(f) *Recognition of gain in certain liquidations under section 333.* Section 341(e)(3) provides that, for purposes of section 333 (relating to elections as to recognition of gain in certain complete liquidations occurring within one calendar month), a corporation is considered not to be a collapsible corporation if, at all times after the adoption of the plan of complete liquidation, the net unrealized appreciation in subsection (e) assets of the corporation does not exceed an amount equal to 15 percent of the net worth of the corporation. For purposes of the preceding sentence, the determination of subsection (e) assets shall be made in accordance with paragraph (b) of this section except that subparagraph (2)(i) and (iii) of such paragraph (b) shall apply in respect of any actual or constructive shareholder who is considered to own more than 5 percent in value of the outstanding stock (in lieu of any actual or constructive shareholder who is considered to own more than 20 percent in value of such stock). Thus, no shareholder of the corporation can qualify under paragraph (3) of section 341(e) for use of section 333 if, because of any actual or constructive shareholder who is considered to own more than 5 percent in value of the stock, this modified general corporate test is not satisfied. On the other hand, once this modified general corporate test is satisfied, all the shareholders can use section 333 (assuming that the requirements of that section are satisfied) since there is no specific shareholder test. For an illustration of this paragraph, see *Example (3)* in paragraph (o) of this section.

(g) *Gain or loss on sales or exchanges in connection with certain liquidations, pursuant to section 337*—(1) *General.* Section 341(e)(4) provides that solely for purposes of section 337, a corporation is considered not to be a collapsible corporation if (i) at all times within the 12-month period beginning on the date of the adoption of a plan of complete liquidation, the net unrealized appreciation in subsection (e) assets of the corporation does not exceed an amount equal to 15 percent of the net worth of the corporation; (ii) within the 12-month period beginning on the date of the adoption of such plan, the corporation sells substantially all of the properties held by it on such date; and (iii) following the adoption of such plan, no distribution is made of any property which in the hands of the corporation or in the hands of the distributee is property in respect of which a deduction for exhaustion, wear and tear, obsolescence, amortization, or depletion is allowable. Thus, if at the time of the adoption of the plan of liquidation the corporation is a collapsible corporation within the meaning of section 341(b) and if the preceding requirements are satisfied, then except as provided in subparagraph (2) of this paragraph section 337(a) will apply to such corporation but the corporation will continue to be a collapsible corporation within the meaning of section 341(b) (including for purposes of section 341(e)(2)) with the result that each shareholder must still satisfy all the tests in paragraph (e) of this section before he can utilize the benefits of section 341(e)(2).

(2) *Exception to section 337 treatment.* Section 341(e)(4) shall not apply with respect to any sale or exchange of property by the corporation to any actual or constructive shareholder who is considered to own more than 20 percent in value of the outstanding stock of the corporation or to any person related (within the meaning of paragraph (k) of this section) to such actual or constructive shareholder if such property in the hands of the corporation, or in the hands of such shareholder or such related person, is property in respect of which a deduction for exhaustion, wear and tear, obsolescence, amortization, or depletion is allowable. Thus, gain or loss will be recognized on such sales or exchanges.

(3) *Cross references.* For effective date of section 341(e)(4) and this paragraph, see paragraph (a)(2) of this section. For an illustration of this paragraph, see *Example (4)* in paragraph (o) of this section.

(h) *Net unrealized appreciation and depreciation defined*—(1) *Net unrealized appreciation.* For purposes of this section, the term *net unrealized appreciation* means, with respect to the assets of a corporation, the amount by which—

(i) The unrealized appreciation in such assets on which there is unrealized appreciation, exceeds

(ii) The unrealized depreciation in such assets on which there is unrealized depreciation.

(2) *Net unrealized depreciation.* For purposes of paragraph (b)(2)(ii) of this section, there is net unrealized depreciation on all property of a corporation which in its hands is property described in section 1231(b) (without regard to any holding period prescribed therein) if—

(i) The unrealized depreciation in such property on which there is unrealized depreciation, exceeds

(ii) The unrealized appreciation in such property on which there is unrealized appreciation.

(3) *Unrealized appreciation or depreciation.* For purposes of this paragraph—

(i) The term *unrealized appreciation* means (except as provided in subparagraph (4) of this paragraph), with respect to any asset, the amount by which (*a*) the fair market value of such asset, exceeds (*b*) the adjusted basis for determining gain from the sale or other disposition of such asset; and

(ii) The term *unrealized depreciation* means, with respect to any asset, the amount by which (*a*) the adjusted basis for determining gain from the sale or other disposition of such asset, exceeds (*b*) the fair market value of such asset.

(4) *Special rule.* For purposes of determining whether the net unrealized appreciation in subsection (e) assets of a corporation exceeds an amount equal to 15 percent of the corporation's net worth under the tests of section 341(e)(1), (2), (3), and (4), in the case of any asset on the sale or exchange of which only a portion of the gain would under any provision of chapter 1 of the Code (other than section 617(d), 1245, 1250, 1251, 1252, or 1254) be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b), there shall be taken into account only an amount equal to the unrealized appreciation in such asset which is equal to such portion of the gain. This subparagraph shall have no effect on whether paragraph (b)(2)(ii) or (iii) of this section applies for purposes of identifying the subsection (e) assets of the corporation.

(i) [Reserved]

(j) *Net worth defined.* For purposes of this section, the net worth of a corporation, as of any day, is the amount by which—

(1) The fair market value of all its assets at the close of such day, plus the amount of any distribution (taken into account at fair market value on the date of such distribution) in complete liquidation made by it on or before such day, exceeds

(2) All its liabilities at the close of such day.

In computing the fair market value of all the assets of a corporation at the close of such day, there shall be excluded any amount attributable to money or property received by it during the one-year period ending on such day for stock, or as a contribution to capital or as paid-in surplus, if it appears that there was not a bona fide business purpose for the transaction in respect of which such money or property was received.

(k) *Related person defined*—(1) *General.* For purposes of paragraphs (c)(5) and (g)(2) of this section, the following persons are considered to be related to a shareholder:

(i) If the shareholder is an individual—

(*a*) His spouse, ancestors, and lineal descendants, and

(*b*) Any corporation which is controlled by him.

(ii) If the shareholder is a corporation—

(*a*) A corporation which controls, or is controlled by, such shareholder, and

(*b*) If more than 50 percent in value of the outstanding stock of such shareholder is owned by any person, any corporation more than 50 percent in value of the outstanding stock of which is owned by the same person.

(2) *Control.* For purposes of this paragraph, control means the ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of shares of all classes of stock of the corporation.

(3) *Constructive ownership rules.* In determining the ownership of stock for purposes of this paragraph, the constructive ownership rules of section 267(c) shall apply, except that the family of an individual shall include only his spouse, ancestors, and lineal descendants.

(l) [Reserved]

(m) *Corporations and shareholders not meeting requirements.* In determining whether the provisions of section 341 (a) through (d) apply with respect to any corporation, the fact that such corporation, or such corporation with respect to any of its shareholders, does not meet the requirements of section 341(e)(1), (2), (3), or (4) shall not be taken into account, and such determination shall be made as if section 341(e) had not been enacted.

(n) *Determinations without regard to sections 617(d), 1245, 1250, 1251, 1252, and 1254.* For purposes of this section, the determination of whether gain from the sale or exchange of property would under any provision of chapter 1 of the Code be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b) shall be made without regard to the application of sections 617(d)(1) (relating to gain from dispositions of certain mining property), 1245(a) and 1250(a) (relating to gain from dispositions of certain depreciable property), 1251(c) (relating to gain from the disposition of farm property where farm losses offset nonfarm income), 1252(a) (relating to gain from disposition of farm land), and 1254(a) (relating to gain from disposition of interest in natural resource recapture property).

(o) *Illustrations.* The operation of section 341(e) may be illustrated by the following examples:

Example (1). (i) The outstanding stock of X Corporation is actually owned, on the basis of value, 75 percent by A, 15 percent by B, and 10 percent by C. None of the stock actually owned by one is attributed to another under the constructive ownership rules of paragraph (a)(3) of this section. The corporation owns no property which, in its hands, is property gain from the sale or exchange of which would be considered (without regard to section 617(d), 1245 or 1250, 1251, or 1252) as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b). The corporation owns no property described in section 1231(b) except an apartment house on which the unrealized appreciation is $20,000 and which in the hands of A would be property held primarily for sale to customers in the ordinary course of trade or business. The corporation owns no property of the type described in clause (iv) of section 341(e)(5)(A). The net worth of the corporation is $100,000.

(ii) Although the apartment house in the hands of the corporation is section 1231(b) property, in the hands of A, a more-than-20-percent shareholder, the apartment house would be ordinary-income type property. Therefore, the apartment house is a subsection (e) asset under clause (iii) of section 341(e)(5)(A). Accordingly, since the net unrealized appreciation in subsection (e) assets ($20,000) exceeds 15 percent of net worth ($15,000), the general corporate test is not satisfied and section 341(e) is unavailable to the corporation or its shareholders.

Example (2). (i) Assume the same facts as in *Example (1)*, except that in the hands of B, but not in the hands of A or C, the apartment house would be property held primarily for sale to customers in the ordinary course of trade or business.

(ii) Since B does not own more than 20 percent in value of the outstanding stock, the fact that the apartment house owned by the corporation would, in his hands, be property held primarily for sale to customers in the ordinary course of trade or business does not make the apartment house owned by the corporation a subsection (e) asset. Therefore, since the net unrealized appreciation in subsection (e) assets (zero) does not exceed 15 percent of net worth, the general corporate test is satisfied. C may sell his stock to anyone (other than X Corporation) and will qualify under section 341(e)(1). However, a sale by A of his stock to persons related to A within the meaning of paragraph (k) of this section will not so qualify.

(iii) B, however, since he owns more than 5 percent but not more than 20 percent in value of the outstanding stock, must take into account not only the net unrealized appreciation in subsection (e) assets but also the net unrealized appreciation in any other assets of the corporation which would be subsection (e) assets under section 341(e)(5)(A) if he owned more than 20 percent in value of the outstanding stock. Therefore, since the apartment house owned by the corporation would be, in B's hands, property held primarily for sale to customers in the ordinary course of trade or business, and since the net unrealized appreciation in such property ($20,000) exceeds 15 percent of net worth ($15,000), B does not satisfy the specific shareholder test and therefore cannot avail himself of section 341(e)(1).

Example (3). (i) Assume the same facts as in *Example (1)*, except that in the hands of B, but not in the hands of A or C, the apartment house of the corporation would be property held primarily for sale to customers in the ordinary course of trade or business. Assume further that the shareholders of X Corporation wish to avail themselves of section 333.

(ii) For purposes of section 341(e)(3), section 341(e)(5)(A)(iii) applies in respect of any shareholder who owns more than 5 percent (instead of more than 20 percent) in value of the outstanding stock. Since in the hands of B, a more-than-5-percent shareholder, the apartment house would be held primarily for sale to customers in the ordinary course of trade or business, the corporation's apartment house is a subsection (e) asset. Therefore, since the net unrealized appreciation in subsection (e) assets ($20,000) exceeds 15 percent of net worth ($15,000), no shareholder of the corporation may qualify under section 341(e)(3) for use of section 333. However, if B were not a more-than-5-percent shareholder of the corporation, or if, in his hands, the apartment house would not be held primarily for sale to customers in the ordinary course of trade or business, then all shareholders of the corporation could qualify under section 341(e)(3) for use of section 333 since the apartment house would not be a subsection (e) asset.

Example (4). (i) Assume the same facts as in *Example (1)*, except that in the hands of no shareholder of the corporation would the apartment house be deemed property held primarily for sale to customers in the ordinary course of trade or business (such determination, however, having been made without regard to A's ownership of stock of related corporations). Assume further that (*a*) X Corporation adopts a plan of complete liquidation, (*b*) within the 12-month period beginning on the date of such adoption X Corporation sells substantially all the property held by it on such date and distributes all its assets in complete liquidation, (*c*) following the adoption of such plan, no distribution is made of any property which in the hands of the corporation or in the hands of the distributee is property in respect of which a deduction for exhaustion, wear and tear, obsolescence, amortization, or depletion is allowable, and (*d*) following the adoption of such plan no property is sold or exchanged to A, to a constructive owner of A's stock, or to a person ''related'' (within the meaning of paragraph (k) of this section) to A or such constructive owner.

(ii) Since, under the above-stated facts, the requirements of section 341(e)(4) are satisfied, section 337(a) will apply to sales or exchanges of property by the corporation within the 12-month period beginning on the date of the adoption of the plan of liquidation.

(iii) Any distribution in complete liquidation to B and C, who own 15 and 10 percent, respectively, in value of the outstanding stock, will qualify under section 341(e)(2) because (*a*) by reason of the application of section 341(e)(4), section 337(a) applies to sales or exchanges of property by the corporation, and (*b*) at all times within the 12-month period beginning on the date of the adoption of the plan of complete liquidation the general corporate test is satisfied and B and C each satisfy the specific shareholder test of paragraph (e)(1)(iii)(*a*) of this section.

(iv) Any distribution in complete liquidation to A, who owns 75 percent in value of the outstanding stock, will qualify under section 341(e)(2) if, at all times within the 12-month period beginning on the date of the adoption of the plan of complete liquidation, and after taking into account A's ownership of stock in related corporations in the manner prescribed in paragraph (d) of this section, A satisfies the specific shareholder test of paragraph (e)(1)(iii)(*b*) of this section.

[T.D. 6806, 30 FR 2845, Mar. 5, 1965, as amended by T.D. 7369, 40 FR 29840, July 16, 1975; T.D. 7418, 41 FR 18811, May 7, 1976; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8586, 60 FR 2500, Jan. 10, 1995]

§ 1.341–7 Certain sales of stock of consenting corporations.

(a) *In general.* (1) Under section 341(f)(1), if a corporation consents (in the manner provided in paragraph (b) of this section) to the application of section 341(f)(2) with respect to dispositions by it of its subsection (f) assets (as defined in paragraph (g) of this section), then section 341(a)(1) does not apply to any sales of stock of such consenting corporation (other than sale to such corporation) made by any of its shareholders within the 6-month period beginning on the date on which such consent is filed.

(2) For purposes of section 341(f)(1) and (5)—(i) The term *sale* means a sale of exchange of stock at a gain, but only if such gain would be recognized as long-term capital gain were section 341 not a part of the Code. Thus, a sale or exchange of stock is not a ''sale'' within the meaning of section 341(f)(1) and (5) if there is no gain on the transaction, or if the sale or exchange gives rise to ordinary income under a provision of the Code other than section 341, or if gain on the transaction is not recognized under any provisions of subtitle A of the Code.

(ii) A sale of stock in a corporation does not include any disposition of such stock by a shareholder, if, by reason of section 341(d)(1), section 341(a) could not have applied to that disposition. (Under section 341(d)(1), section 341(a) does not apply except to more–than–5–percent shareholders.) Except as otherwise provided in paragraph (a)(2)(i) of this section, the term ''sale'' included a disposition of stock in a corporation by a more-than-5-percent shareholders described in section 341(d)(1), even though section 341(a) did not apply to the disposition because the corporation was not collapsible or by reason of the application of section 341(d)(2), (3), or (e).

(3) A corporation which consents to the application of section 341(f)(2) does not thereby become noncollapsible, and the fact that a corporation consents to the application of section 341(f)(2) does not affect the determination as to whether it is a collapsible corporation.

(4) For limitation on the application of section 341(f)(1) see section 341(f)(5) and (6) and paragraphs (h) and (j) of this section.

(b) *Statement of consent.* (1) The consent of a corporation referred to in paragraph (a)(1) or (j)(1) of this section shall be given by means of a statement, signed by any officer who is duly authorized to act on behalf of the consenting corporation stating that the corporation consents to have the provisions of section 341(f)(2) apply to any disposition by it of its subsection (f) assets. The statement shall be filed with the district director having jurisdiction over the income tax return of the consenting corporation for the taxable year during which the statement is filed.

(2)(i) The statement shall contain the name, address, and employer identification number of any corporation 5 percent or more in value of the outstanding stock of which is owned directly by the consenting corporation, and of any other corporation connected to the consenting corporation through a chain of stock ownership described in paragraph (j)(4) of this section. The statement shall also indicate where such 5-percent-or-more corporation (or such ''connected'' corporation) has consented within the 6-month period ending on the date on which the statement filed to the application of section 341 (f)(2) with respect to any dispositions of its subsection (f) assets (see paragraph (j) of this section), and, if so, the district director with whom such consent was filed and the date on which such consent was filed.

(ii) If, during the 6-month period beginning on the date on which the statement is filed, the consenting corporation becomes the owner of 5 percent or more in value of the outstanding stock of another corporation or becomes connected to another corporation through a chain of stock ownership described in paragraph (j)(4) of this section, then the consenting corporation shall, within 5 days after such occurrence, notify the district director with whom it filed the statement of the name, address and employer identification number of such corporation.

(3) A consent under section 341(f)(1) may be filed at any time and there is no limit as to the number of such consents that may be filed. If a consent is filed by a corporation under section 341(f)(1) and if a shareholder sells stock (i) in such corporation, or (ii) in another corporation a sale of whose stock is treated under section 341(f)(6) as a sale of stock in such corporation, at any time during the applicable 6-month period, then the consent cannot thereafter be revoked or withdrawn by the corporation. However, a consent may be revoked or withdrawn at any time prior to a sale during the applicable 6-month period. If no sale is made during such period, the consent will have no effect on the corporation. See paragraph (g) of this section.

(c) *Consenting corporation.* (1) A consenting corporation at the time that is filed a consent under section 341(f)(10) shall notify its shareholders that such consent is being filed. In addition, the consenting corporation shall, at the request of any shareholder, promptly supply the shareholder with a copy of the consent.

(2) A consenting corporation shall maintain records adequate to permit identification of its subsection (F) assets.

(d) *Shareholders of consenting corporation.* (1) A shareholder who sells stock in a consenting corporation within the 6-month period beginning on the date on which the consent is filed shall—

(i) Notify the corporation, within 5 days after such sale, of the date on which such sale is made, and

(ii) Attach a copy of the corporation's consent to the shareholder's income tax return for the taxable year in which the sale is made.

(2) If the sale of stock in a consenting corporation is treated under section 341(f)(6) as the sale of stock in any other corporation, the consenting corporation shall notify such other corporation, within 5 days after receiving notification of a sale of its stock, of the date on which such sale was made.

(e) *Recognition of gain under section 341(f)(2).* (1) Under section 341(f)(2), if a subsection (f) asset (as defined in paragraph (g) of this section) is disposed of any time by a consenting corporation, then, except as provided in section 341(f)(3) and paragraph (f) of this section, the amount by which—

(i) The amount realized (in the case of a sale, exchange, or involuntary conversion), or

(ii) The fair market value of such asset (in the case of any other disposition), exceeds the adjusted base of such asset is treated as gain from the sale of exchange of such asset. Such gain is recognized notwithstanding any contrary non-recognition provisions of subtitle A of the Code, but only to the extent such gain is not recognized under any other provisions of subtitle A of the Code (for example, section 1245 (a)(1) or 1250(a)). Gain recognized under section 341(f)(2) with respect to a disposition of a subsection (f) asset has the same character (i.e., ordinary income or capital gain) that such gain would have if it arose from a sale of such asset.

(2) The nonrecognition provisions of subtitle A of the Code which section 341(f)(2) override include, but are not limited to, sections 311(a), 332(c), 336, 337, 351, 361, 371(a), 374(a), 721, 1031, 1033, 1071, and 1081.

(3) In the case of a foreign corporation which files a statement of consent pursuant to paragraph (b) of this section, such statement, in addition to the information required in paragraph (b) of this section, shall also contain a declaration that the corporation consents that any gain upon the disposition of a subsection (f) asset which would otherwise be recognized under section 341(f)(2) will, for purposes of section 882(a)(2), be considered as gross income which is effectively connected with the conduct of a trade or business which is conducted through a permanent establishment within the United States.

(4) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example (1). Corporation X, a consenting corporation, distributes a subsection (f) asset to its shareholders in complete or partial liquidation of the corporation. The asset, at the line of the distribution, is held by the corporation primarily for sale to customers in the ordinary course of business and has an adjusted basis of $1,000 and a fair market value of $2,000. Under section 341(f)(2), the excess of the fair market value of the asset over its adjusted basis, or $1,000 is treated as ordinary income. Assuming the gain is not recognized by corporation X under another provision of the Code, corporation X recognizes the $1,000 gain as ordinary income under section 341(f)(2) even though, in the absence of section 341(f)(2), section 336 would preclude the recognition of such gain.

Example (2). Corporation Y, a consenting corporation, distributes a subsection (f) asset to its shareholders as a dividend. The asset at the time of the distribution is properly described in section 1231 and has an adjusted basis of $6,000 and a fair market value of $8,000. Assuming that no other section of the Code would require recognition of gain, under section 341(f)(2) the excess of the fair market value of the asset over its adjusted basis, or $2,000, is recognized by corporation Y as gain from the sale or exchange of property described in section 1231 even though, in the absence of section 341(f)(2), section 311(a) would preclude the recognition of such gain.

Example (3). Assume the same facts as in *Example (2)* except that the subsection (f) asset is section 1245 property having a ‘‘recomputed basis’’ (as defined in section 1245(a)(2)) or $7,200. Since the recomputed basis of the asset is lower than its fair market value, the excess of the recomputed basis over the adjusted basis, or $1,200, is recognized as ordinary income under section 1245(a)(1). The remaining amount, or $800, is recognized under section 341(f)(2) as gain from the sale or exchange or property described in section 1231.

(5) The provisions of section 341(f)(2) apply whether or not (i) on the date on which a consent is filed or at any time thereafter, the consenting corporation was in fact a collapsible corporation within the meaning of section 341(b), or (ii) on the date of any sale of stock of the consenting corporation, the purchaser of such stock was aware that a consent had been filed under section 341(f)(1) within the 6-month period ending on the date of such sale.

(6) Section 341(f)(2) does not apply to losses. Thus, section 341(f)(2) does not apply if a loss is realized upon a sale, exahnger or involuntary conversion of a subsection (f) asset nor does the section appy to a disposition other than by way of sale, exchange, or involuntary conversion if at the time of the disposition the fair market value of such property is not greater than its adjusted basis.

(7) For purposes of this paragraph, the term ‘‘disposition’’ includes an abandonment or retirement, a gift, a sale in a sale-and-leasback transaction, and a transfer upon the foreclosure of a security interest. Such term, however, does not include a mere transfer of title to a creditor upon creation of a security interest or to a debtor upon termination of a security interest. Thus, for example, a disposition occurs upon a sale of property prusuant to a conditional sales contract even though the seller retains legal title to the propoerty for purposes of security, but a disposition does not occur when the seller ultimately gives up his security interest following payment by the purchaser.

(8) The amount of gain required to be recognized by section 341(f)(2) shall be

determined separately for each subsection (f) asset disposed of by the corporation. For purposes of applying section 341(f)(2), the facts and circumstances of each disposition shall be considered in determining whether the transactions involves more than one subsection (f) asset or involves both subsection (f) and nonsubsection (f) assets. In appropriate cases, several subsection (f) assets may be treated as a single asset as long as it is reasonably clear, from the best estimates obtainable on the basis of all the facts and circumstances, that the amount of gain required to be recognized by section 341(f)(2) is not less than the total gain under section 341(f)(2) whish would be computed separately for each subsection (f) asset.

(9) In the case of a sale, exchange, or involuntary conversion of a subsection (f) asset and a nonsubsection (f) asset in one transaction, the total amount realized upon the disposition shall be allocated between the subsection (f) asset any arm's length agreement between the buyer and the seller will establish the allocation. In the absence of such an agreement, the allocation shall be made by taking into account the appropriate facts and circumstances. Some of the facts and circumstances which shall be taken into account to the extent appropriate included, but are not limited to, a comparision between the subsection (f) asset and all property disposed of in such transaction of (i) the original costs and reproduction costs of construction, erection, or production, (ii) the remaining economic useful life, (ii) state of obsolencence, and (iv) anticipated expenditures to maintain, renovate, or modernize.

(10) See §1.1502–13 for the treatment of gain recognized upon a distribution other than in complete liquidation made by one member of a group which files a consolidated return to another such members.

(f) *Exception for certain tax-free transactions.* (1) Under section 341(f)(3), no gain is taken into account under section 341(f)(2) by a transferor corporation on the transfer of a subsection (f) asset to another corporation (other than a corporation exempt from tax imposed by chapter 1 of the Code) if—

(i) The basis of such asset in the hands of the transferee corporation is determined by reference to its basis in the hands of the transferor by reason of the application of section 332 (relating to distributions in liquidation of an 80–percent-or-more controlled subsidairy corporation), section 351 (relating to transfers to a corporation controlled by the transferor), section 361 (relating to exchanges pursuant to certain reorganizations), section 371(a) (relating to exchanges pursuant to certain receivership and bankruptcy proceedings), or section 374 (a) (relating to exchanges pursuant to certain railroad reorganizations), and

(ii) The transferee corporation agrees (as provided in subparagraph (3) of this paragraph) to have the provisiions of section 341(f)(2) apply to any disposition by it of such asset.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). Corporation M. in exchange for its voting stock worth $20,000 and $1,000 in cash, acquires the entire property of corporation N (an unencumbered apartment building) in a transaction which is described in section 368(a)(2)(B) and which, therefore, qualifies as a reorganization under section 368(a)(1)(C). The apartment building, which in the hands of corporation N. a consenting corporation, is a subsection (f) asset, has an adjusted basis of $15,000 and a fair market value of $21,000. The basis of the apartment house in the hands of corporation M is determined by reference to its basis in the hands of corporation N by reason of the application of section 361. Thus, under section 341(f)(3), if corporation M agrees to have the provisions of section 341(f)(2) apply to any disposition by it of the apartment house, then corporation N will recognize no gain under section 341(f)(2) but will recognize $1,000 gain under section 361(b) (assuming the cash it receives is not distributed in pursuance of the plan of reorganization). However, if corporation M does not so agree, the gain recognized by corporation N will be $6,000, that is, the gain of $1,000 recognized under section 361(b) plus $5,000 gain recognized under section 341(f)(2). In either case, if section 1245, 1250, or 1251 applies, some or all of the gain may be recognized under sections in lieu of sections 341(f)(2) and 361(b).

Example (2). Corporation Y, a consenting corporation, is a wholly owned subsidiary of corporation X. In the complete liquidation of Y it distributes to X a subsection (f) asset which is section 1245 property. The asset at the time of the distribution has an adjusted basis of $10,000, a recomputed basis of $14,000, and a fair market value of $10,000. The basis of the asset in the hands of X is determined by reference to its basis in the hands of corporation Y by reason of the application of section 332. Thus, under section 341(f)(3), if corporation X agrees to have the provisions of section 341(f)(2) apply to any disposition by it of the subsection (f) asset, then Y will recognize no gain under section 341(f)(2) and will recognize no gain under section 1245(a)(1) by reason of the application of section 1245(b)(3). Under section 334(b)(1), the basis of the subsection (f) asset to corporation X will be the same as it would be in the hands of Y, or $10,000. However, if corporation X does not so agree, then under section 341(f)(2) $6,000 (the excess of the fair market value of the asset over its adjusted basis) will be treated as gain from the sale or exchange of the asset. Moreover, under section 1245(a)(1) $4,000 (the excess of the recomputed basis over the adjusted basis) of the $6,000 will be recognized as ordinary income. The basis of the asset to corporation X is $16,000, i.e., the same as it would be in the hands of Y ($10,000) increased in the amount of gain recognized by Y on the distribution ($6,000).

(3) The agreement of a transferee corporation referred to in subparagraph (1) of this paragraph shall be filed, on or before the date on which the subsection (f) assets are transferred, with the district director having jurisdiction over its income tax return for the taxable year during which the transfer is to be made. The agreement shall be signed by any officer who is duly authorized to act on behalf of the transferee corporation (if the transaxtion is one to which section 371(a) or 374(a) applies, the fiduciary for the transferee corporation, in appropriate cases, may sign the agreement) and shall apply to all the subsection (f) assets to be transferred pursuant to the applicable transaction described in section 341(f)(3). The agreement shall identify the transaction by which the subsection (f) assets will be acquired, including the names, addresses, and employer identification numbers of the transferor and transferee corporations, and shall contain a schedule of the subsection (f) assets to be acquired. The agreement shall also state that the transferee corporation (i) agrees to have the provisions of section 341(f)(2) apply to any disposition by it of the subsection (f) assets acquired, and (ii) agrees to maintain records adequate to permit identification of such subsection (f) assets.

(4) The transferor corporation shall attach a copy of the agreement to its income tax return for the taxable year in which the subsection (f) assets are transferred.

(g) *Subsection (f) asset defined.* (1) Under section 341(f)(4), a subsection (f) asset is any property which, as of the date of any sale of stock to which paragraph (a) or (j)(3) of this section applies, is not a capital asset and is property owned by, or subject to a binding contract or an option to acquire held by, the consenting corporation. Land or any interest in real property (other than a security interest) is treated as property which is not a capital asset. Also, unrealized receivables or fees (as defined in section 341(b)(4)) are treated as property which are not capital assets.

(2) If, with respect to any property described in subparagraph (1) of this paragraph, manufacture, construction, or production has been commenced by either the consenting corporation or another person before any date of sale of stock described in subparagraph (1) of this paragraph, a consenting corporation's subsection (f) assets include any property resulting from such manufacture, construction, or production. Thus, for example, if, on the date of any sale of stock within the 6-month period, manufacture, construction, or production has been commended on a tract of land to be used for residential housing or on a television series, the term ''subsection (f) asset'' includes the residential homes of the television tapes resulting from such manufacture, construction, or production by the consenting corporation (or by a transferee corporation which has agreed to the application of section 341(f)(2)). If land or any interest in real property (other than a security interest) is owned or held under an option by the consenting corporation on the date of any sale of stock described in subparagraph (1) of this paragraph, the term ''subsection (f) asset'' includes any improvements resulting from construction with respect to such property (by the consenting corporation or by a transferee corporation which has agreed to the application of section 341(f)(2)) if such

construction is commenced within 2 years after the date of any such sale. The property or improvements resulting from any manufacture, construction, or production is a question to be determined on the basis of the particular facts and circumstances of each individual case. Thus, for example, a building which is a part of an integrated project is a subsection (f) asset if construction of the project commenced before the date of sale or within 2 years thereafter even if construction of the building commenced more than 2 years thereafter. Similarly a television tape which is part of a series is a subsection (i) asset if production of the series was commenced on the date of sale even if production of the tape commenced after the sale.

(3) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example (1). Corporation X files a consent to the application of section 341(f)(2) on January 1, 1985. Shareholder A owns 100 percent of the outstanding stock of the consenting corporation on January 1, 1965, and sells 5 percent of the stock on January 2, 1965, 10 percent on February 10, 1963, and 1 percent on May 1, 1965. No other sales of X stock were made during the 6-month period beginning on January 1, 1965. On such date X owns an apartment building and on March 1 X purchases an office building. X's subsection (f) assets include the apartment building owned on January 1 and the office building purchased on March 1.

Example (2). Assume the same facts as in *Example (1)* except that on January 1, 1965, X also owns a tract of raw land. On April 1, 1965, construction of a residential housing project is commenced on the tract of land. Corporation X's subsection (i) assets will include the tract of land plus the resulting improvements to the land. This result would not be changed if construction of the residential housing project were not commenced until July 1, 1966, since the construction would have been commenced within 2 years after May 1, 1965.

Example (3). Corporation X files a consent to the application of section 341(f)(2) on January 1, 1965. Shareholder B owns 100 percent of the outstanding stock of the consenting corporation on January 1, 1965, and sells 10 percent of the stock on June 1, 1965. On April 1, 1965, Y acquires an option to purchase a motion picture when completed. On May 1, 1965, production is started on the motion picture. On February 1, 1967, production is completed, and Y exercises its option. Y holds the option and the motion picture for use in its trade or business. Y's subsection (f) assets initially include the option and ultimately include the motion picture. However the exercise of the option is not a disposition of the option within the meaning of section 341(f)(2).

(h) *Five-year limitation as to shareholder.* Under section 341(f)(5), section 341(f)(1) does not apply to the sale of stock of a consenting corporation if, during the 5-year period ending on the date of such sale, such shareholder (or any person related to such shareholder within the meaning of section 341(e)(8)(A)) made a sale (as defined in paragraph (a)(2) of this section) of any stock of another consenting corporation within any 6-month period beginning on a date on which a consent was filed under section 341(f)(1) by such other corporation. Section 341(f)(5) does not prevent a shareholder of a consenting corporation from receiving the benefit of section 341(f)(1) on the sale of additional shares of the stock of the same consenting corporation.

(i) [Reserved]

(j) *Special rule for stock ownership in other corporations*—(1) Section 341(f)(6) provides a special rule applicable to a consenting corporation which owns 5 percent or more in value of the outstanding stock of another corporation. In such a case, a consent filed by the consenting corporation shall not be valid with respect to a sale of its stock during the applicable 6-month period unless each corporation, 5 percent or more in value of the outstanding stock of which is owned by the consenting corporation on the date of such sale, file (within the 6-month period ending on the date of such sale) a valid consent under section 341(f)(1) with respect to sales of its own stock.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: Corporation X files a consent under section 341(f)(1) on November 1, 1965. On January 1, 1966, the date on which a shareholder of corporation X sells stock of X. X owns 80 percent in value of the outstanding stock of corporation Y. In order for the consent filed by corporation X to be valid with respect to the sale of its stock on January 1, 1966, corporation Y must have filed, during the 6-month period ending on January 1, 1966, a valid consent under section 341(f)(1) with respect to sales of its stock.

(3) For purposes of applying section 341(f)(4) (relating to the definition of a subsection (f) asset) to a corporation 5 percent or more in value of the outstanding stock of which is owned by the consenting corporation, a sale of stock of the consenting corporation to which section 341(f)(1) applies shall be treated as a sale of stock of such other corporation. Thus, in the example in subparagraph (2) of this paragraph, the subsection (f) assets of corporation Y would include property described in section 341(f)(4) owned by or held under an option by corporation Y on January 1, 1966.

(4) In the case of a chain of corporations connected by the 5-percent ownership requirement described in subparagraph (1) of this paragraph, rules similar to the rules described in subparagraphs (2) and (3) of this paragraph shall apply. Thus, in the example in subparagraph (2) of this paragraph, if corporation Y owned 5 percent or more of the stock of corporation Z on January 1, 1966, then Z must have filed a valid consent during the 6-month period ending January 1, 1966, in order for the consent filed by X to be valid with respect to the sale of its stock on January 1, 1966. In such case any of stock of either X or Y is treated as a sale of stock of Z for purposes of applying section 341(f)(4) to Z.

(5) If a corporation is a member of an affiliated group (as defined in section 1504(a)) that files a consolidated return, a corporation will be considered to have filed a consent if a consent is filed on its behalf by the common parent under § 1.1502–77(a).

(k) *Effective date.* Paragraphs (b), (c), (e)(3), and (f)(3) of this section apply only with respect to statements and notifications filed more than 30 days after July 6, 1977. Paragraph (d) applies only with respect to sales of stock made more than 30 days after July 6, 1977. All other provisions of this section appy with respect to transactions after August 22, 1964.

[T.D. 7655, 44 FR 68460, Nov. 29, 1979; 45 FR 17982, Mar. 20, 1980; 45 FR 20464, Mar. 28, 1980; T.D. 8597, 60 FR 36679, July 18, 1995]

§ 1.342–1 General.

The determination of whether a foreign corporation was a foreign personal holding company with respect to a taxable year beginning on or before, and ending after August 26, 1937, shall be made under section 331 of the Revenue Act of 1936 (50 Stat. 818) and the regulations thereunder. For the purpose of section 342(a), a liquidation may be completed before the actual dissolution of the liquidating corporation. However, no liquidation shall be considered as completed until the liquidating corporation and the receiver (or trustees in liquidation) are finally divested of all the property, whether tangible or intangible.

DEFINITION

§ 1.346–1 Partial liquidation.

(a) *General.* This section defines a partial liquidation. If amounts are distributed in partial liquidation such amounts are treated under section 331(a)(2) as received in part or full payment in exchange for the stock. A distribution is treated as in partial liquidation of a corporation if:

(1) The distribution is one of a series of distributions in redemption of all of the stock of the corporation pursuant to a plan of complete liquidation, or

(2) The distribution:

(i) Is not essentially equivalent to a dividend,

(ii) Is in redemption of a part of the stock of the corporation pursuant to a plan, and

(iii) Occurs within the taxable year in which the plan is adopted or within the succeeding taxable year.

An example of a distribution which will qualify as a partial liquidation under subparagraph (2) of this paragraph and section 346(a) is a distribution resulting from a genuine contraction of the corporate business such as the distribution of unused insurance proceeds recovered as a result of a fire which destroyed part of the business causing a cessation of a part of its activities. On the other hand, the distribution of funds attributable to a reserve for an expansion program which has been abandoned does not qualify as a partial liquidation within the meaning of section 346(a). A distribution to which section 355 applies (or so much of section 356 as relates to section 355) is not a distribution in partial liquidation within the meaning of section 346(a).

(b) *Special requirements on termination of business.* A distribution which occurs within the taxable year in which the plan is adopted or within the succeeding taxable year and which meets the requirements of subsection (b) of section 346 falls within paragraph (a)(2) of this section and within section 346(a)(2). The requirements which a distribution must meet to fall within subsection (b) of section 346 are:

(1) Such distribution is attributable to the corporation's ceasing to conduct, or consists of assets of, a trade or business which has been actively conducted throughout the five-year period immediately before the distribution, which trade or business was not acquired by the corporation within such period in a transaction in which gain or loss was recognized in whole or in part, and

(2) Immediately after such distribution by the corporation it is actively engaged in the conduct of a trade or business, which trade or business was actively conducted throughout the five-year period ending on the date of such distribution and was not acquired by the corporation within such period in a transaction in which gain or loss was recognized in whole or in part.

A distribution shall be treated as having been made in partial liquidation pursuant to section 346(b) if it consists of the proceeds of the sale of the assets of a trade or business which has been actively conducted for the five-year period and has been terminated, or if it is a distribution in kind of the assets of such a business, or if it is a distribution in kind of some of the assets of such a business and of the proceeds of the sale of the remainder of the assets of such a business. In general, a distribution which will qualify under section 346(b) may consist of, but is not limited to:

(i) Assets (other than inventory or property described in subdivision (ii) of this subparagraph) used in the trade or business throughout the five-year period immediately before the distribution (for this purpose an asset shall be considered used in the trade or business during the period of time the asset which it replaced was so used), or

(ii) Proceeds from the sale of assets described in subdivision (i) of this subparagraph, and, in addition,

(iii) The inventory of such trade or business or property held primarily for sale to customers in the ordinary course of business, if:

(*a*) The items constituting such inventory or such property were substantially similar to the items constituting such inventory or property during the five-year period immediately before the distribution, and

(*b*) The quantity of such items on the date of distribution was not substantially in excess of the quantity of similar items regularly on hand in the conduct of such business during such five-year period, or

(iv) Proceeds from the sale of inventory or property described in subdivision (iii) of this subparagraph, if such inventory or property is sold in bulk in the course of termination of such trade or business and if with respect to such inventory the conditions of subdivision (iii)(*a*) and (*b*) of this subparagraph would have been met had such inventory or property been distributed on the date of such sale.

(c) *Active conduct of a trade or business.* For the purpose of section 346(b)(1), a corporation shall be deemed to have actively conducted a trade or business immediately before the distribution, if:

(1) In the case of a business the assets of which have been distributed in kind, the business was operated by such corporation until the date of distribution, or

(2) In the case of a business the proceeds of the sale of the assets of which are distributed, such business was actively conducted until the date of sale and the proceeds of such sale were distributed as soon thereafter as reasonably possible.

The term *active conduct of a trade or business* shall have the same meaning in this section as in paragraph (c) of §1.355–1.

§1.346–2 Treatment of certain redemptions.

If a distribution in a redemption of stock qualifies as a distribution in part or full payment in exchange for the stock under both section 302(a) and this section, then only this section shall be applicable. None of the limitations of section 302 shall be applicable to such redemption.

§ 1.346–3 Effect of certain sales.

The determination of whether assets sold in connection with a partial liquidation are sold by the distributing corporation or by the shareholder is a question of fact to be determined under the facts and circumstances of each case.

CORPORATE ORGANIZATIONS AND REORGANIZATIONS

CORPORATE ORGANIZATIONS

§ 1.351–1 Transfer to corporation controlled by transferor.

(a)(1) Section 351(a) provides, in general, for the nonrecognition of gain or loss upon the transfer by one or more persons of property to a corporation solely in exchange for stock or securities in such corporation, if immediately after the exchange, such person or persons are in control of the corporation to which the property was transferred. As used in section 351, the phrase ''one or more persons'' includes individuals, trusts, estates, partnerships, associations, companies, or corporations (see section 7701(a)(1)). To be in control of the transferee corporation, such person or persons must own immediately after the transfer stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of such corporation (see section 368(c)). In determining control under this section, the fact that any corporate transferor distributes part or all of the stock which it receives in the exchange to its shareholders shall not be taken into account. The phrase ''immediately after the exchange'' does not necessarily require simultaneous exchanges by two or more persons, but comprehends a situation where the rights of the parties have been previously defined and the execution of the agreement proceeds with an expedition consistent with orderly procedure. For purposes of this section—

(i) Stock or securities issued for services rendered or to be rendered to or for the benefit of the issuing corporation will not be treated as having been issued in return for property, and

(ii) Stock or securities issued for property which is of relatively small value in comparison to the value of the stock and securities already owned (or to be received for services) by the person who transferred such property, shall not be treated as having been issued in return for property if the primary purpose of the transfer is to qualify under this section the exchanges of property by other persons transferring property.

For the purpose of section 351, stock rights or stock warrants are not included in the term ''stock or securities.''

(2) The application of section 351(a) is illustrated by the following examples:

Example (1). C owns a patent right worth $25,000 and D owns a manufacturing plant worth $75,000. C and D organize the R Corporation with an authorized capital stock of $100,000. C transfers his patent right to the R Corporation for $25,000 of its stock and D transfers his plant to the new corporation for $75,000 of its stock. No gain or loss to C or D is recognized.

Example (2). B owns certain real estate which cost him $50,000 in 1930, but which has a fair market value of $200,000 in 1955. He transfers the property to the N Corporation in 1955 for 78 percent of each class of stock of the corporation having a fair market value of $200,000, the remaining 22 percent of the stock of the corporation having been issued by the corporation in 1940 to other persons for cash. B realized a taxable gain of $150,000 on this transaction.

Example (3). E, an individual, owns property with a basis of $10,000 but which has a fair market value of $18,000. E also had rendered services valued at $2,000 to Corporation F. Corporation F has outstanding 100 shares of common stock all of which are held by G. Corporation F issues 400 shares of its common stock (having a fair market value of $20,000) to E in exchange for his property worth $18,000 and in compensation for the services he has rendered worth $2,000. Since immediately after the transaction, E owns 80 percent of the outstanding stock of Corporation F, no gain is recognized upon the exchange of the property for the stock. However, E realized $2,000 of ordinary income as compensation for services rendered to Corporation F.

(3) *Underwritings of stock*—(i) *In general.* For the purpose of section 351, if a

person acquires stock of a corporation from an underwriter in exchange for cash in a qualified underwriting transaction, the person who acquires stock from the underwriter is treated as transferring cash directly to the corporation in exchange for stock of the corporation and the underwriter is disregarded. A qualified underwriting transaction is a transaction in which a corporation issues stock for cash in an underwriting in which either the underwriter is an agent of the corporation or the underwriter's ownership of the stock is transitory.

(ii) *Effective date.* This paragraph (a)(3) is effective for qualified underwriting transactions occurring on or after May 1, 1996.

(b)(1) Where property is transferred to a corporation by two or more persons in exchange for stock or securities, as described in paragraph (a) of this section, it is not required that the stock and securities received by each be substantially in proportion to his interest in the property immediately prior to the transfer. However, where the stock and securities received are received in disproportion to such interest, the entire transaction will be given tax effect in accordance with its true nature, and in appropriate cases the transaction may be treated as if the stock and securities had first been received in proportion and then some of such stock and securities had been used to make gifts (section 2501 and following), to pay compensation (section 61(a)(1)), or to satisfy obligations of the transferor of any kind.

(2) The application of paragraph (b)(1) of this section may be illustrated as follows:

Example (1). Individuals A and B, father and son, organize a corporation with 100 shares of common stock to which A transfers property worth $8,000 in exchange for 20 shares of stock, and B transfers property worth $2,000 in exchange for 80 shares of stock. No gain or loss will be recognized under section 351. However, if it is determined that A in fact made a gift to B, such gift will be subject to tax under section 2501 and following. Similarly, if B had rendered services to A (such services having no relation to the assets transferred or to the business of the corporation) and the disproportion in the amount of stock received constituted the payment of compensation by A to B, B will be taxable upon the fair market value of the 60 shares of stock received as compensation for services rendered, and A will realize gain or loss upon the difference between the basis to him of the 60 shares and their fair market value at the time of the exchange.

Example (2). Individuals C and D each transferred, to a newly organized corporation, property having a fair market value of $4,500 in exchange for the issuance by the corporation of 45 shares of its capital stock to each transferor. At the same time, the corporation issued to E, an individual, 10 shares of its capital stock in payment for organizational and promotional services rendered by E for the benefit of the corporation. E transferred no property to the corporation. C and D were under no obligation to pay for E's services. No gain or loss is recognized to C or D. E received compensation taxable as ordinary income to the extent of the fair market value of the 10 shares of stock received by him.

(c)(1) The general rule of section 351 does not apply, and consequently gain or loss will be recognized, where property is transferred to an investment company after June 30, 1967. A transfer of property after June 30, 1967, will be considered to be a transfer to an investment company if—

(i) The transfer results, directly or indirectly, in diversification of the transferors' interests, and

(ii) The transferee is (*a*) a regulated investment company, (*b*) a real estate investment trust, or (*c*) a corporation more than 80 percent of the value of whose assets (excluding cash and nonconvertible debt obligations from consideration) are held for investment and are readily marketable stocks or securities, or interests in regulated investment companies or real estate investment trusts.

(2) The determination of whether a corporation is an investment company shall ordinarily be made by reference to the circumstances in existence immediately after the transfer in question. However, where circumstances change thereafter pursuant to a plan in existence at the time of the transfer, this determination shall be made by reference to the later circumstances.

(3) Stocks and securities will be considered readily marketable if (and only if) they are part of a class of stock or

securities which is traded on a securities exchange or traded or quoted regularly in the over-the-counter market. For purposes of subparagraph (1)(ii)(*c*) of this paragraph, the term ''readily marketable stocks or securities'' includes convertible debentures, convertible preferred stock, warrants, and other stock rights if the stock for which they may be converted or exchanged is readily marketable. Stocks and securities will be considered to be held for investment unless they are (i) held primarily for sale to customers in the ordinary course of business, or (ii) used in the trade or business of banking, insurance, brokerage, or a similar trade or business.

(4) In making the determination required under subparagraph (1)(ii)(*c*) of this paragraph, stock and securities in subsidiary corporations shall be disregarded and the parent corporation shall be deemed to own its ratable share of its subsidiaries' assets. A corporation shall be considered a subsidiary if the parent owns 50 percent or more of (i) the combined voting power of all classes of stock entitled to vote, or (ii) the total value of shares of all classes of stock outstanding.

(5) A transfer ordinarily results in the diversification of the transferors' interests if two or more persons transfer nonidentical assets to a corporation in the exchange. For this purpose, if any transaction involves one or more transfers of nonidentical assets which, taken in the aggregate, constitute an insignificant portion of the total value of assets transfered, such transfers shall be disregarded in determining whether diversification has occurred. If there is only one transferor (or two or more transferors of identical assets) to a newly organized corporation, the transfer will generally be treated as not resulting in diversification. If a transfer is part of a plan to achieve diversification without recognition of gain, such as a plan which contemplates a subsequent transfer, however delayed, of the corporate assets (or of the stock or securities received in the earlier exchange) to an investment company in a transaction purporting to qualify for nonrecognition treatment, the original transfer will be treated as resulting in diversification.

(6)(i) For purposes of paragraph (c)(5) of this section, a transfer of stocks and securities will not be treated as resulting in a diversification of the transferors' interests if each transferor transfers a diversified portfolio of stocks and securities. For purposes of this paragraph(c)(6), a portfolio of stocks and securities is diversified if it satisfies the 25 and 50-percent tests of section 368(a)(2)(F)(ii), applying the relevant provisions of section 368(a)(2)(F). However, Government securities are included in total assets for purposes of the denominator of the 25 and 50-percent tests (unless the Government securities are acquired to meet the 25 and 50-percent tests), but are not treated as securities of an issuer for purposes of the numerator of the 25 and 50-percent tests.

(ii) Paragraph (c)(6)(i) of this section is effective for transfers completed on or after May 2, 1996. Transfers of diversified (within the meaning of paragraph (c)(6)(i) of this section), but nonidentical, portfolios of stocks and securities completed before May 2, 1996, may be treated either—

(A) Consistent with paragraph (c)(6)(i) of this section; or

(B) As resulting in diversification of the transferors' interests.

(7) The application of subparagraph (5) of this paragraph may be illustrated as follows:

Example (1). Individuals A, B, and C organize a corporation with 101 shares of common stock. A and B each transfers to it $10,000 worth of the only class of stock of corporation X, listed on the New York Stock Exchange, in exchange for 50 shares of stock. C transfers $200 worth of readily marketable securities in corporation Y for one share of stock. In determining whether or not diversification has occurred, C's participation in the transaction will be disregarded. There is, therefore, no diversification, and gain or loss will not be recognized.

Example (2). A, together with 50 other transferors, organizes a corporation with 100 shares of stock. A transfers $10,000 worth of stock in corporation X, listed on the New York Stock Exchange, in exchange for 50 shares of stock. Each of the other 50 transferors transfers $200 worth of readily marketable securities in corporations other than X in exchange for one share of stock. In determining whether or not diversification has occurred, all transfers will be taken into account. Therefore, diversification is present, and gain or loss will be recognized.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6942, 32 FR 20977, Dec. 29, 1967; T.D. 8665, 61 FR 19189, May 1, 1996; T.D. 8663, 61 FR 19545, May 2, 1996]

§1.351–2 Receipt of property.

(a) If an exchange would be within the provisions of section 351(a) if it were not for the fact that the property received in exchange consists not only of property permitted by such subsection to be received without the recognition of gain, but also of other property or money, then the gain, if any, to the recipient shall be recognized, but in an amount not in excess of the sum of such money and the fair market value of such other property. No loss to the recipient shall be recognized.

(b) See section 357 and the regulations pertaining to that section for applicable rules as to the treatment of liabilities as ‘‘other property’’ in cases subject to section 351, where another party to the exchange assumes a liability, or acquires property subject to a liability.

(c) See sections 358 and 362 and the regulations pertaining to those sections for applicable rules with respect to the determination of the basis of stock, securities, or other property received in exchanges subject to section 351.

(d) See part I (section 301 and following), subchapter C, chapter 1 of the Code, and the regulations thereunder for applicable rules with respect to the taxation of dividends where a distribution by a corporation of its stock or securities in connection with an exchange subject to section 351(a) has the effect of the distribution of a taxable dividend.

§1.351–3 Records to be kept and information to be filed.

(a) Every person who received the stock or securities of a controlled corporation, or other property as part of the consideration, in exchange for property under section 351, shall file with his income tax return for the taxable year in which the exchange is consummated a complete statement of all facts pertinent to such exchange, including—

(1) A description of the property transferred, or of his interest in such property, together with a statement of the cost or other basis thereof, adjusted to the date of transfer.

(2) With respect to stock of the controlled corporation received in the exchange, a statement of—

(i) The kind of stock and preferences, if any;

(ii) The number of shares of each class received; and

(iii) The fair market value per share of each class at the date of the exchange.

(3) With respect to securities of the controlled corporation received in the exchange, a statement of—

(i) The principal amount and terms; and

(ii) The fair market value at the date of exchange.

(4) The amount of money received, if any.

(5) With respect to other property received—

(i) A complete description of each separate item;

(ii) The fair market value of each separate item at the date of exchanges; and

(iii) In the case of a corporate shareholder, the adjusted basis of the other property in the hands of the controlled corporation immediately before the distribution of such other property to the corporate shareholder in connection with the exchange.

(6) With respect to liabilities of the transferors assumed by the controlled corporation, a statement of—

(i) The nature of the liabilities;

(ii) When and under what circumstances created;

(iii) The corporate business reason for assumption by the controlled corporation; and

(iv) Whether such assumption eliminates the transferor’s primary liability.

(b) Every such controlled corporation shall file with its income tax return for the taxable year in which the exchange is consummated—

(1) A complete description of all the property received from the transferors.

(2) A statement of the cost or other basis thereof in the hands of the transferors adjusted to the date of transfer.

(3) The following information with respect to the capital stock of the controlled corporation—

(i) The total issued and outstanding capital stock immediately prior to and immediately after the exchange, with a complete description of each class of stock;

(ii) The classes of stock and number of shares issued to each transferor in the exchange, and the number of shares of each class of stock owned by each transferor immediately prior to and immediately after the exchange, and

(iii) The fair market value of the capital stock as of the date of exchange which was issued to each transferor.

(4) The following information with respect to securities of the controlled corporation—

(i) The principal amount and terms of all securities outstanding immediately prior to and immediately after the exchange,

(ii) The principal amount and terms of securities issued to each transferor in the exchange, with a statement showing each transferor's holdings of securities of the controlled corporation immediately prior to and immediately after the exchange,

(iii) The fair market value of the securities issued to the transferors on the date of the exchange, and

(iv) A statement as to whether the securities issued in the exchange are subordinated in any way to other claims against the controlled corporation.

(5) The amount of money, if any, which passed to each of the transferors in connection with the transaction.

(6) With respect to other property which passed to each transferor—

(i) A complete description of each separate item;

(ii) The fair market value of each separate item at the date of exchange, and

(iii) In the case of a corporate transferor, the adjusted basis of each separate item in the hands of the controlled corporation immediately before the distribution of such other property to the corporate transferor in connection with the exchange.

(7) The following information as to the transferor's liabilities assumed by the controlled corporation in the exchange—

(i) The amount and a description thereof,

(ii) When and under what circumstances created, and

(iii) The corporate business reason or reasons for assumption by the controlled corporation.

(c) Permanent records in substantial form shall be kept by every taxpayer who participates in the type of exchange described in section 351, showing the information listed above, in order to facilitate the determination of gain or loss from a subsequent disposition of stock or securities and other property, if any, received in the exchange.

EFFECTS ON SHAREHOLDERS AND SECURITY HOLDERS

§ 1.354–1 Exchanges of stock and securities in certain reorganizations.

(a) Section 354 provides that under certain circumstances no gain or loss is recognized to a shareholder who surrenders his stock in exchange for other stock or to a security holder who surrenders his securities in exchange for stock. Section 354 also provides that under certain circumstances a security holder may surrender securities and receive securities in the same principal amount or in a lesser principal amount without the recognition of gain or loss to him. The exchanges to which section 354 applies must be pursuant to a plan of reorganization as provided in section 368(a) and the stock and securities surrendered as well as the stock and securities received must be those of a corporation which is a party to the reorganization. Section 354 does not apply to exchanges pursuant to a reorganization described in section 368(a)(1)(D) unless the transferor corporation—

(1) Transfers all or substantially all of its assets to a single corporation, and

(2) Distributes all of its remaining properties (if any) and the stock, securities and other properties received in the exchange to its shareholders or security holders in pursuance of the plan

of reorganization. The fact that properties retained by the transferor corporation, or received in exchange for the properties transferred in the reorganization, are used to satisfy existing liabilities not represented by securities and which were incurred in the ordinary course of business before the reorganization does not prevent the application of section 354 to an exchange pursuant to a plan of reorganization defined in section 368(a)(1)(D).

(b) Except as provided in section 354 (c) and (d), section 354 is not applicable to an exchange of stock or securities if a greater principal amount of securities is received than the principal amount of securities the recipient surrenders, or if securities are received and the recipient surrenders no securities. See, however, section 356 and regulations pertaining to such section. See also section 306 with respect to the receipt of preferred stock in a transaction to which section 354 is applicable.

(c) An exchange of stock or securities shall be subject to section 354(a)(1) even though—

(1) Such exchange is not pursuant to a plan of reorganization described in section 368(a), and

(2) The principal amount of the securities received exceeds the principal amount of the securities surrendered or if securities are received and no securities are surrendered—

if such exchange is pursuant to a plan of reorganization for a railroad corporation as defined in section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)) and is approved by the Interstate Commerce Commission under section 77 of such act or under section 20b of the Interstate Commerce Act (49 U.S.C. 20b) as being in the public interest. Section 354 is not applicable to such exchanges if there is received property other than stock or securities. See, however, section 356 and regulations pertaining to such section.

(d) The rules of section 354 may be illustrated by the following examples:

Example 1. Pursuant to a reorganization under section 368(a) to which Corporations T and W are parties, A, a shareholder in Corporation T, surrenders all his common stock in Corporation T in exchange for common stock of Corporation W. No gain or loss is recognized to A.

Example 2. Pursuant to a reorganization under section 368(a) to which Corporations X and Y (which are not railroad corporations) are parties, B, a shareholder in Corporation X, surrenders all his stock in X for stock and securities in Y. Section 354 does not apply to this exchange. See, however, section 356.

Example 3. C, a shareholder in Corporation Z (which is not a railroad corporation), surrenders all his stock in Corporation Z in exchange for securities in Corporation Z. Whether or not this exchange is in connection with a recapitalization under section 368(a)(1)(E), section 354 does not apply. See, however, section 302.

Example 4. The facts are the same as in *Example 3* of this paragraph (d), except that C receivies solely rights to acquire stock in Corporation Z. Section 354 does not apply.

(e) Except as provided in §1.356–6T, for purposes of section 354, the term *securities* includes rights issued by a party to the reorganization to acquire its stock. For purposes of this section and section 356(d)(2)(B), a right to acquire stock has no principal amount. For this purpose, rights to acquire stock has the same meaning as it does under sections 305 and 317(a). Other Internal Revenue Code provisions governing the treatment of rights to acquire stock may also apply to certain exchanges occurring in connection with a reorganization. See, for example, sections 83 and 421 through 424 and the regulations thereunder. This paragraph (e) applies to exchanges occurring on or after March 9, 1998.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7616, 44 FR 26869, May 8, 1979; T.D. 8752, 63 FR 410, Jan. 6, 1998]

§1.355–0 In order to facilitate the use of §§1.355–1 through 1.355–6, this section lists the paragraphs, subparagraphs, and subdivisions in those sections.

§1.355–1 DISTRIBUTION OF STOCK AND SECURITIES OF A CONTROLLED CORPORATION.

(a) Effective date of certain sections.

(b) Application of section.

§1.355–2 LIMITATIONS.

(a) Property distributed.

(b) Independent business purpose.

(1) Independent business purpose requirement.

(2) Corporate business purpose.

(3) Business purpose for distribution.

(4) Business purpose as evidence of nondevice.

(5) Examples.

(c) Continuity of interest requirement.
(1) Requirement.
(2) Examples.
(d) Device for distribution of earnings and profits.
(1) In general.
(2) Device factors.
(i) In general.
(ii) Pro rata distribution.
(iii) Subsequent sale or exchange of stock.
(A) In general.
(B) Sale or exchange negotiated or agreed upon before the distribution.
(C) Sale or exchange not negotiated or agreed upon before the distribution.
(D) Negotiated or agreed upon before the distribution.
(E) Exchange in pursuance of a plan of reorganization.
(iv) Nature and use of assets.
(A) In general.
(B) Assets not used in a trade or business meeting the requirement of section 355(b).
(C) Related function.
(3) Nondevice factors.
(i) In general.
(ii) Corporate business purpose.
(iii) Distributing corporation publicly traded and widely held.
(iv) Distribution to domestic corporate shareholders.
(4) Examples.
(5) Transactions ordinarily not considered as a device.
(i) In general.
(ii) Absence of earnings and profits.
(iii) Section 303(a) transactions.
(iv) Section 302(a) transactions.
(v) Examples.
(e) Stock and securities distributed.
(1) In general.
(2) Additional rules.
(f) Principal amount of securities.
(1) Securities received.
(2) Only stock received.
(g) Period of ownership.
(1) Other property.
(2) Example.
(h) Active conduct of a trade or business.
§ 1.355–3 ACTIVE CONDUCT OF A TRADE OR BUSINESS.
(a) General requirements.
(1) Application of section 355.
(2) Examples.
(b) Active conduct of a trade or business defined.
(1) In general.
(2) Active conduct or a trade or business immediately after distribution.
(i) In general.
(ii) Trade or business.
(iii) Active conduct.
(iv) Limitations.
(3) Active conduct for five-year period preceding distribution.
(4) Special rules for acquisition of a trade or business (Prior to the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).
(i) In general.
(ii) Example.
(iii) Gain or loss recognized in certain transactions.
(iv) Affiliated group.
(5) Special rules for acquisition of a trade or business (After the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).
(c) Examples.
§ 1.355–4 NON PRO RATA DISTRIBUTIONS, ETC.
§ 1.355–5 RECORDS TO BE KEPT AND INFORMATION TO BE FILED.
§ 1.355–6 [RESERVED]

[T.D. 8238, 54 FR 289, Jan. 5, 1989]

§ 1.355–1 Distribution of stock and securities of a controlled corporation.

(a) *Effective date of certain sections.* Sections 1.355–1 through 1.355–4 apply to transactions occurring after February 6, 1989. For transactions occurring on or before that date, see 26 CFR 1.355–1 through 1.355–4 (revised as of April 1, 1987). Sections 1.355–1 through 1.355–4 do not reflect the amendments to section 355 made by the Revenue Act of 1987 and the Technical and Miscellaneous Revenue Act of 1988.

(b) *Application of section.* Section 355 provides for the separation, without recognition of gain or loss to (or the inclusion in income of) the shareholders and security holders, of one or more existing businesses formerly operated, directly or indirectly, by a single corporation (the ‘‘distributing corporation’’). It applies only to the separation of existing businesses that have been in active operation for at least five years (or a business that has been in active operation for at least five years into separate businesses), and which, in general, have been owned, directly or indirectly, for at least five years by the distributing corporation. A separation is achieved through the distribution by the distributing corporation of stock, or stock and securities, of one or more subsidiaries (the ‘‘controlled corporations’’) to its shareholders with respect to its stock or to its security holders in exchange for its securities. The controlled corporations may be preexisting or newly created subsidiaries. Throughout the regulations under section 355, the term *distribution* refers to a distribution by the distributing corporation of stock, or stock and securities, of one or more controlled corporations, unless the context indicates otherwise. Section 355 contemplates the continued operation of the business or businesses existing prior to the separation. See §1.355–4 for types of distributions that may qualify under section 355, including pro rata distributions and non pro rata distributions.

(c) *Stock rights.* Except as provided in §1.356–6T, for purposes of section 355, the term *securities* includes rights issued by the distributing corporation or the controlled corporation to acquire the stock of that corporation. For purposes of this section and section 356(d)(2)(B), a right to acquire stock has no principal amount. For this purpose, rights to acquire stock has the same meaning as it does under sections 305 and 317(a). Other Internal Revenue Code provisions governing the treatment of rights to acquire stock may also apply to certain distributions occurring in connection with a transaction described in section 355. See, for example, sections 83 and 421 through 424 and the regulations thereunder. This paragraph (c) applies to distributions occurring on or after March 9, 1998.

[T.D. 8238, 54 FR 289, Jan. 5, 1989, as amended by T.D. 8752, 63 FR 410, Jan. 6, 1998]

§1.355–2 Limitations.

(a) *Property distributed.* Section 355 applies to a distribution only if the property distributed consists solely of stock, or stock and securities, of a controlled corporation. If additional property (including an excess principal amount of securities received over securities surrendered) is received, see section 356.

(b) *Independent business purpose*—(1) *Independent business purpose requirement.* Section 355 applies to a transaction only if it is carried out for one or more corporate business purposes. A transaction is carried out for a corporate business purpose if it is motivated, in whole or substantial part, by one or more corporate business purposes. The potential for the avoidance of Federal taxes by the distributing or controlled corporations (or a corporation controlled by either) is relevant in determining the extent to which an existing corporate business purpose motivated the distribution. The principal reason for this business purpose requirement is to provide nonrecognition treatment only to distributions that are incident to readjustments of corporate structures required by business exigencies and that effect only readjustments of continuing interests in property under modified corporate forms. This business purpose requirement is independent of the other requirements under section 355.

(2) *Corporate business purpose.* A corporate business purpose is a real and substantial non Federal tax purpose germane to the business of the distributing corporation, the controlled corporation, or the affiliated group (as defined in §1.355–3(b)(4)(iv)) to which the distributing corporation belongs. A purpose of reducing non Federal taxes is not a corporate business purpose if (i) the transaction will effect a reduction in both Federal and non Federal taxes because of similarities between Federal tax law and the tax law of the other jurisdiction and (ii) the reduction of Federal taxes is greater than or substantially coextensive with the reduction of non Federal taxes. See *Examples (7)* and *(8)* of paragraph (b)(5) of this section. A shareholder purpose (for example, the personal planning purposes of a shareholder) is not a corporate business purpose. Depending upon the facts of a particular case, however, a shareholder purpose for a transaction may be so nearly coextensive with a corporate business purpose as to preclude any distinction between them. In such a case, the transaction is carried out for one or more corporate business purposes. See *Example (2)* of paragraph (b)(5) of this section.

(3) *Business purpose for distribution.* The distribution must be carried out for one or more corporate business purposes. See *Example (3)* of paragraph (b)(5) of this section. If a corporate business purpose can be achieved through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation and which is neither impractical nor unduly expensive, then, for purposes of paragraph (b)(1) of this section, the separation is not carried out for that

corporate business purpose. See *Examples (3)* and *(4)* of paragraph (b)(5) of this section. For rules with respect to the requirement of a business purpose for a transfer of assets to a controlled corporation in connection with a reorganization described in section 368(a)(1)(D), *See* § 1.368–1(b).

(4) *Business purpose as evidence of nondevice.* The corporate business purpose or purposes for a transaction are evidence that the transaction was not used principally as a device for the distribution of earnings and profits within the meaning of section 355(a)(1)(B). *See* paragraph (d)(3)(ii) of this section.

(5) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example (1). Corporation X is engaged in the production, transportation, and refining of petroleum products. In 1985, X acquires all of the properties of corporation Z, which is also engaged in the production, transportation, and refining of petroleum products. In 1991, as a result of antitrust litigation, X is ordered to divest itself of all of the properties acquired from Z. X transfers those properties to new corporation Y and distributes the stock of Y pro rata to X's shareholders. In view of the divestiture order, the distribution is carried out for a corporate business purpose. See paragraph (b)(1) of this section.

Example (2). Corporation X is engaged in two businesses: The manufacture and sale of furniture and the sale of jewelry. The businesses are of equal value. The outstanding stock of X is owned equally by unrelated individuals A and B. A is more interested in the furniture business, while B is more interested in the jewelry business. A and B decide to split up the businesses and go their separate ways. A and B anticipate that the operations of each business will be enhanced by the separation because each shareholder will be able to devote his undivided attention to the business in which he is more interested and more proficient. Accordingly, X transfers the jewelry business to new corporation Y and distributes the stock of Y to B in exchange for all of B's stock in X. The distribution is carried out for a corporate business purpose, notwithstanding that it is also carried out in part for shareholder purposes. See paragraph (b)(2) of this section.

Example (3). Corporation X is engaged in the manufacture and sale of toys and the manufacture and sale of candy. The shareholders of X wish to protect the candy business from the risks and vicissitudes of the toy business. Accordingly, X transfers the toy business to new corporation Y and distributes the stock of Y to X's shareholders. Under applicable law, the purpose of protecting the candy business from the risks and vicissitudes of the toy business is achieved as soon as X transfers the toy business to Y. Therefore, the distribution is not carried out for a corporate business purpose. See paragraph (b)(3) of this section.

Example (4). Corporation X is engaged in a regulated business in State T. X owns all of the stock of corporation Y, a profitable corporation that is not engaged in a regulated business. Commission C sets the rates that X may charge its customers, based on its total income. C has recently adopted rules according to which the total income of a corporation includes the income of a business if, and only if, the business is operated, directly or indirectly, by the corporation. Total income, for this purpose, includes the income of a wholly owned subsidiary corporation but does not include the income of a parent or ''brother/sister'' corporation. Under C's new rule, X's total income includes the income of Y, with the result that X has suffered a reduction of the rates that it may charge its customers. It would not be impractical or unduly expensive to create in a nontaxable transaction (such as a transaction qualifying under section 351) a holding company to hold the stock of X and Y. X distributes the stock of Y to X's shareholders. The distribution is not carried out for the purpose of increasing the rates that X may charge its customers because that purpose could be achieved through a nontaxable transaction, the creation of a holding company, that does not involve the distribution of stock of a controlled corporation and which is neither impractical nor unduly expensive. See paragraph (b)(3) of this section.

Example (5). The facts are the same as in *Example (4)*, except that C has recently adopted rules according to which the total income of a corporation includes not only the income included in *Example (3)*, but also the income of any member of the affiliated group to which the corporation belongs. In order to avoid a reduction in the rates that it may charge its customers, X distributes the stock of Y to X's shareholders. The distribution is carried out for a corporate business purpose. See paragraph (b)(3) of this section.

Example (6). (i) Corporation X owns all of the one class of stock of corporation Y. X distributes the stock of Y pro rata to its five shareholders, all of whom are individuals, for the sole purpose of enabling X and/or Y to elect to become an S corporation. The distribution does not meet the corporate business purpose requirement. See paragraph (b)(1) and (2) of this section.

(ii) The facts are the same as in *Example 6(i)*, except that the business of Y is operated as a division of X. X transfers this division to new corporation Y and distributes the stock of Y pro rata to its shareholders, all of whom are individuals, for the sole purpose of enabling X and/or Y to elect to become an S corporation. The distribution does not meet the corporate business purpose requirement. See paragraph (b)(1) and (2) of this section.

Example (7). The facts are the same as in *Example (6)(i),* except that the distribution is made to enable X to elect to become an S corporation both for Federal tax purposes and for purposes of the income tax imposed by State M. State M has tax law provisions similar to subchapter S of the Internal Revenue Code of 1986. An election to be an S corporation for Federal tax purposes will effect a substantial reduction in Federal taxes that is greater than the reduction of State M taxes pursuant to an election to be an S corporation for State M purposes. The purpose of reducing State M taxes is not a corporate business purpose. The distribution does not meet the corporate business purpose requirements. See paragraph (b)(1) and (2) of this section.

Example (8). The facts are the same as *Example (7),* except that the distribution also is made to enable *A,* a key employee of Y, to acquire stock of Y without investing in X. A is considered to be critical to the success of Y and he has indicated that he will seriously consider leaving the company if he is not given the opportunity to purchase a significant amount of stock of Y. As a matter of state law, Y could not issue stock to the employee while it was a subsidiary of X. As in *Example (7),* the purpose of reducing State M taxes is not a corporate business purpose. In order to determine whether the issuance of stock to the key employee, in fact, motivated the distribution of the Y stock, the potential avoidance of Federal taxes is a relevant factor to take into account. If the facts and circumstances establish that the distribution was substantially motivated by the need to issue stock to the employee, the distribution will meet the corporate business purpose requirement.

(c) *Continuity of interest requirement*—(1) *Requirement.* Section 355 applies to a separation that effects only a readjustment of continuing interests in the property of the distributing and controlled corporations. In this regard section 355 requires that one or more persons who, directly or indirectly, were the owners of the enterprise prior to the distribution or exchange own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. This continuity of interest requirement is independent of the other requirements under section 355.

(2) *Examples.*

Example (1). For more than five years, corporation X has been engaged directly in one business, and indirectly in a different business through its wholly owned subsidiary, S. The businesses are equal in value. At all times, the outstanding stock of X has been owned equally by unrelated individuals A and B. For valid business reasons, A and B cause X to distribute all of the stock of S to B in exchange for all of B's stock in X. After the transaction, A owns all the stock of X and B owns all the stock of S. The continuity of interest requirement is met because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (2). Assume the same facts as in *Example (1),* except that pursuant to a plan to acquire a stock interest in X without acquiring, directly or indirectly, an interest in S, C purchased one-half of the X stock owned by A and immediately thereafter X distributed all of the S stock to B in exchange for all of B's stock in X. After the transactions, A owns 50 percent of X and B owns 100 percent of S. The distribution by X of all of the stock of S to B in exchange for all of B's stock in X will satisfy the continuity of interest requirement for section 355 because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (3). Assume the same facts as in *Examples (1) and (2),* except that C purchased all of the X stock owned by A. After the transactions, neither A nor B own any of the stock of X, and B owns all the stock of S. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, own an amount of stock establishing a continuity of interest in each of X and S after the distribution, *i.e.,* although A and B collectively have retained 50 percent of their equity interest in the former combined enterprise, they have failed to continue to own the minimum stock interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

Example (4). Assume the same facts as in *Examples (1) and (2),* except that C purchased 80 percent of the X stock owned by A. After the transactions, A owns 20 percent of the stock of X, B owns no X stock, and B owns 100 percent of the S stock. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, have a continuity of interest in each of X and S after the distribution, *i.e.*, although A and B collectively have retained 60 percent of their equity interest in the former combined enterprise, the 20 percent interest of A in X is less than the minimum equity interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

(d) *Device for distribution of earnings and profits*—(1) *In general.* Section 355 does not apply to a transaction used principally as a device for the distribution of the earnings and profits of the distributing corporation, the controlled corporation, or both (a ''device''). Section 355 recognizes that a tax-free distribution of the stock of a controlled corporation presents a potential for tax avoidance by facilitating the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock of one corporation and the retention of the stock of another corporation. A device can include a transaction that effects a recovery of basis. In this paragraph (d), ''exchange'' includes transactions, such as redemptions, treated as exchanges under the Code. Generally, the determination of whether a transaction was used principally as a device will be made from all of the facts and circumstances, including, but not limited to, the presence of the device factors specified in paragraph (d)(2) of this section (''evidence of device''), and the presence of the nondevice factors specified in paragraph (d)(3) of this section (''evidence of nondevice''). However, if a transaction is specified in paragraph (d)(5) of this section, then it is ordinarily considered not to have been used principally as a device.

(2) *Device factors*—(i) *In general.* The presence of any of the device factors specified in this subparagraph (2) is evidence of device. The strength of this evidence depends on the facts and circumstances.

(ii) *Pro rata distribution.* A distribution that is pro rata or substantially pro rata among the shareholders of the distributing corporation presents the greatest potential for the avoidance of the dividend provisions of the Code and, in contrast to other types of distributions, is more likely to be used principally as a device. Accordingly, the fact that a distribution is pro rata or substantially pro rata is evidence of device.

(iii) *Subsequent sale or exchange of stock*—(A) *In general.* A sale or exchange of stock of the distributing or the controlled corporation after the distribution (a ''subsequent sale or exchange'') is evidence of device. Generally, the greater the percentage of the stock sold or exchanged after the distribution, the stronger the evidence of device. In addition, the shorter the period of time between the distribution and the sale or exchange, the stronger the evidence of device.

(B) *Sale or exchange negotiated or agreed upon before the distribution.* A subsequent sale or exchange pursuant to an arrangement negotiated or agreed upon before the distribution is substantial evidence of device.

(C) *Sale or exchange not negotiated or agreed upon before the distribution.* A subsequent sale or exchange not pursuant to an arrangement negotiated or agreed upon before the distribution is evidence of device.

(D) *Negotiated or agreed upon before the distribution.* For purposes of this subparagraph (2), a sale or exchange is always pursuant to an arrangement negotiated or agreed upon before the distribution if enforceable rights to buy or sell existed before the distribution. If a sale or exchange was discussed by the buyer and the seller before the distribution and was reasonably to be anticipated by both parties, then the sale or exchange will ordinarily be considered to be pursuant to an arrangement negotiated or agreed upon before the distribution.

(E) *Exchange in pursuance of a plan of reorganization.* For purposes of this subparagraph (2), if stock is exchanged for stock in pursuance of a plan of reorganization, and either no gain or loss or only an insubstantial amount of gain is recognized on the exchange, then the exchange is not treated as a subsequent sale or exchange, but the stock received in the exchange is treated as the stock surrendered in the exchange. For this purpose, gain treated as a dividend pursuant to sections 356(a)(2) and 316 shall be disregarded.

(iv) *Nature and use of assets*—(A) *In general.* The determination of whether a transaction was used principally as a device will take into account the nature, kind, amount, and use of the assets of the distributing and the controlled corporations (and corporations controlled by them) immediately after the transaction.

(B) *Assets not used in a trade or business meeting the requirement of section 355(b).* The existence of assets that are not used in a trade or business that satisfies the requirements of section 355(b) is evidence of device. For this purpose, assets that are not used in a trade or business that satisfies the requirements of section 355(b) include, but are not limited to, cash and other liquid assets that are not related to the reasonable needs of a business satisfying such section. The strength of the evidence of device depends on all the facts and circumstances, including, but not limited to, the ratio for each corporation of the value of assets not used in a trade or business that satisfies the requirements of section 355(b) to the value of its business that satisfies such requirements. A difference in the ratio described in the preceding sentence for the distributing and controlled corporation is ordinarily not evidence of device if the distribution is not pro rata among the shareholders of the distributing corporation and such difference is attributable to a need to equalize the value of the stock distributed and the value of the stock or securities exchanged by the distributees.

(C) *Related function.* There is evidence of device if a business of either the distributing or controlled corporation (or a corporation controlled by it) is (*1*) a ‘‘secondary business’’ that continues as a secondary business for a significant period after the separation, and (*2*) can be sold without adversely affecting the business of the other corporation (or a corporation controlled by it). A secondary business is a business of either the distributing or controlled corporation, if its principal function is to serve the business of the other corporation (or a corporation controlled by it). A secondary business can include a business transferred to a newly-created subsidiary or a business which serves a business transferred to a newly-created subsidiary. The activities of the secondary business may consist of providing property or performing services. Thus, in *Example (11)* of §1.355–3(c), evidence of device would be presented if the principal function of the coal mine (satisfying the requirements of the steel business) continued after the separation and the coal mine could be sold without adversely affecting the steel business. Similarly, in *Example (10)* of §1.355–3(c), evidence of device would be presented if the principal function of the sales operation after the separation is to sell the output from the manufacturing operation and the sales operation could be sold without adversely affecting the manufacturing operation.

(3) *Nondevice factors*—(i) *In general.* The presence of any of the nondevice factors specified in this subparagraph (3) is evidence of nondevice. The strength of this evidence depends on all of the facts and circumstances.

(ii) *Corporate business purpose.* The corporate business purpose for the transaction is evidence of nondevice. The stronger the evidence of device (such as the presence of the device factors specified in paragraph (d)(2) of this section), the stronger the corporate business purpose required to prevent the determination that the transaction was used principally as a device. Evidence of device presented by the transfer or retention of assets not used in a trade or business that satisfies the requirements of section 355(b) can be outweighed by the existence of a corporate business purpose for those transfers or retentions. The assessment of the strength of a corporate business purpose will be based on all of the facts and circumstances, including, but not limited to, the following factors:

(A) The importance of achieving the purpose to the success of the business;

(B) The extent to which the transaction is prompted by a person not having a proprietary interest in either corporation, or by other outside factors beyond the control of the distributing corporation; and

(C) The immediacy of the conditions prompting the transaction.

(iii) *Distributing corporation publicly traded and widely held.* The fact that the distributing corporation is publicly traded and has no shareholder who is directly or indirectly the beneficial owner of more than five percent of any class of stock is evidence of nondevice.

(iv) *Distribution to domestic corporate shareholders.* The fact that the stock of the controlled corporation is distributed to one or more domestic corporations that, if section 355 did not apply, would be entitled to a deduction under section 243(a)(1) available to corporations meeting the stock ownership requirements of section 243(c), or a deduction under section 243(a)(2) or (3) or 245(b) is evidence of nondevice.

(4) *Examples.* The provisions of paragraph (d)(1) through (3) of this section may be illustrated by the following examples:

Example (1). Individual A owns all of the stock of corporation X, which is engaged in the warehousing business. X owns all of the stock of corporation Y, which is engaged in the transportation business. X employs individual B, who is extremely knowledgeable of the warehousing business in general and the operations of X in particular. B has informed A that he will seriously consider leaving the company if he is not given the opportunity to purchase a significant amount of stock of X. Because of his knowledge and experience, the loss of B would seriously damage the business of X. B cannot afford to purchase any significant amount of stock of X as long as X owns Y. Accordingly, X distributes the stock of Y to A and A subsequently sells a portion of his X stock to B. However, X could have issued additional shares to B sufficient to give B an equivalent ownership interest in X. There is no other evidence of device or evidence of nondevice. In light of the fact that X could have issued additional shares to B, the sale of X stock by A is substantial evidence of device. The transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iii)(A), (B) and (D), and (3)(i) and (ii) of this section.

Example (2). Corporation X owns and operates a fast food restaurant in State M and owns all of the stock of corporation Y, which owns and operates a fast food restaurant in State N. X and Y operate their businesses under franchises granted by D and E, respectively. X owns cash and marketable securities that exceed the reasonable needs of its business but whose value is small relative to the value of its business. E has recently changed its franchise policy and will no longer grant or renew franchises to subsidiaries (or other members of the same affiliated group) of corporations operating businesses under franchises granted by its competitors. Thus, Y will lose its franchise if it remains a subsidiary of X. The franchise is about to expire. Accordingly, X distributes the stock of Y pro rata among X's shareholders. X retains its business and transfers cash and marketable securities to Y in an amount proportional to the value of Y's business. There is no other evidence of device or evidence of nondevice. The transfer by X to Y and the retention by X of cash and marketable securities is relatively weak evidence of device because after the transfer X and Y hold cash and marketable securities in amounts proportional to the values of their businesses. The fact that the distribution is pro rata is evidence of device. A strong corporate business purpose is relatively strong evidence of nondevice. Accordingly, the transaction is considered not to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A), and (B) and (3)(i) and (ii)(A), (B) and (C) of this section.

Example (3). Corporation X is engaged in a regulated business in State M and owns all of the stock of corporation Y, which is not engaged in a regulated business in State M. State M has recently amended its laws to provide that affiliated corporations operating in M may not conduct both regulated and unregulated businesses. X transfers cash not related to the reasonable needs of the business of X or Y to Y and then distributes the stock of Y pro rata among X's shareholders. As a result of the transfer of cash, the ratio of the value of its assets not used in a trade or business that satisfies the requirements of section 355(b) to the value of its business is substantially greater for Y than for X. There is no other evidence of device or evidence of nondevice. The transfer of cash by X to Y is relatively strong evidence of device because after the transfer Y holds disproportionately many assets that are not used in a trade or business that satisfies the requirements of section 355(b). The fact that the distribution is pro rata is evidence of device. The strong business purpose is relatively strong evidence of nondevice, but it does not pertain to the transfer. Accordingly, the transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A) and (B), and (3) and (i) and (ii) of this section.

Example (4). The facts are the same as in *Example (3),* except that, instead of transferring cash to Y, X purchases operating assets unrelated to the business of Y and transfers them to Y prior to the distribution. There is no other evidence of device or evidence of nondevice. The transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A) and (B), and (3)(i) and (ii) of this section.

(5) *Transactions ordinarily not considered as a device*—(i) *In general.* This subparagraph (5) specifies three distributions that ordinarily do not present the potential for tax avoidance described in paragraph (d)(1) of this section. Accordingly, such distributions are ordinarily considered not to have been used

principally as a device, notwithstanding the presence of any of the device factors described in paragraph (d)(2) of this section. A transaction described in paragraph (d)(5)(iii) or (iv) of this section is not protected by this subparagraph (5) from a determination that it was used principally as a device if it involves the distribution of the stock of more than one controlled corporation and facilitates the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock of one corporation and the retention of the stock of another corporation.

(ii) *Absence of earnings and profits.* A distribution is ordinarily considered not to have been used principally as a device if—

(A) The distributing and controlled corporations have no accumulated earnings and profits at the beginning of their respective taxable years,

(B) The distributing and controlled corporations have no current earnings and profits as of the date of the distribution, and

(C) No distribution of property by the distributing corporation immediately before the separation would require recognition of gain resulting in current earnings and profits for the taxable year of the distribution.

(iii) *Section 303(a) transactions.* A distribution is ordinarily considered not to have been used principally as a device if, in the absence of section 355, with respect to each shareholder distributee, the distribution would be a redemption to which section 303(a) applied.

(iv) *Section 302(a) transactions.* A distribution is ordinarily considered not to have been used principally as a device if, in the absence of section 355, with respect to each shareholder distributee, the distribution would be a redemption to which section 302(a) applied. For purposes of the preceding sentence, section 302(c)(2)(A)(ii) and (iii) shall not apply.

(v) *Examples.* The provisions of this subparagraph (5) may be illustrated by the following examples:

Example (1) . The facts are the same as in *Example (3)* of paragraph (d)(4) of this section, except that X and Y had no accumulated earnings and profits at the beginning of its taxable year, X and Y have no current earnings and profits as of the date of the distribution, and no distribution of property by X immediately before the separation would require recognition of gain that would result in earnings and profits for the taxable year of the distribution. The transaction is considered not to have been used principally as a device. See paragraph (d)(5)(i) and (ii) of this section.

Example (2) . Corporation X is engaged in three businesses: a hotel business, a restaurant business, and a rental real estate business. Individuals A, B, and C own all of the stock of X. X transfers the restaurant business to new corporation Y and transfers the rental real estate business to new corporation Z. X then distributes the stock of Y and Z pro rata between B and C in exchange for all of their stock in X. In the absence of section 355, the distribution would be a redemption to which section 302(a) applied. Since this distribution involves the stock of more than one controlled corporation and facilitates the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock in one corporation and the retention of the stock of another corporation, it is not protected by paragraph (d)(5)(i) and (iv) of this section from a determination that it was used principally as a device. Thus, the determination of whether the transaction was used principally as a device must be made from all the facts and circumstances, including the presence of the device factors and nondevice factors specified in paragraph (d)(2) and (3) of this section.

(e) *Stock and securities distributed*—(1) *In general.* Section 355 applies to a distribution only if the distributing corporation distributes—

(i) All of the stock and securities of the controlled corporation that it owns, or

(ii) At least an amount of the stock of the controlled corporation that constitutes control as defined in section 368(c). In such a case, all, or any part, of the securities of the controlled corporation may be distributed, and paragraph (e)(2) of this section shall apply.

(2) *Additional rules.* Where a part of either the stock or the securities of the controlled corporation is retained under paragraph (e)(1)(ii) of this section, it must be established to the satisfaction of the Commissioner that the retention by the distributing corporation was not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax.

Ordinarily, the corporate business purpose or purposes for the distribution will require the distribution of all of the stock and securities of the controlled corporation. If the distribution of all of the stock and securities of a controlled corporation would be treated to any extent as a distribution of ''other property'' under section 356, this fact tends to establish that the retention of stock or securities is in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax.

(f) *Principal amount of securities*—(1) *Securities received.* Section 355 does not apply to a distribution if, with respect to any shareholder or security holder, the principal amount of securities received exceeds the principal amount of securities surrendered, or securities are received but no securities are surrendered. In such cases, see section 356.

(2) *Only stock received.* If only stock is received in a distribution to which section 355(a)(1)(A) applies, the principal amount of the securities surrendered, if any, and the par value or stated value of the stock surrendered, if any, are not relevant to the application of that section.

(g) *Period of ownership*—(1) *Other property.* For purposes of section 355(a)(1)(A), stock of a controlled corporation acquired in a transaction in which gain or loss was recognized in whole or in part (other than a transaction described in §1.355–3(b)(4)(iii)) within the five-year period ending on the date of the distribution shall not be treated as stock of the controlled corporation but shall be treated as ''other property.'' See section 356. However, for purposes of section 355(a)(1)(D), the stock so acquired is stock of the controlled corporation.

(2) *Example.* Paragraph (g)(1) of this section may be illustrated by the following example:

Example. Corporation X has held 85 of the 100 outstanding shares of the stock of corporation Y for more than five years on the date of the distribution. Six months before that date, X purchased ten more shares. If X distributes all of its 95 shares of the stock of Y, so much of section 356 as relates to section 355 may apply to the transaction and the ten newly acquired shares are treated as other property. On the other hand, if X retains ten of the shares of the stock of Y then the application of paragraph (e) of this section must take into account all of the stock of Y, including the ten shares newly acquired by X and the five shares owned by others. Similarly, if, by the use of any agency, X acquired any of the stock of Y within the five-year period ending on the date of the distribution in a transaction in which gain or loss was recognized in whole or in part (for example, where another subsidiary of X purchased stock of Y), then that stock is treated as other property. If X had held only 75 of the 100 outstanding shares of the stock of Y for more than five years on the date of the distribution and had purchased the remaining 25 shares six months before that date, then neither section 355 nor section 356 would apply to the distribution.

(h) *Active conduct of a trade or business.* Section 355 applies to a distribution only if the requirements of §1.355–3 (relating to the active conduct of a trade or business) are satisfied.

[T.D. 8238, 54 FR 290, Jan. 5, 1989; 54 FR 5577, Feb. 3, 1989; 57 FR 28463, June 25, 1992]

§1.355–3 Active conduct of a trade or business.

(a) *General requirements*—(1) *Application of section 355.* Under section 355(b)(1), a distribution of stock, or stock and securities, of a controlled corporation qualifies under section 355 only if—

(i) The distributing and the controlled corporations are each engaged in the active conduct of a trade or business immediately after the distribution (section 355(b)(1)(A)), or

(ii) Immediately before the distribution, the distributing corporation had no assets other than stock or securities of the controlled corporations, and each of the controlled corporations is engaged in the active conduct of a trade or business immediately after the distribution (section 355(b)(1)(B)). A *de minimis* amount of assets held by the distributing corporation shall be disregarded for purposes of this paragraph (a)(1)(ii).

(2) *Examples.* Paragraph (a)(1) of this section may be illustrated by the following examples:

Example (1). Prior to the distribution, corporation X is engaged in the active conduct of a trade or business and owns all of the stock of corporation Y, which also is engaged in the active conduct of a trade or business. X distributes all of the stock of Y to X's shareholders, and each corporation continues the active conduct of its trade or business. The active business requirement of section 355(b)(1)(A) is satisfied.

Example (2). The facts are the same as in *Example (1)*, except that X transfers all of its assets other than the stock of Y to a new corporation in exchange for all of the stock of the new corporation and then distributes the stock of both controlled corporations to X's shareholders. The active business requirement of section 355(b)(1)(B) is satisfied.

(b) *Active conduct of a trade or business defined*—(1) *In general.* Section 355(b)(2) provides rules for determining whether a corporation is treated as engaged in the active conduct of a trade or business for purposes of section 355(b)(1). Under section 355(b)(2)(A), a corporation is treated as engaged in the active conduct of a trade or business if it is itself engaged in the active conduct of a trade or business or if substantially all of its assets consist of the stock, or stock and securities, of a corporation or corporations controlled by it (immediately after the distribution) each of which is engaged in the active conduct of a trade or business.

(2) *Active conduct of a trade or business immediately after distribution*—(i) *In general.* For purposes of section 355(b), a corporation shall be treated as engaged in the ‘‘active conduct of a trade or business’’ immediately after the distribution if the assets and activities of the corporation satisfy the requirements and limitations described in paragraph (b)(2)(ii), (iii), and (iv) of this section.

(ii) *Trade or business.* A corporation shall be treated as engaged in a trade or business immediately after the distribution if a specific group of activities are being carried on by the corporation for the purpose of earning income or profit, and the activities included in such group include every operation that forms a part of, or a step in, the process of earning income or profit. Such group of activities ordinarily must include the collection of income and the payment of expenses.

(iii) *Active conduct.* For purposes of section 355(b), the determination whether a trade or business is actively conducted will be made from all of the facts and circumstances. Generally, the corporation is required itself to perform active and substantial management and operational functions. Generally, activities performed by the corporation itself do not include activities performed by persons outside the corporation, including independent contractors. A corporation may satisfy the requirements of this subdivision (iii) through the activities that it performs itself, even though some of its activities are performed by others. Separations of real property all or substantially all of which is occupied prior to the distribution by the distributing or the controlled corporation (or by any corporation controlled directly or indirectly by either of those corporations) will be carefully scrutinized with respect to the requirements of section 355(b) and this §1.355–3.

(iv) *Limitations.* The active conduct of a trade or business does not include—

(A) The holding for investment purposes of stock, securities, land, or other property, or

(B) The ownership and operation (including leasing) of real or personal property used in a trade or business, unless the owner performs significant services with respect to the operation and management of the property.

(3) *Active conduct for five-year period preceding distribution.* Under section 355(b)(2)(B), a trade or business that is relied upon to meet the requirements of section 355(b) must have been actively conducted throughout the five-year period ending on the date of the distribution. For purposes of this subparagraph (3)—

(i) Activities which constitute a trade or business under the tests described in paragraph (b)(2) of this section shall be treated as meeting the requirement of the preceding sentence if such activities were actively conducted throughout the 5-year period ending on the date of distribution, and

(ii) The fact that a trade or business underwent change during the five-year period preceding the distribution (for example, by the addition of new or the dropping of old products, changes in production capacity, and the like) shall be disregarded, provided that the changes are not of such a character as to constitute the acquisition of a new or different business. In particular, if a corporation engaged in the active conduct of one trade or business during that five-year period purchased, created, or otherwise acquired another trade or business in the same line of business, then the acquisition of that other business is ordinarily treated as an expansion of the original business, all of which is treated as having been actively conducted during that five-year period, unless that purchase, creation, or other acquisition effects a change of such a character as to constitute the acquisition of a new or different business.

(4) *Special rules for acquisition of a trade or business (Prior to the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988)*—(i) *In general.* Under section 355(b)(2)(C), a trade or business relied upon to meet the requirements of section 355(b) must not have been acquired by the distributing corporation, the controlled corporation, or another member of the affiliated group during the five-year period ending on the date of the distribution unless it was acquired in a transaction in which no gain or loss was recognized. Similarly, under section 355(b)(2)(D), the trade or business must not have been indirectly acquired by any of those corporations (or a predecessor in interest of any of those corporations) during that five-year period in a transaction in which gain or loss was recognized in whole or in part and which consisted of the acquisition of control of the corporation directly engaged in the trade or business, or the indirect acquisition of control of that corporation through the direct or indirect acquisition of control of one or more other corporations. A trade or business acquired, directly or indirectly, within the five-year period ending on the date of the distribution in a transaction in which the basis of the assets acquired was not determined in whole or in part by reference to the transferor's basis does not qualify under section 355(b)(2), even though no gain or loss was recognized by the transferror.

(ii) *Example.* Paragraph (b)(4)(i) of this section may be illustrated by the following example:

Example. In 1985, corporation X, which operates a business and has cash and other liquid assets, purchases all of the stock of corporation Y, which is engaged in the active conduct of a trade or business. Later in the same year, X merges into Y in a ''downstream'' statutory merger. In 1986, Y transfers the business assets formerly owned by X to a new subsidiary, corporation Z, and then distributes the stock of Z to Y's shareholders. Section 355 does not apply to the distribution of the stock of Z because the trade or business of Y was indirectly acquired by X, a predecessor in interest of Y, during the five-year period preceding the distribution.

(iii) *Gain or loss recognized in certain transactions.* The requirements of section 355(b)(2)(C) and (D) are intended to prevent the direct or indirect acquisition of a trade or business by a corporation in anticipation of a distribution by the corporation of that trade of business in a distribution to which section 355 would otherwise apply. A direct or indirect acquisition of a trade or business by one member of an affiliated group from another member of the group is not the type of transaction to which section 355(b)(2)(C) and (D) is intended to apply. Therefore, in applying section 355(b)(2)(C) or (D), such an acquisition, even though taxable, shall be disregarded.

(iv) *Affiliated group.* For purposes of this subparagraph (4), the term *affiliated group* means an affiliated group as defined in section 1504(a) (without regard to section 1504(b)), except that the term *stock* includes nonvoting stock described in section 1504(a)(4).

(5) *Special rules for acquisition of a trade or business (After the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).* [Reserved]

(c) *Examples.* The following examples illustrate section 355(b)(2)(A) and (B) and paragraph (b)(1), (2), and (3) of this section. However, a transaction that satisfies these active business requirements will qualify under section 355 only if it satisfies the other requirements of section 355 (a) and (b).

Example (1). Corporation X is engaged in the manufacture and sale of soap and detergents and also owns investment securities. X transfers the investment securities to new subsidiary Y and distributes the stocks of Y to X's shareholders. Y does not satisfy the requirements of section 355(b) because the holding of investment securities does not constitute the active conduct of a trade or business. See paragraph (b)(2)(iv)(A) of this section.

Example (2). Corporation X owns, manages, and derives rental income from an office building and also owns vacant land. X transfers the land to new subsidiary Y and distributes the stock of Y to X's shareholders. Y will subdivide the land, install streets and utilities, and sell the developed lots to various homebuilders. Y does not satisfy the requirements of section 355(b) because no significant development activities were conducted with respect to the land during the five-year period ending on the date of the distribution. See paragraph (b)(3) of this section.

Example (3). Corporation X owns land on which it conducts a ranching business. Oil has been discovered in the area, and it is apparent that oil may be found under the land on which the ranching business is conducted. X has engaged in no significant activities in connection with its mineral rights. X transfers its mineral rights to new subsidiary Y and distributes the stock of Y to X's shareholders. Y will actively pursue the development of the oil producing potential of the property. Y does not satisfy the requirements of section 355(b) because X engaged in no significant exploitation activities with respect to the mineral rights during the five-year period ending on the date of the distribution. See paragraph (b)(3) of this section.

Example (4). For more than five years, corporation X has conducted a single business of constructing sewage disposal plants and other facilities. X transfers one-half of its assets to new subsidiary Y. These assets include a contract for the construction of a sewage disposal plant in State M, construction equipment, cash, and other tangible assets. X retains a contract for the construction of a sewage disposal plant in State N, construction equipment, cash, and other intangible assets. X then distributes the stock of Y to one of X's shareholders in exchange for all of his stock of X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section.

Example (5). For the past six years, corporation X has owned and operated two factories devoted to the production of edible pork skins. The entire output of one factory is sold to one customer, C, while the output of the second factory is sold to C and a number of other customers. To eliminate errors in packaging, X opens a new factory. Thereafter, orders from C are processed and packaged at the two original factories, while the new factory handles only orders from other customers. Eight months after opening the new factory, X transfers it and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (6). Corporation X has owned and operated a men's retail clothing store in the downtown area of the City of G for nine years and has owned and operated another men's retail clothing store in a suburban area of G for seven years. X transfers the store building, fixtures, inventory, and other assets related to the operations of the suburban store to new subsidiary Y. X also transfers to Y the delivery trucks and delivery personnel that formerly served both stores. Henceforth, X will contract with a local public delivery service to make its deliveries. X retains the warehouses that formerly served both stores. Henceforth, Y will lease warehouse space from an unrelated public warehouse company. X then distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section.

Example (7). For the past nine years, corporation X has owned and operated a department store in the downtown area of the City of G. Three years ago, X acquired a parcel of land in a suburban area of G and constructed a new department store on it. X transfers the suburban store and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, each store has its own manager and is operated independently of the other store. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (8). For the past six years, corporation X has owned and operated hardware stores in several states. Two years ago, X purchased all of the assets of a hardware store in State M, where X had not previously conducted business. X transfers the State M store and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, the State M store has its own manager and is operated independently of the other stores. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (9). For the past eight years, corporation X has engaged in the manufacture and sale of household products. Throughout this period, X has maintained a research department for use in connection with its manufacturing activities. The research department has 30 employees actively engaged in the development of new products. X transfers the research department to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, Y continues its research operations on a contractual basis with several corporations, including X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section. The result in this example is the same if, after the distribution, Y continues its research operations but furnishes its services only to X. See paragraph (b)(3)(i) of this section. However, see §1.355–2 (d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (10). For the past six years, corporation X has processed and sold meat products. X derives income from no other source. X separates the sales function from the processing function by transferring the business assets related to the sales function and cash for working capital to new subsidiary Y. X then distributes the stock of Y to X's shareholders. After the distribution, Y purchases for resale the meat products processed by X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section. However, see §1.355–2(d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (11) . For the past eight years, corporation X has been engaged in the manufacture and sale of steel and steel products. X owns all of the stock of corporation Y, which, for the past six years, has owned and operated a coal mine for the sole purpose of supplying X's coal requirements in the manufacture of steel. X distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355 (b). See paragraph (b)(3)(i) of this section. However, see §1 1.355–2 (d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (12) . For the past seven years, corporation X, a bank, has owned an eleven-story office building, the ground floor of which X has occupied in the conduct of its banking business. The remaining ten floors are rented to various tenants. Throughout this seven-year period, the building has been managed and maintained by employees of the bank. X transfers the building to new subsidiary Y and distributes the stock of Y to X's shareholders. Henceforth, Y will manage the building, negotiate leases, seek new tenants, and repair and maintain the building. X and Y both satisfy the requirements of section 355 (b). See paragraph (b)(3) of this section.

Example (13) . For the past nine years, corporation X, a bank, has owned a two-story building, the ground floor and one half of the second floor of which X has occupied in the conduct of its banking business. The other half of the second floor has been rented as storage space to a neighboring retail merchant. X transfers the building to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, X leases from Y the space in the building that it formerly occupied. Under the lease, X will repair and maintain its portion of the building and pay property taxes and insurance. Y does not satisfy the requirements of section 355 (b) because it is not engaged in the active conduct of a trade or business immediately after the distribution. See paragraph (b)(2)(iv)(A) of this section. This example does not address the question of whether the activities of X with respect to the building prior to the separation would constitute the active conduct of a trade or business.

[T.D. 8238, 54 FR 294, Jan. 5, 1989]

§1.355–4 Non pro rata distributions, etc.

Section 355 provides for nonrecognition of gain or loss with respect to a distribution whether or not (a) the distribution is pro rata with respect to all of the shareholders of the distributing corporation, (b) the distribution is pursuant to a plan of reorganization within the meaning of section 368 (a) (1)(D), or (c) the shareholder surrenders stock in the distributing corporation. Under section 355, the stock of a controlled corporation may consist of common stock or preferred stock. (See, however, section 306 and the regulations thereunder.) Section 355 does not apply, however, if the substance of a transaction is merely an exchange between shareholders or security holders of stock or securities in one corporation for stock or securities in another corporation. For example, if two individuals, A and B, each own directly 50 percent of the stock of corporation X and 50 percent of the stock of corporation Y, section 355 would not apply to a transaction in which A and B transfer all of their stock of X and Y to a new corporation Z, for all of the stock of Z, and Z then distributes the stock of X to A and the stock of Y to B.

[T.D. 8238, 54 FR 296, Jan. 5, 1989]

§1.355–5 Records to be kept and information to be filed.

(a) Every corporation that makes a distribution of stock or securities of a controlled corporation, as described in section 355, shall attach to its return for the year of the distribution a detailed statement setting forth such data as may be appropriate in order to show compliance with the provisions of such section.

(b) Every taxpayer who receives a distribution of stock or securities of a corporation that was controlled by a corporation in which he holds stock or securities shall attach to his return for the year in which such distribution is received a detailed statement setting forth such data as may be appropriate in order to show the applicability of section 355. Such statement shall include, but shall not be limited to, a description of the stock and securities surrendered (if any) and received, and the names and addresses of all of the corporations involved in the transaction.

§ 1.355–6 Certain distributions qualifying under section 355 made ineligible for norecognition of gain to the distributing corporation under § 337(d). [Reserved]

[T.D. 8238, 54 FR 296, Jan. 5, 1989]

§ 1.356–1 Receipt of additional consideration in connection with an exchange.

(a) If in any exchange to which the provisions of section 354 or section 355 would apply except for the fact that there is received by the shareholders or the security holders other property (in addition to property permitted to be received without recognition of gain by such sections) or money, then—

(1) The gain, if any, to the taxpayer shall be recognized in an amount not in excess of the sum of the money and the fair market value of the other property, but,

(2) The loss, if any, to the taxpayer from the exchange or distribution shall not be recognized to any extent.

(b) If the distribution of such other property or money by or on behalf of a corporation has the effect of the distribution of a dividend, then there shall be chargeable to each distributee (either an individual or a corporation)—

(1) As a dividend, such an amount of the gain recognized as is not in excess of the distributee's ratable share of the undistributed earnings and profits of the corporation accumulated after February 28, 1913, and

(2) As a gain from the exchange of property, the remainder of the gain so recognized.

(c) This section may be illustrated by the following examples:

Example (1). In an exchange to which the provisions of section 356 apply and to which section 354 would apply but for the receipt of property not permitted to be received without the recognition of gain or loss, A (either an individual or a corporation), received the following in exchange for a share of stock having an adjusted basis to him of $85:

One share of stock worth	$100
Cash	25
Other property (basis $25) fair market value	50
Total fair market value of consideration received	175
Adjusted basis of stock surrendered in exchange	85
Total gain	90
Gain to be recognized, limited to cash and other property received	75
A's pro rata share of earnings and profits accumulated after February 28, 1913 (taxable dividend)	30
Remainder to be treated as a gain from the exchange of property	45

Example (2). If, in *Example (1),* A's stock had an adjusted basis to him of $200, he would have realized a loss of $25 on the exchange, which loss would not be recognized.

(d) Section 301(b)(1)(B) and section 301(d)(2) do not apply to a distribution of ‘‘other property’’ to a corporate shareholder if such distribution is within the provisions of section 356.

(e) See paragraph (1) of § 1.301–1 for certain transactions which are not within the scope of section 356.

§ 1.356–2 Receipt of additional consideration not in connection with an exchange.

(a) If, in a transaction to which section 355 would apply except for the fact that a shareholder (individual or corporate) receives property permitted by section 355 to be received without the recognition of gain, together with other property or money, without the surrender of any stock or securities of the distributing corporation, then the sum of the money and the fair market value of the other property as of the date of the distribution shall be treated as a distribution of property to which the rules of section 301 (other than section 301(b) and section 301(d)) apply. See section 358 for determination of basis of such other property.

(b) Paragraph (a) of this section may be illustrated by the following examples:

Example (1). Individuals A and B each own 50 of the 100 outstanding shares of common stock of Corporation X. Corporation X owns all of the stock of Corporation Y, 100 shares. Corporation X distributes to each shareholder 50 shares of the stock of Corporation Y plus $100 cash without requiring the surrender of any shares of its own stock. The

$100 cash received by each is treated as a distribution of property to which the rules of section 301 apply.

Example (2). If, in the above example, Corporation X distributes 50 shares of stock of Corporation Y to A and 30 shares of such stock plus $100 cash to B without requiring the surrender of any of its own stock, the amount of cash received by B is treated as a distribution of property to which the rules of section 301 apply.

§ 1.356–3 Rules for treatment of securities as "other property".

(a) As a general rule, for purposes of section 356, the term *other property* includes securities. However, it does not include securities permitted under section 354 or section 355 to be received tax free. Thus, when securities are surrendered in a transaction to which section 354 or section 355 is applicable, the characterization of the securities received as ''other property'' does not include securities received where the principal amount of such securities does not exceed the principal amount of securities surrendered in the transaction. If a greater principal amount of securities is received in an exchange described in section 354 (other than subsection (c) or (d) thereof) or section 355 over the principal amount of securities surrendered, the term *other property* includes the fair market value of such excess principal amount as of the date of the exchange. If no securities are surrendered in exchange, the term *other property* includes the fair market value, as of the date of receipt, of the entire principal amount of the securities received.

(b) Except as provided in § 1.356–6T, for purposes of this section, a right to acquire stock that is treated as a security for purposes of section 354 or 355 has no principal amount. Thus, such right is not other property when received in a transaction to which section 356 applies (regardless of whether securities are surrendered in the exchange). This paragraph (b) applies to transactions occurring on or after March 9, 1998.

(c) In the examples in this paragraph (c), stock means common stock and *warrants* means rights to acquire common stock. The following examples illustrate the rules of paragraph (a) of this section:

Example 1. A, an individual, exchanged 100 shares of stock for 100 shares of stock and a security in the principal amount of $1,000 with a fair market value of $990. The amount of $990 is treated as ''other property.''

Example 2. B, an individual, exchanged 100 shares of stock and a security in the principal amount of $1,000 for 300 shares of stock and a security in the principal amount of $1,500. The security had a fair market value on the date of receipt of $1,575. The fair market value of the excess principal amount, or $525, is treated as ''other property.''

Example 3. C, an individual, exchanged a security in the principal amount of $1,000 for 100 shares of stock and a security in the principal amount of $900. No part of the security received is treated as ''other property.''

Example 4. D, an individual, exchanged a security in the principal amount of $1,000 for 100 shares of stock and a security in the principal amount of $1,200 with a fair market value of $1,100. The fair market value of the excess principal amount, or $183.33, is treated as ''other property.''

Example 5. E, an individual, exchanged a security in the principal amount of $1,000 for another security in the principal amount of $1,200 with a fair market value of $1,080. The fair market value of the excess principal amount, or $180, is treated as ''other property.''

Example 6. F, an individual, exchanged a security in the principal amount of $1,000 for two different securities each in the principal amount of $750. One of the securities had a fair market value of $750, the other had a fair market value of $600. One-third of the fair market value of each security ($250 and $200) is treated as ''other property.''

Example 7. G, an individual, exchanged stock for stock and a warrant. The warrant had no principal amount. Thus, G received no excess principal amount within the meaning of section 356(d).

Example 8. H, an individual, exchanged a warrant for stock and a warrant. The warrants had no principal amount. Thus, H received no excess principal amount within the meaning of section 356(d).

Example 9. I, an individual, exchanged a warrant for stock and a debt security. The warrant had no principal amount. The debt security had a $100 principal amount. I received $100 of excess principal amount within the meaning of section 356(d).

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7616, 44 FR 26869, May 8, 1979; T.D. 8752, 63 FR 410, Jan. 6, 1998]

§ 1.356–4 Exchanges for section 306 stock.

If, in a transaction to which section 356 is applicable, other property or money is received in exchange for section 306 stock, an amount equal to the fair market value of the property plus the money, if any, shall be treated as a distribution of property to which section 301 is applicable. The determination of whether section 306 stock is surrendered for other property (including money) is a question of fact to be decided under all of the circumstances of each case. Ordinarily, the other property (including money) received will first be treated as received in exchange for any section 306 stock owned by a shareholder prior to such transaction. For example, if a shareholder who owns a share of common stock (having a basis to him of $100) and a share of preferred stock which is section 306 stock (having a basis to him of $100) surrenders both shares in a transaction to which section 356 is applicable for one share of common stock having a fair market value of $80 and one $100 bond having a fair market value of $100, the bond will be deemed received in exchange for the section 306 stock and it will be treated as a distribution to which section 301 is applicable to the extent of its entire fair market value ($100).

§1.356–5 Transactions involving gift or compensation.

With respect to transactions described in sections 354, 355, or 356, but which—

(a) Result in a gift, see section 2501 and following, and the regulations pertaining thereto, or

(b) Have the effect of the payment of compensation, see section 61(a)(1), and the regulations pertaining thereto.

§1.356–6T Rules for treatment of nonqualified preferred stock as "other property" (temporary).

(a) *In general.* For purposes of §§1.354–1(e), 1.355–1(c), and 1.356–3(b), the terms *stock* and *securities* do not include—

(1) Nonqualified preferred stock, as defined in section 351(g)(2), received in exchange for (or in a distribution with respect to) stock, or a right to acquire stock, other than nonqualified preferred stock; or

(2) A right to acquire such nonqualified preferred stock, received in exchange for (or in a distribution with respect to) stock, or a right to acquire stock, other than nonqualified preferred stock.

(b) *Exceptions.* The following exceptions apply:

(1) *Certain recapitalizations.* Paragraph (a) of this section does not apply in the case of a recapitalization under section 368(a)(1)(E) of a family-owned corporation as described in section 354(a)(2)(C)(ii)(II).

(2) *Transition rule.* Paragraph (a) of this section does not apply to a transaction described in section 1014(f)(2) of the Taxpayer Relief Act of 1997 (111 Stat. 921).

(c) *Effective date.* This section applies to nonqualified preferred stock, or a right to acquire such stock, received in connection with a transaction occurring on or after March 9, 1998.

[T.D. 8753, 63 FR 411, Jan. 6, 1998]

§1.357–1 Assumption of liability.

(a) *General rule.* Section 357(a) does not affect the rule that liabilities assumed are to be taken into account for the purpose of computing the amount of gain or loss realized under section 1001 upon an exchange. Section 357(a) provides, subject to the exceptions and limitations specified in section 357 (b) and (c), that—

(1) Liabilities assumed are not to be treated as ''other property or money'' for the purpose of determining the amount of realized gain which is to be recognized under section 351, 361, 371, or 374, if the transactions would, but for the receipt of ''other property or money'' have been exchanges of the type described in any one of such sections; and

(2) If the only type of consideration received by the transferor in addition to that permitted to be received by section 351, 361, 371, or 374, consists of an assumption of liabilities, the transaction, if otherwise qualified, will be deemed to be within the provisions of section 351, 361, 371, or 374.

(b) *Application of general rule.* The application of paragraph (a) of this section may be illustrated by the following example:

Example. A, an individual, transfers to a controlled corporation property with an adjusted basis of $10,000 in exchange for stock of the corporation with a fair market value of $8,000, $3,000 cash, and the assumption by the corporation of indebtedness of A amounting to $4,000. A's gain is $5,000, computed as follows:

Stock received, fair market value	$8,000
Cash received	3,000
Liability assumed by transferee	4,000
Total consideration received	15,000
Less: Adjusted basis of property transferred	10,000
Gain realized	5,000

Assuming that the exchange falls within section 351 as a transaction in which the gain to be recognized is limited to ''other property or money'' received, the gain recognized to A will be limited to the $3,000 cash received, since, under the general rule of section 357(a), the assumption of the $4,000 liability does not constitute ''other property.''

(c) *Tax avoidance purpose.* The benefits of section 357(a) do not extend to any exchange involving an assumption of liabilities where it appears that the principal purpose of the taxpayer with respect to such assumption was to avoid Federal income tax on the exchange, or, if not such purpose, was not a bona fide business purpose. In such cases, the total amount of liabilities assumed or acquired pursuant to such exchange (and not merely a particular liability with respect to which the tax avoidance purpose existed) shall, for the purpose of determining the amount of gain to be recognized upon the exchange in which the liabilities are assumed or acquired, be treated as money received by the taxpayer upon the exchange. Thus, if in the example set forth in paragraph (b) of this section, the principal purpose of the assumption of the $4,000 liability was to avoid tax on the exchange, or was not a bona fide business purpose, then the amount of gain recognized would be $5,000. In any suit or proceeding where the burden is on the taxpayer to prove that an assumption of liabilities is not to be treated as ''other property or money'' under section 357, which is the case if the Commissioner determines that the taxpayer's purpose with respect thereto was a purpose to avoid Federal income tax on the exchange or was not a bona fide business purpose, and the taxpayer contests such determination by litigation, the taxpayer must sustain such burden by the clear preponderance of the evidence. Thus, the taxpayer must prove his case by such a clear preponderance of all the evidence that the absence of a purpose to avoid Federal income tax on the exchange, or the presence of a bona fide business purpose, is unmistakable.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6528, 26 FR 399, Jan. 19, 1961]

§ 1.357–2 Liabilities in excess of basis.

(a) Section 357(c) provides in general that in an exchange to which section 351 (relating to a transfer to a corporation controlled by the transferor) is applicable, or to which section 361 (relating to the nonrecognition of gain or loss to corporations) is applicable by reason of a section 368(a)(1)(D) reorganization, if the sum of the amount of liabilities assumed plus the amount of liabilities to which the property is subject exceeds the total of the adjusted basis of the property transferred pursuant to such exchange, then such excess shall be considered as a gain from the sale or exchange of a capital asset or of property which is not a capital asset as the case may be. Thus, if an individual transfers, under section 351, properties having a total basis in his hands of $20,000, one of which has a basis of $10,000 but is subject to a mortgage of $30,000, to a corporation controlled by him, such individual will be subject to tax with respect to $10,000, the excess of the amount of the liability over the total adjusted basis of all the properties in his hands. The same result will follow whether or not the liability is assumed by the transferee. The determination of whether a gain resulting from the transfer of capital assets is long-term or short-term capital gain shall be made by reference to the holding period to the transferor of the assets transferred. An exception to the general rule of section 357(c) is made (1) for any exchange as to which under section 357(b) (relating to assumption of liabilities for tax-avoidance purposes) the entire amount of the liabilities is treated as money received and (2) for an exchange to which section 371 (relating to reorganizations in certain receivership and bankruptcy proceedings) or section 374 (relating to gain or loss not recognized in certain railroad reorganizations) is applicable.

(b) The application of paragraph (a) of this section may be illustrated by the following examples:

Example (1). If all such assets transferred are capital assets and if half the assets (ascertained by reference to their fair market value at the time of the transfer) have been held for less than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), and the remaining half for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), half the excess of the amount of the liability over the total of the adjusted basis of the property transferred pursuant to the exchange shall be treated as short-term capital gain, and the remaining half shall be treated as long-term capital gain.

Example (2). If half of the assets (ascertained by reference to their fair market value at the time of the transfer) transferred are capital assets and half are assets other than capital assets, then half of the excess of the amount of the liability over the total of the adjusted basis of the property transferred pursuant to the exchange shall be treated as capital gain, and the remaining half shall be treated as gain from the sale or exchange of assets other than capital assets.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6528, 26 FR 399, Jan. 19, 1961; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.358–1 Basis to distributees.

(a) In the case of an exchange or distribution to which section 354, 355, or 371(b) applies in which, under the law applicable to the year in which the exchange is made, only nonrecognition property is received, the sum of the basis of all of the stock and securities in the corporation whose stock and securities are exchanged or with respect to which the distribution is made, held immediately after the transaction, plus the basis of all stock and securities received in the transaction shall be the same as the basis of all the stock and securities in such corporation held immediately before the transaction allocated in the manner described in §1.358–2. In the case of an exchange to which section 351, 361, or 374 applies in which, under the law applicable to the year in which the exchange was made, only nonrecognition property is received, the basis of all the stock and securities received in the exchange shall be the same as the basis of all property exchange therefor. If in an exchange or distribution to which section 351, 356, 361, 371(b), or 374 applies both nonrecognition property and ‘‘other property’’ are received, the basis of all the property except ‘‘other property’’ held after the transaction shall be determined as described in the preceding two sentences decreased by the sum of the money and the fair market value of the ‘‘other property’’ (as of the date of the transaction) and increased by the sum of the amount treated as a dividend (if any) and the amount of the gain recognized on the exchange, but the term *gain* as here used does not include any portion of the recognized gain that was treated as a dividend. In any case in which a taxpayer transfers property with respect to which loss is recognized, such loss shall be reflected in determining the basis of the property received in the exchange. The basis of the ‘‘other property’’ is its fair market value as of the date of the transaction.

(b) The application of paragraph (a) of this section may be illustrated by the following example:

Example. A purchased a share of stock in Corporation X in 1935 for $150. Since that date he has received distributions out of other than earnings and profits (as defined in section 316) totalling $60, so that his adjusted basis for the stock is $90. In a transaction qualifying under section 356, A exchanged this share for one share in Corporation Y, worth $100, cash in the amount of $10, and other property with a fair market value of $30. The exchanging had the effect of the distribution of a dividend. A’s ratable share of the earnings and profits of Corporation X accumulated after February 28, 1913, was $5. A realized a gain of $50 on the exchange, but the amount recognized is limited to $40, the sum of the cash received and the fair market value of the other property. Of the gain recognized, $5 is taxable as a dividend, and $35 as a gain from the exchange of property. The basis to A of the one share of stock of Corporation Y is $90. That is, the adjusted basis of the one share of stock Corporation X ($90), decreased by the sum of the cash received ($10) and the fair market value of the other property received ($30) and increased by the sum of the amount treated as a dividend ($5) and the amount treated as a gain from the exchange of property ($35). The basis of the other property received is $30.

[T.D. 6500, 25 FR 11607. Nov. 26, 1960, as amended by T.D. 6533, 26 FR 404, Jan. 19, 1965; T.D. 7616, 44 FR 26869, May 8, 1979]

§1.358–2 Allocation of basis among nonrecognition property.

(a)(1) As used in this paragraph the term *stock* means stock which is not ''other property'' under section 356 or 371(b), stock with respect to which a distribution is made, and, in the case of a surrender of part of the stock of a particular class, the retained part of such stock. The term *securities* means securities (including, where appropriate, fractional parts of securities) which are not ''other property'' under section 356 or 371(b) and in the case of a surrender of part of the securities of a particular class, the retained part of such securities. Stock, or securities, as the case may be, which differ either because they are in different corporations or because the rights attributable to them differ (although they are in the same corporation) are considered different classes of stock or securities, as the case may be, for purposes of this section.

(2) If as the result of an exchange or distribution under the terms of section 354, 355, 356 or 371(b) a shareholder who owned stock of only one class before the transaction owns stock of two or more classes after the transaction, then the basis of all the stock held before the transaction (as adjusted under §1.358–1) shall be allocated among the stock of all classes (whether or not such stock was received in the transaction) held immediately after the transaction in proportion to the fair market values of the stock of each class.

(3) If as the result of an exchange under the terms of section 354, 355, 356 or 371(b) a security holder who owned only securities, all of one class, before the transaction, owns securities or stock of more than one class, or owns both stock and securities, then the basis of all the securities held before the transaction (as adjusted under §1.358–1) shall be allocated among all the stock and securities (whether or not received in the transaction) held immediately after the transaction in proportion to the fair market values of the stock of each class and the securities of each class.

(4) In every case in which, before the transactions, a person owned stock of more than one class or securities of more than one class or owned both stock and securities, a determination must be made, upon the basis of all the facts, of the stock or securities received with respect to stock and securities of each class held (whether or not surrendered). The allocation described in subparagraph (2) of this paragraph shall be separately made as to the stock of each class with respect to which there is an exchange or distribution and the allocation described in subparagraph (3) of this paragraph shall be separately made with respect to the securities of each class, part or all of which are surrendered in the exchange.

(5) Notwithstanding the provisions of subparagraphs (2), (3), and (4) of this paragraph, in any case in which a plan of recapitalization under section 368(a)(1)(E) provides that each holder of stock or securities of a particular class shall have an option to surrender some or none of such stock or securities in exchange for stock or securities, and a shareholder or security holder exchanges an identifiable part of his stock or securities, the basis of the part of the stock or securities retained shall remain unchanged and shall not be taken into account in determining the basis of the stock or securities received.

(b)(1) As used in this paragraph the term *stock* refers only to stock which is not ''other property'' under section 351, 361, or 374 and the term *securities* refers only to securities which are not ''other property'' under section 351, 361, or 374.

(2) If in an exchange to which section 351 or 361 applies property is transferred to a corporation and the transferor receives stock or securities of more than one class or receives both stock and securities, then the basis of the property transferred (as adjusted under §1.358–1) shall be allocated among all of the stock and securities received in proportion to the fair market values of the stock of each class and the securities of each class.

(c) The application of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). A, an individual, owns stock in Corporation X with an adjusted basis of

$1,000. In a transaction qualifying under section 356 (so far as such section relates to section 354), he exchanged this stock for 20 shares of stock of Corporation Y worth $1,200 and securities of Corporation Y worth $400. A realizes a gain of $600 of which $400 is recognized. The adjusted basis in A's hands of each share of the stock of Corporation Y is $50 determined by allocating the basis of the stock of Corporation X ratably to the stock of Corporation Y received in the exchange. The securities of Corporation Y have a basis in the hands of A of $400.

Example (2). B, an individual, owns a security in the principal amount of $10,000 with a basis of $5,000. In a transaction to which section 354 is applicable, he exchanges this security for four securities in the principal amount of $750 each, worth $800 each, four securities in the principal amount of $750 each, worth $600 each, class A common stock worth $1,000, and class B common stock worth $400. B realizes a gain of $2,000, none of which is recognized. The basis of his original security, $5,000, will be allocated 32/70ths to the four securities worth $800, 24/70ths to the four securities worth $600, 10/70ths to the class A common stock, and 4/70ths to the class B common stock.

Example (3). C, an individual, owns stock of Corporation Y with a basis of $5,000 and owns a security issued by Corporation Y in the principal amount of $5,000 with a basis of $5,000. In a transaction to which section 354 is applicable, he exchanges the stock of Corporation Y for stock of Corporation Z with a value of $6,000, and he exchanges the security of Corporation Y for stock of Corporation Z worth $1,500 and a security of Corporation Z in the principal amount of $4,500 worth $4,500. No gain is recognized to C on either exchange. The basis of the stock of Corporation Z received for the stock of Corporation Y is $5,000. The bases of the stock and security of Corporation Z received in exchange for the security of Corporation Y are $1,250 and $3,750, respectively.

Example (4). D, an individual, owns stock in Corporation M with a basis of $15,000, worth $40,000, and owns a security issued by Corporation M in the principal amount of $5,000 with a basis of $4,000. In a transaction qualifying under section 356 (so far as such section relates to section 355), he exchanges the security of Corporation M for a security of Corporation O (a controlled corporation) in the principal amount of $5,000, worth $5,000, and exchanges one-half of his stock of Corporation M for stock of Corporation O worth $15,000 and a security of Corporation O in the principal amount of $5,000, worth $5,000. All of the stock and securities of Corporation O are distributed pursuant to the transaction. D realizes a gain of $12,500 on the exchange of the stock of Corporation M for the stock and security of Corporation O of which $5,000 is recognized. D also realizes a gain of $1,000 on the exchange of a security of Corporation M for a security of Corporation O, none of which is recognized. The basis of his stock of Corporation M held before the transaction is allocated 20/35ths to the stock of Corporation M held after the transaction and 15/35ths to the stock of Corporation O. The basis of the security of Corporation O received in exchange for his security of Corporation M is $4,000, the basis of the security of Corporation M exchanged. The basis of the security of Corporation O received with respect to D's stock of Corporation M is $5,000, its fair market value.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7616, 44 FR 26869, May 8, 1979; T.D. 8648, 60 FR 66079, Dec. 21, 1995]

§1.358–3 Treatment of assumption of liabilities.

(a) For purposes of section 358, where a party to the exchange assumes a liability of a distributee or acquires from him property subject to a liability, the amount of such liability is to be treated as money received by the distributee upon the exchange, whether or not the assumption of liabilities resulted in a recognition of gain or loss to the taxpayer under the law applicable to the year in which the exchange was made.

(b) The application of paragraph (a) of this section may be illustrated by the following examples:

Example (1). A, an individual, owns property with an adjusted basis of $100,000 on which there is a purchase money mortgage of $25,000. On December 1, 1945, A organizes Corporation X to which he transfers the property in exchange for all the stock of Corporation X and the assumption by Corporation X of the mortgage. The capital stock of the Corporation X has a fair market value of $150,000. Under sections 351 and 357, no gain or loss is recognized to A. The basis in A's hands of the stock of Corporation X is $75,000, computed as follows:

Adjusted basis of property transferred	$100,000
Less: Amount of money received (amount of liabilities assumed)	—25,000
Basis of Corporation X stock to A	75,000

Example (2). A, an individual, owns property with an adjusted basis of $25,000 on which there is a mortgage of $50,000. On December 1, 1954, A organizes Corporation X to which he transfers the property in exchange for all the stock of Corporation X and the assumption by Corporation X of the mortgage. The stock of Corporation X has a fair market value of $50,000. Under sections 351 and 357, gain is recognized to A in the amount of

$25,000. The basis in A's hands of the stock of Corporation X is zero, computed as follows:

Adjusted basis of property transferred	$25,000
Less: Amount of money received (amount of liabilities)	—50,000
Plus: Amount of gain recognized to taxpayer	25,000
Basis of Corporation X stock to A	0

§ 1.358–4 Exceptions.

(a) *Plan of reorganization adopted after October 22, 1968.* In the case of a plan of reorganization adopted after October 22, 1968, section 358 does not apply in determining the basis of property acquired by a corporation in connection with such reorganization by the exchange of its stock or securities (or by the exchange of stock or securities of a corporation which is in control of the acquiring corporation) as the consideration in whole or in part for the transfer of the property to it. See section 362 and the regulations pertaining to that section for rules relating to basis to corporations of property acquired in such cases.

(b) *Plan of reorganization adopted before October 23, 1968.* In the case of a plan of reorganization adopted before October 23, 1968, section 358 does not apply in determining the basis of property acquired by a corporation in connection with such reorganization by the issuance of stock or securities of such corporation (or by the issuance of stock or securities of another corporation which is in control of such corporation) as the consideration in whole or in part for the transfer of the property to it. The term *issuance of stock or securities* includes any transfer of stock or securities, including stock or securities which were purchased or were acquired as a contribution to capital. See section 362 and the regulations pertaining to that section for rules relating to basis to corporations of property acquired in such cases.

[T.D. 7422, 41 FR 26569, June 28, 1976]

§ 1.358–5 [Reserved]

§ 1.358–6 Stock basis in certain triangular reorganizations.

(a) *Scope.* This section provides rules for computing the basis of a controlling corporation in the stock of a controlled corporation as the result of certain reorganizations involving the stock of the controlling corporation as described in paragraph (b) of this section. The rules of this section are in addition to rules under other provisions of the Internal Revenue Code and principles of law. See, e.g., section 1001 for the recognition of gain or loss by the controlled corporation on the exchange of property for the assets or stock of a target corporation in a reorganization described in section 368.

(b) *Triangular reorganizations*—(1) *Nomenclature.* For purposes of this section—

(i) *P* is a corporation—

(A) That is a party to a reorganization,

(B) That is in control (within the meaning of section 368(c)) of another party to the reorganization, and

(C) Whose stock is transferred pursuant to the reorganization.

(ii) *S* is a corporation—

(A) That is a party to the reorganization, and

(B) That is controlled by *P*.

(iii) *T* is a corporation that is another party to the reorganization.

(2) *Definitions of triangular reorganizations.* This section applies to the following reorganizations (which are referred to collectively as *triangular reorganizations*):

(i) *Forward triangular merger.* A forward triangular merger is a statutory merger of *T* and *S*, with *S* surviving, that qualifies as a reorganization under section 368(a)(1)(A) or (G) by reason of the application of section 368(a)(2)(D).

(ii) *Triangular C reorganization.* A triangular C reorganization is an acquisition by *S* of substantially all of *T*'s assets in exchange for *P* stock in a transaction that qualifies as a reorganization under section 368(a)(1)(C).

(iii) *Reverse triangular merger.* A reverse triangular merger is a statutory merger of *S* and *T*, with *T* surviving, that qualifies as a reorganization under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(E).

(iv) *Triangular B reorganization.* A triangular B reorganization is an acquisition by *S* of *T* stock in exchange for P stock in a transaction that qualifies as a reorganization under section 368(a)(1)(B).

(c) *General rules.* Subject to the special rule provided in paragraph (d) of this section, *P*'s basis in the stock of *S* or *T*, as applicable, as a result of a triangular reorganization, is adjusted under the following rules—

(1) *Forward triangular merger or triangular C reorganization*—(i) *In general.* In a forward triangular merger or a triangular C reorganization, *P*'s basis in its *S* stock is adjusted as if—

(A) *P* acquired the *T* assets acquired by *S* in the reorganization (and *P* assumed any liabilities which *S* assumed or to which the *T* assets acquired by *S* were subject) directly from *T* in a transaction in which *P*'s basis in the *T* assets was determined under section 362(b); and

(B) *P* transferred the *T* assets (and liabilities which *S* assumed or to which the *T* assets acquired by *S* were subject) to *S* in a transaction in which *P*'s basis in *S* stock was determined under section 358.

(ii) *Limitation.* If, in applying section 358, the amount of *T* liabilities assumed by *S* or to which the *T* assets acquired by *S* are subject equals or exceeds *T*'s aggregate adjusted basis in its assets, the amount of the adjustment under paragraph (c)(1)(i) of this section is zero. *P* recognizes no gain under section 357(c) as a result of a triangular reorganization.

(2) *Reverse triangular merger*—(i) *In general*—(A) *Treated as a forward triangular merger.* Except as otherwise provided in this paragraph (c)(2), *P*'s basis in its *T* stock acquired in a reverse triangular merger equals its basis in its *S* stock immediately before the transaction adjusted as if *T* had merged into *S* in a forward triangular merger to which paragraph (c)(1) of this section applies.

(B) *Allocable share.* If *P* acquires less than all of the *T* stock in the transaction, the basis adjustment described in paragraph (c)(2)(i)(A) of this section is reduced in proportion to the percentage of *T* stock not acquired in the transaction. The percentage of *T* stock not acquired in the transaction is determined by taking into account the fair market value of all classes of *T* stock.

(C) *Special rule if P owns T stock before the transaction.* Solely for purposes of paragraphs (c)(2)(i)(A) and (B) of this section, if *P* owns *T* stock before the transaction, *P* may treat that stock as acquired in the transaction or not, without regard to the form of the transaction.

(ii) *Reverse triangular merger that qualifies as a section 351 transfer or section 368(a)(1)(B) reorganization.* Notwithstanding paragraph (c)(2)(i) of this section, if a reorganization qualifies as both a reverse triangular merger and as a section 351 transfer or as both a reverse triangular merger and a reorganization under section 368(a)(1)(B), *P* can—

(A) Determine the basis in its *T* stock as if paragraph (c)(2)(i) of this section applies; or

(B) Determine the basis in the *T* stock acquired as if *P* acquired such stock from the former *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under section 362(b).

(3) *Triangular B reorganization.* In a triangular B reorganization, *P*'s basis in its *S* stock is adjusted as if—

(i) *P* acquired the *T* stock acquired by *S* in the reorganization directly from the *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under section 362(b); and

(ii) *P* transferred the *T* stock to *S* in a transaction in which *P*'s basis in its *S* stock was determined under section 358.

(4) *Examples.* The rules of this paragraph (c) are illustrated by the following examples. For purposes of these examples, *P*, *S*, and *T* are domestic corporations, *P* and *S* do not file consolidated returns, *P* owns all of the only class of *S* stock, the *P* stock exchanged in the transaction satisfies the requirements of the applicable triangular reorganization provisions, and the facts set forth the only corporate activity.

Example 1. Forward triangular merger. (a) *Facts.* T has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. Pursuant to a plan, *P* forms *S* with $5 cash (which S retains), and *T* merges into *S*. In the merger, the *T* shareholders receive *P* stock worth $100 in exchange for their *T* stock. The transaction is a reorganization to which sections 368(a)(1)(A) and (a)(2)(D) apply.

(b) *Basis adjustment.* Under §1.358–6(c)(1), *P*'s $5 basis in its *S* stock is adjusted as if *P* acquired the *T* assets acquired by *S* in the reorganization directly from *T* in a transaction in which *P*'s basis in the *T* assets was determined under section 362(b). Under section 362(b), *P* would have an aggregate basis of $60 in the *T* assets. *P* is then treated as if it transferred the *T* assets to *S* in a transaction in which *P*'s basis in the *S* stock was determined under section 358. Under section 358, *P*'s $5 basis in its *S* stock would be increased by the $60 basis in the *T* assets deemed transferred. Consequently, *P* has a $65 basis in its *S* stock as a result of the reorganization.

(c) *Use of pre-existing S.* The facts are the same as paragraph (a) of this *Example 1,* except that *S* is an operating company with substantial assets that has been in existence for several years. *P* has a $110 basis in the *S* stock. Under § 1.358–6(c)(1), *P*'s $110 basis in its *S* stock is increased by the $60 basis in the *T* assets deemed transferred. Consequently, *P* has a $170 basis in its *S* stock as a result of the reorganization.

(d) *Mixed consideration.* The facts are the same as paragraph (a) of this *Example 1,* except that the *T* shareholders receive *P* stock worth $80 and $20 cash from *P*. Under section 358, *P*'s $5 basis in its *S* stock is increased by the $60 basis in the *T* assets deemed transferred. Consequently, *P* has a $65 basis in its *S* stock as a result of the reorganization.

(e) *Liabilities.* The facts are the same as paragraph (a) of this *Example 1,* except that *T*'s assets are subject to $50 of liabilities, and the *T* shareholders receive $50 of *P* stock in exchange for their *T* stock. Under section 358, *P*'s basis in its *S* stock is increased by the $60 basis in the *T* assets deemed transferred and decreased by the $50 of liabilities to which the *T* assets acquired by *S* are subject. Consequently, *P* has a net basis adjustment of $10, and a $15 basis in its *S* stock as a result of the reorganization.

(f) *Liabilities in excess of basis.* The facts are the same as in paragraph (a) of this *Example 1,* except that *T*'s assets are subject to liabilities of $90, and the *T* shareholders receive $10 of *P* stock in exchange for their *T* stock in the reorganization. Under § 1.358–6(c)(1)(ii), the adjustment under § 1.358–6(c) is zero if the amount of the liabilities which *S* assumed or to which the *T* assets acquired by *S* are subject exceeds the aggregate adjusted basis in *T*'s assets. Consequently, *P* has no adjustment in its *S* stock, and *P* has a $5 basis in its *S* stock as a result of the reorganization.

Example 2. Reverse triangular merger.(a) *Facts. T* has assets with an aggregate basis of $60 and a fair market value of $100 and no liabilities. *P* has a $110 basis in its *S* stock. Pursuant to a plan, *S* merges into *T* with *T* surviving. In the merger, the *T* shareholders receive $10 cash from *P* and *P* stock worth $90 in exchange for their *T* stock. The transaction is a reorganization to which sections 368(a)(1)(A) and (a)(2)(E) apply.

(b) *Basis adjustment.* Under § 1.358–6(c)(2)(i)(A), *P*'s basis in the *T* stock acquired is *P*'s $110 basis in its *S* stock before the transaction, adjusted as if *T* had merged into *S* in a forward triangular merger to which § 1.358–6(c)(1) applies. In such a case, *P*'s $110 basis in its *S* stock before the transaction would have been increased by the $60 basis of the *T* assets deemed transferred. Consequently, *P* has a $170 basis in its *T* stock immediately after the transaction.

(c) *Reverse triangular merger that also qualifies under section 368(a)(1)(B).* The facts relating to *T* are the same as in paragraph (a) of this *Example 2. P,* however, forms *S* pursuant to the plan of reorganization. The *T* shareholders receive $100 worth of *P* stock (and no cash) in exchange for their *T* stock. The *T* shareholders have an aggregate basis in their *T* stock of $85 immediately before the reorganization. The reorganization qualifies as both a reverse triangular merger and a reorganization under section 368(a)(1)(B). Under § 1.358–6(c)(2)(ii), *P* may determine its basis in its *T* stock either as if § 1.358–6(c)(2)(i) applied to the *T* stock acquired, or as if *P* acquired the *T* stock from the former *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under section 362(b). Accordingly, *P* may determine a basis in its *T* stock of $60 (*T*'s net asset basis) or $85 (the *T* shareholders' aggregate basis in the *T* stock immediately before the reorganization).

(d) *Allocable share in a reverse triangular merger.* The facts are the same as in paragraph (a) of this *Example 2,* except that *X*, a 10% shareholder of *T*, does not participate in the transaction. The remaining *T* shareholders receive $10 cash from *P* and *P* stock worth $80 for their *T* stock. *P* owns 90% of the *T* stock after the transaction. Under § 1.358–6(c)(2)(i)(A), *P*'s basis in its *T* stock is *P*'s $110 basis in its *S* stock before the reorganization, adjusted as if *T* had merged into *S* in a forward triangular merger. In such a case, *P*'s basis would have been adjusted by the $60 basis in the *T* assets deemed transferred. Under § 1.358–6(c)(2)(i)(B), however, the basis adjustment determined under § 1.358–6(c)(2)(i)(A) is reduced in proportion to the percentage of *T* stock not acquired by *P* in the transaction. The percentage of *T* stock not acquired in the transaction is 10%. Therefore, *P* reduces its $60 basis adjustment by 10%, resulting in a net basis adjustment of $54. Consequently, *P* has a $164 basis in its *T* stock as a result of the transaction.

(e) *P's ownership of T stock.* The facts are the same as in paragraph (a) of this *Example 2,* except that *P* owns 10% of the *T* stock before the transaction. *P*'s basis in that *T* stock is $8. All the *T* shareholders other than *P* surrender their *T* stock for $10 cash from *P* and *P* stock worth $80. *P* does not surrender the stock in the transaction. Under § 1.358–6(c)(2)(i)(C), *P* may treat its *T* stock owned before the transaction as acquired in the transaction or not. If *P* treats that *T* stock as acquired in the transaction, *P*'s basis in that *T* stock and the *T* stock actually acquired in the transaction equals *P*'s $110 basis in its *S* stock before the transaction, adjusted by the $60 basis of the *T* assets deemed transferred, for a total basis of $170. If *P* treats its *T* stock as not acquired, *P* retains its $8 pre-transaction basis in that stock. *P*'s basis in its other *T* shares equals *P*'s $110 basis in its *S* stock before the transaction, adjusted by $54 (the $60 basis in the *T* assets deemed transferred, reduced by 10%), for a total basis of $164 in those shares. See §1.358–6(c)(2)(i)(A) and (B). Consequently, if *P* treats its *T* shares as not acquired, *P*'s total basis in all of its *T* shares is $172.

Example 3. Triangular B reorganization.(a) *Facts. T* has assets with a fair market value of $100 and no liabilities. The *T* shareholders have an aggregate basis in their *T* stock of $85 immediately before the reorganization. Pursuant to a plan, *P* forms *S* with $5 cash and *S* acquires all of the *T* stock in exchange for $100 of *P* stock. The transaction is a reorganization to which section 368(a)(1)(B) applies.

(b) *Basis adjustment.* Under §1.358–6(c)(3), *P* adjusts its $5 basis in its *S* stock by treating *P* as if it acquired the *T* stock acquired by *S* in the reorganization directly from the *T* shareholders in exchange for the *P* stock in a transaction in which *P*'s basis in the *T* stock was determined under section 362(b). Under section 362(b), *P* would have an aggregate basis of $85 in the *T* stock received by *S* in the reorganization. *P* is then treated as if it transferred the *T* stock to *S* in a transaction in which *P*'s basis in the *S* stock was determined under section 358. Under section 358, *P*'s basis in its *S* stock would be increased by the $85 basis in the *T* stock deemed transferred. Consequently, *P* has a $90 basis in its *S* stock as a result of the reorganization.

(d) *Special rule for consideration not provided by P*—(1) *In general.* The amount of *P*'s adjustment to basis in its *S* or *T* stock, as applicable, described in paragraph (c) of this section is decreased by the fair market value of any consideration (including *P* stock in which gain or loss is recognized, see §1.1032–2(c)) that is exchanged in the reorganization and that is not provided by *P* pursuant to the plan of reorganization. This paragraph (d) does not apply to the amount of *T* liabilities assumed by *S* or to which the *T* assets acquired by *S* are subject under paragraph (c)(1) of this section (or deemed assumed or taken subject to by *S* under paragraph (c)(2)(i) of this section).

(2) *Limitation. P* makes no adjustment to basis under this section if the decrease required under paragraph (d)(1) of this section equals or exceeds the amount of the adjustment described in paragraph (c) of this section.

(3) *Example.* The rules of this paragraph (d) are illustrated by the following example. For purposes of this example, *P, S,* and *T* are domestic corporations, *P* and *S* do not file consolidated returns, *P* owns all of the only class of *S* stock, the *P* stock exchanged in the transaction satisfies the requirements of the applicable triangular reorganization provisions, and the facts set forth the only corporate activity.

Example. (a)*Facts.* T has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. *S* is an operating company with substantial assets that has been in existence for several years. *P* has a $100 basis in its *S* stock. Pursuant to a plan, *T* merges into *S* and the *T* shareholders receive $70 of *P* stock provided by *P* pursuant to the plan and $30 of cash provided by *S* in exchange for their *T* stock. The transaction is a reorganization to which sections 368(a)(1)(A) and (a)(2)(D) apply.

(b) *Basis adjustment.* Under §1.358–6(c)(1), *P*'s $100 basis in its *S* stock is increased by the $60 basis in the *T* assets deemed transferred. Under §1.358–6(d)(1), the $60 adjustment is decreased by the $30 of cash provided by *S* in the reorganization. Consequently, *P* has a net adjustment of $30 in its *S* stock, and *P* has a $130 basis in its *S* stock as a result of the reorganization.

(c) *Appreciated asset.* The facts are the same as in paragraph (a) of this *Example,* except that in the reorganization *S* provides an asset with a $20 adjusted basis and $30 fair market value instead of $30 of cash. The basis results are the same as in paragraph (b) of this *Example.* In addition, *S* recognizes $10 of gain under section 1001 on its disposition of the asset in the reorganization.

(d) *Depreciated asset.* The facts are the same as in paragraph (c) of this *Example,* except that *S* has a $60 adjusted basis in the asset. The basis results are the same as in paragraph (b) of this *Example.* In addition, *S* recognizes $30 of loss under section 1001 on its disposition of the asset in the reorganization.

(e) *P stock.* The facts are the same as in paragraph (a) of this *Example,* except that in the reorganization *S* provides *P* stock with a fair market value of $30 instead of $30 of cash. *S* acquired the *P* stock in an unrelated transaction several years before the reorganization. *S* has a $20 adjusted basis in the *P* stock. The basis results are the same as in paragraph (b) of this *Example.* In addition, *S* recognizes $10 of gain on its disposition of the *P* stock in the reorganization. See §1.1032–2(c).

(e) *Cross-reference.* For rules relating to stock basis adjustments made as a result of a triangular reorganization in which *P* and *S*, or *P* and *T*, as applicable, are, or become, members of a consolidated group, see § 1.1502–30. For rules relating to stock basis adjustments after a group structure change, see § 1.1502–31.

(f) *Effective dates*—(1) *General rule.* Except as otherwise provided in this paragraph (f), this section applies to triangular reorganizations occurring on or after December 23, 1994.

(2) *Special rule for reverse triangular mergers.* For a reverse triangular merger occurring before December 23, 1994, *P* may—

(i) Determine the basis in its *T* stock as if paragraph (c)(2)(i) of this section applied; or

(ii) Determine the basis in its *T* stock acquired as if *P* acquired such stock from the former *T* shareholders in a transaction in which *P*'s basis in the *T* stock was determined under section 362(b).

[T.D. 8648, 60 FR 66079, Dec. 21, 1995; 61 FR 11547, Mar. 21, 1996]

EFFECTS ON CORPORATION

§ 1.361–1 Nonrecognition of gain or loss to corporations.

Section 361 provides the general rule that no gain or loss shall be recognized if a corporation, a party to a reorganization, exchanges property in pursuance of the plan of reorganization solely for stock or securities in another corporation, a party to the reorganization. This provision includes only stock and securities received in connection with a reorganization defined in section 368(a). It also includes nonvoting stock and securities in a corporation, a party to a reorganization, received in a transaction to which section 368(a)(1)(C) is applicable only by reason of section 368(a)(2)(B).

§ 1.362–1 Basis to corporations.

(a) *In general.* Section 362 provides, as a general rule, that if property was acquired on or after June 22, 1954, by a corporation (1) in connection with a transaction to which section 351 (relating to transfer of property to corporation controlled by transferor) applies, (2) as paid-in surplus or as a contribution to capital, or (3) in connection with a reorganization to which part III, subchapter C, chapter 1 of the Code applies, then the basis shall be the same as it would be in the hands of the transferor, increased in the amount of gain recognized to the transferor on such transfer. (See also § 1.362–2.)

(b) *Exceptions.* (1) In the case of a plan of reorganization adopted after October 22, 1968, section 362 does not apply if the property acquired in connection with such reorganization consists of stock or securities in a corporation a party to the reorganization, unless acquired by the exchange of stock or securities of the transferee (or of a corporation which is in control of the transferee) as the consideration in whole or in part for the transfer.

(2) In the case of a plan of reorganization adopted before October 23, 1968, section 362 does not apply if the property acquired in connection with such reorganization consists of stock or securities in a corporation a party to the reorganization, unless acquired by the issuance of stock or securities of the transferee (or, in the case of transactions occurring after December 31, 1963, of a corporation which is in control of the transferee) as the consideration in whole or in part for the transfer. The term *issuance of stock or securities* includes any transfer of stock or securities, including stock or securities which were purchased or were acquired as a contribution to capital.

[T.D. 7422, 41 FR 26569, June 28, 1976]

§ 1.362–2 Certain contributions to capital.

The following regulations shall be used in the application of section 362(c):

(a) Property deemed to be acquired with contributed money shall be that property, if any, the acquisition of which was the purpose motivating the contribution;

(b) In the case of an excess of the amount of money contributed over the cost of the property deemed to be acquired with such money (as defined in paragraph (a) of this section) such excess shall be applied to the reduction of the basis (but not below zero) of other properties held by the corporation, on the last day of the 12-month period beginning on the day the contribution is received, in the following order—

(1) All property of a character subject to an allowance for depreciation (not including any properties as to which a deduction for amortization is allowable),

(2) Property with respect to which a deduction for amortization is allowable,

(3) Property with respect to which a deduction for depletion is allowable under section 611 but not under section 613, and

(4) All other remaining properties.

The reduction of the basis of each of the properties within each of the above categories shall be made in proportion to the relative bases of such properties.

(c) With the consent of the Commissioner, the taxpayer may, however, have the basis of the various units of property within a particular category adjusted in a manner different from the general rule set forth in paragraph (b) of this section. Variations from such rule may, for example, involve adjusting the basis of only certain units of the taxpayer's property within a given category. A request for variations from the general rule should be filed by the taxpayer with its return for the taxable year for which the transfer of the property has occurred.

§ 1.367(a)–1T Transfers to foreign corporations subject to section 367(a): In general (temporary).

(a) *Purpose and scope of regulations.* These regulations set forth rules relating to the provisions of section 367(a) concerning certain transfers of property to foreign corportions. This section provides general rules explaining the effect of section 367(a)(1) and describing the transfers of property that are subject to the rule of that section. Section 1.367(a)–2T provides rules concerning the exception from the rule of section 367(a)(1) for transfers of property to be used in the active conduct of a trade or business outside of the United States. Rules concerning the application of section 367(a)(1) to transfers of stock or securities are provided in § 1.367(a)–3, while § 1.367(a)–4T provides special rules regarding other specified transfers of property. Section 1.367(a)–5T describes types of property that are subject to the rule of section 367(a)(1) regardless of whether they are transferred for use in a trade or business. Section 1.367(a)–6T provides rules concerning the application of section 367(a) to the transfer of a branch with previously deducted losses. Finally, § 1.367(a)–7T contains transitional rules concerning transfers of intangible property to foreign corporations made after June 6, 1984 and before January 1, 1985. Rules explaining the operation of section 367(d), concerning transfers of intangible property pursuant to an exchange described in section 351 or 361, are provided in § 1.367(d)–1T. Rules concerning the reporting requirements of section 6038B are provided in §§ 1.6038B–1 and 1.6038B–1T.

(b) *General rules*—(1) *Foreign corporation not considered a corporation for purposes of certain transfers.* If a U.S. person transfers property to a foreign corporation in connection with an exchange described in section 332, 351, 354, 355, 356, or 361, then pursuant to section 367(a)(1) the foreign corporation shall not be considered to be a corporation for purposes of determining the extent to which gain shall be recognized on the transfer. Section 367(a)(1) denies nonrecognition treatment only to transfers of items of property on which gain is realized. Thus, the amount of gain recognized because of section 367(a)(1) is unaffected by the transfer of items of property on which loss is realized (but not recognized). The transfers of property that are subject to section 367(a)(1) are further described in paragraph (c) of this section, and relevant definitions are provided in paragraph (d) of this section.

(2) *Cases in which foreign corporate status is not disregarded.* Section 367(a)(1) shall not apply, and a foreign corporate transferee shall, thus, be considered to be a corporation, in the case of any of the following:

(i) [Reserved]

(ii) The transfer of property for use in the active conduct of a trade or business outside of the United States in accordance with the rules of §§ 1.367(a)-2T through 1.367(a)-6T; or

(iii) Certain other transfers of property described in §§ 1.367(a)-2T through 1.367(a)-6T.

(3) *Limitation of gain required to be recognized*—(i) *In general.* If a U.S. person transfers property to a foreign corporation in a transaction on which gain is required to be recognized under section 367(a) and regulations thereunder, then the gain required to be recognized by the U.S. person shall in no event exceed the gain that would have been recognized on a taxable sale of those items of property if sold individually and without offsetting individual losses against individual gains.

(ii) *Losses.* No loss may be recognized by reason of the operation of section 367.

(iii) *Ordinary income and capital gain.* If section 367(a) and regulations thereunder require the recognition of ordinary income and capital gain in excess of the limitation described in paragraph (b)(3)(i) of this section, then the limitation shall be imposed by making proportionate reductions in the amounts or ordinary income and capital gain, regardless of the character of the gain that would have been recognized on a taxable sale of the property.

(4) *Character, source, and adjustments*—(i) *In general.* If a U.S. person is required to recognize gain under section 367 upon a transfer of property to a foreign corporation, then—

(A) The character and source of such gain shall be determined as if the property had been disposed of in a taxable exchange with the transferee foreign corporation (unless otherwise provided by regulation); and

(B) Appropriate adjustments to earnings and profits, basis, and other affected items shall be made according to otherwise applicable rules, taking into account the gain recognized because of section 367(a)(1). Any increase in the basis of the property received by the foreign corporation resulting from the application of section 367(a) and section 362 (a) or (b) shall be allocated over the transferred property with respect to which gain is recognized in proportion to the amount realized by the U.S. person on the transfer of each item of that property. See paragraph (c)(3) of this section for special rules applicable to transfers of partnership interests.

(ii) *Example.* The rules of this paragraph (b)(4) are illustrated by the following example.

Example. Domestic corporation DC transfers inventory with a fair market value of $1 million and adjusted basis of $800,000 to foreign corporation FC in an exchange for stock of FC that is described in section 351 (a). Title passes within the U.S. Pursuant to section 367(a), DC is required to recognize gain of $200,000 upon the transfer. Under the rule of this paragraph (b)(4), such gain shall be treated as ordinary income (sections 1201 and 1221) from sources within the U.S. (section 861) arising from a taxable exchange with FC. Appropriate adjustments to earnings and profits, basis, etc., shall be made as if the transfer were subject to section 351. Thus, for example, DC's basis in the FC stock received, and FC's basis in the transferred inventory, will each be increased by the $200,000 gain recognized by DC, pursuant to sections 358(a)(1) and 362(a), respectively.

(c) *Transfers described in section 367(a)(1)*—(1) *In general.* A transfer described in section 367(a)(1) is any transfer of property by a U.S. person to a foreign corporation pursuant to an exchange described in section 332, 351, 354, 355, 356, or 361. Section 367(a)(1) applies to such a transfer whether it is made directly, indirectly, or constructively. Indirect or constructive transfers that are described in section 367(a)(1) include the transfers described in subparagraphs (2) through (7) of this paragraph (c).

(2) *Indirect transfers in certain reorganizations.* [Reserved] For further guidance, see § 1.367(a)–3(d).

(3) *Indirect transfers involving partnerships and interests therein*—(i) *Transfer by partnership treated as transfer by partners*—(A) *In general.* If a partnership (whether foreign or domestic) transfers property to a foreign corporation in an exchange described in section 367(a)(1), then a U.S. person that is a partner in the partnership shall be treated as having transferred a proportionate share of the property in an exchange described in section 367(a)(1). A U.S. person's proportionate share of partnership property shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder. The rule of this paragraph (c)(3)(i)(A) is illustrated by the following example.

Example P is a partnership having five equal general partners, two of whom are United States persons. P transfers property to F, a foreign corporation, in connection with an exchange described in section 351. The exchange includes an indirect transfer of property by the partners to F. The transfers of property attributable to those partners who are United States persons, that is, 40 percent of each asset transferred to F, are transfers described in section 367(a)(1). The gain (if any) recognized on the transfer of 40 percent of each asset to F is attributable to the two partners who are United States persons.

(B) *Special adjustments to basis.* If a U.S. person is treated under the rule of this paragraph (c)(3)(i) as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(*1*) The U.S. person's basis in the partnership shall be increased by the amount of gain recognized by him;

(*2*) Solely for purposes of determining the basis of the partnership in the stock of the transferee foreign corporation, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754; and

(*3*) The transferee foreign corporation's basis in the property acquired from the partnership shall be increased by the amount of gain recognized by U.S. persons under this paragraph (c)(3)(i).

(ii) *Transfer of partnership interest treated as transfer of proportionate share of assets*—(A) *In general.* If a U.S. person transfers an interest as a partner in a partnership (whether foreign or domestic) in an exchange described in section 367(a)(1), then that person shall be treated as having transferred a proportionate share of the property of the partnership in an exchange described in section 367(a)(1). Accordingly, the applicability of the exception to section 367(a)(1) provided in §1.367(a)–2T shall be determined with reference to the property of the partnership rather than the partnership interest itself. A U.S. person's proportionate share of partnership property shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder.

(B) *Special adjustments to basis.* If a U.S. person is treated under the rule of paragraph (c)(3)(ii)(A) of this section as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(*1*) The U.S. person's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain so recognized by that person;

(*2*) The transferee foreign corporation's basis in the transferred partnership interest shall be increased by the amount of gain recognized by the U.S. person; and

(*3*) Solely for purposes of determining the partnership's basis in the property held by it, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754.

(C) *Limited partnership interest.* The transfer by a U.S. person of an interest in a partnership shall not be subject to the rules of paragraph (c)(3)(ii)(A) and (B) if—

(*1*) The interest transferred is a limited partnership interest; and

(*2*) Such interest is regularly traded on an established securities market.

Instead, the transfer of such an interest shall be treated in the same manner as a transfer of stock or securities. Thus, the consequences of such a transfer shall be determined under the rules of §1.367(a)–3. For purposes of this section, a limited partnership interest is an interest as a limited partner in a partnership that is organized under the laws of any State of the United States or the District of Columbia. Whether such an interest is regularly traded on an established securities market shall be determined under the provisions of paragraph (c)(3)(ii)(D) of this section.

(D) *Regularly traded on an established securities market*—(*1*) *Established securities market.* For purposes of this paragraph (c)(3)(ii), an established securities market is—

(*i*) A national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);

(*ii*) A foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority; and

(*iii*) An over-the-counter market. An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An inter-dealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of stock and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.

(*2*) *Regularly traded.* A class of interests that is traded on an established securities market is considered to be regularly traded if it is regularly quoted by brokers or dealers making a market in such interests. A class of interests shall be presumed to be regularly traded if the entity has a total of 500 or more interest-holders.

(4) *Transfers by trusts and estates*—(i) *In general.* For purposes of section 367(a), a transfer of property by an estate or trust shall be treated as a transfer by the entity itself and not as an indirect transfer by its beneficiaries. Thus, a transfer of property by a foreign trust or estate (as defined in section 7701(a)(31)) is not described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are U.S. persons. Similarly, a transfer of property by a domestic trust or estate may be described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are foreign persons.

(ii) *Grantor trusts.* A transfer of a portion or all of the assets of a foreign or domestic trust to a foreign corporation in an exchange described in section 367(a)(1) is considered a transfer by any U.S. person who is treated as the owner of any such portion or all of the assets of the trust under sections 671 through 679.

(5) *Termination of election under section 1504(d).* Section 367(A) applies to the constructive reorganization and transfer of property from a domestic corporation to a foreign corporation that occurs upon the termination of an election under section 1504(d), which permits the treatment of certain contiguous country corporations as domestic corporations. The rule of this paragraph (c)(5) is illustrated by the following example.

Example. Domestic corporation Y previously made a valid election under section 1504(d) to have its wholly owned Canadian subsidiary, C, treated as a domestic corporation. On July, 1, 1986, C fails to continue to qualify for the election under section 1504 (d). A constructive reorganization described in section 368(a)(1)(D) occurs. The resulting constructive transfer of assests by ''domestic'' corporation C to Canadian corporation C upon the termination of the election is a transfer of property described in section 367(a)(1).

(6) *Changes in classification of an entity.* If a foreign entity is classified as an entity other than an association taxable as a corporation for United States tax purposes, and subsequently a change is made in the governing documents, articles, or agreements of the entity so that the entity is thereafter classified as an association taxable as a corporation, the change in classification is considered a transfer of property to a foreign corporation in connection with an exchange described in section 351. For purposes of section 367(a)(1), the transfer of property is considered as made by the persons determined under the rules set forth in paragraph (c)(3) of this section with respect to partnerships, and paragraph (c)(4)(i) or (ii), with respect to trusts and estates, and the rules of such paragraphs apply determining whether a transfer described in section 367(a)(1) has been made.

(7) *Contributions to capital.* For rules with respect to the treatment of a contribution to the capital of a foreign corporation as a transfer described in section 367(a)(1), see section 367(c)(2) and the regulations thereunder.

(d) *Definitions.* The following definitions apply for purposes of this section and § 1.367(d)–1T.

(1) *United States person.* The term *United States person* includes those persons described in section 7701(a)(30). The term includes a citizen or resident

of the United States, a domestic partnership, a domestic corporation, and any estate or trust other than a foreign estate or trust. (For definitions of these terms, see section 7701 and regulations thereunder.) For purposes of this section, an individual with respect to whom an election has been made under section 6013 (g) or (h) is considered to be a resident of the United States while such election is in effect. A nonresident alien or a foreign corporation will not be considered a United States person because of its actual or deemed conduct of a trade or business within the United States during a taxable year.

(2) *Foreign corporation.* The term *foreign corporation* has the meaning set forth in section 7701(a)(3) and (5) and §301.7701–5.

(3) *Transfer.* For purposes of section 367 and regulations thereunder, the term *transfer* means any transaction that constitutes a transfer for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable. A person's entering into a bona fide cost-sharing arrangement under §1.482–2(d)(4) or acquiring rights to intangible property under such an arrangement shall not be considered a transfer of property described in section 367(a)(1). See §1.6038B–1T(b)(3) for the date on which the transfer is considered to be made.

(4) *Property.* For purposes of section 367 and regulations thereunder, the term *property* means any item that constitutes property for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable.

(5) *Intangible property*—(i) *In general.* For purposes of section 367 and regulations thereunder, the term *intangible property* means knowledge, rights, documents, and any other intangible item within the meaning of section 936(h)(3)(B) that constitutes property for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable. Such property shall be treated as intangible property for purposes of section 367 (a) and (d) and the regulations thereunder without regard to whether it is used or developed in the United States or in a foreign country and without regard to whether it is used in manufacturing activities or in marketing activities. A working interest in oil and gas properties shall not be considered to be intangible property for purposes of section 367 and the regulations thereunder.

(ii) *Operating intangibles.* An operating intangible is any intangible property of a type not ordinarily licensed or otherwise transferred in transactions between unrelated parties for consideration contingent upon the licensee's or transferee's use of the property. Examples of operating intangibles may include long-term purchase or supply contracts, surveys, studies, and customer lists.

(iii) *Foreign goodwill or going concern value.* Foreign goodwill or going concern value is the residual value of a business operation conducted outside of the United States after all other tangible and intangible assets have been identified and valued. For purposes of section 367 and regulations thereunder the value of the right to use a corporate name in a foreign country shall be treated as foreign goodwill or going concern value.

(iv) *Transitional rule for certain marketing intangibles.* For transfers occurring after December 31, 1984, and before May 16, 1986, for foreign trademarks, tradenames, brandnames, and similar marketing intangibles developed by a foreign branch shall be treated as foreign goodwill or going concern value.

(e) *Close of taxable year in certain section 368(a)(1)(F) reorganizations.* If a domestic corporation is the transferor corporation in a reorganization described in section 368(a)(1)(F) after March 30, 1987, in which the acquiring corporation is a foreign corporation, then the taxable year of the transferor corporation shall end with the close of the date of the transfer and the taxable year of the acquiring corporation shall end with the close of the date on which the transferor's taxable year would have ended but for the occurrence of the transfer. With regard to the consequences of the closing of the taxable year, see section 381 and the regulations thereunder.

(f) *Exchanges under sections 354(a) and 361(a) in certain section 368(a)(1)(F) reorganizations.* In every reorganization under section 368(a)(1)(F), where the transferor corporation is a domestic corporation and the acquiring corporation is a foreign corporation, there is considered to exist—

(1) A transfer of assets by the transferor corporation to the acquiring corporation under section 361(a) in exchange for stock of the acquiring corporation and the assumption by the acquiring corporation of the transferor corporation's liabilities;

(2) A distribution of the stock (or stock and securities) of the acquiring corporation by the transferor corporation to the shareholders (or shareholders and security holders) of the transferor corporation; and

(3) An exchange by the transferor corporation's shareholders (or shareholders and security holders) of the stock of the transferor corporation for stock (or stock and securities) of the acquiring corporation under section 354(a).

For this purpose, it shall be immaterial that the applicable foreign or domestic law treats the acquiring corporation as a continuance of the transferor corporation.

(g) *Effective date of certain section*—

(1) *In general.* Except as specifically provided to the contrary elsewhere in these sections, §§ 1.367(a)–1T through 1.367(a)–6T apply to transfers occurring after December 31, 1984.

(2) *Private rulings.* The taxpayer may rely on a private ruling under section 367(a) received by him before June 16, 1986.

(3) *Certain indirect transfers.* Sections 1.367(a)–1T(c)(2)(i) and (iii) and 1.367(a)–1T(c)(3) apply to transfers made after June 16, 1986. For transfers made before that date, see 26 CFR 1.367(a)–1(b) (revised as of April 1, 1986).

[T.D. 8087, 51 FR 17938, May 16, 1986, as amended at T.D. 8280, 55 FR 1408, Jan. 16, 1990; T.D. 8770, 63 FR 33555, June 19, 1998]

§ 1.367(a)–2T Exception for transfers of property for use in the active conduct of a trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall not apply to property transferred to a foreign corporation if—

(1) Such property is transferred for use by that corporation in the active conduct of a trade or business outside of the United States; and

(2) The U.S. person that transfers the property complies with the reporting requirements of section 6038B and regulations thereunder.

Where these conditions are satisifed, the foreign corporate transferee of the property shall be considered to be a corporation for purposes of determining the extent to which gain or loss is required to be recognized upon the transfer pursuant to section 332, 351, 354 [reserved as to section 355 or so much of section 356 as relates to section 355], 356, or 361. Paragraph (b) of this section provides rules concerning the requirement that property be transferred for use in the active conduct of a trade or business outside of the United States, while paragraph (c) concerns the application of the requirement where the transferee itself retransfers the property. In addition, § 1.367(a)–3T provides rules concerning the treatment of stock or securities transferred to a foreign corporation in an exchange described in section 367(a)(1), and § 1.367(a)–4T provides special rules concerning the treatment of other specified types of property. Finally, §§ 1.367(a)–5T and 1.367(a)–6T provide rules concerning certain transfers of property that are subject to section 367(a)(1) regardless of whether the property is used in the active conduct of a trade or business.

(b) *Active conduct of a trade or business outside the United States*—(1) *In general.* Property qualifies for the exception provided by this section if it is transferred to a foreign corporation for use in the active conduct of a trade or business outside of the United States. Therefore, to determine whether property is subject to the exception provided by this section, four factual determinations must be made:

(i) What is the trade or business of the transferee;

(ii) Do the activities of the transferee constitute the active conduct of that trade or business;

(iii) Is the trade or business conducted outside of the United States; and

(iv) Is the transferred property used or held for use in the trade or business?

Rules concerning these four determinations are provided in paragraphs (b)(2), (3), (4), and (5) of this section.

(2) *Trade or business.* Whether the activities of a foreign corporation constitute a trade or business must be determined under all the facts and circumstances. In general, a trade or business is a specific unified group of activities that constitute (or could constitute) an independent economic enterprise carried on for profit. For example, the activities of a foreign selling subsidiary could constitute a trade or business if they could be independently carried on for profit, even though the subsidiary acts exclusively on behalf of, and has operations fully integrated with, its parent corporation. To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. In this regard, one or more of such activities may be carried on by independent contractors under the direct control of the foreign corporation. (However, see paragraph (b)(3) of this section.) The group of activities must ordinarily include the collection of income and the payment of expenses. If the activities of a foreign corporation do not constitute a trade or business, then the exception provided by this section does not apply, regardless of the level of activities carried on by the corporation. The following activities are not considered to constitute by themselves a trade or business for purposes of this section:

(i) Any activity giving rise to expenses that would be deductible only under section 212 if the activities were carried on by an individual; or

(ii) The holding for one's own account of investments in stock, securities, land, or other property, including casual sales thereof.

(3) *Active conduct.* Whether a trade or business is actively conducted must be determined under all the facts and circumstances. In general, a corporation actively conducts a trade or business only if the officers and employees of the corporation carry out substantial managerial and operational activities. A corporation may be engaged in the active conduct of a trade or business even though incidental activities of the trade or business are carried out on behalf of the corporation by independent contractors. In determining whether the officers and employees of the corporation carry out substantial managerial and operational activities, however, the activities of independent contractors shall be disregarded. On the other hand, the officers and employees of the corporation are considered to include the officers and employees of related entities who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the lending related entity by), the transferee foreign corporation. Whether a trade or business that produces rents or royalties is actively conducted shall be determined under the principles of §1.954–2(d)(1) (but without regard to whether the rents or royalties are received from an unrelated person). The rule of this paragraph (b)(3) is illustrated by the following example.

Example. X, a domestic corporation, and Y, a foreign corporation not related to X, transfer property to Z, a newly formed foreign corporation organized for the purpose of combining the research activities of X and Y. Z contracts all of its operational and research activities to Y for an arm's-length fee. Z's activities do not constitute the active conduct of a trade or business.

(4) *Outside of the United States.* Whether a foreign corporation conducts a trade or business outside of the United States must be determined under all the facts and circumstances. Generally, the primary managerial and operational activities of the trade or business must be conducted outside the United States and immediately after the transfer the transferred assets must be located outside the United States. Thus, the exception provided by this section would not apply to the transfer of the assets of a domestic business to a foreign corporation if the domestic business continued to operate in the United States after the transfer. In such a case, the primary operational activities of the business would continue to be conducted in the United States. Moreover, the transferred assets would be located in the United States. However, it is not necessary that every item of property transferred be used outside of the United States. As long as the primary managerial and operational activities of the trade or

business are conducted outside of the United States and substantially all of the transferred assets are located outside the United States, incidental items of transferred property located in the United States may be considered to have been transferred for use in the active conduct of a trade or business outside of the United States.

(5) *Use in the trade or business.* Whether property is used or held for use in a trade or business must be determined under all the facts and circumstances. In general, property is used or held for use in a foreign corporation's trade or business if it is—

(i) Held for the principal purpose of promoting the present conduct of the trade or business;

(ii) Acquired and held in the ordinary course of the trade or business; or

(iii) Otherwise held in a direct relationship to the trade or business. Property is considered held in a direct relationship to a trade or business if it is held to meet the present needs of that trade or business and not its anticipated future needs.

Thus, property will not be considered to be held in a direct relationship to a trade or business if it is held for the purpose of providing for future diversification into a new trade or business, future expansion of trade or business activities, future plant replacement, or future business contingencies.

(c) *Property transferred by transferee corporation*—(1) *General rule.* If a foreign corporation receives property in an exchange described in section 367(a)(1) and as part of the same transaction transfers the property to another person, then the exception provided by this section shall not apply to the initial transfer. For purposes of the preceding sentence, a subsequent transfer within six months of the initial transfer shall be considered to be part of the same transaction, and a subsequent transfer more than six months after the initial transfer may be considered to be part of the same transaction upon the application of step-transaction principles.

(2) *Exception.* Notwithstanding paragraph (c)(1) of this section, the active conduct exception provided by this section shall apply to the initial transfer if—

(i) The initial transfer is followed by one or more subsequent transfers described in section 351 or 721; and

(ii) Each subsequent transferee is either a partnership in which the preceding transferor is a general partner or a corporation in which the preceding transferor owns common stock; and

(iii) The ultimate transferee uses the property in the active conduct of a trade or business outside the United States.

(d) *Transitional rule.* Notwithstanding any other provision of this section, property shall be considered to have been transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was transferred after December 31, 1984, and before June 16, 1986;

(2) The property was, or would have been, considered to be transferred for use by the transferee foreign corporation in the active conduct, in any foreign country, or a trade or business, under the principles of section 3.02(1) of Revenue Procedure 68–23, 1968–1 C.B. 821; and

(3) Based on all of the facts and circumstances, it was, or would have been, determined under section 2.02 of Revenue Procedure 68–23 that tax avoidance was not one of the principal purposes of the transaction.

[T.D. 8087, 51 FR 17942, May 16, 1986]

§ 1.367(a)–3 Treatment of transfers of stock or securities to foreign corporations.

(a) *In general.* This section provides rules concerning the transfer of stock or securities by a U.S. person to a foreign corporation in an exchange described in section 367(a). In general, a transfer of stock or securities by a U.S. person to a foreign corporation that is described in section 351, 354 (including a reorganization described in section 368(a)(1)(B) and including an indirect stock transfer described in paragraph (d) of this section), 356 or section 361(a) or (b) is subject to section 367(a)(1) and, therefore, is treated as a taxable exchange, unless one of the exceptions set forth in paragraph (b) of this section (regarding transfers of foreign stock or securities) or paragraph (c) of this section (regarding transfers of domestic stock or securities) applies. However, if in an exchange described in section 354, a U.S. person exchanges stock of a foreign corporation in a reorganization described in section 368(a)(1)(E), or a U.S. person exchanges stock of a domestic or foreign corporation for stock of a foreign corporation pursuant to an asset reorganization described in section 368(a)(1)(C), (D) or (F) that is not treated as an indirect stock transfer under paragraph (d) of this section, such section 354 exchange is not a transfer to a foreign corporation subject to section 367(a). See, e.g., paragraph (d)(3) *Example 12.* For rules regarding other indirect or constructive transfers of stock or securities subject to section 367(a), see § 1.367(a)–1T(c). For additional rules relating to an exchange involving a foreign corporation in connection with which there is a transfer of stock, see section 367(b) and the regulations under that section. For additional rules regarding a transfer of stock or securities in an exchange described in section 361(a) or (b), see section 367(a)(5) and any regulations under that section. For rules regarding reporting requirements with respect to transfers described under section 367(a), see section 6038B and the regulations thereunder.

(b) *Transfers by U.S. persons of stock or securities of foreign corporations to foreign corporations*—(1) *General rule.* Except as provided in section 367(a)(5), a transfer of stock or securities of a foreign corporation by a U.S. person to a foreign corporation that would otherwise be subject to section 367(a)(1) under paragraph (a) of this section shall not be subject to section 367(a)(1) if either—

(i) *Less than 5-percent shareholder.* The U.S. person owns less than five percent (applying the attribution rules of section 318, as modified by section 958(b)) of both the total voting power and the total value of the stock of the transferee foreign corporation immediately after the transfer; or

(ii) *5-percent shareholder.* The U.S. person enters into a five-year gain recognition agreement with respect to the transferred stock or securities as provided in § 1.367(a)–8.

(2) *Certain transfers subject to sections 367(a) and (b)*—(i) *In general.* A transfer of foreign stock or securities described in section 367(a) or any regulations thereunder as well as in section 367(b) or any regulations thereunder shall be concurrently subject to sections 367(a) and (b) and the regulations thereunder, except to the extent that the transferee foreign corporation is not treated as a corporation under section 367(a)(1). The example in paragraph (b)(2)(ii) of this section illustrates the rules of this paragraph (b)(2). For an illustration of the interaction of the indirect stock transfer rules under section 367(a) (described under paragraph (d) of this section) and the rules of section 367(b), see paragraph (d)(3) *Example 11* of this section.

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(2):

Example. (i) *Facts.* DC, a domestic corporation, owns all of the stock of FC1, a controlled foreign corporation within the meaning of section 957(a). DC's basis in the stock of FC1 is $50, and the value of such stock is $100. The section 1248 amount with respect to such stock is $30. FC2, also a foreign corporation, is owned entirely by foreign individuals who are not related to DC or FC1. In a reorganization described in section 368(a)(1)(B), FC2 acquires all of the stock of FC1 from DC in exchange for 20 percent of the voting stock of FC2. FC2 is not a controlled foreign corporation after the reorganization.

(ii) *Result without gain recognition agreement.* Under the provisions of this paragraph (b), if DC fails to enter into a gain recognition agreement, DC is required to recognize in the year of the transfer the $50 of gain that it realized upon the transfer, $30 of which will be treated as a dividend under section 1248.

(iii) *Result with gain recognition agreement.* If DC enters into a gain recognition agreement under § 1.367(a)–8 with respect to the transfer of FC1 stock, the exchange will also be subject to the provisions of section 367(b) and the regulations thereunder to the extent that it is not subject to tax under section 367(a)(1). In such case, DC will be required to recognize the section 1248 amount of $30 on the exchange of FC1 for FC2 stock. See § 1.367(b)–4(b). The deemed dividend of $30 recognized by DC will increase its basis in the FC1 stock exchanged in the transaction and, therefore, the basis of the FC2 stock received in the transaction. The remaining gain of $20 realized by DC (otherwise recognizable under section 367(a)) in the exchange of FC1 stock will not be recognized if

DC enters into a gain recognition agreement with respect to the transfer. (The result would be unchanged if, for example, the exchange of FC1 stock for FC2 stock qualified as a section 351 exchange, or as an exchange described in both sections 351 and 368(a)(1)(B).)

(c) *Transfers by U.S. persons of stock or securities of domestic corporations to foreign corporations*—(1) *In general.* Except as provided in section 367(a)(5), a transfer of stock or securities of a domestic corporation by a U.S. person to a foreign corporation that would otherwise be subject to section 367(a)(1) under paragraph (a) of this section shall not be subject to section 367(a)(1) if the domestic corporation the stock or securities of which are transferred (referred to as the U.S. target company) complies with the reporting requirements in paragraph (c)(6) of this section and if each of the following four conditions is met:

(i) Fifty percent or less of both the total voting power and the total value of the stock of the transferee foreign corporation is received in the transaction, in the aggregate, by U.S. transferors (*i.e.,* the amount of stock received does not exceed the 50-percent ownership threshold).

(ii) Fifty percent or less of each of the total voting power and the total value of the stock of the transferee foreign corporation is owned, in the aggregate, immediately after the transfer by U.S. persons that are either officers or directors of the U.S. target company or that are five-percent target shareholders (as defined in paragraph (c)(5)(iii) of this section) (*i.e.,* there is no control group). For purposes of this paragraph (c)(1)(ii), any stock of the transferee foreign corporation owned by U.S. persons immediately after the transfer will be taken into account, whether or not it was received in the exchange for stock or securities of the U.S. target company.

(iii) Either—

(A) The U.S. person is not a five-percent transferee shareholder (as defined in paragraph (c)(5)(ii) of this section); or

(B) The U.S. person is a five-percent transferee shareholder and enters into a five-year agreement to recognize gain with respect to the U.S. target company stock or securities it exchanged in the form provided in § 1.367(a)–8; and

(iv) The active trade or business test (as defined in paragraph (c)(3) of this section) is satisfied.

(2) *Ownership presumption.* For purposes of paragraph (c)(1) of this section, persons who transfer stock or securities of the U.S. target company in exchange for stock of the transferee foreign corporation are presumed to be U.S. persons. This presumption may be rebutted in accordance with paragraph (c)(7) of this section.

(3) *Active trade or business test*—(i) *In general.* The tests of this paragraph (c)(3), collectively referred to as the active trade or business test, are satisfied if:

(A) The transferee foreign corporation or any qualified subsidiary (as defined in paragraph (c)(5)(vii) of this section) or any qualified partnership (as defined in paragraph (c)(5)(viii) of this section) is engaged in an active trade or business outside the United States, within the meaning of § 1.367(a)–2T(b)(2) and (3), for the entire 36-month period immediately before the transfer;

(B) At the time of the transfer, neither the transferors nor the transferee foreign corporation (and, if applicable, the qualified subsidiary or qualified partnership engaged in the active trade or business) have an intention to substantially dispose of or discontinue such trade or business; and

(C) The substantiality test (as defined in paragraph (c)(3)(iii) of this section) is satisfied.

(ii) *Special rules.* For purposes of paragraphs (c)(3)(i)(A) and (B) of this section, the following special rules apply:

(A) The transferee foreign corporation, a qualified subsidiary, or a qualified partnership will be considered to be engaged in an active trade or business for the entire 36-month period preceding the exchange if it acquires at the time of, or any time prior to, the exchange a trade or business that has been active throughout the entire 36-month period preceding the exchange. This special rule shall not apply, however, if the acquired active trade or business assets were owned by the U.S. target company or any affiliate (within the meaning of section 1504(a) but excluding the exceptions contained in section 1504(b) and substituting ‘‘50 percent’’ for ‘‘80 percent’’ where it appears therein) at any time during the 36-month period prior to the acquisition. Nor will this special rule apply if the principal purpose of such acquisition is to satisfy the active trade or business test.

(B) An active trade or business does not include the making or managing of investments for the account of the transferee foreign corporation or any affiliate (within the meaning of section 1504(a) but excluding the exceptions contained in section 1504(b) and substituting ‘‘50 percent’’ for ‘‘80 percent’’ where it appears therein). (This paragraph (c)(3)(ii)(B) shall not create any inference as to the scope of §1.367(a)–2T(b)(2) and (3) for other purposes.)

(iii) *Substantiality test*—(A) *General rule.* A transferee foreign corporation will be deemed to satisfy the substantiality test if, at the time of the transfer, the fair market value of the transferee foreign corporation is at least equal to the fair market value of the U.S. target company.

(B) *Special rules.* (*1*) For purposes of paragraph (c)(3)(iii)(A) of this section, the value of the transferee foreign corporation shall include assets acquired outside the ordinary course of business by the transferee foreign corporation within the 36-month period preceding the exchange only if either—

(*i*) Both—

(*A*) At the time of the exchange, such assets or, as applicable, the proceeds thereof, do not produce, and are not held for the production of, passive income as defined in section 1296(b); and

(*B*) Such assets are not acquired for the principal purpose of satisfying the substantiality test; or

(*ii*) Such assets consist of the stock of a qualified subsidiary or an interest in a qualified partnership. See paragraph (c)(3)(iii)(B)(*2*) of this section.

