U.S. source federal taxable income equals $450,000 ($750,000 minus the $300,000 attributed to P's activities in state G).

(C) *Step Three—Allocation.* The portion of P's deduction for state income tax remaining to be allocated equals $52,250 ($56,000 minus the $3,750 specifically allocated to foreign source portfolio dividends). P allocates this portion by applying the methodology illustrated in paragraph (ii) of Example 25, as modified by paragraph (e)(6)(ii)(D)(*2*)(*iii*) of this section. Thus, P compares its adjusted state taxable inocme (as determined under Step One in paragraph (A) above) with an amount equal to 110% of its adjusted U.S.

source federal taxable income (as determined under Step Two in paragraph (B) above). Because P's adjusted state taxable income ($762,500) exceeds 110% of P's adjusted U.S. source federal taxable income ($495,000, or 110% of $450,000), the remaining portion of P's deduction for state income tax ($52,500) must be allocated to a class of gross income that includes both U.S. and foreign source income.

(D) *Step Four—Apportionment.* P must apportion to U.S. source income the portion of the deduction that is attributable to state income tax imposed upon state taxable income in an amount equal to 110% of P's adjusted U.S. source federal taxable income. The remainder of the deduction must be apportioned to foreign source general limitation income.

Amount of deduction to be apportioned	$52,250.00
Less portion of deduction to be apportioned to income from sources within the United States (residual grouping): ($52,250 × ($495,000/$762,500)	$33,919.67
Equals Portion of deduction to be apportioned to foreign source general limitation income (statutory grouping):	$18,330.33

(iii) *Method Two.* Assume that P has elected to allocate and apportion its deduction for state income tax under the safe harbor method provided in §1.861–8(e)(6)(ii)(D)(*3*) ("Method Two").

(A) *Step One—Specific allocation.* Step One of Method Two is the same as Step One of Method One. Therefore, as described in paragraph (A) of paragraph (ii) above, $3,750 of P's deduction for state income tax must be specifically allocated to a class of gross income consisting solely of $37,500 of foreign source portfolio dividends. No apportionment of the $3,750 is necessary. P's adjusted state taxable income is $762,500 (aggregate state taxable income of $800,000 reduced by $37,500 of foreign source portfolio dividends).

(B) *Step Two—Adjustment of U.S. source federal taxable income.* Step Two of Method Two is the same as Step Two of Method One. Therefore, as described in paragraph (B) of paragraph (ii) above, assume that P determines that $300,000 of its federal taxable income is attributable to activities in state G. P's adjusted U.S. source federal taxable income equals $450,000 ($750,000 minus the $300,000 attributed to P's activities in state G).

(C) *Step Three—Allocation.* The portion of P's deduction for state income tax remaining to be allocated equals $52,250 ($56,000 minus the $3,750 of state F income tax specifically allocated to foreign source portfolio dividends). P allocates this portion by applying the methodology illustrated in paragraph (ii) of Example 25, as modified by paragraph (e)(6)(ii)(D)(*3*)(*iii*) of this section. Thus, P compares its adjusted state taxable income (as determined under Step One in paragraph (A) above) with its adjusted U.S. source federal taxable income (as determined under Step Two in paragraph (B) above). Because P's adjusted state taxable income ($762,500) exceeds P's adjusted U.S. source federal taxable income ($450,000), the remaining portion of P's deduction for state income tax ($52,500) must be allocated to a class of gross income that includes both U.S. and foreign source income.

(D) *Step Four—Apportionment.* P must apportion to U.S. source income the portion of the deduction that is attributable to state income tax imposed upon state taxable income in an amount equal to P's adjusted U.S. source federal taxable income.

Amount of deduction to be apportioned	$52,250.00
Less portion of deduction initially apportioned to income from sources within the United States (residual grouping): $52,250 × ($450,000/$762,500)	30,836.07
Remainder requiring further apportionment: $52,250 × ($312,500/ $762,500)	21,413.93

The remainder of $21,413.93 must be further apportioned between foreign source general limitation income and U.S. source federal taxable income in the same proportions that P's adjusted U.S. source federal taxable income and foreign source general limitation income bear to P's total federal taxable income (taking into account the adjustment of U.S. source federal taxable income and reduced by the amount of foreign source portfolio dividends to which the tax has been specifically allocated).

Portion of remainder apportioned to foreign source general limitation income (statutory grouping): $21,413.93 X ($212,500/$662,500)	$6,868.62
Remaining state income tax deduction to be apportioned to income from sources within the United States (residual grouping): $21,413.93 X ($450,000/$662,500)	$14,545.31

Of P's total deduction of $56,000 for state income tax, the portion allocated and apportioned to foreign source general limitation income equals $10,618.62—the sum of $6,868.62 apportioned under Step Four and the $3,750.00 specifically allocated to foreign source portfolio dividend income under Step One. The portion of the deduction allocated and apportioned to U.S. source income equals $45,381.38—the sum of the $30,836.07

and the $14,545.31 apportioned under Step Four.

(Secs. 882(c) and 7805 of the Internal Revenue Code of 1954 (80 Stat. 1556; 26 U.S.C. 882(c) and 68A Stat. 917; 26 U.S.C. 7805))

[T.D. 7456, 42 FR 1195, Jan. 6, 1977, as amended by T.D. 7749, 46 FR 1683, Jan. 7, 1981; T.D. 7939, 49 FR 4207, Feb. 3, 1984; T.D. 8228, 53 FR 35474, Sept. 14, 1988; T.D. 8286, 55 FR 3052, Jan. 30, 1990; T.D. 8337, 56 FR 10369, Mar. 12, 1991; 56 FR 22760, May 16, 1991; 56 FR 24001, May 28, 1991; T.D. 8228, 60 FR 36669, July 18, 1995; T.D. 8646, 60 FR 66503, Dec. 22, 1995; T.D. 8805, 64 FR 1509, Jan 11, 1999]

§ 1.861–8T Computation of taxable income from sources within the United States and from other sources and activities (temporary).

(a) *In general.*

(1) [Reserved]

(2) *Allocation and apportionment of deductions in general.* If an affiliated group of corporations joins in filing a consolidated return under section 1501, the provisions of this section are to be applied separately to each member in that affiliated group for purposes of determining such member's taxable income, except to the extent that expenses, losses, and other deductions are allocated and apportioned as if all domestic members of an affiliated group were a single corporation under section 864(e) and the regulations thereunder. See § 1.861–9T through § 1.861–11T for rules regarding the affiliated group allocation and apportionment of interest expense, and § 1.861–14T for rules regarding the affiliated group allocation and apportionment of expenses other than interest.

(3)–(5) [Reserved]

(b) *Allocation.*

(1)–(2) [Reserved]

(3) *Supportive functions.* Deductions which are supportive in nature (such as overhead, general and administrative, and supervisory expenses) may relate to other deductions which can more readily be allocated to gross income. In such instance, such supportive deductions may be allocated and apportioned along with the deductions to which they relate. On the other hand, it would be equally acceptable to attribute supportive deductions on some reasonable basis directly to activities or property which generate, have generated, or could be reasonably expected to generate gross income. This would ordinarily be accomplished by allocating the supportive expenses to all gross income or to another broad class of gross income and apportioning the expenses in accordance with paragraph (c)(1) of this section. For this purpose, reasonable departmental overhead rates may be utilized. For examples of the application of the principles of this paragraph (b)(3) other than to expenses attributable to stewardship activities, see examples 19 through 21 of paragraph (g) of this section. See paragraph (e)(4) of this section for the allocation and apportionment of deductions attributable to stewardship activities. However, supportive deductions that are described in § 1.861–14T(e)(3) shall be allocated and apportioned in accordance with the rules of § 1.1861–14T and shall not be allocated and apportioned by reference only to the gross income of a single member of an affiliated group of corporations as defined in § 1.861–14T(d).

(4)–(5) [Reserved]

(c) *Apportionment of deductions*—(1) *Deductions definitely related to a class of gross income.* Where a deduction has been allocated in accordance with paragraph (b) of this section to a class of gross income which is included in one statutory grouping and the residual grouping, the deduction must be apportioned between the statutory grouping and the residual grouping. Where a deduction has been allocated to a class of gross income which is included in more than one statutory grouping, such deduction must be apportioned among the statutory groupings and, where necessary, the residual grouping. Thus, in determining the separate limitations on the foreign tax credit imposed by section 904(d)(1) or by section 907, the income within a separate limitation category constitutes a statutory grouping of income and all other income not within that separate limitation category (whether domestic or within a different separate limitation category) constitutes the residual grouping. In this regard, the same method of apportionment must be used in apportioning a deduction to each separate limitation category. Also, see paragraph (f)(1)(iii) of this section with respect to the apportionment of deductions among the statutory groupings designated in section 904(d)(1). If the class of gross income to which a deduction has been allocated consists entirely of a single statutory grouping or the residual grouping, there is no need to apportion that deduction. If a deduction is not definitely related to any gross income, it must be apportioned ratably as provided in paragraph (c)(3) of this section. A deduction is apportioned by attributing the deduction to gross income (within the class to which the deduction has been allocated) which is in one or more statutory groupings and to gross income (within the class) which is in the residual grouping. Such attribution must be accomplished in a manner which reflects to a reasonably close extent the factual relationship between the deduction and the grouping of gross income. In apportioning deductions, it may be that for the taxable year there is no gross income in the statutory grouping or that deductions will exceed the amount of gross income in the statutory grouping. See paragraph (d)(1) of this section with respect to cases in which deductions exceed gross income. In determining the method of apportionment for a specific deduction, examples of bases and factors which should be considered include, but are not limited to—

(i) Comparison of units sold,

(ii) Comparison of the amount of gross sales or receipts,

(iii) Comparison of costs of goods sold,

(iv) Comparison of profit contribution,

(v) Comparison of expenses incurred, assets used, salaries paid, space utilized, and time spent which are attributable to the activities or properties giving rise to the class of gross income, and

(iv) Comparison of the amount of gross income.

Paragraph (e) (2) through (8) of this section provides the applicable rules for allocation and apportionment of deductions for interest, research and development expenses, and certain other deductions. The effects on tax liability of the apportionment of deductions and the burden of maintaining records not otherwise maintained and making computations not otherwise made shall be taken into consideration in determining whether a method of apportionment and its application are sufficiently precise. A method of apportionment described in this paragraph (c)(1) may not be used when it does not reflect, to a reasonably close extent, the factual relationship between the deduction and the groupings of income. Furthermore, certain methods of apportionment described in this paragraph (c)(1) may not be used in connection with any deduction for which another method is prescribed. The principles set forth above are applicable in apportioning both deductions definitely related to a class which constitutes less than all of the taxpayer's gross income and to deductions related to all of the taxpayer's gross income. If a deduction is not related to any class of gross income, it must be apportioned ratably as provided in paragraph (c)(3) of this section.

(2) *Apportionment based on assets.* Certain taxpayers are required by paragraph (e)(2) of this section and § 1.861–9T to apportion interest expense on the basis of assets. A taxpayer may apportion other deductions based on the comparative value of assets that generate income within each grouping, provided that such method reflects the factual relationship between the deduction and the groupings of income and is applied in accordance with the rules of § 1.861–9T(g). In general, such apportionments must be made either on the basis of the tax book value of those assets or on their fair market value. However, once the taxpayer uses fair market value, the taxpayer and all related persons must continue to use such method unless expressly authorized by the Commissioner to change methods. For purposes of this paragraph (c)(2) the term *related persons* means two or more persons in a relationship described in section 267(b). In determining whether two or more corporations are members of same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section

1563(e)(1), and stock owned by the application of section 267(c). In determining whether a corporation is related to a partnership under section 267(b)(10), a person is considered to own the partnership interest owned directly by such person and the partnership interest owned with the application of section 267(e)(3). In the case of any corporate taxpayer that—

(i) Uses tax book value, and

(ii) Owns directly or indirectly (within the meaning of § 1.861–11T(b)(2)(ii)) 10 percent or more of the total combined voting power of all classes of stock entitled to vote in any other corporation (domestic or foreign) that is not a member of the affiliated group (as defined in section 864(e)(5)), such taxpayer shall adjust its basis in that stock in the manner described in § 1.861–11T(b).

(3) [Reserved]

(d) *Excess of deductions and excluded and eliminated items of income.*

(1) [Reserved]

(2) *Allocation and apportionment to exempt, excluded or eliminated income*—(i) *In general.* In the case of taxable years beginning after December 31, 1986, except to the extent otherwise permitted by § 1.861–13T, the following rules shall apply to take account of income that is exempt or excluded, or assets generating such income, with respect to allocation and apportionment of deductions.

(A) *Allocation of deductions.* In allocating deductions that are definitely related to one or more classes of gross income, exempt income (as defined in paragraph (d)(2)(ii) of this section) shall be taken into account.

(B) *Apportionment of deductions.* In apportioning deductions that are definitely related either to a class of gross income consisting of multiple groupings of income (whether statutory or residual) or to all gross income, exempt income and exempt assets (as defined in paragraph (d)(2)(ii) of this section) shall not be taken into account.

For purposes of apportioning deductions which are not taken into account under § 1.1502–13 in determining gain or loss from intercompany transactions, as defined in § 1.1502–13, income from such transactions shall be taken into account in the year such income is ultimately included in gross income.

(ii) *Exempt income and exempt asset defined*—(A) *In general.* For purposes of this section, the term *exempt income* means any income that is, in whole or in part, exempt, excluded, or eliminated for federal income tax purposes. The term *exempt asset* means any asset the income from which is, in whole or in part, exempt, excluded, or eliminated for federal tax purposes.

(B) *Certain stock and dividends.* The term ‘‘exempt income’’ includes the portion of the dividends that are deductible under—

(*1*) Section 243(a) (1) or (2) (relating to the dividends received deduction),

(*2*) Section 245(a) (relating to the dividends received deduction for dividends from certain foreign corporations).

Thus, for purposes of apportioning deductions using a gross income method, gross income would not include a dividend to the extent that it gives rise to a dividend received deduction under either section 243(a)(1), section 243(a)(2), or section 245(a). In the case of a life insurance company taxable under section 801, the amount of such stock that is treated as tax exempt shall not be reduced because a portion of the dividends received deduction is disallowed as attributable to the policyholder’s share of such dividends. See § 1.861–14T(h) for a special rule concerning the allocation of reserve expenses of a life insurance company. In addition, for purposes of apportioning deductions using an asset method, assets would not include that portion of stock equal to the portion of dividends paid thereon that would be deductible under either section 243(a)(1), section 243(a)(2), or section 245(a). In the case of stock which generates, has generated, or can reasonably be expected to generate qualifying dividends deductible under section 243(a)(3), such stock shall not constitute a tax exempt asset. Such stock and the dividends thereon will, however, be eliminated from consideration in the apportionment of interest expense under the consolidation rule set forth in § 1.861–10T(c), and in the apportionment of other expenses under the consolidation rules set forth in § 1.861–14T.

(iii) *Income that is not considered tax exempt.* The following items are not considered to be exempt, eliminated, or excluded income and, thus, may have expenses, losses, or other deductions allocated and apportioned to them:

(A) In the case of a foreign taxpayer (including a foreign sales corporation (FSC)) computing its effectively connected income, gross income (whether domestic or foreign source) which is not effectively connected to the conduct of a United States trade or business;

(B) In computing the combined taxable income of a DISC or FSC and its related supplier, the gross income of a DISC or a FSC;

(C) For all purposes under subchapter N of the Code, including the computation of combined taxable income of a possessions corporation and its affiliates under section 936(h), the gross income of a possessions corporation for which a credit is allowed under section 936(a); and

(D) Foreign earned income as defined in section 911 and the regulations thereunder (however, the rules of § 1.911–6 do not require the allocation and apportionment of certain deductions, including home mortgage interest, to foreign earned income for purposes of determining the deductions disallowed under section 911(d)(6)).

(iv) *Prior years.* For expense allocation and apportionment rules applicable to taxable years beginning before January 1, 1987, and for later years to the extent permitted by § 1.861–13T, see § 1.861–8(d)(2) (Revised as of April 1, 1986).

(e) *Allocation and apportionment of certain deductions.*

(1) [Reserved]

(2) *Interest.* The rules concerning the allocation and apportionment of interest expense and certain interest equivalents are set forth in §§ 1.861–9T through § 1.861–13T.

(3)–(7) [Reserved]

(8) *Net operating loss deduction.* A net operating loss deduction allowed under section 172 shall be allocated and apportioned in the same manner as the deductions giving rise to the net operating loss deduction.

(9)–(11) [Reserved]

(f) *Miscellaneous matters*—(1) *Operative sections.*

(i) [Reserved]

(ii) *Separate limitations to the foreign tax credit.* Section 904(d)(1) requires that the foreign tax credit limitation be determined separately in the case of the types of income specified therein. Accordingly, the income within each separate limitation category constitutes a statutory grouping of income and all other income not within that separate limitation category (whether domestic or within a different separate limitation category) constitutes the residual groups.

(iii) [Reserved]

(2)—(5) [Reserved]

(g) [Reserved]

Examples (1)— (23). [Reserved]

Example (24)— Exempt, excluded, or eliminated income—(i) *Income method*—(A) *Facts.* X, a domestic corporation organized on January 1, 1987, is engaged in a number of businesses worldwide. X owns a 25-percent voting interest in each of five corporations engaged in the business A, two of which are domestic and three of which are foreign. X incurs stewardship expenses in connection with these five stock investments in the amount of $100. X apportions its stewardship expenses using a gross income method. Each of the five companies pays a dividend in the amount of $100. X is entitled to claim the 80-percent dividends received deduction on dividends paid by the two domestic companies. Because tax exempt income is considered in the allocation of deductions, X's $100 stewardship expense is allocated to the class of income consisting of dividends from business A companies. However, because tax exempt income is not considered in the apportionment of deductions within a class of gross income, the gross income of the two domestic companies must be reduced to reflect the availability of the dividends received deduction. Thus, for purposes of apportionment, the gross income paid by the three foreign companies is considered to be $100 each, while the gross income paid by the domestic companies is considered to be $20 each. Accordingly, X has total gross income from business A companies, for purposes of apportionment, of $340. As a result, $29.41 of X's stewardship expense is apportioned to each of the foreign companies and $5.88 of X's stewardship expense is apportioned to each of the domestic companies.

(ii) *Asset method*—(A) *Facts.* X, a domestic corporation organized on January 1, 1987, carries on a trade or business in the United States. X has deductible interest expense incurred in 1987 of $60,000. X owns all the stock of Y, a foreign corporation. X also owns 49 percent of the voting stock of Z, a domestic corporation. Neither Y nor Z has retained earnings and profits at the end of 1987. X apportions its interest expense on the basis of the fair market value of its assets. X has assets worth $1,500,000 that generate domestic source income, among which are tax exempt municipal bonds worth $100,000, and the stock of Z, which has a value of $500,000. The Y stock owned by X has a fair market value of $2,000,000 and generates solely foreign source general limitation income.

(B) *Allocation.* No portion of X's interest expense is directly allocable solely to identified property within the meaning of § 1.861–10T. Thus, X's deduction for interest is definitely related to all its gross income as a class.

(C) *Apportionment.* For purposes of apportioning expenses, assets that generate exempt, eliminated, or excluded income are not taken into account. Because X's municipal bonds are tax exempt, they are not taken into account in apportioning interest expense. Since X is entitled to claim under section 243 to 80-percent dividends received deduction with respect to the dividend it received from Z, 80 percent of the value of that stock is not taken into account as an asset for purposes of apportionment under the asset method. X apportions its interest deduction between the statutory grouping of foreign source general limitation income and the residual grouping of domestic source income as follows:

To foreign source general limitation income:

$$\text{Interest expense} \times \frac{\text{General limitation assets that are not tax exempt}}{\text{Worldwide assets that are not tax exempt}}$$

$$\$60{,}000 \times \frac{\$2{,}000{,}000}{(\$100{,}000 + \$900{,}000 + \$2{,}000{,}000)} = \$40{,}000$$

$$\frac{\text{Nonexempt foreign assets}}{\text{20 percent of Z stock value} + \text{Nonexempt domestic assets} + \text{Nonexempt foreign assets}}$$

To domestic source income:

$$\text{Interest expense} \times \frac{\text{Domestic assets that are not tax exempt}}{\text{Worldwide assets that are not tax exempt}}$$

$$\$60{,}000 \times \frac{\$100{,}000 + \$900{,}000}{(\$100{,}000 + \$900{,}000 + \$2{,}000{,}000)} = \$20{,}000$$

$$\frac{\text{20 percent of Z stock value} + \text{nonexempt domestic assets}}{\text{20 percent of Z stock value} + \text{Nonexempt domestic assets} + \text{Nonexempt foreign assets}}$$

(h) *Effective dates.* In general, the rules of this section, as well as the rules of §§ 1.861–9T, 1.861–10T, 1.861–11T, 1.861–12T, and 1.861–14T shall apply for taxable years beginning after December 31, 1986. In the case of corporate taxpayers, transition rules set forth in § 1.861–13T provide for the gradual phase-in of certain the provisions of this and the foregoing sections. However, the following rules are effective for taxable years commencing after December 31, 1988:

(1) Section 1.861–9T(b)(2) (concerning the treatment of certain foreign currency borrowings),

(2) Section 1.861–9T(d)(2) (concerning the treatment of interest incurred by nonresident aliens),

(3) Section 1.861–10T(b)(3)(ii) (providing an operating costs test for purposes of the nonrecourse indebtedness exception), and

(4) Section 1.861–10T(b)(6) (concerning excess collaterilization of nonrecourse borrowings).

In addition, §1.861–10T(e) (concerning the treatment of related controlled foreign corporation indebtedness) is effective for taxable years commencing after December 31, 1987. For rules for taxable years beginning before January 1, 1987, and for later years to the extent permitted by §1.861–13T, see §1.861–8 (Revised as of April 1, 1986). Paragraph (e)(8) of this section shall cease to be effective January 8, 2002.

[T.D. 8228, 53 FR 35474, Sept. 14, 1988, as amended by T.D. 8286, 55 FR 3054, Jan. 30, 1990; T.D. 8337, 56 FR 10369, Mar. 12, 1991; T.D.8597, 60 FR 36679, July 18, 1995; T.D. 8805, 64 FR 1509, Jan. 11, 1999]

§1.861–9T Allocation and apportionment of interest expense (temporary regulations).

(a) *In general.* Any expense that is deductible under section 163 (including original issue discount) constitutes interest expense for purposes of this section, as well as for purposes of §§1.861–10T, 1.861–11T, 1.861–12T, and 1.861–13T. The term interest refers to the gross amount of interest expense incurred by a taxpayer in a given tax year. The method of allocation and apportionment for interest set forth in this section is based on the approach that, in general, money is fungible and that interest expense is attributable to all activities and property regardless of any specific purpose for incurring an obligation on which interest is paid. Exceptions to the fungibility rule are set forth in §1.861–10T. The fungibility approach recognizes that all activities and property require funds and that management has a great deal of flexibility as to the source and use of funds. When borrowing will generally free other funds for other purposes, and it is reasonable under this approach to attribute part of the cost of borrowing to such other purposes. Consistent with the principles of fungibility, except as otherwise provided, the aggregate of deductions for interest in all cases shall be considered related to all income producing activities and assets of the taxpayer and, thus, allocable to all the gross income which the assets of the taxpayer generate, have generated, or could reasonably have been expected to generate. In the case of the interest expense of members of an affiliated group, interest expense shall be considered to be allocable to all gross income of the members of the group under §1.861–11T. That section requires the members of an affiliated group to allocate and apportion the interest expense of each member of the group as if all members of such group were a single corporation. For the method of determining the interest deduction allowed to foreign corporations under section 882(c), see §1.882–5.

(b) *Interest equivalents*—(1) *Certain expenses and losses*—(i) *General rule.* Any expense or loss (to the extent deductible) incurred in a transaction or series of integrated or related transactions in which the taxpayer secures the use of funds for a period of time shall be subject to allocation and apportionment under the rules of this section if such expense or loss is substantially incurred in consideration of the time value of money. However, the allocation and apportionment of a loss under this paragraph (b) shall not affect the characterization of such loss as capital or ordinary for other purposes of the Code and the regulations thereunder.

(ii) Examples. The rule of this paragraph (b)(1) may be illustrated by the following examples.

Example 1. W, a domestic corporation, borrows from X two ounces of gold at a time when the spot price for gold is $500 per ounce. W agrees to return the two ounces of gold in six months. W sells the two ounces of gold to Y for $1000. W then enters into a contract with Z to purchase two ounces of gold six months in the future for $1,050. In exchange for the use of $1,000 in cash, W has sustained a loss of $50 on related transactions. This loss is subject to allocation and apportionment under the rules of this section in the same manner as interest expense.

Example 2. X, a domestic corporation with a dollar functional currency, borrows 100 pounds on January 1, 1987 for a three-year term at an interest rate greater than the applicable federal rate for dollar loans. At this time, the interest rate on the pound was approximately equal to the interest rate on dollar borrowings and the forward price on the pound, vis-a-vis the dollar, was approximately equal to the spot price. On January 1, 1987, X converted 100 pounds into dollars and entered into a currency swap that substantially hedged X’s foreign currency exposure on the pound borrowing, both with respect to interest and principal. The borrowing, coupled with the swap, represents a series of related transactions in which the taxpayer secures the use of funds in its functional currency. Any net foreign currency loss on this series of transactions constitutes a loss incurred substantially in consideration of the time value of money and shall be apportioned in the same manner as interest expense. Thus, if the pound depreciates against the dollar, such that when the first payment on the pound borrowing is due the taxpayer has a currency loss on the swap payment hedging its first interest payment, such loss shall, even if the transaction is not integrated under section 988(d), be allocated and apportioned in the same manner as interest expense under the authority of this paragraph (b)(1).