(*2*) For purposes of paragraph (c)(3)(iii)(A) of this section, the value of the transferee foreign corporation shall not include the value of the stock of any qualified subsidiary or the value of any interest in a qualified partnership, held directly or indirectly, to the extent that such value is attributable to assets acquired by such qualified subsidiary or partnership outside the ordinary course of business and within the 36-month period preceding the exchange unless those assets satisfy the requirements in paragraph (c)(3)(iii)(B)(*1*) of this section.

(*3*) For purposes of paragraph (c)(3)(iii)(A) of this section, the value of the transferee foreign corporation shall not include the value of assets received within the 36-month period prior to the acquisition, notwithstanding the special rule in paragraph (c)(3)(iii)(B)(*1*) of this section, if such assets were owned by the U.S. target company or an affiliate (within the meaning of section 1504(a) but without the exceptions under section 1504(b) and substituting ‘‘50 percent’’ for ‘‘80 percent’’ where it appears therein) at any time during the 36-month period prior to the transaction.

(4) *Special rules*—(i) *Treatment of partnerships.* For purposes of this paragraph (c), if a partnership (whether domestic or foreign) owns stock or securities in the U.S. target company or the transferee foreign corporation, or transfers stock or securities in an exchange described in section 367(a), each partner in the partnership, and not the partnership itself, is treated as owning and as having transferred, or as owning, a proportionate share of the stock or securities. See §1.367(a)–1T(c)(3).

(ii) *Treatment of options.* For purposes of this paragraph (c), one or more options (or an interest similar to an option) will be treated as exercised and thus will be counted as stock for purposes of determining whether the 50-percent threshold is exceeded or whether a control group exists if a principal purpose of the issuance or the acquisition of the option (or other interest) was the avoidance of the general rule contained in section 367(a)(1).

(iii) *U.S. target has a vestigial ownership interest in transferee foreign corporation.* In cases where, immediately after the transfer, the U.S. target company owns, directly or indirectly (applying the attribution rules of sections 267(c)(1) and (5)), stock of the transferee foreign corporation, that stock will not in any way be taken into account (and, thus, will not be treated as outstanding) in determining whether the 50-percent threshold under paragraph (c)(1)(i) of this section is exceeded or whether a control group under paragraph (c)(1)(ii) of this section exists.

(iv) *Attribution rule.* Except as otherwise provided in this section, the rules of section 318, as modified by the rules of section 958(b) shall apply for purposes of determining the ownership or receipt of stock, securities or other property under this paragraph (c).

(5) *Definitions*—(i) *Ownership statement.* An ownership statement is a statement, signed under penalties of perjury, stating—

(A) The identity and taxpayer identification number, if any, of the person making the statement;

(B) That the person making the statement is not a U.S. person (as defined in paragraph (c)(5)(iv) of this section);

(C) That the person making the statement either—

(*1*) Owns less than 1 percent of the total voting power and total value of a U.S. target company the stock of which is described in Rule 13d–1(d) of Regulation 13D (17 CFR 240.13d–1(d)) (or any rule or regulation to generally the same effect) promulgated by the Securities and Exchange Commission under the Securities and Exchange Act of 1934 (15 USC 78m), and such person did not acquire the stock with a principal purpose to enable the U.S. transferors to satisfy the requirement contained in paragraph (c)(1)(i) of this section; or

(*2*) Is not related to any U.S. person to whom the stock or securities owned by the person making the statement are attributable under the rules of section 958(b), and did not acquire the stock with a principal purpose to enable the U.S. transferors to satisfy the requirement contained in paragraph (c)(1)(i) of this section;

(D) The citizenship, permanent residence, home address, and U.S. address, if any, of the person making the statement; and

(E) The ownership such person has (by voting power and by value) in the U.S. target company prior to the exchange and the amount of stock of the transferee foreign corporation (by voting power and value) received by such person in the exchange.

(ii) *Five-percent transferee shareholder.* A five-percent transferee shareholder is a person that owns at least five percent of either the total voting power or the total value of the stock of the transferee foreign corporation immediately after the transfer described in section 367(a)(1). For special rules involving cases in which stock is held by a partnership, see paragraph (c)(4)(i) of this section.

(iii) *Five-percent target shareholder and certain other 5-percent shareholders.* A five-percent target shareholder is a person that owns at least five percent of either the total voting power or the total value of the stock of the U.S. target company immediately prior to the transfer described in section 367(a)(1). If the stock of the U.S. target company (or any company through which stock of the U.S. target company is owned indirectly or constructively) is described in Rule 13d–1(d) of Regulation 13D (17 CFR 240.13d–1(d)) (or any rule or regulation to generally the same effect), promulgated by the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 USC 78m), then, in the absence of actual knowledge to the contrary, the existence or absence of filings of Schedule 13–D or 13–G (or any similar schedules) may be relied upon for purposes of identifying five-percent target shareholders (or a five-percent shareholder of a corporation which itself is a five-percent shareholder of the U.S. target company). For special rules involving cases in which U.S. target company stock is held by a partnership, see paragraph (c)(4)(i) of this section.

(iv) *U.S. Person.* For purposes of this section, a U.S. person is defined by reference to § 1.367(a)–1T(d)(1). For application of the rules of this section to stock or securities owned or transferred by a partnership that is a U.S. person, however, see paragraph (c)(4)(i) of this section.

(v) *U.S. Transferor.* A U.S. transferor is a U.S. person (as defined in paragraph (c)(5)(iv) of this section) that transfers stock or securities of one or more U.S. target companies in exchange for stock of the transferee foreign corporation in an exchange described in section 367.

(vi) *Transferee foreign corporation.* A transferee foreign corporation is the foreign corporation whose stock is received in the exchange by U.S. persons.

(vii) *Qualified Subsidiary.* A qualified subsidiary is a foreign corporation whose stock is at least 80-percent owned (by total voting power and total value), directly or indirectly, by the transferee foreign corporation. However, a corporation will not be treated as a qualified subsidiary if it was affiliated with the U.S. target company (within the meaning of section 1504(a) but without the exceptions under section 1504(b) and substituting ‘‘50 percent’’ for ‘‘80 percent’’ where it appears therein) at any time during the 36-month period prior to the transfer. Nor will a corporation be treated as a qualified subsidiary if it was acquired by the transferee foreign corporation at any time during the 36-month period prior to the transfer for the principal purpose of satisfying the active trade or business test, including the substantiality test.

(viii) *Qualified partnership.* (A) Except as provided in paragraph (c)(5)(viii)(B) or (C) of this section, a qualified partnership is a partnership in which the transferee foreign corporation—

(*1*) Has active and substantial management functions as a partner with regard to the partnership business; or –

(*2*) Has an interest representing a 25 percent or greater interest in the partnership’s capital and profits.

(B) A partnership is not a qualified partnership if the U.S. target company or any affiliate of the U.S. target company (within the meaning of section 1504(a) but without the exceptions under section 1504(b) and substituting ‘‘50 percent’’ for ‘‘80 percent’’ where it appears therein) held a 5 percent or greater interest in the partnership’s capital and profits at any time during the 36-month period prior to the transfer.

(C) A partnership is not a qualified partnership if the transferee foreign corporation’s interest was acquired by that corporation at any time during the 36-month period prior to the transfer for the principal purpose of satisfying the active trade or business test, including the substantiality test.

(6) *Reporting requirements of U.S. target company.* (i) In order for a U.S. person that transfers stock or securities of a domestic corporation to qualify for the exception provided by this paragraph (c) to the general rule under section 367(a)(1), in cases where 10 percent or more of the total voting power or the total value of the stock of the U.S. target company is transferred by U.S. persons in the transaction, the U.S. target company must comply with the reporting requirements contained in this paragraph (c)(6). The U.S. target company must attach to its timely filed U.S. income tax return for the taxable year in which the transfer occurs a statement titled ‘‘Section 367(a)—Reporting of Cross-Border Transfer Under Reg. §1.367(a)–3(c)(6),’’ signed under penalties of perjury by an officer of the corporation to the best of the officer’s knowledge and belief, disclosing the following information—

(A) A description of the transaction in which a U.S. person or persons transferred stock or securities in the U.S. target company to the transferee foreign corporation in a transfer otherwise subject to section 367(a)(1);

(B) The amount (specified as to the percentage of the total voting power and the total value) of stock of the transferee foreign corporation received in the transaction, in the aggregate, by persons who transferred stock or securities of the U.S. target company. For additional information that may be required to rebut the ownership presumption of paragraph (c)(2) of this section in cases where more than 50 percent of either the total voting power or the total value of the stock of the transferee foreign corporation is received in the transaction, in the aggregate, by persons who transferred stock or securities of the U.S. target company, see paragraph (c)(7) of this section;

(C) The amount (if any) of transferee foreign corporation stock owned directly or indirectly (applying the attribution rules of sections 267(c)(1) and (5)) immediately after the exchange by the U.S. target company;

(D) A statement that there is no control group within the meaning of paragraph (c)(1)(ii) of this section;

(E) A list of U.S. persons who are officers, directors or five-percent target shareholders and the percentage of the total voting power and the total value of the stock of the transferee foreign corporation owned by such persons both immediately before and immediately after the transaction; and

(F) A statement that includes the following—

(*1*) A statement that the active trade or business test described in paragraph (c)(3) of this section is satisfied by the transferee foreign corporation and a description of such business;

(*2*) A statement that on the day of the transaction, there was no intent on the part of the transferee foreign corporation (or its qualified subsidiary, if relevant) or the transferors of the transferee foreign corporation (or qualified subsidiary, if relevant) to substantially discontinue its active trade or business; and

(*3*) A statement that the substantiality test described in paragraph (c)(3)(iii) of this section is satisfied, and documentation that such test is satisfied, including the value of the transferee foreign corporation and the value of the U.S. target company on the day of the transfer, and either one of the following—

(*i*) A statement demonstrating that the value of the transferee foreign corporation 36 months prior to the acquisition, plus the value of any assets described in paragraph (c)(3)(iii)(B) of this section (including stock) acquired by the transferee foreign corporation within the 36-month period, less the amount of any liabilities acquired during that period, exceeds the value of the U.S. target company on the acquisition date; or

(*ii*) A statement demonstrating that the value of the transferee foreign corporation on the date of the acquisition, reduced by the value of any assets not described in paragraph (c)(3)(iii)(B) of this section (including stock) acquired by the transferee foreign corporation within the 36-month period, exceeds the value of the U.S. target company on the date of the acquisition.

(ii) For purposes of this paragraph (c)(6), an income tax return will be considered timely filed if such return is filed, together with the statement required by this paragraph (c)(6), on or before the last date for filing a Federal income tax return (taking into account any extensions of time therefor) for the taxable year in which the transfer occurs. If a return is not timely filed within the meaning of this paragraph (c)(6), the District Director may make a determination, based on all facts and circumstances, that the taxpayer had reasonable cause for its failure to file a timely filed return and, if such a determination is made, the requirement contained in this paragraph (c)(6) shall be waived.

(7) *Ownership statements.* To rebut the ownership presumption of paragraph (c)(2) of this section, the U.S. target company must obtain ownership statements (described in paragraph (c)(5)(i) of this section) from a sufficient number of persons that transfer U.S. target company stock or securities in the transaction that are not U.S. persons to demonstrate that the 50-percent threshold of paragraph (c)(1)(i) of this section is not exceeded. In addition, the U.S. target company must attach to its timely filed U.S. income tax return (as described in paragraph (c)(6)(ii) of this section) for the taxable year in which the transfer occurs a statement, titled ‘‘Section 367(a)—Compilation of Ownership Statements Under Reg. § 1.367(a)–3(c),’’ signed under penalties of perjury by an officer of the corporation, disclosing the following information:

(i) The amount (specified as to the percentage of the total voting power and the total value) of stock of the transferee foreign corporation received, in the aggregate, by U.S. transferors;

(ii) The amount (specified as to the percentage of total voting power and total value) of stock of the transferee foreign corporation received, in the aggregate, by foreign persons that filed ownership statements;

(iii) A summary of the information tabulated from the ownership statements, including—

(A) The names of the persons that filed ownership statements stating that they are not U.S. persons;

(B) The countries of residence and citizenship of such persons; and

(C) Each of such person’s ownership (by voting power and by value) in the

U.S. target company prior to the exchange and the amount of stock of the transferee foreign corporation (by voting power and value) received by such persons in the exchange.

(8) *Certain transfers in connection with performance of services.* Section 367(a)(1) shall not apply to a domestic corporation's transfer of its own stock or securities in connection with the performance of services, if the transfer is considered to be to a foreign corporation solely by reason of §1.83–6(d)(1).

(9) *Private letter ruling option.* The Internal Revenue Service may, in limited circumstances, issue a private letter ruling to permit the taxpayer to qualify for an exception to the general rule under section 367(a)(1) if—

(i) A taxpayer is unable to satisfy all of the requirements of paragraph (c)(3) of this section relating to the active trade or business test of paragraph (c)(1)(iv) of this section, but such taxpayer meets all of the other requirements contained in paragraphs (c)(1)(i) through (c)(1)(iii) of this section, and such taxpayer is substantially in compliance with the rules set forth in paragraph (c)(3) of this section; or

(ii) A taxpayer is unable to satisfy any requirement of paragraph (c)(1) of this section due to the application of paragraph (c)(4)(iv) of this section. Notwithstanding the preceding sentence, in no event will the Internal Revenue Service rule on the issue of whether the principal purpose of an acquisition was to satisfy the active trade or business test, including the substantiality test.

(10) *Examples.* This paragraph (c) may be illustrated by the following examples:

Example 1. Ownership presumption.(i) FC, a foreign corporation, issues 51 percent of its stock to the shareholders of S, a domestic corporation, in exchange for their S stock, in a transaction described in section 367(a)(1).

(ii) Under paragraph (c)(2) of this section, all shareholders of S who receive stock of FC in the exchange are presumed to be U.S. persons. Unless this ownership presumption is rebutted, the condition set forth in paragraph (c)(1)(i) of this section will not be satisfied, and the exception in paragraph (c)(1) of this section will not be available. As a result, all U.S. persons that transferred S stock will recognize gain on the exchange. To rebut the ownership presumption, S must comply with the reporting requirements contained in paragraph (c)(6) of this section, obtaining ownership statements (described in paragraph (c)(5)(i) of this section) from a sufficient number of non-U.S. persons who received FC stock in the exchange to demonstrate that the amount of FC stock received by U.S. persons in the exchange does not exceed 50 percent.

Example 2. Filing of Gain Recognition Agreement.(i) The facts are the same as in *Example 1,* except that FC issues only 40 percent of its stock to the shareholders of S in the exchange. FC satisfies the active trade or business test of paragraph (c)(1)(iv) of this section. A, a U.S. person, owns 10 percent of S's stock immediately before the transfer. All other shareholders of S own less than five percent of its stock. None of S's officers or directors owns any stock in FC immediately after the transfer. A will own 15 percent of the stock of FC immediately after the transfer, 4 percent received in the exchange, and the balance being stock in FC that A owned prior to and independent of the transaction. No S shareholder besides A owns five percent or more of FC immediately after the transfer. The reporting requirements under paragraph (c)(6) of this section are satisfied.

(ii) The condition set forth in paragraph (c)(1)(i) of this section is satisfied because, even after application of the presumption in paragraph (c)(2) of this section, U.S. transferors could not receive more than 50 percent of FC's stock in the transaction. There is no control group because five-percent target shareholders and officers and directors of S do not, in the aggregate, own more than 50 percent of the stock of FC immediately after the transfer (A, the sole five-percent target shareholder, owns 15 percent of the stock of FC immediately after the transfer, and no officers or directors of S own any stock of FC immediately after the transfer). Therefore, the condition set forth in paragraph (c)(1)(ii) of this section is satisfied. The facts assume that the condition set forth in paragraph (c)(1)(iv) of this section is satisfied. Thus, U.S. persons that are not five-percent transferee shareholders will not recognize gain on the exchange of S shares for FC shares. A, a five-percent transferee shareholder, will not be required to include in income any gain realized on the exchange in the year of the transfer if he files a 5-year gain recognition agreement (GRA) and complies with section 6038B.

Example 3. Control Group.(i) The facts are the same as in *Example 2,* except that B, another U.S. person, is a 5-percent target shareholder, owning 25 percent of S's stock immediately before the transfer. B owns 40 percent of the stock of FC immediately after the transfer, 10 percent received in the exchange, and the balance being stock in FC that B owned prior to and independent of the transaction.

(ii) A control group exists because A and B, each a five-percent target shareholder within the meaning of paragraph (c)(5)(iii) of this section, together own more than 50 percent of FC immediately after the transfer (counting both stock received in the exchange and stock owned prior to and independent of the exchange). As a result, the condition set forth in paragraph (c)(1)(ii) of this section is not satisfied, and all U.S. persons (not merely A and B) who transferred S stock will recognize gain on the exchange.

Example 4. Partnerships.(i) The facts are the same as in *Example 3*, except that B is a partnership (domestic or foreign) that has five equal partners, only two of whom, X and Y, are U.S. persons. Under paragraph (c)(4)(i) of this section, X and Y are treated as the owners and transferors of 5 percent each of the S stock owned and transferred by B and as owners of 8 percent each of the FC stock owned by B immediately after the transfer. U.S. persons that are five-percent target shareholders thus own a total of 31 percent of the stock of FC immediately after the transfer (A's 15 percent, plus X's 8 percent, plus Y's 8 percent).

(ii) Because no control group exists, the condition in paragraph (c)(1)(ii) of this section is satisfied. The conditions in paragraphs (c)(1)(i) and (iv) of this section also are satisfied. Thus, U.S. persons that are not five-percent transferee shareholders will not recognize gain on the exchange of S shares for FC shares. A, X, and Y, each a five-percent transferee shareholder, will not be required to include in income in the year of the transfer any gain realized on the exchange if they file 5-year GRAs and comply with section 6038B.

(11) *Effective date.* This paragraph (c) applies to transfers occurring after January 29, 1997. However, taxpayers may elect to apply this section in its entirety to all transfers occurring after April 17, 1994, provided that the statute of limitations of the affected tax year or years is open.

(d) *Indirect stock transfers in certain nonrecognition transfers*—(1) *In general.* For purposes of this section, a U.S. person who exchanges, under section 354 (or section 356) stock or securities in a domestic or foreign corporation for stock or securities in a foreign corporation in connection with one of the following transactions described in paragraphs (d)(1)(i) through (v) of this section (or who is deemed to make such an exchange under paragraph (d)(1)(vi) of this section) shall be treated as having made an indirect transfer of such stock or securities to a foreign corporation that is subject to the rules of this section, including, for example, the requirement, where applicable, that the U.S. transferor enter into a gain recognition agreement to preserve nonrecognition treatment under section 367(a). If the U.S. person exchanges stock or securities of a foreign corporation, see also section 367(b) and the regulations thereunder. For an example of the concurrent application of the indirect stock transfer rules under section 367(a) and the rules of section 367(b), see, e.g., paragraph (d)(3) *Example 11* of this section.

(i) *Mergers described in sections 368(a)(1)(A) and (a)(2)(D).* A U.S. person exchanges stock or securities of a corporation (the acquired corporation)

for stock or securities of a foreign corporation that controls the acquiring corporation in a reorganization described in sections 368(a)(1)(A) and (a)(2)(D). See, e.g., paragraph (d)(3) *Example 1* of this section.

(ii) *Mergers described in sections 368(a)(1)(A) and (a)(2)(E).* A U.S. person exchanges stock or securities of a corporation (the acquiring corporation) for stock or securities in a foreign corporation that controls the acquired corporation in a reorganization described in sections 368(a)(1)(A) and (a)(2)(E).

(iii) *Triangular reorganizations described in section 368(a)(1)(B).* A U.S. person exchanges stock of the acquired corporation for voting stock of a foreign corporation that is in control (as defined in section 368(c)) of the acquiring corporation in connection with a reorganization described in section 368(a)(1)(B). See, e.g., paragraph (d)(3) *Example 4* of this section.

(iv) *Triangular reorganizations described in section 368(a)(1)(C).* A U.S. person exchanges stock or securities of a corporation (the acquired corporation) for voting stock or securities of a foreign corporation that controls the acquiring corporation in a reorganization described in section 368(a)(1)(C). See, e.g., paragraph (d)(3) *Example 5* of this section (for an example of a triangular section 368(a)(1)(C) reorganization involving domestic acquired and acquiring corporations), and paragraph (d)(3)

Example 7 of this section (for an example involving a domestic acquired corporation and a foreign acquiring corporation). If the acquired corporation is a foreign corporation, see paragraph (d)(3) *Example 11* of this section, and section 367(b) and the regulations thereunder.

(v) *Reorganizations described in sections 368*(*a*)(*1*)(*C*) and (*a*)(*2*)(*C*). A U.S. person exchanges stock or securities of a corporation (the acquired corporation) for voting stock or securities of a foreign acquiring corporation in a reorganization described in sections 368(a)(1)(C) and (a)(2)(C) (other than a triangular section 368(a)(1)(C) reorganization described in paragraph (d)(1)(iv) of this section). In the case of a reorganization in which some but not all of the assets of the acquired corporation are transferred pursuant to section 368(a)(2)(C), the transaction shall be considered to be an indirect transfer of stock or securities subject to this paragraph (d) only to the extent of the assets so transferred. (Other assets shall be treated as having been transferred in an asset transfer rather than an indirect stock transfer, and such asset transfer would be subject to the other provisions of section 367, including sections 367(a)(1), (3), (5) and (d) if the acquired corporation is a domestic corporation). See, e.g., paragraph (d)(3) *Example 5B* of this section.

(vi) *Successive transfers of property to which section 351 applies.* A U.S. person transfers property (other than stock or securities) to a foreign corporation in an exchange described in section 351, and all or a portion of such assets transferred to the foreign corporation by such person are, in connection with the same transaction, transferred to a second corporation that is controlled by the foreign corporation in one or more exchanges described in section 351. For purposes of this paragraph (d)(1) and §1.367(a)–8, the initial transfer by the U.S. person shall be deemed to be a transfer of stock described in section 354. (Any assets transferred to the foreign corporation that are not transferred by the foreign corporation to a second corporation shall be treated as a transfer of assets subject to the general rules of section 367, including sections 367(a)(1), (3), (5) and (d), and not as an indirect stock transfer under the rules of this paragraph (d).) See, e.g., paragraph (d)(3) *Example 10* and *Example 10A* of this section.

(2) *Special rules for indirect transfers.* If a U.S. person is considered to make an indirect transfer of stock or securities described in paragraph (d)(1) of this section, the rules of this section and §1.367(a)–8 shall apply to the transfer. For purposes of applying the rules of this section and §1.367(a)–8:

(i) *Transferee foreign corporation.* The transferee foreign corporation shall be the foreign corporation that issues stock or securities to the U.S. person in the exchange.

(ii) *Transferred corporation.* The transferred corporation shall be the acquiring corporation, except that in the case of a triangular section 368(a)(1)(B) reorganization described in paragraph (d)(1)(iii) of this section, the transferred corporation shall be the acquired corporation; in the case of a triangular section 368(a)(1)(C) reorganization described in paragraph (d)(1)(iv) of this section followed by a section 368(a)(2)(C) transfer or a section 368(a)(1)(C) reorganization followed by a section 368(a)(2)(C) transfer described in paragraph (d)(1)(v) of this section, the transferred corporation shall be the transferee corporation; and in the case of successive section 351 transfers described in paragraph (d)(1)(vi) of this section, the transferred corporation shall be the transferee corporation in the final section 351 transfer. The transferred property shall be the stock or securities of the transferred corporation, as appropriate in the circumstances.

(iii) *Amount of gain.* The amount of gain that a U.S. person is required to include in income in the event of a disposition (or a deemed disposition) of some or all of the stock or securities of the transferred corporation shall be the proportionate share (as determined under §1.367(a)–8(e)) of the U.S. person's gain realized but not recognized in the initial exchange (or deemed exchange) of stock or securities under section 354.

(iv) *Gain recognition agreements involving multiple parties.* The U.S. transferor's agreement to recognize gain, as provided in § 1.367(a)–8, shall include appropriate provisions, consistent with the principles of these rules, requiring the transferor to recognize gain in the event of a direct or indirect disposition of the stock or assets of the transferred corporation. For example, in the case of a triangular section 368(a)(1)(B) reorganization described in paragraph (d)(1)(iii) of this section, a disposition of the transferred stock shall include an indirect disposition of such stock by the transferee foreign corporation, such as a disposition of such stock by the acquiring corporation or a disposition of the stock of the acquiring corporation by the transferee foreign corporation. See, e.g., paragraph (d)(3) *Example 4* of this section.

(v) *Determination of whether the transferred corporation disposed of substantially all of its assets.* For purposes of applying § 1.367(a)–8(e)(3)(i) to determine whether the transferred corporation has disposed of substantially all of its assets, the following assets shall be taken into account (but only if such assets are not fully taxable under section 367 in the taxable year that includes the indirect transfer)—

(A) In the case of a sections 368(a)(1)(A) and (a)(2)(D) reorganization, and a triangular section 368(a)(1)(C) reorganization described in paragraph (d)(1)(i) or (iv) of this section, respectively, the assets of the acquired corporation;

(B) In the case of a sections 368(a)(1)(A) and (a)(2)(E) reorganization described in paragraph (d)(1)(ii) of this section, the assets of the acquiring corporation immediately prior to the transaction;

(C) In the case of a sections 368(a)(1)(C) and (a)(2)(C) reorganization described in paragraph (d)(1)(v) of this section, the assets of the acquired corporation that are subject to a transfer described in section 368(a)(2)(C); and

(D) In the case of successive section 351 exchanges described in paragraph (d)(1)(vi) of this section, the assets that are both transferred initially to the foreign corporation, and transferred by the foreign corporation to a second corporation.

(vi) *Coordination between asset transfer rules and indirect stock transfer rules.* If, pursuant to any of the transactions described in paragraph (d)(1) of this section, a domestic corporation transfers (or is deemed to transfer) assets to a foreign corporation (other than in an exchange described in section 354), the rules of section 367, including sections 367(a)(1), (a)(3) and (a)(5), as well as section 367(d), and the regulations thereunder shall apply prior to the application of the rules of this section. However, if a transaction is described in this paragraph (d), section 367(a) shall not apply in the case of a domestic acquired corporation that transfers its assets to a foreign acquiring corporation, to the extent that such assets are re-transferred to a domestic corporation in a transfer described in section 368(a)(2)(C) or paragraph (d)(1)(vi) of this section, but only if the domestic transferee's basis in the assets is no greater than the basis that the domestic acquired company had in such assets. See, e.g., paragraph (d)(3) *Example 8* and *Example 10A* of this section.

(3) *Examples.* The rules of this paragraph (d) and § 1.367(a)–8 are illustrated by the following examples:

Example 1. Section 368(a)(1)(A)/(a)(2)(D) reorganization—(i) *Facts.* F, a foreign corporation, owns all the stock of Newco, a domestic corporation. A, a domestic corporation, owns all of the stock of W, also a domestic corporation. A and W file a consolidated Federal income tax return. A does not own any stock in F (applying the attribution rules of section 318, as modified by section 958(b)). In a reorganization described in sections 368(a)(1)(A) and (a)(2)(D), Newco acquires all of the assets of W, and A receives 40% of the stock of F in an exchange described in section 354.

(ii) *Result.* Pursuant to paragraph (d)(1)(i) of this section, the reorganization is subject to the indirect stock transfer rules. F is treated as the transferee foreign corporation, and Newco is treated as the transferred corporation. Provided that the requirements of paragraph (c)(1) of this section are satisfied, including the requirement that A enter into a five-year gain recognition agreement as described in § 1.367(a)–8, A's exchange of W stock for F stock under section 354 will not be subject to section 367(a)(1). If F disposes (within the meaning of § 1.367(a)–8(e)) of all (or a portion) of Newco's stock within the five-year term of the agreement (and A has not made a valid election under § 1.367(a)–8(b)(1)(vii)), A is required to file an amended return for the year of the transfer and include in income, with interest, the gain realized but not recognized on the initial section 354 exchange. If A has made a valid election under §1.367(a)–8(b)(1)(vii) to include the amount subject to the gain recognition agreement in the year of the triggering event, A would instead include the gain on its tax return for the taxable year that includes the triggering event, together with interest.

Example 1A. Transferor is a subsidiary in consolidated group—(i) *Facts.* The facts are the same as in *Example 1,* except that A is owned by P, a domestic corporation, and for the taxable year in which the transaction occurred, P, A and W filed a consolidated Federal income tax return.

(ii) *Result.* Even though A is the U.S. transferor, P is required under §1.367(a)–8(a)(3) to enter into the gain recognition agreement and comply with the requirements under §1.367(a)–8. In the event that A leaves the P group, A would make the annual certifications required under §1.367(a)–8(b)(5)(ii). P would remain liable with A under the gain recognition agreement.

Example 2. Taxable inversion pursuant to indirect stock transfer rules—(i) *Facts.* The facts are the same as in *Example 1*, except that A receives more than fifty percent of either the total voting power or the total value of the stock of F in the transaction.

(ii) *Result.* A is required to include in income in the year of the exchange the amount of gain realized on such exchange. See paragraph (c)(1)(i) of this section. If A fails to include the income on its timely-filed return, A will also be liable for the penalty under section 6038B (together with interest and other applicable penalties) unless A's failure to include the income is due to reasonable cause and not willful neglect. See §1.6038B–1(f).

Example 3. Disposition by U.S. transferred corporation of substantially all of its assets—(i) *Facts.* The facts are the same as in *Example 1*, except that, during the third year of the gain recognition agreement, Newco disposes of substantially all (as described in §1.367(a)–8(e)(3)(i)) of the assets described in paragraph (d)(2)(v)(A) of this section for cash and recognizes currently all of the gain realized on the disposition.

(ii) *Result.* Under §1.367(a)–8(e)(3)(i), the gain recognition agreement is generally triggered when the transferred corporation disposes of substantially all of its assets. However, under the special rule contained in §1.367(a)–8(h)(2), because A and W filed a consolidated Federal income tax return prior to the transaction, and Newco, the transferred corporation, is a domestic corporation, the gain recognition agreement is terminated and has no further effect.

Example 4. Triangular section 368(a)(1)(B) reorganization—(i) *Facts.* F, a foreign corporation, owns all the stock of S, a domestic corporation. U, a domestic corporation, owns all of the stock of Y, also a domestic corporation. U does not own any of the stock of F (applying the attribution rules of section 318, as modified by section 958(b)). In a triangular reorganization described in section 368(a)(1)(B) and paragraph (d)(1)(iii) of this section, S acquires all the stock of Y, and U receives 10% of the voting stock of F.

(ii) *Result.* U's exchange of Y stock for F stock will not be subject to section 367(a)(1), provided that all of the requirements of paragraph (c)(1) are satisfied, including the requirement that U enter into a five-year gain recognition agreement. For purposes of this section, F is treated as the transferee foreign corporation and Y is treated as the transferred corporation. See paragraphs (d)(2)(i) and (ii) of this section. Under paragraph (d)(2)(iv) of this section, the gain recognition agreement would be triggered if F sold all or a portion of the stock of S, or if S sold all or a portion of the stock of Y.

Example 5. Triangular section 368(a)(1)(C) reorganization—(i) *Facts.* F, a foreign corporation, owns all of the stock of R, a domestic corporation that operates an historical business. V, a domestic corporation, owns all of the stock of Z, also a domestic corporation. V does not own any of the stock of F (applying the attribution rules of section 318 as modified by section 958(b)). In a triangular reorganization described in section 368(a)(1)(C) (and paragraph (d)(1)(iv) of this section), R acquires all of the assets of Z, and V receives 30% of the voting stock of F.

(ii) *Result.* The consequences of the transfer are similar to those described in *Example 1*; V is required to enter into a 5-year gain recognition agreement under §1.367(a)–8 to secure nonrecognition treatment under section 367(a). Under paragraphs (d)(2)(i) and (ii) of this section, F is treated as the transferee foreign corporation and R is treated as the transferred corporation. In determining whether, in a later transaction, R has disposed of substantially all of its assets under §1.367(a)–8(e)(3)(i), see paragraph (d)(2)(v)(A) of this section.

Example 5A. Section 368(a)(1)(C) reorganization followed by section 368(a)(2)(C) exchange—(i) *Facts.* The facts are the same as in *Example 5*, except that the transaction is structured as a section 368(a)(1)(C) reorganization, followed by a section 368(a)(2)(C) exchange, and R is a foreign corporation. The following additional facts are present. Z has 3 businesses: Business A with a basis of $10 and a value of $50, Business B with a basis of $10 and a value of $40, and Business C with a basis of $10 and a value of $30. V and Z file a consolidated Federal income tax return and V has a basis of $30 in the Z stock, which has a value of $120. Assume that Businesses A and B consist solely of assets that will satisfy the section 367(a)(3) active trade or business exception; none of Business C's assets will satisfy the exception. Z transfers all 3 businesses to F in exchange for 30 percent of the F stock, which Z distributes to V pursuant to a section 368(a)(1)(C) reorganization. F then contributes Businesses B and C to R pursuant to section 368(a)(2)(C).

(ii) *Result.* The transfer of the Business A assets by Z to F is subject to the general rules under section 367, as such transfer does not constitute an indirect stock transfer. The transfer by Z of the Business B and C assets to F must first be tested under sections 367(a)(1), (3) and (5). Z recognizes $20 of gain on the outbound transfer of the Business C assets, as such assets do not qualify for an exception to section 367(a)(1). The Business B assets, which will be used by R in an active trade or business outside the United States, qualify for the exception under section 367(a)(3) and § 1.367(a)–2T(c)(2). V is deemed to transfer the stock of Z to F in a section 354 exchange subject to the rules of paragraph (d). V must enter into the gain recognition agreement in the amount of $30 to preserve Z's nonrecognition treatment with respect to its transfer of Business B assets. Under paragraphs (d)(2)(i) and (ii) of this section, F is the transferee foreign corporation and R is the transferred corporation.

Example 5B. Section 368(a)(1)(C) reorganization followed by section 368(a)(2)(C) exchange with U.S. transferee—(i) *Facts.* The facts are the same as in *Example 5A*, except that R is a U.S. corporation.

(ii) *Result.* As in *Example 5A*, the outbound transfer of Business A assets to F is subject to section 367(a) and is not affected by the rules of this paragraph (d). The Business B assets qualified for nonrecognition treatment; the Business C assets did not. However, pursuant to paragraph (d)(2)(vi) of this section, the Business C assets are not subject to section 367(a)(1), provided that the basis of the assets in the hands of R is no greater than the basis of the assets in the hands of Z. V is deemed to make an indirect transfer under the rules of this paragraph (d). To preserve nonrecognition treatment under section 367(a), V must enter into a 5-year gain recognition agreement in the amount of $50, the amount of the appreciation in the Business B and C assets, as the transfer of such assets by Z were not taxable under section 367(a)(1) but were treated as an indirect stock transfer.

Example 6. Triangular section 368(a)(1)(C) reorganization followed by 351 exchange—(i) *Facts.* The facts are the same as in *Example 5*, except that, during the fourth year of the gain recognition agreement, R transfers substantially all of the assets received from Z to K, a wholly-owned domestic subsidiary of R, in an exchange described in section 351.

(ii) *Result.* The disposition by R, the transferred corporation, of substantially all of its assets would trigger the gain recognition agreement if the assets were disposed of in a taxable transaction. However, because the assets were transferred in a nonrecognition transaction, such transfer does not trigger the gain recognition agreement if V satisfies the reporting requirements contained in § 1.367(a)–8(g)(3) (which includes the requirement that V amend its gain recognition agreement to reflect the transaction). See also paragraph (d)(2)(iv) of this section. To determine whether substantially all of the assets are disposed of, any assets of Z that were transferred by Z to R and then contributed by R to K are taken into account.

Example 6A. Triangular section 368(a)(1)(C) reorganization followed by section 351 exchange with foreign transferee—(i) *Facts.* The facts are the same as in *Example 6* except that K is a foreign corporation.

(ii) *Result.* This transfer of assets by R to K must be analyzed to determine its effect upon the gain recognition agreement, and such transfer is also an outbound transfer of assets that is taxable under section 367(a)(1) unless the active trade or business exception under section 367(a)(3) applies. If the transfer is fully taxable under section 367(a)(1), the transfer is treated as if the transferred company, R, sold substantially all of its assets. Thus, the gain recognition agreement would be triggered (but see § 1.367(a)–8(b)(3)(ii) for potential offsets to the gain to be recognized). If each asset transferred qualifies for nonrecognition treatment under section 367(a)(3) and the regulations thereunder (which require, under § 1.367(a)–2T(a)(2), the transferor to comply with the reporting requirements under section 6038B), the result is the same as in *Example 6*. If a portion of the assets transferred qualify for nonrecognition treatment under section 367(a)(3) and a portion are taxable under section 367(a)(1) (but such portion does not result in the disposition of substantially all of the assets), the gain recognition agreement will not be triggered if such information is reported as required under § 1.367(a)–8(b)(5) and (e)(3)(i).

Example 7. Concurrent application of asset transfer and indirect stock transfer rules in consolidated return setting—(i) *Facts.* Assume the same facts as in *Example 5*, except that R is a foreign corporation and V and Z file a consolidated return for Federal income tax purposes. The properties of Z consist of Business A assets, with an adjusted basis of $50 and fair market value of $90, and Business B assets, with an adjusted basis of $50 and a fair market value of $110. Assume that the Business A assets do not qualify for the active trade or business exception under section 367(a)(3), but that the Business B assets do qualify for the exception. V's basis in the Z stock is $100, and the value of such stock is $200.

(ii) *Result.* Under paragraph (d)(2)(vi), the assets of Businesses A and B that are transferred to R must be tested under sections 367(a)(3) and (a)(5) prior to consideration of the indirect stock transfer rules of this paragraph (d). Thus, Z must recognize $40 of income under section 367(a)(1) on the outbound transfer of Business A assets. Under § 1.1502–32, because V and Z file a consolidated return, V's basis in its Z stock increases from $100 to $140 as a result of Z's $40 gain. Provided that all of the other requirements under paragraph (c)(1) of this section are satisfied, to qualify for nonrecognition treatment with respect to V's indirect transfer of Z stock, V must enter into a gain recognition agreement in the amount of $60 (the gain realized but not recognized by V in the stock of Z after the $40 basis adjustment). If F sells a portion of its stock in R during the term of the agreement, V will be required to recognize a portion of the $60 gain subject to the agreement. To determine whether R disposes of substantially all of its assets (under § 1.367(a)–8(e)(3)(i)), only the Business B assets will be considered (because the transfer of the Business A assets was taxable to Z under section 367). See paragraph (d)(2)(v)(A) of this section.

Example 7A. Concurrent application without consolidated returns—(i) *Facts.* The facts are the same as in *Example 7,* except that V and Z do not file consolidated income tax returns.

(ii) *Result.* Z would still recognize $40 of gain on the transfer of its Business A assets, and the Business B assets would still qualify for the active trade or business exception under section 367(a)(3). However, V's basis in its stock of Z would not be increased by the amount of Z's gain. V's indirect transfer of stock will be taxable unless V enters into a gain recognition agreement (as described in § 1.367(a)–8) for the $100 of gain realized but not recognized with respect to the stock of Z.

Example 7B. Concurrent application with individual U.S. shareholder—(i) *Facts.* The facts are the same as in *Example 7,* except that V is an individual U.S. citizen.

(ii) *Result.* Section 367(a)(5) would prevent the application of the active trade or business exception under section 367(a)(3). Thus, Z's transfer of assets to R would be fully taxable under section 367(a)(1). Z would recognize $100 of income. V's basis in its stock of Z is not increased by this amount. V is taxable with respect to its indirect transfer of its Z stock unless V enters into a gain recognition agreement in the amount of the $100, the gain realized but not recognized with respect to its Z stock.

Example 7C. Concurrent application with nonresident alien shareholder—(i) *Facts.* The facts are the same as in *Example 7,* except that V is a nonresident alien.

(ii) *Result.* Pursuant to section 367(a)(5), the active trade or business exception under section 367(a)(3) is not available with respect to Z's transfer of assets to R. Thus, Z has $100 of gain with respect to the Business A and B assets. Because V is a nonresident alien, however, V is not subject to section 367(a) with respect to its indirect transfer of Z stock.

Example 8. Concurrent application with section 368(a)(2)(C) Exchange—(i) *Facts.* The facts are the same as in *Example 7,* except that R transfers the Business A assets to M, a wholly-owned domestic subsidiary of R, in an exchange described in section 368(a)(2)(C).

(ii) *Result.* Pursuant to paragraph (d)(2)(vi) of this section, section 367(a)(1) does not apply to Z's transfer of Business A assets to R, because such assets are transferred to M, a domestic corporation. Sections 367(a)(1), (3) and (5), as well as section 367(d), apply to Z's transfer of assets to R to the extent that such assets are not transferred to M. However, the Business B assets qualify for an exception to taxation under section 367(a)(3). Thus, if the requirements of paragraph (c)(1) of this section are satisfied, including the requirement that V enter into a 5-year gain recognition agreement and comply with the requirements of § 1.367(a)–8 with respect to the gain realized on the Z stock, $100, the entire transaction qualifies for nonrecognition treatment under section 367(a)(1). See also section 367(a)(5) and any regulations issued thereunder. Under paragraphs (d)(2)(i) and (ii) of this section, the transferee foreign corporation is F and the transferred corporation is M. Pursuant to paragraph (d)(2)(iv) of this section, a disposition by F of the stock of R, or a disposition by R of the stock of M, will trigger the gain recognition agreement. To determine whether substantially all of the assets have been disposed of (as described under § 1.367(a)–8(e)(3)(i)), the Business A assets in M and the Business B assets in R must both be considered.

Example 9. Concurrent application of direct and indirect stock transfer rules—(i) *Facts.* F, a foreign corporation, owns all of the stock of O, also a foreign corporation. D, a domestic corporation, owns all of the stock of E, also a domestic corporation, which owns all of the stock of N, also a domestic corporation. Prior to the transactions described in this *Example 9,* D, E and N filed a consolidated income tax return. D has a basis of $100 in the stock of E, which has a fair market value of $160. The N stock has a fair market value of $100, and E has a basis of $60 in such stock. In addition to the stock of N, E owns the assets of Business X. The assets of Business X have a fair market value of $60, and E has a basis of $50 in such assets. Assume that the Business X assets qualify for nonrecognition treatment under section 367(a)(3). D does not own any stock in F (applying the attribution rules of section 318 as modified by section 958(b)). In a triangular reorganization described in section 368(a)(1)(C) and paragraph (d)(1)(iv) of this section, O acquires all of the assets of E, and

D exchanges its stock in E for 40% of the voting stock of F.

(ii) *Result.* E's transfer of its assets, including the N stock, must be tested under the general rules of section 367(a) before consideration of D's indirect transfer of the stock of E. E's transfer of the assets of Business X qualify for nonrecognition under section 367(a)(3). E could qualify for nonrecognition treatment with respect to its transfer of N stock if it enters into a gain recognition agreement (and all of the requirements of paragraph (c)(1)(i) of this section are satisfied); however under §1.367(a)–8(f)(2)(i), D, the parent of the consolidated group, must enter into the agreement. O is the transferee foreign corporation; N is the transferred corporation. D may also qualify for nonrecognition with respect to its indirect transfer of the stock of E if it enters into a separate gain recognition agreement with respect to the E stock (and all of the requirements of paragraph (c)(1)(i) of this section are satisfied). As to this transfer, F is the transferee foreign corporation; O is the transferred corporation. The amount of the gain recognition agreement is $60. See also section 367(a)(5) and any regulations issued thereunder.

Example 10. Successive section 351 exchanges—(i) *Facts.* D, a domestic corporation, owns all the stock of X, a controlled foreign corporation that operates an historical business, which owns all the stock of Y, a controlled foreign corporation that also operates an historical business. The properties of D consist of Business A assets, with an adjusted basis of $50 and a fair market value of $90, and Business B assets, with an adjusted basis of $50 and a fair market value of $110. Assume that the Business B assets qualify for the exception under section 367(a)(3) and §1.367(a)–2T(c)(2), but that the Business A assets do not qualify for the exception. In an exchange described in section 351, D transfers the assets of Businesses A and B to X, and, in connection with the same transaction, X transfers the assets of Business B to Y in another exchange described in section 351.

(ii) *Result.* Under paragraph (d)(1)(vi) of this section, this transaction is treated as an indirect stock transfer for purposes of section 367(a), but the transaction is not recharacterized for purposes of section 367(b). Moreover, under paragraph (d)(2)(vi) of this section, the assets of Businesses A and B that are transferred to X must be tested under section 367(a)(3). The Business A assets, which were not transferred to Y, are subject to the general rules of section 367(a), and not the indirect stock transfer rules described in this paragraph (d). D must recognize $40 of income on the outbound transfer of Business A assets. The transfer of the Business B assets is subject to both the asset transfer rules (under section 367(a)(3)) and the indirect stock transfer rules of this paragraph (d) and §1.367(a)–8. Thus, D's transfer of the Business B assets will not be subject to section 367(a)(1) if D enters into a five-year gain recognition agreement with respect to the stock of Y. Under paragraphs (d)(2)(i) and (ii) of this section, X will be treated as the transferee foreign corporation and Y will be treated as the transferred corporation for purposes of applying the terms of the agreement. If X sells all or a portion of the stock of Y during the term of the agreement, D will be required to recognize a proportionate amount of the $60 gain that was realized by D on the initial transfer of the Business B assets.

Example 10A. Successive section 351 exchanges with ultimate domestic transferee—(i) *Facts.* The facts are the same as in *Example 10,* except that Y is a domestic corporation.

(ii) *Result.* As in *Example 10,* D must recognize $40 of income on the outbound transfer of the Business A assets. Although the Business B assets qualify for the exception under section 367(a)(3) (and end up in U.S. corporate solution, in Y), the $60 of gain realized on the Business B assets is nevertheless taxable under paragraphs (c)(1) and (d)(1)(vi) of this section because the transaction is considered to be a transfer by D of stock of a domestic corporation, Y, in which D receives more than 50 percent of the stock of the transferee foreign corporation, X. A gain recognition agreement is not permitted.

Example 11. Concurrent application of indirect stock transfer rules and section 367(b)—(i) *Facts.* F, a foreign corporation, owns all of the stock of Newco, which is also a foreign corporation. P, a domestic corporation, owns all of the stock of S, a foreign corporation that is a controlled foreign corporation within the meaning of section 957(a). P's basis in the stock of S is $50 and the value of S is $100. The section 1248 amount with respect to S stock is $30. In a reorganization described in section 368(a)(1)(C) (and paragraph (d)(1)(iv) of this section), Newco acquires all of the properties of S, and P exchanges its stock in S for 49 percent of the stock of F.

(ii) *Result.* P's exchange of S stock for F stock under section 354 will be taxable under section 367(a) (and section 1248 will be applicable) if P fails to enter into a 5-year gain recognition agreement in accordance with §1.367(a)–8. Under paragraph (b)(2) of this section, if P enters into a gain recognition agreement, the exchange will be subject to the provisions of section 367(b) and the regulations thereunder as well as section 367(a). Under §7.367(b)–7(c)(1)(i) of this chapter, P must recognize the section 1248 amount of $30 because P exchanged stock of a controlled foreign corporation, S, for stock of a foreign corporation that is not a controlled foreign corporation, F. The indirect stock transfer rules do not apply with respect to section 367(b). The deemed dividend of $30 recognized by P will increase P's basis in the F stock received in the transaction, and F's basis in the Newco stock. Thus, the amount of the gain recognition agreement is $20 ($50 gain realized on the transfer less the $30 inclusion under section 367(b)). Under paragraphs (d)(2)(i) and (ii) of this section, F is treated as the transferee foreign corporation and Newco is the transferred corporation.

Example 11A. Triangular section 368(a)(1)(C) reorganization involving foreign acquired corporation—(i) *Facts.* Assume the same facts as in Example 11, except that P receives 51 percent of the stock of F.

(ii) *Result.* P may still enter into a gain recognition agreement to avoid taxation under section 367(a). There is, however, no inclusion under section 367(b) because P would be exchanging stock in one controlled foreign corporation for another. The amount of the gain recognition agreement is $50. See, also, §1.367(b)–4(b)(4).

Example 12. Direct asset reorganization not subject to stock transfer rules—(i) *Facts.* D is a publicly traded domestic corporation. D's assets consist of tangible assets, including stock or securities. In a reorganization described in section 368(a)(1)(F), D becomes a foreign corporation, F.

(ii) *Result.* The reorganization is characterized under §1.367(a)–1T(f). D's outbound transfer of assets is taxable under section 367(a)(1). Even if any of D's assets would have otherwise qualified for an exception to section 367(a)(1), section 367(a)(5) provides that no exception can apply. The section 368(a)(1)(F) reorganization is not an indirect stock transfer described in paragraph (d) of this section. Moreover, the exchange by D's shareholders of D stock for F stock in an exchange described under section 354 is not an exchange described under section 367(a). See paragraph (a) of this section.

(e) *Effective dates*—(1) *In general.* The rules in paragraphs (a), (b) and (d) of this section apply to transfers occurring on or after July 20, 1998. The rules in paragraph (c) of this section with respect to transfers of domestic stock or securities are generally applicable for transfers occurring after January 29, 1997. See §1.367(a)–3(c)(11). For rules regarding transfers of domestic stock or securities after December 16, 1987, and before January 30, 1997, and transfers of foreign stock or securities after December 16, 1987, and before July 20, 1998, see paragraph (g) of this section.

(2) *Election.* Notwithstanding paragraphs (e)(1) and (g) of this section, taxpayers may, by timely filing an original or amended return, elect to apply paragraphs (b) and (d) of this section to all transfers of foreign stock or securities occurring after December 16, 1987, and before July 20, 1998, except to the extent that a gain recognition agreement has been triggered prior to July 20, 1998. If an election is made under this paragraph (e)(2), the provisions of §1.367(a)–3T(g) (see 26 CFR part 1, revised April 1, 1998) shall apply, and, for this purpose, the term *substantial portion* under §1.367(a)–3T(g)(3)(iii) (see 26 CFR part 1, revised April 1, 1998) shall be interpreted to mean *substantially all* as defined in section 368(a)(1)(C). In addition, if such an election is made, the taxpayer must apply the rules under section 367(b) and the regulations thereunder to any transfers occurring within that period as if the election to apply §1.367(a)–3(b) and (d) to transfers occurring within that period had not been made, except that in the case of an exchange described in section 351 the taxpayer must apply section 367(b) and the regulations thereunder as if the exchange was described in §7.367(b)–7 of this chapter. For example, if a U.S. person, pursuant to a section 351 exchange, transfers stock of a controlled foreign corporation in which it is a United States shareholder but does not receive back stock of a controlled foreign corporation in which it is a United States shareholder, the U.S. person must include in income under §7.367(b)–7 of this chapter the section 1248 amount attributable to the stock exchanged (to the extent that the fair market value of the stock exchanged exceeds its adjusted basis). Such inclusion is required even though §7.367(b)–7 of this chapter, by its terms, did not apply to section 351 exchanges.

(f) *Former 10-year gain recognition agreements.* If a taxpayer elects to apply the rules of this section to all prior transfers occurring after December 16, 1987, any 10-year gain recognition agreement that remains in effect (has not been triggered in full) on July 20, 1998 will be considered by the Internal Revenue Service to be a 5-year gain recognition agreement with a duration of five full taxable years following the close of the taxable year of the initial transfer.

(g) *Transition rules regarding certain transfers of domestic or foreign stock or* *securities after December 16, 1987, and prior to July 20, 1998*—(1) *Scope.* Transfers of domestic stock or securities described under section 367(a) that occurred after December 16, 1987, and prior to April 17, 1994, and transfers of foreign stock or securities described under section 367(a) that occur after December 16, 1987, and prior to July 20, 1998 are subject to the rules contained in section 367(a) and the regulations thereunder, as modified by the rules contained in paragraph (g)(2) of this section. For transfers of domestic stock or securities described under section 367(a) that occurred after April 17, 1994 and before January 30, 1997, see Temporary Income Regulations under section 367(a) in effect at the time of the transfer (§ 1.367(a)–3T(a) and (c), 26 CFR part 1, revised April 1, 1996) and paragraph (c)(11) of this section. For transfers of domestic stock or securities described under section 367(a) that occur after January 29, 1997, see § 1.367(a)–3(c).

(2) *Transfers of domestic or foreign stock or securities: Additional substantive rules*—(i) *Rule for less than 5-percent shareholders.* Unless paragraph (g)(2)(iii) of this section applies (in the case of domestic stock or securities) or paragraph (g)(2)(iv) of this section applies (in the case of foreign stock or securities), a U.S. transferor that transfers stock or securities of a domestic or foreign corporation in an exchange described in section 367(a) and owns less than 5 percent of both the total voting power and the total value of the stock of the transferee foreign corporation immediately after the transfer (taking into account the attribution rules of section 958) is not subject to section 367(a)(1) and is not required to enter into a gain recognition agreement.

(ii) *Rule for 5-percent shareholders.* Unless paragraph (g)(2)(iii) or (iv) of this section applies, a U.S. transferor that transfers domestic or foreign stock or securities in an exchange described in section 367(a) and owns at least 5 percent of either the total voting power or the total value of the stock of the transferee foreign corporation immediately after the transfer (taking into account the attribution rules under section 958) may qualify for nonrecognition treatment by filing a gain recognition agreement in accordance with § 1.367(a)–3T(g) in effect prior to July 20, 1998 (see 26 CFR part 1, revised April 1, 1998) for a duration of 5 or 10 years. The duration is 5 years if the U.S. transferor (5-percent shareholder) determines that all U.S. transferors, in the aggregate, own less than 50 percent of both the total voting power and the total value of the transferee foreign corporation immediately after the transfer. The duration is 10 years in all other cases. See, however, § 1.367(a)–3(f). If a 5-percent shareholder fails to properly enter into a gain recognition agreement, the exchange is taxable to such shareholder under section 367(a)(1).

(iii) *Gain recognition agreement option not available to controlling U.S. transferor if U.S. stock or securities are transferred.* Notwithstanding the provisions of paragraph (g)(2)(ii) of this section, in no event will any exception to section 367(a)(1) apply to the transfer of stock or securities of a domestic corporation where the U.S. transferor owns (applying the attribution rules of section 958) more than 50 percent of either the total voting power or the total value of the stock of the transferee foreign corporation immediately after the transfer (i.e., the use of a gain recognition agreement to qualify for nonrecognition treatment is unavailable in this case).

(iv) *Loss of United States shareholder status in the case of a transfer of foreign stock.* Notwithstanding the provisions of paragraphs (g)(2)(i) and (ii) of this section, in no event will any exception to section 367(a)(1) apply to the transfer of stock of a foreign corporation in which the U.S. transferor is a United States shareholder (as defined in § 7.367(b)–2(b) of this chapter or section 953(c)) unless the U.S. transferor receives back stock in a controlled foreign corporation (as defined in section 953(c), section 957(a) or section 957(b)) as to which the U.S. transferor is a United States shareholder immediately after the transfer.

[T.D. 8702, 61 FR 68637, Dec. 30, 1996, as amended by T.D. 8770, 63 FR 33556, June 19, 1998; 64 FR 15687, Apr. 1, 1999]

§1.367(a)–4T Special rules applicable to specified transfers of property (temporary).

(a) *In general.* This section provides special rules for determining the applicability of section 367(a)(1) to specified transfers of property. Paragraph (b) of this section provides a special rule requiring the recapture of depreciation upon the transfer abroad of property previously used in the United States. Paragraphs (c) through (f) of this section provide rules for determining whether certain types of property are transferred for use in the active conduct of a trade or business outside of the United States. Paragraph (g) excepts certain transfers to FSCs from the operation of section 367(a)(1). The treatment of any transfer of property described in this section shall be determined exclusively under the rules of this section.

(b) *Depreciated property used in the U.S.*—(1) *In general.* If a U.S. person transfers U.S. depreciated property (as defined in paragraph (b)(2) of this section) to a foreign corporation in an exchange described in section 367(a)(1), then that person shall include in its gross income for the taxable year in which the transfer occurs ordinary income equal to the gain realized that would have been includible in the transferor's gross income as ordinary income under section 617(d)(1), 1245(a), 1250(a), 1252(a), or 1254(a), whichever is applicable, if at the time of the transfer the transferor had sold the property at its fair market value. Recapture of depreciation under this paragraph (b) shall be required regardless of whether any exception to section 367(a)(1) (such as the exception for property transferred for use in the active conduct of a foreign trade or business) would otherwise apply to the transfer. However, any applicable exception shall apply with respect to realized gain that is not included in ordinary income pursuant to this paragraph (b).

(2) *U.S. depreciated property.* U.S. depreciated property subject to the rules of this paragraph (b) is any property that—

(i) Is either mining property (as defined in section 617(f)(2)), section 1245 property (as defined in section 1245(a)(3)), section 1250 property (as defined in section 1250(c)), farm land (as defined in section 1252(a)(2)), or oil, gas, or geothermal property (as defined in section 1254(a)(3)); and

(ii) Has been used in the United States or has qualified as section 38 property by virtue of section 48(a)(2)(B) prior to its transfer.

(3) *Property used within and without the U.S.* If U.S. depreciated property has been used partly within and partly without the United States, then the amount required to be included in ordinary income pursuant to this paragraph (b) shall be reduced to an amount determined in accordance with the following formula:

$$\text{Full recapture amount} \times \frac{\text{U.S. use}}{\text{Total use}}$$

For purposes of the above fraction, the *full recapture amount* is the amount that would otherwise be included in the transferor's income under paragraph (b)(1) of this section. *U.S. use* is the number of months that the property either was used within the United States or qualified as section 38 property by virtue of section 48(a)(2)(B), and was subject to depreciation by the transferor or a related person. *Total use* is the total number of months that the property was used (or available for use), and subject to depreciation, by the transferor or a related person. For purposes of this paragraph (b)(3), property shall not be considered to have been in use outside of the United States during any period in which such property was, for purposes of section 48 or 168, treated as property not used predominantly outside the United States pursuant to the provisions of section 48(a)(2)(B). For purposes of this paragraph (b)(3) the term *related person* shall have the meaning set forth in §1.367(d)–1T(h).

(4) [Reserved]

(5) *Effective date.* This paragraph (b) applies to transfers occurring on or after June 16, 1986.

(c) *Property to be leased*—(1) *Leasing business of transferee.* Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation shall be considered to be transferred for use in the active conduct of a trade or business outside of the United States only if—

(i) The transferee's leasing of the property constitutes the active conduct of a leasing business;

(ii) The lessee of the property is not expected to, and does not, use the property in the United States; and

(iii) The transferee has need for substantial investment in assets of the type transferred.

The active conduct of a leasing business requires that the employees of the foreign corporation perform substantial marketing, customer service, repair and maintenance, and other substantial operational activities with respect to the transferred property outside of the United States. Tangible property subject to the rules of this paragraph (c) includes real property located outside of the United States. The rules of § 1.367(a)–5T(b) shall apply to transfers of property described in that section regardless of satisfaction of the rules of this paragraph (c).

(2) *De minimis leasing by transferee.* Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation and that does not satisfy the conditions of paragraph (b)(1) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if either—

(i) The property transferred will be used by the transferee foreign corporation in the active conduct of a trade or business but will be leased during occasional brief periods when the property would otherwise be idle, such as an airplane leased during periods of excess capacity; or

(ii) The property transferred is real property located outside the United States and—

(A) The property will be used primarily in the active conduct of a trade or business of the transferee foreign corporation; and

(B) Not more than ten percent of the square footage of the property will be leased to others.

(d) *Property to be sold.* Property shall not be considered to be transferred for use in the active conduct of a trade or business and a transfer of stock or securities shall not be excepted from section 367(a)(1) under the rules of § 1.367(a)–3T if, at the time of the transfer, it is reasonable to believe that, in the reasonably foreseeable future, the transferee will sell or otherwise dispose of any material portion of the transferred stock, securities, or other property other than in the ordinary course of business.

(e) *Oil and gas working interests*—(1) *In general.* A working interest in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transfer satisfies the conditions of paragraph (e)(2) of this section;

(ii) At the time of the transfer, the transferee has no intention to farmout or otherwise transfer any part of the transferred working interest; and

(iii) During the first three years after the transfer there are no farmouts or other transfers of any part of the transferred working interest as a result of which the transferee retains less than a 50 percent share of the transferred working interest.

(2) *Active use of working interest.* Working interests in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transferor is regularly and substantially engaged in exploration for and extraction of minerals, either directly or through working interests in joint ventures, other than by reason of the property that is transferred;

(ii) The terms of the working interest transferred were actively negotiated among the joint venturers;

(iii) The working interest transferred constitutes at least a five percent working interest;

(iv) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively engaged in—

(A) Operating the working interest, or

(B) Analyzing technical data relating to the activities of the venture;

(v) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively involved in decision-making with respect to the operations of the venture, including decisions relating to exploration, development, production, and marketing; and

(vi) After the transfer, the transferee foreign corporation will for the foreseeable future satisfy the requirements of subdivisions (iv) and (v) of this paragraph (d)(2).

(3) *Start-up operations.* Working interests in oil and gas properties that do not satisfy the requirements of paragraph (e)(2) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if—

(i) The working interest was acquired by the transferor immediately prior to the transfer and for the specific purpose of transferring it to the transferee foreign corporation;

(ii) The requirements of paragraph (e)(2)(ii) and (iii) of this section are satisfied; and

(iii) The transferee foreign corporation will for the foreseeable future satisfy the requirements of paragraph (e)(2)(iv) and (v) of this section.

(4) *Other applicable rules.* Oil and gas interests not described in this paragraph (e) may nonetheless qualify for the exception to section 367(a)(1) contained in §1.367(a)–2T, relating to transfers of property for use in the active conduct of a trade or business outside of the United States. However, a mere royalty interest in oil and gas properties will not be treated as transferred for use in the active conduct of a trade or business outside the United States. Moreover, a royalty or similar interest that constitutes intangible property will be subject to the rules of §1.367(d)–1T, relating to transfers of intangible property.

(f) *Compulsory transfers.* Property shall be presumed to be transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was previously in use in the country in which the transferee foreign corporation is organized; and

(2) The transfer is either:

(i) Legally required by the foreign government as a necessary condition of doing business in that country; or

(ii) Compelled by a genuine threat of immediate expropriation by the foreign government.

(g) *Relationship to other sections.* The rules of §§1.367(a)–5T, 1.367(a)–6T, and 1.367(d)–1T apply to transfers of property whether or not the property is transferred for use in the active conduct of a trade or business outside the United States. See §1.367(d)–1T(g)(2)(ii) for a special election with respect to compulsory transfers of intangible property.

(h) *Transfers of certain property to FSCs*—(1) *In general.* The provisions of section 367 (a) and (d) and the regulations thereunder shall not apply to a transfer of property by a U.S. person to a foreign corporation that constitutes a FSC, as defined in section 922(a), if—

(i) The transferee FSC uses the property to generate exempt foreign trade income, as defined in section 923(a);

(ii) The property is not excluded property, as defined in section 927(a)(2); and

(iii) The property consists of a corporate name or tangible property that is appropriate for use in the operation of a FSC office.

(2) *Exception.* The general rule in paragraph (g)(1) of this section shall not apply if, within three years after the original transfer, the original transferee FSC (or a subsequent transferee FSC) disposes of the property other than in the ordinary course of business or through a transfer to another FSC. Thus, the U.S. transferor may recognize gain in the taxable year in which the original transfer occurred through the application of section 367 and the regulations thereunder.

[T.D. 8087, 51 FR 17947, May 16, 1986, as amended by T.D. 8515, 59 FR 2960, Jan. 20, 1994]

§1.367(a)–5T Property subject to section 367(a)(1) regardless of use in trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall apply to a transfer of property described in this section regardless of whether the property is transferred for use in the active conduct of a trade or business. Certain exceptions to the operation of this rule are provided in this section, and a special gain limitation rule is provided in paragraph (e). A transfer of property described in this section is subject to section 367(a)(1) even if the transfer is a compulsory transfer described in § 1.367(a)–4T(f).

(b) *Inventory, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of—

(1) Stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business; and

(2) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by—

(i) A taxpayer whose personal efforts created such property;

(ii) In the case of a letter, memorandum, or similar property, a taxpayer from whom such property was prepared or produced; or

(iii) A taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or part by reference to the basis of such property in the hands of a taxpayer described in subdivision (i) or (ii) of this paragraph (b)(2).

For purposes of this section, the term *inventory* includes raw materials and supplies, partially completed goods, and finished products.

(c) *Installment obligations, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of installment obligations, accounts receivable, or similar property, but only to the extent that the principal amount of any such obligation has not previously been included by the taxpayer in its taxable income.

(d) *Foreign currency, etc.*—(1) *In general.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of foreign currency or other property denominated in foreign currency, including installment obligations, futures contracts, forward contracts, accounts receivable, or any other obligation entitling its payee to receive payment in a currency other than U.S. dollars.

(2) *Exception for certain obligations.* If transferred property denominated in a foreign currency—

(i) Is denominated in the currency of the country in which the transferee foreign corporation is organized; and

(ii) Was acquired in the ordinary course of the business of the transferor that will be carried on by the transferee foreign corporation,

then section 367(a)(1) shall apply to the transfer only to the extent that gain is required to be recognized with respect to previously realized income reflected in installment obligations subject to paragraph (c) of this section. The rule of this paragraph (d)(2) shall not apply to transfers of foreign currency.

(3) *Limitation of gain required to be recognized.* If section 367(a)(1) applies to a transfer of property described in this paragraph, then the gain required to be recognized shall be limited to—

(i) The gain realized upon the transfer of property described in this paragraph (d), minus

(ii) Any loss realized as part of the same transaction upon the transfer of property described in this paragraph (d).

This limitation applies in lieu of the rule in § 1.367(a)–1T(b)(1). No loss shall be recognized with respect to property described in this paragraph (d).

(e) *Intangible property.* Regardless of use in an active trade or business, a transfer of intangible property pursuant to section 332 shall be subject to section 367(a)(1), unless it constitutes foreign goodwill or going concern value, as defined in § 1.367(a)–1T(d)(5)(iii). For rules concerning transfers of intangible property pursuant to section 351 or 361, see section 367(d) and § 1.367(d)–1T.

(f) *Leased tangible property.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to a transfer of tangible property with respect to which the transferor is a lessor at the time of the transfer, unless—

(1) With respect to property that will not be leased by the transferee to third persons, the transferee was the lessee of the property at the time of the transfer; or

(2) With respect to property that will be leased by the transferee to third persons, the transferee satisfies the conditions set forth in §1.367(a)–4T(c)(1) or (2).

[T.D. 8087, 51 FR 17949, May 16, 1986]

§1.367(a)–6T Transfer of foreign branch with previously deducted losses (temporary).

(a) *In general.* This section provides special rules relating to the transfer of the assets of a foreign branch with previously deducted losses. Paragraph (b) of this section provides generally that such losses must be recaptured by the recognition of the gain realized on the transfer. Paragraph (c) of this section sets forth rules concerning the character of, and limitations on, the gain required to be recognized. Paragraph (d) of this section defines the term *previously deducted losses.* Paragraph (e) of this section describes certain reductions that are made to the previously deducted losses before they are taken into income under this section. Finally, paragraph (g) of this section defines the term *foreign branch.*

(b) *Recognition of gain required*—(1) *In general.* If a U.S. person transfers any assets of a foreign branch to a foreign corporation in an exchange described in section 367(a)(1), then the transferor shall recognize gain equal to—

(i) The sum of the previously deducted branch ordinary losses as defined and reduced in paragraphs (d) and (e) of this section; and

(ii) The sum of the previously deducted branch capital losses as defined and reduced in paragraphs (d) and (e) of this section.

(2) *No active conduct exception.* The rules of this paragraph (b) shall apply regardless of whether the assets of the foreign branch are transferred for use in the active conduct of a trade or business outside the United States.

(c) *Special rules concerning gain recognized*—(1) *Character and source of gain.* The gain described in paragraph (b)(1)(i) of this section shall be treated as ordinary income of the transferor, and the gain described in paragraph (b)(1)(ii) of this section shall be treated as long-term capital gain of the transferor. Gain that is recognized pursuant to the rules of this section shall be treated as income from sources outside the United States. Such recognized gain shall be treated as foreign oil and gas extraction income (as defined in section 907) in the same proportion that previously deducted foreign oil and gas extraction losses bore to the total amount of previously deducted losses.

(2) *Gain limitation.* For a rule limiting the amount of gain required to be recognized under section 367(a) upon any transfer of property to a foreign corporation, including the transfer of assets of a foreign branch with previously deducted losses, see §1.367(a)–1T(b)(3).

(3) *Foreign goodwill and going concern value.* For purposes of this section, the assets of a foreign branch shall include foreign goodwill and going concern value related to the business of the foreign branch, as defined in §1.367(a)–1T(d)(5)(iii). Thus, gain realized upon the transfer of the foreign goodwill or going concern value of a foreign branch to a foreign corporation will be taken into account in computing the limitation on loss recapture under paragraph (c)(2) of this section.

(4) *Transfers of certain intangible property.* Gain realized on the transfer of intangible property (computed with reference to the fair market value of the intangible property as of the date of the transfer) that is an asset of a foreign branch shall be taken into account in computing the limitation on loss recapture under paragraph (c)(2) of this section. For rules relating to the crediting of gain recognized under this section against income deemed to arise by operation of section 367(d), see §1.367(d)–1T(g)(3).

(d) *Previously deducted losses*—(1) *In general.* This paragraph (d) provides rules for determining, for purposes of paragraph (b)(1) of this section, the previously deducted losses of a foreign branch any of whose assets are transferred to a foreign corporation in an exchange described in section 367(a)(1). Initially, the two previously deducted losses of a foreign branch for a taxable year are the total ordinary loss (''previously deducted branch ordinary loss'') and the total capital loss (''previously deducted branch capital loss'') that were realized by the foreign branch in that taxable year (a ''branch loss year'') prior to the transfer and that were or will be reflected on a U.S. income tax return of the transferor. The previously deducted branch ordinary loss for each branch loss year is reduced by expired net ordinary losses under paragraph (d)(2) of this section, while the previously deducted capital loss for each loss year is reduced by expired net capital losses under paragraph (d)(3) of this section. For each branch loss year, the remaining previously deducted branch ordinary loss and the remaining previously deducted branch capital loss are then reduced, proceeding from the first branch loss year to the last branch loss year, to reflect expired foreign tax credits under paragraph (d)(4) of this section. The reductions are made in the order of the taxable years in which the foreign tax credits arose. Finally, similar reductions are made to reflect expired investment credits under paragraph (d)(5) of this section.

(2) *Reduction by expired net ordinary loss*—(i) *In general.* The previously deducted branch ordinary loss for each branch loss year shall be reduced under this paragraph (d)(2) by the amount of any expired net ordinary loss with respect to that branch loss year. Expired net ordinary losses arising in years other than the branch loss year shall reduce the previously deducted branch ordinary loss for the branch loss year only to the extent that the previously deducted branch ordinary loss exceeds the net operating loss, if any, incurred by the transferor in the branch loss year. The previously deducted branch ordinary losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired net operating losses shall be applied to reduce the previously deducted branch ordinary loss for that year in the order in which the expired net ordinary losses arose.

(ii) *Existence of expired net ordinary loss.* An expired net ordinary loss exists with respect to a branch loss year to the extent that—

(A) The transferor incurred a net operating loss (within the meaning of section 172(c));

(B) That net operating loss arose in the branch loss year or was available for carryover or carryback to the branch loss year under section 172(b)(1);

(C) That net operating loss has neither given rise to a net operating loss deduction (within the meaning of section 172(a)) for any taxable year prior to the year of the transfer, nor given rise to a reduction of any previously deducted branch ordinary loss (pursuant to paragraph (d)(2) of this section) of any foreign branch of the transferor upon a previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim a net operating loss deduction with respect to that net operating loss has expired.

(3) *Reduction by expired net capital loss*—(i) *In general.* The previously deducted branch capital loss for each branch loss year shall be reduced under this paragraph (d)(3) by the amount of any expired net capital loss with respect to that branch loss year. Expired net capital losses arising in years other than the branch loss year shall reduce the previously deducted branch capital loss for the branch loss year only to the extent that the previously deducted branch capital loss exceeds the net capital loss, if any, incurred by the transferor in the branch loss year. The previously deducted branch capital losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired net capital losses shall be applied to reduce the previously deducted branch capital loss for that year in the order in which the expired net capital losses arose.

(ii) *Existence of expired net capital loss.* An expired net capital loss exists with respect to a branch loss year to the extent that—

(A) The transferor incurred a net capital loss (within the meaning of section 1222(10));

(B) That net capital loss arose in the branch loss year or was available for carryover or carryback to the branch loss year under section 1212;

(C) That net capital loss has neither been allowed for any taxable year prior to the year of the transfer, nor given rise to a reduction of any previously deducted branch capital loss (pursuant to paragraph (c)(3) of this section) of any foreign branch of the transferor upon any previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim a capital loss deduction with respect to that net capital loss has expired.

(4) *Reduction for expired foreign tax credit*—(i) *In general.* The previously deducted branch ordinary loss and the previously deducted branch capital loss for each branch loss year remaining after the reductions described in paragraph (d)(2) and (3) of this section shall be further reduced under this paragraph (d)(4) proportionately by the amount of any expired foreign tax credit loss equivalent with respect to that branch loss year. The previously deducted branch losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired foreign tax credit loss equivalents shall be applied to reduce the previously deducted branch loss for that year in the order in which the expired foreign tax credits arose.

(ii) *Existence of foreign tax credit loss equivalent.* A foreign tax credit loss equivalent exists with respect to a branch loss year if—

(A) The transferor paid, accrued, or is deemed under section 902 or 960 to have paid creditable foreign taxes in a taxable year;

(B) The creditable foreign taxes were paid, accrued, or deemed paid in the branch loss year or were available for carryover or carryback to the branch loss year under section 904(c);

(C) No foreign tax credit with respect to the foreign taxes paid, accrued, or deemed paid has been taken because of the operation of section 904(a) or similar limitations provided by the Code or an applicable treaty, and such taxes have not given rise to a reduction (pursuant to this paragraph (d)(5)) of any previously deducted branch loss of the foreign branch for a prior taxable year or of any previously deducted branch losses of any foreign branch of the transferor upon a prior transfer to a foreign corporation; and

(D) The period during which the transferor may claim a foreign tax credit for the foreign taxes paid, accrued, or deemed paid has expired.

(iii) *Amount of foreign tax credit loss equivalent.* The amount of the foreign tax credit loss equivalent for the branch loss year with respect to the creditable foreign taxes described in paragraph (d)(4)(ii) of this section is the amount of those creditable foreign taxes divided by the highest rate of tax to which the transferor was subject in the loss year.

(5) *Reduction for expired investment credits*—(i) *In general.* The previously deducted branch ordinary loss and the previously deducted branch capital loss for each branch loss year shall be further reduced under this paragraph (d)(5) proportionately by the amount of any expired investment credit loss equivalent with respect to that branch year. The previously deducted branch losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired investment credit loss equivalents shall be applied to reduce the previously deducted branch loss for that year in the order in which the expired investment credits were earned.

(ii) *Existence of investment credit loss equivalent.* An investment credit loss equivalent exists with respect to a branch loss year if—

(A) The transferor earned an investment credit (within the meaning of section 46(a)) in a taxable year;

(B) The investment credit was earned in the branch loss year or was available for carryover or carryback to the branch loss year under section 39;

(C) The investment credit earned by the transferor in the credit year has been denied by section 38(a) or by similar provisions of the Code and has not given rise to a reduction (pursuant to this paragraph (d)(5)) of any previously deducted branch loss of the foreign branch for a preceding taxable year or of the previously deducted losses of any foreign branch of the transferor upon any previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim the investment credit has expired.

(iii) *Amount of investment tax credit loss equivalent.* The amount of the investment credit loss equivalent for the branch loss year with respect to the investment credit described in paragraph (d)(5)(ii) of this section is 85 percent of the amount of that investment credit divided by the highest rate of tax to which the transferor was subject in the loss year.

(e) *Amounts that reduce previously deducted losses subject to recapture*—(1) *In general.* This paragraph (e) describes five amounts that reduce the sum of the previously deducted branch ordinary losses and the sum of the previously deducted branch capital losses before they are taken into income under paragraph (b) of this section. Amounts representing ordinary income shall be applied to reduce first the sum of the previously deducted branch ordinary losses to the extent thereof, and then the sum of the previously deducted branch capital losses to the extent thereof. Similarly, amounts representing capital gains shall be applied to reduce first the sum of the previously deducted branch capital losses and then the sum of the previously deducted branch ordinary losses.

(2) *Taxable income.* The previously deducted losses shall be reduced by any taxable income of the foreign branch recognized through the close of the taxable year of the transfer, whether before or after any taxable year in which losses were incurred.

(3) *Amounts currently recaptured under section 904(f)(3).* The previously deducted losses shall be reduced by the amount recognized under section 904(f)(3) on account of the transfer.

(4) *Gain recognized under section 367(a).* The previously deducted branch losses shall be reduced by any gain recognized pursuant to section 367(a)(1) (other than by reason of the provisions of this section) upon the transfer of the assets of the foreign branch to the foreign corporation.

(5) *Amounts previously recaptured under section 904(f)(3)*—(i) *In general.* The previously deducted branch losses shall be reduced by the portion of any amount recognized under section 904(f)(3) upon a previous transfer of property that was attributable to the losses of the foreign branch, provided that the amount did not reduce any gain otherwise required to be recognized under section 367(a)(3)(C) and this section (or Revenue Ruling 78–201, 1978–1 C.B. 91).

(ii) *Portion attributable to the losses of the foreign branch*—(A) *Branch property.* The full amount recognized under section 904(f)(3) upon a previous transfer of property of the branch shall be treated as attributable to the losses of the foreign branch.

(B) *Non-branch property.* The portion of the amount previously recognized under section 904(f)(3) upon a transfer of non-branch property that was attributable to the losses of the foreign branch shall be the sum, over the taxable years in which the transferor sustained an overall foreign loss some portion of which was recaptured on the disposition, of the recaptured portions of those overall foreign losses after multiplication by the following fraction:

$$\frac{\text{Losses of the foreign branch for the year}}{\text{All foreign losses for the year}}$$

For purposes of this fraction, the term *losses of the foreign branch for the year* means the losses of the foreign branch that were taken into account under section 904(f)(2) in determining the amount of the transferor's overall foreign loss for the year, and the term *all foreign losses for the year* means all of the losses of the transferor that were taken into account under section 904(f)(2).

(6) *Amounts previously recognized under the rules of this section.* The previously deducted losses shall be reduced by the amounts previously recognized under the rules of this section upon a previous transfer of assets of the foreign branch.

(f) *Example.* The rules of paragraphs (b) through (e) of this section are illustrated by the following example.

Example. (i) *Facts.* X, a U.S. corporation, is a calendar year taxpayer. On January 1, 1981, X established a branch in foreign country A to manufacture and sell X's products in country A. On July 1, 1986, X organized corporation Y, a country A subsidiary, and transferred to Y all of the assets of its country A branch, including goodwill and going concern value. During the period from January 1, 1981, through July 1, 1986, X's country A branch earned income and incurred losses in the following amounts:

COUNTRY A BRANCH

Year	Ordinary income (loss)	Capital gain (loss)
1981	(200)	0
1982	(300)	(100)
1983	(400)	0
1984	(200)	0
1985	(100)	0
1986	50	0

At the time of the transfer of X's country A branch assets to Y, those assets had a fair market value of $2,500 and an adjusted basis of $1,000. For each of the assets, fair market value exceeded adjusted basis. X had no net capital loss or unused investment credit during any taxable year relevant to the transfer. In 1984, X incurred a net operating loss of $400, $200 of which was carried back to prior years. An additional $50 of the 1984 net operating loss was carried over to 1985. The remaining $150 of the 1984 net operating loss was not used in any year prior to the transfer. In 1979, X paid creditable foreign taxes of $330 that could not be claimed as a credit in that year or any earlier year because of section 904. Of those foreign taxes, $100 were carried over and claimed as a credit in 1983, but the remaining $230 were not used in any year prior to the transfer. X was not required to recognize any gain under section 904(f)(3) on account of the 1986 transfer or any prior transfer. X was not required to recognize gain upon the transfer under section 367(a) (other than by reason of the provisions of this section).

(ii) *Previously deducted losses.* The previously deducted losses of X's country A branch are $575 of ordinary losses and $25 of capital losses, computed as follows: Initially, the branch has previously deducted ordinary losses of $1,000 ($200+$300+$400+$100), and previously deducted capital losses of $100. (See paragraph (d)(1) of this section.)

(iii) *Expired losses and credits.* Under the facts of this example, there are no reductions for expired net ordinary losses or expired net capital losses under paragraph (d)(2) or (3) of this section. However, the previously deducted losses are reduced proceeding from the first branch loss year to the last branch loss year to reflect the expired foreign tax credit from 1979. The amount of the foreign tax credit loss equivalent with respect to 1981 is $500 ($230/.46). It reduces the previously deducted losses for 1981 proportionately. Thus, the previously deducted ordinary loss for 1981 is reduced from $200 to $0. (See paragraph (d)(4) of this section.) The amount of the foreign tax credit loss equivalent with respect to 1982 is $300 ($500−$200, *i.e.*, $138/.46). (See paragraph (d)(4)(ii)(C) of this section.) It reduces the previously deducted losses for 1982 proportionately. Thus, the previously deducted ordinary loss for 1982 is reduced from $300 to $75, and the previously deducted capital loss for 1982 is reduced from $100 to $25.

(iv) *Further reductions.* The previously deducted ordinary losses of $575 and the previously deducted capital losses of $25 are reduced by the taxable income earned by the branch prior to the date of the transfer ($250). (See paragraph (e)(2) of this section.) Since that income was ordinary income, it is applied first to reduce the previously deducted ordinary losses of $575 to $325. (See paragraph (e)(1) of this section.)

(v) *Recapture.* Since the gain realized by X upon its transfer of the branch assets to Y exceeds the sum of the previously deducted branch losses as defined and reduced above $325+$25), the limitation in paragraph (c)(2) of this section does not apply. Thus, X is required to recognize $325 of ordinary income and $25 of long-term capital gain upon the transfer. (See paragraph (b) and (c)(1) of this section.)

(g) *Definition of foreign branch*—(1) *In general.* For purposes of this section, the term *foreign branch* means an integral business operation carried on by a U.S. person outside the United States. Whether the activities of a U.S. person outside the United States constitute a foreign branch operation must be determined under all the facts and circumstances. Evidence of the existence of a foreign branch includes, but is not limited to, the existence of a separate set of books and records, and the existence of an office or other fixed place of business used by employees or officers of the U.S. person in carrying out business activities outside the United States. Activities outside the United States shall be deemed to constitute a foreign branch for purposes of this section if the activities constitute a permanent establishment under the terms of a treaty between the United States and the country in which the activities are carried out. Any U.S. person may be treated as having a foreign branch for purposes of this section, whether that person is a corporation, partnership, trust, estate, or individual.

(2) *More than one branch.* If a U.S. person carries on more than one branch operation outside the United States, then the rules of this section must be separately applied with respect to each foreign branch that is transferred to a foreign corporation. Thus, the previously deducted losses of one branch

may not be offset, for purposes of determining the gain required to be recognized under the rules of this section, by the income of another branch that is also transferred to a foreign corporation. Similarly, the losses of one branch shall not be recaptured upon a transfer of the assets of a separate branch. Whether the foreign activities of a U.S. person are carried out through more than one branch must be determined under all of the facts and circumstances. In general, a separate branch exists if a particular group of activities is sufficiently integrated to constitute a single business that could be operated as an independent enterprise. For purposes of determining the combination of activities that constitute a branch operation as defined in this paragraph (g), the nominal relationship among those activities shall not be controlling. Factors suggesting that nominally separate business operations constitute a single foreign branch include a substantial identity of products, customers, operational facilities, operational processes, accounting and record-keeping functions, management, employees, distribution channels, or sales and purchasing forces. For examples of the application of the principles of this paragraph (g)(2), see Revenue Ruling 81–82, 1981–1 C.B. 127.

(3) *Consolidated group.* For purposes of this section, the activities of each of two domestic corporations outside the United States will be considered to constitute a single foreign branch if—

(i) The two corporations are members of the same consolidated group of corporations; and

(ii) The activities of the two corporations in the aggregate would constitute a single foreign branch if conducted by a single corporation.

Notwithstanding the preceding rule of this paragraph (g)(3), gains of a foreign branch of a domestic corporation arising in a year in which that corporation did not file a consolidated return with a second domestic corporation shall not be applied to reduce the previously deducted losses of a foreign branch of the second corporation (but may be applied to reduce such losses of the foreign branch of the first corporation) upon the transfer of the two branches to a foreign corporation, even though the two domestic corporations file a consolidated return for the year in which the transfer occurs and the two branches are considered at that time to constitute a single foreign branch. For an example of the application of the principles of this paragraph (g)(3), see Revenue Ruling 81–89, 1981–1 C.B. 129.

(4) *Property not transferred.* A U.S. transferor's failure to transfer any property of a foreign branch shall be irrelevant to the determination of the previously deducted losses of the branch subject to recapture under the rules of this section. Thus, if the activities with respect to untransferred property constituted a part of the branch operation under the rules of this paragraph (g), then the losses generated by those activities shall be subject to recapture, notwithstanding the failure to transfer the property. For an example of the application of the principles of this paragraph (g)(4), see Revenue Ruling 80–247, 1980–2 C.B. 127, relating to property abandoned by the U.S. transferor.

(h) *Anti-abuse rule.* If—

(1) A U.S. person transfers property of a foreign branch to a domestic corporation for a principal purpose of avoiding the effect of this section; and

(2) The domestic corporation thereafter transfers the property of the foreign branch to a foreign corporation,

Then, solely for purposes of this section, that U.S. person shall be treated as having transferred the property of the branch directly to the foreign corporation. A U.S. person shall be presumed to have transferred property of a foreign branch for a principal purpose of avoiding the effect of this section if the property is transferred to the domestic corporation less than two years prior to the domestic corporation's transfer of the property to a foreign corporation. This presumption may be rebutted by clear evidence that the subsequent transfer of the property was not contemplated at the time of the initial transfer to the domestic corporation and that avoidance of the effect of this section was not a principal purpose for the transaction. A transfer may have more than one principal purpose.

(i) *Basis adjustments.* Basis adjustments reflecting gain recognized pursuant to this section shall be made as described in §1.367(a)–1T(b)(4)(ii).

[T.D. 8087, 51 FR 17950, May 16, 1986]

§1.367(a)–8 Gain recognition agreement requirements.

(a) *In general.* This section specifies the general terms and conditions for an agreement to recognize gain entered into pursuant to §1.367(a)–3(b) or (c) to qualify for nonrecognition treatment under section 367(a).

(1) *Filing requirements.* A transferor's agreement to recognize gain (described in paragraph (b) of this section) must be attached to, and filed by the due date (including extensions) of, the transferor's income tax return for the taxable year that includes the date of the transfer.

(2) *Gain recognition agreement forms.* Any agreement, certification, or other document required to be filed pursuant to the provisions of this section shall be submitted on such forms as may be prescribed therefor by the Commissioner (or similar statements providing the same information that is required on such forms). Until such time as forms are prescribed, all necessary filings may be accomplished by providing the required information to the Internal Revenue Service in accordance with the rules of this section.

(3) *Who must sign.* The agreement to recognize gain must be signed under penalties of perjury by a responsible officer in the case of a corporate transferor, except that if the transferor is a member but not the parent of an affiliated group (within the meaning of section 1504(a)(1)), that files a consolidated Federal income tax return for the taxable year in which the transfer was made, the agreement must be entered into by the parent corporation and signed by a responsible officer of such parent corporation; by the individual, in the case of an individual transferor (including a partner who is treated as a transferor by virtue of §1.367(a)–1T(c)(3)); by a trustee, executor, or equivalent fiduciary in the case of a transferor that is a trust or estate; and by a debtor in possession or trustee in a bankruptcy case under Title 11, United States Code. An agreement may also be signed by an agent authorized to do so under a general or specific power of attorney.

(b) *Agreement to recognize gain*—(1) *Contents.* The agreement must set forth the following information, with the heading ‘‘GAIN RECOGNITION AGREEMENT UNDER §1.367(a)–8’’, and with paragraphs labeled to correspond with the numbers set forth as follows—

(i) A statement that the document submitted constitutes the transferor's agreement to recognize gain in accordance with the requirements of this section;

(ii) A description of the property transferred as described in paragraph (b)(2) of this section;

(iii) The transferor's agreement to recognize gain, as described in paragraph (b)(3) of this section;

(iv) A waiver of the period of limitations as described in paragraph (b)(4) of this section;

(v) An agreement to file with the transferor's tax returns for the 5 full taxable years following the year of the transfer a certification as described in paragraph (b)(5) of this section;

(vi) A statement that arrangements have been made in connection with the transferred property to ensure that the transferor will be informed of any subsequent disposition of any property that would require the recognition of gain under the agreement; and

(vii) A statement as to whether, in the event all or a portion of the gain recognition agreement is triggered under paragraph (e) of this section, the taxpayer elects to include the required amount in the year of the triggering event rather than in the year of the initial transfer. If the taxpayer elects to include the required amount in the year of the triggering event, such statement must be included with all of the other information required under this paragraph (b), and filed by the due date (including extensions) of the transferor's income tax return for the taxable year that includes the date of the transfer.

(2) *Description of property transferred*—(i) The agreement shall include a description of each property transferred by the transferor, an estimate of the fair market value of the property as of the date of the transfer, a statement of

the cost or other basis of the property and any adjustments thereto, and the date on which the property was acquired by the transferor.

(ii) If the transferred property is stock or securities, the transferor must provide the information contained in paragraphs (b)(2)(ii)(A) through (F) of this section as follows—

(A) The type or class, amount, and characteristics of the stock or securities transferred, as well as the name, address, and place of incorporation of the issuer of the stock or securities, and the percentage (by voting power and value) that the stock (if any) represents of the total stock outstanding of the issuing corporation;

(B) The name, address and place of incorporation of the transferee foreign corporation, and the percentage of stock (by voting power and value) that the U.S. transferor received or will receive in the transaction;

(C) If stock or securities are transferred in an exchange described in section 361(a) or (b), a statement that the conditions set forth in the second sentence of section 367(a)(5) and any regulations under that section have been satisfied, and an explanation of any basis or other adjustments made pursuant to section 367(a)(5) and any regulations thereunder;

(D) If the property transferred is stock or securities of a domestic corporation, the taxpayer identification number of the domestic corporation whose stock or securities were transferred, together with a statement that all of the requirements of § 1.367(a)–3(c)(1) are satisfied;

(E) If the property transferred is stock or securities of a foreign corporation, a statement as to whether the U.S. transferor was a United States shareholder (a U.S. transferor that satisfies the ownership requirements of section 1248(a)(2) or (c)(2)) of the corporation whose stock was exchanged, and, if so, a statement as to whether the U.S. transferor is a United States shareholder with respect to the stock received, and whether any reporting requirements contained in regulations under section 367(b) are applicable, and, if so, whether they have been satisfied; and

(F) If the transaction involved the transfer of assets other than stock or securities and the transaction was subject to the indirect stock transfer rules of § 1.367(a)–3(d), a statement as to whether the reporting requirements under section 6038B have been satisfied with respect to the transfer of property other than stock or securities, and an explanation of whether gain was recognized under section 367(a)(1) and whether section 367(d) was applicable to the transfer of such assets, or whether any tangible assets qualified for nonrecognition treatment under section 367(a)(3) (as limited by section 367(a)(5) and §§ 1.367(a)–4T, 1.367(a)–5T and 1.367(a)–6T).

(3) *Terms of agreement*—(i) *General rule.* If prior to the close of the fifth full taxable year (i.e., not less than 60 months) following the close of the taxable year of the initial transfer, the transferee foreign corporation disposes of the transferred property in whole or in part (as described in paragraphs (e)(1) and (2) of this section), or is deemed to have disposed of the transferred property (under paragraph (e)(3) of this section), then, unless an election is made in paragraph (b)(1)(vii) of this section, by the 90th day thereafter the U.S. transferor must file an amended return for the year of the transfer and recognize thereon the gain realized but not recognized upon the initial transfer, with interest. If an election under paragraph (b)(1)(vii) of this section was made, then, if a disposition occurs, the U.S. transferor must include the gain realized but not recognized on the initial transfer in income on its Federal income tax return for the period that includes the date of the triggering event. In accordance with paragraph (b)(3)(iii) of this section, interest must be paid on any additional tax due. (If a taxpayer properly makes the election under paragraph (b)(1)(vii) of this section but later fails to include the gain realized in income, the Commissioner may, in his discretion, include the gain in the taxpayer's income in the year of the initial transfer.)

(ii) *Offsets.* No special limitations apply with respect to net operating losses, capital losses, credits against tax, or similar items.

(iii) *Interest.* If additional tax is required to be paid, then interest must be paid on that amount at the rates determined under section 6621 with respect to the period between the date that was prescribed for filing the transferor's income tax return for the year of the initial transfer and the date on which the additional tax for that year is paid. If the election in paragraph (b)(1)(vii) of this section is made, taxpayers should enter the amount of interest due, labelled as ''sec. 367 interest'' at the bottom right margin of page 1 of the Federal income tax return for the period that includes the date of the triggering event (page 2 if the taxpayer files a Form 1040), and include the amount of interest in their payment (or reduce the amount of any refund due by the amount of the interest). If the election in paragraph (b)(1)(vii) of this section is made, taxpayers should, as a matter of course, include the amount of gain as taxable income on their Federal income tax returns (together with other income or loss items). The amount of tax relating to the gain should be separately stated at the bottom right margin of page 1 of the Federal income tax return (page 2 if the taxpayer files a Form 1040), labelled as ''sec. 367 tax.''

(iv) *Basis adjustments*—(A) *Transferee.* If a U.S. transferor is required to recognize gain under this section on the disposition by the transferee foreign corporation of the transferred property, then in determining for U.S. income tax purposes any gain or loss recognized by the transferee foreign corporation upon its disposition of such property, the transferee foreign corporation's basis in such property shall be increased (as of the date of the initial transfer) by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount) by the U.S. transferor. In the case of a deemed disposition of the stock of the transferred corporation described in paragraph (e)(3)(i) of this section, the transferee foreign corporation's basis in the transferred stock deemed disposed of shall be increased by the amount of gain required to be recognized by the U.S. transferor.

(B) *Transferor.* If a U.S. transferor is required to recognize gain under this section, then the U.S. transferor's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount).

(C) *Other adjustments.* Other appropriate adjustments to basis that are consistent with the principles of this paragraph (b)(3)(iv) may be made if the U.S. transferor is required to recognize gain under this section.

(D) *Example.* The principles of this paragraph (b)(3) are illustrated by the following example:

Example—(i) Facts. D, a domestic corporation owning 100 percent of the stock of S, a foreign corporation, transfers all of the S stock to F, a foreign corporation, in an exchange described in section 368(a)(1)(B). The section 1248 amount with respect to the S stock is $0. In the exchange, D receives 20 percent of the voting stock of F. All of the requirements of §1.367(a)–3(c)(1) are satisfied, and D enters into a five-year gain recognition agreement to qualify for nonrecognition treatment and does not make the election contained in paragraph (b)(1)(vii) of this section. One year after the initial transfer, F transfers all of the S stock to F1 in an exchange described in section 351, and D complies with the requirements of paragraph (g)(2) of this section. Two years after the initial transfer, D transfers its entire 20 percent interest in F's voting stock to a domestic partnership in exchange for an interest in the partnership. Three years after the initial exchange, S disposes of substantially all (as described in paragraph (e)(3)(i) of this section) of its assets in a transaction that would be taxable under U.S. income tax principles, and D is required by the terms of the gain recognition agreement to recognize all the gain that it realized on the initial transfer of the stock of S.

(ii) *Result.* As a result of this gain recognition and paragraph (b)(3)(iv) of this section, D is permitted to increase its basis in the partnership interest by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount), the partnership is permitted to increase its basis in the 20 percent voting stock of F, F is permitted to increase its basis in the stock of F1, and F1 is permitted to increase its basis in the stock of S. S, however, is not permitted to increase its basis in its assets for purposes of determining the direct or indirect U.S. tax results, if any, on the sale of its assets.

(4) *Waiver of period of limitation.* The U.S. transferor must file, with the agreement to recognize gain, a waiver

of the period of limitation on assessment of tax upon the gain realized on the transfer. The waiver shall be executed on Form 8838 (Consent to Extend the Time to Assess Tax Under Section 367—Gain Recognition Agreement) and shall extend the period for assessment of such tax to a date not earlier than the eighth full taxable year following the taxable year of the transfer. Such waiver shall also contain such other terms with respect to assessment as may be considered necessary by the Commissioner to ensure the assessment and collection of the correct tax liability for each year for which the waiver is required. The waiver must be signed by a person who would be authorized to sign the agreement pursuant to the provisions of paragraph (a)(3) of this section.

(5) *Annual certification*—(i) *In general.* The U.S. transferor must file with its income tax return for each of the five full taxable years following the taxable year of the transfer a certification that the property transferred has not been disposed of by the transferee in a transaction that is considered to be a disposition for purposes of this section, including a disposition described in paragraph (e)(3) of this section. The U.S. transferor must include with its annual certification a statement describing any taxable dispositions of assets by the transferred corporation that are not in the ordinary course of business. The annual certification pursuant to this paragraph (b)(5) must be signed under penalties of perjury by a person who would be authorized to sign the agreement pursuant to the provisions of paragraph (a)(3) of this section.

(ii) *Special rule when U.S. transferor leaves its affiliated group.* If, at the time of the initial transfer, the U.S. transferor was a member of an affiliated group (within the meaning of section 1504(a)(1)) filing a consolidated Federal income tax return but not the parent of such group, the U.S. transferor will file the annual certification (and provide a copy to the parent corporation) if it leaves the group during the term of the gain recognition agreement, notwithstanding the fact that the parent entered into the gain recognition agreement, extended the statute of limitations pursuant to this section, and remains liable (with other corporations that were members of the group at the time of the initial transfer) under the gain recognition agreement in the case of a triggering event.

(c) *Failure to comply*—(1) *General rule.* If a person that is required to file an agreement under paragraph (b) of this section fails to file the agreement in a timely manner, or if a person that has entered into an agreement under paragraph (b) of this section fails at any time to comply in any material respect with the requirements of this section or with the terms of an agreement submitted pursuant hereto, then the initial transfer of property is described in section 367(a)(1) (unless otherwise excepted under the rules of this section) and will be treated as a taxable exchange in the year of the initial transfer (or in the year of the failure to comply if the agreement was filed with a timely-filed (including extensions) original (not amended) return and an election under paragraph (b)(1)(vii) of this section was made). Such a material failure to comply shall extend the period for assessment of tax until three years after the date on which the Internal Revenue Service receives actual notice of the failure to comply.

(2) *Reasonable cause exception.* If a person that is permitted under § 1.367(a)–3(b) or (c) to enter into an agreement (described in paragraph (b) of this section) fails to file the agreement in a timely manner, as provided in paragraph (a)(1) of this section, or fails to comply in any material respect with the requirements of this section or with the terms of an agreement submitted pursuant hereto, the provisions of paragraph (c)(1) of this section shall not apply if the person is able to show that such failure was due to reasonable cause and not willful neglect and if the person files the agreement or reaches compliance as soon as he becomes aware of the failure. Whether a failure to file in a timely manner, or materially comply, was due to reasonable cause shall be determined by the district director under all the facts and circumstances.

(d) *Use of security.* The U.S. transferor may be required to furnish a bond or other security that satisfies the requirements of §301.7101–1 of this chapter if the district director determines that such security is necessary to ensure the payment of any tax on the gain realized but not recognized upon the initial transfer. Such bond or security will generally be required only if the stock or securities transferred are a principal asset of the transferor and the director has reason to believe that a disposition of the stock or securities may be contemplated.

(e) *Disposition (in whole or in part) of stock of transferred corporation*—(1) *In general*—(i) *Definition of disposition.* For purposes of this section, a disposition of the stock of the transferred corporation that triggers gain under the gain recognition agreement includes any taxable sale or any disposition treated as an exchange under this subtitle, (e.g., under sections 301(c)(3)(A), 302(a), 311, 336, 351(b) or section 356(a)(1)), as well as any deemed disposition described under paragraph (e)(3) of this section. It does not include a disposition that is not treated as an exchange, (e.g., under section 302(d) or 356(a)(2)). A disposition of all or a portion of the stock of the transferred corporation by installment sale is treated as a disposition of such stock in the year of the installment sale. A disposition of the stock of the transferred corporation does not include certain transfers treated as nonrecognition transfers (under paragraph (g) of this section) in which the gain recognition agreement is retained but modified, or certain transfers (under paragraph (h) of this section) in which the gain recognition agreement is terminated and has no further effect.

(ii) *Example.* The provisions of this paragraph (e) are illustrated by the following example:

Example. Interaction between trigger of gain recognition agreement and subpart F rules—(i) *Facts.* A U.S. corporation (USP) owns all of the stock of two foreign corporations, CFC1 and CFC2. USP's section 1248 amount with respect to CFC2 is $30. USP has a basis of $50 in its stock of CFC2; CFC2 has a value of $100. In a transaction described in section 351 and 368(a)(1)(B), USP transfers the stock of CFC2 in exchange for additional stock of CFC1. The transaction is subject to both sections 367 (a) and (b). See §§1.367(a)–3(b) and 1.367(b)–1(a). To qualify for nonrecognition treatment under section 367(a), USP enters into a 5-year gain recognition agreement for $50 under this section. No election under paragraph 8(b)(1)(vii) of this section is made. USP also complies with the notice requirement under §1.367(b)–1(c).

(ii) *Trigger of gain recognition agreement with no election.* Assume that in year 2, CFC1 sells the stock of CFC2 for $120, and that there were no distributions by CFC2 prior to the sale. USP must amend its return for the year of the initial transfer and include $50 in income (with interest), $30 of which will be recharacterized as a dividend pursuant to section 1248. As a result, CFC1 has a basis of $100 in CFC2. As a result of the sale of CFC2 stock by CFC1, USP will have $20 of subpart F foreign personal holding company income. See section 951, et. seq., and the regulations thereunder.

(iii) *Trigger of gain recognition agreement with election.* Assume the same facts as in paragraphs (i) and (ii) of this *Example,* except that when USP attached the gain recognition agreement to its timely filed Federal income tax return for the year of the initial transfer, it elected under paragraph (b)(1)(vii) of this section to include the amount of gain realized but not recognized on the initial transfer, $50, in the year of the triggering event rather than in the year of the initial transfer. In such case, the result is the same as in paragraph (e)(1)(ii)(B) of this section, except that USP will include the $50 of gain on its year 2 return, together with interest. For purposes of determining the dividend component, if any, of the $50 inclusion, USP will take into account the section 1248 amount of CFC2 at the time of the disposition in Year 2.

(2) *Partial disposition.* If the transferee foreign corporation disposes of (or is deemed to dispose of) only a portion of the transferred stock or securities, then the U.S. transferor is required to recognize only a proportionate amount of the gain realized but not recognized upon the initial transfer of the transferred property. The proportion required to be recognized shall be determined by reference to the relative fair market values of the transferred stock or securities disposed of and retained. Solely for purposes of determining whether the U.S. transferor must recognize income under the agreement described in paragraph (b) of this section, in the case of transferred property (including stock or securities) that is fungible with other property owned by the transferee foreign corporation, a disposition by such corporation of any such property shall be deemed to be a

disposition of no less than a ratable portion of the transferred property.

(3) *Deemed dispositions of stock of transferred corporation*—(i) *Disposition by transferred corporation of substantially all of its assets*—(A) *In general.* Unless an exception applies (as described in paragraph (e)(3)(i)(B) of this section), a transferee foreign corporation will be treated as having disposed of the stock or securities of the transferred corporation if, within the term of the gain recognition agreement, the transferred corporation makes a disposition of substantially all (within the meaning of section 368(a)(1)(C)) of its assets (including stock in a subsidiary corporation or an interest in a partnership). If the initial transfer that necessitated the gain recognition agreement was an indirect stock transfer, see § 1.367(a)–3(d)(2)(v). If the transferred corporation is a U.S. corporation, see paragraph (h)(2) of this section.

(B) The transferee foreign corporation will not be deemed to have disposed of the stock of the transferred corporation if the transferred corporation is liquidated into the transferee foreign corporation under sections 337 and 332, provided that the transferee foreign corporation does not dispose of substantially all of the assets formerly held by the transferred corporation (and considered for purposes of the substantially all determination) within the remaining period during which the gain recognition agreement is in effect. A nonrecognition transfer is not counted for purposes of the substantially all determination as a disposition if the transfer satisfies the requirements of paragraph (g)(3) of this section. A disposition does not include a compulsory transfer as described in § 1.367(a)–4T(f) that was not reasonably forseeable by the U.S. transferor at the time of the initial transfer.

(ii) *U.S. transferor becomes a non-citizen nonresident.* If a U.S. transferor loses U.S. citizenship or a long-term resident ceases to be taxed as a lawful permanent resident (as defined in section 877(e)(2)), then immediately prior to the date that the U.S. transferor loses U.S. citizenship or ceases to be taxed as a long-term resident, the gain recognition agreement will be triggered as if the transferee foreign corporation disposed of all of the stock of the transferred corporation in a taxable transaction on such date. No additional inclusion is required under section 877, and a gain recognition agreement under section 877 may not be used to avoid taxation under section 367(a) resulting from the trigger of the section 367(a) gain recognition agreement.

(f) *Effect on gain recognition agreement if U.S. transferor goes out of existence*—(1) *In general.* If an individual transferor that has entered into an agreement under under paragraph (b) of this section dies, or if a U.S. trust or estate that has entered into an agreement under paragraph (b) of this section goes out of existence and is not required to recognize gain as a consequence thereof with respect to all of the stock of the transferee foreign corporation received in the initial transfer and not previously disposed of, then the gain recognition agreement will be triggered unless one of the following requirements is met—

(i) The person winding up the affairs of the transferor retains, for the duration of the waiver of the statute of limitations relating to the gain recognition agreement, assets to meet any possible liability of the transferor under the duration of the agreement;

(ii) The person winding up the affairs of the transferor provides security as provided under paragraph (d) of this section for any possible liability of the transferor under the agreement; or

(iii) The transferor obtains a ruling from the Internal Revenue Service providing for successors to the transferor under the gain recognition agreement.

(2) *Special rule when U.S. transferor is a corporation*—(i) *U.S. transferor goes out of existence pursuant to the transaction.* If the transferor is a U.S. corporation that goes out of existence in a transaction in which the transferor's gain would have qualified for nonrecognition treatment under § 1.367(a)–3(b) or (c) had the U.S. transferor remained in existence and entered into a gain recognition agreement, then the gain may generally qualify for nonrecognition treatment only if the U.S. transferor is owned by a single U.S. parent corporation and the U.S. transferor and its parent corporation file a consolidated

Federal income tax return for the taxable year that includes the transfer, and the parent of the consolidated group enters into the gain recognition agreement. However, notwithstanding the preceding sentence, a U.S. transferor that was controlled (within the meaning of section 368(c)) by five or fewer domestic corporations may request a ruling that, if certain conditions prescribed by the Internal Revenue Service are satisfied, the transaction may qualify for nonrecognition treatment.

(ii) *U.S. corporate transferor is liquidated after gain recognition agreement is filed.* If a U.S. transferor files a gain recognition agreement but is liquidated during the term of the gain recognition agreement, such agreement will be terminated if the liquidation does not qualify as a tax-free liquidation under sections 337 and 332 and the U.S. transferor includes in income any gain from the liquidation. If the liquidation qualifies for nonrecognition treatment under sections 337 and 332, the gain recognition agreement will be triggered unless the U.S. parent corporation and the U.S. transferor file a consolidated Federal income tax return for the taxable year that includes the dates of the initial transfer and the liquidation of the U.S. transferor, and the U.S. parent enters into a new gain recognition agreement and complies with reporting requirements similar to those contained in paragraph (g)(2) of this section.

(g) *Effect on gain recognition agreement of certain nonrecognition transactions*—(1) *Certain nonrecognition transfers of stock or securities of the transferee foreign corporation by the U.S. transferor.* If the U.S. transferor disposes of any stock of the transferee foreign corporation in a nonrecognition transfer and the U.S. transferor complies with reporting requirements similar to those contained in paragraph (g)(2) of this section, the U.S. transferor shall continue to be subject to the terms of the gain recognition agreement in its entirety.

(2) *Certain nonrecognition transfers of stock or securities of the transferred corporation by the transferee foreign corporation.* (i) If, during the period the gain recognition agreement is in effect, the transferee foreign corporation disposes of all or a portion of the stock of the transferred corporation in a transaction in which gain or loss would not be required to be recognized by the transferee foreign corporation under U.S. income tax principles, such disposition will not be treated as a disposition within the meaning of paragraph (e) of this section if the transferee foreign corporation receives (or is deemed to receive), in exchange for the property disposed of, stock in a corporation, or an interest in a partnership, that acquired the transferred property (or receives stock in a corporation that controls the corporation acquiring the transferred property); and the U.S. transferor complies with the requirements of paragraphs (g)(2)(ii) through (iv) of this section.

(ii) The U.S. transferor must provide a notice of the transfer with its next annual certification under paragraph (b)(5) of this section, setting forth—

(A) A description of the transfer;

(B) The applicable nonrecognition provision; and

(C) The name, address, and taxpayer identification number (if any) of the new transferee of the transferred property.

(iii) The U.S. transferor must provide with its next annual certification a new agreement to recognize gain (in accordance with the rules of paragraph (b) of this section) if, prior to the close of the fifth full taxable year following the taxable year of the initial transfer, either—

(A) The initial transferee foreign corporation disposes of the interest (if any) which it received in exchange for the transferred property (other than in a disposition which itself qualifies under the rules of this paragraph (g)(2)); or

(B) The corporation or partnership that acquired the property disposes of such property (other than in a disposition which itself qualifies under the rules of this paragraph (g)(2)); or

(C) There is any other disposition that has the effect of an indirect disposition of the transferred property.

(iv) If the U.S. transferor is required to enter into a new gain recognition agreement, as provided in paragraph (g)(2)(iii) of this section, the U.S. transferor must provide with its next annual certification (described in paragraph (b)(5) of this section) a statement that arrangements have been made, in connection with the nonrecognition transfer, ensuring that the U.S. transferor will be informed of any subsequent disposition of property with respect to which recognition of gain would be required under the agreement.

(3) *Certain nonrecognition transfers of assets by the transferred corporation.* A disposition by the transferred corporation of all or a portion of its assets in a transaction in which gain or loss would not be required to be recognized by the transferred corporation under U.S. income tax principles, will not be treated as a disposition within the meaning of paragraph (e)(3) of this section if the transferred corporation receives in exchange stock or securities in a corporation or an interest in a partnership that acquired the assets of the transferred corporation (or receives stock in a corporation that controls the corporation acquiring the assets). If the transaction would be treated as a disposition of substantially all of the transferred corporation's assets, the preceding sentence shall only apply if the U.S. transferor complies with reporting requirements comparable to those of paragraphs (g)(2)(ii) through (iv) of this section, providing for notice, an agreement to recognize gain in the case of a direct or indirect disposition of the assets previously held by the transferred corporation, and an assurance that necessary information will be provided to appropriate parties.

(h) *Transactions that terminate the gain recognition agreement*—(1) *Taxable disposition of stock or securities of transferee foreign corporation by U.S. transferor.* (i) If the U.S. transferor disposes of all of the stock of the transferee foreign corporation that it received in the initial transfer in a transaction in which all realized gain (if any) is recognized currently, then the gain recognition agreement shall terminate and have no further effect. If the transferor disposes of a portion of the stock of the transferee foreign corporation that it received in the initial transfer in a taxable transaction, then in the event that the gain recognition agreement is later triggered, the transferor shall be required to recognize only a proportionate amount of the gain subject to the gain recognition agreement that would otherwise be required to be recognized on a subsequent disposition of the transferred property under the rules of paragraph (b)(2) of this section. The proportion required to be recognized shall be determined by reference to the percentage of stock (by value) of the transferee foreign corporation received in the initial transfer that is retained by the United States transferor.

(ii) The rule of this paragraph (h) is illustrated by the following example:

Example. A, a United States citizen, owns 100 percent of the outstanding stock of foreign corporation X. In a transaction described in section 351, A exchanges his stock in X (and other assets) for 100 percent of the outstanding voting and nonvoting stock of foreign corporation Y. A submits an agreement under the rules of this section to recognize gain upon a later disposition. In the following year, A disposes of 60 percent of the fair market value of the stock of Y, thus terminating 60 percent of the gain recognition agreement. One year thereafter, Y disposes of 50 percent of the fair market value of the stock of X. A is required to include in his income in the year of the later disposition 20 percent (40 percent interest in Y multiplied by a 50 percent disposition of X) of the gain that A realized but did not recognize on his initial transfer of X stock to Y.

(2) *Certain dispositions by a domestic transferred corporation of substantially all of its assets.* If the transferred corporation is a domestic corporation and the U.S. transferor and the transferred corporation filed a consolidated Federal income tax return at the time of the transfer, the gain recognition agreement shall terminate and cease to have effect if, during the term of such agreement, the transferred corporation disposes of substantially all of its assets in a transaction in which all realized gain is recognized currently. If an indirect stock transfer necessitated the filing of the gain recognition agreement, such agreement shall terminate if, immediately prior to the indirect transfer, the U.S. transferor and the acquired corporation filed a consolidated return (or, in the case of a section 368(a)(1)(A) and (a)(2)(E) reorganization described in §1.367(a)–3(d)(1)(ii), the U.S. transferor and the

acquiring corporation filed a consolidated return) and the transferred corporation disposes of substantially all of its assets (taking into account §1.367(a)–3(d)(2)(v)) in a transaction in which all realized gain is recognized currently.

(3) *Distribution by transferee foreign corporation of stock of transferred corporation that qualifies under section 355 or section 337.* If, during the term of the gain recognition agreement, the transferee foreign corporation distributes to the U.S. transferor, in a transaction that qualifies under section 355, or in a liquidating distribution that qualifies under sections 332 and 337, the stock that initially necessitated the filing of the gain recognition agreement (and any additional stock received after the initial transfer), the gain recognition agreement shall terminate and have no further effect, provided that immediately after the section 355 distribution or section 332 liquidation, the U.S. transferor's basis in the transferred stock is less than or equal to the basis that it had in the transferred stock immediately prior to the initial transfer that necessitated the GRA.

(i) *Effective date.* The rules of this section shall apply to transfers that occur on or after July 20, 1998. For matters covered in this section for periods before July 20, 1998, the corresponding rules of §1.367(a)–3T(g) (see 26 CFR part 1, revised April 1, 1998) and Notice 87–85 ((1987–2 C.B. 395); see §601.601(d)(2)(ii) of this chapter) apply. In addition, if a U.S. transferor entered into a gain recognition agreement for transfers prior to July 20, 1998, then the rules of §1.367(a)–3T(g) (see 26 CFR part 1, revised April 1, 1998) shall continue to apply in lieu of this section in the event of any direct or indirect nonrecognition transfer of the same property. See, also, §1.367(a)–3(f).

[T.D. 8770, 63 FR 33562, June 19, 1998]

§1.367(b)–1 Other transfers.

(a) *Scope.* Section 367(b) and the regulations thereunder set forth certain rules regarding the extent to which a foreign corporation shall be considered to be a corporation in connection with an exchange to which section 367(b) applies. An exchange to which section 367(b) applies is any exchange described in section 332, 351, 354, 355, 356 or 361, with respect to which the status of a foreign corporation as a corporation is relevant for determining the extent to which income shall be recognized or for determining the effect of the transaction on earnings and profits, basis of stock or securities, or basis of assets. Notwithstanding the preceding sentence, a section 367(b) exchange does not include a transfer to the extent that the foreign corporation fails to be treated as a corporation by reason of section 367(a)(1). See §1.367(a)–3(b)(2)(ii) for an illustration of the interaction of sections 367 (a) and (b). This paragraph applies for transfers occurring on or after July 20, 1998.

(b) [Reserved]. For further guidance, see §7.367(b)–1(b) of this chapter.

(c) *Notice required*—(1) *In general.* If any person referred to in section 6012 (relating to the requirement to make returns of income) realized gain or other income (whether or not recognized) on account of any exchange to which section 367(b) applies, such person must file a notice of such exchange on or before the last date for filing a Federal income tax return (taking into account any extensions of time therefor) for the person's taxable year in which such gain or other income is realized. This notice must be filed with the district director with whom the person would be required to file a Federal income tax return for the taxable year in which the exchange occurs. Notwithstanding anything in this paragraph (c)(1) to the contrary, no notice under this paragraph (c)(1) is required to the extent a transaction is described in both section 367(a) and (b), and the exchanging person is not a United States shareholder of the corporation whose stock is exchanged. This paragraph applies to transfers occurring on or after July 20, 1998.

(c)(2) through (f) [Reserved]. For further guidance, see §7.367(b)–1(c)(2) through (f) of this chapter.

[T.D. 8770, 63 FR 33566, June 19, 1998]

§1.367(b)–2 Definitions.

(a)—(c) [Reserved]

(d) *Section 1248 amount.* In the case of an exchange of stock in a first-tier foreign corporation described in §7.367 (b)–

7 (c)(1)(i) of this chapter or a distribution by a foreign corporation described in § 7.367 (b)–10 (i) of this chapter in which an inclusion in gross income determined by reference to the ''section 1248 amount'' is required by those provisions, the term *section 1248 amount* means the net positive earnings and profits which would have been attributable under section 1248 and the regulations under that section to the stock of the foreign corporation exchanged if the stock has been sold in a transaction to which section 1248(a) applied. For all other purposes of this section, in the case of an exchange of stock in a first-tier foreign corporation to which section 367(b) applies, the term *section 1248 amount* means the earnings and profits or deficit in earnings and profits which would have been attributable under section 1248 and the regulations under that section to the stock of the foreign corporation exchanged if the stock had been sold in a transaction to which section 1248(a) applied.

(e) [Reserved]

(f) *All earnings and profits amounts.* For purposes of asset repatriations covered by §§ 7.367 (b)–5 (b), 7.367 (b)–6 (c), 7.367 (b)–7 (c)(2) and 7.367 (b)–10 (j) of this chapter, the term *all earnings and profits amount* means the net positive earnings and profits, if any, for all taxable years which are attributable to the stock of the foreign corporation exchanged under the principles of section 1246 or 1248 (whichever is applicable) and the regulations under that section. For all other purposes, the term *all earnings and profits amount* means the earnings and profits or deficit in earnings and profits for all taxable years which are attributable to the stock of the foreign corporation exchanged under the principles of section 1246 or 1248 (whichever is applicable) and the regulations under that section. The determination shall be made by applying section 1246 or 1248 as modified by §§ 7.367 (b)–2 through 7.367 (b)–12 of this chapter as if there were no distinction in those sections between earnings and profits accumulated before or after December 31, 1962.

[T.D. 8397, 57 FR 6555, Feb. 26, 1992]

§ 1.367(b)–4 Certain exchanges of stock described in section 354, 351, or sections 354 and 351.

(a) *In general.* This section applies to an exchange of stock in a foreign corporation by a United States shareholder if the exchange is described in section 351, or is described in section 354 and is made pursuant to a reorganization described in section 368(a)(1)(B) (including an exchange that is also described in section 351), without regard to whether the exchange may also be described in section 361.

(b) *Recognition of income.* If an exchange is described in paragraph (b)(1), (2) or (3) of this section, the exchanging shareholder shall include in income as a deemed dividend the section 1248 amount attributable to the stock that it exchanges. See, also, § 1.367(a)–3(b)(2). However, in the case of a recapitalization described in paragraph (b)(3) of this section that occurred prior to July 20, 1998, the exchanging shareholder shall include the section 1248 amount on its tax return for the taxable year that includes the exchange described in paragraph (b)(2)(iii) of this section (and not in the taxable year of the recapitalization), except that no inclusion is required if both the recapitalization and the exchange described in paragraph (b)(2)(iii) of this section occurred prior to July 20, 1998.

(1) *Loss of United States shareholder or controlled foreign corporation status.* An exchange is described in this paragraph (b)(1) if—

(i) An exchanging shareholder receives stock of a foreign corporation that is not a controlled foreign corporation;

(ii) An exchanging shareholder receives stock of a controlled foreign corporation as to which the exchanging United States shareholder is not a United States shareholder; or

(iii) The corporation whose stock is exchanged is not a controlled foreign corporation immediately after the transfer.

(2) *Receipt by domestic corporation of preferred or other stock in certain instances.* An exchange is described in this paragraph (b)(2) if—

(i) Immediately before the exchange, the foreign acquired corporation and the foreign acquiring corporations are not members of the same affiliated group (within the meaning of section 1504(a), but without regard to the exceptions set forth in section 1504(b), and substituting the words ''more than 50'' in place of the words ''at least 80'' in sections 1504(a)(2)(A) and (B));

(ii) Immediately after the exchange, a domestic corporation meets the ownership threshold specified by section 902(a) or (b) such that it may qualify for a deemed paid foreign tax credit if it receives from the foreign acquiring corporation a distribution (directly or through tiers) of its earnings and profits; and

(iii) The exchanging shareholder receives preferred stock (other than preferred stock that is fully participating with respect to dividends, redemptions and corporate growth) in consideration for common stock or preferred stock that is fully participating with respect to dividends, redemptions and corporate growth, or, in the discretion of the District Director (and without regard to whether the stock exchanged is common stock or preferred stock), receives stock that entitles it to participate (through dividends, redemption payments or otherwise) disproportionately in the earnings generated by particular assets of the foreign acquired corporation or foreign acquiring corporation. See, e.g., paragraph (b)(4) *Example 1* through *Example 3* of this section.

(3) *Certain exchanges involving recapitalizations.* An exchange pursuant to a recapitalization under section 368(a)(1)(E) shall be deemed to be an exchange described in this paragraph (b)(3) if the following conditions are satisfied—

(i) During the 24-month period immediately preceding or following the date of the recapitalization, the corporation that undergoes the recapitalization (or a predecessor of, or successor to, such corporation) also engages in a transaction that would be described in paragraph (b)(2) of this section but for paragraph (b)(2)(iii) of this section, either as the foreign acquired corporation or the foreign acquiring corporation; and

(ii) The exchange in the recapitalization is described in paragraph (b)(2)(iii) of this section.

(4) *Examples.* The rules of paragraph (b)(2) of this section are illustrated by the following examples:

Example 1. (i) *Facts.* FC1 is a foreign corporation. DC is a domestic corporation that is unrelated to FC1. DC owns all of the outstanding stock of FC2, a foreign corporation, and FC2 has no outstanding preferred stock. The value of FC2 is $100 and DC has a basis of $50 in the stock of FC2. The section 1248 amount attributable to the stock of FC2 held by DC is $20. In a reorganization described in section 368(a)(1)(B), FC1 acquires all of the stock of FC2 and, in exchange, DC receives FC1 voting preferred stock that constitutes 10 percent of the outstanding voting stock of FC1 for purposes of section 902(a). Immediately after the exchange, FC1 and FC2 are controlled foreign corporations and DC is a United States shareholder of FC1, so paragraph (b)(1) of this section does not require inclusion in income of the section 1248 amount.

(ii) *Result.* Pursuant to §1.367(a)–3(b)(2), the transfer is subject to both section 367(a) and section 367(b). Under §1.367(a)–3(b)(1), DC will not be subject to tax under section 367(a)(1) if it enters into a gain recognition agreement in accordance with §1.367(a)–8. The amount of the gain recognition agreement is $50 less any inclusion under section 367(b). Even though paragraph (b)(1) of this section does not apply to require inclusion in income by DC of the section 1248 amount, DC must nevertheless include the $20 section 1248 amount in income as a deemed dividend from FC2 under paragraph (b)(2) of this section. Thus, if DC enters into a gain recognition agreement, the amount is $30 (the $50 gain realized less the $20 recognized under section 367(b)). (If DC fails to enter into a gain recognition agreement, it must include in income under section 367(a)(1) the $50 of gain realized; $20 of which is treated as a dividend. Section 367(b) does not apply in such case.)

Example 2. (i) *Facts.* The facts are the same as in *Example 1,* except that DC owns all of the outstanding stock of FC1 immediately before the transaction.

(ii) *Result.* Both section 367(a) and section 367(b) apply to the transfer. Paragraph (b)(2) of this section does not apply to require inclusion of the section 1248 amount. Under paragraph (b)(2)(i) of this section, the transaction is outside the scope of paragraph (b)(2) of this section, because FC1 and FC2 are, immediately before the transaction, members of the same affiliated group (within the meaning of such paragraph). Thus, if DC enters into a gain recognition agreement in accordance with §1.367(a)–8, the amount of such agreement is $50. As in *Example 1,* if DC fails to enter into a gain recognition agreement, it must include in income $50, $20 of which will be treated as a dividend.

Example 3. (i) *Facts.* FC1 is a foreign corporation. DC is a domestic corporation that is unrelated to FC1. DC owns all of the stock of FC2, a foreign corporation. The section 1248 amount attributable to the stock of FC2 held by DC is $20. In a reorganization described in section 368(a)(1)(B), FC1 acquires all of the stock of FC2 in exchange for FC1 voting stock that constitutes 10 percent of the outstanding voting stock of FC1 for purposes of section 902(a). The FC1 voting stock received by DC in the exchange carries voting rights in FC1, but by agreement of the parties the shares entitle the holder to dividends, amounts to be paid on redemption, and amounts to be paid on liquidation, which are to be determined by reference to the earnings or value of FC2 as of the date of such event, and which are affected by the earnings or value of FC1 only if FC1 becomes insolvent or has insufficient capital surplus to pay dividends.

(ii) *Result.* Under § 1.367(a)–3(b)(1), DC will not be subject to tax under section 367(a)(1) if it enters into a gain recognition agreement with respect to the transfer of FC2 stock to FC1. Under § 1.367(a)–3(b)(2), the exchange will be subject to the provisions of section 367(b) and the regulations thereunder to the extent that it is not subject to tax under section 367(a)(1). Furthermore, even if DC would not otherwise be required to recognize income under this section, the District Director may nevertheless require that DC include the $20 section 1248 amount in income as a deemed dividend from FC2 under paragraph (b)(2) of this section.

(5) *Special rules for applying section 1248 to subsequent exchanges.* (i) If income is not required to be recognized under paragraph (b) of this section in a transaction described in paragraph (a) of this section involving a foreign acquiring corporation, then, for purposes of applying section 1248 or 367(b) to subsequent exchanges, the earnings and profits attributable to an exchanging shareholder's stock received in the transaction shall be determined by reference to the exchanging shareholder's pro rata interest in the earnings and profits of the foreign acquiring corporation and foreign acquired corporation that accrue after the transaction, as well as its pro rata interest in the earnings and profits of the foreign acquired corporation that accrued prior to the transaction. See also section 1248(c)(2)(D)(ii). The earnings and profits attributable to an exchanging shareholder's stock received in the transaction shall not include any earnings and profits of the foreign acquiring corporation that accrued prior to the transaction.

(ii) The following example illustrates this paragraph (b)(5):

Example. (i) *Facts.* DC1, a domestic corporation, owns all of the stock of FC1, a foreign corporation. DC1 has owned all of the stock of FC1 since FC1's formation. DC2, a domestic corporation, owns all of the stock of FC2, a foreign corporation. DC2 has owned all of the stock of FC2 since FC2's formation. DC1 and DC2 are unrelated. In a reorganization described in section 368(a)(1)(B), DC1 transfers all of the stock of FC1 to FC2 in exchange for 40 percent of FC2. DC1 enters into a five-year gain recognition agreement under the provisions of §§ 1.367(a)–3(b) and 1.367(a)–8 with respect to the transfer of FC1 stock to FC2.

(ii) *Result.* DC1's transfer of FC1 to FC2 is an exchange described in paragraph (a) of this section. Because the transfer is not described in paragraph (b)(1), 2) or (3) of this section, DC1 is not required to include in income the section 1248 amount attributable to the exchanged FC1 stock and the special rule of this paragraph (b)(5) applies. Thus, for purposes of applying section 1248 or section 367(b) to subsequent exchanges, the earnings and profits attributable to DC1's interest in FC2 will be determined by reference to 40 percent of the post-reorganization earnings and profits of FC1 and FC2, and by reference to 100 percent of the pre-reorganization earnings and profits of FC1. The earnings and profits attributable to DC1's interest in FC2 do not include any earnings and profits accrued by FC2 prior to the transaction. Those earnings and profits are attributed to DC2 under section 1248.

(6) *Effective date.* This section applies to transfers occurring on or after July 20, 1998.

(c) and (d) [Reserved]. For further guidance, see § 7.367(b)–4(c) and (d) of this chapter.

[T.D. 8770, 63 FR 33567, June 19, 1998; 64 FR 15687, Apr. 1, 1999]

§ 1.367(b)–7 Exchange of stock described in section 354.

(a) *Scope.* (1) This section applies to an exchange of stock in a foreign corporation (other than a foreign investment company as defined in section 1246(b)) occurring on or after July 20, 1998.

(i) The exchange is described in section 354 or 356 and is made pursuant to a reorganization described in section 368(a)(1)(B) through (F); and

(ii) The exchanging person is either a United States shareholder or a foreign corporation having a United States shareholder who is also a United States shareholder of the corporation whose stock is exchanged.

(2) However, this section shall not apply if a United States shareholder exchanges stock of a foreign corporation in an exchange described in section 368(a)(1)(B). For further guidance, see §1.367(b)–4.

(b) [Reserved]. For further guidance, see §7.367(b)–7(b) of this chapter.

(c) *Receipt of other stock*—(1) *General rule.* (i) [Reserved]

(ii) If an exchanging foreign corporation receives stock of a domestic corporation, or stock of a foreign corporation which is not a controlled foreign corporation, or stock of a controlled foreign corporation as to which any United States shareholder of the exchanging foreign corporation is not a United States shareholder, then there shall be added to the earnings and profits or deficit of the exchanging foreign corporation the section 1248 (c)(2) amount and the additional earnings and profits amount of the exchanging foreign corporation, computed as if all stock of the corporation whose stock is exchanged is owned by a United States shareholder. The amount added shall not be considered a dividend. Paragraph (c)(1)(iii) of this section, and not this paragraph (c)(1)(ii), applies if the stock received—

(A) Is of a domestic corporation which is a member of an affiliated group (as defined in section 1504(a), without application of section 1504(b)(3)) that also includes the exchanging foreign corporation as a member; and

(B) Is not received in an exchange pursuant to which the foreign corporation whose stock is exchanged transfers its assets to a domestic corporation.

(iii) For exchanges beginning after March 3, 1989, if the stock received is described in the last sentence of paragraph (c)(1)(ii) of this section, then the foreign corporation whose stock is exchanged will be considered to be a foreign corporation for purposes of section 354 or 356. This paragraph (c)(1)(iii) may be illustrated by the following examples:

Example 1. A U.S. parent corporation (USP) owns all of the stock of a foreign corporation (CFC1), which in turn owns all of the stock of a second foreign corporation (CFC2), which in turn owns all of the stock of a third foreign corporation (CFC3). USP also owns all of the stock of a U.S. subsidiary (Subsidiary). CFC2 and CFC3 have accumulated earnings and profits or accumulated deficits in earnings and profits. Subsidiary acquires all of the stock of CFC2 from CFC1 in exchange for stock of Subsidiary in a reorganization described in section 368(a)(1)(B). CFC1 will not recognize gain on the exchange. Moreover, CFC2's and CFC3's accumulated earnings and profits or accumulated deficits in earnings and profits will remain in CFC2 and CFC3, respectively, and will not be added to the earnings and profits or deficits in earnings and profits of CFC1.

Example 2. USP owns all of the stock of CFC1, which in turn owns all of the stock of CFC2. USP also owns all of the stock of a U.S. subsidiary (Subsidiary), which in turn owns all of the stock of CFC3. CFC3 acquires the assets of CFC2 in exchange for voting stock of Subsidiary in a reorganization described in section 368(a)(1)(C). Pursuant to the reorganization, CFC2 distributes the stock of Subsidiary to CFC1. CFC1 will not recognize gain on the exchange. In addition, CFC2's accumulated earnings and profits or accumulated deficits in earnings and profits will be added to CFC3's earnings and profits under section 381(c)(2), subject to the limitations contained in section 381 and in the regulations under that section.

(2) [Reserved]

[T.D. 8397, 57 FR 6555, Feb. 26, 1992, as amended by T.D. 8770, 63 FR 33568, June 19, 1998]

§1.367(b)–8 Transfer of assets by a foreign corporation in an exchange described in section 351.

(a)—(b) [Reserved]

(c) *Transfer of stock in a controlled foreign corporation.* (1) [Reserved]

(2) If the transferor corporation transfers stock in a foreign corporation of which there is a United States shareholder immediately before the exchange, and the transferor receives stock of a domestic corporation, of a foreign corporation which is not a controlled foreign corporation, or of a controlled foreign corporation as to which any United States shareholder of the transferor is not a United States shareholder, paragraph (c)(1)(ii) of §1.367(b)–7 shall apply. This paragraph (c)(2) may

be illustrated by the following examples:

Example 1. A U.S. parent corporation (USP) owns all of the stock of a foreign corporation (CFC1), which in turn owns all of the stock of a second foreign corporation (CFC2). CFC1 and CFC2 have accumulated earnings and profits or accumulated deficits in earnings and profits. CFC1 transfers its CFC2 stock to a newly organized foreign corporation (Newco) that is not a controlled foreign corporation, in an exchange described in section 351(a). CFC1 receives 20 percent of the Newco stock in exchange for its CFC2 stock. Persons unrelated to USP and CFC1 receive the remaining 80 percent of the Newco stock. Pursuant to the first sentence of § 1.367(b)–7 (c)(1)(ii), CFC2's accumulated earnings and profits or accumulated deficits in earnings and profits will be added to CFC1's earnings and profits or deficits in earnings and profits.

Example 2. USP owns all of the stock of CFC1, which in turn owns all of the stock of CFC2. USP also owns all of the stock of a U.S. subsidiary (Subsidiary). Subsidiary has both voting and nonvoting stock outstanding. In a transaction occurring after March 3, 1989, CFC1 transfers its CFC2 stock to Subsidiary in an exchange described in section 351(a). CFC1 receives 80 percent of each class of Subsidiary's stock in exchange for its CFC2 stock. Pursuant to the last sentence of § 1.367(b)–7 (c)(1)(ii), CFC2's accumulated earnings and profits or accumulated deficits in earnings and profits will remain in CFC2, and will not be added to the earnings and profits or deficits in earnings and profits of CFC1.

[T.D. 8397, 57 FR 6555, Feb. 26, 1992]

§ 1.367(b)–9 Attribution of earnings and profits on an exchange described in section 351, 354, or 356.

(a) [Reserved]

(b) *General rule.* (1)—(3) [Reserved]

(4) For exchanges beginning on or after March 3, 1989, paragraph (b)(2) and (3) of § 7.367(b)–9 of this chapter will not apply if a U.S. shareholder described in §§ 7.367(b)–7 (b) or 7.367 (b)–8 (c)(1) of this chapter owns (applying the attribution rules of section 958) more than 50 percent of either the total voting power or the total value of the stock of both the corporation whose stock is received in the exchange and the corporation whose stock is exchanged. If this paragraph (b)(4) applies, the rules of section 381 (a) and the regulations under that section will determine the extent to which the corporation whose stock is received in the exchange (or other acquiring corporation) will succeed to the earnings and profits or a deficit in earnings and profits of the corporation whose stock is exchanged and of lower-tier corporations. This paragraph (b)(4) may be illustrated by the following examples:

Example 1. A U.S. parent owns all of the stock of CFC1 and CFC2. CFC1 has accumulated earnings and profits or an accumulated deficit in earnings and profits. CFC2 acquires all of the stock of CFC1 from the U.S. parent in a reorganization described in section 368 (a)(1)(B). CFC2 will not succeed to the earnings and profits or the accumulated deficit in earnings and profits of CFC1.

Example 2. A U.S. parent owns all of the stock of CFC1, which in turn owns all of the stock of CFC2. The U.S. parent also owns all of the stock of CFC3. CFC2 has accumulated earnings and profits or an accumulated deficit in earnings and profits. CFC3 acquires all of the assets of CFC1, including the stock of CFC2, in a reorganization described in section 368(a)(1)(D). CFC3 will not succeed to the earnings and profits or the accumulated deficit in earnings and profits of CFC2.

[T.D. 8397, 57 FR 6556, Feb. 26, 1992]

§ 1.367(d)–1T Transfers of intangible property to foreign corporations (temporary).

(a) *Purpose and scope.* This section provides rules under section 367(d) concerning transfers of intangible property by U.S. persons to foreign corporations pursuant to section 351 or 361. Paragraph (b) of this section specifies the transfers that are subject to section 367(d) and the rules of this section, while paragraph (c) provides rules concerning the consequences of such a transfer. In general, the U.S. transferor will be treated as receiving annual payments contingent on productivity or use of the transferred property, over the useful life of the property (regardless of whether such payments are in fact made by the transferee). Paragraphs (d), (e), and (f) of this section provide rules for cases in which there is a later direct or indirect disposition of the intangible property transferred. In general, deemed annual license payments will continue if a transfer is made to a related person, while gain must be recognized immediately if the transfer is to an unrelated person. Paragraph (g) of this section provides several special rules, including a rule allowing appropriate adjustments where deemed payments under section 367(d) are not in fact received by the U.S. transferor of the intangible property, and a rule providing for a limited election to treat certain transfers of intangible property as sales at fair market value (in lieu of applying the general useful life-contingent payment rule). In addition, paragraph (g) of this section provides rules coordinating the application of section 367(d) with other relevant Code sections. Paragraph (h) of this section defines the term *related person* for purposes of this section. Finally, paragraph (i) of this section provides the effective date of this section. For rules concerning transfers of intangible property pursuant to section 332, see §1.367(a)–5T(e). For purposes of determining whether a U.S. person has made a transfer of intangible property that is subject to the rules of section 367(d), the rules of §1.367(a)–1T(c) shall apply.

(b) *Intangible property subject to section 367(d).* Section 367(d) and the rules of this section shall apply to the transfer of any intangible property, as defined in §1.367(a)–1T(d)(5)(i). However, section 367(d) and the rules of this section shall not apply to the transfer of foreign goodwill or going concern value, as defined in §1.367(a)–1T(d)(5)(iii), or to the transfer of intangible property described in §1.367(a)–5T(b)(2). However, the transfer of those items to a foreign corporation is subject to the rules set forth in §1.367(a)–6T, and the transfer of intangible property described in §1.367(a)–5T(b)(2) is subject to the rules set forth in §1.367(a)–5T. For a special rule relating to the transfer of operating intangibles, as defined in §1.367(a)–1T(d)(5)(ii), see paragraph (g)(3) of this section. Transfers of intangible property to foreign corporations pursuant to section 351 or 361 are subject to the rules of this section regardless of whether the property is to be used in the United States, in connection with goods to be sold or consumed in the United States, or in connection with a trade or business outside the United States.

(c) *Deemed payments upon transfer of intangible property to foreign corporation*—(1) *In general.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, then such person shall be treated as having transferred that property in exchange for annual payments contingent on the productivity or use of the property. Such person shall, over the useful life of the property, annually include in gross income an amount that represents an appropriate arms-length charge for the use of the property. The appropriate charge shall be determined in accordance with the provisions of section 482 and regulations thereunder. See §1.482–2(d). The amount of the deemed payment thus calculated shall be reduced by any royalty or other periodic payment made or accrued by the transferee to an unrelated person during that taxable year for the right to use the intangible property. Amounts so included in the transferor's income shall be treated as ordinary income from sources within the United States. For purposes of computing estimated tax payments, deemed payments under this paragraph (c) shall be treated as received by the transferor on the last day of its taxable year.

(2) *Required adjustments.* The following adjustments shall be made with respect to a U.S. person's recognition of a deemed payment for the use of intangible property under this paragraph (c):

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of such deemed payment; and

(ii) For purposes of subpart F of part III of subchapter N of the Code, the transferee foreign corporation may treat such deemed payment as an expense (whether or not that amount is actually paid), properly allocated and apportioned to gross income subject to subpart F, in accordance with the provisions of §§1.954–1(c) and 1.861–8.

No other special adjustments to earning the profits, basis, or gross income shall be permitted by reason of the recognition of a deemed payment under this paragraph (c). However, see paragraph (g)(1) of this section for rules permitting the establishment of an account receivable with respect to deemed payments not actually received by the U.S. person.

(3) *Useful life.* For purposes of this section, the useful life of intangible property is the entire period during which the property has value. However, in no event shall the useful life of an item of intangible property be considered to exceed twenty years. If intangible property derives its value from secrecy or from protections afforded by law, the useful life of such property shall terminate when the property is no longer secret or no longer legally protected.

(4) *Blocked income.* No deemed payment included in a taxpayer's income under paragraph (c)(1) of this section shall be treated as deferrable income for purposes of applying rules relating to blocked foreign income. See Revenue Ruling 74–351, 1974–2 C.B. 144.

(d) *Subsequent transfer of stock of transferee foreign corporation to unrelated person*—(1) *Treatment as sale of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the intangible property that U.S. transferor subsequently disposes of the stock of the transferee foreign corporation to a person that is not a related person (within the meaning of paragraph (h) of this section), then the U.S. transferor shall be treated as having simultaneously sold the intangible property to the person acquiring the stock of the transferee foreign corporation. The U.S. transferor shall be required to recognize gain (but not loss) from sources within the United States in an amount equal to the difference between the fair market value of the transferred intangible property on the date of the subsequent disposition and the U.S. transferor's former adjusted basis in that property (determined as of the original transfer). If the U.S. transferor's disposition of the stock of the transferee foreign corporation is subject to U.S. tax other than by reason of this paragraph (d), then the amount of gain otherwise required to be recognized with respect to the stock of the transferee foreign corporation shall be reduced by the amount of gain recognized with respect to the intangible property pursuant to this paragraph (d).

(2) *Required adjustments.* If a U.S. person disposes of the stock of a transferee foreign corporation, and under paragraph (d)(1) of this section is treated as having simultaneously sold intangible property, then, for purposes of computing basis and earnings and profits, the person acquiring the stock of the transferee foreign corporation shall be deemed to have purchased that property at fair market value and to have immediately thereafter contributed it to the transferee foreign corporation in a transaction not covered by section 367(d). Therefore, for purposes of chapter 1 of the Code—

(i) The transferee foreign corporation's basis in the intangible property will be equal to its fair market value (as calculated for purposes of determining the gain required to be recognized by the U.S. transferor);

(ii) The acquiring person's basis in the stock of the transferee foreign corporation shall be determined as if no portion of the consideration given by the acquiring person for the stock is attributable to the intangible property; and

(iii) The earnings and profits of the transferee foreign corporation will not be affected by the transfer of its stock or the deemed transfer to it of the intangible property.

(e) *Subsequent transfer of stock of transferee foreign corporation to related person*—(1) *Transfer to related U.S. person treated as disposition of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361 and, within the useful life of the transferred intangible property, that U.S. transferor subsequently transfers the stock of the transferee foreign corporation to U.S. persons that are related to the transferor within the meaning of paragraph (h) of this section, then the following rules shall apply:

(i) Each such related U.S. person shall be treated as having received (with the stock of the transferee foreign corporation) a right to receive a proportionate share of the contingent annual payments that would otherwise be deemed to be received by the U.S. transferor under paragraph (c) of this section.

(ii) Each such related U.S. person shall, over the useful life of the property, annually include in gross income a proportionate share of the amount that would have been included in the income of the U.S. transferor pursuant to paragraph (c) of this section. Such amounts shall be treated as ordinary income from sources within the United States.

(iii) The amount of income required to be recognized by the U.S. transferor pursuant to the rule of paragraph (d)(1) of this section shall be reduced to the amount determined in accordance with the following formula:

(d)(1) amount×(100% − (e) percentage)

For purposes of the above formula, the (*d*)(*1*) *amount* is the income that would otherwise be required to be recognized by the transferor corporation pursuant to paragraph (d)(1) of this section, and the (*e*) *percentage* is the percentage of the transferor corporation's total deemed rights to receive contingent annual payments under paragraph (c) of this section that is deemed to be transferred to related U.S. persons under the rules of this paragraph (e).

(iv) The rules of paragraphs (d) and (e) of this section shall be reapplied in the case of any later transfer of the stock of the transferee foreign corporation by a related U.S. person that received such stock in a transfer that was subject to the rules of this paragraph (e). For purposes of reapplying the rules of paragraphs (d) and (e), each such related U.S. person shall be treated as a U.S. transferor of intangible property to the transferee foreign corporation (to the extent of the interest attributed to such person pursuant to subdivision (i) of this paragraph (e)(1)).

(2) *Required adjustments.* If a U.S. person transfers stock of a transferee foreign corporation to a U.S. related person in a transaction that is subject to the rules of paragraph (e)(1) of this section, the following adjustments shall be made:

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of any payment deemed to be received by a related U.S. person under paragraph (e)(1)(ii) of this section;

(ii) For purposes of subpart F of part III of subchapter N of the Code, the transferee foreign corporation may allocate and apportion such deemed payments (whether or not such payments are actually made to gross income subject to subpart F to the extent appropriate under the provisions of §§1.954–1(c) and 1.861–8;

(iii) For purposes of reapplying the rules of paragraph (d) and (e) of this section, if the related U.S. person is deemed to have received a right to contingent annual payments for the use of intangible property, then the U.S. related person shall be deemed to have held a proportionate share of the property with a basis equal to a proportionate share of the U.S. transferor's adjusted basis plus the gain, if any, recognized by the U.S. transferor on the earlier transfer of the stock to the U.S. related person, and then to have transferred that proportionate share of the property to the foreign corporation in a transfer subject to section 367(d); and

(iv) If the U.S. transferor is itself required to recognize gain upon the transfer by reason of the operation of paragraphs (d)(1) and (e)(1)(iii) of this section (because stock of the transferee foreign corporation is also transferred to unrelated persons), then those unrelated persons shall be deemed to have purchased a proportionate share of the transferred intangible property at fair market value and immediately contributed that property to the transferee foreign corporation, consistent with the general rule of paragraph (d)(2) of this section concerning transfers of stock to unrelated persons. Therefore, for purposes of chapter 1 of the Code—

(A) Each unrelated person's basis in the stock of the transferee foreign corporation shall be increased to the extent of the gain recognized by the U.S. transferor upon the deemed purchase of intangible property by that person; and

(B) The transferee foreign corporation will receive an increase in its basis in the transferred intangible property equal to the fair market value of that portion of the intangible property deemed to be contributed to the transferee foreign corporation by unrelated persons (as calculated for purposes of determining the gain required to be recognized by the U.S. transferor).

(3) *Transfer to related foreign person not treated as disposition of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the transferred intangible property, that U.S. transferor subsequently transfers any of the stock of the transferee foreign corporation to one or more foreign persons that are related to the transferor within the meaning of paragraph (h) of this section, then the U.S. transferor shall continue to include in its income the deemed payments described in paragraph (c) of this section in the same manner as if the subsequent transfer of stock had not occurred. The rule of this paragraph (e)(3) shall not apply with respect to the subsequent transfer by the U.S. person of any of the remaining stock to any related U.S. person or unrelated person.

(4) *Proportionate share.* For purposes of this paragraph (e), any ''proportionate share'' shall be determined by reference to the fair market value (at the time of the original transfer) of the stock of the transferee foreign corporation that was transferred by the U.S. transferor and the fair market value of all of the stock of the transferee foreign corporation originally received by the U.S. transferor.

(f) *Subsequent disposition of transferred intangible property by transferee foreign corporation*—(1) *In general.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the intangible property that transferee foreign corporation subsequently disposes of the intangible property to an unrelated person, then—

(i) The U.S. transferor of the intangible property (or any person treated as such pursuant to paragraph (e)(1) of this section) shall be required to recognize gain from U.S. sources (but not loss) in an amount equal to the difference between the fair market value of the transferred intangible property on the date of the subsequent disposition and the U.S. transferor's former adjusted basis in that property (determined as of the orginial transfer); and

(ii) The U.S. transferor shall be required to recognize a deemed payment under paragraph (c) of this section for that part of its taxable year that the intangible property was held by the transferee foreign corporation and thereafter shall not be required to recognize any further deemed payments under paragraph (c) or (e)(1) of this section with respect to the transferred intangible property disposed of by the transferee foreign corporation.

(2) *Required adjustments.* If a U.S. transferor is required to recognize gain under paragraph (f)(1) of this section, then—

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of gain required to be recognized; and

(ii) The U.S. transferor's recognition of gain will permit the establishment of an account receivable from the transferee foreign corporation, in accordance with paragraph (g)(1) of this section.

(3) *Subsequent transfer of intangible property to related person.* The requirement that a U.S. person recognize gain under paragraph (c) or (e) of this section shall not be affected by the transferee foreign corporation's subsequent disposition of the transferred intangible property to a related person. For purposes of any required adjustments, and of any accounts receivable created under paragraph (g)(1) of this section, the related person that receives the intangible property shall be treated as the transferee foreign corporation.

(g) *Special rules*—(1) *Establishment of accounts receivable*—(i) *In general.* If a U.S. person is required to recognize income under the provisions of paragraph (c), (e), or (f) of this section, and the amount deemed to be received is not actually paid by the transferee foreign corporation, then the U.S. person may establish an account receivable from the transferee foreign corporation equal to the amount deemed paid that was not actually paid. A separate account receivable must be established for each taxable year in which payments deemed to be received are not actually made. Payments received from the transferee foreign corporation must be designated as payments upon a particular account and must be deducted from that account. Accounts receivable under this paragraph (g)(1) may be established and paid without further U.S. income tax consequences to the U.S. transferor or the transferee foreign corporation. No interest shall be paid or accrued on an account receivable created under this paragraph (g)(1), nor shall any bad debt deduction be allowed under section 166 with respect to any failure to receive payment on an account.

(ii) *Unpaid receivable treated as contribution to capital.* If any portion of an account receivable established under this paragraph (g)(1) remains unpaid as of the last day of the third taxable year following the taxable year to which the account relates, then—

(A) Such portion shall be deemed to have been paid on that date; and

(B) The U.S. person shall be deemed to have contributed an equivalent amount to the capital of the foreign corporation, and the U.S. person's basis in the stock of the foreign corporation shall, therefore, be increased by that amount.

(2) *Election to treat transfer as sale.* A U.S. person that transfers intangible property to a foreign corporation in a transaction subject to section 367(d) may elect to recognize income in accordance with the rules of this paragraph (g)(2), if—

(i) The intangible property transferred constitutes an operating intangible, as defined in §1.367(a)–1T(d)(5)(ii); or

(ii) The transfer of the intangible property is either legally required by the government of the country in which the transferee corporation is organized as a condition of doing business in that country, or compelled by a genuine threat of immediate expropriation by the foreign government; or

(iii)(A) The U.S. person transferred the intangible property to the foreign corporation within three months of the organization of that corporation and as part of the original plan of capitalization of that corporation;

(B) Immediately after the transfer, the U.S. person owns at least 40 percent but not more than 60 percent of the total voting power and total value of the stock of the transferee foreign corporation;

(C) Immediately after the transfer, at least 40 percent of the total voting power and total value of the stock of the transferee foreign corporation is owned by foreign persons unrelated to the U.S. person;

(D) Intangible property constitutes at least 50 percent of the fair market value of the property transferred to the foreign corporation by the U.S. transferor; and

(E) The transferred intangible property will be used in the active conduct of a trade or business outside of the United States within the meaning of §1.367(a)–2T and will not be used in connection with the manufacture or sale of products in or for use or consumption in the United States.

A person that makes the election under this paragraph (g)(2) shall not be subject to the provisions of paragraphs (c) through (f) of this section. Such person shall instead recognize in the year of the transfer ordinary income from sources within the United States in an amount equal to the difference between the fair market value of the intangible property transferred and its adjusted basis. A U.S. person shall make an election under this paragraph (g)(2) by notifying the Internal Revenue Service of the election in accordance with the requirements of section 6038B and regulations thereunder, and subsequently including the appropriate amounts in gross income in a timely filed tax return for the year of the transfer.

(3) *Intangible property transferred from branch with previously deducted losses.* If income is required to be recognized under section 904(f)(3) and the regulations thereunder or under §1.367(a)–6T upon the transfer of intangible property of a foreign branch that had previously deducted losses, then the income recognized under those sections with respect to that property shall be credited against amounts that would otherwise be required to be recognized with respect to that same property

under paragraphs (c) through (f) of this section in either the current or future taxable years. The amount recognized under section 904(f)(3) or § 1.367(a)–6T with respect to the transferred intangible property shall be determined in accordance with the following formula:

$$\text{loss recapture income} \times \frac{\text{gain from intangibles}}{\text{gain from all branch assets}}$$

For purposes of the above formula, the *loss recapture income* is the total amount required to be recognized by the U.S. transferor pursuant to section 904(f)(3) or § 1.367(a)–6T. The *gain from intangibles* is the total amount of gain realized by the U.S. transferor pursuant to section 904(f)(3) and § 1.367(a)–6T upon the transfer of items of intangible property that are subject to section 367(d). (''Gain from intangibles'' does not include gain realized upon the transfer of property described in § 1.367(a)–5T(b)(2), foreign goodwill or going concern value, or intangible property with respect to which the taxpayer has made the election provided for in § 1.367(d)–1T(g)(2).) The *gain from all branch assets* is the total amount of gain realized by the transferor upon the transfer of items of property of the branch in which gain is realized. The fraction shall not exceed 1.

(4) *Coordination with section 482*—(i) *In general.* Section 367(d) and the rules of this section shall not apply in the case of an actual sale or license of intangible property by a U.S. person to a foreign corporation. If an adjustment under section 482 is required with respect to an actual sale or license of intangible property, then section 367(d) and the rules of this section shall not apply with respect to the required adjustment. If a U.S. person transfers intangible property to a related foreign corporation without consideration, or in exchange for stock or securities of the transferee in a transaction described in sections 351 or 361, no sale or license subject to adjustment under section 482 will be deemed to have occurred. Instead, the U.S. person shall be treated as having made a transfer of the intangible property that is subject to section 367(d).

(ii) *Sham licenses and sales.* For purposes of paragraph (g)(4)(i) of this section, a purported sale or license of intangible property may be disregarded, and treated as a transfer subject to section 367(d) and the rules of this section, if—

(A) The purported sale or license is made to a foreign corporation in which the transferor holds (or is acquiring) an interest; and

(B) The terms of the purported sale or license differ so greatly from the economic substance of the transaction or the terms that would obtain between unrelated persons that the purported sale or license is a sham.

The terms of a purported sale or license, for purposes of applying the rule of this paragraph (g)(4)(ii), shall be determined by reference not only to the nominal terms of the agreement but also to the actual practice of the parties under that agreement. A sale or license of intangible property shall not be disregarded under this paragraph (g)(4)(ii) solely because other property of an integrated business is simultaneously transferred to the foreign corporation by the U.S. transferor in a transaction described in section 367(a)(1) or any statutory or regulatory exception to section 367(a)(1).

(5) *Determination of fair market value.* For purposes of determining the gain required to be recognized immediately under paragraph (d), (f), or (g)(2) of this section, the fair market value of transferred property shall be the single payment arm's-length price that would be paid for the property by an unrelated purchaser determined in accordance with the principles of section 482 and regulations thereunder. The allocation of a portion of the purchase price to intangible property agreed to by the parties to the transaction shall not necessarily be controlling for this purpose.

(6) *Anti-abuse rule.* If a U.S. person—

(i) Transfers intangible property to a domestic corporation with a principal purpose of avoiding the effect of section 367(d) and the rules of this section; and

(ii) Thereafter transfers the stock of that domestic corporation to a related foreign corporation,

then solely for purposes of section 367(d) that U.S. person shall be treated as having transferred the intangible property directly to the foreign corporation. A U.S. person shall be presumed to have transferred intangible property for a principal purpose of avoiding the effect of section 367(d) if the property is transferred to the domestic corporation less than two years prior to the transfer of the stock of that domestic corporation to a foreign corporation. The presumption created by the previous sentence may be rebutted by clear evidence that the subsequent transfer of the stock of the domestic transferee corporation was not contemplated at the time the intangible property was transferred to that corporation and that avoidance of section 367(d) and the rules of this section was not a principal purpose of the transaction. A transfer may have more than one principal purpose.

(h) *Related person.* For purposes of this section, persons are considered to be related if—

(1) They are partners or partnerships described in section 707(b)(1) of the Code; or

(2) They are related within the meaning of section 267 (b), (c), and (f) of the Code, except that—

(i) ‘‘10 percent or more’’ shall be substituted for ‘‘more than 50 percent’’ each place it appears; and

(ii) Section 1563 shall apply (for purposes of section 267(d)), without regard to section 1563(b)(2).

(i) *Effective date.* Except as specifically provided to the contrary elsewhere in this section, this section applies to transfers occurring after December 31, 1984.

[T.D. 8087, 51 FR 17953, May 16, 1986, as amended by T.D. 8770, 63 FR 33568, June 19, 1998]

§1.367(e)–0T Treatment of section 355 distributions by U.S. corporations to foreign persons; table of contents.

This section lists captioned paragraphs contained in §1.367(e)–1T.

§1.367(e)–1T Treatment of section 355 distributions by U.S. corporations to foreign persons.

(a) Purpose and scope.
(b) Recognition of gain required.
(1) In general.
(2) Computation of gain of the distributing corporation.
(3) Treatment of foreign distributee.
(4) Nonapplication of section 367(a) principles that provide for exceptions to gain recognition.
(5) Partnerships, trusts, and estates.
(i) In general.
(ii) Written statement.
(6) Anti-abuse rule.
(c) Nonrecognition of gain.
(1) Distribution by a U.S. real property holding corporation of stock in a second U.S. real property holding corporation.
(2) Distribution by a publicly traded corporation.
(i) Conditions for nonrecognition.
(ii) Recognition of gain if foreign distributee owns 5 percent of distributing corporation.
(iii) Reporting requirements.
(iv) Timely filed return.
(v) Relation to other nonrecognition provisions.
(3) Distribution of certain domestic stock to 10 or fewer qualified foreign distributees.
(i) In general.
(ii) Conditions for nonrecognition.
(iii) Agreement to recognize gain.
(iv) Waiver of period of limitation.
(v) Annual certifications and other reporting requirements.
(vi) Special rule for nonrecognition transactions.
(vii) Recognition of gain.
(viii) Failure to comply.
(d) Other consequences.
(1) Exchange under section 897(e)(1).
(2) Dividend treatment under section 1248.
(3) Distribution of stock of a passive foreign investment company. [Reserved]
(4) Reporting under section 6038B.
(e) Examples.
(f) Effective date.

[T.D. 8682, 61 FR 42169, Aug. 14, 1996]

§1.367(e)–1T Treatment of section 355 distributions by U.S. corporations to foreign persons (temporary).

(a) *Purpose and scope.* This section provides rules concerning the recognition of gain by a domestic corporation on a distribution that qualifies for nonrecognition under section 355 of stock or securities of a domestic or foreign corporation to a person who is not a U.S. person. Paragraph (b) of this section states as a general rule that gain recognition is required on the distribution. Paragraph (c) of this section provides exceptions to the gain recognition rule for certain distributions of stock or securities of a domestic corporation. Paragraph (d) of this section refers to other consequences of distributions described in this section. Paragraph (e) of this section provides examples of these rules. Finally, paragraph (f) of this section specifies the effective date of this section.

(b) *Recognition of gain required*—(1) *In general.* (i) If a domestic corporation (distributing corporation) makes a distribution that qualifies for nonrecognition under section 355 of stock or securities of a domestic or foreign corporation (controlled corporation) to a person who is not a qualified U.S. person, then, except as provided in paragraph (c) of this section, the distributing corporation shall recognize gain (but not loss) on the distribution under section 367(e)(1). No gain is required to be recognized under this section with respect to a distribution to a qualified U.S. person of stock or securities that qualifies for nonrecognition under section 355. For purposes of this section, a qualified U.S. person is—

(A) A citizen or resident of the United States; and

(B) A domestic corporation.

(ii) In the case of stock or securities owned through a partnership, trust, or estate, see paragraph (b)(5) of this section.

(2) *Computation of gain of the distributing corporation.* The gain recognized by the distributing corporation under paragraph (b)(1) of this section shall be equal to the excess of the fair market value of the stock or securities distributed to persons who are not qualified U.S. persons (determined as of the time of the distribution) over the distributing corporation's adjusted basis in the stock or securities distributed to such distributees. For purposes of the preceding sentence, the distributing corporation's adjusted basis in each unit of each class of stock or securities distributed to a distributee shall be equal to the distributing corporation's total adjusted basis in all of the units of the respective class of stock or securities owned immediately before the distribution, divided by the total number of units of the class of stock or securities owned immediately before the distribution.

(3) *Treatment of distributee.* If the distribution otherwise qualifies for nonrecognition under section 355, each distributee shall be considered to have received stock or securities in a distribution qualifying for nonrecognition under section 355, even though the distributing corporation may recognize gain on the distribution under this section. Thus, the distributee shall not be considered to have received a distribution described in section 301 or a distribution in an exchange described in section 302(b) upon the receipt of the stock or securities of the controlled corporation. Except where section 897(e)(1) and the regulations thereunder cause gain to be recognized by the distributee, the basis of the distributed domestic or foreign corporation stock in the hands of the foreign distributee shall be the basis of the distributed stock determined under section 358 without any increase for any gain recognized by the domestic corporation on the distribution.

(4) *Nonapplication of section 367(a) principles that provide for exceptions to gain recognition.* Paragraph (b)(1) of this section requires recognition of gain notwithstanding the application of any principles contained in section 367(a) or the regulations thereunder. The only exceptions to paragraph (b)(1) of this section are contained in paragraph (c) of this section. None of these exceptions applies to distributions of stock or securities of a foreign corporation.

(5) *Partnerships, trusts, and estates*—(i) *In general.* For purposes of this section, stock or securities owned by or for a partnership (whether foreign or domestic) shall be considered to be owned proportionately by its partners. In applying this principle, the proportionate share of the stock or securities of the distributing corporation considered to be owned by a partner of the partnership at the time of the distribution shall equal the partner's distributive share of gain that would be realized by the partnership from a sale of stock of

the distributing corporation immediately before the distribution (without regard to whether, under the particular facts, any gain would actually be realized on the sale for U.S. tax purposes), determined under the rules and principles of sections 701 through 761 and the regulations thereunder. For purposes of this section, stock or securities owned by or for a trust or estate (whether foreign or domestic) shall be considered to be owned proportionately by the persons who would be treated as owning such stock or securities under sections 318(a)(2)(A) and (B). In applying section 318(a)(2)(B), if a trust includes interests that are not actuarially ascertainable and a principal purpose of the inclusion of the interests is the avoidance of section 367(e)(1), all such interests shall be considered to be owned by foreign persons. In a case where an interest holder in a partnership, trust, or estate that owns stock of the distributing corporation is itself a partnership, trust, or estate, the rules of this paragraph (b)(5) apply to individuals or corporations that own (direct or indirect) interests in the upper-tier partnership, trust or estate.

(ii) *Written statement.* If, prior to the date on which the distributing corporation must file its income tax return for the year of the distribution, the corporation obtains a written statement, signed under penalties of perjury by an interest holder in a partnership, trust, or estate that receives a distribution described in paragraph (b)(1) of this section from the corporation, which statement certifies that the interest holder is a qualified U.S. person (as defined in paragraph (b)(1)(i) of this section), no liability shall be imposed under paragraph (b)(1) of this section with respect to the distribution to the partnership, trust, or estate to the extent of the interest holder's interest in the partnership, trust, or estate, unless the distributing corporation knows or has reason to know that the statement is false, or it is subsequently determined that the interest holder, in fact, was not a qualified U.S. person at the time of the distribution. The written statement must set forth the amount of the interest holder's proportionate interest in the partnership, trust, or estate as determined under paragraph (b)(5)(i) of this section and must set forth the amount of such entity's proportionate interest in the distributing and controlled corporation, as well as the interest holder's name, taxpayer identification number, home address (in the case of an individual) or office address and place of incorporation (in the case of a corporation). The written statement must be retained by the distributing corporation with its books and records for a period of three calendar years following the close of the last calendar year in which the corporation relied upon the statement.

(6) *Anti-abuse rule.* If a domestic corporation is directly or indirectly formed or availed of by one or more foreign persons to hold the stock of a second domestic corporation for a principal purpose of avoiding the application of section 367(e)(1) and the requirements of this section, any distribution of stock or securities to which section 355 applies by such second domestic corporation shall be treated for Federal income tax purposes as a distribution to such foreign person or persons, followed by a transfer of the stock or securities to the first domestic corporation. The qualification of the distribution to the foreign person for an exception to the general gain recognition rule of paragraph (b)(1) of this section, and the consequences of the transfer to the first domestic corporation under this section, shall be determined in accordance with all of the facts and circumstances.

(c) *Nonrecognition of gain*—(1) *Distribution by a U.S. real property holding corporation of stock in a second U.S. real property holding corporation.* Gain shall not be recognized under paragraph (b) of this section by a domestic corporation making a distribution that qualifies for nonrecognition under section 355 of stock or securities of a domestic controlled corporation to a person who is not a qualified U.S. person (as defined in paragraph (b)(1)(i) of this section) if the conditions specified in paragraphs (c)(1)(i) and (ii) of this section are both satisfied:

(i) Immediately after the distribution, both the distributing and controlled corporations are U.S. real property holding corporations (as defined in section 897(c)(2)). For the treatment of the distribution under section 897, see section 897(e)(1) and the regulations thereunder.

(ii) The distributing corporation attaches to its timely filed Federal income tax return for the taxable year in which the distribution occurs a statement titled ''Section 367(e)(1)—Reporting of Section 355 Distribution by U.S. Real Property Holding Corporation'', signed under penalties of perjury by an officer of the corporation, disclosing the following information—

(A) A statement that the distribution is one to which paragraph (c)(1) of this section applies; and

(B) A description of the transaction in which one U.S. real property holding corporation distributes the stock of another U.S. real property holding corporation in a transaction that is described under section 355.

(iii) For purposes of this paragraph (c)(1), an income tax return (including an amended return) will be considered a timely filed Federal income tax return if it is filed prior to the time that the Internal Revenue Service discovers that the reporting requirements of this paragraph have not been satisfied.

(2) *Distribution by a publicly traded corporation—(i) Conditions for nonrecognition.* Except as provided by paragraph (c)(2)(ii) of this section, gain shall not be recognized under paragraph (b) of this section by a domestic corporation making a distribution that qualifies for nonrecognition under section 355 of stock or securities of a domestic controlled corporation to a person who is not a qualified U.S. person (as defined in paragraph (b)(1)(i) of this section) if both of the following conditions are satisfied:

(A) Stock of the domestic controlled corporation with a value of more than 80 percent of the outstanding stock of the corporation is distributed with respect to one or more classes of the outstanding stock of the distributing corporation that are regularly traded on an established securities market, as defined in § 1.897–1(m)(1) and (3), located in the United States. Stock is considered to be regularly traded if it is regularly quoted by brokers or dealers making a market in such interests. A broker or dealer is considered to make a market only if the broker or dealer holds himself out to buy or sell interests in the stock at the quoted price.

(B) The distributing corporation satisfies the reporting requirements contained in paragraph (c)(2)(iii) of this section.

(ii) *Recognition of gain if distributee owns 5 percent of distributing corporation.* If, at the time of the distribution, the distributing corporation knows or has reason to know that any distributee who is not a qualified U.S. person (as defined in paragraph (b)(1)(i) of this section) owns, directly, indirectly, or constructively (using the rules of sections 897(c)(3) and (c)(6)(C), but subject to the rules of paragraph (b)(5) of this section), more than 5 percent (by value) of a class of stock or securities of the distributing corporation with respect to which the stock or securities of the controlled corporation is distributed (a 5-percent shareholder), the distributing corporation will qualify for nonrecognition under paragraph (c)(2)(i) of this section if, with respect to such 5-percent shareholder, either—

(A) The distribution qualifies for nonrecognition under paragraph (c)(3) of this section; or

(B) The distributing corporation recognizes gain (but not loss) on the distribution under paragraph (b) of this section.

(iii) *Reporting Requirements.* To qualify for nonrecognition treatment under paragraph (c)(2)(i) of this section, the distributing corporation must attach to its timely filed Federal income tax return, for the taxable year in which the distribution occurs a statement titled ''Section 367(e)(1)—Reporting of Section 355 Distribution by U.S. Publicly Traded Corporation to Foreign Persons,'' signed under penalties of perjury by an officer of the corporation, disclosing the following information:

(A) A statement that the distribution is one to which paragraph (c)(2) of this section applies.

(B) A description of the transaction in which the distributing corporation that is publicly traded on a U.S. securities market distributed stock or securities of a domestic controlled corporation.

(C) The U.S. securities market on which the stock of the distributing corporation is publicly traded.

(D) A statement that, at the time of the distribution, either—

(*1*) The distributing corporation does not know or have reason to know that any distributee who is not a qualified U.S. shareholder (as defined in paragraph (b)(1)(i) of this section) is a 5-percent shareholder; or

(*2*) The distributing corporation knows or has reason to know that one or more distributees who are not qualified U.S. persons are 5-percent shareholders, and, that with respect to each such 5-percent shareholder, either—

(*i*) Gain will not be recognized because the requirements of paragraph (c)(3) of this section are satisfied; or

(*ii*) Gain (but not loss) will be recognized in accordance with paragraph (b) of this section.

(iv) *Timely filed return.* For purposes of this paragraph (c)(2), an income tax return (including an amended return) will be considered a timely filed Federal income tax return if it was received prior to the time that the Internal Revenue Service discovers that the reporting requirements of this paragraph (c)(2) have not been satisfied.

(v) *Relation to other nonrecognition provisions.* If the distribution of the stock and securities of the controlled corporation also qualifies for nonrecognition under paragraph (c)(1) of this section, the distributing corporation shall be entitled to nonrecognition under paragraph (c)(1) of this section and not this paragraph (c)(2).

(3) *Distribution of certain domestic stock to 10 or fewer qualified foreign distributees*—(i) *In general.* (A) Gain shall not be recognized under paragraph (b) of this section by a domestic corporation making a distribution that qualifies for nonrecognition under section 355 of stock or securities of a domestic controlled corporation with respect to a foreign distributee (defined in paragraph (c)(3)(i)(B) of this section) that is a qualified foreign distributee (defined in paragraph (c)(3)(i)(C) of this section), provided that each of the conditions contained in paragraph (c)(3)(ii) of this section is satisfied. If one or more foreign distributees are not treated as qualified foreign distributees, the distributing corporation shall recognize a percentage of the gain realized on the distribution, equal to the percentage of its stock owned immediately before the distribution, directly or indirectly, by foreign distributees who are not qualified foreign distributees. See paragraph (b)(5) of this section for rules regarding the ownership of stock held by a partnership, trust, or estate.

(B) For purposes of this paragraph (c)(3), the term *foreign distributee* is any person who is not a qualified U.S. person (as defined in paragraph (b)(1)(i) of this section) if such person—

(*1*) Owned stock or securities of the distributing corporation immediately prior to the distribution;

(*2*) Owned stock or securities of the distributing corporation within two years prior to the distribution and directly, indirectly, or constructively (using the rules of section 318) owns 50 percent or more of either the total voting power or the total value of the stock of the distributing or controlled corporation immediately after the distribution; or

(*3*) Is a transferee or substitute distributee, as defined in paragraph (c)(3)(vi)(C) or (D) of this section.

(C) For purposes of this section, except as provided by paragraph (c)(3)(i)(D) of this section, the term *qualified foreign distributee* is a foreign distributee that, during the entire period for which the agreement to recognize gain (described in paragraph (c)(3)(iii) of this section) is in effect with respect to the distributee, is either an individual or a corporation (as defined in section 7701(a)(3)), resident of a foreign country that maintains a comprehensive income tax treaty with the United States which contains an information exchange provision. However, no more than ten foreign distributees in total may be current or former qualified foreign distributees (including any transferee or substitute distributees as defined in paragraph (c)(3)(vi)(C) or (D) of this section) during the entire term of the gain recognition agreement. See, however, paragraph (c)(3)(vi)(G) of this section for special rules applicable to substitute distributees.

(D) Unless the distributing corporation obtains a ruling from the Internal Revenue Service to the contrary, no foreign distributee shall be treated as a qualified foreign distributee if it holds its interest in the distributing corporation through a partnership, trust or estate, characterized as such under the taxation laws of the United States or any entity that is treated as fiscally transparent under the taxation laws of the foreign country in which it is a resident if such country maintains a comprehensive income tax treaty with the United States which contains an information exchange provision.

(ii) *Conditions for nonrecognition.* A distribution of stock or securities described in paragraph (c)(3)(i) of this section to a qualified foreign distributee shall not result in the recognition of gain if each of the following conditions is satisfied:

(A) If more than ten foreign distributees, at any time during the entire term of the gain recognition agreement, are eligible to be qualified foreign distributees, the distributing corporation shall designate the foreign distributees to be considered qualified foreign distributees for which nonrecognition is claimed under this paragraph (c)(3).

(B) Immediately after the distribution and on each testing date beginning after the distribution and during the period that the agreement to recognize gain (described in paragraph (c)(3)(iii) of this section) is in effect, the value of the distributing corporation (that is, the fair market value of the assets of the distributing corporation, less all liabilities of the distributing corporation) must exceed the amount of gain that the distributing corporation realized, but did not recognize (on or after the distribution) under this paragraph (c)(3), as a consequence of the distribution with respect to qualified foreign distributees. This requirement will be deemed satisfied for any testing date upon which the adjusted basis of the distributing corporation’s assets, less all liabilities of the distributing corporation, exceeds the amount of the deferred gain. A testing date is—

(*1*) The last day of any taxable year of the distributing corporation during which the agreement to recognize gain is in effect; and

(*2*) Any date upon which the distributing corporation distributes property to its shareholders under section 301(a).

(C) At all times until the close of the 120-month period following the end of the taxable year of the distributing corporation in which the distribution was made, except under the circumstances and subject to the consequences prescribed in paragraphs (c)(3)(vi) and (vii) of this section, all qualified foreign distributees must continue to own, directly or indirectly, all of the stock and securities of the distributing and controlled corporations that the qualified foreign distributee owned, directly or indirectly, immediately after the distribution (including any stock and securities of the distributing or controlled corporation later acquired from the distributing or controlled corporation for which the distributee has a holding period determined under section 1223 by reference to the stock or securities).

(D) The distribution of stock or securities described in paragraph (c)(3)(i) of this section must not be a distribution pursuant to which the distributing corporation goes out of existence.

(E) The distributing corporation must file an agreement to recognize gain, and the controlled corporation must agree to be secondarily liable in the event that the distributing corporation does not pay the tax due upon a recognition event described in paragraph (c)(3)(vii) of this section. The agreement is described in paragraph (c)(3)(iii) of this section and filed by the distributing corporation with its Federal income tax return for its taxable year in which the distribution is made.

(F) For each of the taxable years of the distributing corporation, beginning with the taxable year of the distribution and ending with the taxable year that includes the close of the 120-month period following the end of the taxable year of the distributing corporation in which the distribution was made, all qualified foreign distributees and the controlled corporation must provide to the distributing corporation the annual certifications described in paragraph (c)(3)(v) of this section, and the distributing corporation must file the certifications with its tax return.

(iii) *Agreement to recognize gain*. The agreement to recognize gain required by this paragraph (c)(3)(iii) shall be prepared by or on behalf of the distributing corporation and signed under penalties of perjury by an authorized officer of the distributing corporation. An authorized officer of the controlled corporation must also sign the agreement under penalties of perjury, agreeing to extend the statute of limitations and accept liability for the tax in the event that the distributing corporation fails to pay the tax upon a recognition event. The agreement provided by the distributing corporation shall set forth the following items, under the heading ‘‘GAIN RECOGNITION AGREEMENT UNDER §1.367(e)–1T(c)(3)(iii)’’, with paragraphs labeled to correspond with such items:

(A) A declaration that the distribution is one to which paragraph (c)(3) of this section applies.

(B) A description of each qualified foreign distributee, which shall include the qualified foreign distributee's—

(*1*) Name;

(*2*) Address;

(*3*) Taxpayer identification number (if any); and

(*4*) Residence and citizenship (in the case of an individual) or place of incorporation and country of residence (in the case of a qualified foreign distributee that is a corporation for Federal income tax purposes under section 7701(a)(3)).

(C) A description of the stock and securities of the distributing and controlled corporations owned (directly or indirectly) by each qualified foreign distributee, including—

(*1*) The number or amount of shares;

(*2*) The type of stock or securities;

(*3*) The fair market values of the stock and securities of the controlled corporation owned (directly or indirectly) by the qualified foreign distributee(s), determined immediately before and immediately after the distribution;

(*4*) The distributing corporation's adjusted basis (immediately before the distribution) in the stock and securities of the controlled corporation distributed to the qualified foreign distributees;

(*5*) The fair market value of the distributing corporation (fair market value of its assets, less all liabilities of the distributing corporation) immediately after the distribution. Such amount must exceed the amount of gain that the distributing corporation realized, but did not recognize under this paragraph (c)(3), on the distribution to qualified foreign distributees. Alternatively, the fair market value standard will be deemed satisfied if the adjusted basis of the assets of the distributing corporation, less all liabilities of the distributing corporation, exceeds the amount of the deferred gain.

(*6*) For each applicable valuation, a summary of the method (including appraisals, if any) used for determining the fair market values required by this paragraph (c)(3)(iii).

(D) The distributing corporation's agreement to recognize gain in accordance with paragraph (c)(3)(vii) of this section.

(E) The controlled corporation's agreement to be secondarily liable for the distributing corporation's tax liability, pursuant to the gain recognition agreement described in this paragraph (c)(3)(iii).

(F) A waiver of the period of limitations by both the distributing and controlled corporation as described in paragraph (c)(3)(iv) of this section.

(G) An attached statement from each qualified foreign distributee declaring that the qualified foreign distributee will provide to the distributing corporation the annual certifications described in paragraph (c)(3)(v)(A) of this section for each of the taxable years of the distributing corporation, beginning with the taxable year of the distribution and ending with the taxable year that includes the close of the 120-month period following the taxable year of the distributing corporation in which the distribution was made. The attached statements shall be signed under penalties of perjury by an authorized officer in the case of any qualified foreign distributee that is a corporation for Federal income tax purposes or by the individual in the case of a qualified foreign distributee that is an individual.

(H) An attached statement from the controlled corporation declaring that it will provide to the distributing corporation the annual certifications described in paragraph (c)(3)(v)(B) of this section.

(I) An agreement by the distributing corporation to attach to its tax returns the annual certifications of the qualified foreign distributees and the controlled corporation described in paragraphs (c)(3)(v)(A) and (B) of this section, respectively, and to meet any other reporting requirement in accordance with paragraph (c)(3)(v) of this section.

(iv) *Waiver of period of limitation.* The distributing corporation and the controlled corporation must file, with the gain recognition agreement described in paragraph (c)(3)(iii) of this section, a waiver of the period of limitation on the assessment of tax upon the gain realized on the distribution to the qualified foreign distributee(s). The waiver shall be executed on Form 8838, substitute form, or such other form as may be prescribed by the Commissioner for this purpose and shall extend the period for assessment of such tax to a date not earlier than the close of the thirteenth full year following the taxable year that includes the distribution. A properly executed Form 8838, substitute form, or such other form authorized by this paragraph (c)(3)(iv) shall be deemed to be consented to and signed by a Service Center Director or the Assistant Commissioner (International) for purposes of § 301.6501(c)–1(d) of this chapter.

(v) *Annual certifications and other reporting requirements.* For each of the taxable years of the distributing corporation, beginning with the taxable year of the distribution and ending with the taxable year that includes the close of the 120-month period following the end of the taxable year of the distributing corporation in which the distribution was made, the distributing corporation must file with its Federal income tax return the annual certifications for that year described in this paragraph (c)(3)(v).

(A) Each current qualified foreign distributee must provide to the distributing corporation an annual certification, signed under penalties of perjury by an authorized officer of the qualified foreign distributee that is a corporation or by the qualified foreign distributee that is an individual (as the case may be). Each annual certification must identify the distribution with respect to which it is given by setting forth the date and a summary description of the distribution. In the annual certification, the qualified foreign distributee must declare that—

(*1*) The qualified foreign distributee continues to satisfy paragraph (c)(3)(i)(C) of this section; and

(*2*) The qualified foreign distributee continues to own, directly or indirectly, without interruption, the stock and securities of the distributing and controlled corporations (except to the extent the stock or securities have been disposed of in a transfer described in paragraph (c)(3)(vi) of this section).

(B) The controlled corporation must provide a certification to the distributing corporation, signed under penalties of perjury by an authorized officer of the corporation, that lists each current qualified foreign distributee holding (directly or indirectly) stock of the controlled corporation and its direct or indirect ownership interest in the controlled corporation at both the first day and the last day of the taxable year for which the distributing corporation files its Federal income tax return, and certifies the accuracy of that list.

(C) The distributing corporation must attach to the annual certifications described in paragraphs (c)(3)(v)(A) and (B) of this section, a statement signed under penalties of perjury by an authorized officer of the corporation, in which the corporation declares that, to the best of its knowledge, the annual certifications are true.

(D) The distributing corporation must also attach to the annual certifications a separate statement indicating—

(*1*) The names and addresses of each current and each former qualified foreign distributee;

(*2*) The percentage of direct or indirect ownership that the qualified foreign distributees retain in the distributing corporation at year-end; and

(*3*) A certification that the value of the distributing corporation (or the adjusted basis of its assets), less all of the liabilities of the distributing corporation on all testing dates, exceeded the amount of the gain deferred as of the testing date.

(vi) *Special rule for nonrecognition transactions.* (A) Gain shall not be recognized under paragraph (c)(3)(vii) of this section if the distributing or controlled corporation is acquired by a successor-in-interest (described in paragraph (c)(3)(vi)(B) of this section), or upon a direct or indirect disposition by a qualified foreign distributee of stock or securities of a distributing or controlled corporation (or a successor-in-interest) that is subject to a gain recognition agreement described in paragraph (c)(3)(iii) of this section, if the requirements of this paragraph (c)(3)(vi) are satisfied and the disposition consists of a transfer described in section 332, 337, 351, 354, 355, 356, or 361 that does not result in a substantial transformation (as defined in paragraph (c)(3)(vii)(B) of this section). For special rules regarding transfers described in section 355, see paragraph (c)(3)(vi)(G) of this section.