Example 3. On January 1, 1987, X, a domestic corporation with a dollar functional currency, enters into a dollar interest rate swap contract with Y, a domestic counterparty. Under the terms of this agreement, X agrees to pay Y floating rate interest with respect to a notional principal amount of $100 for five years. In return, Y agrees to pay X fixed rate interest at 10 percent with respect to a notional principal amount of $100 for five years. On the same day, Y prepays the fixed leg of the swap by making a lump sum payment of $37 to X. This lump sum payment represents the present value of five $10 swap payments. Because X secures the use of $37 in this transaction, any net swap expense arising from the transaction represents an expense incurred substantially in consideration of the time value of money. Assuming this lump sum payment is not otherwise characterized as a loan from Y to X, and that X must amortize the $37 lump sum payment under the principles of Notice 89–21, any net swap expense incurred by X with respect to this transaction (*i.e.*, the excess, if any, of X's annual swap payment to Y over the annual amortization of the $37 lump sum payment that is taken into income by X) represents an expense equivalent to interest expense. The result would be the same if X sold the fixed leg to a third party for $37. While this example presents the case of a lump sum payment, the rules of paragraph (b)(1) would also apply to any transaction in which the swap payments are not substantially contemporaneous if the pricing of the transaction is materially affected by the time value of money. Thus, expenses and losses will be subject to apportionment under the rules of this section to the extent that such expenses or losses were incurred in consideration of the time value of money.

(2) *Certain foreign currency borrowings*—(i) *Rule.* If a taxpayer borrows in a nonfunctional currency at a rate of interest that is less than the applicable federal rate (or its equivalent in functional currency if the functional currency is not the dollar), any swap, forward, future, option, or similar financial arrangement (or any combination thereof) entered into by the taxpayer or by a related person (as defined in § 1.861–8T(c)(2)) that exists during the term of the borrowing and that substantially diminishes currency risk with respect to the borrowing or interest expense thereon will be presumed to constitute a hedge of such borrowing, unless the taxpayer can demonstrate on the basis of facts and circumstances that the two transactions are in fact unrelated. Under this presumption, the currency loss incurred on the borrowing during taxable years beginning after December 31, 1988, in connection with hedged nonfunctional currency borrowings, reduced or increased by the gain or loss on the hedge, will be apportioned in the same manner as interest expense. This presumption can be rebutted by a showing that the financial arrangement was entered into in connection with hedging currency exposure arising in the ordinary course of a trade or business (other than with respect to the borrowing).

(ii) *Examples.* The principles of this paragraph (b)(2) may be illustrated by the following examples.

Example 1. Taxpayer has a dollar functional currency and does not have any qualified business units with a functional currency other than the dollar. On January 1, 1989, when the unit of foreign currency is worth $1, taxpayer borrows 100 units of foreign currency for a three-year period bearing interest at the annual rate of 3 percent and immediately converts the proceeds of the borrowing into dollars for use in its business. In the ordinary course of its business, taxpayer has no foreign currency exposure in this currency. In March 1989, taxpayer enters into a three-year swap agreement that covers most, but not all, of the payment of interest and principal. Because the swap substantially diminishes currency risk with respect to the borrowing, it is presumed to hedge the loan. Since taxpayer cannot demonstrate that it was hedging currency exposure arising in the ordinary course of its business (other than currency exposure with respect to the borrowing), the net currency loss on the borrowing adjusted for any gain or loss on the swap must be apportioned in the same manner as interest expense.

Example 2. Assume the same facts as in Example 1, except that the taxpayer borrows in two separate foreign currencies on terms described in Example 1 and enters into a swap agreement in a single currency that substantially diminishes the taxpayer's aggregate foreign currency risk. The net currency loss on the borrowings adjusted for any gain or loss on the swap must be apportioned in the same manner as interest expense.

(3) *Losses on sale of certain receivables*—(1) *General rule.* Any loss on the sale of a trade receivable (as defined in § 1.954–2(h)) shall be allocated and apportioned, solely for purposes of this section and §§ 1.861–10T, 1.861–11T, 1.861–12T, and 1.861–13T, in the same manner as interest expense, unless at the time of sale of the receivable, it bears interest at a rate which is at least 120 percent of the short term applicable federal rate (as determined under section 1274(d) of the Code), or its equivalent in foreign currency in the case of receivables denominated in foreign currency, determined at the time the receivable arises. This treatment shall not affect the characterization of such expense as interest for other purposes of the Internal Revenue Code.

(ii) *Exceptions.* To the extent that a loss on the sale of a trade receivable exceeds the discount on the receivable that would be computed applying to the amount received on the sale of the receivable 120 percent of the applicable federal rate (or its equivalent in foreign currency in the case of receivables denominated in foreign currency) for the period commencing with the date on which the receivable is sold and ending with the earlier of the date on which the receivable begins to bear interest at such rate or the anticipated payment date of the receivable, such excess shall not be allocated and apportioned in the same manner as interest expense but rather shall be allocated and apportioned to the gross income generated by the receivable. In cases of transfers of receivables to a domestic international sales corporation described § 1.994–1(c)(6)(v), the rule of this paragraph (b)(3) shall not apply for purposes of computing combined taxable income. In computing the combined taxable income of a foreign sales corporation and its related supplier, loss on the sale of receivables to a third party incurred either by the foreign sales corporation or its related supplier shall offset combined taxable income, notwithstanding the provisions of this paragraph (b)(3). See § 1.924(a)–1T(g)(7).

Example. On October 1, X sells a widget to Y for $100 payable in 30 days, after which the receivable will bear stated interest at 13 percent. On October 4, X sells Y's obligation to Z for $98. Assume that the applicable federal rate for the month of October is 10 percent. Applying 120 percent of the applicable federal rate to the $98 received on the sale of the receivable, the obligation is discounted at a 12 percent rate for a period of 27 days. At this discount rate, the obligation would have sold for $99.22. Thus, 88 cents of the $2 loss on the sale is apportioned in the same manner as interest expense, and $1.22 of the $2 loss on the sale is directly allocated to the income generated on the widget sale.

(4) *Rent in certain leasing transactions.* [Reserved]

(5) *Treatment of bond premium*—(i) *Treatment by the issuer.* If a bond or other debt obligation is issued at a premium, an amount of interest expense incurred by the issuer on that bond or other debt obligation equal to the amortized portion of that premium that is included in gross income for the year shall be allocated and apportioned solely to the amortized portion of premium derived by the issuer for the year.

(ii) *Treatment by the holder.* If a bond or debt obligation is purchased at a premium, the portion of that premium amortized during the year by the holder under section 171 and the regulations thereunder shall be allocated and apportioned solely to interest income derived from the bond by the holder for the year.

(6) *Financial products that alter effective cost of borrowing*—(i) *In general.* Various derivative financial products can be part of transactions or series of transactions described in paragraph (b)(1) of this section. Such derivative financial products, including interest rate swaps, options, forwards, caps, and collars, potentially alter a taxpayer's effective cost of borrowing with respect to an actual liability of the taxpayer. For example, a taxpayer that is obligated to pay interest at a fixed rate may, in effect, pay interest at a floating rate by entering into an interest rate swap. Similarly, a taxpayer that is obligated to pay interest at a floating rate may, in effect, limit its exposure to rising interest rates by purchasing a cap. Such a taxpayer may have gains

or losses associated with such derivative financial products. This paragraph (b)(6) provides rules for the treatment of gains and losses from such derivative financial products (''financial products'') that are part of transactions described in paragraph (b)(1) of this section and that are used by the taxpayer to alter its effective cost of borrowing with respect to an actual liability. This paragraph (b)(6) shall only apply where the hedge and the borrowing are in the same currency and shall not apply to the extent otherwise provided in section 988 and the regulations thereunder. The allocation and apportionment of a loss under this paragraph (b) shall not affect the characterization of such loss as capital or ordinary for other purposes of the Code and the regulations thereunder.

(ii) *Definition of gain and loss.* For purposes of this paragraph (b)(6), the term ''gain'' refers to the excess of the amounts properly taken into income under a financial product that alters the effective cost of borrowing over the amounts properly allowed as a deduction thereunder within a given taxable year. See. *e.g.,* Notice 89–21. The term ''loss'' refers to the excess of the amounts properly allowed as a deduction under such a financial product over the amounts properly taken into income thereunder within a given taxable year.

(iii) *Treatment of gain or loss on the disposition of a financial product.* [Reserved]

(iv) *Entities that are not financial services entities.* An entity that does not constitute a financial services entity within the meaning of § 1.904–4(e)(3) shall treat gains and losses on financial products described in paragraph (b)(6)(i) of this section as follows.

(A) *Losses.* Losses on any financial product described in paragraph (b)(6)(i) of this section shall be apportioned in the same manner as interest expense whether or not such financial product is identified by the taxpayer under paragraph (b)(6)(iv)(C) of this section as a liability hedge.

(B) *Gains.* Gains on any financial product described in paragraph (b)(6)(i) of this section shall reduce the taxpayer's total interest expense that is subject to apportionment, but only if such financial product is identified by the taxpayer under paragraph (b)(6)(iv)(C) of this section as a liability hedge. Such reduction is accomplished by directly allocating interest expense to the income derived from such a financial product.

(C) *Identification of financial products.* A taxpayer can identify a financial product described in paragraph (b)(6)(i) of this section as hedging a particular interest-bearing liability (or any group of such liabilities) by clearly identifying on its books and records on the same day that it becomes a party to such arrangement that such arrangement hedges a given liability (or group of liabilities). In the case of a partial hedge, such identification shall apply to only that part of the liability that is hedged. If the taxpayer clearly identifies on its books and records a financial product as a hedge of an interest-bearing asset (or any group of such assets), it will create a rebuttable presumption that such financial product is not described in paragraph (b)(6)(i) of this section. A taxpayer may identify a hedge as relating to an anticipated liability, provided that such liability is in fact incurred within 120 days following the date of such identification. Gains and losses on such an anticipatory arrangement accruing prior to the time at which the liability is incurred shall constitute an adjustment to interest expense.

(v) *Financial services entities.* [Reserved]

(vi) *Dealers.* The rule of paragraph (b)(6)(iv) of this section shall not apply to a person acting in its capacity as a regular dealer in the financial products described in paragraph (b)(6)(i) of this section. Instead, losses sustained by a regular dealer in connection with such financial products shall be allocated to the class of gross income from such arrangements. Gains of a regular dealer in notional principal contracts are governed by the rules of § 1.863–7T(b). Amounts received or accrued by any person from any financial product that is integrated as specified in Notice 89–90 with an asset shall not be treated as amounts received or accrued by a person acting in its capacity as a regular dealer in financial products.

(vii) *Examples.* The principles of this paragraph (b)(6) may be illustrated by the following examples.

Example 1. X is not a financial services entity or regular dealer in the financial products described in paragraph (b)(6)(i) of this section and has a dollar functional currency. In 1990, X incurred a total of $200 of interest expense. On January 1, 1990, X entered into an interest rate swap agreement with Y, in order to hedge its interest rate exposure with respect to a pre-existing floating rate liability. On the same day, X properly identified the agreement as a hedge of such liability. Under the agreement, X is required to pay Y an amount equal to a fixed rate of 10 percent on a notional principal amount of $1,000. Y is required to pay X an amount equal to a floating rate of interest on the same notional principal amount. Under the agreement, X received from Y during 1990 a net payment of $25. Because X identified the swap agreement as a liability hedge under the rules of paragraph (b)(6)(iv)(C), X may effectively reduce its total allocable interest expense for 1990 to $175 by directly allocating $25 of interest expense to the swap income. Had X not properly identified the swap as a liability hedge, this swap payment would have been treated as domestic source income in accordance with the rule of §1.863–7T(b).

Example 2. Assume the same facts as Example (1), except that X did not properly identify the agreement as a liability hedge on January 1, l990. In 1990, X made a net payment of $25 to Y under the swap agreement. This swap payment is allocated and apportioned in the same manner as interest expense under the rules of paragraph (b)(6)(iv)(A).

(viii) *Effective dates*—(A) *Losses.* The rules of this paragraph (b)(6) shall apply to losses on any transaction described in paragraph (b)(6)(i) of this section that was entered into after September 14, 1988.

(B) *Gains.* Except as provided in paragraph (b)(6)(viii)(C) of this section, the rules of this paragraph (b)(6) shall apply to any gain that was realized on any transaction described in paragraph (b)(6)(i) of this section that was entered into after August 14, 1989.

(C) *Exception for interim gains.* Taxpayers shall be permitted to apply the rules of this paragraph (b)(6) to any gain that was realized on any transaction described in paragraph (b)(6)(i) of this section that was entered into after September 14, 1988 and on or before August 14, 1989, if the taxpayer can demonstrate to the satisfaction of the Commissioner that substantially all of the arrangements described in paragraph (b)(6)(i) of this section to which the taxpayer became a party during that interim period were identified on the taxpayer's books and records with the liabilities of the taxpayer in a substantially contemporaneous manner and that all losses and expenses that are subject to the rules of this paragraph (b)(6) were treated in the same manner as interest expense. For this purpose, arrangements that were identified in a substantially contemporaneous manner with the taxpayer's assets shall be ignored.

(7) *Foreign currency gain or loss.* In addition to the rules of paragraph (b)(1), (b)(2), and (b)(6) of this section, any foreign currency loss that is treated as an adjustment to interest expense under regulations issued under section 988 shall be allocated and apportioned in the same manner as interest expense. Any foreign currency gain that is treated as an adjustment to interest expense under regulations issued under section 988 shall offset apportionable interest expense.

(c) *Allowable deductions.* In order for an interest expense to be allocated and apportioned, it must first be determined that the interest expense is currently deductible. A number of provisions in the Code disallow or suspend deductions of interest expense or require the capitalization thereof.

(1) *Disallowed deductions.* A taxpayer does not allocate and apportion interest expense under this section that is permanently disallowed as a deduction by operation of section 163(h), section 265, or any other provision or rule that permanently disallows the deduction of interest expense.

(2) *Section 263A.* Section 263A requires the capitalization of interest expense that is allocable to designated types of property. Any interest expense that is capitalized under section 263A does not constitute deductible interest expense for purposes of this section. Furthermore, interest expense capitalized in inventory or depreciable property is not separately allocated and apportioned when the inventory is sold or depreciation is allowed. Capitalized interest expense is effectively allocated and apportioned as part of, and in the

same manner as, the cost of goods sold, amortization, or depreciation deduction.

(3) *Section 163(d).* Section 163(d) suspends the deduction for interest expense to the extent that it exceeds net investment income. In the year that suspended investment interest expense becomes allowable under the rules of section 163(d), that interest expense is apportioned under rules set forth in paragraph (d)(1) of this section as though it were incurred in the taxable year in which the expense is deducted.

(4) *Section 469*—(i) *General rule.* Section 469 suspends the deduction of passive activity losses to the extent that they exceed passive activity income for the year. Passive activity losses may consist in part of interest expense properly allocable to passive activity. In the year that suspended interest expense becomes allowable as a deduction under the rules of section 469, that interest expense is apportioned under rules set forth in paragraph (d)(1) of this section as though it were incurred in the taxable year in which the expense is deducted.

(ii) *Identification of the interest component of a suspended passive loss.* A suspended passive loss may consist of a variety of items of expense other than interest expense. Suspended interest expense for any taxable year is computed by multiplying the total suspended passive loss for the year by a fraction, the numerator of which is passive interest expense for the year (determined under regulations issued under section 163) and the denominator of which is total passive expenses for the year. The amount of the suspended interest expense that is considered to be deductible in a subsequent taxable year is computed by multiplying the amount of any cumulative suspended interest expense (reduced by suspended interest expense allowed as a deduction in prior taxable years) times a fraction, the numerator of which is the portion of cumulative suspended passive losses that become deductible in the taxable year and the denominator of which is the cumulative suspended passive losses for prior taxable years (reduced by suspended passive losses allowed as deductions in prior taxable years).

(iii) *Example.* The rules of this paragraph (c)(4) may be illustrated by the following example.

Example. On January 1, 1987, A, a United States citizen, invested in a passive activity. In 1987, the passive activity generated no passive income and $100 in passive losses, all of which were suspended by operation of section 469. The suspended loss included $10 of suspended interest expense. In 1988, the passive activity generated $50 in passive income and $150 in passive expenses which included $30 of interest expense. The entire $100 passive loss was suspended in 1988 and included $20 of interest expense ($100 suspended passive loss × $30 passive interest expense/$150 total passive expenses). Thus, at the end of 1988, A had total suspended passive losses of $200, including $30 of suspended interest expense. In 1989, the passive activity generated $100 in passive income and no passive expenses. Thus, $100 of A's cumulative suspended passive loss was therefore allowed in 1989. The $100 of deductible passive loss includes $15 of suspended interest expense ($30 cumulative suspended interest expense × $100 of cumulative suspended passive losses allowable in 1989/$200 of total cumulative suspended passive losses). The $15 of interest expense is apportioned under the rules of paragraph (d) of this section as though it were incurred in 1989.

(d) *Apportionment rules for individuals, estates, and certain trusts*—(1) *United States individuals.* In the case of taxable years beginning after December 31, 1986, individuals generally shall apportion interest expense under different rules according to the type of interest expense incurred. The interest expense of individuals shall be characterized under the regulations issued under section 163. However, in the case of an individual whose foreign source income (including income that is excluded under section 911) does not exceed a gross amount of $5,000, the apportionment of interest expense under this section is not required. Such an individual's interest expense may be allocated entirely to domestic source income.

(i) *Interest incurred in the conduct of a trade or business.* An individual who incurs business interest described in section 163(h)(2)(A) shall apportion such interest expense using an asset method by reference to the individual's business assets.

(ii) *Investment interest.* An individual who incurs investment interest described in section 163(h)(2)(B) shall apportion that interest expense on the basis of the individual's investment assets.

(iii) *Interest incurred in a passive activity.* An individual who incurs passive activity interest described in section 163(h)(2)(C) shall apportion that interest expense on the basis of the individual's passive activity assets. Individuals who receive a distributive share of interest expense incurred in a partnership are subject to special rules set forth in paragraph (e) of this section.

(iv) *Qualified residence and deductible personal interest.* Individuals who incur qualified residence interest described in section 163(h)(2)(D) shall apportion that interest expense under a gross income method, taking into account all income (including business, passive activity, and investment income) but excluding income that is exempt under section 911. For purposes of this section, any qualified residence that is rented shall be considered to be a business asset for the period in which it is rented, with the result that the interest on such a residence is not apportioned under this subdivision (iv) but instead under subdivisions (i) or (iii) of this paragraph (d)(1). To the extent that personal interest described in section 163(h)(2) remains deductible under transitional rules, individuals shall apportion such interest expense in the same manner as qualified residence interest.

(v) *Example.* The following example illustrates the principles of this section.

Example —(i) *Facts.* A is a resident individual taxpayer engaged in the active conduct of a trade or business, which A operates as a sole proprietor. A's business generates only domestic source income. A's investment portfolio consists of several less than 10 percent stock investments. Certain stocks in which A's adjusted basis is $40,000 generate domestic source income and other stocks in which A's adjusted basis is $60,000 generate foreign source passive income. In addition, A owns his personal residence, which is subject to a mortgage in the amount of $100,000. All interest expense incurred with respect to A's mortgage is qualified residence interest for purposes of section 163(h)(2)(D). A's other indebtedness consists of a bank loan in the amount of $40,000. Under the regulations issued under section 163(h), it is determined that the proceeds of the $40,000 loan were divided equally between A's business and his investment portfolio. In 1987, the gross income of A's business, before the apportionment of interest expense, was $50,000. A's investment portfolio generated $4,000 in domestic source income and $6,000 in foreign source passive income. All of A's debt obligations bear interest at the annual rate of 10 percent.

(ii) *Analysis of business interest.* Under section 163(h) of the Code, $2,000 of A's interest expense is attributable to his business. Under the rules of paragraph (d)(1)(i), such interest must be apportioned on the basis of the business assets. Applying the asset method described in paragraph (g) of this section, it is determined that all of A's business assets generate domestic income and, therefore, constitute domestic assets. Thus, the $2,000 in interest expense on the business loan is allocable to domestic source income.

(iii) *Analysis of investment interest.* Under section 163(h) of the Code, $2,000 of A's interest expense is investment interest. Under the rules of paragraph (d)(1)(ii) of this section, such interest must be apportioned on the basis of investment assets. Applying the asset method, A's investment assets consist of stock generating domestic source income with an adjusted basis of $40,000 and stock generating foreign source passive income with an adjusted basis of $60,000. Thus, 40 percent ($800) of A's investment interest is apportioned to domestic source income and 60 percent ($1,200) of A's investment interest is apportioned to foreign source passive income for purposes of section 904.

(iv) *Analysis of qualified residence interest.* The $10,000 of qualified residence interest expense is apportioned under the rules of paragraph (d)(1)(iv) of this section on the basis of all of A's gross income. A's gross income consists of $60,000, $54,000 of which is domestic source and $6,000 of which is foreign source passive income. Thus, $9,000 of A's qualified residence interest is apportioned to domestic source income and $1,000 of A's qualified residence interest is apportioned to foreign source passive income.

(2) *Nonresident aliens*—(i) *General rule.* For taxable years beginning on or after January 1, 1988, interest expense incurred by a nonresident alien shall be considered to be connected with income effectively connected with a United States trade or business only to the extent that interest expense is incurred with respect to liabilities that—

(A) Are entered on the books and records of the United States trade or business when incurred, or

(B) Are secured by assets that generate such effectively connected income.

(ii) *Limitations*—(A) *Maximum debt capitalization.* Interest expense incurred by a nonresident alien is not considered to be connected with effectively connected income to the extent that it is incurred with respect to liabilities that exceed 80 percent of the gross assets of the United States trade or business.

(B) *Collateralization by other assets.* Interest expense on indebtedness that is secured by specific assets (not including the general credit of the nonresident alien) other than the assets of the United States trade or business shall not be considered to be connected with effectively connected income.

(3) *Estates and trusts.* Estates shall be treated in the same manner as individuals. In the case of a trust that is beneficially owned by individuals and is a complex trust, the trust shall be treated in the same manner as individuals under the rules of paragraph (d) of this section, except that no de minimis amount shall apply. In the case of a trust that is beneficially owned by one or more corporations, the trust shall be treated either as a partnership or as a corporation depending on how the trust is characterized under the rules of section 7701 and the regulations thereunder.

(e) *Partnerships*—(1) *In general—aggregate rule.* A partner's distributive share of the interest expense of a partnership that is directly allocable under §1.861–10T to income from specific partnership property shall be treated as directly allocable to the income generated by such partnership property. Subject to the exceptions set forth in paragraph (e)(4), a partner's distributive share of the interest expense of a partnership that is not directly allocable under §1.861–10T generally is considered related to all income producing activities and assets of the partner and shall be subject to apportionment under the rules described in this paragraph. For purposes of this section, a partner's percentage interest in a partnership shall be determined by reference to the partner's interest in partnership income for the year. Similarly, a partner's pro rata share of partnership assets shall be determined by reference to the partner's interest in partnership income for the year.

(2) *Corporate partners whose interest in the partnership is 10 percent or more.* A corporate partner shall apportion its distributive share of partnership interest expense by reference to the partner's assets, including the partner's pro rata share of partnership assets, under the rules of paragraph (f) of this section if the corporate partner's direct and indirect interest in the partnership (as determined under the attribution rules of section 318) is 10 percent or more. A corporation using the tax book value method of apportionment shall use the partnership's inside basis in its assets, adjusted to the extent required under §1.861–10T(d)(2). A corporation using the fair market value method of apportionment shall use the fair market value of the partnership's assets, adjusted to the extent required under §1.861–10T(d)(2).

(3) *Individual partners who are general partners or who are limited partners with an interest in the partnership of 10 percent or more.* An individual partner is subject to the rules of this paragraph (e)(3) if either the individual is a general partner or the individual's direct and indirect interest (as determined under the attribution rules of section 318) in the partnership is 10 percent or more. The individual shall first classify his or her distributive share of partnership interest expense as interest incurred in the active conduct of a trade or business, as passive activity interest, or as investment interest under regulations issued under sections 163 and 469. The individual must then apportion his or her interest expense (including the partner's distributive share of partnership interest expense) under the rules of paragraph (d) of this section. Each such individual partner shall take into account his or her distributive share of partnership gross income or pro rata share of the partnership assets in applying such rules. An individual using the tax book value method of apportionment shall use the partnership's inside basis in its assets, adjusted to the extent required under §1.861–10T(d)(2). An individual using the fair market value method of apportionment shall use the fair market

value of the partnership's assets, adjusted to the extent required under § 1.861–10T(d)(2).

(4) *Less than 10 percent limited partners and less than 10 percent corporate general partners—entity rule*—(i) *Partnership interest expense.* A limited partner (whether individual or corporate) or corporate general partner whose direct and indirect interest (as determined under the attribution rules of section 318) in the partnership is less than 10 percent shall directly allocate its distributive share of partnership interest expense to its distributive share of partnership gross income. Under § 1.904–7(i)(2) of the regulations, such a partner's distributive share of foreign source income of the partnership is treated as passive income (subject to the high taxed income exception of section 904(d)(2)(F)), except in the case of high withholding tax interest or income from a partnership interest held in the ordinary course of the partner's active trade or business, as defined in § 1.904–7(i)(2). A partner's distributive share of partnership interest expense (other than partnership interest expense that is directly allocated to identified property under § 1.861–10T) shall be apportioned in accordance with the partner's relative distributive share of gross foreign source income in each limitation category and of domestic source income from the partnership. To the extent that partnership interest expense is directly allocated under § 1.861–10T, a comparable portion of the income to which such interest expense is allocated shall be disregarded in determining the partner's relative distributive share of gross foreign source income in each limitation category and domestic source income. The partner's distributive share of the interest expense of the partnership that is directly allocable under § 1.861–10T shall be allocated according to the treatment, after application of § 1.904–7(i)(2), of the partner's distributive share of the income to which the expense is allocated.

(ii) *Other interest expense of the partner.* For purposes of apportioning other interest expense of the partner on an asset basis, the partner's interest in the partnership, and not the partner's pro rata share of partnership assets, is considered to be the relevant asset. The value of this asset for apportionment purposes is either the tax book value or fair market value of the partner's partnership interest, depending on the method of apportionment used by the taxpayer. This amount of a partner's interest in the partnership is allocated among various limitation categories in the same manner as partnership interest expense (that is not directly allocable under § 1.861–10T) is apportioned in subdivision (i) of this paragraph (e)(4). If the partner uses the tax book value method of apportionment, the partner's interest in the partnership must be reduced, for this purpose, to the extent that the partner's basis consists of liabilities that are taken into account under section 752. Under either the tax book value or fair market value method of apportionment, for purposes of this section only, the value of the partner's interest in the partnership must be reduced by the principal amount of any indebtedness of the partner the interest on which is directly allocated to its partnership interest under § 1.861–10T.

(5) *Tiered partnerships.* If a partnership is a partner in another partnership, the distributive share of interest expense of a lower-tier partnership that is subject to the rules of paragraph (e)(4) shall not be reapportioned in the hands of any higher-tier partner. However, the distributive share of interest expense of lower-tier partnership that is subject to the rules of paragraph (e) (2) or (3) shall be apportioned by the partner of the higher-tier partnership or by any higher-tier partnership to which the rules of paragraph (e)(4) apply, taking into account the partner's indirect pro rata share of the lower-tier partnership's income or assets.

Example —(i) *Facts.* X is a domestic

(6) Example—(i) Facts. A, B, and C are partners in a limited partnership. A is a corporate general partner, owns a 5 percent interest in the partnership, and has an adjusted basis in its partnership interest, determined without regard to section 752 of the Code, of $5. A's investment in the partnership is not held in the ordinary course of the taxpayer's active trade or business, as defined in § 1.904–7(i)(2). B, a corporate limited partner, owns a 70 percent interest in the partnership, and has an adjusted basis in its

partnership interest, determined without regard to section 752 of the Code, of $70. C is an individual limited partner, owns a 25 percent interest in the partnership, and has an adjusted basis in the partnership interest, determined without regard to section 752 of the Code, of $25. The partners' interests in the profits and losses of the partnership conform to their respective interests. None of the interest expense incurred directly by any of the partners is directly allocable to their partnership interest under § 1.861–10T. The ABC partnership's sole assets are two apartment buildings, one domestic and the other foreign. The domestic building has an adjusted inside basis of $600 and the foreign building has an adjusted inside basis of $500. Each of the buildings is subject to a nonrecourse liability in the amount of $500. The ABC partnership's total interest expense for the taxable year is $120, both nonrecourse liabilities bearing interest at the rate of 12 percent. The indebtedness on the domestic building qualifies for direct allocation under the rules of § 1.861–10T. The indebtedness on the foreign building does not so qualify. The partnership incurred no foreign taxes. The partnership's gross income for the taxable year is $360, consisting of $100 in foreign source income and $260 in domestic source income. Under § 1.752–1(e), the nonrecourse liabilities of the partnership are allocated among the partners according to their share of the partnership profits. Accordingly, the adjusted basis of A, B, and C in their respective partnership interests (for other than apportionment purposes) is, respectively, $55, $770, and $275.

(ii) *Determination of the amount of partnership interest expense that is subject to allocation and apportionment.* Interest on the nonrecourse loan on the domestic building is, under § 1.861–10T, directly allocable to income from that investment. The interest expense is therefore directly allocable to domestic income. Interest on the nonrecourse loan on the foreign building is not directly allocable. The interest expense is therefore subject to allocation and apportionment. Thus, $60 of interest expense is directly allocable to domestic income and $60 of interest expense is subject to allocation and apportionment.

(iii) *Analysis for Partner A.* A's distributive share of the partnership's gross income is $18, which consists of $5 in foreign source income and $13 in domestic source income. A's distributive share of the ABC interest expense is $6, $3 of which is directly allocable to domestic income and $3 of which is subject to apportionment. After direct allocation of qualifying interest expense, A's distributive share of the partnership's gross income consists of $5 in foreign source income and $10 in domestic source income. Because A is a less than 10 percent corporate partner, A's distributive share of any foreign source partnership income is considered to be passive income. Accordingly, in apportioning the $3 of partnership interest expense that is subject to apportionment on a gross income method, one-third ($1) is apportioned to foreign source passive income and two-thirds ($2) is apportioned to domestic source income. In apportioning its other interest expense, A uses the tax book value method. A's adjusted basis in A's partnership interest ($55) includes A's share of the partnership's liabilities ($50), which are included in basis under section 752. For purposes of apportioning other interest expense, A's adjusted basis in the partnership must be reduced to the extent of such liabilities. Thus, A's adjusted basis in the partnership, for purposes of apportionment, is $5. For the purpose of apportioning A's other interest expense, this $5 in basis is characterized one-third as a foreign passive asset and two-thirds as a domestic asset, which is the ratio determined in paragraph (e)(4)(i).

(iv) *Analysis for Partner B.* B's distributive share of the ABC interest expense is $84, $42 of which is directly allocable to domestic income and $42 of which is subject to apportionment. As a corporate limited partner whose interest in the partnership is 10 percent or more, B is subject to the rules of paragraph (e)(2) and paragraph (f) of this section. These rules require that a corporate partner apportion its distributive share of partnership interest expense at the partner level on the asset method described in paragraph (g) of this section by reference to its corporate assets, which include, for this purpose, 70 percent of the partnership's assets, adjusted in the manner described in § 1.861–10T(e) to reflect directly allocable interest expense.

(v) *Analysis for Partner C.* C's distributive share of the ABC interest expense is $30, $15 of which is directly allocable to domestic income and $15 of which is subject to apportionment. As an individual limited partner whose interest in the partnership is 10 percent or more, C is subject to the rules of paragraph (e)(3) of this section. These rules require that an individual's share of partnership interest expense be classified under regulations issued under section 163(h) and then apportioned under the rules applicable to individuals, which are set forth in paragraph (d) of this section.

(7) *Foreign partners.* The distributive share of partnership interest expense of a nonresident alien who is a partner in a partnership shall be considered to be connected with effectively connected income based on the percentage of the assets of the partnership that generate effectively connected income. No interest expense directly incurred by the

partner may be allocated and apportioned to effectively connected income derived by the partnership.

(f) *Corporations*—(1) *Domestic corporations.* Domestic corporations shall apportion interest expense using the asset method described in paragraph (g) of this section and the applicable rules of §§ 1.861–10T through 1.861–13T.

(2) *Foreign branches of domestic corporations.* In the application of the asset method described in paragraph (g) of this section, a domestic corporation shall—

(i) Take into account the assets of any foreign branch, translated according to the rules set forth in paragraph (g) of this section, and

(ii) Combine with its own interest expense any deductible interest expense incurred by a branch, translated according to the rules of section 987 and the regulations thereunder.

For purposes of computing currency gain or loss on any remittance from a branch or other qualified business unit (as defined in § 1.989(a)–1T) under section 987, the rules of this paragraph (f) shall not apply. The branch shall compute its currency gain or loss on remittances by taking into account only its separate expenses and its separate income.

Example —(i) *Facts.* X is a domestic corporation which operates B, a branch doing business in a foreign country. In 1988, without regard to branch B, X has gross domestic source income of $1,000 and gross foreign source general limitation income of $500 and incurs $200 of interest expense. Using the tax book value method of apportionment, X, without regard to branch B, determines the value of its assets that generate domestic source income to be $6,000 and the value of its assets that generate foreign source general limitation income to be $1,000. B constitutes a qualified business unit within the meaning of section 989 with a functional currency other than the U.S. dollar and uses the profit and loss method prescribed by section 987. Applying the translation rules of section 987, B earned $500 of gross foreign general limitation income and incurred $100 of interest expense. B incurred no other expenses. For 1988, the average functional currency book value of B's assets that generate foreign general limitation income translated at the year-end rate for 1988 is $3,000.

(ii) *Computation of net income.* The combined assets of X and B for 1988 (averaged under the rules of § 1.861–9T(g)(3)) consist 60 percent of assets generating domestic source income and 40 percent of assets generating foreign source general limitation income. The combined interest expense of both X and B is $300. Thus, $180 of the combined interest expense is apportioned to domestic source income and $120 is apportioned to the foreign source income, yielding net domestic source income of $820 and net foreign source general limitation income of $880.

(iii) *Computation of currency gain or loss.* For purposes of computing currency gain or loss on branch remittances, B takes into account only its gross income and its separate expenses. In 1988, B therefore has a net amount of income in foreign currency units equal in value to $400. Gain or loss on remittances shall be computed by reference to this amount.

(3) *Controlled foreign corporations*—(i) *In general.* For purposes of computing subpart F income and computing earnings and profits for all other federal tax purposes, the interest expense of a controlled foreign corporation may be apportioned either using the asset method described in paragraph (g) of this section or using the modified gross income method described in paragraph (j) of this section, subject to the rules of subdivisions (ii) and (iii) of this paragraph (f)(2). However, the gross income method described in paragraph (j) of this section is not available to any controlled foreign corporation if a United States shareholder and the members of its affiliated group (as defined in § 1.861–11T(d)) constitute controlling shareholders of such controlled foreign corporation and such affiliated group elects the fair market value method of apportionment under paragraph (g) of this section.

(ii) *Manner of election.* The election to use the asset method described in paragraph (g) of this section or the modified gross income method described in paragraph (j) of this section may be made either by the controlled foreign corporation or by the controlling United States shareholders on behalf of the controlled foreign corporation. The term ‘‘controlling United States shareholders’’ means those United States shareholders (as defined in section 951(b)) who, in aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. In the case of a controlled foreign corporation in which the United States shareholders own stock representing more than 50 percent of the value of the stock in such corporation, but less than 50 percent of the combined voting power of all classes of stock in such corporation, the term ''controlling United States shareholders'' means all the United States shareholders (as defined in section 951(b)) who own (within the meaning of section 958(a)) stock of the controlled foreign corporation. All United States shareholders are bound by the election of either the controlled foreign corporation or the controlling United States shareholders. The election shall be made by filing a written statement described in § 1.964–1(c)(3)(ii) at the time and in the manner described therein and providing a written notice described in § 1.964–1(c)(3)(iii), except that no such written statement or notice is required to be filed or sent before March 13, 1989.

(iii) *Consistency requirement.* The same method of apportionment must be employed by all controlled foreign corporations in which a United States taxpayer and the members of its affiliated group (as defined in § 1.861–11T(d)) constitute controlling United States shareholders. A controlled foreign corporation that is required by this paragraph (f)(3)(iii) to utilize a particular method of apportionment must do so with respect to all United States shareholders.

(iv) *Stock characterization.* Pursuant to § 1.861–12T(c)(2), the stock of a controlled foreign corporation shall be characterized in the hands of any United States shareholder using the same method that the controlled foreign corporation uses to apportion its interest expense.

(4) *Other relevant provisions.* Affiliated groups of corporations are subject to special rules set forth in § 1.861–11T. Section 1.861–12T sets forth rules relating to basis adjustments for stock in nonaffiliated 10 percent owned corporations, special rules relating to the consideration and characterization of certain assets in the apportionment of interest expense, and to other special rules pertaining to the apportionment of interest expense. Section 1.861–13T contains transition rules limiting the application of the rules of §§ 1.861–8T through 1.861–12T, which are otherwise applicable to taxable years beginning after 1986. In the case of an affiliated group of corporations as defined in § 1.861–11T(d), any reference in §§ 1.861–8T through 1.861–13T to the ''taxpayer'' with respect to the allocation and apportionment of interest expense generally denotes the entire affiliated group of corporations and not the separate members thereof, unless the context otherwise requires.

(g) *Asset method*—(1) *In general.* (i) Under the asset method, the taxpayer apportions interest expense to the various statutory groupings based on the average total value of assets within each such grouping for the taxable year, as determined under the asset valuation rules of this paragraph (g)(1) and paragraph (g)(2) of this section and the asset characterization rules of paragraph (g)(3) of this section and § 1.861–12T. Except to the extent otherwise provided (*see, e.g.,* paragraph (d)(1)(iv) of this section), taxpayers must apportion interest expense only on the basis of asset values and may not apportion any interest deduction on the basis of gross income.

(ii) A taxpayer may elect to determine the value of its assets on the basis of either the tax book value or the fair market value of its assets. For rules concerning the application of the fair market value method, see paragraph (h) of this section. In the case of an affiliated group—

(A) The parent of which used the fair market value method prior to 1987, or

(B) A substantial portion of which used the fair market value method prior to 1987, such a taxpayer may use either the fair market value method or the tax book value method for its tax year commencing in 1987 and may use either such method in its tax year commencing in 1988 without regard to which method was used in its tax year commencing in 1987 and without securing the Commissioner's consent. The use of the fair market value method in 1988, however, shall operate as a binding election as described in § 1.861–8T(c)(2). For rules requiring consistency in the use of the tax book value or fair market value method, see § 1.861–8T(c)(2).

(iii) A taxpayer electing to apportion its interest expense on the basis of the fair market value of its assets must establish the fair market value to the satisfaction of the Commissioner. If a taxpayer fails to establish the fair market value of an asset to the satisfaction of the Commissioner, the Commissioner may determine the appropriate asset value. If a taxpayer fails to establish the value of a substantial portion of its assets to the satisfaction of the Commissioner, the Commissioner may require the taxpayer to use the tax book value method of apportionment.

(iv) For rules relating to earnings and profits adjustments by taxpayers using the tax book value method for the stock in certain nonaffiliated 10 percent owned corporations, see § 1.861–12T(b).

(v) The provisions of this paragraph (g)(1) may be illustrated by the following examples.

Example 1 —(i) *Facts.* X, a domestic corporation organized on January 1, 1987, has deductible interest expense in 1987 in the amount of $150,000. X apportions its expenses according to the tax book value method. The adjusted basis of X's assets is $3,600,000, $3,000,000 of which generate domestic source income and $600,000 of which generate foreign source general limitation income.

(ii) *Allocation.* No portion of the $150,000 deduction is directly allocable solely to identified property within the meaning of § 1.861–10T. Thus, X's deduction for interest is related to all its activities and assets.

(iii) *Apportionment.* X apportions its interest expense as follows:

To foreign source general limitation income:

$$\$150{,}000 \times \frac{\$600{,}000}{\$3{,}600{,}000} \,.\,.\,.\,.\,.\,\$25{,}000$$

To domestic source income:

$$\$150{,}000 \times \frac{\$300{,}000}{\$3{,}600{,}000} \,.\,.\,.\,.\,.\,\$125{,}000$$

Example 2 —(i) *Facts.* Assume the same facts as in Example 1, except that X apportions its interest expense on the basis of the fair market value of its assets. X's total assets have a fair market value of $4,000,000, $3,200,000 of which generate domestic source income and $800,000 of which generate foreign source general limitation income.

(ii) *Allocation.* No portion of the $150,000 deduction is directly allocable solely to identified property within the meaning of § 1.861–10T. Thus, X's deduction for interest is related to all its activities and properties.

(iii) *Apportionment.* If it establishes the fair market value of its assets to the satisfaction of the Commissioner, X may apportion its interest expense as follows:

To foreign source general limitation income:

$$\$150{,}000 \times \frac{\$800{,}000}{\$4{,}000{,}000} \,.\,.\,.\,.\,.\,\$30{,}000$$

To domestic source income:

$$\$150{,}000 \times \frac{\$3{,}200{,}000}{\$4{,}000{,}000} \,.\,.\,.\,.\,.\,\$120{,}000$$

(2) *Asset values*—(i) *General rule.* For purposes of determining the value of assets under this section, an average of values (book or market) within each statutory grouping and the residual grouping shall be computed for the year on the basis of values of assets at the beginning and end of the year. For the first taxable year beginning after 1986, a taxpayer may choose to determine asset values solely by reference to the year-end value of its assets, provided that all the members of an affiliated group as defined in § 1.861–11T(d) make the same choice. Thus, no averaging is required for the first taxable year beginning after 1986. Where a substantial distortion of asset values would result from averaging beginning-of-year and year-end values, as might be the case in the event of a major corporate acquisition or disposition, the taxpayer must use a different method of asset valuation that more clearly reflects the average value of assets weighted to reflect the time such assets are held by the taxpayer during the taxable year.

(ii) *Special rule for qualified business units of domestic corporations with functional currency other than the U.S. dollar*—(A) *Tax book value method.* In the case of taxpayers using the tax book value method of apportionment, the following rules shall apply to determine the value of the assets of a qualified business unit (as defined in section 989(a)) of a domestic corporation with a functional currency other than the dollar.

(*1*) *Profit and loss branch.* In the case of a branch for which an election is not effective under § 1.985–2T to use the dollar approximate separate transactions method of computing currency gain or loss, the tax book value shall be determined by applying the rules of paragraph (g)(2)(i) and (3) of this section with respect to beginning-of-year and end-of-year tax book value in units of functional currency that are translated into dollars at the end-of-year exchange rate between the functional currency and the U.S. dollar.

Example. At the end of 1987, a profit and loss branch has assets that generate foreign source general limitation income with a tax book value in units of functional currency of 100. At the end of 1987, the unit is worth $1. At the end of 1988, the branch has assets that generate foreign source general limitation income with a tax book value in units of functional currency of 80. At the end of 1988, the unit is worth $2. The average value of foreign source general limitation assets for 1988 is 90 units, which is worth $180.

(*2*) *Approximate separate transactions method.* In the case of a branch for which an election is effective under § 1.985–2T to use the dollar approximate separate transactions method to compute currency gain or loss, the beginning-of-year dollar amount of the assets shall be determined by reference to the end-of-year balance sheet of the branch for the immediately preceding taxable year, adjusted for United States generally accepted accounting principles and United States tax accounting principles, and translated into U.S. dollars as provided in § 1.985–3T. The year-end dollar amount of the assets of the branch shall be determined in the same manner by reference to the end-of-year balance sheet for the current taxable year. The beginning-of-year and end-of-year dollar tax book value of assets, as so determined, within each grouping must then be averaged as provided in paragraph (g)(2)(i) of this section.

(B) *Fair market value method.* In the case of taxpayers using the fair market value method of apportionment, the beginning-of-year and end-of-year fair market values of branch assets within each grouping shall be computed in dollars and averaged as provided in this paragraph (g)(2).

(iii) *Adjustment for directly allocated interest.* Prior to averaging, the year-end value of any asset to which interest expense is directly allocated during the current taxable year under the rules of § 1.861–10T (b) or (c) shall be reduced (but not below zero) by the percentage of the principal amount of indebtedness outstanding at year-end equal to the percentage of all interest on the debt for the taxable year that is directly allocated.

(iv) *Assets in intercompany transactions.* In the application of the asset method described in this paragraph (g), the tax book value of assets transferred between affiliated corporations in intercompany transactions shall be determined without regard to the gain or loss that is deferred under the regulations issued under section 1502.

(v) Example. X is a domestic corporation that uses the fair market value method of apportionment. X is a calendar year taxpayer. X owns 25 percent of the stock of A, a noncontrolled section 902 corporation. At the end of 1987, the fair market value of X's assets by income grouping are as follows:

Domestic	$1,000,000
Foreign general limitation	500,000
Foreign passive	500,000
Noncontrolled section 902 corporation	50,000

For its 1987 tax year, X apportions its interest expense by reference to the 1987 year-end values. In July of 1988, X sells a portion of its investment in A and in an asset acquisition purchases a shipping business, the assets of which generate exclusively foreign shipping income. At the end of 1988, the fair market values of X's assets by income grouping are as follows:

Domestic	$800,000
Foreign general limitation	900,000
Foreign passive	300,000
Noncontrolled section 902 corporation	40,000
Foreign shipping	100,000

For its 1988 tax year, X shall apportion its interest expense by reference to the average of the 1988 beginning-of-year values (the 1987 year-end values) and the 1988 year-end values, assuming that the averaging of beginning-of-year and end-of-year values does not cause a substantial distortion of asset values. These averages are as follows:

Domestic	$900,000
Foreign general limitation	700,000
Foreign passive	400,000
Foreign shipping	50,000
Noncontrolled section 902 corporation	45,000

(3) *Characterization of assets.* Assets are charactrized for purposes of this section according to the source and type of the income that they generate, have generated, or may reasonably be

expected to generate. The physical location of assets is not relevant to this determination. Subject to the special rules of paragraph (h) concerning the application of the fair market value method of apportionment, the value of assets within each statutory grouping and the residual grouping at the beginning and end of each year shall be determined by dividing the taxpayer's assets into three types—

(i) *Single category assets.* Assets that generate income that is exclusively within a single statutory grouping or the residual grouping;

(ii) *Multiple category assets.* Assets that generate income within more than one grouping of income (statutory or residual); and

(iii) *Assets without directly identifiable yield.* Assets that produce no directly identifiable income yield or that contribute equally to the generation of all the income of the taxpayer (such as assets used in general and administrative functions).

Single category assets are directly attributable to the relevant statutory or residual grouping of income. In order to attribute multiple category assets to the relevant groupings of income, the income yield of each such asset for the taxable year must be analyzed to determine the proportion of gross income generated by it within each relevant grouping. The value of each asset is then prorated among the relevant groupings of income according to their respective proportions of gross income. The value of each asset without directly identifiable income yield must be identified. However, because prorating the value of such assets cannot alter the ratio of assets within the various groupings of income (as determined by reference to the single and multiple category assets), they are not taken into account in determining that ratio. Special asset characterization rules that are set forth in § 1.861–12T. An example demonstrating the application of the asset method is set forth in § 1.861–12T(d).

(h) *The fair market value method.* An affiliated group (as defined in § 1.861–11T(d)) or other taxpayer (the ‘‘taxpayer'') that elects to use the fair market value method of apportionment shall value its assets according to the following methodology.

(1) *Determination of values*—(i) *Valuation of group assets.* The taxpayer shall first determine the aggregate value of the assets of the taxpayer on the last day of its taxable year without excluding the value of stock in foreign subsidiaries or any other asset. In the case of a publicly traded corporation, this determination shall be equal to the aggregate trading value of the taxpayer's stock traded on established securities markets at year-end increased by the taxpayer's year-end liabilities to unrelated persons and its pro rata share of year-end liabilities of all related persons owed to unrelated persons. In determining whether persons are related, § 1.861–8T(c)(2) shall apply. In the case of a corporation that is not publicly traded, this determination shall be made by reference to the capitalization of corporate earnings, in accordance with the rules of Rev. Rul. 68–609. In either case, control premium shall not be taken into account.

(ii) *Valuation of tangible assets.* The taxpayer shall determine the value of all assets held by the taxpayer and its pro rata share of assets held by other related persons on the last day of its taxable year, excluding stock or indebtedness in such persons, any intangible property as defined in section 936(h)(3)(B), or goodwill or going concern value intangibles. Such valuations shall be made using generally accepted valuation techniques. For this purpose, assets may be combined into reasonable groupings. Statistical methods of valuation may only be used in connection with fungible property, such as commodities. The value of stock in any corporation that is not a related person shall be determined under the rules of paragraph (h)(1)(i) of this section, except that no liabilities shall be taken into account.

(iii) *Computation of intangible asset value.* The value of the intangible assets of the taxpayer and of intangible assets of all related persons attributable to the taxpayer's ownership in related persons is equal to the amount obtained by subtracting the amount determined under paragraph (h)(1)(ii) of this section from the amount determined under paragraph (h)(1)(i) of this section.

(2) *Apportionment of intangible asset value.* The value of the intangible assets determined under paragraph (h)(1)(iii) of this section is apportioned among the taxpayer and all related persons in proportion to the net income before interest expense of the taxpayer and the taxpayer's pro rata share of the net income before interest expense of each ralated person held by the taxpayer, excluding income that is passive under § 1.904–4(b). For this purpose, net income is determined before reduction for income taxes. Net income of the taxpayer and of related persons shall be computed without regard to dividends or interest received from any person that is related to the taxpayer.

(3) *Characterization of affiliated group's portion of intangible asset value.* The portion of the value of intangible assets of the taxpayer and related persons that is apportioned to the taxpayer under paragraph (h)(2) of this section is characterized on the basis of net income before interest expense, as determined under paragraph (h)(2) of this section, of the taxpayer within each statutory or residual grouping of income.

(4) *Valuing stock in related persons held by the taxpayer.* The value of stock in a related person held by the taxpayer equals the sum of the following amounts reduced by the taxpayer's pro rata share of liabilities of such related person:

(i) The portion of the value of intangible assets of the taxpayer and related persons that is apportioned to such related person under paragraph (h)(2) of this section;

(ii) The taxpayer's pro rata share of tangible assets held by the related person (as determined under paragraph (h)(1)(ii) of this section); and

(iii) The total value of stock in all related person held by the related person as determined under this paragraph (h)(4).

(5) *Characterizing stock in related persons.* Stock in a related person held by the taxpayer or by another related person shall be characterized on the basis of the fair market value of the taxpayer's pro rata share of assets held by the related person attributed to each statutory grouping and the residual grouping under the stock characterization rules of § 1.861–12T(c)(3)(ii), except that the portion of the value of intangible assets of the taxpayer and related persons that is apportioned to the related person under paragraph (h)(2) of this section shall be characterized on the basis of the net income before interest expense of the related person within each statutory grouping or residual grouping (excluding income that is passive under § 1.904–4(b)).