(B) For purposes of this section, the term *successor-in-interest* refers to any domestic corporation that acquires the assets of the distributing or controlled corporation in a transaction described in section 381(a) to which this paragraph (c)(3)(vi) applies.

(C) For purposes of this section, the term *transferee distributee* refers to:

(*1*) Any corporation whose stock or securities are exchanged for the stock or securities of the distributing or controlled corporation (or a successor-in-interest), or of another transferee distributee, in a transaction described in section 351, 354, or sections 361 and 381(a)(2), to which this paragraph (c)(3)(vi) applies.

(*2*) Any corporation that acquires the assets of any qualified foreign distributee, transferee distributee or substitute distributee in a transaction described in section 381(a).

(D) For purposes of this section, the term *substitute distributee* refers to any person that acquires the stock or securities of the distributing or controlled corporation (or a successor-in-interest), or of a qualified foreign distributee, in a section 355 distribution.

(E) Gain shall not be recognized under paragraph (c)(3)(vii) of this section in a transaction involving a transfer of the assets of the distributing or controlled corporation to a successor-in-interest, only if the following information and agreements are included with the first annual certification thereafter filed under paragraph (c)(3)(v) of this section:

(*1*) A description of the transaction (including a statement of applicable Internal Revenue Code provisions, and a description of stock or securities transferred, exchanged, or received in the transaction).

(*2*) A description of the successor-in-interest (including the name, address, taxpayer identification number, and place of incorporation of the successor in interest).

(*3*) An agreement of the successor-in-interest, signed under penalties of perjury by an authorized officer of the successor-in-interest corporation, to succeed to all of the responsibilities and duties of the distributing corporation or the controlled corporation (as the case may be) under this paragraph (c)(3) as if the successor-in-interest were the distributing or controlled corporation.

(F) Gain shall not be recognized under paragraph (c)(3)(vii) of this section in a transaction described in paragraph (c)(3)(vi)(A) of this section in which a qualified foreign distributee, directly or indirectly, disposes of, and a transferee distributee acquires, stock or securities of the distributing or controlled corporation (or a successor-in-interest), or another transferee distributee, only if the transferee distributee is either a qualified U.S. person or qualifies as a qualified foreign distributee under this paragraph (c)(3) and the following information and agreements are included with the first annual certification thereafter filed under paragraph (c)(3)(v) of this section:

(*1*) A description of the transaction (including a statement of applicable Internal Revenue Code provisions, and a description of the stock or securities of the distributing or controlled corporation (or a successor-in-interest) owned, directly or indirectly, by qualified foreign distributees immediately after the transaction).

(*2*) An agreement of the distributing corporation and the controlled corporation (amending the agreement described in paragraph (c)(3)(iii) of this section), signed under penalties of perjury by an authorized officer of the corporation, to recognize gain (in the case of the distributing corporation) and to be secondarily liable (in the case of the controlled corporation) in accordance with the provisions of this paragraph (c)(3) upon the occurrence of a disposition, directly or indirectly, by the foreign transferee distributee of any stock or securities of the distributing or controlled corporation (or a successor-in-interest) (other than a disposition that itself satisfies the requirements of this paragraph (c)(3)(vi)).

(*3*) An agreement of each foreign transferee distributee, signed under penalties of perjury by the individual or an authorized officer of the corporation, to comply with all of the responsibilities, qualifications and duties of a qualified foreign distributee under this paragraph (c)(3), with respect to the stock or securities of the distributing or controlled corporation (or a successor-in-interest) owned, directly or indirectly, by the transferee distributee.

(G) Gain shall not be recognized under paragraph (c)(3)(vii) of this section in the case of a section 355 distribution by a qualified foreign distributee of stock or securities of the distributing or controlled corporation (or a successor-in-interest), or of another qualified foreign distributee. The qualified foreign distributee that distributed the stock or securities is no longer required to comply with the rules of this section applicable to qualified foreign distributees, provided such person no longer has any interest, directly or indirectly, in the distributing and controlled corporation. Thus, for example, such person is not counted as a qualified foreign distributee for purposes of limiting gain recognition to 10 or fewer foreign distributees. In order for this provision to apply, the substitute distributee must either be a qualified U.S. person or satisfy the requirements applicable to qualified foreign distributees contained in this paragraph (c)(3) and must include with the first annual certification thereafter filed under paragraph (c)(3)(v) of this section the following information and agreements:

(*1*) A description of the transaction (including a statement of applicable Internal Revenue Code sections, and a description of the stock or securities distributed in the transaction).

(*2*) An agreement of the distributing corporation and the controlled corporation (amending the agreement described in paragraph (c)(3)(iii) of this section), signed under penalties of perjury by an authorized officer of the corporation, to recognize gain (in the case of the distributing corporation) and to be secondarily liable (in the case of the controlled corporation) in accordance with the provisions of this paragraph (c)(3) upon the occurrence of a disposition, directly or indirectly, by a foreign substitute distributee of any stock or securities received by the substitute distributee in the transaction.

(*3*) An agreement of each foreign substitute distributee, signed under penalties of perjury by the individual or authorized officer of the corporation, to succeed to all of the responsibilities, qualifications and duties of a qualified foreign distributee under this paragraph (c)(3), with respect to the stock or securities of the distributing or controlled corporation (or a successor-in-interest) received by such substitute distributee.

(vii) *Recognition of gain.* (A)(*1*) The distributing corporation must file, within 90 days of a transaction described in this paragraph (c)(3)(vii)(A), an amended return for the year of the distribution and recognize gain realized but not recognized upon such distribution, if, prior to the close of the 120-month period following the end of the taxable year of the distributing corporation in which the distribution was made, either—

(*i*) A qualified foreign distributee sells (or otherwise disposes of) the stock or securities of the distributing or controlled corporation that the qualified foreign distributee owned (directly or indirectly) (other than pursuant to a transfer described in paragraph (c)(3)(vi) of this section); or

(*ii*) Any other transaction (e.g., a public offering or reorganization) results in a substantial transformation (as defined in paragraph (c)(3)(vii)(B) of this section) in either the distributing or controlled corporation (or both).

(*2*) For purposes of this paragraph (c)(3)(vii)(A), a disposition includes, but is not limited to, any disposition treated as a sale or exchange under this subtitle (e.g., section 301(c)(3)(A), 302(a), 351(b) or 356(a)(1)). For the computation of gain in the case of a sale (or similar disposition), see paragraph (c)(3)(vii)(C) of this section. For the computation of gain in the case of other transactions, see paragraphs (c)(3)(vii)(D) and (F) of this section. For special rules regarding substitute distributees, see paragraph (c)(3)(vii)(E) of this section.

(B) A transaction is treated as a substantial transformation if, as a result of such transaction, the qualified foreign distributees, transferee distributees and substitute distributees own, in the aggregate, less than 50 percent of either the total voting power or the total value of the stock of the distributing or the controlled corporation, directly or indirectly, that the qualified foreign distributees owned immediately after the distribution.

(C) In the case of a sale (or similar disposition), directly or indirectly, by a qualified foreign distributee of the stock or securities of the distributing or controlled corporation (or a successor-in-interest) that does not result in a substantial transformation, the distributing corporation shall be required to recognize a proportionate amount of the gain realized but not recognized under this paragraph (c)(3), equal to the percentage of stock of the distributing or controlled corporation, as the case may be, sold (or otherwise disposed of), directly or indirectly, by the qualified foreign distributee. However, if the sale (or other disposition) of stock or securities by a qualified foreign distributee results in a substantial transformation, the distributing corporation (or its successor-in-interest) must recognize the entire deferred gain that has not already been recognized under paragraph (c)(3)(vii) of this section.

(D) In the case of a nonrecognition transaction that results in a substantial transformation, the distributing corporation must recognize the entire deferred gain that has not already been recognized under paragraph (c)(3)(vii) of this section. If a nonrecognition transaction does not result in a substantial transformation, the distributing corporation does not recognize any gain provided that the requirements of paragraph (c)(3)(vi) of this section are satisfied.

(E) A sale (or other disposition), directly or indirectly, by a substitute distributee, of all or a portion of the stock or securities of the distributing or controlled corporation (or a successor-in-interest) that the substitute distributee received in the section 355 distribution shall be treated as a disposition of such stock or securities by a qualified foreign distributee (in accordance with paragraph (c)(3)(vii)(C) of this section) for purposes of computing gain under this paragraph (c)(3)(vii).

(F) Other transactions or events shall trigger gain under this paragraph (c)(3)(vii) as follows:

(*1*) If a qualified foreign distributee ceases to satisfy the requirements for a qualified foreign distributee contained in paragraph (c)(3)(i)(C) of this section (or any other specified requirements in paragraph (c)(3) of this section), the qualified foreign distributee shall be treated as if it sold all of the stock and securities that it owned, directly or indirectly, in the distributing and controlled corporation (or a successor-in-interest), on the date that such person ceased to meet the requirements.

(*2*) If a substitute distributee ceases to satisfy the requirements for a qualified foreign distributee contained in paragraph (c)(3)(i)(C) of this section (or any other specified requirements in paragraph (c)(3) of this section), the substitute distributee shall be treated as if it sold all of the stock and securities of the distributing or controlled corporation (or a successor-in-interest) that it received in the distribution, on the date that it ceased to meet the requirements.

(*3*) If the distributing corporation (or a successor-in-interest) fails to satisfy the requirement contained in paragraph (c)(3)(ii)(B) of this section on any testing date during which the agreement to recognize gain is in effect, such failure will be treated as if a substantial transformation has occurred on such date.

(*4*) If either the distributing or controlled corporation (or a successor-in-interest) is acquired in a section 381(a) exchange and the acquirer is not a successor-in-interest that satisfies the requirements of paragraph (c)(3)(vi)(E), such acquisition will be treated as if a substantial transformation has occurred on the date of the acquisition.

(G) A qualified foreign distributee that sells (or otherwise disposes of) all of its interest, directly or indirectly, in the distributing and controlled corporation ceases thereafter to be a qualified foreign distributee. In addition, where one qualified foreign distributee owns all of the stock of another qualified foreign distributee, and both persons have identical direct or indirect interests in the distributing or controlled corporation, the direct or indirect sale (or other disposition) by one qualified foreign distributee of all of its interest in the distributing or controlled corporation (under paragraph (c)(3)(vii) of this section) will terminate the qualified foreign distributee status for the second qualified foreign distributee. The principles of this paragraph (c)(3)(vii) shall generally be applied so that any gain relating to the same stock of the distributing or controlled corporation by more than one person is not taxed more than once under this paragraph (c)(3)(vii). In any event, gain recognized pursuant to this paragraph (c)(3)(vii), on a cumulative basis, shall not exceed the amount of gain that the distributing corporation would have recognized under section 367(e)(1) if its initial distribution of the stock or securities of the controlled corporation was fully taxable under paragraph (b) of this section.

(H) If additional tax is required to be paid by the distributing corporation (or a successor-in-interest) for the year of the distribution, interest must be paid by the distributing corporation (or the controlled corporation if the distributing corporation fails to pay the tax due) on that amount at the rates determined under section 6621(a)(2) with respect to the period between the date that was prescribed for filing the distributing corporation's original income tax return for the year of the distribution and the date on which the additional tax for that year is paid.

(I) Net operating losses, capital losses, or credits against tax that were available in the year of the distribution and that are unused (whether or not they have expired since the distribution) at the time of gain recognition described in this paragraph (c)(3)(vii) may be applied (respectively) by the distributing corporation against any gain recognized or tax owed by reason of this provision, but no other adjustments shall be made with respect to any other items of income or deduction in the year of distribution or other years.

(viii) *Failure to comply.* (A) Except as otherwise provided in paragraph (c)(3)(viii)(B) of this section, if the distributing corporation or the controlled corporation fails to comply in any material respect with the requirements of this paragraph (c)(3) or with the terms of an agreement submitted pursuant hereto, or if the distributing corporation knows or has reason to know of any failure of another person to so comply, the distributing corporation shall treat the initial distribution of the stock or securities of the controlled corporation as a taxable exchange in the year of the distribution. In such event, the period for assessment of tax shall be extended until three years after the date on which the Internal Revenue Service receives actual notice of such failure to comply.

(B) If a person fails to comply in any material respect with the requirements of this paragraph or with the terms of an agreement submitted pursuant thereto, the provisions of paragraph (c)(3)(viii)(A) of this section shall not apply if the person is able to show that such failure was due to reasonable cause and not willful neglect, provided that the person achieves compliance as soon as the person becomes aware of the failure. Whether a failure to materially comply was due to reasonable cause shall be determined by the district director under all the facts and circumstances.

(d) *Other consequences*—(1) *Exchange under section 897(e)(1).* With respect to the treatment under section 897(e)(1) of a foreign distributee on the receipt of stock or securities of a domestic or foreign corporation where the foreign distributee's interest in the distributing domestic corporation is a United States real property interest, see section 897(e)(1) and the regulations thereunder.

(2) *Dividend treatment under section 1248.* With respect to the treatment as a dividend of a portion of the gain recognized by the domestic corporation on the distribution of the stock of certain foreign corporations, see sections 1248(a) and (f) and the regulations thereunder.

(3) *Distribution of stock of a passive foreign investment company.* [Reserved]

(4) *Reporting under section 6038B.* Notice shall be required under section 6038B with respect to a distribution described in this section. See §1.6038B–1T(e).

(e) *Examples.* The rules of paragraphs (b), (c), and (d) of this section are illustrated by the examples below. In all examples, assume that all foreign companies are treated as corporations for Federal income tax purposes and are not treated as fiscally transparent under the taxation laws of the relevant foreign country.

Example 1. (i) FC, a Country Z company, owns all of the outstanding stock of DC1, a domestic corporation. DC1 owns all of the outstanding stock of DC2, another domestic corporation. The fair market value of the DC1 stock is 300x, and FC has a 100x basis in the DC1 stock. The fair market value of the DC2 stock is 180x, and DC1 has a 80x basis in the DC2 stock. Neither DC1 nor DC2 is a U.S. real property holding corporation. Country Z does not maintain an income tax treaty with the United States.

(ii) In a transaction qualifying for nonrecognition under section 355, DC1 distributes all of the stock of DC2 to FC. After the distribution, the DC1 stock has a fair market value of 120x.

(iii) Under paragraphs (b)(1) and (2) of this section, DC1 recognizes gain of 100x, which is the difference between the fair market value (180x) and the adjusted basis (80x) of the stock distributed. Under paragraph (d)(1) of this section and section 358, FC takes a basis of 40x in the DC1 stock, and a basis of 60x in the DC2 stock.

Example 2. (i) C, a citizen and resident of Country F, owns all of the stock of DC1, a domestic corporation. DC1, in turn, owns all of the stock of DC2, also a domestic corporation. The fair market value of the DC1 stock is 500x, and C has a 100x basis in the DC1 stock. The DC2 stock has a fair market value of 200x, and DC1 has a 180x basis in the DC2 stock.

(ii) In a transaction qualifying for nonrecognition under section 355, DC1 distributes to C all of the stock of DC2. DC1 and DC2 are U.S. real property holding corporations immediately after the distribution. After the distribution, the DC1 stock has a fair market value of 300x.

(iii) Under paragraph (c)(1) of this section, provided that DC1 complies with the reporting requirements contained in paragraph (c)(1)(ii) of this section, DC1 does not recognize gain on the distribution of the DC2 stock because DC1 and DC2 are U.S. real property holding corporations immediately after the distribution.

(iv) Under section 897(e) and the regulations thereunder, C is considered to have exchanged DC1 stock with a fair market value of 200x and an adjusted basis of 40x for DC2 stock with a fair market value of 200x. Because DC2 is a U.S. real property holding corporation, and its stock is a U.S. real property interest, C does not recognize any gain under section 897(e) on the distribution. C takes a basis of 40x in the DC2 stock, and its basis in the DC1 stock is reduced to 60x pursuant to section 358.

Example 3. (i) All of the outstanding common stock of DC, a domestic corporation that is not a U.S. real property holding corporation, is regularly traded on an established securities market located in the United States. None of the foreign shareholders of DC (directly, indirectly, or constructively) owns more than five percent of the common stock of DC. DC owns all of the stock of DS, a domestic corporation. The stock of DS has appreciated in the hands of DC.

(ii) In a transaction qualifying for nonrecognition under section 355, DC distributes all of the stock of DS to the common shareholders of DC.

(iii) Under paragraph (c)(2) of this section, DC does not recognize gain on the distribution of the DS stock to any foreign distributee, provided that DC complies with the reporting requirements contained in paragraph (c)(2)(iii) of this section. Each shareholder's basis in the DC and DS stock is determined pursuant to section 358.

Example 4. (i) FC, a company resident in Country X, owns all of the stock of DC1, a domestic corporation. DC1, in turn, owns all of the stock of DC2, a domestic corporation. The fair market value of the DC1 stock is 1,000x, and FC has a basis in the DC1 stock of 800x. The DC2 stock has a fair market value of 500x at the time of the distribution, and DC1 has a 100x basis in the DC2 stock. Neither DC1 nor DC2 is a U.S. real property holding corporation. Country X maintains an income tax treaty with the United States that includes an information exchange provision.

(ii) In a transaction qualifying for nonrecognition under section 355, DC1 distributes to FC all of the stock of DC2. Immediately after the distribution, the DC1 stock has a fair market value of 500x. Thus, the value of DC1 exceeds 400x, the amount of the deferred gain on the distribution.

(iii) Under paragraph (c)(3) of this section, DC1 will not recognize gain on the distribution of the DC2 stock to (foreign distributee) FC if FC is a qualified foreign distributee (as described in paragraph (c)(3)(i)(C) of this section) and DC1 enters into a gain recognition agreement (in which DC2 agrees to be secondarily liable), as described in paragraph (c)(3)(iii) of this section, and DC1, DC2 and FC otherwise comply with all of the provisions of paragraph (c)(3) of this section. Pursuant to section 358, FC will take a 400x basis in the DC2 stock and FC's basis in the DC1 stock will be reduced to 400x.

Example 5. (i) Assume the same facts as in *Example 4.* In addition, two years after DC1's distribution of DC2 stock to FC, FC sells 25 percent of the DC2 stock to Y, an unrelated corporation. One year later, FC sells an additional 30 percent of its DC2 stock to Z, another unrelated corporation.

(ii) Under paragraph (c)(3)(vii) of this section, upon FC's sale of 25 percent of its DC2 stock, DC1 is required to file an amended return for the year in which the DC2 stock was distributed to FC, and recognize 100x of gain, which represents 25 percent of the gain realized but not recognized on the distribution.

(iii) Upon FC's second sale of 30 percent of its DC1 stock, DC1 is required to file another amended return for the year of the distribution and recognize the balance of the deferred gain, or 300x, because such sale results in a substantial transformation (within the meaning of paragraph (c)(3)(vii)(B) of this section).

Example 6. (i) Assume the same facts as in *Example 5,* except that FC did not sell an additional 30 percent of its DC2 stock. Instead, DC2 issued additional stock in a public offering that reduced FC's interest in DC2 to less than 50 percent.

(ii) The public offering caused a substantial transformation because, as a result of the public offering, the interest of FC in DC2 was reduced to less than 50 percent of the amount of stock that FC owned in DC2 immediately after the distribution. Thus, the result is the same as in *Example 5.*

Example 7. (i) Assume the same facts as in *Example 4* In addition, one year after DC1's distribution of DC2 stock to FC, FC transfers all of the DC2 stock to FS, a company resident in Country X, in exchange for all of the FS stock, in a transaction described in section 351.

(ii) FS is described as a transferee distributee under paragraph (c)(3)(vi)(C) of this section. The transfer by FC of DC2 stock to FS is a nonrecognition transaction under paragraph (c)(3)(vi) of this section provided all of the requirements in paragraph (c)(3)(vi)(F) of this section are satisfied. (FS is counted, together with FC, for purposes of limiting nonrecognition treatment to up to ten qualified foreign distributees during the time that the gain recognition agreement is in effect.) DC1 will not recognize gain under the gain recognition agreement upon FC's transfer of the stock of DC2 to FS if DC1 enters into a new agreement, agreeing to recognize gain if FS sells DC2 stock, and the provisions of paragraph (c)(3)(vi) of this section are satisfied. A sale by FC of FS stock would be treated as a recognition event under paragraph (c)(3)(vii) because such sale would constitute an indirect disposition by FC of the DC2 stock.

Example 8. (i) P1, an entity treated as a partnership for Federal income tax purposes, owns all of the outstanding stock of DC1, a domestic corporation. DC1 owns all of the outstanding stock of DC2, another domestic corporation. The fair market value of the DC1 stock is 900x and P1 has an 900x basis in the DC1 stock. The fair market value of the DC2 stock is 600x and DC1 has a 400x basis in the DC2 stock. Neither DC1 nor DC2 is a U.S. real property holding corporation.

(ii) FC, a company resident in country X, and USP, a U.S. corporation, are the sole partners of P1. Under the rules and principles of sections 701 through 761, FC is entitled to a 60 percent, and USP is entitled to a 40 percent, distributive share of each item of P1 income and loss. Country X maintains an income tax treaty with the United States that includes an information exchange provision.

(iii) In a distribution qualifying for nonrecognition under section 355, DC1 distributes all of the stock of DC2 to P1. Paragraph (b)(5)(i) of this section provides that stock owned by a partnership is considered to be owned proportionately by its partners. Under paragraph (b)(5)(ii) of this section, if USP certifies to DC1 that it is a qualified U.S. person (and DC1 does not know or have reason to know that the certification is false), no Federal income tax shall be imposed with respect to the distribution by DC1 of DC2 to P1, to the extent of USP's 40 percent interest in P1.

(iv) Paragraph (c)(3)(i)(D) of this section provides that no foreign distributee may be treated as a qualified foreign distributee with respect to stock of the distributing corporation owned through a partnership, unless the distributing corporation receives a ruling from the Internal Revenue Service to the contrary. Thus, DC1 may not avoid recognition of the remaining 60 percent of the realized gain (relating to the interest of P1 owned by FC) by entering into a gain recognition agreement pursuant to paragraph (c)(3) of this section, unless DC1 obtains a ruling to the contrary.

Example 9. (i) DC1, a domestic corporation, owns all of the stock of DC2, also a domestic corporation. The stock of DC1 is owned equally by three shareholders: A, a domestic corporation, B, a U.S. citizen, and FB, a Country Y company.

(ii) A short time before DC1 adopted a plan to distribute the stock of DC2 to its shareholders, but after the board of directors of DC1 began contemplating the distribution, FB formed Newco, a domestic corporation, and contributed its DC1 stock to Newco in a transaction qualifying for nonrecognition under section 351. A valid business purpose existed for FB's transfer of the DC1 stock to Newco, but this purpose would have been fulfilled irrespective of whether FB transferred the DC1 stock to Newco before the distribution of DC2, or after the distribution of DC2 (in which case FB would have transferred the stock of DC1 and DC2 to Newco).

(iii) Pursuant to paragraph (b)(6) of this section, the District Director may determine that FB formed Newco for a principal purpose of avoiding section 367(e)(1). In such case, for Federal income tax purposes, FB will be treated as having received the stock of DC2 in a section 355 distribution, and then as having transferred the stock to Newco in a section 351 transaction.

(iv) If B was not a shareholder of DC1 so that A and FB were equal (50 percent) shareholders, FB would be treated as a foreign distributee within the meaning of paragraph (c)(3)(i)(B) of this section without the application of paragraph (b)(6) of this section. In such case, DC1 would recognize 50 percent of the gain realized on the distribution of the DC2 stock, unless FB was a qualified foreign distributee within the meaning of paragraph (c)(3)(i) of this section and the conditions under paragraph (c)(3)(ii) of this section were satisfied.

Example 10. (i) DC1, a domestic corporation, owns all of the stock of DC2, also a domestic corporation. The stock of DC1 is owned by FP, a company resident in Country X. Country X maintains in income tax treaty with the United States that includes an information exchange provision. The DC2 stock has a fair market value of 500x at the time of the distribution, and DC1 has a basis of 100x in the DC2 stock. The stock of DC1 has a value of 500x (excluding DC1's investment in DC2). Neither DC1 nor DC2 is a U.S. real property holding corporation.

(ii) FP forms a holding company resident in Country X, Newco, and transfers 50 percent of its DC1 stock to Newco in an exchange described in section 351. Immediately after those transactions, DC1 distributes all of its DC2 stock to FP in exchange for FP's stock of DC1 in a transaction described in section 355. Thus, after the non pro rata distribution, FP owns all of the stock of DC2, and FP also owns all of the stock of Newco, which, in turn, owns all of the stock of DC1.

(iii) Newco and FP are foreign distributees (under paragraph (c)(3)(i)(B)(*1*) of this section) because they owned stock of DC1 immediately prior to the distribution. Assuming that all of the requirements of the gain recognition agreement exception under paragraph (c)(3) of this section are satisfied (so that both FP and Newco are qualified foreign distributees under paragraph (c)(3)(i)(C) of this section), DC1 will not be immediately taxable on the 400x gain realized on the distribution of the stock of DC2. Gain will be triggered under the gain recognition agreement under paragraph (c)(3)(vii) of this section if FP sells stock of Newco (because such sale would be an indirect disposition by FP of the stock of DC1), if Newco sells stock of DC1, or if FP sells stock of DC2.

Example 11. (i) Assume the same facts as in *Example 10,* except that Newco is a company resident of Country Z, and Country Z does not maintain an income tax treaty with the United States that includes an information exchange provision.

(ii) DC1 may still enter into a gain recognition agreement under paragraph (c)(3) of this section. Both FP and Newco are foreign distributees, but Newco is not a qualified foreign distributee. Thus, DC1 must recognize 50 percent, or 200x, of the 400x deferred gain on the distribution of DC2 stock. Such (50 percent) portion equals the percentage of the DC1 stock owned by foreign distributees that are not qualified foreign distributees (the 50 percent of the stock owned by Newco). DC1 may defer 50 percent of the gain, with respect to the portion of its stock owned by FP, a qualified foreign distributee, provided that it meets the requirements of paragraph (c)(3) of this section.

Example 12. (i) FC, a company resident in Country X, owns all of the stock of DC1, a domestic corporation (and has owned DC1 for many years). Country X maintains an income tax treaty with the United States that includes an information exchange provision. DC1, in turn, owns all of the stock of DC2, a domestic corporation. DC1 has a basis of 200x in the DC2 stock, and the DC2 stock has a value of 500x. Immediately after the distribution of DC2 described below, DC1 has a value of more than 300x.

(ii) DC1 distributes all of the stock of DC2 to FC (a qualified foreign distributee) in a transaction described under section 355, and satisfies all of the requirements of paragraph (c)(3) of this section to qualify for an exception to the general rule of taxation under section 367(e)(1). Two years after the initial distribution, FC distributes all of the stock of DC2 to its sole shareholder, FP, a resident of Country X, in a transaction described under section 355.

(iii) Under paragraph (c)(3)(vi)(D) of this section, FP is a substitute distributee with respect to the DC2 stock. Provided that the requirements of paragraph (c)(3)(vi)(G) of this section are satisfied, FP replaces FC as a qualified foreign distributee with respect to the DC2 stock (although FC is still a qualified foreign distributee with respect to the DC1 stock). FC is no longer required to maintain an interest in DC2 for purposes of determining whether a substantial transformation occurs. Thus, a sale by FP of the stock of FC would not trigger gain under paragraph (c)(3)(vii) of this section.

Example 13. (i) DC1, a domestic corporation, owns all of the stock of DC2, also a domestic corporation. The stock of DC1 is owned by two shareholders: FP and FX. FP, a company resident in Country Z, owns 25 percent of the stock of DC1. FX, a company resident in Country X, owns 75 percent of the stock of DC1. Country X maintains an income tax treaty with the United States that includes an information exchange provision; Country Z does not. The fair market value of DC2 is 500x and DC1 has a basis of 100x in the DC2 stock. Immediately after the distribution described below, DC1 has a value in excess of 400x.

(ii) FP formed FS, a company resident in Country X, and transferred its 25 percent interest in DC1 to FS in exchange for all of the stock of FS in an exchange described in section 351. Within two years of the exchange, DC1 distributed all of the stock of DC2 to its shareholders.

(iii) Under paragraph (c)(3) of this section, DC1 may defer a portion of its gain realized on the distribution of DC2. DC1 must immediately recognize 25 percent of the realized gain, or 100x, because FP, a 25 percent (indirect) shareholder is a foreign distributee (within the meaning of paragraph (c)(3)(i)(B) of this section), but may not be treated as a qualified foreign distributee (within the meaning of paragraph (c)(3)(i)(C) of this section). DC1 may defer 75 percent of its realized gain if FX is a qualified foreign distributee and DC1 enters into a gain recognition agreement (in which DC2 agrees to be secondarily liable), and the provisions of paragraph (c)(3) of this section are otherwise met. DC1 need not include FS as a qualified foreign distributee because FP and FS had identical 25 percent ownership interests in DC1, and DC1 is taxable with respect to such 25 percent interest. Thus, under paragraph (c)(3)(vii)(G) of this section, a sale by FS of its DC1 or DC2 stock will not result in an additional trigger of the gain recognition agreement under paragraph (c)(3)(vii) of this section.

(iv) If FP was instead a resident of Country X, DC1 could defer its entire realized gain if both FP and FS were qualified foreign distributees. In such case, DC1 would have three qualified foreign distributees. (DC1 is limited to ten qualified foreign distributees, including transferee and substitute distributees during the term of the gain recognition agreement.) If FS sold its entire interest in either DC1 or DC2, DC1 would be required to amend its Federal income tax return for the year of the transfer and include 100x in income. In such case, neither FP nor FS would be considered a qualified foreign distributee immediately after the sale (and, as a result, FP's sale of its FS stock would not trigger additional gain under paragraph (c)(3)(vii)(G) of this section). The result would be the same if FP sold all of the stock of FS (as such sale is an indirect disposition by FP of all its stock of DC1 and DC2). (In such case, the sale by FS of its stock of DC1 or DC2 would not trigger additional gain under paragraph (c)(3)(vii)(G) of this section.)

(f) *Effective date.* This section shall be effective with respect to distributions occurring on or after September 13, 1996. However, taxpayers may elect to apply the rules of this section with respect to distributions occurring on or after December 31, 1995.

[T.D. 8682, 61 FR 42169, Aug. 14, 1996]

§ 1.367(e)–2T Distributions described in section 367(e)(2) (temporary).

(a) *Purpose and scope*—(1) *In general.* This section provides rules concerning the recognition of gain by a corporation on its distribution to a foreign corporation of property in a complete liquidation to which section 332 applies. Paragraph (b)(1) of this section states as a general rule that gain recognition is required when a domestic corporation makes a distribution of property in complete liquidation under section 332 to a foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the domestic corporation. Paragraph (b)(2) of this section provides the only exceptions to the gain recognition rule of paragraph (b)(1). Paragraph (b)(3) of this section refers to other consequences of distributions described in paragraphs (b)(1) and (2). Paragraph (c)(1) of this section states as a general rule that gain recognition is not required when a foreign corporation makes a distribution of property in complete liquidation under section 332 to another foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the distributing foreign corporation. Paragraph (c)(2) of this section provides exceptions to the nonrecognition rule of paragraph (c)(1). Paragraph (c)(3) of this section refers to other consequences of distributions described in paragraphs (c)(1) and (2). Examples of the rules of this section are provided in paragraphs (b)(4) and (c)(4) of this section. Finally, paragraph (d) specifies the effective date for the rules of this section. The rules of this section are issued pursuant to the authority conferred by section 367 (e)(2).

(2) *Nonapplicability of section 367(a).* Section 367(a) shall not apply to a complete liquidation described in section 332 by a domestic corporation into a foreign corporation that meets the stock ownership requirements of section 332(b) and that is subject to section 367(e)(2) or is described in paragraph (b)(2)(iii) of this section.

(b) *Distribution by a domestic corporation*—(1) *Recognition of gain required*—(i) *General rule.* If a domestic corporation makes a distribution of property in a complete liquidation under section 332 to a foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the domestic corporation, then, except as provided in paragraph (b)(2) of this section, section 337 (a) and (b)(1) shall not apply and the distributing domestic corporation shall recognize gain on the distribution of the item of property under section 367(e)(2). The gain recognized by the domestic corporation shall be equal to the excess of the fair market value of each such item of property distributed over its adjusted basis. Except as provided in paragraphs (b)(2)(iii) and (d) of this section, the recognition of gain required under this paragraph is not prohibited by any treaty to which the United States is a party.

(ii) *Recognition of losses.* If paragraph (b)(1)(i) of this section would apply to a distribution of an item of property but for the fact that the distributing domestic corporation realizes a loss on the distribution of such item of property, then the distributing domestic corporation shall recognize the loss realized on such distribution. However, such loss shall be recognized only to the extent that (A) the total amount of capital losses recognized on such distributions does not exceed the total amount of capital gains recognized by the distributing domestic corporation pursuant to paragraph (b)(1)(i), and (B) the total amount of ordinary losses recognized on such distributions does not exceed the total amount of ordinary income recognized by the distributing domestic corporation pursuant to paragraph (b)(1)(i). Notwithstanding any other provision of this paragraph, losses shall be recognized under this section only on property that the distributing domestic corporation did not acquire within the five year period ending on the date of the liquidation through a capital contribution, a liquidation under section 332, or an exchange under section 351(a) or 361(a). If, pursuant to the rules of this paragraph (b)(1)(ii), only a portion of the capital loss or ordinary loss on the property distributed is recognized because the aggregate capital loss exceeds the aggregate capital gain or the aggregate ordinary loss exceeds the aggregate ordinary gain of the distributing corporation, then the capital loss (and the ordinary loss) recognized shall be treated as being recognized on a pro rata basis with respect to each such capital or ordinary property distributed.

(iii) *Distribution of partnership interest*—(A) *In general.* If a domestic corporation distributes an interest as a partner in a partnership (whether foreign or domestic) in a distribution described in paragraph (b)(1)(i) of this section, then for purposes of applying this section the domestic corporation shall be treated as having distributed a proportionate share of the property of the partnership. Accordingly, the applicability of the nonrecognition rules of paragraph (b)(1)(i) and (ii) and of any exception to recognition provided in this section shall be determined with reference to the property of the partnership rather than to the partnership interest itself. Where the property of the partnership includes an interest in a lower-tier partnership the applicability of any exception with respect to the interest in the lower-tier partnership shall be determined with reference to the property of the lower-tier partnership. In the case of multiple tiers of partnerships, the applicability of an exception shall be determined with reference to the property of the lowest-tier partnership in the partnership chain. A domestic corporation's proportionate share of partnership property shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder.

(B) *Basis adjustments.* The foreign corporation's basis in the distributed partnership interest shall be equal to the distributing domestic corporation's basis in such partnership interest immediately prior to the distribution, increased by the amount of gain and reduced by the amount of loss recognized by the domestic corporation on the distribution of the partnership interest. Solely for purposes of sections 743 and 754, the foreign corporation shall be treated as having purchased the partnership interest for an amount equal to the foreign corporation's adjusted basis therein.

(C) *Limited partnership interest.* The distribution by a domestic corporation of a limited partnership interest that is regularly traded on an established securities market shall not be subject to the rules of this paragraph (b)(1)(iii). Instead, the distribution of such an interest shall be treated in the same manner as a distribution of stock. For purposes of this section, a limited partnership interest is an interest as a limited partner in a partnership that is organized under the laws of any state of the United States or the District of Columbia. Whether such an interest is regularly traded on an established securities market shall be determined under the provisions of § 1.367(a)–1T(c)(3)(ii)(D).

(2) *Recognition of gain or loss not required*—(i) *Distribution of property used in a United States trade or business*—(A) *Conditions for nonrecognition.* The domestic corporation shall not recognize gain or loss under paragraph (b)(1) of this section on its distribution of property (including inventory) used by the domestic corporation in the conduct of a trade or business within the United States if—

(*1*) The distributee foreign corporation is not a controlled foreign corporation, as defined in section 957(a) or section 953(c) (including a corporation that would be treated as a controlled foreign corporation under section 953(c) but for the provisions of section 953(c)(3)), at the time of the distribution of property;

(*2*) The distributee foreign corporation, for the ten-year period beginning on the date of the distribution of such property, uses the property in the conduct of a trade or business in the United States (or, in the case of inventory, continues to hold the property for sale to customers until disposed of); and

(*3*) The domestic and foreign corporations attach the statement described in paragraph (b)(2)(i)(B) to their U.S. income tax returns for the year of the distribution (or to an amended return filed no later than July 16, 1990).

This nonrecognition rule does not apply to the distribution of intangibles described in section 936(h)(3)(B). Property is considered used by a foreign corporation in the conduct of a trade or business in the United States only if any income from the use of the property and any income or gain from the sale or exchange of the property would be subject to taxation under section 882(a) as effectively connected income. For purposes of this paragraph (b)(2)(i)(A), stock held by a dealer as inventory or for sale in the ordinary course of its trade or business shall be treated as inventory and not as stock in the hands of both the domestic corporation and the distributee foreign corporation. lf a distributing domestic corporation that would otherwise qualify for nonrecognition on the distribution of such property under this paragraph (b)(2)(i) fails to file the statement properly or files a statement that does not comply with the requirements of paragraph (b)(2)(i)(B) of this section, the Commissioner may, nevertheless, in his discretion treat the distributing domestic corporation as if it had, in fact, met all the requirements of paragraph (b)(2)(i)(B) if such treatment is necessary to prevent the taxpayer from otherwise deriving a tax benefit by such failure.

(B) *Required statement.* The statement required by paragraph (b)(2)(i)(A) shall be prepared by the distributing domestic corporation and signed under penalties of perjury by an authorized officer of each of the distributing domestic and distributee foreign corporations. The statement shall set forth the following items:

(*1*) A declaration that the distribution to the foreign corporation is one to which the rules of §1.367(e)–2T(b)(2)(i) apply.

(*2*) A description of all of the property distributed by the domestic corporation (whether or not the property qualifies for nonrecognition). Such description shall identify the property that continues to be used by the distributee foreign corporation in the conduct of a trade or business within the United States, including the location, adjusted basis, estimated fair market value, a summary of the method (including appraisals if any) used for determining such value, and the date of distribution of such items of property.

(*3*) An identification of the distributee foreign corporation, including its name and address, taxpayer identification number (if any), residence and place of incorporation.

(*4*) With respect to property entitled to nonrecognition pursuant to paragraph (b)(2)(i), a declaration by the distributee foreign corporation that it irrevocably waives any right under any treaty (whether or not currently in force at the time of the liquidation) to sell or exchange any item of such property without U.S. income taxation or at a reduced rate of taxation, or to derive income from the use of any item of such property without U.S. income taxation or at a reduced rate of taxation.

(*5*) An agreement by the distributing domestic corporation and the distributee foreign corporation to extend the statute of limitations on assessments and collections (under section 6501) with respect to the distribution of each item of property until three years after the date on which all such items of property have ceased to be used in a trade or business within the United States pursuant to paragraph (b)(2)(i)(C)(*1*), but in no event shall the extension be for a period longer than 13 years from the filing of the original U.S. income tax return for the taxable year of the last distribution of any such item of property. If, however, the distributing domestic corporation files an amended return pursuant to the provisions of paragraph (b)(2)(i)(C), other than an amended return filed for the substitution of property exchanged under section 1031 or converted under section 1033, the agreement to extend the statute of limitations on assessments and collections as to the property with respect to which gain is included on the amended return will not extend beyond three years (except as otherwise provided by section 6501) after the filing of the amended tax return.

(C) *Effect of submitting statement.* By the distributing domestic corporation's claiming nonrecognition under this paragraph (b)(2)(i), the distributing domestic corporation and the distributee foreign corporation agree to be subject to the rules of this paragraph (b)(2)(i)(C).

(*1*) If, within the ten year period from the date of distribution, any item of property entitled to nonrecognition under paragraph (b)(2)(i)(A) ceases to be used by the distributee foreign corporation in the conduct of a trade or business in the United States for any reason (including but not limited to the sale or exchange of such property or the removal of the property from conduct of the trade or business), then, except as provided in paragraph (b)(2)(i)(C)(*3*), the distributee foreign corporation shall cause to be filed on behalf of the domestic corporation an amended U.S. income tax return for the year of the distribution of such item of property, in which return the domestic corporation recognizes the gain (but not loss) realized but not recognized upon the initial distribution of such item of property. On the amended return filed pursuant to paragraph (b)(2)(i)(C)(*1*), the distributing domestic corporation may use any losses (or credits) existing in the year of the distribution, that were otherwise available in that year and not used in another year, to offset the gain (or tax thereon) required to be recognized under such paragraph.

(*2*) The amended return required by paragraph (b)(2)(i)(C)(*1*) shall be filed no later than the due date (including extensions) for the return of the distributee foreign corporation for the taxable year in which the property ceases to be used by the distributee foreign corporation in the conduct of a trade or business in the United States.

(*3*) If property ceases to be used by the distributee foreign corporation in the conduct of a trade or business in the United States by reason of a disposition of such property, and either (*i*) a loss is recognized in whole on such disposition, or (*ii*) a gain is recognized in whole and the distributee foreign corporation reports the full amount of such gain on its timely filed U.S. tax return for the year of the disposition, then the distributing domestic corporation shall not be required to recognize any gain in respect of the distribution of such property on an amended return for the year of the distribution. If a gain is recognized in whole on the disposition of the property and the distributee foreign corporation does not report the full amount of such gain on a timely filed U.S. tax return for the year of the disposition, then the distributing domestic corporation shall be required to recognize and include in income on an amended return for the year of the distribution the full amount of gain realized by such domestic corporation on the distribution of such property. If the domestic corporation is required to recognize gain in the year of the distribution, the foreign corporation shall, nonetheless, be required to recognize any gain realized on the disposition of the property according to generally applicable principles, but the basis of the property in the hands of the foreign corporation shall be adjusted to reflect the recognition of gain by the domestic corporation. Thus, if the property ceases to be used in the active conduct of a trade or business in the United States in a transaction in which gain is recognized, and the distributee foreign corporation includes in income the full amount of such gain on a timely filed return for the taxable year in which gain is recognized, then no amended return shall be required to be filed in respect of such property by the distributing domestic corporation.

(*4*) For purposes of this paragraph (b)(2)(i)(C), property shall not be considered as no longer used in the conduct of a trade or business in the United States if exchanged for, or involuntarily converted into, similar property used in the conduct of a trade or business in the United States, to the extent such exchange or conversion qualifies for nonrecognition under section 1031 or 1033, or distributed to another foreign corporation in a liquidation distribution under section 337(a) qualifying for nonrecognition under paragraph (c)(2)(i) of this section. Further, a cessation of use of property in the conduct of a trade or business in the United States shall not include the abandonment or disposal of essentially worthless or obsolete property. If the distributee foreign corporation exchanges the property under section 1031 for, or converts the property under section 1033 into similar property used in the conduct of a trade or business in the United States, then the domestic corporation and the distributee foreign corporation must file amended returns for the year of the distribution of such property from the domestic corporation to the distributee foreign corporation, in order to substitute on the statement that was required by paragraph (b)(2)(i)(B) the property received in place of the property exchanged or converted. If the distributee foreign corporation distributes the property in a liquidation distribution under section 337(a) qualifying for nonrecognition under paragraph (c)(2)(i), then the rules of such paragraph shall apply to the distribution.

(*5*) If additional tax is required to be paid by the distributing corporation for the year of a liquidating distribution, then interest must be paid on that amount at the rates determined under section 6621 with respect to the period between the date that was prescribed for filing the distributing domestic corporation's U.S. income tax return for the year of the distribution and the date on which the additional tax for that year is paid.

(*6*) The distributee foreign corporation, as successor in interest and liability to the distributing domestic corporation, shall be jointly and severally liable for any tax owed by the distributing domestic corporation as a result of the application of paragraph (b)(2)(i), and shall succeed to the distributing domestic corporation's agreement to extend the statute of limitations and collections under section 6561.

(*7*) The distributee foreign corporation shall attach a statement to its U.S. income tax return for each year after the liquidation of the distributing domestic corporation. The statement shall identify the distributed property that ceased to be used by the distributee foreign corporation in the conduct of a trade or business within the United States during that year (without regard to whether the distributing domestic corporation was required to file an amended return as a result of such disposition pursuant to paragraph (b)(2)(i)(C)(*3*) of this section). The requirement to attach such statement to the return shall not apply to any taxable year of the distributee foreign corporation after the final taxable year in which any distributed property is used by such corporation in the conduct of a trade or business within the United States, and in no event shall the requirement apply to a taxable year later than 13 years from the filing of the original U.S. income tax return for the taxable year of the distribution.

(ii) *Distribution of U.S. real property interests.* The domestic corporation shall not recognize gain under paragraph (b)(1) of this section on the distribution of a U.S. real property interest (other than stock in a former U.S. real property holding corporation which is treated as a U.S. real property interest for five years under §1.897–5T(c)(1)) in a complete liquidation under section 332(a) to the distributee foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the distributing domestic corporation. See §1.897–5T(b)(3)(iv)(A). If property distributed by the domestic corporation is a U.S. real property interest that qualifies for nonrecognition under this paragraph (b)(2)(ii) in addition to nonrecognition provided by paragraph (b)(2)(i) of this section, then the distributing domestic corporation shall secure nonrecognition pursuant to this paragraph (b)(2)(ii) and not pursuant to the provisions of paragraph (b)(2)(i).

(iii) *Transitional rule for certain treaty provisions.* A distributing domestic corporation shall not recognize gain or loss under paragraph (b)(1) of this section on the distribution of property in a complete liquidation under section 332(a) to a foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the domestic corporation if—

(A) Such property was distributed by the domestic corporation and received by the foreign corporation after July 31, 1986, and before September 29, 1987 in a distribution that would have been subject to section 367(e)(2) (as enacted by the Tax Reform Act of 1986) but for the provisions of Notice 87–5, 1987–1 C.B. 416, and

(B) The foreign corporation is a resident of a foreign country which had an income tax treaty with the United States in force at the time of the distribution which contained a provision barring discrimination based on capital ownership and the corporation is not denied the benefit of nondiscrimination under that treaty.

See Notice 87–66, 1987–2 C.B. 376.

(3) *Other consequences*—(i) *Distributee basis in property.* The basis of property distributed pursuant to paragraph (b) of this section in the hands of the distributee foreign corporation shall be the basis of such property in the hands of the distributing domestic corporation, increased by the amount of gain (if any), or reduced by the amount of loss (if any), recognized by the domestic corporation on the distribution of each of the respective properties pursuant to paragraph (b)(1) of this section.

(ii) *Dividend treatment under section 1248.* With respect to the treatment as a dividend of a portion of the gain recognized by the domestic corporation on the distribution of the stock of certain domestic and foreign corporations, see section 1248 (a) and (e) and the regulations thereunder. With respect to the treatment as a dividend of a portion of the gain realized but not otherwise recognized under paragraph (b)(1) of this section by the domestic corporation on the distribution of the stock of a foreign corporation (including a foreign corporation, the stock of which is a U.S. real property interest, because such corporation has in effect a valid election under section 897(i)), see section 1248(f) and the regulations thereunder.

(iii) *Exchange under section 897(e)(1).* With respect to the treatment under section 897(e)(1) of a distributee foreign corporation whose interest in the distributing domestic corporation is a U.S. real property interest, see § 1.897–5T(b)(3)(iv)(A).

(iv) *Distribution of stock of a passive foreign investment company.* [Reserved]

(v) *Carryover of tax attributes.* In regard to the carryover of certain tax attributes from the domestic corporation to the distributee foreign corporation, see section 381 and the regulations thereunder.

(4) *Examples.* The rules of this paragraph (b) may be illustrated by the following examples.

Example (1). (i) FC, a Country X corporation, owns all of the outstanding stock of DC, a domestic corporation. All of the property of DC has appreciated in value and is used in the conduct of a trade or business in Country X. None of the DC property is used in connection with the conduct of a trade or business within the United States. In a liquidation under section 332, DC distributes all of its property to FC.

(ii) Under paragraph (b)(1) of this section, DC recognizes gain on the distribution of its property to FC. FC takes a basis in each property equal to DC's basis in the property increased by the amount of any gain recognized by DC on the distribution of the property.

Example (2). (i) FC, a Country X corporation that is not a controlled foreign corporation, owns all of the outstanding stock of DC, a domestic corporation. DC owns Parcel P (a U.S. real property interest), equipment used in the conduct of a trade or business in the United States, and all of the stock in DC1, a domestic corporation, and FS, a foreign corporation that is not a passive foreign investment company. All of the property has appreciated in value since acquired by DC. DC, DC1, and FS have never been U.S. real property holding corporations.

(ii) DC distributes all of its property to FC in complete liquidation under section 332 on March 1, 1988. Beginning immediately after the distribution of the equipment, FC uses the equipment in the conduct of a trade or business in the U.S.

(iii) Under paragraph (b)(2)(ii) of this section, DC does not recognize gain on the distribution of Parcel P. If DC and FC comply with the requirements of paragraph (b)(2)(i) of this section, DC will not recognize gain on the distribution of the equipment, because FC uses the equipment in the conduct of a U.S. trade or business immediately after the distribution. DC must recognize gain pursuant to paragraph (b)(1) of this section on the distribution of the stock of DC1 and FS because there is no exception from gain recognition for the liquidating distribution of stock that is not held by the distributing corporation for sale to customers in the ordinary course or as inventory unless the corporation the stock of which is being distributed is a U.S. real property holding corporation. In regard to the treatment of DC under section 1248, see, however, section 1248 (a) and (e) and the regulations thereunder.

(iv) FC takes DC's basis under paragraph (b)(3)(i) of this section in Parcel P and the equipment because no gain is recognized by DC on the distribution of that property. Under paragraph (b)(3)(i) of this section, FC takes DC's basis in the stock of DC1 and FS, increased by the amount of the gain recognized by DC on the respective stocks.

(c) *Distribution by a foreign corporation*—(1) *Recognition of gain generally not required.* If a foreign corporation makes a distribution of property in complete liquidation under section 332 to another foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the distributing foreign corporation, then, except as provided in paragraph (c)(2) of this section, section 337 (a) and (b)(1) shall apply and the distributing foreign corporation shall not recognize gain (or loss) on the distribution under section 367(e)(2). If a distributing foreign corporation distributes an interest as a partner in a partnership (whether foreign or domestic), then such corporation shall be treated as having distributed a proportionate share of the property of the partnership in accordance with the principles of paragraph (b)(1)(iii) of this section.

(2) *Recognition of gain required*—(i) *Property used in a United States trade or business*—(A) *In general.* A foreign corporation (including a corporation that has made an effective election under section 897(i)) that makes a distribution of property in complete liquidation under section 332 to another foreign corporation that meets the stock

ownership requirements of section 332(b) with respect to the stock in the distributing foreign corporation shall recognize gain on the distribution of any property (other than U.S. real property interests) used by the distributing foreign corporation at the time of the liquidation in the conduct of a trade or business within the United States unless the distributee foreign corporation for a ten-year period continues to use such property in the conduct of a trade or business within the United States, and the distributing and distributee foreign corporations attach the statement described in paragraph (c)(2)(i)(B) to their U.S. income tax returns for their taxable years that include the distribution. However, this paragraph (c)(2)(i)(A) shall not apply if all of the following conditions exist.

(*1*) At the time of the distribution, the distributing and the distributee foreign corporations are controlled foreign corporations as defined in section 957 (a) or (b) or section 953(c) (including a corporation that would be treated as a controlled foreign corporation under section 953(c) but for the provisions of section 953(c)(3));

(*2*) The distributee foreign corporation uses such property in the conduct of a trade or business within the United States immediately after the distribution;

(*3*) There was no prior liquidation subject to section 367(e)(2) of a corporation into the distributing corporation (or a predecessor corporation) under paragraph (b)(2)(i) or this paragraph (c)(2)(i) (other than a controlled foreign corporation into another controlled foreign corporation); and

(*4*) The distributee foreign corporation is not entitled to benefits under a comprehensive income tax treaty, but if the distributing foreign corporation (or predecessor corporation) was entitled to benefits under a comprehensive income tax treaty, then the distributee foreign corporation may (but need not) be entitled to benefits under a comprehensive income tax treaty.

(B) *Required statement.* The statement required by paragraph (c)(2)(i)(A) shall be prepared by or on behalf of the distributing foreign corporation and signed under penalties of perjury by an authorized officer of each of the distributing and distributee foreign corporations, and shall be identical to the statement described in paragraph (b)(2)(i)(B), except that ''§1.367(e)–2T(c)(2)(i)'' shall be substituted for references to ''§1.367(e)–2T(b)(2)(i)'' and the term *distributing foreign corporation* shall be substituted for either the term *domestic corporation* or the term *distributing domestic corporation* each time it appears. References in the rules of paragraph (b)(2)(i)(B) to various rules in paragraph (b) shall be applied as if such references were to this paragraph (c). However, the distributee foreign corporation shall not be required to waive its income tax treaty benefits as required by §1.367(e)–2T(b)(2)(i)(B)(*4*) unless the distributing foreign corporation was required to waive its treaty benefits under paragraph (b)(2)(i)(B)(*4*) of this section in connection with the distribution of such property in a prior liquidation distribution subject to the provisions of this section; the distributee foreign corporation is entitled to benefits under a treaty to which the distributing foreign corporation was not entitled; or the distributee foreign corporation is incorporated in a country different from the country in which the distributing foreign corporation is incorporated.

(C) *Effect of submitting or failing to submit a statement.* By the distributing foreign corporation's claiming nonrecognition under this paragraph (c)(2)(i), the distributing foreign corporation and the distributee foreign corporation agree to be subject to the rules of this paragraph (c)(2)(i) and the rules of paragraph (b)(2)(i)(C). In applying the rules of paragraph (b)(2)(i)(C), the term *distributing foreign corporation* shall be substituted for either the term *domestic corporation* or the term *distributing domestic corporation* each time it appears. References in the rules of paragraph (b)(2)(i)(C) to various rules in paragraph (b) shall be applied as if such references were to this paragraph (c). However, if a distributing foreign corporation that would otherwise qualify for nonrecognition on the distribution of such property under this paragraph (c)(2)(i) fails to file the statement properly or files a statement that does not comply with the requirements of this paragraph, the Commissioner may, nevertheless, in his discretion treat the distributing foreign corporation as if it had, in fact, met all the requirements of this paragraph if such treatment is necessary to prevent the taxpayer from otherwise deriving a tax benefit by such failure.

(ii) *Property formerly used in a United States trade or business.* A foreign corporation making a distribution of property in complete liquidation under section 332 to another foreign corporation that meets the stock ownership requirements of section 332(b) with respect to stock in the distributing foreign corporation shall recognize gain (but not loss) on the distribution of any property (other than U.S. real property interests) that ceased, in a taxable year beginning after December 31, 1986, and within ten years prior to the date of liquidation, to be used in connection with the conduct of a trade or business within the United States. Section 864(c)(7) shall govern the treatment of any gain recognized on the distribution of assets described in this paragraph as income effectively connected with the conduct of a trade or business within the United States.

(3) *Other consequences*—(i) *Distributee basis in property.* The basis of distributed property in the hands of the distributee foreign corporation shall be the basis of the distributed property in the hands of the distributing foreign corporation, increased by the amount of gain (if any) recognized by the distributing foreign corporation on the distribution of the property. However, the basis of the distributed property in the hands of the distributee foreign corporation shall not exceed the fair market value of such property where the distributing foreign corporation recognizes gain on the distribution under this section and the distributee foreign corporation recognizes gain under section 897(e) or the regulations thereunder. See § 1.897–5T(b)(3)(iv)(B).

(ii) *Distribution under section 367(b).* With respect to the treatment of certain distributee foreign corporations under section 367(b), see § 7.367(b)–5(c).

(iii) *Distribution or exchange of U.S. real property interests.* With respect to the treatment under section 897(d) of a distributing foreign corporation on the distribution of a U.S. real property interest, see § 1.897–5T(c)(2)(i) and (ii). With respect to the treatment under section 897(e) of the distributee foreign corporation where the distributing foreign corporation has made an election under section 897(i) and the stock of such corporation is treated as a U.S. real property interest, see § 1.897–5T(b)(3)(iv)(B).

(iv) *Distribution of stock of a passive foreign investment company.* [Reserved]

(v) *Carryover of tax attributes.* In regard to the carryover of certain tax attributes from the distributing foreign corporation to the distributee foreign corporation, see section 381 and the regulations thereunder.

(4) *Examples.* The rules of this paragraph (c) may be illustrated by the following examples.

Example (1). (i) FX1, a Country Y corporation, owns all of the outstanding stock of FX2, a Country Y corporation that is not a passive foreign investment company. FX2 owns Parcel P (a U.S. real property interest), Asset #1 that formerly was used by FX2 in its U.S. trade or business, and Asset #2 currently used by FX2 in its U.S. trade or business. Asset #1 ceased to be used in a U.S. trade or business on September 30, 1987. All of the property has appreciated in value since acquired by FX2.

(ii) In a liquidation under section 332, FX2 distributes all of its property to FX1 on December 31, 1989. FX1 uses Asset #2 in the conduct of a trade or business in the United States immediately after the distribution.

(iii) Under paragraphs (c)(1) and (2) of this section, FX2 does not recognize gain under section 367(e)(2) on the distribution of Parcel P. Any gain realized on Parcel P may be subject to taxation under section 897 (d) if certain procedural requirements contained in § 1.897–5T(d)(1)(iii) are not followed. FX2 must recognize gain on the distribution of Asset #1 under paragraph (c)(2)(ii) of this section. Section 864 (c)(7) shall govern the treatment of the gain recognized by FX2 on Asset #1 as income effectively connected with a trade or business in the United States. Because FX2 used and FX1 uses Asset #2 in the conduct of a trade or business in the United States, FX2 will not recognize gain under paragraph (c)(2)(i) of this section on the distribution of Asset #2 if FX1 and FX2 comply with the requirements of that paragraph.

(iv) Under paragraph (c)(3)(i) of this section, FX1 takes FX2's basis in Parcel P and Asset #2 if there is compliance with the requirements. Under paragraph (c)(3)(i) of this section, FX1 takes FX2's basis in Asset #l increased by the gain recognized.

Example (2). (i) FY1, a Country F corporation, owns all of the outstanding stock of FY2, a Country F corporation that is not a passive foreign investment company. FY2 owns Parcel P (a U.S. real property interest held for investment) and machinery used in its U.S. trade or business. FY2 has made an effective election under section 897(i), and the FY2 stock is treated as a U.S. real property interest.

(ii) In a liquidation under section 332, FY2 distributes all of its property to FY1. FY1 will use the machinery in the conduct of a trade or business in the United States immediately after the distribution.

(iii) Under paragraphs (c)(1) and (2) of this section, FY2 does not recognize gain under section 367(e)(2) on the distribution of Parcel P. Any gain realized on Parcel P may be subject to taxation under section 897(d) if certain procedural requirements contained in §1.897–5T(d)(1)(iii) are not followed. Because FY2 used and FY1 continues to use the machinery in the conduct of a trade or business in the United States, FY2 does not recognize gain on the distribution of the machinery under paragraph (c)(2)(i) of this section if FY1 and FY2 comply with the requirements of that paragraph.

(iv) Under paragraph (c)(3)(i) of this section, FY1 takes FY2's basis in Parcel P. Under paragraph (c)(3)(i) of this section, FY1 takes FY2's basis in the machinery. See §1.897–5T(b)(3)(iv)(B) for the treatment of FY1 under section 897 (e).

(d) *Effective date.* This section shall be effective for distributions after July 31, 1986, pursuant to section 337(a) as in effect after the effective dates of the amendments of section 631 of the Tax Reform Act of 1986, except that it shall not apply in the case of any corporation completely liquidated before June 10, 1987, into a corporation organized in a country which then had an income tax treaty with the United States. See section 1006(e)(13) of the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3342, Public Law 100–647).

[T.D. 8280, 55 FR 1412, Jan. 16, 1990]

SPECIAL RULE; DEFINITIONS

§1.368–1 Purpose and scope of exception of reorganization exchanges.

(a) *Reorganizations.* As used in the regulations under parts I, II, and III (section 301 and following), subchapter C, chapter 1 of the Code, the terms *reorganization* and *party to a reorganization* mean only a reorganization or a party to a reorganization as defined in subsections (a) and (b) of section 368. In determining whether a transaction qualifies as a reorganization under section 368(a), the transaction must be evaluated under relevant provisions of law, including the step transaction doctrine. But see §§1.368–2 (f) and (k) and 1.338–2(c)(3). The preceding two sentences apply to transactions occurring after January 28, 1998, except that they do not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter. With respect to insolvency reorganizations, see part IV, subchapter C, chapter 1 of the Code.

(b) *Purpose.* Under the general rule, upon the exchange of property, gain or loss must be accounted for if the new property differs in a material particular, either in kind or in extent, from the old property. The purpose of the reorganization provisions of the Code is to except from the general rule certain specifically described exchanges incident to such readjustments of corporate structures made in one of the particular ways specified in the Code, as are required by business exigencies and which effect only a readjustment of continuing interest in property under modified corporate forms. Requisite to a reorganization under the Internal Revenue Code are a continuity of the business enterprise through the issuing corporation under the modified corporate form as described in paragraph (d) of this section, and (except as provided in section 368(a)(1)(D)) a continuity of interest as described in paragraph (e) of this section. (For rules regarding the continuity of interest requirement under section 355, see §1.355–2(c).) For purposes of this section, the term *issuing corporation* means the acquiring corporation (as that term is used in section 368(a)), except that, in determining whether a reorganization qualifies as a triangular reorganization (as defined in §1.358–6(b)(2)), the issuing corporation means the corporation in control of the acquiring corporation. The preceding three sentences apply to transactions occurring after January 28, 1998, except that they do not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter. The continuity of business enterprise requirement is described in paragraph (d) of this section. The Code recognizes as a reorganization the amalgamation (occurring in a specified way) of two corporate enterprises under a single corporate structure if there exists among the holders of the stock and securities of either of the old corporations the requisite continuity of interest in the new corporation, but there is not a reorganization if the holders of the stock and securities of the old corporation are merely the holders of short-term notes in the new corporation. In order to exclude transactions not intended to be included, the specifications of the reorganization provisions of the law are precise. Both the terms of the specifications and their underlying assumptions and purposes must be satisfied in order to entitle the taxpayer to the benefit of the exception from the general rule. Accordingly, under the Code, a short-term purchase money note is not a security of a party to a reorganization, an ordinary dividend is to be treated as an ordinary dividend, and a sale is nevertheless to be treated as a sale even though the mechanics of a reorganization have been set up.

(c) *Scope.* The nonrecognition of gain or loss is prescribed for two specifically described types of exchanges, viz: The exchange that is provided for in section 354(a)(1) in which stock or securities in a corporation, a party to a reorganization, are, in pursuance of a plan of reorganization, exchanged for the stock or securities in a corporation, a party to the same reorganization; and the exchange that is provided for in section 361(a) in which a corporation, a party to a reorganization, exchanges property, in pursuance of a plan of reorganization, for stock or securities in another corporation, a party to the same reorganization. Section 368(a)(1) limits the definition of the term *reorganization* to six kinds of transactions and excludes all others. From its context, the term *a party to a reorganization* can only mean a party to a transaction specifically defined as a reorganization by section 368(a). Certain rules respecting boot received in either of the two types of exchanges provided for in section 354(a)(1) and section 361(a) are prescribed in sections 356, 357, and 361(b). A special rule respecting a transfer of property with a liability in excess of its basis is prescribed in section 357(c). Under section 367 a limitation is placed on all these provisions by providing that except under specified conditions foreign corporations shall not be deemed within their scope. The provisions of the Code referred to in this paragraph are inapplicable unless there is a plan of reorganization. A plan of reorganization must contemplate the bona fide execution of one of the transactions specifically described as a reorganization in section 368(a) and for the bona fide consummation of each of the requisite acts under which nonrecognition of gain is claimed. Such transaction and such acts must be an ordinary and necessary incident of the conduct of the enterprise and must provide for a continuation of the enterprise. A scheme, which involves an abrupt departure from normal reorganization procedure in connection with a transaction on which the imposition of tax is imminent, such as a mere device that puts on the form of a corporate reorganization as a disguise for concealing its real character, and the object and accomplishment of which is the consummation of a preconceived plan having no business or corporate purpose, is not a plan of reorganization.

(d) *Continuity of business enterprise*—(1) *General rule.* Continuity of business enterprise (COBE) requires that the issuing corporation (P), as defined in paragraph (b) of this section, either continue the target corporation's (T's) historic business or use a significant portion of T's historic business assets in a business. The preceding sentence applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter. The application of this general rule to certain transactions, such as mergers of holding companies, will depend on all facts and circumstances. The policy underlying this general rule, which is to ensure that reorganizations are limited to readjustments of continuing interests in property under modified corporate form, provides the guidance necessary to make these facts and circumstances determinations.

(2) *Business continuity.* (i) The continuity of business enterprise requirement is satisfied if *P* continues *T'* s historic business. The fact *P* is in the same line of business as *T* tends to establish the requisite continuity, but is not alone sufficient.

(ii) If *T* has more than one line of business, continuity of business enterprise requires only that *P* continue a significant line of business.

(iii) In general, a corporation's historic business is the business it has conducted most recently. However, a corporation's historic business is not one the corporation enters into as part of a plan of reorganization.

(iv) All facts and circumstances are considered in determining the time when the plan comes into existence and in determining whether a line of business is ''significant''.

(3) *Asset continuity.* (i) The continuity of business enterprise requirement is satisfied if *P* uses a significant portion of *T'* s historic business assets in a business.

(ii) A corporation's historic business assets are the assets used in its historic business. Business assets may include stock and securities and intangible operating assets such as good will, patents, and trademarks, whether or not they have a tax basis.

(iii) In general, the determination of the portion of a corporation's assets considered ''significant'' is based on the relative importance of the assets to operation of the business. However, all other facts and circumstances, such as the net fair market value of those assets, will be considered.

(4) *Acquired assets or stock held by members of the qualified group or partnerships.* The following rules apply in determining whether the COBE requirement of paragraph (d)(1) of this section is satisfied:

(i) *Businesses and assets of members of a qualified group.* The issuing corporation is treated as holding all of the businesses and assets of all of the members of the qualified group, as defined in paragraph (d)(4)(ii) of this section.

(ii) *Qualified group.* A qualified group is one or more chains of corporations connected through stock ownership with the issuing corporation, but only if the issuing corporation owns directly stock meeting the requirements of section 368(c) in at least one other corporation, and stock meeting the requirements of section 368(c) in each of the corporations (except the issuing corporation) is owned directly by one of the other corporations.

(iii) *Partnerships*—(A) *Partnership assets.* Each partner of a partnership will be treated as owning the T business assets used in a business of the partnership in accordance with that partner's interest in the partnership.

(B) *Partnership businesses.* The issuing corporation will be treated as conducting a business of a partnership if —

(*1*) Members of the qualified group, in the aggregate, own an interest in the partnership representing a significant interest in that partnership business; or

(*2*) One or more members of the qualified group have active and substantial management functions as a partner with respect to that partnership business.

(C) *Conduct of the historic T business in a partnership.* If a significant historic T business is conducted in a partnership, the fact that P is treated as conducting such T business under paragraph (d)(4)(iii)(B) of this section tends to establish the requisite continuity, but is not alone sufficient.

(iv) *Effective date.* This paragraph (d)(4) applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter.

(5) *Examples.* The following examples illustrate this paragraph (d). All corporations have only one class of stock outstanding. The preceding sentence and paragraph (d)(5) *Example 6* through *Example 12* apply to transactions occurring after January 28, 1998, except that they do not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter.

Example 1. T conducts three lines of business: manufacture of synthetic resins, manufacture of chemicals for the textile industry, and distribution of chemicals. The three lines of business are approximately equal in value. On July 1, 1981, *T* sells the synthetic resin and chemicals distribution businesses to a third party for cash and marketable securities. On December 31, 1981, *T* transfers all of its assets to *P* solely for *P* voting stock. *P* continues the chemical manufacturing business without interruption. The continuity of business enterprise requirement is met. Continuity of business enterprise requires only that *P* continue one of *T'* s three significant lines of business.

Example 2. P manufactures computers and *T* manufactures components for computers. *T* sells all of its output to *P*. On January 1, 1981, *P* decides to buy imported components only. On March 1, 1981, *T* merges into *P*. *P* continues buying imported components but retains *T'* s equipment as a backup source of supply. The use of the equipment as a backup source of supply constitutes use of a significant portion of *T'* s historic business assets, thus establishing continuity of business enterprise. *P* is not required to continue *T'* s business.

Example 3. T is a manufacturer of boys' and men's trousers. On January 1, 1978, as part of a plan of reorganization, *T* sold all of its assets to a third party for cash and purchased a highly diversified portfolio of stocks and bonds. As part of the plan *T* operates an investment business until July 1, 1981. On that date, the plan of reorganization culminates in a transfer by *T* of all its assets to *P,* a regulated investment company, solely in exchange for *P* voting stock. The continuity of business enterprise requirement is not met. *T'* s investment activity is not its historic business, and the stocks and bonds are not *T'* s historic business assets.

Example 4. T manufactures children's toys and *P* distributes steel and allied products. On January 1, 1981, *T* sells all of its assets to a third party for $100,000 cash and $900,000 in notes. On March 1, 1981, *T* merges into *P*. Continuity of business enterprise is lacking. The use of the sales proceeds in *P'* s business is not sufficient.

Example 5. T manufactures farm machinery and *P* operates a lumber mill. *T* merges into *P*. *P* disposes of *T'* s assets immediately after the merger as part of the plan of reorganization. *P* does not continue *T'* s farm machinery manufacturing business. Continuity of business enterprise is lacking.

Example 6. Use of a significant portion of T's historic business assets by the qualified group. (i) *Facts.* T operates an auto parts distributorship. P owns 80 percent of the stock of a holding company (HC). HC owns 80 percent of the stock of ten subsidiaries, S–1 through S–10. S–1 through S–10 each separately operate a full service gas station. Pursuant to a plan of reorganization, T merges into P and the T shareholders receive solely P stock. As part of the plan of reorganization, P transfers T's assets to HC, which in turn transfers some of the T assets to each of the ten subsidiaries. No one subsidiary receives a significant portion of T's historic business assets. Each of the subsidiaries will use the T assets in the operation of its full service gas station. No P subsidiary will be an auto parts distributor.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(i) of this section, P is treated as conducting the ten gas station businesses of S–1 through S–10 and as holding the historic T assets used in those businesses. P is treated as holding all the assets and conducting the businesses of all of the members of the qualified group, which includes S–1 through S–10 (paragraphs (d)(4)(i) and (ii) of this section). No member of the qualified group continues T's historic distributorship business. However, subsidiaries S–1 through S–10 continue to use the historic T assets in a business. Even though no one corporation of the qualified group is using a significant portion of T's historic business assets in a business, the COBE requirement of paragraph (d)(1) of this section is satisfied because, in the aggregate, the qualified group is using a significant portion of T's historic business assets in a business.

Example 7. Continuation of the historic T business in a partnership satisfies continuity of business enterprise. (i) *Facts.* T manufactures ski boots. P owns all of the stock of S–1. S–1 owns all of the stock of S–2, and S–2 owns all of the stock of S–3. T merges into P and the T shareholders receive consideration consisting of P stock and cash. The T ski boot business is to be continued and expanded. In anticipation of this expansion, P transfers all of the T assets to S–1, S–1 transfers all of the T assets to S–2, and S–2 transfers all of the T assets to S–3. S–3 and X (an unrelated party) form a new partnership (PRS). As part of the plan of reorganization, S–3 transfers all the T assets to PRS, and S–3, in its capacity as a partner, performs active and substantial management functions for the PRS ski boot business, including making significant business decisions and regularly participating in the overall supervision, direction, and control of the employees of the ski boot business. S–3 receives a 20 percent interest in PRS. X transfers cash in exchange for an 80 percent interest in PRS.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(B)(*2*) of this section, P is treated as conducting T's historic business because S–3 performs active and substantial management functions for the ski boot business in S–3's capacity as a partner. P is treated as holding all the assets and conducting the businesses of all of the members of the qualified group, which includes S–3 (paragraphs (d)(4)(i) and (ii) of this section).

The COBE requirement of paragraph (d)(1) of this section is satisfied.

Example 8. Continuation of the historic T business in a partnership does not satisfy continuity of business enterprise. (i) *Facts.* The facts are the same as *Example 7* except that S–3 transfers the historic T business to PRS in exchange for a 1 percent interest in PRS.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(B)(*2*) of this section, P is treated as conducting T's historic business because S–3 performs active and substantial management functions for the ski boot business in S–3's capacity as a partner. The fact that a significant historic T business is conducted in PRS, and P is treated as conducting such T business under (d)(4)(iii)(B) tends to establish the requisite continuity, but is not alone sufficient (paragraph (d)(4)(iii)(C) of this section). The COBE requirement of paragraph (d)(1) of this section is not satisfied.

Example 9. Continuation of the T historic business in a partnership satisfies continuity of business enterprise. (i) *Facts.* The facts are the same as *Example 7* except that S–3 transfers the historic T business to PRS in exchange for a 33⅓ percent interest in PRS, and no member of P's qualified group performs active and substantial management functions for the ski boot business operated in PRS.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(B)(*1*) of this section, P is treated as conducting T's historic business because S–3 owns an interest in the partnership representing a significant interest in that partnership business. P is treated as holding all the assets and conducting the businesses of all of the members of the qualified group, which includes S–3 (paragraphs (d)(4)(i) and (ii) of this section). The COBE requirement of paragraph (d)(1) of this section is satisfied.

Example 10. Use of T's historic business assets in a partnership business. (i) *Facts.* T is a fabric distributor. P owns all of the stock of S–1. T merges into P and the T shareholders receive solely P stock. S–1 and X (an unrelated party) own interests in a partnership (PRS). As part of the plan of reorganization, P transfers all of the T assets to S–1, and S–1 transfers all the T assets to PRS, increasing S–1's percentage interest in PRS from 5 to 33⅓ percent. After the transfer, X owns the remaining 66⅔ percent interest in PRS. Almost all of the T assets consist of T's large inventory of fabric, which PRS uses to manufacture sportswear. All of the T assets are used in the sportswear business. No member of P's qualified group performs active and substantial management functions for the sportswear business operated in PRS.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(A) of this section, S–1 is treated as owning 33⅓ percent of the T assets used in the PRS sportswear manufacturing business. Under paragraph (d)(4)(iii)(B)(*1*) of this section, P is treated as conducting the sportswear manufacturing business because S–1 owns an interest in the partnership representing a significant interest in that partnership business. P is treated as holding all the assets and conducting the businesses of all of the members of the qualified group, which includes S–1 (paragraphs (d)(4)(i) and (ii) of this section). The COBE requirement of paragraph (d)(1) of this section is satisfied.

Example 11. Aggregation of partnership interests among members of the qualified group: use of T's historic business assets in a partnership business. (i) *Facts.* The facts are the same as *Example 10,* except that S–1 transfers all the T assets to PRS, and P and X each transfer cash to PRS in exchange for partnership interests. After the transfers, P owns 11 percent, S–1 owns 22⅓ percent, and X owns 66⅔ percent of PRS.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(B)(*1*) of this section, P is treated as conducting the sportswear manufacturing business because members of the qualified group, in the aggregate, own an interest in the partnership representing a significant interest in that business. P is treated as owning 11 percent of the assets directly, and S–1 is treated as owning 22⅓ percent of the assets, used in the PRS sportswear business (paragraph (d)(4)(iii)(A) of this section). P is treated as holding all the assets of all of the members of the qualified group, which includes S–1, and thus in the aggregate, P is treated as owning 33⅓ of the T assets (paragraphs (d)(4)(i) and (ii) of this section). The COBE requirement of paragraph (d)(1) of this section is satisfied because P is treated as using a significant portion of T's historic business assets in its sportswear manufacturing business.

Example 12. Tiered partnerships: use of T's historic business assets in a partnership business. (i) *Facts.* T owns and manages a commercial office building in state Z. Pursuant to a plan of reorganization, T merges into P, solely in exchange for P stock, which is distributed to the T shareholders. P transfers all of the T assets to a partnership, PRS–1, which owns and operates television stations nationwide. After the transfer, P owns a 50 percent interest in PRS–1. P does not have active and substantial management functions as a partner with respect to the PRS–1 business. X, not a member of P's qualified group, owns the remaining 50 percent interest in PRS–1. PRS–1, in an effort to expand its state Z television operation, enters into a joint venture with U, an unrelated party. As part of the plan of reorganization, PRS–1 transfers all the T assets and its state Z television station to PRS–2, in exchange for a 75 percent partnership interest. U contributes cash to PRS–2 in exchange for a 25 percent partnership interest and oversees the management of the state Z television operation. PRS–1 does not actively and substantially manage PRS–2's business. PRS–2's state Z operations are moved into the acquired T office building. All of the assets that P acquired from T are used in PRS–2's business.

(ii) *Continuity of business enterprise.* Under paragraph (d)(4)(iii)(A) of this section, PRS–1 is treated as owning 75 percent of the T assets used in PRS–2's business. P, in turn, is treated as owning 50 percent of PRS–1's interest the T assets. Thus, P is treated as owning 37½ percent (50 percent x 75 percent) of the T assets used in the PRS–2 business. Under paragraph (d)(4)(iii)(B)(*1*) of this section, P is treated as conducting PRS–2's business, the operation of the state Z television station, and under paragraph (d)(4)(iii)(A) of this section, P is treated as using 37½ percent of the historic T business assets in that business. The COBE requirement of paragraph (d)(1) of this section is satisfied because P is treated as using a significant portion of T's historic business assets in its television business.

(e) *Continuity of interest*—(1) *General rule.* (i) The purpose of the continuity of interest requirement is to prevent transactions that resemble sales from qualifying for nonrecognition of gain or loss available to corporate reorganizations. Continuity of interest requires that in substance a substantial part of the value of the proprietary interests in the target corporation be preserved in the reorganization. A proprietary interest in the target corporation is preserved if, in a potential reorganization, it is exchanged for a proprietary interest in the issuing corporation (as defined in paragraph (b) of this section), it is exchanged by the acquiring corporation for a direct interest in the target corporation enterprise, or it otherwise continues as a proprietary interest in the target corporation. However, a proprietary interest in the target corporation is not preserved if, in connection with the potential reorganization, it is acquired by the issuing corporation for consideration other than stock of the issuing corporation, or stock of the issuing corporation furnished in exchange for a proprietary interest in the target corporation in the potential reorganization is redeemed. All facts and circumstances must be considered in determining whether, in substance, a proprietary interest in the target corporation is preserved. For purposes of the continuity of interest requirement, a mere disposition of stock of the target corporation prior to a potential reorganization to persons not related (as defined in paragraph (e)(3) of this section determined without regard to paragraph (e)(3)(i)(A) of this section) to the target corporation or to persons not related (as defined in paragraph (e)(3) of this section) to the issuing corporation is disregarded and a mere disposition of stock of the issuing corporation received in a potential reorganization to persons not related (as defined in paragraph (e)(3) of this section) to the issuing corporation is disregarded.

(ii) [Reserved] For further guidance see § 1.368–1T(e)(1)(ii)(A) and (B).

(2) *Related person acquisitions.* (i) A proprietary interest in the target corporation is not preserved if, in connection with a potential reorganization, a person related (as defined in paragraph (e)(3) of this section) to the issuing corporation acquires, with consideration other than a proprietary interest in the issuing corporation, stock of the target corporation or stock of the issuing corporation furnished in exchange for a proprietary interest in the target corporation in the potential reorganization, except to the extent those persons who were the direct or indirect owners of the target corporation prior to the potential reorganization maintain a direct or indirect proprietary interest in the issuing corporation.

(ii) [Reserved] For further guidance see § 1.368–1T(e)(2)(ii).

(3) *Definition of related person*—(i) *In general.* For purposes of this paragraph (e), two corporations are related persons if either—

(A) The corporations are members of the same affiliated group as defined in section 1504 (determined without regard to section 1504(b)); or

(B) A purchase of the stock of one corporation by another corporation would be treated as a distribution in redemption of the stock of the first corporation under section 304(a)(2) (determined without regard to § 1.1502–80(b)).

(ii) *Special rules.* The following rules apply solely for purposes of this paragraph (e)(3):

(A) A corporation will be treated as related to another corporation if such relationship exists immediately before or immediately after the acquisition of the stock involved.

(B) A corporation, other than the target corporation or a person related (as defined in paragraph (e)(3) of this section determined without regard to paragraph (e)(3)(i)(A) of this section) to the target corporation, will be treated as related to the issuing corporation if the relationship is created in connection with the potential reorganization.

(4) *Acquisitions by partnerships.* For purposes of this paragraph (e), each partner of a partnership will be treated as owning or acquiring any stock owned or acquired, as the case may be, by the partnership in accordance with that partner's interest in the partnership. If a partner is treated as acquiring any stock by reason of the application of this paragraph (e)(4), the partner is also treated as having furnished its share of any consideration furnished by the partnership to acquire the stock in accordance with that partner's interest in the partnership.

(5) *Successors and predecessors.* For purposes of this paragraph (e), any reference to the issuing corporation or the target corporation includes a reference to any successor or predecessor of such corporation, except that the target corporation is not treated as a predecessor of the issuing corporation and the issuing corporation is not treated as a successor of the target corporation.

(6) *Examples.* For purposes of the examples in this paragraph (e)(6), P is the issuing corporation, T is the target corporation, S is a wholly owned subsidiary of P, all corporations have only one class of stock outstanding, A and B are individuals, PRS is a partnership, all reorganization requirements other than the continuity of interest requirement are satisfied, and the transaction is not otherwise subject to recharacterization. The following examples illustrate the application of this paragraph (e):

Example 1. Sale of stock to third party. (i) *Sale of issuing corporation stock after merger.* A owns all of the stock of T. T merges into P. In the merger, A receives P stock having a fair market value of $50x and cash of $50x. Immediately after the merger, and pursuant to a preexisting binding contract, A sells all of the P stock received by A in the merger to B. Assume that there are no facts and circumstances indicating that the cash used by B to purchase A's P stock was in substance exchanged by P for T stock. Under paragraphs (e)(1) and (2) of this section, the sale to B is disregarded because B is not a person related to P within the meaning of paragraph (e)(3) of this section. Thus, the transaction satisfies the continuity of interest requirement because 50 percent of A's T stock was exchanged for P stock, preserving a substantial part of the value of the proprietary interest in T.

(ii) *Sale of target corporation stock before merger.* The facts are the same as paragraph (i) of this *Example 1,* except that B buys A's T stock prior to the merger of T into P and then exchanges the T stock for P stock having a fair market value of $50x and cash of $50x. The sale by A is disregarded. The continuity of interest requirement is satisfied because B's T stock was exchanged for P stock, preserving a substantial part of the value of the proprietary interest in T.

Example 2. Relationship created in connection with potential reorganization. Corporation X owns 60 percent of the stock of P and 30 percent of the stock of T. A owns the remaining 70 percent of the stock of T. X buys A's T stock for cash in a transaction which is not a qualified stock purchase within the meaning of section 338. T then merges into P. In the merger, X exchanges all of its T stock for additional stock of P. As a result of the issuance of the additional stock to X in the merger, X's ownership interest in P increases from 60 to 80 percent of the stock of P. X is not a person related to P under paragraph (e)(3)(i)(B) of this section, because a purchase of stock of P by X would not be treated as a distribution in redemption of the stock of P under section 304(a)(2). However, X is a person related to P under paragraphs (e)(3)(i)(A) and (ii)(B) of this section, because X becomes affiliated with P in the merger. The continuity of interest requirement is not satisfied, because X acquired a proprietary interest in T for consideration other than P stock, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(2) of this section.

Example 3. Participation by issuing corporation in post-merger sale. A owns 80 percent of the T stock and none of the P stock, which is widely held. T merges into P. In the merger, A receives P stock. In addition, A obtains rights pursuant to an arrangement with P to have P register the P stock under the Securities Act of 1933, as amended. P registers A's stock, and A sells the stock shortly after the merger. No person who purchased the P stock from A is a person related to P within the meaning of paragraph (e)(3) of this section. Under paragraphs (e)(1) and (2) of this section, the sale of the P stock by A is disregarded because no person who purchased the P stock from A is a person related to P within the meaning of paragraph (e)(3) of this section. The transaction satisfies the continuity of interest requirement because A's T stock was exchanged for P stock, preserving a substantial part of the value of the proprietary interest in T.

Example 4. Redemptions and purchases by issuing corporation or related persons. (i) *Redemption by issuing corporation.* A owns 100 percent of the stock of T and none of the stock of P. T merges into S. In the merger, A receives P stock. In connection with the merger, P redeems all of the P stock received by A in the merger for cash. The continuity of interest requirement is not satisfied, because, in connection with the merger, P redeemed the stock exchanged for a proprietary interest in T, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(1) of this section.

(ii) *Purchase of target corporation stock by issuing corporation.* The facts are the same as paragraph (i) of this *Example 4,* except that, instead of P redeeming its stock, prior to and in connection with the merger of T into S, P purchases 90 percent of the T stock from A for cash. The continuity of interest requirement is not satisfied, because in connection with the merger, P acquired a proprietary interest in T for consideration other than P stock, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(1) of this section. However, see §1.338–2(c)(3) (which may change the result in this case by providing that, by virtue of section 338, continuity of interest is satisfied for certain parties after a qualified stock purchase).

(iii) *Purchase of issuing corporation stock by person related to issuing corporation.* The facts are the same as paragraph (i) of this *Example 4,* except that, instead of P redeeming its stock, S buys all of the P stock received by A in the merger for cash. S is a person related to P under paragraphs (e)(3)(i)(A) and (B) of this section. The continuity of interest requirement is not satisfied, because S acquired P stock issued in the merger, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(2) of this section.

Example 5. Redemption in substance by issuing corporation. A owns 100 percent of the stock of T and none of the stock of P. T merges into P. In the merger, A receives P stock. In connection with the merger, B buys all of the P stock received by A in the merger for cash. Shortly thereafter, in connection with the merger, P redeems the stock held by B for cash. Based on all the facts and circumstances, P in substance has exchanged solely cash for T stock in the merger. The continuity of interest requirement is not satisfied, because in substance P redeemed the stock exchanged for a proprietary interest in T, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(1) of this section.

Example 6. Purchase of issuing corporation stock through partnership. A owns 100 percent of the stock of T and none of the stock of P. S is an 85 percent partner in PRS. The other 15 percent of PRS is owned by unrelated persons. T merges into P. In the merger, A receives P stock. In connection with the merger, PRS purchases all of the P stock received by A in the merger for cash. Under paragraph (e)(4) of this section, S, as an 85 percent partner of PRS, is treated as having acquired 85 percent of the P stock exchanged for A's T stock in the merger, and as having furnished 85 percent of the cash paid by PRS to acquire the P stock. S is a person related to P under paragraphs (e)(3)(i)(A) and (B) of this section. The continuity of interest requirement is not satisfied, because S is treated as acquiring 85 percent of the P stock issued in the merger, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(2) of this section.

Example 7. Exchange by acquiring corporation for direct interest. A owns 30 percent of the stock of T. P owns 70 percent of the stock of T, which was not acquired by P in connection with the acquisition of T's assets. T merges into P. A receives cash in the merger. The continuity of interest requirement is satisfied, because P's 70 percent proprietary interest in T is exchanged by P for a direct interest in the assets of the target corporation enterprise.

Example 8. Effect of general stock repurchase program. T merges into P, a corporation whose stock is widely held and publicly traded and that has one class of common stock outstanding. In the merger, T shareholders receive common stock of P. Immediately after the merger, P repurchases a small percentage of its common stock in the open market as part of its ongoing stock repurchase program. The repurchase program was not created or modified in connection with the acquisition of T. Continuity of interest is satisfied, because based on all of the facts and circumstances, the redemption of a small percentage of the P stock does not affect the T shareholders' proprietary interest in T, because it was not in connection with the merger, and the value of the proprietary interest in T is preserved. See paragraph (e)(1) of this section.

Example 9. Maintenance of direct or indirect interest in issuing corporation. X, a corporation, owns all of the stock of each of corporations P and Z. Z owns all of the stock of T. T merges into P. Z receives P stock in the merger. Immediately thereafter and in connection with the merger, Z distributes the P stock received in the merger to X. X is a person related to P under paragraph (e)(3)(i)(A) of this section. The continuity of interest requirement is satisfied, because X was an indirect owner of T prior to the merger who maintains a direct or indirect proprietary interest in P, preserving a substantial part of the value of the proprietary interest in T. See paragraph (e)(2) of this section.

(7) *Effective date.* This paragraph (e) applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7745, 45 FR 86437, Dec. 31, 1980; T.D. 8760, 63 FR 4178, Jan. 28, 1998; T.D. 8783, 63 FR 50758, Sept. 23, 1998]

§1.368–1T Purpose and scope of exception of reorganization exchanges (temporary).

(a) through (e)(1)(i) [Reserved] For further guidance see §1.368–1(a) through (e)(1)(i).

(e)(1)(ii)(A) *General rule.* A proprietary interest in the target corporation (other than one held by the acquiring corporation) is not preserved if, prior to and in connection with a potential reorganization, it is redeemed or to the extent that, prior to and in connection with a potential reorganization, an extraordinary distribution is made with respect to it. The determination of whether a distribution with respect to stock of the target corporation is an extraordinary distribution for purposes of this paragraph (e)(1)(ii) will be made on the basis of all of the facts and circumstances, but the treatment of the distribution under section 1059 (relating to extraordinary dividends) will not be taken into account.

(B) *Exception.* Paragraph (e)(1)(ii)(A) of this section does not apply to a distribution of stock by the target corporation to which section 355(a) (or so much of section 356 as relates to section 355) applies, except to the extent that—

(*1*) The target corporation shareholders receive other property or money to which section 356(a) applies; or

(*2*) The distribution is extraordinary in amount and is a distribution of property or money to which section 356(b) applies.

(2)(i) [Reserved] For further guidance, see §1.368–1(e)(2)(i).

(ii) A proprietary interest in the target corporation is not preserved if, prior to and in connection with a potential reorganization, a person related (as defined in §1.368–1(e)(3) determined without regard to §1.368–1(e)(3)(i)(A)) to the target corporation acquires stock of the target corporation, with consideration other than stock of either the target corporation or the issuing corporation.

(e)(3) through (e)(6) *Example 9.* [Reserved] For further guidance, see §1.368–1(e)(3) through (e)(6) *Example 9.*

Example 10. (e)(6) *Acquisition of target corporation stock before merger.* (i) *Redemption by target corporation.* A owns 85 percent and B owns 15 percent of the stock of T. The fair market value of T is $100x. Neither A nor B own stock of P. Prior to and in connection with the merger of T into P, T redeems A's T stock for $85x and issues to A its promissory note in exchange for the stock. At the time of the merger T has a value of $15x, after giving effect to the redemption of its stock. In the merger, B receives solely P stock. The continuity of interest requirement is not satisfied because T redeemed A's stock, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(1)(ii)(A) of this section.

(ii) *Purchase by person related to target corporation.* The facts are the same as paragraph (i) of this *Example 10,* except that X, T's wholly owned subsidiary, acquires A's T stock prior to and in connection with the merger for cash of $85x. Under paragraph (e)(2)(ii) of this section and §1.368–1(e)(3)(i)(B), X's acquisition of A's T stock is an acquisition by a related person. The continuity of interest requirement is not satisfied, because X acquired T stock, for consideration other than P stock, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(2)(ii) of this section.

Example 11. Extraordinary distribution before merger. A owns all of the stock of T. The fair market value of T is $100x. Prior to and in connection with the merger of T into P, T pays A an extraordinary distribution of an $85x note. T merges into P, and A receives solely P stock. P assumes T's obligation on the note. The continuity of interest requirement is not satisfied, because T paid A an extraordinary distribution, and a substantial part of the value of the proprietary interest in T is not preserved. See paragraph (e)(1)(ii)(A) of this section.

(f) *Effective date.* This section applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is (subject to customary conditions) binding on January 28, 1998, and at all times thereafter.

[T.D. 8761, 63 FR 4185, Jan. 28, 1998]

§ 1.368–2 Definition of terms.

(a) The application of the term *reorganization* is to be strictly limited to the specific transactions set forth in section 368(a). The term does not embrace the mere purchase by one corporation of the properties of another corporation. The preceding sentence applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter. If the properties are transferred for cash and deferred payment obligations of the transferee evidenced by short-term notes, the transaction is a sale and not an exchange in which gain or loss is not recognized.

(b)(1) In order to qualify as a reorganization under section 368(a)(1)(A) the transaction must be a merger or consolidation effected pursuant to the corporation laws of the United States or a State or territory, or the District of Columbia.

(2) In order for the transaction to qualify under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(D), one corporation (the acquiring corporation) must acquire substantially all of the properties of another corporation (the acquired corporation) partly or entirely in exchange for stock of a corporation which is in control of the acquiring corporation (the controlling corporation), provided that (i) the transaction would have qualified under section 368(a)(1)(A) if the merger had been into the controlling corporation, and (ii) no stock of the acquiring corporation is used in the transaction. The foregoing test of whether the transaction would have qualified under section 368(a)(1)(A) if the merger had been into the controlling corporation means that the general requirements of a reorganization under section 368(a)(1)(A) (such as a business purpose, continuity of business enterprise, and continuity of interest) must be met in addition to the special requirements of section 368(a)(2)(D). Under this test, it is not relevant whether the merger into the controlling corporation could have been effected pursuant to State or Federal corporation law. The term *substantially all* has the same meaning as it has in section 368(a)(1)(C). Although no stock of the acquiring corporation can be used in the transaction, there is no prohibition (other than the continuity of interest requirement) against using other property, such as cash or securities, of either the acquiring corporation or the parent or both. In addition, the controlling corporation may assume liabilities of the acquired corporation without disqualifying the transaction under section 368(a)(2(D), and for purposes of section 357(a) the controlling corporation is considered a party to the exchange. For example, if the controlling corporation agrees to substitute its stock for stock of the acquired corporation under an outstanding employee stock option agreement, this assumption of liability will not prevent the transaction from qualifying as a reorganization under section 368(a)(2)(D) and the assumption of liability is not treated as money or other property for purposes of section 361(b). Section 368(a)(2)(D) applies whether or not the controlling corporation (or the acquiring corporation) is formed immediately before the merger, in anticipation of the merger, or after preliminary steps have been taken to merge directly into the controlling

corporation. Section 368(a)(2)(D) applies only to statutory mergers occurring after October 22, 1968.

(3) For regulations under section 368(a)(2)(E), see paragraph (j) of this section.

(c) In order to qualify as a ‘‘reorganization’’ under section 368(a)(1)(B), the acquisition by the acquiring corporation of stock of another corporation must be in exchange solely for all or a part of the voting stock of the acquiring corporation (or, in the case of transactions occurring after December 31, 1963, solely for all or a part of the voting stock of a corporation which is in control of the acquiring corporation), and the acquiring corporation must be in control of the other corporation immediately after the transaction. If, for example, Corporation X in one transaction exchanges nonvoting preferred stock or bonds in addition to all or a part of its voting stock in the acquisition of stock of Corporation Y, the transaction is not a reorganization under section 368(a)(1)(B). Nor is a transaction a reorganization described in section 368(a)(1)(B) if stock is acquired in exchange for voting stock both of the acquiring corporation and of a corporation which is in control of the acquiring corporation. The acquisition of stock of another corporation by the acquiring corporation solely for its voting stock (or solely for voting stock of a corporation which is in control of the acquiring corporation) is permitted tax-free even though the acquiring corporation already owns some of the stock of the other corporation. Such an acquisition is permitted tax-free in a single transaction or in a series of transactions taking place over a relatively short period of time such as 12 months. For example, Corporation A purchased 30 percent of the common stock of Corporation W (the only class of stock outstanding) for cash in 1939. On March 1, 1955, Corporation A offers to exchange its own voting stock for all the stock of Corporation W tendered within 6 months from the date of the offer. Within the 6-months’ period Corporation A acquires an additional 60 percent of stock of Corporation W solely for its own voting stock, so that it owns 90 percent of the stock of Corporation W. No gain or loss is recognized with respect to the exchanges of stock of Corporation A for stock of Corporation W. For this purpose, it is immaterial whether such exchanges occurred before Corporation A acquired control (80 percent) of Corporation W or after such control was acquired. If Corporation A had acquired 80 percent of the stock of Corporation W for cash in 1939, it could likewise acquire some or all of the remainder of such stock solely in exchange for its own voting stock without recognition of gain or loss.

(d) In order to qualify as a reorganization under section 368(a)(1)(C), the transaction must be one described in subparagraph (1) or (2) of this paragraph:

(1) One corporation must acquire substantially all the properties of another corporation solely in exchange for all or a part of its own voting stock, or solely in exchange for all or a part of the voting stock of a corporation which is in control of the acquiring corporation. For example, Corporation P owns all the stock of Corporation A. All the properties of Corporation W are transferred to Corporation A either solely in exchange for voting stock of Corporation P or solely in exchange for less than 80 percent of the voting stock of Corporation A. Either of such transactions constitutes a reorganization under section 368(a)(1)(C). However, if the properties of Corporation W are acquired in exchange for voting stock of both Corporation P and Corporation A, the transaction will not constitute a reorganization under section 368(a)(1)(C). In determining whether the exchange meets the requirement of ‘‘solely for voting stock’’, the assumption by the acquiring corporation of liabilities of the transferor corporation, or the fact that property acquired from the transferor corporation is subject to a liability, shall be disregarded. Though such an assumption does not prevent an exchange from being solely for voting stock for the purposes of the definition of a reorganization contained in section 368(a)(1)(C), it may in some cases, however, so alter the character of the transaction as to place the transaction outside the purposes and assumptions of the reorganization provisions. Section 368(a)(1)(C) does not

prevent consideration of the effect of an assumption of liabilities on the general character of the transaction but merely provides that the requirement that the exchange be solely for voting stock is satisfied if the only additional consideration is an assumption of liabilities.

(2) One corporation:

(i) Must acquire substantially all of the properties of another corporation in such manner that the acquisition would qualify under (1) above, but for the fact that the acquiring corporation exchanges money, or other property in addition to such voting stock, and

(ii) Must acquire solely for voting stock (either of the acquiring corporation or of a corporation which is in control of the acquiring corporation) properties of the other corporation having a fair market value which is at least 80 percent of the fair market value of all the properties of the other corporation.

(3) For the purposes of subparagraph (2)(ii) only, a liability assumed or to which the properties are subject is considered money paid for the properties. For example, Corporation A has properties with a fair market value of $100,000 and liabilities of $10,000. In exchange for these properties, Corporation Y transfers its own voting stock, assumes the $10,000 liabilities, and pays $8,000 in cash. The transaction is a reorganization even though a part of the properties of Corporation A is acquired for cash. On the other hand, if the properties of Corporation A worth $100,000, were subject to $50,000 in liabilities, an acquisition of all the properties, subject to the liabilities, for any consideration other than solely voting stock would not qualify as a reorganization under this section since the liabilities alone are in excess of 20 percent of the fair market value of the properties. If the transaction would qualify under either subparagraph (1) or (2) of this paragraph and also under section 368(a)(1)(D), such transaction shall not be treated as a reorganization under section 368 (a)(1)(C).

(e) A ‘‘recapitalization’’, and therefore a reorganization, takes place if, for example:

(1) A corporation with $200,000 par value of bonds outstanding, instead of paying them off in cash, discharges them by issuing preferred shares to the bondholders;

(2) There is surrendered to a corporation for cancellation 25 percent of its preferred stock in exchange for no par value common stock;

(3) A corporation issues preferred stock, previously authorized but unissued, for outstanding common stock;

(4) An exchange is made of a corporation’s outstanding preferred stock, having certain priorities with reference to the amount and time of payment of dividends and the distribution of the corporate assets upon liquidation, for a new issue of such corporation’s common stock having no such rights;

(5) An exchange is made of an amount of a corporation’s outstanding preferred stock with dividends in arrears for other stock of the corporation. However, if pursuant to such an exchange there is an increase in the proportionate interest of the preferred shareholders in the assets or earnings and profits of the corporation, then under § 1.305–7(c)(2), an amount equal to the lesser of (i) the amount by which the fair market value or liquidation preference, whichever is greater, of the stock received in the exchange (determined immediately following the recapitalization) exceeds the issue price of the preferred stock surrendered, or (ii) the amount of the dividends in arrears, shall be treated under section 305(c) as a deemed distribution to which sections 305(b)(4) and 301 apply.

(f) The term *a party to a reorganization* includes a corporation resulting from a reorganization, and both corporations, in a transaction qualifying as a reorganization where one corporation acquires stock or properties of another corporation. If a transaction otherwise qualifies as a reorganization, a corporation remains a party to the reorganization even though stock or assets acquired in the reorganization are transferred in a transaction described in paragraph (k) of this section. If a transaction otherwise qualifies as a reorganization, a corporation shall not cease to be a party to the reorganization solely by reason of the fact that part or all of the assets acquired in the reorganization are transferred to a partnership in which the transferor is a partner if the continuity of business enterprise requirement is satisfied. See §1.368–1(d). The preceding three sentences apply to transactions occurring after January 28, 1998, except that they do not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter. A corporation controlling an acquiring corporation is a party to the reorganization when the stock of such controlling corporation is used in the acquisition of properties. Both corporations are parties to the reorganization if, under statutory authority, Corporation A is merged into Corporation B. All three of the corporations are parties to the reorganization if, pursuant to statutory authority, Corporation C and Corporation D are consolidated into Corporation E. Both corporations are parties to the reorganization if Corporation F transfers substantially all its assets to Corporation G in exchange for all or a part of the voting stock of Corporation G. All three corporations are parties to the reorganization if Corporation H transfers substantially all its assets to Corporation K in exchange for all or a part of the voting stock of Corporation L, which is in control of Corporation K. Both corporations are parties to the reorganization if Corporation M transfers all or part of its assets to Corporation N in exchange for all or a part of the stock and securities of Corporation N, but only if (1) immediately after such transfer, Corporation M, or one or more of its shareholders (including persons who were shareholders immediately before such transfer), or any combination thereof, is in control of Corporation N, and (2) in pursuance of the plan, the stock and securities of Corporation N are transferred or distributed by Corporation M in a transaction in which gain or loss is not recognized under section 354 or 355, or is recognized only to the extent provided in section 356. Both Corporation O and Corporation P, but not Corporation S, are parties to the reorganization if Corporation O acquires stock of Corporation P from Corporation S in exchange solely for a part of the voting stock of Corporation O, if (1) the stock of Corporation P does not constitute substantially all of the assets of Corporation S, (2) Corporation S is not in control of Corporation O immediately after the acquisition, and (3) Corporation O is in control of Corporation P immediately after the acquisition.

(g) The term *plan of reorganization* has reference to a consummated transaction specifically defined as a reorganization under section 368(a). The term is not to be construed as broadening the definition of *reorganization* as set forth in section 368(a), but is to be taken as limiting the nonrecognition of gain or loss to such exchanges or distributions as are directly a part of the transaction specifically described as a reorganization in section 368(a). Moreover, the transaction, or series of transactions, embraced in a plan of reorganization must not only come within the specific language of section 368(a), but the readjustments involved in the exchanges or distributions effected in the consummation thereof must be undertaken for reasons germane to the continuance of the business of a corporation a party to the reorganization. Section 368(a) contemplates genuine corporate reorganizations which are designed to effect a readjustment of continuing interests under modified corporate forms.

(h) As used in section 368, as well as in other provisions of the Internal Revenue Code, if the context so requires, the conjunction ‘‘or’’ denotes both the conjunctive and the disjunctive, and the singular includes the plural. For example, the provisions of the statute are complied with if ‘‘stock and securities’’ are received in exchange as well as if ‘‘stock or securities’’ are received.

(i) [Reserved]

(j)(1) This paragraph (j) prescribes rules relating to the application of section 368 (a)(2)(E).

(2) Section 368(a)(2)(E) does not apply to a consolidation.

(3) A transaction otherwise qualifying under section 368(a)(1)(A) is not disqualified by reason of the fact that stock of a corporation (the controlling corporation) which before the merger was in control of the merged corporation is used in the transaction, if the conditions of section 368(a)(2)(E) are satisfied. Those conditions are as follows:

(i) In the transaction, shareholders of the surviving corporation must surrender stock in exchange for voting stock of the controlling corporation. Further, the stock so surrendered must constitute control of the surviving corporation. Control is defined in section 368(c). The amount of stock constituting control is measured immediately before the transaction. For purposes of this subdivision (i), stock in the surviving corporation which is surrendered in the transaction (by any shareholder except the controlling corporation) in exchange for consideration furnished by the surviving corporation (and not by the controlling corporation of the merged corporation) is considered not to be outstanding immediately before the transaction. For effect on ''substantially all'' test of consideration furnished by the surviving corporation, see paragraph (j)(3)(iii) of this section.

(ii) Except as provided in paragraph (k)(2) of this section, the controlling corporation must control the surviving corporation immediately after the transaction.

(iii) After the transaction, except as provided in paragraph (k)(2) of this section, the surviving corporation must hold substantially all of its own properties and substantially all of the properties of the merged corporation (other than stock of the controlling corporation distributed in the transaction). The term *substantially all* has the same meaning as in section 368(a)(1)(C). The ''substantially all'' test applies separately to the merged corporation and to the surviving corporation. In applying the ''substantially all'' test to the surviving corporation, consideration furnished in the transaction by the surviving corporation in exchange for its stock is property of the surviving corporation which it does not hold after the transaction. In applying the ''substantially all'' test to the merged corporation, assets transferred from the controlling corporation to the merged corporation in pursuance of the plan of reorganization are not taken into account. Thus, for example, money transferred from the controlling corporation to the merged corporation to be used for the following purposes is not taken into account for purposes of the ''substantially all'' test:

(A) To pay additional consideration to shareholders of the surviving corporation;

(B) To pay dissenting shareholders of the surviving corporation;

(C) To pay creditors of the surviving corporation;

(D) To pay reorganization expenses; or

(E) To enable the merged corporation to satisfy state minimum capitalization requirements (where the money is returned to the controlling corporation as part of the transaction).

(iv) Paragraphs (j)(3)(ii) and (iii) of this section apply to transactions occurring after January 28, 1998, except that they do not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter.

(4) The controlling corporation may assume liabilities of the surviving corporation without disqualifying the transaction under section 368(a)(2)(E). An assumption of liabilities of the surviving corporation by the controlling corporation is a contribution to capital by the controlling corporation to the surviving corporation. If, in pursuance of the plan of reorganization, securities of the surviving corporation are exchanged for securities of the controlling corporation, or for other securities of the surviving corporation, see sections 354 and 356.

(5) In applying section 368(a)(2)(E), it makes no difference if the merged corporation is an existing corporation, or is formed immediately before the merger, in anticipation of the merger, or after preliminary steps have been taken to otherwise acquire control of the surviving corporation.

(6) The following examples illustrate the application of this paragraph (j). In each of the examples, Corporation P owns all of the stock of Corporation S and, except as otherwise stated, Corporation T has outstanding 1,000 shares of common stock and no shares of any other class. In each of the examples, it is also assumed that the transaction qualifies under section 368(a)(1)(A) if the conditions of section 368(a)(2)(E) are satisfied.

Example 1. P owns no T stock. On January 1, 1981, S merges into T. In the merger, T's shareholders surrender 950 shares of common stock in exchange for P voting stock. The holders of the other 50 shares (who dissent from the merger) are paid in cash with funds supplied by P. After the transaction, T holds all of its own assets and all of S's assets. Based on these facts, the transaction qualifies under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(E). In the transaction, former shareholders of T surrender, in exchange for P voting stock, an amount of T stock (950/1,000 shares or 95 percent) which constitutes control of T.

Example 2. The facts are the same as in *Example (1)* except that holders of 100 shares in corporation T, who dissented from the merger, are paid in cash with funds supplied by T (and not by P or S) and in the merger, T's remaining shareholders surrender 720 shares of common stock in exchange for P voting stock and 180 shares of common stock for cash supplied by P. The requirements of section 368(a)(2)(E)(ii) are satisfied since, in the transaction, former shareholders of T surrender, in exchange for P voting stock, an amount of T stock (720/900 shares or 80 percent) which constitutes control of T. The T stock surrendered in exchange for consideration furnished by T is not considered outstanding for purposes of determining whether the amount of T stock surrendered by T shareholders for P stock constitutes control of T.

Example 3. T has outstanding 1,000 shares of common stock, 100 shares of nonvoting preferred stock, and no shares of any other class. On January 1, 1981, S merges into T. Prior to the merger, as part of the transaction, T distributes its own cash in redemption of the 100 shares of preferred stock. In the transaction, T's remaining shareholders surrender their 1,000 shares of common stock in exchange for P voting stock. The requirements of section 368(a)(2)(E)(ii) are satisfied since, in the transaction, former shareholders of T surrender, in exchange for P voting stock, an amount of T stock (1,000/1,000 shares or 100 percent) which constitutes control of T. The preferred stock surrendered in exchange for consideration furnished by T is not considered outstanding for purposes of determining whether the amount of T stock surrendered by T shareholders for P stock constitutes control of T. However, the consideration furnished by T for its stock is property of T which T does not hold after the transaction for purposes of the substantially all test in paragraph (j)(3)(iii) of this section.

Example 4. On January 1, 1971, P purchased 201 shares of T's stock. On January 1, 1981, S merges into T. In the merger, T's shareholders (other than P) surrender 799 shares of T stock in exchange for P voting stock. Based on these facts, in the transaction, former shareholders of T do not surrender, in exchange for P voting stock, an amount of T stock which constitutes control of T (799/1,000 shares being less than 80 percent). Therefore, the transaction does not qualify under section 368(a)(1)(A). However, if S is a transitory corporation, formed solely for purposes of effectuating the transaction, the transaction may qualify as a reorganization described in section 368(a)(1)(B) provided all of the applicable requirements are satisfied.

Example 5. On January 1, 1971, P purchased 200 shares of T's stock. On January 1, 1981, S merges into T. Prior to the merger, as part of the transaction, T distributes its own cash in redemption of 1 share of T stock from a T shareholder other than P. In the merger, T's remaining shareholders (other than P) surrender 799 shares of T stock in exchange for P voting stock. Based on these facts, in the transaction, former shareholders of T do not surrender, in exchange for P voting stock, an amount of T stock which constitutes control of T (799/999 shares being less than 80 percent). Therefore, the transaction does not qualify under section 368(a)(1)(A). However, if S is a transitory corporation, formed for purposes of effectuating the transaction, the transaction may qualify as a reorganization described in section 368(a)(1)(B) provided all of the applicable requirements are satisfied.

Example 6. The stock of S has a value of $25,000. The stock of T has a value of $75,000. On January 1, 1984, S merges into T. In the merger, T's shareholders surrender all of their T stock in exchange for P voting stock. After the transaction, T holds all of its own assets and all of S's assets. Based on these facts, the transaction qualifies under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(E). In the transaction, former shareholders of T surrender, in exchange for P voting stock, an amount of T stock (1,000/1,000 shares or 100 percent) which constitutes control of T. The stock of T received by P in exchange for P's prior interest in S is not taken into account for purposes of section 368(a)(2)(E)(ii) since the amount of T stock constituting control of T is measured before the transaction.

Example 7. The stock of T has a value of $75,000. On January 1, 1984, S merges into T. In the merger, T's shareholders surrender all of their T stock in exchange for P voting stock. As part of the transaction, P contributes $25,000 to T in exchange for new shares of T stock. None of the cash received by T is distributed or otherwise paid out to former T shareholders. After the transaction, T holds all of its own assets and all of S's assets. Based on these facts, the transaction qualifies under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(E). In the transaction, former shareholders of T surrender, in exchange for P voting stock, an amount of T stock (1,000/1,000 shares or 100 percent) which constitutes control of T. The T stock received by P in exchange for its contribution to T is not taken into account for purposes of section 368(a)(2)(E)(ii) since the amount of T stock constituting control of T is measured before the transaction.

Example 8. The facts are the same as in *Example (7)* except that, as part of the transaction, corporation R, instead of P, contributes $25,000 to T in exchange for T stock. Based on these facts, the transaction does not qualify under section 368(a)(1)(A) by reason of section 368(a)(2)(E) since P does not control T immediately after the transaction.

Example 9. T stock has a value of $75,000. P owns 500 shares (½) of that stock with a value of $37,500. The stock of S has a value of $125,000. On January 1, 1984, S merges into T. In the merger, T's shareholders (other than P) surrender their T stock in exchange for P voting stock. Based on these facts, in the transaction, former shareholders of T do not surrender, in exchange for P voting stock, an amount of T stock which constitutes control of T (500/1,000 shares being less than 80 percent). Therefore, the transaction does not qualify under section 368(a)(1)(A). The stock of T received by P in exchange for P's prior interest in S does not contribute to satisfaction of the requirement of section 368(a)(2)(E)(ii).

(k) *Transfer of assets or stock in section 368(a)(1)(A), (B), (C), or (G) reorganizations*—(1) *General rule for transfers to controlled corporations.* Except as otherwise provided in this section, a transaction otherwise qualifying under section 368(a)(1)(A), (B), (C), or (G) (where the requirements of sections 354(b)(1)(A) and (B) are met) shall not be disqualified by reason of the fact that part or all of the acquired assets or stock acquired in the transaction are transferred or successively transferred to one or more corporations controlled in each transfer by the transferor corporation. Control is defined under section 368(c).

(2) *Transfers following a reverse triangular merger.* A transaction qualifying under section 368(a)(1)(A) by reason of the application of section 368(a)(2)(E) is not disqualified by reason of the fact that part or all of the stock of the surviving corporation is transferred or successively transferred to one or more corporations controlled in each transfer by the transferor corporation, or because part or all of the assets of the surviving corporation or the merged corporation are transferred or successively transferred to one or more corporations controlled in each transfer by the transferor corporation.

(3) *Examples.* The following examples illustrate the application of this paragraph (k). P is the issuing corporation and T is the target corporation. P has only one class of stock outstanding. The examples are as follows:

Example 1. Transfers of acquired assets to controlled corporations. (i) *Facts.* T operates a bakery which supplies delectable pastries and cookies to local retail stores. The acquiring corporate group produces a variety of baked goods for nationwide distribution. P owns 80 percent of the stock of S–1. Pursuant to a plan of reorganization, T transfers all of its assets to S–1 solely in exchange for P stock, which T distributes to its shareholders. S–1 owns 80 percent of the stock of S–2; S–2 owns 80 percent of the stock of S–3, which also makes and supplies pastries and cookies. Pursuant to the plan of reorganization, S–1 transfers the T assets to S–2; S–2 transfers the T assets to S–3.

(ii) *Analysis.* Under this paragraph (k), the transaction, otherwise qualifying as a reorganization under section 368(a)(1)(C), is not disqualified by reason of the fact of the successive transfers of all of the acquired assets from S–1 to S–2, and from S–2 to S–3 because in each transfer, the transferee corporation is controlled by the transferor corporation. Control is defined under section 368(c).

Example 2. Transfers of acquired stock to controlled corporations. (i) *Facts.* The facts are the same as Example 1 except that S–1 acquires all of the T stock rather than the T assets, and as part of the plan of reorganization, S–1 transfers all of the T stock to S–2, and S–2 transfers all of the T stock to S–3.

(ii) *Analysis.* Under this paragraph (k), the transaction, otherwise qualifying as a reorganization under section 368(a)(1)(B), is not disqualified by reason of the fact of the successive transfers of all of the acquired stock from S–1 to S–2, and from S–2 to S–3 because in each transfer, the transferee corporation is controlled by the transferor corporation.

Example 3. Transfers of acquired stock to partnerships. (i) *Facts.* The facts are the same as in Example 2. However, as part of the plan of reorganization, S–2 and S–3 form a new partnership, PRS. Immediately thereafter, S–3 transfers all of the T stock to PRS in exchange for an 80 percent partnership interest, and S–2 transfers cash to PRS in exchange for a 20 percent partnership interest.

(ii) *Analysis.* This paragraph (k) describes the successive transfer of the T stock to S–3, but does not describe S–3's transfer of the T stock to PRS. Therefore, the characterization of this transaction must be determined under the relevant provisions of law, including the step transaction doctrine. See § 1.368–

1(a). The transaction fails to meet the control requirement of a reorganization described in section 368(a)(1)(B) because immediately after the acquisition of the T stock, the acquiring corporation does not have control of T.

(4) This paragraph (k) applies to transactions occurring after January 28, 1998, except that it does not apply to any transaction occurring pursuant to a written agreement which is binding on January 28, 1998, and at all times thereafter.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7281, 38 FR 18540, July 12, 1973; T.D. 7422, 41 FR 26570, June 28, 1976; T.D. 8059, 50 FR 42689, Oct. 22, 1985; 51 FR 6400, Feb. 24, 1986; T.D. 8760, 63 FR 4182, Jan. 28, 1998]

§1.368–3 Records to be kept and information to be filed with returns.

(a) The plan of reorganization must be adopted by each of the corporations parties thereto; and the adoption must be shown by the acts of its duly constituted responsible officers, and appear upon the official records of the corporation. Each corporation, a party to a reorganization, shall file as a part of its return for its taxable year within which the reorganization occurred a complete statement of all facts pertinent to the nonrecognition of gain or loss in connection with the reorganization, including:

(1) A copy of the plan of reorganization, together with a statement, executed under the penalties of perjury, showing in full the purposes thereof and in detail all transactions incident to, or pursuant to, the plan.

(2) A complete statement of the cost or other basis of all property, including all stock or securities, transferred incident to the plan.

(3) A statement of the amount of stock or securities and other property or money received from the exchange, including a statement of all distributions or other disposition made thereof. The amount of each kind of stock or securities and other property received shall be stated on the basis of the fair market value thereof at the date of the exchange.

(4) A statement of the amount and nature of any liabilities assumed upon the exchange, and the amount and nature of any liabilities to which any of the property acquired in the exchange is subject.

(b) Every taxpayer, other than a corporation a party to the reorganization, who receives stock or securities and other property or money upon a tax-free exchange in connection with a corporate reorganization shall incorporate in his income tax return for the taxable year in which the exchange takes place a complete statement of all facts pertinent to the nonrecognition of gain or loss upon such exchange including:

(1) A statement of the cost or other basis of the stock or securities transferred in the exchange, and

(2) A statement in full of the amount of stock or securities and other property or money received from the exchange, including any liabilities assumed upon the exchange, and any liabilities to which property received is subject. The amount of each kind of stock or securities and other property (other than liabilities assumed upon the exchange) received shall be set forth upon the basis of the fair market value thereof at the date of the exchange.

(c) Permanent records in substantial form shall be kept by every taxpayer who participates in a tax-free exchange in connection with a corporate reorganization showing the cost or other basis of the transferred property and the amount of stock or securities and other property or money received (including any liabilities assumed on the exchange, or any liabilities to which any of the properties received were subject), in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received from the exchange.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6622, 27 FR 11918, Dec. 4, 1962]

INSOLVENCY REORGANIZATIONS

§1.371–1 Exchanges by corporations.

(a) *Exchange solely for stock or securities.* (1) Section 371(a)(1) provides for the nonrecognition of gain or loss by a corporation upon certain exchanges made in connection with the reorganization of an insolvent corporation.

The section does not apply to a railroad corporation as defined in section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)). In order to qualify as a section 371(a) reorganization, the transaction must satisfy the express statutory requirements as well as the underlying assumptions and purposes for which the exchange is excepted from the general rule requiring the recognition of gain or loss upon the exchange of property.

(2) Section 371(a)(1) applies only with respect to a reorganization effected in one of two specified types of court proceedings: (i) Receivership, foreclosure, or similar proceedings, or (ii) corporate reorganization proceedings under chapter X of the Bankruptcy Act (11 U.S.C. 10). The specific statutory requirements are the transfer of property of a corporation, in pursuance of an order of the court having jurisdiction of the corporation in such proceeding, to another corporation organized or made use of to effectuate a plan of reorganization approved by the court in such proceeding, in exchange solely for stock or securities in such other corporation. If the consideration for the transfer consists of other property or money as well as stock and securities, see section 371(a)(2) and (c). As to the assumption of liabilities in an exchange described in section 371(a), see section 371(d).

(3) The application of section 371(a)(1) is to be strictly limited to a transaction of the character set forth in such section. Hence, the section is inapplicable unless there is a bona fide plan of reorganization approved by the court having jurisdiction of the proceeding and the transfer of the property of the insolvent corporation is made pursuant to such plan. It is unnecessary that the transfer be a direct transfer from the insolvent corporation; it is sufficient if the transfer is an integral step in the consummation of the reorganization plan approved by the court. By its terms, the section has no application to a reorganization consummated by adjustment of the capital or debt structure of the insolvent corporation without the transfer of its assets to another corporation.

(4) As used in section 371(a)(1), the term *reorganization* is not controlled by the definition of *reorganization* contained in section 368. However, certain basic requirements, implicit in the statute, which are essential to a reorganization under section 368, are likewise essential to qualify a transaction as a reorganization under section 371(a)(1). Among these requirements are a continuity of the business enterprise under the modified corporate form and a continuity of interest therein on the part of those persons who were the owners of the enterprise prior to the reorganization. Thus, the nonrecognition accorded by section 371(a)(1) applies only to a genuine reorganization as distinguished from a liquidation and sale of property to either new or old interests supplying new capital and discharging the obligations of the old corporation. For the purpose of determining whether the requisite continuity of interest exists, the interest of creditors who have, by appropriate legal steps, obtained effective command of the property of an insolvent corporation is considered as the equivalent of a proprietary interest. But the mere possibility of a proprietary interest is not its equivalent. In general, any transaction will be subject to nonrecognition of gain or loss as prescribed by section 371(a)(1) where the property is transferred to a corporation and the stock and securities of such corporation are transferred to persons who were shareholders or creditors of the transferor corporation as if such stock or securities had been transferred to such persons as shareholders pursuant to the nonrecognition provisions of part III, subchapter C, chapter 1 of the Code. The determinative and controlling factors are the corporation's insolvency and the effective command by the creditors over its property. The term *insolvent* as used herein refers to insolvency at any time during the course of the proceeding referred to in section 371(a)(1), either in the sense of excess of liabilities over assets or in the sense of inability to meet obligations as they mature.

(5) A short-term purchase money note is not a security within the meaning of this section, and the transfer of the properties of the insolvent corporation for cash and deferred payment obligations of the transferee evidenced by

short-term notes is a sale and not an exchange.

(b) *Exchange for stock or securities and other property or money.* If an exchange would be within the provisions of section 371(a)(1) if it were not for the fact that the consideration for the transfer of the property of the insolvent corporation consists not only of stock or securities but also of other property or money, then, as provided in section 371(a)(2), if the other property or money received by the corporation is distributed by it pursuant to the plan of reorganization, no gain to the corporation will be recognized. Property is distributed within the meaning of this section if it is paid over or distributed to shareholders or creditors who have by appropriate legal steps obtained effective command of the property of the corporation. If the other property or money received by the corporation is not distributed by it pursuant to the plan of reorganization, the gain, if any, to the corporation from the exchange will be recognized in an amount not in excess of the sum of money and the fair market value of the other property so received which is not distributed. In either case no loss from the exchange will be recognized (see section 371(c)).

(c) *Records to be kept and information to be filed.* (1) Each corporation a party to a section 371(a) reorganization shall furnish a complete statement of all facts pertinent to the nonrecognition of gain or loss in connection with the exchange, including:

(i) A certified copy of the plan of reorganization approved by the court in the proceeding, together with a statement showing in full the purposes thereof and in detail all transactions incident, or pursuant, to the plan;

(ii) A complete statement of the cost or other basis of all property, including all stock or securities, transferred incident to the plan;

(iii) A statement of the amount of stock or securities and other property or money received in the exchange, including a statement of all distributions or other disposition made thereof. The amount of each kind of stock or securities or other property shall be stated on the basis of the fair market value thereof at the date of the exchange;

(iv) A statement of the amount and nature of any liabilities assumed upon the exchange.

The information required by this section shall be filed as a part of the corporation's return for its taxable year within which the reorganization occurred.

(2) Permanent records in substantial form must be kept by every taxpayer who participates in a tax-free exchange in connection with a corporate reorganization showing the cost or other basis of the transferred property and the amount of stock or securities and other property or money received (including any liabilities assumed upon the exchange), in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received from th securities and other property or money received (including any liabilities assumed upon the exchange), in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received from the exchange.

§1.371–2 Exchanges by security holders.

(a) *In general.* (1) Section 371(b) prescribes the rules relative to the recognition of gain or loss upon certain exchanges made by the holders of stock or securities of an insolvent corporation in connection with a reorganization described in section 371(a). Under section 371(b)(1), no gain or loss shall be recognized if, pursuant to the plan of reorganization, stock or securities in the insolvent corporation are exchanged solely for stock or securities in the corporation organized or made use of to effectuate such plan. If, in addition to such stock or securities, other property or money is received upon such exchange, gain is recognized to the extent of such other property or money (section 371(b)(2)), but no loss is recognized (section 371(c)). As to the basis of the stock or securities or other property acquired upon an exchange under section 371(b), see section 358.

(2) By thus characterizing as an exchange, and regarding as a single taxable event, the event or series of events

resulting in the relinquishment or extinguishment of the stock or securities in the old corporation and the acquisition in consideration thereof, in whole or in part, of stock or securities in the new corporation, the Code secures uniformity of treatment for the participating security holders, regardless of the particular steps or the procedural devices by which such exchange is effected. Thus, the transaction which qualified as a reorganization under section 371(a) may take one of several forms. In a typical creditors' reorganization there may be a transfer of the property of the old corporation to its bondholders, or the bondholders' committee, upon surrender of the bonds, followed by the transfer of such property to the new corporation in consideration of stock in the latter; or there may be a transfer of the bonds to the new corporation in exchange for its stocks or securities, followed by the transfer of the property of the old corporation in consideration of the surrender of its bonds. In either event, section 371(b) treats the result to the participating security holders as an exchange of the securities of the old corporation for securities of the new corporation. In order, however, to qualify as an exchange under section 371(b) the various events resulting in the relinquishment or extinguishment of the old securities and the acquisition of the new securities must be embraced within the plan of reorganization and must be undertaken for reasons germane to the plan. If the event, or series of events, qualifies as an exchange under section 371(b), no antecedent event necessarily a component of the relinquishment or extinguishment of the securities of the old corporation in consideration of the acquisition of the securities of the new corporation shall be considered a transaction or event having consequences for income tax purposes.

(b) *Exchange solely for stock or securities.* Section 371(b)(1) provides that no gain or loss shall be recognized upon an exchange consisting of the relinquishment or extinguishment of stock or securities in an insolvent corporation described in section 371(a), in consideration of the acquisition solely of stock or securities in a corporation organized or made use of to effectuate the plan of reorganization. As used in this section, the term security does not include a short-term note.

(c) *Exchanges for stock or securities and other property or money.* If an exchange would be within section 371(b)(1) if it were not for the fact that the property received in the exchange consists not only of stock or securities in the corporation organized or made use of to effectuate the plan of reorganization, but also of other property or money, then

(1) As provided in section 371(b)(2), the gain, if any, to the taxpayer will be recognized in an amount not in excess of the sum of money and the fair market value of the other property. The gain so recognized shall be treated as capital gain.

(2) The loss, if any, to the taxpayer from such an exchange is not to be recognized to any extent (see section 371(c)).

(d) *Records to be kept and information to be filed.* (1) Every taxpayer who receives stock or securities and other property or money upon an exchange described in section 371(b) in connection with a corporate reorganization, must furnish a complete statement of all facts pertinent to the recognition or nonrecognition of gain or loss upon such exchange, including—

(i) A statement of the cost or other basis of the stock or securities transferred in the exchange, and

(ii) A statement in full of the amount of stock or securities and other property or money received from the exchange, including any liability assumed upon the exchange. The amount of each kind of stock or securities and other property (other than liabilities assumed upon the exchange) received shall be set forth upon the basis of the fair market value thereof at the date of the exchange. The statement shall be incorporated in the taxpayer's income tax return for the taxable year in which the exchange occurs.

(2) Permanent records in substantial form shall be kept by every taxpayer who participates in an exchange described in section 371(b), showing the cost or other basis of the transferred property and the amount of stock or securities and other property or money

received (including any liabilities assumed upon the exchange), in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received from the exchange.

§1.372–1 Corporations.

(a) If, as the result of a transaction described in section 371, so much of section 371(c) as relates to section 371(a), or the corresponding provisions of prior law, the property of an insolvent corporation is transferred, in pursuance of a plan of reorganization, to a corporation organized or made use of to effectuate such plan, the basis of such property in the hands of the acquiring corporation is the same as it would be in the hands of the insolvent corporation, increased in the amount of gain recognized upon such transfer under the law applicable to the year in which the transfer was made. In any such case, the adjustments to basis provided by section 270 of the Bankruptcy Act (11 U.S.C. 670), or section 1017 of the Code, shall not be made in respect of any indebtedness cancelled pursuant to the plan of reorganization under which the transfer was made. If the transaction falls within the provisions of section 372(a), the basis of the property involved shall be determined pursuant to such provisions, notwithstanding that the transaction might otherwise fall within another basis provision.

(b) The provisions of section 372(a) are applicable in the determination of basis for all taxable years beginning after December 31, 1933, except that the basis so determined shall not be given effect in the determination of the tax liability for any taxable year beginning prior to January 1, 1943. With the exception indicated, the basis so prescribed is applicable from the date of acquisition of such property. For example, the provisions of section 1016 relating to adjusted basis shall be applied as if section 372(a) were a part of the Internal Revenue Code of 1939 and prior internal revenue laws applicable to all taxable years beginning after December 31, 1933. Hence, in determining the amount of the adjustments for depreciation, depletion, etc., under the provisions of section 1016(a)(2), the *amount allowable* is the amount computed with reference to the basis provided in section 372(a).

(c) The effect of the application of section 372(a) may be illustrated by the following examples:

Example (1). On January 1, 1935, the Y Corporation, a taxpayer making its returns on the calendar year basis, acquired depreciable property from the X Corporation as the result of a transaction described in section 372(a). On January 1, 1935, the property had, in the hands of the X Corporation, a basis of $200,000, an adjusted basis of $150,000, a fair market value as of January 1, 1935 of $80,000, and an estimated remaining life of 20 years. The 1935 transaction was treated as a taxable exchange and, accordingly, the Y Corporation claimed and was allowed depreciation in the amount of $4,000 for each of the eight taxable years 1935 through 1942, inclusive. For each of the twelve taxable years 1943 through 1954, inclusive, the Y Corporation claimed and was allowed depreciation in the amount of $7,500. On December 31, 1954, the property was sold for $10,000 cash. The amount of the gain realized upon the sale is computed as follows:

Basis to X Corporation		$200,000
Adjustment for depreciation in the hands of X Corporation (sec. 1016)		50,000
Adjusted basis for depreciation in the hands of both X and Y Corporations (sec. 372(b))		150,000
Deduct:		
Depreciation allowable in amount of $7,500 per year (1⁄20 of $150,000) for 8 years, from Jan. 1, 1935, through Dec. 31, 1942	$60,000	
Depreciation allowable Jan. 1, 1943, to Dec. 31, 1954 (12 years at $7,500)	90,000	
		150,000
Adjusted basis for computing gain or loss		0
Sale price		10,000
Gain realized		10,000

For the taxable year 1943 and succeeding taxable years, the Y Corporation is entitled to deductions for depreciation in respect of such property in the amounts of $7,500 in the determination of its tax liabilities for such years. But no change in the tax liability is authorized for preceding taxable years by reason of the difference between the $7,500 depreciation allowable and the $4,000 deduction previously allowed.

Example (2). Assume the same facts as in *Example (1)*, except that the property acquired by the Y Corporation had a fair market value as of January 1, 1935, of $180,000, instead of $80,000, and the Y Corporation claimed and was allowed depreciation in the amount of $9,000 for each of the eight taxable years 1935 to 1942, inclusive, and in the amount of $6,500 for the taxable years 1943 to 1954, inclusive. In such case, the amount of the gain realized upon the sale of the property would be computed as follows:

Adjusted basis for depreciation in the hands of Y Corporation as computed in *Example (1)* ..		$150,000
Deduct:		
Depreciation allowed in the amount of $9,000 per year for 8 years Jan. 1, 1935 to Dec. 31, 1942	$72,000	
Depreciation allowable Jan. 1, 1943, to Dec. 31, 1954, inclusive (12 times $6,500)	78,000	
		150,000
Adjusted basis for computing gain or loss		0
Sale price		$10,000
Gain realized		10,000

No change in the tax liability is authorized for taxable years preceding 1943 by reason of the difference between the $7,500 depreciation allowable and the $9,000 deduction previously allowed.

§ 1.374–1 Exchanges by insolvent railroad corporations.

(a) *Exchange solely for stock or securities.* (1) Section 374(a)(1) provides for the nonrecognition of gain or loss by an insolvent railroad corporation upon certain exchanges made in connection with the reorganization of the corporation. In order to qualify as a section 374(a) reorganization, the transaction must satisfy the express statutory requirements as well as the underlying assumptions and purposes for which the exchange is excepted from the general rule requiring the recognition of gain or loss upon the exchange of property.

(2) Section 374(a)(1) applies only with respect to a reorganization effected in one of two specified types of court proceedings: (i) Receivership proceedings, or (ii) proceedings under section 77 of the Bankruptcy Act (11 U.S.C. 205). The specific statutory requirements are the transfer after July 31, 1955, of property of a railroad corporation, as defined in section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)), in pursuance of an order of the court having jurisdiction of the corporation in such proceeding, to another railroad corporation, as defined in section 77(m) of the Bankruptcy Act, organized or made use of to effectuate a plan of reorganization approved by the court in such proceeding, in exchange solely for stock or securities in such other railroad corporation. If the consideration for the transfer consists of other property or money as well as stock and securities, see section 374(a)(2) and (3) and paragraph (b) of this section. As to the assumption of liabilities in an exchange described in section 374(a), see section 357 and paragraph (a)(1) and (2) of § 1.357–1 and paragraph (a) of § 1.357–2.

(3) The application of section 374(a)(1) is to be strictly limited to a transaction of the character set forth in such section. Hence, the section is inapplicable unless there is a bona fide plan of reorganization approved by the court having jurisdiction of the proceeding and the transfer of the property of the insolvent railroad corporation is made pursuant to such plan. It is unnecessary that the transfer be a direct transfer from the insolvent railroad corporation; it is sufficient if the transfer is an integral step in the consummation of the reorganization plan approved by the court. By its terms, the section has no application to a reorganization consummated by adjustment of the capital or debt structure of the insolvent railroad corporation without the transfer of its assets to another railroad corporation.

(4) As used in section 374(a)(1), the term *reorganization* is not controlled by the definition of *reorganization* contained in section 368. However, certain basic requirements, implicit in the statute, which are essential to a reorganization under section 368, are likewise essential to qualify a transaction as a reorganization under section 374(a)(1). Among these requirements are a continuity of the business enterprise under the modified corporate form and a continuity of interest therein on the part of those persons who were the owners of the enterprise prior to the reorganization. Thus, the nonrecognition accorded by section 374(a)(1) applies only to a genuine reorganization as distinguished from a liquidation and sale of property to either new or old interests supplying new capital and discharging the obligations of the old railroad corporation. For the purpose of determining whether the requisite continuity of interest exists, the interest of creditors who have, by

appropriate legal steps, obtained effective command of the property of an insolvent railroad corporation is considered as the equivalent of a proprietary interest. But the mere possibility of a proprietary interest is not its equivalent. In general, any transaction will be subject to nonrecognition of gain or loss as prescribed by section 374(a)(1) where the property is transferred to a railroad corporation and the stock and securities of such corporation are transferred to persons who were shareholders or creditors of the transferor railroad corporation as if such stock or securities had been transferred to such persons as shareholders pursuant to the nonrecognition provisions of part III, subchapter C, chapter 1 of the Code. The determinative and controlling factors are the railroad corporation's insolvency and the effective command by the creditors over its property. The term *insolvent* as used in this section refers to insolvency at any time during the course of the proceeding referred to in section 374(a)(1), either in the sense of excess of liabilities over assets or in the sense of inability to meet obligations as they mature.

(5) A short-term purchase money note is not a security within the meaning of this section, and the transfer of the properties of the insolvent railroad corporation for cash and deferred payment obligations of the transferee evidenced by short-term notes is a sale and not an exchange.

(b) *Exchange for stock or securities and other property or money*. If an exchange would be within the provisions of section 374(a)(1) if it were not for the fact that the consideration for the transfer of the property of the insolvent railroad corporation consists not only of stock or securities but also of other property or money, then, as provided in section 374(a)(2), if the other property or money received by the railroad corporation is distributed by it pursuant to the plan of reorganization, no gain to the railroad corporation will be recognized. Property is distributed within the meaning of this section if it is paid over or distributed to shareholders or creditors who have by appropriate legal steps obtained effective command of the property of the railroad corporation. If the other property or money received by the railroad corporation is not distributed by it pursuant to the plan of reorganization, the gain, if any, to the railroad corporation from the exchange will be recognized in an amount not in excess of the sum of money and the fair market value of the other property so received which is not distributed. In either case no loss from the exchange will be recognized (see section 374(a)(3)). See section 354(c) relative to exchanges by stock or security holders.

[T.D. 6528, 26 FR 400, Jan. 19, 1961]

§1.374–2 Basis of property acquired after December 31, 1938, by railroad corporation in a receivership or railroad reorganization proceeding.

Section 374(b)(1) provides that if property of a railroad corporation, as defined in section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)), was acquired after July 31, 1955, in pursuance of an order of the court having jurisdiction of such corporation in either a receivership proceeding or a proceeding under section 77 of the Bankruptcy Act, and the acquiring corporation is also a railroad corporation as defined in section 77(m) of such Act, organized or availed of to effectuate a plan of reorganization approved by the court in such proceeding, the basis shall be the same as it would be in the hands of the transferor railroad corporation, increased in the amount of gain recognized to the transferor under section 374(a)(2) and paragraph (b) of §1.374–1. For purposes of section 374(b)(1), it is unnecessary that the acquisition in question be a direct transfer from the corporation undergoing reorganization or that such reorganization constitute a reorganization within the meaning of section 368(a) since that section does not apply to part IV, subchapter C, chapter 1 of the Code. It is sufficient if the acquisition is in pursuance of an order of the court and is an integral step in the consummation of a reorganization plan approved by the court having jurisdiction of the proceeding. If the transaction falls within the provisions of section 374(b)(1), the basis of the property involved shall be determined pursuant to such provisions, notwithstanding that the transaction might also fall within another basis provision.

[T.D. 6528, 26 FR 401, Jan. 19, 1961, as amended by T.D. 7616, 44 FR 26870, May 8, 1979]

§1.374–3 Records to be kept and information to be filed.

(a) *Return information.* Each railroad corporation a party to a section 374(a) reorganization shall furnish a complete statement of all facts pertinent to the recognition or nonrecognition of gain or loss in connection with the exchange, including:

(1) A certified copy of the plan of reorganization approved by the court in the proceeding, together with a statement showing in full the purposes thereof and in detail all transactions incident, or pursuant, to the plan;

(2) A complete statement of the cost or other basis of all property, including all stock or securities, transferred incident to the plan;

(3) A statement of the amount of stock or securities and other property or money received in the exchange, including a statement of all distributions or other disposition made thereof. The amount of each kind of stock or securities or other property shall be stated on the basis of the fair market value thereof at the date of the exchange;

(4) A statement of the amount and nature of any liabilities assumed upon the exchange.

The information required by this paragraph shall be filed as a part of each railroad corporation's return for its taxable year within which the reorganization occurred.

(b) *Permanent records.* Permanent records in substantial form must be kept by every railroad corporation which participates in a tax-free exchange in connection with a section 374(a) reorganization showing the cost or other basis of the transferred property and the amount of stock or securities and other property or money received (including any liabilities assumed upon the exchange), in order to facilitate the determination of gain or loss from a subsequent disposition of such stock or securities and other property received from the exchange.

[T.D. 6528, 26 FR 401, Jan. 19, 1961]

§1.374–4 Property acquired by electric railway corporation in corporate reorganizing proceeding.

Subject to the limitations and conditions set forth in section 374(b)(2), if the reorganization under section 77 of the Bankruptcy Act (11 U.S.C. 501 and following) of an electric railway corporation results in the acquisition of the property of such corporation by another corporation, the basis of such property in the hands of the acquiring corporation is the same as it would be in the hands of the old corporation. It is requisite to the application of the section that both corporations be street, suburban, or interurban electric railway corporations engaged in the transportation of persons or property in interstate commerce, and that the acquisition is in pursuance of an order of the court and is an integral step in the consummation of a reorgnizing plan approved by the court having jurisidiction of the proceeding. If section 374(b)(2) applies, section 270 of the Bankruptcy Act (11 U.S.C. 670), relating to the adjustment of basis by reason of the cancellation or reduction of indebtedness in a corporate reorganization proceeding, is inapplicable. Moreover, if the transaction is within the provisons of section 374(b)(2) and may also be considered to be within any other basis provision, then the provisions of section 374(b)(2) only shall apply.

[T.D. 7616, 44 FR 26870, May 8, 1979]

CARRYOVERS

§1.381(a)–1 General rule relating to carryovers in certain corporate acquisitions.

(a) *Allowance of carryovers.* Section 381 provides that a corporation which acquires the assets of another corporation in certain liquidations and reorganizations shall succeed to, and take into account, as of the close of the date of distribution or transfer, the items described in section 381(c) of the distributor or transferor corporation. These items shall be taken into account by the acquiring corporation subject to the conditions and limitations specified in sections 381, 382(b), and 383 and the regulations thereunder.

(b) *Determination of transactions and items to which section 381 applies*—(1) *Qualified transactions.* Except to the extent provided in section 381(c)(20), relating to the carryover of unused pension trust deductions in certain liquidations, the items described in section 381(c) are required by section 381 to be carried over to the acquiring corporation (as defined in subparagraph (2) of this paragraph) only in the following liquidations and reorganizations:

(i) The complete liquidation of a subsidiary corporation upon which no gain or loss is recognized in accordance with the provisions of section 332, but only if the basis of the assets distributed to the acquiring corporation is not required by section 334(b)(2) to be the adjusted basis of the stock with respect to which the distribution is made;

(ii) A statutory merger or consolidation qualifying under section 368(a)(1)(A) to which section 361 applies;

(iii) A reorganization qualifying under section 368(a)(1)(C);

(iv) A reorganization qualifying under section 368(a)(1)(D) if the requirements of section 354(b)(1)(A) and (B) are satisfied; and

(v) A mere change in identity, form, or place of organization qualifying under section 368(a)(1)(F).

(2) *Acquiring corporation defined.* (i) Only a single corporation may be an acquiring corporation for purposes of section 381 and the regulations thereunder. The corporation which acquires the assets of its subsidiary corporation in a complete liquidation to which section 381(a)(1) applies is the acquiring corporation for purposes of section 381. Generally, in a transaction to which section 381(a)(2) applies, the acquiring corporation is that corporation which, pursuant to the plan of reorganization, ultimately acquires, directly or indirectly, all of the assets transferred by the transferor corporation. If, in a transaction qualifying under section 381(a)(2), no one corporation ultimately acquires all of the assets transferred by the transferor corporation, that corporation which directly acquires the assets so transferred shall be the acquiring corporation for purposes of section 381 and the regulations thereunder, even though such corporation ultimately retains none of the assets so transferred. Whether a corporation has acquired all of the assets transferred by the transferor corporation is a question of fact to be determined on the basis of all the facts and circumstances.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). Y Corporation, a wholly-owned subsidiary of X Corporation, directly acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Y Corporation is the acquiring corporation for purposes of section 381.

Example (2). X Corporation acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred all the assets so acquired to Y Corporation, its wholly-owned subsidiary (see section 368(a)(2)(C)). Y Corporation is the acquiring corporation for purposes of section 381.

Example (3). X Corporation acquired all the assets of Z Corporation solely in exchange for the voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred one-half of the assets so acquired to Y Corporation, its wholly-owned subsidiary, and retained the other half of such assets. X Corporation is the acquiring corporation for purposes of section 381.

Example (4). X Corporation acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred one-half of the assets so acquired to Y Corporation, its wholly-owned subsidiary, and the other half of such assets to M Corporation, another wholly-owned subsidiary of X Corporation. X Corporation is the acquiring corporation for purposes of section 381.

(3) *Transactions and items not covered by section 381.* (i) Section 381 does not apply to partial liquidations, divisive reorganizations, or other transactions not described in subparagraph (1) of this paragraph. Moreover, section 381 does not apply to the carryover of an item or tax attribute not specified in subsection (c) thereof. In a case where section 381 does not apply to a transaction, item, or tax attribute by reason of either of the preceding sentences, no

inference is to be drawn from the provisions of section 381 as to whether any item or tax attribute shall be taken into account by the successor corporation.

(ii) If, pursuant to the provisions of subparagraph (2) of this paragraph, a corporation is considered to be the acquiring corporation even though a part of the acquired assets is transferred to one or more corporations controlled by the acquiring corporation, or all the acquired assets are transferred to two or more corporations controlled by the acquiring corporation, then the carryover of any item described in section 381(c) to such controlled corporation or corporations shall be determined without regard to section 381. Thus, for example, if a parent corporation is the acquiring corporation for purposes of section 381 notwithstanding the fact that, pursuant to the plan of reorganization, it transferred to its wholly-owned subsidiary property acquired from the transferor corporation which the transferor corporation had elected to inventory under the last-in first-out method, then the question whether the subsidiary corporation shall continue to use the same method of inventorying with respect to that property shall be determined without regard to section 381.

(c) *Foreign corporations.* A foreign corporation may be a distributor, transferor, or acquiring corporation for purposes of section 381. Thus, for example, the net operating loss carryovers of a foreign corporation, determined under the provisions of section 172 and subchapter N (section 861 and following), chapter 1 of the Code, may be carried over to a domestic acquiring corporation if the domestic corporation acquires the assets of the foreign corporation in a liquidation or reorganization described in section 381(a) and the requirements of § 1.367–1, if applicable, have been complied with.

(d) *Internal Revenue Code of 1939.* Any reference in the regulations under section 381 to any provision of the Internal Revenue Code of 1954 shall, where appropriate, be deemed also to refer to the corresponding provision of the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7343, 40 FR 1698, Jan. 9, 1975]

§ 1.381(b)–1 Operating rules applicable to carryovers in certain corporate acquisitions.

(a) *Closing of taxable year*—(1) *In general.* Except in the case of certain reorganizations qualifying under section 368(a)(1)(F), the taxable year of the distributor or transferor corporation shall end with the close of the date of distribution or transfer. With regard to the closing of the taxable year of the transferor corporation in certain reorganizations under section 368(a)(1)(F) involving a foreign corporation after December 31, 1986, see §§ 1.367(a)–1T(e) and 7.367(b)–(e).

(2) *Reorganizations under section 368(a)(1)(F).* In the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the acquiring corporation shall be treated (for purposes of section 381) just as the transferor corporation would have been treated if there had been no reorganization. Thus, the taxable year of the transferor corporation shall not end on the date of transfer merely because of the transfer; a net operating loss of the acquiring corporation for any taxable year ending after the date of transfer shall be carried back in accordance with section 172(b) in computing the taxable income of the transferor corporation for a taxable year ending before the date of transfer; and the tax attributes of the transferor corporation enumerated in section 381(c) shall be taken into account by the acquiring corporation as if there had been no reorganization.

(b) *Date of distribution or transfer.* (1) The date of distribution or transfer shall be that day on which are distributed or transferred all those properties of the distributor or transferor corporation which are to be distributed or transferred pursuant to a liquidation or reorganization described in paragraph (b)(1) of § 1.381(a)–1. If the distribution or transfer of all such properties is not made on one day, then, except as provided in subparagraph (2) of this paragraph, the date of distribution or transfer shall be that day on which the distribution or transfer of all such properties is completed.

(2) If the distributor or transferor and acquiring corporations file the statements described in subparagraph (3) of this paragraph, the date of distribution or transfer shall be that day as of which (i) substantially all of the properties to be distributed or transferred have been distributed or transferred, and (ii) the distributor or transferor corporation has ceased all operations (other than liquidating activities). Such day also shall be the date of distribution or transfer if the completion of the distribution or transfer is unreasonably postponed beyond the date as of which substantially all the properties to be distributed or transferred have been distributed or transferred and the distributor or transferor corporation has ceased all operations other than liquidating activities. A corporation shall be considered to have distributed or transferred substantially all of its properties to be distributed or transferred even though it retains money or other property in a reasonable amount to pay outstanding debts or preserve the corporation's legal existence. A corporation shall be considered to have ceased all operations, other than liquidating activities, when it ceases to be a going concern and its activities are merely for the purpose of winding up its affairs, paying its debts, and distributing any remaining balance of its money or other properties to its shareholders.

(3) The statements referred to in subparagraph (2) of this paragraph shall specify the day considered to be the date of distribution or transfer and shall specify, as of such date (i) the nature and amount of the total assets which were distributed or transferred and the dates so distributed or transferred, (ii) the nature and amount of the assets not distributed or transferred and the purpose for which they were retained, and (iii) the date on which the distributor or transferor corporation ceased all operations other than liquidating activities. Such statements shall be attached to the timely filed income tax return of the distributor or transferor corporation for its taxable year ending with such date of distribution or transfer and to the timely filed income tax return of the acquiring corporation for its first taxable year ending after such date, except that, with respect to any income tax return filed before October 11, 1960, any such statement shall be filed before October 11, 1960, with the district director with whom such return is filed.

(4) If—

(i) The last day of the acquiring corporation's taxable year is a Saturday, Sunday, or legal holiday, and

(ii) The day specified in subparagraph (1) or (2) of this paragraph as the date of distribution or transfer is the last business day before such Saturday, Sunday, or holiday,

then the last day of the acquiring corporation's taxable year shall be the date of distribution or transfer for purposes of section 381(b) and this section. For purposes of this subparagraph, the term *business day* means a day which is not a Saturday, Sunday, or legal holiday, and also means a Saturday, Sunday, or legal holiday if the date of distribution or transfer determined under subparagraph (1) or (2) of this paragraph is such Saturday, Sunday, or holiday.

(c) *Return of distributor or transferor corporation.* The distributor or transferor corporation shall file an income tax return for the taxable year ending with the date of distribution or transfer described in paragraph (b) of this section. If the distributor or transferor corporation remains in existence after such date of distribution or transfer, it shall file an income tax return for the taxable year beginning on the day following the date of distribution or transfer and ending with the date on which the distributor or transferor corporation's taxable year would have ended if there had been no distribution or transfer.

(d) *Carryback of net operating losses.* For provisions relating to the carryback of net operating losses of the acquiring corporation, see paragraph (b) of §1.381(c)(1)–1.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended at T.D. 8280, 55 FR 1417, Jan. 16, 1990]

§ 1.381(c)(1)–1 Net operating loss carryovers in certain corporate acquisitions.

(a) *Carryover requirement.* (1) Section 381(c)(1) requires the acquiring corporation to succeed to, and take into account, the net operating loss carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with any carryovers and carrybacks of the acquiring corporation for purposes of determining the taxable income of the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 172 in accordance with the conditions and limitations of section 381(c)(1) and this section. See also section 382(b) and the regulations thereunder.

(2) The net operating loss carryovers and carrybacks of the acquiring corporation determined as of the close of the date of distribution or transfer shall be computed without reference to any net operating loss of a distributor or transferor corporation. The net operating loss carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any net operating loss of the acquiring corporation.

(3) For purposes of the tax imposed under section 56, the acquiring corporation succeeding to and taking into account any net operating loss carryovers of the distributor or transferor corporation shall also succeed to and take into account along with such net operating loss carryforward any deferred tax liability under section 56(b) and the regulations thereunder attributable to such net operating loss carryover.

(b) *Carryback of net operating losses.* A net operating loss of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall not be carried back in computing the taxable income of a distributor or transferor corporation. However, a net operating loss of the acquiring corporation for any such taxable year shall be carried back in accordance with section 172(b) in computing the taxable income of the acquiring corporation for a taxable year ending on or before the date of distribution or transfer. If a distributor or transferor corporation remains in existence after the date of distribution or transfer, a net operating loss sustained by it for any taxable year beginning after such date shall be carried back in accordance with section 172(b) in computing the taxable income of such corporation for a taxable year ending on or before that date, but may not be carried back or over in computing the taxable income of the acquiring corporation. This paragraph may be illustrated by the following examples:

Example (1). On December 31, 1954, X Corporation merged into Y Corporation in a statutory merger to which section 361 applies, and the charter of Y Corporation continued after the merger. Y Corporation sustained a net operating loss for the calendar year 1955. Y Corporation's net operating loss for 1955 may not be carried back in computing the taxable income of X Corporation but shall be carried back in computing the taxable income of Y Corporation.

Example (2). On December 31, 1954, X Corporation and Y Corporation transferred all their assets to Z Corporation in a statutory consolidation to which section 361 applies. Z Corporation sustained a net operating loss for the calendar year 1955. Z Corporation's net operating loss for 1955 may not be carried back in computing the taxable income of X Corporation or Y Corporation.

Example (3). On December 31, 1954, X Corporation ceased all operations (other than liquidating activities) and transferred substantially all its properties to Y Corporation in a reorganization qualifying under section 368(a)(1)(C). Such properties comprised all of X Corporation's properties which were to be transferred pursuant to the reorganization. In the process of liquidating its assets and winding up its affairs, X Corporation sustained a net operating loss for its taxable year beginning on January 1, 1955. This net operating loss of X Corporation shall be carried back in computing the taxable income of that corporation but may not be carried back or over in computing the taxable income of Y Corporation.

(c) *First taxable year to which carryovers apply.* (1) The net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies irrespective of whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year. Thus, such net operating loss carryovers shall first be used by the acquiring corporation with respect to the computation of its net operating loss deduction under section 172(a), and its taxable income determined under the provisions of section 172(b)(2), for such first taxable year. However, see paragraph (f) of this section.

(2) The net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation. Thus, if a parent corporation owning 80 percent of all classes of stock of its subsidiary corporation were to acquire its share of the assets of the subsidiary corporation upon a complete liquidation described in paragraph (b)(1)(i) of §1.381(a)–1, then, subject to the conditions and limitations of this section, 100 percent of the net operating loss carryovers available to the subsidiary corporation as of the close of the date of distribution would be carried over to the parent corporation.

(d) *Limitation on net operating loss deduction for first taxable year ending after date of distribution or transfer.* (1) That part of the acquiring corporation's net operating loss deduction, determined in accordance with sections 172(a) and 381(c)(1), for its first taxable year ending after the date of distribution or transfer which is attributable to the net operating loss carryovers of the distributor or transferor corporation, is limited by section 381(c)(1)(B) and this paragraph to an amount equal to the acquiring corporation's postacquisition part year taxable income. Such postacquisition part year taxable income is the amount which bears the same ratio to the acquiring corporation's taxable income for the first taxable year ending after the date of distribution or transfer (determined under section 63 without regard to any net operating loss deduction but taking into account other items to which the acquiring corporation succeeds under section 381) as the number of days in such first taxable year which follow the date of distribution or transfer bears to the total number of days in such taxable year. Thus, if the date of distribution or transfer is the last day of the acquiring corporation's taxable year, the net operating loss carryovers of the distributor or transferor are allowed in full in computing under section 172(a) the net operating loss deduction of the acquiring corporation for its first taxable year ending after that date. In such instance, the number of days in the first taxable year which follow the date of distribution or transfer is the total number of days in such taxable year.

(2) The limitation provided by section 381(c)(1)(B) applies solely for the purpose of computing the net operating loss deduction of the acquiring corporation under section 172(a) for the acquiring corporation's first taxable year ending after the date of distribution or transfer. The limitation does not apply for purposes of determining the portion of any net operating loss (whether of the distributor, transferor, or acquiring corporation) which may be carried to any taxable year of the acquiring corporation following its first taxable year ending after the date of distribution or transfer since such determination is made pursuant to section 172(b) and section 381(c)(1)(C). See paragraphs (e) and (f) of this section.

(3) The limitation provided by section 381(c)(1)(B) shall be applied to the aggregate of the allowable net operating loss carryovers of the distributor or transferor corporation without reference to the taxable years in which the net operating losses were sustained by such corporation. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, then the limitation provided by section 381(c)(1)(B) shall be applied to the aggregate of the net operating loss carryovers from all of such distributor or transferor corporations.

(4) If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor

or transferor corporations on two or more different dates of distribution or transfer within one taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(1)(B) to the aggregate of such carryovers shall be governed by the rules prescribed in paragraph (b) of § 1.381(c)(1)–2.

(5) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example (1). (i) X Corporation and Y Corporation were organized on January 1, 1956, and make their returns on the calendar year basis. On December 16, 1957, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and taxable income (computed without the net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1956	($35,000)	($5,000)
Ending 12–16–57	(30,000)	xxx
1957	xxx	36,500

(ii) The aggregate of the net operating loss carryovers of X Corporation carried under section 381(c)(1)(A) to Y Corporation's taxable year ending December 31, 1957, is $65,000; but pursuant to section 381(c)(1)(B), only $1,500 of such aggregate amount ($36,500× 15/365) may be used in computing the net operating loss deduction of Y Corporation for such taxable year under section 172(a). This limitation applies even though Y Corporation's own net operating loss carryover to such year is only $5,000, with the result that Y Corporation has taxable income under section 63 of $30,000 for its taxable year ending December 31, 1957, that is, $36,500 less the sum of $5,000 and $1,500.

(iii) For rules determining the portion of any given loss of X Corporation or Y Corporation which may be carried to a taxable year of Y Corporation following its taxable year ending December 31, 1957, see sections 172(b)(2) and 381(c)(1)(C) and paragraph (f) of this section.

Example (2). (i) X Corporation was organized on January 1, 1954, and Y Corporation was organized on January 1, 1956. Each corporation makes its return on the basis of the calendar year. On December 31, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($5,000)	xxx
1955	(15,000)	xxx
1956	(10,000)	$20,000
1957	xxx	40,000

(ii) The aggregate of the net operating loss carryovers of X Corporation carried under section 381(c)(1)(A) to Y Corporation's taxable year 1957 is $30,000, and the full amount of such carryovers is allowed in such taxable year to Y Corporation as a deduction under section 172(a), since such amount does not exceed the limitation ($40,000× 365/365) for such taxable year under section 381(c)(1)(B).

Example (3). (i) X Corporation, Y Corporation, and Z Corporation were organized on January 1, 1954, and each corporation makes its return on the basis of the calendar year. On September 30, 1956, X Corporation and Y Corporation transferred all their assets to Z Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the three corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
1954	($5,000)	($3,000)	($40,000)
1955	(4,000)	(2,000)	10,000
Ending 9–30–56	(1,000)	(9,000)	xxx
1956	xxx	xxx	73,200

(ii) The aggregate of the net operating loss carryovers of X Corporation and Y Corporation carried under section 381(c)(1)(A) to Z Corporation's taxable year 1956 is $24,000; but, pursuant to section 381(c)(1)(B), only $18,400 of such aggregate amount ($73,200× 92/366) may be used in computing the net operating loss deduction of Z Corporation for such taxable year under section 172(a). For this purpose, Z Corporation may not use the total of the aggregate carryovers ($10,000) from X Corporation plus the aggregate carryovers ($14,000) from Y Corporation, even though each such aggregate of carryovers is separately less than the limitation ($18,400) applicable under section 381(c)(1)(B) and this section.

(iii) For rules determining the portion of any given loss of X Corporation, Y Corporation, or Z Corporation which may be carried to a taxable year of Z Corporation following its taxable year ending December 31, 1956, see sections 172(b)(2) and 381(c)(1)(C) and paragraph (f) of this section.

(e) *Computation of carryovers and carrybacks; general rule*—(1) *Sequence for applying losses and computation of taxable income.* The portion of any net operating loss which is carried back or carried over to any taxable year is the excess, if any, of the amount of the loss over the sum of the taxable income for each of the prior taxable years to which the loss may be carried under sections 172(b)(1) and 381. In determining the taxable income for each such prior taxable year for this purpose, the various net operating loss carryovers and carrybacks to such prior taxable year are considered to be applied in reduction of the taxable income in the order of the taxable years in which the net operating losses are sustained, beginning with the loss for the earliest taxable year. The application of this rule to the taxable income of the acquiring corporation for any taxable year ending after the date of distribution or transfer involves the use of carryovers of the distributor or transfer corporation, and of carryovers and carrybacks of the acquiring corporation. In such instance, the sequence for the use of loss years remains the same, and the requirement is to begin with the net operating loss of the earliest taxable year, whether or not it is a loss of the distributor, transferor, or acquiring corporation. The taxable income of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall be determined in the manner prescribed by section 172(b)(2), except that, if the date of distribution or transfer is on a day other than the last day of a taxable year of the acquiring corporation, the taxable income of such corporation for the taxable year which includes such date shall be computed in the special manner prescribed by section 381(c)(1)(C) and paragraph (f) of this section.

(2) *Loss year of transferor or distributor considered prior taxable year.* Section 381(c)(1)(C) provides that, for the purpose of determining the net operating loss carryovers under section 172(b)(2), a net operating loss for a loss year of a distributor or transferor corporation which ends on or before the last day of a loss year of the acquiring corporation shall be considered to be a net operating loss for a year prior to such loss year of the acquiring corporation. In a case where the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, the loss years of the distributor or transferor corporations shall be taken into account in the order in which such loss years terminate; if any one of the loss years of a distributor or transferor corporation ends on the same day as the loss year of another distributor or transferor corporation, either loss year may be taken into account before the other.

(3) *Years to which losses may be carried.* The taxable years to which a net operating loss shall be carried back or carried over are prescribed by section 172(b)(1). Since the taxable year of the distributor or transferor corporation ends with the close of the date of distribution or transfer, such taxable year and the first taxable year of the acquiring corporation which ends after that date shall be considered two separate taxable years to which a net operating loss of the distributor or transferor corporation for any taxable year ending before that date may be carried over. This rule applies even though the taxable year of the distributor or transferor corporation which ends on the date of distribution or transfer is a period of less than twelve months. However, for the purpose of determining under section 172(b)(1) the taxable years to which a net operating loss of the acquiring corporation is carried over or carried back, the first taxable year of the acquiring corporation which ends after the date of distribution or transfer shall be treated as only one taxable year even though such taxable year is considered under section 381(c)(1)(C) and paragraph (f)(2) of this section as two taxable years. The application of this subparagraph may be illustrated by the following example:

Example. X Corporation was organized on January 1, 1954, and thereafter it sustained net operating losses in its calendar years 1954, 1955, and 1956. On June 30, 1957, X Corporation transferred all its assets to Y Corporation, which was organized on January 1, 1955, in a statutory merger to which section 361 applies. In its taxable year ending June

30, 1957, X Corporation sustained a net operating loss. Y Corporation sustained net operating losses in its calendar years 1955, 1956, and 1958, but had taxable income for the year 1957. The years to which these losses of X Corporation and Y Corporation shall be carried, and the sequence in which carried, are as follows:

Loss year	
X 1954	X 1955, X 1956, X 6/30/57, Y 1957, Y 1958.
X 1955	X 1954, X 1956, X 6/30/57, Y 1957, Y 1958, Y 1959.
Y 1955	Y 1956, Y 1957, Y 1958, Y 1959, Y 1960.
X 1956	X 1954, X 1955, X 6/30/57, Y 1957, Y 1958, Y 1959, Y 1960.
Y 1956	Y 1955, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
X 6–30–57	X 1955, X 1956, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
Y 1958	Y 1955, Y 1956, Y 1957, Y 1959, Y 1960, Y 1961, Y 1962, Y 1963.

(4) *Computation of carryovers in a case where the date of distribution or transfer occurs on last day of acquiring corporation's taxable year.* The computation of the net operating loss carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a taxable year of the acquiring corporation may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1955, and each corporation makes its return on the basis of the calendar year. On December 31, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1955	($2,000)	($11,000)
1956	(3,000)	10,000
1957	xxx	(15,000)

The sequence in which the losses of X Corporation and Y Corporation are applied, and the computation of the carryovers to Y Corporation's calendar year 1958, may be illustrated as follows:

(i) *X Corporation's 1955 loss.* The carryover to 1958 is $2,000, computed as follows:

Net operating loss		$2,000
Less:		
X's 1956 taxable income	0	
Y's 1957 taxable income	0	
		0
Carryover		2,000

(ii) *Y Corporation's 1955 loss.* The carryover to 1958 is $1,000, computed as follows:

Net operating loss		$11,000
Less:		
Y's 1956 taxable income	$10,000	
Y's 1957 taxable income	0	
		10,000
Carryover		1,000

(iii) *X Corporation's 1956 loss.* The carryover to 1958 is $3,000, computed as follows:

Net operating loss		$3,000
Less:		
X's 1955 taxable income	0	
Y's 1957 taxable income	0	
		0
Carryover		3,000

(iv) *Y Corporation's 1957 loss.* The carryover to 1958 is $15,000, computed as follows:

Net operating loss			$15,000
Less:			
Y's 1955 taxable income		0	
Y's 1956 taxable income before net operating loss deduction	$10,000		
Minus Y's 1956 net operating loss deduction (i.e., Y's 1955 carryover)	11,000	0	
		0	
Carryover			15,000

(v) *Summary of carryovers to 1958.* The aggregate of the net operating loss carryovers to 1958 is $21,000, computed as follows:

X's 1955 loss	$2,000
Y's 1955 loss	1,000
X's 1956 loss	3,000
Y's 1957 loss	15,000
Total	21,000

(f) *Computation of carryovers and carrybacks when date of distribution or transfer is not on last day of acquiring corporation's taxable year*—(1) *General rule.* Pursuant to the provisions of section 381(c)(1)(C), the taxable income of the acquiring corporation for its taxable year which is a prior taxable year for purposes of section 172(b)(2) and paragraph (e) of this section shall be determined in the manner prescribed in this paragraph, if the date of distribution or transfer occurs within, but not on the last day of, such taxable year.

(2) *Taxable year considered as two taxable years.* Such taxable year of the acquiring corporation shall be considered as though it were two taxable years, but only for the limited purpose of applying section 172(b)(2). The first of such two taxable years shall be referred to in this section as the preacquisition part year; the second, as the postacquisition part year. For purposes of section 172(b)(2), a net operating loss of the acquiring corporation shall be carried to the preacquisition part year and then to the postacquisition part year, whereas a net operating loss of a distributor or transferor corporation shall be carried to the postacquisition part year and then to the acquiring corporation's subsequent taxable years. In determining under section 172(b)(2) and this paragraph the portion of any net operating loss of a distributor or transferor corporation which is carried to any taxable year of the acquiring corporation ending after the postacquisition part year, the taxable income (as determined under this paragraph) of the postacquisition part year shall be taken into account but the taxable income of the preacquisition part year (as so determined) shall not be taken into account. Though considered as two separate taxable years for purposes of section 172(b)(2), the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which a net operating loss is carried under section 172(b)(1). See paragraph (e)(3) of this section.

(3) *Preacquisition part year.* The preacquisition part year shall begin with the beginning of such taxable year of the acquiring corporation and shall end with the close of the date of distribution or transfer.

(4) *Postacquisition part year.* The postacquisition part year shall begin with the day following the date of distribution or transfer and shall end with the close of such taxable year of the acquiring corporation.

(5) *Division of taxable income.* The taxable income for such taxable year (computed with the modifications specified in section 172(b)(2)(A) but without any net operating loss deduction) of the acquiring corporation shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation acquires the assets of X Corporation on June 30, 1960, and Y Corporation has taxable income (computed in the manner so prescribed) of $36,600 for its calendar year 1960, then the preacquisition part year taxable income would be $18,200 ($36,600× 182/366) and the postacquisition part year taxable income would be $18,400 ($36,600× 184/366).

(6) *Net operating loss deduction.* After obtaining the taxable income of the preacquisition part year and of the postacquisition part year in the manner described in subparagraph (5) of this paragraph, it is necessary to compute the net operating loss deduction for each such part year. This deduction shall be determined in the manner prescribed by section 172(b)(2)(B) but subject to the provisions of this subparagraph. The net operating loss deduction for the preacquisition part year shall, for purposes of section 172(b)(2) only, be determined in the same manner as that prescribed by section 172(b)(2)(B) but shall be computed without taking into account any net operating loss of the distributor or transferor corporation. Therefore, only net operating loss carryovers and carrybacks of the acquiring corporation to the preacquisition part year shall be taken into account in computing the net operating loss deduction for such part year. The net operating loss deduction for the post- acquisition part year shall, for purposes of section 172(b)(2) only, be determined in the same manner as that prescribed by section 172(b)(2)(B) and shall be computed by taking into account all the net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer, as well as the net operating loss carryovers and carrybacks of the acquiring corporation to the postacquisition part year. The sequence in which the net operating losses of the two corporations shall be applied for purposes

of this subparagraph shall be determined in the manner prescribed in paragraph (e) of this section.

(7) *Limitation on taxable income.* In no case shall the taxable income of the preacquisition part year or the postacquisition part year, as computed under this paragraph, be considered to be less than zero.

(8) *Cross reference.* If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributors or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the determination of the taxable income of the acquiring corporation for such year pursuant to section 381(c)(1)(C) shall be governed by the rules prescribed in paragraph (c) of § 1.381(c)(1)–2.

(9) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example— (i) *Facts.* X Corporation was organized on January 1, 1955, and Y Corporation was organized on January 1, 1954. Each corporation makes its return on the basis of the calendar year. On June 30, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	xxx	($5,000)
1955	($65,000)	(20,000)
Ending June 30, 1956	1,000	xxx
1956	xxx	36,600

(ii) *Y Corporation's 1954 loss.* The carryover to 1957 is $0, computed as follows:

Net operating loss		$5,000
Less:		
Y's 1955 taxable income		0
Carryover to Y's preacquisition part year		5,000
Less:		
Y's preacquisition part year taxable income computed under subparagraph (5) of this paragraph ($36,600× 182/366)	$18,200	
Minus Y's net operating loss deduction for preacquisition part year	xxx	18,200
Carryover to Y's postacquisition part year and also to Y 1957		0

(iii) *X Corporation's 1955 loss.* The carryover to 1957 is $45,600, computed as follows:

Net operating loss		$65,000
Less:		
X's 6/30/56 year taxable income		1,000
Carryover to Y's postacquisition part year		64,000
Less:		
Y's postacquisition part year taxable income computed under subparagraph (5) of this paragraph ($36,600×184/366)	$18,400	
Minus Y's net operating loss deduction for postacquisition part year (i.e., Y's 1954 carryover of $0 to such part year)		$18,400
Carryover to Y 1957		45,600

(iv) *Y Corporation's 1955 loss.* The carryover to 1957 is $6,800, computed as follows:

Net operating loss		$20,000
Less:		
Y's 1954 taxable income		0
Carryover to Y's preacquisition part year		20,000
Less:		
Y's preacquisition part year taxable income computed under subparagraph (5) of this paragraph	$18,200	
Minus Y's net operating loss deduction for preacquisition part year (i.e., Y's 1954 carryover to such part year)	5,000	
		13,200
Carryover to Y's postacquisition part year		6,800
Less:		
Y's postacquisition part year taxable income computed under subparagraph (5) of this paragraph	$18,400	
Minus Y's net operating loss deduction for postacquisition part year (i.e., Y's 1954 carryover of $0, and X's 1955 carryover of $64,000, to such part year)	64,000	
		0
Carryover to Y 1957		6,800

(v) *Summary of carryovers to 1957.* The aggregate of the net operating loss carryovers to 1957 is $52,400, determined as follows:

Y's 1954 loss	0
X's 1955 loss	$45,600
Y's 1955 loss	6,800
Total	52,400

(g) *Successive acquiring corporations.* An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 172 and 381, the net operating loss carryovers available to the first acquiring corporation under sections 172 and 381.

(h) *Illustration.* The application of this section may be further illustrated by the following example:

Example— (1) *Facts.* X Corporation was organized on January 1, 1954, and Y Corporation was organized on January 1, 1955. Each corporation makes its return on the basis of the calendar year. On August 31, 1957, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income of the two corporations for the taxable years involved are set forth in the tabulation below. The taxable income so shown is computed without the modifications required by section 172(b)(2)(A) and without the benefit of any net operating loss deduction. In its calendar year 1957, Y Corporation had a deduction of $365 which is disallowed by section 172(b)(2)(A).

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($7,000)	xxx
1955	(10,000)	($10,000)
1956	(25,000)	(15,000)
Ending 8–31–57	1,000	xxx
1957	xxx	54,750
1958	xxx	(5,000)
1959	xxx	50,000

(2) *Computation of carryovers and carrybacks.* The sequence in which the losses of X Corporation and Y Corporation are applied and the computation of the carryovers to Y Corporation's calendar year 1959 may be illustrated as follows:

(i) *X Corporation's 1954 loss.* The carryover to 1958, which is the last year to which this loss may be carried, is $0, computed as follows:

Net operating loss		$7,000
Less:		
X's 1955 taxable income	0	
X's 1956 taxable income	0	
		0
Carryover to X's 8/31/57-year		7,000
Less:		
X's 8/31/57-year taxable income		1,000
Carryover to Y's postacquisition part year		6,000
Less:		
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section (($54,750+$365) × 122/365)	$18,422	
Minus Y's net operating loss deduction for postacquisition part year	xxx	
		18,422
Carryover to Y 1958		0

(ii) *X Corporation's 1955 loss.* The carryover to 1959 is $0, computed as follows:

Net operating loss		$10,000
Less:		
X's 1954 taxable income	0	
X's 1956 taxable income	0	
		0
Carryover to X's 8/31/57-year		10,000
Less:		
X's 8/31/57-year taxable income before net operating loss deduction	$1,000	
Minus X's net operating loss deduction for 8/31/57-year (i.e., X's 1954 carryover)	7,000	
		0
Carryover to Y's postacquisition part year		10,000
Less:		
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section	$18,422	
Minus Y's net operating loss deduction for postacquisition part year (i.e., X's 1954 carryover to such part year)	6,000	
		12,422
Carryover to Y 1958 and Y 1959		0

(iii) *Y Corporation's 1955 loss.* The carryover to 1959 is $0, computed as follows:

Net operating loss		$10,000
Less:		
Y's 1956 taxable income		0
Carryover to Y's preacquisition part year		10,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section (($54,750+$365) × 243/365)	$36,693	
Minus Y's net operating loss deduction for preacquisition part year	xxx	
		36,693
Carryover to Y's postacquisition part year, to Y 1958, and to Y 1959		0

(iv) *X Corporation's 1956 loss.* The carryover to 1959 is $22,578, computed as follows:

Net operating loss		$25,000

Less:			
X's 1954 taxable income		0	
X's 1955 taxable income		0	
X's 8/31/57-year taxable income before net operating loss deduction	$1,000		
Minus X's net operating loss deduction for 8/31/57-year (i.e., X's 1954 carryover of $7,000 and X's 1955 carryover of $10,000)	$17,000	0	0
Carryover to Y's postacquisition part year			$25,000
Less:			
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section		$18,422	
Minus Y's net operating loss deduction for postacquisition part year (i.e., X's 1954 carryover of $6,000, X's 1955 carryover of $10,000 and Y's 1955 carryover of $0, to such part year)		16,000	
			2,422
Carryover to Y 1958			22,578
Less:			
Y's 1958 taxable income			0
Carryover to Y 1959			22,578

(v) *Y Corporation's 1956 loss.* The carryover to 1959 is $0, computed as follows:

Net operating loss		$15,000
Less:		
Y's 1955 taxable income		0
Carryover to Y's preacquisition part year		15,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section	$36,693	
Minus Y's net operating loss deduction for preacquisition part year (i.e., Y's 1955 carryover to such part year)	10,000	
		26,693
Carryover to Y's postacquisition part year, to Y 1958, and to Y 1959		0

(vi) *Y Corporation's 1958 loss.* The carryover to 1959 is $0, computed as follows:

Net operating loss		$5,000
Less:		
Y's 1955 taxable income [1]	0	
Y's 1956 taxable income	0	
		0
Carryback to Y's preacquisition part year		$5,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section	$36,693	
Minus Y's net operating loss deduction for preacquisition part year (i.e., Y's 1955 carryover of $10,000, and Y's 1956 carryover of $15,000, to such part year)	25,000	
		11,693
Carryback to Y's postacquisition part year and carryover to Y 1959		0

[1] Three-year carryback in case of loss years ending after December 31, 1957.

(vii) *Summary of carryovers to 1959.* The aggregate of the net operating loss carryovers to 1959 is $22,578, computed as follows:

X's 1955 loss	0
Y's 1955 loss	0
X's 1956 loss	$22,578
Y's 1956 loss	0
Y's 1958 loss	0
Total	22,578

(3) *Net operating loss deduction for 1957.* (i) The net operating loss deduction available to Y Corporation under section 172(a) for the calendar year 1957, determined in accordance with paragraph (d) of this section, is $48,300, computed as follows:

Aggregate of the net operating loss carryovers available to the transferor corporation as of the close of August 31, 1957, but limited by paragraph (d) of this section to $18,300 (Y's 1957 taxable income of $54,750, computed without any net operating loss deduction, multiplied by 122/365)		
Carryover of X's 1954 loss	$6,000	
Carryover of X's 1955 loss	10,000	
Carryover of X's 1956 loss	25,000	
	$41,000	
Aggregate of carryovers, limited as above		$18,300
Carryover of Y's 1955 loss		10,000
Carryover of Y's 1956 loss		15,000
Carryback of Y's 1958 loss		5,000
Net operating loss deduction		48,800

(ii) The taxable income under section 63 for 1957 is $6,450, computed as follows:

Taxable income determined without any net operating loss deduction	$54,750
Less:	
Net operating loss deduction for 1957, as determined under subdivision (i) of this subparagraph	$48,300
Taxable income under section 63	6,450

(4) *Net operating loss deduction for 1959.* The taxable income under section 63 for 1959 is $27,422, computed as follows:

Taxable income determined without any net operating loss deduction	$50,000
Less:	
Net operating loss deduction for 1959 (i.e., the aggregate carryovers determined under subparagraph (2)(vii) of this paragraph)	22,578
Taxable income under section 63	27,422

(5) *Years to which losses may be carried.* The taxable years to which the losses of X Corporation and Y Corporation may be carried, and the sequence in which carried, are as follows:

Loss year	Carried to
X 1954	X 1955, X 1956, X 8/31/57, Y 1957, Y 1958.
X 1955	X 1954, X 1956, X 8/31/57, Y 1957, Y 1958, Y 1959.
Y 1955	Y 1956, Y 1957, Y 1958, Y 1959, Y 1960.
X 1956	X 1954, X 1955, X 8/31/57, Y 1957, Y 1958, Y 1959, Y 1960.
Y 1956	Y 1955, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
Y 1958	Y 1955, Y 1956, Y 1957, Y 1959, Y 1960, Y 1961, Y 1962, Y 1963.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7564, 43 FR 40493, Sept. 12, 1978]

§1.381(c)(1)–2 Net operating loss carryovers; two or more dates of distribution or transfer in the taxable year.

(a) *In general.* If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer within one taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(1)(B) to the aggregate of the net operating loss carryovers to that taxable year from all of the distributor or transferor corporations shall be determined by applying the rules prescribed in paragraph (b) of this section, and the taxable income of the acquiring corporation for that taxable year under sections 381(c)(1)(C) and 172(b)(2) shall be determined by applying the rules prescribed in paragraph (c) of this section. For purposes of this section, the term *postacquisition income* means postacquisition part year taxable income determined under paragraph (d)(1) of §1.381(c)(1)–1 by treating the first date of distribution or transfer as though it were the only date of distribution or transfer during the taxable year of the acquiring corporation.

(b) *Determination of limitation under section 381(c)(1)(B)*—(1) *In general.* If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date of distribution or transfer equals or exceeds the postacquisition income, then the limitation under section 381(c)(1)(B) shall be an amount equal to such postacquisition income. If the amount of the net operating loss carryovers acquired on the first date of distribution or transfer is less than such postacquisition income, then the limitation under section 381(c)(1)(B) shall be determined as provided in subparagraphs (2) through (5) of this paragraph.

(2) *Allocation of postacquisition income among partial postacquisition years.* That part of the taxable year of the acquiring corporation beginning on the day following the first date of distribution or transfer and ending with the close of the taxable year of the acquiring corporation shall be divided into the same number of partial postacquisition years as the number of dates of distribution or transfer on which the acquiring corporation succeeds to net operating loss carryovers during its taxable year. The first partial postacquisition year shall begin with the day following the first date of distribution or transfer and shall end with the close of the second date of distribution or transfer. The second and succeeding partial postacquisition years shall begin with the day following the close of the preceding such partial year and shall end with the close of the succeeding date of distribution or transfer, or, if there is no such succeeding date, then with the close of the taxable year of the acquiring corporation. The postacquisition income of the acquiring corporation shall be allocated among the partial postacquisition years in proportion to the number of days in each such partial year.

(3) *Two dates of distribution or transfer.* If the acquiring corporation succeeds to the net operating loss carryovers of two distributor or transferor corporations on two dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date equals or exceeds the income for the first partial postacquisition year, the limitation provided by section

381(c)(1)(B) shall be the amount of the postacquisition income. If the income for the first partial postacquisition year exceeds the net operating loss carryovers acquired on the first date of distribution or transfer, the limitation provided by section 381(c)(1)(B) shall be the amount of the postacquisition income reduced by the amount of such excess. The application of this subparagraph may be illustrated by the following example:

Example. (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquires the assets of Y and Z Corporations in statutory mergers to each of which section 361 applies, the dates of transfer being January 1 and December 1, respectively. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
Y	$1,000	$33,400 ($36,500×334/365)	$32,400
Z	50,000	3,000 ($36,500×30/365)	0
	51,000	36,400	32,400

(ii) The limitation provided by section 381(c)(1)(B) equals the postacquisition income of $36,400 reduced by $32,400, the excess of the income for the first partial year ($33,400) over the net operating loss carryovers acquired on the first date of transfer ($1,000). Accordingly, the limitation is $4,000 ($36,400 minus $32,400). Therefore, although X Corporation acquired carryovers aggregating $51,000 during 1955, it can utilize only $4,000 of such carryovers in computing its net operating loss deduction for 1955.

(4) *Three dates of distribution or transfer.* If the acquiring corporation succeeds to the net operating loss carryovers of three distributor or transferor corporations on three dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date equals or exceeds the income for the first and second partial postacquisition years, the limitation provided by section 381(c)(1)(B) shall be the amount of the postacquisition income. If the amount of the carryovers acquired on the first date equals or exceeds the income for the first partial postacquisition year but does not equal or exceed the income for the first and second partial postacquisition years, the limitation shall be the amount of the postacquisition income reduced by the excess of the income for the first and second partial postacquisition years over the amount of carryovers acquired on the first and second dates of distribution or transfer. If the income for the first partial postacquisition year exceeds the carryovers acquired on the first date, the limitation shall be the postacquisition income reduced by the sum of the amount of such excess plus the amount, if any, by which the income for the second partial postacquisition year exceeds the carryovers acquired on the second date. This subparagraph may be illustrated by the following examples:

Example (1). (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquires the assets of M, N, and Z Corporations in statutory mergers to each of which section 361 applies, the dates of transfer being January 1, January 31, and December 1, respectively. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
M	$4,000	$3,000 ($36,500× 30/365)	$23,400
N	6,000	30,400 ($36,500×304/365)	
Z	50,000	3,000 ($36,500× 30/365)	0
	60,000	36,400	23,400

(ii) Since the carryovers of $4,000 acquired on the first date of transfer exceed the income for the first partial year ($3,000), the limitation provided by section 381(c)(1)(B) is the amount of the postacquisition income ($36,400) reduced by the excess of the income for the first and second partial years ($33,400) over the carryovers acquired on the first and second dates of transfer ($10,000). Therefore, the limitation is $13,000 ($36,400 less $23,400).

Example (2). (i) Assume the same facts as in *Example (1)* except that the amount of the net operating loss carryovers acquired from M Corporation is $1,000. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
M	$1,000	$3,000 ($36,500×30/365)	$2,000
N	6,000	30,400 ($36,500×304/365)	24,400
Z	50,000	3,000 ($36,500×30/365)	0
	57,000	36,400	26,400

(ii) Since the income for the first partial year ($3,000) exceeds the $1,000 of carryovers acquired on the first date by $2,000, the limitation provided by section 381(c)(1)(B) is the postacquisition income of $36,400 reduced by such excess and also reduced by the excess of the income for the second partial year ($30,400) over the carryovers acquired on the second date of transfer ($6,000). Therefore, the limitation is $10,000 ($36,400 less the sum of $2,000 and $24,400).

Example (3). (i) Assume the same facts as in *Example (2)* except that the carryovers acquired from N Corporation are $75,000. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
M	$1,000	$3,000 ($36,500× 30/365)	$2,000
N	75,000	30,400 ($36,500×304/365)	0
Z	50,000	3,000 ($36,500× 30/365)	0
	126,000	36,400	2,000

(ii) Since the income for the first partial year ($3,000) exceeds the $1,000 of carryovers acquired on the first date by $2,000, the limitation provided by section 381(c)(1)(B) is the postacquisition income of $36,400 reduced by $2,000, or $34,400. No further reduction is made since the income for the second partial year ($30,400) does not exceed the carryovers of $75,000 acquired on the second date of transfer.

(5) *Four or more dates of distribution or transfer.* If the acquiring corporation succeeds to the net operating loss carryovers of four or more distributor or transferor corporations on four or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the limitation provided by section 381(c)(1)(B) shall be determined consistently with the methods prescribed in subparagraphs (3) and (4) of this paragraph. The application of this subparagraph may be illustrated by the following example:

Example. (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquired the assets of M, N, O, Y, and Z Corporations in statutory mergers to each of which section 361 applied, the dates of transfer being, respectively, January 1, January 31, March 3, April 2, and December 1. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
M	$1,000	$3,000 ($36,500× 30/365)	$2,000
N	4,000	3,100 ($36,500× 31/365)	
O	1,000	3,000 ($36,500× 30/365)	1,100
Y	10,000	24,300 ($36,500×243/365)	14,300
Z	20,000	3,000 ($36,500× 30/365)	0
	36,000	36,400	17,400

(ii) The limitation provided by section 381(c)(1)(B) equals the postacquisition income of $36,400 reduced by the sum of (a) the $2,000 excess of the income for the first partial year ($3,000) over the carryovers acquired from M Corporation ($1,000), (b) the $1,100 excess of the income for the second and third partial years ($6,100) over the carryovers acquired from N and O Corporations ($5,000), and (c) the $14,300 excess of the income for the fourth partial year ($24,300) over the carryovers acquired from Y Corporation ($10,000). Accordingly, the limitation is $19,000 ($36,400 minus $17,400). Therefore, although X Corporation acquired carryovers aggregating $36,000 during 1955, it can utilize only $19,000 of such carryovers in computing its net operating loss deduction for 1955.

(c) *Determination of taxable income of acquiring corporation under section 381(c)(1)(C)*—(1) *In general.* If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer within one taxable year of the acquiring corporation, then pursuant to section 381(c)(1)(C) the taxable income of the acquiring corporation for its taxable year which is a prior taxable year for purposes of section 172(b)(2) and paragraph (e) of § 1.381(c)(1)–1 shall be determined as provided in this paragraph.

(2) *Division of taxable income.* The taxable income of the acquiring corporation (computed with the modifications specified in section 172(b)(2)(A) but without any net operating loss deduction) shall be allocated proportionately on a daily basis among a preacquisition part year (determined under paragraph (f)(3) of § 1.381(c)(1)–1 by treating the first date of distribution or transfer as though it were the only date of distribution or transfer during the taxable year of the acquiring corporation) and two or more partial postacquisition years (determined as provided in paragraph (b)(2) of this section). The preacquisition part year and each partial

postacquisition year shall be considered a separate taxable year, but only for the limited purpose of applying sections 172(b)(2) and 381(c)(1)(C).

(3) *Net operating loss deduction.* The net operating loss deduction of the preacquisition part year and the partial postacquisition years shall be determined consistently with the manner described in paragraph (f)(6) of § 1.381(c)(1)–1 but by taking into account, in the case of any partial postacquisition year, only the net operating loss carryovers and carrybacks of the acquiring corporation and those net operating loss carryovers from a distributor or transferor corporation which become available to the acquiring corporation as of the close of those dates of distribution or transfer which occur before the beginning of that specific partial postacquisition year. The sequence in which the net operating losses of the distributor or transferor and acquiring corporations shall be applied for this purpose shall be determined in the manner described in paragraph (e) of § 1.381(c)(1)–1. Subject to the preceding sentence, the net operating loss carryovers to any specific partial postacquisition year, whether from a distributor, transferor, or acquiring corporation, shall be taken into account in the order of the taxable years in which the net operating losses arose, beginning with the loss for the earliest taxable year.

(4) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example— (i) *Facts.* X Corporation, which was organized on January 1, 1957, sustained a net operating loss of $20,000 for its calendar year 1957 and had taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1958. During 1958, X Corporation acquired the assets of Y and Z Corporations in statutory mergers to each of which section 361 applied, the dates of transfer being June 30 and September 30, respectively. None of the modifications specified in section 172(b)(2)(A) apply to any of the corporations for any taxable year. The taxable income (computed without any net operating loss deduction) and net operating losses of Y and Z Corporations (which were organized on January 1, 1957, and January 1, 1954, respectively) are set forth below:

Taxable year	Acquiring corporation X	Transferor corporation Y	Transferor corporation Z
1954	xxx	xxx	($30,000)
1955	xxx	xxx	1,000
1956	xxx	xxx	1,000
1957	($20,000)	($25,000)	1,000
Ending 6–30–58	xxx	1,000	xxx
Ending 9–30–58	xxx	xxx	1,000
1958	36,500	xxx	xxx

The sequence in which the losses of the acquiring corporation and the transferor corporations are applied and the computation of the carryovers to X Corporation's calendar year 1959 are illustrated in the following subdivisions of this example.

(ii) *Computation of taxable income.* X Corporation's taxable income, determined in the manner described in subparagraph (2) of this paragraph, for the preacquisition part year and for the partial postacquisition years is as follows:

Year	Taxable income	Computation
Preacquisition part year	$18,100	$36,500×181/365
Partial No. 1	9,200	36,500×92/365
Partial No. 2	9,200	36,500×92/365

(iii) *Z Corporation's 1954 loss.* The carryover to 1959 is $0, computed as follows:

Net operating loss	$30,000
Less:	
Z's 1955, 1956, 1957, and 9/30/58-3 year income	4,000
Net operating loss carryover to Partial No. 2 year	26,000
Less:	
Partial No. 2 year taxable income	9,200
	16,800

The balance of $16,800 is not carried over to 1959 since X Corporation's taxable year 1958 is the last of the five years to which Z's 1954 loss may be carried under section 172(b)(1).

(iv) *Y Corporation's 1957 loss.* The carryover to 1959 is $14,800, computed as follows:

Net operating loss		$25,000
Less:		
Y's 6/30/58-year income		1,000
Net operating loss carryover to Partial No. 1 year		24,000
Less:		
Partial No. 1 year taxable income		9,200
Carryover to Partial No. 2 year		14,800
Less:		
X's Partial No. 2 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 2 year (i.e., Z's 1954 carryover of $26,000 to such partial year)	26,000	

	0
Carryover to 1959	14,800

(v) *X Corporation's 1957 loss.* The carryover to 1959 is $1,900, computed as follows:

Net operating loss		$20,000
Less:		
X's preacquisition part year taxable income		18,100
Carryover to Partial No. 1 year		1,900
Less:		
Partial No. 1 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 1 year (i.e., Y's 1957 carryover of $24,000 to such partial year)	24,000	
		0
Carryover to Partial No. 2 year		1,900
Less:		
Partial No. 2 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 2 year (i.e., Z's 1954 carryover of $26,000, and Y's 1957 carryover of $14,800, to such partial year	40,800	
		0
Carryover to 1959		$1,900

(vi) *Summary of carryovers to 1959.* The aggregate of the net operating loss carryovers to 1959 is $16,700, computed as follows:

Z's 1954 loss	xxx
Y's 1957 loss	$14,800
X's 1957 loss	91,900
Total	16,700

§1.381(c)(2)–1 Earnings and profits.

(a) *In general.* (1) Section 381(c)(2) requires the acquiring corporation in a transaction to which section 381(a) applies to succeed to, and take into account, the earnings and profits, or deficit in earnings and profits, of the distributor or transferor corporation as of the close of the date of distribution or transfer. In determining the amount of such earnings and profits, or deficit, to be carried over, and the manner in which they are to be used by the acquiring corporation after such date, the provisions of section 381(c)(2) and this section shall apply. For purposes of section 381(c)(2) and this section, if the distributor or transferor corporation accumulates earnings and profits, or incurs a deficit in earnings and profits, after the date of distribution or transfer and before the completion of the reorganization or liquidation, such earnings and profits, or deficit, shall be deemed to have been accumulated or incurred as of the close of the date of distribution or transfer.

(2) If the distributor or transferor corporation has accumulated earnings and profits as of the close of the date of distribution or transfer, such earnings and profits shall (except as hereinafter provided in this section) be deemed to be received by, and to become a part of the accumulated earnings and profits of, the acquiring corporation as of such time. Similarly, if the distributor or transferor corporation has a deficit in accumulated earnings and profits as of the close of the date of distribution or transfer, such deficit shall (except as hereinafter provided in this section) be deemed to be incurred by the acquiring corporation as of such time. In no event, however, shall the accumulated earnings and profits, or deficit, of the distribution or transferor corporation be taken into account in determining earnings and profits of the acquiring corporation for the taxable year during which occurs the date of distribution or transfer.

(3) Any part of the accumulated earnings and profits, or deficit in accumulated earnings and profits, of the distributor or transferor corporation which consists of earnings and profits, or deficits, accumulated before March 1, 1913, shall be deemed to become earnings and profits, or deficits, of the acquiring corporation accumulated before March 1, 1913, and any part of the accumulated earnings and profits of the distributor or transferor corporation which consists of increase in value of property accrued before March 1, 1913, shall be deemed to become earnings and profits of the acquiring corporation consisting of increase in value of property accrued before March 1, 1913.

(4) If the acquiring corporation and each distributor or transferor corporation has accumulated earnings and profits as of the close of the date of distribution or transfer, or if each of such corporations has a deficit in accumulated earnings and profits as of such time, then the accumulated earnings and profits (or deficit) of each such corporation shall be consolidated as of the close of the date of distribution or transfer in the accumulated earnings

and profits account of the acquiring corporation. See subparagraph (6) of this paragraph for determination of the accumulated earnings and profits (or deficit) of the acquiring corporation as of the close of the date of distribution or transfer.

(5) If (i) one or more corporations a party to a distribution or transfer has accumulated earnings and profits as of the close of the date of distribution or transfer, and (ii) one or more of such corporations has a deficit in accumulated earnings and profits as of such time, the total of any such deficits shall be used only to offset earnings and profits accumulated, or deemed to have been accumulated under subparagraph (6) of this paragraph, by the acquiring corporation after the date of distribution or transfer. In such instance, the acquiring corporation will be considered as maintaining two separate earnings and profits accounts after the date of distribution or transfer. The first such account shall contain the total of the accumulated earnings and profits as of the close of the date of distribution or transfer of each corporation which has accumulated earnings and profits as of such time, and the second such account shall contain the total of the deficits in accumulated earnings and profits of each corporation which has a deficit as of such time. The total deficit in the second account may not be used to reduce the accumulated earnings and profits in the first account (although such earnings and profits may be offset by deficits incurred, or deemed to have been incurred, after the date of distribution or transfer) but shall be used only to offset earnings and profits accumulated, or deemed to have been accumulated under subparagraph (6) of this paragraph, by the acquiring corporation after the date of distribution or transfer.

(6) In any case in which it is necessary to compute the accumulated earnings and profits, or the deficit in accumulated earnings and profits, of the acquiring corporation as of the close of the date of distribution or transfer and such date is a day other than the last day of a taxable year of the acquiring corporation—

(i) If the acquiring corporation has earnings and profits for its taxable year during which occurs the date of distribution or transfer, such earnings and profits (*a*) shall be deemed to have accumulated as of the close of such date in an amount which bears the same ratio to the undistributed earnings and profits of such corporation for such year as the number of days in the taxable year preceding the date following the date of distribution or transfer bears to the total number of days in the taxable year, and (*b*) shall be deemed to have accumulated after the date of distribution or transfer in an amount which bears the same ratio to the undistributed earnings and profits of such corporation for such year as the number of days in the taxable year following such date bears to the total number of days in such taxable year. For purposes of the preceding sentence, the undistributed earnings and profits of the acquiring corporation for such taxable year shall be the earnings and profits for such taxable year reduced by any distributions made therefrom during such taxable year.

(ii) If the acquiring corporation has an operating deficit for its taxable year during which occurs the date of distribution or transfer, then, unless the actual accumulated earnings and profits, or deficit, as of such date can be shown, such operating deficit shall be deemed to have accumulated in a manner similar to that described in subdivision (i) of this subparagraph.

(7) This paragraph may be illustrated by the following examples, in which it is assumed that none of the accumulated earnings and profits, or deficits, consist of earnings and profits or deficits accumulated, or increase in value of property accrued, before March 1, 1913.

Example (1). (i) M and N Corporations make their returns on the basis of the calendar year. On June 30, 1959, M Corporation transfers all its assets to N Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	M Corporation (transferor)	N Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958 ..	$100,000	$150,000

Description	M Corporation (transferor)	N Corporation (acquirer)
Earnings and profits of taxable year ending June 30, 1959	15,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during calendar year 1959	0	0

(ii) As of the close of June 30, 1959, N acquires from M accumulated earnings and profits of $115,000. Since M and N each has accumulated earnings and profits as of the close of the date of transfer, M's accumulated earnings and profits are added to N's accumulated earnings and profits as of such time. However, no part of M's accumulated earnings and profits is taken into account in determining N's earnings and profits for the calendar year 1959. Therefore, N's earnings and profits for the calendar year 1959 are $36,500.

Example (2). (i) X and Y Corporations make their returns on the basis of the calendar year. On June 30, 1959, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958	$20,000	$100,000
Deficit in earnings and profits for taxable year ending June 30, 1959	80,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during calendar year 1959	0	0

(ii) As of the close of June 30, 1959, Y acquires from X a deficit in accumulated earnings and profits in the amount of $60,000. This deficit may be used only to reduce those earnings and profits of Y which are accumulated, or deemed to have accumulated, after June 30, 1959. Accordingly, as of December 31, 1959, the accumulated earnings and profits of Y amount to $118,100; at such time Y also has a separate deficit in accumulated earnings and profits in the amount of $41,600. These amounts are determined as follows:

Accumulated earnings and profits of Y as of the close of 1958	$100,000
Add:	
Portion of undistributed earnings and profits of Y for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500×181/365)	18,100
Accumulated earnings and profits of Y as of close of June 30, 1959, and also as of Dec. 31, 1959	118,100
Portion of undistributed earnings and profits of Y for 1959 deemed to have accumulated after June 30, 1959 ($36,500×184/365)	18,400
Less:	
Deficit in accumulated earnings and profits acquired by Y from X Corporation as of close of June 30, 1959	60,000
Separate deficit in accumulated earnings and profits of Y as of Dec. 31, 1959	41,600

Example (3). Assume the same facts as in *Example (2)*, except that on September 15, 1959, Y Corporation makes a cash distribution of $96,500. The entire distribution is a dividend: $36,500 from earnings and profits for the taxable year 1959 and $60,000 from earnings and profits accumulated as of December 31, 1958. Accordingly, as of December 31, 1959, Y has accumulated earnings and profits of $40,000, and also has a separate deficit in accumulated earnings and profits of $60,000. These amounts are determined as follows:

Earnings and profits of Y for calendar year 1959	$36,500
Accumulated earnings and profits of Y as of close of 1958	100,000
Total	136,500
Less:	
Distributions during 1959	96,500
Accumulated earnings and profits of Y as of Dec. 31, 1959	40,000
Deficit in accumulated earnings and profits acquired from X as of close of June 30, 1959	$60,000
Less:	
Portion of Y's undistributed earnings and profits for 1959 deemed to have accumulated after June 30, 1959	0
Separate deficit in accumulated earnings and profits of Y as of Dec. 31, 1959	60,000

Example (4). (i) M and N Corporations make their returns on the basis of the calendar year. On June 30, 1959, M Corporation transfers all its assets to N Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	M Corporation (transferor)	N Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958	$100,000	$50,000
Earnings and profits for taxable year ending June 30, 1959	10,000	....
Deficit in earnings and profits for calendar year 1959	....	146,000
Distributions during calendar year 1959	0	0

(ii) Assuming that N has not shown its actual accumulated earnings and profits, or deficit, as of the close of June 30, 1959, N has a deficit in accumulated earnings and profits at such time which amounts to $22,400, determined as follows:

Accumulated earnings and profits of N as of close of 1958	$50,000
Less:	
Portion of deficit in earnings and profits of N for 1959 deemed to have accumulated as of close of June 30, 1959 ($146,000×181/365)	72,400
Deficit in accumulated earnings and profits of N as of close of June 30, 1959, and also as of Dec. 31, 1959	22,400

As of the close of June 30, 1959, N acquires from M accumulated earnings and profits in the amount of $110,000, no part of which may be offset by N's own deficit of $22,400; however, such earnings and profits may be offset by deficits incurred, or deemed incurred, by N after June 30, 1959. Thus, as of December 31, 1959, N has the above-mentioned deficit of $22,400; at such time N also has accumulated earnings and profits in the amount of $36,400, determined as follows:

Accumulated earnings and profits acquired from M as of close of June 30, 1959	$110,000
Less:	
Portion of deficit in earnings and profits of N for 1959 deemed to have accumulated after June 30, 1959 ($146,000×184/365)	73,600
Accumulated earnings and profits of N as of Dec. 31, 1959	36,400

Example (5). Assume the same facts as in *Example (4)*, except that on September 9, 1959, N Corporation makes a cash distribution of $100,000. The amount of $82,000 is a dividend from accumulated earnings and profits, computed as follows:

Accumulated earnings and profits acquired from M as of close of June 30, 1959	$110,000
Less:	
Deficit in earnings and profits of N for 1959 deemed to have accumulated from June 30 through Sept. 8, 1959 ($146,000×70/365)	28,000
Accumulated earnings and profits as of close of Sept. 8, 1959	82,000

As of December 31, 1959, N Corporation has a deficit in accumulated earnings and profits of $68,000, computed as follows:

Deficit in accumulated earnings and profits of N as of close of June 30, 1959	$22,400
Add:	
Portion of N's deficit in earnings and profits for 1959 deemed to have accumulated after Sept. 8, 1959 ($146,000×114/365)	45,600
Deficit in accumulated earnings and profits of N as of Dec. 31, 1959	68,000

Example (6). (i) X, Y, and Z Corporations make their returns on the basis of the calendar year. On June 30, 1959, X Corporation and Y Corporation transfer all their assets to Z Corporation in a statutory merger to which section 361 applies. The books of the three corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
Accumulated earnings and profits (or deficit) at close of calendar year 1958	$35,000	($25,000)	($20,000)
Earnings and profits (or deficit) for taxable year ended June 30, 1959	5,000	(5,000)	....
Earnings and profits for calendar year 1959	....	....	36,500
Distributions during 1959	0	0	0

(ii) As of the close of June 30, 1959, Z acquires from Y a deficit in accumulated earnings and profits of $30,000. As of such time, Z's own deficit in accumulated earnings and profits amounts to $1,900, determined as follows:

Deficit in accumulated earnings and profits of Z as of close of 1958	$20,000
Less:	
Portion of undistributed earnings and profits of Z for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500×181/365)	18,100
Deficit in accumulated earnings and profits as of close of June 30, 1959	1,900

The total deficit of $31,900 may be used only to offset earnings and profits of Z accumulated, or deemed to have accumulated, after June 30, 1959; such deficit may not be used to reduce the accumulated earnings and profits of $40,000 acquired from X as of the close of June 30, 1959. Thus, as of December 31, 1959, the accumulated earnings and profits of Z amount to $40,000; at such time Z Corporation also has a separate deficit in accumulated earnings and profits in the amount of $13,500, determined as follows:

Deficit in accumulated earnings and profits as of close of June 30, 1959	$31,900
Less:	
Portion of undistributed earnings and profits of Z for 1959 deemed to have accumulated after June 30, 1959 ($36,500×184/365)	18,400
Separate deficit in accumulated earnings and profits as of Dec. 31, 1959	13,500

Example (7). X and Y Corporations make their returns on the basis of the calendar year. On December 31, 1954, X transfers all its assets to Y in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (acquirer)
Accumulated earnings and profits (or deficit) at close of calendar year 1954	($50,000)	$210,000
Earnings and profits (or deficit) for calendar year:		
1955	....	5,000
1956	....	(20,000)
1957	....	70,000
1958	....	60,000
1959	....	55,000
Cash distributions on:		
Sept. 1, 1957	....	80,000
Sept. 1, 1958	....	40,000
Sept. 1, 1959	....	30,000

The balances in the accumulated earnings and profits account and the separate deficit account of Y Corporation at the close of the taxable year involved are as follows:

Year	Deficit acquired from X Corporation	Accumulated earnings and profits of Y Corporation
1954	$50,000	$210,000
1955	45,000	210,000
1956	45,000	190,000
1957	45,000	180,000
1958	25,000	180,000
1959	None	180,000

(b) *Successive acquisitions.* (1) If, as of the date of distribution or transfer, either the acquiring corporation, or the distributor or transferor corporation, or both, is considered under paragraph (a) of this section to be maintaining separate earnings and profits accounts as the result of a prior transaction or transactions to which section 381(a) applied, the accumulated earnings and profits, or deficit in accumulated earnings and profits, of each such corporation shall be combined with the appropriate earnings and profits account of the other such corporation. For example, if, as of the date of transfer, the acquiring corporation and the transferor corporation are each maintaining separate accounts, one containing accumulated earnings and profits and the other containing a deficit in accumulated earnings and profits, the amounts in the two accumulated earnings and profits accounts shall be combined into one account, and the amounts in the two deficit accounts shall be combined into a second account, and the amount in one combined account may not be used to offset the amount in the other combined account.

(2) This paragraph may be illustrated by the following examples, in which it is assumed that none of the accumulated earnings and profits, or deficits, consist of earnings and profits or deficits accumulated, or increase in value of property accrued, before March 1, 1913.

Example (1). (i) X, Y, and Z Corporations make their returns on the basis of the calendar year. On June 30, 1958, X Corporation transfers all its assets to Z Corporation in a statutory merger to which section 361 applies, and on August 31, 1958, Y Corporation transfers all its assets to Z Corporation in another statutory merger to which section 361 applies. The books of the three corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
Accumulated earnings and profits (deficit) at close of calendar year 1957	($40,000	$10,000	$60,000
Deficit in earnings and profits for taxable year ending June 30, 1958	(5,000)	....	....
Earnings and profits for taxable year ending Aug. 31, 1958	....	2,000	....
Earnings and profits of calendar year 1958	....	....	36,500
Distributions during calendar year 1958	0	0	0

(ii) As of the close of June 30, 1958, Z acquires from X a deficit in accumulated earnings and profits in the amount of $45,000, which deficit may be used only to reduce those earnings and profits of Z which are accumulated, or deemed to have been accumulated, after June 30, 1958. As of the close of August 31, 1958, Z acquires from Y earnings and profits of $12,000, no portion of which may be reduced by the deficit acquired by Z from X. Accordingly, as of December 31, 1958, Z has accumulated earnings and profits of $90,100, and also has a separate deficit in accumulated earnings and profits of $26,600. These amounts are determined as follows:

Accumulated earnings and profits of Z as of Dec. 31, 1957	$60,000
Add:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated as of close of June 30, 1958 ($36,500×181/365)	18,100

Accumulated earnings and profits of Z as of June 30, 1958	78,100
Add:	
Accumulated earnings and profits acquired by Z from Y as of close of Aug. 31, 1958	12,000
Accumulated earnings and profits of Z as of close of Aug. 31, 1958, and also as of Dec. 31, 1958	90,100
Deficit in accumulated earnings and profits acquired by Z from X as of close of June 30, 1958	45,000
Less:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated from June 30 through Aug. 31, 1958 ($36,500×62/365)	6,200
Separate deficit in accumulated earnings and profits of Z as of Aug. 31, 1958	38,800
Less:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated after Aug. 31, 1958 ($36,500×122/365)	12,200
Separate deficit in accumulated earnings and profits of Z as of Dec. 31, 1958	26,600

Example (2). (i) Assume the same facts as in *Example (1)*, plus the additional fact that on June 30, 1959, Z Corporation transfers all its assets to M Corporation (which makes its return on the basis of the calendar year) in a statutory merger to which section 361 applies, and that as of such time M Corporation is considered to be maintaining separate earnings and profits accounts as the result of a previous transaction to which section 381(a) applied. The books of the two corporations reveal the following information:

Description	Z Corporation (transferor)	M Corporation (acquirer)
Accumulated earnings and profits as of Dec. 31, 1958	$90,100	$50,000
Separate deficit in accumulated earnings and profits as of Dec. 31, 1958	26,600	30,000
Earnings and profits for taxable year ending June 30, 1959	5,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during 1959	0	0

(ii) As of June 30, 1959, M acquires from Z accumulated earnings and profits of $90,100, which amount is combined with M's own accumulated earnings and profits of $50,000; M also acquires from Z a deficit in accumulated earnings and profits of $21,600 ($26,600 minus $5,000), which amount is combined with M's own deficit of $11,900. The total deficit of $33,500 may be used only to reduce earnings and profits of M which are accumulated, or deemed to have accumulated, after June 30, 1959. Accordingly, as of December 31, 1959, M has accumulated earnings and profits of $140,100, and also has a separate deficit in accumulated earnings and profits in the amount of $15,100. These amounts are determined as follows:

Deficit of M as of Dec. 31, 1958	$30,000
Less:	
Portion of M's undistributed earnings and profits for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500×181/365)	18,100
Deficit of M as of June 30, 1959	11,900
Plus:	
Deficit of Z as of June 30, 1959	21,600
Combined deficit of M as of close of June 30, 1959	33,500
Less:	
Portion of M's undistributed earnings and profits for 1959 deemed to have accumulated after June 30, 1959 ($36,500×184/365)	18,400
Separate deficit of M as of Dec. 31, 1959	15,100
Accumulated earnings and profits of M as of Dec. 31, 1958, and also as of June 30, 1959	50,000
Accumulated earnings and profits of Z as of Dec. 31, 1958, and also as of June 30, 1959	90,100
Combined accumulated earnings and profits of M as of close of June 30, 1959, and also as of Dec. 31, 1959	140,100

(c) *Distribution of earnings and profits pursuant to reorganization or liquidation.* (1) If, in a reorganization to which section 381(a)(2) applies, the transferor corporation pursuant to the plan of reorganization distributes to its stockholders property consisting not only of property permitted by section 354 to be received without recognition of gain, but also of other property or money, then the accumulated earnings and profits of the transferor corporation as of the close of the date of transfer shall be computed by taking into account the amount of earnings and profits properly applicable to the distribution, regardless of whether such distribution occurs before or after the close of the date of transfer.

(2) If, in a distribution to which section 381(a)(1) (relating to certain liquidations of subsidiaries) applies, the acquiring corporation receives less than 100 percent of the assets distributed by the distributor corporation, then the accumulated earnings and profits of the distributor corporation as of the close of the date of distribution shall be computed by taking into account the amount of earnings and

profits properly applicable to the distributions to minority stockholders, regardless of whether such distributions occur before or after the close of the date of distribution.

(d) *Treatment of earnings and profits where assets are transferred to a corporation controlled by the acquiring corporation.* If, pursuant to the provisions of paragraph (b)(2) of §1.381(a)–1, a corporation is considered to be the acquiring corporation even though a part of the acquired assets is transferred to one or more corporations controlled by the acquiring corporation, or all the acquired assets are transferred to two or more corporations controlled by the acquiring corporation, then whether any portion of the earnings and profits received by the acquiring corporation under section 381(c)(2) is allocable to such controlled corporation or corporations shall be determined without regard to section 381. See paragraph (a) of §1.312–11.

[T.D. 6586, 26 FR 12550, Dec. 28, 1961, as amended by T.D. 6692, 28 FR 12817, Dec. 3, 1963]

§1.381(c)(3)–1 Capital loss carryovers.

(a) *Carryover requirement.* (1) Section 381(c)(3) requires the acquiring corporation in a transaction to which section 381(a) applies to succeed to, and take into account, the capital loss carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with the capital loss carryovers of the acquiring corporation for purposes of determining the taxable income of the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 1212 in accordance with the conditions and limitations of section 381(c)(3) and this section.

(2) The capital loss carryovers of the acquiring corporation as of the close of the date of distribution or transfer shall be determined without reference to any capital gains or capital losses of the distributor or transferor corporation. The capital loss carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any capital gains or capital losses of the acquiring corporation.

(3) This section contains rules applicable to capital loss carryovers determined without reference to the amendment of section 1212(a) made by section 7 of the Act of September 2, 1964 (Public Law 88–571, 78 Stat. 860) in respect of foreign expropriation capital losses. If the distributor, transferor, or acquiring corporation sustains a net capital loss in a taxable year ending after December 31, 1958, any portion of which is attributable to a foreign expropriation capital loss, such portion shall be carried over to each of the ten succeeding taxable years consistently with the rules prescribed in this section and paragraph (a)(2) of §1.1212–1.

(b) *First taxable year to which carryovers apply.* (1) The capital loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies irrespective of whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year.

(2) The capital loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(c) *Limitation on capital loss carryovers for first taxable year ending after date of distribution or transfer.* (1) Any capital loss carryover of a distributor or transferor corporation which is available to the acquiring corporation as of the close of the date of distribution or transfer shall be a short-term capital loss of the acquiring corporation in each of the taxable years to which the net capital loss giving rise to such carryover may be carried to the extent provided in section 1212 and this section. However, in the first taxable year of the acquiring corporation ending after the date of distribution or transfer, the total capital loss carryovers of the distributor or transferor corporation which may be treated in that year as short-term capital losses of the acquiring corporation is limited by section 381(c)(3)(B) to an amount which bears the same ratio to the acquiring corporation's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such first taxable year (determined without regard to any capital loss carryovers) as the number of days in such first taxable year which follow the date of distribution or transfer bears to the total number of days in such taxable year. Thus, if the date of distribution or transfer is the last day of the acquiring corporation's taxable year, there is no limitation under section 381(c)(3)(B) on the amount of such carryovers which may be treated as short-term capital losses of the acquiring corporation for its first taxable year ending after that date.

(2) The limitation provided by section 381(c)(3)(B) shall be applied to the aggregate of the capital loss carryovers of the distributor or transferor corporation without reference to the taxable years in which the net capital losses giving rise to the carryovers were sustained. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, then the limitation provided by section 381(c)(3)(B) shall be applied to the aggregate of the capital loss carryovers from all of such distributor or transferor corporations.

(3) If the acquiring corporation succeeds to the capital loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(3)(B) to the aggregate of such carryovers shall be determined consistently with the rules prescribed in paragraph (b) of § 1.381(c)(1)–2.

(4) The application of this paragraph may be illustrated by the following example:

Example. (i) X and Y Corporations are organized on January 1, 1954, and make their returns on the basis of the calendar year. On July 4, 1957, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after Dec. 31, 1976), (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($5,000)	0
1955	(10,000)	$5,000
1956	(25,000)	(7,000)
Ending 7–4–57	(8,000)	....
1957	....	36,500

(ii) The capital loss carryovers of X Corporation which are available to Y Corporation as of the close of July 4, 1957, amount to $48,000 in the aggregate; but only $18,000 ($36,500 × 180/365) of such amount may be treated as short-term capital losses of Y Corporation for 1957.

(d) *Computation of carryovers; general rule*—(1) *Sequence for applying losses and determination of capital gain net income.* Section 1212 provides that a net capital loss sustained in any taxable year (hereinafter referred to as the ''loss year'') shall be carried over to each of the five succeeding taxable years and treated in each of such succeeding years as a short-term capital loss to the extent not allowed as a deduction against any capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of any taxable years intervening between the loss year and the taxable year to which such loss is carried. For this purpose, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of any intervening taxable year is determined without regard to the net capital loss for the loss year or for any taxable year thereafter, and the various capital loss carryovers from taxable years preceding the loss year to any such intervening taxable year are considered to be applied in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such year in the order of the taxable years in which the losses were sustained, beginning with the loss for the earliest preceding taxable year. The application of these rules to the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for any taxable year ending after the date of distribution or transfer involves the use of carryovers of the distributor or transferor corporation and of the acquiring corporation. In determining the order in which the capital loss carryovers of the distributor or transferor and acquiring corporations from taxable years ending on or before the date of distribution or transfer are considered to be applied in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for any intervening taxable year ending after such date, the following rules shall apply:

(i) Each taxable year of the distributor or transferor and acquiring corporations which, with respect to the first taxable year of the acquiring corporation ending after the date of distribution or transfer, constitutes a first preceding taxable year, shall be treated as if each such year ended on the same day, whether or not such taxable years actually end on the same day. In like manner, each taxable year of the distributor or transferor and acquiring corporations which, with respect to such first taxable year of the acquiring corporation ending after the date of distribution or transfer, constitutes a second preceding taxable year, shall be treated as if each such year ended on the same day (whether or not such taxable years actually end on the same day), and a similar rule shall be applied with respect to those taxable years of the distributor or transferor and acquiring corporations which constitute third, fourth, and fifth preceding taxable years;

(ii) If in the same preceding taxable year both the distributor or transferor and acquiring corporations incurred a net capital loss which is a carryover to an intervening taxable year of the acquiring corporation ending after the date of distribution or transfer, then in applying such losses in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such an intervening year, either such loss may be taken into account before the other; and

(iii) The rules of subdivisions (i) and (ii) of this subparagraph shall apply regardless of the number of distributor or transferor corporations the assets of which are acquired by the acquiring corporation on the same date of distribution or transfer.

(2) *Cross reference.* If the date of distribution or transfer is a day other than the last day of a taxable year of the acquiring corporation, then in determining the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for its first taxable year ending after the date of distribution or transfer, section 1212 and this paragraph shall be applied in the special manner set forth in paragraph (e) of this section.

(3) *Years to which losses may be carried.* The taxable years to which a net capital loss shall be carried are prescribed by section 1212. Since the taxable year of a distributor or transferor corporation ends with the close of the date of distribution or transfer, such taxable year and the first taxable year of the acquiring corporation which ends after that date are considered two separate taxable years to which a net capital loss of the distributor or transferor corporation for any taxable year ending before that date shall be carried. This rule applies even though the taxable year of the distributor or transferor corporation which ends on the date of distribution or transfer is a period of less than twelve months. However, the distribution or transfer has no effect in determining under section 1212 the taxable years to which a net capital loss of the acquiring corporation is carried. For this purpose, the first taxable year of the acquiring corporation which ends after the date of distribution or transfer constitutes only one taxable year even though such taxable year is considered under paragraph (e) of this section as two taxable years for certain purposes. The application of this subparagraph may be illustrated by the following example:

Example. R and S Corporations are organized on January 1, 1954, and both corporations make their returns on the basis of the calendar year. R Corporation has net capital losses for its years 1954, 1955, and 1957, and S Corporation has net capital losses for its years 1954 and 1956. On June 30, 1958, R Corporation transfers all its assets to S Corporation in a statutory merger to which section 361 applies. The taxable years to which these losses of R and S Corporations may be carried are as follows:

Loss year	Carried to
R1954	R1955, R1956, R1957, R6/30/58, S1958.
S1954	S1955, S1956, S1957, S1958, S1959.
R1955	R1956, R1957, R6/30/58, S1958, S1959.
S1956	S1957, S1958, S1959, S1960, S1961.
R1957	R6/30/58, S1958, S1959, S1960, S1961.

(4) *Computation of carryovers in case where date of distribution or transfer occurs on last day of acquiring corporation's taxable year.* The computation of the capital loss carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a taxable year of the acquiring corporation may be illustrated by the following example:

Example. X and Y Corporations are organized on January 1, 1955, and make their returns on the basis of the calendar year. On December 31, 1956, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after December 31, 1976), (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1955	($20,000)	($2,000)
1956	(10,000)	(8,000)
1957	....	25,000
1958	....	10,000

The sequence in which the net capital losses of X and Y Corporations are applied, and the computation of the capital loss carryovers to Y Corporation's taxable year 1959, may be illustrated as follows. (For purposes of this example, the carryover from a preceding taxable year of the transferor corporation will be applied before the carryover from the same preceding taxable year of the acquiring corporation):

(i) *X Corporation's 1955 loss.* The carryover to 1959 is $0, computed as follows:

Net capital loss	$20,000
Less: Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	25,000
Carryover to Y 1958 and Y 1959	0

(ii)*Y Corporation's 1955 loss.* The carryover to 1959 is $0, computed as follows:

Net capital loss		$2,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryover of $20,000 from X 1955)	20,000	
		5,000
Carryover to Y 1958 and Y 1959		0

(iii) *X Corporation's 1956 loss.* The carryover to 1959 is $0, computed as follows:

Net capital loss		$10,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryovers of $20,000 from X 1955 and $2,000 from Y 1955)	22,000	
		3,000
Carryover to Y 1958		7,000
Less:		
Y's 1958 net capital gain (computed without regard to any capital loss carryovers)	$10,000	
Minus capital loss carryovers to Y 1958	0	
		10,000
Carryover to Y 1959		0

(iv) *Y Corporation's 1956 loss.* The carryover to 1959 is $5,000, computed as follows:

Net capital loss		$8,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryovers of $20,000 from X 1955, $2,000 from Y 1955, and $10,000 from X 1956)	32,000	
		0
Carryover to Y 1958		8,000
Less:		
Y's 1958 net capital gain (computed without regard to any capital loss carryovers)	$10,000	
Minus capital loss carryovers to Y 1958 (i.e., carryover of $7,000 from X 1956)	7,000	
		3,000
Carryover to Y 1959		5,000

(e) *Computation of carryovers when date of distribution or transfer is not on last day of acquiring corporation's taxable year*—(1) *General rule.* If, in determining under paragraph (d) of this section the portion of a net capital loss for any taxable year which is carried over to a succeeding taxable year, an intervening taxable year is a taxable year of the acquiring corporation which includes, but does not end on, the date of distribution or transfer, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of such intervening year shall be determined by applying section 1212 in the special manner provided by this paragraph.

(2) *Taxable year considered as two taxable years.* Such intervening taxable year of the acquiring corporation shall be considered as though it were two taxable years, but only for the limited purpose of computing capital loss carryovers to subsequent taxable years. The first of such two taxable years shall be referred to in this paragraph as the preacquisition part year; the second, as the postacquisition part year. Though considered as two separate taxable years for purposes of this paragraph, the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which a net capital loss is carried under section 1212. See paragraph (d)(3) of this section.

(3) *Preacquisition part year.* The preacquisition part year shall begin with the beginning of such taxable year of the acquiring corporation and shall end with the close of the date of distribution or transfer.

(4) *Postacquisition part year.* The postacquisition part year shall begin with the day following the date of distribution or transfer and shall end with the close of such taxable year of the acquiring corporation.

(5) *Division of capital gain net income.* The capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such intervening taxable year (computed without regard to any capital loss carryovers) of the acquiring corporation shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation acquires the assets of X Corporation on June 30, 1956, and Y Corporation has net capital gain (computed in the manner so prescribed) of $36,600 for its calendar year 1956, then the preacquisition part year capital gain net income (net capital gain for taxable years beginning before January 1, 1977) would be $18,200 ($36,600×182/366) and the postacquisition part year capital gain net income (net capital gain for taxable years beginning before January 1, 1977) would be $18,400 ($36,600×184/366).

(6) *Application of capital loss carryovers.* After obtaining the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the preacquisition part year and postacquisition part year in the manner described in subparagraph (5) of this paragraph, it is necessary to determine the capital loss carryovers which are taken into account with respect to each such part year. The carryovers to be taken into account and the sequence in which such carryovers are applied, shall be determined in accordance with paragraph (d)(1) of this section but subject to the provisions of this subparagraph. With respect to the preacquisition part year, no capital loss carryovers of the distributor or transferor corporation shall be taken into account; that is, only capital loss carryovers of the acquiring corporation shall be taken into account. With respect to the postacquisition part year, capital loss carryovers of both the distributor or transferor corporation and the acquiring corporation shall be taken into account.

(7) *Cross reference.* If an intervening taxable year is a taxable year of the acquiring corporation during which the acquiring corporation succeeds to the capital loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for such intervening taxable year shall be determined consistently with the rules prescribed in paragraph (c) of § 1.381(c)(1)–2, except that the sequence in which the capital loss carryovers of the distributor or transferor and acquiring corporations shall be applied shall be determined under paragraph (d)(1) of this section.

(8) *Illustration.* The application of this paragraph may be illustrated as follows:

Example. X Corporation is organized on April 1, 1959, and makes its return on the basis of the fiscal year ending March 31. Y Corporation is organized on January 1, 1959, and makes its return on the basis of the calendar year. On June 30, 1961, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1959		($24,000)
Ending 3–31–60	($19,000)	
1960		(6,000)
Ending 3–31–61	(5,000)	
Ending 6–30–61	0	
1961		36,500
1962		12,000

The following table shows those taxable years of the transferor and acquiring corporations which, with respect to Y Corporation's calendar year 1961, are first, second, and third preceding taxable years:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
First preceding year	Ending June 30, 1961	1960
Second preceding year	Ending March 31, 1961	1959
Third preceding year	Ending March 31, 1960	

The sequence in which the net capital losses of X and Y Corporations are applied, and the computation of the capital loss carryovers to Y Corporation's calendar year 1963, may be illustrated as follows. (For purposes of this example, the carryover from a preceding taxable year of the acquiring corporation will be applied before the carryover from the same preceding taxable year of the transferor corporation):

(i) *X Corporation's 3/31/60 loss.* The carryover to 1963 is $0, computed as follows:

Net capital loss	$19,000
Less: Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph ($36,500× 184/365)	18,400
Carryover to Y 1962	600
Less: Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	12,000
Carryover to Y 1963	0

(ii) *Y Corporation's 1959 loss.* The carryover to 1963 is $0, computed as follows:

Net capital loss		$24,000
Less: Y's preacquisition part year net capital gain computed under subparagraph (5) of this paragraph ($36,500× 181/365)		18,100
Carryover to Y's postacquisition part year		5,900
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	
Minus capital loss carryovers to postacquisition part year (i.e., carryover of $19,000 from X 3/31/60)	19,000	0
Carryover to Y 1962		5,900
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	
Minus capital loss carryovers to Y 1962 (i.e., carryover of $600 from X 3/31/60)	600	11,400
Carryover to Y 1963		0

(iii) *X Corporation's 3/31/61 loss.* The carryover to 1963 is $0, computed as follows:

Net capital loss		$5,000
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	
Minus capital loss carryovers to postacquisition part year (i.e., carryovers of $19,000 from X 3/31/60 and $5,900 from Y 1959)	24,900	
		0
Carryover to Y 1962		5,000
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	
Minus capital loss carryovers to Y 1962 (i.e., carryovers of $600 from X 3/31/60 and $5,900 from Y 1959)	6,500	
		5,500
Carryover to Y 1963		0

(iv) *Y Corporation's 1960 loss.* The carryover to 1963 is $5,500, computed as follows:

Net capital loss		$6,000
Less:		
Y's preacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,100	
Minus capital loss carryovers to preacquisition part year (i.e., carryover of $24,000 from Y 1959)	24,000	
		0
Carryover to Y's postacquisition part year		6,000
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	

Minus capital loss carryovers to postacquisition part year (i.e., carryovers of $19,000 from X 3/31/60, $5,900 from Y 1959, and $5,000 from X 3/31/61) ..	29,900	0
		0
Carryover to Y 1962		6,000
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	
Minus capital loss carryovers to Y 1962 (i.e., carryovers of $600 from X 3/31/60, $5,900 from Y 1959, and $5,000 from X 3/31/61)	11,5000	
		$500
Carryover to Y 1963		5,500

(f) *Successive acquiring corporations.* An acquiring corporation which, in a transaction to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 1212 and 381, the capital loss carryovers available to the first acquiring corporation under sections 1212 and 381.

[T.D. 6552, 26 FR 1985, Mar. 8, 1961, as amended by T.D. 6867, 30 FR 15094, Dec. 12, 1965; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.381(c)(4)–1 Method of accounting.

(a) *Carryover requirement*—(1) *General rule.* (i) Section 381(c)(4) provides that, in a transaction to which section 381(a) applies, an acquiring corporation shall use the same method of accounting used by the distributor or transferor corporation on the date of distribution or transfer unless different methods of accounting were used on that date by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation. If different methods of accounting were used, the acquiring corporation shall use the method or combination of methods of accounting adopted pursuant to this section.

(ii) The acquiring corporation shall take into its accounts the dollar balances of those accounts of the distributor or transferor corporation representing items of income or deduction which, because of its method of accounting, were not required or permitted to be included or deducted by the distributor or transferor corporation in computing taxable income for taxable years ending on or before the date of distribution or transfer. The acquiring corporation shall similarly take into its accounts the dollar balances of those accounts of the distributor or transferor corporation which represents reserves in respect of which the distributor or transferor corporation has taken a deduction for taxable years ending on or before the date of distribution or transfer. The acquiring corporation shall also take into its accounts the dollar balance of that account of the distributor or transferor corporation which represents a suspense account established by the distributor or transferor corporation under section 166(f)(4) in taxable years ending on or before the date of distribution or transfer. Items of income and deduction shall have the same character in the hands of the acquiring corporation as they would have had in the hands of the distributor or transferor corporation or corporations if no distribution or transfer had occurred. This section shall have no application to items of income or deduction, or dollar balances, to the extent they are attributable to assets or liabilities not distributed or transferred, and shall have no application to items the tax treatment of which is specifically provided for in other paragraphs of section 381(c). In the case of an obligation of the distributor or transferor corporation which is assumed by the acquiring corporation and which gives rise to a liability (within the meaning of paragraph (a)(4) of §1.381(c)(16)–1) after the date of distribution or transfer, the deductibility of such an item is determined under this section if it is not deductible under section 381(c)(16) and the regulations thereunder. The amount of the adjustments necessary to reflect a change in accounting method pursuant to this section, the manner in which they are to be taken into account, and the tax attributable thereto shall be determined and computed under section 481 and the regulations thereunder, subject to the rules provided in paragraphs (c) and (d) of this section. Where such change is a change from the accrual to the installment method by a dealer in personal property, section 453(c) and the regulations thereunder apply.

(2) *Rules of application.* For purposes of section 381(c)(4) and this section, the term *method of accounting* shall have the same meaning as that provided under section 446 and the regulations thereunder. This section shall not be construed as preventing the exercise of any election which may be made by the acquiring corporation without consent of the Commissioner, or preventing the application of section 269 or 482, or the regulations thereunder. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1. See other paragraphs of section 381(c) and the regulations thereunder for other rules regarding the treatment of the carryover of certain items specifically enumerated therein.

(b) *Conditions for continuation of methods of accounting*—(1) *No differences in methods of accounting.* If all the parties to a section 381(a) transaction used the same method of accounting on the date of distribution or transfer, the acquiring corporation shall continue to use such method of accounting, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a different method of accounting. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation and Y Corporation use the accrual method as their overall method of accounting. Both corporations have established a reserve for bad debts under section 166(c). Pursuant to elections made by each corporation, they are amortizing trademark and trade name expenditures over a 60-month period under section 177, expensing intangible drilling and development costs under section 263(c), and accruing real property taxes ratably under section 461(c). It is assumed that there are no other items to which paragraph (a) of this section might apply. Y Corporation acquires all of the assets of X Corporation in a transaction to which section 381(a) applies. On and after the date of distribution or transfer Y Corporation must continue, without further election, to use the same overall method of accounting and the same accounting treatment of the specified items, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the methods of accounting. Thus, Y Corporation shall carry over the balance in X Corporation's reserve for bad debts account, shall continue to amortize and deduct over the remaining portion of the 60-month period the unamortized portion of the trademark and trade name expenditures carried over from X Corporation, and shall continue the same treatment of intangible drilling and development costs and of real property taxes.

Example (2). M Corporation and N Corporation use the cash receipts and disbursements method of accounting. N Corporation acquires all of the assets and assumes all the obligations of M Corporation in a transaction to which section 381(a) applies. M Corporation, immediately prior to the transaction, is entitled to receive $10,000 for unbilled services performed, and has billed but not received payment for services performed in an amount of $20,000. It has received but not paid invoices amounting to $18,000, and has received services in the amount of $5,000 for which no invoices have been received. Since M Corporation and N Corporation are both on the cash receipts and disbursements method, N Corporation must continue to use that method, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change its method of accounting. Accordingly, N Corporation must include in income when received the unrealized receivables of M Corporation and may deduct the payment of those obligations of M Corporation which would have been deductible by such corporation if paid by it. Thus, N Corporation shall treat as ordinary income the receipt by it of M Corporation's $30,000 of receivables, and may deduct upon payment the amount of M Corporation's $23,000 of payables which would have been deductible by it.

Example (3). S Corporation and T Corporation are both publishers and use the accrual method as their overall method of accounting. Both corporations have elected under section 455 to defer prepaid subscription income to the taxable years during which the liability to furnish the newspaper, magazine, or other periodical exists. T Corporation, in a transaction to which section 381(a) applies, acquires all the assets of S Corporation and assumes the liability of such corporation to furnish or deliver the newspaper, magazine, or other periodical. On and after the date of the transfer, T Corporation must continue, without further election, to use the accrual method as its over-all method of accounting and to defer prepaid subscription income under section 455, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the method of accounting. T Corporation shall carry over the closing balance of S Corporation's prepaid subscription income account. The principles in this example would be equally applicable if both corporations had been deferring prepaid subscription income under a method permitted by subsection (e) of section 455.

(2) *Separate businesses.* If, after the date of distribution or transfer, the trades or businesses of the parties to a transaction described in section 381(a) are operated as separate and distinct trades or businesses within the meaning of paragraph (d) of §1.446–1, then the method of accounting employed by the parties to the transaction on the date of distribution or transfer with respect to each trade or business shall be used by the acquiring corporation, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of §1.446–1 to use a different method of accounting, or unless the Commissioner prescribes a different method of accounting under paragraph (b)(1) of §1.446–1. However, if only a single method of accounting may be employed by a taxpayer with respect to a particular item regardless of the number of separate and distinct trades or businesses operated by such taxpayer, but different methods were employed by the several corporations on the date of distribution or transfer with respect to such item, then the acquiring corporation shall adopt the principal method of accounting determined under paragraph (c) of this section (see subparagraph (2)(iv) thereof) for such item, or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable. This subparagraph may be illustrated by the following examples:

Example (1). M Corporation is engaged in a personal service business and uses the cash receipts and disbursements method of accounting. N Corporation is engaged in a retail furniture business and uses the accrual method of accounting. N Corporation acquires the assets of M Corporation in a transaction to which section 381(a) applies. In accordance with paragraph (d) of §1.446–1, N Corporation operates as a separate and distinct trade or business the personal service business formerly operated by M Corporation. Unless consent of the Commissioner is obtained in accordance with paragraph (e) of §1.446–1 to change the method of accounting, N Corporation shall continue to use the cash receipts and disbursements method of accounting with respect to the personal service business formerly operated by M Corporation, and shall use the accrual method of accounting with respect to the retail furniture business.

Example (2). Assume the same facts as in *Example (1)*, except that M Corporation has elected under section 171 to amortize bond premium with respect to fully taxable bonds. N Corporation has not made the election to amortize bond premium with respect to such bonds owned by it. N Corporation may not continue separate accounting methods as to amortizable bond premium but must consistently apply only a single method of accounting with respect to such bond premium since the election to amortize bond premium applies to all fully taxable bonds held by the taxpayer. N Corporation shall use the principal method of accounting determined under paragraph (c) of this section for such bond premium, unless it is determined in accordance with paragraph (d) of this section that a different method of accounting is to be used. However, if such principal or different method of accounting is not to amortize bond premium N Corporation is not precluded from making a new election to the extent permitted by section 171.

(3) *Integrated businesses.* (i) If, after the date of distribution or transfer, any of the trades or business of the parties to a transaction in section 381(a) are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of §1.446–1, then, to the extent that the same methods of accounting were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or are required to be integrated in accordance with section 446(d) and the regulations thereunder, the acquiring corporation shall continue to employ such methods of accounting, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of §1.446–1 to use a different method of accounting, or unless the Commissioner prescribes a different method of accounting under paragraph (b)(1) of §1.446–1.

(ii) If, after the date of distribution or transfer, any of the trades or businesses of the parties to a transaction described in section 381(a) are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of §1.446–1, then, to the extent that different methods of accounting were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or required to be integrated in accordance with section 446(d) and the regulations thereunder, this paragraph shall not apply and the acquiring corporation shall adopt the principal method of accounting determined under paragraph (c) of this section or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). M Corporation and N Corporation both use the accrual method as an overall method of accounting. M Corporation has established a reserve for bad debts while N Corporation uses the specific charge-off method with respect to its bad debts. N Corporation acquires all of the assets of M Corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by M Corporation into the business operated by N Corporation before the date of distribution or transfer. N Corporation shall continue to use the accrual method as its overall method of accounting, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change its method of accounting. N Corporation shall use the principal method of accounting determined under paragraph (c) of this section with respect to bad debts, or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable.

Example (2). X Corporation conducts two separate and distinct trades or businesses, a personal service business with respect to which the cash receipts and disbursements method of accounting is used and a manufacturing business with respect to which the accrual method of accounting is used. Y Corporation conducts a manufacturing business and uses the accrual method of accounting. Y Corporation acquires all of the assets of X Corporation in a transaction to which section 381(a) applies. After the date of distribution or transfer, Y integrates the manufacturing business formerly operated by X Corporation into the manufacturing business operated by it and continues to operate as a separate and distinct trade or business the personal service business formerly operated by X Corporation. Unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the method of accounting, Y Corporation shall continue to use the accrual method of accounting with respect to the integrated manufacturing business and shall continue to use the cash receipts and disbursements method of accounting with respect to the personal service business.

(4) *Rules of application.* In any case where the method of accounting employed on the date of distribution or transfer is continued, it will be unnecessary for the acquiring corporation to renew any election previously made by it or by any distributor or transferor corporation with respect to such method of accounting. Also, the acquiring corporation is bound by any election previously made by it or by any distributor or transferor corporation with respect to such method of accounting which is in effect on the date of distribution or transfer to the same extent as though the distribution or transfer had not occurred. If, on the date of distribution or transfer, any party to a section 381(a) transaction had no established method of accounting for any item, or came into existence as a result of the transaction, such party shall not be considered to be using a method of accounting for such item or having an overall method of accounting different from that used by the other parties to the transaction. Where under other sections of the Internal Revenue Code or regulations thereunder a taxpayer is permitted to elect a method of accounting on a project-by-project, job-by-job, or other similar basis (such as the election to charge taxes and carrying charges to capital account under § 1.266–1), that method elected with respect to each project or job shall be deemed to be an established method of accounting only for the project or job for which it is elected. Accordingly, unless two or more of the parties were working on the same project or job and were using different methods of accounting for such project or job before the date of distribution or transfer, the method of accounting previously elected for each project or job must be continued.

(c) *Change of method of accounting without consent of Commissioner*—(1) *General rule.* If the acquiring corporation may not continue to use, under the provisions of paragraph (b) of this section, the method of accounting used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, the acquiring corporation shall use the principal method of accounting of such corporation (as determined under subparagraph (2) of this paragraph), provided that (i) such method of accounting clearly reflects the income of the acquiring corporation, and (ii) the use of such method is not inconsistent with the provisions of any closing agreement entered into under section 7121 and the regulations thereunder. If the principal method of accounting does not meet these requirements, or if there is no principal method of accounting, see subdivision (i) of paragraph (d)(1) of this section. If the acquiring corporation wishes to use a method of accounting other than the principal method of accounting, see subdivision (ii) of paragraph (d)(1) of this section. Whenever this paragraph applies, the increase or decrease in tax resulting from the change from the method of accounting previously used by any of the corporations involved shall be taken into account by the acquiring corporation. The adjustments necessary to reflect such change and such increase or decrease in tax shall be determined and computed in the same manner as if on the date of distribution or transfer each of the several corporations whose method or methods of accounting are required to be changed in accordance with this section had initiated a change in accounting method. In addition, the acquiring corporation shall take into account the portion of such adjustments which is attributable to pre-1954 Code years to the extent not taken into account by any of the other corporations in accordance with the rules provided in section 481(b)(4) and this paragraph. If the principal method of accounting is adopted under this paragraph, it will be unnecessary for the acquiring corporation to renew any election previously made by it or by any distributor or transferor corporation with respect to such principal method of accounting. Also, in such event, the acquiring corporation is bound by any election previously made by it or by any distributor or transferor corporation with respect to such principal method of accounting which is in effect on the date of distribution or transfer to the same extent as though the distribution or transfer had not occurred.

(2) *Principal method of accounting.* (i) The determination of the principal method of accounting shall be made with respect to each integrated trade or business operated by the acquiring corporation immediately after the date of distribution or transfer, except with respect to items for which only a single method of accounting may be used by any one taxpayer. See subdivision (iv) of this subparagraph. Such determination for an integrated trade or business shall be made by reference to the methods of accounting used immediately preceding the date of distribution or transfer by each of the component trades or businesses which now constitute the integrated trade or business of the acquiring corporation. The method of accounting for items other than those for which special methods of accounting are provided under chapter 1 of the Code and the regulations thereunder (see §1.446–1(c)(1)(iii)) shall be governed by the principal overall method determined for such trade or business under subdivision (ii) of this subparagraph. The method of accounting for items for which special methods of accounting are provided under chapter 1 of the Code and the regulations thereunder shall be determined under subdivision (iii) of this subparagraph.

(ii) The principal overall method of accounting of an integrated trade or business is determined by making a comparison of—

(*a*) The total of the adjusted bases of the assets (determined under section 1011 and the regulations thereunder) immediately preceding the date of distribution or transfer, and

(*b*) The gross receipts for a representative period (ordinarily the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer)

of the component trades or businesses which are integrated or are required to be integrated. If more than one component trade or business used the same overall method, then such total assets and gross receipts of each of the component trades or businesses shall be aggregated and compared with the aggregate of such total assets and gross receipts of other component trades or businesses which used a different overall method. If this comparison shows that the one or more component trades or businesses (using a common overall method of accounting) having the greatest total of the adjusted bases of assets also has the greatest amount of gross receipts, then the overall method of accounting of such one or more component trades or businesses shall be the principal overall method of accounting. If this comparison shows that the one or more component trades or businesses (using a common overall method of accounting) having the greatest total of the adjusted bases of assets does not also have the greatest amount of gross receipts, then there is no principal overall method of accounting, and the acquiring corporation shall request the Commissioner to determine the appropriate overall method of accounting for such integrated trade or business in accordance with paragraph (d) of this section.

(iii) The principal method of accounting for an item for which a special method or methods of accounting are provided under chapter 1 of the Code and the regulations thereunder is determined by comparing the amounts of such item and related accounts for the component trades or businesses in accordance with the principles of subdivision (ii) of this subparagraph. Thus, for example, in the case of bad debts, trades or businesses which are components of the integrated trade or business and which had been using the reserve method of accounting will be compared with the other component trades or businesses which had been using the specific charge-off method of accounting. In such a case, the following factors would ordinarily be used in determining the principal method of accounting for bad debts: (*a*) Sales on account for the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer, (*b*) accounts receivable immediately before the date of distribution or transfer, and (*c*) the amount of debts which became worthless within the meaning of section 166(a) and the regulations thereunder during the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer. If this comparison shows that the one or more component trades or businesses using the same method of accounting with respect to bad debts have the greater amounts of such sales, accounts receivable, and bad debts, then the method of accounting with respect to bad debts for such one or more component trades or businesses shall be the principal method of accounting. If such comparison shows that the one or more component trades or businesses using the same method of accounting with respect to bad debts do not have the greater amounts of all of such items, then there is no principal method of accounting with respect to bad debts, and the acquiring corporation shall request the Commissioner to determine the appropriate method of accounting for bad debts for such integrated trade or business in accordance with paragraph (d) of this section.

(iv) If a single method of accounting must be employed by a taxpayer with respect to a particular item regardless of the number of separate and distinct trades or businesses operated by the taxpayer, the principal method of accounting for such item shall be determined by comparing the aggregate amount of the item and related accounts for all the parties to the transaction using a common method, with the aggregate amount of the item and related accounts for those parties to the transaction which use a different common method. The method of accounting of the party having the greatest aggregate amount of such item and related accounts shall be the principal method of accounting for such item.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). M Corporation, which commenced business in 1955, uses the cash receipts and disbursements method of accounting, while N Corporation uses the accrual method. On June 30, 1961, N Corporation acquires all of the assets of M Corporation in a transaction to which section 381(a) applies. N Corporation then integrates its own business with that of M Corporation. Immediately prior to the transfer the total of the adjusted bases of the assets of N Corporation was greater than that of M Corporation, and for the 12-month period ending on June 30, 1961, the gross receipts of N Corporation were greater than that of M Corporation. Under such circumstances, the accrual method of accounting is the principal overall method of accounting and N Corporation shall use such method for the integrated business, provided it clearly reflects income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting. Except as to items for which N Corporation had no established method of accounting and items for which a special method of accounting is provided under chapter 1 of the Code and the regulations thereunder, all adjustments necessary to place the accounts of M Corporation on the accrual method shall be made in accordance with section 481. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if M Corporation had initiated a change in method of accounting on June 30, 1961.

Example (2). Assume the same facts as in *Example (1)* except that the gross receipts of M Corporation were greater than those of N Corporation for the 12-month period ending on June 30, 1961. N Corporation must, under such circumstances, request the Commissioner to determine the appropriate overall method of accounting, in accordance with the provisions of paragraph (d) of this section. The necessary adjustments to be made by the corporation whose method of accounting is changed shall be made in accordance with section 481 to place the integrated business on the method so adopted. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if the corporation whose method is changed had initiated a change in method of accounting on June 30, 1961.

Example (3). Assume the same facts as in *Example (1).* Assume further that M Corporation's deduction for wages and salaries for the 12 calendar months ending on June 30, 1961, is larger than N Corporation's deduction for wages and salaries for such period. Since wages and salaries is not an item for which a special method of accounting is provided under chapter 1 of the Code or the regulations thereunder, the necessary adjustments shall be made in accordance with section 481 to place the wages and salary account of M Corporation on the accrual method of accounting, provided such accrual method clearly reflects income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if M Corporation had initiated a change in method of accounting on June 30, 1961.

Example (4). Assume the same facts as in *Example (1).* Assume further that M Corporation used the specific charge-off method with respect to bad debts, and that N Corporation has established a reserve for bad debts. M Corporation's sales on account and bad debts for the 12 calendar months ending June 30, 1961, were larger than those of N Corporation. Also M Corporation's accounts receivable immediately prior to June 30, 1961, were larger than those of N Corporation. Since the method of accounting for bad debts is a special method of accounting under section 166, M Corporation's method of accounting for bad debts is the principal method of accounting for such item. Assuming such method clearly reflects income, appropriate adjustments shall be made in accordance with section 481 to the accounts of N Corporation to place N Corporation on the specific charge-off method with respect to all of its bad debts, as if N Corporation had initiated a change in method of accounting on June 30, 1961, and N Corporation shall include the amount of its reserve for bad debts in gross income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting.

Example (5). Assume the same facts as in *Example (1)* except that M Corporation commenced business in 1945. In addition assume that N Corporation is a calendar-year taxpayer and that of the total amount of the adjustments required by section 481 to place the accounts of M Corporation on the accrual method $40,000 is attributable to pre-1954 Code years as described in section 481(b)(4) and the regulations thereunder. Assume further that M Corporation does not elect, under section 481(b)(6), to take the $40,000 portion of the adjustments into account in the manner described in section 481(b)(1) or (2). In computing the increase in tax of M Corporation attributable to the $40,000 portion of the adjustment for the fiscal year ended June 30, 1961, only one-tenth, or $4,000, will be taken into account. The resulting increase in tax shall be taken into account by N Corporation. The remaining nine-tenths of the $40,000 portion of the adjustments, or $36,000, shall be taken into account by N Corporation in the amount of $4,000 in each of the calender years 1962 through 1970.

(d) *Change of method of accounting with consent of Commissioner*—(1) *General rule.* (i) If the acquiring corporation may not continue to use, under paragraph (b), the method of accounting used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, and may not under paragraph (c) use the principal method of accounting, or, if there is no principal method of accounting, then the Commissioner shall determine the appropriate method or combination of methods of accounting to be used.

(ii) If an acquiring corporation wishes to use a method or combination of methods of accounting other than the principal method of accounting which is required to be used by paragraph (c) of this section, it shall apply to the Commissioner for permission to use such other method or combination of methods of accounting. Permission to use such other method or combination of methods of accounting will not be granted unless the acquiring corporation and the Commissioner agree to the terms, conditions, and adjustments under which the change to such method or combination of methods will be effected.

(iii) The increase or decrease in tax resulting from the change from the method of accounting previously used by any of the corporations involved shall be taken into account by the acquiring corporation. The adjustments necessary to reflect such change and such increase or decrease in tax shall be determined and computed in the same manner as if, on the date of distribution or transfer, each of the several corporations that were not using the method or combination of methods of accounting adopted pursuant to subdivision (i) or (ii) of this subparagraph had initiated a change in accounting method.

(2) *Time and manner of making application.* Applications under subparagraph (1) of this paragraph for permission to use a method of accounting or requests for determination of the method of accounting to be used shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, DC, 20224, not later than 90 days after the date of distribution or transfer, except that in cases where the date of distribution or transfer occurs before August 5, 1964, such applications or requests shall be filed not later than November 3, 1964. The application shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in accounting methods used by the corporations concerned; the method or methods of accounting proposed to be used by the acquiring corporation; and the various amounts, if any, of items of income or deduction which will be duplicated or omitted in the computation of taxable income under such proposed method or methods. The Commissioner may also require such other information as may be necessary in order to determine the appropriate method or combination of methods of accounting to be used by the acquiring corporation.

(e) *Special rules applicable to distributions or transfers before August 5, 1964*—(1) *Statute of limitations bars assessment or refund.* If the date of distribution or transfer was before August 5, 1964, and if the assessment of any deficiency or the refund or credit of any overpayment for the taxable year of the acquiring corporation which includes the date of distribution or transfer or any subsequent taxable year is prevented by the operation of any law or rule of law, then this section does not authorize the Commissioner or the acquiring corporation to change any method or methods of accounting in any taxable year of the acquiring corporation. However, the Commissioner or the acquiring corporation may change such method or methods of accounting under the provisions of section 446 and the regulations thereunder or, where applicable, any section of the Internal Revenue Code (other than section 381(c)(4)), or the regulations thereunder, in accordance with which such changes may be made without the consent of the Commissioner.

(2) *Statute of limitations does not bar assessment and refund.* Except as provided in subparagraph (1) of this paragraph—

(i) If the date of distribution or transfer was before August 5, 1964, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, (*a*) adopted or continued a method of accounting consistent with the rules of this section, (*b*) been granted permission by the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a method or combination of methods of accounting, or (*c*) adopted a method of accounting that under other sections of the Internal Revenue Code, or regulations thereunder, may be adopted without the consent of the Commissioner, then the method or methods of accounting adopted or continued in the manner described in (*a*), (*b*), and (*c*) shall not be changed, by reason of the rules contained in this section, by the Commissioner or the acquiring corporation for any taxable year ending after the date of distribution or transfer. However, the Commissioner or the acquiring corporation may change such methods of accounting for any such taxable year under the provisions of, and to the extent permitted by, section 446 and the regulations thereunder or, where applicable, any section of the Internal Revenue Code (other than section 381(c)(4)), or regulations thereunder, in accordance with which such change may be made without the consent of the Commissioner.

(ii) If the date of distribution or transfer was before August 5, 1964, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, adopted or continued a method or methods of accounting other than in the manner described in (*a*), (*b*), and (*c*) of subdivision (i) of this subparagraph, then the acquiring corporation may—

(*a*) Continue to use the method or methods of accounting so adopted or continued if such method or methods clearly reflect income and if proper adjustments were made to reflect the adoption of such method or methods, or

(*b*) Adopt the method or methods of accounting prescribed by this section. Such method or methods of accounting shall be adopted by filing an amended return (which includes the proper adjustments required by this section) for the taxable year of the acquiring corporation which includes the date of distribution or transfer, and by filing amended returns for all subsequent taxable years of the acquiring corporation for which returns have previously been filed. Such amended return or returns shall be accompanied by a copy of the statement described in paragraph (b)(3) of §1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in accounting methods used by the corporations concerned; the method or methods of accounting originally adopted by the acquiring corporation; the method or methods of accounting adopted on the amended return or returns; and the computation of the amount of the adjustments and the resulting increase or decrease in tax.

[T.D. 6750, 29 FR 11263, Aug. 5, 1964, as amended by T.D. 8071, 51 FR 2481, Jan. 17, 1986]

§1.381(c)(5)–1 Inventories.

(a) *Carryover requirement*—(1) *General rule.* Section 381(c)(5) provides that in a transaction to which section 381(a) applies and in which inventories are received by the acquiring corporation (as defined in §1.381(a)–1(b)(2)) such inventories shall be taken by the acquiring corporation (in determining its income) on the same basis on which such inventories were taken by the distributor or transferor corporation on the date of distribution or transfer unless different inventory methods were used on that date by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation. If different methods were used, the acquiring corporation shall use the method or combination of methods of taking inventories adopted pursuant to the provisions of this section.

(2) *Rules of application.* Reference in this section to a method or methods of taking inventories are to be construed as referring to both the method or methods of identifying the goods and the method or methods of valuing the goods. The method or methods of taking inventories shall be determined on the date of distribution or transfer, and any corporation, a party to a section 381(a) transaction whose taxable year does not end on such date shall be considered as using the method or methods of taking inventories that it would have employed had its taxable year ended on such date. The amount of the adjustments necessary to reflect the change in method of taking inventories pursuant to this section, the manner in which they are to be taken into account by the acquiring corporation, and the tax attributable thereto shall

be determined and computed under section 481 and the regulations thereunder, subject to the rules provided in paragraphs (c) and (d) of this section. However, in the case of any party to a section 381(a) transaction which changes its method of taking inventories to the last-in, first-out method of identification, the adjustments required by section 472(d) shall be applicable. See paragraph (e) of this section. This section shall not be construed as preventing any party to a section 381(a) transaction from adopting an inventory method which, under the provisions of section 471 or 472, and the regulations thereunder, may be adopted without the consent of the Commissioner. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1.

(b) *Conditions for continuation of methods of taking inventories*—(1) *No difference in method of taking inventories.* (i) If all the parties to a section 381(a) transaction used the same method of taking inventories on the date of distribution or transfer, the acquiring corporation, whether or not immediately after the date of distribution or transfer it operates separate or integrated trades or businesses, shall continue to use such method of taking inventories, unless the acquiring corporation has, in accordance with paragraph (e) of § 1.446–1, obtained the consent of the Commissioner to use a different method of taking inventories. For purposes of this determination, a corporation shall be deemed to be using the last-in, first-out method of taking inventories with respect to a particular type of goods on the date of the distribution or transfer, if such corporation elects, under the provisions of section 472, to adopt the last-in, first-out method with respect to such goods for its taxable year within which or with which the date of distribution or transfer occurs.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. O and P corporations are manufacturing companies which compute their entire inventories by the use of the last-in, first-out method of identification and the cost basis of valuation. In applying the last-in, first-out method both corporations use the dollar-value method, use the double-extension method, pool under the natural business unit method, and value annual inventory increases by reference to the actual cost of goods most recently purchased. P corporation acquires the assets of O corporation in a transaction to which section 381(a) applies. Under the provisions of this subparagraph, on and after the date of distribution or transfer P corporation must continue to use the last-in, first-out method of identification, the cost basis of valuation, and, in applying the last-in, first-out method, must continue to use the dollar-value method, use the double-extension method, pool under the natural business unit method, and value annual inventory increases by reference to the actual cost of goods most recently purchased, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories.

(2) *Separate businesses.* (i) If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then the method or methods of taking inventories employed by such parties to the transaction on the date of distribution or transfer with respect to such trades or businesses shall be used by the acquiring corporation, unless the acquiring corporation has, in accordance with paragraph (e) of § 1.446–1, obtained the consent of the Commissioner to use a different method of taking inventories. This subparagraph shall not be construed as precluding the Commissioner under section 471 or 472, and the regulations thereunder, from requiring that the method of taking inventories used in a particular trade or business be used in another trade or business with respect to similar types of goods, if, in the opinion of the Commissioner, the use of such method of taking inventories is necessary for a clear reflection of income.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. R Corporation is engaged in the production of radios and television sets and S Corporation is engaged in the production of washers and driers. In computing their inventories both corporations use the cost basis of valuation. R corporation uses the last-in, first-out method of identification, whereas S corporation uses the first-in, first-out method. T corporation acquires the assets of R corporation and S corporation in a transaction to which section 381(a) applies. T corporation operates as a separate and distinct trade or business, within the meaning of paragraph (d) of §1.446–1, each of the businesses formerly operated by R corporation and S corporation. Under the provisions of this subparagraph, T corporation is required to continue to use the method of taking inventories previously used by R corporation and S corporation, respectively, with respect to each trade or business, unless, in accordance with paragraph (e) of §1.446–1, consent of the Commissioner is obtained to change the methods of taking inventories, on and after the dates of transfer. However, the Commissioner may require T corporation, in accordance with §1.472–2, to use the last-in, first-out method with respect to that portion of the goods in the trades or businesses formerly operated by S corporation and T corporation which are similar to goods in the trade or business formerly operated by R corporation, if, in his opinion, the use of the last-in, first-out method with respect to such similar goods is necessary for a clear reflection of income.

(3) *Integrated businesses*—(i) *Same inventory method.* If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of §1.446–1, then, to the extent that the same methods of taking inventories for particular types of goods were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or are required to be integrated in accordance with paragraph (d) of §1.446–1, the acquiring corporation shall continue to employ such methods of taking inventories for such types of goods, unless, in accordance with paragraph (e) of §1.446–1, the acquiring corporation has obtained the consent of the Commissioner to use a different method of taking inventories. This subdivision shall not be construed as precluding the Commissioner under section 471 or 472, and the regulations thereunder, from requiring that the method of taking inventories used with respect to particular types of goods in a particular trade or business operated by the acquiring corporation after the date of distribution or transfer be used with respect to similar types of goods in another trade or business operated by it after such date if, in the opinion of the Commissioner, the use of such method of taking inventories is necessary for a clear reflection of income.

(ii) *Different inventory methods.* If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of §1.446–1, then, to the extent that different methods of taking inventories for particular types of goods were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or required to be integrated in accordance with paragraph (d) of §1.446–1, the acquiring corporation shall not be permitted to continue to use such different methods of taking inventories, and shall adopt the method of taking inventories described in paragraph (c) of this section for such types of goods unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

(iii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example (1). O and P corporations are manufacturing companies which compute their entire inventories by the use of the last-in, first-out method of identification and the cost basis of valuation. In applying the last-in, first-out method both corporations use the dollar-value method and the double-extension method. However, O corporation pools under the natural business unit method while P corporation pools under the multiple pool method. In addition, O corporation determines the cost of its annual inventory increase by reference to the actual cost of goods most recently purchased, whereas P corporation determines the cost of such increase by reference to the actual cost of the goods purchased during the taxable year in the order of acquisition. P corporation acquires the assets of O corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by O corporation into the business which was operated by P corporation before the date of distribution or transfer. Under the provisions of subdivision (i) of this subparagraph (relating to the same inventory methods in an integrated trade or business), P corporation shall continue to use the last-in, first-out method of identification, the cost basis of valuation, and in applying the last-in, first-out method, shall continue to use the dollar-value method and the double-extension method, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories. However, under the provisions of subdivision (ii) of this subparagraph (relating to different inventory methods in an integrated trade or business), P corporation shall use the method of taking inventories described in paragraph (c) of this section with respect to the method of pooling and the method of determining the cost of annual inventory increases, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

Example (2). Y and Z corporations are engaged in the manufacture of cereal products. Y corporation uses the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuing its inventories, including oats. Z corporation uses the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuing its inventories, except oats which are valued on the cost method. Y corporation acquires all of the assets of Z corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by Z corporation into the business which was operated by Y corporation before the date of distribution or transfer. Under the provisions of subdivision (i) of this subparagraph (relating to the same inventory methods in an integrated trade or business), Y corporation must continue to use the first-in, first-out method with respect to all of its inventories and must continue to use the cost or market, whichever is lower, method of valuing all inventories except oats, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories. In addition, under the provisions of subdivision (ii) of this subparagraph (relating to different inventory methods in an integrated trade or business), Y corporation shall use the method described in paragraph (c) of this section in valuing its inventory of oats, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of valuing its oats.

(4) *Rules of application.* (i) In any case where the method of taking inventories employed on the date of distribution or transfer is continued, it will be unnecessary for the acquiring corporation to renew any election previously made by it or by any distributor or transferor corporation with respect to such method of taking inventories, and the acquiring corporation is bound by any such elections. If, on the date of distribution or transfer, any party to a section 381(a) transaction had no inventories of a particular type of goods, or such party came into existence as a result of the transaction, such party shall not be considered to be using a method of taking inventories for the particular type of goods different from that used by the other parties to the transaction. If, on the date of distribution or transfer, any one of the parties to the transaction is using the cash receipts and disbursements method of accounting and is not required to take inventories, the determination as to whether such method of accounting is to be continued by the acquiring corporation shall be made in accordance with section 381(c)(4) and the regulations thereunder.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). M corporation is engaged in manufacturing and computes its inventories under the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuation. N corporation is also engaged in manufacturing and computes its inventories under the first-in, first-out method of identification and the cost method of valuation. M corporation acquires the assets of N corporation in a transaction to which section 381(a) applies and M corporation integrates the business formerly operated by N corporation into the business which was operated by M corporation before the date of distribution or transfer. On the date of distribution or transfer, N corporation has inventories of sheet steel while M corporation has no inventories of this particular type of goods. In all other respects the inventories of the two corporations consist of similar types of goods. Under the provisions of this subparagraph, M corporation must use the first-in, first-out method of identification and the cost method of valuation of inventories of sheet steel, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking such inventories. For other goods in its inventories M corporation must use the first-in, first-out method of identification (as required by subparagraph (3)(i) of this paragraph), and with respect to the method of valuation, must use the method of taking inventories described in paragraph (c) of this section, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

Example (2). W corporation is engaged in the business of raising cattle and uses the cash receipts and disbursements method of computing taxable income. Inventories, therefore, are not required. X corporation is also engaged in the business of raising cattle and uses the accrual method of computing taxable income under which it has elected to use the ''farm-price method'' of valuing inventories. The assets of W corporation are acquired by X corporation in a transaction to which section 381(a) applies and X corporation integrates the business formerly operated by W corporation into the business which was operated by X corporation before the date of distribution or transfer. Under the provisions of this subparagraph, whether X corporation is required to take inventories will depend upon which method of accounting is used by X corporation after the date of distribution or transfer, in accordance with the provisions of section 381(c)(4) and the regulations thereunder. Therefore, if X corporation uses the cash receipts and disbursements method, it will not be required to take inventories into account in computing its taxable income. However, if X corporation uses the accrual method, it must use the ''farm-price method'' of taking inventories, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

(c) *Change of method of taking inventories without consent of Commissioner*—(1) *General rule.* If, under the provisions of paragraph (b) of this section, the acquiring corporation is not permitted to continue to use the method of taking inventories used by it or by the distributor or transferor corporation or corporations on the date of distribution or transfer, the acquiring corporation shall use the principal method of taking inventories for each particular type of goods of such corporations, as determined under subparagraph (2) of this paragraph: *Provided,* That:

(i) Such method clearly reflects the income of the acquiring corporation after the distribution or transfer as provided by sections 446(a) and 471 and the regulations thereunder, and

(ii) The use of such method is not inconsistent with the provisions of any closing agreement entered into under section 7121 and the regulations thereunder.

If the principal method does not satisfy the requirements of subdivisions (i) and (ii) of this subparagraph, or if the acquiring corporation wishes to use a method other than the principal method, see paragraph (d)(1) of this section. If the principal method of taking inventories is adopted under this paragraph, it will not be necessary for the acquiring corporation or corporations to renew any election previously made by it or by the distributor or transferor corporation with respect to such principal method of taking inventories, and the acquiring corporation is bound by any such election.

(2) *Principal method of taking inventories.* The determination of the principal method of taking inventories shall be made with respect to each particular type of goods of each integrated trade or business operated by the acquiring corporation immediately after the date of distribution or transfer. Such determination for each integrated trade or business shall be made by reference to the methods of taking inventories previously used in the component trades or businesses for such types of goods which constitute the subsequent integrated trade or business of the acquiring corporation. For purposes of this determination, a corporation shall be deemed to be using the last-in, first-out method of taking inventories with respect to a particular type of goods on the date of the distribution or transfer, if such corporation elects, under the provisions of section 472, to adopt the last-in, first-out method with respect to such goods for its taxable year within which or with which the date of distribution or transfer occurs. The fair market value of the particular types of goods of each group of component trades or businesses with respect to which one method of taking inventories common to all was employed shall be compared with the fair market value of comparable types of goods of other groups of component trades or businesses with respect to which another method of taking inventories common to all was employed. For purposes of the above comparison and to the extent that particular types of goods are included in inventory by grouping or pooling, then such group or pool shall be considered as a single unit. The total fair market value of such group or pool shall be the basis

for comparison in determining the principal method of taking inventories. The method of taking inventories of the group of component trades or businesses having the largest fair market value of such inventories shall be the principal method of taking inventories. For purposes of this subparagraph, the fair market value of the inventories of a component trade or business shall be determined immediately after the date of distribution or transfer.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). (i) X, Y, and Z corporations are all engaged in the manufacture of sheet metal. In addition, Y and Z corporations are engaged in the manufacture of paper containers. X and Y corporations use the first-in, first-out method of identifying goods and the cost method of valuing all inventories, while Z corporation uses the first-in, first-out method of identifying goods and the cost or market, whichever is lower, method of valuing all inventories. X, Y, and Z corporations enter into a transaction to which section 381(a) applies, and the acquiring corporation integrates the sheet metal businesses formerly operated by X, Y, and Z corporations and also integrates the paper container businesses formerly operated by Y and Z corporations. Each corporation has the same types of goods in the inventories of its sheet metal business and Y and Z corporations have the same types of goods in the inventories of their paper container businesses. Immediately after the date of distribution or transfer the fair market values of the respective inventories are as follows:

	X	Y	Z
Sheet metal	$10,000	$7,000	$15,000
Paper container	....	6,000	7,000

(ii) Since X, Y, and Z corporations all used the first-in, first-out method of identifying their inventories as of the date of distribution or transfer, then, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation shall continue to use the first-in, first-out method of identifying all goods unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(iii) Since the acquired corporations used different methods of valuing inventories in their sheet metal business and their paper container business, when the businesses were integrated the acquiring corporation must, under the provisions of this paragraph, determine which method of inventory valuation used by the acquired corporations on the date of distribution or transfer is the principal method of inventory valuation for each of such businesses.

(*a*) In determining which is the principal method of valuing inventories for the sheet metal business pursuant to subparagraph (2) of this paragraph, the total fair market value of the sheet metal inventories of X and Y corporations, $17,000 (i.e., $10,000 +$7,000=$17,000), is compared with the fair market value of the sheet metal inventory of Z corporation, $15,000. Since the total fair market value of the sheet metal inventories of X and Y corporations ($17,000) exceeds the fair market value of the sheet metal inventory of Z corporation ($15,000), the cost method of valuation used by X and Y corporations is the principal method of taking such inventories, and must be used by the acquiring corporation in valuing such inventories, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(*b*) In determining which is the principal method of valuing inventories for the paper container business pursuant to subparagraph (2) of this paragraph, the fair market value of the paper container inventory of Y corporation ($6,000) is compared with the fair market value of the paper container inventory of Z corporation ($7,000). Since the fair market value of the paper container inventory of Z corporation ($7,000) exceeds the fair market value of the paper container inventory of Y corporation ($6,000), the cost or market, whichever is lower, method of valuation used by Z corporation is the principal method of taking such inventories, and must be used by the acquiring corporation in valuing such inventories, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

Example (2). (i) X, Y, and Z corporations are all engaged in the manufacture of electrical appliances. In addition, X and Z corporations are engaged in the manufacture of plastic containers. X corporation uses the first-in, first-out method of identifying goods and the cost method of valuing all inventories. Y and Z corporations use the last-in, first-out method of identifying goods and the cost method of valuing all inventories. In applying the last-in, first-out method, Y corporation uses the dollar value method, the double-extension method, and pools under the natural business unit method, while Z corporation uses the dollar value method, the double-extension method, and pools under the multiple pooling method for all inventories. X, Y, and Z corporations enter into a transaction to which section 381(a) applies, and the acquiring corporation integrates the electric appliance businesses formerly operated by X, Y, and Z corporations and also integrates the plastic container businesses formerly operated by X and Z corporations. Each corporation has the same types of goods in the inventories of its electric appliance business and X and Z corporations have the same types of goods in the inventories of their plastic container businesses. Immediately after the date of distribution or transfer, the fair market values of the respective inventories are as follows:

	X	Y	Z
Electric appliance	$13,000	$10,000	$5,000
Plastic container	7,000	....	6,000

(ii) Since X, Y, and Z corporations all used the cost method of valuing their inventories as of the date of distribution or transfer, then, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation shall continue to use the cost method of valuing all goods unless, in accordance with paragraph (e) of §1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(iii) Since the acquired corporations used different methods of identifying inventories in their electric appliance business and their plastic container business, when the businesses were integrated the acquiring corporation must, under the provisions of this paragraph, determine which method of inventory identification used by the acquired corporations on the date of distribution or transfer is the principal method of inventory identification for each of such businesses.

(*a*)(*1*) In determining which is the principal method of identifying inventories for the electric appliance business pursuant to subparagraph (2) of this paragraph, the fair market value of the electric appliance inventory of X corporation, $13,000, is compared with the total fair market value of the electric appliance inventories of Y and Z corporations, $15,000 (i.e., $10,000+$5,000 =$15,000). Since the total fair market value of the electric appliance inventories of Y and Z corporations ($15,000) exceeds the fair market value of the electric appliance inventory of X corporation ($13,000), the last-in, first-out method of identification is the principal method of taking the electric appliance inventories and must be used by the acquiring corporation, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(*2*) Since Y and Z corporations used different pooling methods, in applying the last-in, first-out method, the acquiring corporation must, under the provisions of this paragraph, determine which pooling method as used by Y and Z corporations on the date of distribution or transfer is the principal method. In making such determination pursuant to subparagraph (2) of this paragraph, the fair market value of the electric appliance inventory of Y corporation ($10,000) is compared with the fair market value of the electric appliance inventory of Z corporation ($5,000). Since the fair market value of the electric appliance inventory of Y corporation ($10,000) exceeds the fair market value of the electric appliance inventory of Z corporation ($5,000), the natural business unit method is the principal method of pooling and must be used by the acquiring corporation in applying the last-in, first-out method with respect to the electric appliance business, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

In addition, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation must use the dollar value method and the double-extension method for valuing goods in its electric appliance inventory since Y and Z corporations both used such methods in valuing their electric appliance inventories as of the date of distribution or transfer, unless, in accordance with paragraph (e) of §1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(*b*) In determining which is the principal method of identifying inventories for the plastic container business pursuant to subparagraph (2) of this paragraph, the fair market value of the plastic container inventory of X corporation ($7,000) is compared with the fair market value of the plastic container inventory of Z corporation ($6,000). Since the fair market value of the plastic container inventory of X corporation. ($7,000) exceeds the fair market value of the plastic container inventory of Z corporation ($6,000) the first-in, first-out method of identification, as used by X corporation, is the principal method of taking the plastic container inventories and must be used by the acquiring corporation, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(d) *Change of method of taking inventories with consent of the Commissioner*—(1) *General rule*—(i) *Carryover and principal method not permitted.* If the acquiring corporation is not permitted, under paragraph (b) of this section, to continue to use the method of taking inventories used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, and is not permitted, under paragraph (c) of this section, to use the principal method of taking inventories, then such acquiring corporation must request the Commissioner to determine the appropriate method of taking inventories.

(ii) *Principal method required.* If the acquiring corporation wishes to use a method of taking inventories other than the principal method of taking inventories which is required to be used under paragraph (c) of this section, it shall apply to the Commissioner for permission to use such other method of taking inventories. Permission to use such other method of taking inventories will not be granted unless the acquiring corporation and the Commissioner agree to the terms, conditions, and adjustments under which the change to such method will be effected.

(2) *Time and manner of making application.* Request for a determination of the method of taking inventories to be used under subparagraph (1)(i) of this paragraph or applications for permission to use a method of taking inventories under subparagraph (1)(ii) of this paragraph shall be filed with the Commissioner of Internal Revenue, Attention: T:I:C, Washington, DC 20224, not later than 90 days after the date of distribution or transfer, except that in cases where the date of distribution or transfer occurs before January 15, 1975, such applications or requests shall be filed not later than 90 days after such date. The application shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the differences in methods of taking inventories used by the corporations concerned; the method of taking inventories proposed to be used by the acquiring corporations; and the amount of adjustments necessary to prevent duplication or omission of items in the computation of taxable income under such proposed method. The Commissioner may also require such other information as may be necessary in order to determine the proper method of taking inventories to be used by the acquiring corporation.

(e) *Treatment of layers of inventories by the acquiring corporation and rules for making adjustments*—(1) *In general.* This paragraph provides rules for treating layers of inventories by the acquiring corporation and rules for making adjustments, once the acquiring corporation's method of taking inventories for its taxable year including the date of distribution or transfer has been determined in accordance with the rules set forth in paragraphs (a) through (d) of this section. Thus, for example, if the acquiring corporation uses the last-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, either because such corporation elects the last-in, first-out method of taking inventories under the provisions of section 472 for such year or because such method is otherwise determined to be the principal method of taking inventories under paragraph (c)(2) of this section, then such corporation shall integrate its layers of inventories and make the necessary adjustments in accordance with the rules under paragraph (e)(2) of this section.

(2) *Acquiring corporation uses last-in, first-out method*—(i) *Dollar-value method—(a) Distributor or transferor corporation using last-in, first-out method.* In any case where the acquiring corporation is required or permitted to use the dollar value method of pricing inventories on the last-in, first-out method for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be placed on the dollar value method pursuant to the rules contained in paragraph (f) of § 1.472–8, and then such inventories shall be integrated with the inventories of the acquiring corporation. If pools of each corporation are permitted or required to be combined, they shall be combined in accordance with the principles set forth in paragraph (g)(2) of § 1.472–8. For purposes of combining pools, all base-year inventories or layers of increment which occur in taxable years including the same December 31 shall be combined. A base-year inventory or layer of increment occurring in any short taxable year not including a December 31 or in the final taxable year of a distributor or transferor corporation shall be merged with and considered a layer of increment of its immediately preceding taxable year.

(*b*) *Distributor or transferor corporation not using last-in, first-out method.* In any case where the acquiring corporation is required or permitted to use the last-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which did not use the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having been acquired at their average unit cost in a single transaction on the date of distribution or transfer. Thus, where the acquiring corporation is required or permitted to use the dollar value method of pricing inventories, if an item of inventory is to be combined in an existing dollar value pool, such item shall be treated as if it were purchased at its average unit cost on the date of distribution or transfer with respect to such pool. On the other hand, if such item is not to be combined in an existing pool and the taxpayer otherwise uses LIFO with respect to such item, such item will be treated as if it were purchased at its average unit cost on the date of distribution or transfer with respect to a new pool (if any), with the base-year being the year of distribution or transfer. Adjustments resulting from a restoration to cost of any write-down to market value of such inventories of a distributor or transferor corporation shall be taken into account by such corporation in its final taxable year (where such year is closed by reason of section 381(b)). See section 472(d).

(ii) *Specific goods method—(a) Distributor or transferor corporation using last-in, first-out method.* In any case where the acquiring corporation is required or permitted to use the specific goods method of pricing inventories on the last-in, first-out method for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having the acquisition dates and costs of the distributor or transferor corporation.

(*b*) *Distributor or transferor not using last-in, first-out method.* See paragraph (e)(1)(i)(*b*) of this section.

(3) *Acquiring corporation uses first-in, first-out method*—(i) *Distributor or transferor corporations not using first-in, first-out method.* In any case where the acquiring corporation is permitted or required to use the first-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which did not use the first-in, first-out method shall be treated by the acquiring corporation as having the same acquisition dates and costs which such inventory would have had if the distributor or transferor corporation had been using the first-in, first-out method for its taxable year in which the distribution or transfer occurred. However, if the acquiring corporation values its inventories at cost or market, whichever is lower, then the acquired inventories shall be treated as having been acquired at cost or market, whichever is lower.

(ii) *Distributor or transferor corporation using first-in, first-out method.* In any case where the acquiring corporation is required or permitted to use the first-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used such method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having the same acquisition dates and costs as the distributor or transferor corporations. However, where the acquiring corporation values its inventories at cost or market, whichever is lower, then the acquiring corporation shall treat the acquired inventories as having been acquired at cost or market, whichever is lower.

(4) *Adjustments.* Except as provided in paragraph (e)(1) of this section with respect to any adjustments under section 472(d), the adjustments necessary to reflect the change from the method of taking inventories previously used by any of the corporations involved (including any adjustments required by section 481), shall be determined and computed in the same manner as if on the date of distribution or transfer, each of the several corporations that were not using the method of taking inventories used by the acquiring corporation for its taxable year including the date of distribution or transfer had

initiated a change in the method of taking inventories. However, such adjustments (as an item of income or deduction, as the case may be) shall be taken into account solely by the acquiring corporation in computing its taxable income.

(f) *Basis of inventories received.* The basis of inventories received by the acquiring corporation from a distributor or transferor corporation shall be determined in accordance with section 334(b)(1) or 362(b), and the regulations thereunder. See also section 1013, and the regulations thereunder.

(g) *Additional rules applicable to distributions or transfers before January 15, 1975*—(1) *Statute of limitations bars assessment or refund.* If the date of distribution or transfer was before January 15, 1975, and if the assessment of any deficiency or the refund or credit of any overpayment for the taxable year of the acquiring corporation which includes the date of distribution or transfer or any subsequent taxable year is prevented by the operation of any law or rule of law, then this section does not authorize the Commissioner or the acquiring corporation to change any method or methods of computing inventories in any taxable year of the acquiring corporation. However, the Commissioner or the acquiring corporation may change such method or methods of computing inventories under the provisions of section 446, 471, or 472 and the regulations thereunder.

(2) *Statute of limitations does not bar assessment and refund.* Except as provided in subparagraph (1) of this paragraph—

(i) If the date of distribution or transfer was before January 15, 1975, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer:

(*a*) Adopted or continued a method or methods of taking inventories consistent with the rules of this section,

(*b*) Been granted permission by the Commissioner, in accordance with section 446, 471, or 472 and the regulations thereunder, to use a method or methods of taking inventories, or

(*c*) Adopted a method or methods of taking inventories that, under section 446, 471, or 472 and the regulations thereunder may be adopted without the consent of the Commissioner,

then the method or methods of taking inventories adopted or continued in the manner described in (*a*), (*b*), or (*c*) of this subdivision, shall not be changed, by reason of the rules contained in this section, by the Commissioner or by the acquiring corporation for any taxable year ending after the date of distribution or transfer. However, the Commissioner or the acquiring corporation may change such method or methods of taking inventories for any such taxable year under the provisions of, and to the extent permitted by, section 446, 471, or 472 and the regulations thereunder.

(ii) If the date of distribution or transfer was before January 15, 1975, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, adopted or continued a method or methods of taking inventories other than in the manner described in (*a*), (*b*), or (*c*) of subdivision (i) of this subparagraph, then the acquiring corporation may—

(*a*) Continue to use the method or methods of taking inventories so adopted or continued if such method or methods clearly reflect income and if proper adjustments were made to reflect the adoption of such method or methods, or

(*b*) Adopt the method or methods of taking inventories prescribed by this section.

Such method or methods of taking inventories shall be adopted by filing an amended return (which includes the proper adjustments required by this section) for the taxable year of the acquiring corporation which includes the date of distribution or transfer, and by filing amended returns for all subsequent taxable years of the acquiring corporation for which returns have previously been filed. Such amended return or returns shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in methods of taking inventories used by the corporation concerned; the method or methods of taking inventories originally adopted by the acquiring corporation; the method or methods of taking inventories adopted on the amended return or returns; and the computation of the amount of the adjustments and the resulting increase or decrease in tax.

(h) *Effective date.* This section is applicable with respect to taxable years beginning after January 15, 1975. However, if a taxpayer wishes to rely on the rules stated in this section for taxable years beginning before January 15, 1975 it may do so, subject to the provisions of paragraph (g) of this section.

(Sec. 381(c)(5) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 381(c)(5) and 7805))

[T.D. 7344, 40 FR 2684, Jan. 15, 1975]

§1.381(c)(6)–1 Depreciation method.

(a) *Carryover requirement*—(1) *Distributions in taxable years ending before July 25, 1969.* (i) Section 381(c)(6) provides that if, in a transaction in a taxable year which ends before July 25, 1969, to which section 381(a) applies, an acquiring corporation acquires depreciable property from a distributor or transferor corporation which computes its allowance for the depreciation of the property under section 167(b)(2), (3), or (4), the acquiring corporation shall compute its depreciation allowance by the same method used by the distributor or transferor corporation with respect to such property. Thus, if the distributor or transferor corporation used the sum of the years-digits method under section 167(b)(3) with respect to an asset distributed or transferred to an acquiring corporation, the acquiring corporation will be required to use the sum of the years-digits method with respect to such asset acquired. The computation of the depreciation allowance with respect to the property acquired shall be made under the provisions of section 167 and the regulations thereunder.

(ii) The rules provided in section 381(c)(6) and subdivision (i) of this subparagraph will apply only with respect to that part or all of the basis of the property in the hands of the acquiring corporation immediately after the date of distribution or transfer as does not exceed the basis of the property in the hands of the distributor or transferor corporation on the date of the distribution or transfer. For this purpose, the basis of the property in the hands of the distributor or transferor corporation shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. For provisions defining the date of distribution or transfer see §1.381(b)–1(b).

(2) *Distributions in taxable years ending after July 24, 1969.* (i) Section 381(c)(6) provides that if, in a transaction in a taxable year ending after July 24, 1969, to which section 381(a) applies, an acquiring corporation acquires depreciable property from a distributor or transferor corporation which computes its allowances for the depreciation of the property under subsection (b), (j), or (k) of section 167, the acquiring corporation shall compute its depreciation allowance by the same method used by the distributor or transferor corporation with respect to such property. Thus, if the distributor or transferor corporation used the straight line method under section 167(b)(1) with respect to an asset distributed or transferred to an acquiring corporation, the acquiring corporation will be required to use the straight line method with respect to such asset. Similarly, if the distributor or transferor corporation elected to compute depreciation under section 167(k) with respect to property attributable to rehabilitation expenditures, and such property is transferred to an acquiring corporation, the acquiring corporation will be required to compute depreciation under section 167(k) with respect to the property acquired. The computation of the depreciation allowance with respect to the property acquired shall be made under the provisions of section 167 and the regulations thereunder.

(ii) The rules provided in section 381(c)(6) and subdivision (i) of this subparagraph shall apply only with respect to that part or all of the basis of the property in the hands of the acquiring corporation immediately after the date of distribution or transfer as does not exceed the basis of the property in the hands of the distributor or transferor corporation on the date of the distribution or transfer. For this purpose, the basis of the property in the hands of the distributor or transferor corporation shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. For provisions defining the date of distribution or transfer see § 1.38(b)–1(b).

(b) *Portion in excess of distributor or transferor corporation's basis*—(1) *General rule.* With respect to that part of the basis of the depreciable property (other than certain section 1250 property described in subparagraph (2) of this paragraph) which in the hands of the acquiring corporation exceeds the adjusted basis to the distributor or transferor corporation, the acquiring corporation may use any reasonable method of computing depreciation, other than the methods provided in section 167(b)(2), (3), or (4). See paragraph (b) of § 1.167(b)–0 for methods which are acceptable under section 167(a) with respect to such property. See also sections 334(b)(1) and 362(b) for the determination of basis of property in the hands of the acquiring corporation in connection with a transaction to which section 381(a) applies.

(2) *Section 1250 property.* With respect to that part of the basis of section 1250 property acquired after July 24, 1969, which in the hands of the acquiring corporation exceeds the adjusted basis to the distributor or transferor corporation, the acquiring corporation shall be subject to the limitations contained in section 167(j)(4) (relating to used section 1250 property) or 167(j)(5) (relating to used residential rental property). Thus, for example, if section 1250 property which is not residential rental property is acquired in a section 381(a) transaction after July 24, 1969, the straight line method of depreciation (or other method allowable under section 167(j)(4)(B)) is the only acceptable method with respect to that portion of the basis of the property which, in the hands of the acquiring corporation, exceeds the adjusted basis to the transferor or distributor corporation.

(c) *Records required.* Records shall be maintained in sufficient detail to identify any depreciable property to which this section applies, and to establish the basis thereof.

(d) *Agreement under section 167(d).* To the extent not inconsistent with paragraph (b) of this section, an acquiring corporation shall be treated as the distributor or transferor corporation in the case of an agreement between the distributor or transferor corporation and the district director under section 167(d) and § 1.167(d)–1 with respect to property to which section 381(c)(6) and this section apply. Thus, in the case where the basis of an asset in the hands of an acquiring corporation exceeds the basis of such asset in the hands of the distributor or the transferor corporation, such an agreement will not have the effect of permitting the acquiring corporation to compute its depreciation allowance with respect to such excess basis under the methods provided in section 167(b)(2), (3), or (4). However, the provisions of the agreement will continue to apply with respect to the useful life of the asset.

(e) *Change of method of depreciation.* Although the acquiring corporation is required to use the method of computing depreciation used by the distributor or transferor with respect to depreciable property to which this section applies, such acquiring corporation may use another method with respect to such property if consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1. Further, subject to the provisions of paragraph (b) of § 1.167(e)–1 the acquiring corporation may change from the declining balance method described in section 167(b)(2) to the straight line method without consent of the Commissioner.

(f) *Successive transactions to which* section 381(a) applies. The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, for example, if X Corporation, a transferor corporation, used the sum of the years-digits method under section 167(b)(3) with respect to an asset transferred to Y Corporation, an acquiring corporation, in a transaction to which section 381(a) applies, and subsequently Y Corporation, using the same method, transfers such asset to Z Corporation in a transaction to which section 381(a) also applies, then Z Corporation shall be required to use the sum of the years-digits method with respect to such asset.

(g) *Illustration.* The application of this section may be illustrated by the following example:

Example. M and N Corporations compute their taxable incomes on the basis of the calendar year. On December 31, 1959, M Corporation transfers all of its assets to N Corporation in a transaction to which section 381(a) applies. Included among these assets is an item of depreciable property which on that date has an adjusted basis (for determining gain) of $800,000 after M Corporation takes into account for 1959 its allowance for depreciation under section 167(b)(2). The basis attributable to the asset under section 362(b) is determined to be $900,000 in the hands of N Corporation. Under the provisions of section 381(c)(6) and paragraph (a) of this section, N Corporation is required to compute its allowance for the depreciation of the asset under section 167(b)(2) for 1960 and subsequent years but only in respect of $800,000 of its basis. N Corporation may use any reasonable method other than the methods provided in section 167(b)(2), (3), or (4) in computing its depreciation allowance of the remaining $100,000.

[T.D. 6559, 26 FR 2983, Apr. 7, 1961, as amended by T.D. 7166, 37 FR 5246, Mar. 11, 1972; 37 FR 6400, Mar. 29, 1972]

§1.381(c)(8)–1 Installment method.

(a) *Carryover requirement.* (1) Section 381(c)(8) provides that if, in a transaction to which section 381(a) applies, an acquiring corporation acquires installment obligations, the income from which the distributor or transferor corporation has elected under section 453 and the regulations thereunder to report on the installment method, then the acquiring corporation shall be treated as the distributor or transferor corporation would have been treated under section 453 had it not transferred the installment obligations. Thus, if the distributor or transferor corporation had properly elected to return income from the sale or other disposition of property giving rise to the obligations on the installment method, then the acquiring corporation shall be required to return the income from all such installment obligations in the same manner and to the same extent as the distributor or transferor corporation, unless consent of the Commissioner to use another method is obtained in accordance with paragraph (e) of §1.446–1. Amounts received by the acquiring corporation on or after the date of distribution or transfer with respect to an installment sale made by the distributor or transferor corporation will not be taken into account in applying the limitation under section 453(b)(2) with respect to the amount of payments received in the year of sale or other disposition.

(2) Section 381(c)(8) and this section have no application to sales or other dispositions of property made by the acquiring corporation on or after the date of distribution or transfer. For provisions defining the date of distribution or transfer, see §1.381(b)–1(b). See section 381(c)(4) and the regulations thereunder for rules relating to the proper method or combination of methods of accounting to be used by the acquiring corporation.

(b) *Basis of obligations.* The basis in the hands of an acquiring corporation of installment obligations described in section 381(c)(8) and paragraph (a) of this section shall be the same as in the hands of the distributor or transferor corporation.

(c) *Repossession of property sold in prior years.* If the acquiring corporation repossesses property, previously sold by the distributor or transferor corporation, by reason of default by the purchaser in payment of the acquired installment obligations, then the acquiring corporation shall be treated as though it were the vendor corporation for purposes of determining, under section 453 and the regulations thereunder, the gain, loss, income, or deduction with respect to the property repossessed.

[T.D. 6559, 26 FR 2983, Apr. 7, 1961]

§1.381(c)(9)–1 Amortization of bond discount or premium.

(a) *Carryover requirement.* If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for the payment of bonds of a distributor or transferor corporation which were issued at a discount or premium, then under the provisions of section 381(c)(9) the acquiring corporation is to be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of determining the amount of amortization allowable, or includible, with respect to such discount or premium in computing taxable income. Thus, if subsequent to February 28, 1913, a distributor or transferor corporation issues bonds at a premium and the liability for them is assumed by the acquiring corporation in a transaction to which section 381(a) applies, then the net amount of the premium is income which should be prorated or amortized over the life of the bonds, including the period during which the acquiring corporation is liable upon the obligations assumed. On the other hand, if a distributor or transferor corporation issues bonds at a discount and the liability for them is assumed by the acquiring corporation in a transaction to which section 381(a) applies, then the net amount of the discount is deductible in computing taxable income but should be prorated or amortized over the life of the bonds, including the period during which the acquiring corporation is liable upon the obligations assumed.

(b) *Expense incurred upon issuance of bonds.* If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for bonds of a distributor or transferor corporation which were issued at a discount or premium, the acquiring corporation shall be treated as the distributor or transferor corporation after the date of distribution or transfer with respect to the expense incurred upon the issuance of such bonds.

(c) *Purchase of bonds.* If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for bonds of a distributor or transferor corporation which were issued at a discount or premium and if the acquiring corporation subsequently purchases such bonds, then the acquiring corporation shall be treated as the distributor or transferor corporation for the purpose of determining the amount of any income or deduction resulting from the purchase. See paragraph (c) of § 1.61–12. For rules relating to the exchange or substitution of bonds issued by the acquiring corporation for bonds of a distributor or transferor corporation, see paragraph (d) of this section.

(d) *Exchange of new for old bonds.* Notwithstanding any other provision of this section, if—

(1) In a transaction to which section 381(a) applies, bonds of the acquiring corporation are exchanged or substituted for bonds of a distributor or transferor corporation which were issued at a discount or premium, or

(2) Bonds of the acquiring corporation are exchanged or substituted for bonds of a distributor or transferor corporation which were issued at a discount or premium and in respect of which the acquiring corporation has assumed the liability in a transaction to which section 381(a) applies,

then, with respect to any unamortized discount, premium, or expense of issuance attributable to such bonds of the distributor or transferor corporation, the acquiring corporation shall be treated as the distributor or transferor corporation.

(e) *Bonds of a distributor or transferor corporation.* For purposes of applying section 381(c)(9), the term *bonds of a distributor or transferor corporation* includes not only bonds issued by the distributor or transferor corporation but also bonds for which the distributor or transferor corporation has assumed liability. Thus, if the distributor or transferor corporation has assumed liability for bonds in a transaction in which any unamortized discount or premium attributable to such bonds carried over to such corporation, then the acquiring corporation assuming liability for the bonds shall be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of determining the amount of amortization allowable, or includible, with respect to such discount or premium. On the other hand, if the distributor or transferor corporation has assumed liability for bonds in a transaction in which any unamortized discount or premium attributable to such bonds did not carry over to such corporation, then there can be no carryover to the acquiring corporation under this section.

[T.D. 6532, 26 FR 405, Jan. 19, 1961]

§1.381(c)(10)–1 Deferred exploration and development expenditures.

(a) *Carryover requirement.* (1) If for any taxable year a distributor or transferor corporation has elected under section 615 or section 616 (or corresponding provisions of prior law) to defer and deduct on a ratable basis any exploration or development expenditures made in connection with any ore, mineral, mine, or other natural deposit transferred to the acquiring corporation in a transaction described in section 381(a), then under the provisions of section 381(c)(10) the acquiring corporation shall be entitled to deduct such expenditures on a ratable basis in the same manner, and to the same extent, as they would have been deductible by the distributor or transferor corporation in the absence of the distribution or transfer. For this purpose, the acquiring corporation shall be treated as though it were the distributor or transferor corporation. The principles set forth in paragraph (e) of §1.615–3 and paragraph (f) of §1.616–2 are applicable in computing the amount of the deduction allowable to the acquiring corporation in respect of expenditures deferred by a distributor or transferor corporation.

Example. X and Y Corporations are both organized on January 1, 1955, and both corporations compute their taxable income on the basis of the calendar year. During 1955, X Corporation purchases a mineral property which it begins to develop in 1956. During 1956, X Corporation incurs development expenditures of $500,000 in respect of such property which it elects to defer under section 616(b). On December 31, 1956, Y Corporation acquires all of the assets of X Corporation in a reorganization to which section 381(a) applies, no gain being recognized to X Corporation on the transfer. In 1957, Y Corporation sells 150,000 units of produced ore benefited by the development expenditures incurred and deferred by X Corporation, and the number of units remaining as of the end of 1957, plus the number of units sold during that year, is estimated to be 1,000,000. In addition to its deduction for depletion, Y Corporation is, in 1957, entitled to a deduction under sections 616(b) and 381(c)(10) of $75,000 of the development expenditures previously deferred by X Corporation, that is, $500,000 × 150,000/1,000,000.

(2) If a distributor or transferor corporation has elected under section 615 or section 616 (or corresponding provisions of prior law) to defer exploration or development expenditures in respect of a mine or other natural deposit which it subsequently disposes of except for a retained economic interest therein, such as the right to royalty income or in-ore payments, and such retained economic interest is transferred to the acquiring corporation in a transaction to which section 381(a) applies, then the acquiring corporation shall be entitled to deduct such deferred expenditures attributable to the economic interest retained on a ratable basis to the same extent they would have been deductible by the distributor or transferor corporation in the absence of the distribution or transfer. See paragraph (c) of §1.615–3 and paragraph (c) of §1.616–2.

(3) For purposes of this section, the terms *exploration expenditures* and *development expenditures* shall have the same meaning as that ascribed to them in the regulations under sections 615 and 616 of the Internal Revenue Code of 1954, or under sections 23(cc) and 23(ff) of the Internal Revenue Code of 1939, whichever applies. See, for example, paragraph (a) of §1.615–1 and paragraph (a) of §1.616–1.

(b) *Effect and identification of election previously made.* (1) The election made by a distributor or transferor corporation under the provisions of section 615 or section 616 (or corresponding provisions of prior law) to defer exploration or development expenditures in respect of any taxable year may not be revoked by the acquiring corporation for any reason whatsoever.

(2) When filing its return for the first taxable year for which it deducts exploration or development expenditures which were deferred under section 615 or section 616 (or corresponding provisions of prior law) by a distributor or transferor corporation, the acquiring corporation shall attach thereto a statement properly identifying the taxable year for which the election to defer was made by the distributor or transferor corporation, the name of the corporation which made the election, and the district director with whom the election was filed.

(3) It is unnecessary for an acquiring corporation to renew an election to

defer exploration or development expenditures which was made by a distributor or transferor corporation.

(c) *Successive transactions to which section 381(a) applies.* If, by virtue of section 381(c)(10), the acquiring corporation is entitled to deduct exploration or development expenditures deferred by a distributor or transferor corporation, then such acquiring corporation shall be deemed to have made the election to defer such expenditures for purposes of applying section 381(c)(10) to any subsequent transaction in which such acquiring corporation is a distributor or transferor corporation.

(d) *Carryover of limitation requirements.* (1) If a distributor or transferor corporation transfers any mineral property to the acquiring corporation in a transaction described in section 381(a) and the acquiring corporation pays or incurs exploration expenditures in a taxable year ending after the date of the distribution or transfer, then in applying the 4-year or $400,000 limitations described in section 615(c) and paragraphs (a) and (b) of § 1.615–4, whichever is applicable, the acquiring corporation shall be deemed to have been allowed any deduction which, for any taxable year ending on or before the date of distribution or transfer, was allowed to the distributor or transferor corporation under section 615(a), or under section 23(ff)(1) of the Internal Revenue Code of 1939, or to have made any election which, for any such preceding year, was made by the distributor or transferor corporation under section 615(b), or under section 23(ff)(2) of the Internal Revenue Code of 1939. Thus, in such instance, the acquiring corporation shall take into account the years in which the distributor or transferor corporation exercised the election to deduct or defer exploration expenditures and any amounts so deducted or deferred. For this purpose, it is immaterial whether the deduction has been allowed to, or the election has been made by, the distributor or transferor corporation with respect to the specific mineral property transferred by that corporation to the acquiring corporation.

(2) Generally, for purposes of applying the 4-year limitation described in paragraph (a) of § 1.615–4, if there are two or more distributor or transferor corporations that transfer any mineral property to the acquiring corporation, each taxable year of any such corporation ending on or before the date of distribution or transfer in which exploration expenditures were deducted or deferred shall be treated as a separate taxable year regardless of the fact that the taxable years of two or more such corporations normally end on the same date. However, if the date of distribution or transfer is the same with respect to more than one distributor or transferor corporation, then the taxable years of such corporations ending on the same date of distribution or transfer shall be considered as one taxable year for purposes of applying the 4-year limitation even though more than one such corporation deducted or deferred exploration expenditures for such taxable years.

(3) For purposes of applying the $400,000 limitation described in paragraph (b) of § 1.615–4, if there are two or more distributor or transferor corporations that transfer any mineral property to the acquiring corporation, any exploration expenditures which were deducted or treated as deferred expenses by such corporations for taxable years ending after December 31, 1950, shall be taken into account by the acquiring corporation.

(4) If a distributor or transferor corporation that transfers any mineral property to the acquiring corporation was required to take into account any taxable years or amounts of its transferor, as provided by paragraph (e) of § 1.615–4, for purposes of either the 4-year limitation described in paragraph (a) of § 1.615–4 or the $400,000 limitation described in paragraph (b) of § 1.615–4, then the acquiring corporation shall also take these taxable years and amounts into account in applying the same limitations.

(5) The provisions of this paragraph may be illustrated by the following examples:

Example (1). M and N Corporations were organized on January 1, 1956, and each corporation computes its taxable income on the basis of the calendar year. For each of its taxable years 1956 and 1957, M Corporation expended $60,000 for exploration expenditures and exercised the option to deduct such amounts under section 615(a). N Corporation made no exploration expenditures during its taxable years 1956 and 1957. On December 31, 1957, M Corporation transferred all of its assets to N Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. N Corporation made exploration expenditures of $100,000, $120,000, $110,000, and $100,000 for the years 1958, 1959, 1960, and 1961, respectively, which expenditures it desired to deduct under section 615(a) to the extent allowable. On the basis of these facts, N Corporation may deduct up to $100,000 for each of the years 1958 and 1959. No deduction or deferral is allowable for 1960 since the benefits of section 615(c) were previously availed of for 4 taxable years. However, N Corporation may deduct $80,000 for 1961 (the 4-year limitation not applying to such year) but, if such deduction is made, N Corporation will not be allowed any further deductions or deferrals since the $400,000 limitation of paragraph (b) of § 1.615–4 will have been reached.

Example (2). R and S Corporations were organized on January 1, 1955, and each corporation computes its income on the basis of the calendar year. For the 1955 taxable year neither corporation made any exploration expenditures under section 615(a). On June 30, 1956, R Corporation transferred all its assets to S Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. During its short taxable year ending June 30, 1956, R Corporation made exploration expenditures of $60,000 which it elected to deduct under section 615. For its taxable year ending December 31, 1956, S Corporation may deduct or defer exploration expenditures up to $100,000 since this is a separate election for purposes of utilizing section 615 and is not affected by the $60,000 previously deducted by R Corporation. Assuming S Corporation exercises an election under section 615 for its taxable year ending December 31, 1956, S Corporation may elect to apply the benefits of section 615 to exploration expenditures for two more taxable years. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), S Corporation is entitled under section 615 to deduct or defer exploration expenditures made in such years to the extent that the combined deductions and deferrals by R and S Corporations in prior years did not exceed $400,000.

Example (3). O and P Corporations were organized on January 1, 1955, and each corporation computes its taxable income on the basis of the calendar year. For their taxable years 1955, 1956, and 1957, each corporation deducted exploration expenditures made in such years under section 615(a). On June 30, 1958, O Corporation transferred all its assets to P Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. If, during its short taxable year ending June 30, 1958, O Corporation made additional exploration expenditures, it may deduct or defer such expenditures (up to $100,000) under section 615 since O Corporation has utilized section 615 in only three previous taxable years. For its taxable years ending after June 30, 1958, and beginning before July 7, 1960, P Corporation may not deduct or defer exploration expenditures under section 615, since the benefits of that section were utilized by O and P Corporations for 4 taxable years. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), P is entitled under section 615 to deduct or defer exploration expenditures made in such years to the extent that the combined deductions and deferrals by O and P Corporations in prior years do not exceed $400,000. See paragraph (b) of § 1.615–4.

Example (4). X, Y, and Z Corporations were organized on January 1, 1955, and each corporation computes its taxable income on the basis of the calendar year. For their taxable years ending December 31, 1955, X and Y Corporations each deferred $100,000 for exploration expenditures made in such taxable years under section 615(b). Z Corporation made no exploration expenditures during its taxable year ending December 31, 1955. On March 31, 1956, X and Y Corporations transferred all their assets to Z Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporations on the transfer. X and Y Corporations each made exploration expenditures of $75,000 during their short taxable years ending March 31, 1956, which they deducted under section 615(a). For purposes of taxable years beginning before July 7, 1960, Z Corporation must take into account the taxable years in which X and Y Corporations deducted or deferred exploration expenditures. In so doing, each taxable year in which exploration expenditures were deducted or deferred must be taken into account except that the taxable years of X and Y Corporations ending on March 31, 1956, shall be considered as one taxable year. Therefore, Z Corporation may deduct or defer exploration expenditures in accordance with section 615 for any one taxable year ending after March 31, 1956, and beginning before July 7, 1960. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), Z Corporation must take into account for purposes of the $400,000 limitation all of the $350,000 of exploration expenditures deducted or deferred by X, Y, and Z Corporations during taxable years ending after December 31, 1950. Therefore, Z Corporation, assuming it has not deducted or deferred any exploration expenditures, is entitled under section 615 to deduct or defer in taxable years beginning after July 6, 1960, up to

$50,000 for exploration expenditures made in such years.

Example (5). For purposes of this example, assumethat each taxpayer computes taxable income on the basis of the calendar year. Taxpayer A, an individual who has deducted exploration expenditures of $75,000 under section 23(ff) of the Internal Revenue Code of 1939 for each of his taxable years 1952 and 1953, transferred a mineral property to K Corporation on January 1, 1954, in a transaction in which the basis of the mineral property in the hands of K Corporation is determined under section 362(a). For its taxable year 1954 and pursuant to section 615(a)., K Corporation deducted exploration expenditures of $100,000 which it made in such year. K Corporation had made no exploration expenditures in any preceding taxable year. On December 31, 1954, K Corporation transferred all its assets to L Corporation in a reorganization to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. Assuming that L Corporation has not deducted or deferred exploration expenditures in any preceding taxable year, L Corporation may deduct or defer exploration expenditures (up to $100,000) in accordance with section 615 for any one taxable year ending after December 31, 1954, and beginning before July 7, 1960, in view of the 4-year limitation. However, if L Corporation does not deduct or defer exploration expenditures in that period, then for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), L Corporation is entitled to deduct or defer up to $150,000 (but not to exceed $100,000 per year) for exploration expenditures made in such years. See paragraph (b) of § 1.615–4.

[T.D. 6552, 26 FR 1988, Mar. 8, 1961, as amended by T.D. 6685, 28 FR 11406, Oct. 24, 1963]

§ 1.381(c)(11)–1 Contributions to pension plan, employees' annuity plans, and stock bonus and profit-sharing plans.

(a) *Carryover requirement.* Section 381(c)(11) provides that, for purposes of determining amounts deductible under section 404 for any taxable year, the acquiring corporation shall be considered after the date of distribution or transfer to be the distributor or transferor corporation in respect of any pension, annuity, stock bonus, or profit-sharing plan.

(b) *Nature of carryover.* (1) Primarily, section 381(c)(11) and this section apply to the amount of any unused deductions or excess contributions carryovers which, in the absence of the transaction causing section 381 to apply, would have been available to the distributor or transferor corporation under section 404. Thus, for example, this section applies to unused deductions under a profit-sharing or stock bonus trust which, in accordance with the second sentence of section 404(a)(3)(A) and § 1.404(a)–9, would have been available in succeeding taxable years to the transferor corporation if the transfer of assets to the acquiring corporation had not occurred.

(2) Section 381(c)(11) also permits or requires the acquiring corporation to be treated as though it were the distributor or transferor corporation for the purpose of satisfying any conditions which would have been required of the distributor or transferor corporation in the absence of the distribution or transfer, so that it may be determined whether the distributor or transferor corporation, or the acquiring corporation, is entitled to take a deduction under section 404 in respect of a trust or plan established by the distributor or transferor corporation. Thus, for example, in a case when the taxable year of the transferor corporation ends on the date of transfer pursuant to section 381(b)(1), that corporation is entitled, pursuant to the provisions of section 404(a)(6) and paragraph (c) of § 1.404(a)–1, to a deduction in such taxable year for a payment to a qualified trust of that corporation made by the acquiring corporation after the close of such taxable year but within the time specified in section 404(a)(6). In further illustration, if the transferor corporation were to establish a qualified plan, and if the plan were maintained as a qualified plan by the acquiring corporation, then any contributions paid under the plan by the acquiring corporation (other than those which are deductible by the transferor corporation by reason of section 404(a)(6)) would be deductible under section 404 by the acquiring corporation even though the plan were exclusively for the benefit of former employees of the transferor corporation. Also, for example, if the transferor corporation were to adopt an annuity plan during its taxable year ending on the date of transfer, the acquiring corporation would be entitled, subject to the provisions of section 401(b) and § 1.401–5, to

amend the plan so as to make it retroactively satisfy the requirements of section 401(a)(3), (4), (5), and (6) for the period beginning with the date on which the plan was put into effect.

(c) *Taxable year of deduction.* The first taxable year of the acquiring corporation in which any amount shall be allowed as a deduction to that corporation by reason of section 381(c)(11) and this section shall be its first taxable year ending after the date of distribution or transfer.

(d) *Requirements for deductions.* (1) In order for any amount paid by the acquiring corporation (other than amounts deductible under section 404(a)(5)) to be deductible by the acquiring corporation by reason of this section in respect of a trust or nontrusteed annuity plan which is established by a distributor or transferor corporation and maintained by the acquiring corporation, the contributions must be paid (or deemed to have been paid under section 404(a)(6)) by the acquiring corporation in a taxable year of that corporation which ends with or within a year of the trust for which it is exempt under section 501(a), or, in the case of a nontrusteed annuity plan, for which it meets the requirements of section 404(a)(2). See, however, section 404(a)(4) and §1.404(a)–11 for rules relating to deductions for contributions to foreign-situs trusts. The trust or plan which is established by the distributor or transferor corporation and maintained by the acquiring corporation may separately satisfy the requirements of section 401(a) or section 404(a)(2) or may, together with other trusts or plans of the acquiring corporation, constitute a single plan which qualifies under section 401(a) or meets the requirements of section 404(a)(2).

(2) Excess contributions paid under a qualified trust or plan established by the transferor or distributor corporation may be carried over and, subject to the applicable limitations, deducted by the acquiring corporation in a taxable year ending after the date of distribution or transfer regardless of whether the trust is exempt, or the plan meets the requirements of section 404(a)(2), during such taxable year. There are, however, special rules for computing the limitations on the amount of excess contributions which are deductible in a taxable year ending after the trust or plan has terminated (see §1.404(a)–7, paragraph (e) of §1.404(a)–9, and paragraph (a) of §1.404(a)–13). For this purpose, the pension, annuity, stock bonus, or profit-sharing plan of the distributor or transferor corporation under which the excess contributions were made shall be considered continued (and not terminated) by the acquiring corporation if, after the date of distribution or transfer, the acquiring corporation continues the plan as a separate and distinct plan of its own which continues to qualify under section 401(a), or to meet the requirements of section 404(a)(2), or consolidates or replaces that plan with a comparable plan. See subparagraph (4) of this paragraph for rules relating to what constitutes a ‘‘comparable’’ plan.

(3) In order for any amount paid by the acquiring corporation to be deductible by the acquiring corporation as an unused deduction carried over from a qualified profit-sharing or stock bonus trust established by a distributor or transferor corporation, the acquiring corporation must continue such trust established by the distributor or transferor corporation as a separate and distinct trust of its own which continues to qualify under section 401(a), or must consolidate or replace that trust with a comparable trust. In addition, the amount paid by the acquiring corporation will be deductible as an unused deduction carried over from the transferor or distributor corporation only if it is paid into the profit-sharing or stock bonus trust established by the transferor or distributor corporation, or the comparable trust, in a taxable year of the acquiring corporation which ends with or within a year of such trust (or such comparable trust) for which it meets the requirements of section 401(a) and is exempt under section 501(a). See subparagraph (4) of this paragraph for rules relating to what constitutes a ‘‘comparable’’ trust.

(4) For purposes of subparagraphs (2) and (3) of this paragraph, a plan under which deductions are determined pursuant to paragraph (1) or (2) of section 404(a) shall be considered comparable

to another plan under which deductions are determined pursuant to either of those paragraphs, and a plan under which deductions are determined pursuant to paragraph (3) of section 404(a) shall be considered comparable to another plan under which deductions are determined pursuant to such paragraph (3). Thus, a profit-sharing plan (which qualifies under section 401(a)) established by the transferor or distributor corporation shall, for purposes of subparagraphs (2) and (3) of this paragraph, be considered terminated if, after the date of distribution or transfer, the acquiring corporation transfers the funds accumulated under the profit-sharing plan into a pension plan covering the same employees. In such a case, excess contributions paid under the profit-sharing plan by the distributor or transferor corporation may be carried over and deducted by the acquiring corporation in a taxable year ending after the date of distribution or transfer subject to the limitations in section 404(a)(3)(A) computed in accordance with the rules in paragraph (e)(2) of § 1.404(a)–9 for computing limitations when a profit-sharing plan has terminated. On the other hand, unused deductions attributable to the profit sharing plan may not be carried over and used by the acquiring corporation as a basis for deducting amounts contributed by it to the pension plan.

(e) *Effect of consolidation or replacement of plan on prior contributions.* If a pension, annuity, stock bonus, or profit-sharing plan which was established by a distributor or transferor corporation is terminated after the date of distribution or transfer because of consolidation or replacement with a comparable plan of the acquiring corporation, then the contributions paid to or under its plan by the distributor or transferor corporation on or before the date of distribution or transfer shall not be disallowed under section 404 merely because of the termination of the plan which was established by that corporation, provided that the termination does not cause the plan to fail to qualify under section 401(a).

(f) *Amounts deductible under section 404.* Section 381(c)(11) and this section apply only to amounts which are otherwise deductible under section 404 and the regulations thereunder. See §§ 1.404(a)–1 through 1.404(d)–1. Thus, to be deductible by reason of this section, contributions paid by the acquiring corporation must be expenses which otherwise satisfy the conditions of section 162 (relating to trade or business expenses). No deduction shall be allowed by reason of section 381(c)(11) and this section for a contribution which is allowable under section 162 but is not allowable under section 404. Thus, the acquiring corporation shall not be allowed a deduction by reason of this section in respect of a plan established by a distributor or transferor corporation if the contribution would not otherwise be deductible under section 404 by reason of section 404(c) and § 1.404(c)–1. On the other hand, any unused deductions or excess contributions of a distributor or transferor corporation which are carried over from 1939 Code years shall be deductible by the acquiring corporation if the requirements of this section, section 404(d), and § 1.404(d)–1 are satisfied.

(g) *Cost of past service credits.* In computing the cost of past service credits under a plan with respect to employees of the distributor or transferor corporation, the acquiring corporation may include the cost of credits for periods during which the employees were in the service of the distributor or transferor corporation.

(h) *Separate carryovers required.* The excess contributions which are available to a distributor or transferor corporation under the provisions of section 404(a)(1)(D) and section 404(a)(3)(A) at the close of the date of distribution or transfer and are carried over to the acquiring corporation under this section shall be kept separate and distinct from each other and from any excess contributions which are available to the distributor or transferor corporation at that time under the provisions of section 404(a)(7) and are carried over to the acquiring corporation under this section. If there are excess contributions carried over to the acquiring corporation from more than one transferor or distributor corporation, the excess contributions of each transferor or distributor corporation shall be kept separate and distinct from those of the other transferor or distributor corporations and, with respect to each such transferor or distributor corporation, shall be kept separate and distinct as provided in the preceding sentence. See, however, paragraph (i) of this section for rules for applying the provisions of section 404(a)(3)(A) when the acquiring corporation maintains two or more profit-sharing or stock bonus trusts, one or more of which was established by a distributor or transferor corporation. The requirements in this paragraph shall apply with respect to any excess contributions which are carried over to the acquiring corporation from a distributor or transferor corporation under the provisions of section 404(d) and this section.

(i) *Limitations applicable to profit-sharing or stock bonus trusts.* When contributions are paid by the acquiring corporation after the date of distribution or transfer to two or more profit-sharing or stock bonus trusts, and one or more of such trusts was established by a distributor or transferor corporation, such trusts shall be considered as a single trust in applying the provisions of section 404(a)(3)(A) under this section. Accordingly, in determining its secondary limitation, and its excess contributions carryover, under section 404(a)(3)(A) and §1.404(a)–9 in any taxable year ending after the date of distribution or transfer, the acquiring corporation shall take into accounts its primary limitations, and the deductions allowed or allowable to it, for all prior years under the limitations provided in those sections, and also the primary limitations of, and deductions allowed or allowable to, the distributor or transferor corporation or corporations for all prior years under the limitations provided in those sections.

(j) *Successive carryovers.* The provisions of section 381(c)(11) and this section shall apply to an acquiring corporation which, in a distribution or transfer to which section 381(a) applies acquires the assets of a distributor or transferor corporation which has previously acquired the assets of another corporation in a transaction to which section 381(a) applies, even though, in computing an unused deductions or excess contributions carryover to the second acquiring corporation, it is necessary to take into account contributions paid by, and limitations applicable to, the first distributor or transferor corporation.

(k) *Information to be furnished by acquiring corporation.* The acquiring corporation shall furnish such information with respect to a plan established by a distributor or transferor corporation as will, consistently with the principles of section 404, establish that the provisions of such section and this section apply. For purposes of this section, the district director may require any other information that he considers necessary to determine deductions allowable under section 404 and this section or qualification under section 401. Any unused deductions or excess contributions carried over from a distributor or transferor corporation pursuant to this section shall be properly identified with the corporation which would have been permitted to use those deductions or contributions in the absence of the transaction causing section 381 to apply.

(l) *Illustration.* The application of this section may be illustrated by the following example:

Example. In 1955, X Corporation, which makes its return on the basis of the calendar year, paid $400,000 to completely fund past service credits under a qualified pension plan and deducted 10 percent ($40,000) of that cost in each of the taxable years 1955, 1956, and 1957. The pension plan established by X Corporation had an anniversary date of January 1. On December 31, 1957, on which date the undeducted part of the cost amounted to $280,000, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. Y Corporation, which also makes its return on the basis of the calendar year, had a qualified pension plan and trust which also had an anniversary date of January 1. Since Y Corporation had many more employees than X Corporation on the date of transfer, it covered the former employees of X Corporation under its own plan. Y Corporation is entitled to deductions under section 404(a)(1)(D) and this section in 1958 and succeeding taxable years, in order of time, with respect to the undeducted balance of $280,000, to the extent of the difference between the amount paid and deductible by that corporation in each such taxable year and the maximum amount deductible by that corporation for such taxable year in accordance with the applicable limitations of section 404(a)(1). In computing the maximum amount deductible by Y Corporation for 1958 and 1959 under section 404(a)(1)(C), that corporation may include $40,000 for each year, the amount that X Corporation could have included for each of those years in computing the maximum amount that would have been deductible by X Corporation under section 404(a)(1)(C) if the merger had not occurred. Thus, assuming that Y Corporation's appropriate limitation so computed under section 404(a)(1)(C) is $1,000,000 (including the $40,000 carried over from X Corporation under this section) for each of those taxable years, and that Y Corporation contributed $925,000 to its trust in 1958 and $975,000 in 1959, then Y Corporation is entitled under section 404(a)(1)(D) and this section to deduct in 1958 $75,000, and in 1959 $25,000, of the amount ($280,000) carried over from X Corporation. The undeducted balance of such amount ($180,000) available to Y Corporation on December 31, 1959, would be deductible by that corporation in succeeding taxable years in accordance with section 404(a)(1)(D) and this section.

[T.D. 6556, 26 FR 2405, Mar. 22, 1961, as amended by T.D. 7168, 37 FR 5024, Mar. 9, 1972]

§ 1.381(c)(12)–1 Recovery of bad debts, prior taxes, or delinquency amounts.

(a) *Carryover requirement.* (1) If, as a result of a distribution or transfer to which section 381(a) applies, the acquiring corporation is entitled to the recovery of a bad debt, prior tax, or delinquency amount on account of which a deduction or credit was allowed to a distributor or transferor corporation for a prior taxable year, and such debt, tax, or amount is recovered by the acquiring corporation after the date of distribution or transfer, then under the provisions of section 381(c)(12) the acquiring corporation is required to include in its gross income for the taxable year of recovery the same amount of income attributable to the recovery as the distributor or transferor corporation would have been required to include under section 111 and the regulations thereunder had the distribution or transfer not occurred.

(2) The rule prescribed by paragraph (a)(1) of this section and by section 381(c)(12) with respect to bad debts, prior taxes, and delinquency amounts applies equally with respect to the recovery by the acquiring corporation of all other losses, expenditures, and accruals made on the basis of deductions from the gross income of a distributor or transferor corporation for prior taxable years, including war losses referred to in section 127 of the Internal Revenue Code of 1939, but not including deductions with respect to depreciation, depletion, amortization, or amortizable bond premiums. An item which is not a ''section 111 item'' for purposes of the regulations under section 111 is not subject to the provisions of section 381(c)(12). The provisions of section 111(c) shall be applied with respect to a recovery by the acquiring corporation in the same manner as they would have been applied by the distributor or transferor corporation.

(b) *Amount of recovery exclusion allowable for year of recovery.* For the year of any recovery by the acquiring corporation, the amount of the recovery exclusion for the original taxable year shall be determined in accordance with paragraph (b) of § 1.111–1. For the purpose of this paragraph and section 381(c)(12), the recovery exclusion for any year with respect to section 111 items of the acquiring corporation shall be kept separate from the recovery exclusion for any year with respect to section 111 items of each distributor or transferor corporation. The recovery by the acquiring corporation of any section 111 item of such corporation after the date of the distribution or transfer shall be considered separately from recoveries by the acquiring corporation of any such item which was deducted or credited by a distributor or transferor corporation. Any recovery by the acquiring corporation of a section 111 item shall be excluded from the gross income of the acquiring corporation to the extent of the recovery exclusion (1) determined for the original year for which that item was deducted or credited by the specific corporation which claimed the deduction or credit and (2) reduced by the excludable recoveries (whether made by the acquiring corporation, or by the distributor or transferor corporation) in intervening years with respect to the recovery exclusion of such corporation for such original year. There shall be taken into account the effect of net operating loss carryovers and carrybacks or capital loss carryovers.

(c) *Illustration of carryover of recovery exclusion*—(1) *Facts.* (i) The application of section 381(c)(12) may be illustrated by the following example. M and N Corporations are both organized on January 1, 1957, and both corporations compute their taxable income on the basis of the calendar year. On December 31, 1959, M Corporation transfers all its assets to N Corporation in a reorganization to which section 381(a) applies.

(ii) The section 111 items of the two corporations for the following taxable years are as follows, identification of such items being made by an appropriate letter:

Taxable year of deduction or credit	M Corporation (transferor)	N Corporation (acquirer)
1957	$500(g)	$200(h)
1958	300(i)	400(j)
1959	600(k)	100(m)

(iii) The recovery exclusions in respect of such taxable years, computed in accordance with § 1.111–1(b)(2), are assumed to be as follows:

Taxable year	M Corporation (transferor)	N Corporation (acquirer)
1957	$400	$150
1958	200	300
1959	500	75

(iv) The recoveries of the above-mentioned section 111 items by the two corporations are as follows:

Taxable year of recovery	M Corporation (transferor)	N Corporation (acquirer)
1958	$25 (g)	$50 (h)
1959	50 (g) 30 (i)	20 (h) 15 (j)
1960		350 (g) 225 (i) 550 (k) 100 (h) 350 (j) 85 (m)

(2) *M Corporation's 1958 recovery.*

Total recovery of section 111 items for 1957	$25
Less: Recovery exclusion for 1957	400
Amount included in gross income of M Corporation for 1958	0

(3) *M Corporation's 1959 recoveries.*

(i) Total recovery of section 111 items for 1957		$50
Less: Recovery exclusion for 1957	$400	
Minus excludable recovery	25	
		375
Amount included in gross income of M Corporation for 1959		0
(ii) Total recovery of section 111 items for 1958		30
Less: Recovery exclusion for 1958		200
Amount included in gross income of M Corporation for 1959		0

(4) *N Corporation's 1958 recovery.*

Total recovery of section 111 items for 1957	$50
Less: Recovery exclusion for 1957	150
Amount included in gross income of N Corporation for 1958	0

(5) *N Corporation's 1959 recoveries.*

(i) Total recovery of section 111 items for 1957		$20
Less: Recovery exclusion for 1957	$150	
Minus excludable recovery in 1958	50	
		100
Amount included in gross income of N Corporation for 1959		0
(ii) Total recovery of section 111 items for 1958		15
Less: Recovery exclusion for 1958		300
Amount included in gross income of N Corporation for 1959		0

(6) *N Corporation's 1960 recoveries.*

(i) Total recovery of section 111 items of M Corporation for 1957			$350
Less: Recovery exclusion of M Corporation for 1957			$400
Minus:			
Excludable recovery in 1959	$50		
Excludable recovery in 1958	25		
		75	
			325
Amount included in gross income of N Corporation for 1960			25
(ii) Total recovery of section 111 items of M Corporation for 1958			225
Less: Recovery exclusion of M Corporation for 1958		$200	
Minus excludable recovery in 1959		30	
			170
Amount included in gross income of N Corporation for 1960			55
(iii) Total recovery of section 111 items of M Corporation for 1959			550
Less: Recovery exclusion of M Corporation for 1959			500
Amount included in gross income of N Corporation for 1960			50
(iv) Total recovery of section 111 items of N Corporation for 1957			100
Less: Recovery exclusion of N Corporation for 1957		$150	
Minus:			
Excludable recovery in 1959	$20		
Excludable recovery in 1958	50		
		70	
			80
Amount included in gross income of N Corporation for 1960			20
(v) Total recovery of section 111 items of N Corporation for 1958			$350
Less: Recovery exclusion of N Corporation for 1958		$300	
Minus excludable recovery in 1959		15	

	285
Amount included in gross income of N Corporation for 1960	65
(vi) Total recovery of section 111 items of N Corporation for 1959	85
Less: Recovery exclusion of N Corporation for 1959	75
Amount included in gross income of N Corporation for 1960	10

(7) *Summary of recoveries included in gross income of N Corporation for 1960.*

(i) Recovery of M Corporation items for:		
1957	$25	
1958	55	
1959	50	
		$130
(ii) Recovery of N corporation items for:		
1957	20	
1958	65	
1959	10	
		95
Total amount included in gross income		225

[T.D. 6559, 26 FR 2984, Apr. 7, 1961]

§ 1.381(c)(13)–1 Involuntary conversions.

(a) *Carryover requirement*—(1) *General rule.* Section 381(c)(13) requires that after the date of distribution or transfer the acquiring corporation, in a transaction to which section 381(a) applies, shall be treated as the distributor or transferor corporation for purposes of applying section 1033, relating to involuntary conversions. This rule shall apply even though the property similar or related in service or use to the property converted, or the stock of a corporation owning such similar property, is purchased by the acquiring corporation after the date of distribution or transfer and is not received from the distributor or transferor corporation in the transaction to which section 381(a) applies. Accordingly, if any factor essential to the application of section 1033 occurs on or before the date of distribution or transfer and any other such factor also occurs after that date, then, in accordance with section 381(c)(13) and this section, the provisions of section 1033 shall apply to the acquiring corporation in the same manner that they would have applied to the distributor or transferor corporation in the absence of the distribution or transfer. For purposes of this section, the terms *involuntary conversion* and *disposition of the converted property* shall have the meaning ascribed to them by the regulations under section 1033.

(2) *Application to other transactions.* The provisions of this section shall apply to any transaction which, under provisions of the Internal Revenue Code of 1954, is treated as though it were an involuntary conversion within the meaning of section 1033. See, for example, section 1071, relating to gain from a sale or exchange to effectuate the policies of the Federal Communications Commission; and sections 1332(b)(3) and 1333(3), relating to war loss recoveries.

(b) *Conversion into similar property.* Section 1033(a)(1) provides that no gain shall be recognized if property is involuntarily converted only into property which is similar or related in service or use to the property so converted. If there is a disposition of property of a distributor or transferor corporation and, subsequent to the date of distribution or transfer, property similar or related in service or use to the property disposed of is received by the acquiring corporation as compensation for the property so disposed of, then no gain shall be recognized to the acquiring corporation, provided that no gain would have been recognized under section 1033(a)(1) if the similar property had been received directly by the distributor or transferor corporation.

Example. Property of S Corporation with an adjusted basis of $100 is condemned by the local government. Shortly after the property is so condemned, S Corporation liquidates and distributes its assets to P Corporation in a distribution to which section 381(a) applies. Subsequent to the date of distribution, P Corporation receives from the government (in settlement of the condemnation proceedings) property with a market value of $500 which is similar or related in service or use to the property so condemned. No gain is recognized to either corporation upon P Corporation's receipt of the similar property, and the property so received has a basis of $100 in the hands of P Corporation on the date of its acquisition.

(c) *Conversion into money or dissimilar property when disposition occurs after December 31, 1950*—(1) *General rule.* Section 1033(a)(3) and § 1.1033(a)–2 provide rules for involuntary conversions of property into money or dissimilar property where the disposition of the converted property occurs after December 31, 1950. In such a case, the gain on the conversion, if any, shall be recognized, at the election of the taxpayer, only to the extent that the amount realized on the conversion exceeds the cost of other property purchased by the taxpayer which is similar or related in service or use to the property so converted, or exceeds the cost of stock purchased by the taxpayer in the acquisition of control of a corporation owning such other property, provided (i) the taxpayer purchases such other property or stock for the purpose of replacing the property so converted and (ii) the purchase occurs during the period of time specified in section 1033(a)(3)(B). The provisions of this paragraph shall apply to involuntary conversions where the disposition of the property occurs after December 31, 1950, and where the election to have section 1033(a)(3) apply to the treatment of the gain upon the conversion is contingent upon activities of both the distributor or transferor corporation and the acquiring corporation. For purposes of section 381(c)(13), the period of time specified in section 1033(a)(3)(B) shall be determined by taking into account taxable years of, and extensions of time granted to, both the distributor or transferor corporation and the acquiring corporation.

(2) *Replacement period.* The period during which the purchase of similar property or stock must be made in order to prevent the recognition of gain on the involuntary conversion terminates 2 years (or, in the case of a disposition occurring before Dec. 31, 1969, 1 year) after the close of the first taxable year in which any part of the gain upon the conversion is realized, or at the close of such later date as may be designated pursuant to an application of the taxpayer. See paragraph (c)(3) of §1.1033(a)–2. Therefore, if, in a case to which this subparagraph applies, the first taxable year in which gain is realized is the taxable year of the distributor or transferor corporation ending with the close of the date of distribution or transfer, the acquiring corporation will have a maximum of only 2 years (or, in the case of a disposition occurring before Dec. 31, 1969, 1 year) after that date in which to purchase the similar property or stock, unless an extension of time has been granted upon application by the distributor, transferor, or acquiring corporation within the time prescribed. See paragraph (a) of §1.381(b)–1 as to the termination of the taxable year of the distributor or transferor corporation. See paragraph (c)(3) of §1.1033(a)–2 as to applications to extend the period within which to replace the converted property. In addition to the information otherwise required under paragraph (c)(3) of §1.1033(a)–2, the application shall contain sufficient detail in connection with the distribution or transfer to establish that section 381(c)(13) applies to the involuntary conversion involved.

(3) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A and B Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970 property of A Corporation is destroyed by fire, and in January 1971, A Corporation receives $15,000 from an insurance company as compensation for its loss of property. The adjusted basis of the property on the date of destruction is $10,000; as a consequence, A Corporation realizes a gain of $5,000 on the involuntary conversion. On June 30, 1971, B Corporation acquires all of the assets of A Corporation in a reorganization to which section 381(a) applies. In accordance with paragraph (c)(2) of §1.1033(a)–2, A Corporation reports in its return for the short taxable year ending June 30, 1971, all the details in connection with the involuntary conversion but does not include the realized gain in gross income, thereby electing to have the gain recognized only to the extent provided in section 1033(a)(3). On June 15, 1973, B Corporation purchases for $20,000 property which is similar or related in service or use to the property previously destroyed. In its return for 1973, B Corporation reports all of the details in connection with its replacement of the property, as required by paragraph (c)(2) of §1.1033(a)–2. As a result of this replacement by B Corporation, none of the gain realized by A Corporation is recognized. The replacement property which is purchased by B Corporation has a basis to that corporation of $15,000 on the date of its purchase, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to A Corporation on the involuntary conversion ($5,000).

Example (2). Assume the same facts as in *Example (1),* except that B Corporation does not purchase similar property on or before June 30, 1973, and does not apply on or before that date (in accordance with paragraph (c)(3) of § 1.1033(a)–2) for an extension of time in which to make a replacement. In such event, the gain realized by A Corporation is recognized to that corporation for its taxable year ending June 30, 1971. A Corporation's tax liability for such taxable year must be recomputed in accordance with paragraph (c)(2) of § 1.1033(a)–2 in order to reflect this additional income.

Example (3). Assume the same facts as in *Example (1),* except that the property of A Corporation is destroyed in 1968, A Corporation receives the $15,000 from an insurance company in January 1969, B Corporation acquires all of the assets of A Corporation on June 30, 1969, and A Corporation's return is filed for the short taxable year ending June 30, 1969. B Corporation would have to purchase property which is similar or related in service or use to the property previously destroyed by June 30, 1970, in order to take advantage of the provisions of section 1033.

Example (4). M and N Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970, property of M Corporation is destroyed by fire. The adjusted basis of the property on the date of destruction is $10,000. The property is insured against loss by fire, but the insurance claim is not satisfied on or before June 30, 1971, the date on which N Corporation acquires all of the assets (including the insurance claim) of M Corporation in a reorganization to which section 381(a) applies. On September 1, 1972, N Corporation receives $15,000 from the insurance company as compensation for the fire loss suffered by M Corporation. Upon receipt of the insurance proceeds, N Corporation realizes a gain of $5,000 upon the involuntary conversion; however, in its return for 1972, N Corporation elects under the provisions of paragraph (c)(2) of § 1.1033(a)–2 to have the gain recognized only to the extent provided by section 1033(a)(3). On December 30, 1974, N Corporation purchases for $20,000 property which is similar or related in service or use to the property previously destroyed in the hands of M Corporation. As a result of this replacement by N Corporation, none of the gain realized by N Corporation in 1972 is recognized. The replacement property which is purchased by N Corporation has a basis to that corporation of $15,000 on the date of its purchase, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to N Corporation on the involuntary conversion ($5,000).

Example (5). R and S Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970 property of R Corporation is destroyed by fire. The adjusted basis of the property on the date of destruction is $10,000. In anticipation of taking the benefit of section 1033(a)(3), R Corporation purchases for $20,000 on June 1, 1971, property which is similar or related in service or use to the destroyed property. In its return for 1971, R Corporation reports all of the details in connection with the replacement of the property, as required by paragraph (c)(2) of § 1.1033(a)–2. The property destroyed in 1970 is insured against loss by fire, but the insurance claim is not satisfied on or before March 1, 1972, the date on which S Corporation acquires all of the assets (including the insurance claim) of R Corporation in a reorganization to which section 381(a) applies. On October 1, 1972, S Corporation receives $12,000 from the insurance company as compensation for the fire loss suffered by R Corporation. Upon receipt of the insurance proceeds, S Corporation realizes a gain of $2,000 upon the involuntary conversion; however, in its return for 1972, S Corporation elects under the provisions of paragraph (c)(2) of § 1.1033(a)–2 to have the gain recognized only to the extent provided by section 1033(a)(3). As a result of the replacement by R Corporation, none of the gain realized by S Corporation in 1972 is recognized. Assuming there are no adjustments for depreciation, the replacement property has a basis on October 1, 1972, of $18,000, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to S Corporation on the involuntary conversion ($2,000)

(d) *Conversion into money when disposition occurs before January 1, 1951.* Section 1033(a)(2) provides that, if property is disposed of in an involuntary conversion before January 1, 1951, and money is received as compensation for the conversion, no gain shall be recognized if such money is forthwith expended in the acquisition of other property similar or related in service or use to the property so converted, or in the acquisition of control of a corporation owning such other property, or in the establishment of a replacement fund. That section also provides that, if any part of the money is not so expended, the gain, if any, shall be recognized to the extent of the money which is not so expended. For example, if, pursuant to section 381(c)(13) and section 1033(a)(2), property of a distributor or transferor corporation is disposed of before January 1, 1951, in an involuntary conversion, and the proceeds from the conversion are received by the acquiring corporation so that the gain on the conversion is realized by that corporation, the acquiring corporation may avoid recognition of the gain if it complies with the provisions of section 1033(a)(2) for nonrecognition of gain. Thus, the acquiring corporation must forthwith expend the proceeds in the acquisition of similar property or stock, or in the establishment of a replacement fund, in order to avoid recognition of the gain, if the disposition occurred before January 1, 1951. See the provisions of §§1.1033(a)–3 and 1.1033(a)–4 relating to involuntary conversions and replacement funds when disposition of the converted property occurred before January 1, 1951.

(e) *Successive acquiring corporations.* An acquiring corporation which, in a transaction to which section 381(a) applies, acquires the assets of a corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall be treated as such other corporation for purposes of applying sections 381(c)(13) and 1033 (relating to involuntary conversions). Thus, for example, if any factor essential to the application of section 1033 occurs on or before the date of distribution or transfer in one transaction to which section 381(a) applies, and any other such factor occurs after the date of distribution or transfer in a subsequent transaction to which section 381(a) applies, then the acquiring corporation in such subsequent transaction shall be treated as the first distributor or transferor corporation subject to the rules and limitations of this section for purposes of sections 381(c)(13) and 1033.

[T.D. 6552, 26 FR 1989, Mar. 8, 1961, as amended by T.D. 7075, 35 FR 17995, Nov. 24, 1970]

§1.381(c)(14)–1 Dividend carryover to personal holding company.

(a) *Carryover requirement.* Section 381(c)(14) provides that an acquiring corporation shall succeed to and take into account the dividend carryover (described in section 564) of a distributor or transferor corporation in computing its dividends paid deduction under section 561 for taxable years ending after the date of distribution or transfer for which the acquiring corporation is a personal holding company under section 542. To determine the amount of such dividend carryover and to integrate it with the dividend carryover of the acquiring corporation in computing the dividends paid deduction for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 564 and §1.564–1 in accordance with this section.

(b) *Manner of computing dividend carryover*—(1) *Preceding taxable years.* If the acquiring corporation is a personal holding company under section 542 for its first taxable year ending after the date of distribution or transfer, the taxable year of the distributor or transferor corporation ending with such date is a first preceding taxable year for purposes of section 564, and the taxable year of the distributor or transferor corporation immediately preceding such first preceding year is a second preceding taxable year for purposes of section 564. If the acquiring corporation is a personal holding company for its second taxable year ending after the date of distribution or transfer, the taxable year of the distributor or transferor corporation ending with such date is a second preceding taxable year for purposes of section 564.

(2) *Determination of dividends paid deduction and taxable income.* The dividends paid deduction of any distributor or transferor corporation (determined under section 561 but without regard to any dividend carryover) and the taxable income of any such corporation (adjusted as provided in section 545(b)) for any taxable year ending on or before the date of distribution or transfer shall be determined without reference to any dividends paid deduction, or taxable income, of the acquiring corporation or any other distributor or transferor corporation; in like manner, the dividends paid deduction and the taxable income of the acquiring corporation for any such taxable year shall be determined without reference to any dividends paid deduction, or taxable income, of a distributor or transferor corporation.

(3) *Computation of dividend carryover.* (i) For the purpose of determining the dividend carryover to the first taxable year of the acquiring corporation ending after the date of distribution or transfer, the amount of the dividend carryover from the distributor or

transferor corporation shall be determined under section 564 without reference to the dividends paid deduction or taxable income of the acquiring corporation or any other corporation. If two or more transactions to which section 381(a) applies have the same date of distribution or transfer, or if a particular taxable year of the acquiring corporation is the first taxable year ending after the dates of distribution or transfer of two or more such transactions occurring on different dates, the amount of the dividend carryover from each distributor or transferor corporation shall be determined separately as provided in the preceding sentence. Except as provided in subdivision (iii) of this subparagraph, the aggregate of the dividend carryovers from each distributor or transferor corporation and the dividend carryover of the acquiring corporation (computed without regard to this section) shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for its first taxable year ending after the date (or dates) of distribution or transfer.

(ii) For the purpose of determining the dividend carryover to the second taxable year of the acquiring corporation ending after the date (or dates) of distribution or transfer, the excess, if any, of the dividends paid deduction (determined under section 561 without regard to any dividend carryover) over the taxable income (adjusted as provided in section 545(b)) for the taxable year of each distributor or transferor corporation and the acquiring corporation referred to as a second preceding taxable year shall be determined separately without reference to the dividends paid deduction or taxable income of any other of such corporations. The excesses thus determined shall be aggregated, and such aggregate shall be—

(*a*) Increased by the excess of the dividends paid deduction (determined without regard to any dividend carryover) over the taxable income (adjusted as provided in section 545(b)), or

(*b*) Reduced by the excess of the taxable income (adjusted as provided in section 545(b)) over the dividends paid deduction (determined without regard to any dividend carryover),

for the first preceding taxable year of the acquiring corporation. Except as provided in subdivision (iii) of this subparagraph, the amount thus determined shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for its second taxable year ending after the date (or dates) of distribution or transfer.

(iii) If a particular taxable year of the acquiring corporation is its first taxable year ending after the date (or dates) of distribution or transfer of one or more transactions to which section 381(a) applies, and if the same taxable year of the acquiring corporation is also its second taxable year ending after the date (or dates) of distribution or transfer of one or more other transactions to which section 381(a) applies, then, for the purpose of determining the dividend carryover to such taxable year of the acquiring corporation, the rules contained in both subdivisions (i) and (ii) of this subparagraph shall be applied. Insofar as such taxable year constitutes the first taxable year ending after the date (or dates) of distribution or transfer of any transaction, the amount of the dividend carryover from any distributor or transferor corporation involved in such transaction shall be determined separately as provided in subdivision (i) of this subparagraph. Insofar as such taxable year constitutes the second taxable year ending after the date (or dates) of distribution or transfer of any transaction, the amount of the dividend carryover from any distributor or transferor corporation involved in the transaction and the acquiring corporation shall be determined as provided in subdivision (ii) of this subparagraph. The aggregate of the dividend carryovers thus determined shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for such taxable year. See *Example (4)* in paragraph (c) of this section.

(c) *Illustrations.* The rules set forth in paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1) —(i) *Facts.* N Corporation acquired on June 30, 1960, all the assets of M Corporation in a reorganization to which section 381(a) applies. Both corporations compute taxable income on the basis of the calendar year. N Corporation is a personal holding company for its taxable years ending December 31, 1960, and December 31, 1961.

(ii) *Dividend carryover to N Corporation's taxable year ending December 31, 1960.* With respect to N Corporation's taxable year ending December 31, 1960, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(*a*) M Corporation's taxable years ending June 30, 1960, and December 31, 1959, respectively; and

(*b*) N Corporation's taxable years ending December 31, 1959, and December 31, 1958, respectively.

The dividend carryover to N Corporation's taxable year ending December 31, 1960, is $22,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	M Corporation		N Corporation
Second preceding taxable year:			
Dividends paid deduction	$25,000		$12,000
Taxable income	15,000		13,000
Excess dividends paid deduction		$10,000	
First preceding taxable year:			
Dividends paid deduction	23,000		20,000
Taxable income	21,000		10,000
Excess dividends paid deduction	2,000		$10,000
Separate dividend carryovers	12,000		10,000

The aggregate dividend carryover of $22,000 is the sum of $12,000 (the separate dividend carryover from M Corporation) and $10,000 (the separate dividend carryover from N Corporation's own preceding taxable years).

(iii) *Dividend carryover to N Corporation's taxable year ending December 31, 1961.* With respect to N Corporation's taxable year ending December 31, 1961, the first preceding taxable year is N Corporation's taxable year ending December 31, 1960; and the taxable years referred to as second preceding taxable years are M Corporation's taxable year ending June 30, 1960, and N Corporation's taxable year ending December 31, 1959. The dividend carryover to N Corporation's taxable year ending December 31, 1961, is $17,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

Second preceding taxable year	M Corporation	N Corporation
Dividends paid deduction	$23,000	$20,000
Taxable income	21,000	10,000
Separate excess of dividends paid deduction over taxable income	2,000	10,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $12,000, the sum of $2,000 (separate excess from N Corporation) and $10,000 (separate excess from N Corporation). Such aggregate excess is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

Aggregate excess of dividends paid deduction for second preceding taxable year		$12,000
Dividends paid deduction of N Corporation for first preceding taxable year	$50,000	
Taxable income of N Corporation for first preceding taxable year	45,000	
		$5,000
Dividend carryover to N Corporation's taxable year ending December 31, 1961		17,000

Example (2) —(i) *Facts.* X Corporation is organized on May 1, 1956, and computes its taxable income on the basis of the fiscal year ending April 30. Y Corporation and Z Corporation are both organized on January 1, 1955, and both compute their taxable income on the basis of the calendar year. On July 31, 1957, X Corporation and Y Corporation transfer all their assets to Z Corporation in a statutory merger to which section 381(a) applies. For its taxable years ending December 31, 1957, and December 31, 1958, Z Corporation is a personal holding company.

(ii) *Dividend carryover to Z Corporation's taxable year ending December 31, 1957.* With respect to Z Corporation's taxable year ending December 31, 1957, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(*a*) X Corporation's taxable years ending July 31, 1957, and April 30, 1957, respectively;

(*b*) Y Corporation's taxable years ending July 31, 1957, and December 31, 1956, respectively; and

(*c*) Z Corporation's taxable years ending December 31, 1956, and December 31, 1955, respectively.

The dividend carryover to Z Corporation's taxable year ending December 31, 1957, is $40,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	X Corporation		*Y Corporation*		*Z Corporation*	
Second preceding taxable year:						
Dividends paid deduction	$56,000		$19,000		$6,000	
Taxable income	24,000		17,000		5,000	....
Excess		$32,000		$2,000		$1,000
First preceding taxable year:						
Dividends paid deduction	9,000		4,000		10,000	
Taxable income	7,000		8,000		5,000	
Excess		2,000		(4,000)		5,000
Separate dividend carryovers		34,000		0		6,000

The aggregate dividend carryover of $40,000 is the sum of $34,000 (the separate dividend carryover from X Corporation) and $6,000 (the separate dividend carryover from Z Corporation's own preceding taxable years).

(iii) *Dividend carryover to Z Corporation's taxable year ending December 31, 1958.* With respect to Z Corporation's taxable year ending December 31, 1958, the first preceding taxable year is Z Corporation's taxable year ending December 31, 1957; and the taxable years referred to as second preceding taxable years are X Corporation's taxable year ending July 31, 1957, Y Corporation's taxable year ending July 31, 1957, and Z Corporation's taxable year ending December 31, 1956. The dividend carryover to Z Corporation's taxable year ending December 31, 1958, is $1,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	X Corporation	*Y Corporation*	*Z Corporation*
Second preceding taxable year:			
Dividends paid deduction	$9,000	$4,000	$10,000
Taxable income	7,000	8,000	5,000
Separate excess of dividends paid deduction over taxable income	2,000	0	5,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $7,000, the sum of $2,000 (separate excess from X Corporation) and $5,000 (separate excess from Z Corporation). Such aggregate excess is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

Aggregate excess of dividends paid deduction for second preceding taxable year	....	$7,000
Dividends paid deduction of Z Corporation for first preceding taxable year	$102,000	
Taxable income of Z Corporation for first preceding taxable year	108,000	(6,000)
Dividend carryover to Z Corporation's taxable year ending December 31, 1958	....	1,000

Example (3). Assume the facts stated in *Example (2),* except that Y Corporation transferred all its assets to Z Corporation on May 31, 1957. Assume also that the facts for Y Corporation's taxable year ending May 31, 1957, are otherwise the same as those stated for its taxable year in *Example (2)* ending July 31, 1957. In such case, the dividend carryovers to Z Corporation's taxable years ending on December 31, 1957, and December 31, 1958, are the same as in *Example (2)* notwithstanding the fact that the transfers from X Corporation and Y Corporation occurred on the different dates.

Example (4) —(i) *Facts.* T Corporation acquired on June 30, 1960, all the assets of U Corporation in a statutory merger to which section 381(a) applies, and in a like transaction acquired on June 30, 1961, all the assets of V Corporation. Such corporations all compute taxable income on the basis of the calendar year. T Corporation is a personal holding company for its taxable years 1960 and 1961.

(ii) *Dividend carryover to T Corporation's taxable year 1960.* With respect to T Corporation's taxable year ending December 31, 1960, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(*a*) U Corporation's taxable years ending June 30, 1960, and December 31, 1959, respectively; and

(*b*) T Corporation's taxable years ending December 31, 1959, and December 31, 1958, respectively.

The dividend carryover to T Corporation's taxable year ending December 31, 1960, is $7,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	U Corporation		*T Corporation*	
Second preceding taxable year:				
Dividends paid deduction	$16,000		$10,000	
Taxable income	12,000		13,000	
Excess		$4,000		0
First preceding taxable year:				
Dividends paid deduction	7,000		17,000	
Taxable income	5,000		16,000	
Excess		2,000		$1,000
Separate dividend carryovers		6,000		1,000

The aggregate dividend carryover of $7,000 is the sum of $6,000 (the separate dividend carryover from U Corporation) and $1,000 (the separate dividend carryover from T Corporation's own first preceding taxable year).

(iii) *Dividend carryover to T Corporation's taxable year 1961.* Inasmuch as T Corporation's taxable year 1961 is the second taxable year ending after the date of distribution or transfer from U Corporation, paragraph (b)(3)(ii) of this section governs the determination of the dividend carryover from taxable years of T Corporation and U Corporation. On the other hand, inasmuch as T Corporation's taxable year 1961 is the first taxable year ending after the date of distribution or transfer from V Corporation, paragraph (b)(3)(i) governs the determination of the dividend carryover from taxable years of V Corporation.

(*a*) *Application of paragraph (b)(3)(ii) of this section.* With respect to T Corporation's taxable year 1961, the first preceding taxable year is T Corporation's taxable year ending December 31, 1960; and the taxable years referred to as second preceding taxable year are T Corporation's taxable year ending December 31, 1959, and U Corporation's taxable year ending June 30, 1960. The dividend carryover from taxable years of T Corporation and U Corporation is $1,500 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

Second preceding taxable year	U Corporation	T Corporation
Dividends paid deduction	$7,000	$17,000
Taxable income	5,000	16,000
Separate excess of dividends paid deduction over taxable income	2,000	1,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $3,000, the sum of $2,000 (separate excess from U Corporation) and $1,000 (separate excess from T Corporation). Such aggregate is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

		T Corporation
Aggregate excess of dividends paid deduction for second preceding taxable year		$3,000
First preceding taxable year:		
Dividends paid deduction of T Corporation	$21,000	
Taxable income of T Corporation	22,500	
Excess taxable income		(1,500)
Separate dividend carryover (without regard to V Corporation)		1,500

(*b*) *Application of paragraph (b)(3)(i) of this section.* With respect to T Corporation's taxable year 1961, V Corporation's taxable year ending June 30, 1961, is a first preceding taxable year, and its taxable year ending December 31, 1960, is a second preceding taxable year. The separate dividend carryover from V Corporation is $8,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	V Corporation	
Second preceding taxable year		
Dividends paid deduction	$11,000	
Taxable income	6,000	
Excess		$5,000
First preceding taxable year:		
Dividends paid deduction	$9,000	
Taxable income	6,000	

	V Corporation	
Second preceding taxable year		
Excess	3,000	
Separate dividend carryover from V Corporation		8,000

(*c*) *Dividend carryover.* The dividend carryover to T Corporation's taxable year 1961 is $9,500, the sum of $8,000 (the separate dividend carryover from V Corporation) and $1,500 (the aggregate dividend carryover from T Corporation and U Corporation).

(d) *Successive carryovers.* The provisions of this section shall apply for the purpose of determining a dividend carryover to an acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which has previously acquired the assets of another corporation in a transaction to which section 381(a) applies; even though, in computing the dividend carryover to such second acquiring corporation, it is necessary to take into account the deduction for dividends paid, and the adjusted taxable income, of the first distributor or transferor corporation.

(e) *Acquiring corporation not receiving all the assets.* The dividend carryover acquired from a distributor or transferor corporation by an acquiring corporation in a transaction to which section 381(a) applies is not reduced by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(f) *Dividends paid after the close of taxable year.* A transaction to which section 381(a) applies does not prevent the application of section 563(b) to a dividend paid by a distributor or transferor corporation after the close of its taxable year ending with the date of distribution or transfer but on or before the 15th day of the third month following the close of such taxable year. However, dividends paid by the acquiring corporation may not be taken into account under section 563(b) for the purpose of determining the dividends paid deduction of the distributor or transferor corporation for its taxable year ending with the date of distribution or transfer.

[T.D. 6532, 26 FR 406, Jan. 19, 1961]

§ 1.381(c)(15)–1 Indebtedness of certain personal holding companies.

(a) *Qualified indebtedness*—(1) *Carryover requirement.* If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for any indebtedness which was qualified indebtedness (as defined in section 545(c) and § 1.545–3) in the hands of the distributor or transferor corporation immediately before the assumption of such indebtedness, then, under section 381(c)(15), in computing its undistributed personal holding company income for any taxable year beginning after December 31, 1963, and ending after the date of distribution or transfer, the acquiring corporation shall be considered the distributor or transferor corporation for purposes of computing the deduction under section 545(c) and § 1.545–3. Such deduction shall be allowed to the acquiring corporation in accordance with section 545(c) and § 1.545–3.

(2) *Successive transactions to which section 381(a) applies.* If in a transaction to which section 381(a) applies, an acquiring corporation assumes liability for qualified indebtedness, such acquiring corporation shall be deemed to have incurred such qualified indebtedness for the purpose of applying section 381(c)(15) to any subsequent transaction in which such acquiring corporation is the distributor or transferor corporation.

(b) *Pre-1934 indebtedness*—(1) *Carryover requirement.* If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for any indebtedness incurred, or assumed, before January 1, 1934, by a distributor or transferor corporation, then under section 381(c)(15) the acquiring corporation shall be allowed, in computing its undistributed personal holding company income for any taxable year ending after the date of distribution or transfer, a deduction under section 545(b)(7) for amounts used or irrevocably set aside to pay or to retire such indebtedness. Such deduction shall be allowed to the acquiring corporation in accordance with section 545(b)(7) and paragraph (g) of § 1.545–2 as though the indebtedness had been incurred, or assumed, by the acquiring corporation before January 1, 1934.

(2) *Successive transactions to which section 381(a) applies.* If, in a transaction to which section 381(a) applies, an acquiring corporation assumes liability for indebtedness described in subparagraph (1) of this paragraph, such acquiring corporation shall be deemed to have incurred the indebtedness before January 1, 1934, for the purpose of applying section 381(c)(15) to any subsequent transaction in which such acquiring corporation is the distributor or transferor corporation.

(c) *Special rule.* For purposes of this section, if, in a transaction otherwise described in this section, an acquiring corporation acquires real estate—(1) of which the distributor or transferor corporation is the legal or equitable owner immediately before the acquisition, and (2) which is subject to indebtedness that, with respect to the distributor or transferor corporation, is indebtedness described in this section immediately before the acquisition, then the acquiring corporation will be treated as having assumed such indebtedness, provided it shows to the satisfaction of the Commissioner that under all the facts and circumstances it bears the burden of discharging such indebtedness.

[T.D. 6949, 33 FR 5524, Apr. 9, 1968; 33 FR 6091, Apr. 20, 1968]

§ 1.381(c)(16)–1 Obligations of distributor or transferor corporation.

(a) *Deduction allowed to acquiring corporation.* (1) If, in a transaction to which section 381(a) applies, the acquiring corporation assumes an obligation of a distributor or transferor corporation which gives rise to a liability after the date of distribution or transfer and if the distributor or transferor corporation would be entitled to deduct such liability in computing taxable income were it paid or accrued after that date by such corporation, then, under the provisions of section 381(c)(16) and this section, the acquiring corporation shall be entitled to deduct such liability as if it were the distributor or transferor corporation. However, in the case of a transaction to which section 381(a)(2) applies, section 381(c)(16) shall not apply to an obligation which is reflected in the amount of consideration, that is, the stock, securities, or other property, transferred by the acquiring corporation to a transferor corporation or its shareholders in exchange for the property of that transferor corporation. An obligation which is so reflected in the amount of consideration will be treated as an item or tax attribute not specified in section 381(c)(16). Such an obligation is subject to section 381(c)(4). See subparagraph (2) of this paragraph. Any deduction allowed under section 381(c)(16) to the acquiring corporation shall be taken by that corporation in the taxable year ending after the date of distribution or transfer in which the liability is paid or accrued by that corporation, as the case may be.

(2) In order to determine whether, in the case of obligations of a distributor or transferor corporation assumed by an acquiring corporation, section 381(c)(16) and this section, or section 381(c)(4) and the regulations thereunder, apply, the following rules shall govern:

(i) If the obligation gave rise to a liability before the date of distribution or transfer, see section 381(c)(4) and the regulations thereunder.

(ii) If the obligation gives rise to a liability after the date of distribution or transfer, and the obligation was not reflected in the amount of consideration transferred by the acquiring corporation to the distributor or transferor corporation or its shareholders in exchange for the property of the distributor or transferor corporation, then section 381(c)(16) and this section shall apply.

(iii) In the case of a transaction to which section 381(a)(1) applies, if the obligation gives rise to a liability after the date of a distribution, and the obligation was reflected in the amount of consideration transferred by the acquiring corporation to the distributor corporation or its shareholders in exchange for the property of the distributor corporation, then section 381(c)(16) and this section shall apply.

(iv) In the case of a transaction to which section 381(a)(2) applies, if the obligation gives rise to a liability after the date of a transfer, and the obligation was reflected in the amount of consideration transferred by the acquiring corporation to the transferor corporation or its shareholders in exchange for the property of the transferor corporation, then see section 381(c)(4) and the regulations thereunder.

(3) The rules of this section apply to obligations assumed by agreement of the parties as well as by operation of law.

(4) For purposes of this section, an obligation of a distributor or transferor corporation gives rise to a liability when the liability would be accruable by a taxpayer using the accrual method of accounting notwithstanding the fact that the distributor or transferor corporation is not using the accrual method of accounting. See paragraph (a)(2) of § 1.461–1.

(5) In the case of a transaction to which section 381(a)(2) applies, the determination as to whether or not an obligation was reflected in the amount of consideration transferred by the acquiring corporation to the transferor corporation or its shareholders in exchange for the property of the transferor corporation shall be made on the basis of all the facts of each particular transfer. Where, on the date of distribution or transfer, the parties were aware of the existence of a specific obligation and reduced the amount of consideration to be transferred by the acquiring corporation by a specific amount because of the existence of such obligation, then such obligation shall be considered to have been reflected in the amount of consideration transferred. In the absence of such facts, it shall be presumed that the obligation was not reflected in the amount of consideration transferred.

(b) *Distribution or transfer occurring under the Internal Revenue Code of 1939.* Subject to the provisions of section 381(c)(16) and this section, a corporation which would have been an acquiring corporation (under the provisions of paragraph (b) of § 1.381(a)–1) in a transaction to which section 381(a) applies if the date of distribution or transfer had occurred on or after the effective date of the provisions of subchapter C, chapter 1 of the Internal Revenue Code of 1954, applicable to a liquidation or reorganization, as the case may be, shall be entitled to take a deduction for amounts paid or accrued in any taxable year beginning after December 31, 1953, in respect of any obligation which it has assumed from a corporation which would have been a distributor or transferor corporation in such transaction. However, this paragraph shall have no application to a situation described in paragraph (a)(2)(iv) of this section.

(c) *Examples.* The application of the foregoing rules may be illustrated by the following examples:

Example (1). X Corporation and Y Corporation compute their taxable income on the basis of the calendar year, and both corporations use an accrual method of accounting. On December 31, 1954, Y Corporation acquires the assets of X Corporation in a transfer to which section 381(a)(2) applies. By reason of State law, Y Corporation assumes responsibility for all of the obligations for which X Corporation is then, or may become, liable. The parties have no knowledge of any specific obligations of X Corporation which are not yet fixed and ascertainable, but it is agreed to reduce the amount of consideration that Y Corporation is to transfer in exchange for the assets of X Corporation by $5,000 to reflect any unforeseen contingent liabilities of X Corporation for which Y Corporation might subsequently become liable. After the date of the transfer, a claim for damages on account of the alleged negligence of an alleged agent of X Corporation is filed. After commencement of legal action by the claimant and in order to eliminate the possibility of injury to its business, Y Corporation settles the claim in 1955 by paying the claimant the amount of $3,000. Assuming that such sum would have been deductible under section 162 if paid by X Corporation, Y Corporation is entitled to deduct such sum in accordance with the provisions of section 381(c)(16) and this section in computing its taxable income for 1955, since the claim gave rise to a liability after the date of transfer, the parties were not aware of a specific obligation, and the specific obligation was not reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation.

Example (2). Assume the same facts as in *Example (1)*, except that the claim for damages was filed prior to the transfer of X Corporation's assets to Y Corporation, but the parties considered the chances for recovery by the claimant so remote that no specific amount other than the $5,000 reduction in consideration for all contingent liabilities as a whole is reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation. Assuming that such sum would have been deductible under section 162 if paid by X Corporation, the

$3,000 paid by Y Corporation in 1955 is deductible in accordance with the provisions of section 381(c)(16) and this section in 1955.

Example (3). Assume the same facts as in *Example (1)*, except that the parties consider the chances of recovery by the claimant of sufficient probability that Y Corporation reduces the amount of consideration it transfers in exchange for the assets of X Corporation by $1,000 in addition to the $5,000 reduction for all other contingent liabilities. The $3,000 paid by Y Corporation in 1955 is not deductible under section 381(c)(16) and this section, since the specific obligation was reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation. The deductibility of the payment is accordingly governed by the provisions of section 381(c)(4) and the regulations thereunder. Similarly, if in this case Y Corporation had transferred $10,000 less in consideration for the assets of X Corporation because of this particular claim, Y Corporation would not be entitled to any deduction for the $3,000 paid in 1955 under section 381(c)(16) and this section, and the deductibility of the payment would be governed by the provisions of section 381(c)(4) and the regulations thereunder. If the date of transfer of X Corporation's assets had occurred prior to the effective date of subchapter C, chapter 1 of the Internal Revenue Code of 1954, applicable to a reorganization, no deduction would be allowed to Y Corporation under that section.

[T.D. 6750, 29 FR 11267, Aug. 5, 1964]

§1.381(c)(17)–1 Deficiency dividend of personal holding company.

(a) *Carryover requirement.* If a determination (as defined in section 547(c)) establishes that a distributor or transferor corporation in a transaction to which section 381(a) applies is liable for personal holding company tax imposed by section 541 (or by a corresponding provision of prior income tax law) for any taxable year ending on or before the date of distribution or transfer, then in computing such tax the deduction described in section 547 shall be allowed pursuant to section 381(c)(17) to such corporation for the amount of deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. Except as otherwise provided in this section, the provisions of section 547 and the regulations thereunder apply with respect to a deficiency dividend deduction allowable pursuant to section 381(c)(17).

(b) *Deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation.* A deficiency dividend paid by the acquiring corporation with respect to the distributor or transferor corporation is a distribution that would satisfy the definition of a deficiency dividend under section 547(d)(1) if paid by the distributor or transferor corporation to its own shareholders except that it shall be paid by the acquiring corporation to its own shareholders and shall be paid after the date of distribution or transfer and on, or within 90 days after, the date of the determination but before the acquiring corporation files claim under paragraph (c) of this section.

(c) *Claim for deduction.* A claim for a deduction under this section shall be made by the acquiring corporation on Form 976, and shall be filed within 120 days after the date of the determination. The form shall contain, or be accompanied by, the information required under paragraph (b)(2) of §1.547–2 in sufficient detail to properly identify the facts with the distributor or transferor corporation and the acquiring corporation. The statement required with respect to the shareholders on the date of payment of the deficiency dividend shall relate to the shareholders of the acquiring corporation, and the required certified copy of the resolution authorizing the payment of the dividend shall be that of the board of directors, or other authority, of the acquiring corporation. Necessary changes may be made in Form 976 in order to carry out the provisions of this paragraph. The claim shall be filed with the district director for the internal revenue district in which the return of the distributor or transferor corporation to which such claim relates was filed.

(d) *Effect on dividends paid deduction.* A deficiency dividend paid by the acquiring corporation, which is allowable as a deduction to a distributor or transferor corporation pursuant to section 381(c)(17), shall not become a part of the dividends paid deduction of the acquiring corporation under section 561 for any taxable year.

(e) *Successive transactions to which section 381(a) applies.* The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if X Corporation transfers its assets to Y Corporation in a transaction to which section 381(a) applies and if Y Corporation transfers its assets to Z Corporation in a subsequent transaction to which section 381(a) applies, then, subject to the provisions of this section, X Corporation may take a deficiency dividend deduction for the amount of deficiency dividends paid by Z Corporation with respect to X Corporation.

(f) *Example.* The provisions of this section may be illustrated by the following example:

Example. M Corporation, a personal holding company, computes its taxable income on the basis of the calendar year. On December 31, 1956, N Corporation acquires the assets of M Corporation in a transaction to which section 381(a) applies. On July 31, 1958, a determination (as defined in section 547(c)) establishes that M Corporation is liable for the taxable year 1955 for personal holding company tax in the amount of $35,500 based on undistributed personal holding company income of $42,000 for such taxable year. N Corporation complies with the provisions of this section and on September 30, 1958, distributes $42,000 to its shareholders as deficiency dividends with respect to M Corporation's taxable year 1955. The distribution of $42,000 by N Corporation is a taxable dividend under section 316(b)(2) regardless of whether N Corporation is a personal holding company for the taxable year 1958 or whether it had any current or accumulated earnings and profits. See *Example (3)* in paragraph (e) of § 1.316–1. Because N Corporation has paid deficiency dividends of $42,000 in accordance with this section, M Corporation is entitled to a deficiency dividend deduction of $42,000 for the taxable year 1955 and is thus relieved of its liability for personal holding company tax of $35,500 for such taxable year. To prevent a duplication of deductions, the amount distributed by N Corporation in 1958 does not become a part of N Corporation's dividends paid deduction under section 561 for any taxable year.