(6) *Adjustments for apportioning related person expenses.* For purposes of apportioning expenses of a related person, the value of stock in a second related person as otherwise determined under paragraph (h)(4) of this section (which is determined on the basis of the taxpayer's percentage ownership interest in the second related person) shall be increased to reflect the first related person's percentage ownership interest in the second related person to the extent it is larger.

Example. Assume that a taxpayer owns 80 percent of CFC1, which owns 100 percent of CFC2. The value of CFC1 is determined generally under paragraph (h)(4) on the basis of the taxpayer's 80 percent indirect interest in CFC2. For purposes of apportioning expenses of CFC1, 100 percent of the stock of CFC1 must be taken into account. Therefore, the value of CFC2 stock in the hands of CFC1 shall equal the value of CFC2 stock in the hands of CFC1 as determined under paragraph (h)(4) of this section, increased by 25 percent of such amount to reflect the fact that CFC1 owns 100 percent and not 80 percent of CFC2.

(i) [Reserved]

(j) *Modified gross income method.* Subject to rules set forth in paragraph (f)(3) of this section, the interest expense of a controlled foreign corporation may be allocated according to the following rules.

(1) *Single-tier controlled foreign corporation.* In the case of a controlled foreign corporation that does not hold stock in any lower-tier controlled foreign corporation, the interest expense of the controlled foreign corporation shall be apportioned based on its gross income.

(2) *Multiple vertically owned controlled foreign corporations.* In the case of a controlled foreign corporation that

holds stock in any lower-tier controlled foreign corporation, the interest expense of that controlled foreign corporation and such upper-tier controlled foreign corporation shall be apportioned based on the following methodology:

(i) *Step 1.* Commencing with the lowest-tier controlled foreign corporation in the chain, allocate and apportion its interest expense based on its gross income as provided in paragraph (j)(1) of this section, yielding gross income in each grouping net of interest expense.

(ii) *Step 2.* Moving to the next higher-tier controlled foreign corporation, combine the gross income of such corporation within each grouping with its pro rata share of the gross income net of interest expense of all lower-tier controlled foreign corporations held by such higher-tier corporation within the same grouping adjusted as follows:

(A) Exclude from the gross income of the upper-tier corporation any dividends or other payments received from the lower-tier corporation other than interest subject to look-through under section 904(d)(3); and

(B) Exclude from the gross income net of interest expense of any lower-tier corporation any subpart F income (net of interest expense apportioned to such income).

Then apportion the interest expense of the higher-tier controlled foreign corporation based on the adjusted combined gross income amounts. Repeat this step 2 for each next higher-tier controlled foreign corporation in the chain. For purposes of this paragraph (j)(2)(ii), pro rata share shall be determined under principles similar to section 951(a)(2).

[T.D. 8228, 53 FR 35477, Sept. 14, 1988, as amended by T.D. 8257, 54 FR 31819, Aug. 2, 1989; T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8658, 61 FR 9329, Mar. 8, 1996]

§1.861–10 Special allocations of interest expense.

(a)–(d) [Reserved]

(e) *Treatment of certain related group indebtedness*—(1) *In general.* If, for any taxable year beginning after December 31, 1991, a U.S. shareholder (as defined in paragraph (e)(5)(i) of this section) has both—

(i) Excess related group indebtedness (as determined under Step One in paragraph (e)(2) of this section) and

(ii) Excess U.S. shareholder indebtedness (as determined under Step Two in paragraph (e)(3) of this section),

the U.S. shareholder shall allocate, to its gross income in the various separate limitation categories described in section 904(d)(1), a portion of its interest expense paid or accrued to any obligee who is not a member of the affiliated group (as defined in §1.861–11T(d)) of the U.S. shareholder (‘‘third party interest expense’’), excluding amounts allocated under paragraphs (b) and (c) of §1.861–10T. The amount of third party interest expense so allocated shall equal the total amount of interest income derived by the U.S. shareholder during the year from related group indebtedness, multiplied by the ratio of the lesser of the foregoing two amounts of excess indebtedness for the year to related group indebtedness for the year. This amount of third party interest expense is allocated as described in Step Three in paragraph (e)(4) of this section.

(2) *Step One: Excess related group indebtedness.* (i) The excess related group indebtedness of a U.S. shareholder for the year equals the amount by which its related group indebtedness for the year exceeds its allowable related group indebtedness for the year.

(ii) The ‘‘related group indebtedness’’ of the U.S. shareholder is the average of the aggregate amounts at the beginning and end of the year of indebtedness owed to the U.S. shareholder by each controlled foreign corporation which is a related person (as defined in paragraph (e)(5)(ii) of this section) with respect to the U.S. shareholder.

(iii) The ‘‘allowable related group indebtedness’’ of a U.S. shareholder for the year equals—

(A) The average of the aggregate values at the beginning and end of the year of the assets (including stock holdings in and obligations of related persons, other than related controlled foreign corporations) of each related controlled foreign corporation, multiplied by

(B) The foreign base period ratio of the U.S. shareholder for the year.

(iv) The ‘‘foreign base period ratio’’ of the U.S. shareholder for the year is the average of the related group debt-to-asset ratios of the U.S. shareholder for each taxable year comprising the foreign base period for the current year (each a ‘‘base year’’). For this purpose, however, the related group debt-to-asset ratio of the U.S. shareholder for any base year may not exceed 110 percent of the foreign base period ratio for that base year. This limitation shall not apply with respect to any of the five taxable years chosen as initial base years by the U.S. shareholder under paragraph (e)(2)(v) of this section or with respect to any base year for which the related group debt-to-asset ratio does not exceed 0.10.

(v)(A) The foreign base period for any current taxable year (except as described in paragraphs (e)(2)(v) (B) and (C) of this section) shall consist of the five taxable years immediately preceding the current year.

(B) The U.S. shareholder may choose as foreign base periods for all of its first five taxable years for which this paragraph (e) is effective the following alternative base periods:

(*1*) For the first effective taxable year, the 1982, 1983, 1984, 1985 and 1986 taxable years;

(*2*) For the second effective taxable year, the 1983, 1984, 1985 and 1986 taxable years and the first effective taxable year;

(*3*) For the third effective taxable year, the 1984, 1985 and 1986 taxable years and the first and second effective taxable years;

(*4*) For the fourth effective taxable year, the 1985 and 1986 taxable years and the first, second and third effective taxable years; and

(*5*) For the fifth effective taxable year, the 1986 taxable year and the first, second, third and fourth effective taxable years.

(C) If, however, the U.S. shareholder does not choose, under paragraph (e)(10)(ii) of this section, to apply this paragraph (e) to one or more taxable years beginning before January 1, 1992, the U.S. shareholder may not include within any foreign base period the taxable year immediately preceding the first effective taxable year. Thus, for example, a U.S. shareholder for which the first effective taxable year is the taxable year beginning on October 1, 1992, may not include the taxable year beginning on October 1, 1991, in any foreign base period. Assuming that the U.S. shareholder does not elect the alternative base periods described in paragraph (e)(2)(v)(B) of this section, the initial foreign base period for the U.S. shareholder will consist of the taxable years beginning on October 1 of 1986, 1987, 1988, 1989, and 1990. The foreign base period for the U.S. shareholder for the following taxable year, beginning on October 1, 1993, will consist of the taxable years beginning on October 1 of 1987, 1988, 1989, 1990, and 1992.

(D) If the U.S. shareholder chooses the base periods described in paragraph (e)(2)(v)(B) of this section as foreign base periods, it must make a similar election under paragraph (e)(3)(v)(B) of this section with respect to its U.S. base periods.

(vi) The ‘‘related group debt-to-asset ratio’’ of a U.S. shareholder for a year is the ratio between—

(A) The related group indebtedness of the U.S. shareholder for the year (as determined under paragraph (e)(2)(ii) of this section); and

(B) The average of the aggregate values at the beginning and end of the year of the assets (including stock holdings in and obligations of related persons, other than related controlled foreign corporations) of each related controlled foreign corporation.

(vii) Notwithstanding paragraph (e)(2)(i) of this section, a U.S. shareholder is considered to have no excess related group indebtedness for the year if—

(A) Its related group indebtedness for the year does not exceed its allowable related group indebtedness for the immediately preceding year (as determined under paragraph (e)(2)(iii) of this section); or

(B) Its related group debt-to-asset ratio (as determined under paragraph (e)(2)(vi) of this section) for the year does not exceed 0.10.

(3) *Step Two: Excess U.S. shareholder indebtedness.* (i) The excess indebtedness of a U.S. shareholder for the year

equals the amount by which its unaffiliated indebtedness for the year exceeds its allowable indebtedness for the year.

(ii) The ‘‘unaffiliated indebtedness’’ of the U.S. shareholder is the average of the aggregate amounts at the beginning and end of the year of indebtedness owed by the U.S. shareholder to any obligee, other than a member of the affiliated group (as defined in §1.861–11T(d)) of the U.S shareholder.

(iii) The ‘‘allowable indebtedness’’ of a U.S. shareholder for the year equals—

(A) The average of the aggregate values at the beginning and end of the year of the assets of the U.S. shareholder (including stock holdings in and obligations of related controlled foreign corporations, but excluding stock holdings in and obligations of members of the affiliated group (as defined in §1.861–11T(d)) of the U.S. shareholder), reduced by the amount of the excess related group indebtedness of the U.S. shareholder for the year (as determined under Step One in paragraph (e)(2) of this section), multiplied by

(B) The U.S. base period ratio of the U.S. shareholder for the year.

(iv) The ‘‘U.S. base period ratio’’ of the U.S. shareholder for the year is the average of the debt-to-asset ratios of the U.S. shareholder for each taxable year comprising the U.S. base period for the current year (each a ‘‘base year’’). For this purpose, however, the debt-to-asset ratio of the U.S. shareholder for any base year may not exceed 110 percent of the U.S. base period ratio for that base year. This limitation shall not apply with respect to any of the five taxable years chosen as initial base years by the U.S. shareholder under paragraph (e)(3)(v) of this section or with respect to any base year for which of the debt-to-asset ratio does not exceed 0.10.

(v)(A) The U.S. base period for any current taxable year (except as described in paragraphs (e)(3)(v) (B) and (C) of this section) shall consist of the five taxable years immediately preceding the current year.

(B) The U.S. shareholder may choose as U.S. base periods for all of its first five taxable years for which this paragraph (e) is effective the following alternative base periods:

(*1*) For the first effective taxable year, the 1982, 1983, 1984, 1985 and 1986 taxable years;

(*2*) For the second effective taxable year, the 1983, 1984, 1985 and 1986 taxable years and the first effective taxable year;

(*3*) For the third effective taxable year, the 1984, 1985 and 1986 taxable years and the first and second effective taxable years;

(*4*) For the fourth effective taxable year, the 1985 and 1986 taxable years and the first, second and third effective taxable years; and

(*5*) For the fifth effective taxable year, the 1986 taxable year and the first, second, third and fourth effective taxable years.

(C) If, however, the U.S. shareholder does not choose, under paragraph (e)(10)(ii) of this section, to apply this paragraph (e) to one or more taxable years beginning before January 1, 1992, the U.S. shareholder may not include within any U.S. base period the taxable year immediately preceding the first effective taxable year. Thus, for example, a U.S. shareholder for which the first effective taxable year is the taxable year beginning on October 1, 1992, may not include the taxable year beginning on October 1, 1991, in any U.S. base period. Assuming that the U.S. shareholder does not elect the alternative base periods described in paragraph (e)(3)(v)(B) of this section, the initial U.S. base period for the U.S. shareholder will consist of the taxable years beginning on October 1, of 1986, 1987, 1988, 1989, and 1990. The U.S. base period for the U.S. shareholder for the following taxable year, beginning on October 1, 1993, will consist of the taxable years beginning on October 1, 1987, 1988, 1989, 1990, and 1992.

(D) If the U.S. shareholder chooses the base periods described in paragraph (e)(3)(v)(B) of this section as U.S. base periods, it must make a similar election under paragraph (e)(2)(v)(B) of this section with respect to its foreign base periods.

(vi) The ‘‘debt-to-asset ratio’’ of a U.S. shareholder for a year is the ratio between—

(A) The unaffiliated indebtedness of the U.S. shareholder for the year (as determined under paragraph (e)(3)(ii) of this section); and

(B) The average of the aggregate values at the beginning and end of the year of the assets of the U.S. shareholder. For this purpose, the assets of the U.S. shareholder include stock holdings in and obligations of related controlled foreign corporations but do not include stock holdings in and obligations of members of the affiliated group (as defined in § 1.861–11T(d)).

(vii) A U.S. shareholder is considered to have no excess indebtedness for the year if its debt-to-asset ratio (as determined under paragraph (e)(3)(vi) of this section) for the year does not exceed 0.10.

(4) *Step Three: Allocation of third party interest expense.* (i) A U.S. shareholder shall allocate to its gross income in the various separate limitation categories described in section 904(d)(1) a portion of its third party interest expense incurred during the year equal in amount to the interest income derived by the U.S. shareholder during the year from allocable related group indebtedness.

(ii) The ''allocable related group indebtedness'' of a U.S. shareholder for any year is an amount of related group indebtedness equal to the lesser of—

(A) The excess related group indebtedness of the U.S. shareholder for the year (determined under Step One in paragraph (e)(2) of this section); or

(B) The excess U.S. shareholder indebtedness for the year (determined under Step Two in paragraph (e)(3) of this section).

(iii) The amount of interest income derived by a U.S. shareholder from allocable related group indebtedness during the year equals the total amount of interest income derived by the U.S. shareholder during the year with respect to related group indebtedness, multiplied by the ratio of allocable related group indebtedness for the year to the aggregate amount of related group indebtedness for the year.

(iv) The portion of third party interest expense described in paragraph (e)(4)(i) of this section shall be allocated in proportion to the relative average amounts of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year. The remaining portion of third party interest expense of the U.S. shareholder for the year shall be apportioned as provided in §§ 1.861–8T through 1.861–13T, excluding paragraph (e) of § 1.861–10T and this paragraph (e).

(v) The average amount of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year equals the average of the aggregate amounts of such indebtedness in each separate limitation category at the beginning and end of the year. Solely for purposes of this paragraph (e)(4), each debt obligation of a related controlled foreign corporation held by the U.S. shareholder at the beginning or end of the year is attributed to separate limitation categories in the same manner as the stock of the obligor would be attributed under the rules of § 1.861–12T(c)(3), whether or not such stock is held directly by the U.S. shareholder.

(vi) The amount of third party interest expense of a U.S. shareholder allocated pursuant to this paragraph (e)(4) shall not exceed the total amount of the third party interest expense of the U.S. shareholder for the year (excluding any third party interest expense allocated under paragraphs (b) and (c) of § 1.861–10T).

(5) *Definitions.* For purposes of this paragraph (e), the following terms shall have the following meanings.

(i) *U.S. shareholder.* The term ''U.S. shareholder'' has the same meaning as the term ''United States shareholder'' when used in section 957, except that, in the case of a United States shareholder that is a member of an affiliated group (as defined in § 1.861–11T(d)), the entire affiliated group is considered to constitute a single U.S. shareholder.

(ii) *Related person.* For the definition of the term ''related person'', see § 1.861–8T(c)(2). A controlled foreign corporation is considered ''related'' to a U.S. shareholder if it is a related person with respect to the U.S. shareholder.

(6) *Determination of asset values.* A U.S. shareholder shall determine the values of the assets of each related controlled foreign corporation (for purposes of Step One in paragraph (e)(2) of this section) and the assets of the U.S. shareholder (for purposes of Step Two in paragraph (e)(3) of this section) for

any year in accordance with the valuation method (tax book value or fair market value) elected for that year pursuant to §1.861–9T(g). However, solely for purposes of this paragraph (e), a U.S. shareholder may instead choose to determine the values of the assets of all related controlled foreign corporations by reference to their values as reflected on Forms 5471 (the annual information return with respect to each related controlled foreign corporation), subject to the translation rules of paragraph (e)(8)(i) of this section. This method of valuation may be used only if the taxable years of each of the related controlled foreign corporations begin with, or no more than one month earlier than, the taxable year of the U.S. shareholder. Once chosen for a taxable year, this method of valuation must be used in each subsequent taxable year and may be changed only with the consent of the Commissioner.

(7) *Adjustments to asset value.* For purposes of apportioning remaining interest expense under §1.861–9T, a U.S. shareholder shall reduce (but not below zero) the value of its assets for the year (as determined under §1.861–9T (g) (3) or (h)) by an amount equal to the allocable related group indebtedness of the U.S. shareholder for the year (as determined under Step Three in paragraph (e)(4)(ii) of this section). This reduction is allocated among assets in each separate limitation category in proportion to the average amount of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year (as determined under Step Three in paragraph (e)(4)(v) of this section).

(8) *Special rules*—(i) *Exchange rates.* All indebtedness amounts and asset values (including current year and base year amounts and values) denominated in a foreign currency shall be translated into U.S. dollars at the exchange rate for the current year. The exchange rate for the current year may be determined under any reasonable method (*e.g.*, average of month-end exchange rates for each month in the current year) if it is consistently applied to the current year and all base years. Once chosen for a taxable year, a method for determining an exchange rate must be used in each subsequent taxable year and will be treated as a method of accounting for purposes of section 446. A taxpayer may apply a different translation rule only with the prior consent of the Commissioner. In this regard, the Commissioner will be guided by the extent to which a different rule would reduce the comparability of dollar amounts of indebtedness and dollar asset values for the base years and the current year.

(ii) *Exempt assets.* Solely for purposes of this paragraph (e), any exempt assets otherwise excluded under section 864(e)(3) and §1.861–8T(d) shall be included as assets of the U.S. shareholder or related controlled foreign corporation.

(iii) *Exclusion of certain directly allocated indebtedness and assets.* Qualified nonrecourse indebtedness (as defined in §1.861–10T(b)(2)) and indebtedness incurred in connection with an integrated financial transaction (as defined in §1.861–10T(c)(2)) shall be excluded from U.S. shareholder indebtedness and related group indebtedness. In addition, assets which are the subject of qualified nonrecourse indebtedness or integrated financial transactions shall be excluded from the assets of the U.S. shareholder and each related controlled foreign corporation.

(iv) *Exclusion of certain receivables.* Receivables between related controlled foreign corporations (or between members of the affiliated group constituting the U.S. shareholder) shall be excluded from the assets of the related controlled foreign corporation (or affiliated group member) holding such receivables. See also §1.861–11T(e)(1).

(v) *Classification of certain loans as related group indebtedness.* If—

(A) A U.S. shareholder owns stock in a related controlled foreign corporation which is a resident of a country that—

(*1*) Does not impose a withholding tax of 5 percent or more upon payments of dividends to a U.S. shareholder; and

(*2*) Does not, for the taxable year of the controlled foreign corporation, subject the income of the controlled foreign corporation to an income tax which is greater than that percentage specified under §1.954–1T(d)(1)(i) of the maximum rate of tax specified under section 11 of the Code, and

(B) The controlled foreign corporation has outstanding a loan or loans to one or more other related controlled foreign corporations, or the controlled foreign corporation has made a direct or indirect capital contribution to one or more other related controlled foreign corporations which have outstanding a loan or loans to one or more other related controlled foreign corporations, then, to the extent of the aggregate amount of its capital contributions in taxable years beginning after December 31, 1986, to the related controlled foreign corporation that made such loans or additional contributions, the U.S. shareholder itself shall be treated as having made the loans decribed in paragraph (e)(8)(v)(B) of this section and, thus, such loan amounts shall be considered related group indebtedness. However, for purposes of paragraph (e)(4) of this section, interest income derived by the U.S. shareholder during the year from related group indebtedness shall not include any income derived with respect to the U.S. shareholder's ownership of stock in the related controlled foreign corporation that made such loans or additional contributions.

(vi) *Classification of certain stock as related person indebtedness.* In determining the amount of its related group indebtedness for any taxable year, a U.S. shareholder must treat as related group indebtedness its holding of stock in a related controlled foreign corporation if, during such taxable year, such related controlled foreign corporation claims a deduction for interest under foreign law for distributions on such stock. However, for purposes of paragraph (e)(4) of this section, interest income derived by the U.S. shareholder during the year from related group indebtedness shall not include any income derived with respect to the U.S. shareholder's ownership of stock in the related controlled foreign corporation.

(9) *Corporate events*—(i) *Initial acquisition of a controlled foreign corporation.* If the foreign base period of the U.S. shareholder for any year includes a base year in which the U.S. shareholder did not hold stock in any related controlled foreign corporation, then, in computing the foreign base period ratio, the related group debt-to-asset ratio of the U.S. shareholder for any such base year shall be deemed to be 0.10.

(ii) *Incorporation of U.S. shareholder*—(A) *Nonapplication.* This paragraph (e) does not apply to the first taxable year of the U.S. shareholder. However, this paragraph (e) does apply to all following years, including years in which later members of the affiliated group may be incorporated.

(B) *Foreign and U.S. base period ratios.* In computing the foreign and U.S. base period ratios, the foreign and U.S. base periods of the U.S. shareholder shall be considered to be only the period prior to the current year that the U.S. shareholder was in existence if this prior period is less than five taxable years.

(iii) *Acquisition of additional corporations.* (A) If a U.S. shareholder acquires (directly or indirectly) stock of a foreign or domestic corporation which, by reason of the acquisition, then becomes a related controlled foreign corporation or a member of the affiliated group, then in determining excess related group indebtedness or excess U.S. shareholder indebtedness, the indebtedness and assets of the acquired corporation shall be taken into account only at the end of the acquisition year and in following years. Thus, amounts of indebtedness and assets and the various debt-to-asset ratios of the U.S. shareholder existing at the beginning of the acquisition year or relating to preceding years are not recalculated to take account of indebtedness and assets of the acquired corporation existing as of dates before the end of the year. If, however, a major acquisition is made within the last three months of the year and a substantial distortion of values for the year would otherwise result, the taxpaper must take into account the average values of the acquired indebtedness and assets weighted to reflect the time such indebtedness is owed and such assets are held by the taxpayer during the year.

(B) In the case of a reverse acquisition subject to this paragraph (e)(9), the rules of § 1.1502–75(d)(3) apply in determining which corporations are the acquiring and acquired corporations. For this purpose, whether corporations are affiliated is determined under § 1.861–11T(d).

(C) If the stock of a U.S. shareholder is acquired by (and, by reason of such acquisition, the U.S. shareholder becomes affiliated with) a corporation described below, then such U.S. shareholder shall be considered to have acquired such corporation for purposes of the application of the rules of this paragraph (e). A corporation to which this paragraph (e)(9)(iii)(C) applies is—

(*1*) A corporation which is not affiliated with any other corporation (other than other similarly described corporation); and

(*2*) Substantially all of the assets of which consist of cash, securities and stock.

(iv) *Election to compute base period ratios by including acquired corporations.* A U.S. shareholder may choose, solely for purposes of paragraph (e)(9) (i) and (iii) of this section, to compute its foreign and U.S. base period ratios for the acquisition year and all subsequent years by taking into account the indebtedness and asset values of the acquired corporation or corporations (including related group indebtedness owed to a former U.S. shareholder) at the beginning of the acquisition year and in each of the five base years preceding the acquisition year. This election, if made for an acquisition, must be made for all other acquisitions occurring during the same taxable year or initiated in that year and concluded in the following year.

(v) *Dispositions.* If a U.S. shareholder disposes of stock of a foreign or domestic corporation which, by reason of the disposition, then ceases to be a related controlled foreign corporation or a member of the affiliated group (unless liquidated or merged into a related corporation), in determining excess related group indebtedness or excess U.S. shareholder indebtedness, the indebtedness and assets of the divested corporation shall be taken into account only at the beginning of the disposition year and for the relevant preceding years. Thus, amounts of indebtedness and assets and the various debt-to-asset ratios of the U.S. shareholder existing at the end of the year or relating to following years are not affected by indebtedness and assets of the divested corporation existing as of dates after the beginning of the year. If, however, a major disposition is made within the first three months of the year and a substantial distortion of values for the year would otherwise result, the taxpayer must take into account the average values of the divested indebtedness and assets weighted to reflect the time such indebtedness is owed and such assets are held by the taxpayer during the year.

(vi) *Election to compute base period ratios by excluding divested corporations.* A U.S. shareholder may choose, solely for purposes of paragraph (e) (9) (v) and (vii) of this section, to compute its foreign and U.S. base period ratios for the disposition year and all subsequent years without taking into account the indebtedness and asset values of the divested corporation or corporations at the beginning of the disposition year and in each of the five base years preceding the disposition year. This election, if made for a disposition, must be made for all other dispositions occurring during the same taxable year or initiated in that year and concluded in the following year.

(vii) *Section 355 transactions.* A U.S. corporation which becomes a separate U.S. shareholder as a result of a distribution of its stock to which section 355 applies shall be considered—

(A) As disposed of by the U.S. shareholder of the affiliated group of which the distributing corporation is a member, with this disposition subject to the rules of paragraphs (e) (9) (v) and (vi) of this section; and

(B) As having the same related group debt-to-asset ratio and debt-to-asset ratio as the distributing U.S. shareholder in each year preceding the year of distribution for purposes of applying this paragraph (e) to the year of distibution and subsequent years of the distributed corporation.

(10) *Effective date*—(i) *Taxable years beginning after December 31, 1991.* The provisions of this paragraph (e) apply to all taxable years beginning after December 31,1991.

(ii) *Taxable years beginning after December 31, 1987 and before January 1, 1992.* The provisions of § 1.861–10T (e) apply to taxable years beginning after December 31, 1987, and before January 1, 1992. The taxpayer may elect to apply the provisions of this paragraph

(e) (in lieu of the provisions of § 1.861–10T (e)) for any taxable year beginning after December 31, 1987, but this paragraph (e) must then be applied to all subsequent taxable years.