[T.D. 6532, 26 FR 409, Jan. 19, 1961, as amended by T.D. 7604, 44 FR 18661, Mar. 29, 1979; T.D. 7767, 45 FR 11264, Feb. 6, 1981]

§ 1.381(c)(18)–1 Depletion on extraction of ores or minerals from the waste or residue of prior mining.

(a) *Carryover requirement.* Section 381(c)(18) provides that the acquiring corporation in a transaction described in section 381(a) shall be considered as though it were the distributor or transferor corporation after the date of distribution or transfer for the purpose of determining the applicability of section 613(c)(3) (relating to extraction of ores or minerals from the ground). Thus, an acquiring corporation which has acquired the waste or residue of prior mining from a distributor or transferor corporation in a transaction described in section 381(a) shall be entitled, after the date of distribution or transfer, to an allowance for depletion under section 611 in respect of ores or minerals extracted from such waste or residue if the distributor or transferor corporation would have been entitled to such an allowance for depletion in the absence of the distribution or transfer. See paragraph (f) of § 1.613–4 to determine whether a distributor or transferor corporation is entitled to an allowance for depletion with respect to the waste or residue of prior mining.

(b) *Application of section 614 to waste or residue of prior mining.* If, in a transaction described in section 381(a), the acquiring corporation acquires waste or residue of prior mining from a distributor or transferor corporation, then the acquiring corporation shall be considered as though it were the distributor or transferor corporation for the purpose of applying section 614 and the regulations thereunder to the waste or residue so acquired. Thus, if the distributor or transferor corporation was required under paragraph (c) of § 1.614–1 to treat the waste or residue as part of the mineral deposit from which it was extracted and if the acquiring corporation acquires both the waste or residue and the mineral deposit from which it was extracted in a transaction described in section 381(a), then such waste or residue shall be treated as a part of such mineral deposit in the hands of the acquiring corporation. On the other hand, if the waste or residue was required to be treated as a separate mineral deposit in the hands of the distributor or transferor corporation, such waste or residue shall be treated as a separate mineral deposit in the hands of the acquiring corporation.

[T.D. 6552, 26 FR 1991, Mar. 8, 1961, as amended by T.D. 7170, 37 FR 5373, Mar. 15, 1972]

§1.381(c)(19)–1 Charitable contribution carryovers in certain acquisitions.

(a) *Carryover requirement.* Section 381(c)(19) provides that, in computing taxable income for its taxable years which begin after the date of distribution or transfer to which section 381(a) applies, the acquiring corporation shall take into account any charitable contributions made by a distributor or transferor corporation during the taxable year ending on the date of distribution or transfer, and in certain immediately preceding taxable years, which are in excess of the maximum amount deductible for those taxable years under section 170(b)(2) in the following manner:

(1) If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins before January 1, 1962, the acquiring corporation shall, in computing taxable income for its first 2 taxable years which begin after the date of such distribution or transfer, take into account the excess contributions made by the distributor or transferor corporation in the taxable year ending on the date of distribution or transfer and in the immediately preceding taxable year;

(2) If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, the acquiring corporation shall, in computing taxable income for certain taxable years which begin after the date of distribution or transfer, take into account the excess contributions made by the distributor or transferor corporation in the taxable year ending on such date of distribution or transfer and in any of the four taxable years immediately preceding such taxable year but excluding any taxable year beginning before January 1, 1962 (see paragraph (c)(3) of this section). Notwithstanding the preceding sentence, if the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, and before January 1, 1963, the acquiring corporation shall, in computing taxable income for its first taxable year which begins after the date of distribution or transfer, also take into account the excess contributions made by the distributor or transferor corporation in the taxable year immediately preceding the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer (see paragraph (c)(2) of this section).

To determine the amount of excess contributions made by a distributor or transferor corporation and to integrate them with contributions made by the acquiring corporation for the purpose of determining the charitable contributions deductible by the acquiring corporation for its taxable years beginning immediately after the date of distribution or transfer, it is necessary to apply the provisions of section 170(b)(2) and §1.170–3 (or, if applicable, section 170(b)(2) and (d)(2) and §1.170A–11) in accordance with the conditions and limitations of section 381(c)(19) and this section. For taxable years beginning before January 1, 1970, see section 170 for provisions of section 170(b)(2) as referred to in this section. For taxable years beginning after December 31, 1969, see section 170A for provisions of section 170(b)(2) or (d)(2) as referred to in this section. For special rules for applying section 170(d)(2) with respect to contributions paid, or treated as paid, in taxable years beginning before January 1, 1970, see paragraph (d) of §1.170A–11.

(b) *Manner of computing excess charitable contribution carryovers.* (1) The amount of any charitable contribution made by a distributor or transferor corporation in any taxable year ending on or before the date of distribution or transfer, or made by the acquiring corporation in any taxable year before its taxable year beginning after the date of distribution or transfer, in excess of the amount allowable as a deduction to such corporation for such taxable year under section 170(b)(2) shall be determined by taking into account the taxable income of, and the contributions made by, that corporation only.

(2) An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a

transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 170 and 381, the charitable contribution carryovers available to the first acquiring corporation under sections 170 and 381, including those derived by such first acquiring corporation from its distributor or transferor corporation.

(3) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and in certain immediately preceding taxable years (see paragraph (c) of this section) which are not deductible by the distributor or transferor corporation because of the 5-percent limitation of section 170(b)(2) shall be available to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation. Thus, if a parent corporation owning 80 percent of all classes of stock of its subsidiary corporation were to acquire its share of the assets of the subsidiary corporation upon a complete liquidation described in paragraph (b)(1)(i) of § 1.381(a)–1, then, subject to the conditions and limitations of this section, 100 percent of the excess contributions made by the subsidiary corporation would be available to the acquiring corporation.

(c) *Taxable years to which carryovers apply and amount deductible*—(1) *Taxable years beginning before January 1, 1962.* If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins before January 1, 1962:

(i) The excess charitable contributions made by a distributor or transferor corporation in its taxable year immediately preceding that ending on the date of distribution or transfer, to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on that date, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) in its first taxable year beginning after the date of distribution or transfer. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first taxable year shall not be deducted by that corporation in any other taxable year.

(ii) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer shall first be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) and this section in its first taxable year beginning after that date and then, to the extent prescribed by section 170(b)(2) and this section, in its second taxable year beginning after that date. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first and second taxable years shall not be deducted by that corporation in any other taxable year.

(2) *Taxable years beginning in 1962.* If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, and before January 1, 1963:

(i) The excess charitable contributions made by a distributor or transferor corporation in its taxable year immediately preceding that ending on the date of distribution or transfer, to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on that date, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) in its first taxable year beginning after the date of distribution or transfer. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first year shall not be deducted by that corporation in any other taxable year.

(ii) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and beginning after December 31, 1961, and before January 1, 1963, shall first be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) and this section in its first taxable year beginning after that date and then, to the extent prescribed by section 170(b)(2) and this section, in its second, third, fourth, and fifth taxable year, in order of time, beginning after that date. Any portion of such excess which is not deductible under this section by the acquiring corporation in such 5 taxable years shall not be deducted by that corporation in any other taxable year.

(3) *Taxable years beginning after December 31, 1962.* (i) If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1962, the excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and in each of its four immediately preceding taxable years (excluding any taxable year beginning before January 1, 1962), to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on the date of distribution or transfer or its prior taxable years, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) (or, if applicable, section 170(d)(2)) and subdivision (ii) of this subparagraph, in its taxable years which begin after the date of distribution or transfer. However, any portion of the excess charitable contributions made by a distributor or transferor corporation in a particular taxable year, to which this subparagraph is applicable, which is not deductible under this section within the 5 taxable years immediately following the taxable year in which the contribution was paid by the distributor or transferor corporation shall not be deductible by the acquiring corporation in any other taxable year.

(ii) For purposes of determining the 5 taxable years in which the excess contributions may be deducted, all taxable years of the distributor or transferor corporation subsequent to the taxable year in which the excess contribution was made, including the taxable year ending on the date of distribution or transfer shall be treated as taxable years of the acquiring corporation.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. X Corporation and Y Corporation both compute taxable income on the calendar year basis. X Corporation has excess charitable contributions for 1962 and 1964. On December 31, 1966, X Corporation distributes all its assets to Y Corporation in a complete liquidation to which section 381(a) applies. The excess 1962 charitable contributions of X Corporation (to the extent not deductible by X because of the limitations of section 170(b)(2) in its taxable years 1963 through 1966) may be deducted by Y Corporation only in 1967. Y Corporation's taxable year 1967 is the fifth taxable year succeeding the taxable year 1962 (the year in which the excess contributions were made), and the portion of such excess contributions which is not deductible in the 5 taxable years immediately succeeding 1962 (1963 through 1967) is not deductible by Y Corporation in any other taxable year. Any excess charitable contributions for 1964 to which Y Corporation may be entitled must be deducted by Y Corporation (if deductible at all) in 1967, 1968, and 1969 since such years are the third, fourth, and fifth taxable years succeeding the taxable year 1964 (the year in which the excess contributions were paid).

(4) *General rules.* No excess charitable contributions made by a distributor or transferor corporation shall be deductible by the acquiring corporation in its taxable year which includes the date of distribution or transfer. In addition, an excess charitable contribution made by a distributor or transferor corporation in a taxable year prior to the taxable year of the transfer is only deductible by the distributor or transferor corporation, subject to the limitations of section 170(b)(2) (or, if applicable, section 170(d)(2)), in its subsequent taxable years which begin on or before the date of distribution or transfer, and by the acquiring corporation in its taxable year or years beginning after the date of distribution or transfer.

(d) *Rules governing amounts deductible by acquiring corporations.* (1) In applying the provisions of section 170(b)(2) (or, if applicable, section 170(d)(2)) for the purpose of determining the amount of excess charitable contributions which are deductible by the acquiring corporation in its taxable years beginning after the date of distribution or transfer, all taxable years of the distributor or tranferor and acquiring corporations which, with respect to a particular taxable year beginning after the date of distribution or transfer, constitute the same numbered preceding taxable year shall together be considered as a 1 taxable year even though the taxable years involved may not end on the same date. Thus, for example, all taxable years of the distributor or transferor and acquiring corporations which, with respect to the first taxable year of the acquiring corporation beginning after the date of distribution or transfer, constitutes the second preceding taxable year shall together be considered as 1 taxable year even though the taxable years involved may not end on the same date. Any excess charitable contributions carried over from preceding taxable years which are considered as 1 taxable year shall be taken into account by the acquiring corporation as one amount, without regard to the extent to which the contributions were made by a distributor or transferor corporation or the acquiring corporation.

(2) For purposes of this paragraph, each taxable year of the distributor or transferor corporation beginning on or before the date of distribution or transfer shall be treated as a preceding taxable year with reference to the acquiring corporation's taxable years beginning after such date. For example, the taxable year of a distributor or transferor corporation which ends on the date of distribution or transfer shall be considered a first preceding taxable year with reference to the acquiring corporation's first taxable year beginning after that date, a second preceding taxable year with reference to the acquiring corporation's second taxable year beginning after that date, and so forth with respect to succeeding taxable years of the acquiring corporation. Also, for example, the taxable year of a distributor or transferor corporation which immediately precedes its taxable year ending on the date of distribution or transfer shall be considered a second preceding taxable year with reference to the acquiring corporation's first taxable year beginning after that date.

(e) *Illustration.* The application of this section may be illustrated by the following example:

Example. (i) X Corporation is organized on April 1, 1956, and computes its taxable income on the basis of the fiscal year ending March 31. Y Corporation is organized on July 1, 1955, and computes its taxable income on the basis of the fiscal year ending June 30. Z Corporation is organized on January 1, 1956, and computes its taxable income on the basis of the calendar year. On June 30, 1957, X Corporation distributes all its assets to Y Corporation in a complete liquidation to which section 381(a) applies. On November 30, 1957, Y Corporation transfers all its assets to Z Corporation in a statutory merger to which section 381(a) applies.

(ii) The 5-percent limitation (computed in the manner prescribed by section 170(b)(2)), the charitable contributions actually paid, and the excess contributions with respect to each such corporation during the taxable years involved are as follows:

Name of corporation	*X*	*X*
Taxable year ending	*3–31–57*	*6–30–57*
5-percent limitation	$20,000	$9,000
Current contributions	32,000	15,000
(Excess contributions)	(12,000)	(6,000)

Name of corporation	*Y*	*Y*	*Y*
Taxable year ending	*6–30–56*	*6–30–57*	*11–30–57*
5-percent limitation	$15,000	$10,000	$18,000
Current contributions	29,000	0	17,000
(Excess contributions)	(14,000)	....	....
Balance of 5-percent limitation	....	10,000	1,000

Name of corporation	*Z*	*Z*	*Z*
Taxable year ending	*12–31–56*	*12–31–57*	*12–31–58*
5-percent limitation	$10,000	$30,000	$58,000
Current contributions	40,000	28,000	92,000
(Excess contributions)	(30,000)	....	....
Balance of 5-percent limitation	....	2,000	56,000

(iii) X Corporation was in existence for two taxable years, in each of which it made charitable contributions in excess of the maximum amount deductible for those years under section 170(b)(2). The excess contributions made in the year ending March 31, 1957, of $12,000, are deductible by X Corporation in its short taxable year ending June 30, 1957, and then by Y Corporation in its short taxable year ending November 30, 1957, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. The excess contributions made by X Corporation in the year ending June 30, 1957, of $6,000, are deductible by Y Corporation in its short taxable year ending November 30, 1957, and then by Z Corporation in its taxable year 1958, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section.

(iv) Y Corporation was in existence for three taxable years. In the year ended June 30, 1956, its contributions in excess of the amount deductible for that year under section 170(b)(2) amounted to $14,000. Such excess is deductible by Y Corporation in its taxable year ending June 30, 1957, and, together with X Corporation's excess contributions of $18,000, in its short taxable year ending November 30, 1957, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. Accordingly, since Y Corporation made no contributions in its taxable year ending June 30, 1957, its deduction for that year on account of excess contributions carried over is $10,000, an amount equal to the 5-percent limitation of section 170(b)(2). The deduction is attributable to excess contributions made by Y Corporation in the taxable year ended June 30, 1956; thus, the excess of those contributions over $10,000, namely, $4,000, is deductible by Y Corporation in its short taxable year ending November 30, 1957, in the manner and to the extent prescribed by section 170(b)(2) and this section. With respect to the short taxable year ending November 30, 1957, the excess contributions of the second preceding year are X Corporation's excess contributions of $12,000 made in the year ending March 31, 1957, and Y Corporation's excess contributions of $4,000 made in the year ending June 30, 1956, which were not deductible by Y Corporation in the taxable year ending June 30, 1957, because of the 5-percent limitation prescribed by section 170(b)(2), an aggregate of $16,000. Inasmuch as Y Corporation's limitation for the short taxable year ended November 30, 1957, exceeds the contributions made in that year by $1,000, the excess contributions of the second preceding taxable year are deductible in the taxable year ending November 30, 1957, to the extent of $1,000 and the remainder ($15,000) is not deductible by any corporation in any taxable year. The excess contributions of the first preceding taxable year, namely, X Corporation's excess contributions made in the short taxable year ending June 30, 1957, are deductible by Z Corporation in its taxable year 1958, in the manner and to the extent prescribed in section 170(b)(2) and this section.

(v) Z Corporation has been in existence for 3 taxable years. The contributions made in 1956 in excess of the amount deductible for that year under section 170(b)(2) amounted to $30,000. Such excess is deductible by Z Corporation in its taxable year 1957 and, together with X Corporation's excess contributions of $6,000 (derived through Y Corporation) made in the taxable year ending June 30, 1957, in the taxable year 1958, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. Thus, $2,000 of the $30,000 excess contributions made in the year 1956 are deducted in 1957 and the remainder ($28,000), together with X Corporation's excess contributions of $6,000 made in the short taxable year ending June 30, 1957, are deducted in 1958 since the aggregate of such amounts plus the contributions actually made in that year does not exceed the 5-percent limitation prescribed by section 170(b)(2).

[T.D. 6552, 26 FR 1992, Mar. 8, 1961, as amended by T.D. 6900, 31 FR 14642, Nov. 17, 1966; T.D. 7207, 37 FR 20795, Oct. 5, 1972]

§1.381(c)(21)–1 Pre-1954 adjustments resulting from change in method of accounting.

(a) *Carryover requirement.* Section 381(c)(21) provides that, in a transaction to which section 381(a) applies, an acquiring corporation shall take into account the net amount of any adjustments described in section 481(b)(4) (relating to adjustments arising from changes in accounting methods initiated by the taxpayer attributable to pre-1954 Code years) of the distributor or transferor corporation to the extent that such net amount of such adjustments has not been taken into account in any taxable year, including a short taxable year, by the distributor or transferor corporation. The acquiring corporation shall take into account in each taxable year beginning with the taxable year ending after the date of distribution or transfer the net amount of such adjustments in the same manner and at the same time as such net amount would have been taken into account by the distributor or transferor corporation. Thus, the amount of any such adjustment which the acquiring corporation shall take into account in each taxable year shall be the same amount that would have been taken into account in each taxable year by the distributor or transferor corporation.

(b) This section may be illustrated by the following example:

Example. On January 1, 1960, X Corporation, a calendar year taxpayer, voluntarily changed its method of accounting giving rise to a $50,000 adjustment under section 481(a), of which $20,000 is attributable to pre-1954 Code years. Under section 481(b)(4) the $20,000 adjustment is to be spread over 1960 and the following 9 years at the rate of $2,000 each year. On November 1, 1963, all the assets of X Corporation are acquired by Y Corporation in a transaction to which section 381(a) applies. Y Corporation reports its income on a fiscal year ending June 30. X and Y Corporations must take into account the $20,000 adjustment at the rate of $2,000 in each taxable year in the following time and manner:

X Corporation	
Calendar years 1960–62 ($2,000×3)	$6,000

X Corporation		
Short taxable year ending Nov. 1, 1963 ($2,000×1)	2,000	$8,000
Y Corporation		
Fiscal years ending:		
June 30, 1964 ($2,000×1)	2,000	
June 30, 1965–69 ($2,000×5)	10,000	12,000
		20,000

(c) *Successive transactions to which section 381(a) applies.* The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if R Corporation, which was taking into account adjustments described in section 481(b)(4), distributes or transfers its assets to S Corporation in a transaction to which section 381(a) applies, and S Corporation was required to take into account any remaining portion of such adjustments under section 381(c)(21) and this section, and if subsequently S Corporation distributes or transfers its assets to T Corporation in a transaction to which section 381(a) applies, then T Corporation, under section 381(c)(21) and this section, shall take into account any remaining portion of such adjustments not previously taken into account by R and S Corporations.

(d) *Acquiring corporation not receiving all the assets.* The adjustments described in this section acquired from a distributor or transferor corporation by an acquiring corporation in a transaction to which section 381(a) applies is not reduced by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

[T.D. 6553, 26 FR 2171, Mar. 15, 1961]

§ 1.381(c)(22)–1 Successor life insurance company.

(a) *Carryover requirement.* If in a taxable year beginning after December 31, 1957, a distributor or transferor corporation which is a life insurance company (as defined in section 801(a)) is acquired by a corporation which is a life insurance company (as defined in section 801(a)), in a transaction to which section 381(a) applies, section 381(c)(22) provides that the acquiring corporation shall take into account the appropriate items which the distributor or transferor corporation was required to take into account for purposes of part I, subchapter L, chapter 1 of the Code. Furthermore, except as otherwise provided by this section, the acquiring corporation shall take into account the items described in paragraphs (2) through (21), other than paragraphs (14), (15), and (17), of section 381(c) and the regulations thereunder. For example, the acquiring corporation shall take into account the reserves described in section 810(c) distributed or transferred to it as of the close of the date of distribution or transfer by the distributor or transferor corporation in accordance with the provisions of section 381(c)(4) and the regulations thereunder. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1.

(b) *Items required to be taken into account by acquiring corporation.* If a transaction meets the requirements of paragraph (a) of this section, the acquiring corporation shall, except as otherwise provided, take into account as of the close of the date of distribution or transfer the following items of the distributor or transferor corporation:

(1) The operations loss carryovers (as determined under section 812), subject to conditions and limitations consistent with the conditions and limitations prescribed in section 381(c)(1) and the regulations thereunder. For example, a loss from operations for a loss year of a distributor or transferor corporation which ends on or before the last day of a loss year of the acquiring corporation shall be considered to be a loss from operations for a year prior to such loss year of the acquiring corporation. All references in section 381(c)(1) and the regulations thereunder to section 172 shall be construed as referring to the appropriate corresponding provisions of section 812. Thus, a reference to section 172(b) shall be construed as referring to section 812 (b) and (d). In determining the span of years for which a loss from operations may be carried, the number of taxable years for which the distributor or transferor corporation was authorized to do business as an insurance company shall be taken into account. For purposes of this determination, the taxable year of

the distributor or transferor corporation which ends on the date of distribution or transfer shall be taken into account even though such taxable year is a period of less than 12 months.

(2)(i) The investment yield and the beginning of the year asset balance for the distributor or transferor corporation's taxable year ending with the close of the date of distribution or transfer. Such items shall be integrated with the investment yield and beginning of the year asset balance of the acquiring corporation for its first taxable year ending after such date of distribution or transfer for purposes of determining the current earnings rate of the acquiring corporation for such taxable year. Furthermore, for purposes of determining the average earnings rate of the acquiring corporation, the investment yield and mean of the assets of the distributor or transferor corporation for its 4 taxable years immediately preceding its taxable year which closes with the date of distribution or transfer shall be integrated with the investment yield and mean of the assets of the acquiring corporation for such corresponding taxable years.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). X qualified as a life insurance company in 1949. Y qualified as a life insurance company in 1951. On June 30, 1961, at which time both X and Y were life insurance companies (as defined in section 801(a)), X transferred all its assets to Y in a statutory merger to which section 361 applies. For its taxable year ending on June 30, 1961, X had investment yield of $15 and assets at the beginning of such taxable year of $450. For purposes of determining its current earnings rate for its taxable year ending on December 31, 1961, Y had investment yield of $45 (including the $15 of investment yield of X), assets at the beginning of such taxable year of $1,250 (including the $450 of X's assets at the beginning of its taxable year 1961), and assets at the end of such taxable year of $1,750 (after the application of section 806(a)). Under the provisions of subdivision (i) of this subparagraph, the current earnings rate of Y for the taxable year 1961 would be 3 percent, determined by dividing the investment yield of Y, $45, by the mean of the assets of Y, $1,500 ($1,250+$1,750÷2). In order to determine its average earnings rate and adjusted reserves rate for the taxable year 1961, Y would make up the following schedule:

Taxable year	Investment yield			Mean of assets			Current earnings rate of Y
	Column 1—X	Column 2—Y	Column 3 (Col. 1 + Col. 2) integrated investment yield	Column 4—X	Column 5—Y	Column 6 (Col. 4 + Col. 5) integrated means of assets	Column 7 (Col. 3 ÷ Col. 6)
1960	$16	$26	$42	$400	$800	$1,200	3.5
1959	16	24	40	500	750	1,250	3.2
1958	17	22	39	650	650	1,300	3.0
1957	19	21	40	700	500	1,200	3.3

For the taxable year 1961, Y would have an average earnings rate of 3.2 percent, computed by taking into account the current earnings rates for the taxable year 1961 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3 percent since the current earnings rate of 3 percent for 1961 is lower than the average earnings rate of 3.2 percent.

Example (2). The facts are the same as in *Example (1)*, except that the taxable year in issue is 1962, and the current earnings rate of Y for such taxable year was 3.8 percent. For the taxable year 1962, Y would have an average earnings rate of 3.3 percent, computed by taking into account only the current earnings rates for the taxable year 1962 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3.3 percent since the average earnings rate of 3.3 percent is lower than the 1962 current earnings rate of 3.8 percent.

(3) To the extent there are any amounts accrued for discounts in the nature of interest which have not been included as interest paid under section 805(e)(3), the acquiring corporation shall be treated as the distributor or transferor corporation for purposes of including such amounts as interest paid.

(4) Any adjustment required by section 806(b) with respect to an item described in section 810(c) shall be made

by the acquiring corporation in its first taxable year which begins after the date of distribution or transfer.

(5) The amount of the deduction provided by section 809(d)(6), as limited by section 809(f), for all taxable years of the distributor or transferor corporation which end on and before the date of distribution or transfer (irrespective of whether or not the distributor or transferor corporation claimed this deduction for such taxable years) for the purpose of determining the limitation under section 809(d)(6).

(6)(i) To the extent there are any remaining net increases or net decreases in reserves required to be taken into account by the distributor or transferor corporation under section 810(d)(1), the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. Assume that the amount of an item described in section 810(c) of X, a life insurance company, at the beginning of the taxable year 1959 is $100. Assume that at the end of the taxable year 1959, as a result of a change in the basis used in computing such item during the taxable year, the amount of the item (computed on the new basis) is $200 but computed on the old basis would have been $150. Since the amount of the item at the end of the taxable year computed on the new basis, $200, exceeds the amount of the item at the end of the taxable year computed on the old basis, $150, by $50, section 810(d)(1) provides that one-tenth of the amount of such excess, or $5, shall be taken into account by X as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1959. Assume further that on June 30, 1961, X transferred all its assets to Y, a life insurance company, in a statutory merger to which section 361 applies. Under the provisions of section 810(d)(1), X would include $5 as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for its taxable years 1960 and 1961. Thus, the remaining net increase to be taken into account by X under section 810(d)(1) is $40 (eight-tenths of $50). Accordingly, Y shall take into account $5 as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of its 8 taxable years beginning in 1962 ($5×8=$40).

(7)(i) The dollar balances in the shareholders surplus account, policyholders surplus account, and other accounts provided, however, that the acquiring corporation is a stock life insurance company. The dollar balance in the policyholders surplus account shall reflect the amount (if any) treated as a subtraction from such account by reason of the application of the limitation provided under section 815(d)(4) immediately prior to the close of the date of distribution or transfer. To the extent that any amount must be added to the shareholders surplus account as a result of the application of the limitation provided under section 815(d)(4), the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(ii) If the acquiring corporation is a mutual life insurance company, the dollar balances in the shareholders surplus account, policyholders surplus account, and other accounts shall not be taken into account by such acquiring corporation and the distributor or transferor corporation shall be subject to the provisions of section 815(d)(2)(A) as of the close of the date of distribution or transfer.

(8) To the extent that any amount must be added to the shareholders surplus account as a result of an election made under section 815(d)(1) by the distributor or transferor corporation, the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(9) The amount of the life insurance reserves at the end of 1958, but only for the purpose of applying the limitation provided under section 815(d)(4)(B).

(10) To the extent there are amounts subject to the provisions of section 817(d), the acquiring corporation shall be treated as the distributor or transferor corporation.

(11) To the extent there are any installments of tax imposed by section 818(e)(3)(A) remaining to be paid, the acquiring corporation shall be treated

as the distributor or transferor corporation for the purpose of paying such installments.

(12) The capital loss carryovers, subject to conditions and limitations consistent with the conditions and limitations prescribed in section 381(c)(3) and the regulations thereunder, except that any net capital loss of the distributor or transferor corporation for a taxable year beginning before January 1, 1959, shall not be taken into account. See section 817(c).

[T.D. 6625, 27 FR 12541, Dec. 19, 1962]

§1.381(c)(23)–1 Investment credit carryovers in certain corporate acquisitions.

(a) *Carryover requirement.* (1) Section 381(c)(23) requires the acquiring corporation in a transaction to which section 381 applies to succeed to and take into account under such regulations as may be prescribed by the Secretary or his delegate, the investment credit carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with any carryovers and carrybacks of the acquiring corporation for purposes of determining the amount of credit allowed by section 38 to the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of sections 46, 47, and 48 in accordance with the conditions and limitations of this section.

(2) The investment credit carryovers and carrybacks of the acquiring corporation determined as of the close of the date of distribution or transfer shall be computed without reference to any unused credit of a distributor or transferor corporation. The investment credit carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any unused credit of the acquiring corporation.

(b) *Carryback of unused credits.* An unused credit of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall not be carried back in computing the credit allowed by section 38 to a distributor or transferor corporation. However, an unused credit of the acquiring corporation for any such taxable year shall be carried back in accordance with section 46(b)(1) in computing the credit allowed to the acquiring corporation for a taxable year ending on or before the date of distribution or transfer. If a distributor or transferor corporation remains in existence after the date of distribution or transfer, an unused credit sustained by it for any taxable year beginning after such date shall be carried back in accordance with section 46(b)(1) in computing the credit allowed by section 38 to such corporation for a taxable year ending on or before that date, but may not be carried back or over in computing the credit allowed by section 38 to the acquiring corporation.

(c) *Computation of carryovers and carrybacks.* (1) Subject to the modifications set forth in this paragraph, the provisions of §1.46–2 shall apply in computing carryovers and carrybacks of unused credits to taxable years of the acquiring corporation.

(2)(i) The investment credit carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year.

(ii) The investment credit carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(3) An unused credit of a distributor or transferor corporation for a taxable year which ends on or before the last day of a taxable year of the acquiring corporation shall be considered to be an unused credit for a year prior to such taxable year of the acquiring corporation. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations

on the same date of distribution or transfer, the unused credit years of the distributor or transferor corporations shall be taken into account in the order in which such years terminate. If any one of the unused credit years of a distributor or transferor corporation ends on the same day as the unused credit year of another distributor or transferor corporation, either unused credit year may be taken into account before the other.

(4) The extent to which an investment credit carryover of a distributor or transferor corporation or of an acquiring corporation from an unused credit year ending before January 1, 1971, may be taken into account by the acquiring corporation for a taxable year beginning after December 31, 1970, shall be determined without regard to the credit earned by the acquiring corporation for such year. Thus, in such a case, the amount of unused credit from such unused credit years which may be taken into account in a taxable year of the acquiring corporation beginning after December 31, 1970, shall be determined solely with reference to the limitation based on amount of tax for such taxable year (without reduction for the credit earned for such year).

(d) *Computation of carryovers when date of distribution or transfer occurs on last day of acquiring corporation's taxable year.* The computation of the investment credit carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a taxable year of the acquiring corporation may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1971, and each corporation files its return on the calendar year basis. On December 31, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1971 and 1972 are as follows:

X Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$10,000	$5,000
1972	5,000	3,000

Y's credit earned and its limitation based on amount of tax for its taxable years 1971 through 1973 are as follows:

Y Corporation's	Credit earned	Limitation based on amount of tax
1971	$6,000	$5,000
1972	5,000	3,000
1973	3,000	10,000

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of the carryovers to Y Corporation's calendar year 1974, may be illustrated as follows:

(1) *X Corporation's 1971 unused credit.*— The carryover to Y 1974 is $0, computed as follows:

Unused credit	$5,000
Excess of X's 1972 limitation based on tax over credit earned	0
Carryover to Y's year 1973	5,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Carryover to Y's year 1974	0

(2) *Y Corporation's 1971 unused credit.*— The carryover to Y 1974 is $0, computed as follows:

Unused credit	$1,000
Excess of Y's 1972 limitation based on tax over credit earned	0
Carryover to Y's year 1973	1,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971	5,000
	2,000
Carryover to Y's year 1974	0

(3) *X Corporation's 1972 unused credit.*— The carryover to Y 1974 is $1,000, computed as follows:

Unused credit	$2,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971 and Y's $1,000 carryover from 1971	6,000
	1,000
Carryover to Y's year 1974	1,000

(4) *Y Corporation's 1972 unused credit.*— The carryover to Y 1974 is $2,000, computed as follows:

Unused credit	$2,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971 Y's $1,000 carryover from 1971 and X's $1,000 carryover from 1972	7,000
	0
Carryover to Y's year 1974	2,000

(5) The aggregate of the investment credit carryovers to Y's year 1974 is $3,000, computed as follows:

X's 1972 unused credit	$1,000
Y's 1972 unused credit	2,000
Total	3,000

(e) *Computation of carryovers when date of distribution or transfer is not on last day of acquiring corporation's taxable year.* (1) If the date of distribution or transfer occurs on any day other than the last day of a taxable year of the acquiring corporation, the amount which may be added to the amount allowable as a credit by section 38 for the first taxable year of the acquiring corporation ending after the date of distribution or transfer (hereinafter called the "year of acquisition") shall be determined in the following manner. The year of acquisition shall be considered as though it were 2 taxable years. The first of such 2 taxable years shall be referred to in this paragraph as the preacquisition part year and shall begin with the beginning of the year of acquisition and end with the close of the date of distribution or transfer. The second of such 2 taxable years shall be referred to in this paragraph as the postacquisition part year and shall begin with the day following the date of distribution or transfer and shall end with the close of the year of acquisition.

(2) The excess limitation for the year of acquisition (i.e., the excess of the limitation based on the amount of tax for such year over the amount of credit earned for such year) shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation, a calendar year taxpayer, acquires the assets of X Corporation on June 30, 1975, and Y Corporation has an excess limitation of $36,500 for its calendar year 1975, then the excess limitation for the preacquisition part year would be $18,100 ($36,500×181/365) and the excess limitation for the postacquisition part year would be $18,400 ($36,500×184/365).

(3) An unused credit of the acquiring corporation shall be carried to and applied against the excess limitation for the preacquisition part year and then carried to and applied against the excess limitation for the postacquisition part year, whereas an unused credit of the distributor or transferor corporation shall not be carried to the preacquisition part year but shall only be carried to and applied against the excess limitation for the postacquisition part year. For special rule relating to carryovers from taxable years ending before January 1, 1971, to taxable years beginning after December 31, 1970, see subparagraph (6) of this paragraph.

(4) Though considered as two separate taxable years for purposes of this paragraph, the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which an unused credit is carried under section 46(b)(1).

(5) The preceding subparagraphs may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1971, and each corporation files its return on the calendar year basis. On May 1, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1971 and ending May 1, 1972, are as follows:

X Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$11,000	$5,000
Ending 5–1–72	3,000	6,000

Y's credit earned and its limitation based on amount of tax for its taxable years 1971 and 1972 are as follows:

Y Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$7,000	$3,000
1972	3,000	9,000

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of carryovers to Y Corporation's calendar year 1973, may be illustrated as follows:

(i) *X Corporation's 1971 unused credit.* The carryover to Y 1973 is $0, computed as follows:

Unused credit	$6,000
Excess of X's 5–1–72 limitation based on tax over credit earned	3,000
Carryover to Y's postacquisition part year 1972	3,000

Excess limitation for Y's postacquisition part year ($6,000× 244/366)	4,000
Carryover to Y's year 1973	0

(ii) *Y Corporation's 1971 unused credit.* The carryover to Y 1973 is $1,000, computed as follows:

Unused credit	$4,000
Excess limitation for Y's preacquisition part year ($6,000×122/ 366)	2,000
Carryover to Y's postacquisition part year	2,000
Excess limitation for Y's postacquisition part year ($6,000× 244/366)	4,000
Less: X's $3,000 carryover from 1971	3,000
	1,000
Carryover to Y's year 1973	1,000

(iii) The aggregate of the investment credit carryovers to Y's year 1973 is $1,000, computed as follows:

X's 1971 unused credit	0
Y's 1971 unused credit	$1,000
Total	1,000

(6) If the year of acquisition is a taxable year beginning after December 31, 1970, and if there is an unused credit of the distributor or transferor corporation or of the acquiring corporation arising in an unused credit year ending before January 1, 1971, which may be carried to such year of acquisition (see paragraph (c)(4) of this section), then in applying subparagraphs (1), (2), and (3) of this paragraph, in lieu of dividing the excess limitation for the year of acquisition between the preacquisition and postacquisition part years, only the limitation based on the amount of tax for such year (i.e., without reduction for the credit earned) shall be divided between the preacquisition and postacquisition part years. If there is also an unused credit arising in an unused credit year ending after December 31, 1970, which may be carried to the year of acquisition, then for the purpose of determining the amount of such unused credit which may be taken into account for such year of acquisition, the credit earned for the year of acquisition shall first be applied against the limitation based on amount of tax for the preacquisition part year (reduced by any investment credit carryovers to such part year from unused credit years ending before January 1, 1971) and the excess, if any, shall then be applied against the limitation based on amount of tax for the postacquisition part year (also reduced by any investment credit carryovers to such part year from unused credit years ending before January 1, 1971).

(7) Subparagraph (6) of this paragraph may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1970, and each corporation files its return on the calendar year basis. On May 1, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1970, 1971, and ending May 1, 1972, are as follows:

X Corporation's taxable year	Credit earned	Limitation based on amount of tax
1970	$300	
1971	100	
Ending 5–1–72	200	

Y's credit earned and its limitation based on amount of tax for its taxable years 1970 through 1972 are as follows:

Y Corporation's taxable year	Credit earned	Limitation based on amount of tax
1970	$100	
1971	200	
1972	300	$900

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of carryovers to Y Corporation's calendar year 1973, may be illustrated as follows:

(i) *X Corporation's 1970 unused credit.*— The carryover to Y 1973 is $0, computed as follows:

Unused credit	$300
X Corporation's 1971 limitation based on tax	0
X Corporation's 5–1–72 limitation based on tax	0
Carryover to Y's postacquisition part year 1972	300
Limitation based on tax for Y's postacquisition part year 1972 ($900×244/366)	600
Carryover to Y's year 1973	0

(ii) *Y Corporation's 1970 unused credit.*— The carryover to Y 1973 is $0, computed as follows:

Unused credit	$100
Y Corporation's 1971 limitation based on tax	0
Carryover to Y's preacquisition part year 1972	100
Limitation based on tax for Y's preacquisition part year 1972 ($900×122/366)	300
Carryover to Y's postacquisition part year 1972	0

(iii) *Y Corporation's credit earned for 1972.*— The carryover to Y 1973 is $0, computed as follows:

Credit earned	$300
Limitation based on tax for preacquisition part year 1972 ($900×122/366)	300
Less: Y's $100 carryover from 1970	100
	$200
Carryover to Y's postacquisition part year 1972	100
Limitation based on tax for postacquisition part year 1972 ($900×244/366)	600
Less: X's $300 carryover from 1970	$300
	300
Carryover to Y's year 1973	0

(iv) *X Corporation's 1971 unused credit.*— The carryover to Y 1973 is $0, computed as follows:

Unused credit	$100
Excess of X's 1972 limitation based on tax over credit earned	0
Carryover to Y's postacquisition part year 1972	100
Limitation based on tax for postacquisition part year 1972 ($900×244/366)	600
Less:	
X's $300 carryover from 1970	300
Y's 1972 credit earned for postacquisition part year	100
	400
	200
Carryover to Y's year 1973	0

(v) *Y Corporation's 1971 unused credit.*— The carryover to Y 1973 is $100, computed as follows:

Unused credit	$200
Limitation based on tax for preacquisition part year 1972 ($900×122/366)	300
Less:	
Y's $100 carryover from 1970	100
Y's 1972 credit earned for preacquisition part year 1972	200
	300
	0
Carryover to Y's postacquisition part year	200
Limitation based on tax for postacquisition part year 1972 ($900×244/366)	600
Less:	
X's $300 carryover from 1970	300
Y's 1972 credit earned for postacquisition part year 1972	100
X's $100 carryover from 1971	100
	500
	100
Carryover to Y's year 1973	100

(vi) *X Corporation's 5–1–72 unused credit.*— The carryover to Y 1973 is $200, computed as follows:

Unused credit	$200
Limitation based on tax for postacquisition part year 1972 ($900×244/366)	600
Less:	
X's $300 carryover from 1970	300
Y's 1972 credit earned for postacquisition part year 1972	100
X's $100 carryover from 1971, and Y's $100 carryover from 1971	200
	600
	0
Carryover to Y's year 1973	200

(vii) The aggregate of the investment credit carryovers to Y 1973 is $300, computed as follows:

Y's 1971 unused credit	$100
X's 1972 unused credit	200
Total	300

(8) If the year of acquisition is a taxable year to which the limitation provided in § 1.46–2(b)(2) (relating to 20-percent limitation on carryovers and carrybacks to certain taxable years) applies, then for purposes of applying such limitation the preacquisition part year and the postacquisition part year shall each be considered a fractional part of a year, but, if the date of distribution or transfer is not on the last day of a month, the entire month in which the date of distribution or transfer occurs shall be considered as included in the preacquisition part year and no portion thereof shall be considered as included in the postacquisition part year.

(9) If the acquiring corporation succeeds to the investment credit carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the manner in which the unused credits of the distributor or transferor corporations shall be applied shall be determined consistently with the rules prescribed in paragraph (c) of § 1.381(c)(1)–2.

(f) *Successive acquiring corporations.* An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of § 1.46–2 and this section, the investment credit carryovers available to the first acquiring corporation under § 1.46–2 and this section.

(g) *Recomputation of credit allowed by section 38 on certain property of acquiring corporation.* If section 38 property acquired by an acquiring corporation in a transaction to which section 381(a) applies is disposed of, or otherwise ceases to be section 38 property (or becomes public utility property) with respect to the acquiring corporation, before the close of the estimated useful life which was taken into account in computing the distributor or transferor corporation's qualified investment, see paragraph (e) of § 1.47–3.

(h) *Electing small business corporation.* An unused credit of a distributor or transferor corporation arising in an unused credit year for which such corporation is not an electing small business corporation (as defined in section 1371(b)) may not be carried over in a transaction to which section 381 applies to a taxable year of the acquiring corporation for which such corporation is an electing small business corporation and may not be added to the amount allowable as a credit under section 38 to the shareholders of the acquiring corporation for such taxable year. However, in such a case, a taxable year for which the acquiring corporation is an electing small business corporation shall be counted as a taxable year for purposes of determining the taxable years to which such unused credit may be carried.

(i) [Reserved]

(j) *Carryover of operating capacity for qualified intercity bus.* For rules for determining an acquiring corporation's qualified investment for the energy credit for a qualified intercity bus, see § 1.48–9(q)(11).

(Sec. 38(b) (76 Stat. 963, 26 U.S.C. 38(b)), 48(l)(16) (94 Stat. 264, 26 U.S.C. 48(l)(16)), and 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 7289, 38 FR 30554, Nov. 6, 1973, as amended by T.D. 7982, 49 FR 39544, Oct. 9, 1984; 49 FR 41246, Oct. 22, 1984]

§ 1.381(c)(24)–1 Work incentive program credit carryovers in certain corporate acquisitions.

The computation of carryovers and carrybacks of unused WIN credits in a transaction to which section 381 applies shall be made under the principles of § 1.381(c)(23)–1 (relating to the computation of carryovers and carrybacks of unused investment credits), except that the provisions of paragraph (c)(4) and paragraph (e)(6), (7), and (8) of such section shall not apply.

(Secs. 381(c)(23), 76 Stat. 971 (26 U.S.C. 381(c)(23), 381(c)(24)) 85 Stat. 557 (26 U.S.C. 381(c)(24)), 7805, 68A Stat. 917 (26 U.S.C. 7805))

[T.D. 7289, 38 FR 30557, Nov. 6, 1973]

§ 1.381(c)(25)–1 Deficiency dividend of a qualified investment entity.

(a) *Carryover requirement.* If a distributor or transferor corporation in a transaction to which section 381(a) applies—

(1) Was a qualified investment entity (within the meaning of section 860(b)) for any taxable year ending on or before the date of distribution or transfer, and

(2) A determination (as defined in section 860(e)) establishes that the transferor or distributor corporation is liable for the tax imposed by section 11(a), 56(a), 852(b), 857(b)(1), 857(b)(3)(A), or 1201(a) for such taxable year,then in determining the liability for such tax the deduction described in section 860 shall be allowed pursuant to section 381(c)(25) to such corporation for the amount of deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. Except as otherwise provided

in this section, the provisions of section 860 and the regulations thereunder apply with respect to a deficiency dividend deduction allowable pursuant to section 381(c)(25).

(b) *Deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation.* A deficiency dividend paid by the acquiring corporation with respect to the distributor or transferor corporation must be a distribution that would satisfy the definition of a deficiency dividend under section 860(f) if paid by the distributor or transferor corporation to its own shareholders. The distribution, however, shall be paid by the acquiring corporation to its own shareholders. The distribution also shall be paid after the date of distribution or transfer and on, or within 90 days after, the date of the determination but before the acquiring corporation files a claim under paragraph (c) of this section.

(c) *Claim for deduction.* A claim for deduction under this section shall be made by the acquiring corporation on Form 976 and shall be filed within 120 days after the date of the determination. The form shall contain, or be accompanied by, the information required under §1.860–2(b)(2) in sufficient detail to properly identify the facts with respect to the distributor or transferor corporation and the acquiring corporation. The required certified copy of the resolution authorizing the payment of the dividend shall be that of the trustees, board of directors, or other authority, of the acquiring corporation. Necessary changes may be made in Form 976 in order to carry out the provisions of this paragraph. The claim shall be filed with the district director, or director of the internal revenue service center, with whom the return of the distributor or transferor corporation to which the claim relates was filed.

(d) *Effect on dividends paid deduction.* A deficiency dividend paid by the acquiring corporation that is allowable as a deduction to a distributor or transferor corporation pursuant to section 381(c)(25) shall not become a part of the dividends paid deduction of the acquiring corporation under section 561 for any taxable year.

(e) *Successive transactions to which section 381(a) applies.* The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if X corporation transfers its assets to Y corporation in a transaction to which section 381(a) applies and if Y corporation transfers its assets to Z corporation in a subsequent transaction to which section 381(a) applies, then, subject to the provisions of this section, X corporation may take a deficiency dividend deduction for the amount of deficiency dividends paid by Z corporation with respect to X corporation.

(Sec. 860(l) (92 Stat. 2849, 26 U.S.C. 860(l)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)); and sec. 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 7767, 46 FR 11264, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§1.381(c)(26)–1 Credit for employment of certain new employees.

(a) *Carryovers and carrybacks.* For taxable years beginning before January 1, 1984, the computation of carryovers and carrybacks of unused targeted jobs credit (new jobs credit in the case of wages paid before 1979) under section 44B (as in effect prior to enactment of the Tax Reform Act of 1984) in a transaction to which section 381(a) applies shall be made under the principles of §1.381(c)(23)–1 (relating to the computation of carryovers and carrybacks of unused investment credit), except that the provisions of paragraph (c)(4) and paragraph (e)(6), (7) and (8) of such section shall not apply.

(b) *Other items.* See §1.51–1(h) for a rule that applies to certain transfers of a trade or business in which a member of a targeted group is employed.

§ 1.382–1 Table of contents.

This section lists the captions that appear in the regulations for §§ 1.382–1T, 1.382–2, 1.382–2T, and 1.382–3 through 1.382–11.

§ 1.382–1T [Reserved]

§ 1.382–2 General rules for ownership change.

(a) Certain definitions for purposes of sections 382 and 383 and the regulations thereunder.
(1) Loss corporation.
(i) In general.
(ii) Distributor of transferor loss corporation in a transaction under section 381.
(iii) Separate accounting required for losses and credits of an acquiring corporation and a distributor or transferor loss corporation.
(iv) End of separate accounting for losses and credits of distributor or transferor loss corporation.
(2) Pre-change loss.
(3) Stock.
(i) In general.
(ii) Convertible stock.
(4) Testing date.
(i) In general.
(ii) Exceptions.
(b) Effective dates.
(1) In general. [Reserved]
(2) Rules provided in paragraph (a)(3)(ii) of this section.
(i) In general.
(ii) Certain convertible preferred stock.
(3) Rules provided in paragraph (a)(4) of this section.

§ 1.382–2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).

(a) *Ownership change.* (1) In general.
(2) Events requiring a determination of whether an ownership change has occurred.
(i) Testing dates prior to November 5, 1992.
(ii) Information statement required.
(iii) Records to be maintained by loss corporation.
(A) Exception.
(B) Statement with respect to prior periods.
(b) *Nomenclature and assumptions.*
(c) *Computing the amount of increases in percentage ownership.* (1) In general.
(2) Example.
(3) Related and unrelated increases in percentage stock ownership.
(4) Example.
(d) *Testing period.* (1) In general.
(2) Effect of a prior ownership change.
(3) Commencement of the testing period.
(i) In general.
(ii) Exception for corporations with net unrealized built-in loss.
(4) Disregarding testing dates.
(5) Example.
(e) *Owner shift and equity structure shift.*
(1) Owner shift.
(i) Defined.
(ii) Transactions between persons who are not 5-percent shareholders disregarded.
(iii) Examples.
(2) Equity structure shift.
(i) Tax-free reorganizations.
(ii) Transactions designated under section 382(g)(3)(B) treated as equity structure shifts.
(iii) Overlap of owner shift and equity structure shift.
(iv) Examples.
(f) *Definitions.* (1) Loss corporation.
(i) In general.
(ii) End of separate accounting for losses and credit of distributor or transferor loss corporation.
(iii) Application to other successor corporations.
(2) Old loss corporation.
(3) New loss corporation.
(4) Successor corporation.
(5) Predecessor corporation.
(6) Shift.
(7) Entity.
(8) Director ownership interest.
(9) First tier entity.
(10) 5-percent owner.
(11) Public shareholder.
(12) Public owner.
(13) Public group.
(14) Higher tier entity.
(15) Indirect ownership interest.
(16) Highest tier entity.
(17) Next lower tier entity.
(18) Stock.
(i) In general.
(ii) Treating stock as not stock.
(iii) Treating interests not constituting stock as stock.
(iv) Stock of the loss corporation.
(19) Change date.
(20) Year.
(21) Old section 382.
(22) Pre-change loss.
(23) Unrelated.
(24) Percentage ownership interest.
(g) *5-percent shareholder.* (1) In general.
(2) Determination of whether a person is a 5-percent shareholder.
(3) Determination of the percentage stock ownership interest of a 5-percent shareholder.
(4) Examples.
(5) Stock ownership presumptions in connection with certain acquisitions and dispositions of loss corporation stock.
(i) In general.
(ii) Example.
(h) *Constructive ownership of stock.* (1) In general.
(2) Attribution from corporations, partnerships, estates and trusts.

(i) In general.
(ii) Limitation on attribution from entities with respect to certain interests.
(iii) Limitation on attribution from certain entities.
(iv) Examples.
(3) Attribution to corporations, partnerships, estates and trusts.
(4) Option attribution.
(i) In general.
(ii) Examples.
(iii) Contingencies.
(iv) Series of options.
(v) Interests that are similar to options.
(vi) Actual exercise of options.
(A) In general.
(B) Actual exercise within 120 days of deemed exercise.
(vii) Effect of deemed exercise of options on the outstanding stock of the loss corporation.
(A) Right of obligation to issue stock.
(B) Right or obligation to acquire outstanding stock by the loss corporation.
(C) Effect on value of old loss corporation.
(viii) Options that lapse or are forfeited.
(ix) Option rule inapplicable if pre-change losses are de minimis.
(x) Options not subject to attribution
(A) Long-held options with respect to actively traded stock.
(B) Right to receive or obligation to issue a fixed dollar amount of value of stock upon maturity of certain debt.
(C) Right or obligation to redeem stock of the loss corporation.
(D) Options exercisable only upon death, disability or mental incompetency.
(E) Right to receive or obligation to issue stock as interest or dividends.
(F) Options outstanding following an ownership change.
(*1*) In general.
(*2*) Example.
(G) Right to acquire loss corporation stock pursuant to a default under loan agreement.
(H) Agreement to acquire or sell stock owned by certain shareholders upon retirement.
(I) [Reserved]
(J) Title 11 of similar case.
(K) through (Y) [Reserved]
(xi) Certain transfers of options disregarded.
(xii) Exercise of an option that has not been treated as stock.
(xiii) Effective date.
(5) Stock transferred under certain agreements.
(6) Family attribution.
(i) [Reserved]
(j) *Aggregation and segregation rules.* (1) Aggregation of public shareholders and public owners into public groups.
(i) Public group.
(ii) Treatment of public group that is a 5-percent shareholder.
(iii) Presumption of no cross-ownership.
(iv) Identification of the public groups treated as 5-percent shareholders.
(A) Analysis of highest tier entities.
(B) Analysis of other higher tier entities and first tier entities.
(C) Aggregation of the public shareholders.
(v) Appropriate adjustments.
(vi) Examples.
(2) Segregation rules applicable to transactions involving the loss corporation.
(i) In general.
(ii) Direct public group.
(iii) Transactions to which segregation rules apply.
(A) In general.
(B) Certain equity structure shifts and transactions to which section 1032 applies.
(*1*) In general.
(*2*) Examples.
(C) Redemption-type transactions.
(*1*) In general.
(*2*) Examples.
(D) Acquisition of loss corporation stock as the result of the ownership of a right to acquire stock.
(*1*) In general.
(*2*) Example.
(E) Transactions identified in the Internal Revenue Bulletin.
(F) Issuance of rights to acquire loss corporation stock.
(*1*) In general.
(*2*) Example.
(iv) Combination of de minimis public groups.
(A) In general.
(B) Example.
(v) Multiple transactions.
(A) In general.
(B) Example.
(vi) Acquistions made by either a 5-percent shareholder or the loss corporation following application of the segregation rules.
(3) Segregation rules applicable to transactions involving first tier entities or higher tier entities.
(i) Dispositions.
(ii) Example.
(iii) Other transactions affecting direct public groups of a first tier entity or higher tier entity.
(iv) Examples.
(v) Acquistions made by a 5-percent shareholder, a higher tier entity, or a first tier entity following application of the segregation rules.
(k) *Operating rules.* (1) Presumptions regarding stock ownership.
(i) Stock subject to regulation by the Securities and Exchange Commission.
(ii) Statements under penalties of perjury.
(2) Actual knowledge regarding stock ownership.
(3) Duty to inquire as to actual stock ownership in the loss corporation.

(4) Ownership interests structured to avoid the section 382 limitation.

(5) Example.

(6) First tier entity or higher tier entity that is a foreign corporation or entity. [Reserved.]

(l) *Changes in percentage ownership which are attributable to fluctuations in value.* [Reserved]

(m) *Effective date.* (1) In general.

(2) Plan of reorganization.

(3) Earliest commencement of the testing period.

(4) Transitional rules.

(i) Rules provided in paragraph (j) of this section for testing dates before September 4, 1987.

(ii) Example.

(iii) Rules provided in paragraph (j) of this section for testing dates on or after September 4, 1987.

(iv) Rules provided in paragraphs (f)(18)(ii) and (iii) of this section.

(v) Rules provided in paragraph (a)(2)(ii) of this section.

(vi) Rules provided in paragraph (h)(4) of this section.

(vii) Rules provided in paragraph (a)(2)(i) of this section.

(5) Bankruptcy proceedings.

(i) In general.

(ii) Example.

(6) Transactions of domestic building and loan associations.

(7) Transactions not subject to section 382.

(i) Application of old section 382.

(ii) Effect on testing period.

(iii) Termination of old section 382. [Reserved]

(8) Options issued or transferred before January 1, 1987.

(i) Options issued before May 6, 1986.

(ii) Options issued on or after May 6, 1986 and before September 18, 1986.

(iii) Options issued on or after September 18, 1986 and before January 1, 1987.

(9) Examples.

(ii) Coordination of special rule and other rules affecting value.

(7) Limitation on value of stock.

(l) Rules for determining the value of the loss corporation's pre-change assets.

(1) In general.

(2) Coordination with section 382(e)(2).

(3) Coordination with section 382(e)(3).

(4) Coordination with section 382(l)(1).

(5) Coordination with section 382(l)(4).

(m) Continuity of business requirement.

(1) Under section 382(1)(5).

(2) Under section 382(l)(6).

(n) Ownership change in a title 11 or similar case succeeded by another ownership change within two years.

(1) Section 382(l)(5) applies to the first ownership change.

(2) Section 382(l)(6) applies to the first ownership change.

(o) Options not subject to attribution.

(p) Effective date for rules relating to section 382(l)(6).

(1) In general.

(2) Ownership change to which section 382(l)(6) applies occurring before March 17, 1994.

§1.382–10 [Reserved]

§1.382–11 Effective dates. [Reserved]

[T.D. 8149, 52 FR 29674, Aug. 11, 1987, as amended by T.D. 8264, 54 FR 38666, Sept. 20, 1989; T.D. 8352, 56 FR 29434, June 27, 1991. Redesignated by T.D. 8440, 57 FR 45711, Oct. 5, 1992; T.D. 8490, 58 FR 51573, Oct. 4, 1993; T.D. 8531, 59 FR 12835, Mar. 18, 1994; T.D. 8530, 59 FR 12842, Mar. 18, 1994; T.D. 8529, 59 FR 12846, Mar. 18, 1994; T.D. 8546, 59 FR 32080, June 22, 1994; T.D. 8679, 61 FR 33314, June 27, 1996]

§1.382–1T [Reserved]

§1.382–2 General rules for ownership change.

(a) *Certain definitions for purposes of sections 382 and 383 and the regulations thereunder.* The following definitions apply for purposes of sections 382 and 383 and the regulations thereunder.

(1) *Loss corporation*—(i) *In general.* The term *loss corporation* means a corporation which—

(A) Is entitled to use a net operating loss carryforward, a capital loss carryover, a carryover of excess foreign taxes under section 904(c), a carryforward of a general business credit under section 39, or a carryover of a minimum tax credit under section 53,

(B) For the taxable year that includes a testing date, as defined in paragraph (a)(4) of this section or §1.382–2T(a)(2)(i), whichever is applicable (determined for purposes of this paragraph (a)(1) without regard to whether the corporation is a loss corporation), has a net operating loss, a net capital loss, excess foreign taxes under section 904(c), unused general business credits under section 38, or an unused minimum tax credit under section 53, or

(C) Has a net unrealized built-in loss (determined for purposes of this paragraph (a)(1) by treating the date on which such determination is made as the change date). See section 382(h)(3) for the definition of net unrealized built-in loss.

See section 383 and §1.383–1 for rules relating to a loss corporation that has an ownership change and has capital losses, excess foreign taxes, general business credits or minimum tax credits. Any predecessor or successor to a loss corporation described in this paragraph (a)(1) is also a loss corporation.

(ii) *Distributor or transferor loss corporation in a transaction under section 381.* Notwithstanding that a loss corporation ceases to exist under state law, if its net operating loss carryforwards, excess foreign taxes, or other items described in section 381(c) are succeeded to and taken into account by an acquiring corporation in a transaction described in section 381(a), such loss corporation shall be treated as continuing in existence until—

(A) Any pre-change losses (excluding pre-change credits described in §1.383–1(c)(3)), determined as if the date of such transaction were the change date, are fully utilized or expire under either section 172 or section 1212,

(B) Any net unrealized built-in losses, determined as if the date of such transaction were the change date, may no longer be treated as pre-change losses, and

(C) Any pre-change credits (described in §1.383–1(c)(3)), determined as if the date of such transaction were the change date, are fully utilized or expire under sections 39, 53, or 904(c).

Following a transaction described in the preceding sentence, the stock of the acquiring corporation shall be treated as the stock of the loss corporation for purposes of determining whether an ownership change occurs with respect to the pre-change losses and net unrealized built-in losses that may be treated as pre-change losses of the distributor or transferor corporation.

(iii) *Separate accounting required for losses and credits of an acquiring corporation and a distributor or transferor loss corporation.* Except as provided in §1.382–2T(f)(1)(ii), pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss), that are succeeded to and taken into account by an acquiring corporation in a transaction to which section 381(a) applies must be accounted for separately from losses and credits of the acquiring corporation for purposes of applying this section. See *Example (2)* of §1.382–2T(e)(2)(iv) of this section.

(iv) *End of separate accounting for losses and credits of distributor or transferor loss corporation.* For further guidance, see § 1.382–2T(f)(1)(ii).

(2) *Pre-change loss.* The term *pre-change loss* means—

(i) Any net operating loss carryforward of the old loss corporation to the taxable year ending on the change date or in which the change date occurs,

(ii) Any net operating loss of the old loss corporation for the taxable year in which the ownership change occurs to the extent such loss is allocable to the period in such year on or before the change date.

(iii) Any recognized built-in loss for any recognition period taxable year (within the meaning of 382(h)),

(iv) Any pre-change capital losses described in §1.383-1T(c)(2)(i) and (ii), and

(v) Any pre-change credits described in 1.383-1T(c)(3).

(3) *Stock*—(i) *In general.* Except as provided in this paragraph (f)(18), the term *stock* means stock other than stock described in section 1504(a)(4). Notwithstanding the preceding sentence, stock that is not described in section 1504(a)(4) solely because it is entitled to vote as a result of dividend arrearages shall be treated as so described and thus shall not be considered stock. Stock described in section 1504(a)(4), however, is not excluded for purposes of determining the value of the loss corporation under section 382(e). The determination of the percentage of stock of any corporation owned by any person shall be made on the basis of the relative fair market value of the stock owned by such person to the total fair market value of the outstanding stock of the corporation. Solely for purposes of determining the percentage of stock owned by a person, each share of all the outstanding shares of stock that have the same material terms is treated as having the same value. Thus, for example, a control premium or blockage discount is disregarded in determining the percentage of stock owned by any person. The previous two sentences of this paragraph (a)(3)(i) apply to any testing date occurring on or after January 29, 1991.

(ii) *Convertible stock.* The term *stock* includes any convertible stock. For rules regarding the treatment of certain convertible stock as an option, see § 1.382–4(d)(9)(ii).

(4) *Testing date*—(i) *In general.* Except as provided in paragraph (a)(4)(ii) of this section, a loss corporation is required to determine whether an ownership change has occurred immediately after any owner shift, or issuance or transfer (including an issuance or transfer described in § 1.382–4(d)(8)(i) or (ii)) of an option with respect to stock of the loss corporation that is treated as exercised under § 1.382–4(d)(2). Each date on which a loss corporation is required to make a determination of whether an ownership change has occurred is referred to as a testing date. All computations of increases in percentage ownership are to be made as of the close of the testing date and any transactions described in this paragraph (a)(4) that occur on that date are treated as occurring simultaneously at the close of the testing date. See § 1.382–2T(e)(1) for the definition of owner shift. The term *option,* as used in this paragraph (a)(4), includes interests that are treated as options under § 1.382–4(d)(9). For rules regarding the determination of whether dates prior to November 5, 1992, are testing dates, see § 1.382–2T(a)(2)(i).

(ii) *Exceptions.* A loss corporation is not required to determine whether an ownership change has occurred immediately after—

(A) Any transfer of stock, or an option with respect to stock, of the loss corporation in any of the circumstances described in section 382(l)(3)(B) (death, gift, divorce, *etc.*); or

(B) The transfer of an option described in § 1.382–4(d)(11)(i) or (ii) (relating to transfers between persons who are not 5-percent shareholders or between members of certain public groups).

(b) *Effective dates*—(1) *In general.* [Reserved]

(2) *Rules provided in paragraph (a)(3)(ii) of this section*—(i) *In general.* Except as provided in paragraph (b)(2)(ii) of this section, the rules provided in paragraph (a)(3)(ii) of this section apply with respect to any convertible stock.

(ii) *Certain convertible preferred stock.* Convertible stock that, when issued, would be described in section 1504(a)(4) by disregarding subparagraph (D) thereof and by ignoring the potential participation in corporate growth that the conversion feature may offer is treated as stock described in that section (and thus is not treated as stock for the purpose of determining whether an ownership change occurs, but is taken into account for the purpose of determining the value of the loss corporation immediately before an ownership change; see sections 382(e)(1) and 382(k)(6)(A)) if—

(A) The stock was issued on or after July 20, 1988, and prior to November 5, 1992; or

(B) The stock was issued prior to July 20, 1988, and the loss corporation makes the election described in Notice 88–67, 1988–1 C.B. 555, (see §601.601(d)(2)(ii)(*b*) of this chapter for availability of Cumulative Bulletins (C.B.)) on or before the earlier of the date prescribed in the Notice or December 7, 1992.

(3) *Rules provided in paragraph (a)(4) of this section.* The rules provided in paragraph (a)(4) of this section apply to determine whether dates on or after November 5, 1992, are testing dates.

[T.D. 8352, 56 FR 29434, June 27, 1991, as amended by T.D. 8405, 57 FR 10740, Mar. 30, 1992; 57 FR 24188, June 8, 1992; T.D. 8531, 59 FR 12836, Mar. 18, 1994; T.D. 8679, 61 FR 33315, June 27, 1996]

§1.382–2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).

(a) *Ownership change*—(1) *In general.* A corporation is a new loss corporation and thus subject to limitation under section 382 only if an ownership change has occurred with respect to such corporation. An ownership change occurs with respect to a corporation if it is a loss corporation on a testing date and, immediately after the close of the testing date, the percentage of stock of the corporation owned by one or more 5-percent shareholders has increased by more than 50 percentage points over the lowest percentage of stock of such corporation owned by such shareholders at any time during the testing period. See paragraph (a)(2)(i) of this section for the definition of testing date. See paragraph (d) of this section for the definition of testing period. See §1.382–2(a)(1) and paragraph (f)(3) of this section for the respective definition of loss corporation and new loss corporation. See paragraph (g) of this section for the definition of 5-percent shareholder. See section 383 and §1.383–1 for rules relating to loss corporations that have an ownership change and have capital loss carryovers, excess foreign taxes carried over under section 904(c), carryovers of general business credits under section 39, or unused minimum tax credits under section 53.

(2) *Events requiring a determination of whether an ownership change has occurred*—(i) *Testing dates prior to November 5, 1992.* Except as otherwise provided in this paragraph (a)(2)(i), a loss corporation is required to determine whether an ownership change has occurred immediately after any owner shift, any equity structure shift, or any transaction in which an option with respect to stock of the loss corporation is—

(A) Transferred to (or by) a 5-percent shareholder (or a person who would be 5-percent shareholder if the option were treated as exercised), or

(B) Issued by the loss corporation, a first tier entity, or a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section). Notwithstanding the preceding sentence, any transfer of stock of the loss corporation (or an option with respect to such stock) in any of the circumstances described in section 382(l)(3)(B), or any equity structure shift that is not also an owner shift, is not an event that requires the loss corporation to make a determination of whether an ownership change has occurred. For purposes of this section, each date on which a loss corporation is required to make a determination of whether an ownership change has occurred is referred to as a testing date, all computations of increases in percentage ownership are to be made as of the close of the testing date, and any transactions described in this paragraph (a)(2)(i) that occur on that date are treated as occurring simultaneously at the close of the testing date. See paragraphs (e)(1) and (2) of this section for the respective definitions of owner shift and equity structure shift. See paragraphs (f)(9) and (14) of this section for the respective definitions of first tier entity and higher tier entity. See paragraph (m)(4)(vii) of this section for special rules regarding the effective date of the provisions of this paragraph (a)(2)(i).

(ii) *Information statement required.* A loss corporation must file a statement with its income tax return for each taxable year that it is a loss corporation in which an owner shift, equity structure shift or other transaction described in paragraph (a)(2)(i) of this section occurs. The statement must—

(A) Indicate whether any testing dates occurred during the taxable year;

(B) Identify each testing date, if any, on which an ownership change occurred;

(C) Identify the testing date, if any, that occurred during and closest to the end of each of the three month periods ending on March 31, June 30, September 30 and December 31 during the taxable year, regardless of whether an ownership change occurred on the testing date,

(D) Identify each 5-percent shareholder on each such testing date;

(E) State the percentage ownership of the stock of the loss corporation for each 5-percent shareholder as of each such testing date and the increase, if any, in such ownership during the testing period; and

(F) Disclose the extent to which the loss corporation relied upon the presumptions regarding stock ownership under paragraph (k)(i) of this section to determine whether an ownership change occurred on any identified testing date.

See § 1.383–1(k) and paragraph (m)(4)(v) of this section for transitional rules regarding the filing of information statements.

(iii) *Records to be maintained by loss corporation.* A loss corporation shall keep such records as are necessary to determine: (A) The identity of its 5-percent shareholders, (B) the percentage of its stock owned by each such 5-percent shareholder, and (C) whether the section 382 limitation is applicable. Such records shall be retained so long as they may be material in the administration of any internal revenue law.

(b) *Nomenclature and assumptions.* For purposes of the example in this section—

(1) L is a loss corporation, and, if there is more than one loss corporation, they are designated as L_1, L_2, L_3, etc.

(2) P is a corporation that is not a loss corporation, and, if there is more than one such corporation, they are designated as P_1, P_2, P_3, etc.

(3) HC is a corporation whose assets consist solely of the stock of other corporations.

(4) E is an entity other than a corporation (e.g., a partnership), and, if there is more than one such entity, they are designated as E_1, E_2, E_3, etc.

(5) Unless otherwise stated—

(i) A, B, C, D, AA, BB, CC, and DD are unrelated individuals who own interests in corporations or other entities only to the extent expressly stated,

(ii) All corporations have one class of stock outstanding and each share of stock has the same fair market value as each other share,

(iii) The capital structure of the loss corporation and its business do not change over time, and

(iv) The rules of paragraphs (k)(2) and (4) of this section are not applicable.

(6) Public L represents a group of unrelated individuals and entities that own direct (and not indirect) stock ownership interests in loss corporation L, each of whom owns less than five percent of the stock of the loss corporation, and, if there is more than one loss corporation, such groups are designated as Public L_1, Public L_2, Public L_3, etc.

(7) Public P represents a group of unrelated individuals and entities that own direct (and not indirect) stock ownership interests in corporation P, each of whom owns less than five percent of the stock of the corporation, and, if there is more than one corporation, such groups are designated as Public P_1, P_2, P_3, etc.

(8) Public E represents a group of unrelated individuals and entities that own direct (and not indirect) ownership interests in entity E, each of whom

owns less than five percent of the entity, and, if there is more than one entity, such groups are designated as Public E_1, Public E_2, Public E_3, etc.

(c) *Computing the amount of increases in percentage ownership*—(1) *In general.* In order to determine whether an ownership change has occurred on a testing date, the loss corporation must identify each 5-percent shareholder whose percentage of stock ownership in the loss corporation immediately after the close of the testing date has increased, compared to such shareholder's lowest percentage of stock ownership in such corporation at any time during the testing period. The amount of the increase in the percentage of stock ownership in the loss corporation of each 5-percent shareholder must be computed separately by comparing the percentage ownership of each such 5-percent shareholder immediately after the close of the testing date to such shareholder's lowest percentage ownership at any time during the testing period. Each such increase in the percentage ownership of a 5-percent shareholder is then added together with any other such increases of other 5-percent shareholders to determine whether an ownership change has occurred. Because only those 5-percent shareholders whose percentages of stock ownership have increased are taken into account, a 5-percent shareholder is disregarded if his percentage of stock ownership, immediately after the close of the testing date, has decreased (or has remained the same), compared to his lowest percentage ownership interest on any previous date during the testing period.

(2) *Example.*

Example. (i) A and B each own 40 percent of the outstanding L stock. The remaining 20 percent of the L stock is owned by 100 unrelated individuals, none of whom own as much as five percent of L stock (''Public L''). C negotiates with A and B to purchase all their stock in L.

(ii) The acquisitions from both A and B are completed on September 13, 1990. C's acquisition of 80 percent of L stock results in an ownership change because C's percentage ownership has increased by 80 percentage points as of the testing date, compared to his lowest percentage ownership in L at any time during the testing period (0 percent).

(3) *Related and unrelated increases in percentage stock ownership.* The determination whether an ownership change has occurred is made without regard to whether the changes in stock ownership of the loss corporation (by one or more 5-percent shareholders) result from related or unrelated events.

(4) *Example.*

Example. (i) L has outstanding 200 shares of common stock. A, B and C respectively own 100, 50 and 50 shares of the L stock. On January 2, 1988, A sells 60 shares of L stock to B. Thus, B's percentage ownership interest in L increases by 30 percentage points, from 50 shares to 110 shares. On January 1, 1989, A purchases C's entire interest in L. Thus, A's percentage ownership interest in L increases by 25 percentage points, compared to his lowest percentage ownership interest in L, from 40 shares immediately following the January 2, 1988 sale to B to 90 shares. Even though A's ownership interest in L as of January 1, 1989 has decreased, compared to his 50 percent ownership interest at the beginning of the testing period, A is a 5-percent shareholder who must be taken into account for purposes of the computation required under paragraph (c)(1) of this section because his interest in L on that testing date (45 percent) has increased, compared to his lowest percentage ownership interest in L at any time during the testing period (20 percent following the sale to B).

(ii) Accordingly, although A and B jointly have increased their aggregate total ownership interest in L between January 2, 1988 and January 1, 1989 by only 25 percentage points (*i.e.*, the total ownership interest in L held by A and B at all times is not less than a 75 percent interest), the total of their separate increases in the percentage stock ownership of L, compared to their respective lowest percentage ownership interests at any time during the testing period, is 55 percentage points. Thus, an ownership change occurs as a result of A's acquisition of L stock on January 1, 1989.

(d) *Testing period*—(1) *In general.* Except as otherwise provided in paragraphs (d) and (m) of this section, the testing period for any testing date is the three-year period ending on the testing date. See paragraph (a)(2)(i) of this section for the definition of testing date.

(2) *Effect of a prior ownership change.* Following an ownership change, the testing period for determining whether a subsequent ownership change has occurred shall begin no earlier than the first day following the change date of the most recent ownership change. See

paragraph (f)(19) of this section for the definition of change date.

(3) *Commencement of the testing period*—(i) *In general.* Except as otherwise provided in paragraph (d)(3)(ii) of this section, the testing period for any loss corporation shall not begin before the earlier of the first day of either—

(A) The first taxable year from which there is a loss or excess credit carryforward to the first taxable year ending after the testing date, or

(B) The taxable year in which the testing date occurs.

(ii) *Exception for corporations with net unrealized built-in loss.* Paragraph (d)(3)(i) of this section shall not apply if the corporation has a net unrealized built-in loss (determined after application of section 382(h)(3)(B)) on the testing date, unless the loss corporation establishes the taxable year in which the net unrealized built-in loss first accrued.

In that event, the testing period shall not begin before the earlier of—

(A) The first day of the taxable year in which the net unrealized built-in loss first accrued, or

(B) The day described in paragraph (d)(3)(i) of this section. See section 382(h) for the definition of net unrealized built-in loss.

(4) *Disregarding testing dates.* Any testing date that occurs before the beginning of the testing period shall be disregarded for purposes of this section.

(5) *Example.*

Example. (i) A owns all 100 outstanding shares of L stock. A sells 40 shares to B on January 1, 1988. C purchases 20 shares of L stock from A on July 1, 1991. In determining if an ownership change occurs on the July 1, 1991 testing date, B's acquisition of L stock is disregarded because it occurred before the testing period that ends on such testing date. Thus, B's ownership interest in L does not increase during the testing period, and no ownership change results from C's acquisition.

(ii) The facts are the same as in (i), except that throughout the period during which B negotiated his stock purchase transaction with A, B knew that C intended to attempt to acquire a significant stock interest in L. Also, B and C have been partners in a number of significant business ventures. The result is the same as in (i).

(e) *Owner shift and equity structure shift*—(1) *Owner shift*—(i) *Defined.* For purposes of this section, an owner shift is any change in the ownership of the stock of a loss corporation that affects the percentage of such stock owned by any 5-percent shareholder. See paragraph (g) of this section for the definition of a 5-percent shareholder. An owner shift includes, but is not limited to, the following transactions:

(A) A purchase of disposition of loss corporation stock by a 5-percent shareholder,

(B) A section 351 exchange that affects the percentage of stock owned by a 5-percent shareholder,

(C) A redemption or a recapitalization that affects the percentage of stock owned by a 5-percent shareholder,

(D) An issuance of loss corporation stock that affects the percentage of stock owned by a 5-percent shareholder, and

(E) An equity structure shift that affects the percentage of stock owned by a 5-percent shareholder.

(ii) *Transactions between persons who are not 5-percent shareholders disregarded.* Transfers of loss corporation stock between persons who are not 5-percent shareholders of such corporation (and between members of separate public groups resulting from the application of the segregation rules of paragraphs (j)(2) and (3)(iii) of this section) are not owner shifts and thus are not taken into account. See paragraph (h)(4)(xi) of this section for a similar rule applicable to transfers of options.

(iii) *Examples.*

Example (1) . A has owned all 1000 shares of outstanding L stock for more than three years. On June 15, 1988, A sells 300 of his L shares to B. This transaction is an owner shift. No other 5-percent shareholder has increased his percentage ownership of L stock during the testing period. Thus, the owner shift resulting from B's acquisition does not result in an ownership change, because B has increased his stock ownership in L by only 30 percentage points.

Example (2). The facts are the same as in *Example (1).* In addition, on June 15, 1989, L issues 100 shares to each of C, D and AA. The stock issuance is an owner shift. The transaction, however, does not result in an ownership change, because B, C, D and AA (the 5-percent shareholders whose stock ownership has increased as of the testing date, compared to any other time during the testing period) have increased their percentage of stock ownership in L by a total of only 46.2 percentage points during the testing period (by 23.1 percentage points [300 shares/1300 shares] for B, and 7.7 percentage points [100 shares/1300 shares] for each of C, D and AA).

Example (3). All 1000 shares of L stock are owned by a group of 100 unrelated individuals, none of whom own as much as five percent of L stock (''Public L''). Several of the members of Public L sell their L stock, amounting to a 30 percent ownership interest in L, to B on June 15, 1988. The sale of stock to B is an owner shift. Between June 16, 1988 and June 15, 1989, each of the remaining individuals in Public L sells his stock to another person who is not a 5-percent shareholder. Under paragraph (e)(1)(ii) of this section, trading activity among the members of Public L is disregarded and does not result in an owner shift. On June 15, 1989, L issues 100 shares to each of C, D and AA. The only sale transactions by members of Public L that are taken into account in determining whether an ownership change occurs on June 15, 1989 are the sales to B on June 15, 1988. Because B, C, D and AA together have increased their percentage ownership of L stock as a result of B's purchase and the stock issuance by an amount not in excess of 50 percentage points during the testing period ending on June 15, 1988, an ownership change does not occur on that date.

Example (4). The facts are the same as in *Example (2).* In addition, on December 15, 1989, L redeems 200 of the L shares from A. The redemption is an owner shift that results in an ownership change, because B, C, D and AA are 5-percent shareholders whose percentage ownership of L increase by a total of 54.6 percentage points during the testing period (by 27.3 percentage points [300 shares/1100 shares] for B and 9.1 percentage points [100 shares/1100 shares] for each of C, D and AA).

Example (5). L is owned entirely by 10,000 unrelated shareholders, none of whom owns as much as five percent of the stock of L (''Public L''). Accordingly, Public L is L's only 5-percent shareholder. See paragraph (j)(1) of this section. There are one million shares of common stock outstanding. On December 1, 1988, L issues two million new shares of its common stock to members of the public, none of whom owned any L stock prior to the issuance. Following the public offering, no shareholder of L owns, directly or indirectly, five percent or more of L stock. Under paragraph (j)(2) of this section, however, all of the newly issued stock is treated as acquired by a 5-percent shareholder (''Public NL'') that is unrelated to Public L. Therefore, the public offering constitutes an owner shift that results in an ownership change because Public NL's percentage of stock ownership in L increased by 66⅔ percentage points (two million shares acquired in the public offering/three million shares outstanding following the offering) over its lowest percentage ownership during the testing period (0 percent prior to the offering).

Example (6). The facts are the same as in *Example (5),* except that L issues only 500,000 new shares of L stock on December 1, 1988, and Public NL's percentage ownership interest in L increases by only 33⅓ percentage points (500,000 shares acquired in the public offering/1.5 million shares outstanding following the offering). During the two years following December 2, 1988, 14 percent of the stock outstanding on that date is sold over a public stock exchange. On December 3, 1990, A purchases five percent of L stock (75,000 shares) over a public stock exchange. The purchase of five percent of L stock by A is an owner shift and is presumed to have been made proportionately from Public L and Public NL under paragraph (j)(1)(vi) of this section. Under paragraph (e)(1)(ii) of this section, transfers of L stock in transactions not involving A (*i.e.,* in transactions among or between members of separate public groups resulting from the application of paragraphs (j)(2) and (3) of this section) are not taken into account, and do not constitute owner shifts. (Transfers between members of Public NL and Public L, which are treated as separate 5-percent shareholders solely by virtue of paragraph (j)(2) of this section, are disregarded even if L has actual knowledge of any such transfers.) A and Public NL, the only 5-percent shareholders whose interests in L have increased during the testing period, have increased their respective stock ownership by only 36⅔ percentage points—five percentage points for A [75,000 shares/1.5 million shares outstanding] and 31⅔ percentage points for Public NL [((500,000 shares issued in the public offering)—(5 percent × 500,000 shares presumed to have been acquired by A)) /1.5 million shares outstanding]. Accordingly, there is no ownership change with respect to L notwithstanding that, taking into account the public trading, a change of more than 50 percentage points in the ultimate beneficial ownership of L stock occurred during the three-year period ending on the December 3, 1990 testing date.

Example 7. The facts are the same as in *Example 6,* except that five percent of the L stock has always been owned by P which, in turn, has always been owned by Public P. On December 6, 1990, P sells all of its L stock over a public stock exchange. Although the trading of P stock among persons that are not 5-percent share-holders (without regard to the segregation rules of paragraph (j) of this section) are disregarded under paragraph (e)(1)(ii) of this section, the disposition of the L stock by P is not disregarded because the L stock is transferred in a transaction that is subject to paragraph (j)(3)(i) of this section.

(2) *Equity structure shift*—(i) *Tax-free reorganizations.* An equity structure shift is any reorganization within the meaning of section 368 with respect to which the loss corporation is a party to the reorganization, except that such term does not include a reorganization described in—

(A) Section 368(a)(1)(D) or (G) unless the requirements of section 354(b)(1) are met, or

(B) Section 368(a)(1)(F).

(ii) *Transactions designated under section 382(g)(3)(B) treated as equity structure shifts.* [Reserved]

(iii) *Overlap of owner shift and equity structure shift.* Any equity structure shift that affects the percentage of loss corporation stock owned by a 5-percent shareholder also constitutes an owner shift. See paragraph (e)(i)(E) of this section

(iv) *Examples.*

Example (1). A owns all of the stock of L and B owns all of the stock of P. On October 13, 1988, L merges into P in a reorganization described in section 368a(1)(A). As a result of the merger, A and B own 25 and 75 percent, respectively, of the stock of P. The merger is an equity structure shift (and, because it affects the percentage of L stock owned by 5-percent shareholders, it also constitutes an owner shift). On the October 13, 1988 testing date, B is a 5-percent shareholder whose stock ownership in the loss corporation following the merger has increased by 75 percentage points over his lowest percentage of stock ownership in L at any time during the testing period (0 percent prior to the merger). Accordingly, an ownership change occurs as a result of the merger. P is thus a new loss corporation and L's pre-change losses are subject to limitation under section 382.

Example (2). (i) A owns 100 percent of L_1 stock and B owns 100 percent of L_2 stock. On January 1, 1988, L_1 merges into L_2 in a reorganization described in section 368(a)(1)(A). Immediately after the merger, A and B own 40 percent and 60 percent, respectively, of the L_2 stock. There is an equity structure shift (as well as an owner shift) with respect to both L_1 and L_2 on January 1, 1988.

(*ii*) Because the percentage of L_2 stock owned by B immediately after the merger (60 percent) increases by more than 50 percentage points over the lowest percentage of the stock of L_1 owned by B during the testing period (0 percent prior to the merger), there is an ownership change with respect to L_1. L_2 is a new loss corporation and thus, under §1.382–2(a)(1)(iii) of this section, the pre-change losses of L_1 must be accounted for separately by L_2 from the losses of L_2 (immediately before the ownership change) and are subject to limitation under section 382. See paragraph (f)(1)(ii) of this section for rules that end separate accounting for L_1's pre-change losses on any testing date occurring on or after January 29, 1991.

(*iii*) L_2 is a new loss corporation because it is a successor corporation to L_1. There is no ownership change with respect to L_2, however, because A's stock ownership in L_2 increased by only 40 percentage points (to 40 percent) over the amount owned by A prior to the merger (0 percent). Therefore, the pre-change losses of L_2 are not limited under section 382 as a result of the merger.

Example (3). The result in *Example (2)* would be the same if L_1 had survived the merger (*i.e.*, L_2 merged into L_1) with A and B owning 40 and 60 percent, respectively, of L_1 stock. L_1's pre-change losses would be accounted for separately and limited under section 382 and the pre-change losses of ^{2} would be accounted for separately under §1.382–2(a)(1)(iii) of this section, but would not be limited under section 382. See §1.382–2(a)(1)(ii) for the treatment of ^{2} following the transaction.

Example (4). The facts are the same as *Example (2)*, except, instead of acquiring ^{1} in a merger, ^{2} acquires all of the ^{1} stock from A on January 1, 1988, solely in exchange for stock representing a 40 percent interest in ^{2}, in a reorganization described in section 368(a)(1)(B). The acquisition of stock by ^{2} is an equity structure shift (as well as an owner shift) with respect to ^{1} that results in an ownership change with respect to ^{1} because the percentage of ^{1} stock owned by B immediately after the reorganization (60 percent, by virtue of B's ownership of ^{2}, through the operation of the constructive ownership rules of paragraph (h) of this section) increases by more than 50 percentage points over the lowest percentage of ^{1} stock owned by B at any time during the testing period (0 percent prior to the reorganization). The acquisition also results in an equity structure shift and an owner shift with respect to ^{2}, but ^{2} incurs no ownership change, because A's stock ownership in ^{2} increased by only 40 percentage points over the percentage of ^{2} stock owned by A prior to the reorganization (0 percent).

(f) *Definitions.* For purposes of this section—

(1) *Loss corporation*—(i) *In General.* See section 382 and § 1.382–2(a)(1) for the definition of a loss corporation.

(ii) *End of separate accounting for losses and credits of distributor or transferor loss corporation.* The separate tracking of owner shifts of the stock of an acquiring corporation required by § 1.382–2(a)(1)(iii) with respect to the net operating loss carryovers and other attributes described in § 1.382–2(a)(1)(ii) ends when a fold-in event occurs. A fold-in event is either an ownership change of the distributor or transferor corporation in connection with, or after, the transaction to which section 381(a) applies, or a period of 5 consecutive years following the section 381(a) transaction during which the distributor or transferor corporation has not had an ownership change. Starting on the day after the earlier of the change date (but not earlier than the day of the section 381(a) transaction) or the last day of the 5 consecutive year period, the losses and other attributes of the distributor or transferor corporation are treated as losses and attributes of the acquiring corporation for purposes of determining whether an ownership change occurs with respect to such losses. Also, for purposes of determining the beginning of the acquiring corporation's testing period, such losses are considered to arise either in a taxable year that begins not earlier than the later of the day following the change date or the day of the section 381(a) transaction, or in a taxable year that begins 3 years before the end of the 5 consecutive year period. Prechange losses of a distributor or transferor corporation that are subject to a limitation under section 382 continue to be subject to the limitation notwithstanding the occurrence of a fold-in event. Any ownership change that occurs in connection with, or subsequent to, the section 381 transaction may result in an additional, lesser limitation with respect to such pre-change losses. This paragraph (f)(1)(ii) applies to any testing date occurring on or after January 29, 1991.

(iii) *Application to other successor corporations.* Section 1.382–2(a)(1) (relating to the definition of loss corporation) and this paragraph (f)(1) also apply, as the context may require, to successor corporations other than successors in section 381(a) transactions. For example, if a corporation receives assets from the loss corporation that have basis in excess of value, the recipient corporation's basis for the assets is determined, directly or indirectly, in whole or in part, by reference to the loss corporation's basis, and the amount by which basis exceeds value is material, the recipient corporation is a successor corporation subject to § 1.382–2(a)(1) and this paragraph (f)(1). This paragraph (f)(1)(iii) applies to any testing date occurring on or after January 1, 1997.

(2) *Old loss corporation.* The term *old loss corporation* means any corporation with respect to which there is an ownership change and that was a loss corporation immediately before the ownership change.

(3) *New loss corporation.* The term *new loss corporation* means a corporation with respect to which there is an ownership change if, immediately after such change, it is a loss corporation. A successor corporation to the corporation described in the preceding sentence also is a new loss corporation.

(4) *Successor corporation.* A successor corporation is a distributee or transferee corporation that succeeds to and takes into account items described in section 381(c) from a corporation as the result of an acquisition of assets described in section 381(a). A successor corporation also includes, as the context may require, a corporation which receives an asset or assets from another corporation if the corporation's basis for the asset(s) is determined, directly or indirectly, in whole or in part, by reference to the other corporation's basis and the amount by which basis differs from value is, in the aggregate, material. The previous sentence of this paragraph (f)(4) applies to any testing date occurring on or after January 1, 1997.

(5) *Predecessor corporation.* A predecessor corporation is a distributor or transferor corporation that distributes or transfers its assets to an acquiring corporation in a transaction described in section 381(a). A predecessor corporation also includes, as the context may require, a corporation which transfers an asset or assets to another corporation if the transferee's basis for the asset(s) is determined, directly or indirectly, in whole or in part, by reference to the corporation's basis and the amount by which basis differs from value is, in the aggregate, material.

The previous sentence of this paragraph (f)(5) applies to any testing date occurring on or after January 1, 1997.

(6) *Shift.* As the context may require, a shift means an equity structure shift, an owner shift or both.

(7) *Entity.* See § 1.382–3(a)(1) for the definition of an entity.

(8) *Direct ownership interest.* A *direct ownership interest* means the interest a person owns in an entity, including a loss corporation, without regard to the constructive ownership rules of paragraph (h) of this section.

(9) *First tier entity.* A first tier entity is an entity that, at any time during the testing period, owns a five percent or more direct ownership interest in the loss corporation.

(10) *5-percent owner.* A 5-percent owner is any individual that, at any time during the testing period, owns a five percent or more direct ownership interest in a first tier entity or a higher tier entity. See paragraph (g) of this section for rules to determine whether, as a result of the constructive ownership rules of paragraph (h) of this section, a 5-percent owner is a 5-percent shareholder.

(11) *Public shareholder.* A public shareholder is any individual, entity, or other person with a direct ownership interest in a loss corporation of less than five percent at all times during the testing period.

(12) *Public owner.* A public owner is any individual, entity, or other person that, at all times during the testing period, owns less than a five percent direct ownership interest in a first tier entity or any higher tier entity.

(13) *Public group.* A public group is a group of individuals, entities, or other persons each of whom owns, directly or constructively, less than five percent of the loss corporation. See paragraphs (g) and (j) of this section for the rules applicable to identify public groups and to determine whether a public group is a 5-percent shareholder.

(14) *Higher tier entity.* A higher tier entity is any entity that, at any time during the testing period, owns a five percent or more direct ownership interest in a first tier entity or in any higher tier entity.

(15) *Indirect ownership interest.* An indirect ownership is an interest a person owns in an entity determined solely as a result of the application of the constructive ownership rules of paragraph (h) of this section and without regard to any direct ownership interest (or other beneficial ownership interest) in the entity.

(16) *Highest tier entity.* A highest tier entity is a first tier entity or a higher tier entity that is not owned, in whole or in part, at any time during the testing period by a higher tier entity.

(17) *Next lower tier entity.* The next lower tier entity with respect to a first tier entity is the loss corporation. The next lower tier entity with respect to a higher tier entity is any first tier entity or other higher tier entity in which the higher tier entity owns, at any time during the testing period, a five percent or more direct ownership interest.

(18) *Stock*—(i) *In general.* For further guidance, see § 1.382–2(a)(3)(i).

(ii) *Treating stock as not stock.* Any ownership interest that otherwise would be treated as stock under paragraph (f)(18)(i) of this section shall not be treated as stock if—

(A) As of the time of its issuance or transfer to (or by) a 5-percent shareholder, the likely participation of such interest in future corporate growth is disproportionately small when compared to the value of such stock as a proportion of the total value of the outstanding stock of the corporation,

(B) Treating the interest as not constituting stock would result in an ownership change, and

(C) The amount of the pre-change loss (determined as if the testing date were the change and treating the amount of any net unrealized built-in loss as a pre-change loss) is more than twice the amount determined by multiplying

(*1*) the value of the loss corporation (as determined under section 382(e)) on the testing date, by

(*2*) the long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs.

Stock that is not treated as stock under this paragraph (f)(18)(ii), however, is taken into account for purposes of determining the value of the loss corporation under section 382(e).

(iii) *Treating interests not constituting stock as stock.* Any ownership interest that would not be treated as stock under paragraph (f)(18)(i) of this section (other than an option that is subject to paragraph (h)(4) of this section) shall be treated as constituting stock if—

(A) As of the time of its issuance or transfer to (or by) a 5-percent shareholder (or a person who would be a 5-percent shareholder if the interest not constituting stock were treated as stock), such interest offers a potential significant participation in the growth of the corporation,

(B) Treating the interest as constituting stock would result in an ownership change, and

(C) The amount of the pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss) is more than twice the amount determined by multiplying

(*1*) The value of the loss corporation (as determined under section 382(e)) on the testing date, by

(*2*) The long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs.

An ownership interest is that treated as stock under this paragraph (f)(18)(iii) is taken into account for purposes of determining the value of the loss corporation under section 382(e). See §1.382–4(d)(12) for rules that apply with respect to options and this paragraph (f)(18)(iii).

(iv) *Stock of the loss corporation.* The *stock of the loss corporation* means stock of such corporation within the meaning of this paragraph (f)(18) and, as the context may require, includes any indirect ownership interest in the loss corporation.

(19) *Change date.* The *change date* means the date on which a shift (or any other transaction described in paragraph (a)(2)(i) of this section) that is the last component of an ownership change occurs.

(20) *Year.* A *year,* or any multiple thereof, means a 365-day period (or a 366-day period in the case of a leap year), or any multiple thereof, unless the year is specifically identified as a taxable year.

(21) *Old section 382.* ''Old section 382'' means section 382, as in effect prior to the effective date of section 382 in the Tax Reform Act of 1986 (the ''Act''), but taking into account section 621(f)(2) of the Act.

(22) *Pre-change loss.* See section 382 and §1.382–2(a)(2) for the definition of pre-change loss.

(23) *Unrelated.* Any two persons are unrelated if the constructive ownership rules of paragraph (h) of this section do not apply to treat either person as owning stock that is owned, directly or constructively, by the other person.

(24) *Percentage ownership interest.* A person's percentage ownership interest in—

(i) A corporation shall be determined under the rules of this section that are applicable to the determination of a shareholder's percentage stock ownership interest in a loss corporation (see paragraphs (f)(18)(i) through (iii) of this section),

(ii) A partnership shall be equal to the relative fair market value of such person's partnership interest to the total fair market value of all outstanding partnership interests, determined without regard to any limited and preferred partnership interest that is described in paragraph (h)(2)(ii)(C) of this section,

(iii) A trust shall be determined in accordance with the principles of section 318(a)(2)(B) for determining the constructive ownership of stock,

(iv) An estate shall be determined in accordance with the principles of section 318(a)(2)(A) for determining the constructive ownership of stock, and

(v) All other entities shall be determined by reference to the person's relative economic interest in the entity, taking into account all of the relevant facts and circumstances.

(g) *5-percent shareholder*—(1) *In general.* Subject to the rules of paragraphs (k)(2) and (4) of this section, the term *5-percent shareholder* means—

(i) An individual that owns, at any time during the testing period,

(A) A direct ownership interest in the stock of the loss corporation of five percent or more or

(B) An indirect ownership interest in the stock of the loss corporation of five percent or more by virtue of an ownership interest in any one first tier entity or higher tier entity,

(ii) A public group, of either a first tier entity or a higher tier entity, identified as a 5-percent shareholder under paragraph (j)(1)(iv)(A) or (B) of this section,

(iii) A public group of the loss corporation identified as a 5-percent shareholder under paragraph (j)(1)(iv)(C) of this section, and

(iv) A public group, of the loss corporation, a first tier entity or a higher tier entity, identified as a 5-percent shareholder under paragraph (j)(2) or (3) of this section. An individual owning five percent or more of the stock of the loss corporation at any time during the testing period is a 5-percent shareholder notwithstanding that the individual may own less than five percent of the stock of the loss corporation on the testing date. See paragraph (g)(5)(i)(B) of this section for rules permitting a loss corporation to make an adjustment in cases described in the preceding sentence.

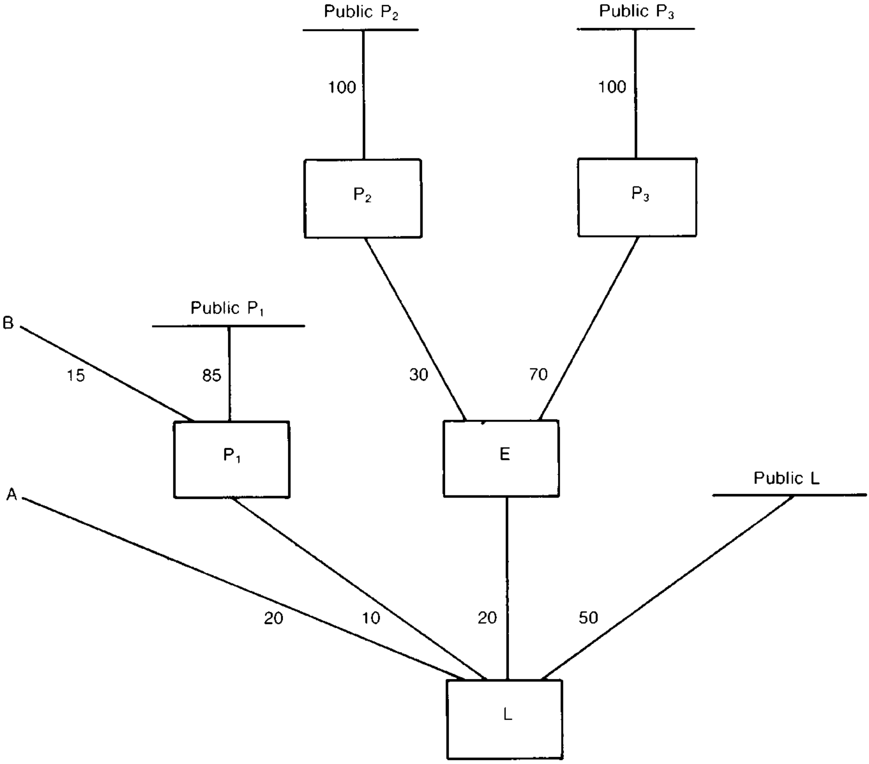
(2) *Determination of whether a person is a 5-percent shareholder.* Except as provided in paragraphs (k)(2) and (4) of this section, a person shall be treated as constructively owning stock of the loss corporation pursuant to paragraph (h)(2) of this section only if the loss corporation stock is attributed to such person in the person's capacity as a higher tier entity or a 5-percent owner of the first tier entity or higher tier entity from which such stock is attributed. See paragraph (k)(3) of this section for rules explaining the extent of the obligation of the loss corporation to determine the identity of its 5-percent shareholders. Nothing in this paragraph (g)(2), however, shall limit the attribution of loss corporation stock under section 318(a)(2) and paragraph (h) of this section to a public owner.

(3) *Determination of the percentage stock ownership interest of a 5-percent shareholder.* Subject to the rules of paragraphs (k)(2) and (4) of this section, in determining a 5-percent shareholder's percentage ownership interest in the loss corporation, the shareholder's direct ownership interest, if any, and each indirect ownership interest that he may have in the loss corporation in his capacity as a 5-percent owner of any one first tier entity or higher tier entity, if any, are required to be added together and taken into account with respect to such shareholder only to the extent that each such direct or indirect ownership interest constitutes five percent or more of the stock of the loss corporation.

(4) *Examples.*

Example (1) (i) Twenty percent of L stock is owned by A, 10 percent is owned by P_1, 20 percent is owned by E, a joint venture, and the remaining 50 percent of L stock is owned by Public L. P_1 is owned 15 percent by B and 85 percent by Public P_1. E is owned 30 percent by P_2 and 70 percent by P_3, which, in turn, are owned by Public P_2 and Public P_3, respectively.

(ii) The ownership structure of L is illustrated by the following chart:

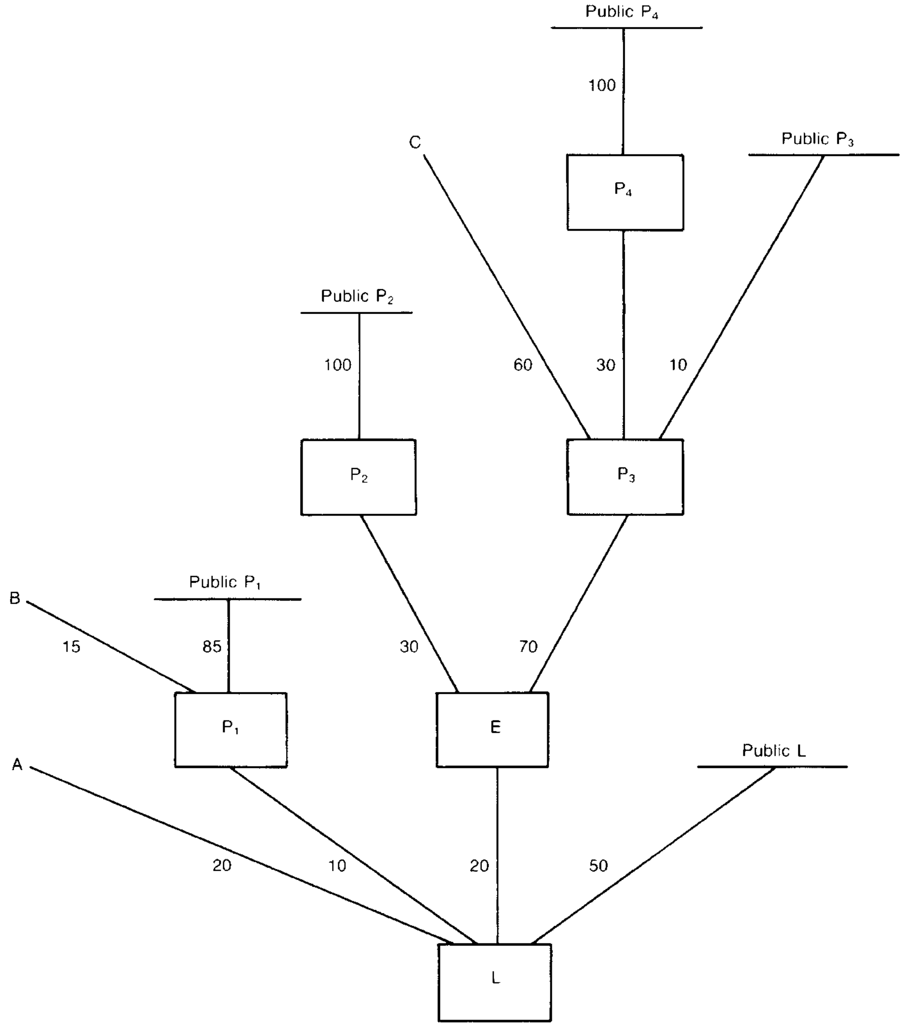


(iii) P_1 and E, each of which has a direct ownership interest in L of five percent or more, are first tier entities. The shareholders with direct ownership interests in L who individually own less than five percent of L are public shareholders (Public L). B, who has a direct ownership interest of five percent or more in P_1, is a 5-percent owner of P . P_2 and P_3, and P_3, each of which has a direct ownership interest in a first tier entity (E) of five percent or more, are higher tier entities with respect to L and, because neither entity is owned at any time during the testing period by a higher tier entity, they also are highest tier entities. The shareholders of P_2 and P_3 (Public P_2 and Public P_3, respectively) are public owners of such entities, because none of those shareholders own five percent or more of either entity at any time during the testing period.

(iv) A, who has a 20 percent direct ownership interest in L, is a 5-percent shareholder of L. Because, by application of the constructive ownership rules of paragraph (h) of this section, B owns only 1.5 percent of L stock in his capacity as a 5-percent owner of P_1 (15 percent ownership of P_1 × 10 percent ownership of L), B is not a 5-percent shareholder of L, even though he is a 5-percent owner of P_1. Under the rules of paragraph (j) of this section, therefore, B is treated as a member of Public P_1. See *Example (3)* of paragraph (j)(1)(vi) of this section for a determination of which public owners and public shareholders constitute public groups that are treated as 5-percent shareholders of L.

Example (2) (i) The facts are the same as in *Example (1)*, except that P_3 is owned 60 percent by C, 30 percent by P_4, and 10 percent by Public P_3. The stock of P_4 is owned by a group of persons (Public P_4), none of whom own five percent or more of the stock of P_4.

(ii) The ownership structure of L is illustrated by the following chart:



(iii) The defined terms are the same as in *Example (1)*, except that P_3 is a higher tier entity, not a highest tier entity, because five percent or more of P_3 is, in turn, owned by another entity (P_4). P_4, which owns five percent or more of a higher tier entity (P_3), also is a higher tier entity and, because it is not owned at any time during any testing period by any entity that is also a higher tier entity, P_4 is a highest tier entity. All of the shareholders of P_4, none of which own a direct ownership interest of five percent or more in P_4, are public owners of P_4.

(iv) C is a 5-percent owner of P_3 and, under the constructive ownership rules of paragraph (h) of this section, C indirectly owns 8.4 percent of L ([60 percent ownership of P_3] × [70 percent ownership of E] × [20 percent ownership of L]), in his capacity as a 5-percent owner of P_3. B is a 5-percent owner of P_1 and, under the constructive ownership rules of paragraph (h) of his section, B owns 1.5 percent of L ([15 percent ownership of P_1] × [10 percent ownership of L]) in his capacity as a 5-percent owner of P_1. Therefore, C is a 5-percent shareholder of L, but B is not a 5-percent shareholder of L, even though he is a 5-percent owner of P_1. See *Example (4)* of paragraph (j)(1)(vi) of this section for a determination of which public owners and public shareholders constitute public groups that are treated as separate 5-percent shareholders of L.

Example (3) (i) L is owned 30 percent by A and 70 percent by P. A owns six percent of P stock and the balance (94 percent) is owned equally by 500 unrelated shareholders (‘‘Public P’’).

(ii) A is a 5-percent shareholder because he directly owns 30 percent of L. Even though A is a 5-percent owner of P, A’s 4.2 percent indirect ownership interest in L (six percent ownership interest in P × P’s 70 percent ownership of L) is generally not taken into account in determining A’s ownership interest, because such indirect ownership interest is less than five percent. Instead, A’s 4.2 percent indirect interest is treated under paragraph (j)(1)(iv) of this section as owned by Public P. If, however, L has actual knowledge of A’s less-than-five-percent indirect ownership interest in L and is thus subject to paragraph (k)(2) of this section, or paragraph (k)(4) of this section otherwise applies, L must take A’s total 34.2 percent ownership interest into account in determining A’s percentage ownership in L.

Example (4). The facts are the same as in *Example (3),* except that A owns ten percent of P’s stock. Because A’s indirect ownership interest in L in his capacity as a 5-percent owner of P is five percent or more, both A’s 30 percent direct ownership interest in L and his seven percent indirect ownership interest in L (10 percent ownership interest in P × P’s 70 percent ownership of L) are taken into account in determining his ownership interest in L, without regard to L’s actual knowledge or whether paragraph (k)(4) of this section applies.

Example 5— See §1.382–3(a)(1)(ii) for additional examples with respect to the definition of an entity.

(5) *Stock ownership presumptions in connection with certain acquisitions, and dispositions of loss corporation stock*—(i) *In general.* For purposes of this section—

(A) If an individual owns less than five percent of the stock of a loss corporation during the testing period (excluding the testing date) and acquires an amount of such stock so that the individual becomes a 5-percent shareholder on the testing date, the loss corporation may treat any interest in the loss corporation owned by such individual prior to that acquisition as owned by a public group during the period of such individual’s ownership of that interest and as not owned by the 5-percent shareholder during the same period, and

(B) If a 5-percent shareholder’s percentage ownership interest in the loss corporation is reduced to less than five percent, the loss corporation may presume that the remaining stock owned by such 5-percent shareholder immediately after such reduction is the stock owned by such shareholder for each subsequent testing date having a testing period that includes the date on which the reduction occurred as long as such shareholder continues to own less than five percent of the stock of the loss corporation. In that event, such ownership interest shall be treated as owned by a separate public group for purposes of the rules of paragraph (j)(2)(vi) of this section.

(ii) *Example.*

L has 100,000 shares of stock outstanding. All of the L stock is owned equally by 40 unrelated, individual shareholders, including A (who owns 2.5 percent of L stock). Because no person owns as much as five percent of L stock, Public L is the only 5-percent shareholder of L. See paragraph (j)(1) of this section. A purchases 5,000 shares of L stock over a public stock exchange on June 8, 1989. The purchase is an owner shift. When added to his ownership interest before that date (the testing date), A owns 7,500 shares of L stock (7.5 percent). Under paragraph (g)(5)(i)(A) of this section, L may treat A and Public L as having owned 0 percent and 100 percent, respectively, at all times prior to June 8, 1989 (rather than having owned 2.5 percent by A and 97.5 percent by Public L, even if L has actual knowledge of A’s less than five percent ownership interest). The increase in A’s stock ownership of L as of June 8, 1989 thus would be 7.5 percentage points, rather than 5.0 percentage points, for purposes of determining whether an ownership change occurs on that testing date and any subsequent testing date.

(h) *Constructive ownership of stock*—(1) *In general.* Subject to certain modifications set forth in this section and section 382(l)(3), the constructive ownership rules of section 318(a) generally apply for purposes of determining ownership of loss corporation stock.

(2) *Attribution from corporations, partnerships, estates and trusts*—(i) *In general.* Stock owned (directly or indirectly) by an entity shall be attributed to its owners—

(A) Except as otherwise provided in this section, and solely for the purposes of determining whether a loss corporation has an ownership change by treating the stock attributed pursuant to section 318(a)(2) as no longer being owned by the entity from which it is attributed, and

(B) If attribution is from a corporation, without regard to the 50 percent stock ownership limitation contained in section 318(a)(2)(C).

(ii) *Limitation on attribution from entities with respect to certain interests.* Section 318(a)(2) shall not apply to treat the stock of the loss corporation that is owned directly by a first tier entity (or indirectly by any higher tier entity) as being indirectly owned by any person that has an ownership interest in the first tier entity (or any higher tier entity) to the extent that such interest is (or is attributable to)—

(A) Stock of any such entity that is described in section 1504(a)(4),

(B) Any ownership interest in any such entity that does not constitute stock under paragraph (f)(18)(ii) of this section, or

(C) If the entity is not a corporation, any ownership interest in any such entity that has characteristics similar to the interests described in paragraph (h)(2)(ii)(A) or (B) of this section.

The ownership interests described in this paragraph (h)(2)(ii) shall not be taken into account in determining a person's percentage ownership interest in an entity under paragraph (f)(24) of this section.

(iii) *Limitation on attribution from certain entities.* For purposes of this section, except as provided in paragraphs (k)(2) and (4) of this section, each of the following shall be treated as an individual who is unrelated to any other owner (direct or indirect) of the loss corporation—

(A) Any entity other than a higher tier entity that owns five percent or more of the loss corporation stock (determined without regard to paragraph (h)(2)(i)(A) of this section) on a testing date, a first tier entity or the loss corporation,

(B) A qualified trust described in section 401(a),

(C) Any State, any possession of the United States, the District of Columbia, the United States (or any agency or instrumentality thereof), any foreign government, or any political subdivision of any of the foregoing, and

(D) Any other person designated by the Internal Revenue Service in the Internal Revenue Bulletin.

Stock of a loss corporation that is owned by any such person shall thus not be attributed to any other person for purposes of this section. See paragraph (g)(2) of this section limiting attribution from a first tier entity or a higher tier entity to any person that is not a 5-percent owner or a higher tier entity.

(iv) *Examples.*

Example (1). All the stock of L is owned by A. B and C respectively own 70 and 30 percent of the outstanding P stock. P acquires 60 percent of the outstanding L stock from A on July 1, 1988 (a testing date). After the acquisition, P is a first tier entity and a higher tier entity of L. B and C are each 5-percent owners of P and also are 5-percent shareholders of L having a 42 percent and 18 percent stock ownership interest in L, respectively, through the operation of the constructive ownership rules of paragraph (h) of this section. Because B and C together have increased their ownership in L by more than 50 percentage points during the testing period ending on the testing date (60 percent on the testing date and 0 percent prior thereto), an ownership change occurs with respect to L on July 1, 1988.

Example (2). The facts are the same as in *Example (1),* except that B and C are not shareholders in a corporation, but instead are partners in a general partnership, E. B and C respectively own 70 percent and 30 percent of E. E acquires 60 percent of the L stock on July 1, 1988. The results are the same as in *Example (1).*

Example (3). The facts are the same as in *Example (1),* except that the acquisition is accomplished in a transaction that qualifies under section 351(a). In that transaction, HC is formed through (i) a contribution of money by P in exchange for 60 shares of HC common stock and (ii) a contribution of all the outstanding shares of L stock plus cash by A in exchange for 40 shares of HC common stock and 30 shares of HC preferred stock that is described in section 1504(a)(4). The respective values of each share of HC stock, common and preferred, are equal. The stock of L is attributed to A through his interest in HC common stock, but not through his interest in HC preferred stock (see paragraph (h)(2)(ii)(A) of this section). Thus, A is treated as owning indirectly only 40 percent of L. B and C are 5-percent shareholders of L having indirect ownership interests in L of 42 percent and 18 percent, respectively, through their ownership of HC common stock. The results are therefore the same as in *Example (1)*.

(3) *Attribution to corporations, partnerships, estates and trusts.* Except as otherwise provided by regulation under section 382 or by the Internal Revenue Service in the Internal Revenue Bulletin, the rules of section 318(a)(3) shall not apply in determining the ownership of stock under this section.

(4) *Option attribution*—(i) *In general.* Solely for the purpose of determining whether there is an ownership change on any testing date, stock of the loss corporation that is subject to an option shall be treated as acquired on any such date, pursuant to an exercise of the option by its owner on that date, if such deemed exercise would result in an ownership change. The preceding sentence shall be applied separately with respect to—

(A) Each class of options (*i.e.,* options with terms that are identical, issued by the same issuer, and issued on the same date) owned by each 5-percent shareholder (or person who would be a 5-percent shareholder if the option were treated as exercised), and

(B) Each 5-percent shareholder, each owner of an option who would be a 5-percent shareholder if the option were treated as exercised, and each combination of such persons.

(ii) *Examples.*

Example (*1*)(*i*) A owns all of the 100 shares of outstanding L stock. A grants options for the purchase of his L stock, exercisable for 10 years from the date of issuance, in the following transactions: An option to B for four shares (issued January 1, 1988), an option to C for six shares (issued June 1, 1989), and an option to D for 15 shares (issued July 30, 1989). On July 30, 1990, A sells 41 shares of his L stock to BB.

(*ii*) Pursuant to paragraph (a)(2)(i) of this section, the date on which each option is acquired is a testing date. The issuance of options to acquire L stock to each of B, C, and D is not treated as an acquisition of the underlying stock on any such testing date since such treatment with respect to any one of the option owners (or any combination thereof) would not have resulted in an ownership change on any of those testing dates.

(*iii*) The date on which BB acquires 41 shares also is a testing date. BB's acquisition of 41 percent of the L stock, taken together with the shift in ownership that would result if the options held by B, C and D were exercised, would result in an ownership change, because the stock owned or treated as owned by Public L (a group including only B, the sole shareholder who owns less than five percent of L stock), C, D and BB would have increased by 66 percentage points (four, six, 15, and 41 percentage points, respectively) during the testing period. Subject to paragraph (h)(4)(ix) of this section, the options are treated as exercised and an ownership change occurs on July 30, 1990, pursuant to paragraph (h)(4)(i) of this section. Accordingly, no new testing period can begin before July 31, 1990. Under paragraph (h)(4)(x)(F) of this section, the option attribution rules of paragraph (h)(4)(i) of this section shall not be applicable with respect to any of the options owned by B, C, and D immediately before the ownership change until such time, if any, that such options are transferred to (or by) 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised). In addition, the subsequent exercise of any of those options by A, B, or C (the persons owning such options immediately before the ownership change) is disregarded. See paragraph (h)(4)(vi) of this section. Also see paragraph (h)(4)(viii) of this section for the treatment of options that lapse or are forfeited.

(*iv*) The facts are the same as in (*i*), except that the sale of A's 41 shares of L stock to BB occurs on July 30, 1995. Because the options are treated as exercised and the related stock is treated as acquired on the July 30, 1995 testing date, the results are the same as described in (*iii*).

Example (2) (*i*) A owns all of the outstanding 100 shares of the stock of L. On July 22, 1988, the value of A's stock in L is $500 and the following agreements are entered into: (i) A sells 40 shares of his L stock to B for $200, (ii) in exchange for $10, A grants B an option to acquire the balance of his L stock for $305 at any time before July 22, 1992, and (iii) L grants A an option to acquire 100 shares of L stock at a price of $600 exercisable until such time as B's option is no longer outstanding.

(*ii*) If the stock subject to the options owned by both A and B were treated as acquired on the July 22, 1988 testing date, B would have increased his ownership interest in L by only 50 percentage points to 50 percent ([40 shares purchased + 60 shares acquired pursuant to the option]/200 outstanding shares of L stock, including 100 shares deemed outstanding pursuant to the option issued to A by L) as compared with 0 percent prior to July 22, 1988. In determining whether the options with respect to the stock of L would, if exercised, result in an ownership change, paragraph (h)(4)(i)(B) of this section requires that such options be treated as exercised separately with respect to each 5-percent shareholder, each person who would be a 5-percent shareholder if the option were treated as exercised or each combination of such persons. Therefore, by treating the option owned by A as not having been exercised and the option owned by B as having been exercised, B's interest in L increases by 100 percentage points during the testing period. An ownership change with respect to L therefore results from the transactions occurring on July 22, 1988.

(iii) *Contingencies.* Except as provided in paragraph (h)(4)(x)(D) of this section, the extent to which an option is contingent or otherwise not currently exercisable shall be disregarded for purposes of this section.

(iv) *Series of options.* For purposes of this section, an option to acquire an option with respect to the stock of the loss corporation, and each one of a series of such options, shall be considered as an option to acquire such stock.

(v) *Interests that are similar to options.* For purposes of this section,

(A) An interest that is similar to an option includes, but is not limited to, a warrant, a convertible debt instrument, an instrument other than debt that is convertible into stock, a put, a stock interest subject to risk of forfeiture, and a contract to acquire or sell stock, and

(B) Any such interest shall be treated as an option.

(vi) *Actual exercise of options*—(A) *In general.* The actual exercise of any option in existence immediately before and after an ownership change, whether or not the option was treated as exercised in connection with the ownership change under paragraph (h)(4)(i) of this section, shall be disregarded for purposes of this section, but only if the option is exercised by the 5-percent shareholder (or person who would have been a 5-percent shareholder if the options owned by such person had been exercised immediately before the ownership change) who owned the option immediately before and after such ownership change.

(B) *Actual exercise within 120 days of deemed exercise.* If the actual exercise of an option occurs on or before the end of the period which is 120 days after the date on which the option is treated as exercised under paragraph (h)(4)(i) of this section, the loss corporation may elect to treat paragraphs (h)(4)(i) and (vi)(A) of this section as not applying to such option and take into account only the acquisition of loss corporation stock resulting from the actual exercise of the option. An election under this paragraph (h)(4)(vi)(B) shall have no effect on the determination of whether an ownership change occurs, but shall apply only for the purpose of determining the date on which the change date occurs. An election under this paragraph (h)(4)(vi)(B) shall be made in the statement described in paragraph (a)(2)(ii) of this section.

(vii) *Effect of deemed exercise of options on the outstanding stock of the loss corporation*—(A) *Right or obligation to issue stock.* Solely for purposes of determining whether an ownership change has occurred under paragraph (h)(4)(i) of this section, the deemed exercise of an option with respect to unissued stock (or treasury stock) of a corporation shall result in a corresponding increase in the amount of its total outstanding stock.

(B) *Right or obligation to acquire outstanding stock by the loss corporation.* Solely for purposes of determining whether an ownership change has occurred under paragraph (h)(4)(i) of this section, the deemed exercise of a right to transfer outstanding stock to the issuing corporation (or a right of the issuing corporation to acquire its stock) shall result in a corresponding decrease in the amount of its total outstanding stock.

(C) *Effect on value of old loss corporation.* The deemed exercise of an option with respect to unissued stock (or treasury stock) under paragraph (h)(4)(i) of this section shall have no effect on the determination of the value of the old loss corporation and the computation of the section 382 limitation. See section 382(l)(1)(B) disregarding capital contributions made during the two-year period preceding the change date for purposes of computing the section 382 limitation.

(viii) *Options that lapse or are forfeited.* If an option that is treated as exercised under paragraph (h)(4)(i) of this section lapses unexercised or the owner of such option irrevocably forfeits his right to acquire stock pursuant to the option, the option shall be treated for purposes of this section as if it never had been issued. In that case, the loss corporation may file an amended return for prior years (subject to any applicable statute of limitations) if the section 382 limitation was thus inapplicable. If paragraph (h)(4)(i) of this section applied to an option (or options) with respect to a taxable year for which an income tax return has not been filed by the date that the option (or options) lapses or is irrevocably forfeited, the loss corporation may treat paragraph (h)(4)(i) of this section as inapplicable to such option (or options).

(ix) *Option rule inapplicable if pre-change losses are de minimis.* Paragraph (h)(4)(i) of this section shall not apply to treat the stock of the loss corporation as acquired by the owner of an option if, on a testing date, the amount of pre-change losses (determined as if the testing date were a change date and treating the amount of any net unrealized built-in loss as a pre-change loss) is less than twice the amount determined by multiplying.

(A) The value of the loss corporation (as determined under section 382(e)) on the testing date, by

(B) The long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs.

(x) *Options not subject to attribution.* Paragraph (h)(4)(i) of this section shall not apply to—

(A) *Long-held options with respect to actively traded stock.* Any option with respect to stock of the loss corporation which stock is actively traded on an established securities market (within the meaning of section 1273(b)) for which market quotations are readily available, if such option has been continuously owned by the same 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised) for at least three years, but only until the earlier of such time as—

(*1*) The option is transferred by or to a 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised), or

(*2*) The fair market value of the stock that is subject to the option exceeds the exercise price for such stock on the testing date. For purposes of this paragraph (h)(4)(x)(A), options with respect to the stock of a loss corporation that are assumed (or substituted) in a reorganization and converted into options with respect to the stock of another party to the reorganization shall not be treated as transferred, provided that there are no changes in the terms of the options, other than that the stock that may be acquired pursuant to the option is that of another party to the reorganization and that the amount of stock subject to the option is adjusted only to reflect the exchange ratio for the exchange of stock of the loss corporation in the reorganization.

(B) *Right to receive or obligation to issue a fixed dollar amount of value of stock upon maturity of certain debt.* Any right to receive or obligation to issue stock pursuant to the terms of a debt instrument that, in economic terms, is equivalent to nonconvertible debt because the right to receive stock of the issuer of a fixed dollar amount is based upon the fair market value for such stock determined at or about the date the stock is transferred pursuant to such right or obligation (*i.e.,* the amount of the stock transferred pursuant to the option is equal to a fixed dollar amount, divided by the value of each share of such stock at or about the date of the stock transfer). This paragraph (h)(4)(x)(B) shall not apply if the method for determining the fair market value of the stock of the issuer is intended to or, in fact, provides the owner of the debt instrument with a participation in any appreciation of any stock of the issuer.

(C) *Right or obligation to redeem stock of the loss corporation.* Any right or obligation of the loss corporation to redeem any of its stock at the time such stock is issued, but only to the extent such stock is issued to persons who are not 5-percent shareholders immediately before the issuance.

(D) *Options exercisable only upon death, disability or mental incompetency.* Any option entered into between owners of the same entity (or an owner and the entity in which the owner has a direct ownership interest) with respect to such owner's ownership interest in the entity that is exercisable only upon the death, complete disability or mental incompetency of such owner.

(E) *Right to receive or obligation to issue stock as interest or dividends.* Any right to receive or obligation to issue stock of a corporation in payment of interest or dividends by the issuing corporation. (For an example illustrating this exception, see paragraph (j)(2)(iv)(B) of this section.)

(F) *Options outstanding following an ownership change*—(*1*) *In general.* Any option in existence immediately before and after an ownership change, whether or not the option was treated as exercised in connection with the ownership change under paragraph (h)(4)(i) of this section, but only so long as the option continues to be owned by the 5-percent shareholder (or person who was treated as a 5-percent shareholder) who owned the option immediately before and after such ownership change.

≤(2) Example (i) A, B, C and D own all of the outstanding stock of L. A owns 70 shares of L stock and each of B, C and D own 10 shares of L stock. On July 12, 1988, L issues warrants to each of its shareholders entitling them to acquire an additional 8.5 shares of L stock for each share of stock owned. (*ii*) If B, C and D, but not A, each exercise their respective rights to acquire an additional 85 shares of L stock (10 shares × 8.5 shares that may be acquired for each share owned) on July 12, 1988, their combined ownership interest in L on that date would exceed 80 percent (255 shares deemed to be acquired + 30 shares actually owned)/355 shares outstanding (actual and deemed)). B, C and D thus would increase their ownership interest in L by 50.3 percentage points during the testing period, causing an ownership change, because, under paragraph (h)(4)(i)(B) of this section, the options are treated as exercised if the exercise would cause an ownership change.

(*iii*) Following the ownership change, paragraph (h)(4)(i) of this section applies to prevent A's right to acquire 595 shares of L stock (70 shares x 8.5 shares that may be acquired for each share owned) or the rights held by B, C, or D, to be treated as exercised on any subsequent testing date, except to the extent that those rights are transferred. To the extent any of those options are transferred following the ownership change, paragraph (h)(4)(i) of this section will apply to any such options on the date of the transfer and on any subsequent testing date.

(G) *Right to acquire loss corporation stock pursuant to a default under a loan agreement.* Any right to acquire stock of a corporation by a bank (as that term is defined in section 581), an insurance company (as that term is defined in § 1.801–3(a)), or a trust qualified under section 401(a) solely as the result of a default under a loan agreement entered into in the ordinary course of the trade or business of such bank, life insurance company or qualified trust.

(H) *Agreement to acquire or sell stock owned by certain shareholders upon retirement.* Any option entered into between noncorporate owners of the same entity (or a noncorporate owner and the entity in which the owner has a direct ownership interest) with respect to such owner's ownership interest in the entity, but only if each of such owners actively participate in the management of the entity's trade or business, the option is issued at a time that the loss corporation is not a loss corporation and the option is exercisable solely upon the retirement of such owner. An option with terms described in both this paragraph (h)(4)(x)(H) and in paragraph (h)(4)(x)(D) of this section shall also not be subject to paragraph (h)(4)(i) of this section.

(I) [Reserved]

(J) *Title 11 or similar case.* See § 1.382–9(o) which excepts certain options created by or under a plan of reorganization in a title 11 or similar case from the operation of paragraph (h)(4)(i) of this section.

(K)—(Y) [Reserved]

(xi) *Certain transfers of options disregarded.* Transfers of options between persons who are not 5-percent shareholders (and between members of separate public groups resulting from the application of the segregation rules of paragraphs (j)(2) and (3)(iii) of this section) are not taken into account. Transfers of options in any of the circumstances described in section 382(l)(3)(B) are also disregarded and the transferee shall be treated as having owned the option for the period that it was owned by the transferor.

(xii) *Exercise of an option that has not been treated as stock.* The acquisition of stock pursuant to the actual exercise of an option (other than an option described in paragraph (h)(4)(vi)(A) of this section) shall not be disregarded.

(xiii) *Effective date.* See paragraph (m)(4)(vi) of this section for special rules regarding the effective date of the provisions of this paragraph (h)(4).

(5) *Stock transferred under certain agreements.* Notwithstanding paragraph (h)(4) of this section, no shift results solely because under section 1058(a)—

(i) A shareholder transfers stock of a corporation pursuant to an agreement that meets the requirements of section 1058(b), or

(ii) A person having rights under such an agreement exchanges those rights for stock identical to the stock transferred pursuant to the agreement.

(6) *Family attribution.* For purposes of this section—

(i) Paragraphs (1) and (5)(B) of section 318(a) shall not apply,

(ii) An individual and all members of his family described in section 318(a)(1) shall be treated as one individual,

(iii) Subject to paragraph (k)(2) of this section, paragraph (h)(6)(ii) of this section shall not apply to members of a family who, without regard to that paragraph (h)(6)(ii), would not be 5-percent shareholders, and

(iv) If under paragraph (h)(6)(ii) of this section, an individual may be treated as a member of more than one family, and each family that is treated as one individual is a 5-percent shareholder (or would be treated as a 5-percent shareholder if such individual were treated as a member of such family), then such individual shall be treated only as a member of the family that results in the smallest increase in the total percentage stock ownership of the 5-percent shareholders on the testing date and shall not be treated as the member of any other family.

(i) [Reserved]

(j) *Aggregation and segregation rules.* For purposes of this section, except as provided in paragraphs (k)(2) and (4) of this section—

(1) *Aggregation of public shareholders and public owners into public groups*—(i) *Public group.* Under this paragraph (j), a loss corporation or other entity can be treated as owned, in whole or in part, by one or more public groups. A public group can include public shareholders, public owners, and 5-percent owners who are not 5-percent shareholders of the loss corporation.

(ii) *Treatment of a public group that is a 5-percent shareholder.* Each public group that is treated as a 5-percent shareholder under paragraph (g)(1)(ii), (iii) or (iv) of this section shall be treated as one individual. See paragraph (j)(2)(iv) for a rule combining certain de minimis public groups.

(iii) *Presumption of no cross-ownership.* The public owners, 5-percent owners who are not 5-percent shareholders and public shareholders in any public group, subject to paragraphs (j)(2)(iii), (k)(2) and (k)(4) of this section, are presumed not to be members of any other public group. It also is presumed that each such person is unrelated to all other shareholders (direct and indirect) of the loss corporation. See paragraph (h)(6)(iii) of this section. The members of a public group that exists by virtue of its direct ownership interest in an entity are presumed not to be members (and not to be related to a member) of any other public group that exists at any time by virtue of its direct ownership interest in any other entity. To the extent that the presumptions adopted in this paragraph (j)(1)(iii) are not applicable because the loss corporation has actual knowledge of facts to the contrary and is thus subject to paragraph (k)(2) of this section, public shareholders, public owners and 5-percent owners who are not 5-percent shareholders may be aggregated into additional public groups.

(iv) *Identification of the public groups treated as 5-percent shareholders*—(A) *Analysis of highest tier entities.* The loss corporation must identify first tier entities and higher tier entities in order to identify any highest tier entities that must be identified under paragraph (k)(3) of this section. The loss corporation must then identify any 5-percent owners of each such highest tier entity who indirectly own, at any time during the testing period, five percent or more of the loss corporation through the ownership interest in such highest tier entity. Under paragraph (g)(1)(i)(B) of this section, any such 5-percent owner is a 5-percent shareholder. See paragraph (k)(3) of this section for rules explaining the extent of the obligation of the loss corporation to determine the identity of its shareholders. Each person who has an ownership interest in any highest tier entity and who is not treated as a 5-percent shareholder (*i.e.,* persons who are public owners or 5-percent owners who are not 5-percent shareholders) is a member of the public group of that highest tier entity. A public group, so identified, that indirectly owns five percent or more of the loss corporation on the testing date is treated under paragraph (g)(1)(ii) of this section as a 5-percent shareholder. If the public group so identified owns less than five percent of the loss corporation on the testing date, such public group is treated as part of the public group of the next lower tier entity.

(B) *Analysis of other higher tier entities and first tier entities.* The analysis and aggregation of public groups described in paragraph (j)(1)(iv)(A) of this section is repeated for any next lower tier entity and successively for any next lower tier entity of any entity described in this paragraph (j)(1)(iv)(B) until applied to each first tier entity.

(C) *Aggregation of the public shareholders.* The public shareholders are aggregated and, under paragraph (g)(1)(iii) of this section, are treated as a public group that is a 5-percent shareholder without regard to whether such group, at any time during the testing period, owns five percent or more of the loss corporation. For this purpose, if the public group of any first tier entity indirectly owns less than five percent of the loss corporation on the testing date, and is thus not treated as a 5-percent shareholder, but is treated as part of the public group of the loss corporation under paragraph (j)(1)(iv)(A) or (B) of this section, the ownership interest of that group is included in the public group of the loss corporation referred to in the preceding sentence.

(v) *Appropriate adjustments.* A loss corporation may apply the principles of paragraph (g)(5) of this section with respect to—

(A) Any public group that is treated as a 5-percent shareholder on the testing date if such public group, at any time during the testing period, was treated as part of the public group of the next lower tier entity, or

(B) Any public group that is treated as part of the public group of a next lower tier entity if such public group, at any time during the testing period, was part of the public group of a higher tier entity that was treated as a 5-percent shareholder and had a direct or indirect ownership interest in such lower tier entity.

(vi) *Examples.*

Example (1) (*i*) All of the stock of L is owned by 1,000 shareholders, none of whom own as much as five percent of L stock (‘‘Public L’’). All of the stock of P is owned by 150,000 shareholders, none of whom own as much as five percent of P stock (‘‘Public P’’). Between July 12, 1988 and August 13, 1988, P purchases all of the L stock through a series of transactions on the public stock exchange. P’s percentage of direct stock ownership in L increases from 4.9 percent to five percent on July 15, 1988, and from 50 percent to 51 percent on July 30, 1988.

(*ii*) Before July 15, 1988, P is a public shareholder of L. On and after July 15, 1988, P is a first tier entity (and a highest tier entity) of L. Accordingly, under the rules of paragraph (j)(1) of this section, Public P, on and after July 15, 1988, is treated as a public group that is a 5-percent shareholder. Each acquisition by P on and after such date affects the percentage of L stock that is owned by Public P and thus constitutes an owner shift.

(*iii*) Immediately after the transaction on July 30, 1988, P owns 51 percent of L stock. Under paragraph (j)(1)(iv)(A) of this section, Public P thus owns 51 percent of L. Under paragraph (j)(1)(iv)(C) of this section, Public L, the public group that includes the public shareholders of L, is treated as a 5-percent shareholder that owns 49 percent of L. Under paragraph (j)(1)(iii) of this section, Public L and Public P are presumed not to have any common members and it is also presumed that no member of either public group is related to any other member of either of the two public groups.

(*iv*) Assuming that the presumption provided in paragraph (j)(1)(iii) of this section (*i.e.,* that no person owns stock in both P and L) is not rebutted to any extent, Public P is treated as a 5-percent shareholder whose stock ownership in L, as of the July 30, 1988 testing date, has increased by 51 percentage points over its lowest percentage of stock ownership in L at any time during the testing period (0 percent prior to July 12, 1988). Accordingly, an ownership change with respect to L occurs as a result of P’s acquisition on July 30, 1988. L is thus a new loss corporation and its pre-change losses are subject to limitation under section 382.

Example (2) (*i*) All of the stock of P is owned by 1,000 unrelated shareholders, none of whom owns as much as five percent of P stock. L_1 is a wholly owned subsidiary of P. On January 2, 1988, P distributes all of the L_1 stock pro rata to its shareholders.

(*ii*) Prior to the stock distribution, the public owners of P are members of a public group (''Public P'') that is treated as a 5-percent shareholder owning 100 percent of the stock of L_1.

See paragraph (j)(1)(iv)(A) of this section. Following the stock distribution to the P shareholders, L_1 is owned by 1,000 public shareholders that are members of a public group (''Public L_1'') that is treated as a 5-percent shareholder owning 100 percent of the stock of L_1. See paragraph (j)(1)(iv)(C) of this section.

(*iii*) Public P and Public L_1 are treated as unrelated, individual 5-percent shareholders under paragraph (j)(1)(iii) of this section. Although the members of one public group are presumed not to be members of any other public group under paragraph (j)(1)(iii) of this section, L_1 has actual knowledge that all of its public shareholders immediately following the distribution (Public L_1) received L_1 stock pro rata in respect to the outstanding P stock and thus were also members of Public P. Applying paragraph (k)(2) of this section, the loss corporation may take into account the identity of ownership interests between Public L_1 and Public P to establish that Public L_1 did not increase its percentage ownership in L_1. Accordingly, the transaction would not constitute an owner shift.

Example (3) (*i*) The facts are the same as in *Example (1)* of paragraph (g)(4) of this section. Thus, 20 percent of L stock is owned by A, 10 percent is owned by P_1, 20 percent is owned by E, a joint venture, and the remaining 50 percent of L stock is owned by Public L. P_1 is owned 15 percent by B and 85 percent by Public P_1. E is owned 30 percent by P_2 and 70 percent by P_3, which are owned by Public P_2 and Public P_3, respectively. See *Example (1)(ii)* of paragraph (g)(4) of this section for a chart illustrating this ownership structure.

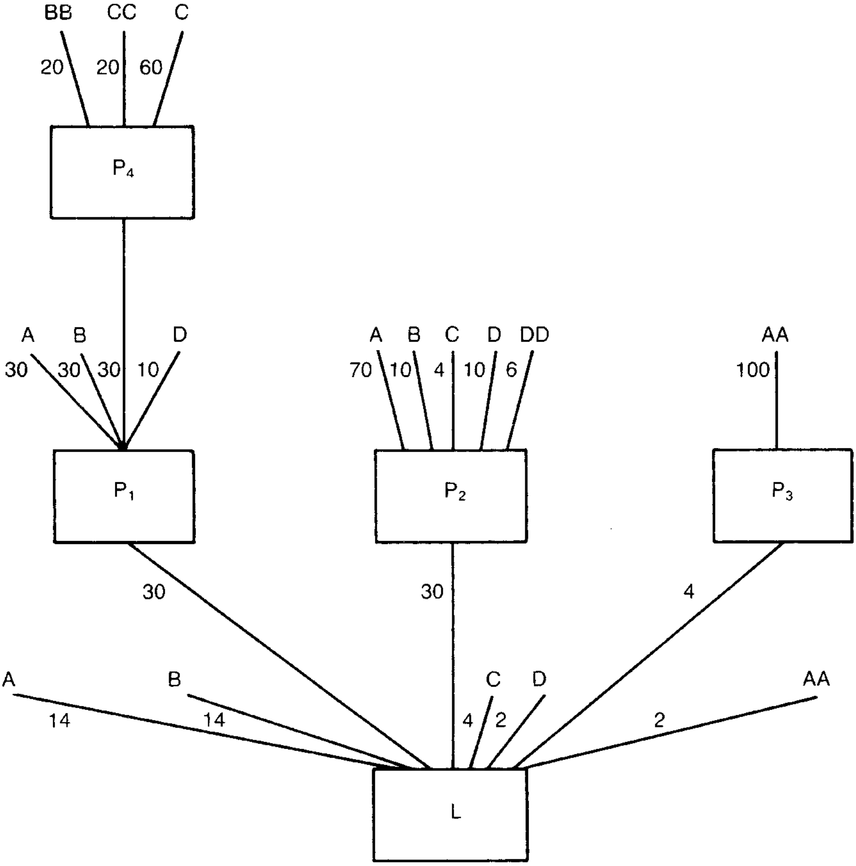
(*ii*) The public owners of P_2 and P_3 (Public P_2 and Public P_3, respectively), are public groups that are treated as 5-percent shareholders of L, because each such public group indirectly owns five percent or more of L stock (six percent by Public P_2 [(30 percent ownership of E)×(20 percent ownership of L)] and 14 percent by Public P_3 [(70 percent ownership of E)×(20 percent ownership of L)]). The public owners of P_1 (''Public P_1''), who indirectly own 8.5 percent of L stock [(85 percent ownership of P_1)×(10 percent ownership of L)] and B, who indirectly owns 1.5 percent of L and is thus included in Public P_1 under paragraph (j)(1)(iv)(A) of this section, are members of a public group that is treated as a 5-percent shareholder of L that owns ten percent of L stock. Finally, the public group of L (''Public L'') is a 5-percent shareholder that owns 50 percent of L. Accordingly, A, Public L, Public P_1 (including B), Public P_2, and Public P_3 are the only 5-percent shareholders of L.

Example (4) (*i*) The facts are the same as *Example (3)* above, except that P_3 is owned 60 percent by C, 30 percent by P_4, and 10 percent by P_3. The stock of P_4 is publicly traded and is owned by Public P_4. The facts are thus the same as in *Example (2)* in paragraph (g)(4) of this section. See *Example (2)(ii)* of paragraph (g)(4) of this section for a chart illustrating this ownership structure.

(*ii*) The public owners of P_4 (a highest tier entity) are members of a public group that indirectly owns 4.2 percent of L ([30 percent ownership of P_3]×[70 percent ownership of E]×[20 percent ownership of L]). For purposes of identifying public groups that are 5-.percent shareholders, L is not required to identify P_4 as a highest tier entity under paragraph (k)(3) of this section because P_4 does not own five percent or more of L stock. Moreover, under paragraph (h)(2)(iii) of this section, P_4 generally is treated as an individual from which there is no attribution of loss corporation stock. The public group of P_3 (including P_4) indirectly owns 5.6 percent of L ([40 percent of P_3]×[70 percent ownership of E]×[20 percent of L]), and is thus a 5-percent shareholder of L. The public groups of P_2 and P_1 (both Public P_1 and B), respectively, also own five percent or more of L stock and are thus 5-percent shareholders of L. In addition, the public group of L is a 5-percent shareholder regardless of whether it owns five percent of L stock. Accordingly, A, Public L, Public P_3 (including P_4), Public P_2, and Public P_1 (including B), are the only 5-percent shareholders of L.

Example (5)(i) On September 4, 1987, L is owned 14 percent by each of A and B, 30 percent by each of P_1 and P_2, four percent by each of C and P_3, and two percent by each of D and AA. P_1 is owned 30 percent by each of A, B, and P_4 and 10 percent by D. P_2 is owned 70 percent by A, 10 percent by each of B and D, six percent by DD and four percent by C. AA owns 100 percent of the stock of P_3. P_4 is owned 60 percent by C and 20 percent by each of BB and CC.

(*ii*) The ownership structure of L is illustrated by the following chart:



(*iii*) In order to identify L's 5-percent shareholders and their respective ownership interests in L on September 4, 1987, the rules of paragraph (j)(1) of this section apply to identify the public groups that are treated as separate 5-percent shareholders. Analysis begins with any highest tier entity, such as P_4. Each of P_4's shareholders is a 5-percent owner of P_4. C^4 owns 5.4 percent of L in his capacity as a 5-percent owner of P_4 and therefore is a 5-percent shareholder. Notwithstanding that C actually owns, directly and by attribution, 10.6 percent of L (four percent directly, 5.4 percent indirectly through P_4, and 1.2 percent through P_2), C's ownership interest in L as a 5-percent shareholder is presumed to include only the 5.4 percent indirect ownership through P_4. (Under paragraphs (g) and (k)(2) of this section, however, L must account for C's direct and indirect ownership interests in determining whether an ownership change occurs on any testing date if it has actual knowledge of such ownership on or berfore the date that its income tax return is filed for the taxable year that includes the testing date). Although BB and CC are each 5-percent owners of P_4, they are not 5-percent shareholders and therefore are members of the public group of P_4. Because the public group of P_4 indirectly owns only 3.6 percent of L, it is treated under paragraph (j)(1)(iv)(A) of this section as part of the public group of the next lower tier entity, P_1.

(*iv*) With respect to P_1, a first tier entity, each of its shareholders are 5-percent owners. Because A and B each indirectly own nine percent of L as 5-percent owners of P_1 and A indirectly owns 21 percent of L as a 5-percent owner of P_2, they are each 5-percent shareholders without regard to their direct ownership interests in L. A's ownership interest in L as a 5-percent shareholder is 44 percent (14 percent directly, nine percent in his capacity as a 5-percent owner of P_1, and 21 percent in his capacity as a 5-percent owner of P_2). B's ownership interest in L as a 5-percent shareholder is 23 percent (14 percent directly and nine percent in his capacity as a 5-percent and nine percent in his capacity as a 5-percent owner of P_1). B's ownership interest as a 5-percent shareholder does not include the three percent interest he owns indirectly through P_2. (Under paragraphs (g) and (k)(2) of this section, however, L must account for B's direct and indirect ownership interests, including his three percent interest through P_2, in determining whether an ownership change occurs on any testing date if L has actual knowledge of such ownership on or before the date that its income tax return is filed for the taxable year that includes the testing date.) D is a 5-percent owner of P_1. Although D owns eight percent of L (two percent directly, three percent indirectly through P_1, and three percent indirectly through P_2), he is not a 5-percent shareholder because he does not own five percent or more of L stock either directly or in his capacity as a 5-percent owner of either P_1 or P_2. (Under paragraphs (g) and (k)(2) of this section, however, L must account for D's direct and indirect ownership interests in determining whether an ownership change occurs on any testing date to the extent L has actual knowledge of such ownership amounting to five percent or more of L stock before the date that its income tax return is filed for the taxable year that includes the testing date.) The public group of P_1 (comprised of the public group of P_4 and D's direct ownership interest in P_1) has a 6.6 percent interest in L and is therefore treated as a separate 5-percent shareholder.

(*v*) With respect to highest tier entity P_2, D is a 5-percent owner who is not a 5-percent shareholder for the reason described in the preceding subdivision. DD is a 5-percent owner of P_2, who is not a 5-percent shareholder, because DD indirectly owns only 1.8 percent of L. Assuming that L does not have actual knowledge of B's and C's direct ownership interest in P_2, those interests are accounted for in computing the ownership interest are accounted for in computing the ownership interest of the public group of P_2. Therefore, each of P_2's shareholders, except A who is a 5-percent shareholder in his capacity as a 5-percent owner of P_2, are treated as members of the public group of P_2 that owns nine percent of L and is thus treated as a separate 5-percent shareholder.

(*vi*) Because the direct ownership interest of P_3 is less than five percent, it is a public shareholder. Therefore, assuming that L does not have actual knowledge of C's, D's, or AA's direct and/or indirect ownership interests in L, the public group of L is a separate 5-percent shareholder owning 12 percent of L (comprised of the direct ownership interests of C, D, AA and P_3).

(2) *Segregation rules applicable to transactions involving the loss corporation*—(i) *In general.* For purposes of this section, if—

(A) A transaction is described in paragraph (j)(2)(iii) of this section, and

(B) The loss corporation has one or more direct public groups immediately before and after the transaction,

the stock owned by such direct public group or groups is subject to the segregation rules described in paragraph (j)(2)(iii) of this section for purposes of determining whether an ownership change has occurred on the date of the transaction (and on any subsequent testing date with a testing period that includes the date of such transaction). See paragraph (j)(3) of this section for the application of the rules of this paragraph (j)(2) to transactions involving first tier entities or higher tier entities.

(ii) *Direct public group.* For purposes of this section, a direct public group is any public group of the loss corporation described in paragraph (j)(1)(iv)(C) of this section or any public group of the loss corporation resulting from the application of paragraph (j)(2)(iii) or (j)(3)(i) of this section.

(iii) *Transactions to which segregation rules apply*—(A) *In general.* The segregation rules of this paragraph (j)(2)(iii) apply to any transaction described in paragraph (j)(2)(iii)(B), (C), (D), (E), or (F) of this section in the manner specified. The presumptions adopted by this paragraph (j)(2)(iii) shall not apply only if, and to the extent that, the loss corporation either has actual knowledge of facts to the contrary regarding its stock ownership and is thus subject to paragraph (k)(2) of this section, or is subject to paragraph (k)(4) of this section. Any direct public group that is required to be identified as a result of a transaction described in paragraph (j)(2)(iii) of this section shall be treated as a 5-percent shareholder under paragraph (g)(1)(iv) of this section without regard to whether such group, at any time during the testing period, owns five percent or more of the loss corporation stock. To the extent that the presumptions are rebutted, the public shareholders, public owners and 5-percent owners who are not 5-percent shareholders may be aggregated into additional public groups. For an exception applicable to certain regulated investment companies, see § 1.382–3(k)(1).

(B) *Certain equity structure shifts and transactions to which section 1032 applies*—(*1*) *In general.* In the case of—

(*i*) A transaction that is an equity structure shift that also is described in section 381(a)(2) and in which the loss corporation is a party to the reorganization, or

(*ii*) A transfer of the stock of the loss corporation (including treasury stock) by the loss corporation in any other transaction to which section 1032 applies,

each direct public group that exists immediately after such transaction shall be segregated so that each direct public group that existed immediately before the transaction is treated separately from the direct public group that acquires stock of the loss corporation in the transaction. The direct public group that acquires stock of the loss corporation in the transaction is presumed not to include any members of any direct public group that existed immediately before the transaction. For purposes of this paragraph (j)(2)(iii)(B), a person is treated as acquiring stock of the loss corporation in a reorganization as the result of the person's ownership interest in another corporation that succeeds to the loss corporation's pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss) in a transaction to which section 381(a)(2) applies. In determining whether a transaction is described in section 1032 for purposes of this paragraph (j)(2)(iii)(B), the transfer by the loss corporation of any interest not constituting stock that is treated as stock under paragraph (f)(18)(iii) of this section shall be treated as the transfer of stock. See § 1.382–3(j) for exceptions to the segregation rules of this paragraph (j)(2)(iii)(B)(*1*).

(*2*) *Examples.*

Example (1) (*i*) P_1 owns 60 percent of the stock of L. The remaining L stock (40 percent) is owned by Public L. A owns 40 percent of the P_1 stock. The remaining P_1 stock (60 percent) is owned by Public P_1. P_2 is a publicly traded corporation owned by shareholders who each own less than five percent of P_2 stock (Public P_2).

(*ii*) On May 22, 1988, L merges into P_2 in a transaction described in section 368(a)(1)(A), with the shareholders of L receiving an amount of P_2 stock equal to 70 percent of the value of P_2 immediately after the reorganization.

(*iii*) Immediately before the merger, L's 5-percent shareholders were Public L (40 percent), Public P_1 (36 percent), and A (24 percent). Although the shareholders of P_2 (immediately before the merger) do not acquire any stock in the merger, they are treated as acquiring a direct ownership interest in the loss corporation in the reorganization because P_2 succeeds to the pre-change losses of L in a transaction to which section 381(a)(2) applies. As a result of the merger, which constitutes a transaction described in (j)(2)(iii)(B)(*1*) of this section, L's direct public group, Public L, must be segregated from the direct public group that would otherwise exist after the transaction (Public L and Public P_2). Public L, the direct public group that exists before the merger, has a continuing 28 percent interest in the loss corporation [70 percent of P_2 shares received in the merger x 40 percent shares of L owned prior to the merger] that must be segregated from the interests acquired by Public P_2.

(*iv*) In addition, Public P_1, which owns five percent or more of the stock of P_2 through P_1's ownership interest in P_2, also is segregated from any other public group (*i.e.*, both Public L and Public P_2) under paragraph (j)(1) of this section. Therefore, under paragraphs (j)(1) and (2) of this section, Public P_2 (excluding the members of Public L and Public P_1 immediately before the merger) is treated as a separate public group and 5-percent shareholder.

(*v*) The only 5-percent shareholder whose interest in the loss corporation, P_2, has increased during the testing period is Public P_2. Its interest has increased by 30 percentage points. Accordingly, no ownership change results from the merger. For purposes of measuring the shift in ownership of P_2 on any subsequent testing date with a testing period that includes May 22, 1988 (the date on which L merged into P_2), Public P_2 will continue to be treated as a direct public group, separate from Public L (the members of which own P_2 stock as a result of the merger) and Public P_1.

Example (2) (*i*) P and L are each owned by 21 equal shareholders. Each of 14 of the shareholders of P and L are owners of both corporations (''common owners''). L has actual knowledge of this cross ownership. therefore, as a group, these persons own 66⅔ percent of each of P and L. P stock has a value of $600 and L stock has a value of $400.

(*ii*) P merges into L under section 368(a)(1)(A) on June 10, 1988. Ordinarily, the direct public group of L that exists immediately before the transaction would be segregated from the direct public group that acquires stock in the merger (the public group of P immediately before the merger). In view of the common ownership of P and L, however, a third group may be created under paragraph (j)(2)(iii)(A) of this section so that L's owners following the merger would be: The common owners (66⅔ percent), Public L, less the common owners, 13 1/3 percent), and Public P, less the common owners (20 percent). Accordingly, the only 5-percent shareholder increasing its ownership interest by 20 percentage points and no ownership change occurs as a result of the merger.

Example (3) (*i*) L is entirely owned by Public L. L commences and completes a public offering of common stock on January 22, 1988, with the result that its outstanding stock increases from 100,000 shares to 300,000 shares. No person owns as much as five percent of L stock following the public offering.

(*ii*) The public offering of L stock is a transaction to which section 1032 applies. Immediately before the public offering, L's only 5-percent shareholder was Public L, a direct public group. Therefore, Public L (as in existence immediately before the transaction) must be segregated from the direct public group that would otherwise exist immediately after the transaction. Under paragraph (j)(2)(iii)(B)(*1*) of this section, the acquisition of 200,000 shares of L stock in the public offering must be treated as acquired by a direct public group (''New Public L'') that is separate from Public L. Each such public group is treated as an individual that is a separate 5-percent shareholder. See paragraphs (g)(1)(iv) and (j)(1)(ii) of this section.

(*iii*) As a result of the public offering, L has two 5-percent shareholders, Public L and New Public L, which own 33⅓ percent and 66⅔ percent of the stock of L, respectively. Because the members of New Public L are presumed not to be members of Public L (and not to be related to any such members), the ownership interest of New Public L immediately prior to the offering of stock was 0 percent.

(*iv*) New Public L is a 5-percent shareholder that has increased its ownership interest in L by more than 50 percentage points during the testing period (by 66⅔ percentage points). Thus, there is an ownership change with respect to L. For purposes of subsequent transactions, Public L and New Public L will not be segregated into two public groups because a new testing period commences on the day following the change date, January 23, 1988 (*i.e.*, any subsequent testing date will not have a testing period that includes the date of the public offering).

Example (4). The facts are the same as in *Example (3)*, but L establishes that 60,000 shares of the newly issued L stock were acquired by its shareholders of record on the date of the stock issuance (*i.e.*, members of Public L, referred to as Acquiring Public L) by persons owning 27 percent of the L stock immediately before the stock issuance. Accordingly, L has actual knowledge that New Public L acquired no more than 140,000 shares of L stock in the public offering. Under paragraphs (j)(2)(iii) and (k)(2) of this section, New Public L may be treated as having increased its ownership interest in L by 46⅔ percentage points (140,000 shares acquired in the offering/300,000 shares outstanding). L also has actual knowledge that the members of Public L owning 27 percent of L stock immediately before the stock issuance (27,000 shares/100,000 shares outstanding) own 29 percent of L stock immediately after such issuance ([27,000 shares + 60,000 shares acquired in the offering]/300,000 shares outstanding). Assuming that L chooses to take its actual knowledge into account for purposes of determining whether an ownership change occurred on January 22, 1988, Public L is segregated into two direct public groups immediately before the stock issuance so that the two percentage point increase in the ownership interest in L by Acquiring Public L is taken into account. The total increased ownership interest in L by New Public L and Acquiring Public L on the testing date over their lowest ownership interest during the testing period is 48 2/3 percent. Thus, no ownership change occurs with respect to L.

Example (5) (*i*) L is owned entirely by 10,000 unrelated individuals, none of whom own as much as five percent of L stock (''Public L''). P is owned entirely by 1,500 unrelated individuals, none of whom own as much as five percent of P stock (''Public P''). On December 22, 1988, L acquires all of the P stock from Public P in exchange for L stock representing 25 percent of the value of L, in a transaction described in section 368(a)(1)(B).

(*ii*) Under paragraph (j)(2)(iii)(B)(*1*) of this section, Public L, the direct public group that owns L stock immediately before and after the transaction to which section 1032 applies, is treated separately from Public P, the direct public group that acquires L stock in the transaction. Because Public P's percentage ownership interest in L increases to only 25 percent (as compared with 0 percent before the acquisition), no ownership change occurs. For purposes of determining whether an ownership change occurs on any testing date with a testing period that includes December 22, 1988, Public L and Public P will continue to be treated as separate 5-percent shareholders.

(*iii*) See *Example (4)* in paragraph (j)(3)(iv) of this section for the application of paragraph (j)(2)(iii)(B) of this section to a reorganization under section 368(a)(1)(B) in which the loss corporation is acquired.

(C) *Redemption-type transactions*—(*1*) *In general.* In the case of a transaction in which the loss corporation acquires its stock in exchange for property, each direct public group that exists immediately before the transaction shall be segregated at that time (and thereafter) so that the stock that is acquired in the transaction is treated as owned by a separate public group from each public group that owns the stock that is not acquired. For purposes of the preceding sentence, the term property shall include stock described in section 1504(a)(4) and stock described in paragraph (f)(18)(ii) of this section. Each direct public group that owned the stock that is acquired in the transaction is presumed not to own any such stock immediately after the transaction.

(*2*) *Examples.*

Example (1). L is entirely owned by Public L. There are 500,000 shares of L stock outstanding. On July 12, 1988, L acquires 150,000 shares of its stock for cash. Because L's acquisition is a redemption, Public L is segregated into two different public groups immediately before the transaction (and thereafter) so that the redeemed interests (''Public RL'') are treated as part of a public group that is separate from the ownership interests that are not redeemed (''Public CL''). Therefore, as a result of the redemption, Public CL's interest in L increases by 30 percentage points (from 70 percent (350,000/500,000) to 100 percent) on the July 12, 1988 testing date. Because the resulting increase is not more than 50 percentage points, no ownership change occurs. For purposes of determining whether an ownership change occurs on any subsequent testing date having a testing period that includes such redemption, Public CL is treated as a 5-percent shareholder whose percentage ownership interests in L increased by 30 percentage points as a result of the redemption.

Example (2). L is entirely owned by Public L. There are 250,000 shares of L common stock outstanding. On April 22, 1988, L acquires 100,000 shares of its outstanding common stock in exchange for 100,000 shares of preferred stock described in section 1504(a)(4). (The transaction thus constitutes a recapitalization within the meaning of section 368(a)(1)(E).) As a result of the recapitalization, which is a transaction described in paragraph (j)(2)(iii)(C) of this section, Public L is segregated into two different public groups immediately before the transaction (and thereafter) so that the stock acquired by L is treated as owned by a public group (''Public RL'') that is separate from the public group that owns the stock that is not so acquired (''Public CL''). Therefore, as a result of the transaction, Public CL's interest in L increases by 40 percentage points (from 60 percent to 100 percent). Because the resulting increase is not more than 50 percentage points, no ownership change occurs. For purposes of determining whether an ownership change occurs on any subsequent testing date with a testing period that includes the date of the recapitalization, Public CL is treated as a separate 5-percent shareholder whose percentage ownership interest increased by 40 percentage points as a result of the redemption type transaction.

(D) *Acquisition of loss corporation stock as the result of the ownership of a right to acquire stock—(1) In general.* In the case of a deemed acquisition of stock of the loss corporation as the result of the ownership of a right issued by the loss corporation to acquire such stock (see paragraph (h)(4) of this section), each direct public group that exists immediately after such acquisition shall be segregated so that each direct public group that existed immediately before the transaction is treated separately from the direct public group that is deemed to acquire stock of the loss corporation as a result of the ownership of the right to acquire such stock. The direct public group that is treated as acquiring stock of the loss corporation in the transaction is presumed not to include any members of any direct public group that existed immediately before the transaction. In applying the rules of paragraph (h)(4) of this section, the segregation rules of this paragraph (j)(2)(iii)(D) shall apply before making the determination required under that paragraph (h)(4) of this section. See § 1.382–3(j)(9) for rules relating to this paragraph (j)(2)(iii)(D).

(*2*) *Example.*

(i) L has 700,000 shares of common stock outstanding. Public L owns all of the outstanding L common stock. On May 20, 1988, L issues a class of debentures to the public that, in the aggregate, may be converted into 300,000 shares of L common stock. On September 7, 1988, P_1 acquires 210,000 shares of L common stock over a public stock exchange. None of the L debentures have been converted as of that date.

(*ii*) By virtue of L's issuance of convertible debentures, May 20, 1988 is a testing date. See paragraph (a)(2)(i) of this section. Immediately before the issuance of the convertible debentures, L's only 5-percent shareholder was Public L, a direct public group. Therefore, under paragraph (j)(2)(iii)(D) of this section, Public L must be segregated from the direct public group that would otherwise exist immediately after the transaction for the purpose of applying paragraph (h)(4) of this section, so that any acquisition of L stock through the conversion of L's debentures is treated as made by a public group other than Public L (''New Public L''). Assuming the largest increase in the total percentage stock ownership of New Public L on the testing date (see paragraph (h)(4) of this section), New Public L would have increased its ownership interest in L by 30 percentage points. Therefore, the stock of L would not be treated as acquired pursuant to a deemed conversion of the L debentures on May 20, 1988, under paragraph (h)(4) of this section, because the conversion would not cause an ownership change.

(*iii*) P_1's acquisition of L common stock results in second testing date. For the purpose of applying paragraph (h)(4) of this section, Public L must again be segregated from the direct public group that would otherwise result from conversion of the debentures, so that a deemed acquisition of L stock through the conversion of L's debentures on September 7, 1988 is treated as made by a public group other than Public L (''New Public L''). As on the previous testing date, New Public L would have increased its ownership interest in L by 30 percentage points if it were treated as having acquired L common stock pursuant to the conversion of the L debentures. The increase in New Public L's ownership, taken together with P_1's 21 percentage point ownership increase in L during the testing period [210,000 shares deemed converted/(700,000 (actual) + 300,000 (deemed) shares outstanding)], results in an ownership change.

(E) *Transactions identified in the Internal Revenue Bulletin.* Any transaction that is designated by the International Revenue Service in the Internal Revenue Bulletin shall be subject to the rules, as provided in such bulletin, similar to the rules described in this paragraph (j)(2)(iii).

(F) *Issuance of rights to acquire loss corporation stock*—(*1*) *In general.* In the case of any transaction that is described in paragraph (j)(2)(iii)(B), (D) or (E) of this section in which the loss corporation issues rights to acquire its stock to the members of more than one public group, those rights shall be presumed to be exercised pro rata by each such public group as those rights are actually exercised. See §1.382–3(j)(10) for an exception to the application of the rule of this paragraph (j)(2)(iii)(F)(*1*) to stock issued on the exercise of a transferable option.

(*2*) *Example.*

(i) L, which has six million shares outstanding, is owned entirely by Public L and P is owned entirely by Public P. On November 30, 1988, P merges into L in a transaction qualifying under section 368(a)(1)(A) with Public P receiving four million shares of L stock as a result of the reorganization. Under paragraph (j)(2)(iii)(B) of this section, Public L and Public P continue to be treated as separate public groups following the merger. Pursuant to the plan of reorganization, L also issues an amount of warrants in L stock pro rata to Public L and Public P that, if exercised, would result in the issuance of an additional two million shares of L stock. On November 30, 1989, when only one-half of the outstanding warrants have been exercised, A acquires all of the unexercised warrants.

(*ii*) Without regard to the warrants distributed in reorganization, Public P's ownership interest in L increases by 40 percentage points on November 30, 1988, relative to its lowest ownership interest in L at any time during the testing period (0 percent prior to the merger). For purposes of determining whether an ownership change occurs on November 30, 1988, the segregation rules of paragraphs (j)(2)(iii)(B) and (D) of this section does not require that a third direct public group be separately identified and treated as acquiring the warrants, because L has actual knowledge that Public L and Public P acquired the distributed warrants in proportion to their respective ownership interests in L stock. Because the largest increase in the ownership of L on the testing date results from treating only Public P as exercising the distributing warrants, in which event, its ownership interest would increase by 44.4 percentage points ([four million shares acquired in the merger + 800,000 shares deemed acquired]/10.8 million (actual and deemed) shares outstanding), the issuance of the warrants by L does not cause an ownership change on November 30, 1988.

(*iii*) Under paragraph (j)(2)(iii)(F)(*1*) of this section, each actual exercise of warrants to acquire one million shares of L stock between November 30, 1988 and November 30, 1989 is treated as made pro rata by Public L and Public P (600,000 shares to Public L and 400,000 shares to Public P). Accordingly, as a result of the actual exercises of warrants during that period the ownership interests of the only 5-percent shareholders, Public L and Public P, are proportionately increased.

(*iv*) A's acquisition of the all of the outstanding warrants on November 30, 1989 requires the determination whether there has been an ownership change with respect to L, because A would be 5-percent shareholder under paragraph (g)(1)(i) of this section owning 8⅓ percent of the L stock if the acquired warrants were exercised (one million shares deemed acquired/12 million (actual and deemed) shares outstanding). See paragraph (a)(2)(i) of this section. Under paragraph (h)(4)(i) of this section, A is not treated as having exercised those warrants, because an ownership change would not results. (Public P's 36⅔ percentage point increase [(four million shares acquired in the merger + 400,000 shares deemed acquired)/12 million (actual and deemed) shares outstanding] and A's 8⅓ percentage point increase is not greater than 50 percentage points).

(iv) *Combination of de minimis public groups*—(A) *In general.* Notwithstanding paragraph (j)(2)(iii)(A) of this section, any public group first identified during a taxable year, as a result of any transaction described in paragraph (j)(2)(iii)(B), (D), (E), or (F) of this section, that owns less than five percent of loss corporation stock may be combined, at the option of the loss corporation, with any other such groups also first identified as a result of any such transaction that occurs during such taxable year.

(B) *Example.*

(i) L is widely held with no person owning as much as five percent of the L stock at any time (''Public L''). L's taxable year ends on December 31. On January 1, 1989, L issues a class of debt maturing on December 31, 2019 (''Class A Debentures'') with respect to which it will semi-annually issue L stock in discharge of its interest obligation. In addition, L issues an amount of L stock to the public in two separate transactions during 1989. As a percentage of the L stock outstanding at the close of L's taxable year on December 31, 1989, L issued .45 percent of its stock on each of two dates in payment of interest with respect to the Class A Debentures, 4.5 percent of its stock in the first stock offering and six percent of its stock in the second stock offering. During 1990, L did not issue stock other than in payment of interest with respect to the Class A Debentures. As a percentage of L stock outstanding on December 31, 1990, L issued .41 percent of its stock on each of two dates during 1990 with respect to its outstanding debt.

(*ii*) Under paragraph (h)(4)(x)(E) of this section, L's obligation to issue stock in satisfaction of the interest with respect to the Class A Debentures until December 31, 2019, is not subject to paragraph (h)(4)(i) of this section and thus is taken into account only as such stock is issued.

(*iii*) The application of the segregation rules of paragraphs (j)(2)(iii)(B) and (iv) of this section require the identification of at least two additional, separate direct public groups during 1989. First, the persons who acquire six percent of L stock in a public offering to which section 1032 applies must be treated as a separate 5-percent shareholder (''Public 1L''). See paragraph (j)(2)(iii)(B) of this section. Even though this group was first identified in 1989, it may not be combined with other public groups also first identified in 1989 because it owns five percent or more of L stock. Second, although each of the three other issuances of L stock during the year ordinarily result in the identification of an additional, separate direct public group, each such direct public group may be combined with the two other such groups into a single public group (''Public 2L''). As of the end of 1989, Public 2L would own a total of 5.4 percent of the stock of L.

(*iv*) The application of the segregation rules of paragraphs (j)(2)(iii)(B) and (iv) of this section require the identification of at least one additional, direct public group during 1990. Because each additional, direct public group first identified in 1990 acquires less than five percent of L stock, they may be combined into a single public group (''Public 3L'') owning .82 percent of the stock of L. Public 3L is treated as a five percent shareholder even though it owns less than five percent of the stock of L. See paragraph (j)(2)(iv)(A) of this section.

(v) *Multiple transactions*—(A) *In general.* If a transaction (or any part thereof) is described by more than one subdivision of paragraph (j)(2)(iii) of this section, each such subdivision shall apply to the transaction (or each part of the transaction) in the manner that results in the largest increase in the percentage stock ownership by the 5-percent shareholders.

(B) *Example.*

(i) All of the common stock of L is owned by 1,000 unrelated persons, none of whom owns as much as five percent of the L stock (''Public CL''). L has outstanding a class of preferred stock described in section 1504(a)(4) that is owned in equal amounts by 500 unrelated persons (''Public PL'').

(*ii*) On September 4, 1988, L rearranges its capital structure by redeeming 70 percent of the common stock owned by 700 of the shareholders in exchange for cash. In addition, all of the preferred stock is exchanged for a new class of common stock (nonvoting) representing 40 percent of the value of L.

(*iii*) With respect to the part of the transaction that is treated as a redemption under paragraph (j)(2)(iii)(C) of this section (the exchange of common stock for cash), Public CL is segregated into two different public groups immediately before the transaction (and thereafter) so that the owners of the redeemed stock (''Public RCL'') are treated as part of a public group that is separate from the public group comprised of the owners of the stock that is not redeemed (''Public CCL''). As a result of the redemption, Public CCL's percentage ownership interest in L thus increases by 30 percentage points from 30 percent to 60 percent (taking into account all transactions occurring on the testing date, because the change in ownership is measured under paragraph (a)(1)(i) of this section by reference to each 5-percent shareholder's ownership interest immediately after the testing date). In addition, the exchange of preferred stock for nonvoting common stock is a transaction to which section 1032 applies. Under paragraph (j)(2)(v) of this section, the part of the transaction to which section 1032 applies is also subject to the segregation rules in the manner specified in paragraph (j)(2)(iii)(B) of this section. Accordingly, Public PL, the direct public group that acquires L nonvoting common stock in exchange for L preferred stock, must be treated as a separate public group from the other direct public groups, Public CCL and Public RCL. As a separate public group, Public PL's percentage stock ownership in L increases by 40 points (as compared to 0 percent prior to the transaction).

(*iv*) In summary, Public CCL increases its percentage ownership in L by 30 percentage points and Public PL increases its percentage ownership by 40 percentage points. Consequently, an ownership change occurs with respect to L on September 4, 1988.

(vi) *Acquisitions made by either a 5-percent shareholder or the loss corporation following application of the segregation rules.* Unless a different proportion is established by either the loss corporation or the Internal Revenue Service, the acquisition of loss corporation stock by either a 5-percent shareholder or the loss corporation on any date on which more than one public group of the loss corporation exists by virtue of the application of the rules of this paragraph (j)(2) shall be treated as being made proportionately from each public group existing immediately before such acquisition. See paragraph (g)(5)(i)(B) of this section for the application of this paragraph to the ownership interest of a 5-percent shareholder that owns less than five percent of the stock of the loss corporation on the testing date.

(3) *Segregation rules applicable to transactions involving first tier entities or higher tier entities*—(i) *Dispositions.* If a loss corporation is owned, in whole or in part, by a public group (or groups), the rules of paragraphs (j)(2)(iii)(B) and (iv) of this section shall apply to any transaction in which a first tier entity or an individual that owns a direct ownership interest in the loss corporation of five percent or more transfers a direct ownership interest in the loss corporation to public shareholders. Therefore, each direct public group that exists immediately after such a disposition shall be segregated so that the ownership interests of each public group that existed immediately before the transaction are treated separately from the public group that acquires stock of the loss corporation as a result of the disposition by the individual or first tier entity. The principles of this paragraph (j)(3)(i) shall also apply to transactions in which an ownership interest in a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section) or a first tier entity is transferred to a public owner or 5-percent owner who is not a 5-percent shareholder.

(ii) *Example.*

(A) L is owned equally by Public L, P and E. Public L consists of 150 equal, unrelated shareholders. P is owned by Public P, a group consisting of 1,500 equal, unrelated shareholders. E is a partnership and none of its partners are 5-percent owners. On October 22, 1988, E sells its entire interest in L over a public stock exchange. No individual or entity acquires as much as five percent of L's stock as the result of E's disposition of the L stock.

(B) The disposition of the L stock by E is a transaction that causes the segregation of L's direct public group that exists immediately before the transaction (Public L) from the direct public group that acquires L stock in the transaction (Public EL). As a result, L has three 5-percent shareholders, Public L, Public P (through the application of paragraph (j)(1) of this section) and Public EL, each of which owns 33⅓ percent of L stock. Therefore, Public EL is a 5-percent shareholder that has increased its ownership interest in L by 33⅓ percentage points during the testing period. For purposes of subsequent transactions, Public L and Public EL will continue to be treated as separate direct public groups until any subsequent testing date that does not have a testing period that includes E's disposition of L stock.

(iii) *Other transactions affecting direct public groups of a first tier entity or higher tier entity.* The rules of paragraphs (j)(2)(i), (iii), (iv) and (v) of this section shall apply to transactions described in such paragraphs that involve either a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section) or a first tier entity. In applying those rules for purposes of this paragraph (j)(3)(iii), each direct public group of a first tier entity or a higher tier entity is any public group of any such entity identified in paragraph (j)(1)(iv)(A) or (B) of this section or resulting from the application of this paragraph (j)(3)(iii). The principles of paragraph (j)(2)(iii)(C) of this section also shall apply to any transaction that has the effect of a redemption-type transaction (e.g., an acquisition by the loss corporation of stock in a first tier entity).

(iv) *Examples.*

Example (1). The facts are the same as in *Example (1)* of paragraph (j)(2)(iii)(B)(*2*) of this section, except that Public L and P_1 own 40 percent and 60 percent, respectively, of the stock of HC which, in turn, owns 100 percent of L and HC merges into P_2. Under paragraph (j)(3)(iii) of this section, the rules of paragraph (j)(2)(iii)(B) of this section apply to segregate HC's direct public group (Public L) immediately before the merger from the direct public group (Public P_2) that acquires loss corporation stock in the merger. The consequences of the merger of HC into P_2 are thus the same as in *Example (1)* of paragraph (j)(2)(iii)(B)(*2*) of this section.

Example (2) (*i*) Twenty-five individual shareholders each own four percent of L (''Public L''). Public L is therefore the only 5-percent shareholder of L. Each of the shareholders of L contribute their L stock to a newly formed corporation, HC. In exchange for their contribution of L stock, HC issues 100 percent of each of its two classes of common stock (voting and nonvoting).

(*ii*) The formation of HC, a first tier entity of L, is a transaction to which section 1032 applies. Under paragraph (j)(3)(iii) of this section, the rules of paragraphs (j)(1)(iii) and (j)(2)(iii)(B) of this section are applied to this transaction with the result that the shareholders of HC, immediately after the issuance of HC stock, are presumed not to include any persons that previously had a direct or indirect ownership interest in L. The presumption underlying those rules, however, is rebutted by establishing that all of the HC stock outstanding immediately after the transaction was issued solely in exchange for L stock. Thus, Public HC (immediately after the transaction) and Public L (immediately before the transaction) would be treated owned by the same direct public group.

Example (3) (*i*) All of the stock of L is owned by unrelated shareholders, none of whom owns as much as five percent of L stock. P also is owned by unrelated shareholders, none of whom owns as much as five percent of P stock. On November 22, 1988, P incorporates P_1 with a contribution of P stock. Immediately thereafter, P_1 acquires all of the properties of L in exchange for its P stock in a forward triangular merger qualifying under sections 368 (a)(1)(A) and (a)(2)(D). The P stock transferred by P_1 equals 45 percent of the total outstanding P stock.

(*ii*) Immediately before the merger of L into P_1, P's only 5-percent shareholder was Public P, a direct public group of P. The rules of paragraph (j)(2)(iii)(B) of this section thus apply to the transaction under paragraph (j)(3)(i) of this section since P, a first tier entity, is a party to the reorganization described in such paragraph. Although Public P does not acquire any stock in the merger, it is treated as acquiring stock in the loss corporation, P_1, because such corporation succeeds to the pre-change losses of L in a transaction to which 381(a) applies. As a result of the merger, Public P, the direct public group of P that exists immediately before the merger, must be segregated from the direct public groups acquiring P stock in the reorganization. Public P is, therefore, treated as acquiring 55 percent of the outstanding stock of the loss corporation, P_1, in the transaction. The transaction, therefore, results in an ownership change for P_1.

Example (4) (*i*) L is owned 20 percent by A and 80 percent by 1,000 unrelated individuals and entities, none of whom owns as much as five percent of L stock (''Public L''). P is owned 10 percent by B, 40 percent by E, and 50 percent by 5,000 unrelated individuals, none of whom owns as much as five percent of P stock (''Public P''). E is owned 30 percent by C and 70 percent by 30 unrelated individuals, none of whom owns as much as five percent of E (''Public E'').

(*ii*) On October 31, 1987, P acquires all of the L stock from A and Public L in exchange for P stock representing 20 percent of the value of P (determined immediately after the acquisition) in a transaction described in section 368(a)(1)(B). After the acquisition, P is owned eight percent by B, 32 percent by E, four percent by A, and 56 percent by 6,000 unrelated individuals, none of whom owns as much as five percent of P. Because L is wholly owned by P immediately after the acquisition, L, under paragraph (j)(1) of this section, is treated as owned as follows: Eight percent by B, 9.6 percent by C (through C's ownership interest in E, a highest tier entity, and E's ownership interest in P, a first tier entity), 22.4 percent by Public E (through its ownership interest in E and E's ownership interest in P), four percent by A, and 56 percent by the shareholders who each own less than five percent of L through their ownership interest in P.

(*iii*) Under paragraph (j)(3)(iii) of this section, the rules of paragraph (j)(2)(iii)(B) of this section apply to the reorganization since the transaction involved a first tier entity of L. Thus, the direct public group of P that exists immediately after the transaction must be segregated into two public groups—the direct public group of P that existed immediately before the acquisition (Public P) is treated separately from the direct public group consisting of the persons who acquire P stock in the transaction (Public L). Accordingly, immediately after the reorganization, Public P and Public L own 40 percent and 16 percent of L, respectively. See paragraph (h) of this section. (Under paragraph (g)(5)(ii)(B) of this section, L may treat the four percent of L stock owned by A immediately after the reorganization as the amount of L stock owned by A for each subsequent testing date having a testing period that includes the reorganization.)

(*iv*) In summary, after applying the rules of paragraphs (j)(1) and (3) of this section, L is treated as owned as follows:

5-percent shareholder	Percentage ownership interest
A	4.0
B	8.0
C	9.6
Public E	22.4
Public P	40.0
Public L	16.0

(*v*) The reorganization results in an ownership change, because B, C, Public E and Public P, all of whom are 5-percent shareholders, together have increased their percentage ownership in L by 80 percentage points as compared to their lowest percentage ownership in L at any time during the testing period (0 percent prior to the acquisition).

(v) *Acquisitions made by a 5-percent shareholder, a higher tier entity, or a first tier entity following application of the segregation rules.* The rules of paragraph (j)(2)(vi) of this section shall apply to the acquisition of an ownership interest in a first tier entity (or higher tier entity) if more than one direct public group of any such entity are segregated under the rules of this paragraph (j)(3). Accordingly, an acquisition by such an entity or a 5-percent shareholder of any ownership interest in such an entity shall be treated as made proportionately from the direct public groups resulting from the application of this paragraph (j)(3).

(k) *Operating rules*—(1) *Presumptions regarding stock ownership.* Subject to paragraphs (k)(2) and (4) of this section, for purposes of applying paragraphs (f), (g), (h), and (j)(1) of this section—

(i) *Stock subject to regulation by the Securities and Exchange Commission.* With respect to loss corporation stock that is described in Rule 13d–1(d) of Regulation 13D–G (or any rule or regulation to generally the same effect), promulgated by the Securities and Exchange Commission under the Securities and Exchange Act of 1934 (''registered stock''), a loss corporation may rely on the existence and absence of filings of Schedules 13D and 13G (or any similar schedules) as of any date to identify all of the corporation's shareholders who have a direct ownership interest of five percent or more (both individuals and first tier entities) on such date. A loss corporation may similarly rely on the existence and absence of such filings as of any date with respect to registered stock of any first tier entity or any higher tier entity to identify the 5-percent owners of any such entities on such date who indirectly own five percent or more of the loss corporation stock, and are thus 5-percent shareholders, and to identify any higher tier entities of such entities.

(ii) *Statements under penalties of perjury.* A loss corporation may rely on a statement, signed under penalties of perjury, by an officer, director, partner, trustee, executor or similar responsible person, on behalf of a first tier entity or a higher tier entity to establish the extent, if any, to which the ownership interests of any 5-percent owners or higher tier entities with respect to such entities have changed during a testing period. A loss corporation may not rely on such a statement (A) that it knows to be false or (B) that is made by either a first tier entity or higher tier entity that owns 50 percent or more of the stock of the loss corporation. For purposes of the preceding sentence, any first tier entities and higher tier entities that are known by the loss corporation to be members of the same controlled group (within the meaning of section 267(f)) shall be treated as one corporation.

(2) *Actual knowledge regarding stock ownership.* For purposes of this section (other than paragraphs (g)(5) and (j)(1)(v) of this section), to the extent that the loss corporation has actual knowledge of stock ownership on any testing date (or acquires such knowledge before the date that the income tax return is filed for the taxable year in which the testing date occurs) by—

(i) An individual who would be a 5-percent shareholder, but for the application of paragraphs (h)(2)(iii), (h)(6)(iii) or (g)(2) of this section, or

(ii) A 5-percent shareholder that would be taken into account, but for paragraphs (h)(2)(iii), (h)(6)(iii) or (g)(3) of this section,

the loss corporation must take such stock ownership into account for purposes of determining whether an ownership change has occurred on that testing date. If a loss corporation acquires such knowledge after such income tax return is filed, the loss corporation may take such ownership into account for purposes of determining whether an ownership change occurred on that testing date and, if appropriate, file an amended income tax return (subject to any applicable statute of limitations). To the extent the loss corporation has actual knowledge on or after any testing date regarding the ownership interest in the loss corporation by members of one public group (described in paragraphs (g)(1)(ii), (iii) or (iv) of this section) and the ownership interest of those members in the loss corporation as members in another such public group, the loss corporation may take such ownership into account for purposes of determining whether an ownership change occurred on that testing date.

(3) *Duty to inquire as to actual stock ownership in the loss corporation.* For purposes of this section, the loss corporation is required to determine the stock ownership on each testing date (and, except as otherwise provided in this section, the changes in the stock ownership during the testing period) of—

(i) Any individual shareholder who has a direct ownership interest of five percent or more in the loss corporation,

(ii) Any first tier entity,

(iii) Any higher tier entity that has an indirect ownership interest of five percent or more in the loss corporation (determined without regard to paragraph (h)(2)(i)(A) of this section), and

(iv) Any 5-percent owner who indirectly owns five percent or more of the stock of the loss corporation in his capacity as a 5-percent owner in any one first tier entity or higher tier entity.

The loss corporation does not have any obligation to inquire or to determine facts relating to the stock ownership of any shareholders other than those described in the preceding sentence. In addition, the loss corporation does not have any obligation to inquire or to determine if the actual facts relating to the stock ownership of any shareholder are consistent with the ownership interests of the loss corporation as determined by applying the presumptions and other rules of paragraphs (g), (h), (j) or (k)(1) of this section.

(4) *Ownership interest structured to avoid the section 382 limitation.* For purposes of this section, if the ownership interests in a loss corporation are structured by a person with a direct or indirect ownership interest in the loss corporation to avoid treating a person as a 5-percent shareholder (or to permit the loss corporation to rely on the presumption provided in paragraph (g)(5)(i)(B) of this section) for a principal purpose of circumventing the section 382 limitation, then—

(i) Paragraph (h)(2)(iii) of this section shall not apply with respect to the ownership interests so structured and the constructive ownership rules of paragraph (h)(2)(i) of this section shall thus apply to attribute stock from any entity without regard to the amount of stock it owns in the loss corporation or any other corporation,

(ii) Paragraphs (g)(2) and (3) of this section shall be modified with respect to the ownership interests so structured so that the ownership interest of a person includes all of an individual's direct and indirect ownership in the loss corporation, without regard to whether each such interest represents five percent or more of the stock of the loss corporation, and

(iii) Paragraph (g)(5)(i)(B) of this section shall not apply with respect to the ownership interests so structured so that the ownership interest of a person takes into account his actual ownership interest in the loss corporation.

This paragraph (k)(4) shall apply, however, only if application would result in an ownership change.

(5) *Example.*

L is owned by 25 individuals who each own four percent of the outstanding L stock. A purchases 40 percent of L stock from such shareholders on August 13, 1988. Thereafter, B plans to acquire 15 percent of the L stock. B is advised concerning the potential application of section 382 to L. On February 1, 1989, B acquires a 15 percent interest in L pursuant to a program in which each of four corporations, P_1 through P_4, each of which is wholly-owned by B, acquire a 3.75 percent interest in L. A principal purpose of acquiring the L stock through four corporations is to avoid treating B as owning any ownership interest in L amounting to as much as five percent, and thus to circumvent the section 382 limitation by avoiding an ownership change. Under paragraph (k)(4) of this section, the limitation on the constructive ownership rules of paragraph (h)(2)(iii) of this section are disregarded and B is treated as a 5-percent shareholder owning 15 percent of the stock of L by virtue of his ownership interests in P_1 through P_4, notwithstanding paragraph (g)(2) of this section. Accordingly, an ownership change occurs with respect to L.

(6) *First tier entity or higher tier entity that is a foreign corporation or entity.* [Reserved]

(l) *Changes in percentage ownership which are attributable to fluctuations in value.* [Reserved]

(m) *Effective date*—(1) *In general.* Except as provided in this paragraph (m), section 382 shall apply to any ownership change that occurs immediately after an owner shift or an equity structure shift that occurs after December 31, 1986, or any other event occurring after such date that requires the determination of whether an ownership change has occurred under paragraph (a)(2)(i) of this section. In the case of an equity structure shift (including an equity structure shift that also constitutes an owner shift), any equity structure shift completed pursuant to a plan of reorganization adopted before January 1, 1987, shall be treated as occurring on the date such plan was adopted. Therefore, section 382 shall apply to any ownership change occurring immediately after—

(i) An owner shift (excluding an owner shift that also constitutes an equity structure shift) that occurs on or after January 1, 1987,

(ii) An equity structure shift that occurs after December 31, 1986, if it is completed pursuant to a plan of reorganization adopted on or after January 1, 1987, or

(iii) Any transfer or issuance of an option, or other interest that is similar to an option, that occurs on or after January l, 1987 and that is taken into account under paragraph (a)(2)(i) of this section.

With respect to equity structure shifts completed pursuant to plans adopted before January 1, 1987, section 382 shall be inapplicable only if the equity structure shift that is treated as occurring on the date the plan of reorganization for such shift was adopted (or other event occurring after the adoption of such plan) results in an ownership change before January 1, 1987. In that event, a new testing period for the loss corporation shall begin on the day after such ownership change.

(2) *Plan of reorganization.* For purposes of paragraph (m)(1) of this section, a plan of reorganization shall be treated as adopted on the earlier of—

(i) The first date that the boards of directors of all the parties to the reorganization have adopted the plan or have recommended adoption to their shareholders, or

(ii) The date the shareholders approve such reorganization.

If there is an ownership change with respect to a subsidiary as the result of a reorganization of the parent, the treatment of the subsidiary under this paragraph (m)(2) shall be governed by the classification of the parent-level transaction. For purposes of the preceding sentence, a corporation shall be treated as a subsidiary of another corporation only if the other corporation owns stock in that corporation meeting the requirements of section 1504(a)(2).

(3) *Earliest commencement of the testing period.* For purposes of determining if an ownership change has occurred at any time after May 5, 1986, the testing period shall begin no earlier than May

6, 1986. Under paragraph (d)(4) of this section, therefore, shifts in the ownership of stock of the loss corporation prior to May 6, 1986 are disregarded.

(4) *Transitional rules*—(i) *Rules provided in paragraph (j) of this section for testing dates before September 4, 1987.* For purposes of determining whether an ownership change occurs for any testing date before September 4, 1987.

(A) The rules of paragraph (j)(1) of this section shall apply only to stock of the loss corporation acquired after May 5, 1986, by any first tier entity or higher tier entity and shall not apply to any stock acquired by such an entity on or before that date,

(B) The rules of paragraph (j)(2) of this section shall apply only to equity structure shifts in which more than one corporation is a party to the reorganization and shall not apply to any other transactions, and

(C) The rules of paragraph (j)(3) of this section shall apply only to—

(*1*) Dispositions of stock acquired by an individual, a first tier entity or higher tier entity after May 5, 1986 (and shall not apply to dispositions of stock acquired on or before such date), and

(*2*) Equity structure shifts in which more than one corporation is a party to the reorganization (and shall not apply to any other transactions).

For any testing date before September 4, 1987, however, the loss corporation is permitted to apply all of the rules of paragraph (j) of this section. A loss corporation that applies the rules of paragraph (j) of this section under the preceding sentence must apply all of the rules of such paragraph in determining whether any ownership change occurs on any testing dates after May 5, 1986.

(ii) *Example.*

(i) L is owned entirely by 10,000 unrelated individuals, none of whom owns as much as five percent of the stock of L (‘‘Public L’’). P is owned entirely by 1,000 unrelated individuals, none of whom owns as much as five percent of the stock of P (‘‘Public P’’).

(*ii*) Between March 1, 1987 and June 1, 1987, P acquires 45 percent of L stock in a series of transactions. On June 15, 1987, L redeems 20 percent of the L stock from Public L.

(*iii*) Under paragraph (m)(4)(i)(A) of this section, the rules of paragraph (j)(1) of this section apply to the acquisitions made by P, because they occurred after May 5, 1986. Accordingly, following those acquisitions, the stock of L is owned 45 percent by Public P and 55 percent by Public L. Because the increase in the percentage ownership by Public P as a result of P’s stock purchases is not more than 50 percent, no ownership change occurs as the result of P’s purchases.

(*iv*) On or after September 4, 1987, the rules of paragraph (j)(2)(iii)(C) of this section apply to treat any L stock that is redeemed as owned by a public group that is separate from the public group owning the stock that is not redeemed. (Under paragraph (j)(2)(iii)(C) of this section, the continuing shareholders of Public L, who owned 35 percent of the stock of L before the redemption ([55 percent—20 percent]/100 percent) increase their ownership interest in L by 8.8 percentage points as a result of such redemption (43.8 percent—35 percent)). Those rules, however, do not apply to the June 15, 1987 redemption because it occurs before the date that paragraph (j)(2)(iii) of this section generally is effective. (Until September 4, 1987, paragraph (j)(2)(iii) of this section generally is effective only for equity structure shifts in which more than one corporation is a party to the reorganization.) Solely because of the application of paragraph (j)(1) of this section to P’s acquisitions of L stock, Public P’s ownership interest in L as a result of the redemption has increased from 45 percentage points to 56.2 percentage points which, compared to its lowest percentage ownership interest at any time during the testing period (0 percent prior to March 1, 1987), is a more than 50 percentage point increase thus causing an ownership change with respect to L on June 15, 1987.

(iii) *Rules provided in paragraph (j) of this section for testing dates on or after September 4, 1987.* For purposes of determining whether an ownership change occurs for any testing date on or after September 4, 1987, the rules of paragraphs (j)(2) and (3) of this section shall not apply to identify any public group resulting from—

(A) Any transaction described in such paragraphs (j)(2) and (3), unless that transaction is also described in paragraph (m)(4)(i)(B) or (C) of this section, or

(B) Any disposition of stock acquired on or before May 5, 1986, but only if such disposition or other transaction occurs before September 4, 1987. Thus, for example, the rules of paragraph (j)(2)(iii)(D) of this section shall apply only to rights to acquire stock of the loss corporation issued on or after such date.

(iv) *Rules provided in paragraphs (f)(18)(ii) and (iii) of this section.* For purposes of determining whether an ownership change occurs for any testing date, the rules of paragraphs (f)(18)(ii) and (iii) of this section apply only to stock (or any other ownership interest) that is—

(A) Issued on or after September 4, 1987, or

(B) Transferred to (or by) a person who is a 5-percent shareholder (or would be a 5-percent shareholder if paragraph (f)(18)(iii) of this section were applicable) on or after September 4, 1987.

(v) *Rules provided in paragraph (a)(2)(ii) of this section.* The information statement required under paragraph (a)(2)(ii) of this section is not required to be filed with respect to any taxable year for which the due date (including extensions) of the income tax return of the loss corporation is on or before October 5, 1987.

(vi) *Rules provided in paragraph (h)(4) of this section.* The rules provided in paragraph (h)(4) of this section do not apply on any testing date on or after November 5, 1992. The rule provided in paragraph (h)(4)(viii) of this section applies to the lapse or forfeiture of any option treated as exercised under paragraph (h)(4)(i) of this section. If an option is treated as exercised under paragraph (h)(4)(i) of this section, and the option is actually exercised on a day that is within 120 days after the date on which the option is treated as exercised, the rule provided in paragraph (h)(4)(vi)(B) of this section applies (even if the actual exercise of the option occurs on a date on which the rules of paragraph (h)(4) of this section would not otherwise apply). Thus, in such a case, the loss corporation may elect to treat paragraphs (h)(4)(i) and (vi)(A) of this section as not applying to the option and take into account only the acquisition of loss corporation stock resulting from the actual exercise of the option.

(vii) *Rules provided in paragraph (a)(2)(i) of this section.* The rules provided in paragraph (a)(2)(i) of this section apply to determine whether dates prior to November 5, 1992, are testing dates. For rules regarding the determination of whether dates on or after November 5, 1992, are testing dates, see §1.382–2(a)(4).

(5) *Bankruptcy proceedings*—(i) *In general.* In the case of a reorganization described in section 368(a)(1)(G) or an exchange of debt for stock in a title 11 or similar case (within the meaning of section 368(a)(3)), section 382 shall not apply to any ownership change resulting from such a reorganization or proceeding if a petition in such case was filed with the court before August 14, 1986. Accordingly, any shift in ownership in the loss corporation arising out of such reorganization or proceeding shall not be taken into account for purposes of determining whether an ownership change occurs on any testing date that occurs after December 31, 1986.

(ii) *Example.*

(i) L filed a petition in bankruptcy on September 29, 1985. As a result of a title 11 bankruptcy reorganization of L that is confirmed by a court on February 2, 1988, there is a shift in the ownership of L so that JK increased her interest in L by 24 percentage points relative to her lowest ownership interest in L during the testing period. JK is the only 5-percent shareholder of L following the reorganization whose interest in L increased as a result of the transaction. On December 25, 1988, GK purchases 42 percent of the outstanding stock of L from shareholders other than JK.

(*ii*) There is no ownership change on December 25, 1988 because the 24 percentage point increase in JK's ownership interest in L is not taken into account under paragraph (m)(6)(i) of this section.

(*iii*) The facts are the same as in (*i*), except that the acquisitions by JK and GK occurred on August 5, 1986 and September 26, 1986, respectively. Because paragraph (m)(6)(i) of this section is only applicable with respect to the determination of whether an ownership change has occurred on any testing date that occurs after December 31, 1986, there is an ownership change as a result of GK's acquisition on September 26, 1986. Accordingly, section 382 is inapplicable to such ownership change under paragraph (m)(1) of this section because it occurred prior to January 1, 1987. Under paragraph (d)(2) of this section, the testing period for determining whether an ownership change occurs on any subsequent testing date shall commence no earlier than September 27, 1986.

(6) *Transactions of domestic building and loan associations.* The rules of paragraph (j)(2)(iii)(B) of this section (and the application of those rules by virtue of paragraph (j)(3) of this section) shall not apply to a public offering of stock

by a domestic building and loan association described in section 591 (or any corporation that owns stock in the association meeting the requirements of section 1504(a)(2)) prior to January 1, 1989. In the case of any transaction described in the preceding sentence, any transitory ownership of stock by any entity that is an underwriter shall be disregarded so that the rules of paragraph (j)(1) of this section shall not apply to treat such stock as owned by the owners of the underwriter and thus the rules of paragraph (j)(3)(i) of this section shall not apply to the disposition of such stock by the underwriter. For purposes of this paragraph (m)(7)—

(i) Ownership shall be considered transitory only with respect to an underwriter acquiring stock in a firm commitment underwriting to the extent the stock is disposed of pursuant to the offer (but in no event later than sixty (60) days after the initial offering) and,

(ii) To the extent a transaction may be described both by paragraph (j)(2)(iii)(B) of this section and any other provision of paragraph (j)(2)(iii) or (3) of this section, paragraph (j)(2)(v)(A) of this section shall not apply and the transaction shall be treated as described solely by paragraph (j)(2)(iii)(B) of this section.

(7) *Transactions not subject to section 382*—(i) *Application of old section 382.* Old section 382 shall not apply to a loss corporation on or after the date on which an ownership change occurs, but only if such ownership change results in the application of the section 382 limitation (as defined in section 382(b)) with respect to the loss corporation.

(ii) *Effect on testing period.* The application of old section 382 to a transaction is disregarded for purposes of paragraph (d)(2) of this section unless the transaction that results in such application is the last component of an ownership change after May 5, 1986 that is not subject to section 382 under the effective date rules of this paragraph (m) (*e.g.*, an ownership change occurring as the result of an individual's purchase of more than 50 percent of L stock on any date on or before December 31, 1986).

(iii) *Termination of old section 382.* [Reserved]

(8) *Options issued or transferred before January 1, 1987*—(i) *Options issued before May 6, 1986.* An option issued before May 6, 1986, is subject to the rules of paragraph (h)(4) of this section only if it is transferred by (or to) a 5-percent shareholder (or a person who would be a 5-percent shareholder if the option were treated as exercised) on or after such date. In all other cases, such an option shall not be subject to paragraph (h)(4)(i) of this section, but shall be subject to paragraph (h)(4)(xii) of this section. Thus, for example, a warrant to acquire stock of the loss corporation issued before May 6, 1986 shall not be subject to paragraph (h)(4) of this section unless the warrant is transferred by (or to) a 5-percent shareholder. The exercise of such a warrant, however, would be taken into account as required by this paragraph (m)(8)(i) and paragraph (h)(4)(xii) of this section.

(ii) *Options issued on or after May 6, 1986 and before September 18, 1986.* An option issued or transferred on or after May 6, 1986, and before September 18, 1986, is subject to the rules of paragraph (h)(4) of this section.

(iii) *Options issued on or after September 18, 1986 and before January 1, 1987.* An option issued or transferred on or after September 18, 1986, and before January 1, 1987, is subject to the rules of paragraph (h)(4) of this section, except that the option shall be treated for purposes of this section as if it never had been issued in the event that either—

(A) The option lapses unexercised or is irrevocably forfeited by the holder thereof, or

(B) On the date the option was issued, there was no significant likelihood that such option would be exercised within the five-year period from the date of such issuance and a purpose for the issuance of the option was to cause an ownership change prior to January 1, 1987.

(9) *Examples.* The rules of this paragraph (m) may be illustrated by the following examples.

Example (1) (i) A owns all 100 outstanding shares of L stock. A sells 11 shares to B on January 1, 1986. The January 1, 1986 testing date is disregarded under paragraph (m)(3) of this section. A sells another 40 shares to B on

January 1, 1988. B's second stock purchase is an owner shift that does not result in an ownership change. B's percentage ownership interest on the testing date (51 percent) is only 40 percentage points greater than the lowest percentage of L stock owned by B at any time during the testing period (11 percent on and after May 6, 1986).

(ii) The facts are the same as in (i). In addition A sells 20 shares of his L stock to C on July 1, 1990. C's stock purchase is an owner shift. Because B and C together have increased their respective ownership interests in L by 40 and 20 percentage points relative to their lowest percentage stock ownership interests in L at any time during the testing period, C's purchase causes an ownership change. The testing period for any subsequent ownership change begins on the first day following C's acquisition, July 2, 1990.

Example (2) (i) C has owned 100 percent of L since March 22, 1980. On October 13, 1986, P merges into L. As a result of the merger, 40 percent of L stock is acquired by A, the sole shareholder of P. The merger of P into L is both an equity structure shift and an owner shift. The transaction, however, is not an ownership change with respect to L, because A's percentage ownership interest has increased by only 40 percentage points. On August 22, 1987, B purchases 15 percent of the L stock from C. B's purchase constitutes an owner shift resulting in an ownership change that is subject to section 382 because the aggregate increases in percentage ownership by B and C (respectively 40 percent and 15 percent) is more than 50 percentage points.

(ii) The facts are the same as in (i), except that the plan of reorganization is adopted on October 13, 1986, and the merger is completed on July 22, 1987. The result is the same as in (i).

(iii) The facts are the same as in (ii), except that the reorganization is completed on August 22, 1987, and B's purchase of the L stock occurs one month earlier, on July 22, 1987. Assume that after the reorganization on August 22, 1987, A and B own 40 percent and 15 percent, respectively, of L stock. Although the merger occurred pursuant to a plan of reorganization adopted before 1987, L is subject to section 382 following the equity structure shift, because the merger would not have caused an ownership change if it had been completed in 1986 after the commencement of the L's testing period.

(iv) The facts are the same as in (ii), except that B's purchase occurs on June 7, 1986. Assume that immediately after the reorganization on August 22, 1987, A and B own 40 percent and 15 percent, respectively, of L stock. Since the reorganization pursuant to a plan adopted before 1987, taken together with the other shifts in the ownership of L's stock between May 5, 1986, and December 31, 1986, would have caused an ownership change, section 382 does not apply as a result of the merger. Since an ownership change occurs as a result of the merger, L's testing period for purposes of any subsequent ownership change begins on October 14, 1986.

(v) The facts are the same as in (iv), except that B makes an additional purchase from C of one percent of L's stock on February 14, 1987. The result is the same as in (iv). B's additional purchase, however, is taken into account for the purpose of determining whether there is a second ownership change with respect to L.

[T.D. 8149, 52 FR 29675, Aug. 11, 1987, as amended by T.D. 8264, 54 FR 38666, Sept. 20, 1989; T.D. 8277, 54 FR 52936, Dec. 26, 1989; T.D. 8352, 56 FR 29434, June 27, 1991; T.D. 8405, 57 FR 10741, Mar. 30, 1992; T.D. 8407, 57 FR 12210, Apr. 9, 1992; T.D. 8428, 57 FR 38282, Aug. 24, 1992; T.D. 8440, 57 FR 45712, Oct. 5, 1992; 57 FR 52827, Nov. 5, 1992; T.D. 8490, 59 FR 51573, Oct. 4, 1993; T.D. 8531, 59 FR 12837, Mar. 18, 1994; T.D. 8679, 61 FR 33315, June 27, 1996]

§1.382–3 Definitions and rules relating to a 5-percent shareholder.

(a) *Definitions*—(1) *Entity*—(i) *In general.* An entity is any corporation, estate, trust, association, company, partnership or similar organization. An entity includes a group of persons who have a formal or informal understanding among themselves to make a coordinated acquisition of stock. A principal element in determining if such an understanding exists is whether the investment decision of each member of a group is based upon the investment decision of one or more other members. However, the participation by creditors in formulating a plan for an insolvency workout or a reorganization in a title 11 or similar case (whether as members of a creditors' committee or otherwise) and the receipt of stock by creditors in satisfaction of indebtedness pursuant to the workout or reorganization do not cause the creditors to be considered an entity.

(ii) *Examples.* The following examples illustrate the provisions of paragraph (a)(1)(i) of this section.

Example 1. (i) L corporation has 1,000 shares of common stock outstanding. For the three-year period ending on October 1, 1992, L's stock was owned by unrelated individuals, none of whom owned five percent or more of L. A group of 20 individuals who previously owned no stock (the ''Group'') agree among themselves to acquire more than 5 percent of L's stock. The Group is not a corporation, trust, association, partnership or company.

On October 1, 1992, pursuant to their understanding, the members of the Group purchase 600 shares of L common stock from the old shareholders of L (a total of 60 percent of L stock), with each member purchasing 30 shares.

(ii) Before the members of the Group acquired L's stock on October 1, 1992, no individual or entity owned, directly or indirectly, five percent or more of the stock of L. As a result, all shareholders were aggregated into a public group and L was considered to be owned by a single 5-percent shareholder (''Public L'') in accordance with § 1.382–2T (g)(1) and (j)(1).

(iii) Under paragraph (a)(1)(i) of this section, the members of the Group have a formal or informal understanding among themselves to make a coordinated acquisition of stock and, therefore, the Group is an entity. Thus, the acquisition of more than five percent of the stock of L on October 1, 1992, by members of the Group is not disregarded under § 1.382–2T(e)(1)(ii). Because no member of the Group owns, directly or indirectly, five percent or more of the stock of L, §§ 1.382–2T (g)(1) and (j)(1) require that the members of the Group be aggregated into a separate public group, which will be presumed to consist of persons unrelated to the members of Public L. Because there is a shift of more than fifty percentage points in the ownership of L stock during the three-year testing period ending on October 1, 1992, an ownership change occurs on October 1, 1992, as a result of the Group's purchase of the 600 shares.

Example 2. (i) Prior to October 1, 1992, L's 1,000 shares of outstanding stock were owned by unrelated individuals, none of whom owned five percent or more of the stock of L. L's management is concerned that L may become subject to a takeover bid. In separate meetings, L's management meets with potential investors who own no stock and are friendly to management to convince them to acquire L's stock based on an understanding that L will assemble a group that in the aggregate will acquire more than 50 percent of L's stock. On October 1, 1992, 15 of these investors each purchase 4 percent of L's stock.

(ii) Under paragraph (a)(1)(i) of this section, the 15 investors (the ''Group'') are treated as an entity because the members of the Group purchase L stock pursuant to a formal or informal understanding among themselves to make a coordinated acquisition of stock. Sections 1.382–2T (g)(1) and (j)(1) require that on October 1, 1992, the Group be aggregated into a separate public group, which has increased its ownership of L stock by 60 percentage points over its lowest level of ownership in the three-year period ending on October 1, 1992. Accordingly, an ownership change occurs on that date.

Example 3. (i) Prior to October 1, 1992, L's 1,000 shares of outstanding stock were owned by unrelated individuals, none of whom owned five percent or more of the stock of L. On October 1, 1992, an investment advisor advises its clients that it believes L's stock is undervalued and recommends that they acquire L stock. Acting on the investment advisor's recommendation, 20 unrelated individuals purchase 6 percent of L's stock in aggregate, with each individual purchasing less than 5 percent. Each client's decision was not based upon the investment decisions made by one or more other clients.

(ii) Because there is no formal or informal understanding among the clients to make a coordinated acquisition of L stock, their purchase of stock is not made by an entity under paragraph (a)(1)(i) of this section. As a result, they remain part of the public group which owns L stock, and no owner shift results upon their purchase of L stock under § 1.382–2T(e)(1)(ii).

(iii) The result in this example would be the same under paragraph (a)(3)(i) of this section if the only additional fact was that the investment advisor is also the underwriter (without regard to whether it is a firm commitment or best efforts underwriting) for a primary or secondary offering of L stock.

(iv) Assume that the facts are the same except that, instead of an investment advisor recommending that clients purchase L stock, the trustee of several trusts qualified under section 401(a) sponsored by unrelated corporations causes each trust to purchase the L stock. In this case, the result is the same, so long as the investment decision made on behalf of each trust was not based on the investment decision made on behalf of one or more of the other trusts.

(iii) *Effective date.* (A) *In general.* The second, third and fourth sentences of paragraph (a)(1)(i) of this section and *Examples 1, 2* and *3* of paragraph (a)(1)(ii) of this section apply to testing dates (determined by applying such sentence and examples) on or after November 20, 1990, but with respect to any group of persons that pursuant to a formal or informal understanding among themselves makes a coordinated acquisition of stock before November 20, 1990, only if the group increases or decreases its ownership of stock of the loss corporation relative to its percentage ownership interest at the close of November 19, 1990, by five percentage points or more on or after November 20, 1990.

(B) *Special rule.* If pursuant to a formal or informal understanding among themselves a group consisting only of regulated investment companies under section 851, qualified trusts under section 401, common trust funds under section 584, or trusts or estates that are clients of a trust department of a bank under section 581, make a coordinated acquisition of stock before November 20, 1990, the second, third and fourth sentences of paragraph (a)(1)(i) of this section and *Examples 1, 2,* and *3* of paragraph (a)(1)(ii) of this section apply for testing dates (determined by applying such sentences and examples) on or after November 20, 1990, only if the group increases its ownership of stock of the loss corporation relative to its percentage ownership interest at the close of November 19, 1990, by five percentage points or more on or after November 20, 1990.

(C) *Example.* The following example illustrates the provisions of paragraph (a)(1)(iii) of this section.

Example. Prior to November 1, 1990, L, a loss, corporation, is owned entirely by 1,000 unrelated individuals, none of whom owns as much as 5 percent of the stock of L (''Public L''). On November 1, 1990, 15 individuals (the ''Group'') each acquired 3 percent, or 45 percent, in total, of L stock pursuant to an understanding among themselves to make a coordinated acquisition of stock. The Group is not a corporation, trust, association, partnership or company. On March 1, 1992, six members of the Group each purchased an additional one percent of L stock, or 6 percent, in total, pursuant to the understanding. Accordingly, the Group increased its ownership in L stock by 51 percentage points during the three-year testing period ending on March 1, 1992. As a result, an ownership change of L occurs on March 1, 1992.

(2) [Reserved]

(b)—(i) [Reserved]

(j) *Modification of the segregation rules of §1.382–2T(j)(2)(iii) in the case of certain issuances of stock*—(1) *Introduction.* This paragraph (j) exempts, in whole or in part, certain issuances of stock by a loss corporation from the segregation rules of §1.382–2T(j)(2)(iii)(B). Terms and nomenclature used in this paragraph (j), and not otherwise defined herein, have the same meanings as in section 382 and the regulations thereunder.

(2) *Small issuance exception*—(i) *In general.* Section 1.382–2T(j)(2)(iii)(B) does not apply to a small issuance (as defined in paragraph (j)(2)(ii) of this section), except to the extent that the total amount of stock issued in that issuance and all other small issuances previously made in the same taxable year (determined in each case on issuance) exceeds the small issuance limitation. This paragraph (j)(2) does not apply to an issuance of stock that, by itself, exceeds the small issuance limitation.

(ii) *Small issuance defined.* ''Small issuance'' means an issuance (other than an issuance described in paragraph (j)(6) of this section) by the loss corporation of an amount of stock not exceeding the small issuance limitation. For purposes of this paragraph (j)(2)(ii), all stock issued in the issuance is taken into account, including stock owned immediately after the issuance by a 5-percent shareholder that is not a direct public group.

(iii) *Small issuance limitation*—(A) *In general.* For each taxable year, the loss corporation may, at its option, apply this paragraph (j)(2)—

(*1*) On a corporation-wide basis, in which case the small issuance limitation is 10 percent of the total value of the loss corporation's stock outstanding at the beginning of the taxable year (excluding the value of stock described in section 1504(a)(4)); or

(*2*) On a class-by-class basis, in which case the small issuance limitation is 10 percent of the number of shares of the class outstanding at the beginning of the taxable year.

(B) *Class of stock defined.* For purposes of this paragraph (j)(2)(iii), a class of stock includes all stock with the same material terms.

(C) *Adjustments for stock splits and similar transactions.* Appropriate adjustments to the number of shares of a class outstanding at the beginning of a taxable year must be made to take into account any stock split, reverse stock split, stock dividend to which section 305(a) applies, recapitalization, or similar transaction occurring during the taxable year.

(D) *Exception.* The loss corporation may not apply this paragraph (j)(2)(iii) on a class-by-class basis if, during the taxable year, more than one class of stock is issued in a single issuance (or in two or more issuances that are treated as a single issuance under paragraph (j)(8)(ii) of this section).

(iv) *Short taxable years.* In the case of a taxable year that is less than 365 days, the small issuance limitation is reduced by multiplying it by a fraction, the numerator of which is the number of days in the taxable year, and the denominator of which is 365.

(3) *Other issuances of stock for cash*—(i) *In general.* If the loss corporation issues stock solely for cash, § 1.382–2T(j)(2)(iii)(B) does not apply to such stock in an amount equal (as a percentage of the total stock issued) to one-half of the aggregate percentage ownership interest of direct public groups immediately before the issuance.

(ii) *Solely for cash*—(A) *In general.* A share of stock is not issued solely for cash if—

(*1*) The acquiror, as a condition of acquiring that share for cash, is required to purchase other stock for consideration other than cash; or

(*2*) The share is acquired upon the exercise of an option that was not issued solely for cash or was not distributed with respect to stock.

(B) *Related issuances.* Paragraph (j)(8)(i) of this section (relating to the treatment of one or more issuances as a single issuance) does not apply in determining whether stock is issued solely for cash.

(iii) *Coordination with paragraph (j)(2) of this section.* This paragraph (j)(3) does not apply to a small issuance exempted in whole from § 1.382–2T(j)(2)(iii)(B) under paragraph (j)(2) of this section. In the case of a small issuance exempted in part from § 1.382–2T(j)(2)(iii)(B) under paragraph (j)(2) of this section, this paragraph (j)(3) applies only to the portion of the issuance not so exempted, and that portion is treated as a separate issuance for purposes of this paragraph (j)(3).

(4) *Limitation on exempted stock.* The total amount of stock that is exempted from the application of § 1.382–2T(j)(2)(iii)(B) under paragraphs (j)(2) and (j)(3) of this section cannot exceed the total amount of stock issued in the issuance less the amount of that stock owned by a 5-percent shareholder (other than a direct public group) immediately after the issuance. Except to the extent that the loss corporation has actual knowledge to the contrary, any increase in the amount of the loss corporation's stock owned by a 5-percent shareholder on the day of the issuance is considered to be attributable to an acquisition of stock in the issuance.

(5) *Proportionate acquisition of exempted stock*—(i) *In general.* Each direct public group that exists immediately before an issuance to which paragraph (j)(2) or (j)(3) of this section applies is treated as acquiring its proportionate share of the amount of stock exempted from the application of § 1.382–2T(j)(2)(iii)(B) under paragraph (j)(2) or (j)(3) of this section.

(ii) *Actual knowledge of greater overlapping ownership.* Under the last sentence of § 1.382–2T(k)(2), the loss corporation may treat direct public groups existing immediately before an issuance to which paragraph (j)(2) or (j)(3) of this section applies as acquiring in the aggregate more stock than the amount determined under paragraph (j)(5)(i) of this section, but only if the loss corporation actually knows that the aggregate amount acquired by those groups in the issuance exceeds the amount so determined.

(6) *Exception for equity structure shifts.* This paragraph (j) does not apply to any issuance of stock in an equity structure shift, except that paragraph (j)(2) of this section applies (if its requirements are met) to the issuance of stock in a recapitalization under section 368(a)(1)(E).

(7) *Transitory ownership by underwriter disregarded.* For purposes of § 1.382–2T(g)(1) and (j), and this paragraph (j), the transitory ownership of stock by an underwriter of the issuance is disregarded.

(8) *Certain related issuances.* For purposes of this paragraph (j), two or more issuances (including issuances of stock by first tier or higher tier entities) are treated as a single issuance if—

(i) The issuances occur at approximately the same time pursuant to the same plan or arrangement; or

(ii) A principal purpose of issuing the stock in separate issuances rather than in a single issuance is to minimize or avoid an owner shift under the rules of this paragraph (j).

(9) *Application to options.* The principles of this paragraph (j) apply for purposes of applying § 1.382–

2T(j)(2)(iii)(D) (relating to the deemed acquisition of stock as a result of the ownership of an option).

(10) *Issuance of stock pursuant to the exercise of certain options.* If stock is issued on the exercise of a transferable option issued by the loss corporation, §1.382–2T(j)(2)(iii)(F) does not apply and, in applying the last sentence of §1.382–2T(k)(2), the loss corporation must take into account any transfers of the option (including transfers described in §1.382–2T(h)(4)(xi)). Therefore, even if transferable options are distributed pro rata to members of existing public groups, the actual knowledge exception of §1.382–2T(k)(2) applies only to the extent that the loss corporation actually knows that the persons acquiring stock on exercise of the options are members of a pre-existing public group. Moreover, if transferable options are issued to more than one public group, §1.382–2T(j)(2)(iii)(F) does not apply to treat the options as exercised pro rata by each such public group as the options are actually exercised.

(11) *Application to first tier and higher tier entities.* The principles of this paragraph (j) apply to issuances of stock by a first tier entity or a higher tier entity that owns 5 percent or more of the loss corporation's stock (determined without regard to §1.382–2T(h)(2)(i)(A)).

(12) *Certain non-stock ownership interests.* As the context may require, a non-stock ownership interest in an entity other than a corporation is treated as stock for purposes of this paragraph (j).

(13) *Examples.* The provisions of this paragraph (j) are illustrated by the following examples:

Example 1. (i) L corporation is a calendar year taxpayer. On January 1, 1994, L has 1,000 shares of a single class of common stock outstanding, all of which are owned by a single direct public group (Public L). On February 1, 1994, L issues to employees as compensation 60 new common shares of the same class. On May 1, 1994, L issues 50 new common shares of the same class solely for cash. Following each issuance, L's stock is owned entirely by public shareholders. No other changes in the ownership of L's stock occur prior to May 1, 1994. L chooses to determine its small issuance limitation for 1994 on a class-by-class basis under paragraph (j)(2)(iii)(A)(*2*) of this section.

(ii) The February issuance is a small issuance because the number of shares issued (60) does not exceed 100, the small issuance limitation (10 percent of the number of common shares outstanding on January 1, 1994). Under paragraph (j)(2) of this section, the segregation rules of §1.382–2T(j)(2)(iii)(B) do not apply to the February issuance. Under paragraph (j)(5) of this section, Public L is treated as acquiring all 60 shares issued.

(iii) The May issuance is a small issuance because the number of shares issued (50) does not exceed 100, the small issuance limitation (10 percent of the number of common shares outstanding on January 1, 1994). However, under paragraph (j)(2) of this section, only 40 of the 50 shares issued are exempted from the segregation rules of §1.382–2T(j)(2)(iii)(B) because the total number of shares of common stock issued in the February and May issuances exceeds 100, the small issuance limitation, by 10. Because the May issuance is solely for cash, paragraph (j)(3) of this section exempts 5 of the 10 remaining shares from the segregation rules of §1.382–2T(j)(2)(iii)(B) (10 shares multiplied by 50 percent, one-half of Public L's 100 percent ownership interest immediately before the May issuance—1,060 shares/1,060 shares). Accordingly, under paragraph (j)(5) of this section, Public L is treated as acquiring 45 shares in the May issuance. Section 1.382–2T(j)(2)(iii)(B) applies to the remaining 5 shares issued, which are treated as acquired by a direct public group separate from Public L. Each such public group is treated as an individual who is a separate 5-percent shareholder. See §1.382–2T (g)(1)(iv) and (j)(1)(ii).

(iv) Assume that L actually knows that at least 10 shares of the May issuance are acquired by members of Public L. The result is the same. See paragraph (j)(5)(ii) of this section.

(v) Assume instead that L actually knows that all 50 shares of the May issuance are acquired by members of Public L. Under paragraph (j)(5)(ii) of this section, L may treat Public L as acquiring 50 shares in the May issuance.

Example 2. (i) L corporation is a calendar year taxpayer. On January 1, 1995, L has 1,000 shares of Class A common stock outstanding, the aggregate value of which is $1,000. Five hundred shares are owned by one direct public group (Public 1), and 500 shares are owned by another direct public group (Public 2). On August 1, 1995, L issues 200 shares of Class B common stock for $200 cash. A, an individual, acquires 120 Class B shares in the transaction. The remaining 80 Class B shares are acquired by public shareholders. No other changes in ownership of L's stock occur prior to August 1, 1995.

(ii) The August issuance is not a small issuance. The total value of the Class B stock issued ($200) exceeds $100, the small issuance limitation as calculated under paragraph (j)(2)(iii)(A)(*1*) of this section (10 percent of the value of L's stock on January 1, 1995). The total number of Class B shares issued (200) exceeds 0, the small issuance limitation as calculated under paragraph (j)(2)(iii)(A)(*2*) of this section (10 percent of the number of Class B shares outstanding on January 1, 1995). Accordingly, paragraph (j)(2) of this section does not apply to the August issuance.

(iii) Paragraph (j)(3) of this section, as limited by paragraph (j)(4) of this section, exempts 80 Class B shares from the segregation rule of § 1.382–2T(j)(2)(iii)(B). Paragraph (j)(3) of this section, without regard to paragraph (j)(4) of this section, would exempt 100 Class B shares: the product of the 200 Class B shares issued and 50 percent (one-half of the combined 100 percent pre-issuance ownership interest of Public 1 and Public 2). Paragraph (j)(4), however, limits the total number of Class B shares that may be excluded to 80 Class B shares: the difference between the 200 shares issued and the 120 shares acquired by A. Under paragraph (j)(5) of this section, Public 1 and Public 2 are treated as acquiring the 80 exempted Class B shares. Because Public 1 and Public 2 each owned 500 Class A shares prior to the issuance, Public 1 and Public 2 are considered to acquire 40 Class B shares each.

Example 3. (i) L has 1,000 shares of a single class of common stock outstanding, all of which are owned by a direct public group (Public L). At the same time pursuant to the same plan, L issues 500 shares of its stock to its creditors in exchange for its outstanding debt and 500 shares of its stock to the public for cash. Assume that the separate issuances of stock for debt and stock for cash do not have a principal purpose of minimizing or avoiding an owner shift. L has no individual 5-percent shareholders immediately after the issuances.

(ii) The 500 shares of stock issued by L to its former creditors were not issued solely for cash. Therefore, paragraph (j)(3) of this section does not apply to those 500 shares, which are treated as owned by a public group separate from Public L. See § 1.382–2T(j)(2)(iii)(B)(*1*)(*ii*).

(iii) Paragraph (j)(3) of this section applies to the 500 shares of stock issued by L to the public because that stock was issued solely for cash. Because the two issuances occur at the same time pursuant to the same plan, they are generally treated as a single issuance for purposes of this paragraph (j). See paragraph (j)(8)(i) of this section. The treatment of the two issuances as a single issuance does not apply, however, for the purpose of determining whether the stock issued to the public was issued solely for cash. See paragraph (j)(3)(ii)(B) of this section.

(iv) Paragraph (j)(3) of this section applies to exempt 250 of the 500 shares issued solely for cash from the segregation rules of § 1.382–2T(j)(2)(iii)(B) (the product of the 500 shares issued for cash and 50 percent (one-half of the 100 percent pre-issuance ownership interest of Public L)). The creditors that receive stock in exchange for their debt would not be treated as acquiring any of the 250 exempted shares even if their exchange of debt for stock occurs prior to the cash issuance. Paragraph (j)(5)(i) of this section allocates exempted shares among the direct public groups that exist immediately before an issuance. Because the issuance for cash and the issuance for debt are generally treated as a single issuance, the public group comprised of the former creditors of L was not a public group that existed immediately before the issuance.

(v) Three public groups owning L stock exist immediately after the two issuances. Public L owns 1,250 shares—the 1,000 shares it owned prior to the issuances plus the 250 shares it is treated as acquiring in the cash issuance. A separate group comprised of the former creditors of L owns the 500 shares issued for debt. A third public group owns the 250 shares that are not treated as acquired by Public L in the cash issuance.

Example 4. (i) L has 1,000 shares of a single class of common stock outstanding, all of which are owned by a direct public group (Public L). L issues 1,000 shares pursuant to an offer under which 500 shares must be acquired in exchange for debt and the remainder may be acquired for cash. Under the terms of the offer, only persons that acquire stock for debt are eligible to acquire stock for cash. L has no 5-percent shareholders other than direct public groups immediately after the issuance.

(ii) As a condition of acquiring shares for cash, the creditors are required to purchase stock for debt. Therefore, paragraph (j)(3) of this section does not apply to any part of the issuance because it is not an issuance of stock solely for cash. The segregation rules of § 1.382–2T(j)(2)(iii)(B) apply to treat all 1,000 shares as acquired by a new public group separate from Public L.

(14) *Effective date*—(i) *In general.* Except as otherwise provided in this paragraph (j)(14), this paragraph (j) applies to issuances or deemed issuances of stock in taxable years beginning on or after November 4, 1992.

(ii) *Effective date for paragraph (j)(10) of this section.* Paragraph (j)(10) of this section applies to stock issued on the exercise of an option issued on or after November 4, 1992, unless the option was issued before May 4, 1993, and the issuer, on or before November 4, 1992, filed a registration statement with the Securities and Exchange Commission (or a comparable document with a

State agency regulating securities) for the specific purpose of such issuance.

(iii) *Election to apply this paragraph (j) retroactively*—(A) *Election.* A loss corporation may elect to apply paragraphs (j)(1) through (j)(13) of this section to all issuances or deemed issuances of stock to which §1.382–2T(j)(2)(iii)(B) or (D) applied (or would have applied taking paragraph (j)(7) of this section into account) occurring in taxable years beginning prior to November 4, 1992. This election is made by filing with the loss corporation's first income tax return filed more than 60 days after October 4, 1993, the statement, ''This is an Election to Apply §1.382–3(j) Retroactively,'' accompanied by the amended returns and revised information statements described in paragraphs (j)(14)(iii)(B) and (C) of this section. An election under this paragraph (j)(14)(iii) is irrevocable.

(B) *Amended returns.* If the retroactive application of the rules of this paragraph (j) affects the amount of taxable income or loss for a prior taxable year, then, except as precluded by the applicable statute of limitations, the loss corporation (or the common parent of any consolidated group of which the loss corporation was a member for the year) must file an amended return for the year that reflects the effects of the retroactive application of the rules of this paragraph (j). If the statute of limitations precludes the filing of an amended return for one or more such prior taxable years, the loss corporation (or the common parent) must make appropriate adjustments under the principles of section 382(l)(2)(A) in subsequent taxable years to reflect the difference between the losses and credits actually used in such prior taxable years and the amount that would have been used in those years applying the rules of this paragraph (j).

(C) *Revised information statements.* If the retroactive application of the rules of this paragraph (j) affects the information reported on an information statement filed for any prior taxable year pursuant to §1.382–2T(a)(2)(ii), then the loss corporation (or the common parent of any consolidated group of which the loss corporation was a member for the year) must file a revised information statement for the year that reflects the retroactive application of the rules of this paragraph (j).

(k) *Special rules for certain regulated investment companies*—(1) *In general.* The segregation rules of §1.382–2T(j)(2) do not apply to the issuance (as described in §1.382–2T(j)(2)(iii)(B)(1)(*ii*)) or the redemption (as described in §1.382–2T(j)(2)(iii)(C)) of any redeemable security, as defined in 15 U.S.C. 80a–2(a)(32), by a regulated investment company in the ordinary course of business.

(2) *Effective date*—(i) *General rule.* Paragraph (k)(1) of this section applies to testing dates after December 31, 1986. A corporation may file an amended return for taxable years ending before August 21, 1992 (subject to any applicable statute of limitations) to take into account paragraph (k)(1) of this section only if corresponding adjustments are made in amended returns for all affected taxable years ending after December 31, 1986 (subject to any applicable statute of limitations).

(ii) *Election to apply prospectively.* A corporation may elect to apply paragraph (k)(1) of this section only to testing dates on or after October 29, 1991. The election must be made on the first return which is filed after October 20, 1992 by stating on such return, ''This is an Election To Apply §1.382–3(k)(1) Only to Testing Dates on or After October 29, 1991.''

[T.D. 8428, 57 FR 38282, Aug. 24, 1992. Redesignated by T.D. 8440, 57 FR 45712, Oct. 5, 1992; 57 FR 52827, Nov. 5, 1992; T.D. 8490, 59 FR 51573, Oct. 4, 1993]

§1.382–4 Constructive ownership of stock.

(a) *In general.* [Reserved]

(b) *Attribution from corporations, partnerships, estates and trusts.* [Reserved]

(c) *Attribution to corporations, partnerships, estates and trusts.* [Reserved]

(d) *Treatment of options as exercised*—(1) *General rule.* Except as provided in paragraph (d)(2) of this section, an option is not treated as exercised under section 382(l)(3)(A).

(2) *Options treated as exercised*—(i) *Issuance or transfer.* For purposes of determining whether an ownership change occurs, an option is treated as exercised on the date of its issuance or transfer if, on that date, the option satisfies—

(A) The ownership test of paragraph (d)(3) of this section,

(B) The control test of paragraph (d)(4) of this section, or

(C) The income test of paragraph (d)(5) of this section.

(ii) *Subsequent testing dates.* Except as provided in paragraph (d)(10) of this section, an option that is treated as exercised on the date of its issuance or transfer is treated as exercised on any subsequent testing date (as defined in § 1.382–2(a)(4)) for purposes of determining whether an ownership change occurs.

(3) *The ownership test.* An option satisfies the ownership test if a principal purpose of the issuance, transfer, or structuring of the option (alone or in combination with other arrangements) is to avoid or ameliorate the impact of an ownership change of the loss corporation by providing the holder of the option, prior to its exercise or transfer, with a substantial portion of the attributes of ownership of the underlying stock.

(4) *The control test*—(i) *In general.* An option satisfies the control test if—

(A) A principal purpose of the issuance, transfer, or structuring of the option (alone or in combination with other arrangements) is to avoid or ameliorate the impact of an ownership change of the loss corporation, and

(B) The holder of the option and any persons related to the option holder have, in the aggregate, a direct and indirect ownership interest in the loss corporation of more than 50 percent (determined as if the increase in such persons' percentage ownership interest that would result from the exercise of the option in question and any other options to acquire stock held by such persons, and any other intended increases in such persons' percentage ownership interest, actually occurred on the date the option is issued or transferred).

(ii) *Operating rules*—(A) *Person and related persons.* For purposes of this paragraph (d)(4)—

(*1*) The term *person* includes an individual or entity, but not a public group, as defined in § 1.382–2T(f)(13), and

(*2*) Persons are related if they bear a relationship specified in section 267(b) or 707(b) or if they have a formal or informal understanding among themselves to make a coordinated acquisition of stock, within the meaning of § 1.382–3(a)(1)(i).

(B) *Indirect ownership interest.* The indirect ownership interest that the holder of the option and any persons related to the holder have in the loss corporation is determined by applying the constructive ownership rules of § 1.382–2T(h), other than § 1.382–2T(h)(2)(i)(A) (which treats stock attributed pursuant to section 318(a)(2) as no longer being owned by the entity from which it is attributed) and § 1.382–2T(h)(4) (which treats options as exercised in certain circumstances). If, however, the application of such constructive ownership rules without regard to § 1.382–2T(h)(2)(i)(A) would result in the same stock of the loss corporation being owned by two or more such persons, appropriate adjustments must be made so that such stock is not counted more than once in computing the aggregate ownership interests of such persons.

(5) *The income test.* An option satisfies the income test if a principal purpose of the issuance, transfer, or structuring of the option (alone or in combination with other arrangements) is to avoid or ameliorate the impact of an ownership change of the loss corporation by facilitating the creation of income (including accelerating income or deferring deductions) or value (including unrealized built-in gains) prior to the exercise or transfer of the option.

(6) *Application of the ownership, control, and income tests*—(i) *In general.* Whether an option satisfies the ownership, control, or income test depends on all the relevant facts and circumstances. Among the factors that are relevant in applying all three tests are any business purposes for the issuance, transfer, or structure of the option, the likelihood of exercise of the option (taking into account, for example, any contingencies to its exercise), transactions related to the issuance or transfer of the option, and the consequences of treating the option as exercised.

An option is not treated as exercised under any of the three tests, however, if a principal purpose of its issuance, transfer, or structuring is to avoid an ownership change by having it treated as exercised. Paragraphs (d)(6)(ii), (iii) and (iv) of this section describe additional examples of factors that are relevant in applying each test. The weight given to any factor depends on all the facts and circumstances. The presence or absence of any factor described in this paragraph (d)(6) does not create a presumption.

(ii) *Application of ownership test.* Among the additional factors that are taken into account in applying the ownership test are the relationship, at the time of issuance or transfer of the option, between the exercise price of the option and the value of the underlying stock, whether the option provides its holder or a related person with the right to participate in the management of the loss corporation or with other rights that ordinarily would be afforded to owners of the underlying stock, and the existence of reciprocal options (e.g., a call option held by the prospective purchaser and a corresponding put option held by the prospective seller). The ability of the holder of an option with a fixed exercise price to share in future appreciation of the underlying stock is also a relevant factor, but is not sufficient, by itself, for the option to satisfy the ownership test. Conversely, the fact that the holder of such an option does not bear the risk of loss due to declines in value of the underlying stock does not preclude the option from satisfying the ownership test.

(iii) *Application of control test.* Among the additional factors that are taken into account in applying the control test are the economic interests in the loss corporation of the option holder or related persons and the influence of those persons over the management of the loss corporation (in either case, through the option or a related arrangement, or through rights in stock).

(iv) *Application of income test.* Among the additional factors that are taken into account in applying the income test are whether, in connection with the issuance or transfer of the option, the loss corporation engages in income acceleration transactions or the holder of the option or a related person purchases stock (including section 1504(a)(4) stock) from, or makes a capital contribution or loan to, the loss corporation that can reasonably be expected to avoid or ameliorate the impact of an ownership change. Examples of income acceleration transactions are those outside the ordinary course of the loss corporation's business that accelerate income or gain into the period prior to the exercise of the option (or defer deductions to the period after the exercise of the option). A stock purchase, capital contribution, or loan is more probative toward an option satisfying the income test the larger the amount received by the loss corporation in the transaction or related transactions. A stock purchase, capital contribution, or loan is generally not taken into account in applying the income test if it is made to enable the loss corporation to continue basic operations of its business (*e.g.*, to meet the monthly payroll or fund other operating expenses of the loss corporation).

(7) *Safe harbors.* Except as provided in paragraph (d)(7)(i) of this section, an option described in this paragraph (d)(7) is not treated as exercised pursuant to the ownership, control, or income test. The failure of an option to be described in this paragraph (d)(7) does not affect the determination of whether the option satisfies the ownership, income, or control test. The following options are described in this paragraph (d)(7):

(i) *Contracts to acquire stock.* A stock purchase agreement or a similar arrangement, the terms of which are commercially reasonable, in which the parties' obligations to complete the transaction are subject only to reasonable closing conditions, and which is closed on a change date within one year after it is entered into. An option is not exempt from the income test of paragraph (d)(5) of this section solely by reason of its description in this paragraph (d)(7)(i).

(ii) *Escrow, pledge, or other security agreements.* An option that is part of a security arrangement in a typical lending transaction (including a purchase money loan), if the arrangement is subject to customary commercial conditions. For this purpose, a security arrangement includes, for example, an agreement for holding stock in escrow or under a pledge or other security agreement, or an option to acquire stock contingent upon a default under a loan.

(iii) *Compensatory options.* An option to acquire stock in a corporation with customary terms and conditions provided to an employee, director, or independent contractor in connection with the performance of services for the corporation or a related person (and that is not excessive by reference to the services performed) and which—

(A) Is nontransferable within the meaning of § 1.83–3(d); and

(B) Does not have a readily ascertainable fair market value as defined in § 1.83–7(b) on the date the option is issued.

(iv) *Options exercisable only upon death, disability, mental incompetency, or retirement.* An option entered into between stockholders of a corporation (or a stockholder and the corporation) with respect to stock of either stockholder, that is exercisable only upon the death, disability, mental incompetency of the stockholder, or, in the case of stock acquired in connection with the performance of services for the corporation or a related person (and that is not excessive by reference to the services performed), the stockholder's retirement.

(v) *Rights of first refusal.* A bona fide right of first refusal with customary terms, entered into between stockholders of a corporation (or between the corporation and a stockholder), and regarding the corporation's stock.

(vi) *Options designated in the Internal Revenue Bulletin.* An option designated by the Internal Revenue Service in the Internal Revenue Bulletin as being exempt from one or more of the ownership, control, or income tests. See § 601.601(d)(2)(ii) of this chapter (relating to the Internal Revenue Bulletin).

(8) *Additional rules*—(i) *Contracts to acquire stock.* For purposes of this paragraph (d), a contract is considered to be issued or transferred on the date it is entered into or assigned, respectively.

(ii) *Indirect transfer of an option.* If an entity is formed or availed of for a principal purpose of facilitating an indirect transfer of an option by issuing or transferring interests in the entity, an issuance or transfer of an interest in the entity will be treated as a transfer of the option for purposes of applying the ownership, control, and income tests of paragraphs (d)(3) through (5) of this section.

(iii) *Options related to interests in non-corporate entities.* The rules of this paragraph (d) apply, with appropriate adjustments, to options to acquire or transfer interests in non-corporate entities.

(iv) *Puts.* In applying the rules of this section to puts, appropriate adjustments must be made to take into account that the put provides its holder with a right to transfer, instead of acquire, stock.

(9) *Definition of option*—(i) *In general.* Any contingent purchase, warrant, convertible debt, put, stock subject to a risk of forfeiture, contract to acquire stock, or similar interest is treated as an option for purposes of this paragraph (d), regardless of whether it is contingent or otherwise not currently exercisable.

(ii) *Convertible stock.* Convertible stock is treated as an option for purposes of this paragraph (d) (in addition to being treated as stock under § 1.382–2(a)(3)(ii)) only if the terms of the conversion feature permit or require consideration other than the stock being converted.

(iii) *Series of options.* For purposes of this paragraph (d), an option to acquire an option with respect to the stock of the loss corporation, and each one of a series of such options, is treated as an option to acquire such stock.

(iv) *General principles of tax law.* This paragraph (d) does not affect the determination under general principles of tax law (such as substance over form) of whether an instrument is an option or stock.

(10) *Subsequent treatment of options treated as exercised on a change date*—(i) *In general.* The following rules apply to options that are treated as exercised under paragraph (d)(2) of this section on a change date:

(A) The option is not treated as exercised under paragraph (d)(2) of this section on any testing date after the change date and prior to a transfer of the option that would itself (*i.e.,* without regard to the purposes for the issuance or any prior transfers of the option) cause the option to satisfy the ownership test of paragraph (d)(3) of this section, the control test of paragraph (d)(4) of this section, or the income test of paragraph (d)(5) of this section; and

(B) The exercise of the option, if by the person who owned the option immediately after the ownership change (or by a transferee of the option who acquired the option, directly or indirectly, from that person in one or more transfers described in paragraph (d)(11) of this section), does not contribute to another ownership change on any testing date on or after the date of exercise.

(ii) *Alternative look-back rule for options exercised within 3 years after change date.* If a loss corporation, on its return, as originally filed, for a taxable year that includes a change date, properly treats an option as exercised under paragraph (d)(2) of this section on the change date, and the option is actually exercised within three years after the change date, the loss corporation may treat the rules of paragraph (d)(10)(i) of this section as inapplicable to the option and instead treat the option as having been exercised on the change date for the purpose of determining whether an ownership change occurs on any and all testing dates after the change date (filing such amended returns as may be necessary for taxable years ending after the change date and before the date of exercise of the option). A transfer after the change date of an option to which this paragraph (d)(10)(ii) applies is treated as a transfer of the stock subject to the option. The exercise of an option to which this paragraph (d)(10)(ii) applies is not taken into account for the purpose of determining whether an ownership change occurs on or after the date of exercise.

(11) *Transfers not subject to deemed exercise.* Paragraph (d)(2) of this section does not apply to the transfer of an option (including a transfer described in paragraph (d)(8)(i) or (ii) of this section), if—

(i) Neither the transferor nor the transferee is a 5-percent shareholder and neither person would be a 5-percent shareholder if all options held by that person to acquire stock were treated as exercised;

(ii) The transfer is between members of separate public groups resulting from the application of the segregation rules of §1.382–2T(j)(2) and (3)(iii); or

(iii) The transfer occurs in any of the circumstances described in section 382(l)(3)(B) (relating to stock acquired by reason of death, gift, divorce, separation, etc.).

(12) *Certain rules regarding non-stock interests as stock.* Section 1.382–2T(f)(18)(iii) does not apply to treat an option (whether or not treated as exercised under this paragraph (d)) as stock.

(e) *Stock transferred under certain agreements.* [Reserved]

(f) *Family attribution.* [Reserved]

(g) *Definitions.* The terms and nomenclature used in this section, and not otherwise defined herein, have the same meaning as in section 382 and the regulations thereunder.

(h) *Effective date*—(1) *In general.* [Reserved]

(2) *Option attribution rules*—(i) *General rule.* The rules of paragraph (d) of this section apply, instead of the rules of §1.382–2T(h)(4), on any testing date on or after November 5, 1992. See paragraph (h)(2)(vi) of this section for an election relating to the effective date.

(ii) *Special rule for control test.* An option issued on or before March 17, 1994, or an option issued within 60 days after that date pursuant to a plan existing before that date, is not treated as exercised under the control test provided in paragraph (d)(4) of this section on any testing date prior to a transfer of the option after March 17, 1994 that would itself cause the option to satisfy the control test.

(iii) *Convertible stock issued prior to July 20, 1988*—(A) *In general.* Except as provided in paragraph (h)(2)(iii)(B) of this section, convertible stock issued prior to July 20, 1988, is not treated as an option subject to the rules of §1.382–2T(h)(4) or paragraph (d)(2) of this section.

(B) *Exceptions*—(*1*) *Nonvoting convertible preferred stock.* Convertible stock issued prior to July 20, 1988, is treated as an option subject to the rules of §1.382–2T(h)(4) or paragraph (d)(2) of this section if—

(*i*) The stock, when issued, would be described in section 1504(a)(4) by disregarding subparagraph (D) thereof and by ignoring the potential participation in corporate growth that the conversion feature may offer; and

(*ii*) The loss corporation makes the election described in Notice 88–67, 1988–1 C.B. 555 (see § 601.601(d)(2)(ii)(*b*) of this chapter for availability of Cumulative Bulletins (C.B.)), on or before the earlier of the date prescribed in Notice 88–67 or December 7, 1992.

(*2*) *Other convertible stock.* Convertible stock issued prior to July 20, 1988, is treated as an option subject to the rules of § 1.382–2T(h)(4) or paragraph (d)(2) of this section if—

(*i*) The terms of the conversion feature permit or require the tender of consideration other than the stock being converted; and

(*ii*) The loss corporation makes the election described in Notice 88–67 on or before the date prescribed in the Notice.

(iv) *Convertible stock issued on or after July 20, 1988, and before November 5, 1992.* Convertible stock issued on or after July 20, 1988, and before November 5, 1992, is treated as an option subject to the rules of § 1.382–2T(h)(4) or paragraph (d) of this section only if—

(A) The stock, when issued, would be described in section 1504(a)(4) by disregarding subparagraph (D) thereof and by ignoring the potential participation in corporate growth that the conversion feature may offer; or

(B) The terms of the conversion feature permit or require the tender of consideration other than the stock being converted.

(v) *Certain options in existence immediately before and after an ownership change.* If an option existed immediately before and after an ownership change occurring on a testing date to which § 1.382–2T(h)(4) applies—

(A) The option is not treated as exercised under paragraph (d)(2) of this section on any testing date after the change date and prior to a transfer of the option that would itself cause the option to satisfy the ownership test of paragraph (d)(3) of this section, the control test of paragraph (d)(4) of this section, or the income test of paragraph (d)(5) of this section; and

(B) Except as provided in § 1.382–2T(m)(4)(vi) (which relates to the effective date of the rules provided in § 1.382–2T(h)(4) and includes a special rule related to options that are actually exercised within 120 days after they are treated as exercised under that section), the actual exercise of the option, if by the person who owned the option immediately after the ownership change (or by a transferee of the option who acquired the option, directly or indirectly, from that person in one or more transfers described in paragraph (d)(11) of this section), will not contribute to an ownership change on any testing date on or after the date of exercise.

(vi) *Election to apply § 1.382–2T(h)(4)*—(A) *In general.* If a loss corporation makes an election under this paragraph (h)(2)(vi), §§ 1.382–2T(a)(2)(i) and (h)(4) (relating to testing dates and option attribution) apply (instead of the definition of testing date in § 1.382–2(a)(4) and paragraph (d) of this section) for the purpose of determining whether an ownership change occurs—

(*1*) On any testing date on or before May 17, 1994, or

(*2*) In the case of a loss corporation that is under the jurisdiction of a court in a title 11 or similar case filed on or before May 17, 1994, subject to § 1.382–9(o)(1), on any testing date at or before the time the plan of reorganization becomes effective.

(B) *Additional consequences of election.* If a loss corporation makes an election under this paragraph (h)(2)(vi)—

(*1*) In determining whether any convertible preferred stock issued by the loss corporation during the period that the election is in effect is treated as stock or as an option, the convertible preferred stock is treated as if it were issued on November 4, 1992, and

(*2*) The special effective date for the control test provided in paragraph (h)(2)(ii) of this section does not apply to any option with respect to stock of the loss corporation.

(C) *Time and manner of making the election.* The election described in paragraph (h)(2)(vi)(A) of this section is made by attaching a statement to the loss corporation's income tax return for the first taxable year ending after November 4, 1992, in which a testing date (within the meaning of §1.382–2T(a)(2)(i)) occurs, or if such return is filed on or before May 17, 1994, with its first return filed after May 17, 1994. However, a loss corporation that is under the jurisdiction of a court in a title 11 or similar case filed on or before May 17, 1994, may make the election described in paragraph (h)(2)(vi)(A) by attaching a statement to its tax return for its first taxable year ending after that date. The statement must say ''THIS IS AN ELECTION UNDER §1.382–4(h)(2)(vi) TO APPLY §1.382–2T(h)(4) ON OR AFTER NOVEMBER 5, 1992.'' Any amended returns required by paragraph (h)(2)(vi)(D) of this section must accompany the return with which the election is made. An election under paragraph (h)(2)(vi)(A) of this section is irrevocable.

(D) *Amended returns.* If an election under this paragraph (h)(2)(vi) affects the amount of taxable income or loss for a prior taxable year, the loss corporation (or the common parent of any consolidated group of which the loss corporation was a member for the year) must file an amended return for the year that reflects the effect of the election.

(3) *Special rule for options subject to attribution under §1.382–2T(h)(4).* Section §1.382–2T(h)(4)(i) does not apply to any option designated by the Internal Revenue Service in the Internal Revenue Bulletin as being excepted from the operation of §1.382–2T(h)(4)(i).

[T.D. 8531, 59 FR 12837, Mar. 18, 1994]

§1.382–5 Section 382 limitation. [Reserved]

§1.382–5T Section 382 limitation (temporary).

(a) *Scope.* Following an ownership change, the section 382 limitation for any post-change year is an amount equal to the value of the loss corporation multiplied by the long-term tax-exempt rate that applies with respect to the ownership change, and adjusted as required by section 382 and the regulations thereunder. See, for example, section 382(b)(2) (relating to the carryforward of unused section 382 limitation), section 382(b)(3)(B) (relating to the section 382 limitation for the post-change year that includes the change date), section 382(m)(2) (relating to short taxable years), and section 382(h) (relating to recognized built-in gains and section 338 gains).

(b) *Computation of value.* [Reserved]

(c) *Short taxable year.* The section 382 limitation for any post-change year that is less than 365 days is the amount that bears the same ratio to the section 382 limitation determined under section 382(b)(1) as the number of days in the post-change year bears to 365. The section 382 limitation, as so determined, is adjusted as required by section 382 and the regulations thereunder. This paragraph (c) does not apply to a 52–53 week taxable year that is less than 365 days unless a return is required under section 443 (relating to short periods) for such year.

(d) *Successive ownership changes and absorption of a section 382 limitation*—(1) *In general.* If a loss corporation has two (or more) ownership changes, any losses attributable to the period preceding the earlier ownership change are treated as pre-change losses with respect to both ownership changes. Thus, the later ownership change may result in a lesser (but never in a greater) section 382 limitation with respect to such losses. In any case, the amount of taxable income for any post-change year that can be offset by pre-change losses may not exceed the section 382 limitation for such ownership change, reduced by the amount of taxable income offset by pre-change losses subject to any earlier ownership change(s).

(2) *Recognized built-in gains and losses.* [Reserved]

(3) *Effective date.* This paragraph (d) applies to taxable years of a loss corporation beginning on or after January 1, 1997.

(e) *Controlled groups.* See §1.382–8T for rules for determining the value of a loss corporation that is a member of a controlled group.

(f) *Effective date.* Except as otherwise provided, this section applies to a loss corporation that has an ownership change to which section 382(a), as amended by the Tax Reform Act of 1986, applies.

[T.D. 8679, 61 FR 33316, June 27, 1996]

§ 1.382–6 Allocation of income and loss to periods before and after the change date for purposes of section 382.

(a) *General rule.* Except as provided in paragraphs (b) and (d) of this section, a loss corporation must allocate its net operating loss or taxable income (see section 382(k)(4)), and its net capital loss (see section 1222(10)) or modified capital gain net income (as defined in paragraph (g)(4) of this section), for the change year between the pre-change period and the post-change period by ratably allocating an equal portion to each day in the year.

(b) *Closing-of-the-books election*—(1) *In general.* Subject to paragraphs (b)(3)(ii) and (d) of this section, a loss corporation may elect to allocate its net operating loss or taxable income and its net capital loss or modified capital gain net income for the change year between the pre-change period and the post-change period as if the loss corporation's books were closed on the change date. An election under this paragraph (b)(1) does not terminate the loss corporation's taxable year as of the change date (e.g., the change year is a single tax year for purposes of section 172).

(2) *Making the closing-of-the-books election*—(i) *Time and manner.* A loss corporation makes the closing-of-the-books election by including the following statement on the information statement required by § 1.382–2T(a)(2)(ii) for the change year: ''THE CLOSING-OF-THE-BOOKS ELECTION UNDER § 1.382–6(b) IS HEREBY MADE WITH RESPECT TO THE OWNERSHIP CHANGE OCCURRING ON [INSERT DATE].'' The election must be made on or before the due date (including extensions) of the loss corporation's income tax return for the change year.

(ii) *Election irrevocable.* An election under this paragraph (b) is irrevocable.

(3) *Special rules relating to consolidated and controlled groups*—(i) *Consolidated groups.* If an election under this paragraph (b) is made with respect to an ownership change occurring in a consolidated return year, all allocations under this section with respect to that ownership change must be consistent with the election.

(ii) *Controlled groups.* If paragraph (b)(3)(i) of this section does not apply, and if, as part of the same plan or arrangement, two or more members of a controlled group (as defined in section 1563(a), determined by substituting ''50 percent'' for ''80 percent'' each place that it appears, and without regard to section 1563(a)(4)), have ownership changes and continue to be members of the controlled group (or become members of the same other controlled group), a closing-of-the-books election applies only if the election is made by all members having the ownership changes.

(c) *Operating rules for determining net operating loss, taxable income, net capital loss, modified capital gain net income, and special allocations.* For purposes of this section, for the change year—

(1) *In general*—(i) Net operating loss or taxable income is determined without regard to gains or losses on the sale or exchange of capital assets; and

(ii) Net operating loss or taxable income and net capital loss or modified capital gain net income are determined without regard to the section 382 limitation and do not include the following items, which are allocated entirely to the post-change period—

(A) Any income, gain, loss, or deduction to which section 382(h)(5)(A) applies; and

(B) Any income or gain recognized on the disposition of assets transferred to the loss corporation during the post-change period for a principal purpose of ameliorating the section 382 limitation.

(2) *Adjustment to net operating loss*—(i) *Determination of remaining capital gain.* The amount of modified capital gain net income (defined in paragraph (g)(4) of this section) allocated to each period is offset by capital losses to which section 382(h)(5)(A) applies and capital loss carryovers, subject to the section 382 limitation (in the case of modified capital gain net income allocated to the post-change period).

(ii) *Reduction of net operating loss by remaining capital gain.* The amount of net operating loss allocated to each period is reduced (but not below zero) without regard to the section 382 limitation, first by the modified capital gain net income remaining in the same period, and then by the modified capital gain net income remaining in the other period.

(d) *Coordination with rules relating to the allocation of income under §1.1502–76(b).* If §1.1502–76 applies (relating to the taxable year of members of a consolidated group), an allocation of items under paragraph (a) or (b) of this section is determined after applying §1.1502–76. Thus, if a short taxable year under §1.1502–76 is a change year for which an allocation under this section is to be made, the allocation under this section applies only to the items allocated to that short taxable year under §1.1502–76.

(e) *Allocation of certain credits.* The principles of this section apply for purposes of allocating, under section 383, excess foreign taxes under section 904(c), current year business credits under section 38, and the minimum tax credit under section 53. The loss corporation must use the same method of allocation (ratable allocation or closing-of-the-books) for purposes of sections 382 and 383.

(f) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. (i) Assume that the loss corporation, L, a calendar year taxpayer with a May 26, 1995, change date, determines a section 382 limitation under section 382(b)(1) of $100,000. Thus, for the change year, its section 382 limitation is $100,000 × (219/365)=$60,000. L makes the closing-of-the-books election under paragraph (b) of this section.

(ii) Assume that L has a $150,000 capital loss carryover (from its 1994 taxable year) and a $300,000 net operating loss carryover (from its 1994 taxable year) to the change year. L recognizes, in the pre-change period, $200,000 of ordinary loss, and, in the post-change period, $150,000 of capital gain and $100,000 of ordinary income. Assume that section 382(h) does not apply to the capital gain or the ordinary income.

(iii) L has a $100,000 net operating loss for the change year ($200,000 pre-change loss less $100,000 post-change income), as determined under paragraph (c)(1)(i) of this section. Because L has no current year capital losses, L's $150,000 capital gain recognized in the post-change period is its modified capital gain net income for the change year (as defined at paragraph (g)(4) of this section). L allocates $100,000 of net operating loss to the pre-change period and $150,000 of modified capital gain net income to the post-change period.

(iv) Under paragraph (c)(2)(i) of this section, L uses its capital loss carryover to offset its modified capital gain net income allocated to the post-change period, subject to its section 382 limitation. L's section 382 limitation is $60,000, so L uses $60,000 of its capital loss carryover to offset $60,000 of its $150,000 modified capital gain net income. L has absorbed its entire section 382 limitation for the change year and has $90,000 of modified capital gain net income remaining in the post-change period.

(v) Under paragraph (c)(2)(ii) of this section, L offsets its $100,000 net operating loss allocated to the pre-change period by the $90,000 of modified capital gain net income remaining in the post-change period, without regard to the section 382 limitation, thereby reducing its pre-change net operating loss to $10,000.

(vi) From its 1994 taxable year, L will carry over $90,000 of capital loss and $300,000 of net operating loss to its 1996 taxable year. From its 1995 taxable year, L will carry over $10,000 of net operating loss subject to the section 382 limitation to its 1996 taxable year.

Example 2. (i) Assume the facts of *Example 1,* except that L does not make the closing-of-the-books election under paragraph (b) of this section.

(ii) L ratably allocates its $100,000 net operating loss and its $150,000 of modified capital gain net income for the change year. $40,000 of net operating loss ($100,000 × (146/365)) and $60,000 of modified capital gain net income ($150,000 × (146/365)) are allocated to the pre-change period. $60,000 of net operating loss ($100,000 × (219/365)) and $90,000 of modified capital gain net income ($150,000 × (219/365)) are allocated to the post-change period.

(iii) Under paragraph (c)(2)(i) of this section, L uses its capital loss carryovers to offset modified capital gain net income. The capital loss carryovers offset the $60,000 modified capital gain net income allocated to the pre-change period without limitation. Subject to the section 382 limitation, the remaining $90,000 of capital loss carryovers offset the modified capital gain net income allocated to the post-change period. Accordingly, L uses $60,000 of its capital loss carryovers to offset $60,000 of its $90,000 modified capital gain net income allocated to the post-change period. L has absorbed its entire section 382 limitation for the change year.

(iv) Under paragraph (c)(2)(ii) of this section, L's $60,000 net operating loss allocated to the post-change period is offset by its remaining $30,000 of post-change modified capital gain net income, reducing its post-change net operating loss to $30,000.

(v) From its 1994 taxable year, L will carry over $30,000 of capital loss and $300,000 of net operating loss to its 1996 taxable year. From its 1995 taxable year, L will carry over $70,000 of net operating loss ($40,000 pre-change +$30,000 post-change) to its 1996 taxable year. The $40,000 pre-change portion of that carryover is subject to the section 382 limitation.

(g) *Definitions and nomenclature.* The terms and nomenclature used in this section and not otherwise defined herein have the same meanings as in sections 382 and 383 and the regulations thereunder. For purposes of this section:

(1) *Change year.* A loss corporation's taxable year that includes the change date is its *change year.*

(2) *Pre-change period.* The *pre-change period* is the portion of the change year ending on the close of the change date.

(3) *Post-change period.* The *post-change period* is the portion of the change year beginning with the day after the change date.

(4) *Modified capital gain net income.* A loss corporation's *modified capital gain net income* is the excess of the gains from sales or exchanges of capital assets over the losses from such sales or exchanges for the change year, determined by excluding any short-term capital losses under section 1212.

(h) *Effective date.* This section applies to ownership changes occurring on or after June 22, 1994.

[T.D. 8546, 59 FR 32080, June 22, 1994]

§ 1.382–7 Built-in gains and losses. [Reserved]

§ 1.382–8 Controlled groups. [Reserved]

§ 1.382–8T Controlled groups (temporary).

(a) *Introduction.* This section provides rules to adjust the value of a loss corporation that is a member of a controlled group of corporations on a change date so that the same value is not included more than once in computing the limitations under section 382 for the loss corporations that are members of the controlled group. In general, the adjustment is made under paragraph (c) of this section by reducing the value of the loss corporation by the value of the stock of each component member of the controlled group that the loss corporation owns immediately after the ownership change. The loss corporation's value may, however, be increased under paragraph (c) of this section by any amount of value that the other member elects to restore to the loss corporation.

(b) *Controlled group loss and controlled group with respect to a controlled group loss.* A controlled group loss is a pre-change loss (or a net unrealized built-in loss) of a loss corporation that is attributable to a taxable year of the corporation with respect to which the corporation is a component member of a controlled group (as defined by paragraphs (e)(2) and (3) of this section). The controlled group with respect to each controlled group loss is composed of the loss corporation and each other corporation that is a component member of a controlled group that includes the loss corporation both—

(1) With respect to the taxable year to which the controlled group loss is attributable; and

(2) On the date the loss corporation has an ownership change.

(c) *Computation of value.* For purposes of computing the limitation under section 382 with respect to each controlled group loss, the value of the stock of each component member of the controlled group with respect to that loss is determined immediately before the ownership change, and is adjusted by applying the following rules:

(1) *Reduction in value.* The value of the stock of each component member is reduced by the value (immediately before the ownership change and without regard to any restoration of value or other adjustment under this section) of the stock of any other component member directly owned by the component member immediately after the ownership change.

(2) *Restoration of value.* After the value of the stock of each component member is reduced pursuant to paragraph (c)(1) of this section, the value of the stock of each component member is increased by the amount of value, if any, restored to the component member by another component member (the electing member) pursuant to this paragraph (c)(2). The electing member may elect to restore value to another component member in an amount that does not exceed the lesser of—

(i) The sum of—

(A) The value, determined immediately before the ownership change, of the electing member's stock (after adjustment under paragraph (c)(1) of this section and before any restoration of value under this paragraph (c)(2)); plus

(B) Any amount of value restored to the electing member by another component member under this paragraph (c)(2); or

(ii) The value, determined immediately before the ownership change, of the electing member's stock (without regard to any adjustment under this section) that is directly owned by the other component member immediately after the ownership change.

(3) *Reduction in value by the amount restored.* The value of the stock of the electing member is reduced by any amount of value that the electing member elects to restore under paragraph (c)(2) of this section to another component member.

(4) *Appropriate adjustments.* Appropriate additional adjustments consistent with paragraphs (c)(1), (2), and (3) of this section must be made to prevent any duplication of value. Thus, for example, adjustments must be made to reflect—

(i) Any indirect ownership interest in another component member;

(ii) Any cross ownership of stock by component members of the controlled group with respect to the controlled group loss; and

(iii) Any value used to determine a limitation under section 382 with respect to controlled group losses from the same period.

(5) *Certain reductions in the value of members of a controlled group.* A loss corporation that has an ownership change is required to make adjustments consistent with this paragraph (c) with respect to its stock if the stock of another corporation in which it had a direct or indirect ownership interest was disposed of before the ownership change, and;

(i) Both corporations were component members of a controlled group—

(A) With respect to a taxable year to which a controlled group loss of the loss corporation is attributable; and

(B) At any time during the 2 year period before the ownership change; and

(ii) Both corporations are component members of a controlled group at any time during the 2 year period following the ownership change.

(d) *No double reduction.* To the extent consistent with the purposes of this section, section 382 and this section shall not be applied to duplicate a reduction in the value of a loss corporation. Thus, for example, if the value of a loss corporation is reduced under section 382(l)(1) to reflect a capital contribution of stock of a component member, it is not again reduced by such amount under paragraph (c)(1) of this section. If this paragraph (d) applies to prevent a reduction in value from being duplicated, the application of the other rules of this section, such as those relating to the restoration of value, is correspondingly limited in a manner consistent with the principles of this section.

(e) *Definitions and nomenclature*—(1) *Definitions in section 382 and the regulations thereunder.* Except as otherwise provided, the definitions and nomenclature contained in section 382 and the regulations thereunder apply to this section.

(2) *Controlled group.* Controlled group has the same meaning as in section 1563(a), determined by substituting ''50 percent'' for ''80 percent'' each place that it appears, and without regard to section 1563(a)(4).

(3) *Component member.* Component member has the same meaning as in section 1563(b), determined by substituting ''December 31 (or the change date, if earlier)'' for ''December 31'' each place it appears, and without regard to section 1563 (b)(2), (b)(3)(C), and (b)(4).

(4) *Predecessor and successor corporation.* As the context may require, a reference to a corporation, or component member includes a reference to a predecessor or successor corporation.

(f) *Coordination between consolidated groups and controlled groups.* Some or all of the component members of a controlled group may also be members of a consolidated group, and a controlled group loss may be subject to a consolidated section 382 limitation or subgroup section 382 limitation determined under §1.1502–93T. Except as otherwise provided in this paragraph (f) and §§ 1.1502–91T through 1.1502–99T, § 1.1502–93T applies instead of this section when both sections, by their terms, are otherwise applicable. This section is applicable and may require an adjustment to value if a member of a consolidated group, a loss group, or a loss subgroup (as those terms are defined in §§ 1.1502–1(h) and 1.1502–91T) is also a component member of a controlled group with respect to a controlled group loss. Solely for purposes of applying this section, a consolidated group, loss group, or loss subgroup is treated as a single corporation. Thus to determine the limitation with respect to any portion of the pre-change consolidated attributes or pre-change subgroup attributes of the loss group or loss subgroup that is a controlled group loss, the consolidated section 382 limitation or subgroup section 382 limitation is computed by treating the loss group or the loss subgroup as a single corporation, and adjusting value in accordance with paragraph (c) of this section. See paragraph (g) *Example 4* of this section.

(g) *Examples.* For purposes of the examples in this section, unless otherwise stated, the nomenclature and assumptions of the examples in § 1.382–2T(b) apply, all corporations file separate income tax returns on a calendar year basis, the only 5-percent shareholder of a corporation is a public group, and the facts set forth the only owner shifts with respect to the corporations during the testing period.

Example 1. Controlled group with respect to a controlled group loss. (a) Public L owns all of the L stock, L and Public L1 own 30 percent and 70 percent, respectively, of the L1 stock, and L1 owns all of the corporation T stock. L1 has a net operating loss arising in Year 1 that is carried over to Year 4. L has a net operating loss arising in Year 2 that is carried over to Year 4. On August 1, Year 3, L acquires 30 percent of the stock of L1, thereby increasing its percentage ownership interest in L1 to 60 percent. On December 1, Year 3, L1 purchases all of the stock of corporation S from Public S. On November 1, Year 4, P acquires all of the L stock. The acquisition by P of all of the L stock on November 1, Year 4, causes ownership changes of both L and L1 under the rules of § 1.382–2T. The following is a graphic illustration of these facts.

(b)(1) Under paragraph (b) of this section, the Year 1 net operating loss carryover of L1 is a controlled group loss because L1 is a component member of a controlled group with respect to Year 1, the year to which the loss is attributable. L1 and T compose a controlled group with respect to the net operating loss carryover because L1 and T are component members of a controlled group both—

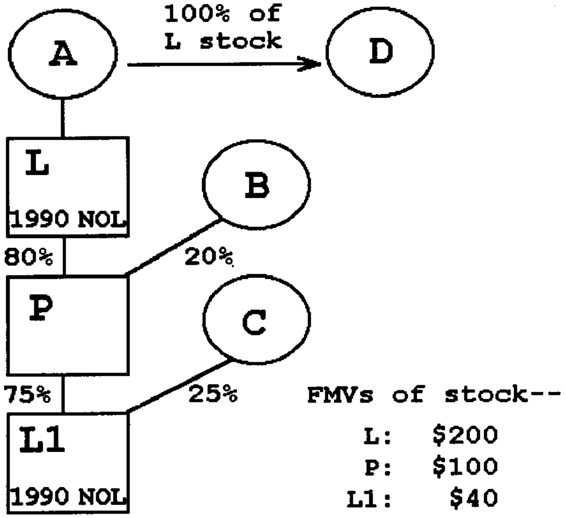
(A) With respect to the taxable year to which L1's net operating loss carryover is attributable (i.e., Year 1); and

(B) On November 1, Year 4, L1's change date. Although L and S are component members of L1's controlled group on L1's change date, they are not component members of the controlled group with respect to the Year 1 net operating loss carryover because they were not component members with respect to the year to which the net operating loss carryover is attributable.

(2) The value of L1's stock must therefore be adjusted in accordance with paragraph (c) of this section to take into account an adjustment with respect to the T stock (but not the S stock) in computing L1's limitation under section 382 with respect to its net operating loss carryover.

(c) Although L is a member of a controlled group composed of L, L1, S, and T on November 1, Year 4, L's change date, it is not a component member of a controlled group with respect to Year 2, the taxable year to which its net operating loss carryover is attributable. Therefore, L's Year 2 net operating loss carryover is not a controlled group loss under paragraph (b) of this section and the value of L's stock is not adjusted in accordance with paragraph (c) of this section to compute L's limitation under section 382 with respect to the Year 2 net operating loss carryover.

Example 2. Adjustments to value of the controlled group members. (a) Since Year 1, A has owned all of the stock of L, L and B have owned 80 percent and 20 percent, respectively, of the stock of corporation P, and P and C have owned 75 percent and 25 percent, respectively, of the stock of L1. L and L1 each has a net operating loss for the Year 6 taxable year that is carried over to its respective Year 7 taxable year. On December 1, Year 7, A sells all of the L stock to D. The sale results in ownership changes of both L and L1. Immediately before the ownership changes, the total value of the L1 stock is $40, the total value of the P stock (including the value of its L1 stock) is $100, and the total value of the L stock (including the value of the P stock) is $200. The following is a graphic illustration of these facts.



(b) Under paragraph (b) of this section, the Year 6 net operating loss carryovers of each of L and L1 are controlled group losses because each of L and L1 is a component member of a controlled group with respect to Year 6, the year to which the losses are attributable. L, P, and L1 compose controlled groups with respect to both Year 6 net operating loss carryovers because L, P, and L1 are component members of a controlled group both—

(1) With respect to the taxable years to which the net operating loss carryovers are attributable (i.e., Year 6); and

(2) On December 1, Year 7, the change date.

(c) The value of the stock of L1 for purposes of determining its limitation under section 382 with respect to its net operating loss carryover from Year 6 is $40. L1 does not elect to restore any value to P under paragraph (c)(2) of this section.

(d) The value of the stock of P ($100) is reduced under paragraph (c)(1) of this section by the value of the stock of L1 that it directly owns, $30 (75%×$40). Following the adjustment, the value of the stock of P is $70. P elects to restore this entire $70 of value to L.

(e) The value of the stock of L, $200, is reduced under paragraph (c)(1) of this section by the value of the stock of P it directly owns, i.e., $80 (80%×$100), and increased under paragraph (c)(2) of this section by the amount P elects to restore to L, i.e., $70. Thus, the value of the L stock for purposes of determining L's limitation under section 382 with respect to its net operating loss carryover from Year 6 is $190 ($200−$80+$70).

Example 3. Limitation on restoration of value. (a) The facts are the same as in *Example 2,* except that L1 elects to restore $20 to P. For purposes of determining L1's limitation under section 382 with respect to the Year 6 net operating loss carryover, the value of the stock of L1 is $20 ($40−$20) because the value of its stock is reduced under paragraph (c)(3) of this section by the $20 of value it elects to restore to P.

(b) The value of the stock of P ($100) is reduced under paragraph (c)(1) of this section by the value of the L1 stock it directly owns ($30), and is increased under paragraph (c)(2) of this section by the value that L1 elects to restore to P ($20). Thus, the value of the P stock is $90 ($100−$30+$20).

(c)(1) P elects to restore to L the maximum value permitted under this section. The value of the stock of L, $200, is reduced under paragraph (c)(1) of this section by the value of the P stock it directly owns ($80), and is increased by the value that P elects to restore to L. P may elect to restore to L the lesser of—

(A) The sum of the value of its stock immediately after adjustment under paragraph (c)(1) of this section (i.e., $70) plus the value restored to it by L1 (i.e., $20) (a total of $90); or

(B) The value of the P stock (without regard to the adjustment required by paragraphs (c)(1) and (2) of this section) that is directly owned by L immediately before the ownership change (i.e., $80).

(2) Thus, $80 is the maximum amount that P may elect to restore to L. Following the restoration of value by P, the value of the L stock for purposes of determining L's limitation under section 382 is $200 ($200 −$80 + $80).

Example 4. Coordination with consolidated return regulations. (a) P and its wholly owned subsidiary L file a consolidated return. L owns 79 percent of the outstanding stock of L1. P acquired the stock of L in Year 1 and L acquired the stock of L1 in Year 2. The P consolidated group has a consolidated net operating loss arising in the Year 6 consolidated return year that is carried over to Year 8. L1 has a net operating loss arising in its Year 6 taxable year that is also carried over to Year 8. On January 1, Year 8, the P consolidated group has an ownership change under § 1.1502–92T(b)(1)(i) and L1 has an ownership change under § 1.382–2T.

(b)(1) Under paragraph (b) of this section, the Year 6 net operating loss carryover of the P group is a controlled group loss because P, L, and L1 are component members of a controlled group with respect to Year 6, the year to which the loss is attributable. P, L, and L1 compose a controlled group with respect to the Year 6 net operating loss carryover of the P loss group because they are component members of a controlled group both—

(A) With respect to the taxable years to which the net operating loss carryover is attributable (i.e., Year 6); and –

(B) On January 1, Year 8, the P group's change date.

(2) Because P and L compose a loss group (within the meaning of § 1.1502–91T(c)) with respect to its Year 6 net operating loss carryover, the P loss group must compute a consolidated section 382 limitation with respect to its Year 6 net operating loss carryover as a result of the ownership change.

(c) In computing the consolidated section 382 limitation under § 1.1502–93T with respect to the Year 6 net operating loss carryover, the value of the P stock immediately before the ownership change is reduced under paragraphs (c)(1) and (f) of this section by the value immediately before the ownership change of the L1 stock directly owned by L immediately after the ownership change. L1 may, however, elect to restore such value to the P consolidated group to the extent permitted under paragraph (c)(2) of this section.

Example 5. Appropriate adjustments for indirect ownership interest. (a) Individual A owns all of the stock of L, L owns an 80 percent interest in the capital and profits of partnership PS, and PS owns 75 percent of the stock of L1. Both L and L1 have net operating losses for the Year 1 taxable year that are carried over to their respective Year 2 taxable years. On December 19, Year 2, A sells all of the L stock to an unrelated individual. The sale results in an ownership change of L and L1.

(b) Under paragraph (b) of this section, the Year 1 net operating loss carryovers of each of L and L1 are controlled group losses because each of L and L1 is a component member of a controlled group with respect to Year 1, the year to which the losses are attributable. L and L1 compose controlled groups with respect to each corporation's net operating loss carryovers because L and L1 are component members of a controlled group both—

(1) With respect to the taxable years to which the net operating loss carryovers are attributable (i.e., Year 1); and

(2) On December 19, Year 2, the change date.

(c) L has an indirect ownership interest in L1 which, under paragraph (c)(4) of this section, must be taken into account in applying this section. As a result, the value of the L stock for purposes of determining its limitation under section 382 with respect to the Year 1 net operating loss carryover must be reduced by the value of L's indirect ownership interest in the L1 stock (60 percent) that it owns through PS immediately before the ownership change, and is increased by the amount (if any) that L1 elects to restore to L under paragraph (c)(2) of this section. The value of L1 is reduced under paragraph (c)(3) of this section to the extent that L1 elects to restore value to L.

(h) *Time and manner of filing election to restore*—(1) *Statement required.* The election to restore value described in paragraph (c)(2) of this section must be in the form set forth below. It must be signed on behalf of both the electing member and the corporation to which such value is restored by persons authorized to sign their respective income tax returns. (The common parent of a consolidated group must make the election on behalf of the group.) It must be filed by the loss corporation with its income tax return for the taxable year in which the ownership change occurs (or with an amended return for such year filed on or before the due date (including extensions) of the income tax return of any component member with respect to the taxable year in which the ownership change occurs). The statement must provide that: ''THIS IS AN ELECTION UNDER § 1.382–8T OF THE INCOME TAX REGULATIONS TO RESTORE ALL OR PART OF THE VALUE OF [insert name and E.I.N. of the electing member] TO [insert name and E.I.N. of the corporation to which value is restored]. The statement must also—

(i) Identify the change date for the loss corporation in connection with which the election is made;

(ii) State the value of the electing member's stock (without regard to any adjustment under paragraph (c) of this section) immediately before the ownership change;

(iii) State the amount of any reduction required under paragraph (c)(1) of this section with respect to stock of the electing member that is owned directly or indirectly by the corporation to which value is restored;

(iv) State the amount of value that the electing member elects to restore to the corporation; and

(v) State whether the value of either component member's stock was adjusted pursuant to paragraph (c)(4) of this section.

(2) *Revocation of election.* An election made under this section is revocable only with the consent of the Commissioner.

(3) *Filing by component member.* An electing member must attach a copy of the statement described in paragraph (h)(1) of this section to its income tax return (or amended return) for the taxable year which includes the change date in connection with which the election is made.

(i) [Reserved]

(j) *Effective date*—(1) *In general.* This section applies to a loss corporation that has an ownership change with respect to a controlled group loss on or after January 1, 1997.

(2) *Transition rule*—(i) *In general.* The members of a controlled group on January 1, 1997, that have had an ownership change with respect to a controlled group loss before January 1, 1997, must determine the limitations under section 382 for any post-change year with respect to controlled group losses by using a reasonable method to preclude the value of stock of a component member that was owned directly or indirectly by another member immediately after an ownership change from being taken into account more than once in determining the limitations under section 382 with respect to controlled group losses. If such a reasonable method was not used for a post-change year, subject to the exception in paragraph (j)(3) of this section, the members of the controlled group described in the preceding sentence must reduce their limitations under section 382 for post-change years for which the income tax return is filed after January 1, 1997, to recapture, as quickly as possible, any limitation that members took into account in excess of the amount that would be allowable under this section.

(ii) *Special transition rule for controlled groups that had ownership changes before January 29, 1991.* For purposes of this section, in the case of an ownership change occurring before January 29, 1991, the controlled group with respect to a controlled group loss does not include a corporation that is not a component member of the controlled group on January 29, 1991. Thus, in the case of an ownership change occurring before January 29, 1991, paragraph (c) of this section does not require that a loss corporation that is a component member of a controlled group to disregard the value of stock of another corporation directly owned immediately after the ownership change in determining the value of its own stock unless the other corporation is a component member of the controlled group on January 29, 1991.

(3) *Amended returns.* A taxpayer that has had an ownership change before January 1, 1997, may file an amended return for any taxable year to modify the amount of a limitation under section 382 with respect to a controlled group loss only if—

(i) The modification complies with the rules contained in this section for computing a limitation under section 382;

(ii) Any other component member of the controlled group with respect to the controlled group loss who elects to restore value and whose taxable income is affected by the election to restore value also files amended returns that comply with such rules; and

(iii) Corresponding adjustments are made in amended returns for all taxable years ending after December 31, 1986.

[T.D. 8679, 61 FR 33316, June 27, 1996]

§1.382–9 Special rules under section 382 for corporations under the jurisdiction of a court in a title 11 or similar case.

(a) *Introduction.* Either section 382(l)(5) or section 382(l)(6) may apply to an ownership change which occurs in a title 11 or similar case (as defined in section 368(a)(3)(A)) if the transaction resulting in the ownership change is ordered by the court or is pursuant to a plan approved by the court. Terms and nomenclature used in this section, and not otherwise defined herein (including the nomenclature and assumptions in §1.382–2T(b) relating to the examples) have the same respective meanings as in section 382 and the regulations thereunder.

(b) *Application of section 382(l)(5).* section 382(a) does not apply to any ownership change if—

(1) The old loss corporation is (immediately before the ownership change) under the jurisdiction of the court in a title 11 or similar case; and

(2) The pre-change shareholders and qualified creditors of the old loss corporation (determined immediately before the ownership change) own (after the ownership change and as a result of being pre-change shareholders or qualified creditors immediately before the ownership change) stock of the new loss corporation (or stock of a controlling corporation if also in bankruptcy) that meets the requirements of section 1504(a)(2) (determined by substituting ‘‘50 percent’’ for ‘‘80 percent’’ each place it appears).

(c) [Reserved]

(d) *Rules for determining whether stock of the loss corporation is owned as a result of being a qualified creditor*—(1) *Qualified creditor.* A qualified creditor is the beneficial owner, immediately before the ownership change, of qualified indebtedness of the loss corporation. A qualified creditor owns stock of the new loss corporation (or a controlling corporation) as a result of being a qualified creditor only to the extent that the qualified creditor receives stock in full or partial satisfaction of qualified indebtedness (including interest accrued on such indebtedness) in a transaction that is ordered by the court or is pursuant to a plan approved by the court in a title 11 or similar case. For purposes of this paragraph (d)(1), ownership of stock after the ownership change is determined without applying the attribution rules generally applicable under section 382(l)(3)(A) or §1.382–2T(h).

(2) *General rules for determining whether indebtedness is qualified indebtedness*—(i) *Definition.* Indebtedness of the loss corporation is qualified indebtedness if it—

(A) Has been owned by the same beneficial owner since the date that is 18 months before the date of the filing of the title 11 or similar case; or

(B) Arose in the ordinary course of the trade or business of the loss corporation and has been owned at all times by the same beneficial owner.

(ii) *Determination of beneficial ownership.* For purposes of paragraph (d)(2)(i) of this section, beneficial ownership of indebtedness is determined without applying attribution rules.

(iii) *Duty of inquiry.* The loss corporation must determine that indebtedness that the loss corporation treats as qualified indebtedness, other than indebtedness to which paragraph (d)(3)(i) of this section applies, has been owned for the requisite period by the beneficial owner who owns the indebtedness immediately before the ownership change. The loss corporation may rely on a statement, signed under penalties of perjury, by a beneficial owner regarding the amount of indebtedness the beneficial owner owns and the length of time that the beneficial owner has owned the indebtedness.

(iv) *Ordinary course indebtedness.* For purposes of this paragraph (d)(2), indebtedness arises in the ordinary course of the loss corporation's trade or business only if the indebtedness is incurred by the loss corporation in connection with the normal, usual, or customary conduct of business, determined without regard to whether the indebtedness funds ordinary or capital expenditures of the loss corporation. For example, indebtedness (other than indebtedness acquired for a principal purpose of being exchanged for stock) arises in the ordinary course of the loss corporation's trade or business if it is trade debt; a tax liability; a liability arising from a past or present employment relationship, a past or present business relationship with a supplier, customer, or competitor of the loss corporation, a tort, a breach of warranty, or a breach of statutory duty; or indebtedness incurred to pay an expense deductible under section 162 or included in the cost of goods sold. A claim that arises upon the rejection of a burdensome contract or lease pursuant to the title 11 or similar case is treated as arising in the ordinary course of the loss corporation's trade or business if the contract or lease so arose.

(3) *Treatment of certain indebtedness as continuously owned by the same owner*—(i) *In general.* For purposes of paragraph (d)(2) of this section, a loss corporation may treat indebtedness as always having been owned by the beneficial owner of the indebtedness immediately before the ownership change if the beneficial owner is not, immediately after the ownership change, either a 5-percent shareholder or an entity through which a 5-percent shareholder owns an indirect ownership interest in the loss corporation (a *5-percent entity*). This paragraph (d)(3)(i) does not apply to indebtedness beneficially owned by a person whose participation in formulating a plan of reorganization makes evident to the loss corporation (whether or not the loss corporation had previous knowledge) that the person has not owned the indebtedness for the requisite period.

(ii) *Operating rules.* For purposes of paragraph (d)(3)(i) of this section: (A) If a loss corporation has actual knowledge of a coordinated acquisition of its indebtedness by a group of persons, through a formal or informal understanding among themselves, for a principal purpose of exchanging the indebtedness for stock, the indebtedness (and any stock received in exchange therefor) is treated as owned by an entity. A principal element in determining if an understanding exists among members of a group is whether the investment decision of each member is based upon the investment decision of one or more other members.

(B) If the loss corporation has actual knowledge regarding stock ownership described in § 1.382–2T(k)(2), the loss corporation must take that ownership into account in determining which beneficial owners of indebtedness are, immediately after the ownership change, 5-percent shareholders or 5-percent entities. The loss corporation is not required to take into account an ownership interest described in § 1.382–2T(k)(4) unless the loss corporation has actual knowledge of the ownership interest.

(C) The term *5-percent shareholder* includes any person who is a 5-percent shareholder of the loss corporation within the meaning of §1.382–2T(g), without regard to the option attribution rules of section 382(l)(3)(A) or §1.382–4(d) (or, if applicable, §1.382–2T(h)(4)).

(D) Paragraph (d)(3)(i) of this section does not apply to indebtedness if the loss corporation has actual knowledge immediately after the ownership change that the exercise of an option to acquire or dispose of stock of the loss corporation would cause the beneficial owner of the indebtedness immediately before the ownership change to be, after the ownership change, either a 5-percent shareholder or a 5-percent entity. An interest that is treated as an option under §1.382–4(d)(9) (or §1.382–2T(h)(4)(v) if applicable) is treated as an option for purposes of this paragraph (d)(3)(ii)(D).

(iii) *Indebtedness owned by beneficial owner who becomes a 5-percent shareholder or 5-percent entity.* If the beneficial owner of indebtedness immediately before the ownership change is a 5-percent shareholder or 5-percent entity immediately after the ownership change, the general rules of paragraph (d)(2) of this section apply to determine whether the indebtedness has been owned for the requisite period by the beneficial owner.

(iv) *Example.* The following example illustrates paragraph (d)(3) of this section.

(A)(1) L is a loss corporation in a title 11 case. The plan of reorganization of L approved by the bankruptcy court provides for the satisfaction of claims by the issuance of new L common stock to its creditors as follows:

A—2 percent
B—7.5 percent
C—2.5 percent
P1—3 percent
P2—10 percent
P3—4.9 percent
P4—4.9 percent
P5—4.9 percent

(2) P2 is owned by Public P2. B owns 10 percent of the stock of P1 and L has no actual knowledge of this ownership. L has actual knowledge that D owns P3, P4 and P5. In addition, L has actual knowledge, immediately after the ownership change, that C owns an option to acquire newly-issued stock of L that, if exercised, would increase C's percentage ownership of L stock from 2.5 percent to 8 percent. An ownership change of L occurs on the date the plan becomes effective.

(B) Under paragraph (d)(3)(i) of this section, L may treat the indebtedness owned by A and P1 immediately before the ownership change as always having been owned by A and P1. Neither A nor P1 is a 5-percent shareholder immediately after the ownership change. Further, because P1 owns less than 5 percent of the L stock (and L has no actual knowledge of B's ownership interest in P1), P1 is treated as an individual, and the L stock owned by P1 is not attributed to any other person, including B. See §1.382–2T(h)(2)(iii). Therefore, P1 is not a 5-percent entity.

(C) Paragraph (d)(3)(i) of this section does not apply to the indebtedness owned by B, C, P2, P3, P4, or P5. B is a 5-percent shareholder immediately after the ownership change. L has actual knowledge immediately after the ownership change that the exercise of C's option would cause C to be a 5-percent shareholder immediately after the ownership change. (L does not take into account the effect of the exercise of the option, however, in determining the percentage stock ownership of any person other than C because the deemed exercise would not cause any other person to be a 5-percent shareholder or a 5-percent entity after the ownership change.) P2 is a 5-percent entity, because Public P2, a 5-percent shareholder, owns an indirect ownership interest in L through P2. P3, P4, and P5 are 5-percent entities because D, a 5-percent shareholder, owns an indirect ownership interest in L through P3, P4, and P5. Because L has actual knowledge that D would be a 5-percent shareholder but for the application of §1.382–2T(h)(2)(iii), that section does not apply to P3, P4, or P5. See §1.382–2T(k)(2). Thus, under §1.382–2T(h)(2)(i), the L stock owned by P3, P4, and P5 is attributed to D, and D is a 5-percent shareholder. Because paragraph (d)(3)(i) of this section does not apply to the indebtedness owned by B, C, P2, P3, P4, and P5, L may treat as qualified indebtedness only indebtedness that it determines had been owned by such persons for the requisite period. See paragraph (d)(2)(iii) of this section.

(4) *Special rule if indebtedness is a large portion of creditor's assets*—(i) *In general.* Indebtedness is not qualified indebtedness if—

(A) The beneficial owner of the indebtedness is a corporation or other entity that had an ownership change on any day during the applicable period;

(B) The indebtedness represents more than 25 percent of the fair market value of the total gross assets (excluding cash or cash equivalents) of the beneficial owner on its change date; and

(C) The beneficial owner is a 5-percent entity immediately after the ownership change of the loss corporation (determined by applying the rules of paragraph (d)(3) of this section).

(ii) *Applicable period.* For purposes of paragraph (d)(4)(i) of this section, the term *applicable period* means the period beginning on the day 18 months before the filing of the title 11 or similar case (or the day on which the beneficial owner acquired the indebtedness, if later) and ending with the change date of the loss corporation.

(iii) *Determination of ownership change.* For purposes of paragraph (d)(4)(i) of this section, the determination whether a beneficial owner of indebtedness has an ownership change is made under the principles of section 382 and the regulations thereunder, without regard to whether the beneficial owner is a loss corporation and by beginning the testing period no earlier than the latest of the day three years before the change date, the day 18 months before the filing of the title 11 or similar case, or the day on which the beneficial owner acquired the indebtedness.

(iv) *Reliance on statement.* Paragraph (d)(4)(i) of this section does not apply to indebtedness if the loss corporation obtains a statement, signed under penalties of perjury, by the beneficial owner of the indebtedness that states that paragraph (d)(4)(i) of this section does not apply to the indebtedness.

(5) *Tacking of ownership periods*—(i) *Transferee treated as owning indebtedness for period owned by transferor.* To determine whether indebtedness transferred in a qualified transfer is qualified indebtedness, the transferee is treated as having owned the indebtedness for the period that it was owned by the transferor.

(ii) *Qualified transfer.* For purposes of paragraph (d)(5)(i) of this section, a transfer of indebtedness is a qualified transfer if—

(A) The transfer is between parties who bear a relationship to each other described in section 267(b) or 707(b) (substituting at least 80 percent for more than 50 percent each place it appears in section 267(b) (and section 267(f)(1)) or 707(b));

(B) The transfer is a transfer of a loan within 90 days after its origination, pursuant to a customary syndication transaction;

(C) The transfer is a transfer of newly incurred indebtedness by an underwriter that owned the indebtedness for a transitory period pursuant to an underwriting;

(D) The transferee's basis in the indebtedness is determined under section 1014 or 1015 or with reference to the transferor's basis in the indebtedness;

(E) The transfer is in satisfaction of a right to receive a pecuniary bequest;

(F) The transfer is pursuant to any divorce or separation instrument (within the meaning of section 71(b)(2));

(G) The transfer is pursuant to a subrogation in which the transferee acquires a claim against the loss corporation by reason of a payment to the claimant pursuant to an insurance policy or a guarantee, letter of credit or similar security arrangement; or

(H) The transfer is a transfer of an account receivable in a customary commercial factoring transaction made within 30 days after the account arose to a transferee that regularly engages in such transactions.

(iii) *Exception.* A transfer of indebtedness is not a qualified transfer for purposes of paragraph (d)(5)(i) of this section if the transferee acquired the indebtedness for a principal purpose of benefiting from the losses of the loss corporation by—

(A) Exchanging the indebtedness for stock of the loss corporation pursuant to the title 11 or similar case; or

(B) Selling the indebtedness at a profit that reflects the expectation that, by reason of section 382(l)(5), section 382(a) will not apply to any ownership change resulting from the title 11 or similar case.

(iv) *Debt-for-debt exchanges.* If the loss corporation satisfies its indebtedness with new indebtedness, either through an exchange of new indebtedness for old indebtedness or a change in the terms of indebtedness that results in an exchange under section 1001—

(A) The owner of the new indebtedness is treated as having owned that indebtedness for the period that it owned the old indebtedness; and

(B) The new indebtedness is treated as having arisen in the ordinary course of the trade or business of the loss corporation if the old indebtedness so arose.

(6) *Effective date*—(i) *In general.* This paragraph (d) applies to ownership changes occurring on or after March 17, 1994.

(ii) *Elections and amended returns*—(A) *Election to apply this paragraph (d) retroactively.* A loss corporation may elect to apply this paragraph (d) to an ownership change occurring prior to March 17, 1994. This election must be made by the later of the due date (including any extensions of time) of the loss corporation's tax return for the taxable year which includes the change date or the date that the loss corporation files its first tax return after May 16, 1994. The election is made by attaching the following statement to the return: ''This is an Election to Apply §1.382–9(d) Retroactively with Respect to the Ownership Change on [Insert Date of Ownership Change] That Occurred in Connection with the Title 11 or Similar Case filed on [Insert Date of Filing].'' This statement must be accompanied by the amended returns described in paragraph (d)(6)(ii)(C) of this section. An election under this paragraph (d)(6) is irrevocable.

(B) *Election to revoke section 382(l)(5)(H) election.* A loss corporation may elect to revoke a prior election made under section 382(l)(5)(H) with respect to an ownership change occurring before March 17, 1994 by including the following statement with its election to apply §1.382–9(d) retroactively: ''This is an Election to Revoke a Prior Election Made Under Section 382(l)(5)(H) With Respect to the Ownership Change on [Insert Date of Ownership Change] That Occurred in Connection With the Title 11 or Similar Case Filed on [Insert Date of Filing].''

(C) *Amended returns.* If the retroactive application of this paragraph (d) affects the amount of taxable income or loss for a prior taxable year, then, except as precluded by the applicable statute of limitations, the loss corporation (or the common parent of any consolidated group of which the loss corporation was a member for the year) must file an amended return for the year that reflects the effects of the retroactive application of the rules of this paragraph (d). If the statute of limitations precludes the filing of an amended return for one or more such prior taxable years, the loss corporation (or the common parent) must make appropriate adjustments under the principles of section 382(l)(2)(A) in subsequent taxable years to reflect the difference between the losses and credits actually used in such prior taxable years and the amount that would have been used in those years applying the rules of this paragraph (d).

(e) *Option attribution for purposes of determining stock ownership under section 382(l)(5)(A)(ii)*—(1) *In general.* Solely for purposes of determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied at the time of an ownership change, stock of the loss corporation (or of a controlling corporation if also in bankruptcy) that is subject to an option is treated as acquired at that time, pursuant to an exercise of the option by its owner, if such deemed exercise would cause the pre-change shareholders and qualified creditors of the loss corporation to own (after such ownership change and as a result of being pre-change shareholders or qualified creditors immediately before such change) less than an amount of such stock sufficient to satisfy the ownership requirements of section 382(l)(5)(A)(ii). An option that is owned as a result of being a pre-change shareholder or qualified creditor and that, if exercised, would result in the ownership of stock by a pre-change shareholder or qualified creditor is not treated as exercised under this paragraph (e). For purposes of this paragraph (e)(1), rules similar to those option attribution rules under §1.382–2T(h)(4)(iii), (iv), (v), (vii), and (x)(A), (B) (except with respect to a debt instrument that was issued after the filing of the petition in the title 11 or similar case), (D), (E) (except with respect to a right to receive or obligation to issue stock as interest or dividends on a debt instrument or stock that was issued after the filing of the petition in the title 11 or similar case), (G), (H), and (Z), apply.

(2) *Special rules*—(i) *Lapse or forfeiture of options deemed exercised.* A loss corporation may apply rules similar to the rules of § 1.382–2T(h)(4)(viii) with respect to an option except to the extent any person owning the option at any time on or after the change date acquires additional stock or an option to acquire additional stock during the period of time on or after the ownership change and on or before the lapse or forfeiture of the option.

(ii) *Actual exercise of options not deemed exercised.* In determining whether the ownership change pursuant to the plan of reorganization qualifies under section 382(l)(5), a loss corporation may take into account stock acquired pursuant to the actual exercise of an option issued pursuant to the plan of reorganization if that option was not deemed exercised under paragraph (e)(1) of this section. However, this paragraph (e)(2)(ii) applies only if the option is actually exercised within the 3 years of the ownership change by the 5-percent shareholder who, as a result of being a pre-change shareholder or qualified creditor, acquired the option under the plan.

(iii) *Amended returns.* A loss corporation may file an amended return for a prior taxable year (subject to any applicable statute of limitations) if it determines that section 382(l)(5) applies to an ownership change as a result of the operation of paragraph (e)(2)(i) or (ii) of this section, but only if the loss corporation makes corresponding adjustments on amended returns for all affected taxable years (subject to any applicable statute of limitations).

(3) *Examples.* In each of the examples in this paragraph (e)(3), assume that there is an ownership change of loss corporation L on the date the plan of reorganization is effective.

Example 1. L is a loss corporation in a title 11 case. The plan of reorganization of L approved by the bankruptcy court provides for the cancellation of all existing L stock, the issuance of 100 shares of new L common stock to qualified creditors, and the issuance of an option to a new investor to acquire, at any time during the next 3 years, 90 shares of new L common stock from L at its fair market value on the date the plan becomes effective. Under paragraph (e)(1) of this section, on the date the plan becomes effective, the option held by the new investor is deemed exercised if the exercise would cause the qualified creditors of L to own less than 50 percent of the total voting power or value of the L stock after the ownership change. Because the qualified creditors would receive at least 50 percent of the voting power and value of the new L common stock even if the option were deemed exercised, the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied.

Example 2. The facts are the same as in *Example 1*, except that L issues an option to the new investor to acquire 110 shares of new L common stock. This option is deemed exercised under paragraph (e)(1) of this section on the date the plan becomes effective, because, as a result of the deemed exercise, the qualified creditors would own only 100 of 210 shares of the new L common stock (approximately 48 percent) after the ownership change. Accordingly, the stock ownership requirements of section 382(l)(5)(A)(ii) are not satisfied and section 382(a) applies to the ownership change.

Example 3. (a) L is a loss corporation in a title 11 case. The plan of reorganization of L approved by the bankruptcy court provides for the cancellation of all existing L stock, the issuance of new L common stock and 5-year options to acquire L common stock as follows:

(i) To qualified creditors—100 shares of stock and options to acquire 50 shares;

(ii) To a new investor—options to acquire 110 shares.

(b) Under paragraph (e)(1) of this section, the option held by the new investor is deemed exercised on the date the plan becomes effective because the exercise would cause the qualified creditors of L to own less than 50 percent of the total voting power and value of the L stock after the ownership change (100 of 210 shares or approximately 48 percent). Accordingly, the stock ownership requirements of section 382(l)(5)(A)(ii) are not satisfied initially and section 382(a) applies to the ownership change.

(c) Assume, however, that the qualified creditors actually exercise enough options that were acquired pursuant to the plan of reorganization to purchase 30 additional shares during the 3 year period after the plan becomes effective. Under paragraph (e)(2)(ii) of this section, L may take into account the 30 shares purchased by the qualified creditors by the exercise of the options in determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) were satisfied on the date the plan of reorganization became effective. If L takes such purchases into account, the qualified creditors of L are deemed to own as of the date of the ownership change more than 50 percent of the total voting power or value of the L stock after the ownership change (130 of 240 shares or approximately 54 percent), with the result that the stock ownership requirements of section

382(l)(5)(A)(ii) are satisfied and section 382(l)(5) applies to the ownership change as of the effective date of the plan.

(d) Assume instead that the qualified creditors acquire 30 additional shares by exercise of options more than 3 years after the plan becomes effective. Such exercise is not taken into account under paragraph (e)(2)(ii) of this section for purposes of determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied as of the effective date of the plan. Thus, the qualified creditors are deemed to own less than 50 percent of the total voting power and value of the L stock after the ownership change (100 of 210 shares) and section 382(l)(5) does not apply to the ownership change.

(e) Assume instead that, during the 3 year period after the plan becomes effective, the new investor exercises part of his option and purchases 105 shares of stock. The exercise causes a lapse of the rights to acquire the remaining 5 shares of stock. Also during that time, the qualified creditors exercise part of their options and acquire 6 additional shares of stock. Under paragraph (e)(2)(i) of this section, L may treat the lapse of that part of the new investor's option to acquire 5 shares of stock as if that part of the option had never been issued for purposes of determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied as of the effective date of the plan. Also, under paragraph (e)(2)(ii) of this section, L may take into account the 6 shares purchased by the qualified creditors by the exercise of the options in determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied as of the effective date of the plan. If L takes all of this information into account, the qualified creditors are deemed to own more than 50 percent of the total voting power or value of the L stock after the ownership change (106 of 211 shares or approximately 50.2 percent) and section 382(l)(5) applies to the ownership change as of the effective date of the plan.

(4) *Effective dates*—(i) *In general.* This paragraph (e) applies to ownership changes occurring on or after September 5, 1990.

(ii) *Special rule for interest or dividends.* Rules similar to the rules of §1.382–2T(h)(4)(x)(E) (relating to option attribution for purposes of determining whether an ownership change occurs) apply to a right to receive or obligation to issue stock as interest or dividends on a debt instrument or stock that was issued after the filing of the petition in the title 11 or similar case for ownership changes occurring before April 8, 1992.

(f)—(h) [Reserved]

(i) *Election not to apply section 382(l)(5).* Under section 382(l)(5)(H), a loss corporation may elect not to have the provisions of section 382(l)(5) apply to an ownership change in a title 11 or similar case. This election is irrevocable and must be made by the due date (including any extensions of time) of the loss corporation's tax return for the taxable year which includes the change date. The election is to be made by attaching the following statement to the tax return of the loss corporation for that taxable year: ''This is an Election Under §1.382–9(i) not to Apply the Provisions of Section 382(l)(5) to the Ownership Change Occurring Pursuant to a Plan of Reorganization Confirmed by the Court on [Insert Confirmation Date].''

(j) *Value of the loss corporation in an ownership change to which section 382(l)(6) applies.* Section 382(l)(6) applies to any ownership change occurring pursuant to a plan of reorganization in a title 11 or similar case to which section 382(l)(5) does not apply. In such case, the value of the loss corporation under section 382(e) is equal to the lesser of—

(1) The value of the stock of the loss corporation immediately after the ownership change (determined under the rules of paragraph (k) of this section); or

(2) The value of the loss corporation's pre-change assets (determined under the rules of paragraph (l) of this section).

(k) *Rules for determining the value of the stock of the loss corporation*—(1) *Certain ownership interests treated as stock.* For purposes of paragraph (j)(1) of this section—

(i) Stock includes stock described in section 1504(a)(4) and any stock that is not treated as stock under §1.382–2T(f)(18)(ii) for purposes of determining whether a loss corporation has an ownership change; and

(ii) Stock does not include an ownership interest that is treated as stock under §1.382–2T(f)(18)(iii) for purposes of determining whether a loss corporation has an ownership change.

(2) *Coordination with section 382(e)(2).* In the case of a redemption or other corporate contraction occurring after and in connection with the ownership

change, the value of the stock of the loss corporation under paragraph (j)(1) of this section is reduced under section 382(e)(2).

(3) *Coordination with section 382(e)(3).* If the loss corporation is a foreign corporation, in determining the value of the stock under paragraph (j)(1) of this section, only items treated as connected with the conduct of a trade or business in the United States are taken into account.

(4) *Coordination with section 382(l)(1).* Section 382(l)(1) does not apply in determining the value of the stock of the loss corporation under paragraph (j)(1) of this section.

(5) *Coordination with section 382(l)(4).* If, immediately after the ownership change, the loss corporation has substantial nonbusiness assets (as determined under section 382(l)(4)(B) taking into account only those assets the loss corporation held immediately before the ownership change), the value of the stock of the loss corporation under paragraph (j)(1) of this section is reduced by the excess of the value of such nonbusiness assets over those assets' share of the loss corporation's indebtedness (determined under section 382(l)(4)(D) taking into account the loss corporation's assets and liabilities immediately after the ownership change).

(6) *Special rule for stock not subject to the risk of corporate business operations*—(i) *In general.* The value of the stock of the loss corporation under paragraph (j)(1) of this section is reduced by the value of stock that is issued as part of a plan one of the principal purposes of which is to increase the section 382 limitation without subjecting the investment to the entrepreneurial risks of corporate business operations.

(ii) *Coordination of special rule and other rules affecting value.* If the value of the loss corporation is modified under another rule affecting value, appropriate adjustments are to be made so that such modification is not duplicated under this paragraph (k)(6).

(7) *Limitation on value of stock.* For purposes of paragraph (j)(1) of this section, the value of stock of the loss corporation issued in connection with the ownership change cannot exceed the cash and the value of any property (including indebtedness of the loss corporation) received by the loss corporation in consideration for the issuance of that stock.

(l) *Rules for determining the value of the loss corporation's pre-change assets*—(1) *In general.* Except as otherwise provided in this paragraph (l), the value of the loss corporation's pre-change assets is the value of its assets (determined without regard to liabilities) immediately before the ownership change.

(2) *Coordination with section 382(e)(2).* Section 382(e)(2) does not apply in determining the value of the pre-change assets of the loss corporation under paragraph (j)(2) of this section.

(3) *Coordination with section 382(e)(3).* If the loss corporation is a foreign corporation, in determining the value of the pre-change assets under paragraph (j)(2) of this section, only assets treated as connected with the conduct of a trade or business in the United States are taken into account.

(4) *Coordination with section 382(l)(1).* For purposes of paragraph (j)(2) of this section, the value of the pre-change assets of the loss corporation is determined without regard to the amount of any capital contribution to which section 382(l)(1) applies. For purposes of applying this paragraph (l)(4), the receipt of cash or property by the loss corporation in exchange for the issuance of indebtedness is considered a capital contribution if it is part of a plan one of the principal purposes of which is to increase the value of the loss corporation under paragraph (j) of this section.

(5) *Coordination with section 382(l)(4).* If, immediately after the ownership change, the loss corporation has substantial nonbusiness assets (as determined under section 382(l)(4)(B) taking into account only those assets the loss corporation held immediately before the ownership change), the value of the loss corporation's pre-change assets is reduced by the value of the nonbusiness assets.

(m) *Continuity of business requirement*—(1) *Under section 382(l)(5).* If section 382(l)(5) applies to an ownership change of a loss corporation, section 382(c) and the regulations thereunder do not apply with respect to the ownership change.

(2) *Under section 382(l)(6).* If section 382(l)(6) applies to an ownership change of a loss corporation, section 382(c) and the regulations thereunder apply to the ownership change.

(n) *Ownership change in a title 11 or similar case succeeded by another ownership change within two years*—(1) *Section 382(l)(5) applies to the first ownership change.* If section 382(l)(5) applies to an ownership change and, within the two-year period immediately following such ownership change, a second ownership change occurs, section 382(l)(5) cannot apply to the second ownership change and the section 382(a) limitation with respect to the second ownership change is zero.

(2) *Section 382(l)(6) applies to the first ownership change.* If the value of a loss corporation in an ownership change was determined under section 382(l)(6) and a second ownership change occurs within the two-year period immediately following the first ownership change, the value of the loss corporation under section 382(e) with respect to the second ownership change is not reduced under section 382(l)(1) for any increase in value of the loss corporation previously taken into account under section 382(l)(6) with respect to the first ownership change.

(o) *Treatment of certain options for ownership change purposes*—(1) Neither § 1.382–2T(h)(4)(i) nor § 1.382–4(d) (relating to the treatment of options as exercised) applies to the following options to acquire stock of a loss corporation reorganized pursuant to a plan of reorganization that is confirmed in a title 11 or similar case (within the meaning of section 368(a)(3)(A)) but only until the time the plan becomes effective—

(i) Any option created by the solicitation or receipt of acceptances to the plan;

(ii) The option created by the confirmation of the plan; and

(iii) Any option created under the plan.

(2) This paragraph (o) generally applies to any testing date occurring on or after September 5, 1990. However, this paragraph (o) does not apply on any testing date occurring on or after April 8, 1992, if, in connection with the plan of reorganization, the loss corporation issues stock (including stock described in section 1504(a)(4)) or otherwise receives a capital contribution before the effective date of the plan for a principal purpose of using before the effective date losses and credits that would be subject to limitation under section 382(a) or would be eliminated under section 382(l)(5)(B) or (C) if this paragraph (o) did not apply on the testing date. A loss corporation may elect to apply this paragraph (o) to any testing date occurring before September 5, 1990, by filing a statement substantially similar to the following with its income tax return: ‘‘THIS IS AN ELECTION TO APPLY § 1.382–3(o) (OR § 1.382–9(o) AFTER REDESIGNATION) FOR TESTING DATES PRIOR TO SEPTEMBER 5, 1990, TO OPTIONS CREATED BY OR UNDER A PLAN OF REORGANIZATION CONFIRMED IN A TITLE 11 OR SIMILAR CASE.’’ A loss corporation may elect to not apply this paragraph (o) to testing dates occurring on or after September 5, 1990, to April 8, 1992, by filing a statement substantially similar to the following with its income tax return: ‘‘THIS IS AN ELECTION TO NOT APPLY § 1.382–3(o) (OR § 1.382–9(o) AFTER REDESIGNATION) FOR TESTING DATES OCCURRING ON OR AFTER SEPTEMBER 5, 1990, TO APRIL 8, 1992, TO OPTIONS CREATED BY OR UNDER A PLAN OF REORGANIZATION CONFIRMED IN A TITLE 11 OR SIMILAR CASE.’’

(p) *Effective date for rules relating to section 382(l)(6)*—(1) *In general.* Paragraphs (i), (j), (k), (l), (m)(2), and (n)(2) of this section apply to any ownership change occurring on or after March 17, 1994.

(2) *Ownership change to which section 382(l)(6) applies occurring before March 17, 1994.* In the case of an ownership change occurring before March 17, 1994, the loss corporation may elect to apply the rules of paragraphs (j), (k), (l), (m)(2), and (n)(2) of § 1.382–9 in their entirety. The election must be made by the later of the due date (including any extensions of time) of the loss corporation's tax return for the taxable year which includes the change date or the date that the loss corporation files its first tax return after May 16, 1994. The election is made by attaching the following statement to the return: ‘‘This is an Election to Apply §§ 1.382–9 (j), (k),

(l), (m)(2), and (n)(2) of the Income Tax Regulations to the Ownership Change Occurring Pursuant to a Plan of Reorganization Confirmed by the Court on [Insert Confirmation Date].'' In connection with making this election, on the same return the loss corporation may also elect not to apply section 382(l)(5) to the ownership change under paragraph (i) of this section (if the loss corporation has not already done so pursuant to § 301.9100–7T(a) of this chapter). If, under the applicable statute of limitations, the loss corporation may file amended returns for the year of the ownership change and all subsequent years (an open year), an electing loss corporation must file an amended return for each prior affected year to reflect the elections. If, under the applicable statute of limitations, the loss corporation may not file an amended return for the year of the ownership change or any subsequent year (a closed year), an electing loss corporation must file an amended return for each affected open year to reflect the elections and the section 382 limitation resulting from the ownership change must be appropriately adjusted for the earliest open year (or years) to reflect the difference between the amount of pre-change losses actually used in closed years and the amount of pre-change losses that would have been used in such years applying the rules of paragraphs (j), (k), (l), (m)(2), (n)(2) of this section to the ownership change.

§ 1.383–1 Special limitations on certain capital losses and excess credits.

(a) *Outline of topics.* In order to facilitate the use of this section, this paragraph lists the paragraphs, subparagraphs and subdivisions contained in this section.

(a) Outline of topics.
(b) In general.
(c) Definitions.
(1) Coordination with definitions and nomenclature used in section 382.
(2) Pre-change capital loss.
(3) Pre-change credit.
(4) Pre-change loss.
(5) Regular tax liability.
(6) Section 383 credit limitation.
(i) Definition.
(ii) Example.
(d) Limitation on use of pre-change losses and pre-change credits.
(1) In general.
(2) Ordering rules for utilization of pre-change losses and pre-change credits and for absorption of the section 382 limitation and the section 383 credit limitation.
(3) Coordination with other limitations.
(i) In general.
(ii) Examples.
(e) Carryforward of unused section 382 limitation.
(1) Computation of carryforward amount.
(2) Section 383 credit reduction amount.
(3) Computation of section 383 credit reduction amount; illustration using tax rates and brackets in effect for calendar year 1988.
(4) Special rules for determining the section 383 credit reduction amount.
(i) Ordering rules.
(ii) Special rule for credits under section 38(a).
(f) Examples.
(g) Coordination with section 382 and the regulations thereunder.
(h) Alternative minimum tax.
(i) [Reserved]
(j) Effective date.
(k) Transitional rules regarding information statements

(b) *In general.* Under section 383, if an ownership change occurs with respect to a loss corporation, the section 382 limitation and the section 383 credit limitation (as defined in paragraph (c)(6) of this section) for a post-change year shall apply to limit the amount of taxable income and regular tax liability, respectively, that can be offset by pre-change capital losses and pre-change credits of the new loss corporation. The section 383 credit limitation for a post-change year bears a direct relationship to the amount, if any, of the section 382 limitation that remains after taking into account the reduction in the loss corporation's taxable income during a post-change year as a result of its pre-change losses (as defined in paragraph (c)(4) of this section). In general, the section 383 credit limitation is an amount equal to the tax liability of the new loss corporation for the post-change year which is attributable to so much of the corporation's taxable income that would be reduced by allowing as a deduction its section 382 limitation remaining after accounting for the use of pre-change losses. As pre-change losses and pre-change credits of a corporation are used, they absorb the section 382 limitation and the section 383 credit limitation, respectively, in the manner prescribed by paragraph (d) of this section. See also section 382 and the regulations thereunder.

(c) *Definitions*—(1) *Coordination with definitions and nomenclature used in section 382.* Terms and nomenclature used in this section, and not otherwise defined herein, shall have the same respective meanings as in section 382 and the regulations thereunder, taking into account that the limitations of section 383 and this section apply to pre-change capital losses and pre-change credits.

(2) *Pre-change capital loss.* The term *pre-change capital loss* means—

(i) Any capital loss carryover under section 1212 of the old loss corporation to the taxable year ending on the change date or in which the change date occurs,

(ii) Any net capital loss of the old loss corporation for the taxable year in which the ownership change occurs, to the extent such loss is allocable to the period in such year ending on or before the change date, and

(iii) If the old loss corporation has a net unrealized built-in loss, any recognized built-in loss for any recognition period taxable year (within the meaning of section 382(h)) that is a capital loss.

(3) *Pre-change credit.* The term *pre-change credit* means—

(i) Any excess foreign taxes under section 904(c) of the old loss corporation—

(A) carried forward to the taxable year ending on the change date or in which the change date occurs, or

(B) carried forward from the taxable year that includes the change date, to the extent such credit is allocable to the period in such year ending on or before the change date,

(ii) Any credit under section 38 of the old loss corporation—

(A) carried forward to the taxable year ending on the change date or in which the change date occurs, or

(B) carried forward from a taxable year that includes the change date to the extent such credit is allocable to the period in such year ending on or before the change date, and

(iii) The available minimum tax credit of the old loss corporation under section 53 to the extent attributable to periods ending on or before the change date.

(4) *Pre-change loss.* Solely for purposes of this section, the term *prechange loss* means any pre-change loss described in § 1.382–2(a)(2) other than pre-change credits described in paragraph (c)(3) of this section.

(5) *Regular tax liability.* For purposes of this section, the term *regular tax liability* has the same meaning as provided in section 26(b).

(6) *Section 383 credit limitation*—(i) *Definition.* The *section 383 credit limitation* for a post-change year of a new loss corporation is an amount equal to the excess of—

(A) The new loss corporation's regular tax liability for the post-change year, over

(B) The new loss corporation's regular tax liability for the post-change year computed, for this purpose, by allowing as an additional deduction an amount equal to the section 382 limitation remaining after the application of paragraphs (d)(2)(i) through (iv) of this section.

(ii) *Example.*

L, a new loss corporation, is a calendar year taxpayer. L has an ownership change on December 31, 1987. For 1988, L has taxable income (prior to the use of any pre-change losses) of $100,000. In addition, L has a section 382 limitation of $25,000, a pre-change net operating loss carryover of $12,000, a pre-change minimum tax credit of $50,000, and no pre-change capital losses. L's section 383 credit limitation is the excess of its regular tax liability computed after allowing a $12,000 net operating loss deduction (taxable income of $88,000; regular tax liability of $18,170), over its regular tax liability computed after allowing an additional deduction in the amount of L's section 382 limitation remaining after the application of paragraphs (d)(2)(i) through (iv) of this section, or $13,000 (taxable income of $75,000; regular tax liability of $13,750). L's section 383 credit limitation is therefore $4,420 ($18,170 minus $13,750).

(d) *Limitation on use of pre-change losses and pre-change credits*—(1) *In general.* The amount of taxable income of a new loss corporation for any post-change year that may be offset by pre-change losses shall not exceed the amount of the section 382 limitation for the post-change year. The amount of the regular tax liability of a new loss corporation for any post-change year that may be offset by pre-change credits shall not exceed the amount of the section 383 credit limitation for the post-change year.

(2) *Ordering rules for utilization of pre-change losses and pre-change credits and for absorption of the section 382 limitation and the section 383 credit limitation.* Pre-change losses described in any subdivision of this paragraph (d)(2) can offset taxable income in a post-change year only to the extent that the section 382 limitation for that year has not been absorbed by pre-change losses described in any lower-numbered subdivisions. Pre-change credits described in any subdivision of this paragraph (d)(2) can offset regular tax liability in a post-change year only to the extent that the section 383 credit limitation for that year has not been absorbed by pre-change credits described in any lower numbered subdivisions. The section 382 limitation is absorbed by one dollar for each dollar of pre-change loss that is used to offset taxable income. The section 383 credit limitation is absorbed by one dollar for each dollar of pre-change credit that is used to offset regular tax liability. For each post-change year, the section 382 limitation and the section 383 credit limitation of a new loss corporation are absorbed by such corporation's pre-change losses and pre-change credits in the following order:

(i) Pre-change capital losses described in paragraph (c)(2)(iii) of this section that are recognized and are subject to the section 382 limitation in such post-change year,

(ii) Pre-change capital losses described in paragraphs (c)(2)(i) and (ii) of this section,

(iii) Pre-change losses that are described in § 1.382–2(a)(2) (other than losses that are pre-change capital losses) that are recognized and are subject to the section 382 limitation in such post-change year,

(iv) Pre-change losses not described in paragraphs (d)(2)(i) through (iii) of this section,

(v) Pre-change credits described in paragraph (c)(3)(i) of this section (excess foreign taxes),

(vi) Pre-change credits described in paragraph (c)(3)(ii) of this section (business credits), and

(vii) Pre-change credits described in paragraph (c)(3)(iii) of this section (minimum tax credit).

(3) *Coordination with other limitations*—(i) *In general.* Paragraphs (d)(1) and (2) of this section shall be applied after the application of all other limitations contained in subtitle A which are applicable to the use of a pre-change loss or pre-change credit in a post-change year. Thus, only otherwise currently allowable pre-change losses and pre-change credits will result in the absorption of the section 382 limitation and the section 383 credit limitation.

(ii) *Examples:*

Example (1). L is a calendar year taxpayer and has an ownership change on December 31, 1987. For 1988, L has taxable income of $300,000, a regular tax liability of $100,250 and a tentative minimum tax of $90,000. L has no pre-change losses, but has a business credit carryforward from 1985 of $25,000, no portion of which is due to the regular percentage of the investment tax credit under section 46. L has a section 382 limitation for 1988 of $50,000. L's section 383 credit limitation is $19,500, i.e., an amount equal to the excess of L's regular tax liability ($100,250) over its regular tax liability calculated by allowing an additional deduction of $50,000. Pursuant to the limitation contained in section 38(c), however, L is entitled to use only $10,250 of its business credit carryforward in 1988. The unabsorbed portion of L’s section 382 limitation (computed pursuant to paragraph (e) of this section) is carried forward under section 382(b)(2). The unused portion of L’s business credit carryforward, $14,750, is carried forward to the extent provided in section 39.

Example (2). Assume the same facts as in *Example (1),* except that L’s tentative minimum tax is $70,000. L’s use of its investment tax credit carryforward is no longer limited by section 38(c); however, pursuant to section 383 and this section, L is entitled to use only $19,500 of its business credit carryforward in 1988. The unused portion of L’s business credit carryforward, $5,500, is carried forward to the extent provided in section 39. There is no unused section 382 limitation to be carried forward.

(e) *Carryforward of unused section 382 limitation*—(1) *Computation of carryforward amount.* The section 382 limitation that can be carried forward under section 382(b)(2) is the excess, if any, of (i) the section 382 limitation for the post-change year remaining after the application of paragraphs (d)(2)(i) through (iv) of this section, over (ii) the section 383 credit reduction amount for that post-change year.

(2) *Section 383 credit reduction amount.* The section 383 credit reduction amount for a post-change year is equal to the amount of taxable income attributable to the portion of the new loss corporation’s regular tax liability for the year that is offset by pre-change credits. Each dollar of regular tax liability that is offset by a dollar of pre-change credit is divided by the effective marginal rate at which that dollar of tax was imposed to determine the amount of taxable income that resulted in that particular dollar of regular tax liability. The sum of these ‘‘grossed-up’’ amounts for the taxable year is the section 383 credit reduction amount. In determining the effective marginal rate at which a dollar of tax was imposed, special rules regarding rates of tax (*e.g.,* sections 11(b)(2) and (15) or taxable income brackets (*e.g.,* section 1561), or both, shall be taken into account. See *Example (3)* in paragraph (f) of this section illustrating the effect of section 1561(a). Paragraph (e)(3) of this section illustrates the gross-up computation of the section 383 credit reduction amount based on the tax table and the rates of tax prescribed by section 11(b) as in effect for taxable years beginning on January 1, 1988.

(3) *Computation of section 383 credit reduction amount; illustration using tax rates and brackets in effect for calendar year 1988.* (i) Assuming no special rules regarding rates of tax or taxable income brackets apply, the section 383 credit reduction amount for a new loss corporation is the sum of the amounts determined under paragraphs (e)(3)(ii), (iii), (iv), (v), and (vi) of this section.

(ii) The amount determined under this subdivision (ii) is the amount (if any) by which pre-change credits offset so much of the new loss corporation’s regular tax liability as exceeds $113,900, divided by 0.34.

(iii) The amount determined under this subdivision (e)(3)(iii) is the amount (if any) by which pre-change credits offset so much of the new loss corporation’s regular tax liability as exceeds $22,250 (but does not exceed $113,900), divided by 0.39.

(iv) The amount determined under this subdivision (e)(3)(iv) is the amount (if any) by which pre-change credits offset so much of the new loss corporation’s regular tax liability as exceeds $13,750 (but does not exceed $22,250), divided by 0.34.

(v) The amount determined under this subdivision (e)(3)(v) is the amount (if any) by which pre-change credits offset so much of the new loss corporation’s regular tax liability as exceeds $7,500 (but does not exceed $13,750), divided by 0.25.

(vi) The amount determined under this subdivision (e)(3)(vi) is the amount (if any) by which pre-change credits offset so much of the new loss corporation’s regular tax liability as does not exceed $7,500, divided by 0.15.

(4) *Special rules for determining the section 383 credit reduction amount*—(i) *Ordering rules.* For purposes of this paragraph (e), credits, including pre-change credits, are considered to offset regular tax liability in the order that such credits are applied under the ordering rules of part IV of subchapter A of chapter 1 and section 904. For example, for purposes of this paragraph (e), excess foreign taxes carried over under section 904(c) (whether or not a pre-change credit) are considered (under

section 38(c)) to offset regular tax liability before the general business credit carryovers to the taxable year are considered (under section 39) to offset regular tax liability before general business credits arising in the taxable year.

(ii) *Special rule for credits under section 38(a).* For purposes of applying this paragraph (e), credits under section 38(a) that, under section 38(c)(2) as applicable, taking into account amendments made by section 11813 of the Revenue Reconciliation Act of 1990, effectively offset both regular tax liability and the tax imposed by section 55 (relating to minimum tax), are considered to offset regular tax liability.

(f) *Examples.* The following examples illustrate the operation of paragraphs (b) through (e) of this section. For purposes of these examples, the term *modified tax liability* means the amount determined under paragraph (c)(6)(i)(B) of this section.

Example (1). (i) L, a calendar year taxpayer, has an ownership change on December 31, 1987. Before the application of carryovers, L, a new loss corporation, has $60,000 of capital gain, $100,000 of ordinary taxable income and a section 382 limitation of $100,000 for its first post-change year beginning after the change date. L's only carryovers are an $80,000 capital loss carryover and a $100,000 net operating loss carryover. Both carryovers are from taxable years ending before the change date and thus are pre-change losses.

(ii) L first uses $60,000 of its pre-change capital loss carryover to offset its capital gain. This reduces its section 382 limitation to $40,000 (i.e., $100,000−$60,000). L's pre-change net operating loss carryover can therefore be used only to the extent of $40,000. L's remaining $20,000 pre-change capital loss carryover and remaining $60,000 pre-change net operating loss carryover are carried to later years to the extent permitted under this section and sections 172, 382(l)(2) and 1212.

Example (2). (i) L, a calendar year taxpayer, has an ownership change on December 31, 1987. L has $750,000 of ordinary taxable income (before the application of carryovers) and a section 382 limitation of $1,500,000 for 1988. L's only carryovers are from pre-1987 taxable years and consist of a $500,000 net operating loss (''NOL'') carryover and a $200,000 foreign tax credit carryover, all of which may be used under the section 904 limitation. The NOL carryover is a pre-change loss, and the foreign tax credit carryover is a pre-change credit. L has no other credits which can be used for 1988 and is not liable for an alternative minimum tax for 1988.

(ii) The following computation illustrates the application of this section for 1988:

1. Taxable income before carryovers	$750,000
2. Pre-change NOL carryover	500,000
3. Section 382 limitation	1,500,000
4. Amount of pre-change NOL carryover that can be used (lesser of line 1, 2, or 3)	500,000
5. Taxable income (line 1 minus line 4)	250,000
6. Section 382 limitation remaining (line 3 minus line 4)	1,000,000
7. Pre-change credit carryover	200,000
8. Regular tax liability (line 5 × section 11 rates): $50,000×0.15=$7,500 25,000×0.25=6,250 25,000×0.34=8,500 150,000×0.39=58,500	80,750
9. Modified tax liability (line 5 minus line 6 (but not less than zero)) × section 11 rates)	0
10. Section 383 credit limitation (line 8 minus line 9)	80,750
11. Amount of pre-change credits that can be used (lesser of line 7 or line 10)	80,750
12. Amount of pre-change credits to be carried over to 1989 under section 904(c) (line 7 minus line 11)	119,250
13. Section 383 credit reduction amount: ($80,750 minus $22,250)/0.39=$150,000 ($22,250 minus $13,750)/0.34=25,000 ($13,750 minus $7,500)/0.25=25,000 $7,500/0.15=50,000	250,000
14. Section 382 limitation to be carried to 1989 under section 382(b)(2) (Line 6 minus line 13)	750,000

Example (3). (i) Assume the same facts as in *Example (2),* except that, for purposes of section 1561(a), L is a component member of a controlled group of corporations and the taxable income of the controlled group of corporations for 1988 is $2,000,000.

(ii) The following computation illustrates the application of this section for 1988:

1. Taxable income before carryovers	$750,000
2.Pre-change NOL carryover	500,000
3. Section 382 limitation	1,500,000
4. Amount of pre-change NOL carryover that can be used (lesser of line 1, 2, or 3)	500,000
5. Taxable income (line 1 minus line 4)	250,000
6. Section 382 limitation remaining (line 3 minus line 4)	1,000,000

7. Pre-change credit carryover ...	200,000
8. Regular tax liability (line 5×0.34 (the effective section 11 rate under section 1561(a)))	85,000
9. Modified tax liability (line 5 minus line 6 (but not less than zero)) × section 11 rates)	0
10. Section 383 credit limitation (line 8 minus line 9)	85,000
11. Amount of pre-change credits that can be used (lesser of line 7 or line 10)	85,000
12. Amount of pre-change credits to be carried over to 1989 under section 904(c) (line 7 minus line 11)	115,000
13. Section 383 credit reduction amount (line 11 divided by 0.34)	250,000
14. Section 383 limitation to be carried to 1989 under section 382(b)(2) (line 6 minus line 13) ...	750,000

Example (4) . (i) L, a calendar year taxpayer, has an ownership change on December 31, 1987. L has $80,000 of ordinary taxable income (before the application of carryovers) and a section 382 limitation of $25,000 for 1988, a post-change year. L's only carryover is from a pre-1987 taxable year and is a general business credit carryforward under section 39 in the amount of $10,000 (no portion of which is attributable to the investment tax credit under section 46). The general business credit carryforward is a pre-change credit. L has no other credits which can be used for 1988 and is not liable for an alternative minimum tax for 1988.

(ii) The following computation illustrates the application of this section:

1. Taxable income	$80,000
2. Section 382 limitation	25,000
3. Pre-change credit carryover	10,000
4. Regular tax liability (line 1 × section 11 rates): $50,000×0.15=$7,500 25,000×0.25=6,250 5,000×0.34=1,700	15,450
5. Modified tax liability ((line 1 minus line 2) × section 11 rates): $50,000×0.15=$7,500 5,000×0.25=1,250	8,750
6. Section 383 credit limitation (line 4 minus line 5)	6,700
7. Amount of pre-change credits that can be used (lesser of line 3 or line 6)	6,700
8. Amount of pre-change credits to be carried over to 1989 under sections 39 and 382(l)(2) (line 3 minus line 7)	3,300
9. Regular tax payable (line 4 minus line 7)	8,750
10. Section 383 credit reduction amount: ($15,450 minus $13,750)/0.34=$5,000 ($13,750 minus $8,750)/0.25=20,000	25,000
11. Section 382 limitation to be carried to 1989 under section 382(b)(2) (line 2 minus line 10)	0

(g) *Coordination with section 382 and the regulations thereunder.* The rules and principles of section 382 (including, for example, section 382(b)(3) and section 382(l)(2)) and the regulations thereunder shall also apply with respect to section 383 and this section. To the extent section 382(h)(6) applies to credits, the principles of this section apply to such credits. In applying the rules and principles of section 382 and the regulations thereunder, appropriate adjustments shall be made to take into account that section 383 and this section apply to pre-change capital losses and pre-change credits. For example, in applying §1.382–2T (f)(18)(ii)(C), (f)(18)(iii)(C) and (h)(4)(ix), any pre-change credits, as defined in paragraph (c)(3) of this section, must be converted to a deduction equivalent by dividing the amount of such credits by the maximum effective rate of tax provided for under section 11 (e.g., 0.34 for taxable years beginning in 1989).

(h) *Alternative minimum tax.* See §1.383–2T for the application of the limitations contained in sections 382 and 383 in computing the alternative minimum tax under section 55.

(i) [Reserved]

(j) *Effective date.* Subject to any exception from the application of section 382 or the section 382 limitation with respect to a loss corporation, section 383 and this section apply to any loss corporation with respect to which an ownership change occurs after December 31, 1986. See §1.382–2T(m) for effective date rules relating to ownership changes. If section 383 was not taken into account or was applied other than in accordance with this section in a prior taxable year with respect to which section 383 applies, the taxpayer should, within the period of limitation, file an amended return and pay any additional tax due plus interest.

(k) Transitional rules regarding information statements—(1) *Exception.*

An information statement described in § 1.382–2T(a)(2)(ii) of this section that would be required to be filed solely by reason of the loss corporation having pre-change capital losses (as defined in § 1.382–2T (a)(2)(ii)(A) and (B) or pre-change credits (as defined in paragraph (c)(3) of this section) is not required to be filed with the income tax return of the loss corporation for any taxable year for which the due date (including extensions) of the income tax return is on or before November 20, 1989, or for which the income tax return is filed on or before October 10, 1989.

(2) *Statement with respect to prior periods.* A corporation which is a loss corporation for any taxable year ending in 1987, 1988 or 1989 solely because it has pre-change capital losses (as defined in paragraphs (c)(2)(i) and (ii) of this section or pre-change credits (as defined in paragraph (c)(3) of this section) must attach a separate information statement to its 1988 and 1989 income tax returns. Such information statement must (i) include the information specified in § 1.382–2T (a)(2)(ii)(A) and (B) (without regard to testing dates before May 6, 1986) for each taxable year ending on or after May 6, 1986 for which the corporation was a loss corporation, (ii) state whether and to what extent pre-change capital losses (as defined in paragraphs (c)(2)(i) and (ii) of this section) or pre-change credits (as defined in paragraph (c)(3) of this section) utilized by the corporation in a taxable year to which the section 382 limitation applied, exceeded the amount permitted under this section, and (iii) be labeled ‘‘Information Statement with Respect to Transition Periods.’’ For purposes of the preceding sentence, information previously reported in an information statement, including a statement filed with a 1988 return, may be excluded. The requirements of this paragraph (k)(2) apply only with respect to 1988 and 1989 taxable years with respect to which the due date of the income tax return (including extensions) is after November 20, 1989, and for which the income tax return is not filed on or before October 10, 1989.

[T.D. 8264, 54 FR 38668, Sept. 20, 1989; T.D. 8264, 54 FR 46187, Nov. 1, 1989; T.D. 8264, 54 FR 50043, Dec. 4, 1989. Redesignated and amended by T.D. 8352, 56 FR 29434, June 27, 1991]

§ 1.383–2 Limitations on certain capital losses and excess credits in computing alternative minimum tax. [Reserved]

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES

NORMAL TAXES AND SURTAXES (CONTINUED)

DEFERRED COMPENSATION, ETC.

PENSION, PROFIT-SHARING, STOCK BONUS PLANS, ETC.

Sec.
1.401–0 Scope and definitions.
1.401–1 Qualified pension, profit-sharing, and stock bonus plans.
1.401–2 Impossibility of diversion under the trust instrument.
1.401–3 Requirements as to coverage.
1.401–4 Discrimination as to contributions or benefits (before 1994).
1.401–5 Period for which requirements of section 401(a) (3), (4), (5), and (6) are applicable with respect to plans put into effect before September 2, 1974.
1.401–6 Termination of a qualified plan.
1.401–7 Forfeitures under a qualified pension plan.
1.401–8 Custodial accounts prior to January 1, 1974.
1.401–9 Face-amount certificates—nontransferable annuity contracts.
1.401–10 Definitions relating to plans covering self-employed individuals.
1.401–11 General rules relating to plans covering self-employed individuals.
1.401–12 Requirements for qualification of trusts and plans benefiting owner-employees.
1.401–13 Excess contributions on behalf of owner-employees.
1.401–14 Inclusion of medical benefits for retired employees in qualified pension or annuity plans.
1.401(a)–1 Post-ERISA qualified plans and qualified trusts; in general.
1.401(a)–2 Impossibility of diversion under qualified plan or trust.
1.401(a)–4 Optional forms of benefit (before 1994).
1.401(a)–11 Qualified joint and survivor annuities.
1.401(a)–12 Mergers and consolidations of plans and transfers of plan assets.
1.401(a)–13 Assignment or alienation of benefits.
1.401(a)–14 Commencement of benefits under qualified trusts.
1.401(a)–15 Requirement that plan benefits are not decreased on account of certain Social Security increases.
1.401(a)–16 Limitations on benefits and contributions under qualified plans.
1.401(a)–19 Nonforfeitability in case of certain withdrawals.
1.401(a)–20 Requirements of qualified joint and survivor annuity and qualified preretirement survivor annuity.
1.401(a)–30 Limit on elective deferrals.
1.401(a)–50 Puerto Rican trusts; election to be treated as a domestic trust.
1.401(a)(4)–0 Table of contents.
1.401(a)(4)–1 Nondiscrimination requirements of section 401(a)(4).
1.401(a)(4)–2 Nondiscrimination in amount of employer contributions under a defined contribution plan.
1.401(a)(4)–3 Nondiscrimination in amount of employer-provided benefits under a defined benefit plan.
1.401(a)(4)–4 Nondiscriminatory availability of benefits, rights, and features.
1.401(a)(4)–5 Plan amendments and plan terminations.
1.401(a)(4)–6 Contributory defined benefit plans.
1.401(a)(4)–7 Imputation of permitted disparity.
1.401(a)(4)–8 Cross-testing.
1.401(a)(4)–9 Plan aggregation and restructuring.
1.401(a)(4)–10 Testing of former employees.
1.401(a)(4)–11 Additional rules.
1.401(a)(4)–12 Definitions.
1.401(a)(4)–13 Effective dates and fresh-start rules.
1.401(a)(5)–1 Special rules relating to nondiscrimination requirements.
1.401(a)(17)–1 Limitation on annual compensation.
1.401(a)(26)–0 Table of contents.
1.401(a)(26)–1 Minimum participation requirements.
1.401(a)(26)–2 Minimum participation rule.
1.401(a)(26)–3 Rules applicable to a defined benefit plan's prior benefit structure.
1.401(a)(26)–4 Testing former employees.
1.401(a)(26)–5 Employees who benefit under a plan.
1.401(a)(26)–6 Excludable employees.
1.401(a)(26)–7 Testing methods.
1.401(a)(26)–8 Definitions.
1.401(a)(26)–9 Effective dates and transition rules.
1.401(a)(31)–1 Requirement to offer direct rollover of eligible rollover distributions; questions and answers.
1.401(b)–1 Certain retroactive changes in plan.
1.401(b)–1T Certain retroactive changes in plan (temporary).
1.401(e)–1 Definitions relating to plans covering self-employed individuals.
1.401(e)–2 General rules relating to plans covering self-employed individuals.

1.401(e)–3 Requirements for qualification of trusts and plans benefiting owner-employees.
1.401(e)–4 Contributions for premiums on annuity, etc., contracts and transitional rule for certain excess contributions.
1.401(e)–5 Limitation of contribution and benefit bases to first $100,000 of annual compensation in case of plans covering self-employed individuals.
1.401(e)–6 Special rules for shareholder-employers.
1.401(f)–1 Certain custodial accounts and annuity contracts.
1.401(k)–0 Certain cash or deferred arrangements, table of contents.
1.401(k)–1 Certain cash or deferred arrangements.
1.401(l)–0 Table of contents.
1.401(l)–1 Permitted disparity in employer-provided contributions or benefits.
1.401(l)–2 Permitted disparity for defined contribution plans.
1.401(l)–3 Permitted disparity for defined benefit plans.
1.401(l)–4 Special rules for railroad plans.
1.401(l)–5 Overall permitted disparity limits.
1.401(l)–6 Effective dates and transition rules.
1.401(m)–0 Employee and matching contributions, table of contents.
1.401(m)–1 Employee and matching contributions.
1.401(m)–2 Multiple use of alternative limitation.
1.402(a)–1 Taxability of beneficiary under a trust which meets the requirements of section 401(a).
1.402(a)(5)–1T Rollovers of partial distributions from qualified trusts and annuities. (Temporary)
1.402(b)–1 Treatment of beneficiary of a trust not exempt under section 501(a).
1.402(c)–1 Taxability of beneficiary of certain foreign situs trusts.
1.402(c)–2 Eligible rollover distributions; questions and answers.
1.402(d)–1 Effect of section 402(d).
1.402(e)–1 Certain plan terminations.
1.402(f)–1 Required explanation of eligible rollover distributions; questions and answers.
1.402(g)–0 Limitation on exclusion for elective deferrals, table of contents.
1.402(g)–1 Limitation on exclusion for elective deferrals.
1.403(a)–1 Taxability of beneficiary under a qualified annuity plan.
1.403(a)–2 Capital gains treatment for certain distributions.
1.403(b)–1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.
1.403(b)–2 Eligible rollover distributions; questions and answers.
1.403(c)–1 Taxability of beneficiary under a nonqualified annuity.
1.403(d)–1 Taxability of employee when rights under contracts purchased by exempt organizations change from forfeitable to nonforfeitable.
1.404(a)–1 Contributions of an employer to an employees' trust or annuity plan and compensation under a deferred payment plan; general rule.
1.404(a)–1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for employees. (Temporary)
1.404(a)–2 Information to be furnished by employer claiming deductions; taxable years ending before December 31, 1971.
1.404(a)–2A Information to be furnished by employer; taxable years ending on or after December 31, 1971, and before December 31, 1975.
1.404(a)–3 Contributions of an employer to or under an employees' pension trust or annuity plan that meets the requirements of section 401(a); application of section 404(a)(1).
1.404(a)–4 Pension and annuity plans; limitations under section 404(a)(1)(A).
1.404(a)–5 Pension and annuity plans; limitations under section 404(a)(1)(B).
1.404(a)–6 Pension and annuity plans; limitations under section 404(a)(1)(C).
1.404(a)–7 Pension and annuity plans; contributions in excess of limitations under section 404(a)(1); application of section 404(a)(1)(D).
1.404(a)–8 Contributions of an employer under an employees' annuity plan which meets the requirements of section 401(a); application of section 404(a)(2).
1.404(a)(8)–1T Deductions for plan contributions on behalf of self-employed individuals. (Temporary)
1.404(a)–9 Contributions of an employer to an employees' profit-sharing or stock bonus trust that meets the requirements of section 401(a); application of section 404(a)(3)(A).
1.404(a)–10 Profit-sharing plan of an affiliated group; application of section 404(a)(3)(B).
1.404(a)–11 Trusts created or organized outside the United States; application of section 404(a)(4).
1.404(a)–12 Contributions of an employer under a plan that does not meet the requirements of section 401(a); application of section 404(a)(5).
1.404(a)–13 Contributions of an employer where deductions are allowable under section 404(a) (1) or (2) and also under section 404(a)(3); application of section 404(a)(7).
1.404(a)–14 Special rules in connection with the Employee Retirement Income Security Act of 1974.
1.404(b)–1 Method of contribution, etc., having the effect of a plan; effect of section 404(b).

1.404(b)–1T Method or arrangement of contributions, etc., deferring the receipt of compensation or providing for deferred benefits. (Temporary)
1.404(c)–1 Certain negotiated plans; effect of section 404(c).
1.404(d)–1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for independent contractors. (Temporary)
1.404(e)–1 Contributions on behalf of a self-employed individual to or under a pension, annuity, or profit-sharing plan meeting the requirements of section 401; application of section 404(a) (8), (9), and (10) and section 404 (e) and (f).
1.404(e)–1A Contributions on behalf of a self-employed individual to or under a qualified pension, annuity, or profit-sharing plan.
1.404(g)–1 Deduction of employer liability payments.
1.404(k)–1T Questions and answers relating to the deductibility of certain dividend distributions. (Temporary)
1.405–1 Qualified bond purchase plans.
1.405–2 Deduction of contributions to qualified bond purchase plans.

DEFERRED COMPENSATION, ETC.

PENSION, PROFIT-SHARING, STOCK BONUS PLANS, ETC.

§1.401–0 Scope and definitions.

(a) *In general.* Sections 1.401 through 1.401–14 (inclusive) reflect the provisions of section 401 prior to amendment by the Employee Retirement Income Security Act of 1974. The sections following §1.401–14 and preceding §1.402(a)–1 (hereafter referred to in this section as the ''Post-ERISA Regulations'') reflect the provisions of section 401 after amendment by such Act.

(b) *Definitions.* For purposes of the Post-ERISA regulations—

(1) *Qualified plan.* The term ''qualified plan'' means a plan which satisfies the requirements of section 401(a).

(2) *Qualified trust.* The term ''qualified trust'' means a trust which satisfies the requirements of section 401(a).

(Sec. 411 Internal Revenue Code of 1954 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42320, Aug. 23, 1977]

§1.401–1 Qualified pension, profit-sharing, and stock bonus plans.

(a) *Introduction.* (1) Sections 401 through 405 relate to pension, profit-sharing, stock bonus, and annuity plans, compensation paid under a deferred-payment plan, and bond purchase plans. Section 401(a) prescribes the requirements which must be met for qualification of a trust forming part of a pension, profit-sharing, or stock bonus plan.

(2) A qualified pension, profit-sharing, or stock bonus plan is a definite written program and arrangement which is communicated to the employees and which is established and maintained by an employer—

(i) In the case of a pension plan, to provide for the livelihood of the employees or their beneficiaries after the retirement of such employees through the payment of benefits determined without regard to profits (see paragraph (b)(1)(i) of this section);

(ii) In the case of a profit-sharing plan, to enable employees or their beneficiaries to participate in the profits of the employer's trade or business, or in the profits of an affiliated employer who is entitled to deduct his contributions to the plan under section 404(a)(3)(B), pursuant to a definite formula for allocating the contributions and for distributing the funds accumulated under the plan (see paragraph (b)(1)(ii) of this section); and

(iii) In the case of a stock bonus plan, to provide employees or their beneficiaries benefits similar to those of profit-sharing plans, except that such benefits are distributable in stock of the employer, and that the contributions by the employer are not necessarily dependent upon profits. If the employer's contributions are dependent upon profits, the plan may enable employees or their beneficiaries to participate not only in the profits of the employer, but also in the profits of an affiliated employer who is entitled to deduct his contributions to the plan under section 404(a)(3)(B) (see paragraph (b)(1)(iii) of this section).

(3) In order for a trust forming part of a pension, profit-sharing, or stock bonus plan to constitute a qualified trust under section 401(a), the following tests must be met:

(i) It must be created or organized in the United States, as defined in section 7701(a)(9), and it must be maintained at all times as a domestic trust in the United States;

(ii) It must be part of a pension, profit-sharing, or stock bonus plan established by an employer for the exclusive benefit of his employees or their beneficiaries (see paragraph (b)(2) through (5) of this section);

(iii) It must be formed or availed of for the purpose of distributing to the employees or their beneficiaries the corpus and income of the fund accumulated by the trust in accordance with the plan, and, in the case of a plan which covers (as defined in paragraph (a)(2) of § 1.401–10) any self-employed individual, the time and method of such distribution must satisfy the requirements of section 401(a)(9) with respect to each employee covered by the plan (see paragraph (e) of § 1.401–11);

(iv) It must be impossible under the trust instrument at any time before the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust, for any part of the corpus or income to be used for, or diverted to, purposes other than for the exclusive benefit of the employees or their beneficiaries (see § 1.401–2);

(v) It must be part of a plan which benefits prescribed percentages of the employees, or which benefits such employees as qualify under a classification set up by the employer and found by the Commissioner not to be discriminatory in favor of certain specified classes of employees (see § 1.401–3 and, in addition, see § 1.401–12 for special rules as to plans covering owner-employees);

(vi) It must be part of a plan under which contributions or benefits do not discriminate in favor of certain specified classes of employees (see § 1.401–4);

(vii) It must be part of a plan which provides the nonforfeitable rights described in section 401(a)(7) (see § 1.401–6);

(viii) If the trust forms part of a pension plan, the plan must provide that forfeitures must not be applied to increase the benefits any employee would receive under such plan (see § 1.401–7);

(ix) It must, if the plan benefits any self-employed individual who is an owner-employee, satisfy the additional requirements for qualification contained in section 401(a)(10) and (d).

(4) For taxable years beginning after December 31, 1962, self-employed individuals may be included in qualified plans. See §§ 1.401–10 through 1.401–13.

(b) *General rules.* (1)(i) A pension plan within the meaning of section 401(a) is a plan established and maintained by an employer primarily to provide systematically for the payment of definitely determinable benefits to his employees over a period of years, usually for life, after retirement. Retirement benefits generally are measured by, and based on, such factors as years of service and compensation received by the employees. The determination of the amount of retirement benefits and the contributions to provide such benefits are not dependent upon profits. Benefits are not definitely determinable if funds arising from forfeitures on termination of service, or other reason, may be used to provide increased benefits for the remaining participants (see § 1.401–7, relating to the treatment of forfeitures under a qualified pension plan). A plan designed to provide benefits for employees or their beneficiaries to be paid upon retirement or over a period of years after retirement will, for the purposes of section 401(a), be considered a pension plan if the employer contributions under the plan can be determined actuarially on the basis of definitely determinable benefits, or, as in the case of money purchase pension plans, such contributions are fixed without being geared to profits. A pension plan may provide for the payment of a pension due to disability and may also provide for the payment of incidental death benefits through insurance or otherwise. However, a plan is not a pension plan if it provides for the payment of benefits not customarily included in a pension plan such as layoff benefits or benefits for sickness, accident, hospitalization, or medical expenses (except medical benefits described in section 401(h) as defined in paragraph (a) of §1.401–14).

(ii) A profit-sharing plan is a plan established and maintained by an employer to provide for the participation in his profits by his employees or their beneficiaries. The plan must provide a definite predetermined formula for allocating the contributions made to the plan among the participants and for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some event such as layoff, illness, disability, retirement, death, or severance of employment. A formula for allocating the contributions among the participants is definite if, for example, it provides for an allocation in proportion to the basic compensation of each participant. A plan (whether or not it contains a definite predetermined formula for determining the profits to be shared with the employees) does not qualify under section 401(a) if the contributions to the plan are made at such times or in such amounts that the plan in operation discriminates in favor of officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees. For the rules with respect to discrimination, see §§1.401–3 and 1.401–4. A profit-sharing plan within the meaning of section 401 is primarily a plan of deferred compensation, but the amounts allocated to the account of a participant may be used to provide for him or his family incidental life or accident or health insurance.

(iii) A stock bonus plan is a plan established and maintained by an employer to provide benefits similar to those of a profit-sharing plan, except that the contributions by the employer are not necessarily dependent upon profits and the benefits are distributable in stock of the employer company. For the purpose of allocating and distributing the stock of the employer which is to be shared among his employees or their beneficiaries, such a plan is subject to the same requirements as a profit-sharing plan.

(iv) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(2) The term ‘‘plan’’ implies a permanent as distinguished from a temporary program. Thus, although the employer may reserve the right to change or terminate the plan, and to discontinue contributions thereunder, the abandonment of the plan for any reason other than business necessity within a few years after it has taken effect will be evidence that the plan from its inception was not a bona fide program for the exclusive benefit of employees in general. Especially will this be true if, for example, a pension plan is abandoned soon after pensions have been fully funded for persons in favor of whom discrimination is prohibited under section 401(a). The permanency of the plan will be indicated by all of the surrounding facts and circumstances, including the likelihood of the employer’s ability to continue contributions as provided under the plan. In the case of a profit-sharing plan, other than a profit-sharing plan which covers employees and owner-employees (see section 401(d)(2)(B)), it is not necessary that the employer contribute every year or that he contribute the same amount or contribute in accordance with the same ratio every year. However, merely making a single or occasional contribution out of profits for employees does not establish a plan of profit-sharing. To be a profit-sharing plan, there must be recurring and substantial contributions out of profits for the employees. In the event a plan is abandoned, the employer should promptly notify the district director, stating the circumstances which led to the discontinuance of the plan.

(3) If the plan is so designed as to amount to a subterfuge for the distribution of profits to shareholders, it will not qualify as a plan for the exclusive benefit of employees even though other employees who are not shareholders are also included under the plan. The plan must benefit the employees in general, although it need not provide benefits for all of the employees. Among the employees to be

benefited may be persons who are officers and shareholders. However, a plan is not for the exclusive benefit of employees in general if, by any device whatever, it discriminates either in eligibility requirements, contributions, or benefits in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or the highly compensated employees. See section 401(a) (3), (4), and (5). Similarly, a stock bonus or profit-sharing plan is not a plan for the exclusive benefit of employees in general if the funds therein may be used to relieve the employer from contributing to a pension plan operating concurrently and covering the same employees. All of the surrounding and attendant circumstances and the details of the plan will be indicative of whether it is a bona fide stock bonus, pension, or profit-sharing plan for the exclusive benefit of employees in general. The law is concerned not only with the form of a plan but also with its effects in operation. For example, section 401(a)(5) specifies certain provisions which of themselves are not discriminatory. However, this does not mean that a plan containing these provisions may not be discriminatory in actual operation.

(4) A plan is for the exclusive benefit of employees or their beneficiaries even though it may cover former employees as well as present employees and employees who are temporarily on leave, as, for example, in the Armed Forces of the United States. A plan covering only former employees may qualify under section 401(a) if it complies with the provisions of section 401(a)(3)(B), with respect to coverage, and section 401(a)(4), with respect to contributions and benefits, as applied to all of the former employees. The term ''beneficiaries'' of an employee within the meaning of section 401 includes the estate of the employee, dependents of the employee, persons who are the natural objects of the employee's bounty, and any persons designated by the employee to share in the benefits of the plan after the death of the employee.

(5)(i) No specific limitations are provided in section 401(a) with respect to investments which may be made by the trustees of a trust qualifying under section 401(a). Generally, the contributions may be used by the trustees to purchase any investments permitted by the trust agreement to the extent allowed by local law. However, such a trust will be subject to tax under section 511 with respect to any ''unrelated business taxable income'' (as defined in section 512) realized by it from its investments.

(ii) Where the trust funds are invested in stock or securities of, or loaned to, the employer or other person described in section 503(b), full disclosure must be made of the reasons for such arrangement and the conditions under which such investments are made in order that a determination may be made whether the trust serves any purpose other than constituting part of a plan for the exclusive benefit of employees. The trustee shall report any of such investments on the return which under section 6033 it is required to file and shall with respect to any such investment furnish the information required by such return. See § 1.6033–1.

(c) *Portions of years.* A qualified status must be maintained throughout the entire taxable year of the trust in order for the trust to obtain any exemption for such year. But see section 401(a)(6) and § 1.401–3.

(d) *Plan of several employers.* A trust forming part of a plan of several employers for their employees will be qualified if all the requirements are otherwise satisfied.

(e) *Determination of exemptions and returns.* (1) An employees' trust may request a determination letter as to its qualification under section 401 and exemption under section 501. For the procedure for obtaining such a determination letter see paragraph (l) of § 601.201 of this chapter (Statement of Procedural Rules).

(2) A trust which qualifies under section 401(a) and which is exempt under section 501(a) must file a return in accordance with section 6033 and the regulations thereunder. See §§ 1.6033–1 and 1.6033–2(a)(3). In case such a trust realizes any unrelated business taxable income, as defined in section 512, such trust is also required to file a return

with respect to such income. See paragraph (e) of §1.6012–2 and paragraph (a)(5) of §1.6012–3 for requirements with respect to such returns. For information required to be furnished periodically by an employer with respect to the qualification of a plan, see §§1.404(a)–2, 1.404(a)–2A, and 1.6033–2(a)(2)(ii)*(i)*.

[T.D. 6500, 25 FR 11670, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10118, Sept. 17, 1963; T.D. 6722, 29 FR 5071, Apr. 14, 1964; T.D. 7168, 37 FR 5024, Mar. 9, 1972; T.D. 7428, 41 FR 34619, Aug. 16, 1976]

§1.401–2 Impossibility of diversion under the trust instrument.

(a) *In general.* (1) Under section 401(a)(2) a trust is not qualified unless under the trust instrument it is impossible (in the taxable year and at any time thereafter before the satisfaction of all liabilities to employees or their beneficiaries covered by the trust) for any part of the trust corpus or income to be used for, or diverted to, purposes other than for the exclusive benefit of such employees or their beneficiaries. This section does not apply to funds of the trust which are allocated to provide medical benefits described in section 401(h) as defined in paragraph (a) of §1.401–14. For the rules prohibiting diversion of such funds and the requirement of reversion to the employer after satisfaction of all liabilities under the medical benefits account, see paragraph (c) (4) and (5) of §1.401–14. For rules permitting reversion to the employer of amounts held in a section 415 suspense acount, see §1.401(a)–2(b).

(2) As used in section 401(a)(2), the phrase ''if under the trust instrument it is impossible'' means that the trust instrument must definitely and affirmatively make it impossible for the nonexempt diversion or use to occur, whether by operation or natural termination of the trust, by power of revocation or amendment, by the happening of a contingency, by collateral arrangement, or by any other means. Although it is not essential that the employer relinquish all power to modify or terminate the rights of certain employees covered by the trust, it must be impossible for the trust funds to be used or diverted for purposes other than for the exclusive benefit of his employees or their beneficiaries.

(3) As used in section 401(a)(2), the phrase ''purposes other than for the exclusive benefit of his employees or their beneficiaries'' includes all objects or aims not solely designed for the proper satisfaction of all liabilities to employees or their beneficiaries covered by the trust.

(b) *Meaning of ''liabilities''.* (1) The intent and purpose in section 401(a)(2) of the phrase ''prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust'' is to permit the employer to reserve the right to recover at the termination of the trust, and only at such termination, any balance remaining in the trust which is due to erroneous actuarial computations during the previous life of the trust. A balance due to an ''erroneous actuarial computation'' is the surplus arising because actual requirements differ from the expected requirements even though the latter were based upon previous actuarial valuations of liabilities or determinations of costs of providing pension benefits under the plan and were made by a person competent to make such determinations in accordance with reasonable assumptions as to mortality, interest, etc., and correct procedures relating to the method of funding. For example, a trust has accumulated assets of $1,000,000 at the time of liquidation, determined by acceptable actuarial procedures using reasonable assumptions as to interest, mortality, etc., as being necessary to provide the benefits in accordance with the provisions of the plan. Upon such liquidation it is found that $950,000 will satisfy all of the liabilities under the plan. The surplus of $50,000 arises, therefore, because of the difference between the amounts actuarially determined and the amounts actually required to satisfy the liabilities. This $50,000, therefore, is the amount which may be returned to the employer as the result of an erroneous actuarial computation. If, however, the surplus of $50,000 had been accumulated as a result of a change in the benefit provisions or in the eligibility requirements of the plan, the $50,000 could not revert to the employer because such surplus would not be the result of an erroneous actuarial computation.

(2) The term ''liabilities'' as used in section 401(a)(2) includes both fixed and contingent obligations to employees. For example, if 1,000 employees are covered by a trust forming part of a pension plan, 300 of whom have satisfied all the requirements for a monthly pension, while the remaining 700 employees have not yet completed the required period of service, contingent obligations to such 700 employees have nevertheless arisen which constitute ''liabilities'' within the meaning of that term. It must be impossible for the employer (or other non employee) to recover any amounts other than such amounts as remain in the trust because of ''erroneous actuarial computations'' after the satisfaction of all fixed and contingent obligations. Furthermore, the trust instrument must contain a definite affirmative provision to this effect, irrespective of whether the obligations to employees have their source in the trust instrument itself, in the plan of which the trust forms a part, or in some collateral instrument or arrangement forming a part of such plan, and regardless of whether such obligations are, technically speaking, liabilities of the employer, of the trust, or of some other person forming a part of the plan or connected with it.

[T.D. 6500, 25 FR 11672, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5072, Apr. 14, 1964; T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§ 1.401–3 Requirements as to coverage.

(a)(1) In order to insure that stock bonus, pension, and profit-sharing plans are utilized for the welfare of employees in general, and to prevent the trust device from being used for the principal benefit of shareholders, officers, persons whose principal duties consist in supervising the work of other employees, or highly paid employees, or as a means of tax avoidance, a trust will not be qualified unless it is part of a plan which satisfies the coverage requirements of section 401(a)(3). However, if the plan covers any individual who is an owner- employee, as defined in section 401(c)(3), the requirements of section 401(a)(3) and this section are not applicable to such plan, but the plan must satisfy the requirements of section 401(d) (see § 1.401–12).

(2) The percentage requirements in section 401(a)(3)(A) refer to a percentage of all the active employees, including employees temporarily on leave, such as those in the Armed Forces of the United States, if such employees are eligible under the plan.

(3) The application of section 401(a)(3)(A) may be illustrated by the following example:

Example. A corporation adopts a plan at a time when it has 1,000 employees. The plan provides that all full-time employees who have been employed for a period of two years and have reached the age of 30 shall be eligible to participate. The plan also requires participating employees to contribute 3 percent of their monthly pay. At the time the plan is made effective 100 of the 1,000 employees had not been employed for a period of two years. Fifty of the employees were seasonal employees whose customary employment did not exceed five months in any calendar year. Twenty-five of the employees were part-time employees whose customary employment did not exceed 20 hours in any one week. One hundred and fifty of the full-time employees who had been employed for two years or more had not yet reached age 30. The requirements of section 401(a)(3)(A) will be met if 540 employees are covered by the plan, as shown by the following computation:

(i) Total employees with respect to whom the percentage requirements are applicable (1,000 minus 175 (100 plus 50 plus 25))	825
(ii) Employees not eligible to participate because of age requirements	150
(iii) Total employees eligible to participate	675
(iv) Percentage of employees in item (i) eligible to participate	81+%
(v) Minimum number of participating employees to qualify the plan (80 percent of 675)	540

If only 70 percent, or 578, of the 825 employees satisfied the age and service requirements, then 462 (80 percent of 578) participating employees would satisfy the percentage requirements.

(b) If a plan fails to qualify under the percentage requirements of section 401(a)(3)(A), it may still qualify under section 401(a)(3)(B) provided always that (as required by section 401(a) (3) and (4)) the plan's eligibility conditions, benefits, and contributions do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or the highly compensated employees.

(c) Since, for the purpose of section 401, a profit-sharing plan is a plan which provides for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some event such as illness, disability, retirement, death, layoff, or severance of employment, employees who receive the amounts allocated to their accounts before the expiration of such a period of time or the occurrence of such a contingency shall not be considered covered by a profit-sharing plan in determining whether the plan meets the coverage requirements of section 401(a)(3) (A) and (B). Thus, in case a plan permits employees to receive immediately the amounts allocated to their accounts, or to have such amounts paid to a profit- sharing plan for them, the employees who receive the shares immediately shall not, for the purpose of section 401, be considered covered by a profit-sharing plan.

(d) Section 401(a)(5) sets out certain classifications that will not in themselves be considered discriminatory. However, those so designated are not intended to be exclusive. Thus, plans may qualify under section 401(a)(3)(B) even though coverage thereunder is limited to employees who have either reached a designated age or have been employed for a designated number of years, or who are employed in certain designated departments or are in other classifications, provided the effect of covering only such employees does not discriminate in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees. For example, if there are 1,000 employees, and the plan is written for only salaried employees, and consequently only 500 employees are covered, that fact alone will not justify the conclusion that the plan does not meet the coverage requirements of section 401(a)(3)(B). Conversely, if a contributory plan is offered to all of the employees but the contributions required of the employee participants are so burdensome as to make the plan acceptable only to the highly paid employees, the classification will be considered discriminatory in favor of such highly paid employees.

(e)(1) Section 401(a)(5) contains a provision to the effect that a classification shall not be considered discriminatory within the meaning of section 401(a)(3)(B) merely because all employees whose entire annual remuneration constitutes ‘‘wages’’ under section 3121(a)(1) (for purposes of the Federal Insurance Contributions Act, chapter 21 of the Code) are excluded from the plan. A reference to section 3121(a)(1) for years after 1954 shall be deemed a reference to section 1426(a)(1) of the Internal Revenue Code of 1939 for years before 1955. This provision, in conjunction with section 401(a)(3)(B), is intended to permit the qualification of plans which supplement the old-age, survivors, and disability insurance benefits under the Social Security Act (42 U.S.C. ch. 7). Thus, a classification which excludes all employees whose entire remuneration constitutes ‘‘wages’’ under section 3121(a)(1), will not be considered discriminatory merely because of such exclusion. Similarly, a plan which includes all employees will not be considered discriminatory solely because the contributions or benefits based on that part of their remuneration which is excluded from wages under section 3121(a)(1) differ from the contributions or benefits based on that part of their remuneration which is not so excluded. However, in making his determination with respect to discrimination in classification under section 401(a)(3)(B), the Commissioner will consider whether the total benefits resulting to each employee under the plan and under the Social Security Act, or under the Social Security Act only, establish an integrated and correlated retirement system satisfying the tests of section 401(a). If, therefore, a classification of employees under a plan results in relatively or proportionately greater benefits for employees earning above any specified salary amount or rate than for those below any such salary amount or rate, it may be found to be discriminatory within the meaning of section 401(a)(3)(B). If, however, the relative or proportionate differences in benefits which result from such classification are approximately offset by the old-age, survivors, and disability insurance benefits which are provided by the Social Security Act and which are not attributable to employee contributions under the Federal Insurance Contributions Act, the plan will be considered to be properly integrated with the Social Security Act and will, therefore, not be considered discriminatory.

(2)(i) For purposes of determining whether a plan is properly integrated with the Social Security Act, the amount of old-age, survivors, and disability insurance benefits which may be considered as attributable to employer contributions under the Federal Insurance Contributions Act is computed on the basis of the following:

(A) The rate at which the maximum monthly old-age insurance benefit is provided under the Social Security Act is considered to be the average of *(1)* the rate at which the maximum benefit currently payable under the Act (i.e., in 1971) is provided to an employee retiring at age 65, and *(2)* the rate at which the maximum benefit ultimately payable under the Act (i.e., in 2010) is provided to an employee retiring at age 65. The resulting figure is 43 percent of the average monthly wage on which such benefit is computed.

(B) The total old-age, survivors, and disability insurance benefits with respect to an employee is considered to be 162 percent of the employee's old-age insurance benefits. The resulting figure is 70 percent of the average monthly wage on which it is computed.

(C) In view of the fact that social security benefits are funded through equal contributions by the employer and employee, 50 percent of such benefits is considered attributable to employer contributions. The resulting figure is 35 percent of the average monthly wage on which the benefit is computed.

Under these assumptions, the maximum old-age, survivors, and disability insurance benefits which may be attributed to employer contributions under the Federal Insurance Contributions Act is an amount equal to 35 percent of the earnings on which they are computed. These computations take into account all amendments to the Society Security Act through the Social Security Amendments of 1971 (85 Stat. 6). It is recognized, however, that subsequent amendments to this Act may increase the percentages described in (A) or (B) of this subdivision (i), or both. If this occurs, the method used in this subparagraph for determining the integration formula may result in a figure under (C) of this subdivision (i) which is greater than 35 percent and a plan could be amended to adopt such greater figure in its benefit formula. In order to minimize future plan amendments of this nature, an employer may anticipate future changes in the Social Security Act by immediately utilizing such a higher figure, but not in excess of 37½ percent, in developing its benefit formula.

(ii) Under the rules provided in this subparagraph, a classification of employees under a noncontributory pension or annuity plan which limits coverage to employees whose compensation exceeds the applicable integration level under the plan will not be considered discriminatory within the meaning of section 401(a)(3)(B), where:

(A) The integration level applicable to an employee is his covered compensation, or is *(1)* in the case of an active employee, a stated dollar amount uniformly applicable to all active employees which is not greater than the covered compensation of any active employee, and *(2)* in the case of a retired employee an amount which is not greater than his covered compensation. (For rules relating to determination of an employee's covered compensation, see subdivision (iv) of this subparagraph.)

(B) The rate at which normal annual retirement benefits are provided for any employee with respect to his average annual compensation in excess of the plan's integration level applicable to him does not exceed 37½ percent.

(C) Average annual compensation is defined to mean the average annual compensation over the highest 5 consecutive years.

(D) There are no benefits payable in case of death before retirement.

(E) The normal form of retirement benefits is a straight life annuity, and if there are optional forms, the benefit payments under each optional form are actuarially equivalent to benefit payments under the normal form.

(F) In the case of any employee who reaches normal retirement age before completion of 15 years of service with the employer, the rate at which normal annual retirement benefits are provided for him with respect to his average annual compensation in excess of the plan's integration level applicable to him does not exceed 2½ percent for each year of service.

(G) Normal retirement age is not lower than age 65.

(H) Benefits payable in case of retirement or any other severance of employment before normal retirement age cannot exceed the actuarial equivalent of the maximum normal retirement benefits, which might be provided in accordance with (A) through (G) of this subdivision (ii), multiplied by a fraction, the numerator of which is the actual number of years of service of the employee at retirement or severance, and the denominator of which is the total number of years of service he would have had if he had remained in service until normal retirement age. A special disabled life mortality table shall not be used in determining the actuarial equivalent in the case of severance due to disability.

(iii) (A) If a plan was properly integrated with old-age and survivors insurance benefits on July 5, 1968 (hereinafter referred to as an ''existing plan''), then, notwithstanding the fact that such plan does not satisfy the requirements of subdivision (ii) of this subparagraph, it will continue to be considered properly integrated with such benefits until January 1, 1972. Such plan will be considered properly integrated after December 31, 1971, so long as the benefits provided under the plan for each employee equal the sum of—

(1) The benefits to which he would be entitled under a plan which, on July 5, 1968, would have been considered properly integrated with old-age and survivors insurance benefits, and under which benefits are provided at the same (or a lesser) rate with respect to the same portion of compensation with respect to which benefits are provided under the existing plan, multiplied by the percentage of his total service with the employer performed before a specified date not later than January 1, 1972; and

(2) The benefits to which he would be entitled under a plan satisfying the requirements of subdivision (ii) of this subparagraph, multiplied by the percentage of his total service with the employer performed on and after such specified date.