(11) The following example illustrates the provisions of this paragraph (e):

Example. (i) *Facts.* X, a domestic corporation, elects to apply this paragraph (e) to its 1990 tax year. X has a calendar taxable year and apportions its interest expense on the basis of the tax book value of its assets. In 1990, X incurred deductible third-party interest expense of $24,960 on an average amount of indebtedness (determined on the basis of beginning-of-year and end-of-year amounts) of $249,600. X manufactures widgets, all of which are sold in the United States. X owns all of the stock of Y, a controlled foreign corporation that also has a calendar taxable year and is also engaged in the manufacture and sale of widgets. Y has no earnings and profits or deficit of earnings and profits attributable to taxable years prior to 1987. X's total assets and their average tax book values (determined on the basis of beginning-of-year and end-of-year tax book values) for 1990 are:

Asset	Average tax book value
Plant and equipment	$315,000
Corporate headquarters	60,000
Y stock	75,000
Y note	50,000
Total	500,000

Y had $25,000 of income before the deduction of any interest expense. Of this total, $5,000 is high withholding tax interest income. The remaining $20,000 is derived from widget sales, and constitutes foreign source general limitation income. Assume that Y has no deductions from gross income other than interest expense. During 1990, Y paid $5,000 of interest expense to X on the Y note and $10,000 of interest expense to third parties, giving Y total interest expense of $15,000. X elects pursuant to § 1.861–9T to apportion Y's interest expense under the gross income method prescribed in section 1.861–9T (j).

(ii) *Step 1:* Using a beginning and end of year average, X (the U.S. shareholder) held the following average amounts of indebtedness of Y and Y had the following average asset values:

	1985	1986–88	1989	1990
(A) Related group indebtedness	$11,000	24,000	26,000	50,000
(B) Average Value of Assets of Related CFC	100,000	200,000	200,000	250,000
(C) Related Group Debt-to-Asset Ratio	.11	.12	.13	.20

(*1*) X's ''foreign base period ratio'' for 1990, an average of its ratios of related group indebtedness to related group assets for 1985 through 1989, is:

(.11+.12+.12+.12+.13)/5=.12

(*2*) X's ''allowable related group indebtedness'' for 1990 is:

$250,000×.12=$30,000.

(*3*) X's ''excess related group indebtedness'' for 1990 is:

$50,000 − $30,000=$20,000

X's related group indebtedness of $50,000 for 1990 is greater than its allowable related group indebtedness of $24,000 for 1989 (assuming a foreign base period ratio in 1989 of .12), and X's related group debt-to-asset ratio for 1990 is .20, which is greater than the ratio of .10 described in paragraph (e)(2)(vii)(B) of this section. Therefore, X's excess related group indebtedness for 1990 remains at $20,000.

(iii) *Step 2:* Using a beginning and end of year average, X has the following average amounts of U.S. and foreign indebtedness and average asset values:

	1985	1986	1987	1988	1989	1990
(1)	$231,400	225,000	225,000	225,000	220,800	249,600
(2)	445,000	450,000	450,000	450,000	460,000	480,000 (a)
(3)	.52	.50	.50	.50	.48	.52

(1) U.S. and foreign indebtedness

(2) Average value of assets of U.S. shareholder

(3) Debt-to-Asset ratio of U.S. shareholder

(a) [500,000–20,000 (excess related group indebtedness determined in Step 1)]

X's ''U.S. base period ratio'' for 1990 is:

(.52+.50+.50+.50+.48)/5=.50

X's ''allowable indebtedness'' for 1990 is:

$480,000×.50=$240,000

X’s ‘‘excess U.S. shareholder indebtedness’’ for 1990 is:

$249,000 – $240,000=$9,600

X’s debt-to-asset ratio for 1990 is .52, which is greater than the ratio of .10 described in paragraph (e)(3)(vii) of this section. Therefore, X’s excess U.S. shareholder indebtedness for 1990 remains at $9,600.

(iv) *Step 3:* (a) Since X’s excess U.S. shareholder indebtedness of $9,600 is less than its excess related group indebtedness of $20,000, X’s allocable related group indebtedness for 1990 is $9,600. The amount of interest received by X during 1990 on allocable related group indebtedness is:

$5,000×$9,600/$50,000=$960

(b) Therefore, $960 of X’s third party interest expense ($24,960) shall be allocated among various separate limitation categories in proportion to the relative average amounts of Y obligations held by X in each such category. The amount of Y obligations in each limitation category is determined in the same manner as the stock of Y would be attributed under the rules of §1.861–12T(c)(3). Since Y’s interest expense is apportioned under the gross income method prescribed in §1.861–9T (j), the Y stock must be characterized under the gross income method described in §1.861–12T(c)(3)(iii). Y’s gross income net of interest expense is determined as follows:

Foreign source high withholding tax interest income
=$5,000–[($15,000) multiplied by ($5,000)/($5,000+$20,000)]
=$2,000

and

Foreign source general limitation income
=$20,000–[($15,000) multiplied by ($20,000)/($5,000+$20,000)]
=$8,000.

(c) Therefore, $192 [($960×$2,000/($2,000+$8,000)] of X’s third party interest expense is allocated to foreign source high withholding tax interest income and $768 [$960×$8,000/($2,000+$8,000)] is allocated to foreign source general limitation income.

(v) As a result of these direct allocations, for purposes of apportioning X’s remaining interest expense under §1.861–9T, the value of X’s assets generating foreign source general limitation income is reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source general limitation income ($7,680), and the value of X’s assets generating foreign source high withholding tax interest income is reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source high withholding tax interest income ($1,920), determined as follows:

Reduction of X’s assets generating foreign source general limitation income:

$$\text{X's allocable related group indebtedness} \times \frac{\text{Y's Foreign source general limitation income}}{\text{Y's Foreign source income}}$$

$$\$9{,}600 \times \$8{,}000/(\$8{,}000 + \$2{,}000) = \$7{,}680$$

Reduction of X’s assets generating foreign source high withholding tax interest income:

$$\text{X's allocable related group indebtedness} \times \frac{\begin{array}{c}\text{Y's Foreign source high withholding tax}\\ \text{interest income}\end{array}}{\text{Y's Foreign source income}}$$

$$\$9{,}600 \times \$2{,}000/(\$8{,}000 + \$2{,}000) = \$1{,}920$$

[T.D. 8410, 57 FR 13022, Apr. 15, 1992; 57 FR 28012, June 23, 1992]

§ 1.861–10T Special allocations of interest expense (temporary regulations).

(a) *In general.* This section applies to all taxpayers and provides three exceptions to the rules of § 1.861–9T that require the allocation and apportionment of interest expense on the basis of all assets of all members of the affiliated group. Paragraph (b) of this section describes the direct allocation of interest expense to the income generated by certain assets that are subject to qualified nonrecourse indebtedness. Paragraph (c) of this section describes the direct allocation of interest expense to income generated by certain assets that are acquired in integrated financial transaction. Paragraph (d) of this section provides special rules that are applicable to all transactions described in paragraphs (b) and (c) of this section. Paragraph (e) of this section requires the direct allocation of third party interest of an affiliated group to such group's investment in related controlled foreign corporations in cases involving excess related person indebtedness (as defined therein). See also § 1.861–9T(b)(5), which requires direct allocation of amortizable bond premium.

(b) *Qualified nonrecourse indebtedness*—(1) *In general.* In the case of qualified nonrecourse indebtedness (as defined in paragraph (b)(2) of this section), the deduction for interest shall be considered directly allocable solely to the gross income which the property acquired, constructed, or improved with the proceeds of the indebtedness generates, has generated, or could reasonably be expected to generate.

(2) *Qualified nonrecourse indebtedness defined.* The term ''qualified nonrecourse indebtedness'' means any borrowing that is not excluded by paragraph (b)(4) of this section if:

(i) The borrowing is specifically incurred for the purpose of purchasing, constructing, or improving identified property that is either depreciable tangible personal property or real property with a useful life of more than one year or for the purpose of purchasing amortizable intangible personal property with a useful life of more than one year;

(ii) The proceeds are actually applied to purchase, construct, or improve the identified property;

(iii) Except as provided in paragraph (b)(7)(ii) (relating to certain third party guarantees in leveraged lease transactions), the creditor can look only to the identified property (or any lease or other interest therein) as security for payment of the principal and interest on the loan and, thus, cannot look to any other property, the borrower, or any third party with respect to repayment of principal or interest on the loan;

(iv) The cash flow from the property, as defined in paragraph (b)(3) of this section, is reasonably expected to be sufficient in the first year of ownership as well as in each subsequent year of ownership to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payments of interest and original issue discount and periodic payments of principal in each such year; and

(v) There are restrictions in the loan agreement on the disposal or use of the property consistent with the assumptions described in subdivisions (iii) and (iv) of this paragraph (b)(2).

(3) *Cash flow defined*—(i) *In general.* The term ''cash flow from the property'' as used in paragraph (b)(2)(iv) of this section means a stream of revenue (as computed under paragraph (b)(3)(ii) of this section) substantially all of which derives directly from the property. The phrase ''cash flow from the property'' does not include revenue if a significant portion thereof is derived from activities such as sales, labor, services, or the use of other property. Thus, revenue derived from the sale or lease of inventory or of similar property does not constitute cash flow from the property, including plant or equipment used in the manufacture and sale or lease, or purchase and sale or lease, of such inventory or similar property. In addition, revenue derived in part from the performance of services that are not ancillary and subsidiary to the use of property does not constitute cash flow from the property.

(ii) *Self-constructed assets.* The activities associated with self-construction of assets shall be considered to constitute labor or services for purposes of paragraph (b)(3)(i) only if the self-constructed asset—

(A) Is constructed for the purpose of resale, or

(B) Without regard to purpose, is sold to an unrelated person within one year from the date that the property is placed in service for purposes of section 167.

(iii) *Computation of cash flow.* Cash flow is computed by subtracting cash disbursements excluding debt service from cash receipts.

(iv) *Analysis of operating costs.* [Reserved]

(v) *Examples.* The principles of this paragraph may be demonstrated by the following examples.

Example 1. In 1987, X borrows $100,000 in order to purchase an apartment building, which X then purchases. The loan is secured only by the building and the leases thereon. Annual debt service on the loan is $12,000. Annual gross rents from the building are $20,000. Annual taxes on the building are $2,000. Other expenses deductible under section 162 are $2,000. Rents are reasonably expected to remain stable or increase in subsequent years, and taxes and expenses are reasonably expected to remain proportional to gross rents in subsequent years. X provides security, maintenance, and utilities to the tenants of the building. Based on facts and circumstances, it is determined that, although services are provided to tenants, these services are ancillary and subsidiary to the occupancy of the apartments. Accordingly, the case flow of $16,000 is considered to constitute a return from the property. Furthermore, such cash flow is sufficient to fulfill the terms and conditions of the loan agreement as required by paragraph (b)(2)(iii).

Example 2. In 1987, X borrows funds in order to purchase a hotel, which X then purchases and operates. The loan is secured only by the hotel. Based on facts and circumstances, it is determined that the operation of the hotel involves services the value of which is significant in relation to amounts paid to occupy the rooms. Thus, a significant portion of the cash flow is derived from the performance of services incidental to the occupancy of hotel rooms. Accordingly, the cash flow from the hotel is considered not to constitute a return on or from the property.

Example 3. In 1987, X borrows funds in order to build a factory, which X then builds and operates. The loan is secured only by the factory and the equipment therein. Based on the facts and circumstances, it is determined that the operation of the factory involves significant expenditures for labor and raw materials. Thus, a significant portion of the cash flow is derived from labor and the processing of raw materials. Accordingly, the cash flow from the factory is considered not to constitute a return on or from the property.

(4) *Exclusions.* The term ‘‘qualified nonrecourse indebtedness’ shall not include any transaction that—

(i) Lacks economic significance within the meaning of paragraph (b)(5) of this section;

(ii) Involves cross collateralization within the meaning of paragraph (b)(6) of this section;

(iii) Except in the case of a leveraged lease described in paragraph (b)(7)(ii) of this section, involves credit enhancement within the meaning of paragraph (b)(7) of this section or, with respect to loans made on or after October 14, 1988, does not under the terms of the loan documents, prohibit the acquisition by the holder of bond insurance or similar forms of credit enhancement;

(iv) Involves the purchase of inventory;

(v) Involves the purchase of any financial asset, including stock in a corporation, an interest in a partnership or a trust, or the debt obligation of any obligor (although interest incurred in order to purchase certain financial instruments may qualify for direct allocation under paragraph (c) of this section);

(vi) Involves interest expense that constitutes qualified residence interest as defined in section 163(h)(3); or

(vii) [Reserved]

(5) *Economic significance.* Indebtedness that otherwise qualifies under paragraph (b)(2) shall nonetheless be subject to apportionment under §1.861–9T if, taking into account all the facts and circumstances, the transaction (including the security arrangement) lacks economic significance.

(6) *Cross collateralization.* The term ‘‘cross collateralization’’ refers to the pledge as security for a loan of—

(i) Any asset of the borrower other than the identified property described in paragraph (b)(2) of this section, or

(ii) Any asset belonging to any related person, as defined in §1.861–8T(c)(2).

(7) *Credit enhancement*—(i) *In general.* Except as provided in paragraph

(b)(7)(ii) of this section, the term ‘‘credit enhancement’’ refers to any device, including a contract, letter of credit, or guaranty, that expands the creditor's rights, directly or indirectly, beyond the identified property purchased, constructed, or improved with the funds advanced and, thus effectively provides as security for a loan the assets of any person other than the borrower. The acquisition of bond insurance or any other contract of suretyship by an initial or subsequent holder of an obligation shall constitute credit enhancement.

(ii) *Special rule for leveraged leases.* For purposes of this paragraph (b), the term ‘‘credit enhancement’’ shall not include any device under which any person that is not a related person within the meaning of § 1.861–8T(c)(2) agrees to guarantee, without recourse to the lessor or any person related to the lessor, a lessor's payment of principal and interest on indebtedness that was incurred in order to purchase or improve an asset that is depreciable tangible personal property or depreciable tangible real property (and the land on which such real property is situated) that is leased to a lessee that is not a related person in a transaction that constitutes a lease for federal income tax purposes.

(iii) *Syndication of credit risk and sale of loan participations.* The term ‘‘syndication of credit risk’’ refers to an arrangement in which one primary lender secures the promise of a secondary lender to bear a portion of the primary lender's credit risk on a loan. The term ‘‘sale of loan participations’’ refers to an arrangement in which one primary lender divides a loan into several portions, sells and assigns all rights with respect to one or more portions to participating secondary lenders, and does not remain at risk in any manner with respect to the portion assigned. For purposes of this paragraph (b), the syndication of credit risk shall constitute credit enhancement because the primary lender can look to secondary lenders for payment of the loan, notwithstanding limitations on the amount of the secondary lender's liability. Conversely, the sale of loan participations does not constitute credit enhancement, because the holder of each portion of the loan can look solely to the asset securing the loan and not to the credit or other assets of any person.

(8) *Other arrangements that do not constitute cross collateralization or credit enhancement.* For purposes of paragraphs (b) (6) and (7) of this section, the following arrangements do not constitute cross collateralization or credit enhancement:

(i) *Integrated projects.* A taxpayer's pledge of multiple assets of an integrated project, provided that the integrated project. An integrated project consists of functionally related and geographically contiguous assets that, as to the taxpayer, are used in the same trade or business.

(ii) Insurance. A taxpayer's purchase of third-party casualty and liability insurance on the collateral or, by contract, bearing the risk of loss associated with destruction of the collateral or with respect to the attachment of third party liability claims.

(iii) *After-acquired property.* Extension of a creditor's security interest to improvements made to the collateral, provided that the extension does not constitute excess collateralization under paragraph (b)(6), determined by taking into account the value of improvements at the time the improvements are made and the value of the original property at the time the loan was made.

(iv) *Warranties of completion and maintenance.* A taxpayer's warranty to a creditor that it will complete construction or manufacture of the collateral or that it will maintain the collateral in good condition.

(v) *Substitution of collateral.* A taxpayer's right to substitute collateral under any loan contract. However, after the right is exercised, the loan shall no longer constitute qualified nonrecourse indebtedness.

(9) *Refinancings.* If a taxpayer refinances qualified nonrecourse indebtedness (as defined in paragraph (b)(2) of this section) with new indebtedness, such new indebtedness shall continue to qualify only if—

(i) The principal amount of the new indebtedness does not exceed by more than five percent the remaining principal amount of the original indebtedness,

(ii) The term of the new indebtedness does not exceed by more than six months the remaining term of the original indebtedness, and

(iii) The requirements of this paragraph (other than those of paragraph (b)(2) (i) and (ii) of this section) are satisfied at the time of the refinancing, and the exclusions contained in this paragraph (b)(4) do not apply.

(10) *Post-construction permanent financing.* Financing that is obtained after the completion of constructed property will be deemed to satisfy the requirements of paragraph (b)(2) (i) and (ii) of this section if—

(i) The financing is obtained within one year after the constructed property or substantially all of a constructed integrated project (as defined in paragraph (b)(9)(i) of this section) is placed in service for purposes of section 167; and

(ii) The financing does not exceed the cost of construction (including construction period interest).

(11) *Assumptions of pre-existing qualified nonrecourse indebtedness.* If a transferee of property that is subject to qualified nonrecourse indebtedness assumes such indebtedness, the indebtedness shall continue to constitute qualified nonrecourse indebtedness, provided that the assumption in no way alters the qualified status of the debt.

(12) *Excess collateralization.* [Reserved]

(c) *Direct allocations in the case of certain integrated financial transactions*—(1) *General rule.* Interest expense incurred on funds borrowed in connection with an integrated financial transaction (as defined in paragraph (c)(2) of this section) shall be directly allocated to the income generated by the investment funded with the borrowed amounts.

(2) *Definition.* The term ‘‘integrated financial transaction’’ refers to any transaction in which—

(i) The taxpayer—

(A) Incurs indebtedness for the purpose of making an identified term investment,

(B) Identifies the indebtedness as incurred for such purpose at the time the indebtedness is incurred, and

(C) Makes the identified term investment within ten business days after incurring the indebtedness;

(ii) The return on the investment is reasonably expected to be sufficient throughout the term of the investment to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payments of principal and interest or original issue discount;

(iii) The income constitutes interest or original issue discount or would constitute income equivalent to interest if earned by a controlled foreign corporation (as described in §1.954–2T(h));

(iv) The debt incurred and the investment mature within ten business days of each other;

(v) The investment does not relate in any way to the operation of, and is not made in the normal course of, the trade or business of the taxpayer or any related person, including the financing of the sale of goods or the performance of services by the taxpayer or any related person, or the compensation of the taxpayer’s employees (including any contribution or loan to an employee stock ownership plan (as defined in section 4975(e)(7)) or other plan that is qualified under section 401(a)); and

(vi) The borrower does not constitute a financial services entity (as defined in section 904 and the regulations thereunder).

(3) *Rollovers.* In the event that a taxpayer sells of otherwise liquidates an investment described in paragraph (c)(2) of this section, the interest expense incurred on the borrowing shall, subsequent to that liquidation, no longer qualify for direct allocation under this paragraph (c).

(4) *Examples.* The principles of this paragraph (c) may be demonstrated by the following examples.

Example 1. X is a manufacturer and does not constitute a financial services entity as defined in the regulations under section 904. On January 1, 1988, X borrows $100 for 6 months at an annual interest rate of 10 percent. X identifies on its books and records by the close of that day that the indebtedness is being incurred for the purpose of making an investment that is intended to qualify as an integrated financial transaction. On January 5, 1988, X uses the proceeds to purchase a portfolio of stock that approximates the composition of the Standard & Poor’s 500

Index. On that day, X also enters into a forward sale contract that requires X to sell the stock on June 1, 1988 for $110. X identifies on its books and records by the close of January 5, 1988, that the portfolio stock purchases and the forward sale contract constitute part of the integrated financial transaction with respect to which the identified borrowing was incurred. Under § 1.954–2T(h), the income derived from the transaction would constitute income equivalent to interest. Assuming that the return on the investment to be derived on June 1, 1988, will be sufficient to pay the interest due on June 1, 1988, the interest on the borrowing is directly allocated to the gain from the investment.

Example 2. X does not constitute a financial services entity as defined in the regulations under section 904. X is in the business of, among other things, issuing credit cards to consumers and purchasing from merchants who accept the X card the receivables of consumers who make purchases with the X card. X borrows from Y in order to purchase X credit card receivables from Z, a merchant. Assuming that the Y borrowing satisfies the other requirements of paragraph (c)(2) of this section, the transaction nonetheless cannot constitute an integrated financial transaction because the purchase relates to the operation of X's trade or business.

Example 3. Assume the same facts as in Example 2, except that X borrows in order to purchase the receivables of A, a merchant who does not accept the X card and is not otherwise engaged directly or indirectly in any business transaction with X. Because the borrowing is not related to the operation of X's trade or business, the borrowing may qualify as an integrated financial transaction if the other requirements of paragraph (c)(2) of this section are satisfied.

(d) *Special rules.* In applying paragraphs (b) and (c) of this section, the following special rules shall apply.

(1) *Related person transactions.* The rules of this section shall not apply to the extent that any transaction—

(i) Involves either indebtedness between related persons (as defined in section § 1.861–8T(c)(2)) or indebtedness incurred from unrelated persons for the purpose of purchasing property from a related person; or

(ii) Involves the purchase of property that is leased to a related person (as defined in § 1.861–8T(c)(2)) in a transaction described in paragraph (b) of this section. If a taxpayer purchases property and leases such property in whole or in part to a related person, a portion of the interest incurred in connection with such an acquisition, based on the ratio that the value of the property leased to the related person bears to the total value of the property, shall not qualify for direct allocation under this section.

(2) *Consideration of assets or income to which interest is directly allocated in apportioning other interest expense.* In apportioning interest expense under § 1.861–9T, the year-end value of any asset to which interest expense is directly allocated under this section during the current taxable year shall be reduced to the extent provided in § 1.861–9T(g)(2)(iii) to reflect the portion of the principal amount of the indebtedness outstanding at year-end relating to the interest which is directly allocated. A similar adjustment shall be made to the end-of-year value of assets for the prior year for purposes of determining the beginning-of-year value of assets for the current year. These adjustments shall be made prior to averaging beginning-of-year and end-of-year values pursuant to § 1.861–9T(g)(2). In apportioning interest expense under the modified gross income method, gross income shall be reduced by the amount of income to which interest expense is directly allocated under this section.

(e) *Treatment of certain related controlled foreign corporation indebtedness*—(1) *In general.* In taxable years beginning after 1987, if a United States shareholder has incurred substantially disproportionate indebtedness in relation to the indebtedness of its related controlled foreign corporations so that such corporations have excess related person indebtedness (as determined under step 4 in subdivision (iv) of this paragraph (e)(1), the third party interest expense of the related United States shareholder (excluding amounts allocated under paragraphs (b) and (c)) in an amount equal to the interest income received on such excess related person indebtedness shall be allocated to gross income in the various separate limitation categories described in section 904(d)(1) in the manner prescribed in step 6 in subdivision (vi) of this paragraph (e)(1). This computation shall be performed as follows.

(i) *Step 1: Compute the debt-to-asset ratio of the related United States shareholder.* The debt-to-asset ratio of the related United States shareholder is the ratio between—

(A) The average month-end debt level of the related United States shareholder taking into account debt owing to any obligee who is not a related person as defined in section §1.861–8T(c)(2), and

(B) The value of assets (tax book or fair market) of the related United States shareholder including stockholdings and obligations of related controlled foreign corporations but excluding stockholdings and obligations of members of the affiliated group (as defined in §1.861–11T(d)).

(ii) *Step 2: Compute aggregate debt-to-asset ratio of all related controlled foreign corporations.* The aggregate debt-to-asset ratio of all related controlled foreign corporations is the ratio between—

(A) The average aggregate month-end debt level of all related controlled foreign corporations for their taxable years ending during the related United States shareholder's taxable year taking into account only indebtedness owing to persons other than the related United States shareholder or the related United States shareholder's other related controlled foreign corporations (''third party indebtedness''), and

(B) The aggregate value (tax book or fair market) of the assets of all related controlled foreign corporations for their taxable years ending during the related United States shareholder's taxable year excluding stockholdings in and obligations of the related United States shareholder or the related United States shareholder's other related controlled foreign corporations.

(iii) *Step 3: Compute aggregate related person debt of all related controlled foreign corporations.* This amount equals the average aggregate month-end debt level of all related controlled foreign corporations for their taxable years ending with or within the related United States shareholder's taxable year, taking into account only debt which is owned to the related United States shareholder (''related person indebtedness'').