(B) A plan which, on July 5, 1968, was properly integrated with old-age and survivors insurance benefits will not be considered not to be properly integrated with such benefits thereafter merely because such plan provides a minimum benefit for each employee (other than an employee who owns, directly or indirectly, stock possessing more than 10 percent of the total combined voting power or value of all classes of stock of the employer corporation) equal to the benefit to which he would be entitled under the plan as in effect on July 5, 1968, if he continued to earn annually until retirement the same amount of compensation as he earned in 1967.

(C) If a plan was properly integrated with old-age and survivors insurance benefits on May 17, 1971, notwithstanding the fact that such plan does not satisfy the requirements of subdivision (ii) of this subparagraph, it will continue to be considered properly integrated with such benefits until January 1, 1972.

(iv) For purposes of this subparagraph, an employee's covered compensation is the amount of compensation with respect to which old-age insurance benefits would be provided for him under the Social Security Act (as in effect at any uniformly applicable date occurring before the employee's separation from the service) if for each year until he attains age 65 his annual compensation is at least equal to the maximum amount of earnings subject to tax in each such year under the Federal Insurance Contributions Act. A plan may provide that an employee's covered compensation is the amount determined under the preceding sentence rounded to the nearest whole multiple of a stated dollar amount which does not exceed $600.

(v) In the case of an integrated plan providing benefits different from those described in subdivision (ii) or (iii) (whichever is applicable) of this subparagraph, or providing benefits related to years of service, or providing benefits purchasable by stated employer contributions, or under the terms of which the employees contribute, or providing a combination of any of the foregoing variations, the plan will be considered to be properly integrated only if, as determined by the Commissioner, the benefits provided thereunder by employer contributions cannot exceed in value the benefits described in subdivision (ii) or (iii) (whichever is applicable) of this subparagraph. Similar principles will govern in determining whether a plan is properly integrated if participation therein is limited to employees earning in excess of amounts other than those specified in subdivision (iv) of this subparagraph, or if it bases benefits or contributions on compensation in excess of such amounts, or if it provides for an offset of benefits otherwise payable under the plan on account of old-age, survivors, and disability insurance benefits. Similar principles will govern in determining whether a profit-sharing or stock bonus plan is properly integrated with the Social Security Act.

(3) A plan supplementing the Social Security Act and excluding all employees whose entire annual remuneration constitutes ‘‘wages’’ under section 3121(a)(1) will not, however, be deemed discriminatory merely because, for administrative convenience, it provides a reasonable minimum benefit not to exceed $20 a month.

(4) Similar considerations, to the extent applicable in any case, will govern classifications under a plan supplementing the benefits provided by other Federal or State laws. See section 401(a)(5).

(5) If a plan provides contributions or benefits for a self-employed individual, the rules relating to the integration of such a plan with the contributions or benefits under the Social Security Act are set forth in paragraph (c) of § 1.401–11 and paragraph (h) of § 1.401–12.

(6) This paragraph (e) does not apply to plan years beginning on or after January 1, 1989.

(f) An employer may designate several trusts or a trust or trusts and an annuity plan or plans as constituting one plan which is intended to qualify under section 401(a)(3), in which case all of such trusts and plans taken as a whole may meet the requirements of such section. The fact that such combination of trusts and plans fails to qualify as one plan does not prevent such of the trusts and plans as qualify from meeting the requirements of section 401(a).

(g) It is provided in section 401(a)(6) that a plan will satisfy the requirements of section 401(a)(3), if on at least one day in each quarter of the taxable year of the plan it satisfies such requirements. This makes it possible for a new plan requiring contributions from employees to qualify if by the end of the quarter-year in which the plan is adopted it secures sufficient contributing participants to meet the requirements of section 401(a)(3). It also affords a period of time in which new participants may be secured to replace former participants, so as to meet the requirements of either subparagraph (A) or (B) of section 401(a)(3).

[T.D. 6500, 25 FR 11672, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10119, Sept. 17, 1963; T.D. 6982, 33 FR 16499, Nov. 13, 1968; T.D. 7134, 36 FR 13592, July 22, 1971; 36 FR 13990, July 29, 1971; T.D. 8359, 56 FR 47614, Sept. 19, 1991]

§ 1.401–4 Discrimination as to contributions or benefits (before 1994).

(a)(1)(i) In order to qualify under section 401(a), a trust must not only meet the coverage requirements of section 401(a)(3), but, as provided in section 401(a)(4), it must also be part of a plan under which there is no discrimination in contributions or benefits in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees as against other employees whether within or without the plan.

(ii) Since, for the purpose of section 401, a profit-sharing plan is a plan which provides for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some event such as illness, disability, retirement, death, layoff, or severance of employment, any amount allocated to an employee which is withdrawn before the expiration of such a period of time or the occurrence of such a contingency shall not be considered in determining whether the contributions under the plan discriminate in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees. Thus, in case a plan permits employees to receive immediately the whole or any part of the amounts allocated to their accounts, or to have the whole or any part of such amounts paid to a profit-sharing plan for them, any amounts which are received immediately shall not, for the purpose of section 401, be considered contributed to a profit-sharing plan.

(iii) Funds in a stock bonus or profit-sharing plan arising from forfeitures on termination of service, or other reason, must not be allocated to the remaining participants in such a manner as will effect the prohibited discrimination. With respect to forfeitures in a pension plan, see §1.401–7.

(2)(i) Section 401(a)(5) sets out certain provisions which will not in and of themselves be discriminatory within the meaning of section 401 a) (3) or (4). See §1.401–3. Thus, a plan will not be considered discriminatory merely because the contributions or benefits bear a uniform relationship to total compensation or to the basic or regular rate of compensation, or merely because the contributions or benefits based on that part of the annual compensation of employees which is subject to the Federal Insurance Contributions Act (chapter 21 of the Code) differ from the contributions or benefits based on any excess of such annual compensation over such part. With regard to the application of the rules of section 401(a)(5) in the case of a plan which benefits a self-employed individual, see paragraph (c) of §1.401–11.

(ii) The exceptions specified in section 401(a)(5) are not an exclusive enumeration, but are merely a recital of provisions frequently encountered which will not of themselves constitute forbidden discrimination in contributions or benefits.

(iii) Variations in contributions or benefits may be provided so long as the plan, viewed as a whole for the benefit of employees in general, with all its attendant circumstances, does not discriminate in favor of employees within the enumerations with respect to which discrimination is prohibited. Thus, benefits in a stock bonus or profit-sharing plan which vary by reason of an allocation formula which takes into consideration years of service, or other factors, are not prohibited unless they discriminate in favor of such employees.

(b) A plan which excludes all employees whose entire remuneration constitutes wages under section 3121(a)(1) (relating to the Federal Insurance Contributions Act), or a plan under which the contributions or benefits based on that part of an employee’s remuneration which is excluded from ‘‘wages’’ under such act differs from the contributions or benefits based on that part of the employee’s remuneration which is not so excluded, or a plan under which the contributions or benefits differ because of any retirement benefit created under State or Federal law, will not be discriminatory because of such exclusion or difference, provided the total benefits resulting under the plan and under such law establish an integrated and correlated retirement system satisfying the tests of section 401(a).

(c)(1) Although a qualified plan may provide for termination at will by the employer or discontinuance of contributions thereunder, this will not of itself prevent a trust from being a qualified trust. However, a qualified pension plan must expressly incorporate provisions which comply with the restrictions contained in subparagraph (2) of this paragraph at the time the plan is established, unless (i) it is reasonably certain at the inception of the plan that such restrictions would not affect the amount of contributions which may be used for the benefit of any employee, or (ii) the Commissioner determines that such provisions are not necessary to prevent the prohibited discrimination that may occur in the event of any early termination of the plan. Although these provisions are the only provisions required to be incorporated in the plan to prevent the discrimination that may arise because of an early termination of the plan, the plan may in operation result in the discrimination prohibited by section 401(a)(4), unless other provisions are later incorporated in the plan. Any pension plan containing a provision described in this paragraph shall not fail to satisfy section 411(a), (d)(2) and (d)(3) merely by reason of such a plan provision. Paragraph (c)(7) of this section sets forth special early termination rules applicable to certain qualified defined benefit plans for plan years affected by the Employee Retirement Income Security Act of 1974 (''ERISA''). Paragraph (c)(7) of this section does not contain all the rules required by the enactment of ERISA.

(2)(i) If employer contributions under a qualified pension plan may be used for the benefit of an employee who is among the 25 highest paid employees of the employer at the time the plan is established and whose anticipated annual pension under the plan exceeds $1,500, such plan must provide that upon the occurrence of the conditions described in subdivision (ii) of this subparagraph, the employer contributions which are used for the benefit of any such employee are restricted in accordance with subdivision (iii) of this subparagraph.

(ii) The restrictions described in subdivision (iii) of this subparagraph become applicable if—

(A) The plan is terminated within 10 years after its establishment,

(B) The benefits of an employee described in subdivision (i) of this subparagraph become payable within 10 years after the establishment of the plan, or

(C) The benefits of an employee described in subdivision (i) of this subparagraph become payable after the plan has been in effect for 10 years, and the full current costs of the plan for the first 10 years have not been funded. In the case of an employee described in (B) of this subdivision, the restrictions will remain applicable until the plan has been in effect for 10 years, but if at that time the full current costs have been funded the restrictions will no longer apply to the benefits payable to such an employee. In the case of an employee described in (B) or (C) of this subdivision, if at the end of the first 10 years the full current costs are not met, the restrictions will continue to apply until the full current costs are funded for the first time.

(iii) The restrictions required under subdivision (i) of this subparagraph must provide that the employer contributions which may be used for the benefit of an employee described in such subdivision shall not exceed the greater of $20,000, or 20 percent of the first $50,000 of the annual compensation of such employee multiplied by the number of years between the date of the establishment of the plan and—

(A) The date of the termination of the plan,

(B) In the case of an employee described in subdivision (ii)(B) of this subparagraph, the date the benefit of the employee becomes payable, if before the date of the termination of the plan, or

(C) In the case of an employee described in subdivision (ii)(C) of this subparagraph, the date of the failure to meet the full current costs of the plan. However, if the full current costs of the plan have not been met on the date described in (A) or (B) of this subdivision, whichever is applicable, then the date of the failure to meet such full current costs shall be substituted for the date referred to in (A) or (B) of this subdivision. For purposes of determining the contributions which may be used for the benefit of an employee when (b) of this subdivision applies, the number of years taken into account may be recomputed for each year if the full current costs of the plan are met for such year.

(iv) For purposes of this subparagraph, the employer contributions which, at a given time, may be used for the benefits of an employee include any unallocated funds which would be used for his benefits if the plan were then terminated or the employee were then to withdraw from the plan, as well as all contributions allocated up to that time exclusively for his benefits.

(v) The provisions of this subparagraph apply to a former or retired employee of the employer, as well as to an employee still in the employer's service.

(vi) The following terms are defined for purposes of this subparagraph—

(A) The term ''benefits'' includes any periodic income, any withdrawal values payable to a living employee, and the cost of any death benefits which may be payable after retirement on behalf of an employee, but does not include the cost of any death benefits with respect to an employee before retirement nor the amount of any death benefits actually payable after the death of an employee whether such death occurs before or after retirement.

(B) The term *full current costs* means the normal cost, as defined in §1.404(a)–6, for all years since the effective date of the plan, plus interest on any unfunded liability during such period.

(C) The term *annual compensation* of an employee means either such employee's average regular annual compensation, or such average compensation over the last five years, or such employee's last annual compensation if such compensation is reasonably similar to his average regular annual compensation for the five preceding years.

(3) The amount of the employer contributions which can be used for the benefit of a restricted employee may be limited either by limiting the annual amount of the employer contributions for the designated employee during the period affected by the limitation, or by limiting the amount of funds under the plan which can be used for the benefit of such employee, regardless of the amount of employer contributions.

(4) The restrictions contained in subparagraph (2) of this paragraph may be exceeded for the purpose of making current retirement income benefit payments to retired employees who would otherwise be subject to such restrictions, if—

(i) The employer contributions which may be used for any such employee in accordance with the restrictions contained in subparagraph (2) of this paragraph are applied either (A) to provide level amounts of annuity in the basic form of benefit provided for under the plan for such employee at retirement (or, if he has already retired, beginning immediately), or (B) to provide level amounts of annuity in an optional form of benefit provided under the plan if the level amount of annuity under such optional form of benefit is not greater than the level amount of annuity under the basic form of benefit provided under the plan;

(ii) The annuity thus provided is supplemented, to the extent necessary to provide the full retirement income benefits in the basic form called for under the plan, by current payments to such employee as such benefits come due; and

(iii) Such supplemental payments are made at any time only if the full current costs of the plan have then been met, or the aggregate of such supplemental payments for all such employees does not exceed the aggregate employer contributions already made under the plan in the year then current.

If disability income benefits are provided under the plan, the plan may contain like provisions with respect to the current payment of such benefits.

(5) If a plan has been changed so as to increase substantially the extent of possible discrimination as to contributions and as to benefits actually payable in event of the subsequent termination of the plan or the subsequent discontinuance of contributions thereunder, then the provisions of this paragraph shall be applied to the plan as so changed as if it were a new plan established on the date of such change. However, the provision in subparagraph (2)(iii) of this paragraph that the unrestricted amount of employer contributions on behalf of any employee is at least $20,000 is applicable to the aggregate amount contributed by the employer on behalf of such employee from the date of establishment of the original plan, and, for purposes of determining if the employee's anticipated annual pension exceeds $1,500, both the employer contributions on the employee's behalf prior to the date of the change in the plan and those expected to be made on his behalf subsequent to the date of the change (based on the employee's rate of compensation on the date of the change) are to be taken into account.

(6) This paragraph shall apply to taxable years of a qualified plan commencing after September 30, 1963. In the case of an early termination of a qualified pension plan during any such taxable year, the employer contributions which may be used for the benefit

of any employee must conform to the requirements of this paragraph. However, any pension plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed in this paragraph.

(7)(i) A qualified defined benefit plan subject to section 412 (without regard to section 412(h)(2)) shall not be required to contain the restriction described in paragraph (c)(2)(ii)(*c*) of this section applicable to an employee in a plan whose full current costs for the first 10 years have not been funded.

(ii) A qualified defined benefit plan covered by section 4021(a) of ERISA (''qualified Title IV plan'') shall satisfy the restrictions in paragraph (c)(2) of this section only if the plan satisfies this paragraph (c)(7). A plan satisfies this paragraph (c)(7) by providing that employer contributions which may be used for the benefit of an employee described in paragraph (c)(2) of this section who is a substantial owner, as defined in section 4022(b)(5) of ERISA, shall not exceed the greater of the dollar amount described in paragraph (c)(2)(iii) of this section or a dollar amount which equals the present value of the benefit guaranteed for such employee under section 4022 of ERISA, or if the plan has not terminated, the present value of the benefit that would be guaranteed if the plan terminated on the date the benefit commences, determined in accordance with regulations of the Pension Benefit Guaranty Corporation (''PBGC'').

(iii) A plan satisfies this paragraph (c)(7) by providing that employer contributions which may be used for the benefit of all employees described in paragraph (c)(2) of this section (other than an employee who is a substantial owner as defined in section 4022(b)(5) of ERISA) shall not exceed the greater of the dollar amount described in paragraph (c)(2)(iii) of this section or a dollar amount which equals the present value of the maximum benefit described in section 4022(b)(3)(B) of ERISA (determined on the date the plan terminates or on the date benefits commence, whichever is earlier and determined in accordance with regulations of PBGC) without regard to any other limitations in section 4022 of ERISA.

(iv) A plan provision satisfying this paragraph (c)(7) may be adopted by amendment or by incorporation at the time of establishment. Any allocation of assets attributable to employer contributions to an employee which exceeds the dollar limitation in this paragraph (c)(7) may be reallocated to prevent prohibited discrimination.

(v) The early termination rules in the preceding subparagraphs (1) through (6) apply to a qualified Title IV plan except where such rules are determined by the Commissioner to be inconsistent with the rules of this paragraph (c)(7), § 1.411(d)–2, and section 4044(b)(4) of ERISA. The early termination rules of this paragraph (c)(7) contain some of the rules under section 401(a)(4) and (a)(7), as in effect on September 2, 1974, and section 411(d) (2) and (3). Section 1.411(d)–2 also contains certain discrimination and vesting rules which are applicable to plan terminations.

(vi) Paragraph (c)(7) of this section applies to plan terminations occurring on or after March 12, 1984. For distributions not on account of plan terminations, paragraph (c)(7) applies to distributions in plan years beginning after December 31, 1983. However, a plan may elect to apply that paragraph to distributions not on account of plan termination on or after January 10, 1984.

(d)(1) Except as provided in paragraph (d)(2) of this section, the provisions of this section do not apply to plan years beginning on or after January 1, 1994. For rules applicable to plan years beginning on or after January 1, 1994, see §§ 1.401(a)(4)–1 through 1.401(a)(4)–13.

(2) In the case of plans maintained by organizations exempt from income taxation under section 501(a), including plans subject to section 403(b)(12)(A)(i) (nonelective plans), the provisions of this section do not apply to plan years beginning on or after January 1, 1996.

For rules applicable to plan years beginning on or after January 1, 1996, see §§1.401(a)(4)–1 through 1.401(a)(4)–13.

(Secs. 411 (d)(2) and (3) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 88 Stat. 912; 26 U.S.C. 411(d)(2) and (3) and 7805))

[T.D. 6500, 25 FR 11674, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10119, Sept. 17, 1963; T.D. 7934, 49 FR 1183, Jan. 10, 1984; 49 FR 2104, Jan. 18, 1984; T.D. 8360, 56 FR 47536, Sept. 19, 1991; T.D. 8485, 58 FR 46778, Sept. 3, 1993]

§1.401–5 Period for which requirements of section 401(a) (3), (4), (5), and (6) are applicable with respect to plans put into effect before September 2, 1974.

A pension, profit-sharing, stock bonus, or annuity plan shall be considered as satisfying the requirements of section 401(a) (3), (4), (5), and (6) for the period beginning with the date on which it was put into effect and ending with the 15th day of the third month following the close of the taxable year of the employer in which the plan was put into effect, if all the provisions of the plan which are necessary to satisfy such requirements are in effect by the end of such period and have been made effective for all purposes with respect to the whole of such period. Thus, if an employer in 1954 adopts such a plan as of January 1, 1954, and makes a return on the basis of the calendar year, he will have until March 15, 1955, to amend his plan so as to make it satisfy the requirements of section 401(a) (3), (4), (5), and (6) for the calendar year 1954 provided that by March 15, 1955, all provisions of such plan necessary to satisfy such requirements are in effect and have been made retroactive for all purposes to January 1, 1954, the effective date of the plan. If an employer is on a fiscal year basis, for example, April 1 to March 31, and in 1954 adopts such a plan effective as of April 1, 1954, he will have until June 15, 1955, to amend his plan so as to make it satisfy the requirements of section 401(a) (3), (4), (5), and (6) for the fiscal year beginning April 1, 1954, provided that by June 15, 1955, all provisions of such plan necessary to satisfy such requirements are in effect and have been made retroactive for all purposes to April 1, 1954, the effective date of the plan. It should be noted that under section 401(b) the period in which a plan may be amended to qualify under section 401(a) ends before the date on which taxpayers other than corporations are required to file income tax returns. See section 6072. This section shall not apply to any pension, profit-sharing, stock bonus, or annuity plan put into effect after September 1, 1974, and shall not apply with respect to any disqualifying provision to which §1.401(b)–1 applies.

[T.D. 6500, 25 FR 11674, Nov. 26, 1960; as amended by T.D. 7436, 41 FR 42653, Sept. 28, 1976]

§1.401–6 Termination of a qualified plan.

(a) *General rules.* (1) In order for a pension, profit-sharing, or stock bonus trust to satisfy the requirements of section 401, the plan of which such trust forms a part must expressly provide that, upon the termination of the plan or upon the complete discontinuance of contributions under the plan, the rights of each employee to benefits accrued to the date of such termination or discontinuance, to the extent then funded, or the rights of each employee to the amounts credited to his account at such time, are nonforfeitable. As to what constitutes nonforfeitable rights of an employee, see paragraph (a)(2) of §1.402(b)–1.

(2)(i) A qualified plan must also provide for the allocation of any previously unallocated funds to the employees covered by the plan upon the termination of the plan or the complete discontinuance of contributions under the plan. Such provision may be incorporated in the plan at its inception or by an amendment made prior to the termination of the plan or the discontinuance of contributions thereunder.

(ii) Any provision for the allocation of unallocated funds is acceptable if it specifies the method to be used and does not conflict with the provisions of section 401(a)(4) and the regulations thereunder. The allocation of unallocated funds may be in cash or in the form of other benefits provided under the plan. However, the allocation of the funds contributed by the employer among the employees need not necessarily benefit all the employees covered by the plan. For example, an allocation may be satisfactory if priority is given to benefits for employees over the age of 50 at the time of the termination of the plan, or those who then have at least 10 years of service, if there is no possibility of discrimination in favor of employees who are officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees.

(iii) Subdivisions (i) and (ii) of this subparagraph do not require the allocation of amounts to the account of any employee if such amounts are not required to be used to satisfy the liabilities with respect to employees and their beneficiaries under the plan (see section 401(a)(2)).

(b) *Termination defined.* (1) Whether a plan is terminated is generally a question to be determined with regard to all the facts and circumstances in a particular case. For example, a plan is terminated when, in connection with the winding up of the employer's trade or business, the employer begins to discharge his employees. However, a plan is not terminated, for example, merely because an employer consolidates or replaces that plan with a comparable plan. Similarly, a plan is not terminated merely because the employer sells or otherwise disposes of his trade or business if the acquiring employer continues the plan as a separate and distinct plan of its own, or consolidates or replaces that plan with a comparable plan. See paragraph (d)(4) of § 1.381(c)(11)–1 for the definition of comparable plan. In addition, the Commissioner may determine that other plans are comparable for purposes of this section.

(2) For purposes of this section, the term *termination* includes both a partial termination and a complete termination of a plan. Whether or not a partial termination of a qualified plan occurs when a group of employees who have been covered by the plan are subsequently excluded from such coverage either by reason of an amendment to the plan, or by reason of being discharged by the employer, will be determined on the basis of all the facts and circumstances. Similarly, whether or not a partial termination occurs when benefits or employer contributions are reduced, or the eligibility or vesting requirements under the plan are made less liberal, will be determined on the basis of all the facts and circumstances. However, if a partial termination of a qualified plan occurs, the provisions of section 401(a)(7) and this section apply only to the part of the plan that is terminated.

(c) *Complete discontinuance defined.* (1) For purposes of this section, a complete discontinuance of contributions under the plan is contrasted with a suspension of contributions under the plan, which is merely a temporary cessation of contributions by the employer. A complete discontinuance of contributions may occur although some amounts are contributed by the employer under the plan if such amounts are not substantial enough to reflect the intent on the part of the employer to continue to maintain the plan. The determination of whether a complete discontinuance of contributions under the plan has occurred will be made with regard to all the facts and circumstances in the particular case, and without regard to the amount of any contributions made under the plan by employees.

(2) In the case of a pension plan, a suspension of contributions will not constitute a discontinuance if—

(i) The benefits to be paid or made available under the plan are not affected at any time by the suspension, and

(ii) The unfunded past service cost at any time (which includes the unfunded prior normal cost and unfunded interest on any unfunded cost) does not exceed the unfunded past service cost as of the date of establishment of the plan, plus any additional past service or supplemental costs added by amendment.

(3) In any case in which a suspension of a profit-sharing plan is considered a discontinuance, the discontinuance becomes effective not later than the last day of the taxable year of the employer following the last taxable year of such employer for which a substantial contribution was made under the profit-sharing plan.

(d) *Contributions or benefits which remain forfeitable.* The provisions of this section do not apply to amounts which are reallocated to prevent the discrimination prohibited by section 401(a)(4) (see paragraph (c) of §1.401–4).

(e) *Effective date.* This section shall apply to taxable years of a qualified plan commencing after September 30, 1963. In the case of the termination or complete discontinuance (as defined in this section) of any qualified plan during any such taxable year, the rights accorded to each employee covered under the plan must conform to the requirements of this section. However, a plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed by this section.

[T.D. 6675, 28 FR 10120, Sept. 17, 1963]

§1.401–7 Forfeitures under a qualified pension plan.

(a) *General rules.* In the case of a trust forming a part of a qualified pension plan, the plan must expressly provide that forfeitures arising from severance of employment, death, or for any other reason, must not be applied to increase the benefits any employee would otherwise receive under the plan at any time prior to the termination of the plan or the complete discontinuance of employer contributions thereunder. The amounts so forfeited must be used as soon as possible to reduce the employer's contributions under the plan. However, a qualified pension plan may anticipate the effect of forfeitures in determining the costs under the plan. Furthermore, a qualified plan will not be disqualified merely because a determination of the amount of forfeitures under the plan is made only once during each taxable year of the employer.

(b) *Examples.* The rules of paragraph (a) of this section may be illustrated by the following examples:

Example (1). The B Company Pension Trust forms a part of a pension plan which is funded by individual level annual premium annuity contracts. The plan requires ten years of service prior to obtaining a vested right to benefits under the plan. One of the company's employees resigns his position after two years of service. The insurance company paid to the trustees the cash surrender value of the contract—$750. The B Company must reduce its next contribution to the pension trust by this amount.

Example (2). The C Corporation's trusteed pension plan has been in existence for 20 years. It is funded by individual contracts issued by an insurance company, and the premiums thereunder are paid annually. Under such plan, the annual premium accrued for the year 1966 is due and is paid on January 2, 1966, and on July 1 of the same year the plan is terminated due to the liquidation of the employer. Some forfeitures were incurred and collected by the trustee with respect to those participants whose employment terminated between January 2 and July 1. The plan provides that the amount of such forfeitures is to be applied to provide additional annuity benefits for the remaining employees covered by the plan. The pension plan of the C Corporation satisfies the provisions of section 401(a)(8). Although forfeitures are used to increase benefits in this case, this use of forfeitures is permissible since no further contributions will be made under the plan.

(c) *Effective date.* This section applies to taxable years of a qualified plan commencing after September 30, 1963. However, a plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed by this section.

[T.D. 6675, 28 FR 10121, Sept. 17, 1963]

§1.401–8 Custodial accounts prior to January 1, 1974.

(a) *Treatment of a custodial account as a qualified trust.* For taxable years of a plan beginning after December 31, 1962, a custodial account may be used, in lieu of a trust, under any pension, profit-sharing, or stock bonus plan, described in section 401 if the requirements of paragraph (b) of this section are met. A custodial account may be used under such a plan, whether the plan covers common-law employees, self-employed individuals who are treated as employees by reason of section 401(c), or both. The use of a custodial account as part of a plan does not preclude the use of a trust or another custodial account as part of the same plan. A plan under which a custodial account is used may be considered in connection with other plans of the employer in determining whether the requirements of section 401 are satisfied. For regulations relating to the period after December 31, 1973, see §1.401(f)–11.

(b) *Rules applicable to custodial accounts.* (1) A custodial account shall be treated for taxable years beginning after December 31, 1962, as a qualified trust under section 401 if such account meets the following requirements described in subdivisions (i) through (iii) of this subparagraph:

(i) The custodial account must satisfy all the requirements of section 401 that are applicable to qualified trusts. See subparagraph (2) of this paragraph.

(ii) The custodian of the custodial account must be a bank.

(iii) The custodial agreement provides that the investment of the funds in the account is to be made—

(A) Solely in stock of one or more regulated investment companies which is registered in the name of the custodian or its nominee and with respect to which an employee who is covered by the plan is the beneficial owner, or

(B) Solely in annuity, endowment, or life insurance contracts, issued by an insurance company and held by the custodian until distributed pursuant to the terms of the plan. For purposes of the preceding sentence, a face-amount certificate described in section 401(g) and § 1.401–9 is treated as an annuity issued by an insurance company.

See subparagraphs (3) and (4) of this paragraph.

(2) As a result of the requirement described in subparagraph (1)(i) of this paragraph (relating to the requirements applicable to qualified trusts), the custodial account must, for example, be created pursuant to a written agreement which constitutes a valid contract under local law. In addition, the terms of the contract must make it impossible, prior to the satisfaction of all liabilities with respect to the employees and their beneficiaries covered by the plan, for any part of the funds of the custodial account to be used for, or diverted to, purposes other than for the exclusive benefit of the employees or their beneficiaries as provided for in the plan (see paragraph (a) of § 1.401–2).

(3) The requirement described in subparagraph (1)(iii) of this paragraph, relating to the investment of the funds of the plan, applies, for example, to the employer contributions under the plan, any employee contributions under the plan, and any earnings on such contributions. Such requirement also applies to capital gains realized upon the sale of stock described in (A) of such subdivision, to any capital gain dividends received in connection with such stock, and to any refunds described in section 852(b)(3)(D)(ii) (relating to undistributed capital gains of a regulated investment company) which is received in connection with such stock. However, since such requirement relates only to the investment of the funds of the plan, the custodian may deposit funds with a bank, in either a checking or savings account, while accumulating sufficient funds to make additional investments or while awaiting an appropriate time to make additional investments.

(4) The requirement in subparagraph (1)(iii)(A) of this paragraph that an employee covered by the plan be the beneficial owner of the stock does not mean that the employee who is the beneficial owner must have a nonforfeitable interest in the stock. Thus, a plan may provide for forfeitures of an employee's interest in such stock in the same manner as plans which use a trust. In the event of a forfeiture of an employee's beneficial ownership in the stock of a regulated investment company, the beneficial ownership of such stock must pass to another employee covered by the plan.

(c) *Effects of qualification.* (1) Any custodial account which satisfies the requirements of section 401(f) shall be treated as a qualified trust for all purposes of the Internal Revenue Code of 1954. Accordingly, such a custodial account shall be treated as a separate legal person which is exempt from the income tax by section 501(a). On the other hand, such a custodial account is required to file the returns described in sections 6033 and 6047 and to supply any other information which a qualified trust is required to furnish.

(2) In determining whether the funds of a custodial account are distributed or made available to an employee or his beneficiary, the rules which under section 402(a) are applicable to trusts will also apply to the custodial account as though it were a separate legal person and not an agent of the employee.

(d) *Effect of loss of qualification.* If a custodial account which has qualified under section 401 fails to qualify under such section for any taxable year, such custodial account will not thereafter be treated as a separate legal person, and the funds in such account shall be treated as made available within the meaning of section 402(a)(1) to the employees for whom they are held.

(e) *Definitions.* For purposes of this section—

(1) The term *bank* means a bank as defined in section 401(d)(1).

(2) The term *regulated investment company* means any domestic corporation which issues only redeemable stock and is a regulated investment company within the meaning of section 851(a) (but without regard to whether such corporation meets the limitations of section 851(b)).

(Secs. 401(f)(2), 7805, Internal Revenue Code of 1954 (88 Stat. 939 and 68A Stat. 917; 26 U.S.C. 401(f)(2), 7805))

[T.D. 6675, 28 FR 10121, Sept. 17, 1963, as amended by T.D. 7565, 43 FR 41204, Sept. 15, 1978. Redesignated and amended by T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§1.401–9 Face-amount certificates—nontransferable annuity contracts.

(a) *Face-amount certificates treated as annuity contracts.* Section 401(g) provides that a face-amount certificate (as defined in section 2(a)(15) of the Investment Company Act of 1940 (15 U.S.C. sec. 80a–2)) which is not transferable within the meaning of paragraph (b)(3) of this section shall be treated as an annuity contract for purposes of sections 401 through 404 for any taxable year of a plan subject to such sections beginning after December 31, 1962. Accordingly, there may be established for any such taxable year a qualified plan under which such face-amount certificates are purchased for the participating employees without the creation of a trust or custodial account. However, for such a plan to qualify, the plan must satisfy all the requirements applicable to a qualified annuity plan (see section 403(a) and the regulations thereunder).

(b) *Nontransferability of face-amount certificates and annuity contracts.* (1)(i) Section 401(g) provides that, in order for any face-amount certificate, or any other contract issued after December 31, 1962, to be subject to any provision under sections 401 through 404 which is applicable to annuity contracts, as compared to other forms of investment, such certificate or contract must be nontransferable at any time when it is held by any person other than the trustee of a trust described in section 401(a) and exempt under section 501(a). Thus, for example, in order for a group or individual retirement income contract to be treated as an annuity contract, if such contract is not held by the trustee of an exempt employees' trust, it must satisfy the requirements of this section. Furthermore, a face-amount certificate or an annuity contract will be subject to the tax treatment under section 403(b) only if it satisfies the requirements of section 401(g) and this section. Any certificate or contract in order to satisfy the provisions of this section must expressly contain the provisions that are necessary to make such certificate or contract not transferable within the meaning of this paragraph.

(ii) In the case of any group contract purchased by an employer under a plan to which sections 401 through 404 apply, the restriction on transferability required by section 401(g) and this section applies to the interest of the employee participants under such group contract but not to the interest of the employer under such contract.

(2) If a trust described in section 401(a) which is exempt from tax under section 501(a) distributes any annuity, endowment, retirement income, or life insurance contract, then the rules relating to the taxability of the distributee of any such contract are set forth in paragraph (a)(2) of §1.402(a)–1.

(3) A face-amount certificate or an annuity contract is transferable if the owner can transfer any portion of his interest in the certificate or contract to any person other than the issuer thereof. Accordingly, such a certificate or contract is transferable if the owner can sell, assign, discount, or pledge as collateral for a loan or as security for the performance of an obligation or for any other purpose his interest in the certificate or contract to any person other than the issuer thereof. On the other hand, for purposes of section 401(g), a face-amount certificate or annuity contract is not considered to be transferable merely because such certificate or contract, or the plan of

which it is a part, contains a provision permitting the employee to designate a beneficiary to receive the proceeds of the certificate or contract in the event of his death, or contains a provision permitting the employee to elect to receive a joint and survivor annuity, or contains other similar provisions.

(4) A material modification in the terms of an annuity contract constitutes the issuance of a new contract regardless of the manner in which it is made.

(c) *Examples.* The rules of this section may be illustrated by the following examples:

Example (1). The P Employees' Annuity Plan is a nontrusteed plan which is funded by individual annuity contracts issued by the Y Insurance Company. Each annuity contract issued by such company after December 31, 1962, provides, on its face, that it is ''NOT TRANSFERABLE''. The terms of each such contract further provide that, ''This contract may not be sold, assigned, discounted, or pledged as collateral for a loan or as security for the performance of an obligation or for any other purpose, to any person other than this company.'' The annuity contracts of the P Employees' Annuity Plan satisfy the requirements of section 401(g) and this section.

Example (2). The R Company Pension Trust forms a part of a pension plan which is funded by individual level premium annuity contracts. Such contracts are purchased by the trustee of the R Company Pension Trust from the Y Insurance Company. The trustee of the R Company Pension Trust is the legal owner of each such contract at all times prior to the distribution of such contract to a qualifying annuitant. The trustee purchases such a contract on January 3, 1963, in the name of an employee who qualifies on that date for coverage under the plan. At the time such contract is purchased, and while the contract is held by the trustee of the R Company Pension Trust, the contract does not contain any restrictions with respect to its transferability. The annuity contract purchased by the trustee of the R Company Pension Trust satisfies the requirements of section 401(g) and this section while it is held by the trustee.

Example (3). A is the trustee of the X Corporation's Employees' Pension Trust. The trust forms a part of a pension plan which is funded by individual level premium annuity contracts. The trustee is the legal owner of such contracts, but the employees covered under the plan obtain beneficial interests in such contracts after ten years of service with the X Corporation. On January 15, 1980, A distributes to D an annuity contract issued to A in D's name on June 25, 1959, and distributes to E an annuity contract issued to A in E's name on September 30, 1963. The contract issued to D need not be nontransferable, but the contract issued to E must be nontransferable in order to satisfy the requirements of section 401(g) and this section.

Example (4). The corpus of the Y Corporation's Employees' Pension Plan consists of individual insurance contracts in the names of the covered employees and an auxiliary fund which is used to convert such policies to annuity contracts at the time a beneficiary of such trust retires. F retires on June 15, 1963, and the trustee converts the individual insurance contract on F's life to a life annuity which is distributed to him. The life annuity issued on F's life must be nontransferable in order to satisfy the requirements of section 401(g) and this section.

[T.D. 6675, 28 FR 10122, Sept. 17, 1963]

§ 1.401–10 Definitions relating to plans covering self-employed individuals.

(a) *In general.* (1) Certain self-employed individuals may be covered by a qualified pension, annuity, or profit-sharing plan for taxable years beginning after December 31, 1962. This section contains definitions relating to plans covering self-employed individuals. The provisions of §§ 1.401–1 through 1.401–9, relating to requirements which are applicable to all qualified plans, are also generally applicable to any plan covering a self-employed individual. However, in addition to such requirements, any plan covering a self-employed individual is subject to the rules contained in §§ 1.401–11 through 1.401–13. Section 1.401–11 contains general rules which are applicable to any plan covering a self-employed individual who is an employee within the meaning of paragraph (b) of this section. Section 1.401–12 contains special rules which are applicable to plans covering self-employed individuals when one or more of such individuals is an owner-employee within the meaning of paragraph (d) of this section. Section 1.401–13 contains rules relating to excess contributions by, or for, an owner-employee. The provisions of this section and of §§ 1.401–11 through 1.401–13 are applicable to taxable years beginning after December 31, 1962.

(2) A self-employed individual is covered under a qualified plan during the period beginning with the date a contribution is first made by, or for, him

under the qualified plan and ending when there are no longer funds under the plan which can be used to provide him or his beneficiaries with benefits.

(b) *Treatment of a self-employed individual as an employee.* (1) For purposes of section 401, a self-employed individual who receives earned income from an employer during a taxable year of such employer beginning after December 31, 1962, shall be considered an employee of such employer for such taxable year. Moreover, such an individual will be considered an employee for a taxable year if he would otherwise be treated as an employee but for the fact that the employer did not have net profits for that taxable year. Accordingly, the employer may cover such an individual under a qualified plan during years of the plan beginning with or within a taxable year of the employer beginning after December 31, 1962.

(2) If a self-employed individual is engaged in more than one trade or business, each such trade or business shall be considered a separate employer for purposes of applying the provisions of sections 401 through 404 to such individual. Thus, if a qualified plan is established for one trade or business but not the others, the individual will be considered an employee only if he received earned income with respect to such trade or business and only the amount of such earned income derived from that trade or business shall be taken into account for purposes of the qualified plan.

(3)(i) The term *employee*, for purposes of section 401, does not include a self-employed individual when the term ‘‘common-law’’ employee is used or when the context otherwise requires that the term ‘‘employee’’ does not include a self-employed individual. The term ‘‘common- law’’ employee also includes an individual who is treated as an employee for purposes of section 401 by reason of the provisions of section 7701(a)(20), relating to the treatment of certain full-time life insurance salesmen as employees. Furthermore, an individual who is a common-law employee is not a self-employed individual with respect to income attributable to such employment, even though such income constitutes net earnings from self-employment as defined in section 1402(a). Thus, for example, a minister who is a common-law employee is not a self-employed individual with respect to income attributable to such employment, even though such income constitutes net earnings from self-employment as defined in section 1402(a).

(ii) An individual may be treated as an employee within the meaning of section 401(c)(1) of one employer even though such individual is also a common-law employee of another employer. For example, an attorney who is a common-law employee of a corporation and who, in the evenings maintains an office in which he practices law as a self-employed individual is an employee within the meaning of section 401(c)(1) with respect to the law practice. This example would not be altered by the fact that the corporation maintained a qualified plan under which the attorney is benefited as a common-law employee.

(4) For the purpose of determining whether an employee within the meaning of section 401(c)(1) satisfies the requirements for eligibility under a qualified plan established by an employer, such an employer may take into account past services rendered by such an employee both as a self-employed individual and as a common-law employee if past services rendered by other employees, including common-law employees, are similarly taken into account. However, an employer cannot take into account only past services rendered by employees within the meaning of section 401(c)(1) if past services rendered to such employer by individuals who are, or were, common-law employees are not taken into account. Past service as described in this subparagraph may be taken into account for the purpose of determining whether an individual who is, or was, an employee within the meaning of section 401(c)(1) satisfies the requirements for eligibility even if such service was rendered prior to January 1, 1963. On the other hand, past service cannot be taken into account for purposes of determining the contributions which may be made on such an individual’s behalf under a qualified plan.

(c) *Definition of earned income*—(1) *General rule.* For purposes of section 401 and the regulations thereunder, ‘‘earned income’’ means, in general, net earnings from self-employment (as defined in section 1402(a)) to the extent such net earnings constitute compensation for personal services actually rendered within the meaning of section 911(b).

(2) *Net earnings from self-employment.* (i) The computation of the net earnings from self-employment shall be made in accordance with the provisions of section 1402(a) and the regulations thereunder, with the modifications and exceptions described in subdivisions (ii) through (iv) of this subparagraph. Thus, an individual may have net earnings from self-employment, as defined in section 1402(a), even though such individual does not have self-employment income, as defined in section 1402(b), and, therefore, is not subject to the tax on self-employment income imposed by section 1401.

(ii) Items which are not included in gross income for purposes of chapter 1 of the Code and the deductions properly attributable to such items must be excluded from the computation of net earnings from self-employment even though the provisions of section 1402(a) specifically require the inclusion of such items. For example, if an individual is a resident of Puerto Rico, so much of his net earnings from self-employment as are excluded from gross income under section 933 must not be taken into account in computing his net earnings from self-employment which are earned income for purposes of section 401.

(iii) In computing net earnings from self-employment for the purpose of determining earned income, a self-employed individual may disregard only deductions for contributions made on his own behalf under a qualified plan. However, such computation must take into account the deduction allowed by section 404 or 405 for contributions under a qualified plan on behalf of the common-law employees of the trade or business.

(iv) For purposes of determining whether an individual has net earnings from self-employment and, thus, whether he is an employee within the meaning of section 401(c)(1), the exceptions in section 1402(c) (4) and (5) shall not apply. Thus, certain ministers, certain members of religious orders, doctors of medicine, and Christian Science practitioners are treated for purposes of section 401 as being engaged in a trade or business from which net earnings from self-employment are derived. In addition, the exceptions in section 1402(c)(2) shall not apply in the case of any individual who is treated as an employee under section 3121(d)(3) (A), (C), or (D). Therefore, such individuals are treated, for purposes of section 401, as being engaged in a trade or business from which net earnings from self-employment may be derived.

(3) *Compensation for personal services actually rendered.* (i) For purposes of section 401, the term ‘‘earned income’’ includes only that portion of an individual’s net earnings from self-employment which constitutes earned income as defined in section 911(b) and the regulations thereunder. Thus, such term includes only professional fees and other amounts received as compensation for personal services actually rendered by the individual. There is excluded from ‘‘earned income’’ the amount of any item of income, and any deduction properly attributable to such item, if such amount is not received as compensation for personal services actually rendered. Therefore, an individual who renders no personal services has no ‘‘earned income’’ even though such an individual may have net earnings from self-employment from a trade or business.

(ii) If a self-employed individual is engaged in a trade or business in which capital is a material income-producing factor, then, under section 911(b), his earned income is only that portion of the net profits from the trade or business which constitutes a reasonable allowance as compensation for personal services actually rendered. However, such individual’s earned income cannot exceed 30 percent of the net profits of such trade or business. The net profits of the trade or business is not necessarily the same as the net earnings from self-employment derived from such trade or business.

(4) *Minimum earned income when both personal services and capital are material income-producing factors.* (i) If a self-employed individual renders personal

services on a full-time, or substantially full-time, basis to only one trade or business, and if with respect to such trade or business capital is a material income-producing factor, then the amount of such individual's earned income from the trade or business is considered to be not less than so much of his share in the net profits of such trade or business as does not exceed $2,500.

(ii) If a self-employed individual renders substantial personal services to more than one trade or business, and if with respect to all such trades or businesses such self-employed individual actually renders personal services on a full-time, or substantially full-time, basis, then the earned income of the self-employed individual from trades or businesses for which he renders substantial personal services and in which both personal services and capital are material income-producing factors is considered to be not less than—

(A) So much of such individual's share of the net profits from all trades or businesses in which he renders substantial personal services as does not exceed $2,500, reduced by.

(B) Such individual's share of the net profits of any trade or business in which only personal services is a material income-producing factor.

However, in no event shall the share of the net profits of any trade or business in which capital is a material income-producing factor be reduced below the amount which would, without regard to the provisions of this subdivision, be treated as the earned income derived from such trade or business under section 911(b). In making the computation required by this subdivision, any trade or business with respect to which the individual renders substantial personal services shall be taken into account irrespective of whether a qualified plan has been established by such trade or business.

(iii) If the provisions of subdivision (ii) of this subparagraph apply in determining the earned income of a self-employed individual, and such individual is engaged in two or more trades or businesses in which capital and personal services are material income-producing factors, then the total amount treated as the earned income shall be allocated to each such trade or business for which he performs substantial personal services in the same proportion as his share of net profits from each such trade or business bears to his share of the total net profits from all such trades or businesses. Thus, in such case, the amount of earned income attributable to any such trade or business is computed by multiplying the total earned income as determined under subdivision (ii) of this subparagraph by the individual's net profits from such trade or business and dividing that product by the individual's total net profits from all such trades or businesses.

(iv) For purposes of this subparagraph, the determination of whether an individual renders personal services on a full-time, or substantially full-time, basis is to be made with regard to the aggregate of the trades and businesses with respect to which the employee renders substantial personal services as a common-law employee or as a self-employed individual. However, for all other purposes in applying the rules of this subparagraph, a trade or business with respect to which an individual is a common-law employee shall be disregarded.

(d) *Definition of owner-employee.* For purposes of section 401 and the regulations thereunder, the term ''owner-employee'' means a proprietor of a proprietorship, or, in the case of a partnership, a partner who owns either more than 10 percent of the capital interest, or more than 10 percent of the profits interest, of the partnership. Thus, an individual who owns only 2 percent of the profits interest but 11 percent of the capital interest of a partnership is an owner-employee. A partner's interest in the profits and the capital of the partnership shall be determined by the partnership agreement. In the absence of any provision regarding the sharing of profits, the interest in profits of the partners will be determined in the same manner as their distributive shares of partnership taxable income. However, a guaranteed payment (as described in section 707(c)) is not considered a distributive share of partnership income for such purpose. See section 704(b), relating to the determination of the distributive share by the income or loss ratio, and the regulations thereunder. In the absence of a provision in the partnership agreement, a partner's capital interest in a partnership shall be determined on the basis of his interest in the assets of the partnership which would be distributable to such partner upon his withdrawal from the partnership, or upon liquidation of the partnership, whichever is the greater.

(e) *Definition of employer.* (1) For purposes of section 401, a sole proprietor is considered to be his own employer, and the partnership is considered to be the employer of each of the partners. Thus, an individual partner is not an employer who may establish a qualified plan with respect to his services to the partnership.

(2) Regardless of the provision of local law, a partnership is deemed, for purposes of section 401, to be continuing until such time as it is terminated within the meaning of section 708, relating to the continuation of a partnership.

[T.D. 6675, 28 FR 10123, Sept. 17, 1963]

§ 1.401–11 General rules relating to plans covering self-employed individuals.

(a) *Introduction.* This section provides certain rules which supplement, and modify, the rules of §§ 1.401–1 through 1.401–9 in the case of a qualified pension, annuity, or profit-sharing plan which covers a self-employed individual who is an employee within the meaning of section 401(c)(1). The provisions of this section apply to taxable years beginning after December 31, 1962. Except as otherwise provided, paragraphs (b) through (m) of this section apply to taxable years beginning after December 31, 1962. Paragraph (n) of this section applies to plan years determined in accordance with paragraph (n)(1) of this section.

(b) *General rules.* (1) If the amount of employer contributions for common-law employees covered under a qualified plan is related to the earned income (as defined in section 401(c)(2)) of a self-employed individual, or group of self-employed individuals, such a plan is a profit-sharing plan (as described in paragraph (b)(1)(ii) of § 1.401–1) since earned income is dependent upon the profits of the trade or business with respect to which the plan is established. Thus, for example, a plan, which provides that the employer will contribute 10 percent of the earned income of a self-employed individual but no more than $2,500, and that the employer contribution on behalf of common-law employees shall be the same percentage of their salaries as the contribution on behalf of the self-employed individual bears to his earned income, is a profit-sharing plan, since the amount of the employer's contribution for common-law employees covered under the plan is related to the earned income of a self-employed individual and thereby to the profits of the trade or business. On the other hand, for example, a plan which defines the compensation of any self-employed individual as his earned income and which provides that the employer will contribute 10 percent of the compensation of each employee covered under the plan is a pension plan since the contribution on behalf of common-law employees is fixed without regard to whether the self-employed individual has earned income or the amount thereof.

(2) The Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 809) permits self-employed individuals to be treated as employees and therefore included in qualified plans, but it is clear that such law requires such self-employed individuals to provide benefits for their employees on a nondiscriminatory basis. Self-employed individuals will not be considered as providing contributions or benefits for an employee to the extent that the wages or salary of the employee covered under the plan are reduced at or about the time the plan is adopted.

(3) In addition to permitting self-employed individuals to participate in qualified plans, the Self-Employed Individuals Tax Retirement Act of 1962 extends to such individuals some of the tax benefits allowed common-law employee-participants in such plans. However, the tax benefits allowed a self-employed individual are restricted by the limits which are placed on the deductions allowed for contributions on such an individual's behalf. In view of these restrictions on the tax benefits

extended to any self-employed individual, a self-employed individual participating in a qualified plan may not participate in any forfeitures. Therefore, in the case of a qualified plan which covers any self-employed individual, a separate account must be established for each self-employed individual to which no forfeitures can be allocated.

(c) *Requirements as to coverage.* (1) In general, section 401(a)(3) and the regulations thereunder prescribe the coverage requirements which a qualified plan must satisfy. However, if such a plan covers self-employed individuals who are not owner-employees, it must, in addition to satisfying such requirements, satisfy the requirements of this paragraph. If any owner-employee is covered under a qualified plan, the provisions of this paragraph do not apply, but the provisions of section 401(d), including section 401(d)(3), do apply (see §1.401–12).

(2)(i) Section 401(a)(3)(B) provides that a plan may satisfy the coverage requirements for qualification if it covers such employees as qualify under a classification which is found not to discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees. Section 401(a)(5) sets forth certain classifications that will not in themselves be considered discriminatory. Under such section, a classification which excludes all employees whose entire remuneration constitutes ‘‘wages’’ under section 3121(a)(1), will not be considered discriminatory merely because of such exclusion. Similarly, a plan which includes all employees will not be considered discriminatory solely because the contributions or benefits based on that part of their remuneration which is excluded from ‘‘wages’’ under section 3121(a)(1) differ from the contributions or benefits based on that part of their remuneration which is not so excluded. However, in determining if a classification is discriminatory under section 401(a)(3)(B), consideration will be given to whether the total benefits resulting to each employee under the plan and under the Social Security Act, or under the Social Security Act only, establish an integrated and correlated retirement system satisfying the tests of section 401(a). A plan which covers self-employed individuals, none of whom is an owner-employee, may also be integrated with the contributions or benefits under the Social Security Act. In such a case, the portion of the earned income (as defined in section 401(c)(2)) of such an individual which does not exceed the maximum amount which may be treated as self-employment income under section 1402(b)(1), and which is derived from the trade or business with respect to which the plan is established, shall be treated as ‘‘wages’’ under section 3121(a)(1) subject to the tax imposed by section 3111 (relating to the tax on employers) for purposes of applying the rules of paragraph (e)(2) of §1.401–3, relating to the determination of whether a plan is properly integrated. However, if the plan covers an owner-employee, the rules relating to the integration of the plan with the contributions or benefits under the Social Security Act contained in paragraph (b) of §1.401–12 apply.

(ii) Certain of the classifications enumerated in section 401(a)(5) do not apply to plans which provide contributions or benefits for any self-employed individual. Since self-employed individuals are not salaried or clerical employees, the provision in section 401(a)(5) permitting a plan, in certain cases to cover only this type of employee is inapplicable to plans which cover any self-employed individual.

(iii) The classifications enumerated in section 401(a)(5) are not exclusive, and it is not necessary that a qualified plan cover all employees or all full-time employees. Plans may qualify even though coverage is limited in accordance with a particular classification incorporated in the plan, provided the effect of covering only such employees as satisfy such eligibility requirement does not result in the prohibited discrimination.

(d) *Discrimination as to contributions or benefits*—(1) *In general.* In order for a plan to be qualified, there must be no discrimination in contributions or benefits in favor of employees who are officers, shareholders, supervisors, or highly compensated, as against other employees whether within or without the plan. A self-employed individual, by reason of the contingent nature of his compensation, is considered to be a highly-compensated employee, and thus is a member of the group in whose favor discrimination is prohibited. In determining whether the prohibited discrimination exists, the total employer contribution on behalf of a self-employed individual shall be taken into account regardless of the fact that only a portion of such contribution is allowed as a deduction. For additional rules relating to discrimination as to contributions or benefits with regard to plans covering any owner-employee, see §1.401–12.

(2) *Base for computing contributions or benefits.* (i) A plan which is otherwise qualified is not considered discriminatory merely because the contributions or benefits provided under the plan bear a uniform relationship to the total compensation, basic compensation, or regular rate of compensation of the employees, including self-employed individuals, covered under the plan.

(ii) In the case of a self-employed individual who is covered under a qualified plan, the total compensation of such individual is the earned income (as defined in section 401(c)(2)) which such individual derives from the employer's trade or business, or trades or businesses, with respect to which the qualified plan is established. Thus, for example, in the case of a partner, his total compensation includes both his distributive share of partnership income, whether or not distributed, and guaranteed payments described in section 707(c) made to him by the partnership establishing the plan, to the extent that such income constitutes earned income as defined in section 401(c)(2).

(iii)(A) The basic or regular rate of compensation of any self-employed individual is that portion of his earned income which bears the same ratio to his total earned income derived from the trade or business, or trades or businesses, with respect to which the qualified plan is established as the aggregate basic or regular compensation of all common-law employees covered under the plan bears to the aggregate total compensation of such employees derived from such trade or business, or trades or businesses.

(B) If an employer establishes two or more plans which satisfy the requirements of section 401(a) separately, and only one such plan covers a self-employed individual, the determination of the basic or regular rate of compensation of such self-employed individual is made with regard to the compensation of common-law employees covered under the plan which provides contributions or benefits for such self-employed individual. On the other hand, if two or more plans must be considered together in order to satisfy the requirements of section 401(a), the computation of the basic or regular rate of compensation of a self-employed individual must be made with regard to the compensation of the common-law employees covered by so many of such plans as are required to be taken together in order to satisfy the qualification requirements of section 401(a).

(3) *Discriminatory contributions.* If a discriminatory contribution is made by, or for, a self-employed individual who is an employee within the meaning of section 401(c)(1) because of an erroneous assumption as to the earned income of such individual, the plan will not be considered discriminatory if adequate adjustment is made to remove such discrimination. In the case of any self-employed individual who is an owner-employee, the amount of any excess contribution to be returned and the manner in which it is to be repaid are determined by the provisions of section 401(d)(8) and (e). However, if any self-employed individual, including any owner-employee, has not made the full contribution permitted to be made on his behalf as an employee, then, if the plan expressly provides, so much of any excess contribution by such self-employed individual's employer as may, under the provisions of the plan, be treated as a contribution made by such individual as an employee can be so treated.

(e) *Distribution of entire interest.* (1) If a trust forms part of a plan which covers a self-employed individual, such trust shall constitute a qualified trust under section 401 only if the plan of which such trust is a part expressly provides that the entire interest of each employee, including any common-law employee, will be distributed in accordance with the provisions of subparagraph (2) or (3) of this paragraph.

(2) Unless the provisions of subparagraph (3) of this paragraph apply, the entire interest of each employee (including contributions he has made on his own behalf, contributions made on his behalf by his employer, and interest thereon) must be actually distributed to such employee—

(i) In the case of an employee, other than an individual who is, or has been, an owner-employee under the plan, not later than the last day of the taxable year of such employee in which he attains the age of 70½, or not later than the last day of the taxable year in which such employee retires, whichever is later, and

(ii) In the case of an employee who is, or has been, an owner-employee under the plan, not later than the last day of the taxable year in which he attains the age of 70½.

(3) In lieu of distributing an employee's entire interest in a qualified plan as provided in subparagraph (2) of this paragraph, such interest may be distributed commencing no later than the last taxable year described in such subparagraph (2). In such case, the plan must expressly provide that the entire interest of such an employee shall be distributed to him and his beneficiaries, in a manner which satisfies the requirements of subparagraph (5) of this paragraph, over any of the following periods (or any combination thereof)—

(i) The life of the employee, or

(ii) The lives of the employee and his spouse, or

(iii) A period certain not longer than the life expectancy of the employee, or

(iv) A period certain not longer than the joint life and last survivor expectancy of the employee and his spouse.

(4) For purposes of subparagraphs (3) and (5) of this paragraph, the determination of the life expectancy of the employee or the joint life and last survivor expectancy of the employee and his spouse is to be made either (i) only once, at the time the employee receives the first distribution of his entire interest under the plan, or (ii) periodically, in a consistent manner. Such life expectancy or joint life and last survivor expectancy cannot exceed the period computed by the use of the expected return multiples in §1.72–9, or, in the case of payments under a contract issued by an insurance company, the period computed by use of the life expectancy tables of such company.

(5) If an employee's entire interest is to be distributed over a period described in subparagraph (3) of this paragraph, then the amount to be distributed each year must be at least an amount equal to the quotient obtained by dividing the entire interest of the employee under the plan at the time the distribution is made (expressed in either dollars or units) by the life expectancy of the employee, or joint life and last survivor expectancy of the employee and his spouse (whichever is applicable), determined in accordance with the provisions of subparagraph (4) of this paragraph. However, no distribution need be made in any year, or a lesser amount may be distributed, if the aggregate amounts distributed by the end of that year are at least equal to the aggregate of the minimum amounts required by this subparagraph to have been distributed by the end of such year.

(6) If an employee's entire interest is distributed in the form of an annuity contract, then the requirements of section 401(a)(9) are satisfied if the distribution of such contract takes place before the end of the latest taxable year described in subparagraph (2) of this paragraph, and if the employee's interest will be paid over a period described in subparagraph (3) of this paragraph and at a rate which satisfies the requirements of subparagraph (5) of this paragraph.

(7) The requirements of section 401(a)(9) do not preclude contributions from being made on behalf of an owner-employee under a qualified plan subsequent to the taxable year in which the distribution of his entire interest is required to commence. Thus, if all other requirements for qualification are satisfied, a qualified plan may provide contributions for an owner-employee

who has already attained age 70½. However, a distribution of benefits attributable to contributions made on behalf of an owner-employee in a taxable year beginning after the taxable year in which he attains the age of 70½ must satisfy the requirements of subparagraph (3) of this paragraph. Thus, if an owner-employee has already attained the age of 70½ at the time the first contribution is made on his behalf, the distribution of his entire interest must commence in the year in which such contribution is first made on his behalf.

(8) This paragraph shall not apply and an otherwise qualified trust will not be disqualified if the method of distribution under the plan is one which was designated by a common-law employee prior to October 10, 1962, and such method of distribution is not in accordance with the provisions of section 401(a)(9). Such exception applies regardless of whether the actual distribution of the entire interest of an employee making such a designation, or any portion of such interest, has commenced prior to October 10, 1962.

[T.D. 6675, 28 FR 10124, Sept. 17, 1963, as amended by T.D. 6982, 33 FR 16500, Nov. 13, 1968]

§ 1.401–12 Requirements for qualification of trusts and plans benefiting owner-employees.

(a) *Introduction.* This section prescribes the additional requirements which must be met for qualification of a trust forming part of a pension or profit-sharing plan, or of an annuity plan, which covers any self-employed individual who is an owner-employee as defined in section 401(c)(3). However, to the extent that the provisions of § 1.401–11 are not modified by the provisions of this section, such provisions are also applicable to a plan which covers an owner-employee. The provisions of this section apply to taxable years beginning after December 31, 1962. Except as otherwise provided, paragraphs (b) through (m) of this section apply to taxable years beginning after December 31, 1962. Paragraph (n) of this section applies to plan years determined in accordance with paragraph (n)(1) of the section.

(b) *General rules.* (1) The qualified plan and trust of an unincorporated trade or business does not have to satisfy the additional requirements for qualification merely because an owner-employee derives earned income (as defined in section 401(c)(2)) from the trade or business with respect to which the plan is established. Such additional requirements need be satisfied only if an owner-employee is actually covered under the plan of the employer. An owner-employee may only be covered under a plan of an employer if such owner-employee has so consented. However, the consent of the owner-employee may be either expressed or implied. Thus, for example, if contributions are, in fact, made on behalf of an owner-employee, such owner-employee is considered to have impliedly consented to being covered under the plan.

(2) A qualified plan covering an owner-employee must be a definite written program and arrangement setting forth all provisions essential for qualification at the time such plan is established. Therefore, for example, even though the owner-employee is the only employee covered under the plan at the time the plan is established, the plan must incorporate all the provisions relating to the eligibility and benefits of future employees.

(c) *Bank trustee.* (1)(i) If a trust created after October 9, 1962, is to form a part of a qualified pension or profit-sharing plan covering an owner-employee, or if a trust created before October 10, 1962, but not exempt from tax on October 9, 1962, is to form part of such a plan, the trustee of such trust must be a bank as defined in paragraph (c)(2) of this section, unless an exception contained in paragraph (c)(4) of this section applies, or paragraph (n) of this section applies.

(ii) The provisions of this paragraph do not apply to an employees' trust created prior to October 10, 1962, if such trust was exempt from tax on October 9, 1962, even though the plan of which such trust forms a part is amended after December 31, 1962, to cover any owner-employee. Although the trustee of a trust described in the preceding sentence need not be a bank, all other requirements for the qualification of such a trust must be satisfied at the time an owner-employee is first covered under such plan.

(2) The term *bank* as used in this paragraph means—

(i) A bank as defined in section 581;

(ii) A corporation which, under the laws of the State of its incorporation or under the laws of the District of Columbia, is subject to both the supervision of, and examination by, the authority in such jurisdiction in charge of the administration of the banking laws;

(iii) In the case of a trust created or organized outside of the United States, that is, outside the States and the District of Columbia, a bank or trust company, wherever incorporated, exercising fiduciary powers and subject to both supervision and examination by governmental authority;

(iv) Beginning on January 1, 1974, an insured credit union (within the meaning of section 101 (6) of the Federal Credit Union Act, 12 U.S.C. 1752 (6)).

(3) Although a bank is required to be the trustee of a qualified trust, another person, including the employer, may be granted the power in the trust instrument to control the investment of the trust funds either by directing investments, including reinvestments, disposals, and exchanges, or by disapproving proposed investments, including reinvestments, disposals, or exchanges.

(4)(i) This paragraph does not apply to a trust created or organized outside the States and the District of Columbia before October 10, 1962, if, on October 9, 1962, such trust is described in section 402(c) as an organization treated as if it was a trust exempt from tax under section 501(a).

(ii) In addition, the requirement that the trustee must be a bank does not apply to a qualified trust forming a part of a pension or profit-sharing plan if—

(A) The investments of all the funds in such trust are in annuity, endowment, or life insurance contracts, issued by a company which is a life insurance company as defined in section 801(a) during the taxable year immediately preceding the year that such contracts are originally purchased;

(B) All the proceeds which are, or may become, payable under the contract are payable directly to the employee or his beneficiary;

(C) The plan contains a provision to the effect that the employer is to substitute a bank as a trustee or custodian of the contracts if the employer is notified by the district director that such substitution is required because the trustee is not keeping such records, or making such returns, or rendering such statements, as are required by forms or regulations.

However, a qualified trust may only purchase insurance protection to the extent permitted under a qualified plan (see paragraph (b)(1) (i) and (ii) of § 1.401–1).

(5) An employer may designate several trusts (or custodial accounts) or a trust or trusts and an annuity plan or plans as constituting parts of a single plan which is intended to satisfy the requirements for qualification. However, each trust (or custodial account) so designated which is part of a plan covering an owner-employee must satisfy the requirements of this paragraph. Thus, for example, if all other requirements for qualification are satisfied by the plan, a qualified profit-sharing plan may provide that a portion of the contributions under the plan will be paid to a custodial account, the custodian of which is a bank, for investment in stock of a regulated investment company, and the remainder of such contributions will be paid to a trust, the trustee of which is not a bank, for investment in annuity contracts.

(d) *Profit-sharing plan*. (1) A profit-sharing plan, as defined in paragraph (b)(1)(ii) of § 1.401–1, which covers any owner-employee must contain a definite formula for determining the contributions to be made by the employer on behalf of employees, other than owner-employees. A formula to be definite must specify the portion of profits to be contributed to the trust and must also define profits for plan purposes. A definite formula may contain a variable factor, if the value of such factor may not vary at the discretion of the employer. For example, the percentage of profits to be contributed each year may differ depending on the amount of profits. On the other hand, a formula which, for example, specifies that profits for plan purposes are not to exceed the cash on hand at the time the employer contribution is made is not a definite formula. The requirement that the plan formula be definite is satisfied if such formula limits the amount to be contributed on behalf of all employees covered under the plan to the amount which permits self-employed individuals to obtain the maximum deduction under section 404(a). However, even though the plan formula is definite, the plan must satisfy all the other requirements for qualification, including the requirement that the contributions under the plan not discriminate in favor of any self-employed individual, and the requirement that the plan be for the exclusive benefit of the employees in general.

(2) A definite contribution formula constitutes an integral part of a qualified profit-sharing plan and may not be amended except for a valid business reason.

(3) The requirement that a profit-sharing plan contain a definite formula for determining the amount of contributions to be made on behalf of employees does not apply to contributions which are made on behalf of owner-employees. However, such contributions are subject to the requirement that they be nondiscriminatory with respect to other employees and must not exceed the limitations on allowable and deductible contributions which may be made by owner-employees.

(e) *Requirements as to coverage*—(1) *Coverage of all employees.* The coverage requirements contained in section 401(a)(3) do not apply to a plan which covers any owner-employee. However, such a plan must satisfy the coverage requirements of section 401(d), including section 401(d)(3). Accordingly, a plan which covers an owner-employee must benefit each employee of the trade or business (other than any owner-employee who does not consent to be covered under the plan) whose customary period of employment has been for more than 20 hours a week for more than five months during each of three consecutive periods of twelve calendar months. Therefore, a plan may not provide, for example, that an employee, other than an owner-employee, is ineligible to participate because he does not consent to be a participant or because he does not consent to make reasonable contributions under the plan.

(2) *Period of service.* (i) In determining whether an employee renders service to the same employer, and, therefore, must be covered under the plan of such employer, a partnership is considered to be one employer during the entire period prior to the time it is terminated within the meaning of section 708 (see paragraph (e)(2) of § 1.401–10).

(ii) In the case of a common-law employee who becomes an employee within the meaning of section 401(c)(1) with respect to the same trade or business, his period of employment is the aggregate of his service as a common-law employee and an employee within the meaning of section 401(c)(1).

(iii) In determining whether any employee, including any owner-employee, has three years of service, past service of any such employee may be taken into account as provided in paragraph (b) of § 1.401–10. Thus, if an employer takes into account past service for any owner-employee, he must take into account the past service of all his other employees to the same extent. However, a plan may provide for coverage after a period of service which is shorter than three years, but in no case may the plan require a waiting period for employees which is longer than that required for the owner-employees.

(f) *Discrimination in contributions or benefits.* (1) Variations in contributions or benefits may be provided under the plan so long as the plan does not discriminate, either as to contributions or benefits, in favor of officers, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees, as against other employees (see § 1.401–4). For the purpose of determining whether the provisions of a plan which provide contributions or benefits for an owner-employee result in the prohibited discrimination, an owner-employee, like other self-employed individuals, is considered a highly compensated employee (see paragraph (d) of § 1.401–11). Whether or not a plan is discriminatory is determined by the actual operation of the plan as well as by its formal provisions.

(2) The provisions of section 401(a)(5), relating to certain plan provisions which will not in and of themselves be considered discriminatory, are not applicable to any plan which covers any owner-employee. Such a plan must, instead, satisfy the requirements of section 401(a)(10) and section 401(d)(6). Accordingly, a plan is not discriminatory within the meaning of section 401(a)(4) merely because the contributions or benefits provided for the employees covered under the plan bear a uniform relationship to the total compensation, or to the basic or regular rate of compensation, of such employees. The total compensation or the basic or regular rate of compensation of an owner-employee is computed in accordance with the provisions of paragraph (d)(2) of §1.401–11.

(3) Even though the contributions under the plan do not bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered thereunder and the plan would otherwise be considered discriminatory within the meaning of section 401(a)(4), the plan shall not be considered discriminatory if such variation is due to employer contributions on behalf of any owner-employee which are required, under the plan, to be applied to pay premiums or other consideration on one or more level premium contracts described in section 401(e)(3)(A). In a taxable year to which the foregoing exception applies and, therefore, one in which the contributions under the plan would otherwise be discriminatory, the employer contributions to pay such premiums or other consideration must be the only employer contributions made for the owner-employee, and the contributions for such taxable year under such plan must not be in excess of the amount permitted to be paid toward the purchase of such a contract under the provisions of section 401(e)(3). Furthermore, the exception described in this subparagraph only applies to contributions made under a plan which otherwise satisfies the requirements of section 401(a)(4) and the regulations thereunder. Thus, if a plan provides for the purchase, in accordance with section 401(e)(3), of a level premium contract for an owner-employee, then such plan must provide either that the benefits for all employees are nondiscriminatory or, in the case of a money-purchase type of plan, that the contributions for all employees are based on compensation determined in a non-discriminatory manner. For example, since the contributions on behalf of the owner-employee are based on his earned income during the period preceding the purchase of the contract, the contributions for other employees must be based on their compensation during the same period if this will result in larger contributions on their behalf.

(4) In the case of a plan which covers any owner-employee, the contributions or benefits provided under the plan cannot vary with respect to years of service except as provided in subparagraph (5) of this paragraph.

(5) The provisions of section 401(d)(3) do not preclude the coverage of employees with less than three years of service if such coverage is provided on a nondiscriminatory basis. However, a plan will not be disqualified merely because the contributions or benefits for employees who have less than three years of service are not as favorable as the contributions or benefits for employees having more than three years of service.

(g) *Nonforfeitable rights.* (1)(i) Except as provided in subparagraph (2) of this paragraph, if an owner-employee is covered under the plan of his employer, each employee's rights to the contributions, or to the benefits derived from the contributions, of such employer must be nonforfeitable at the time such contributions are paid to, or under, the plan. The employees who must obtain such nonforfeitable rights include the self-employed individuals who are covered under the plan. As to what constitutes nonforfeitable rights of an employee, see paragraph (a)(2) of §1.402(b)–1.

(ii) Under section 401(d)(2), it is necessary that each employee obtain nonforfeitable rights to the employer contributions under the plan on his behalf from the time such contributions are paid. Thus, each employee must have a nonforfeitable interest to the portion of the funds under the plan which is allocable to the employer contributions made under the plan on his behalf.

(2) The provisions of subparagraph (1) of this paragraph do not apply to the extent that employer contributions on behalf of any employee must remain forfeitable in order to satisfy the requirements of paragraph (c) of § 1.401–4. However, employer contributions on behalf of employees whose rights are required to remain forfeitable to satisfy such requirements must be nonforfeitable except for such contingency.

(h) *Integration with social security.* (1) If a qualified plan covers any owner-employee, then the rules relating to the integration of such plan with the contributions or benefits under the Social Security Act are provided in this paragraph. Accordingly, the provisions of paragraph (e) of § 1.401–3 and paragraph (c) of § 1.401–11 do not apply to such a plan. In the case of a plan which provides contributions or benefits for any owner-employee, integration of the plan with the Social Security Act for any taxable year of the employer can take place only if not more than one-third of the employer contributions under the plan which are deductible under section 404 for that year are made on behalf of the owner-employees. If such requirement is satisfied, then the plan may be integrated with the contributions or benefits under the Social Security Act in accordance with the rules of subparagraph (3) of this paragraph.

(2)(i) For purposes of subparagraph (1) of this paragraph, in determining the total amount of employer contributions which are deductible under section 404, the provisions of section 404(a), including the provisions of section 404(a)(9) (relating to plans benefiting self-employed individuals), and section 404(e) (relating to the special limitations for self-employed individuals) are taken into account, but the provisions of section 404(a)(10) (relating to the special limitation on the amount allowed as a deduction for self-employed individuals) are not taken into account.

(ii) The amount of deductible employer contributions which are made on behalf of all owner-employees for the year is compared with the amount of deductible employer contributions for the year made on behalf of all employees covered under the plan (including self-employed individuals who are not owner-employees and owner-employees) for the purpose of determining whether the deductible contributions by the employer on behalf of owner-employees are not more than one-third of the total deductible contributions.

(3) If a plan covering an owner-employee satisfies the requirement of subparagraph (1) of this paragraph, and if the employer wishes to integrate such plan with the contributions or benefits under the Social Security Act, then—

(i) The employer contributions under the plan on behalf of any owner-employee shall be reduced by an amount determined by multiplying the earned income of such owner-employee which is derived from the trade or business with respect to which the plan is established and which does not exceed the maximum amount which may be treated as self-employment income under section 1402(b)(1), by the rate of tax imposed under section 1401(a); and

(ii) The employer contributions under the plan on behalf of any employee other than an owner-employee may be reduced by an amount not in excess of the amount determined by multiplying the employee's wages under section 3121(a)(1) by the rate of tax imposed under section 3111(a). For purposes of this subdivision, the earned income of a self-employed individual which is derived from the trade or business with respect to which the plan is established and which is treated as self-employment income under section 1402(b)(1), shall be treated as ''wages'' under section 3121(a)(1).

(4) A money purchase pension plan or a profit-sharing plan may provide that such plan will be integrated with the Social Security Act only for such taxable years of the employer in which the requirements for integration are satisfied. However, a qualified plan cannot provide that employer contributions are only to be made for taxable years in which the integration requirements are satisfied.

(i) *Limit on contributions on behalf of an owner-employee.* (1) Section 401(d)(5) requires that a plan which covers any owner-employee must contain provisions which restrict the employer contributions that may be made on behalf of any owner-employee for each taxable year to an amount no greater than that which is deductible under section 404. In computing the amount deductible under section 404 for purposes of section 401(d)(5) and this paragraph, the limitations contained in section 404(a)(9) and (e), relating to special limitations for self-employed individuals, are taken into account, but such amount is determined without regard to section 404(a)(10), relating to the special limitation on the amount allowed as a deduction for self-employed individuals. Accordingly, a qualified plan which covers any owner-employee cannot permit employer contributions to be made on behalf of such owner-employee in excess of 10 percent of the earned income which is derived by such owner-employee from the trade or business with respect to which the plan is established, or permit the employer to contribute more than $2,500 on behalf of any such owner-employee for any taxable year.

(2)(i) In determining whether the plan permits contributions to be made in excess of the limitations of subparagraph (1) of this paragraph, employer contributions under the plan which are allocable to the purchase of life, accident, health, or other insurance are not to be taken into account. To determine the amount of employer contributions under the plan which are allocable to the purchase of life, accident, health, or other insurance, see paragraph (f) of §1.404(e)–1 and paragraph (b) of §1.72–16. However, contributions for such insurance can be made only to the extent otherwise permitted under sections 401 through 404 and the regulations thereunder.

(ii) A further exception to the limit on the amount of contributions which an employer may make under the plan on behalf of an owner-employee is made in the case of contributions which are required, under the plan, to be applied to pay premiums or other consideration for one or more annuity, endowment, or life insurance contracts described in section 401(e)(3) (see section 401(e)(3) and the regulations thereunder).

(j) *Excess contributions.* The provisions of section 401(e) define the term ‘‘excess contribution’’ and indicate the consequences of making such a contribution (see §1.401–13). However, section 401(d)(8) provides that a qualified plan which provides contributions or benefits for any owner-employee must contain certain provisions which complement the rules contained in section 401(e). Under section 401(d)(8), a qualified plan must provide that—

(1) The net amount of any excess contribution (determined in accordance with the provisions of §1.401–13) must be returned to the owner-employee on whose behalf it is made, together with the net income earned on such excess contribution;

(2) For each taxable year for which the trust is considered to be a nonqualified trust with respect to an owner-employee under section 401(e)(2) because the net amount of an excess contribution and the earnings thereon have not been returned to such owner-employee, the income of the trust for that taxable year attributable to the interest of such owner-employee is to be paid to him.

(3) If an excess contribution is determined to be willfully made (within the meaning of section 401(e)(2)(E)), the entire interest of the owner-employee on whose behalf such contribution was made is required to be distributed to such owner-employee. Furthermore, the plan must require the distribution of an owner-employee’s entire interest under the plan if a willful excess contribution is determined to have been made under any other plan in which the owner-employee is covered as an owner-employee.

(k) *Contributions of property under a qualified plan.* (1) The contribution of property, other than money, prior to January 1, 1975, by the person who is the employer (within the meaning of section 401(c)(4)) to a qualified trust forming a part of a plan which covers employees some or all of whom are owner-employees who control (within the meaning of section 401(d)(9)(B) and the regulations thereunder) the trade or business with respect to which the plan is established is a prohibited transaction between such trust and the employer-grantor of such trust (see section 503(g) prior to its repeal by sec. 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978)).

(2) A contribution of property, other than money, prior to January 1, 1975, to a qualified trust by an owner-employee who controls, or a member of a group of owner-employees who together control, the trade or business with respect to which the plan is established, or a contribution of property, other than money, to a qualified trust by a member of such an owner-employee's family (as defined in section 267(c)(4)), is a prohibited transaction. (See section 503(g) prior to its repeal by section 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978)).

(3) See section 4975 and the regulations thereunder with respect to rules relating to the contribution of property, other than money, made after December 31, 1974.

(l) *Controlled trades or businesses*— (1) *Plans covering an owner-employee who controls another trade or business.* (i) A plan must not cover any owner-employee, or group of two or more owner-employees, if such owner-employee, or group of owner-employees, control (within the meaning of subparagraph (3) of this paragraph) any other trade or business, unless the employees of such other trade or business controlled by such owner-employee, or such group of owner-employees, are included in a plan which satisfies the requirements of section 401(a), including the qualification requirements of section 401(d). The employees who must be covered under the plan of the trade or business which is controlled include the self-employed individuals who are not owner-employees and the owner-employees who consent to be covered by such plan. Accordingly, the employer must determine whether any owner-employee, or group of owner-employees, who may participate in the plan which is established by such employer controls any other trade or business, and whether the requirements of this subparagraph are satisfied with respect to the plan established in such other trade or business. The plan of an employer may exclude an owner-employee who controls another trade or business from coverage under the plan even though such owner-employee consents to be covered, if a plan which satisfies the requirements of subdivision (ii) of this subparagraph has not been established in the trade or business which such owner-employee controls.

(ii) The qualified plan which the owner-employee, or owner-employees, are required to provide for the employees of the trade or business which they control must provide contributions and benefits which are not less favorable than the contributions and benefits provided for the owner-employee, or owner-employees, under the plan of any trade or business which they do not control. Thus, for example, if the contributions or benefits for the owner-employee under the plan of the trade or business which he does not control are computed on the basis of his total (as compared to basic or regular rate) of compensation, then the contributions or benefits for employees covered under the plan of the trade or business which the owner controls must be computed on the basis of their total compensation. However, the requirements of this subdivision cannot be satisfied if the benefits and contributions provided under the plan for the employees of the trade or business which is controlled are not comparable to those provided under the plan covering the owner-employee, or group of owner-employees, in the trade or business which they do not control. Thus, for example, if the owner-employee is covered by a pension plan in the trade or business which he does not control, he may not satisfy the requirements of this subdivision by establishing a profit-sharing plan in the trade or business which he does control.

(iii) If an individual is covered as an owner-employee under the plans of two or more trades or businesses which he does not control and such individual controls a trade or business, then the contributions or benefits of the employees under the plan of the trade or business which he does control must be as favorable as those provided for him under the most favorable plan of the trade or business which he does not control.

(2) *Owner-employees who control more than one trade or business.* If the plan

provides contributions or benefits for an owner-employee who controls, or group of owner-employees who together control, the trade or business with respect to which the plan is established, and such owner-employee, or group of owner-employees, also control as owner-employees one or more other trades or businesses, plans must be established with respect to such controlled trades or businesses so that when taken together they form a single plan which satisfies the requirements of section 401 (a) and (d) with respect to the employees of all the controlled trades or businesses.

(3) *Control defined.* (i) For purposes of this paragraph, an owner-employee, or a group of two or more owner-employees, shall be considered to control a trade or business if such owner-employee, or such group of two or more owner-employees together—

(A) Own the entire interest in an unincorporated trade or business, or

(B) In the case of a partnership, own more than 50 percent of either the capital interest or the profits interest in such partnership.

In determining whether an owner-employee, or group of owner-employees, control a trade or business within the meaning of the preceding sentence, it is immaterial whether or not such individuals could be covered under a plan established with respect to the trade or business. For example, if an individual who is an owner-employee has a 60-percent capital interest in another trade or business, such individual controls such trade or business and the provisions of this paragraph apply even though the individual derives no earned income, as defined in section 401(c)(2), from the controlled trade or business. For purposes of determining the ownership interest of an owner-employee, or group of owner-employees, an owner-employee, or group of owner-employees, is treated as owning any interest in a partnership which is owned, directly or indirectly, by a partnership controlled by such owner-employee, or group of owner-employees.

(ii) The provisions of subparagraphs (1) and (2) of this paragraph apply only if the owner-employee who controls, or the group of owner-employees who control, a trade or business, or trades or businesses, within the meaning of subdivision (i) of this subparagraph is the same owner-employee, or group of owner-employees, covered under the plan intended to satisfy the requirements for qualification. Thus, for example, if A is a 50-percent partner in both the AB and AC partnership, and if the AB partnership wishes to establish a plan covering A and B, the provisions of subparagraphs (1) and (2) of this paragraph do not apply, since A does not control either partnership, and since B has no interest in the AC partnership.

(m) *Distribution of benefits.* (1)(i) Section 401(d)(4)(B) requires that a qualified plan which provides contributions or benefits for any owner-employee must not provide for the payment of benefits to such owner-employee at any time before he has attained age 59½. An exception to the foregoing rule permits a qualified plan to provide for the distribution of benefits to an owner-employee prior to the time he attains age 59½ if he is disabled. For taxable years beginning after December 31, 1966, see section 72(m)(7) and paragraph (f) of §1.72–17 for the meaning of disabled. For taxable years beginning before January 1, 1967, see section 213(g)(3) for the meaning of disabled. In general, both sections 72(m)(7) and 213(g)(3) provide that an individual is considered disabled if he is unable to engage in any substantial gainful activity because of a medically determinable physical or mental impairment which can be expected to result in death or to be of long-continued and indefinite duration. In addition, section 401(d)(4)(B) does not preclude the distribution of benefits to the estate or other beneficiary of a deceased owner-employee prior to the time the owner-employee would have attained age 59½ if he had lived.

(ii) A qualified plan must provide that if, despite the restrictions in the plan to the contrary, an amount is prematurely distributed, or made available, to a participant in such plan who is, or has been, an owner-employee, then no contribution shall be made under the plan by, or for, such individual during any of the 5 taxable years of the plan beginning after the distribution is made.

(2)(i) The provisions of subparagraph (1) of this paragraph preclude an owner-employee who is a participant in a qualified pension or profit-sharing plan of his employer from withdrawing any part of the funds accumulated on his behalf except as provided in such subparagraph (1). However, the distribution of an owner-employee's interest, or any portion of such interest, after he attains age 59½ is determined by the provisions of the plan. Thus, for example, if a qualified pension plan provides that the normal retirement age under the plan is age 65, an owner-employee would not be entitled to a distribution of an amount under the plan merely because he attained age 59½.

(ii) The provisions of subparagraph (1) of this paragraph do not preclude the establishment of a profit-sharing plan which provides for the distribution of all, or part, of participants' accounts after a fixed number of years. However, such a plan must not permit a distribution of any amount to any owner-employee prior to the time the owner-employee has attained age 59½ or becomes disabled within the meaning of section 72(m)(7) or section 213(g)(3), whichever is applicable. On the other hand, if a distribution would have been made under the plan to an owner-employee but for the fact that he had not attained age 59½, then the amount of such distribution (including any increment earned on such amount) must be distributed to such owner-employee at such time as he attains age 59½.

(3) A qualified pension, annuity, or profit-sharing plan which covers an owner-employee must provide that the distribution of an owner-employee's entire interest under the plan must begin prior to the end of the taxable year in which he attains the age of 70½, and such distribution must satisfy the requirements of section 401(a)(9) and paragraph (e) of § 1.401–11. Furthermore, section 401(d)(7) provides that, if an owner-employee dies prior to the time his entire interest has been distributed to him, such owner-employee's entire remaining interest under the plan must, in general, either be distributed to his beneficiary, or beneficiaries, within 5 years, or be used within that period to purchase an immediate annuity for his beneficiary, or beneficiaries. However, a distribution within 5 years of the death of the owner-employee is not required if the distribution of his interest has commenced and such distribution is for a term certain over a period not extending beyond the joint life and survivor expectancy of the owner-employee and his spouse. Thus, for example, an annuity for the joint life and survivor expectancy of an owner-employee and his spouse which guarantees payments for 10 years is a distribution which is payable over a period which does not exceed the joint life and survivor expectancy of the owner-employee and his spouse if such expectancy is at least 10 years at the time the distribution first commences.

§ 1.401–13 Excess contributions on behalf of owner-employees.

(a) *Introduction.* (1) The provisions of this section prescribe the rules relating to the treatment of excess contributions made under a qualified pension, annuity, or profit-sharing plan on behalf of a self-employed individual who is an owner-employee (as defined in paragraph (d) of § 1.401–10). Paragraph (b) of this section defines the term ''excess contribution''. Paragraph (c) of this section describes an exception to the definition of an excess contribution in the case of contributions which are applied to pay premiums on certain annuity, endowment, or life insurance contracts. Paragraph (d) of this section describes the effect of making an excess contribution which is not determined to have been willfully made, and paragraph (e) of this section describes the effect of making an excess contribution which is determined to have been willfully made.

(2) Under section 401(c)(1), certain self-employed individuals are treated as employees for purposes of section 401. In addition, under section 401(c)(4), a proprietor is treated as his own employer, and the partnership is treated

as the employer of the partners. Under section 404, certain contributions on behalf of a self-employed individual are treated as deductible and taken into consideration in determining the amount allowed as a deduction under section 404(a). Such contributions are treated under section 401 and the regulations thereunder as employer contributions on behalf of the self-employed individual. However, in some cases, additional contributions may be made on behalf of a self-employed individual. Such contributions are not taken into consideration in determining the amount deductible under section 404 and are not taken into consideration in computing the amount allowed as a deduction under section 404(a). For purposes of section 401 and the regulations thereunder, such contributions are treated as employee contributions by the self-employed individual. If a self-employed individual is an owner-employee within the meaning of section 401(c)(3) and paragraph (d) of § 1.401–10, then this section prescribes the rules applicable if contributions are made in excess of those permitted to be made under section 401.

(b) *Excess contributions defined.* (1)(i) Except as provided in paragraph (c) relating to contributions which are applied to pay premiums on certain annuity, endowment, or life insurance contracts, an excess contribution is any amount described in subparagraphs (2) through (4) of this paragraph.

(ii) For purposes of determining if the amount of any contribution made under the plan on behalf of an owner-employee is an excess contribution, the amount of any contribution made under the plan which is allocable to the purchase of life, accident, health, or other insurance is not taken into account. The amount of any contribution which is allocable to the cost of insurance protection is determined in accordance with the provisions of paragraph (f) of § 1.404 (e)–1 and paragraph (b) of § 1.72–16.

(2)(i) In the case of a taxable year of the plan for which employer contributions are made on behalf of only owner-employees, an excess contribution is the amount of any contribution for such taxable year on behalf of such owner-employee which is not deductible under section 404 (determined without regard to section 404(a)(10)). This rule applies irrespective of whether the plan provides for contributions on behalf of common-law employees, or self-employed individuals who are not owner-employees, when such employees or individuals become eligible for coverage under the plan, and irrespective of whether contributions are in fact made for such employees or such individuals for other taxable years of the plan.

(ii) In the case of a taxable year of the plan for which employer contributions are made on behalf of both owner-employees and either common-law employees or self-employed individuals who are not owner-employees, an excess contribution is the amount of any employer contribution on behalf of any owner-employee for such taxable year which exceeds the amount deductible under section 404 (determined without regard to section 404(a)(10)) unless such amount may be treated as an employee contribution under the plan in accordance with the rules of paragraph (d)(3) of § 1.401–11 and is a permissible employee contribution under subparagraph (3) of this paragraph.

(3)(i) In the case of a taxable year of the plan for which employer contributions are made on behalf of both an owner-employee and either common-law employees or self-employed individuals who are not owner-employees, employee contributions on behalf of an owner-employee may be made for such taxable year of the plan. How-ever, the amount of such contributions, if any, which is described in subdivisions (ii), (iii), or (iv) of this subparagraph is an excess contribution.

(ii) An excess contribution is the amount of any employee contribution made on behalf of any owner-employee during a taxable year of the plan at a rate in excess of the rate of contributions which may be made as employee contributions by common-law employees, or by self-employed individuals who are not owner-employees, during such taxable year of the plan.

(iii) An excess contribution is the amount of any employee contribution made on behalf of an owner-employee which exceeds the lesser of $2,500 or 10 percent of the earned income (as defined in paragraph (c) of § 1.401–10) of such owner-employee for his taxable year in which such contributions are made.

(iv) In the case of a taxable year of an owner-employee in which contributions are made on behalf of such owner-employee under more than one plan, an excess contribution is the amount of any employee contribution made on behalf of such owner-employee under all such plans during such taxable year which exceeds $2,500. If such an excess contribution is made, the amount of the excess contribution made on behalf of the owner-employee with respect to any one of such plans is the amount by which the employee contribution on his behalf under such plan for the year exceeds an amount which bears the same ratio to $2,500 as the earned income of the owner-employee derived from the trade or business with respect to which the plan is established bears to his earned income derived from the trades or businesses with respect to which all such plans are established.

(4) An excess contribution is the amount of any contribution on behalf of an owner-employee for any taxable year of the plan with respect to which the plan is treated, under section 401(e)(2), as not meeting the requirements of section 401(d) with respect to such owner-employee.

(c) *Contributions for premiums on certain annuity, endowment, or life insurance contracts.* (1) The term ''excess contribution'' does not include the amount of any employer contributions on behalf of an owner-employee which, under the provisions of the plan, is expressly required to be applied (either directly or through a trustee) to pay the premiums or other consideration for one or more annuity, endowment, or life insurance contracts, if—

(i) The employer contributions so applied meet the requirements of subparagraphs (2) through (4) of this paragraph, and

(ii) The total employer contributions required to be applied annually to pay premiums on behalf of any owner-employee for contracts described in this paragraph do not exceed $2,500. For purposes of computing such $2,500 limit, the total employer contributions includes amounts which are allocable to the purchase of life, accident, health, or other insurance.

(2)(i) The employer contributions must be paid under a plan which satisfies all the requirements for qualification. Accordingly, for example, contributions can be paid under the plan for life insurance protection only to the extent otherwise permitted under sections 401 through 404 and the regulations thereunder. However, certain of the requirements for qualification are modified with respect to a plan described in this paragraph (see section 401(a)(10)(A)(ii) and (d)(5)).

(ii) A plan described in this paragraph is not disqualified merely because a contribution is made on behalf of an owner-employee by his employer during a taxable year of the employer for which the owner-employee has no earned income. On the other hand, a plan will fail to qualify if a contribution is made on behalf of an owner-employee which results in the discrimination prohibited by section 401(a)(4) as modified by section 401(a)(10)(A)(ii) (see paragraph (f)(3) of § 1.401–12).

(3) The employer contributions must be applied to pay premiums or other consideration for a contract issued on the life of the owner-employee. For purposes of this subparagraph, a contract is not issued on the life of an owner-employee unless all the proceeds which are, or may become, payable under the contract are payable directly, or through a trustee of a trust described in section 401(a) and exempt from tax under section 501(a), to the owner-employee or to the beneficiary named in the contract or under the plan. Accordingly, for example, a nontransferable face-amount certificate (as defined in section 401(g) and the regulations thereunder) is considered an annuity on the life of the owner-employee if the proceeds of such contract are payable only to the owner-employee or his beneficiary.

(4)(i) For any taxable year of the employer, the amount of contributions by the employer on behalf of the owner-employee which is applied to pay premiums under the contracts described in this paragraph must not exceed the average of the amounts deductible under section 404 (determined without regard to section 404(a)(10)) by such employer on behalf of such owner-employee for the most recent three taxable years of the employer (ending prior to the date the latest contract was entered into or modified to provide additional benefits), in which the owner-employee derived earned income from the trade or business with respect to which the plan is established. However, if such owner-employee has not derived earned income for at least three taxable years preceding such date, then, in determining the ''average of the amounts deductible'', only so many of such taxable years as such owner-employee was engaged in such trade or business and derived earned income therefrom are taken into account.

(ii) For the purpose of making the computation described in subdivision (i) of this subparagraph, the taxable years taken into account include those years in which the individual derived earned income from the trade or business but was not an owner-employee with respect to such trade or business. Furthermore, taxable years of the employer preceding the taxable year in which a qualified plan is established are taken into account. If such taxable years began prior to January 1, 1963, the amount deductible is determined as if section 404 included section 404(a) (8), (9), (10), and (e).

(5) The amount of any employer contribution which is not deductible but which is not treated as an excess contribution because of the provisions of this paragraph shall be taken into account as an employee contribution made on behalf of the owner-employee during the owner-employee's taxable year with, or within which, the taxable year of the person treated as his employer under section 401(c)(4) ends. However, such contribution is only treated as an employee contribution made on behalf of the owner-employee for the purpose of determining whether any other employee contribution made on behalf of the owner-employee during such period is an excess contribution described in paragraph (b)(3) of this section.

(d) *Effect of an excess contribution which is not willfully made.* (1) If an excess contribution (as defined in paragraph (b) of this section) is made on behalf of an owner-employee, and if such contribution is not willfully made, then the provisions of this paragraph describe the effect of such an excess contribution. However, if the excess contribution made on behalf of an owner-employee is determined to have been willfully made, then the provisions of paragraph (e) of this section are applicable to such contribution.

(2)(i) This paragraph does not apply to an excess contribution if the net amount of such excess contribution (as defined in subparagraph (4) of this paragraph) and the net income attributable to such amount are repaid to the owner-employee on whose behalf the excess contribution was made at any time before the end of six months beginning on the day on which the district director sends notice (by certified or registered mail) of the amount of the excess contribution to the trust, insurance company, or other person to whom such excess contribution was paid. The net income attributable to the net amount of the excess contribution is the aggregate of the amounts of net income attributable to the net amount of the excess contribution for each year of the plan beginning with the taxable year of the plan within which the excess contribution is made and ending with the close of the taxable year of the plan immediately preceding the taxable year of the plan in which the net amount of the excess contribution is repaid. The amount of net income attributable to the net amount of the excess contribution for each year is the amount of net income earned under the plan during the year which is allocated in a reasonable manner to the net amount of the excess contribution. For example, the amount of net income earned under the plan for the year which is attributable to the net amount of an excess contribution can be computed as the amount which bears the same ratio to the amount of the ''net income attributable to the interest of the owner-employee under the plan'' for such taxable year (determined in accordance with the provisions of subparagraph (5)(ii) of this paragraph) as the net amount of the excess contribution bears to the aggregate amount standing to the account of the owner-employee at the end of that year (including the net amount of any excess contribution).

(ii) The notice described in subdivision (i) of this subparagraph shall not be mailed prior to the time that the amount of the tax under chapter 1 of the Code of the owner-employee to whom the excess contribution is to be repaid has been finally determined for his taxable year in which such excess contribution was made. For purposes of this subdivision, a final determination of the amount of tax liability of the owner-employee includes—

(A)1 A decision by the Tax Court of the United States, or a judgment, decree, or other order by any court of competent jurisdiction, which has become final;

(B) A closing agreement authorized by section 7121; or

(C) The expiration of the period of limitation on suits by the taxpayer for refund, unless suit is instituted prior to the expiration of such period.

(iii) For purposes of this subparagraph, an amount is treated as repaid to an owner-employee if an adequate adjustment is made to the account of the owner-employee. An adequate adjustment is made to the account of an owner-employee, for example, if the amount of the excess contribution (without any reduction for any loading or other administrative charge) and the net income attributable to such amount is taken into account as a contribution under the plan for the current year. In such a case, the gross income of the owner-employee for his taxable year in which such adjustment is made includes the amount of the net income attributable to the excess contribution.

(iv) If the net amount of the excess contribution and the net income attributable thereto is repaid, within the period described in subdivision (i) of this subparagraph, to the owner-employee on whose behalf such contribution was made, then the net income attributable to the excess contribution is, pursuant to section 61(a), includible in the gross income of the owner-employee for his taxable year in which such amount is distributed, or made available, to him. However, such amount is not a distribution to which section 402 or 403 and section 72 apply (see subparagraph (6) of this paragraph).

(3)(i) If the net amount of any excess contribution (as defined in subparagraph (4) of this paragraph) and the net income attributable to that excess contribution are not repaid to the owner-employee on whose behalf the excess contribution was made before the end of the six-month period described in subparagraph (2)(i) of this paragraph, the plan under which the excess contribution has been made is considered, for purposes of section 404, as not satisfying the requirements for qualification with respect to such owner-employee for all taxable years of the plan described in subdivision (ii) of this subparagraph. However, such disqualification only applies to the interest of the owner-employee on whose behalf an excess contribution has been made and does not disqualify the plan with respect to the other participants thereunder.

(ii) The taxable years referred to in subdivision (i) of this subparagraph include the taxable year of the plan within which the excess contribution is made and each succeeding taxable year of the plan until the beginning of the taxable year of the plan in which the trust, insurance company, or other person to whom such excess contribution was paid repays to such owner-employee—

(A) The net amount of the excess contribution, and

(B) The amount of income attributable to his interest under the plan which is includible in his gross income for any taxable year by reason of the provisions of subparagraph (5) of this paragraph.

(4) For purposes of this paragraph, the net amount of an excess contribution is the amount of such excess contribution, as defined in paragraph (b) of this section, reduced by the amount of any loading charge or other administrative charge ratably allocable to such excess contribution.

(5)(i) If a plan is considered as not meeting the requirements for qualification with respect to an owner-employee by reason of the provisions of subparagraph (3) of this paragraph for any taxable year of the plan, such owner-employee's gross income for any of his taxable years with or within which such taxable year of the plan ends shall, for purposes of chapter 1 of the Code, include the portion of the net income earned under the plan for such taxable year of the plan which is attributable to the interest of the owner-employee under the plan.

(ii) For purposes of this subparagraph, the term ''net income'' means the net income earned under the plan determined in accordance with generally accepted accounting principles consistently applied, and the ''net income attributable to the interest of the owner-employee under the plan'' is the amount which bears the same ratio to the aggregate amount of net income earned under the plan for the taxable year of the plan as the amount standing to the account of the owner-employee at the end of that year (including the amount of any excess contribution which is credited to his account) bears to the aggregate amount of all funds under the plan for all employees at the end of that year (including the aggregate amount of excess contributions credited to the accounts of all owner-employees for that year).

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. A is an owner-employee covered under the X Employees' Pension Trust who files his return on the basis of a calendar year. An excess contribution was made on behalf of A during the plan year beginning on January 1, 1966. The net amount of the excess contribution and the net income attributable thereto was not repaid to A before the end of the six-month period described in subparagraph (2)(i) of this paragraph. Accordingly, the net income earned under the plan during 1966 which is attributable to A's interest is to be included in his gross income for 1966. Assume that the trust which forms a part of the pension plan of the X Company also files its returns on a calendar year basis, and that during 1966 the trust had a gross income of $4,000 (including a long-term capital gain of $2,500) and expenses of $500. Assume, further, that the amount standing to A's account on December 31, 1966 (including the amount of the excess contribution), was $20,000, and that on that date the amount funded under the plan for all employees (including A) is $140,000. Then the net income of the trust for 1966 is $3,500 ($4,000 − $500). The net income attributable to the interest of A under the plan is $500 (the amount which bears the same ratio to $3,500 as $20,000 bears to $140,000). Accordingly, $500 is included in A's gross income in accordance with the provisions of section 401(e)(2)(B) as the ''net income attributable to the interest of the owner-employee under the plan''.

(6) The provisions of section 402 or 403 and section 72 do not apply to any amount distributed, or made available, to an owner-employee which is described in this paragraph. Accordingly, for example, the provisions of section 72(m)(5)(A)(i), relating to amounts subject to the penalty tax imposed by section 72(m), do not apply to the amount of the net income attributable to the interest of an owner-employee (as defined in subparagraph (5)(ii) of this paragraph) which is includible in his gross income. Furthermore, in such a case, the provisions of section 401(d)(5)(C) do not apply to such amount.

(7) Certain adjustments will be required with respect to the interest of an owner-employee after any amount previously allocated to his account has been returned to him pursuant to the provisions of this paragraph. For example, if the determination of whether life insurance benefits provided under the plan are incidental is made, in part, with regard to the contributions allocated to the accounts of the participants covered under the plan, an adjustment may have to be made with respect to the life insurance purchased under the plan for any owner-employee after any amount previously allocated to his account has been repaid to him. Furthermore, if, for example, an owner-employee has received annuity payments which were taxable under the exclusion ratio rule of section 72, and if such exclusion ratio took into account any amount credited to the account of the owner-employee which is subsequently repaid to him, then such exclusion ratio must be recomputed after the adjustment in such owner-employee's account has taken place.

(8) Notwithstanding any other provision of law, in any case in which the plan is treated as not satisfying the requirements for qualification with respect to any owner-employee by reason of the provisions of section 401(e), the period for assessing, with respect to such owner-employee, any deficiency arising by reason of—

(i) The disallowance of any deduction under section 404 by reason of the provisions of subparagraph (3) of this paragraph, or

(ii) The inclusion of amounts in the gross income of the owner-employee by reason of the provisions of subparagraph (5) of this paragraph,

shall not expire prior to 18 months after the day the district director mails the notice with respect to the excess contribution (described in subparagraph (2)(i) of this paragraph) which gives rise to such disallowance or inclusion. Thus, for example, notwithstanding the provisions of section 6212(c) (relating to the restriction on the determination of additional deficiencies), if, after a final determination by the Tax Court of the income tax liability of an owner-employee for a taxable year in which an excess contribution was made, the amount of such excess contribution and the net income attributable thereto is not paid to the owner-employee before the end of the six-month period described in subparagraph (2)(i) of this paragraph, an additional deficiency assessment may be made for such taxable year with respect to such excess contribution.

(e) *Effect of an excess contribution which is determined to have been willfully made.* If an excess contribution (as defined in paragraph (b) of this section) on behalf of an owner-employee is determined to have been willful ly made, then—

(1) Only the provisions of this paragraph apply to such contribution;

(2) There shall be distributed to the owner-employee on whose behalf such contribution was willfully made his entire interest in all plans in which he is a participant as an owner-employee;

(3) The amount distributed under each such plan is an amount to which section 72 does apply (see section 72(m)(5)(A)(iii)); and

(4) For purposes of section 404, no plan in which such individual is covered as an owner-employee shall be considered as meeting the requirements for qualification with respect to such owner-employee for any taxable year of the plan beginning with or within the calendar year in which it is determined that the excess contribution has been willfully made and with or within the five calendar years following such year.

(f) *Years to which this section applies.* This section applies to contributions made in taxable years of employers beginning before January 1, 1976. Thus, for example, in the case of willful contributions made in taxable years of employers beginning before January 1, 1976, paragraphs (e) (1), (2), and (3) of this section apply to such taxable years beginning on or after such date. However, in such a case, because the application of paragraph (e)(4) of this section affects contributions made in taxable years of employers beginning on or after January 1, 1976, paragraph (e)(4) of this section does not apply to such taxable years; see paragraph (c) of §1.401(e)–4 (relating to transitional rules for excess contributions).

[T.D. 6676, 28 FR 10139, Sept. 17, 1963; as amended by T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401–14 Inclusion of medical benefits for retired employees in qualified pension or annuity plans.

(a) *Introduction.* Under section 401(h) a qualified pension or annuity plan may make provision for the payment of sickness, accident, hospitalization, and medical expenses for retired employees, their spouses, and their dependents. The term ‘‘medical benefits described in section 401(h)’’ is used in this section to describe such payments.

(b) *In general*—(1) *Coverage.* Under section 401(h), a qualified pension or annuity plan may provide for the payment of medical benefits described in section 401(h) only for retired employees, their spouses, or their dependents. To be ‘‘retired’’ for purposes of eligibility to receive medical benefits described in section 401(h), an employee must be eligible to receive retirement benefits provided under the pension plan, or else be retired by an employer providing such medical benefits by reason of permanent disability. For purposes of the preceding sentence, an employee is not considered to be eligible to receive retirement benefits provided under the plan if he is still employed by the employer and a separation from employment is a condition to receiving the retirement benefits.

(2) *Discrimination.* A plan which provides medical benefits described in section 401(h) must not discriminate in favor of officers, shareholders, supervisory employees, or highly compensated employees with respect to coverage and with respect to the contributions or benefits under the plan. The determination of whether such a plan so discriminates is made with reference to the retirement portion of the plan as well as the portion providing the medical benefits described in section 401(h). Thus, for example, a plan will not be qualified under section 401 if it discriminates in favor of employees who are officers or shareholders with respect to either portion of the plan.

(3) *Funding medical benefits.* Contributions to provide the medical benefits described in section 401(h) may be made either on a contributory or noncontributory basis, without regard to whether the contributions to fund the retirement benefits are made on a similar basis. Thus, for example, the contributions to fund the medical benefits described in section 401(h) may be provided for entirely out of employer contributions even though the retirement benefits under the plan are determined on the basis of both employer and employee contributions.

(4) *Definitions.* For purposes of section 401(h) and this section:

(i) The term *dependent* shall have the same meaning as that assigned to it by section 152, and

(ii) The term *medical expense* means expenses for medical care as defined in section 213(e)(1).

(c) *Requirements.* The requirements which must be met for a qualified pension or annuity plan to provide medical benefits described in section 401(h) are set forth in subparagraphs (1) through (5) of this paragraph.

(1) *Benefits.* (i) The plan must specify the medical benefits described in section 401(h) which will be available and must contain provisions for determining the amount which will be paid. Such benefits, when added to any life insurance protection provided for under the plan, must be subordinate to the retirement benefits provided by such plan. For purposes of this section, life insurance protection includes any benefit paid under the plan on behalf of an employee-participant as a result of the employee-participant's death to the extent such payment exceeds the amount of the reserve to provide the retirement benefits for the employee-participant existing at his death. The medical benefits described in section 401(h) are considered subordinate to the retirement benefits if at all times the aggregate of contributions (made after the date on which the plan first includes such medical benefits) to provide such medical benefits and any life insurance protection does not exceed 25 percent of the aggregate contributions (made after such date) other than contributions to fund past service credits.

(ii) The meaning of the term *subordinate* may be illustrated by the following example:

Example. The X Corporation amends its qualified pension plan to provide medical benefits described in section 401(h) effective for the taxable year 1964. The total contributions under the plan (excluding those for past service credits) for the taxable year 1964 are $125,000, allocated as follows: $100,000 for retirement benefits, $10,000 for life insurance protection, and $15,000 for medical benefits described in section 401(h). The medical benefits described in section 401(h) are considered subordinate to the retirement benefits since the portion of the contributions allocated to the medical benefits described in section 401(h) ($15,000) and to life insurance protection after such medical benefits were included in the plan ($10,000), or $25,000, does not exceed 25 percent of $125,000. For the taxable year 1965, the X Corporation contributes $140,000 (exclusive of contributions for past service credits) allocated as follows: $100,000 for retirement benefits, $10,000 for life insurance protection, and $30,000 for medical benefits described in section 401(h). The medical benefits described in section 401(h) are considered subordinate to the retirement benefits since the aggregate contributions allocated to the medical benefits described in section 401(h) ($45,000) and to life insurance protection after such medical benefits were included in the plan ($20,000) or $65,000 does not exceed 25 percent of $265,000, the aggregate of the contributions made in 1964 and 1965.

(2) *Separate accounts.* Where medical benefits described in section 401(h) are provided for under a qualified pension or annuity plan, a separate account must be maintained with respect to contributions to fund such benefits. The separation required by this section

is for recordkeeping purposes only. Consequently, the funds in the medical benefits account need not be separately invested. They may be invested with funds set aside for retirement purposes without identification of which investment properties are allocable to each account. However, where the investment properties are not allocated to each account, the earnings on such properties must be allocated to each account in a reasonable manner.

(3) *Reasonable and ascertainable.* Section 401(h) further requires that amounts contributed to fund medical benefits therein described must be reasonable and ascertainable. For the rules relating to the deduction of such contributions, see paragraph (f) of § 1.404(a)–3. The employer must, at the time he makes a contribution, designate that portion of such contribution allocable to the funding of medical benefits.

(4) *Impossibility of diversion prior to satisfaction of all liabilities.* Section 401(h) further requires that it must be impossible, at any time prior to the satisfaction of all liabilities under the plan to provide for the payment of medical benefits described in section 401(h), for any part of the corpus or income of the medical benefits account to be (within the taxable year or thereafter) used for, or diverted to, any purpose other than the providing of such benefits. Consequently, a plan which, for example, under its terms, permits funds in the medical benefits account to be used for any retirement benefit provided under the plan does not satisfy the requirements of section 401(h) and will not qualify under section 401(a). However, the payment of any necessary or appropriate expenses attributable to the administration of the medical benefits account does not affect the qualification of the plan.

(5) *Reversion upon satisfaction of all liabilities.* The plan must provide that any amounts which are contributed to fund medical benefits described in section 401(h) and which remain in the medical benefits account upon the satisfaction of all liabilities arising out of the operation of the medical benefits portion of the plan are to be returned to the employer.

(6) *Forfeitures.* The plan must expressly provide that in the event an individual's interest in the medical benefits account is forfeited prior to termination of the plan an amount equal to the amount of the forfeiture must be applied as soon as possible to reduce employer contributions to fund the medical benefits described in section 401(h).

(d) *Effective date.* This section applies to taxable years of a qualified pension or annuity plan beginning after October 23, 1962.

[T.D. 6722, 29 FR 5072, Apr. 14, 1964]

§ 1.401(a)–1 Post-ERISA qualified plans and qualified trusts; In general.

(a) *Introduction*—(1) *In general.* This section and the following regulation sections under section 401 reflect the provisions of section 401 after amendment by the Employee Retirement Income Security Act of 1974 (Pub. L. 93–406) (''ERISA'').

(2) [Reserved]

(b) *Requirements for pension plans*—(1) *Definitely determinable benefits.* (i) In order for a pension plan to be a qualified plan under section 401(a), the plan must be established and maintained by an employer primarily to provide systematically for the payment of definitely determinable benefits to its employees over a period of years, usually for life, after retirement.

(ii) Section 1.401–1(b)(1)(i), a pre-ERISA regulation, provides rules applicable to this requirement, and that regulation is applicable except as otherwise provided.

(iii) The use of the type of plan provision described in § 1.415–1(d)(1) which automatically freezes or reduces the rate of benefit accrual or the annual addition to insure that the limitations of section 415 will not be exceeded, will not be considered to violate the requirements of this subparagraph provided that the operation of such provision precludes discretion by the employer.

[T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§ 1.401(a)–2 Impossibility of diversion under qualified plan or trust.

(a) *General rule.* Section 401(a)(2) requires that in order for a trust to be qualified, it must be impossible under the trust instrument (in the taxable year and at any time thereafter before the satisfaction of all liabilities to employees or their beneficiaries covered by the trust) for any part of the trust corpus or income to be used for, or diverted to, purposes other than for the exclusive benefit of those employees or their beneficiaries. Section 1.401–2, a pre-ERISA regulation, provides rules under section 401(a)(2) and that regulation is applicable except as otherwise provided.

(b) *Section 415 suspense account.* Paragraph (a) of this section does not apply to amounts properly allocated to a suspense account pursuant to §1.415–6(b)(6). The plan, or the trust forming part of the plan, may provide for the reversion to the employer, upon termination of the plan, of amounts held in the suspense account.

[T.D. 7748, 46 FR 1696, Jan. 7, 1981]

§1.401(a)–4 Optional forms of benefit (before 1994).

Q–1: How does section 401(a)(4) apply to optional forms of benefits?

A–1: (a) *In general*—(1) *Scope.* The nondiscrimination requirements of section 401(a)(4) apply to the amount of contributions or benefits, optional forms of benefit, and other benefits, rights and features (e.g., actuarial assumptions, methods of benefit calculation, loans, social security supplements, and disability benefits) under a plan. This section addresses the application of section 401(a)(4) only to optional forms of benefit under a plan. Generally, the determination of whether an optional form is nondiscriminatory under section 401(a)(4) is made by reference to the availability of such optional form, and not by reference to the utilization or actual receipt of such optional form. See Q&A–2 of this section. Even though an optional form of benefit under a plan may be nondiscriminatory under section 401(a)(4) and this §1.401(a)–4 because the availability of such optional form does not impermissibly favor employees in the highly compensated group, such plan may fail to satisfy section 401(a)(4) with respect to the amount of contributions or benefits or with respect to other benefits, rights and features if, for example, the method of calculation or the amount or value of benefits payable under such optional form impermissibly favors the highly compensated group. See §1.411(d)–4, Q&A–1 for the definition of ‘‘optional form of benefit.’’

(2) *Nondiscrimination requirements.* Each optional form of benefit provided under a plan is subject to the nondiscrimination requirement of section 401(a)(4) and thus the availability of each optional form of benefit must not discriminate in favor of the employees described in section 401(a)(4) in whose favor discrimination is prohibited (the ‘‘highly compensated group’’). See paragraph (b) of this Q&A–1 for a description of the employees included in such group. This is true without regard to whether a particular optional form of benefit is the actuarial equivalent of any other optional form of benefit under the plan. Thus, for example, a plan may not condition, or otherwise limit, the availability of a single sum distribution of an employee's benefit in a manner that impermissibly favors the highly compensated group.

(b) *Highly compensated group.* For plan years commencing prior to the applicable effective date for the amendment made to section 401(a)(4) by section 1114 of the Tax Reform Act of 1986 (TRA '86), the highly compensated group consists of those employees who are officers, shareholders, or highly compensated. For plan years beginning on or after the applicable effective date of the amendments to section 401(a)(4) made by TRA '86, the highly compensated group consists of those employees who are highly compensated within the meaning of section 414(q). The amendment to section 401(a)(4) made by section 1114 of TRA '86 is generally effective for plan years commencing after December 31, 1988. See section 1114(a) of TRA '86.

Q–2: How is it determined whether an optional form of benefit satisfies the nondiscrimination requirements of section 401(a)(4)?

A–2: (a) *Nondiscrimination requirement.*—(1) *In general.* An optional form of benefit under a plan is nondiscriminatory under section 401(a)(4) only if the requirements of paragraphs (a)(2) and (a)(3) of this Q&A–2 are satisfied with respect to such optional form. The determination of whether an optional form of benefit satisfies these requirements is made by reference to the availability of the optional form, and not by reference to the utilization or actual receipt of such optional form. Thus, an optional form of benefit that satisfies the requirements of paragraphs (a)(2) and (a)(3) of this Q&A–2 is nondiscriminatory under section 401(a)(2) even though the highly compensated group disproportionately utilizes such optional form. However, the composition of the group of employees who actually receive benefits in an optional form may be relevant in determining whether such optional form satisfies the requirement of paragraph (a)(3) of this Q&A–2 with respect to effective availability.

(2) *Current availability*—(i) *Plan years prior to TRA '86 effective date.* Except as provided in paragraph (a)(2)(iii) of this Q&A–2, for plan years prior to the effective date of the amendments made to section 401(b) by section 1112(a) of TRA '86, the requirement of this paragraph (a)(2) is satisfied only if the group of employees to whom the optional form is currently available satisfies either the seventy percent test of section 410(b)(1)(A) or the nondiscriminatory classification test of section 410(b)(1)(B).

(ii) *Plan years commencing on or after TRA '86 effective date.* Except as provided in paragraph (a)(2)(iii) of this Q&A–2, for plan years commencing on or after the effective date on which the amendments made to section 410(b) by section 1112(a) of TRA '86 first apply to a plan, the requirement of this paragraph (a)(2) is satisfied only if the group of employees to whom the optional form is currently available satisfies either the percentage test set forth in section 410(b)(1)(A), the ratio test set forth in section 410(b)(1)(B), or the nondiscriminatory classification test set forth in section 410(b)(2)(A)(i). The employer need not satisfy the average benefit percentage test in section 410(b)(2)(A)(ii) in order for the optional form to be currently available to a nondiscriminatory group of employees.

(iii) *Special rule for certain governmental or church plans.* Plans described in section 410(c) will be treated as satisfying the current availability test of this paragraph (a)(2) if the group of employees with respect to whom the optional form is currently available satisfies the requirements of section 401(a)(3) as in effect on September 1, 1974.

(iv) *Effective data for TRA '86 amendments to section 410(b).* The amendments to section 410(b) made by section 1112(a) of TRA '86 are generally effective for plan years commencing after December 31, 1988. See section 1112(e)(1) of TRA '86.

(v) *Elimination of optional forms*—(A) *In general.* Notwithstanding paragraphs (a)(2)(i) and (a)(2)(ii) of this Q&A–2, in the case of an optional form of benefit that has been eliminated under a plan with respect to specified employees for benefits accrued after the later of the eliminating amendment's adoption date or effective date, the determination of whether such optional form satisfies this paragraph (a)(2) with respect to such employees is to be made immediately prior to the elimination. Accordingly, if, as of the later of the adoption date or effective date of an amendment eliminating an optional form with respect to future benefit accruals, the current availability of such optional form immediately prior to such amendment satisfies this paragraph (a)(2), then the optional form will be treated as satisfying this paragraph (a)(2) for all subsequent years.

(B) *Example.* A profit-sharing plan that provides for a single sum distribution available to all employees on termination of employment is amended January 1, 1990, to eliminate such single sum optional form of benefit with respect to benefits accrued after January 1, 1991. As of January 1, 1991, the single sum optional form of benefit is available to a group of employees that satisfies the percentage test of section 410(b)(1)(A). As of January 1, 1995, all nonhighly compensated employees who were entitled to the single sum optional form of benefit have terminated from employment with the employer and taken a distribution of their benefits. The only remaining employees who have a right to take a portion of their benefits in the form of a single sum distribution on termination of employment are highly compensated employees. Because the availability of the single sum optional form of benefit satisfied the current availability test as of January 1, 1991, the availability of such optional form of benefit is deemed to continue to satisfy the current availability test of this paragraph (a)(2).

(3) *Effective availability*—(i) *In general.* The requirement of this paragraph (a)(3) is satisfied only if, based on the facts and circumstances, the group of employees to whom the optional form is effectively available does not substantially favor the highly compensated group. This is the case even if the optional form is, or has been, currently available to a group of employees that satisfies the applicable requirements in paragraph (a)(2) (i) or (ii) of this Q&A–2.

(ii) *Examples.* The provisions of paragraph (a)(3)(i) of this Q&A–2 can be illustrated by the following examples:

Example 1. Employer X maintains a defined benefit plan that covers both of the 2 highly compensated employees of the employer and 8 of the twelve nonhighly compensated employees of the employer. Plan X provides for a normal retirement benefit payable as an annuity and based on a normal retirement age of 65, and an early retirement benefit payable upon termination in the form of an annuity to employees who terminate from service with the employer on or after age 55 with 30 or more years of service. Each of the 2 employees of employer X who are in the highly compensated group currently meet the age and service requirement, or will have 30 years of service by the time they reach age 55. All but 2 of the 8 nonhighly compensated employees of employer X who are covered by the plan were hired on or after age 35 and thus, cannot qualify for the early retirement benefit provision. Even though the group of employees to whom the early retirement benefit is currently available does not impermissibly favor the highly compensated group by reason of disregarding age and service, these facts and circumstances indicate that the effective availability of the early retirement benefit in plan X substantially favors the highly compensated group.

Example 2. Assume the same facts as in *Example 1* except that the early retirement benefit is added by a plan amendment first adopted, announced and effective December 1, 1991, and is available only to employees who terminate from employment with the employer prior to December 15, 1991. Further assume that all employees were hired prior to attaining age 25, and that the group of employees who have, or will have attained age 55 with 30 years of service, by December 15, 1991, satisfies the ratio test of section 410(b)(1)(B). Finally, assume that the only employees who terminate from employment with the employer during the two week period in which the early retirement benefit is available are employees in the highly compensated group. These facts and circumstances indicate that the effective availability of the early retirement benefit substantially favors the highly compensated group. This is the case even though the limitation of the early retirement benefit to a specified period satisfies section 411(d)(6).

Example 3. Employer Y amends plan Y on June 30, 1990, to provide for a single sum distribution for employees who terminate from employment with the employer after June 30, 1990, and prior to January 1, 1991. The availability of this single sum distribution is conditioned on the employee having a particular disability at the time of termination of employment. The only employee of the employer who meets this disability requirement at the time of the amendment and thereafter through December 31, 1990, is a highly compensated employee. Generally, a disability condition with respect to the availability of a single sum distribution may be disregarded in determining whether the current availability of such optional form of benefit is discriminatory. However, these facts and circumstances indicate that the effective availability of the optional form of benefit substantially favors the highly compensated group.

Example 4. Employer Z maintains a money purchase pension plan that covers all employees of the employer. The plan provides for distribution in the form of a joint and survivor annuity, a life annuity, or equal installments over 10 years. During the 1992 calendar year the employer winds up his business. In December of 1992, only two employees remain in the employment of the employer, both of whom are highly compensated. Employer Z then amends the plan to provide for a single sum distribution to employees who terminate from employment on or after the date of the amendment. Both highly compensated employees terminate from employment on December 31, 1992, taking a single sum distribution of their benefits. These facts and circumstances indicate that the effective availability of the single sum optional form of benefit substantially favors the highly compensated group.

(b) *Application of tests*—(1) *Current availability*—(i) *In general.* Except as otherwise provided in this paragraph (b), in determining whether an optional form of benefit that is subject to specified eligibility conditions is currently available to an employee for purposes of paragraph (a) of this Q&A–2, the determination of current availability generally is to be based on the current facts and circumstances with respect to the employee (e.g., the employee's current compensation or the employee's current net worth). Thus, for example, the fact that an employee may, in the future, satisfy an eligibility condition generally does not cause an optional form of benefit to be treated as currently available to such employee.

(ii) *Exceptions for age, service, employment termination and certain other conditions*—(A) *Age and service conditions.* For purposes of applying paragraph (a)(2) of this Q&A–2, except as provided in paragraph (b)(1)(ii)(B) of this Q&A–2, an age condition, a service condition, or both are to be disregarded. For example, an employer that maintains a plan that provides for an early retirement benefit payable as an annuity for employees in division A, subject to a requirement that the employee has attained his or her 55th birthday and has at least twenty years of service with the employer, is to disregard the age and service conditions in determining the group of employees to whom the early retirement annuity benefit is currently available. Thus, the early retirement annuity benefit is treated as currently available to all employees of division A, without regard to their ages or years of service and without regard to whether they could potentially meet the age and service conditions prior to attaining the plan's normal retirement age.

(B) *Exception for certain age and service conditions.* Age and service conditions that must be satisfied within a specified period of time may not be disregarded pursuant to paragraph (b)(1)(ii)(A) of this Q&A–2. However, in determining the current availability of an optional form of benefit subject to such an age condition, service condition, or both, an employer may project the age and service of employees to the last date on which the optional form of benefit subject to the age condition or service condition (or both) is available under the plan. An employer's ability to protect age and service to the last date on which the optional form of benefit is available under the plan is not cut off by a plan termination occurring prior to that date. Thus, for example, assume that an employer maintaining a plan that permits employees terminating from employment on or after age 55 between June 1, 1991 to May 31, 1992, to elect a single sum distribution, decides to terminate the plan on December 31, 1991. In determining the group of employees to whom the single sum optional form of benefit is currently available, this employer may project employees' ages through May 31, 1992.

(C) *Certain other conditions disregarded.* Conditions on the availability of optional forms of benefit requiring termination of employment, death, satisfaction of a specified health condition (or failure to meet such condition), disability, hardship, marital status, default on a plan loan secured by a participant's account balance, or execution of a covenant not to compete may be disregarded in determining the group of employees to whom an optional form of benefit is currently available.

(2) *Employees taken into account.* For purposes of applying paragraph (a) of this Q&A–2, the tests are to be applied on the basis of the employer's nonexcludable employees (whether or not they are participants in the plan) in the same manner as such tests would be applied in determining whether the plan providing the optional form of benefit satisfies the tests under section 410(b).

(3) *Definition of ''plan''.* For purposes of applying paragraph (a) of this Q&A–2, the term ''plan'' has the meaning that such term has for purposes of determining whether the amount of contributions or benefits and whether other benefits, rights, and features are nondiscriminatory under section 401(a)(4).

(4) *Restructuring optional forms of benefit*—(i) *In general.* For purposes of applying paragraph (a) of this Q&A–2, the availability of two or more optional forms of benefit under a plan may be tested by restructuring such benefits into two or more restructured optional forms of benefit and testing the availability of such restructured optional forms of benefit. If two or more optional forms of benefit under a plan contain both common and distinct components, such optional forms of benefit may be restructured as a single optional form of benefit comprising the common component, and one or more optional forms of benefit comprising

each distinct component. Components of optional forms of benefit may be treated as common only if they are identical with respect to all characteristics taken into account under Q&A–1(b) of §1.411(d)–4. The availability of each restructured optional form of benefit must satisfy the applicable nondiscrimination requirements of paragraph (a) of this Q&A–2.

(ii) *Example.* A profit-sharing plan covering all the employees of an employer provides a single sum distribution option upon termination from employment for all employees earning less than $50,000 and a single sum distribution option upon termination from employment after the attainment of age 55 for all employees earning $50,000 or more. These distribution options are identical in all other respects. For purposes of applying section 401(a)(4), such optional forms of benefit may be restructured into two different optional forms of benefit: (A) a single sum distribution option upon termination from employment after the attainment of age 55 for all employees (i.e., the common component), and (B) a single sum distribution option upon termination from employment before the attainment of age 55 for all employees earning less than $50,000. The availability of each of these restructured optional forms of benefit must satisfy section 401(a)(4).

(c) *Commissioner may provide additional tests.* The Commissioner may provide such additional factors, tests, and safe harbors as are necessary or appropriate for purposes of determining whether the availability of an optional form of benefit is discriminatory under section 401(a)(4). In addition, the Commissioner may provide that additional eligibility conditions not related directly or indirectly to compensation or wealth may be disregarded under paragraph (b)(1)(ii)(C) of this Q&A–2 in determining the current availability of an optional form of benefit. The Commissioner may provide such additional guidance only through the publication of revenue rulings, notices or other documents of general applicability.

Q–3: May a plan condition the availability of an optional form of benefit on employer discretion?

A–3: No. Even if the availability of an optional form of benefit that is conditioned on employer discretion satisfies the nondiscrimination requirements of section 401(a)(4), the plan providing the optional form of benefit will fail to satisfy certain other requirements of section 401(a), including, in applicable circumstances, the definitely determinable requirement of section 401(a) and the requirements of section 401(a)(25) and section 411(d)(6). See §1.411(d)–4.

Q–4: Will a plan provision violate section 401(a)(4) merely because it requires that an employee who terminates from service with the employer receive a single sum distribution in the event that the present value of the employee's benefit is not more than $3,500, as permitted by sections 411(a)(11) and 417(e)?

A–4: No. A plan will not be treated as discriminatory under section 401(a)(4) merely because the plan mandates a single sum distribution when the present value of an employee's benefit is not more than $3,500, as permitted by sections 411(a)(11) and 417(e). This is an exception to the general principles of this section. (No similar provision exists excepting such single sum distributions from the limits on employer discretion under section 411(d)(6). See §1.411(d)–4 Q&A–4.)

Q–5: If the availability of an optional form of benefit discriminates, or may reasonably be expected to discriminate, in favor of the highly compensated group, what acceptable alternatives exist for amending the plan without violating section 411(d)(6)?

A–5: (a) *Transitional rules*—(1) *In general.* The following rules apply for purposes of making necessary amendments to existing plans (as defined in Q&A–6 of this section) under which the availability of an optional form of benefit violates the nondiscrimination requirements of section 401(a)(4) or may reasonably be expected to violate such requirements. These transitional rules are provided under the authority of section 411(d)(6), which allows the elimination of certain optional forms of benefit if permitted by regulations, and section 7805(b).

(2) *Nondiscrimination*—(i) *In general.* The determination of whether the availability of an optional form of benefit violates section 401(a)(4) is to be made in accordance with Q&A–2 of this section. In addition, the availability of a particular optional form of benefit may reasonably be expected to violate the nondiscrimination requirements of

section 401(a)(4) if, under the applicable facts and circumstances, there is a significant possibility that the current availability of such optional form of benefit will impermissibly favor the highly compensated group. This determination must be made on the basis of the seventy percent test of section 410(b)(1)(A) or the nondiscriminatory classification test of section 410(b)(1)(B) as such tests existed prior to the effective date of the amendments made to section 410(b) by section 1112(a) of TRA '86. Thus, a condition may not reasonably be expected to discriminate for purposes of these rules merely because it results in a significant possibility that discrimination will result because of the amendments made to section 410(b) by section 1112(a) of TRA '86. In addition, the availability of an optional form of benefit may not reasonably be expected to discriminate merely because of an age or service condition that may be disregarded in determining the current availability of such optional form of benefit under paragraph (b)(1)(ii)(A) of Q&A–2 of this section. Similarly, the availability of an optional form of benefit may not reasonably be expected to discriminate merely because of an age or service condition that, after permitted projection, does not cause such optional form to fail to satisfy the requirement of this paragraph (a)(2).

(ii) *Examples.* The provisions of paragraph (a)(2)(i) of this Q&A–5 can be illustrated by the following examples:

Example (1). A plan provides that a single sum distribution option is available only to (A) employees earning $50,000 or more in the final year of employment, (B) employees who furnish evidence that they have a net worth above a certain specified amount, and (C) employees who present a letter from an accountant or attorney declaring that it is in the employee's best interest to receive a single sum distribution. Whether the availability of such optional form of benefit discriminates depends on whether it meets the requirements of Q&A–2 of this §1.401(a)–4. However, each of the specified conditions limiting the availability of the optional form of benefit may reasonably be expected to discriminate in favor of the highly compensated group in operation because of the likelihood of a significant positive correlation between the ability to meet any of the specified conditions and membership in the highly compensated group.

Example (2). A plan limits the availability of a single sum distribution option to employees employed in one particular division of the employer's company. All the employees of the company are participants in the plan. During the 1988 plan year, the division employs individuals who represent a nondiscriminatory classification of that company's employees (under section 410(b)(1)(B) prior to the effective date of the amendments made to section 410(b) by section 1112(a) of TRA '86) and is unlikely to cease employing such a nondiscriminatory classification in the future. The availability of a single sum distribution under this plan does not result in discrimination during the 1988 plan year and may not reasonably be expected to do so.

(b) *Transitional alternatives.* If the availability of an optional form of benefit under an existing plan is discriminatory under section 401(a)(4), the plan must be amended either to eliminate the optional form of benefit or to make the availability of the optional form of benefit nondiscriminatory. For example, the availability of an optional form of benefit may be made nondiscriminatory by making such benefit available to sufficient additional employees who are not in the highly compensated group or by imposing nondiscriminatory objective criteria on its availability such that the group of employees to whom the benefit is available is nondiscriminatory. See Q&A–6 of §1.411(d)–4 for requirements with respect to such objective criteria. If, under an exisitng plan, the availability of an optional form of benefit may reasonably be expected to discriminate, the plan may be amended in the same manner permitted where the availability of an optional form of benefit is discriminatory. See paragraph (d) of this Q&A–5 for rules limiting the period during which the availability of optional forms of benefit may be eliminated or reduced under this paragraph.

(c) *Compliance and amendment date provisions*—(1) *Operational compliance requirement.* On or before the applicable effective date for the plan (see Q&A–6 of this section), the plan sponsor must select one of the alternatives permitted under paragraph (b) of this Q&A–5 with respect to each affected optional form of benefit and the plan must be operated in accordance with this selection. This is an operational requirement and does not require a plan amendment prior to the period set forth in paragraph (c)(2) of this Q&A–5. There is no special reporting requirement under the Code or this section with respect to this selection.

(2) *Deferred amendment date.* If paragraph (c)(1) of this Q&A–5 is satisfied, a plan amendment conforming the plan to the particular alternative selected under paragraph (b) of this Q&A–5 must be adopted within the time period permitted for amending plans in order to meet the requirements of section 410(b) as amended by TRA '86. Such conforming amendment must be consistent with the sponsor's selection as reflected by plan practice during the period from the effective date to the date the amendment is adopted. Thus, for example, if an existing calendar year noncollectively bargained defined benefit plan has a single sum distribution form subject to a discriminatory condition, that was available as of January 30, 1986 (subject to such condition), and such employer makes one or more single sum distributions available on or after the first day of the first plan year commencing on or after January 1, 1989, and before the plan amendment, then such employer may not adopt a plan amendment eliminating the single sum distribution form. Instead, such employer must adopt an amendment making the distribution form available to a nondiscriminatory group of employees while retaining the availability of such distribution form with respect to the group of employees to whom the benefit is already available. Similarly, any objective criteria that are adopted as part of such amendment must be consistent with the plan practice for the applicable period prior to the amendment. A conforming amendment under this paragraph (c)(2) must be made with respect to each optional form of benefit for which such amendment is required and must be retroactive to the applicable effective date.

(d) *Limitation on transitional alternatives.* The transitional alternatives permitting the elimination or reduction of optional forms of benefit will not violate section 411(d)(6) during the period prior to the applicable effective date for the plan (see Q&A–6 of this section). After the applicable effective date, any amendment (other than one described in paragraph (c)(2) of this Q&A–5) that eliminates or reduces an optional form of benefit or imposes new objective criteria restricting the availability of such optional form of benefit will fail to qualify for the exception to section 411(d)(6) provided in this Q&A–5. This is the case without regard to whether the availability of the optional form of benefit is discriminatory or may reasonably be expected to be discriminatory.

Q–6: For what period are the rules of this section effective?

A–6: (a) *General effective date*—(1) *In general.* Except as otherwise provided in this section, the provisions of this section are effective January 30, 1986, and do not apply to plan years beginning on or after January 1, 1994. For rules applicable to plan years beginning on or after January 1, 1994, see §§1.401(a)(4)–1 through 1.401(a)(4)–13.

(2) *Plans of tax-exempt organizations.* In the case of plans maintained by organizations exempt from income taxation under section 501(a), including plans subject to section 403(b)(12)(A)(i) (nonelective plans), except as otherwise provided in this section, the provisions of this section are effective January 30, 1986, and do not apply to plan years beginning on or after January 1, 1996. For rules applicable to plan years beginning on or after January 1, 1996, see §§1.401(a)(4)–1 through 1.401(a)(4)–13.

(b) *New plans*—(1) *In general.* Unless otherwise provided in paragraph (b)(2) of this Q&A–6, plans that are either adopted or made effective on or after January 30, 1986, are ‘‘new plans’’. With respect to such new plans, this section is effective January 30, 1986. This effective date is applicable to such plans whether or not they are collectively bargained.

(2) *Exception with respect to certain new plans.* Plans that are new plans as defined in paragraph (b)(1) of this Q&A–6, under which the availability of an optional form of benefit is discriminatory or may reasonably be expected to be discriminatory, and that receive a favorable determination letter that covered such plan provisions with respect to an application submitted prior to July 11, 1988, will be treated as existing plans with respect to such optional

form of benefit for purposes of the transitional rules of this section. Thus, such plans are eligible for the compliance and amendment alternatives set forth in the transitional rule in Q&A–5 of this section.

(c) *Existing plans*—(1) *In general.* Plans that are both adopted and in effect prior to January 30, 1986, are ‘‘existing plans’’. In addition, new plans described in paragraph (b)(2) of this Q&A–6 are treated as existing plans with respect to certain forms of benefit. Subject to the limitations in paragraph (d) of this Q&A–6, the effective dates set forth in paragraphs (c)(2) and (c)(3) of this Q&A–6 apply to these existing plans for purposes of this section.

(2) *Existing noncollectively bargained plans.* With respect to existing noncollectively bargained plans, this section is effective for the first day of the first plan year commencing on or after January 1, 1989.

(3) *Existing collectively bargained plans.* With respect to existing collectively bargained plans, this section is effective for the later of the first day of the first plan year commencing on or after January 1, 1989, or the first day of the first plan year that the requirements of section 410(b) as amended by TRA ’86 apply to such plan.

(d) *Delayed effective dates not applicable to new optional forms of benefit or conditions*—(1) *In general.* The delayed effective dates in paragraph (c) (2) and (3) of this Q&A–6 for existing plans are applicable with respect to an optional form of benefit only if both the optional form of benefit and any applicable condition either causing the availability of such optional form of benefit to be discriminatory or making it reasonable to expect that the availability of such optional form will be discriminatory were both adopted and in effect prior to January 30, 1986. If the preceding sentence is not satisfied with respect to an optional form of benefit, this section is effective with respect to such optional form of benefit as if the plan were a new plan.

(2) *Exception for certain amendments covered by a favorable determination letter.* If a condition causing the availability of an optional form of benefit to be discriminatory, or to be reasonably expected to discriminate, was adopted or made effective on or after January 30, 1986, and a favorable determination letter that covered such plan provision is or was received with respect to an application submitted before July 11, 1988, the effective date of this section with respect to such provision is the applicable effective date determined under the rules with respect to existing plans, as though such provision had been adopted and in effect prior to January 30, 1986.

(e) *Transitional rule effective date.* The transitional rule provided in Q&A–5 of this section is effective January 30, 1986.

[53 FR 26054, July 11, 1988, as amended by T.D. 8360, 56 FR 47536, Sept. 19, 1991; T.D. 8485, 58 FR 46778, Sept. 3, 1993; T.D. 8212, 61 FR 14247, Apr. 1, 1996]

§ 1.401(a)–11 Qualified joint and survivor annuities.

(a) *General rule*—(1) *Required provisions.* A trust, to which section 411 (relating to minimum vesting standards) applies without regard to section 411(e)(2), which is a part of a plan providing for the payment of benefits in any form of a life annuity (as defined in paragraph (b)(1) of this section), shall not constitute a qualified trust under section 401(a)(11) and this section unless such plan provides that:

(i) Unless the election provided in paragraph (c)(1) of this section has been made, life annuity benefits will be paid in a form having the effect of a qualified joint and survivor annuity (as defined in paragraph (b)(2) of this section) with respect to any participant who—

(A) Begins to receive payments under such plan on or after the date the normal retirement age is attained, or

(B) Dies (on or after the date the normal retirement age is attained) while in active service of the employer maintaining the plan, or

(C) In the case of a plan which provides for the payment of benefits before the normal retirement age, begins to receive payments under such plan on or after the date the qualified early retirement age (as defined in paragraph (b)(4) of this section) is attained, or

(D) Separates from service on or after the date the normal retirement age (or the qualified early retirement age) is attained and after satisfaction of eligibility requirements for the payment of benefits under the plan (except for any plan requirement that there be filed a claim for benefits) and thereafter dies before beginning to receive life annuity benefits;

(ii) Any participant may elect, as provided in paragraph (c)(1) of this section, not to receive life annuity benefits in the form of a qualified joint and survivor annuity; and

(iii) If the plan provides for the payment of benefits before the normal retirement age, any participant may elect, as provided in paragraph (c)(2) of this section, that life annuity benefits be payable as an early survivor annuity (as defined in paragraph (b)(3) of this section) upon his death in the event that he—

(A) Attains the qualified early retirement age (as defined in paragraph (b)(4) of this section), and

(B) Dies on or before the day normal retirement age is attained while employed by an employer maintaining the plan.

(2) *Certain cash-outs.* A plan will not fail to satisfy the requirements of section 401(a)(11) and this section merely because it provides that if the present value of the entire nonforfeitable benefit derived from employer contributions of a participant at the time of his separation from service does not exceed $1,750 (or such smaller amount as the plan may specify), such benefit will be paid to him in a lump sum.

(3) *Illustrations.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). The X Corporation Defined Contribution Plan was established in 1960. As in effect on January 1, 1974, the plan provided that, upon the participant's retirement, the participant may elect to receive the balance of his account in the form of (1) a single-sum cash payment, (2) a single-sum distribution consisting of X Corporation stock, (3) five equal annual cash payments, (4) a life annuity, or (5) a combination of options (1) through (4). The plan also provided that, if a participant did not elect another form of distribution, the balance of his account would be distributed to him in the form of a single-sum cash payment upon his retirement. Assume that section 401(a)(11) and this section became applicable to the plan as of its plan year beginning January 1, 1976, with respect to persons who were active participants in the plan as of such date (see paragraph (f) of this section). If X Corporation Defined Contribution Plan continues to allow the life annuity payment option after December 31, 1975, it must be amended to provide that if a participant elects a life annuity option the life annuity benefit will be paid in a form having the effect of a qualified joint and survivor annuity, except to the extent that the participant elects another form of benefit payment. However, the plan can continue to provide that, if no election is made, the balance will be paid as a single-sum cash payment. If the trust is not so amended, it will fail to qualify under section 401(a).

Example (2). The Corporation Retirement Plan provides that plan benefits are payable only in the form of a life annuity and also provides that a participant may retire before the normal retirement age of 65 and receive a benefit if he has completed 30 years of service. Under this plan, an employee who begins employment at the age of 18 will be eligible to receive retirement benefits at the age of 48 if he then has 30 years of service. This plan must allow a participant to elect in the time and manner prescribed in paragraph (c)(2) of this section an early survivor annuity (defined in paragraph (b)(3) of this section) to be payable on the death of the participant if death occurs while the participant is in active service for the employer maintaining the plan and on or after the date the participant reaches the qualified early retirement age of 55 (the later of the date the participant reaches the earliest retirement age (age 48) or 10 years before normal retirement age (age 55)) but before the day after the day the participant reaches normal retirement age (age 65).

Example (3). Assume the same facts as in Example (2). A, B, and C began employment with Y Corporation when they each attained age 18. A retires and begins to receive benefit payments at age 48 after completing 30 years of service. The plan is not required to pay a qualified joint and survivor annuity to A and his spouse at any time. B does not elect an early survivor annuity at age 55, but retires at age 57 after completing 39 years of service. Unless B makes an election under subparagraph (1)(ii) of this paragraph, the plan is required to pay a qualified joint and survivor annuity to B and his spouse. C makes no elections described in subparagraph (1) of this paragraph, and dies while in active service at age 66 after completing 48 years of service. The plan is required to pay a qualified survivor annuity to C's spouse.

(b) *Definitions.* As used in this section—(1) *Life annuity.* (i) The term ''life annuity'' means an annuity that provides retirement payments and requires the survival of the participant or his spouse as one of the conditions for any payment or possible payment under the annuity. For example, annuities that make payments for 10 years or until death, whichever occurs first or whichever occurs last, are life annuities.

(ii) However, the term ''life annuity'' does not include an annuity, or that portion of an annuity, that provides those benefits which, under section 411(a)(9), would not be taken into account in the determination of the normal retirement benefit or early retirement benefit. For example, ''social security supplements'' described in the fourth sentence of section 411(a)(9) are not considered to be life annuities for the purposes of this section, whether or not an early retirement benefit is provided under the plan.

(2) *Qualified joint and survivor annuity.* The term ''qualified joint and survivor annuity'' means an annuity for the life of the participant with a survivor annuity for the life of his spouse which is neither (i) less than one-half of, nor (ii) greater than, the amount of the annuity payable during the joint lives of the participant and his spouse. For purposes of the preceding sentence, amounts described in §1.401(a)–11(b)(1)(ii) may be disregarded. A qualified joint and survivor annuity must be at least the actuarial equivalent of the normal form of life annuity or, if greater, of any optional form of life annuity offered under the plan. Equivalence may be determined, on the basis of consistently applied reasonable actuarial factors, for each participant or for all participants or reasonable groupings of participants, if such determination does not result in discrimination in favor of employees who are officers, shareholders, or highly compensated. An annuity is not a qualified joint and survivor annuity if payments to the spouse of a deceased participant are terminated, or reduced, because of such spouse's remarriage.

(3) *Early survivor annuity.* The term ''early survivor annuity'' means an annuity for the life of the participant's spouse the payments under which must not be less than the payments which would have been made to the spouse under the joint and survivor annuity if the participant had made the election described in paragraph (c)(2) of this section immediately prior to his retirement and if his retirement had occurred on the day before his death and within the period during which an election can be made under such paragraph (c)(2). For example, if a participant would be entitled to a single life annuity of $100 per month or a reduced amount under a qualified joint and survivor annuity of $80 per month, his spouse is entitled to a payment of at least $40 per month. However, the payments may be reduced to reflect the number of months of coverage under the survivor annuity pursuant to paragraph (e) of this section.

(4) *Qualified early retirement age.* The term ''qualified early retirement age'' means the latest of—

(i) The earliest date, under the plan, on which the participant could elect (without regard to any requirement that approval of early retirement be obtained) to receive retirement benefits (other than disability benefits).

(ii) The first day of the 120th month beginning before the participant reaches normal retirement age, or

(iii) The date on which the participant begins participation.

(5) *Normal retirement age.* The term ''normal retirement age'' has the meaning set forth in section 411(a)(8).

(6) *Annuity starting date.* The term ''annuity starting date'' means the first day of the first period with respect to which an amount is received as a life annuity, whether by reason of retirement or by reason of disability.

(7) *Day.* The term ''day'' means a calendar day.

(c) *Elections*—(1) *Election not to take joint and survivor annuity form*—(i) *In general.* (A) A plan shall not be treated as satisfying the requirements of this section unless it provides that each participant may elect, during the election period described in subdivision (ii) of this subparagraph, not to receive a qualified joint and survivor annuity. However, if a plan provides that a qualified joint and survivor annuity is the only form of benefit payable under the plan with respect to a married participant, no election need be provided.

(B) The election shall be in writing and clearly indicate that the participant is electing to receive all or, if permitted by the plan, part of his benefits under the plan in a form other than that of a qualified joint and survivor annuity. A plan will not fail to meet the requirements of this section merely because the plan requires the participant to obtain the written approval of his spouse in order for the participant to make this election or if the plan provides that such approval is not required.

(ii) *Election period.* (A) For purposes of the election described in paragraph (c)(1)(i) of this section, the plan shall provide an election period which shall include a period of at least 90 days following the furnishing of all of the applicable information required by subparagraph (3)(i) of this paragraph and ending prior to commencement of benefits. In no event may the election period end earlier than the 90th day before the commencement of benefits. Thus, for example, the commencement of benefits may be delayed until the end of such election period because the amount of payments to be made to a participant cannot be ascertained before the end of such period; see §1.401(a)–14(d).

If a participant makes a request for additional information as provided in subparagraph (3)(iii) of this paragraph on or before the last day of the election period, the election period shall be extended to the extent necessary to include at least the 90 calendar days immediately following the day the requested additional information is personally delivered or mailed to the participant. Notwithstanding the immediately preceding sentence, a plan may provide in cases in which the participant has been furnished by mail or personal delivery all of the applicable information required by subparagraph (3)(i) of this paragraph, that a request for such additional information must be made on or before a date which is not less than 60 days from the date of such mailing or delivery; and if the plan does so provide, the election period shall be extended to the extent necessary to include at least the 60 calendar days following the day the requested additional information is personally delivered or mailed to the participant.

(B) In the case of a participant in a plan to which this subparagraph applies who separated from service after section 401(a)(11) and this section became applicable to such plan with respect to such participant, and to whom an election required by this subparagraph has not been previously made available (and will not become available in normal course), the plan must provide an election to receive the balance of his benefits (properly adjusted, if applicable, for payments received, prior to the exercise of such election, in the form of a qualified joint and survivor annuity) in a form other than that of a qualified joint and survivor annuity. The provisions of paragraph (c)(1)(ii)(A) shall apply except that in no event shall the election period end before the 90th day after the date on which notice of the availability of such election and the applicable information required by subparagraph (3)(i) of this paragraph is given directly to the participant. If such notice and information is given by mail, it shall be treated as given on the date of mailing. If such participant has died, such election shall be made available to such participant's personal representative.

(2) *Election of early survivor annuity*—(i) *In general.* (A) A plan described in subparagraph (a)(1)(iii) of this section shall not be treated as satisfying the requirements of this section unless it provides that each participant may elect, during the period described in subdivision (ii) of this subparagraph, an early survivor annuity as described in paragraph (a)(1)(iii) of this section. Breaks in service after the participant has attained the qualified early retirement age neither invalidate a previous election or revocation nor prevent an election from being made or revoked during the election period.

(B) The election shall be in writing and clearly indicate that the participant is electing the early survivor annuity form.

(C) A plan is not required to provide an election under this subparagraph if—

(*1*) The plan provides that an early survivor annuity is the only form of benefit payable under the plan with respect to a married participant who dies while employed by an employer maintaining the plan,

(*2*) In the case of a defined contribution plan, the plan provides a survivor benefit at least equal in value to the vested portion of the participant's account balance, if the participant dies while in active service with an employer maintaining the plan, or

(*3*) In the case of a defined benefit plan, the plan provides a survivor benefit at least equal in value to the present value of the vested portion of the participant's normal form of the accrued benefit payable at normal retirement age (determined immediately prior to death), if the participant dies while in active service with an employer maintaining the plan. Any present values must be determined in accordance with either the actuarial assumptions or factors specified in the plan, or a variable standard independent of employer discretion for converting optional benefits specified in the plan.

(ii) *Election period.* (A) For purposes of the election described in paragraph (c)(2)(i) of this section the plan shall provide an election period which, except as provided in the following sentence, shall begin not later than the later of either the 90th day before a participant attains the qualified early retirement age or the date on which his participation begins, and shall end on the date the participant terminates his employment. If such a plan contains a provision that any election made under this subparagraph does not become effective or ceases to be effective if the participant dies within a certain period beginning on the date of such election, the election period prescribed in this subdivision (ii) shall begin not later than the later of (*1*) a date which is 90 days plus such certain period before the participant attains the qualified early retirement age or (*2*) the date on which his participation begins. For example, if a plan provides that an election made under this subparagraph does not become effective if the participant dies less than 2 years after the date of such election, the period for making an election under this subparagraph must begin not later than the later of (*1*) 2 years and 90 days before the participant attains the qualified early retirement age, or (*2*) the date on which his participation begins. However, the election period for an individual who was an active participant on the date this section became effective with regard to the plan need not begin earlier than such effective date.

(B) In the case of a participant in a plan to which this subparagraph applies who dies after section 401(a)(11) and this section became applicable to such plan with respect to such participant and to whom an election required by this subparagraph has not been previously made available, the plan must give the participant's surviving spouse or, if dead, such spouse's personal representative the option of electing an early survivor annuity. The plan may reduce the surviving spouse's annuity to take into account any benefits already received. The period for making such election shall not end before the 90th day after the date on which written notice of the availability of such election and applicable information required by subparagraph (3)(i) of this paragraph is given directly to such surviving spouse or personal representative. If such notice and information is given by mail, if shall be treated as given on the date of mailing.

(3) *Information to be provided by plan administrator.* (i) A plan which is required to provide either or both of the elections described in paragraph (c) (1) or (2) of this section must provide to the participants, at the time and in the manner specified in subdivision (ii) of this subparagraph, the following information, as applicable to the plan, in written nontechnical language:

(A) In the case of the election described in paragraph (c)(1) of this section, a general description or explanation of the qualified joint and survivor annuity, the circumstances in which it will be provided unless the participant has elected not to have benefits provided in that form, and the availability of such election;

(B) In the case of the election described in paragraph (c)(2) of this section, a general description of the early survivor annuity, the circumstances under which it will be paid if elected, and the availability of such election; and

(C) A general explanation of the relative financial effect on a participant's annuity of either or both elections, as the case may be.

Various methods may be used to explain such relative financial effect. With regard to a qualified joint and survivor annuity, they include: information as to the benefits the participant would receive under the qualified joint and survivor annuity stated as an arithmetic or percentage reduction from a single life annuity; a table showing the difference between a straight life annuity and a qualified joint and survivor annuity in terms of a reduction in dollar amounts; a table showing a percentage reduction from the straight life annuity or, in the case of a profit-sharing plan, an approximate dollar amount reduction. The notice and explanation required by this subdivision (i) must also inform the participants of the availability of the additional information specified in subdivision (iii) of this subparagraph and how they may obtain such information.

(ii) The method or methods used to provide the information described in subdivision (i) of this subparagraph may vary. Posting which meets the requirements of §1.7476–2(c)(1) may be used; see §1.7476–2(c)(1) for examples of other methods which may be used. One or more methods may be used to provide the required information provided that all of the required information is provided by one method or a combination of methods by or within the time period specified in this subdivision (ii). If mail or personal delivery is used, then, whether or not the information has been previously provided, there must be a mailing or personal delivery of the information by such time as to reasonably assure that it will be received on or about: (*1*) In the case of a plan which does not provide for the payment of benefits before the normal retirement age, the date which is 9 months before the participant attains normal retirement age; (*2*) in the case of a plan which provides for the payment of benefits before the normal retirement age and which is required to provide the election described in paragraph (c)(2) of this section (whether or not it is also required to provide the election described in paragraph (c)(1) of this section), the date which is 90 days before the latest date prescribed by paragraph (c)(2)(ii)(A) for the beginning of the election period for the early survivor annuity; or (*3*) in the case of a plan which provides for the payment of benefits before the normal retirement age and which is required to provide only the election described in paragraph (c)(1) of this section, the date which is nine months before the participant attains the qualified early retirement age; except that in the case of a plan described in (*2*) or (*3*), if the qualified early retirement age is the date the participant begins participation in the plan, the information may be provided on or about such date. If a method other than mail or personal delivery is used to provide participants with some or all of such information, if must be a method which is reasonably calculated to reach the attention of a participant on or about the date prescribed in the immediately preceding sentence and to continue to reach the attention of such participant during the election period applicable to him for which the information is being provide (as, for example, by permanent posting, repeated publication, etc.).

(iii) The plan administrator must furnish to a particular participant, upon a timely written request, a written explanation in nontechnical language of the terms and conditions of the qualified joint and survivor annuity and the financial effect upon the particular participant's annuity of making any election under this paragraph. Such financial effect shall be given in terms of dollars per annuity payment; and in the case of a defined contribution plan, the projected annuity for a particular participant may be based on his account balance as of the most recent valuation date. The plan administrator need not comply with more than one such request made by a particular participant. This explanation must be personally delivered or mailed (first class mail, postage prepaid) to the participant within 30 days from the date of the participant's written request.

(4) *Election is revocable.* A plan to which this section applies must provide that any election made under this

paragraph may be revoked in writing during the specified election period, and that after such election has been revoked, another election under this paragraph may be made during the specified election period.

(5) *Election by surviving spouse.* A plan will not fail to meet the requirements of section 401(a)(11) and this section merely because it provides that the spouse of a deceased participant may elect to have benefits paid in a form other than a survivor annuity. If the plan provides that such a spouse may make such an election, the plan administrator must furnish to this spouse, within a reasonable amount of time after a written request has been made by this spouse, a written explanation in non-technical language of the survivor annuity and any other form of payment which may be selected. This explanation must state the financial effect (in terms of dollars) of each form of payment. A plan need not respond to more than one such request.

(d) *Permissible additional plan provisions*—(1) *In general.* A plan will not fail to meet the requirements of section 401(a)(11) and this section merely because it contains one or more of the provisions described in paragraphs (d)(2) through (5) of this section.

(2) *Claim for benefits.* A plan may provide that as a condition precedent to the payment of benefits, a participant must express in writing to the plan administrator the form in which he prefers benefits to be paid and provide all the information reasonably necessary for the payment of such benefits. However, if a participant files a claim for benefits with the plan administrator and provides the plan administrator with all the information necessary for the payment of benefits but does not indicate a preference as to the form for the payment of benefits, benefits must be paid in the form of a qualified joint and survivor annuity if the participant has attained the qualified early retirement age unless such participant has made an effective election not to receive benefits in such form. For rules relating to provisions in a plan to the effect that a claim for benefits must be filed before the payment of benefits will commence, see § 1.401(a)–14.

(3) *Marriage requirements.* A plan may provide that a joint and survivor annuity will be paid only if—

(i) The participant and his spouse have been married to each other throughout a period (not exceeding one year) ending on the annuity starting date.

(ii) The spouse of the participant is not entitled to receive a survivor annuity (whether or not the election described in paragraph (c)(2) of this section has been made) unless the participant and his spouse have been married to each other throughout a period (not exceeding one year) ending on the date of such participant's death.

(iii) The same spouse must satisfy the requirements of subdivisions (i) and (ii) of this subparagraph.

(iv) The participant must notify the plan administrator (as defined by section 414(g)) of his marital status within any reasonable time period specified in the plan.

(4) *Effect of participant's death on an election or revocation of an election under paragraph (c).* A plan may provide that any election described in paragraph (c) of this section or any revocation of any such election does not become effective or ceases to be effective if the participant dies within a period, not in excess of 2 years, beginning on the date of such election or revocation. However, a plan containing a provision described in the preceding sentence shall not satisfy the requirements of this section unless it also provides that any such election or any revocation of any such election will be given effect in any case in which—

(i) The participant dies from accidental causes,

(ii) A failure to give effect to the election or revocation would deprive the participant's survivor of a survivor annuity, and

(iii) Such election or revocation is made before such accident occurred.

(5) *Benefit option approval by third party.* (i) A plan may provide that an optional form of benefit elected by a participant is subject to the approval of an administrative committee or similar third party. However, the administrative committee cannot deny a participant any of the benefits required by section 401(a)(11). For example, if a

plan offers a life annuity option, the committee may deny the participant a qualified joint and survivor annuity only by denying the participant access to all life annuity options without knowledge of whether the participant wishes to receive a qualified joint and survivor annuity. Alternatively, if the committee knows which form of life annuity the participant has chosen before the committee makes its decision, the committee cannot withhold its consent for payment of a qualified joint and survivor annuity event though it denies all other life annuity options. This subparagraph (5) only applies before the effective date of the amendment made to section 411(d)(6) by section 301 of the Retirement Equity Act of 1984. See section 411(d)(6) and the regulations thereunder for rules limiting employer discretion.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. In 1980 plan M provides that the automatic form of benefit is a single sum distribution. The plan also permits, subject to approval by the administrative committee, the election of several optional forms of life annuity. On the election form that is reviewed by the administrative committee the participant indicates whether any life annuity option is preferred, without indicating the particular life annuity chosen. Thus, the committee approves or disapproves the election without knowledge of whether a qualified joint and survivor annuity will be elected. The administrative committee approval provision in Plan M does not cause the plan to fail to satisfy this section. On the other hand, if the form indicates which form of life annuity is preferred, committee disapproval of any election of the qualified joint and survivor annuity would cause the plan to fail to satisfy this section.

(e) *Costs of providing qualified joint and survivor annuity form or early survivor annuity form.* A plan may take into account in any equitable manner consistent with generally accepted actuarial principles applied on a consistent basis any increased costs resulting from providing qualified joint and survivor annuity and early survivor annuity benefits. A plan may give a participant the option of paying premiums only if it provides another option under which an out-of-pocket expense by the participant is not required.

(f) *Application and effective date.* Section 401(a)(11) and this section shall apply to a plan only with respect to plan years beginning after December 31, 1975, and shall apply only if—

(1) The participant's annuity starting date did not fall within a plan year beginning before January 1, 1976, and

(2) The participant was an active participant in the plan on or after the first day of the first plan year beginning after December 31, 1975.

For purposes of this paragraph, the term ''active participant'' means a participant for whom benefits are being accrued under the plan on his behalf (in the case of a defined benefit plan), the employer is obligated to contribute to or under the plan on his behalf (in the case of a defined contribution plan other than a profit-sharing plan), or the employer either is obligated to contribute to or under the plan on his behalf or would have been obligated to contribute to or under the plan on his behalf if any contribution were made to or under the plan (in the case of a profit-sharing plan).

If benefits under a plan are provided by the distribution to the participants of individual annuity contracts, the annuity starting date will be considered for purposes of this paragraph to fall within a plan year beginning before January 1, 1976, with respect to any such individual contract that was distributed to the participant during a plan year beginning before January 1, 1976, if no premiums are paid with respect to such contract during a plan year beginning after December 31, 1975. In the case of individual annuity contracts that are distributed to participants before January 1, 1978, and which contain an option to provide a qualified joint and survivor annuity, the requirements of this section will be considered to have been satisfied if, not later than January 1, 1978, holders of individual annuity contracts who are participants described in the first sentence of this paragraph are given an opportunity to have such contracts amended, so as to provide for a qualified joint and survivor annuity in the absence of a contrary election, within a period of not less than one year from the date such opportunity was offered. In no event, however, shall the preceding sentence apply with respect to benefits attributable to premiums paid after December 31, 1977.

(g) *Effect of REA 1984*—(1) *In general.* The Retirement Equity Act of 1984 (REA 1984) significantly changed the qualified joint and survivor annuity rules generally effective for plan years beginning after December 31, 1984. The new survivor annuity rules are primarily in sections 401(a)(11) and 417 as revised by REA 1984 and §§ 1.401(a)–20 and 417(e)–1.

(2) *Regulations after REA 1984.* (i) REA and the regulations thereunder to the extent inconsistent with pre-REA 1984 section 401(a)(11) and this section are controlling for years to which REA 1984 applies. See *e.g.*, paragraphs (a)(1) and (2) of this section, relating to required provisions and certain cash-outs, respectively and (e), relating to costs of providing annuities, for rules that are inconsistent with REA 1984 and, therefore, are not applicable to REA 1984 years.

(ii) To the extent that the pre-REA 1984 law either is the same as or consistent with REA 1984 and the new regulations hereunder, the rules in this section shall continue to apply for years to which REA 1984 applies. (See, *e.g.*, paragraph (c) (relating to how information is furnished participants and spouses) and paragraph (b) (defining a life annuity) for some of the rules that apply to REA 1984 years.) The rules in this section shall not apply for such years to the extent that they are inconsistent with REA 1984 and the regulations thereunder.

(iii) The Commissioner may provide additional guidance as to the continuing effect of the various rules in this section for years to which REA 1984 applies.

(Secs. 401(a)(11), 7805 Internal Revenue Code of 1954, (88 Stat. 935, 68A Stat. 917; (26 U.S.C. 401(a)(11), 7805)))

[T.D. 7458, 42 FR 1466, Jan. 7, 1977; 42 FR 6367, Feb. 2, 1977; T.D. 7510, 42 FR 53956, Oct. 4, 1977; T.D. 8219, 53 FR 31841, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988]

§ 1.401(a)–12 Mergers and consolidations of plans and transfers of plan assets.

A trust will not be qualified under section 401 unless the plan of which the trust is a part provides that in the case of any merger or consolidation with, or transfer of assets or liabilities to, another plan after September 2, 1974, each participant in the plan would receive a minimum benefit if the plan terminated immediately after the merger, consolidation, or transfer. This benefit must be equal to or greater than the benefit the participant would have been entitled to receive immediately before the merger, consolidation, or transfer if the plan in which he was a participant had then terminated. This section applies to a multiemployer plan only to the extent determined by the Pension Benefit Guaranty Corporation. For additional rules concerning mergers or consolidations of plans and transfers of plan assets, see section 414(l) and § 1.414(l)–1.

[T.D. 7638, 44 FR 48195, Aug. 17, 1979]

§ 1.401(a)–13 Assignment or alienation of benefits.

(a) *Scope of the regulations.* This section applies only to plans to which section 411 applies without regard to section 411(e)(2). Thus, for example, it does not apply to a governmental plan, within the meaning of section 414(d); a church plan, within the meaning of section 414(e), for which there has not been made the election under section 410(a) to have the participation, vesting, funding, etc. requirements apply; or a plan which at no time after September 2, 1974, provided for employer contributions.

(b) *No assignment or alienation*—(1) *General rule.* Under section 401(a)(13), a trust will not be qualified unless the plan of which the trust is a part provides that benefits provided under the plan may not be anticipated, assigned (either at law or in equity), alienated or subject to attachment, garnishment, levy, execution or other legal or equitable process.

(2) *Federal tax levies and judgments.* A plan provision satisfying the requirements of subparagraph (1) of this paragraph shall not preclude the following:

(i) The enforcement of a Federal tax levy made pursuant to section 6331.

(ii) The collection by the United States on a judgment resulting from an unpaid tax assessment.

(c) *Definition of assignment and alienation*—(1) *In general.* For purposes of this section, the terms ''assignment'' and ''alienation'' include—

(i) Any arrangement providing for the payment to the employer of plan benefits which otherwise would be due the participant under the plan, and

(ii) Any direct or indirect arrangement (whether revocable or irrevocable) whereby a party acquires from a participant or beneficiary a right or interest enforceable against the plan in, or to, all or any part of a plan benefit payment which is, or may become, payable to the participant or beneficiary.

(2) *Specific arrangements not considered an assignment or alienation.* The terms ''assignment'' and ''alienation'' do not include, and paragraph (e) of this section does not apply to, the following arrangements:

(i) Any arrangement for the recovery of amounts described in section 4045(b) of the Employee Retirement Income Security Act of 1974, 88 Stat. 1027 (relating to the recapture of certain payments),

(ii) Any arrangement for the withholding of Federal, State or local tax from plan benefit payments,

(iii) Any arrangement for the recovery by the plan of overpayments of benefits previously made to a participant,

(iv) Any arrangement for the transfer of benefit rights from the plan to another plan, or

(v) Any arrangement for the direct deposit of benefit payments to an account in a bank, savings and loan association or credit union, provided such arrangement is not part of an arrangement constituting an assignment or alienation. Thus, for example, such an arrangement could provide for the direct deposit of a participant's benefit payments to a bank account held by the participant and the participant's spouse as joint tenants.

(d) *Exceptions to general rule prohibiting assignments or alienations*—(1) *Certain voluntary and revocable assignments or alienations.* Not withstanding paragraph (b)(1) of this section, a plan may provide that once a participant or beneficiary begins receiving benefits under the plan, the participant or beneficiary may assign or alienate the right to future benefit payments provided that the provision is limited to assignments or alienations which—

(i) Are voluntary and revocable;

(ii) Do not in the aggregate exceed 10 percent of any benefit payment; and

(iii) Are neither for the purpose, nor have the effect, of defraying plan administration costs.

For purposes of this subparagraph, an attachment, garnishment, levy, execution, or other legal or equitable process is not considered a voluntary assignment or alienation.

(2) *Benefits assigned or alienated as security for loans.* (i) Notwithstanding paragraph (b)(1) of this section, a plan may provide for loans from the plan to a participant or a beneficiary to be secured (by whatever means) by the participant's accrued nonforfeitable benefit provided that the following conditions are met.

(ii) The plan provision providing for the loans must be limited to loans from the plan. A plan may not provide for the use of benefits accrued or to be accrued under the plan as security for a loan from a party other than the plan, regardless of whether these benefits are nonforfeitable within the meaning of section 411 and the regulations thereunder.

(iii) The loan, if made to a participant or beneficiary who is a disqualified person (within the meaning of section 4975(e)(2)), must be exempt from the tax imposed by section 4975 (relating to the tax imposed on prohibited transactions) by reason of section 4975(d)(1). If the loan is made to a participant or beneficiary who is not a disqualified person, the loan must be one which would the exempt from the tax imposed by section 4975 by reason of section 4975(d)(1) if the loan were made to a disqualified person.

(e) *Special rule for certain arrangements*—(1) *In general.* For purposes of this section and notwithstanding paragraph (c)(1) of this section, an arrangement whereby a participant or beneficiary directs the plan to pay all, or any portion, of a plan benefit payment to a third party (which includes the participant's employer) will not constitute an ''assignment or alienation'' if—

(i) It is revocable at any time by the participant or beneficiary; and

(ii) The third party files a written acknowledgement with the plan administrator pursuant to subparagraph (2) of this paragraph.

(2) *Acknowledgement requirement for third party arrangements.* In accordance with paragraph (e)(1)(ii) of this section, the third party is required to file a written acknowledgement with the plan administrator. This acknowledgement must state that the third party has no enforceable right in, or to, any plan benefit payment or portion thereof (except to the extent of payments actually received pursuant to the terms of the arrangement). A blanket written acknowledgement for all participants and beneficiaries who are covered under the arrangement with the third party is sufficient. The written acknowledgement must be filed with the plan administrator no later than the later of—

(i) August 18, 1978; or

(ii) 90 days after the arrangement is entered into.

(f) *Effective date.* Section 401(a)(13) is applicable as of January 1, 1976, and the plan provision required by this section must be effective as of that date. However, regardless of when the provision is adopted, it will not affect—

(1) Attachments, garnishments, levies, or other legal or equitable process permitted under the plan that are made before January 1, 1976;

(2) Assignments permitted under the plan that are irrevocable on December 31, 1975, including assignments made before January 1, 1976, as security for loans to a participant or beneficiary from a party other than the plan; and

(3) Renewals or extensions of loans described in subparagraph (2) of this paragraph, if—

(i) The principal amount of the obligation outstanding on December 31, 1975 (or, if less, the principal amount outstanding on the date of renewal or extension), is not increased;

(ii) The loan, as renewed or extended, does not bear a rate of interest in excess of the rate prevailing for similar loans at the time of the renewal or extensions; and

(iii) With respect to loans that are renewed or extended to bear a variable interest rate, the formula for determining the applicable rate is consistent with the formula for formulae prevailing for similar loans at the time of the renewal or extension. For purposes of subparagraphs (2) and (3) of this paragraph, a loan from a party other than the plan made after December 31, 1975, will be treated as a new loan. This is so even if the lender's security interest for the loan arises from an assignment of the participant's accrued nonforfeitable benefit made before that date.

(g) *Special rules for qualified domestic relations orders*—(1) *Definition.* The term ''qualified domestic relations order'' (QDRO) has the meaning set forth in section 414(p). For purposes of the Internal Revenue Code, a QDRO also includes any domestic relations order described in section 303(d) of the Retirement Equity Act of 1984.

(2) *Plan amendments.* A plan will not fail to satisfy the qualification requirements of section 401(a) or 403(a) merely because it does not include provisions with regard to a QDRO.

(3) *Waiver of distribution requirements.* A plan shall not be treated as failing to satisfy the requirements of sections 401 (a) and (k) and 409(d) solely because of a payment to an alternate payee pursuant to a QDRO. This is the case even if the plan provides for payments pursuant to a QDRO to an alternate payee prior to the time it may make payments to a participant. Thus, for example, a pension plan may pay an alternate payee even though the participant may not receive a distribution because he continues to be employed by the employer.

(4) *Coordination with section 417*—(i) *Former spouse.* (A) *In general.* Under section 414(p)(5), a QDRO may provide that a former spouse shall be treated as the current spouse of a participant for all or some purposes under sections 401(a)(11) and 417.

(B) *Consent.* (*1*) To the extent a former spouse is treated as the current spouse of the participant by reason of a QDRO, any current spouse shall not be treated as the current spouse. For example, assume H is divorced from W, but a QDRO provides that H shall be treated as W's current spouse with respect to all of W's benefits under a plan. H will be treated as the surviving spouse under the QPSA and QJSA unless W obtains H's consent to waive the QPSA or QJSA or both. The fact that W married S after W's divorce from H is disregarded. If, however, the QDRO had provided that H shall be treated as W's current spouse only with respect to benefits that accrued prior to the divorce, then H's consent would be needed by W to waive the QPSA or QJSA with respect to benefits accrued before the divorce. S's consent would be required with respect to the remainder of the benefits.

(*2*) In the preceding examples, if the QDRO ordered that a portion of W's benefit (either through separate accounts or a percentage of the benefit) must be distributed to H rather than ordering that H be treated as W's spouse, the survivor annuity requirements of sections 401(a)(11) and 417 would not apply to the part of W's benefit awarded H. Instead, the terms of the QDRO would determine how H's portion of W's accrued benefit is paid. W is required to obtain S's consent if W elects to waive either the QJSA or QPSA with respect to the remaining portion of W's benefit.

(C) *Amount of the QPSA or QJSA.* (*1*) Where, because of a QDRO, more than one individual is to be treated as the surviving spouse, a plan may provide that the total amount to be paid in the form of a QPSA or survivor portion of a QJSA may not exceed the amount that would be paid if there were only one surviving spouse. The QPSA or survivor portion of the QJSA, as the case may be, payable to each surviving spouse must be paid as an annuity based on the life of each such spouse.

(*2*) Where the QDRO splits the participant's accrued benefit between the participant and a former spouse (either through separate accounts or percentage of the benefit), the surviving spouse of the participant is entitled to a QPSA or QJSA based on the participant's accrued benefit as of the date of death or the annuity starting date, less the separate account or percentage that is payable to the former spouse. The calculation is made as if the separate account or percentage had been distributed to the participant prior to the relevant date.

(ii) *Current spouse.* Under section 414(p)(5), even if the applicable election periods (*i.e.,* the first day of the year in which the participant attains age 35 and 90 days before the annuity starting date) have not begun, a QDRO may provide that a current spouse shall not be treated as the current spouse of the participant for all or some purposes under sections 401(a)(11) and 417. A QDRO may provide that the current spouse waives all future rights to a QPSA or QJSA.

(iii) *Effects on benefits.* (A) A plan is not required to provide additional vesting or benefits because of a QDRO.

(B) If an alternate payee is treated pursuant to a QDRO as having an interest in the plan benefit, including a separate account or percentage of the participant's account, then the QDRO cannot provide the alternate payee with a greater right to designate a beneficiary for the alternate payee's benefit amount than the participant's right. The QJSA or QPSA provisions of section 417 do not apply to the spouse of an alternate payee.

(C) If the former spouse who is treated as a current spouse dies prior to the participant's annuity starting date, then any actual current spouse of the participant is treated as the current spouse, except as otherwise provided in a QDRO.

(iv) *Section 415 requirements.* Even though a participant's benefits are awarded to an alternate payee pursuant to a QDRO, the benefits are benefits of the participant for purposes of applying the limitations of section 415 to the participant's benefits.

[T.D. 7534, 43 FR 6943, Feb. 17, 1978, as amended by T.D. 8219, 53 FR 31850, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988]

§1.401(a)–14 Commencement of benefits under qualified trusts.

(a) *In general.* Under section 401(a)(14), a trust to which section 411 applies (without regard to section 411(e)(2) is not qualified under section 401 unless the plan of which such trust is a part provides that the payment of benefits under the plan to the participant will begin not later than the 60th day after the close of the plan year in which the latest of the following events occurs—

(1) The attainment by the participant of age 65, or, if earlier, the normal retirement age specified under the plan,

(2) The 10th anniversary of the date on which the participant commenced participation in the plan,

(3) The termination of the participant's service with the employer, or

(4) The date specified in an election made pursuant to paragraph (b) of this section.

Notwithstanding the preceding sentence, a plan may require that a participant file a claim for benefits before payment of benefits will commence.

(b) *Election of later date*—(1) *General rule.* A plan may permit a participant to elect that the payment to him of any benefit under a plan will commence at a date later than the dates specified under paragraphs (a)(1), (2), and (3) of this section.

(2) *Manner of election.* A plan permitting an election under this paragraph shall require that such election must be made by submitting to the plan administrator a written statement, signed by the participant, which describes the benefit and the date on which the payment of such benefit shall commence.

(3) *Restriction.* An election may not be made pursuant to a plan provision permitted by this paragraph if the exercise of such election will cause benefits payable under the plan with respect to the participant in the event of his death to be more than ''incidental'' within the meaning of paragraph (b)(1)(i) of § 1.401–1.

(c) *Special early retirement rule*—(1) *Separation prior to early retirement age.* A trust forming part of a plan which provides for the payment of an early retirement benefit is not qualified under section 401 unless, upon satisfaction of the age requirement for such early retirement benefit, a participant who—

(i) Satisfied the service requirements for such early retirement benefit, but

(ii) Separated from service (with any nonforfeitable right to an accrued benefit) before satisfying such age requirement,

is entitled to receive not less than the reduced normal retirement benefit described in paragraph (c)(2) of this section. A plan may establish reasonable conditions for payments of early retirement benefits (including for example, a requirement that a claim for benefits be made) if the conditions are equally applicable to participants who separate from service when eligible for an early retirement benefit and participants who separate from service earlier.

(2) *Reduced normal retirement benefit.* For purposes of this section, the reduced normal retirement benefit is the benefit to which the participant would have been entitled under the plan at normal retirement age, reduced in accordance with reasonable actuarial assumptions.

(3) *Separation prior to effective date of this section.* The provisions of this paragraph shall not apply in the case of a plan participant who separates from service before attainment of early retirement age and prior to the effective date of this section set forth in paragraph (e) of this section.

(4) *Illustration.* The provisions of this paragraph may be illustrated by the following example:

Example. The X Corporation Defined Benefit Plan provides that a normal retirement benefit will be payable to a participant upon attainment of age 65. The plan also provides that an actuarially reduced retirement benefit will be payable, upon application, to any participant who has completed 10 years of service with the X Corporation and attained age 60. When he is 55 years of age and has completed 10 years of service with X Corporation, A, a participant in the plan, leaves the service of X Corporation and does not return. The plan will not be qualified under section 401 unless, upon attainment of age 60 and application for benefits, A is entitled to receive a reduced normal retirement benefit described in subparagraph (2) of this paragraph.

(d) *Retroactive payment rule.* If the amount of the payment required to commence on the date determined under this section cannot be ascertained by such date, or if it is not possible to make such payment on such date because the plan administrator has been unable to locate the participant after making reasonable efforts to do so, a payment retroactive to such date may be made no later than 60 days after the earliest date on which the amount of such payment can be ascertained under the plan or the date on which the participant is located (whichever is applicable).

(e) *Effective date.* This section shall apply to a plan for those plan years to which section 411 of the Code applies without regard to section 411(e)(2).

(Secs. 401(a)(14), 7805, Internal Revenue Code of 1954 (88 Stat. 937, 68A Stat. 917; 26 U.S.C. 401(a)(14), 7805))

[T.D. 7436, 41 FR 42651, Sept. 28, 1976; 41 FR 44690, Oct. 12, 1976]

§1.401(a)–15 Requirement that plan benefits are not decreased on account of certain Social Security increases.

(a) *In general.* Under section 401(a)(15), a trust which is part of a plan to which section 411 applies (without regard to section 411(e)(2)) is not qualified under section 401 unless, under the plan of which such trust is a part:

(1) *Benefit being received by participant or beneficiary.* A benefit (including a death or disability benefit) being received under the plan by a participant or beneficiary (other than a participant to whom subparagraph (2)(ii) of this paragraph applies, or a beneficiary of such a participant) is not decreased by reason of any post-separation social security benefit increase effective after the later of—

(i) September 2, 1974, or

(ii) The date of first receipt of any retirement benefit, death benefit, or disability benefit under the plan by the participant or by a beneficiary of the participant (whichever receipt occurs first).

(2) *Benefit to which participant separated from service has nonforfeitable right.* In the case of a benefit to which a participant has a nonforfeitable right under such plan—

(i) If such participant is separated from service and does not subsequently return to service and resume participation in the plan, such benefit is not decreased by reason of any post-separation social security benefit increase effective after the later of September 2, 1974, or separation from service, or

(ii) If such participant is separated from service and subsequently returns to service and resumes participation in the plan, such benefit is not decreased by reason of any post-separation social security benefit increase effective after September 2, 1974, which occurs during separation from service and which would decrease such benefit to a level below the level of benefits to which he would have been entitled had he not returned to service after his separation.

(b) *Post-separation social security benefit increase.* For purposes of this section, the term ‘‘post-separation social security benefit increase’’ means, with respect to a participant or a beneficiary of the participant, an increase in a benefit level or wage base under title II of the Social Security Act (whether such increase is a result of an amendment of such title II or is a result of the application of the provisions of such title II) occurring after the earlier of such participant’s separation from service or commencement of benefits under the plan.

(c) *Illustrations.* The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). A plan to which section 401(a)(15) applies provides an annual benefit at the normal retirement age, 65, in the form of a stated benefit formula amount less a specified percentage of the primary insurance amount payable under title II of the Social Security Act. The plan provides no early retirement benefits. In the case of a participant who separates from service before age 65 with a nonforfeitable right to a benefit under the plan, the plan defines the primary insurance amount as the amount which the participant is entitled to receive under title II of the Social Security Act at age 65, multiplied by the ratio of the number of years of service with the employer to the number of years of service the participant would have had if he had worked for the employer until age 65. The plan does not satisfy the requirements of section 401(a)(15), because social security increases that occur after a participant’s separation from service will reduce the benefit the participant will receive under the plan.

Example (2). A plan to which section 401(a)(15) applies provides an annual benefit at the normal retirement age, 65, in the form of a stated benefit formula amount less a specified percentage of the primary insurance amount payable under title II of the Social Security Act. The plan provides no early retirement benefits. In the case of a participant who separates from service before age 65 with a nonforfeitable right to a benefit under the plan, the plan defines the primary insurance amount as the amount which the participant is entitled to receive under title

II of the Social Security Act at age 65 based upon the assumption that he will continue to receive until reaching age 65 compensation which would be treated as wages for purposes of the Social Security Act at the same rate as he received such compensation at the time he separated from service, but determined without regard to any post-separation social security benefit increase, multiplied by the ratio of the number of years of service with the employer to the number of years of service the participant would have had if he had worked for the employer until age 65. The plan satisfies the requirements of section 401(a)(15), because social security increases that occur after a participant's separation from service will not reduce the benefit the participant will receive under the plan.

(d) *Other Federal or State laws.* To the extent applicable, the rules discussed in this section will govern classifications under a plan supplementing the benefits provided by other Federal or State laws, such as the Railroad Retirement Act of 1937. See section 206(b) of the Employee Retirement Income Security Act of 1974 (Public Law 93–406, 88 Stat. 864).