(iv) *Step 4: Computation of excess related person indebtedness and computation of the income therefrom*—(A) *General rule.* If the ratio computed under step 2 is less than applicable percentage of the ratio computed under step 1, the taxpayer shall add to the aggregate third party indebtedness of all related controlled foreign corporations determined under paragraph (e)(1)(ii)(A) of this section that portion of the related person indebtedness computed under step 3 that, when combined with the aggregate third party indebtedness of all controlled foreign corporations, makes the ratio computed under step 2 equal to applicable percentage of the ratio computed under step 1. The amount of aggregate related person debt that is so added to the aggregate third party debt of related controlled foreign corporations is considered to constitute excess related person indebtedness. For purposes of this paragraph (e)(1)(iv)(A), the term ''applicable percentage'' means the designated percentages for taxable years beginning during the following calendar years:

Taxable years beginning in	Applicable percentage
1988	50
1989	65
1990 and thereafter	80

(B) *Elective quadratic formula.* In calculating the amount of excess related party indebtedness of related controlled foreign corporations, the United States shareholder's debt-to-asset ratio may be adjusted to reflect the amount by which its debt and assets would be reduced had the related controlled foreign corporations incurred the excess related party indebtedness directly to third parties. In such case, the ratio computed in Step 1 is adjusted to reflect a reduction of both portions of the ratio by the amount of excess related person indebtedness as computed under this paragraph (e)(1)(ii)(A). Excess related person indebtedness may be computed under the following formula, under which excess related person indebtedness equals the smallest positive amount (not exceeding the aggregate amount of related controlled foreign corporation indebtedness) that is a solution to the following formula (with X equalling the amount of excess related person indebtedness):

$$\frac{\text{Aggregate third party debt of related US shareholder} - X}{\text{US shareholder assets} - X} \times \text{Applicable percentage for year} = \frac{\text{Aggregate third party debt of related CFCs} + X}{\text{Related CFC assets}}$$

Guidance concerning the solution of this equation is set forth in *Example* (2) of § 1.861–12(k).

(C) *Computation of interest income received on excess related party indebtedness.* The amount of interest income received on excess related person indebtedness equals the total interest income on related person indebtedness derived by the related United States shareholder during the taxable year multiplied by the ratio of excess related person indebtedness over the aggregate related person indebtedness for the taxable year.

(v) *Step 5: Determine the aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each limitation category.* The aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each limitation category equals the sum of the value of all such obligations in each limitation category. Solely for purposes of this paragraph (e)(1)(v), each debt obligation in a related controlled foreign corporation held by a related United States shareholder shall be attributed to separate limitation categories in the same manner as the stock of the obligor would be attributed under the rules of § 1.861–12T(c)(3), whether or nor such stock is held directly by such related United States shareholder.

(vi) *Step 6: Direct allocation of United States shareholder third party interest expense.* Third party interest expense of the related United States shareholder equal to the amount of interest income received on excess related person indebtedness as determined in step 4 shall be allocated among the various separate limitation categories in proportion to the relative aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each such category, as determined under step 5. The remaining portion of third party interest expense will be apportioned as provided in §§ 1.861–8T through 1.861–13T, excluding this paragraph.

(2) *Definitions*—(i) *United States shareholder.* For purposes of this paragraph, the term ‘‘United States shareholder’’ has the same meaning as defined by section 957, except that, in the case of a United States shareholder that is a member an affiliated group (as defined in § 1.861–11T(d)), the entire affiliated group shall be considered to constitute a single United States shareholder. The term ‘‘related United States shareholder’’ is the United States shareholder (as defined in this paragraph (e)(2)(i)) with respect to which related controlled foreign corporations (as defined in paragraph (e)(2)(ii) of this section) are related within the meaning of that paragraph.

(ii) *Related controlled foreign corporation.* For purposes of this section, the term ‘‘related controlled foreign corporation’’ means any controlled foreign corporation which is a related person (as defined in § 1.861–8T(c)(2)) to a United States shareholder (as defined paragraph (e)(2)(i) of this section).

(iii) *Value of assets and amount of liabilities.* For purposes of this section, the value of assets is determined under § 1.861–9T(g). Thus, in the case of assets that are denominated in foreign currency, the average of the beginning-of-year and end-of-year values is determined in foreign currency and translated into dollars using exchange rates on the last day of the related United States shareholder’s taxable year. In the case of liabilities that are denominated in foreign currency, the average month-end debt level of such liabilities is determined in foreign currency and then translated into dollars using exchange rates on the last day of the related United States shareholder’s taxable year.

(3) *Treatment of certain stock.* To the extent that there is insufficient related person indebtedness of all related controlled foreign corporations under step 3 in paragraph (e)(1)(iii) of this section to achieve as equal ratio in step 4 of

paragraph (e)(1)(iv) of this section, certain stock held by the related United States shareholder will be treated as related person indebtedness. Such stock includes—

(i) Any stock in the related controlled foreign corporation that is treated in the same manner as debt under the law of any foreign country that grants a deduction for interest or original issue discount relating to such stock, and

(ii) Any stock in a related controlled foreign corporation that has made loans to, or held stock described in this paragraph (e)(3) in, another related controlled foreign corporation. However, such stock shall be treated as related person indebtedness only to the extent of the principal amount of such loans.

For purposes of computing income from excess related person indebtedness in step 4 of paragraph (e)(1)(iv) of this section, stock that is treated under this paragraph as related person indebtedness shall be considered to yield interest in an amount equal to the interest that would be computed on an equal amount of indebtedness under section 1274. Only dividends actually paid thereon shall be included in gross income for other purposes.

(4) *Adjustments to assets in apportioning other interest expense.* In apportioning interest expense under §1.861–9T, the value of assets in each separate limitation category for the taxable year as determined under §1.861–9T(g)(3) shall be reduced (but not below zero) by the principal amount of third party indebtedness of the related United States shareholder the interest expense on which is allocated to each such category under paragraph (e)(1) of this section.

(5) *Exceptions*—(i) *Per company rule.* If—

(A) A related controlled foreign corporation with obligations owing to a related United States shareholder has a greater proportion of passive assets than the proportion of passive assets held by the related United States shareholder,

(B) Such passive assets are held in liquid or short term investments, and

(C) There are frequent cash transfers between the related controlled foreign corporation and the related United States shareholder,

the Commissioner, in his discretion, may choose to exclude such a corporation from other related controlled foreign corporations in the application of the rules of this paragraph (e).

(ii) *Aggregate rule.* If it is determined that, in aggregate, the application of the rules of this paragraph (e) increases a taxpayer's foreign tax credit as determined under section 901(a), the Commissioner, in his discretion, may choose not to apply the rules of this paragraph. If the Commissioner exercises discretion under this paragraph (e)(5)(ii), then paragraph (e) shall not apply to any extent to any interest expense of the taxpayer.

[T.D. 8228, 53 FR 35485, Sept. 14, 1988]

§1.861–11T Special rules for allocating and apportioning interest expense of an affiliated group of corporations (temporary regulations.)

(a) *In general.* Sections 1.861–9T, 1.861–10T, 1.861–12T, and 1.861–13T provide rules that are generally applicable in apportioning interest expense. The rules of this section relate to affiliated groups of corporations and implement section 864(e) (1) and (5), which requires affiliated group allocation and apportionment of interest expense. The rules of this section apply to taxable years beginning after December 31, 1986, except as otherwise provided in §1.861–13T. Paragraph (b) of this section describes the scope of the application of the rule for the allocation and apportionment of interest expense of affiliated groups of corporations, which is contained in paragraph (c) of this section. Paragraph (d) of this section sets forth the definition of the term ‘‘affiliated group’’ for purposes of this section. Paragraph (e) describes the treatment of loans between members of an affiliated group. Paragraph (f) of this section provides rules concerning the affiliated group allocation and apportionment of interest expense in computing the combined taxable income of a FSC or DISC and its related supplier. Paragraph (g) of this section describes the treatment of losses caused by apportionment of interest expense in the case of an affiliated group that does not file a consolidated return.

(b) *Scope of application*—(1) *Application of section 864(e) (1) and (5) (concerning the definition and treatment of affiliated groups).* Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) apply to the computation of foreign source taxable income for purposes of section 904 (relating to various limitations on the foreign tax credit). Section 904 imposes separate foreign tax credit limitations on passive income, high withholding interest income, financial services income, shipping income, income consisting of dividends from each noncontrolled section 902 corporation, income consisting of dividends from a DISC or former DISC, taxable income attributable to foreign trade income within the meaning of section 923(b), distributions from a FSC or former FSC, and all other forms of foreign source income not enumerated above (''general limitation income''). Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) also apply in connection with section 907 to determine reductions in the amount allowed as a foreign tax credit under section 901. Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) also apply to the computation of the combined taxable income of the related supplier and a foreign sales corporation (FSC) (under sections 921 through 927) as well as the combined taxable income of the related supplier and a domestic international sales corporation (DISC) (under sections 991 through 997).

(2) *Nonapplication of section 864(e) (1) and (5) (concerning the definition and treatment of affiliated groups).* Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) do not apply to the computation of subpart F income of controlled foreign corporations (under sections 951 through 964), the computation of combined taxable income of a possessions corporation and its affiliates (under section 936), or the computation of effectively connected taxable income of foreign corporations. For the rules with respect to the allocation and apportionment of interest expenses of foreign corporations other than controlled foreign corporations, see §§ 1.882–4 and 1.882–5.

(c) *General rule for affiliated corporations.* Except as otherwise provided in this section, the taxable income of each member of an affiliated group within each statutory grouping shall be determined by allocating and apportioning the interest expense of each member according to apportionment fractions which are computed as if all members of such group were a single corporation. For purposes of determining these apportionment fractions, stock in corporations within the affiliated group (as defined in section 864(e)(5) and the rules of this section) shall not be taken into account. In the case of an affiliated group of corporations that files a consolidated return, consolidated foreign tax credit limitations are computed for the group in accordance with the rules of § 1.1502–4. Except as otherwise provided, all the interest expense of all members of the group will be treated as definitely related and therefore allocable to all the gross income of the members of the group and all the assets of all the members of the group shall be taken into account in apportioning this interest expense. For purposes of this section, the term ''taxpayer'' refers to the affiliated group (regardless of whether the group files a consolidated return), rather than to the separate members thereof.

(d) *Definition of affiliated group*—(1) *General rule.* For purposes of the section, in general, the term ''affiliated group'' has the same meaning as is given that term by section 1504, except that section 936 companies are also included within the affiliated group. Section 1504(a) defines an affiliated group as one or more chains of includible corporations connected through 80-percent stock ownership with a common parent corporation which is an includible corporation (as defined in section 1504(b)). In the case of a corporation that either becomes or ceases to be a member of the group during the course of the corporation's taxable year, only the interest expense incurred by the group member during the period of membership shall be allocated and apportioned as if all members of the group were a single corporation. In this regard, assets held during the period of membership shall be taken into account. Other interest expense incurred by the group member during its taxable year but not during the period of membership shall be allocated and apportioned without regard to other members of the group.

(2) *Inclusion of section 936 corporations*—(i) The exclusion from the affiliated group of section 936 corporations under section 1504(b)(4) is inoperative for purposes of this section. Thus, a possessions corporation meeting the ownership requirements of section 1504(a) with respect to which an election under section 936 is in effect for the taxable year is a member of the affiliated group.

(ii) Example— (A) Facts. X is the common parent of Y and Z. XY constitutes an affiliated group of corporations within the meaning of section 1504(a) and uses the tax book value method of apportionment. Y owns all the stock of Z, a possessions corporation with respect to which an election under section 936 is in effect for the taxable year. Z manufactures widgets in Puerto Rico. Y purchases these widgets and markets them exclusively in the United States. Of the three corporations, only Z has foreign source income, which includes both qualified possessions source investment income and general limitation income. For purposes of section 904, Z's qualified possessions source investment income constitutes foreign source passive income. In computing the section 936 benefit, Y and Z have elected the cost sharing method. Of the three corporations, only X has debt and, thus, only X incurs interest expense.

(B) *Analysis.* As provided in paragraph (b)(2) of this section, sections 864(e)(1) and (5) do not apply in the computation of benefits under section 936(h). The effect of including Z in the affiliated group relates to the fact that X, the only debtor corporation in the group, must, under the asset method described in §1.861–9T(g), apportion a part of its interest expense to foreign source passive income and foreign source general limitation income. This is because the assets of Z that generate qualified possessions source investment income and general limitation income are included in computing the group apportionment fractions. The result is that, under section 904(f), X has an overall foreign loss in both the passive and general limitation categories, which currently offsets domestic income and must be recaptured against any subsequent years' foreign passive income and general limitation income, respectively, under the rules of that section.

(3) *Treatment of life insurance companies subject to taxation under section 801*—(i) *General rule.* A life insurance company that is subject to taxation under section 801 shall be considered to constitute a member of the affiliated group composed of companies not taxable under section 801 only if a parent corporation so elects under section 1504(c)(2)(A) of the Code. If a parent does not so elect, no adjustments shall be required with respect to such an insurance company under paragraph (g) of this section.

(ii) *Treatment of stock.* Stock of a life insurance company that is subject to taxation under section 801 that is not included in an affiliated group shall be disregarded in the allocation and apportionment of the interest expense of such affiliated group.

(4) *Treatment of certain financial corporations*—(i) *In general.* In the case of an affiliated group (as defined in paragraph (d)(1) of this section), any member that constitutes financial corporations as defined in paragraph (d)(4)(ii) of this section shall be treated as a separate affiliated group consisting of financial corporations (the ''financial group''). The members of the group that do not constitute financial corporations shall be treated as members of a separate affiliated group consisting of nonfinancial corporations (''the nonfinancial group'').

(ii) *Financial corporation defined.* The term ''financial corporation'' means any corporation which meets all of the following conditions:

(A) It is described in section 581 (relating to the definition of a bank) or section 591 (relating to the deduction for dividends paid on deposits by mutual savings banks, cooperative banks, domestic building and loan associations, and other savings institutions chartered and supervised as savings and loan or similar associations);

(B) Its business is predominantly with persons other than related persons (within the meaning of section 864(d)(4) and the regulations thereunder) or their customers; and

(C) It is required by state or Federal law to be operated separately from any other entity which is not such an institution.

(iii) *Treatment of bank holding companies.* The total aggregate interest expense of any member of an affiliated group that constitutes a bank holding company subject to regulation under the Bank Holding Company Act of 1956 shall be prorated between the financial group and the nonfinancial group on the basis of the assets in the financial and nonfinancial groups. For purposes of making this proration, the assets of each member of each group, and not the stock basis in each member, shall be taken into account. Any direct or indirect subsidiary of a bank holding company that is predominantly engaged in the active conduct of a banking, financing, or similar business shall be considered to be a financial corporation for purposes of this paragraph (d)(4). The interest expense of the bank holding company must be further apportioned in accordance with § 1.861–9T(f) to the various section 904(d) categories of income contained in both the financial group and the nonfinancial group on the basis of the assets owned by each group. For purposes of computing the apportionment fractions for each group, the assets owned directly by a bank holding company within each limitation category described in section 904(d)(1) (other than stock in affiliates or assets described in § 1.861–9T(f)) shall be treated as owned pro rata by the nonfinancial group and the financial group based on the relative amounts of investments of the bank holding company in the nonfinancial group and financial group.

(iv) *Consideration of stock of the members of one group held by members of the other group.* In apportioning interest expense, the nonfinancial group shall not take into account the stock of any lower-tier corporation that is treated as a member of the financial group under paragraph (d)(4)(i) of this section. Conversely, in apportioning interest expense, the financial group shall not take into account the stock of any lower-tier corporation that is treated as a member of the nonfinancial group under paragraph (d)(4)(i) of this section. For the treatment of loans between members of the financial group and members of the nonfinancial group, see paragraph (e)(1) of this section.

(5) Example— (i) Facts. X, a domestic corporation which is not a bank holding company, is the parent of domestic corporations Y and Z. Z owns 100 percent of the stock Z1, which is also a domestic corporation. X, Y, Z, and Z1 were organized after January 1, 1987, and constitute an affiliated group within the meaning of paragraph (d)(1) of this section. Y and Z are financial corporations described in paragraph (d)(4) of this section. X also owns 25 percent of the stock of A, a domestic corporation. Y owns 25 percent of the voting stock of B, a foreign corporation that is not a controlled foreign corporation. Z owns less than 10 percent of the voting stock of C, another foreign corporation. The foreign source income generated by Y's or Z's direct assets is exclusively financial services income. The foreign source income generated by X's or Z1's direct assets is exclusively general limitation income. X and Z1 are not financial corporations described in paragraph (d)(4)(ii) of this section. Y and Z, therefore, constitute a separate affiliated group apart from X and Z1 for purposes of section 864(e). The combined interest expense of Y and Z of $100,000 ($50,000 each) is apportioned separately on the basis of their assets. The combined interest expense of X and Z1 of $50,000 ($25,000 each) is allocated on the basis of the assets of the XZ1 group.

Analysis of the YZ group assets

Adjusted basis of assets of the YZ group that generate foreign source financial services income (excluding stock of foreign subsidiaries not included in the YZ affiliated group)	$200,000
Z's basis in the C stock (not adjusted by the allocable amount of C's earnings and profits because Z owns less than 10 percent of the stock) which would be considered to generate passive income in the hands of a nonfinancial services entity but is considered to generate financial services income when in the hands of Z, a financial services entity	$100,000
Y's basis in the B stock (adjusted by the allocable amount of B's earnings and profits) which generates dividends subject to a separate limitation for B dividends	$100,000
Adjusted basis of assets of the YZ group that generate U.S. source income	$600,000
Total assets	$1,000,000

Analysis of the XZ1 group assets

Adjusted basis of assets of the XZ1 group that generate foreign source general limitation income	$500,000
Adjusted basis of assets of the XZ1 group other than A stock that generate domestic source income	$1,900,000
X's basis in the A stock adjusted by the allocable amount of A's earnings and profits	$100,000
Total domestic assets	$2,000,000
Total assets	$2,500,000

(ii) *Allocation.* No portion of the $50,000 deduction of the YZ group is definitely related solely to specific property within the meaning of §1.861–10T. Thus, the YZ group's deduction for interest is related to all its activities and properties. Similarly, no portion of the $50,000 deduction of the XZ1 group is definitely related solely to specific property within the meaning of §1.861–10T. Thus, the XZ1 group's deduction for interest is related to all its activities and properties.

(iii) *Apportionment.* The YZ group would apportion its interest expense as follows:

To gross financial services income from sources outside the United States:

$$\$50{,}000\times\frac{\$300{,}000}{\$1{,}000{,}000}\ldots\ldots\$15{,}000$$

To gross income subject to a separate limitation for dividends from B:

$$\$50{,}000\times\frac{\$100{,}000}{\$1{,}000{,}000}\ldots\ldots\$5{,}000$$

To gross income from sources inside the United States:

$$\$50{,}000\times\frac{\$600{,}000}{\$1{,}000{,}000}\ldots\ldots\$30{,}000$$

The XZ1 group would apportion its interest expense as follows:

To gross general limitation income from sources outside the United States:

$$\$50{,}000\times\frac{\$500{,}000}{\$2{,}500{,}000}\ldots\ldots\$10{,}000$$

To gross income from sources inside the United States:

$$\$50{,}000\times\frac{\$2{,}000{,}000}{\$2{,}500{,}000}\ldots\ldots\$40{,}000$$

(6) *Certain unaffiliated corporations.* Certain corporations that are not described in paragraph (d)(1) of this section will nonetheless be considered to constitute affiliated corporations for purposes of §§1.861–9T through 1.861–13T. These corporations include:

(i) Any includible corporation (as defined in section 1504(b) without regard to section 1504(b)(4)) if 80 percent of either the vote or value of all outstanding stock of such corporation is owned directly or indirectly by an includible corporation or by members of an affiliated group, and

(ii) Any foreign corporation if 80 percent of either the vote or value of all outstanding stock of such corporation is owned directly or indirectly by members of an affiliated group, and if more than 50 percent of the gross income of such corporation for the taxable year is effectively connected with the conduct of a United States trade or business. If 80 percent or more of the gross income of such corporation is effectively connected income, then all the assets of such corporation and all of its interest expense shall be taken into account. If between 50 and 80 percent of the gross income of such corporation is effectively connected income, then only the assets of such corporation that generate effectively connected income and a percentage of its interest expense equal to the percentage of its assets that generate effectively connected income shall be taken into account.

The attribution rules of section 318 shall apply in determining indirect ownership under this paragraph (d)(6). The Commissioner shall have the authority to disregard trusts, partnerships, and pass-through entities that break affiliated status. Corporations described in this paragraph (d)(6) shall be considered to constitute members of an affiliated group that does not file a consolidated return and shall therefore be subject to the limitations imposed under paragraph (g) of this section. The affiliated group filing a consolidated return shall be considered to constitute a single corporation for purposes of applying the rules of paragraph (g) of this section.

(e) *Loans between members of an affiliated group*—(1) *General rule.* In the case of loans (including any receivable) between members of an affiliated group, as defined in paragraph (d) of this section, for purposes of apportioning interest expense, the indebtedness of the member borrower shall not be considered an asset of the member lender. However, in the case of members of separate financial and nonfinancial groups under paragraph (d)(4) of this section, the indebtedness of the member borrower shall be considered an asset of the member lender and such asset shall be characterized by reference to the member lender's income from the asset as determined under paragraph (e)(2)(ii) of this section. For purposes of this paragraph (e), the terms ''related person interest income'' and ''related person interest payment'' refer to interest paid and received by members of the same affiliated group as defined in paragraph (d) of this section.

(2) *Treatment of interest expense within the affiliated group*—(i) *General rule.* A member borrower shall deduct related person interest payments in the same manner as unrelated person interest expense using group apportionment fractions computed under § 1.861–9T(f). A member lender shall include related person interest income in the same class of gross income as the class of gross income from which the member borrower deducts the related person interest payment.

(ii) *Special rule for loans between financial and nonfinancial affiliated corporations.* In the case of a loan between two affiliated corporations only one of which constitutes a financial corporation under paragraph (d)(4) of this section, the member borrower shall allocate and apportion related person interest payments in the same manner as unrelated person interest expense using group apportionment fractions computed under § 1.861–9T(f). The source of the related person interest income to the member lender shall be determined under section 861(a)(1).

(iii) *Special rule for high withholding tax interest.* In the case of an affiliated corporation that pays interest that is high withholding tax interest under § 1.904–5(f)(1) to another affiliated corporation, the interest expense of the payor shall be allocated to high withholding tax interest.

(3) *Back-to-back loans.* If a member of the affiliated group makes a loan to a nonmember who makes a loan to a member borrower, the rule of paragraphs (e) (1) and (2) of this section shall apply, in the Commissioner's discretion, as if the member lender made the loan directly to the member borrower, provided that the loans constitute a back-to-back loan transaction. Such loans will constitute a back-to-back loan for purposes of this paragraph (e) if the loan by the nonmember would not have been made or maintained on substantially the same terms irrespective of the loan of funds by the lending member to the nonmember or other intermediary party.

(4) *Examples.* The rules of this paragraph (e) may be illustrated by the following examples.

Example 1. X, a domestic corporation, is the parent of Y, a domestic corporation. X and Y were organized after January 1, 1987, and constitute an affiliated group within the meaning of paragraph (d)(1) of this section. Among X's assets is the note of Y for the amount of $100,000. Because X and Y are members of an affiliated group, Y's note does not constitute an asset for purposes of apportionment. The apportionment fractions for the relevant tax year of the XY group are 50 percent domestic, 40 percent foreign general, and 10 percent foreign passive. Y deducts its related person interest payment using those apportionment fractions. Of the $10,000 in related person interest income received by X, $5,000 consists of domestic source income, $4,000 consists of foreign general limitation income, and $1,000 consists of foreign passive income.

Example 2. X is a domestic corporation organized after January 1, 1987. X owns all the stock of Y, a domestic corporation. On June 1, 1987, X loans $100,000 to Z, an unrelated person. On June 2, 1987, Z makes a loan to Y with terms substantially similar to those of the loan from X to Z. Based on the facts and circumstances of the transaction, it is determined that Z would not have made the loan to Y on the same terms if X had not made the loan to Z. Because the transaction constitutes a back-to-back loan, as defined in paragraph (e)(3) of this section, the Commissioner may require, in his discretion, that neither the note of Y nor the note of Z may be considered an asset of X for purposes of this section.

(f) *Computations of combined taxable income.* In the computation of the combined taxable income of any FSC or DISC and its related supplier which is a member of an affiliated group under the pricing rules of sections 925 or 994, the combined taxable income of such FSC or DISC and its related supplier shall be reduced by the portion of the total interest expense of the affiliated group that is incurred in connection with those assets of the group used in connection with export sales involving that FSC or DISC. This amount shall be computed by multiplying the total interest expense of the affiliated group and interest expense of the FSC or DISC by a fraction the numerator of which is the assets of the affiliated group and of the FSC or DISC generating foreign trade income or gross income attributable to qualified export receipts, as the case may be, and the denominator of which is the total assets of the affiliated group and the FSC or DISC. Under this rule, interest of other group members may be attributed to the combined taxable income of a FSC or DISC and its related supplier without affecting the amount of interest otherwise deductible by the FSC or DISC, the related supplier or other member of the affiliated group. The FSC or DISC is entitled to only the statutory portion of the combined taxable income, net of any deemed interest expense, which determines the commission paid to the FSC or DISC or the transfer price of qualifying export property sold to the FSC or DISC.

(g) *Losses created through apportionment*—(1) *General rules.* In the case of an affiliated group that is eligible to file, but does not file, a consolidated return and in the case of any corporation described in paragraph (d)(6) of this section, the foreign tax credits in any separate limitation category are limited to the credits computed under the rules of this paragraph (g). As a consequence of the affiliated group allocation and apportionment of interest expense required by section 864(e)(1) and this section, interest expense of a group member may be apportioned for section 904 purposes to a limitation category in which that member has no gross income, resulting in a loss in that limitation category. The same is true in connection with any expense other than interest that is subject to apportionment under the rules of section 864(e)(6) of the Code. Any reference to ‘‘interest expense’’ in this paragraph (g) shall be treated as including such expenses. For purposes of this paragraph, the term ‘‘limitation category’’ includes domestic source income, as well as the types of income described in section 904(d)(1) (A) through (I). A loss of one affiliate in a limitation category will reduce the income of another member in the same limitation category if a consolidated return is filed. (See §1.1502–4.) If a consolidated return is not filed, this netting does not occur. Accordingly, in such a case, the following adjustments among members are required in order to give effect to the group allocation of interest expense:

(i) Losses created through group apportionment of interest expense in one or more limitation categories within a given member must be eliminated; and

(ii) A corresponding amount of income of other members in the same limitation category must be recharacterized.

Such adjustments shall be accomplished, in accordance with paragraph (g)(2) of this section, without changing the total taxable income of any member and before the application of section 904(f). Section 904(f) (including section 904(f)(5)) does not apply to a loss created through the apportionment of interest expense to the extent that the loss is eliminated pursuant to paragraph (g)(2)(ii) of this section. For purposes of this section, the terms ‘‘limitation adjustment’’ and ‘‘recharacterization’’ mean the recharacterization of income in one limitation category as income in another limitation category.

(2) *Mechanics of computation*—(i) *Step 1: Computation of consolidated taxable income.* The members of an affiliated group must first allocate and apportion

all other deductible expenses other than interest. The members must then deduct from their respective gross incomes within each limitation category interest expense apportioned under the rules of § 1.861–9T(f). The taxable income of the entire affiliated group within each limitation category is then totalled.

(ii) *Step 2: Loss offset adjustments.* If, after step 1, a member has losses in a given limitation category or limitation categories created through apportionment of interest expense, any such loss (*i.e.*, the portion of such loss equal to interest expense) shall be eliminated by offsetting that loss against taxable income in other limitation categories of that member to the extent of the taxable income of other members within the same limitation category as the loss. If the member has taxable income in more than one limitation category, then the loss shall offset taxable income in all such limitation categories on a pro rata basis. If there is insufficient domestic income of the member to offset the net losses in all foreign limitation categories caused by the apportionment of interest expense, the losses in each limitation category shall be recharacterized as domestic losses to the extent of the taxable income of other members in the same respective limitation categories. After these adjustments are made, the income of the entire affiliated group within each limitation category is totalled again.

(iii) *Step 3: Determination of amount subject to recharacterization.* In order to determine the amount of income to be recharacterized in step 4, the income totals computed under step 1 in each limitation category shall be subtracted from the income totals computed under step 2 in each limitation category.

(iv) *Step 4: Recharacterization.* Because any differences determined under step 3 represent deviations from the consolidated totals computed under Step 1, such differences (in any limitation category) must be eliminated.

(A) *Limitation categories to be reduced.* In the case of any limitation category in which there is a positive change, the income of group members with income in that limitation category must be reduced on a pro rata basis (by reference to net income figures as determined under Step 2) to the extent of such positive change (“limitation reductions”). Each member shall separately compute the sum of the limitation reductions.

(B) *Limitation categories to be increased.* In any case in which only one limitation category has a negative change in Step 3, the sum of the limitation reductions within each member is added to that limitation category. In the case in which multiple limitation categories have negative changes in Step 3, the sum of the limitation reductions within each member is prorated among the negative change limitation categories based on the ratio that the negative change for the entire group in each limitation category bears to the total of all negative changes for the entire group in all limitation categories.

(3) *Examples.* The following examples illustrate the principles of this paragraph.

Example 1 —(i) *Facts.* X, a domestic corporation, is the parent of domestic corporations Y and Z. X, Y, and Z were organized after Janaury 1, 1987, constitute an affiliated group within the meaning of paragraph (d)(1) of this section, but do not file a consolidated return. The XYZ group apportions its interest expense on the basis of the fair market value of its assets. X, Y, and Z have the following assets, interest expense, and taxable income before apportioning interest expense:

Assets	X	Y	Z	Total
Domestic	2,000.00	0	1,000.00	3,000.00
Foreign Passive	0	50.00	50.00	100.00
Foreign General	0	700.00	200.00	900.00
Interest expense	48.00	12.00	80.00	140.00
Taxable Income (pre-interest):				
Domestic	100.00	0	63.00	163.00
Foreign Passive	0	5.00	5.00	10.00
Foreign General	0	60.00	35.00	95.00

(ii) *Step 1: Computation of consolidated taxable income.* Each member of the XYZ group apportions its interest expense according to group apportionment ratios determined under the asset method decribed in § 1.861–9T(f), yielding the following results:

Apportioned interest expense	X	Y	Z	Total
Domestic	36.00	9.00	60.00	105.00
Foreign Passive	1.20	0.30	2.00	3.50
Foreign General	10.80	2.70	18.00	31.50
Total	48.00	12.00	80.00	140.00

The members of the group then compute taxable income within each category by deducting the apportioned interest expense from the amounts of pre-interest taxable income specified in the facts in paragraph (i), yielding the following results:

Taxable income	X	Y	Z	Total
Domestic	64.00	9.00	3.00	58.00
Foreign Passive	−1.20	4.70	3.00	6.50
Foreign General	−10.80	57.30	17.00	63.50
Total	52.00	53.00	23.00	128.00

(iii) *Step 2: Loss offset adjustments.* Because X and Y have losses created through apportionment, these losses must be eliminated by reducing taxable income of the member in other limitation categories. Because X has a total of $12 in apportionment losses and because it has only one limitation category with income (*i.e.*, domestic), domestic income must be reduced by $12, thus eliminating its apportionment losses. Because Y has a total of $9 in apportionment losses and because it has two limitation categories with income (*i.e.*, foreign passive and foreign general limitation), the income in these two limitation categories must be reduced on a pro rata basis in order to eliminate its apportionment losses. In summary, the following adjustments are required:

Loss offset adjustments	X	Y	Z	Total
Domestic	−12.00	+9.00	0	−3.00
Foreign Passive	+1.20	−0.68	0	+0.52
Foreign General	+10.80	−8.32	0	+2.48

These adjustments yield the following adjusted taxable income figures:

Adjusted taxable income	X	Y	Z	Total
Domestic	52.00	0	3.00	55.00
Foreign Passive	0	4.02	3.00	7.02
Foreign General	0	48.98	17.00	65.98
Total	52.00	53.00	23.00	128.00

(iv) *Step 3: Determination of amount subject to recharacterization.* The adjustments performed under Step 2 led to a change in the group's taxable income within each limitation category. The total loss offset adjustments column shown in paragraph (iii) above shows the net deviations between Step 1 and 2.

(v) *Step 4: Recharacterization.* The loss offset adjustments yield a positive change in the foreign passive and the foreign general limitation categories. Y and Z both have income in these limitation categories. Accordingly, the income of Y and Z in each of these limitation categories must be reduced on a pro rata basis (by reference to the adjusted taxable income figures) to the extent of the positive change in each limitation category. The total positive change in the foreign passive limitation category is $0.52. The adjusted taxable income of Y in the foreign passive limitation category is $4.02 and the adjusted taxable income of Z in the foreign passive limitation category is $3. Therefore, $0.30 is drawn from Y and $0.22 is drawn from Z. The total positive change in the foreign general limitation category is $2.48. The adjusted taxable income of Y in the foreign general limitation category is $48.98, and the adjusted taxable income of Z in the foreign general limitation category is $17. Therefore, $1.84 is drawn from Y and $.64 is drawn from Z.

The members must then separately compute the sum of the limitation reductions. Y has limitation reductions of $0.30 in the foreign passive limitation category and $1.84 in the foreign general limitation category, yielding total limitation reduction of $2.14. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Y's domestic income is increased by $2.14. Z has limitation reductions of $0.22 in the foreign passive limitation category and $0.64 in the foreign general limitation category, yielding total limitation reductions of $0.86. Under these facts, domestic income is the only limitation category of Z requiring a positive adjustment. Accordingly, Z's domestic income is increased by $0.86.

Recharacterization adjustments	X	Y	Z	Total
Domestic	0	+2.14	+0.86	+3.00
Foreign Passive	0	−0.30	−0.22	−0.52
Foreign General	0	−1.84	−0.64	−2.48

These recharacterization adjustments yield the following final taxable income figures:

Final taxable income	X	Y	Z	Total
Domestic	52.00	2.14	3.86	58.00
Foreign Passive	0	3.72	2.78	6.50
Foreign General	0	47.14	16.36	63.50
Total	52.00	53.00	23.00	128.00

Example 2 —(i) *Facts.* X, a domestic corporation, is the parent of domestic corporations Y and Z. X, Y, and Z were organized after January 1, 1987, constitute an affiliated group within the meaning of paragraph (d)(1) of this section, but do not file a consolidated return. Moreover, X has served as the sole borrower in the group and, as a result, has sustained an overall loss. The XYZ group apportions its interest expense on the basis of the fair market value of its assets. X, Y, and Z have the following assets, interest expense, and taxable income before interest expense:

Assets	X	Y	Z	Total
Domestic	2,000	0	1,000	3,000
Foreign Passive	0	50	50	100
Foreign General	0	700	200	900
Interest Expense	140	0	0	140
Taxable Income (pre-interest):				
Domestic	100	0	100	200
Foreign Passive	0	5	5	10
Foreign General	0	70	35	105

(ii) *Step 1: Computation of consolidated taxable income.* Each member of the XYZ group apportions its interest expense according to group apportionment ratios determined under the asset method described in § 1.861–9T(g), yielding the following results:

Apportioned interest expense	X	Y	Z	Total
Domestic	105.00	0	0	105.00
Foreign Passive	3.50	0	0	3.50
Foreign General	31.50	0	0	31.50
Total	140.00	0	0	140.00

The members of the group then compute taxable income within each category by deducting the apportioned interest expense from the amounts of pre-interest taxable income specified in the facts in paragraph (i), yielding the following results:

Taxable income	X	Y	Z	Total
Domestic	−5.00	0	100.00	95.00
Foreign Passive	−3.50	5.00	5.00	6.50
Foreign General	−31.50	70.00	35.00	73.50
Total	−40.00	75.00	140.00	175.00

(iii) *Step 2: Loss offset adjustment.* Because X has insufficient domestic income to offset the sum of the losses in the foreign limitation categories caused by apportionment, the amount of apportionment losses in each limitation category shall be recharacterized as domestic losses to the extent of taxable income of other members in the same limitation category. This is accomplished by adding to each foreign limitation categories an amount equal to the loss therein and by subtracting the sum of such foreign losses from domestic income, as follows:

Loss offset adjustments	X	Y	Z	Total
Domestic	−35.00	0	0	−35.00
Foreign Passive	+3.50	0	0	+3.50
Foreign General	+31.50	0	0	+31.50

These adjustments yield the following adjusted taxable income figures:

Adjusted taxable income	X	Y	Z	Total
Domestic	−40	0	100	60
Foreign Passive	0	5	5	10
Foreign General	0	70	35	105
Total	−40	75	140	175

(iv) *Step 3: Determination of amount subject to recharacterization.* The adjustments performed under Step 2 led to a change in the group's taxable income within each limitation category. The total loss offset adjustment column shown in paragraph (iii) above shows the net deviations between Steps 1 and 2.

(v) *Step 4: Recharacterization.* The loss offset adjustments yield a positive change in the foreign passive and the foreign general limitation categories. Y and Z both have income in these limitation categories. Accordingly, the income of Y and Z in each of these limitation categories must be reduced on a pro rata basis (by reference to the adjusted taxable income figures) to the extent of the positive change in each limitation category. The total positive change in the foreign passive limitation category is $3.50. The adjusted taxable income of Y in the foreign passive limitation category is $5, and the adjusted taxable income of Z in the foreign passive limitation category is $5. Therefore, $1.75 is drawn from Y and $1.75 is drawn from Z. The total positive change in the foreign general limitation category is $31.50. The adjusted taxable income of Y in the foreign general limitation category is $70, and the adjusted taxable income of Z in the foreign general limitation category is $35. Therefore, $21 is drawn from Y and $10.50 is drawn from Z.

The members must then separately compute the sum of the limitation reductions. Y has limitation reductions of $1.75 in the foreign passive limitation category and $21 in the foreign general limitation category, yielding total limitation reductions of $22.75. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Y's domestic income is increased by $22.75. Z has limitation reductions of $1.75 in the foreign passive limitation category and $10.50 in the foreign general limitation category, yielding total limitation reductions of $12.25. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Z's domestic income is increased by $12.25.

Recharacterization adjustments	X	Y	Z	Total
Domestic	0	+22.75	+12.25	+35.00
Foreign Passive	0	−1.75	−1.75	−3.50
Foreign General	0	−21.00	−10.50	−31.50

These recharacterization adjustments yield the following final taxable income figures:

Final taxable income	X	Y	Z	Total
Domestic	−40.00	22.75	112.25	95.00
Foreign Passive	0	3.25	3.25	6.50
Foreign General	0	49.00	24.50	73.50
Total	−40.00	75.00	140.00	175.00

[T.D. 8228, 53 FR 35490, Sept. 14, 1988]

§1.861–12T Characterization rules and adjustments for certain assets (temporary regulations.)

(a) *In general.* These rules are applicable to taxpayers in apportioning expenses under an asset method to income in various separate limitation categories under section 904(d), and supplement other rules provided in §§1.861–9T, 1.861–10T, and 1.861–11T. The rules of this section apply to taxable years beginning after December 31, 1986, except as otherwise provided in §1.861–13T. Paragraph (b) of this section describes the treatment of inventories. Paragraph (c)(1) of this section concerns the treatment of various stock assets. Paragraph (c)(2) of this section describes a basis adjustment for stock in nonaffiliated 10 percent owned corporations. Paragraph (c)(3) of this section sets forth rules for characterizing the stock in controlled foreign corporations. Paragraph (c)(4) of this section describes the treatment of stock of noncontrolled section 902 corporations. Paragraph (d)(1) of this section concerns the treatment of notes. Paragraph (d)(2) of this section concerns the treatment of the notes of controlled foreign corporations. Paragraph (e) of this section describes the treatment of certain portfolio securities that constitute inventory or generate income primarily in the form of gains. Paragraph (f) of this section describes the treatment of assets that are subject to the capitalization rules of section 263A. Paragraph (g) of this section concerns the treatment of FSC stock and of assets of the related supplier generating foreign trade income. Paragraph (h) of this section concerns the treatment of DISC stock and of assets of the related supplier generating qualified export receipts. Paragraph (i) of this section is reserved. Paragraph (j) of this section sets forth an example illustrating the rules of this section, as well as the rules of §1.861–9T(g).

(b) *Inventories.* Inventory must be characterized by reference to the source and character of sales income, or sales receipts in the case of LIFO inventory, from that inventory during the taxable year. If a taxpayer maintains separate inventories for any federal tax purpose, including the rules for establishing pools of inventory items under sections 472 and 474 of the Code, each separate inventory shall be separately characterized in accordance with the previous sentence.

(c) *Treatment of stock*—(1) *In general.* Subject to the adjustment and special rules of paragraphs (c) and (e) of this section, stock in a corporation is taken into account in the application of the asset method described in §1.861–9T(g). However, an affiliated group (as defined in §1.861–11T(d)) does not take into account the stock of any member in the application of the asset method.

(2) *Basis adjustment for stock in nonaffiliated 10 percent owned corporations*—(i) *Taxpayers using the tax book value method.* For purposes of apportioning expenses on the basis of the tax book value of assets, the adjusted basis of any stock in a 10 percent owned corporation owned directly by the taxpayer shall be—

(A) Increased by the amount of the earnings and profits of such corporation (and of lower-tier 10 percent owned corporations) attributable to such stock and accumulated during the period the taxpayer or other members of its affiliated group held 10 percent or more of such stock, or

(B) Reduced (but not below zero) by any deficit in earnings and profits of such corporation (and of lower-tier 10 percent owned corporations) attributable to such stock for such period.

Solely for purposes of this section, a taxpayer's basis in the stock of a controlled foreign corporation shall not include any amount included in basis under section 961 or 1293(d) of the Code. For purposes of this paragraph (c)(2), earnings and profits and deficits are computed under the rules of section 312 and, in the case of a foreign corporation, section 902 and the regulations thereunder for taxable years of the 10 percent owned corporation ending on or before the close of the taxable year of the taxpayer. The rules of section 1248 and the regulations thereunder shall apply to determine the amount of earnings and profits that is attributable to stock without regard to whether earned and profits (or deficits) were derived (or incurred) during taxable years beginning before or after December 31, 1962. This adjustment is to be made annually and is noncumulative. Thus, the adjusted basis of the stock (determined without prior years' adjustments under this section) is to be adjusted annually by the amount of accumulated earnings and profits (or any deficit) attributable to such stock as of the end of each year. Earnings and profits or deficits of a qualified business unit that has a functional currency other than the dollar must be computed under this paragraph (c)(2) in functional currency and translated into dollars using the exchange rate at the end of the taxpayer's current taxable year with respect to which interest is being allocated (and not the exchange rates for the years in which the earnings and profits or deficits were derived or incurred).

(ii) *10 percent owned corporation defined*—(A) *In general.* The term ''10 percent owned corporation'' means any corporation (domestic or foreign)—

(*1*) Which is not included within the taxpayer's affiliated group as defined in §1.861–11T(d) (1) or (6).

(*2*) In which the members of the taxpayer's affiliated group own directly or indirectly 10 percent or more of the total combined voting power of all classes of the stock entitled to vote, and

(*3*) Which is taken into account for purposes of apportionment.

(B) *Rule of attribution.* Stock that is owned by a corporation, partnership, or trust shall be treated as being indirectly owned proportionately by its shareholders, partners, or beneficiaries. For this purpose, a partner's interest in stock held by a partnership shall be determined by reference to the partner's distributive share of partnership income.

(iii) *Earnings and profits of lower-tier corporations taken into account.* For purposes of the adjustment to the basis of the stock of the 10 percent owned corporation owned by the taxpayer under paragraph (c)(2)(i) of this section, the earnings and profits of that corporation shall include its pro rata share of the earnings and profits (or any deficit therein) of each succeeding lower-tier 10 percent owned corporation. Thus, a first-tier 10 percent owned corporation shall combine with its own earnings and profits its pro rata share of the earnings and profits of all such lower-tier corporations. The affiliated group shall then adjust its basis in the stock of the first-tier corporation by its pro rata share of the total combined earnings and profits of the first-tier and the lower-tier corporations. In the case of a 10 percent owned corporation whose tax year does not conform to that of the taxpayer, the taxpayer shall include the annual earnings and profits of such 10 percent owned corporation for the tax year ending within the tax year of the taxpayer, whether or not such 10 percent owned corporation is owned directly by the taxpayer.

(iv) *Special rules for foreign corporations in pre-effective date tax years.* Solely for purposes of determining the adjustment required under paragraph (c)(2)(i) of this section, for tax years beginning after 1912 and before 1987, financial earnings (or losses) of a foreign corporation computed using United States generally accepted accounting principles may be substituted for earnings and profits in making the adjustment required by paragraph (c)(2)(i) of this section. A taxpayer is not required to isolate the financial earnings of a foreign corporation derived or incurred during its period of 10 percent ownership or during the post-1912 taxable years and determine earnings and profits (or deficits) attributable under section 1248 principles to the taxpayer's stock in a 10 percent owned corporation. Instead, the taxpayer may include all historic financial earnings for purposes of this adjustment. If the affiliated group elects to use financial earnings with respect to any foreign corporation, financial earnings must be used by that group with respect to all foreign corporations, except that earnings and profits may in any event be used for controlled foreign corporations for taxable years beginning after

1962 and before 1987. However, if the affiliated group elects to use earnings and profits with respect to any single controlled foreign corporation for the 1963 through 1986 period, such election shall apply with respect to all its controlled foreign corporations.

(v) *Taxpayers using the fair market value method.* Because the fair market value of any asset which is stock will reflect retained earnings and profits, taxpayers who use the fair market value method shall not adjust stock basis by the amount of retained earnings and profits, as otherwise required by paragraph (c)(2)(i) of this section.

(vi) *Examples.* Certain of the rules of this paragraph (c)(2) may be illustrated by the following examples.

Example 1. X, an affiliated group that uses the tax book value method of apportionment, owns 20 percent of the stock of Y, which owns 50 percent of the stock of Z. X's basis in the Y stock is $1,000. X, Y, and Z have calendar taxable years. The undistributed earnings and profits of Y and Z at year-end attributable to X's period of ownership are $80 and $40, respectively. Because Y owns half of the Z stock, X's pro rata share of Z's earnings and profits attributable to X's Y stock is $4. X's pro rata share of Y's earnings attributable to X's Y stock is $16. For purposes of apportionment, the tax book value of the Y stock is, therefore, considered to be $1,020.

Example 2. X, an unaffiliated domestic corporation that was organized on January 1, 1987, has owned all the stock of Y, a foreign corporation with a functional currency other than the U.S. dollar, since January 1, 1987. Both X and Y have calendar taxable years. All of Y's assets generate general limitation income. X has a deductible interest expense incurred in 1987 of $160,000. X apportions its interest expense using the tax book value method. The adjusted basis of its assets that generate domestic income is $7,500,000. The adjusted basis of its assets that generate foreign source general limitation income (other than the stock of Y) is $400,000. X's adjusted basis in the Y stock is $2,000,000. Y has undistributed earnings and profits for 1987 of $100,000, translated into dollars from Y's functional currency at the exchange rate on the last day of X's taxable year. Because X is required under paragraph (b)(1) of this §1.861–10T to increase its basis in the Y stock by the computed amount of earnings and profits, X's adjusted basis in the Y stock is considered to be $2,100,000, and its adjusted basis of assets that generate foreign source general limitation income is, thus, considered to be $2,500,000. X would apportion its interest expense as follows:

To foreign source general limitation income:

$$\text{Interest expense} \times \frac{\text{Adjusted basis of foreign general limitation assets}}{\begin{array}{c}\text{Adjusted basis of foreign}\\ \text{general limitation assets}\end{array} + \text{Adjusted basis of domestic assets}}$$

$$\$160{,}000 \times \frac{\$2{,}500{,}000}{\$2{,}500{,}000 + \$7{,}500{,}000} = \$40{,}000$$

To domestic source income:

$$\text{Interest expense} \times \frac{\text{Adjusted basis of domestic assets}}{\begin{array}{c}\text{Adjusted basis of foreign}\\ \text{general limitation assets}\end{array} + \text{Adjusted basis of domestic assets}}$$

$$\$160{,}000 \times \frac{\$7{,}500{,}000}{\$2{,}500{,}000 + \$7{,}500{,}000} = \$120{,}000$$

(3) *Characterization of stock of controlled foreign corporations*—(i) *In general.* Stock in a controlled foreign corporation (as defined in section 957)

shall be characterized as an asset in the various separate limitation categories either on the basis of:

(A) The asset method described in paragraph (c)(3)(ii) of this section, or

(B) The modified gross income method described in paragraph (c)(3)(iii) of this section.

Stock in a controlled foreign corporation whose interest expense is apportioned on the basis of assets shall be characterized in the hands of its United States shareholders under the asset method described in paragraph (c)(3)(ii). Stock in a controlled foreign corporation whose interest expense is apportioned on the basis of gross income shall be characterized in the hands of its United States shareholders under the gross income method described in paragraph (c)(3)(iii).

(ii) *Asset method.* Under the asset method, the taxpayer characterizes the tax book value or fair market value of the stock of a controlled foreign corporation based on an analysis of the assets owned by the controlled foreign corporation during the foreign corporation's taxable year that ends with or within the taxpayer's taxable year. This process is based on the application of §1.861–9T(g) at the level of the controlled foreign corporation. In the case of a controlled foreign corporation that owns stock in one or more lower-tier controlled foreign corporations in which the United States taxpayer is a United States shareholder, the characterization of the tax book value of the fair market value of the stock of the first-tier controlled foreign corporation to the various separate limitation categories of the affiliated group must take into account the stock in lower-tier corporations. For this purpose, the stock of each such lower-tier corporation shall be characterized by reference to the assets owned during the lower-tier corporation's taxable year that ends during the taxpayer's taxable year. The analysis of assets within a chain of controlled foreign corporations must begin at the lowest-tier controlled foreign corporation and proceed up the chain to the first-tier controlled foreign corporation. For purposes of this paragraph (c), the value of any passive asset to which related person interest is allocated under § 1.904–5(c)(2)(ii) must be reduced by the principal amount of indebtedness on which such interest is incurred. Furthermore, the value of any asset to which interest expense is directly allocated under § 1.861–10T must be reduced as provided in § 1.861–9T(g)(2)(iii). See § 1.861–9T(h)(5) for further guidance concerning characterization of stock in a related person under the fair market value method.

(iii) *Modified gross income method.* Under the gross income method, the taxpayer characterizes the tax book value of the stock of the first-tier controlled foreign corporation based on the gross income net of interest expense of the controlled foreign corporation (as computed under § 1.861–9T(j)) within each relevant category for the taxable year of the controlled foreign corporation ending with or within the taxable year of the taxpayer. For this purpose, however, the gross income of the first-tier controlled foreign corporation shall include the total amount of net subpart F income of any lower-tier controlled foreign corporation that was excluded under the rules of § 1.861–9T(j)(2)(ii)(B).

(4) *Stock of noncontrolled section 902 corporations*—(i) *General rule.* Because each noncontrolled section 902 corporation constitutes a separate limitation category, the value of such stock, increased to the extent required under paragraph (c)(2) of this section, is attributable solely to each such category.

(ii) *Special rule for separate limitation losses*—(A) *Election.* If, as a result of the allocation and apportionment of interest expense using the asset method described in § 1.861–9T(g), the taxpayer has a loss in the separate limitation category for a given noncontrolled section 902 corporation, the taxpayer may elect to reallocate interest expense equal to such loss to any other separate limitation category that is in excess credit (without regard to carryovers from other years), to the extent that the reallocation of such interest to such other category does not create a loss in that category. For this purpose, the term ''category in excess credit'' means any category of income with respect to which the foreign income taxes paid or accrued for the current taxable year exceed the limitation computed under section 904 with respect to such category. The election to reallocate interest expense under this paragraph shall be made in the manner prescribed in § 1.861–9T(f)(3) (relating to the election to use a gross income method for controlled foreign corporations). Furthermore, such election is irrevocable and, thus, cannot be amended by an amended return.

(B) Example. X, a domestic corporation organized on January 1, 1987, incurred deductible interest expense in 1987 in the amount of $1,000,000. X uses the tax book value method of apportionment. X owns 25 percent of the stock of A, a noncontrolled section 902 corporation. At the end of 1987, the tax book value of X's assets by income grouping are as follows:

Domestic	$3,500,000
Foreign general limitation	1,000,000
Noncontrolled section 902 corporation	500,000

In 1987, A paid no dividends. X received $100,000 of foreign general limitation income, on which it incurred $50,000 of tax to foreign governments.

The stock of A constitutes ten percent of X's assets. Therefore, ten percent of X's interest expense ($100,000) is allocated and apportioned to the separate limitation category for dividends on the A stock. Since A paid no dividends, this amount would constitute a separate limitation loss under the rules of section 904(f)(5).

Because X incurred more tax to foreign governments on its foreign general limitation income than it can credit against its U.S. tax liability, for the current tax year, and because the reallocation of interest expense allocated and apportioned to dividends from A to foreign general limitation income would not create a loss in that category, X may elect to reallocate such interest expense to the foreign general limitation category to the extent of the loss in the separate limitation category for dividends received from A.

(d) *Treatment of notes*—(1) *General rule.* Subject to the adjustments and special rules of this paragraph (d) and paragraph (e) of this section, all notes held by a taxpayer are taken into account in the application of the asset method described in § 1.861–9T(g). However, the notes of an affiliated corporation are subject to special rules set forth in § 1.861–11T(e). For purposes of this section, the term ''notes'' means all interest bearing debt, including debt bearing original issue discount.

(2) *Characterization of related controlled foreign corporation notes.* The debt of a controlled foreign corporation shall be characterized according to the taxpayer's treatment of the interest income derived from that debt obligation after application of the look-through rule of section 904(d)(3)(C). Thus, a United States shareholder includes interest income from a controlled foreign corporation in the same category of income as the category of income from which the controlled foreign corporation deducts the interest expense. See section 954(b)(5) and § 1.904–5(c)(2) for rules concerning the allocation of related person interest payments to the foreign personal holding company income of a controlled foreign corporation.

(e) *Portfolio securities that constitute inventory or generate primarily gains.* Because gain on the sale of securities is sourced by reference to the residence of the seller, a resident of the United States will generally receive domestic source income (and a foreign resident will generally receive foreign source income) upon sale or disposition of securities that otherwise generate foreign source dividends and interest (or domestic source dividends and interest in the case of a foreign resident). Although under paragraphs (c) and (d) of this section securities are characterized by reference to the source and character of dividends and interest, the source and character of income on gain or disposition must also be taken into account for purposes of characterizing portfolio securities if:

(1) The securities constitute inventory in the hands of the holder, or

(2) 80 percent or more of the gross income generated by a taxpayer's entire portfolio of such securities during a taxable year consists of gains.

For this purpose, a portfolio security is a security in any entity other than a controlled foreign corporation with respect to which the taxpayer is a United States shareholder under section 957, a noncontrolled section 902 corporation with respect to the taxpayer, or a 10 percent owned corporation as defined in § 1.861–12(c)(2)(ii). In taking gains into account, a taxpayer must treat all portfolio securities generating foreign source dividends and interest as a single asset and all portfolio securities generating domestic source dividends as a single asset and shall characterize the total value of that asset based on the source of all income and gain generated by those securities in the taxable year.

(f) *Assets funded by disallowed interest*—(1) *Rule.* In the case of any asset in connection with which interest expense accruing at the end of the taxable year is capitalized, deferred, or disallowed under any provision of the Code, the adjusted basis or fair market value (depending on the taxpayer's choice of apportionment methods) of such an asset shall be reduced by the principal amount of indebtedness the interest on which is so capitalized, deferred, or disallowed.

(2) *Example.* The rules of this paragraph (f) may be illustrated by the following example.

Example. X is a domestic corporation which uses the tax book value method of apportionment. X has $1000 of indebtedness and $100 of interest expense. X constructs an asset with an adjusted basis of $800 before interest capitalization and is required under the rules of section 263A to capitalize $80 in interest expense. Because interest on $800 of debt is capitalized and because the production period is in progress at the end of X's taxable year, $800 of the principal amount of X's debt is allocable to the building. The $800 of debt allocable to the building reduces its adjusted basis for purposes of apportioning the balance of X's interest expense ($20).

(g) *Special rules for FSCs*—(1) *Treatment of FSC stock.* No interest expense shall be allocated or apportioned to stock of a foreign sales corporation ("FSC") to the extent that the FSC stock is attributable to the separate limitation for certain FSC distributions described in section 904(d)(1)(H). FSC stock is considered to be attributable solely to the separate limitation category described in section 904(d)(1)(H) unless the taxpayer can demonstrate that more than 20 percent of the FSC's gross income for the taxable year consists of income other than foreign trading income.

(2) *Treatment of assets that generate foreign trade income.* Assets of the related supplier that generate foreign trade income must be prorated between assets attributable to foreign source general limitation income and assets attributable to domestic source income in proportion to foreign source general limitation income and domestic source income derived from transactions generating foreign trade income.

(i) *Value of assets attributable to foreign source income.* The value of assets attributable to foreign source general limitation income is computed by multiplying the value of assets for the taxable year generating foreign trading gross receipts by a fraction:

(A) The numerator of which is foreign source general limitation income for the taxable year derived from transactions giving rise to foreign trading gross receipts, after the application of the limitation provided in section 927(e)(1), and

(B) The denominator of which is total income for the taxable year derived from the transaction giving rise to foreign trading gross receipts.

(ii) *Value of assets attributable to domestic source income.* The value of assets attributable to domestic source income is computed by subtracting from the total value of assets for the taxable year generating foreign trading gross receipts the value of assets attributable to foreign source general limitation income as computed under paragraph (g)(2)(i) of this section.

(h) *Special rules for DISCs*—(1) *Treatment of DISC stock.* No interest shall be allocated or apportioned to stock in a DISC (or stock in a former DISC to the extent that the stock in the former DISC is attributable to the separate limitation category described in section 904(d)(1)(F)).

(2) *Treatment of assets that generate qualified export receipts.* Assets of the related supplier that generate qualified export receipts must be prorated between assets attributable to foreign source general limitation income and assets attributable to domestic source income in proportion to foreign source general limitation income and domestic source income derived from transactions during the taxable year from transactions generating qualified export receipts.

(i) [Reserved]

(j) *Examples.* Certain of the rules in this section and §§ 1.861–9T(g) and 1.861–

10(e) are illustrated by the following example.

Example 1 —(1) *Facts.* X, a domestic corporation organized on January 1, 1987, has a calendar taxable year and apportions its interest expense on the basis of the tax book value of its assets. In 1987, X incurred a deductible third-party interest expense of $100,000 on an average month-end debt amount of $1 million. The total tax book value of X's assets (adjusted as required under paragraph (b) of this section for retained earnings and profits) is $2 million. X manufactures widgets. One-half of the widgets are sold in the United States and one-half are exported and sold through a foreign branch with title passing outside the United States.

X owns all the stock of Y, a controlled foreign corporation that also has a calendar taxable year and is also engaged in the manufacture and sale of widgets. Y has no earnings and profits or deficits in earnings and profits prior to 1987. For 1987, Y has taxable income and earnings and profits of $50,000 before the deductible for related person interest expense. Half of the $50,000 is foreign source personal holding company income and the other half is derived from widget sales and constitutes foreign source general limitation income. Assume that Y has no deductibles from gross income other than interest expense. Y's foreign personal holding company taxable income is included in X's gross income under section 951. Y paid no dividends in 1987. Prior to 1987, Y did not borrow any funds from X. The average month-end level of borrowings by Y from X in 1987 is $100,000, on which Y paid a total of $10,000 in interest. The total tax book value of Y's assets in 1987 is $500,000. Y has no liabilities to third parties. X elects pursuant to §1.861–9T for Y to apportion Y's interest expense under the gross income method prescribed in §1.861–9T(g).

In addition to its stock in Y, X owns 20 percent of the stock of Z, a noncontrolled section 902 corporation.

X's total assets and their tax book values are:

Asset	Tax book value
Plant & equipment	$1,000,000
Corporate headquarters	500,000
Inventory	200,000
Automobiles	20,000
Patents	50,000
Trademarks	10,000
Y stock (including paragraph (c)(2) adjustment)	80,000
Y note	100,000
Z stock	40,000

(2) *Categorization of Assets.*

Single Category Assets

1. Automobiles: X's automobiles are used exclusively by its domestic sales force in the generation of United States source income. Thus, these assets are attributable solely to the grouping of domestic income.

2. Y Note: Under paragraph (d)(2) of this section, the Y note in the hands of X is characterized according to X's treatment of the interest income received on the Y note. In determining the source and character of the interest income on the Y note, the look-through rules of sections 904(d)(3)(C) and 904(g) apply. Under section 954(b)(5) and §1.904–5(c)(2)(ii), Y's $10,000 interest payment to X is allocated directly to, and thus reduces, Y's foreign personal holding company income of $25,000 (yielding foregin personal holding company taxable income of $15,000). Therefore, the Y note is attributable solely to the statutory grouping of foreign source passive income.

3. Z stock: Because Z is a noncontrolled section 902 corporation, the dividends paid by Z are subject to a separate limitation under section 904(d)(1)(E). Thus, this asset is attributable solely to the statutory grouping consisting of Z dividends.

Multiple Category Assets

1. Plant & equipment, inventory, patents, and trademarks: In 1987, X sold half its widgets in the United States and exported half outside the United States. A portion of the taxable income from export sales will be foreign source income, since the export sales were accomplished through a foreign branch and title passed outside the United States. Thus, these assets are attributable both to the statutory grouping of foreign general limitation and the grouping of domestic income.

2. Y Stock: Since Y's interest expense is apportioned under the gross income method prescribed in §1.861–9T(j), the Y stock must be characterized under the gross income method described in paragraph (c)(3)(iii) of this section.

Assets without Directly Identifiable Yield

1. Corporate headquarters: This asset generates no directly identifiable income yield. The value of the asset is disregarded.

(3) *Analysis of Income Yield for Multiple Category Assets.*

1. Plant & Equipment, inventory, patents, and trademarks: As noted above, X's 1987 widget sales were half domestic and half foreign. Assume that Example 2 of §1.863–3(b)(2) applies in sourcing the export income from the export sales. Under Example 2, the income generated by the export sales is sourced half domestic and half foreign. The income gnerated by the domestic sales is entirely domestic source. Accordingly, three-quarters of the income generated on all sales

is domestic source and one-quarter of the income is foreign source. Thus, three-quarters of the fair market value of these assets are attributed to the grouping of domestic source income and one-quarter of the fair market value of these assets is attributed to the statutory grouping of foreign source general limitation income.

2. Y Stock: Under the gross income method described in paragraph (c)(3)(iii) of this section, Y's gross income net of interest expenses in each limitation category must be determined—$25,000 foreign source general limitation income and $15,000 of foreign source passive income. Of X's adjusted basis of $80,000 in Y stock, $50,000 is attributable to foreign source general limitation income and $30,000 is attributable to foreign source passive income.

(4) *Application of the Special Allocation Rule of § 1.861–10T(e).* Assume that the taxable year in question is 1990 and that the appliable percentage prescribed by § 1.861–10T(e)(1)(iv)(A) is 80 percent. Assume that X has elected to use the quadratic formula provided in § 1.861–10T(e)(1)(iv)(B).

Step 1. X's average month-end level of debt owning to unrelated persons is $1 million. The tax book value of X's assets is $2 million. Thus, X's debt-to-asset ratio computed under § 1.861–10T(e)(1)(i) is 1 to 2.

Step 2. The tax book value of Y's assets is $500,000. Because Y has no debt to persons other than X, Y's debt-to-asset ratio computed under § 1.861–10T(e)(1)(ii) is $0 to $500,000.

Step 3. Y's average month-end liabilities to X, as computed under § 1.861–10T(e)(1)(iii) for 1987 are $100,000.

Step 4. Adding the $100,000 of Y's liabilities owed to X as computed under Step 3 to Y's third party liabilities ($0) would be insufficient to make Y's debt-to-asset ratio computed in Step 2 ($100,000-to-$500,000, or 1:5) equal to at least 80 percent of X's debt-to-asset ratio computed under Step 1, as adjusted to reflect a reduction in X's debt and assets by the $100,000 of excess related person indebtedness (.80 x $900,000/$1,900,000 or 1:2.6). Therefore, the entire amount of Y's liabilities to X ($100,000) constitute excess related person indebtedness under § 1.861–10T(e)(1)(ii). Thus, the entire $10,000 of interest received by X from Y during 1987 constitutes interest received on excess related person indebtedness.

Step 5. The Y note held by X has a tax book value of $100,000. Solely for purposes of § 1.861–10(e)(1)(v), the Y note is attributed to separate limitation categories in the same manner as the Y stock. Under paragraph (c)(3)(iii) of this section, of the $80,000 of Y stock held by X, $50,000 is attributable to foreign source general limitation income, and $30,000 is attributable to foreign source passive income. Thus, for purposes of $1.861–10T(e)(1)(v), $62,500 of the $100,000 Y note is considered to be a foreign source general limitation asset and $37,500 of the $100,000 Y note is considered to be a foreign source passive asset.

Step 6. Since $8,000 of the $10,000 in related person interest income received by Y constitutes interest received on excessive related person indebtedness, $10,000 of X's third party interest expense is allocated to X's debt investment in Y. Under § 1.861–10T(e)(1)(vi), 62.5 percent of the $10,000 of X's third party interest expense ($6,250) is allocated to foreign source general limitation income and 37.5 percent of the $10,000 of X's third party interest expense ($3,750) is allocated to foreign source passive income. As a result of this direct allocation, the value of X's assets generating foreign source general limitation income shall be reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source general limitation income ($62,500), and X's assets generating foreign general limitation income shall be reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign passive income ($37,500).

(5) *Totals.*

Having allocated $10,000 of its third party interest expense to its debt investment in Y, X would apportion the $90,000 balance of its interest according to the following apportionment fractions:

Asset	Domestic source	Foreign general	Foreign passive	Noncontrolled section 902
Plant and equipment	$750,000	$250,000		
Inventory	$150,000	$50,000		
Automobiles	$20,000			
Patents	$37,500	$12,500		
Trademarks	$7,500	$2,500		
Y stock		$50,000	$30,000	
Y note			$100,000	
Z stock				$40,000
Totals	$965,000	$365,000	$130,000	$40,000
Adjustments for directly allocable interest		($62,250)	($37,750)	

Asset	Domestic source	Foreign general	Foreign passive	Noncontrolled section 902
Adjusted totals	$965,000	$302,750	$92,250	$40,000
Percentage	69	22	6	3

Example 2 —Assume the same facts as in *Example* 1, except that Y has $100,000 of third party indebtedness. Further, assume for purposes of the application of the special allocation rule of §1.861–10T(e) that the taxable year is 1990 and that the applicable percentage prescribed by §1.861–10T(e)(1)(iv)(A) is 80 percent. The application of the §1.861–10(e) would be modified as follows.

Step 1. X's debt-to-asset ratio computed under §1.861–10T(e)(1)(i) remains 1 to 2 (or 0.5).

Step 2. The tax book value of Y's assets is $500,000. Y has $100,000 of indebtedness to third parties. Y's debt-to-asset ratio computed under §1.861–10T(e)(1)(ii) is $100,000 to $500,000 (1:5 or 0.2).

Step 3. Y's average month-end liabilities to X, as computed under §1.861–10T(e)(1)(iii) remain $100,000.

Step 4. X's debt-to-asset ratio is 0.5 and 80 percent of 0.5 is 0.4. Because Y's debt-to-asset ratio is 0.2, there is excess related person indebtedness, the amount of which can be computed based on the following formula:

$$\frac{\text{Aggregate third party debt of related U.S. shareholder} - X}{\text{U.S. shareholder assets} - X} \times \begin{matrix}\text{Applicable percentage}\\ \text{for year (0.8)}\end{matrix} = \frac{\text{Aggregate third party debt of related CFCs} + X}{\text{Related CFC assets}}$$

Supplying the facts as given, this equation is as follows:

$$\frac{1{,}000{,}000 - X}{2{,}000{,}000 - X} \times .8 = \frac{100{,}000 + X}{500{,}000}$$

Multiply both sides by 500,000 and (2,000,000 − X), yielding:

$$4 \times 10^{11} - 400{,}000X = 2 \times 10^{11} + 2{,}000{,}000X - 100{,}000X - X^{2}$$

Since there is an X^2 in this equation, a quadratic formula must be utilized to solve for X. Group the components in this equation, segregating the X and the $X^{2\leqq}$

$$X^{2} + (-2{,}300{,}000)X + (2 \times 10^{11}) = 0$$

Apply the quadratic formula:

$$X = \frac{-b \pm \sqrt{b^{2} - 4(a)(c)}}{2(a)}$$

a=1 (coefficient of X^2)
b=−2,300,000 (coefficient of X)
c=2×10^{11} (remaining element of equation)

Therefore, X equals either 90,519 or (2.21×10^{11}). for purposes of computing excess related person indebtedness, X is the lowest positive amount derived from this equation, which is 90,519.

Steps 5 and 6 are unchanged from *Example* 1, except that the total amount of interest on excess related party indebtedness is $9,051.

[T.D. 8228, 53 FR 35495, Sept. 14, 1988]

§1.861–13T Transition rules for interest expenses (temporary regulations).

(a) *In general*—(1) *Optional application.* The rules of this section may be applied at the choice of a corporate taxpayer. In the case of an affiliated group, however, the choice must be made on a consistent basis for all members. Therefore, a corporate taxpayer (or affiliated group) may allocate and apportion its interest expense entirely on the basis of the rules contained in §§1.861–8T through 1.861–12T and without regard to the rules of this section. The choice is made on an annual basis and, thus, is not binding with respect to subsequent tax years.

(2) *Transition relief.* This section contains transitional rules that limit the application of the rules for allocating and apportioning interest expense of corporate taxpayers contained in

§§ 1.861–8T through 1.861–12T, which are applicable in allocating and apportioning the interest expense of corporate taxpayers generally for taxable years beginning after 1986. Sections 1.861–9(d) (relating to individuals, estates, and certain trusts) and 1.861–9(e) (relating to partnerships) are effective for taxable years beginning after 1986. Thus, the taxpayers to whom those sections apply do not qualify for transition relief under this section.

(3) *Indebtedness defined.* For purposes of this section, the term ''indebtedness'' means any obligation or other evidence of indebtedness that qenerates an expense that constitutes interest expense within the meaning of § 1.861–9T(a). In the case of an obligation that does not bear interest initially, but becomes interest bearing with the lapse of time or upon the occurrence of an event, such obligation shall only be considered to constitute indebtedness when it first bears interest. Obligations that are outstanding as of November 16, 1985 shal1 only qualify for transition relief under this section if they bear interest-bearing as of that date. For this purpose, any obligation that has original issue discount within the meaning of section 1273(a)(1) of the Code shall be considered to be interest-bearing.

(4) *Exceptions.* The term ''indebtedness'' shall not include any obligation existing between affiliated corporations, as defined in § 1.861–llT(d). Moreover, the term ''indebtedness'' shall not include any obligation the interest on which is directly allocable under §§ 1.861–10T(b) and 1.861–10T(c). Under § 1.861–9T(b)(6)(iv)(B), certain interest expense is directly allocated to the gain derived from an appropriately identified financial product. When interest expense on a liability is reduced by such gain, the principal amount of such liability shall be reduced pro rata by the relative amount of interest expense that is directly allocated.

(b) *General phase-in*—(1) *In general.* In the case of each of the first three taxable years of the taxpayer beginning after December 31, 1986, the rules of §§ 1.861–8T through 1.861–12T shall not apply to interest expenses paid or accrued by the taxpayer during the taxable year with respect to an aggregate amount of indebtedness which does not exceed the general phase-in amount, as defined in paragraph (b)(2) of this section.

(2) *General phase-in amount defined.* Subject to the limitation imposed by paragraph (b)(3) of this section, the general phase-in amount means the amount which is the applicable percentage (determined under the following table) of the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985:

Taxable year beginning after December 31, 1986	Percentage
First	75
Second	50
Third	25

(3) *Reductions in indebtedness.* The general phase-in amount shall not exceed the taxpayer's historic lowest month-end debt level taking into account all months after October 1985. However, for the taxable year ln which a taxpayer attains a new historic lowest month-end debt level (but not for subsequent taxable years), the general phase-in amount shall not exceed the average of month-end debt levels within that taxable year (without taking into account any increase in month-end debt levels occurring in such taxable Year after the new historic lowest month-end debt level is attained).

Example. X is a calendar year taxpayer that had $100 of indebtedness outstanding on November 16, 1985. X's month-end debt level remained $100 for all subsequent months until July 1987, when X's month-end debt level fell to $50. In computing transition relief for 1987, X's general phase-in amount cannot exceed $75 (900 divided by 12), which is the average of month-end debt levels in 1987. Assuming that X's month-end debt level for any subsequent month does not fall below $50, the limitation on its general phase-in amount for all taxable years after 1987 will be $50, its historic lowest month-end debt level after October 1985.

(c) *Nonapplication of the consolidation rule*—(1) *General rule.* In the case of each of the first five taxable years of the taxpayer beginning after December 31, 1986, the consolidation rule contained in § 1.861–11T(c) shall not apply to interest expenses paid or accrued by the taxpayer during the taxable year with respect to an aggregate amount of indebtedness which does not exceed the special phase-in amount, as defined in paragraph (c)(2) of this section.

(2) *Special phase-in amount.* The special phase-in amount is the sum of—

(i) The general phase-in amount,

(ii) The five-year phase-in amount, and

(iii) The four-year phase-in amount.

(3) *Five-year phase-in amount.* The five-year phase-in amount is the lesser of—

(i) The applicable percentage (the ‘‘unreduced percentage’’ in the following table) of the five-year debt amount, or

(ii) The applicable percentage (the ‘‘reduced percentage’’ in the following table) of the five-year debt amount reduced by paydowns (if any):

Transition year	Unreduced percentage	Reduced percentage
Year 1	8⅓	10
Year 2	16⅔	25
Year 3	25	50
Year 4	33⅓	100
Year 5	16⅔	100

(4) *Four-year phase-in amount.* The four-year phase-in amount is the lesser of—

(i) The applicable percentage (the ‘‘unreduced percentage’’ in the following table) of the four-year debt amount, or

(ii) The applicable percentage (the ‘‘reduced percentage’’ in the following table) of the four-year debt amount reduced by paydowns (if any) to the extent that such paydowns exceed the five-year debt amount:

Transition year	Unreduced percentage	Reduced percentage
Year 1	5	6¼
Year 2	10	16⅔
Year 3	15	37½
Year 4	20	100

(5) *Five-year debt amount.* The ‘‘five-year debt amount’’ means the excess (if any) of—

(i) The amount of the outstanding indebtedness of the taxpayer on May 29, 1985, over

(ii) The amount of the outstanding indebtedness of the taxpayer on December 31, 1983. The five-year debt amount shall not exceed the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985.

(6) *Four-year debt amount.* The ‘‘four-year debt amount’’ means the excess (if any) of—

(i) The amount of the outstanding indebtedness of the taxpayer on December 31, 1983, over

(ii) The amount of the outstanding indebtedness of the taxpayer on December 31, 1982.

The four-year debt amount shall not exceed the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985, reduced by the five-year debt amount.

(7) *Paydowns.* The term ‘‘paydowns’’ means the excess (if any) of—

(i) The aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985, over

(ii) The limitation on the general phase-in amount described in paragraph (b)(3) of this section.

Paydowns are first applied to the five-year debt amount to the extent thereof and then to the four-year debt amount for purposes of computing the five-year and the four-year phase-in amounts.

(d) *Treatment of affiliated group.* For purposes of this section, all members of the same affiliated group of corporations (as defined in §1.861–11(d)) shall be treated as one taxpayer whether or not such members filed a consolidated return. Interaffiliate debt is not taken into account in computing transition relief. Moreover, any reduction in the amount of interaffiliate debt is not taken into account in determining the amount of paydowns.

(e) *Mechanics of computation*—(1) *Step 1: Determination of the amounts within the various categories of debt.* Each separate member of an affiliated group must determine each of its following amounts:

(i) *November 16, 1985 amount.* The amount of its debt outstanding on November 16, 1985 (after the elimination of interaffiliate indebtedness),

(ii) *Unreduced five-year debt.* The amount of any net increase in the amount of its indebtedness on May 29, 1985 (after elimination of interaffiliate indebtedness) over the amount of its indebtedness on December 31, 1983 (after elimination of interaffiliate indebtedness),

(iii) *Unreduced four-year debt.* The amount of any net increase in the amount of its indebtedness on December 31, 1983 (after elimination of interaffiliate indebtedness) over the amount of its indebtedness on December 31, 1982 (after elimination of interaffiliate indebtedness), and

(iv) *Month-end debt.* The amount of its month-end debt level for all months after October 1985 (after elimination of interaffiliate indebtedness).

(2) *Step 2: Aggregation of the separate company amounts.* Each of the designated amounts for the separate companies identified in Step 1 must be aggregated in order to compute consolidated transition relief. Paragraph (e)(10)(iv) of this section (Step 10) requires the use of the taxpayer's current year average debt level for the purpose of computing the percentages of debt that are subject to the three sets of rules that are identified in Step 10. For use in that computation, the taxpayer should compute the current year average debt level by aggregating separate company month-end debt levels and then by averaging those aggregate amounts.