(e) *Effect on prior law.* Nothing in this section shall be construed as amending or modifying the rules applicable to post-separation social security increases prior to September 2, 1974. See paragraph (e) of § 1.401–3.

(f) *Effective date.* Section 401(a)(15) and this section shall apply to a plan only with respect to plan years to which section 411 (relating to minimum vesting standards) is applicable to the plan without regard to section 411(e)(2).

[T.D. 7434, 41 FR 42650, Sept. 28, 1976]

§ 1.401(a)–16 Limitations on benefits and contributions under qualified plans.

A trust will not be a qualified trust and a plan will not be a qualified plan if the plan provides for benefits or contributions which exceed the limitations of section 415. Section 415 and the regulations thereunder provide rules concerning these limitations on benefits and contributions.

[T.D. 7748, 46 FR 1696, Jan. 7, 1981]

§ 1.401(a)–19 Nonforfeitability in case of certain withdrawals.

(a) *Application of section.* Section 401(a)(19) and this section apply to a plan to which section 411(a) applies. (See section 411(e) and § 1.411(a)–2 for applicability of section 411).

(b) *Prohibited forfeitures*—(1) *General rule.* A plan to which this section applies is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if, under such plan, any part of a participant's accrued benefit derived from employer contributions is forfeitable solely because a benefit derived from the participant's contributions under the plan is voluntarily withdrawn by him after he has become a 50 percent vested participant.

(2) *50 percent vested participant.* For purposes of subparagraph (1) of this paragraph, a participant is a 50 percent vested participant when he has a nonforfeitable right (within the meaning of section 411 and the regulations thereunder) to at least 50 percent of his accrued benefit derived from employer contributions. Whether or not a participant is 50 percent vested shall be determined by the ratio of the participant's total nonforfeitable employer-derived accrued benefit under the plan to his total employer-derived accrued benefit under the plan.

(3) *Certain forfeitures.* Paragraph (b)(1) of this section does not apply in the case of a forfeiture permitted by section 411(a)(3)(D)(iii) and § 1.411(a)–7(d)(3) (relating to forfeitures of certain benefits accrued before September 2, 1974).

(c) *Supersession.* Section 11.401(a)–(19) of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this section.

(Sec. 411 Internal Revenue Code of 1954 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42320, Aug. 23, 1977]

§ 1.401(a)–20 Requirements of qualified joint and survivor annuity and qualified preretirement survivor annuity.

Q–1: What are the survivor annuity requirements added to the Code by the Retirement Equity Act of 1984 (REA 1984)?

A–1: REA 1984 replaced section 401(a)(11) with a new section 401(a)(11) and added section 417. Plans to which new section 401(a)(11) applies must comply with the requirements of sections 401(a)(11) and 417 in order to remain qualified under sections 401(a) or 403(a). In general, these plans must provide both a qualified joint and survivor annuity (QJSA) and a qualified preretirement survivor annuity (QPSA) to remain qualified. These survivor annuity requirements are applicable to any benefit payable under a plan, including a benefit payable to a participant under a contract purchased by the plan and paid by a third party.

Q–2: Must annuity contracts purchased and distributed to a participant or spouse by a plan subject to the survivor annuity requirements of sections 401(a)(11) and 417 satisfy the requirements of those sections?

A–2: Yes. Rights and benefits under section 401(a)(11) or 417 may not be eliminated or reduced because the plan uses annuity contracts to provide benefits merely because (a) such a contract is held by a participant or spouse instead of a plan trustee, or (b) such contracts are distributed upon plan termination. Thus, the requirements of sections 401(a)(11) and 417 apply to payments under the annuity contracts, not to the distributions of the contracts.

Q–3: What plans are subject to the survivor annuity requirements of section 401(a)(11)?

A–3: (a) Section 401(a)(11) applies to any defined benefit plan and to any defined contribution plan that is subject to the minimum funding standards of section 412. This section also applies to any participant under any other defined contribution plan unless all of the following conditions are satisfied—

(1) The plan provides that the participant's nonforfeitable accrued benefit is payable in full, upon the participant's death, to the participant's surviving spouse (unless the participant elects, with spousal consent that satisfies the requirements of section 417(a)(2), that such benefit be provided instead to a designated beneficiary);

(2) The participant does not elect the payment of benefits in the form of a life annuity; and

(3) With respect to the participant, the plan is not a transferee or an offset plan. (See Q&A 5 of this section.)

(b) A defined contribution plan not subject to the minimum funding standards of section 412 will not be treated as satisfying the requirement of paragraph (a)(1) unless both of the following conditions are satisfied—

(1) The benefit is available to the surviving spouse within a reasonable time after the participant's death. For this purpose, availability within the 90-day period following the date of death is deemed to be reasonable and the reasonableness of longer periods shall be determined based on the particular facts and circumstances. A time period longer than 90 days, however, is deemed unreasonable if it is less favorable to the surviving spouse than any time period under the plan that is applicable to other distributions. Thus, for example, the availability of a benefit to the surviving spouse would be unreasonable if the distribution was required to be made by the close of the plan year including the participant's death while distributions to employees who separate from service were required to be made within 90 days of separation.

(2) The benefit payable to the surviving spouse is adjusted for gains or losses occurring after the participant's death in accordance with plan rules governing the adjustment of account balances for other plan distributions. Thus, for example, the plan may not provide for distributions of an account balance to a surviving spouse determined as of the last day of the quarter in which the participant's death occurred with no adjustments of an account balance for gains or losses after death if the plan provides for such adjustments for a participant who separates from service within a quarter.

(c) For purposes of determining the extent to which section 401(a)(11) applies to benefits under an employee stock ownership plan (as defined in section 4975(e)(7)), the portion of a participant's accrued benefit that is subject to section 409(h) is to be treated as though such benefit were provided under a defined contribution plan not subject to section 412.

(d) The requirements set forth in section 401(a)(11) apply to other employee benefit plans that are covered by applicable provisions under Title I of the Employee Retirement Income Security Act of 1974. For purposes of applying the regulations under sections 401(a)(11) and 417, plans subject to ERISA section 205 are treated as if they were described in section 401(a). For example, to the extent that section 205 covers section 403(b) contracts and custodial accounts they are treated as section 401(a) plans. Individual retirement plans (IRAs), including IRAs to which contributions are made under simplified employee pensions described in section 408(k) and IRAs that are treated as plans subject to Title I, are not subject to these requirements.

Q–4: What rules apply to a participant who elects a life annuity option under a defined contribution plan not subject to section 412?

A–4: If a participant elects at any time (irrespective of the applicable election period defined in section 417(a)(6)) a life annuity option under a defined contribution plan not subject to section 412, the survivor annuity requirements of sections 401(a)(11) and 417 will always thereafter apply to all of the participant's benefits under such plan unless there is a separate accounting of the account balance subject to the election. A plan may allow a participant to elect an annuity option prior to the applicable election period described in section 417(a)(6). If a participant elects an annuity option, the plan must satisfy the applicable written explanation, consent, election, and withdrawal rules of section 417, including waiver of the QJSA within 90 days of the annuity starting date. If a participant selecting such an option dies, the surviving spouse must be able to receive the QPSA benefit described in section 417(c)(2) which is a life annuity, the actuarial equivalent of which is not less than 50 percent of the nonforfeitable account balance (adjusted for loans as described in Q&A 24(d) of this section). The remaining account balance may be paid to a designated nonspouse beneficiary.

Q–5: How do sections 401(a)(11) and 417 apply to transferee plans which are defined contribution plans not subject to section 412?

A–5: (a) *Transferee plans.* Although the survivor annuity requirements of sections 401(a)(11) and 417 generally do not apply to defined contribution plans not subject to section 412, such plans are subject to the survivor annuity requirements to the extent that they are transferee plans with respect to any participant. A defined contribution plan is a transferee plan with respect to any participant if the plan is a direct or indirect transferee of such participant's benefits held on or after January 1, 1985, by:

(1) A defined benefit plan,

(2) A defined contribution plan subject to section 412 or

(3) A defined contribution plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 with respect to that participant.

If through a merger, spinoff, or other transaction having the effect of a transfer, benefits subject to the survivor annuity requirements of sections 401(a)(11) and 417 are held under a plan that is not otherwise subject to such requirements, such benefits will be subject to the survivor annuity requirements even though they are held under such plan. Even if a plan satisfies the survivor annuity requirements, other rules apply to these transactions. See, *e.g.*, section 411(d)(6) and the regulations thereunder. A transfer made before January 1, 1985, and any rollover contribution made at any time, are not transactions that subject the transferee plan to the survivor annuity requirements with respect to a participant. If a plan is a transferee plan with respect to a participant, the survivor annuity requirements do not apply with respect to other plan participants solely because of the transfer. Any plan that would not otherwise be subject to the survivor annuity requirements of sections 401(a)(11) and 417 whose benefits are used to offset benefits in a plan subject to such requirements is subject to the survivor annuity requirements with respect to those participants whose benefits are offset. Thus, if a stock bonus or profit-sharing plan offsets benefits under a defined benefit plan, such a plan is subject to the survivor annuity requirements.

(b) *Benefits covered.* The survivor annuity requirements apply to all accrued benefits held for a participant with respect to whom the plan is a transferee plan unless there is an acceptable separate accounting between the transferred benefits and all other benefits under the plan. A separate accounting is not acceptable unless gains, losses, withdrawals, contributions, forfeitures, and other credits or charges are allocated on a reasonable and consistent basis between the accrued benefits subject to the survivor annuity requirements and other benefits. If there is an acceptable separate accounting between transferred benefits and any other benefits under the plan, only the transferred benefits are subject to the survivor annuity requirements.

Q–6: Is a frozen or terminated plan required to satisfy the survivor annuity requirements of sections 401(a)(11) and 417?

A–6: In general, benefits provided under a plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 must be provided in accordance with those requirements even if the plan is frozen or terminated. However, any plan that has a termination date prior to September 17, 1985, and that distributed all remaining assets as soon as administratively feasible after the termination date, is not subject to the survivor annuity requirements. The date of termination is determined under section 411(d)(3) and §1.411(d)–2(c).

Q–7: If the Pension Benefit Guaranty Corporation (PBGC) is administering a plan, are benefits payable in the form of a QPSA or QJSA-

A–7: Yes, the PBGC will pay benefits in such forms.

Q–8: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply to participants?

A–8: (a) If a participant dies before the annuity starting date with vested benefits attributable to employer or employee contributions (or both), benefits must be paid to the surviving spouse in the form of a QPSA. If a participant survives until the annuity starting date with vested benefits attributable to employer or employee contributions (or both), benefits must be provided to the participant in the form of a QJSA.

(b) A participant may waive the QPSA or the QJSA (or both) if the applicable notice, election, and spousal consent requirements of section 417 are satisfied.

(c) Benefits are not required to be paid in the form of a QPSA or QJSA if at the time of death or distribution the participant was vested only in employee contributions and such death occurred, or distribution commenced, before October 22, 1986.

(d) *Certain mandatory distributions.* A distribution may occur without satisfying the spousal consent requirements of section 417 (a) and (e) if the present value of the nonforfeitable benefit does not exceed the cash-out limit in effect under §1.411(a)–11T(c)(3)(ii). See §1.417(e)–1.

Q–9: May separate portions of a participant's accrued benefit be subject to QPSA and QJSA requirements at any particular point in time?

A–9: (a) *Dual QPSA and QJSA rights.* One portion of a participant's benefit may be subject to the QPSA and another portion to the QJSA requirements at the same time. For example, in order for a money purchase pension plan to distribute any portion of a married participant's benefit to the participant, the plan must distribute such portion in the form of a QJSA (unless the plan satisfies the applicable consent requirements of section 417 (a) and (e) with respect to such portion of the participant's benefit). This rule applies even if the distribution is merely an in-service distribution attributable to voluntary employee contributions and regardless of whether the participant has attained the normal retirement age under the plan. The QJSA requirements apply to such a distribution because the annuity starting date has occurred with respect to this portion of the participant's benefit. In the event of a participant's death following the commencement of a distribution in the form of a QJSA, the remaining payments must be made to the surviving spouse under the QJSA. In addition, the plan must satisfy the QPSA requirements with respect to any portion of the participant's benefits for which the annuity starting date had not yet occurred.

(b) *Example.* Assume that participant A has a $100,000 account balance in a money purchase pension plan. A makes an in-service withdrawal of $20,000 attributable to voluntary employee contributions. The QJSA requirements apply to A's withdrawal of the

$20,000. Accordingly, unless the QJSA form is properly waived such amount must be distributed in the form of a QJSA. A's remaining account balance ($80,000) remains subject to the QPSA requirements because the annuity starting date has not occurred with respect to the $80,000. (If A survives until the annuity starting date, the $80,000 would be subject to the QJSA requirements.) If A died on the day following the annuity starting date for the withdrawal, A's spouse would be entitled to a QPSA with a value equal to at least $40,000 with respect to the $80,000 account balance, in addition to any survivor benefit without respect to the $20,000. If the $20,000 payment to A had been the first payment of an annuity purchased with the entire $100,000 account balance rather than an in-service distribution, then the QJSA requirements would apply to the entire account balance at the time of the annuity starting date. In such event, the plan would have no obligation to provide A's spouse with a QPSA benefit upon A's death. Of course, A's spouse would receive the QJSA benefit (if the QJSA had not been waived) based on the full $100,000.

Q–10: What is the relevance of the annuity starting date with respect to the survivor benefit requirements?

A–10: (a) *Relevance.* The annuity starting date is relevant to whether benefits are payable as either a QJSA or QPSA, or other selected optional form of benefit. If a participant is alive on the annuity starting date, the benefits must be payable as a QJSA. If the participant is not alive on the annuity starting date, the surviving spouse must receive a QPSA. The annuity starting date is also used to determine when a spouse may consent to and a participant may waive a QJSA. A waiver is only effective if it is made 90 days before the annuity starting date. Thus, a deferred annuity cannot be selected and a QJSA waived until 90 days before payments commence under the deferred annuity. In some cases, the annuity starting date will have occurred with respect to a portion of the participant's accrued benefit and will not have occurred with respect to the remaining portion. (See Q&A–9.)

(b) *Annuity starting date*—(1) *General rule.* For purposes of sections 401(a)(11), 411(a)(11) and 417, the annuity starting date is the first day of the first period for which an amount is paid as an annuity or any other form.

(2) *Annuity payments.* The annuity starting date is the first date for which an amount is paid, not the actual date of payment. Thus, if participant A is to receive annuity payments as of the first day of the first month after retirement but does not receive any payments until three months later, the annuity starting date is the first day of the first month. For example, if an annuity is to commence on January 1, January 1 is the annuity starting date even though the payment for January is not actually made until a later date. In the case of a deferred annuity, the annuity starting date is the date for which the annuity payments are to commence, not the date that the deferred annuity is elected or the date the deferred annuity contract is distributed.

(3) *Administrative delay.* A payment shall not be considered to occur after the annuity starting date merely because actual payment is reasonably delayed for calculation of the benefit amount if all payments are actually made.

(4) *Forfeitures on death.* Prior to the annuity starting date, section 411(a)(3)(A) allows a plan to provide for a forfeiture of a participant's benefit, except in the case of a QPSA or a spousal benefit described in section 401(a)(11)(B)(iii)(I). Once the annuity starting date has occurred, even if actual payment has not yet been made, a plan must pay the benefit in the distribution form elected.

(5) *Surviving spouses, alternate payees, etc.* The definition of ''annuity starting date'' for surviving spouses, other beneficiaries and alternate payees under section 414(p) is the same as it is for participants.

(c) *Disability auxiliary benefit*—(1) *General rule.* The annuity starting date for a disability benefit is the first day of the first period for which the benefit becomes payable unless the disability benefit is an auxiliary benefit. The payment of any auxiliary disability benefits is disregarded in determining the annuity starting date. A disability benefit is an auxiliary benefit if upon attainment of early or normal retirement age, a participant receives a benefit that satisfies the accrual and vesting rules of section 411 without taking into account the disability benefit payments up to that date.

Example. (i) Assume that participant A at age 45 is entitled to a vested accrued benefit of $100 per month commencing at age 65 in the form of a joint and survivor annuity under Plan X. If prior to age 65 A receives a disability benefit under Plan X and the payment of such benefit does not reduce the amount of A's retirement benefit of $100 per month commencing at age 65, any disability benefit payments made to A between ages 45 and 65 are auxiliary benefits. Thus, A's annuity starting date does not occur until A attains age 65. A's surviving spouse B would be entitled to receive a QPSA if A died before age 65. B would be entitled to receive the survivor portion of a QJSA (unless waived) if A died after age 65. The QPSA payable to B upon A's death prior to age 65 would be computed by reference to the QJSA that would have been payable to A and B had A survived to age 65.

(ii) If in the above example A's benefit payable at age 65 is reduced to $99 per month because a disability benefit is provided to A prior to age 65, the disability benefit would not be an auxiliary benefit. The benefit of $99 per month payable to A at age 65 would not, without taking into account the disability benefit payments to A prior to age 65, satisfy the minimum vesting and accrual rules of section 411. Accordingly, the first day of the first period for which the disability payments are to be made to A would constitute A's annuity starting date, and any benefit paid to A would be required to be paid in the form of a QJSA (unless waived by A with the consent of B).

(d) *Other rules*—(1) *Suspension of benefits.* If benefit payments are suspended after the annuity starting date pursuant to a suspension of benefits described in section 411(a)(3)(B) after an employee separates from service, the recommencement of benefit payments after the suspension is not treated as a new annuity starting date unless the plan provides otherwise. In such case, the plan administrator is not required to provide new notices nor to obtain new waivers for the recommenced distributions if the form of distribution is the same as the form that was appropriately selected prior to the suspension. If benefits are suspended for an employee who continues in service without a separation and who never receives payments, the commencement of payments after the period of suspension is treated as the annuity starting date unless the plan provides otherwise.

(2) *Additional accruals.* In the case of an annuity starting date that occurs on or after normal retirement age, such date applies to any additional accruals after the annuity starting date, unless the plan provides otherwise. For example, if a participant who continues to accrue benefits elects to have benefits paid in an optional form at normal retirement age, the additional accruals must be paid in the optional form selected unless the plan provides otherwise. In the case of an annuity starting date that occurs prior to normal retirement age, such date does not apply to any additional accruals after such date.

Q–11: Do the survivor annuity requirements apply to benefits derived from both employer and employee contributions?

A–11: Yes. The survivor annuity benefit requirements apply to benefits derived from both employer and employee contributions. Benefits are not required to be paid in the form of a QPSA or a QJSA if the participant was vested only in employee contributions at the time of death or distribution and such death or distribution occurred before October 22, 1986. All benefits provided under a plan, including benefits attributable to rollover contributions, are subject to the survivor annuity requirements.

Q–12: To what benefits do the survivor annuity requirements of sections 401(a)(11) and 417 apply?

A–12: (a) *Defined benefit plans.* Under a defined benefit plan, sections 401(a)(11) and 417 apply only to benefits in which a participant was vested immediately prior to death. They do not apply to benefits to which a participant's beneficiary becomes entitled by reason of death or to the proceeds of a life insurance contract to the extent such proceeds exceed the present value of the participant's nonforfeitable benefits that existed immediately prior to death.

(b) *Defined contribution plans.* Sections 401(a)(11) and 417 apply to all nonforfeitable benefits which are payable under a defined contribution plan, whether nonforfeitable before or upon death, including the proceeds of insurance contracts.

Q–13: Does the rule of section 411(a)(3)(A) which permits forfeitures on account of death apply to a QPSA or the spousal benefit described in section 401(a)(11)(B)(iii)?

A–13: No. Section 411(a)(3)(A) permits forfeiture on account of death prior to the time all the events fixing payment occur. However, this provision does not operate to deprive a surviving spouse of a QPSA or the spousal benefit described in section 401(a)(11)(B)(iii). Therefore, sections 401(a)(11) and 417 apply to benefits that were nonforfeitable immediately prior to death (determined without regard to section 411(a)(3)(A)). Thus, in the case of the death of a married participant in a defined contribution plan not subject to section 412 which provides that, upon a participant's death, the entire nonforfeitable accrued benefit is payable to the participant's spouse, the nonforfeitable benefit is determined without regard to the provisions of section 411(a)(3)(A).

Q–14: Do sections 411(a)(11), 401(a)(11) and 417 apply to accumulated deductible employee contributions, as defined in section 72(o)(5)(B) (Accumulated DECs)?

A–14: (a) *Employee consent, section 411.* The requirements of section 411(a)(11) apply to Accumulated DECs. Thus, Accumulated DECs may not be distributed without participant consent unless the applicable exemptions apply.

(b) *Survior requirements.* Accumulated DECs are treated as though held under a separate defined contribution plan that is not subject to section 412. Thus, section 401(a)(11) applies to Accumulated DECs only as provided in section 401(a)(11)(B)(iii). All Accumulated DECs are treated in this manner, including Accumulated DECs that are the only benefit held under a plan and Accumulated DECs that are part of a defined benefit or a defined contribution plan.

(c) *Effective date.* Sections 401(a)(11) and 411(a)(11) shall not apply to distributions of accumulated DECs until the first plan year beginning after December 31, 1988.

Q–15: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply to a defined benefit plan that includes an accrued benefit based upon a contribution to a separate account or mandatory employee contributions?

A–15: (a) *414(k) plans.* In the case of a section 414(k) plan that includes both a defined benefit plan and a separate account, the rules of sections 401(a)(11) and 417 apply separately to the defined benefit portion and the separate account portion of the plan. The separate account portion is subject to the survivor annuity requirements of sections 401(a)(11) and 417 and the special QPSA rules in section 417(c)(2).

(b) *Employee contributions*—(1) *Voluntary.* In the case of voluntary employee contributions to a defined benefit plan, the plan must maintain a separate account with respect to the voluntary employee contributions. This separate account is subject to the survivor annuity requirements of sections 401(a)(11) and 417 and the special QPSA rules in section 417(c)(2).

(2) *Mandatory.* In the case of a defined benefit plan providing for mandatory employee contributions, the entire accrued benefit is subject to the survivor annuity requirements of sections 401(a)(11) and 417 as a defined benefit plan.

(c) *Accumulated DECs.* See Q&A 14 of this section for the rule applicable to accumulated deductible employee contributions.

Q–16: Can a plan provide a benefit form more valuable than the QJSA and if a plan offers more than one annuity option satisfying the requirements of a QJSA, is spousal consent required when the participant chooses among the various forms?

A–16: In the case of an unmarried participant, the QJSA may be less valuable than other optional forms of benefit payable under the plan. In the case of a married participant, the QJSA must be at least as valuable as any other optional form of benefit payable under the plan at the same time. Thus, if a plan has two joint and survivor annuities that would satisfy the requirements for a QJSA, but one has a greater actuarial value than the other, the more valuable joint and survivor annuity is the QJSA. If there are two or more actuarially equivalent joint and survivor annuities that satisfy the requirements for a QJSA, the plan must designate which one is the QJSA and, therefore, the automatic form of benefit payment. A plan, however, may allow a participant to elect out of such a QJSA, without spousal consent, in favor of another actuarially equivalent joint and survivor annuity that satisfies the QJSA conditions. Such an election is not subject to the requirement that it be made within the 90-day period before the annuity starting date. For example, if a plan designates a joint and 100% survivor annuity as the QJSA and also offers an actuarially equivalent joint and 50% survivor annuity that would satisfy the requirements of a QJSA, the participant may elect the joint and 50% survivor annuity without spousal consent. The participant, however, does need spousal consent to elect a joint and survivor annuity that was not actuarially equivalent to the automatic QJSA.

Q–17: When must distributions to a participant under a QJSA commence?

A–17: (a) *QJSA benefits upon earliest retirement.* A plan must permit a participant to receive a distribution in the form of a QJSA when the participant attains the earliest retirement age under the plan. Written consent of the participant is required. However, the consent of the participant's spouse is not required. Any payment not in the form of a QJSA is subject to spousal consent. For example, if the participant separates from service under a plan that allows for distributions on separation from service or if a plan allows for in-service distributions, the participant may receive a QJSA without spousal consent in such events. Payments in any other form, including a single sum, would require waiver of the QJSA by the participant's spouse.

(b) *Earliest retirement age.* (1) This paragraph (b) defines the term ''earliest retirement age'' for purposes of sections 401(a)(11), 411(a)(11) and 417.

(2) In the case of a plan that provides for voluntary distributions that commence upon the participant's separation from service, earliest retirement age is the earliest age at which a participant could separate from service and receive a distribution. Death of a participant is treated as a separation from service.

(3) In the case of a plan that provides for in-service distributions, earliest retirement age is the earliest age at which such distributions may be made.

(4) In the case of a plan not described in subparagraph (2) or (3) of this paragraph, the rule below applies. Earliest retirement age is the early retirement age determined under the plan, or if no early retirement age, the normal retirement age determined under the plan. If the participant dies or separates from service before such age, then only the participant's actual years of service at the time of the participant's separation from service or death are taken into account. Thus, in the case of a plan under which benefits are not payable until the attainment of age 65, or upon attainment of age 55 and completion of 10 years of service, the earliest retirement age of a participant who died or separated from service with 8 years of service is when the participant would have attained age 65 (if the participant had survived). On the other hand, if a participant died or separated from service after 10 years of service, the earliest retirement age is when the participant would have attained age 55 (if the participant had survived).

Q–18: What is a qualified preretirement survivor annuity (QPSA) in a defined benefit plan?

A–18: A QPSA is an immediate annuity for the life of the surviving spouse of a participant. Each payment under a QPSA under a defined benefit plan is not to be less than the payment that would have been made to the survivor under the QJSA payable under the plan if (a) in the case of a participant who dies after attaining the earliest retirement age under the plan, the participant had retired with a QJSA on the day before the participant's death, and (b) in the case of a participant who dies on or before the participant's earliest retirement age under the plan, the participant had separated from service at the earlier of the actual time of separation or death, survived until the earliest retirement age, retired at that time with a QJSA, and died on the day thereafter. If the participant elects before the annuity starting date a form of joint and survivor annuity that satisfies the requirements for a QJSA and dies before the annuity starting date, the elected form is treated as the QJSA and the QPSA must be based on such form.

Q–19: What rules apply in determining the amount and forfeitability of a QPSA?

A–19: The QPSA is calculated as of the earliest retirement age if the participant dies before such time, or at death if the participant dies after the earliest retirement age. The plan must make reasonable actuarial adjustments to reflect a payment earlier or later than the earliest retirement age. A defined benefit plan may provide that the QPSA is forfeited if the spouse does not survive until the date prescribed under the plan for commencement of the QPSA (*i.e.,* the earliest retirement age). Similarly, if the spouse survives past the participant's earliest retirement age (or other earlier QPSA distribution date under the plan) and elects after the death of the participant to defer the commencement of the QPSA to a later date, a defined benefit plan may provide for a forfeiture of the QPSA benefit if the spouse does not survive until the deferred commencement date. The account balance in a defined contribution plan may not be forfeited even though the spouse does not survive until the time the account balance is used to purchase the QPSA. See Q&A–17 of this section for the meaning of earliest retirement age.

Q–20: What preretirement survivor annuity benefits must a defined contibution plan subject to the survivor annuity requirements of sections 401(a)(11) and 417 provide?

A–20: A defined contribution plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 must provide a preretirement survivor annuity with a value which is not less than 50 percent of the nonforfeitable account balance of the participant as of the date of the participant's death. If a contributory defined contribution plan has a forfeiture provision permitted by section 411(a)(3)(A), not more than a proportional percent of the account balance attributable to contributions that may not be forfeited at death (for example, employee and section 401(k) contributions) may be used to satisfy the QPSA benefit. Thus, for example, if the QPSA benefit is to be provided from 50 percent of the account balance, not more than 50 percent of the nonforfeitable contributions may be used for the QPSA.

Q–21: May a defined benefit plan charge the participant for the cost of the QPSA benefit?

A–21: Prior to the later of the time the plan allows the participant to waive the QPSA or provides notice of the ability to waive the QPSA, a defined benefit plan may not charge the participant for the cost of the QPSA by reducing the participant's plan benefits or by any other method. The preceding sentence does not apply to any charges prior to the first plan year beginning after December 31, 1988. Once the participant is given the opportunity to waive the QPSA or the notice of the QPSA is later, the plan may charge the participant for the cost of the QPSA. A charge for the QPSA that reasonably reflects the cost of providing the QPSA will not fail to satisfy section 411 even if it reduces the accrued benefit.

Q–22: When must distributions to a surviving spouse under a QPSA commence?

A–22: (a) In the case of a defined benefit plan, the plan must permit the surviving spouse to direct the commencement of payments under QPSA no later than the month in which the participant would have attained the earliest retirement age. However, a plan may permit the commencement of payments at an earlier date.

(b) In the case of a defined contribution plan, the plan must permit the surviving spouse to direct the commencement of payments under the QPSA within a reasonable time after the participant's death.

Q–23: Must a defined benefit plan obtain the consent of a participant and the participant's spouse to commence payments in the form of a QJSA in order to avoid violating section 415 or 411(b)?

A–23: No. A defined benefit plan may commence distributions in the form of a QJSA without the consent of the participant and spouse, even if consent would otherwise be required (see § 1.417(e)–1(b)), to the extent necessary to avoid a violation of section 415 or 411(b). For example, assume a plan has a normal retirement age of 55. A is a married participant, age 55, and has accrued a $75,000 joint and 100 percent survivor annuity that satisfies section 415. If an actuarial increase would be required under section 411 because of deferred commencement and the increase would cause the benefit to exceed the applicable limit under section 415, the plan may commence payment of a QJSA at age 55 without the participant's election or consent and without the spouse's concent.

Q–24: What are the rules under sections 401(a)(11) and 417 applicable to plan loans?

A–24: (a) *Consent rules.* (1) A plan does not satisfy the survivor annuity requirements of sections 401(a)(11) and 417 unless the plan provides that, at the time the participant's accrued benefit is used as security for a loan, spousal consent to such use is obtained. Consent is required even if the accrued benefit is not the primary security for the loan. No spousal consent is necessary if, at the time the loan is secured, no consent would be required for a distribution under section 417(a)(2)(B). Spousal consent is not required if the plan or the participant is not subject to section 401(a)(11) at the time the accrued benefit is used as security, or if the total accrued benefit subject to the security is not in excess of the cash-out limit in effect under §1.411(a)–11T(c)(3)(ii). The spousal consent must be obtained no earlier than the beginning of the 90-day period that ends on the date on which the loan is to be so secured. The consent is subject to the requirements of section 417(a)(2). Therefore, the consent must be in writing, must acknowledge the effect of the loan and must be witnessed by a plan representative or a notary public.

(2) Participant consent is deemed obtained at the time the participant agrees to use his accrued benefit as security for a loan for purposes of satisfying the requirements for participant consent under sections 401(a)(11), 411(a)(11) and 417.

(b) *Change in status.* If spousal consent is obtained or is not required under paragraph (a) of this Q&A 24 at the time the benefits are used as security, spousal consent is not required at the time of any setoff of the loan against the accrued benefit resulting from a default, even if the participant is married to a different spouse at the time of the setoff. Similarly, in the case of a participant who secured a loan while unmarried, no consent is required at the time of a setoff of the loan against the accrued benefit even if the participant is married at the time of the setoff.

(c) *Renegotiation.* For purposes of obtaining any required spousal consent, any renegotiation, extension, renewal, or other revision of a loan shall be treated as a new loan made on the date of the renegotiation, extension, renewal, or other revision.

(d) *Effect on benefits.* For purposes of determining the amount of a QPSA or QJSA, the accrued benefit of a participant shall be reduced by any security interest held by the plan by reason of a loan outstanding to the participant at the time of death or payment, if the security interest is treated as payment in satisfaction of the loan under the plan. A plan may offset any loan outstanding at the participant's death which is secured by the participant's account balance against the spousal benefit required to be paid under section 401(a)(11)(B)(iii).

(e) *Effective date.* Loans made prior to August 19, 1985, are deemed to satisfy the consent requirements of paragraph (a) of this Q&A 24.

Q–25: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply with respect to participants who are not married or to surviving spouses and participants who have a change in marital status?

A–25: (a) *Unmarried participant rule.* Plans subject to the survivor annuity requirements of sections 401(a)(11) and 417 must satisfy those requirements applicable to QJSAs with respect to participants who are not married. A QJSA for a participant who is not married is an annuity for the life of the participant. Thus, an unmarried participant must be provided the written explanation described in section 417(a)(3)(A) and a single life annuity unless another form of benefit is elected by the participant. An unmarried participant is deemed to have waived the QPSA requirements. This deemed waiver is null and void if the participant later marries.

(b) *Marital status change.*—(1) *Remarriage.* If a participant is married on the date of death, payments to a surviving spouse under a QPSA or QJSA must continue even if the surviving spouse remarries.

(2) *One-year rule.* (i) A plan is not required to treat a participant as married unless the participant and the participant's spouse have been married throughout the one-year period ending on the earlier of (A) the participant's annuity starting date or (B) the date of the participant's death. Nevertheless, for purposes of the preceding sentence, a participant and the participant's spouse must be treated as married throughout the one-year period ending on the participant's annuity starting date even though they are married to each other for less than one year before the annuity starting date if they remain married to each other for at least one year. See section 417(d)(2). If a plan adopts the one-year rule provided in section 417(d), the plan must treat the participant and spouse who are married on the annuity starting date as married and must provide benefits which are to commence on the annuity starting date in the form of a QJSA unless the participant (with spousal consent) elects another form of benefit. The plan is not required to provide the participant with a new or retroactive election or the spouse with a new consent when the one-year period is satisfied. If the participant and the spouse do not remain married for at least one year, the plan may treat the participant as having not been married on the annuity starting date. In such event, the plan may provide that the spouse loses any survivor benefit right; further, no retroactive correction of the amount paid the participant is required.

(ii) *Example.* Plan X provides that participants who are married on the annuity starting date for less than one year are treated as unmarried participants. Plan X provides benefits in the form of a QJSA or an optional single sum distribution. Participant A was married 6 months prior to the annuity starting date. Plan X must treat A as married and must commence payments to A in the form of a QJSA unless another form of benefit is elected by A with spousal consent. If a QJSA is paid and A is divorced from his spouse S, within the first year of the marriage, S will no longer have any survivor rights under the annuity (unless a QDRO provides otherwise). If A continues to be married to S, and A dies within the one-year period, Plan X may treat A as unmarried and forfeit the OJSA benefit payable to S.

(3) *Divorce.* If a participant divorces his spouse prior to the annuity starting date, any elections made while the participant was married to his former spouse remain valid, unless otherwise provided in a QDRO, or unless the participant changes them or is remarried. If a participant dies after the annuity starting date, the spouse to whom the participant was married on the annuity starting date is entitled to the QJSA protection under the plan. The spouse is entitled to this protection (unless waived and consented to by such spouse) even if the participant and spouse are not married on the date of the participant's death, except as provided in a QDRO.

Q–26: In the case of a defined contribution plan not subject to section 412, does the requirement that a participant's nonforfeitable accrued benefit be payable in full to a surviving spouse apply to a spouse who has been married to the participant for less than one year?

A–26: A plan may provide that a spouse who has not been married to a participant throughout the one-year period ending on the earlier of (a) the participant's annuity starting date or (b) the date of the participant's death is not treated as a surviving spouse and is not required to receive the participant's account balance. The special exception described in section 417(d)(2) and Q&A 25 of this section does not apply.

Q–27: Are there circumstances when spousal consent to a participant's election to waive the QJSA or the QPSA is not required?

A–27: Yes. If it is established to the satisfaction of a plan representative that there is no spouse or that the spouse cannot be located, spousal consent to waive the QJSA or the QPSA is not required. If the spouse is legally incompetnent to give consent, the spouse's legal guardian, even if the guardian is the participant, may give consent. Also, if the participant is legally separated or the participant has been abandoned (within the meaning of local law) and the participant has a court order to such effect, spousal consent is not required unless a QDRO provides otherwise. Similar rules apply to a plan subject to the requirements of section 401(a)(11)(B)(iii)(I).

Q–28: Does consent contained in an antenuptial agreement or similar contract entered into prior to marriage satisfy the consent requirements of sections 401(a)(11) and 417?

A–28: No. An agreement entered into prior to marriage does not satisfy the applicable consent requirements, even if the agreement is executed within the applicable election period.

Q–29: If a participant's spouse consents under section 417(a)(2)(A) to the participant's waiver of a survivor annuity form of benefit, is a subsequent spouse of the same participant bound by the consent?

A–29: No. A consent under section 417(a)(2)(A) by one spouse is binding only with respect to the consenting spouse. See Q&A–24 of this section for an exception in the case of plan benefits securing plan loans.

Q–30: Does the spousal consent requirement of section 417(a)(2)(A) require that a spouse's consent be revocable?

A–30: No. A plan may preclude a spouse from revoking consent once it has been given. Alternatively, a plan may also permit a spouse to revoke a consent after it has been given, and thereby to render ineffective the participant's prior election not to receive a QPSA or QJSA. A participant must always be allowed to change his election during the applicable election period. Spousal consent is required in such cases to the extent provided in Q&A 31, except that spousal consent is never required for a QJSA or QPSA.

Q–31: What rules govern a participant's waiver of a QPSA or QJSA under section 417(a)(2)?

A–31: (a) *Specific beneficiary.* Both the participant's waivers of a QPSA and QJSA and the spouse's consents thereto must state the specific nonspouse beneficiary (including any class of beneficiaries or any contingent beneficiaries) who will receive the benefit. Thus, for example, if spouse B consents to participant A's election to waive a QPSA, and to have any benefits payable upon A's death before the annuity starting date paid to A's children, A may not subsequently change beneficiaries without the consent of B (except if the change is back to a QPSA). If the designated beneficiary is a trust, A's spouse need only consent to the designation of the trust and need not consent to the designation of trust beneficiaries or any changes of trust beneficiaries.

(b) *Optional form of benefit*—(1) *QJSA.* Both the participant's waiver of a QJSA (and any required spouse's consent thereto) must specify the particular optional form of benefit. The participant who has waived a QJSA with the spouse's consent in favor of another form of benefit may not subsequently change the optional form of benefit without obtaining the spouse's consent (except back to a QJSA). Of course, the participant may change the form of benefit if the plan so provides after the spouse's death or a divorce (other than as provided in a QDRO). A participant's waiver of a QJSA (and any required spouse's consent thereto) made prior to the first plan year beginning after December 31, 1986, is not required to specify the optional form of benefit.

(2) *QPSA.* A participant's waiver of a QPSA and the spouse's consent thereto are not required to specify the optional form of any preretirement benefit. Thus, a participant who waives the QPSA with spousal consent may subsequently change the form of the preretirement benefit, but not the nonspouse beneficiary, without obtaining the spouse's consent.

(3) *Change in form.* After the participant's death, a beneficiary may change the optional form of survivor benefit as permitted by the plan.

(c) *General consent.* In lieu of satisfying paragraphs (a) and (b) of this Q&A 31, a plan may permit a spouse to execute a general consent that satisfies the requirements of this paragraph (c). A general consent permits the participant to waive a QPSA or QJSA, and change the designated beneficary or the optional form of benefit payment without any requirement of further consent by such spouse. No general consent is valid unless the general consent acknowledges that the spouse has the right to limit consent to a specific beneficiary and a specific optional form of benefit, where applicable, and that the spouse voluntarily elects to relinquish both of such rights. Notwithstanding the previous sentence, a spouse may execute a general consent that is limited to certain beneficiaries or forms of benefit payment. In such case, paragraphs (a) and (b) of this Q&A 31 shall apply to the extent that the limited general consent is not applicable and this paragraph (c) shall apply to the extent that the limited general consent is applicable. A general consent, including a limited general consent, is not effective unless it is made during the applicable election period. A general consent executed prior to October 22, 1986 does not have to satisfy the specificity requirements of this Q&A 31.

Q–32: What rules govern a participant's waiver of the spousal benefit under section 401(a)(11)(B)?

A–32: (a) *Application.* In the case of a defined contribution plan that is not subject to the survivor annuity requirements of sections 401(a)(11) and 417, a participant may waive the spousal benefit of section 401(a)(11)(B)(iii) if the conditions of paragraph (b) are satisfied. In general, a spousal benefit is the nonforfeitable account balance on the participant's date of death.

(b) *Conditions.* In general, the same conditions, other than the age 35 requirement, that apply to the participant's waiver of a QPSA and the spouse's consent thereto apply to the participant's waiver of the spousal benefit and the spouse's consent thereto. See Q&A–31. Thus, the participant's waiver of the spousal benefit must state the specific nonspouse beneficiary who will receive such benefit. The waiver is not required to specify the optional form of benefit. The participant may change the optional form of benefit, but not the nonspouse beneficiary, without obtaining the spouse's consent.

Q–33: When and in what manner, may a participant waive a spousal benefit or a QPSA?

A–33: (a) *Plans not subject to section 401(a)(11).* A participant in a plan that is not subject to the survivor annuity requirements of section 401(a)(11) (because of subparagraph (B)(iii) thereof) may waive the spousal benefit at any time, provided that no such waiver shall be effective unless the spouse has consented to the waiver. The spouse may consent to a waiver of the spousal benefit at any time, even prior to the participant's attaining age 35. No spousal consent is required for a payment to the participant or the use of the accrued benefit as security for a plan loan to the participant.

(b) *Plans subject to section 401(a)(11).* A participant in a plan subject to the survivor annuity requirements of section 401(a)(11) generally may waive the QPSA benefit (with spousal consent) only on or after the first day of the plan year in which the participant attains age 35. However, a plan may provide for an earlier waiver (with spousal consent), provided that a written explanation of the QPSA is given to the participant and such waiver becomes invalid upon the beginning of the plan year in which the participant's 35th birthday occurs. If there is no new waiver after such date, the participant's spouse must receive the QPSA benefit upon the participant's death.

Q–34: Must the written explanations required by section 417(a)(3) be provided to nonvested participants?

A–34: Such written explantions must be provided to nonvested participants who are employed by an employer maintaining the plan. Thus, they are not required to be provided to those nonvested participants who are no longer employed by such an employer.

Q–35: When must a plan provide the written explanation, required by section 417(a)(3)(B), of the QPSA to a participant?

A–35: (a) *General rule.* A plan must provide the written explanation of the QPSA to a participant within the applicable period. Except as provided in paragraph (b), the applicable period means, with respect to a participant, whichever of the following periods ends last:

(1) The period beginning with the first day of the plan year in which the participant attains age 32 and ending with the close of the plan year preceding the plan year in which the participant attains age 35.

(2) A reasonable period ending after the individual becomes a participant.

(3) A reasonable period ending after the QPSA is no longer fully subsidized.

(4) A reasonable period ending after section 401(a)(11) first applies to the participant. Section 401(a)(11) would first apply when a benefit is transferred from a plan not subject to the survivor annuity requirements of section 401(a)(11) to a plan subject to such section or at the time of an election of an annuity under a defined contribution plan described in section 401(a)(11)(B)(iii).

(b) *Pre-35 separations.* In the case of a participant who separates from service before attaining age 35, the applicable period means the period beginning one year before the separation from service and ending one year after such separation. If such a participant returns to service, the plan must also comply with pragraph (a).

(c) *Reasonable period.* For purposes of applying paragraph (a), a reasonable period ending after the enumerated events described in paragraphs (a) (2), (3) and (4) is the end of the one-year period beginning with the date the applicable event occurs. The applicable period for such events begins one year prior to the occurrence of the enumerated events.

(d) *Transition rule.* In the case of an individual who was a participant in the plan on August 23, 1984, and, as of that date had attained age 34, the plan will satisfy the requriement of section 417(a)(3)(B) if it provided the explanation not later than December 31, 1985.

Q–36: How do plans satisfy the requirements of providing participants explanations of QPSAs and QJSAs?

A–36: Section 417(a)(3) sets forth the requirements for providing plan participants written explanations of QPSAs and QJSAs. The requirement that the terms and conditions of the QJSA or QPSA, as the case may be, be furnished to participants is not satisfied unless the written explanation complies with the requirements set forth in §1.401(a)–11(c)(3). Also, for plan years beginning after December 31, 1988, participants must be furnished a general description of the eligibility conditions and other material features of the optional forms of benefit and sufficient additional information to explain the relative values of the optional forms of benefit available under the plan (*e.g.*, the extent to which optional forms are subsidized relative to the normal form of benefit or the interest rates used to calculate the optional forms).

Q–37: What are the consequences of fully subsidizing the cost of either a QJSA or a QPSA in accordance with section 417(a)(5)?

A–37: If a plan fully subsidizes a QJSA or QPSA in accordance with section 417(a)(5) and does not allow a participant to waive such QJSA or QPSA or to select a nonspouse beneficiary, the plan is not required to provide the written explanation required by section 417(a)(3). However, if the plan offers an election to waive the benefit or designate a beneficiary, it must satisfy the election, consent, and notice requirements of section 417(a) (1), (2), and (3), with respect to such subsidized QJSA or QPSA, in accordance with section 417(a)(5).

Q–38: What is a fully subsidized benefit?

A–38: (a) *QJSA*—(1) *General rule.* A fully subsidized QJSA is one under which no increase in cost to, or decrease in actual amounts received by, the participant may result from the participant's failure to elect another form of benefit.

(2) *Examples.*

Example (1). If a plan provides a joint and survivor annuity and a single sum option, the plan does not fully subsidize the joint and survivor annuity, regardless of the actuarial value of the joint and survivor annuity because, in the event of the participant's early death, the participant would have received less under the annuity than he would have received under the single sum option.

Example (2). If a plan provides for a life annuity of $100 per month and a joint and 100% survivor benefit of $99 per month, the plan does not fully subsidize the joint and survivor benefit.

(b) *QPSA.* A QPSA is fully subsidized if the amount of the participant's benefit is not reduced because of the QPSA coverage and if no charge to the participant under the plan is made for the coverage. Thus, a QPSA is fully subsidized in a defined contribution plan.

Q–39: When do the survivor annuity requirements of sections 401(a)(11) and 417 apply to plans?

A–39: Sections 401(a)(11) and 417 generally apply to plan years beginning after December 31, 1984. Sections 302 and 303 of REA 1984 provide specific effective dates and transitional rules under which the QJSA or QPSA (or pre-REA 1984 section 401(a)(11)) requirements may be applicable to particular plans or with respect to benefits provided to (as amended by REA 1984) particular participants. In general, the section 401(a)(11) (as amended by REA 1984) survivor annuity requirements do not apply with respect to a participant who does not have at least one hour of service or one hour of paid leave under the plan after August 22, 1984.

Q–40: Are there special effective dates for plans maintained pursuant to collective bargaining agreements?

A–40: Yes. Section 302(b) of REA 1984 as amended by section 1898(g) of the Tax Reform Act of 1986 provides a special deferred effective date for such plans. Whether a plan is described in section 302(b) of REA 1984 is determined under the principles applied under section 1017(c) of the Employee Retirement Income Security Act of 1974. See H.R. Rep. No. 1280, 93d Cong., 2d Sess. 266 (1974). In addition, a plan will not be treated as maintained under a collective bargaining agreement unless the employee representatives satisfy section 7701(a)(46) of the Internal Revenue Code after March 31, 1984. See § 301.7701–17T for other requirements for a plan to be considered to be collectively bargained. Nothing in section 302(b) of REA 1984 denies a participant or spouse the rights set forth in sections 303(c)(2), 303(c)(3), 303(e)(1), and 303(e)(2) of REA 1984.

Q–41: What is one hour of service or paid leave under the plan for purposes of the transition rules in section 303 of REA 1984?

A–41: One hour of service or paid leave under the plan is one hour of service or paid leave recognized or required to be recognized under the plan for any purpose, *e.g.*, participation, vesting percentage, or benefit accrual purposes. For plans that do not compute hours of service, one hour of service or paid leave means any service or paid leave recognized or required to be recognized under the plan for any purpose.

Q–42: Must a plan be amended to provide for the QPSA required by section 303(c)(2) of REA 1984, or for the survivor annuities required by section 303(e) of REA 1984?

A–42: A plan will not fail to satisfy the qualification requirements of section 401(a) or 403(a) merely because it is not amended to provide the QPSA required by section 303(c)(2) or the survivor annuities required by section 303(e). The plan must, however, satisfy those requirements in operation.

Q–43: Is a participant's election, or a spouse's consent to an election, with respect to a QPSA, made before August 23, 1984, valid?

A–43: No.

Q–44: Is spousal consent required for certain survivor annuity elections made by the participant after December 31, 1984, and before the first plan year to which new sections 401(a)(11) and 417 apply?

A–44: Yes. Section 303(c)(3) of REA 1984 provides that any election not to take a QJSA made after December 31, 1984, and before the date sections 401(a)(11) and 417 apply to the plan by a participant who has 1 hour of service or leave under the plan after August 23, 1984, is not effective unless the spousal consent requirements of section 417 are met with respect to such election. Unless the participant's annuity starting date occurred before January 1, 1985, the spousal consent required by section 417 (a)(2) and (e) must be obtained even though the participant elected the benefit prior to January 1, 1985. The plan is not required to be amended to comply with section 303(c)(3) of REA 1984, but the plan must satisfy this requirement in operation.

Q–45: Are there special rules for certain participants who separated from service prior to August 23, 1984?

A–45: Yes. Section 303(e) of REA 1984 provides special rules for certain participants who separated from service before August 23, 1984. Section 303(e)(1), which applies only to plans subject to section 401(a)(11) of the Code (as in effect on August 22, 1984), provides that participants whose annuity starting date did not occur before August 24, 1984, and who had one hour of service on or after September 2, 1974, but not in a plan year beginning after December 31, 1975, may elect to receive the benefits required to be provided under section 401(a)(11) of the Code (as in effect on August 22, 1984). Section 303(e)(2) provides that certain participants who had one hour of service in a plan year beginning on or after January 1, 1976, but not after August 22, 1984, may elect QPSA coverage under new sections 401(a)(11) and 417 in plans subject to these provisions. Section 303(e)(4)(A) requires plans or plan administrators to notify those participants of the provisions of section 303(e).

Q–46: When must a plan provide the notice required by section 303(e)(4)(A) of REA 1984?

A–46: The notice required by section 303(e)(4)(A) must be provided no later than the earlier of:

(a) The date the first summary annual report provided after September 17, 1985, is distributed to participants; or

(b) September 30, 1985.

A plan will not fail to satisfy the preceding sentence if the plan provides a fully subsidized QPSA with respect to any participant described in section 303(e) who dies on or after July 19, 1985, and before the notice is received. If the plan ceases to fully subsidize the QPSA, the cessation must not be effective until the notice is given. For this purpose, an annuity payable to a nonspouse beneficiary elected by the participant, in lieu of a spouse, shall satisfy the QPSA requirement, so long as the survivor benefit is fully subsidized. The notice required by this paragraph must be in writing and sent to the participant's last known address.

Q–47: Is there another time when plans must provide notice of the right, described in section 303(e)(1) of REA '84, to elect a pre-REA 1984 qualified joint and survivor annuity?

A–47: Yes. Notice of this right must also be provided to a participant at the time the participant applies for benefit payments.

[53 FR 31842, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988, as amended by T.D. 8794, 63 FR 70338, Dec. 21, 1998]

§1.401(a)–30 Limit on elective deferrals.

(a) *General Rule.* A trust that is part of a plan under which elective deferrals may be made during a calendar year is not qualified under section 401(a) unless the plan provides that the elective deferrals on behalf of an individual under the plan and all other plans, contracts, or arrangements of the employer maintaining the plan may not exceed the applicable limit for the individual's taxable year beginning in the calendar year. A plan may incorporate the applicable limit by reference. In the case of a plan maintained by more than one employer to which section 413 (b) or (c) applies, section 401(a)(30) and this section are applied as if each employer maintained a separate plan. See §1.402(g)–1(e) for rules permitting the distribution of excess deferrals to prevent disqualification of a plan or trust for failure to comply in operation with section 401(a)(30).

(b) *Definitions.* For purposes of this section:

(1) *Applicable limit.* The term ''applicable limit'' has the meaning provided in §1.402(g)–1(d).

(2) *Elective deferrals.* The term ''elective deferrals'' has the meaning provided in §1.402(g)–1(b).

(c) *Effective date*—(1) *In general.* Except as otherwise provided in this paragraph (c), this section is effective for plan years beginning after December 31, 1987.

(2) *Transition rule.* For plan years beginning in l988, a plan may rely on a reasonable interpretation of the law as in effect on December 31, 1987.

(3) *Deferrals under collective bargaining agreements.* In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986, this section does not apply to contributions made pursuant to a collective bargaining agreement for plan years beginning before the earlier of:

(i) The later of January 1, 1988, or the date on which the last collective bargaining agreement terminates (determined without regard to any extension thereof after February 28, 1986), or

(ii) January 1, 1989.

[T.D. 8357, 56 FR 40516, Aug. 15, 1991]

§ 1.401(a)–50 Puerto Rican trusts; election to be treated as a domestic trust.

(a) *In general.* Section 401(a) requires, among other things, that a trust forming part of a pension, profit-sharing, or stock bonus plan must be created or organized in the United States to be a qualified trust. Section 1022(i)(2) of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 942) provides that trusts under certain pension, etc., plans created or organized in Puerto Rico whose administrators have made the election referred to in section 1022(i)(2) are to be treated as trusts created or organized in the United States for purposes of section 401(a). Thus, if a plan otherwise satisfies the qualification requirements of section 401(a), any trust forming part of the plan for which an election is made will be treated as a qualified trust under that section.

(b) *Manner and effect of election.* A plan administrator may make an election under ERISA section 1022(i)(2) by filing a statement making the election, along with a copy of the plan, with the Director's Representative of the Internal Revenue Service in Puerto Rico. The statement making the election must indicate that it is being made under ERISA section 1022(i)(2). The statement may also be filed in conjunction with a written request for a determination letter. If the election is made with a written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will be irrevocable upon issuance of such letter. Otherwise, once made, an election is irrevocable. It is generally effective for plan years beginning after the date it has been made. However, an election made before March 3, 1983 may, at the option of the plan administrator at the time he or she makes the election, be considered to have been made on any date between September 2, 1974, and the actual date of the election. The election will then be effective for plan years beginning on or after the date chosen by the plan administrator.

(c) *Annuities, custodial accounts, etc.* See section 401 (f) for rules relating to the treatment of certain annuities, custodial accounts or other contracts, as trusts for purposes of section 401(a).

(d) *Source of plan distributions to participants and beneficiaries residing outside the United States.* Except as provided under section 871(f) (relating to amounts received as an annuity by nonresident aliens), the amount of a distribution from an electing plan that is to be treated as income from sources within the United States is determined as described below. The portion of the distribution considered to be a return of employer contributions is to be treated as income from sources within the United States in an amount equal to the portion of the distribution considered to be a return of employer contributions multiplied by the following fraction:

$$\frac{\text{Days of performance of labor or services within the United States for the employer.}}{\text{Total days of performance of labor or services for the employer.}}$$

The days of performance of labor or services within the United States shall not include the time period for which the employee's compensation is deemed not to be income from sources within the United States under subtitle A of the Code. Thus, for example, if an employee's compensation was not deemed to be income from sources within the United States under section 861(a)(3), then the time the emloyee was present in the United States while such compensation was earned would not be included in determining the days of performance of labor or services within the United States in the numerator of the above fraction. In addition, days of performance of labor or services for the employer in both the numerator and denominator of the above fraction are limited to days of plan participation by the employee and any service used for determining an employee's accrued benefit under the plan. The remaining portion of the distribution, that is, any amount other than the portion of the distribution considered to be a return of employer contributions, is not to be treated as income from sources within the United

States. For example, if a distribution consists of amounts representing employer contributions, employee contributions, and earnings on employer and employee contributions, no part of the portion of the distribution attributable to employee contributions, or earnings on employer and employee contributions, will be treated as income from sources within the United States.

[T.D. 7859, 47 FR 54297, Dec. 2, 1982]

§1.401(a)(4)–0 Table of contents.

This section contains a listing of the major headings of §§1.401(a)(4)–1 through 1.401(a)(4)–13.

§1.401(a)(4)–1 Nondiscrimination requirements of section 401(a)(4)

(a) In general.
(b) Requirements a plan must satisfy.
(1) In general.
(2) Nondiscriminatory amount of contributions or benefits.
(3) Nondiscriminatory availability of benefits, rights, and features.
(4) Nondiscriminatory effect of plan amendments and terminations.
(c) Application of requirements.
(1) In general.
(2) Interpretation.
(3) Plan-year basis of testing.
(4) Application of section 410(b) rules.
(5) Collectively-bargained plans.
(6) Former employees.
(7) Employee-provided contributions and benefits.
(8) Allocation of earnings.
(9) Rollovers, transfers, and buybacks.
(10) Vesting.
(11) Crediting service.
(12) Governmental plans.
(13) Employee stock ownership plans.
(14) Section 401(h) benefits.
(15) Definitions.
(16) Effective dates and fresh-start rules.
(d) Additional guidance.

§1.401(a)(4)–2 Nondiscrimination in amount of employer contributions under a defined contribution plan

(a) Introduction.
(1) Overview.
(2) Alternative methods of satisfying nondiscriminatory amount requirement.
(b) Safe harbors.
(1) In general.
(2) Safe harbor for plans with uniform allocation formula.
(3) Safe harbor for plans with uniform points allocation formula.
(4) Use of safe harbors not precluded by certain plan provisions.
(c) General test for nondiscrimination in amount of contributions.
(1) General rule.
(2) Determination of allocation rates.
(3) Satisfaction of section 410(b) by a rate group.
(4) Examples.

§1.401(a)(4)–3 Nondiscrimination in amount of employer-provided benefits under a defined benefit plan

(a) Introduction.
(1) Overview.
(2) Alternative methods of satisfying nondiscriminatory amount requirement.
(b) Safe harbors.
(1) In general.
(2) Uniformity requirements.
(3) Safe harbor for unit credit plans.
(4) Safe harbor for plans using fractional accrual rule.
(5) Safe harbor for insurance contract plans.
(6) Use of safe harbors not precluded by certain plan provisions.
(c) General test for nondiscrimination in amount of benefits.
(1) General rule.
(2) Satisfaction of section 410(b) by a rate group.
(3) Certain violations disregarded.
(4) Examples.
(d) Determination of accrual rates.
(1) Definitions.
(2) Rules of application.
(3) Optional rules.
(4) Examples.
(e) Compensation rules.
(1) In general.
(2) Average annual compensation.
(3) Examples.
(f) Special rules.
(1) In general.
(2) Certain qualified disability benefits.
(3) Accruals after normal retirement age.
(4) Early retirement window benefits.
(5) Unpredictable contingent event benefits.
(6) Determination of benefits on other than plan-year basis.
(7) Adjustments for certain plan distributions.
(8) Adjustment for certain QPSA charges.
(9) Disregard of certain offsets.
(10) Special rule for multiemployer plans.

§1.401(a)(4)–4 Nondiscriminatory availability of benefits, rights, and features

(a) Introduction.
(b) Current availability.
(1) General rule.
(2) Determination of current availability.
(3) Benefits, rights, and features that are eliminated prospectively.
(c) Effective availability.
(1) General rule.

(2) Examples.
(d) Special rules.
(1) Mergers and acquisitions.
(2) Frozen participants.
(3) Early retirement window benefits.
(4) Permissive aggregation of certain benefits, rights, or features.
(5) Certain spousal benefits.
(6) Special ESOP rules.
(7) Special testing rule for unpredictable contingent event benefits.
(e) Definitions.
(1) Optional form of benefit.
(2) Ancillary benefit.
(3) Other right or feature.

§ 1.401(a)(4)–5 Plan amendments and plan terminations

(a) Introduction.
(1) Overview.
(2) Facts-and-circumstances determination.
(3) Safe harbor for certain grants of benefits for past periods.
(4) Examples.
(b) Pre-termination restrictions.
(1) Required provisions in defined benefit plans.
(2) Restriction of benefits upon plan termination.
(3) Restrictions on distributions.
(4) Operational restrictions on certain money purchase pension plans.

§ 1.401(a)(4)–6 Contributory defined benefit plans

(a) Introduction.
(b) Determination of employer-provided benefit.
(1) General rule.
(2) Composition-of-work-force method.
(3) Minimum-benefit method.
(4) Grandfather rules for plans in existence on May 14, 1990.
(5) Government-plan method.
(6) Cessation of employee contributions.
(c) Rules applicable in determining whether employee-provided benefits are nondiscriminatory in amount.
(1) In general.
(2) Same rate of contributions.
(3) Total-benefits method.
(4) Grandfather rule for plans in existence on May 14, 1990.

§ 1.401(a)(4)–7 Imputation of permitted disparity

(a) Introduction.
(b) Adjusting allocation rates.
(1) In general.
(2) Employees whose plan year compensation does not exceed taxable wage base.
(3) Employees whose plan year compensation exceeds taxable wage base.
(4) Definitions.
(5) Example.
(c) Adjusting accrual rates.
(1) In general.
(2) Employees whose average annual compensation does not exceed covered compensation.
(3) Employees whose average annual compensation exceeds covered compensation.
(4) Definitions.
(5) Employees with negative unadjusted accrual rates.
(6) Example.
(d) Rules of general application.
(1) Eligible plans.
(2) Exceptions from consistency requirements.
(3) Overall permitted disparity.

§ 1.401(a)(4)–8 Cross-testing

(a) Introduction.
(b) Nondiscrimination in amount of benefits provided under a defined contribution plan.
(1) General rule.
(2) Determination of equivalent accrual rates.
(3) Safe-harbor testing method for target benefit plans.
(c) Nondiscrimination in amount of contributions under a defined benefit plan.
(1) General rule.
(2) Determination of equivalent allocation rates.
(3) Safe harbor testing method for cash balance plans.
(d) Safe-harbor testing method for defined benefit plans that are part of a floor-offset arrangement.
(1) General rule.
(2) Application of safe-harbor testing method to qualified offset arrangements.

§ 1.401(a)(4)–9 Plan aggregation and restructuring

(a) Introduction.
(b) Application of nondiscrimination requirements to DB/DC plans.
(1) General rule.
(2) Special rules for demonstrating nondiscrimination in amount of contributions or benefits.
(3) Optional rules for demonstrating nondiscrimination in availability of certain benefits, rights, and features.
(c) Plan restructuring.
(1) General rule.
(2) Identification of component plans.
(3) Satisfaction of section 401(a)(4) by a component plan.
(4) Satisfaction of section 410(b) by a component plan.
(5) Effect of restructuring under other sections.
(6) Examples.

§ 1.401(a)(4)–10 Testing of former employees

(a) Introduction.

(b) Nondiscrimination in amount of contributions or benefits.
(1) General rule.
(2) Permitted disparity.
(3) Examples.
(c) Nondiscrimination in availability of benefits, rights, or features.

§1.401(a)(4)–11 Additional rules

(a) Introduction.
(b) Rollovers, transfers, and buybacks.
(1) Rollovers and elective transfers.
(2) Other transfers. [Reserved]
(3) Employee buybacks.
(c) Vesting.
(1) General rule.
(2) Deemed equivalence of statutory vesting schedules.
(3) Safe harbor for vesting schedules.
(4) Examples.
(d) Service-crediting rules.
(1) Overview.
(2) Manner of crediting service.
(3) Service-crediting period.
(e) Family aggregation rules. [Reserved]
(f) Governmental plans. [Reserved]
(g) Corrective amendments.
(1) In general.
(2) Scope of corrective amendments.
(3) Conditions for corrective amendments.
(4) Corrective amendments must have substance.
(5) Effect under other statutory requirements.
(6) Examples.

§1.401(a)(4)–12 Definitions

§1.401(a)(4)–13 Effective dates and fresh-start rules

(a) General effective dates.
(1) In general.
(2) Plans of tax-exempt organizations.
(3) Compliance during transition period.
(b) Effective date for governmental plans.
(c) Fresh-start rules for defined benefit plans.
(1) Introduction.
(2) General rule.
(3) Definition of frozen.
(4) Fresh-start formulas.
(5) Rules of application.
(6) Examples.
(d) Compensation adjustments to frozen accrued benefits.
(1) Introduction.
(2) In general.
(3) Plan requirements.
(4) Meaningful coverage as of fresh-start date.
(5) Meaningful ongoing coverage.
(6) Meaningful current benefit accruals.
(7) Minimum benefit adjustment.
(8) Adjusted accrued benefit.
(9) Examples.
(e) Determination of initial theoretical reserve for target benefit plans.
(1) General rule.
(2) Example.
(f) Special fresh-start rules for cash balance plans.
(1) In general.
(2) Alternative formula.
(3) Limitations on formulas.

[T.D. 8485, 58 FR 46778, Sept. 3, 1993]

§1.401(a)(4)–1 Nondiscrimination requirements of section 401(a)(4).

(a) *In general.* Section 401(a)(4) provides that a plan is a qualified plan only if the contributions or the benefits provided under the plan do not discriminate in favor of HCEs. Whether a plan satisfies this requirement depends on the form of the plan and on its effect in operation. In making this determination, intent is irrelevant. This section sets forth the exclusive rules for determining whether a plan satisfies section 401(a)(4). A plan that complies in form and operation with the rules in this section therefore satisfies section 401(a)(4).

(b) *Requirements a plan must satisfy*—(1) *In general.* In order to satisfy section 401(a)(4), a plan must satisfy each of the requirements of this paragraph (b).

(2) *Nondiscriminatory amount of contributions or benefits*—(i) *General rule.* Either the contributions or the benefits provided under the plan must be nondiscriminatory in amount. It need not be shown that both the contributions and the benefits provided are nondiscriminatory in amount, but only that either the contributions alone or the benefits alone are nondiscriminatory in amount.

(ii) *Defined contribution plans*—(A) *General rule.* A defined contribution plan satisfies this paragraph (b)(2) if the contributions allocated under the plan (including forfeitures) are nondiscriminatory in amount under §1.401(a)(4)–2. Alternatively, a defined contribution plan (other than an ESOP) satisfies this paragraph (b)(2) if the equivalent benefits provided under the plan are nondiscriminatory in amount under §1.401(a)(4)–8(b). Section 1.401(a)(4)–8(b) includes a safe-harbor testing method for contributions provided under a target benefit plan.

(B) *Section 401(k) plans and section 401(m) plans.* A section 401(k) plan is deemed to satisfy this paragraph (b)(2) because § 1.410(b)–9 defines a section 401(k) plan as a plan consisting of elective contributions under a qualified cash or deferred arrangement (i.e., one that satisfies section 401(k)(3), the nondiscriminatory amount requirement applicable to qualified cash or deferred arrangements). A section 401(m) plan satisfies this paragraph (b)(2) only if the plan satisfies §§ 1.401(m)–1(b) and 1.401(m)–2. Contributions under a nonqualified cash or deferred arrangement, elective contributions described in § 1.401(k)–1(b)(4)(iv) that fail to satisfy the allocation and compensation requirements of § 1.401(k)–1(b)(4)(i), matching contributions that fail to satisfy § 1.401(m)–1(b)(4)(ii)(A), and qualified nonelective contributions treated as elective or matching contributions for certain purposes under §§ 1.401(k)–1(b)(5) and 1.401(m)–1(b)(5), respectively, are not subject to the special rule in this paragraph (b)(2)(ii)(B), because they are not treated as part of a section 401(k) plan or section 401(m) plan as those terms are defined in § 1.410(b)–9. The contributions described in the preceding sentence must satisfy paragraph (b)(2)(ii)(A) of this section.

(iii) *Defined benefit plans.* A defined benefit plan satisfies this paragraph (b)(2) if the benefits provided under the plan are nondiscriminatory in amount under § 1.401(a)(4)–3. Alternatively, a defined benefit plan satisfies this paragraph (b)(2) if the equivalent allocations provided under the plan are nondiscriminatory in amount under § 1.401(a)(4)–8(c). Section 1.401(a)(4)–8(c) includes a safe-harbor testing method for benefits provided under a cash balance plan. In addition, § 1.401(a)(4)–8(d) provides a safe-harbor testing method for benefits provided under a defined benefit plan that is part of a floor-offset arrangement.

(3) *Nondiscriminatory availability of benefits, rights, and features.* All benefits, rights, and features provided under the plan must be made available in the plan in a nondiscriminatory manner. Rules for determining whether this requirement is satisfied are set forth in § 1.401(a)(4)–4.

(4) *Nondiscriminatory effect of plan amendments and terminations.* The timing of plan amendments must not have the effect of discriminating significantly in favor of HCEs. Rules for determining whether this requirement is satisfied are set forth in § 1.401(a)(4)–5(a). Section 1.401(a)(4)–5(b) provides additional requirements regarding plan terminations.

(c) *Application of requirements*—(1) *In general.* The requirements of paragraph (b) of this section must be applied in accordance with the rules set forth in this paragraph (c).

(2) *Interpretation.* The provisions of §§ 1.401(a)(4)–1 through 1.401(a)(4)–13 must be interpreted in a reasonable manner consistent with the purpose of preventing discrimination in favor of HCEs.

(3) *Plan-year basis of testing.* The requirements of paragraph (b) of this section are generally applied on the basis of the plan year and on the basis of the terms of the plan in effect during the plan year. Thus, unless otherwise provided, the compensation, contributions, benefit accruals, and other items used to apply these requirements must be determined with respect to the plan year being tested. However, § 1.401(a)(4)–11(g) provides rules allowing for corrective amendments made after the close of the plan year to be taken into account in satisfying certain requirements under paragraph (b) of this section.

(4) *Application of section 410(b) rules*—(i) *Relationship between sections 401(a)(4) and 410(b).* To be a qualified plan, a plan must satisfy both sections 410(b) and 401(a)(4). Section 410(b) requires that a plan benefit a nondiscriminatory group of employees, and section 401(a)(4) requires that the contributions or benefits provided to employees benefiting under the plan not discriminate in favor of HCEs. Consistent with this requirement, the definition of a plan subject to testing under section 401(a)(4) is the same as the definition of a plan subject to testing under section 410(b), i.e., the plan determined after applying the mandatory disaggregation rules of § 1.410(b)–7(c) and the permissive aggregation rules of § 1.410(b)–7(d). In addition, whichever testing option is used for the plan year under § 1.410(b)–8(a) (e.g., quarterly testing) must also be used for purposes of determining whether the

plan satisfies section 401(a)(4) for the plan year.

(ii) *Special rules for certain aggregated plans.* Special rules are set forth in §1.401(a)(4)–9(b) for applying the nondiscriminatory amount and availability requirements of paragraphs (b)(2) and (b)(3) of this section to a plan that includes one or more defined benefit plans and one or more defined contribution plans that have been permissively aggregated under §1.410(b)–7(d).

(iii) *Restructuring.* In certain circumstances, a plan may be restructured on the basis of employee groups and treated as comprising two or more plans, each of which is treated as a separate plan that must independently satisfy sections 401(a)(4) and 410(b). Rules relating to restructuring plans for purposes of applying the requirements of paragraph (b) of this section are set forth in §1.401(a)(4)–9(c).

(iv) *References to section 410(b).* Except as otherwise specifically provided, references to satisfying section 410(b) in §§1.401(a)(4)–1 through 1.401(a)(4)–13 mean satisfying §1.410(b)–2 (taking into account any special rules available in satisfying that section, other than the permissive aggregation rules of §1.410(b)–7(d)). In the case of a plan described in section 410(c)(1) that has not made the election described in section 410(d) and is not subject to section 403(b)(12)(A)(i), references in §§1.401(a)(4)–1 through 1.401(a)(4)–13 to satisfying section 410(b) mean satisfying section 410(c)(2).

(5) *Collectively-bargained plans.* The requirements of paragraph (b) of this section are treated as satisfied by a collectively-bargained plan that automatically satisfies section 410(b) under §1.410(b)–2(b)(7).

(6) *Former employees.* In applying the nondiscriminatory amount and availability requirements of paragraphs (b)(2) and (b)(3) of this section, former employees are tested separately from active employees, unless otherwise provided. Rules for applying paragraphs (b)(2) and (b)(3) of this section to former employees are set forth in §1.401(a)(4)–10.

(7) *Employee-provided contributions and benefits.* In applying the nondiscriminatory amount requirement of paragraph (b)(2) of this section, employee-provided contributions and benefits are tested separately from employer-provided contributions and benefits, unless otherwise provided. Rules for determining the amount of employer-provided benefits under a defined benefit plan that include employee contributions not allocated to separate accounts are set forth in §1.401(a)(4)–6(b), and rules for applying paragraph (b)(2) of this section to employee contributions under such a plan are set forth in §1.401(a)(4)–6(c). See paragraph (b)(2)(ii)(B) of this section for rules applicable to employee contributions allocated to separate accounts.

(8) *Allocation of earnings.* Notwithstanding any other provision in §§1.401(a)(4)–1 through 1.401(a)(4)–13, a defined contribution plan does not satisfy paragraph (b)(2) of this section if the manner in which income, expenses, gains, or losses are allocated to accounts under the plan discriminates in favor of HCEs or former HCEs.

(9) *Rollovers, transfers, and buybacks.* In applying the requirements of paragraph (b) of this section, rollover (including direct rollover) contributions described in section 402(c), 402(e)(6), 403(a)(4), 403(a)(5), or 408(d)(3), elective transfers described in §1.411(d)–4, Q&A–3(b), transfers of assets and liabilities described in section 414(l), and employee buybacks are treated in accordance with the rules set forth in §1.401(a)(4)–11(b).

(10) *Vesting.* A plan does not satisfy the nondiscriminatory amount requirement of paragraph (b)(2) of this section unless it satisfies §1.401(a)(4)–11(c) with respect to the manner in which employees vest in their accrued benefits.

(11) *Crediting service.* A plan does not satisfy paragraphs (b)(2) and (b)(3) of this section unless it satisfies §1.401(a)(4)–11(d) with respect to the manner in which employees' service is credited under the plan. Service other than actual service with the employer may not be taken into account in determining whether the plan satisfies paragraphs (b)(2) and (b)(3) of this section except as provided in §1.401(a)(4)–11(d).

(12) *Governmental plans.* The rules of this section apply to a governmental plan within the meaning of section

414(d), except as provided in §§1.401(a)(4)–11(f) and 1.401(a)(4)–13(b).

(13) *Employee stock ownership plans.* [Reserved]

(14) *Section 401(h) benefits.* In applying the requirements of paragraph (b) of this section, the portion of a plan providing benefits described in section 401(h) is tested separately from the portion of the same plan providing retirement benefits, and thus is not required to satisfy this section. Rules applicable to section 401(h) benefits are set forth in §1.401–14(b)(2).

(15) *Definitions.* In applying the requirements of this section, the definitions in §1.401(a)(4)–12 govern.

(16) *Effective dates and fresh-start rules.* In applying the requirements of this section, the effective dates set forth in §1.401(a)(4)–13 govern. Section 1.401(a)(4)–13 also provides certain transition and fresh-start rules that apply for purposes of this section.

(d) *Additional guidance.* The Commissioner may, in revenue rulings, notices, and other guidance, published in the Internal Revenue Bulletin, provide any additional guidance that may be necessary or appropriate in applying the nondiscrimination requirements of section 401(a)(4), including additional safe harbors and alternative methods and procedures for satisfying those requirements. See §601.601(d)(2)(ii)(*b*) of this chapter.

[T.D. 8485, 58 FR 46780, Sept. 3, 1993]

§1.401(a)(4)–2 Nondiscrimination in amount of employer contributions under a defined contribution plan.

(a) *Introduction*—(1) *Overview.* This section provides rules for determining whether the employer contributions allocated under a defined contribution plan are nondiscriminatory in amount as required by §1.401(a)(4)–1(b)(2)(ii)(A). Certain defined contribution plans that provide uniform allocations are permitted to satisfy this requirement by meeting one of the safe harbors in paragraph (b) of this section. Plans that do not provide uniform allocations may satisfy this requirement by satisfying the general test in paragraph (c) of this section. See §1.401(a)(4)–1(b)(2)(ii)(B) for the exclusive tests applicable to section 401(k) plans and section 401(m) plans.

(2) *Alternative methods of satisfying nondiscriminatory amount requirement.* A defined contribution plan is permitted to satisfy paragraph (b)(2) or (c) of this section on a restructured basis pursuant to §1.401(a)(4)–9(c). Alternatively, a defined contribution plan (other than an ESOP) is permitted to satisfy the nondiscriminatory amount requirement of §1.401(a)(4)–1(b)(2)(ii)(A) on the basis of equivalent benefits pursuant to §1.401(a)(4)–8(b).

(b) *Safe harbors*—(1) *In general.* The employer contributions allocated under a defined contribution plan are nondiscriminatory in amount for a plan year if the plan satisfies either of the safe harbors in paragraph (b)(2) or (b)(3) of this section. Paragraph (b)(4) of this section provides exceptions for certain plan provisions that do not cause a plan to fail to satisfy this paragraph (b).

(2) *Safe harbor for plans with uniform allocation formula*—(i) *General rule.* A defined contribution plan satisfies the safe harbor in this paragraph (b)(2) for a plan year if the plan allocates all amounts taken into account under paragraph (c)(2)(ii) of this section for the plan year under an allocation formula that allocates to each employee the same percentage of plan year compensation, the same dollar amount, or the same dollar amount for each uniform unit of service (not to exceed one week) performed by the employee during the plan year.

(ii) *Permitted disparity.* If a plan satisfies section 401(l) in form, differences in employees' allocations under the plan attributable to uniform disparities permitted under §1.401(l)–2 (including differences in disparities that are deemed uniform under §1.401(l)–2(c)(2)) do not cause the plan to fail to satisfy this paragraph (b)(2).

(3) *Safe harbor for plans with uniform points allocation formula*—(i) *General rule.* A defined contribution plan (other than an ESOP) satisfies the safe harbor in this paragraph (b)(3) for a plan year if it satisfies both of the following requirements:

(A) The plan must allocate amounts under a uniform points allocation formula. A uniform points allocation formula defines each employee's allocation for the plan year as the product of the total of all amounts taken into account under paragraph (c)(2)(ii) of this section and a fraction, the numerator of which is the employee's points for the plan year and the denominator of which is the sum of the points of all employees in the plan for the plan year. For this purpose, an employee's points for a plan year equal the sum of the employee's points for age, service, and units of plan year compensation for the plan year. Under a uniform points allocation formula, each employee must receive the same number of points for each year of age, the same number of points for each year of service, and the same number of points for each unit of plan year compensation. (See §1.401(a)(4)–11(d)(3) regarding service that may be taken into account as years of service.) A uniform points allocation formula need not grant points for both age and service, but it must grant points for at least one of them. If the allocation formula grants points for years of service, the plan is permitted to limit the number of years of service taken into account to a single maximum number of years of service. A uniform points allocation formula need not grant points for units of plan year compensation, but if it does, the unit used must be a single dollar amount for all employees that does not exceed $200.

(B) For the plan year, the average of the allocation rates for the HCEs in the plan must not exceed the average of the allocation rates for the NHCEs in the plan. For this purpose, allocation rates are determined in accordance with paragraph (c)(2) of this section, without imputing permitted disparity and without grouping allocation rates under paragraphs (c)(2) (iv) and (v) of this section, respectively.

(ii) *Example.* The following example illustrates the safe harbor in this paragraph (b)(3):

Example. (a) Plan A has a single allocation formula that applies to all employees, under which each employee's allocation for the plan year equals the product of the total of all amounts taken into account for all employees for the plan year under paragraph (c)(2)(ii) of this section and a fraction, the numerator of which is the employee's points for the plan year and the denominator of which is the sum of the points of all employees for the plan year. Plan A grants each employee 10 points for each year of service (including pre-participation service and imputed service credited under Plan A that satisfies §1.401(a)(4)–11(d)(3)) and one point for each $100 of plan year compensation. For the 1994 plan year, the total allocations are $71,200, and the total points for all employees are 7,120. Each employee's allocation for the 1994 plan year is set forth in the table below.

Employee	Years of service	Plan year compensation	Points	Amount of allocation	Allocation rate (percent)
H1	20	$150,000	1,700	$17,000	11.3
H2	10	150,000	1,600	16,000	10.7
H3	30	100,000	1,300	13,000	13.0
H4	3	100,000	1,030	10,300	10.3
N1	10	40,000	500	5,000	12.5
N2	5	35,000	400	4,000	11.4
N3	3	30,000	330	3,300	11.0
N4	1	25,000	260	2,600	10.4
Total			7,120	71,200	

(b) Under these facts, for the 1994 plan year, Plan A allocates amounts under a uniform points allocation formula within the meaning of paragraph (b)(3)(i)(A) of this section.

(c) For the 1994 plan year, the average allocation rate for the HCEs (H1 through H4) is 11.3 percent, and the average allocation rate for NHCEs (N1 through N4) is 11.3 percent. Because the average of the allocation rates for the HCEs does not exceed the average of the allocation rates for the NHCEs, Plan A satisfies paragraph (b)(3)(i)(B) of this section and, thus, the safe harbor in this paragraph (b)(3) for the 1994 plan year.

(4) *Use of safe harbors not precluded by certain plan provisions*—(i) *In general.* A plan does not fail to satisfy this paragraph (b) merely because the plan contains one or more of the provisions described in this paragraph (b)(4). Unless

otherwise provided, any such provision must apply uniformly to all employees.

(ii) *Entry dates.* The plan provides one or more entry dates during the plan year as permitted by section 410(a)(4).

(iii) *Certain conditions on allocations.* The plan provides that an employee's allocation for the plan year is conditioned on either the employee's employment on the last day of the plan year or the employee's completion of a minimum number of hours of service during the plan year (not to exceed 1,000), or both. Such a provision may include an exception from this condition for all employees whose employment terminates during the plan year or only for those employees whose employment terminates during the plan year on account of one or more of the following circumstances: retirement, disability, death, or military service.

(iv) *Certain limits on allocations.* The plan limits allocations otherwise provided under the allocation formula to a maximum dollar amount or a maximum percentage of plan year compensation, limits the dollar amount of plan year compensation taken into account in determining the amount of allocations, or applies the restrictions of section 409(n) or the limits of section 415.

(v) *Lower allocations for HCEs.* The allocations provided to one or more HCEs under the plan are less than the allocations that would otherwise be provided to those employees if the plan satisfied this paragraph (b) (without regard to this paragraph (b)(4)(v)).

(vi) *Multiple formulas*—(A) *General rule.* The plan provides that an employee's allocation under the plan is the greater of the allocations determined under two or more formulas, or is the sum of the allocations determined under two or more formulas. This paragraph (b)(4)(vi) does not apply to a plan unless each of the formulas under the plan satisfies the requirements of paragraph (b)(4)(vi) (B) through (D) of this section.

(B) *Sole formulas.* The formulas must be the only formulas under the plan.

(C) *Separate testing.* Each of the formulas must separately satisfy this paragraph (b). A formula that is available solely to some or all NHCEs is deemed to satisfy this paragraph (b)(4)(vi)(C).

(D) *Availability*—(*1*) *General rule.* All of the formulas must be available on the same terms to all employees.

(*2*) *Formulas for NHCEs.* A formula does not fail to be available on the same terms to all employees merely because the formula is not available to any HCEs, but is available to some or all NHCEs on the same terms as all of the other formulas in the plan.

(*3*) *Top-heavy formulas.* In the case of a plan that provides the greater of the allocations under two or more formulas, one of which is a top-heavy formula, the top-heavy formula does not fail to be available on the same terms to all employees merely because it is available solely to all non-key employees on the same terms as all the other formulas under the plan. Furthermore, the top-heavy formula does not fail to be available on the same terms as the other formulas under the plan merely because it is conditioned on the plan's being top-heavy within the meaning of section 416(g). Finally, the top-heavy formula does not fail to be available on the same terms as the other formulas under the plan merely because it is available to all employees described in §1.416–1, Q&A M–10 (i.e., all non-key employees who have not separated from service as of the last day of the plan year). The preceding sentence does not apply, however, unless the plan would satisfy section 410(b) if all employees who are benefiting under the plan solely as a result of receiving allocations under the top-heavy formula were treated as not currently benefiting under the plan. For purposes of this paragraph (b)(4)(vi)(D)(*3*), a top-heavy formula is a formula that provides the minimum benefit described in section 416(c)(2) (taking into account, if applicable, the modification in section 416(h)(2)(A)(ii)(II)).

(E) *Provisions may be applied more than once.* The provisions of this paragraph (b)(4)(vi) may be applied more than once. For example, a plan satisfies this paragraph (b) if an employee's allocation under the plan is the greater of the allocations under two or more formulas, and one or more of those formulas is the sum of the allocations under two or more other formulas, provided that each of the formulas under the plan satisfies the requirements of paragraph (b)(4)(vi) (B) through (D) of this section.

(F) *Examples.* The following examples illustrate the rules in this paragraph (b)(4)(vi):

Example 1. Under Plan A, each employee's allocation equals the sum of the allocations determined under two formulas. The first formula provides an allocation of five percent of plan year compensation. The second formula provides an allocation of $100. Plan A satisfies this paragraph (b)(4)(vi).

Example 2. Under Plan B, each employee's allocation equals the greater of the allocations determined under two formulas. The first formula provides an allocation of seven percent of plan year compensation and is available to all employees who complete at least 1,000 hours of service during the plan year and who have not separated from service as of the last day of the plan year. The second formula is a top-heavy formula that provides an allocation of three percent of plan year compensation and that is available to all employees described in §1.416–1, Q&A M–10. Plan B does not satisfy the general rule in paragraph (b)(4)(vi)(D)(*1*) of this section because the two formulas are not available on the same terms to all employees (i.e., an employee is required to complete 1,000 hours of service during the plan year to receive an allocation under the first formula, but not under the second formula). Nonetheless, because the second formula is a top-heavy formula, the special availability rules for top-heavy formulas in paragraph (b)(4)(vi)(D)(*3*) of this section apply. Thus, the second formula does not fail to be available on the same terms as the first formula merely because the second formula is available to all employees described in §1.416–1, Q&A M–10, as long as the plan would satisfy section 410(b) if all employees who are benefiting under the plan solely as a result of receiving allocations under the top-heavy formula were treated as not currently benefiting under the plan. This is true even if the plan conditions the availability of the second formula on the plan's being top-heavy for the plan year.

Example 3. The facts are the same as in *Example 2,* except that the first formula is available to all employees who have not separated from service as of the last day of the plan year, regardless of whether they complete at least 1,000 hours of service during the plan year. Plan B still does not satisfy the general rule in paragraph (b)(4)(vi)(D)(*1*) of this section because the two formulas are not available on the same terms to all employees (i.e., the second formula is only available to all non-key employees). Nonetheless, because the second formula is a top-heavy formula, the special availability rules for top-heavy formulas in paragraph (b)(4)(vi)(D)(*3*) of this section apply. Thus, the second formula does not fail to be available on the same terms as the first formula merely because the second formula is available solely to all non-key employees.

(c) *General test for nondiscrimination in amount of contributions*—(1) *General rule.* The employer contributions allocated under a defined contribution plan are nondiscriminatory in amount for a plan year if each rate group under the plan satisfies section 410(b). For purposes of this paragraph (c), a rate group exists under a plan for each HCE and consists of the HCE and all other employees in the plan (both HCEs and NHCEs) who have an allocation rate greater than or equal to the HCE's allocation rate. Thus, an employee is in the rate group for each HCE who has an allocation rate less than or equal to the employee's allocation rate.

(2) *Determination of allocation rates*—(i) *General rule.* The allocation rate for an employee for a plan year equals the sum of the allocations to the employee's account for the plan year, expressed either as a percentage of plan year compensation or as a dollar amount.

(ii) *Allocations taken into account.* The amounts taken into account in determining allocation rates for a plan year include all employer contributions and forfeitures that are allocated or treated as allocated to the account of an employee under the plan for the plan year, other than amounts described in paragraph (c)(2)(iii) of this section. For this purpose, employer contributions include annual additions described in §1.415–6(b)(2)(i) (regarding amounts arising from certain transactions between the plan and the employer). In the case of a defined contribution plan subject to section 412, an employer contribution is taken into account in the plan year for which it is required to be contributed and allocated to employees' accounts under the plan, even if all or part of the required contribution is not actually made.

(iii) *Allocations not taken into account.* Allocations of income, expenses, gains, and losses attributable to the balance in an employee's account are not taken into account in determining allocation rates.

(iv) *Imputation of permitted disparity.* The disparity permitted under section 401(l) may be imputed in accordance with the rules of §1.401(a)(4)–7.

(v) *Grouping of allocation rates*—(A) *General rule.* An employer may treat all employees who have allocation rates within a specified range above and below a midpoint rate chosen by the employer as having an allocation rate equal to the midpoint rate within that range. Allocation rates within a given range may not be grouped under this paragraph (c)(2)(v) if the allocation rates of HCEs within the range generally are significantly higher than the allocation rates of NHCEs in the range. The specified ranges within which all employees are treated as having the same allocation rate may not overlap and may be no larger than provided in paragraph (c)(2)(v)(B) of this section. Allocation rates of employees that are not within any of these specified ranges are determined without regard to this paragraph (c)(2)(v).

(B) *Size of specified ranges.* The lowest and highest allocation rates in the range must be within five percent (not five percentage points) of the midpoint rate. If allocation rates are determined as a percentage of plan year compensation, the lowest and highest allocation rates need not be within five percent of the midpoint rate, if they are no more than one quarter of a percentage point above or below the midpoint rate.

(vi) *Consistency requirement.* Allocation rates must be determined in a consistent manner for all employees for the plan year.

(3) *Satisfaction of section 410(b) by a rate group*—(i) *General rule.* For purposes of determining whether a rate group satisfies section 410(b), the rate group is treated as if it were a separate plan that benefits only the employees included in the rate group for the plan year. Thus, for example, under §1.401(a)(4)–1(c)(4)(iv), the ratio percentage of the rate group is determined taking into account all nonexcludable employees regardless of whether they benefit under the plan. Paragraph (c)(3)(ii) and (iii) of this section provide additional special rules for determining whether a rate group satisfies section 410(b).

(ii) *Application of nondiscriminatory classification test.* A rate group satisfies the nondiscriminatory classification test of §1.410(b)–4 (including the reasonable classification requirement of §1.410(b)–4(b)) if and only if the ratio percentage of the rate group is greater than or equal to the lesser of—

(A) The midpoint between the safe and the unsafe harbor percentages applicable to the plan; and

(B) The ratio percentage of the plan.

(iii) *Application of average benefit percentage test.* A rate group satisfies the average benefit percentage test of §1.410(b)–5 if the plan of which it is a part satisfies §1.410(b)–5 (without regard to §1.410(b)–5(f)). In the case of a plan that relies on §1.410(b)–5(f) to satisfy the average benefit percentage test, each rate group under the plan satisfies the average benefit percentage test (if applicable) only if the rate group separately satisfies §1.410(b)–5(f).

(4) *Examples.* The following examples illustrate the general test in this paragraph (c):

Example 1. Employer X maintains two defined contribution plans, Plan A and Plan B, that are aggregated and treated as a single plan for purposes of sections 410(b) and 401(a)(4) pursuant to §1.410(b)–7(d). For the 1994 plan year, Employee M has plan year compensation of $10,000 and receives an allocation of $200 under Plan A and an allocation of $800 under Plan B. Employee M's allocation rate under the aggregated plan for the 1994 plan year is 10 percent (i.e., $1,000 divided by $10,000).

Example 2. The employees in Plan C have the following allocation rates (expressed as a percentage of plan year compensation): 2.75 percent, 2.80 percent, 2.85 percent, 3.25 percent, 6.65 percent, 7.33 percent, 7.34 percent, and 7.35 percent. Because the first four rates are within a range of no more than one quarter of a percentage point above and below 3.0 percent (a midpoint rate chosen by the employer), under paragraph (c)(2)(v) of this section the employer may treat the employees who have those rates as having an allocation rate of 3.0 percent (provided that the allocation rates of HCEs within the range generally are not significantly higher than the allocation rates of NHCEs within the range). Because the last four rates are within a range of no more than five percent above and below 7.0 percent (a midpoint rate chosen by the employer), the employer may treat the employees who have those rates as having an allocation rate of 7.0 percent (provided that the allocation rates of HCEs within the range generally are not significantly higher than the allocation rates of NHCEs within the range).

Example 3. (a) Employer Y has only six nonexcludable employees, all of whom benefit under Plan D. The HCEs are H1 and H2, and the NHCEs are N1 through N4. For the 1994 plan year, H1 and N1 through N4 have an allocation rate of 5.0 percent of plan year compensation. For the same plan year, H2 has an allocation rate of 7.5 percent of plan year compensation.

(b) There are two rate groups under Plan D. Rate group 1 consists of H1 and all those employees who have an allocation rate greater than or equal to H1's allocation rate (5.0 percent). Thus, rate group 1 consists of H1, H2, and N1 through N4. Rate group 2 consists only of H2 because no other employee has an allocation rate greater than or equal to H2's allocation rate (7.5 percent).

(c) The ratio percentage for rate group 2 is zero percent—i.e., zero percent (the percentage of all nonhighly compensated nonexcludable employees who are in the rate group) divided by 50 percent (the percentage of all highly compensated nonexcludable employees who are in the rate group). Therefore rate group 2 does not satisfy the ratio percentage test under §1.410(b)–2(b)(2). Rate group 2 also does not satisfy the nondiscriminatory classification test of §1.410(b)–4 (as modified by paragraph (c)(3) of this section). Rate group 2 therefore does not satisfy section 410(b) and, as a result, Plan D does not satisfy the general test in paragraph (c)(1) of this section. This is true regardless of whether rate group 1 satisfies §1.410(b)–2(b)(2).

Example 4. (a) The facts are the same as in *Example 3*, except that N4 has an allocation rate of 8.0 percent.

(b) There are two rate groups in Plan D. Rate group 1 consists of H1 and all those employees who have an allocation rate greater than or equal to H1's allocation rate (5.0 percent). Thus, rate group 1 consists of H1, H2 and N1 through N4. Rate group 2 consists of H2, and all those employees who have an allocation rate greater than or equal to H2's allocation rate (7.5 percent). Thus, rate group 2 consists of H2 and N4.

(c) Rate group 1 satisfies the ratio percentage test under §1.410(b)–2(b)(2) because the ratio percentage of the rate group is 100 percent—i.e., 100 percent (the percentage of all nonhighly compensated nonexcludable employees who are in the rate group) divided by 100 percent (the percentage of all highly compensated nonexcludable employees who are in the rate group).

(d) Rate group 2 does not satisfy the ratio percentage test of §1.410(b)–2(b)(2) because the ratio percentage of the rate group is 50 percent—i.e., 25 percent (the percentage of all nonhighly compensated nonexcludable employees who are in the rate group) divided by 50 percent (the percentage of all highly compensated nonexcludable employees who are in the rate group).

(e) However, rate group 2 does satisfy the nondiscriminatory classification test of §1.410(b)–4 because the ratio percentage of the rate group (50 percent) is greater than the safe harbor percentage applicable to the plan under §1.410(b)–4(c)(4) (45.5 percent).

(f) Under paragraph (c)(3)(iii) of this section, rate group 2 satisfies the average benefit percentage test, if Plan D satisfies the average benefit percentage test. (The requirement that Plan D satisfy the average benefit percentage test applies even though Plan D satisfies the ratio percentage test and would ordinarily not need to run the average benefit percentage test.) If Plan D satisfies the average benefit percentage test, then rate group 2 satisfies section 410(b) and thus, Plan D satisfies the general test in paragraph (c)(1) of this section, because each rate group under the plan satisfies section 410(b).

Example 5. (a) Plan E satisfies section 410(b) by satisfying the nondiscriminatory classification test of §1.410(b)–4 and the average benefit percentage test of §1.410(b)–5 (without regard to §1.410(b)–5(f)). See §1.410(b)–2(b)(3). Plan E uses the facts-and-circumstances requirements of §1.410(b)–4(c)(3) to satisfy the nondiscriminatory classification test of §1.410(b)–4. The safe and unsafe harbor percentages applicable to the plan under §1.410(b)–4(c)(4) are 29 and 20 percent, respectively. Plan E has a ratio percentage of 22 percent.

(b) Rate group 1 under Plan E has a ratio percentage of 23 percent. Under paragraph (c)(3)(ii) of this section, the rate group satisfies the nondiscriminatory classification requirement of §1.410(b)–4, because the ratio percentage of the rate group (23 percent) is greater than the lesser of—

(1) The ratio percentage for the plan as a whole (22 percent); and

(2) The midpoint between the safe and unsafe harbor percentages (24.5 percent).

(c) Under paragraph (c)(3)(iii) of this section, the rate group satisfies section 410(b) because the plan satisfies the average benefit percentage test of §1.410(b)–5.

[T.D. 8485, 58 FR 46781, Sept. 3, 1993]

§1.401(a)(4)–3 Nondiscrimination in amount of employer-provided benefits under a defined benefit plan.

(a) *Introduction*—(1) *Overview.* This section provides rules for determining whether the employer-provided benefits under a defined benefit plan are nondiscriminatory in amount as required by §1.401(a)(4)–1(b)(2)(iii). Certain defined benefit plans that provide uniform benefits are permitted to satisfy this requirement by meeting one of the safe harbors in paragraph (b) of this section. Plans that do not provide uniform benefits may satisfy this requirement by satisfying the general test in paragraph (c) of this section. Paragraph (d) of this section provides rules for determining the individual benefit accrual rates needed for the general test. Paragraph (e) of this section provides rules for determining compensation for purposes of applying the requirements of this section. Paragraph (f) of this section provides additional rules that apply generally for purposes of both the safe harbors in paragraph (b) of this section and the general test in paragraph (c) of this section. See § 1.401(a)(4)–6 for rules for determining the amount of employer-provided benefits under a contributory DB plan, and for determining whether the employee-provided benefits under such a plan are nondiscriminatory in amount.

(2) *Alternative methods of satisfying nondiscriminatory amount requirement.* A defined benefit plan is permitted to satisfy paragraph (b) or (c) of this section on a restructured basis pursuant to § 1.401(a)(4)–9(c). Alternatively, a defined benefit plan is permitted to satisfy the nondiscriminatory amount requirement of § 1.401(a)(4)–1(b)(2)(iii) on the basis of equivalent allocations pursuant to § 1.401(a)(4)–8(c). In addition, a defined benefit plan that is part of a floor-offset arrangement is permitted to satisfy this section pursuant to § 1.401(a)(4)–8(d).

(b) *Safe harbors*—(1) *In general.* The employer-provided benefits under a defined benefit plan are nondiscriminatory in amount for a plan year if the plan satisfies each of the uniformity requirements of paragraph (b)(2) of this section and any one of the safe harbors in paragraphs (b)(3) (unit credit plans), (b)(4) (fractional accrual plans), and (b)(5) (insurance contract plans) of this section. Paragraph (b)(6) of this section provides exceptions for certain plan provisions that do not cause a plan to fail to satisfy this paragraph (b). Paragraph (f) of this section provides additional rules that apply in determining whether a plan satisfies this paragraph (b).

(2) *Uniformity requirements*—(i) *Uniform normal retirement benefit.* The same benefit formula must apply to all employees. The benefit formula must provide all employees with an annual benefit payable in the same form commencing at the same uniform normal retirement age. The annual benefit must be the same percentage of average annual compensation or the same dollar amount for all employees who will have the same number of years of service at normal retirement age. (See § 1.401(a)(4)–11(d)(3) regarding service that may be taken into account as years of service.) The annual benefit must equal the employee's accrued benefit at normal retirement age (within the meaning of section 411(a)(7)(A)(i)) and must be the normal retirement benefit under the plan (within the meaning of section 411(a)(9)).

(ii) *Uniform post-normal retirement benefit.* With respect to an employee with a given number of years of service at any age after normal retirement age, the annual benefit commencing at that employee's age must be the same percentage of average annual compensation or the same dollar amount that would be payable commencing at normal retirement age to an employee who had that same number of years of service at normal retirement age.

(iii) *Uniform subsidies.* Each subsidized optional form of benefit available under the plan must be currently available (within the meaning of § 1.401(a)(4)–4(b)(2)) to substantially all employees. Whether an optional form of benefit is considered subsidized for this purpose may be determined using any reasonable actuarial assumptions.

(iv) *No employee contributions.* The plan must not be a contributory DB plan.

(v) *Period of accrual.* Each employee's benefit must be accrued over the same years of service that are taken into account in applying the benefit formula under the plan to that employee. For this purpose, any year in which the employee benefits under the plan (within the meaning of § 1.410(b)–3(a)) is included as a year of service in which a benefit accrues. Thus, for example, a plan does not satisfy the safe harbor in paragraph (b)(4) of this section unless the plan uses the same years of service to determine both the normal retirement benefit under the plan's benefit formula and the fraction by which an employee's fractional rule benefit is multiplied to derive the employee's accrued benefit as of any plan year.

(vi) *Examples.* The following examples illustrate the rules in this paragraph (b)(2):

Example 1. Plan A provides a normal retirement benefit equal to two percent of average annual compensation times each year of service commencing at age 65 for all employees. Plan A provides that employees of Division S receive their benefit in the form of a straight life annuity and that employees of Division T receive their benefit in the form of a life annuity with an automatic cost-of-living increase. Plan A does not provide a uniform normal retirement benefit within the meaning of paragraph (b)(2)(i) of this section because the annual benefit is not payable in the same form to all employees.

Example 2. Plan B provides a normal retirement benefit equal to 1.5 percent of average annual compensation times each year of service at normal retirement age for all employees. The normal retirement age under the plan is the earlier of age 65 or the age at which the employee completes 10 years of service, but in no event earlier than age 62. Plan B does not provide a uniform normal retirement benefit within the meaning of paragraph (b)(2)(i) of this section because the same uniform normal retirement age does not apply to all employees.

Example 3. Plan C is an accumulation plan under which the benefit for each year of service equals one percent of plan year compensation payable in the same form to all employees commencing at the same uniform normal retirement age. Under paragraph (e)(2) of this section, an accumulation plan may substitute plan year compensation for average annual compensation. Plan C provides a uniform normal retirement benefit within the meaning of paragraph (b)(2)(i) of this section, because all employees with the same number of years of service at normal retirement age will receive an annual benefit that is treated as the same percentage of average annual compensation.

Example 4. The facts are the same as in *Example 3*, except that the benefit for each year of service equals one percent of plan year compensation increased by reference to the increase in the cost of living from the year of service to normal retirement age. Plan C does not provide a uniform normal retirement benefit, because the annual benefit defined by the benefit formula can vary for employees with the same number of years of service at normal retirement age, depending on the age at which those years of service were credited to the employee under the plan.

Example 5. Plan D provides a normal retirement benefit of 50 percent of average annual compensation at normal retirement age (age 65) for employees with 30 years of service at normal retirement age. Plan D provides that, in the case of an employee with less than 30 years of service at normal retirement age, the normal retirement benefit is reduced on a pro rata basis for each year of service less than 30. However, if an employee with less than 30 years of service at normal retirement age continues to work past normal retirement age, Plan D provides that the additional years of service worked past normal retirement age are taken into account for purposes of the 30 years of service requirement. Thus, an employee who has 26 years of service at age 65 but who does not retire until age 69 with 30 years of service will receive a benefit of 50 percent of average annual compensation. Plan D provides uniform post-normal retirement benefits within the meaning of paragraph (b)(2)(ii) of this section.

Example 6. (a) Plan E is amended on February 14, 1994, to provide an early retirement window benefit that consists of an unreduced early retirement benefit to employees who terminate employment after attainment of age 55 with 10 years of service and between June 1, 1994, and November 30, 1994. The early retirement window benefit is a single subsidized optional form of benefit. Paragraph (b)(2)(iii) of this section requires that the subsidized optional form of benefit be currently available (within the meaning of §1.401(a)(4)–4(b)(2)) to substantially all employees. Section 1.401(a)(4)–4(b)(2)(ii)(A)(*2*) provides that age and service requirements are not disregarded in determining the current availability of an optional form of benefit if those requirements must be satisfied within a specified period of time. Thus, the early retirement window benefit is not currently available to an employee unless the employee will satisfy the eligibility requirements for the early retirement window benefit by the close of the early retirement window benefit period. Plan E will fail to satisfy paragraph (b)(2)(iii) of this section unless substantially all of the employees satisfy the eligibility requirements for the early retirement window benefit by November 30, 1994. However, see §1.401(a)(4)–9(c)(6), *Example 2*, for an example of how a plan with an early retirement window benefit may be restructured into two component plans, each of which satisfies the safe harbors of this paragraph (b).

(b) A similar analysis would apply if, instead of an unreduced early retirement benefit, the early retirement window benefit consisted of a special schedule of early retirement factors, defined by starting with the plan's usual schedule and then treating each employee eligible for the early retirement window benefit as being five years older than the employee actually is, but not older than the employee's normal retirement age.

Example 7. Plan F generally provides a normal retirement benefit of 1.5 percent of an employee's average annual compensation multiplied by the employee's years of service with the employer. For employees transferred outside of the group of employees covered by the plan, the plan's benefit formula takes into account only years of service prior to the transfer, but determines average annual compensation taking into account section 414(s) compensation both before and after the transfer. Plan F does not satisfy the requirements of paragraph (b)(2)(v) of this section with respect to transferred employees, because their benefits are accrued over years of service (i.e., after transfer) that are not taken into account in applying the plan's benefit formula to them. However, see *Example 2* of paragraph (b)(6)(x)(B) of this section for an example of how a plan that continues to take transferred employees' section 414(s) compensation into account after their transfer may still satisfy this paragraph (b).

(3) *Safe harbor for unit credit plans*—(i) *General rule.* A plan satisfies the safe harbor in this paragraph (b)(3) for a plan year if it satisfies both of the following requirements:

(A) The plan must satisfy the 133⅓ percent accrual rule of section 411(b)(1)(B).

(B) Each employee's accrued benefit under the plan as of any plan year must be determined by applying the plan's benefit formula to the employee's years of service and (if applicable) average annual compensation, both determined as of that plan year.

(ii) *Example.* The following example illustrates the rules in this paragraph (b)(3):

Example. Plan A provides that the accrued benefit of each employee as of any plan year equals the employee's average annual compensation times a percentage that depends on the employee's years of service determined as of that plan year. The percentage is 2 percent for each of the first 10 years of service, plus 1.5 percent for each of the next 10 years of service, plus 2 percent for all additional years of service. Plan A satisfies this paragraph (b)(3).

(4) *Safe harbor for plans using fractional accrual rule*—(i) *General rule.* A plan satisfies the safe harbor in this paragraph (b)(4) for a plan year if it satisfies each of the following requirements:

(A) The plan must satisfy the fractional accrual rule of section 411(b)(1)(C).

(B) Each employee's accrued benefit under the plan as of any plan year before the employee reaches normal retirement age must be determined by multiplying the employee's fractional rule benefit (within the meaning of § 1.411(b)–1(b)(3)(ii)(A)) by a fraction, the numerator of which is the employee's years of service determined as of the plan year, and the denominator of which is the employee's projected years of service as of normal retirement age.

(C) The plan must satisfy one of the following requirements:

(*1*) Under the plan, it must be impossible for any employee to accrue in a plan year a portion of the normal retirement benefit described in paragraph (b)(2)(i) of this section that is more than one-third larger than the portion of the same benefit accrued in that or any other plan year by any other employee, when each portion of the benefit is expressed as a percentage of each employee's average annual compensation or as a dollar amount. In making this determination, actual and potential employees in the plan with any amount of service at normal retirement must be taken into account (other than employees with more than 33 years of service at normal retirement age). In addition, in the case of a plan that satisfies section 401(l) in form, an employee is treated as accruing benefits at a rate equal to the excess benefit percentage in the case of a defined benefit excess plan or at a rate equal to the gross benefit percentage in the case of an offset plan.

(*2*) The normal retirement benefit under the plan must be a flat benefit that requires a minimum of 25 years of service at normal retirement age for an employee to receive the unreduced flat benefit, determined without regard to section 415. For this purpose, a flat benefit is a benefit that is the same percentage of average annual compensation or the same dollar amount for all employees who have a minimum number of years of service at normal retirement age (e.g., 50 percent of average annual compensation), with a pro rata reduction in the flat benefit for employees who have less than the minimum number of years of service at normal retirement age. An employee is permitted to accrue the maximum benefit permitted under section 415 over a period of less than 25 years, provided that the flat benefit under the plan, determined without regard to section 415, can accrue over no less than 25 years.

(*3*) The plan must satisfy the requirements of paragraph (b)(4)(i)(C)(*2*) of this section (other than the requirement that the minimum number of years of service for receiving the unreduced flat benefit is at least 25 years), and, for the plan year, the average of the normal accrual rates for all nonhighly compensated nonexcludable employees must be at least 70 percent of the average of the normal accrual rates for all highly compensated nonexcludable employees. The averages in the preceding sentence are determined taking into account all nonexcludable employees (regardless of whether they benefit under the plan). In addition, contributions and benefits under other plans of the employer are disregarded. For purposes of this paragraph (b)(4)(i)(C)(*3*), normal accrual rates are determined under paragraph (d) of this section.

(ii) *Examples.* The following examples illustrate the rules in this paragraph (b)(4). In each example, it is assumed that the plan has never permitted employee contributions.

Example 1. Plan A provides a normal retirement benefit equal to 1.6 percent of average annual compensation times each year of service up to 25. Plan A further provides that an employee's accrued benefit as of any plan year equals the employee's fractional rule benefit multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year, and the denominator of which is the employee's projected years of service as of normal retirement age. The greatest benefit that an employee could accrue in any plan year is 1.6 percent of average annual compensation (this is the case for an employee with 25 or fewer years of projected service at normal retirement age). Among potential employees with 33 or fewer years of projected service at normal retirement age, the lowest benefit that an employee could accrue in any plan year is 1.212 percent of average annual compensation (this is the case for an employee with 33 years of projected service at normal retirement age). Plan A satisfies paragraph (b)(4)(i)(C)(*1*) of this section because 1.6 percent is not more than one third larger than 1.212 percent.

Example 2. Plan B provides a normal retirement benefit equal to 1.0 percent of average annual compensation up to the integration level, and 1.6 percent of average annual compensation above the integration level, times each year of service up to 35. Plan B further provides that an employee's accrued benefit as of any plan year equals the employee's fractional rule benefit multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year and the denominator of which is the employee's projected years of service as of normal retirement age. For purposes of satisfying the one third larger rule in paragraph (b)(4)(i)(C)(*1*) of this section, because Plan B satisfies section 401(l) in form, all employees with less than 35 projected years of service are assumed to accrue benefits at the rate of 1.6 percent of average annual compensation (the excess benefit percentage under the plan). Plan B satisfies paragraph (b)(4)(i)(C) of this section because all employees with 33 or fewer years of projected service at normal retirement age accrue in each plan year a benefit of 1.6 percent of average annual compensation.

Example 3. Plan C provides a normal retirement benefit equal to four percent of average annual compensation times each year of service up to 10 and one percent of average annual compensation times each year of service in excess of 10 and not in excess of 30. Plan C further provides that an employee's accrued benefit as of any plan year equals the employee's fractional rule benefit multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year, and the denominator of which is the employee's projected years of service as of normal retirement age. The greatest benefit that an employee could accrue in any plan year is four percent of average annual compensation (this is the case for an employee with 10 or fewer years of projected service at normal retirement age). Among employees with 33 or fewer years of projected service at normal retirement age, the lowest benefit that an employee could accrue in a plan year is 1.82 percent of average annual compensation (this is the case of an employee with 33 years of projected service at normal retirement age). Plan C fails to satisfy this paragraph (b)(4) because four percent is more than one third larger than 1.82 percent. See also §1.401(a)(4)–9(c)(6), *Example 3.*

Example 4. Plan D provides a normal retirement benefit of 100 percent of average annual compensation, reduced by four percentage points for each year of service below 25 the employee has at normal retirement age. Plan D further provides that an employee's accrued benefit as of any plan year is equal to the employee's fractional rule benefit multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year, and the denominator of which is the employee's projected years of service at normal retirement age. In the case of an employee who has five years of service as of the current plan year, and who is projected to have 10 years of service at normal retirement age, the employee's fractional rule benefit would be 40 percent of average annual compensation, and the employee's accrued benefit as of the current plan year would be 20 percent of average annual compensation (the fractional rule benefit multiplied by a fraction of five years over 10 years). Plan D satisfies this paragraph (b)(4).

Example 5. The facts are the same as in *Example 4*, except that the normal retirement benefit is 125 percent of average annual compensation, reduced by five percentage points for each year of service below 25 that the employee has at normal retirement age. Plan D satisfies this paragraph (b)(4), even though an employee may accrue the maximum benefit allowed under section 415 (i.e., 100 percent of the participant's average compensation for the high three years of service) in less than 25 years.

Example 6. The facts are the same as in *Example 1*, except that the plan determines each employee's accrued benefit by multiplying the employee's projected normal retirement benefit (rather than the fractional rule benefit) by the fraction described in *Example 1*. In determining an employee's projected normal retirement benefit, the plan defines each employee's average annual compensation as the average annual compensation the employee would have at normal retirement age if the employee's annual section 414(s) compensation in future plan years equaled the employee's plan year compensation for the prior plan year. Under these facts, Plan A does not satisfy paragraph (b)(4)(i)(B) of this section because the employee's accrued benefit is determined on the basis of a projected normal retirement benefit that is not the same as the employee's fractional rule benefit determined in accordance with § 1.411(b)–1(b)(3)(ii)(A).

Example 7. Plan E provides a normal retirement benefit of 50 percent of average annual compensation, with a pro rata reduction for employees with less than 30 years of service at normal retirement age. Plan E further provides that an employee's accrued benefit as of any plan year is equal to the employee's fractional rule benefit multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year, and the denominator of which is the employee's projected years of service at normal retirement age. For purposes of determining this fraction, the plan limits the years of service taken into account for an employee to the number of years the employee has participated in the plan. However, all years of service (including years of service before the employee commenced participation in the plan) are taken into account in determining an employee's normal retirement benefit under the plan's benefit formula. Plan E fails to satisfy this paragraph (b)(4) because the years of service over which benefits accrue differ from the years of service used in applying the benefit formula under the plan. See paragraph (b)(2)(v) of this section.

Example 8. (a) Plan F provides a normal retirement benefit equal to 2.0 percent of average annual compensation, plus 0.65 percent of average annual compensation above covered compensation, for each year of service up to 25. Plan F further provides that an employee's accrued benefit as of any plan year equals the sum of—

(1) The employee's fractional rule benefit (determined as if the normal retirement benefit under the plan equaled 2.0 percent of average annual compensation for each year of service up to 25) multiplied by a fraction, the numerator of which is the employee's years of service as of the plan year and the denominator of which is the employee's projected years of service as of normal retirement age; plus

(2) 0.65 percent of the employee's average annual compensation above covered compensation multiplied by the employee's years of service (up to 25) as of the current plan year.

(b) Although Plan F satisfies the fractional accrual rule of section 411(b)(1)(C), the plan fails to satisfy this paragraph (b)(4) because the plan does not determine employees' accrued benefits in accordance with paragraph (b)(4)(i)(B) of this section.

(5) *Safe harbor for insurance contract plans.* A plan satisfies the safe harbor in this paragraph (b)(5) if it satisfies each of the following requirements:

(i) The plan must satisfy the accrual rule of section 411(b)(1)(F).

(ii) The plan must be an insurance contract plan within the meaning of section 412(i).

(iii) The benefit formula under the plan must be one that would satisfy the requirements of paragraph (b)(4) of this section if the stated normal retirement benefit under the formula accrued ratably over each employee's period of plan participation through normal retirement age in accordance with paragraph (b)(4)(i)(B) of this section. Thus, the benefit formula may not recognize years of service before an employee commenced participation in the plan because, otherwise, the definition of years of service for determining the normal retirement benefit would differ from the definition of years of service for determining the accrued benefit under paragraph (b)(4)(i)(B) of this section. See paragraph (b)(4)(ii), *Example 7,* of this section. Notwithstanding the foregoing, an insurance contract plan adopted and in effect on September 19, 1991, may continue to recognize years of service prior to an employee's participation in the plan for an employee who is a participant in the plan on that date to the extent provided by the benefit formula in the plan on such date.

(iv) The scheduled premium payments under an individual or group insurance contract used to fund an employee's normal retirement benefit must be level annual payments to normal retirement age. Thus, payments may not be scheduled to cease before normal retirement age.

(v) The premium payments for an employee who continues benefiting after normal retirement age must be equal to the amount necessary to fund additional benefits that accrue under the plan's benefit formula for the plan year.

(vi) Experience gains, dividends, forfeitures, and similar items must be used solely to reduce future premiums.

(vii) All benefits must be funded through contracts of the same series. Among other requirements, contracts of the same series must have cash values based on the same terms (including interest and mortality assumptions) and the same conversion rights. A plan does not fail to satisfy this requirement, however, if any change in the contract series or insurer applies on the same terms to all employees. But see §1.401(a)(4)–5(a)(4), *Example 12* (change in insurer considered a plan amendment subject to §1.401(a)(4)–5(a)).

(viii) If permitted disparity is taken into account, the normal retirement benefit stated under the plan's benefit formula must satisfy §1.401(l)–3. For this purpose, the 0.75-percent factor in the maximum excess or offset allowance in §1.401(l)–3(b)(2)(i) or (b)(3)(i), respectively, adjusted in accordance with §1.401(l)–3(d)(9) and (e), is reduced by multiplying the factor by 0.80.

(6) *Use of safe harbors not precluded by certain plan provisions*—(i) *In general.* A plan does not fail to satisfy this paragraph (b) merely because the plan contains one or more of the provisions described in this paragraph (b)(6). Unless otherwise provided, any such provision must apply uniformly to all employees.

(ii) *Section 401(l) permitted disparity.* The plan takes permitted disparity into account in a manner that satisfies section 401(l) in form. Thus, differences in employees' benefits under the plan attributable to uniform disparities permitted under §1.401(l)–3 (including differences in disparities that are deemed uniform under §1.401(l)–3(c)(2)) do not cause a plan to fail to satisfy this paragraph (b).

(iii) *Different entry dates.* The plan provides one or more entry dates during the plan year as permitted by section 410(a)(4).

(iv) *Certain conditions on accruals.* The plan provides that an employee's accrual for the plan year is less than a full accrual (including a zero accrual) because of a plan provision permitted by the year-of-participation rules of section 411(b)(4).

(v) *Certain limits on accruals.* The plan limits benefits otherwise provided under the benefit formula or accrual method to a maximum dollar amount or to a maximum percentage of average annual compensation (e.g., by limiting service taken into account in the benefit formula) or in accordance with section 401(a)(5)(D), applies the limits of section 415, or limits the dollar amount of compensation taken into account in determining benefits.

(vi) *Dollar accrual per uniform unit of service.* The plan determines accruals based on the same dollar amount for each uniform unit of service (not to exceed one week) performed by each employee with the same number of years of service under the plan during the plan year. The preceding sentence applies solely for purposes of the unit credit safe harbor in paragraph (b)(3) of this section.

(vii) *Prior benefits accrued under a different formula.* The plan determines benefits for years of service after a fresh-start date for all employees under a benefit formula and accrual method that differ from the benefit formula and accrual method previously used to determine benefit accruals for employees in a fresh-start group for years of service before the fresh-start date. This paragraph (b)(6)(vii) applies solely to plans that satisfy § 1.401(a)(4)–13(c) with respect to the fresh start.

(viii) *Employee contributions.* The plan is a contributory DB plan that would satisfy the requirements of paragraph (b) of this section if the plan's benefit formula provided benefits at employees' employer-provided benefit rates determined under § 1.401(a)(4)–6(b). This paragraph (b)(6)(viii) does not apply to a plan tested under paragraph (b)(4) or (b)(5) of this section unless the plan satisfies one of the methods in § 1.401(a)(4)–6 (b)(4) through (b)(6). A minimum benefit added to the plan solely to satisfy § 1.401(a)(4)–6(b)(3) is not taken into account in determining whether this paragraph (b)(6)(viii) is satisfied.

(ix) *Certain subsidized optional forms.* The plan provides a subsidized optional form of benefit that is available to fewer than substantially all employees because the optional form of benefit has been eliminated prospectively as provided in § 1.401(a)(4)–4(b)(3).

(x) *Lower benefits for HCEs*—(A) *General rule.* The benefits (including any subsidized optional form of benefit) provided to one or more HCEs under the plan are inherently less valuable to those HCEs (determined by applying the principles of § 1.401(a)(4)–4(d)(4)) than the benefits that would otherwise be provided to those HCEs if the plan satisfied this paragraph (b) (determined without regard to this paragraph (b)(6)(x)). These inherently less valuable benefits are deemed to satisfy this paragraph (b).

(B) *Examples.* The following examples illustrate the rules in this paragraph (b)(6)(x):

Example 1. Plan A would satisfy this paragraph (b) (determined without regard to this paragraph (b)(6)(x)), except for the fact that it fails to satisfy the requirement of paragraph (b)(2)(iii) of this section (i.e., a subsidized optional form must be available to substantially all employees on similar terms). Each subsidized optional form in the plan is available to all the NHCEs on similar terms, but one of the subsidized optional forms of benefit is not available to any of the HCEs. Plan A satisfies this paragraph (b), because Plan A is a safe harbor plan with respect to the NHCEs and provides inherently less valuable benefits to the HCEs.

Example 2. (a) Plan B would satisfy this paragraph (b) (determined without regard to this paragraph (b)(6)(x)), except for the fact that some employees are not being credited with years of service under the plan, but are continuing to accrue benefits as a result of compensation increases. These are employees who have been transferred from the employer that sponsors Plan B to another member of the controlled group whose employees are not covered by Plan B. For these employees, Plan B fails to satisfy the requirement of paragraph (b)(2)(v) of this section (i.e., each employee's benefit must accrue over the same years of service used in applying the benefit formula).

(b) Plan B is restructured into two component plans under the provisions of § 1.401(a)(4)–9(c). One component plan (Component Plan B1) consists of all NHCEs who are not being credited with years of service under the plan's benefit formula but are continuing to accrue benefits as a result of compensation increases, and the other component plan (Component Plan B2) consists of the balance of the employees.

(c) Component Plan B1 satisfies this section and section 410(b), because it benefits only NHCEs.

(d) Component Plan B2 is treated as satisfying this paragraph (b), because Plan B would satisfy this paragraph (b) (determined without regard to this paragraph (b)(6)(x)) with respect to the employees in Component Plan B2 but for the fact that it provides inherently less valuable benefits to some HCEs in that component plan (i.e., the employees who are credited only with compensation increases rather than both years of service and compensation increases).

(e) Under § 1.401(a)(4)–9(c), if Component Plan B2 satisfies section 410(b), then Plan B satisfies this section.

(xi) *Multiple formulas*—(A) *General rule.* The plan provides that an employee's benefit under the plan is the greater of the benefits determined under two or more formulas, or is the sum of the benefits determined under two or more formulas. This paragraph (b)(6)(xi) does not apply to a plan unless each of the formulas under the plan satisfies the requirements of paragraph (b)(6)(xi) (B) through (D) of this section.

(B) *Sole formulas.* The formulas must be the only formulas under the plan.

(C) *Separate testing.* Each of the formulas must separately satisfy the uniformity requirements of paragraph (b)(2) of this section and also separately satisfy one of the safe harbors in paragraphs (b)(3) through (b)(5) of this section. A formula that is available solely to some or all NHCEs is deemed to satisfy this paragraph (b)(6)(xi)(C).

(D) *Availability*—(*1*) *General rule.* All of the formulas must be available on the same terms to all employees.

(*2*) *Formulas for NHCEs.* A formula does not fail to be available on the same terms to all employees merely because the formula is not available to any HCEs, but is available to some or all NHCEs on the same terms as all of the other formulas in the plan.

(*3*) *Top-heavy formulas.* Rules parallel to those in §1.401(a)(4)–2(b)(4)(vi)(D)(*3*) apply in the case of a plan that provides the greater of the benefits under two or more formulas, one of which is a top-heavy formula. For purposes of this paragraph (b)(6)(xi)(D)(*3*), a top-heavy formula is a formula that provides a benefit equal to the minimum benefit described in section 416(c)(1) (taking into account, if applicable, the modification in section 416(h)(2)(A)(ii)(I)).

(E) *Provisions may be applied more than once.* The provisions of this paragraph (b)(6)(xi) may be applied more than once. See §1.401(a)(4)–2(b)(4)(vi)(E) for an example of the application of these provisions more than once.

(F) *Examples.* The following examples illustrate the rules in this paragraph (b)(6)(xi):

Example 1. Under Plan A, each employee's benefit equals the sum of the benefits determined under two formulas. The first formula provides one percent of average annual compensation per year of service. The second formula provides $10 per year of service. Plan A is eligible to apply the rules in this paragraph (b)(6)(xi).

Example 2. Under Plan B, each employee's benefit equals the greater of the benefits determined under two formulas. The first formula provides $15 per year of service and is available to all employees who complete at least 500 hours of service during the plan year. The second formula provides 1.5 percent of average annual compensation per year of service and is available to all employees who complete at least 1,000 hours of service during the plan year. Plan B does not satisfy this paragraph (b)(6)(xi) because the two formulas are not available on the same terms to all employees.

Example 3. Under Plan C, each employee's benefit equals the greater of the benefits determined under two formulas. The first formula provides $15 per year of service and is available to all employees who complete at least 1,000 hours of service during the plan year. The second formula provides the minimum benefit described in section 416(c)(1) and is available to all non-key employees who complete at least 1,000 hours of service during the plan year. Plan C does not satisfy the general rule in paragraph (b)(6)(xi)(D)(*1*) of this section because the two formulas are not available on the same terms to all employees (i.e., the second formula is only available to all non-key employees). Nonetheless, because the second formula is a top-heavy formula, the special availability rules for top-heavy formulas in paragraph (b)(6)(xi)(D)(*3*) of this section apply. Thus, the second formula does not fail to be available on the same terms as the first formula merely because the second formula is available solely to all non-key employees on the same terms. This is true even if the plan conditions the availability of the second formula on the plan's being top-heavy for the plan year.

Example 4. Under Plan D, each employee's benefit equals the greater of the benefits determined under two formulas. The first formula is available to all employees and provides a benefit equal to 1.5 percent of average annual compensation per year of service. The second formula is only available to NHCEs and provides a benefit equal to two percent of average annual compensation per year of service, minus two percent of the primary insurance amount per year of service. The amount of the offset is not limited to the maximum permitted offset under §1.401(l)–3(b). Under paragraph (b)(6)(xi)(D)(*2*) of this section, both formulas are treated as available to all employees on the same terms. Furthermore, even though the second formula does not satisfy any of the safe harbors in this paragraph (b), the formula is deemed to satisfy the separate testing requirement under paragraph (b)(6)(xi)(C) of this section, because the formula is available solely to some or all NHCEs.

Example 5. Plan E is a unit credit plan that provides a benefit of one percent of average annual compensation per year of service to all employees. In 1994, the plan is amended to provide a benefit of two percent of average annual compensation per year of service after 1993, while continuing to provide a benefit of one percent of average annual compensation per year of service for all years of service before 1994. Thus, the plan's amended benefit formula provides a benefit equal to the sum of the benefits determined under two benefit formulas: one percent of average annual compensation per year of service, plus one percent of average annual compensation per year of service after 1993. Plan E satisfies this paragraph (b)(6)(xi).

Example 6. The facts are the same as in *Example 5*, except that the plan amendment in 1994 decreases the benefit to 0.75 percent of average annual compensation per year of service after 1993, while retaining the one-percent formula for all years of service before 1994. Thus, the plan's amended benefit formula provides a benefit equal to the sum of the benefits determined under two benefit formulas: 0.75 percent of average annual compensation per year of service, plus 0.25 percent of average annual compensation per year of service before 1994. Under these facts, the second formula does not separately satisfy any of the safe harbors in this paragraph (b) because the years of service over which each employee's benefit accrues under the second formula (i.e., all years of service) are not the same years of service that are taken into account in applying the benefit formula under the plan to that employee (i.e., years of service before 1994). See paragraph (b)(2)(v) of this section. But see paragraph (b)(6)(vii) of this section and § 1.401(a)(4)–13, which provide rules under which Plan E, as amended, may be able to satisfy this paragraph (b).

Example 7. Plan F provides a benefit to all employees of one percent of average annual compensation per year of service. Employee M was hired as the president of the employer in December 1994 and was not a HCE under section 414(q) during the 1994 calendar plan year. In 1994, Plan F is amended to provide a benefit that is the greater of the benefit determined under the pre-existing formula in the plan and a new formula that is available solely to some NHCEs (including Employee M). The new formula does not satisfy the uniformity requirements of paragraph (b)(2) of this section, because it provides a different benefit for some NHCEs than for other NHCEs. As a result of this change, Employee M receives a higher accrual in 1994 than the NHCEs who are not eligible for the new formula. In 1995, when Employee M first becomes a HCE, the second formula no longer applies to Employee M. It would be inconsistent with the purpose of preventing discrimination in favor of HCEs for Plan F to use the special rule for a formula that is available solely to some or all NHCEs to satisfy the separate testing requirement of paragraph (b)(6)(xi)(C) of this section for the 1994 calendar plan year. See § 1.401(a)(4)–1(c)(2).

(c) *General test for nondiscrimination in amount of benefits*—(1) *General rule.* The employer-provided benefits under a defined benefit plan are nondiscriminatory in amount for a plan year if each rate group under the plan satisfies section 410(b). For purposes of this paragraph (c)(1), a rate group exists under a plan for each HCE and consists of the HCE and all other employees (both HCEs and NHCEs) who have a normal accrual rate greater than or equal to the HCE's normal accrual rate, and who also have a most valuable accrual rate greater than or equal to the HCE's most valuable accrual rate. Thus, an employee is in the rate group for each HCE who has a normal accrual rate less than or equal to the employee's normal accrual rate, and who also has a most valuable accrual rate less than or equal to the employee's most valuable accrual rate.

(2) *Satisfaction of section 410(b) by a rate group.* For purposes of determining whether a rate group satisfies section 410(b), the same rules apply as in § 1.401(a)(4)–2(c)(3). See paragraph (c)(4) of this section and § 1.401(a)(4)–2(c)(4), *Example 3* through *Example 5,* for examples of this rule.

(3) *Certain violations disregarded.* A plan is deemed to satisfy paragraph (c)(1) of this section if the plan would satisfy that paragraph by treating as not benefiting no more than five percent of the HCEs in the plan, and the Commissioner determines that, on the basis of all of the relevant facts and circumstances, the plan does not discriminate with respect to the amount of employer-provided benefits. For this purpose, five percent of the number of HCEs may be determined by rounding to the nearest whole number (e.g., 1.4 rounds to 1 and 1.5 rounds to 2). Among the relevant factors that the Commissioner may consider in making this determination are—

(i) The extent to which the plan has failed the test in paragraph (c)(1) of this section;

(ii) The extent to which the failure is for reasons other than the design of the plan;

(iii) Whether the HCEs causing the failure are five-percent owners or are among the highest paid nonexcludable employees;

(iv) Whether the failure is attributable to an event that is not expected to recur (e.g., a plant closing); and

(v) The extent to which the failure is attributable to benefits accrued under a prior benefit structure or to benefits accrued when a participant was not a HCE.

(4) *Examples.* The following examples illustrate the rules in this paragraph (c):

Example 1. (a) Employer X has 1100 nonexcludable employees, N1 through N1000, who are NHCEs, and H1 through H100, who are HCEs. Employer X maintains Plan A, a defined benefit plan that benefits all of these nonexcludable employees. The normal and most valuable accrual rates (determined as a percentage of average annual compensation) for the employees in Plan A for the 1994 plan year are listed in the following table.

Employee	Normal accrual rate	Most valuable accrual rate
N1 through N100	1.0	1.4
N101 through N500	1.5	3.0
N501 through N750	2.0	2.65
N751 through N1000	2.3	2.8
H1 through H50	1.5	2.0
H51 through H100	2.0	2.65

(b) There are 100 rate groups in Plan A because there are 100 HCEs in Plan A.

(c) Rate group 1 consists of H1 and all those employees who have a normal accrual rate greater than or equal to H1's normal accrual rate (1.5 percent) and who also have a most valuable accrual rate greater than or equal to H1's most valuable accrual rate (2.0 percent). Thus, rate group 1 consists of H1 through H100 and N101 through N1000.

(d) Rate group 1 satisfies the ratio percentage test of §1.410(b)–2(b)(2) because the ratio percentage of the rate group is 90 percent, i.e., 90 percent (the percentage of all nonhighly compensated nonexcludable employees who are in the rate group) divided by 100 percent (the percentage of all highly compensated nonexcludable employees who are in the rate group).

(e) Because H1 through H50 have the same normal accrual rates and the same most valuable accrual rates, the rate group with respect to each of them is identical. Thus, because rate group 1 satisfies section 410(b), rate groups 2 through 50 also satisfy section 410(b).

(f) Rate group 51 consists of H51 and all those employees who have a normal accrual rate greater than or equal to H51's normal accrual rate (2.0 percent) and who also have a most valuable accrual rate greater than or equal to H51's most valuable accrual rate (2.65 percent). Thus, rate group 51 consists of H51 through H100 and N501 through N1000. (Even though N101 through N500 have a most valuable accrual rate (3.0 percent) greater than H51's most valuable accrual rate (2.65 percent), they are not included in this rate group because their normal accrual rate (1.5 percent) is less than H51's normal accrual rate (2.0 percent).)

(g) Rate group 51 satisfies the ratio percentage test of §1.410(b)–2(b)(2) because the ratio percentage of the rate group is 100 percent, i.e., 50 percent (the percentage of all nonhighly compensated nonexcludable employees who are in the rate group) divided by 50 percent (the percentage of all highly compensated nonexcludable employees who are in the rate group).

(h) Because H51 through H100 have the same normal accrual rates and the same most valuable accrual rates, the rate group with respect to each of them is identical. Thus, because rate group 51 satisfies section 410(b), rate groups 52 through 100 also satisfy section 410(b).

(i) The employer-provided benefits under Plan A are nondiscriminatory in amount because each rate group under the plan satisfies section 410(b).

Example 2. The facts are the same as in *Example 1*, except that H96 has a most valuable accrual rate of 3.5. Each of the rate groups is the same as in *Example 1*, except that rate group 96 consists solely of H96 because no other employee has a most valuable accrual rate greater than 3.5. Because the plan would satisfy the test in paragraph (c)(1) of this section by treating H96 (who constitutes less than five percent of the HCEs in the plan) as not benefiting, the Commissioner may determine under paragraph (c)(3) of this section that, on the basis of all of the relevant facts and circumstances, the plan does not discriminate with respect to the amount of benefits.

(d) *Determination of accrual rates*—(1) *Definitions*—(i) *Normal accrual rate.* The normal accrual rate for an employee for a plan year is the increase in the employee's accrued benefit (within the meaning of section 411(a)(7)(A)(i)) during the measurement period, divided by the employee's testing service during the measurement period, and expressed either as a dollar amount or as a percentage of the employee's average annual compensation.

(ii) *Most valuable accrual rate.* The most valuable accrual rate for an employee for a plan year is the increase in the employee's most valuable optional form of payment of the accrued benefit during the measurement period, divided by the employee's testing service during the measurement period, and expressed either as a dollar amount or as a percentage of the employee's average annual compensation. The employee's most valuable optional form of payment of the accrued benefit is determined by calculating for the employee the normalized QJSA associated with the accrued benefit that is potentially payable in the current or any future plan year at any age under the plan and selecting the largest (per year of testing service). If the plan provides a QSUPP, the most valuable accrual rate also takes into account the QSUPP payable in conjunction with the QJSA at each age under the plan. Thus, the most valuable accrual rate reflects the value of all benefits accrued or treated as accrued under section 411(d)(6) that are payable in any form and at any time under the plan, including early retirement benefits, retirement-type subsidies, early retirement window benefits, and QSUPPs. In addition, the most valuable accrual rate must take into account any such benefits that are available during a plan year, even if the benefits cease to be available before the end of the current or any future plan year.

(iii) *Measurement period.* The measurement period can be—

(A) The current plan year;

(B) The current plan year and all prior years; or

(C) The current plan year and all prior and future years.

(iv) *Testing service*—(A) *General rule.* Testing service means an employee's years of service as defined in the plan for purposes of applying the benefit formula under the plan, subject to the requirements of paragraph (d)(1)(iv)(B) of this section. Alternatively, testing service means service determined for all employees in a reasonable manner that satisfies the requirements of paragraph (d)(1)(iv)(B) of this section. For example, the number of plan years that an employee has benefited under the plan within the meaning of §1.410(b)–3(a) is an acceptable definition of testing service because it determines service in a reasonable manner and satisfies paragraph (d)(1)(iv)(B) of this section. See also §1.401(a)(4)–11(d)(3) (additional limits on service that may be taken into account as testing service).

(B) *Requirements for testing service*—(*1*) *Employees not credited with years of service under the benefit formula.* An employee must be credited with testing service for any year in which the employee benefits under the plan (within the meaning of §1.410(b)–3(a)), unless that year is part of a period of service that may not be taken into account under §1.401(a)(4)–11(d)(3). This rule applies even if the employee does not receive service credit under the benefit formula for that year (e.g., because of a service cap in the benefit formula or because of a transfer out of the group of employees covered by the plan).

(*2*) *Current year testing service.* In the case of a measurement period that is the current plan year, testing service for the plan year equals one (1).

(2) *Rules of application*—(i) *Consistency requirement.* Both normal and most valuable accrual rates must be determined in a consistent manner for all employees for the plan year. Thus, for example, the same measurement periods must be used, and the rules of this paragraph (d)(2) and any available options described in paragraph (d)(3) of this section must be applied consistently. If plan benefits are not expressed as straight life annuities beginning at employees' testing ages, they must be normalized.

(ii) *Determining plan benefits, service and compensation*—(A) *In general.* Potential plan benefits, testing service, and average annual compensation must be determined in a reasonable manner, reflecting actual or projected service and compensation only through the end of the measurement period. The determination of potential plan benefits is not reasonable if it incorporates an assumption that, in future years, an employee's compensation will increase or the employee will terminate employment before the employee's testing age (other than the assumptions under paragraph (d)(1)(ii) of this section that the employee's service will end in connection with the payment of each potential QJSA in future years).

(B) Section 415 limits. For purposes of determining accrual rates under this paragraph (d), plan benefits are generally determined without regard to whether those benefits are permitted to be paid under section 415. However, plan provisions implementing any of the limits of section 415 may be taken into account in applying this paragraph (d) if the plan does not provide for benefit increases resulting from section 415(d)(1) adjustments for former employees who were employees in a plan year in which such plan provisions were taken into account in applying this paragraph (d). If the limits of section 415 are taken into account under this paragraph (d)(2)(ii)(B) as of the end of the measurement period, they must also be taken into account as of the beginning of the measurement period. If the limits of section 415 are not taken into account in testing the plan for the current plan year, but were taken into account in testing the plan for the preceding plan year, any resulting increase in the accrued benefits taken into account in testing the plan is treated as an increase in accrued benefits during the current plan year.

(iii) *Requirements for measurement period that includes future years*—(A) *Discriminatory pattern of accruals.* A measurement period that includes future years (as described in paragraph (d)(1)(iii)(C) of this section) may not be used if the pattern of accruals under the plan discriminates in favor of HCEs (i.e., if projected benefits for HCEs are relatively frontloaded when compared to the degree of front loading or backloading for NHCEs). This determination is made based on all of the relevant facts and circumstances.

(B) *Future-period limitation.* Future years beginning after an employee's attainment of the employee's testing age (or after the employee's assumed termination in the case of most valuable accrual rates) may not be included in the measurement period.

(3) *Optional rules*—(i) *Imputation of permitted disparity.* The disparity permitted under section 401(l) may be imputed in accordance with the rules of §1.401(a)(4)–7.

(ii) *Grouping of accrual rates*—(A) *General rule.* An employer may treat all employees who have accrual rates within a specified range above and below a midpoint rate chosen by the employer as having an accrual rate equal to the midpoint rate within that range. Accrual rates within a given range may not be grouped under this paragraph (d)(3)(ii) if the accrual rates of HCEs within the range generally are significantly higher than the accrual rates of NHCEs in the range. The specified ranges within which all employees are treated as having the same accrual rate may not overlap and may be no larger than provided in paragraph (d)(3)(ii)(B) of this section. Accrual rates of employees that are not within any of these specified ranges are determined without regard to this paragraph (d)(3)(ii).

(B) *Size of specified ranges.* In the case of normal accrual rates, the lowest and highest accrual rates in the range must be within five percent (not five percentage points) of the midpoint rate. In the case of most valuable accrual rates, the lowest and highest accrual rates in the range must be within 15 percent (not 15 percentage points) of the midpoint rate. If accrual rates are determined as a percentage of average annual compensation, the lowest and highest accrual rates need not be within five percent (or 15 percent) of the midpoint rate, if they are no more than one twentieth of a percentage point above or below the midpoint rate.

(iii) *Fresh-start alternative*—(A) *General rule.* Notwithstanding the definition of measurement period provided in paragraph (d)(1)(iii) of this section, a measurement period for a fresh-start group is permitted to be limited to the period beginning after the fresh-start date with respect to that group if the plan makes a fresh start that satisfies §1.401(a)(4)–13(c) (without regard to §1.401(a)(4)–13(c)(2)(i) and (ii)). If the measurement period is so limited or the measurement period is the plan year (whether or not so limited), any compensation adjustments during the measurement period to the frozen accrued benefit as of the fresh-start date that are permitted under the rules of §1.401(a)(4)–13(d) may be disregarded in determining the increase in accrued benefits during the measurement period, but only if—

(*1*) The plan makes a fresh start as of the fresh-start date that satisfies §1.401(a)(4)–13(c) (without regard to §1.401(a)(4)–13(c)(2)(ii)) in conjunction with a bona fide amendment to the benefit formula or accrual method under the plan; and

(*2*) The amendment provides for adjustments to employees' frozen accrued benefits as of the fresh-start date in accordance with the rules of §1.401(a)(4)–13(d).

(B) *Application of consistency requirements.* Limiting the application of the fresh-start alternative in this paragraph (d)(3)(iii) to a fresh-start group that consists of fewer than all employees does not violate the consistency requirement of paragraph (d)(2)(i) of this section.

(iv) *Floor on most valuable accrual rate.* In lieu of determining an employee's most valuable accrual rate in accordance with the definition in paragraph (d)(1)(ii) of this section, an employer may determine an employee's most valuable accrual rate for the current plan year as the employee's highest most valuable accrual rate determined for any prior plan year. This option may be used only if the employee's normal accrual rate has not changed significantly from the normal accrual rate for the relevant prior plan year and, there have been no plan amendments in the interim period since that prior plan year that affect the determination of most valuable accrual rates.

(4) *Examples.* The following examples illustrate the rules in this paragraph (d):

Example 1. The employees in Plan A have the following normal accrual rates (expressed as percentage of average annual compensation): 0.8 percent, 0.83 percent, 0.9 percent, 1.9 percent, 2.0 percent, and 2.1 percent. Because the first three rates are within a range of no more than one twentieth of a percentage point above or below 0.85 percent (a midpoint rate chosen by the employer), the employer may treat the employees who have those rates as having an accrual rate of 0.85 percent (provided that the accrual rates of HCEs within the range are not significantly higher than the accrual rates for NHCEs within the range). Because the last three rates are within a range of no more than five percent above or below 2.0 percent (a midpoint rate chosen by the employer), the employer may treat the employees who have those rates as having an accrual rate of 2.0 percent (provided that the accrual rates of HCEs within the range are not significantly higher than the accrual rates for NHCEs within the range).

Example 2. Employer X maintains a plan under which headquarters employees accrue a benefit of 1.25 percent of average compensation for the first 10 years of service and 0.75 percent of average compensation for subsequent years of service, while all other employees accrue a benefit of one percent of compensation for all years of service. Assume that the group of headquarters employees does not satisfy section 410(b). Under these facts, the pattern of accruals under the plan discriminates in favor of HCEs, and, therefore, under paragraph (d)(2)(iii)(A) of this section, the measurement period for determining accrual rates under the plan may not include future service.

(e) *Compensation rules*—(1) *In general.* This paragraph (e) provides rules for determining average annual compensation. Safe harbor plans that satisfy paragraph (b) of this section must determine benefits either as a dollar amount unrelated to employees' compensation or as a percentage of each employee's average annual compensation. In contrast, plans that must satisfy the general test of paragraph (c) of this section are not required under this section to determine benefits under any particular definition of compensation or in any particular manner, but the accrual rates used in testing these plans must be expressed either as a dollar amount or determined as a percentage of each employee's average annual compensation.

(2) *Average annual compensation*—(i) *General rule.* An employee's average annual compensation is the average of the employee's annual section 414(s) compensation determined over the averaging period in the employee's compensation history during which the average of the employee's annual section 414(s) compensation is the highest. For this purpose, an averaging period must consist of three or more consecutive 12-month periods, but need not be longer than the employee's period of employment. An employee's compensation history may begin at any time, but must be continuous, be no shorter than the averaging period, and end in the current plan year.

(ii) *Certain permitted modifications to average annual compensation*—(A) *Use of plan year compensation.* If the measurement period for determination of accrual rates is the current plan year, or the plan is an accumulation plan that satisfies paragraph (b) of this section, then plan year compensation may be substituted for average annual compensation.

(B) *Drop-out years.* Any of the following types of 12-month periods in an employee's compensation history may be disregarded in determining the employee's average annual compensation (including for purposes of the requirement to average section 414(s) compensation over consecutive 12-month periods), but only if the plan disregards the employee's compensation for those periods in determining benefits—

(*1*) The 12-month period in which the employee terminates employment;

(*2*) All 12-month periods in which the employee performs no services; or

(*3*) All 12-month periods in which the employee performs services for less than a specified number of hours or specified period of time in the 12-month period. The specified number of hours or specified period of time may be selected by the employer, but may not exceed three quarters of the time that an employee in the same job category working on a full-time basis would perform services during that 12-month period.

(C) *Drop-out months within 12-month periods.* If a plan determines an employee's average annual compensation using 12-month periods that do not end on a fixed date (e.g., average annual compensation as of a date is defined as the average of the employee's section 414(s) compensation for the 60 consecutive months within the compensation history in which the average is highest), then, for purposes of determining a 12-month period, any of the following type of months may be disregarded (including for purposes of the requirement to average section 414(s) compensation over consecutive 12-month periods), but only if the plan disregards the employee's compensation for those months in determining benefits—

(*1*) The month in which the employee terminates employment;

(*2*) All months in which the employee performs no services; or

(*3*) All months in which the employee performs services for less than a specified number of hours or specified period of time in the month. The specified number of hours or specified period of time may be selected by the employer, but may not exceed three quarters of the time that an employee in the same job category working on a full-time basis would perform services during that month.

(D) *Employees working less than full-time.* In the case of an employee who normally works less than full-time, the rules in paragraphs (e)(2)(ii)(B)(*3*) and (e)(2)(ii)(C)(*3*) of this section may be applied in relation to that employee's normal work schedule (instead of a full- time employee's work schedule) by prorating the specified number of hours or specified period of time, based on the employee's normal work schedule as a fraction of a full-time schedule.

(E) *Exception from consecutive-periods requirement for certain plans.* The requirement that the periods taken into account under paragraph (e)(2)(i) of this section be consecutive does not apply in the case of a plan that is not a section 401(l) plan, provided that it does not take permitted disparity into account under §1.401(a)(4)–7. This paragraph (e)(2)(ii)(E) applies only if the plan does not take into account whether 12-month periods of compensation are consecutive in determining average compensation for purposes of calculating benefits.

(iii) *Consistency requirements.* Average annual compensation must be determined in a consistent manner for all employees.

(3) *Examples.* The following examples illustrate the rules in this paragraph (e):

Example 1. Plan A is a defined benefit plan. Plan A determines benefits on the basis of the average of each employee's annual compensation for the five consecutive plan years (or the employee's period of employment, if shorter) during the employee's compensation history in which the average of the employee's annual compensation is the highest. The compensation history used for this purpose is the last 10 plan years, plus the current plan year. In determining compensation for each plan year in the compensation history, Plan A defines compensation using a single definition that satisfies section 414(s) as a safe harbor definition under §1.414(s)–1(c). Plan A determines benefits on the basis of average annual compensation.

Example 2. Plan B is a defined benefit plan. Plan B determines benefits on the basis of the average of each employee's compensation for the five consecutive 12-month periods (or the employee's period of employment, if shorter) during the employee's compensation history in which the average of the employee's annual compensation is the highest. The compensation history used for this purpose is the 10 consecutive 12-month periods ending on the employee's termination date. In determining the average, Plan B disregards all months in which the employee performs services for less than 100 hours (60 percent of a full-time work schedule of 173 hours). In the case of an employee whose normal work schedule is less than a full-time schedule, Plan B disregards all months in which that employee performs services for less than 60 percent of the employee's normal work schedule. Plan B defines compensation for each 12-month period using a single definition that satisfies § 1.414(s)–1. Plan B determines benefits on the basis of average annual compensation.

Example 3. (a) The facts are the same as in *Example 1,* except that, for plan years prior to 1996, the compensation for a plan year was determined under a rate of pay definition of compensation that satisfies section 414(s), while, for plan years after 1995, the compensation for a plan year is determined using a definition that satisfies section 414(s) as a safe harbor definition under § 1.414(s)–1(c).

(b) The underlying definition of compensation for each plan year in the employee's compensation history is section 414(s) compensation, because for each plan year the definition satisfies the requirements for section 414(s) compensation under § 1.401(a)(4)–12. Therefore, Plan A determines benefits on the basis of average annual compensation, even though the underlying definition used to measure the amount of compensation for each plan year in an employee's compensation history is not the same for all plan years.

Example 4. The facts are the same as in *Example 1,* except that Plan A determines benefits on the basis of the average of the employee's annual section 414(s) compensation for the five consecutive 12-month periods ending on June 30 during the employee's compensation history in which the average is highest. An employee's compensation history begins when the employee commences participation in the plan and ends in the current plan year. In the case of an employee with less than five consecutive years of plan participation as of June 30, the compensation history is extended prior to the employee's commencement of participation to include the five consecutive 12-month periods ending on June 30 of the current plan year (or the employee's total period of employment, if shorter). Plan A determines benefits on the basis of average annual compensation.

Example 5. The facts are the same as in *Example 4,* except that Plan A determines benefits on the basis of the average of each employee's compensation for the employee's entire compensation history. Plan A determines benefits on the basis of average annual compensation.

(f) *Special rules*—(1) *In general.* The special rules in this paragraph (f) apply for purposes of applying the provisions of this section to a defined benefit plan. Any special rule provided in this paragraph (f) that is optional must, if used, apply uniformly to all employees.

(2) *Certain qualified disability benefits.* In general, qualified disability benefits (within the meaning of section 411(a)(9)) are not taken into account under this section. However, a qualified disability benefit that results from the crediting of compensation or service for a period of disability in the same manner as actual compensation or service is credited under a plan's benefit formula is permitted to be taken into account under this section as an accrued benefit upon the employee's return to service with the employer following the period of disability, provided that the qualified disability benefit is then treated in the same manner as an accrued benefit for all purposes under the plan.

(3) *Accruals after normal retirement age*—(i) *General rule.* An employee's accruals for any plan year after the plan year in which the employee attains normal retirement age are taken into account for purposes of this section. However, any plan provision that provides for increases in an employee's accrued benefit solely because the employee has delayed commencing benefits beyond the normal retirement age applicable to the employee under the plan may be disregarded, but only if—

(A) The same uniform normal retirement age applies to all employees; and

(B) The percentage factor used to increase the employee's accrued benefit is no greater than the largest percentage factor that could be applied to increase actuarially the employee's accrued benefit using any standard mortality table and any standard interest rate.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (f)(3). In each example, it is assumed that the plan satisfies the requirements of paragraph (f)(3)(i)(A) and (B) of this section.

Example 1. Plan A provides a benefit of two percent of average annual compensation per year of service for all employees. In addition, Plan A provides an actuarial increase in an employee's accrued benefit of six percent for each year that an employee defers commencement of benefits beyond normal retirement age. For employees who continue in service beyond normal retirement age, the employee's two-percent accrual for the current plan year is offset by the six-percent actuarial increase, as permitted under section 411(b)(1)(H)(iii)(II). For purposes of this section, the actuarial increase (and hence the offset) may be disregarded, and thus all employees may be treated as if they were accruing at the rate of two percent of average annual compensation per year.

Example 2. The facts are the same as in *Example 1,* except that the employee's two- percent accrual for the current plan year is not offset by the six-percent actuarial increase. The employer may disregard the actuarial increase and thus may treat all employees as if they were accruing at the rate of two percent of average annual compensation per year.

(4) *Early retirement window benefits*—(i) *General rule.* In applying the requirements of this section, all early retirement benefits, retirement-type subsidies, QSUPPs, and other optional forms of benefit under a plan, and changes in the plan's benefit formula, are taken into account regardless of whether they are permanent features of the plan or are offered only to employees whose employment terminates within a limited period of time. Additional rules and examples relevant to the testing of early retirement window benefits are found in *Example 6* of paragraph (b)(2)(vi) of this section; paragraph (b)(2)(ii)(A)(2), *Example 2* of paragraph (c)(2), paragraph (d)(3), and *Example 3* of paragraph (e)(1)(iii) of §1.401(a)(4)–4; paragraph (c)(4)(i) and *Example 2* of paragraph (c)(6) of §1.401(a)(4)–9; and the definition of benefit formula in §1.401(a)(4)–12.

(ii) Special rules—(A) *Year in which early retirement window benefit taken into account.* Notwithstanding paragraph (f)(4)(i) of this section, an early retirement window benefit is disregarded for purposes of determining whether a plan satisfies this section with respect to an employee for all plan years other than the first plan year in which the benefit is currently available (within the meaning of §1.401(a)(4)–4(b)(2)) to the employee. For purposes of this paragraph (f)(4)(ii)(A), in determining which plan years the benefit is currently available, an early retirement window benefit that consists of a temporary change in the plan's benefit formula is treated as an optional form of benefit.

(B) *Treatment of early retirement window benefit that consists of temporary change in benefit formula.* An early retirement window benefit is disregarded for purposes of determining an employee's normal accrual rate, even if the early retirement window benefit consists of a temporary change in a plan's benefit formula. However, if an early retirement window benefit consists of a temporary change in a plan's benefit formula, the plan does not satisfy paragraph (b) of this section during the period for which the change is effective unless the plan satisfies paragraph (b) of this section both reflecting the temporary change in the benefit formula and disregarding that change.

(C) *Effect of early retirement window benefit on most valuable accrual rate.* In determining an employee's most valuable optional form of payment of the accrued benefit (which is used in determining the employee's most valuable accrual rate under paragraphs (d)(1)(ii) and (f)(4)(i) of this section), an early retirement window benefit that is currently available to the employee (within the meaning of paragraph (f)(4)(ii)(A) of this section) and that is not disregarded for a plan year under paragraph (f)(4)(ii)(A) of this section is taken into account in that plan year with respect to the employee's accrued benefit as of the earliest of the employee's date of termination, the close of the early retirement window, or the last day of that plan year.

(D) *Effect of early retirement window benefit on average benefit percentage test.* Notwithstanding paragraph (c)(2) of this section, a rate group under a plan that provides an early retirement window benefit is deemed to satisfy the average benefit percentage test of §1.410(b)–5 if—

(*1*) All rate groups under the plan would satisfy the ratio percentage test of §1.410(b)–2(b)(2) if the early retirement window benefit were disregarded; and

(*2*) The group of employees to whom the early retirement window benefit is currently available (within the meaning of paragraph (f)(4)(ii)(A) of this section) satisfies section 410(b) without regard to the average benefit percentage test of §1.410(b)–5.

(iii) *Early retirement window benefit defined.* For purposes of this paragraph (f)(4), an early retirement window benefit is an early retirement benefit, retirement-type subsidy, QSUPP, or other optional form of benefit under a plan that is available, or a change in the plan's benefit formula that is applicable, only to employees who terminate employment within a limited period specified by the plan (not to exceed one year) under circumstances specified by the plan. A benefit does not fail to be described in the preceding sentence merely because the plan contains provisions under which certain employees may receive the benefit even though, for bona fide business reasons, they terminate employment within a reasonable period after the end of the limited period. An amendment to an early retirement window benefit that merely extends the periods in the preceding sentences is not treated as a separate early retirement window benefit, provided that the periods, as extended, satisfy the preceding sentences. However, any other amendment to an early retirement window benefit creates a separate early retirement window benefit.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (f)(4):

Example 1. (a) Plan A provides a benefit of one percent of average annual compensation per year of service and satisfies the requirements of paragraph (b)(2) of this section. Thus, the plan provides the same benefit to all employees with the same years of service under the Plan. Plan A is amended to treat all employees with ten or more years of service who terminate employment after attainment of age 55 and between March 1, 1999, and January 31, 2000, as if they had an additional five years of service under the benefit formula. However, in order to ensure the orderly implementation of the early retirement window, the plan amendment provides that designated employees in the human resources department who would otherwise be eligible for the early retirement window benefit are eligible to be treated as having the additional five years of service only if they terminate between January 1, 2000, and April 30, 2000.

(b) The additional benefits provided under this amendment are tested as benefits provided to employees rather than former employees. The effect of this amendment is temporarily to change the benefit formula for employees who are eligible for the early retirement window benefit because the amendment changes (albeit temporarily) the amount of the benefit payable to those employees at normal retirement age. See the definition of benefit formula in § 1.401(a)(4)–12. Assume that the additional years of service credited to employees eligible for the window benefit do not represent past service (within the meaning of § 1.401(a)(4)–11(d)(3)(i)(B)) or pre-participation or imputed service (within the meaning of § 1.401(a)(4)–11(d)(3)(ii)(A) or (B), respectively) and thus may not be taken into account as years of service. See § 1.401(a)(4)–11(d)(3)(i)(A) (regarding years of service that may not be taken into account under § 1.401(a)(4)–1(b)(2)). Thus, the window-eligible employees are entitled to a larger benefit (as a percentage of average annual compensation) than other employees with the same number of years of service, and the plan does not satisfy the uniform normal retirement benefit requirement of paragraph (b)(2)(i) of this section.

(c) Plan A is restructured under the provisions of § 1.401(a)(4)–9(c) into two component plans: Component Plan A1, consisting of all employees who are not eligible for the early retirement window benefit and all of their accruals and benefits, rights, and features under the plan, and Component Plan A2, consisting of all employees who are eligible for the early retirement window benefit (including the designated employees in the human resource department) and all of their accruals and benefits, rights, and features under the plan.

(d) Component Plan A1 still satisfies paragraph (b) of this section, because there has been no change for the employees in that component plan. Similarly, Component Plan A2 satisfies paragraph (b) of this section disregarding the change in the benefit formula.

(e) Because the early retirement window benefit consists of a temporary change in the benefit formula, paragraph (f)(4)(ii)(B) of this section requires that the plan satisfy the requirements of paragraph (b) of this section reflecting the change in order to remain a safe harbor plan. After reflecting the change, Component Plan A2 still provides the same benefit (albeit higher than under the regular benefit formula) to all employees with the same years of service that may be taken into account in testing the plan, and thus the benefit formula (as temporarily amended) satisfies the requirements of paragraphs (b)(2) (i) and (ii) of this section.

(f) Since Component Plan A2 also satisfies all of the other requirements of paragraph (b)(2) of this section and the safe harbor of paragraph (b)(3) of this section reflecting the change in the benefit formula, Component Plan A2 satisfies this paragraph (b) both reflecting and disregarding the change in the benefit formula. Thus, Component Plan A2 satisfies paragraph (b) of this section.

Example 2. The facts are the same as in *Example 1,* except that Plan A's benefit formula used the maximum amount of permitted disparity under section 401(l) prior to the amendment. The analysis is the same as in paragraphs (a) through the first sentence of paragraph (e) of *Example 1.* In order to satisfy the requirements of paragraph (b)(2) of this section, a plan that uses permitted disparity must satisfy the requirements of section 401(l) after reflecting the change in the benefit formula. Because, as stated in *Example 1,* the additional five years of service may not be taken into account for purposes of satisfying paragraph (b) of this section, the disparity that results from crediting that service exceeds the maximum permitted disparity under section 401(l). Thus, Component Plan A2 does not satisfy the requirements of paragraph (b) of this section.

Example 3. The facts are the same as in *Example 1,* except that Plan A is tested under the general test in paragraph (c) of this section. The early retirement window benefit is disregarded for purposes of determining the normal accrual rates, but is taken into account in 1999 for purposes of determining the most valuable accrual rates, of employees who were eligible for the early retirement window benefit (regardless of whether they elected to receive it). As stated in *Example 1,* the additional five years of service do not represent past service, pre-participation service, or imputed service, and thus under §1.401(a)(4)–11(d)(3)(i)(A) may not be taken into account as testing service.

(5) *Unpredictable contingent event benefits*—(i) *General rule.* In general, an unpredictable contingent event benefit (within the meaning of section 412(l)(7)(B)(ii)) is not taken into account under this section until the occurrence of the contingent event. Thus, the special rule in §1.401(a)(4)–4(d)(7) (treating the contingent event as having occurred) does not apply for purposes of this section. In the case of an unpredictable contingent event that is expected to result in the termination from employment of certain employees within a period of time consistent with the rules for defining an early retirement window benefit in paragraph (f)(4)(iii) of this section, the unpredictable contingent event benefit available to those employees is permitted to be treated as an early retirement window benefit, thus permitting the rules of paragraph (f)(4) of this section to be applied to it.

(ii) *Example.* The following example illustrates the rules of this paragraph (f)(5):

Example. (a) Employer X operates various manufacturing plants and maintains Plan A, a defined benefit plan that covers all of its nonexcludable employees. Plan A provides an early retirement benefit under which employees who retire after age 55 but before normal retirement age and who have at least 10 years of service receive a benefit equal to their normal retirement benefit reduced by four percent per year for each year prior to normal retirement age. Plan A also provides a plant-closing benefit under which employees who satisfy the conditions for receiving the early retirement benefit and who work at a plant where operations have ceased and whose employment has been terminated will receive an unreduced normal retirement benefit. The plant-closing benefit is an unpredictable contingent event benefit.

(b) During the 1997 plan year, Employer X had no plant closings. Therefore, the plant-closing benefit is not taken into account for the 1997 plan year in determining accrual rates or in applying the safe harbors in paragraph (b) of this section.

(c) During the 1998 plan year, Employer X begins to close one plant. Employees M through Z, who are employees at the plant that is closing, are expected to terminate employment with Employer X during the plan year and will satisfy the conditions for the plant-closing benefit. Therefore, in testing Plan A under this section for the 1998 plan year, the availability of the plant-closing benefit to Employees M through Z must be taken into account in determining their accrual rates or in determining whether the plan satisfies one of the safe harbors under paragraph (b) of this section.

(d) Because the employees eligible for the unpredictable contingent event benefit are expected to terminate employment with Employer X during a period consistent with the rules for defining an early retirement window benefit, in testing Plan A under this section for the 1998 plan year, the special rules in paragraph (f)(4)(ii) of this section may be applied. Thus, for example, normal accrual rates may be determined without reference to the unpredictable contingent event benefit.

(e) Despite the closing of the plant, Employee Q remains an employee into the 1999 plan year. Under paragraph (f)(4)(ii)(A) of this section, the availability of the plant-closing benefit to Employee Q may be disregarded in the 1999 plan year.

(6) *Determination of benefits on other than plan-year basis.* For purposes of this section, accruals are generally determined based on the plan year. Nevertheless, an employer may determine accruals on the basis of any period ending within the plan year as long as the period is at least 12 months in duration. For example, accruals for all employees may be determined based on accrual computation periods ending within the plan year.

(7) *Adjustments for certain plan distributions.* For purposes of this section,

an employee's accrued benefit includes the actuarial equivalent of prior distributions of accrued benefits from the plan to the employee if the years of service taken into account in determining the accrued benefits that were distributed continue to be taken into account under the plan for purposes of determining the employee's current accrued benefit. For purposes of this paragraph (f)(7), actuarial equivalence must be determined in a uniform manner for all employees using reasonable actuarial assumptions. A standard interest rate and a standard mortality table are among the assumptions considered reasonable for this purpose. Thus, for example, if an employee has commenced receipt of benefits in accordance with the minimum distribution requirements of section 401(a)(9), and the plan reduces the employee's accrued benefit to take into account the amount of the distributions, the employee's accrued benefit for purposes of this section is restored to the value it would have had if the distributions had not occurred.

(8) *Adjustment for certain QPSA charges.* For purposes of this section, an employee's accrued benefit includes the cost of a qualified preretirement survivor annuity (QPSA) that reduces the employee's accrued benefit otherwise determined under the plan, as permitted under § 1.401(a)–20, Q&A–21. Thus, an employee's accrued benefit for purposes of this section is determined as if the cost of the QPSA had not been charged against the accrued benefit. This paragraph (f)(8) applies only if the QPSA charges apply uniformly to all employees.

(9) *Disregard of certain offsets*—(i) *General rule.* For purposes of this section, an employee's accrued benefit under a plan includes that portion of the benefit that is offset under an offset provision described in § 1.401(a)(4)–11(d)(3)(i)(D). The rule in the preceding sentence applies only to the extent that the benefit by which the benefit under the plan being tested is offset is attributable to periods for which the plan being tested credits pre-participation service (within the meaning of § 1.401(a)(4)–11(d)(3)(ii)(A)) that satisfies § 1.401(a)(4)–11(d)(3)(iii) or past service (within the meaning of § 1.401(a)(4)–11(d)(3)(i)(B)), and only if—

(A) The benefit under the plan being tested is offset by either—

(*1*) Benefits under a qualified defined benefit plan or defined contribution plan (whether or not terminated); or

(*2*) Benefits under a foreign plan that are reasonably expected to be paid; and,

(B) If any portion of the benefit that is offset is nonforfeitable (within the meaning of section 411), that portion is offset by a benefit (or portion of a benefit) that is also nonforfeitable (or vested, in the case of a foreign plan).

(ii) *Examples.* The following examples illustrate the rules in this paragraph (f)(9):

Example 1. (a) Employer X maintains two qualified defined benefit plans, Plan A and Plan B. Plan B provides that, whenever an employee transfers to Plan B from Plan A, the service that was credited under Plan A is credited in determining benefits under Plan B. The Plan A service credited under Plan B is pre-participation service that satisfies § 1.401(a)(4)–11(d)(3)(iii). Plan B offsets the benefits determined under Plan B by the employee's vested benefits under Plan A. Plan A does not credit additional benefit service or accrual service after employees transfer to Plan B.

(b) The Plan B provision providing for an offset of benefits under Plan A satisfies § 1.401(a)(4)–11(d)(3)(i)(D). This is because the provision applies to similarly-situated employees and the benefits under Plan A that are offset against the Plan B benefits are attributable to pre-participation service taken into account under Plan B.

(c) This paragraph (f)(9) applies in determining the benefits that are taken into account under this section for employees in Plan B who are transferred from Plan A. This is because the offset provision is described in § 1.401(a)(4)–11(d)(3)(i)(D), the benefits under the other plan by which the benefits under the plan being tested are offset are attributable solely to pre-participation service that satisfies § 1.401(a)(4)–11(d)(3)(iii), and the benefits are offset solely by vested benefits under another qualified plan. Thus, for example, the accrual rates of employees in Plan B are determined as if there were no offset, i.e., by adding back the benefits that are offset to the net benefits under Plan B.

(d) The result would be the same even if Plan A continued to recognize compensation paid after the transfer in the determination of benefits under Plan A. However, if Plan A continued to credit benefit or accrual service after the transfer, then, to the extent that

Plan B's offset of benefits under Plan A increased as a result, the additional benefits offset under Plan B would not be added back in determining the benefits under Plan B that are taken into account under this section.

Example 2. The facts are the same as in *Example 1,* except that Plan A is not a plan described in paragraph (f)(9)(i)(A) of this section. None of the benefits under Plan B that are offset by benefits under Plan A may be added back in determining the benefits under Plan B that are taken into account under this section. Thus, benefits under Plan B are tested on a net basis.

(10) *Special rule for multiemployer plans.* For purposes of this section, if a multiemployer plan increases benefits for service prior to a specific date subject to a plan provision requiring employees to complete a specified amount of service (not to exceed five years) after that date, then benefits are permitted to be determined disregarding the service condition, provided that the condition is applicable to all employees in the multiemployer plan (including collectively bargained employees).

[T.D. 8485, 58 FR 46785, Sept. 3, 1993]

§1.401(a)(4)–4 Nondiscriminatory availability of benefits, rights, and features.

(a) *Introduction.* This section provides rules for determining whether the benefits, rights, and features provided under a plan (i.e., all optional forms of benefit, ancillary benefits, and other rights and features available to any employee under the plan) are made available in a nondiscriminatory manner. Benefits, rights, and features provided under a plan are made available to employees in a nondiscriminatory manner only if each benefit, right, or feature satisfies the current availability requirement of paragraph (b) of this section and the effective availability requirement of paragraph (c) of this section. Paragraph (d) of this section provides special rules for applying these requirements. Paragraph (e) of this section defines optional form of benefit, ancillary benefit, and other right or feature.

(b) *Current availability*—(1) *General rule.* The current availability requirement of this paragraph (b) is satisfied if the group of employees to whom a benefit, right, or feature is currently available during the plan year satisfies section 410(b) (without regard to the average benefit percentage test of §1.410(b)–5). In determining whether the group of employees satisfies section 410(b), an employee is treated as benefiting only if the benefit, right, or feature is currently available to the employee.

(2) *Determination of current availability*—(i) *General rule.* Whether a benefit, right, or feature that is subject to specified eligibility conditions is currently available to an employee generally is determined based on the current facts and circumstances with respect to the employee (e.g., current compensation, accrued benefit, position, or net worth).

(ii) *Certain conditions disregarded*—(A) *Certain age and service conditions—(1) General rule.* Notwithstanding paragraph (b)(2)(i) of this section, any specified age or service condition with respect to an optional form of benefit or a social security supplement is disregarded in determining whether the optional form of benefit or the social security supplement is currently available to an employee. Thus, for example, an optional form of benefit that is available to all employees who terminate employment on or after age 55 with at least 10 years of service is treated as currently available to an employee, without regard to the employee's current age or years of service, and without regard to whether the employee could potentially meet the age and service conditions prior to attaining the plan's normal retirement age.

(*2*) *Time-limited age or service conditions not disregarded.* Notwithstanding paragraph (b)(2)(ii)(A)(*1*) of this section, an age or service condition is not disregarded in determining the current availability of an optional form of benefit or social security supplement if the condition must be satisfied within a limited period of time. However, in determining the current availability of an optional form of benefit or a social security supplement subject to such an age or service condition, the age and service of employees may be projected to the last date by which the age condition or service condition must be satisfied in order to be eligible for the optional form of benefit or social security supplement under the plan. Thus, for example, an optional form of benefit that is available only to employees who terminate employment between July 1, 1995, and December 31, 1995, after attainment of age 55 with at least 10 years of service is treated as currently available to an employee only if the employee could satisfy those age and service conditions by December 31, 1995.

(B) *Certain other conditions.* Specified conditions on the availability of a benefit, right, or feature requiring a specified percentage of the employee's accrued benefit to be nonforfeitable, termination of employment, death, satisfaction of a specified health condition (or failure to meet such condition), disability, hardship, family status, default on a plan loan secured by a participant's account balance, execution of a covenant not to compete, application for benefits or similar ministerial or mechanical acts, election of a benefit form, execution of a waiver of rights under the Age Discrimination in Employment Act or other federal or state law, or absence from service, are disregarded in determining the employees to whom the benefit, right, or feature is currently available. In addition, if a multiemployer plan includes a reasonable condition that limits eligibility for an ancillary benefit, or other right or feature, to those employees who have recent service under the plan (e.g., a condition on a death benefit that requires an employee to have a minimum number of hours credited during the last two years) and the condition applies to all employees in the multiemployer plan (including the collectively bargained employees) to whom the ancillary benefit, or other right or feature, is otherwise currently available, then the condition is disregarded in determining the employees to whom the ancillary benefit, or other right or feature, is currently available.

(C) *Certain conditions relating to mandatory cash-outs.* In the case of a plan that provides for mandatory cash-outs of all terminated employees who have a vested accrued benefit with an actuarial present value less than or equal to a specified dollar amount (not to exceed the cash-out limit in effect under §1.411(a)–11T(c)(3)(ii)) as permitted by sections 411(a)(11) and 417(e), the implicit condition on any benefit, right, or feature (other than the mandatory cash-out) that requires the employee to have a vested accrued benefit with an actuarial present value in excess of the specified dollar amount is disregarded in determining the employees to whom the benefit, right, or feature is currently available.

(D) *Other dollar limits.* A condition that the amount of an employee's vested accrued benefit or the actuarial present value of that benefit be less than or equal to a specified dollar amount is disregarded in determining the employees to whom the benefit, right, or feature is currently available.

(E) *Certain conditions on plan loans.* In the case of an employee's right to a loan from the plan, the condition that an employee must have an account balance sufficient to be eligible to receive a minimum loan amount specified in the plan (not to exceed $1,000) is disregarded in determining the employees to whom the right is currently available.

(3) *Benefits, rights, and features that are eliminated prospectively*—(i) *Special testing rule.* Notwithstanding paragraph (b)(1) of this section, a benefit, right, or feature that is eliminated with respect to benefits accrued after the later of the eliminating amendment's adoption or effective date (the elimination date), but is retained with respect to benefits accrued as of the elimination date, and that satisfies this paragraph (b) as of the elimination date, is treated as satisfying this paragraph (b) for all subsequent periods. This rule does not apply if the terms of the benefit, right, or feature (including the employees to whom it is available) are changed after the elimination date.

(ii) *Elimination of a benefit, right, or feature*—(A) *General rule.* For purposes of this paragraph (b)(3), a benefit, right, or feature provided to an employee is eliminated with respect to benefits accrued after the elimination date if the amount or value of the benefit, right, or feature depends solely on the amount of the employee's accrued benefit (within the meaning of section 411(a)(7)) as of the elimination date, including subsequent income, expenses, gains, and losses with respect to that benefit in the case of a defined contribution plan.

(B) *Special rule for benefits, rights, and features that are not section 411(d)(6)-protected benefits.* Notwithstanding paragraph (b)(3)(ii)(A) of this section, in the case of a benefit, right, or feature under a defined contribution plan that is not a section 411(d)(6)-protected benefit (within the meaning of § 1.411(d)–4, Q&A–1), e.g., the availability of plan loans, for purposes of this paragraph (b)(3)(ii) each employee's accrued benefit as of the elimination date may be treated, on a uniform basis, as consisting exclusively of the dollar amount of the employee's account balance as of the elimination date.

(C) *Special rule for benefits, rights, and features that depend on adjusted accrued benefits.* For purposes of this paragraph (b)(3), a benefit, right, or feature provided to an employee under a plan that has made a fresh start does not fail to be eliminated as of an elimination date that is the fresh-start date merely because it depends solely on the amount of the employee's adjusted accrued benefit (within the meaning of § 1.401(a)(4)–13(d)(8)).

(c) *Effective availability*—(1) *General rule.* Based on all of the relevant facts and circumstances, the group of employees to whom a benefit, right, or feature is effectively available must not substantially favor HCEs.

(2) *Examples.* The following examples illustrate the rules of this paragraph (c):

Example 1. Employer X maintains Plan A, a defined benefit plan that covers both of its highly compensated nonexcludable employees and nine of its 12 nonhighly compensated nonexcludable employees. Plan A provides for a normal retirement benefit payable as an annuity and based on a normal retirement age of 65, and an early retirement benefit payable upon termination in the form of an annuity to employees who terminate from service with the employer on or after age 55 with 30 or more years of service. Both HCEs of Employer X currently meet the age and service requirement, or will have 30 years of service by the time they reach age 55. All but two of the nine NHCEs of Employer X who are covered by Plan A were hired on or after age 35 and, thus, cannot qualify for the early retirement benefit. Even though the group of employees to whom the early retirement benefit is currently available satisfies the ratio percentage test of § 1.410(b)–2(b)(2) when age and service are disregarded pursuant to paragraph (b)(2)(ii)(A) of this section, absent other facts, the group of employees to whom the early retirement benefit is effectively available substantially favors HCEs.

Example 2. Employer Y maintains Plan B, a defined benefit plan that provides for a normal retirement benefit payable as an annuity and based on a normal retirement age of 65. By a plan amendment first adopted and effective December 1, 1998, Employer Y amends Plan B to provide an early retirement benefit that is available only to employees who terminate employment by December 15, 1998, and who are at least age 55 with 30 or more years of service. Assume that all employees were hired prior to attaining age 25 and that the group of employees who have, or will have, attained age 55 with 30 years of service by December 15, 1998, satisfies the ratio percentage test of § 1.410(b)–2(b)(2). Assume, further, that the employer takes no steps to inform all eligible employees of the early retirement option on a timely basis and that the only employees who terminate from employment with the employer during the two-week period in which the early retirement benefit is available are HCEs. Under these facts, the group of employees to whom this early retirement window benefit is effectively available substantially favors HCEs.

Example 3. Employer Z amends Plan C on June 30, 1999, to provide for a single sum optional form of benefit for employees who terminate from employment with Employer Z after June 30, 1999, and before January 1, 2000. The availability of this single sum optional form of benefit is conditioned on the employee's having a particular disability at the time of termination of employment. The only employee of the employer who meets this disability requirement at the time of the amendment and thereafter through December 31, 1999, is a HCE. Under paragraph (b)(2)(ii)(B) of this section, the disability condition is disregarded in determining the current availability of the single sum optional form of benefit. Nevertheless, under these facts, the group of employees to whom the single sum optional form of benefit is effectively available substantially favors HCEs.

(d) *Special rules*—(1) *Mergers and acquisitions*—(i) *Special testing rule.* A benefit, right, or feature available under a plan solely to an acquired group of employees is treated as satisfying paragraphs (b) and (c) of this section during the period that each of the following requirements is satisfied:

(A) The benefit, right, or feature must satisfy paragraphs (b) and (c) of this section (determined without regard to the special rule in section

410(b)(6)(C)) on the date that is selected by the employer as the latest date by which an employee must be hired or transferred into the acquired trade or business for an employee to be included in the acquired group of employees. This determination is made with reference to the plan of the current employer and its nonexcludable employees.

(B) The benefit, right, or feature must be available under the plan of the current employer after the transaction on the same terms as it was available under the plan of the prior employer before the transaction. This requirement is not violated merely because of a change made to the benefit, right, or feature that is permitted by section 411(d)(6), provided that—

(*1*) The change is a replacement of the benefit, right, or feature with another benefit, right, or feature that is available to the same employees as the original benefit, right, or feature, and the original benefit, right, or feature is of inherently equal or greater value (within the meaning of paragraph (d)(4)(i)(A) of this section) than the benefit, right, or feature that replaces it; or

(*2*) The change is made before January 12, 1993.

(ii) *Scope of special testing rule.* This paragraph (d)(1) applies only to benefits, rights, and features with respect to benefits accruing under the plan of the current employer, and not to benefits, rights, and features with respect to benefits accrued under the plan of the prior employer (unless, pursuant to the transaction, the plan of the prior employer becomes the plan of the current employer, or the assets and liabilities with respect to the acquired group of employees under the plan of the prior employer are transferred to the plan of the current employer in a plan merger, consolidation, or other transfer described in section 414(l)).

(iii) *Example.* The following example illustrates the rules of this paragraph (d)(1):

Example. Employer X maintains Plan A, a defined benefit plan with a single sum optional form of benefit for all employees. Employer Y acquires Employer X and merges Plan A into Plan B, a defined benefit plan maintained by Employer Y that does not otherwise provide a single sum optional form of benefit. Employer Y continues to provide the single sum optional form of benefit under Plan B on the same terms as it was offered under Plan A to all employees who were acquired in the transaction with Employer X (and to no other employees). The optional form of benefit satisfies paragraphs (b) and (c) of this section immediately following the transaction (determined without taking into account section 410(b)(6)(C)) when tested with reference to Plan B and Employer Y's nonexcludable employees. Under these facts, Plan B is treated as satisfying this section with respect to the single sum optional form of benefit for the plan year of the transaction and all subsequent plan years.

(2) *Frozen participants.* A plan must satisfy the nondiscriminatory availability requirement of this section not only with respect to benefits, rights, and features provided to employees who are currently benefiting under the plan, but also separately with respect to benefits, rights, and features provided to nonexcludable employees with accrued benefits who are not currently benefiting under the plan (frozen participants). Thus, each benefit, right, and feature available to any frozen participant under the plan is separately subject to the requirements of this section. A plan satisfies paragraphs (b) and (c) of this section with respect to a benefit, right, or feature available to any frozen participant under the plan only if one or more of the following requirements is satisfied:

(i) The benefit, right, or feature must be one that would satisfy paragraphs (b) and (c) of this section if it were not available to any employee currently benefiting under the plan.

(ii) The benefit, right, or feature must be one that would satisfy paragraphs (b) and (c) of this section if all frozen participants were treated as employees currently benefiting under the plan.

(iii) No change in the availability of the benefit, right, or feature may have been made that is first effective in the current plan year with respect to a frozen participant.

(iv) Any change in the availability of the benefit, right, or feature that is first effective in the current plan year with respect to a frozen participant must be made in a nondiscriminatory manner. Thus, any expansion in the availability of the benefit, right, or feature to any highly compensated frozen participant must be applied on a consistent basis to all nonhighly compensated frozen participants. Similarly, any contraction in the availability of the benefit, right, or feature that affects any nonhighly compensated frozen participant must be applied on a consistent basis to all highly compensated frozen participants.

(3) *Early retirement window benefits.* If a benefit, right, or feature meets the definition of an early retirement window benefit in §1.401(a)(4)–3(f)(4)(iii) (or would meet that definition if the definition applied to all benefits, rights, and features), the benefit, right, or feature is disregarded for purposes of applying this section with respect to an employee for all plan years other than the first plan year in which the benefit is currently available to the employee.

(4) *Permissive aggregation of certain benefits, rights, or features*—(i) *General rule.* An optional form of benefit, ancillary benefit, or other right or feature may be aggregated with another optional form of benefit, ancillary benefit, or other right or feature, respectively, and the two may be treated as a single optional form of benefit, ancillary benefit, or other right or feature, if both of the following requirements are satisfied:

(A) One of the two optional forms of benefit, ancillary benefit, or other rights or features must in all cases be of inherently equal or greater value than the other. For this purpose, one benefit, right, or feature is of inherently equal or greater value than another benefit, right, or feature only if, at any time and under any conditions, it is impossible for any employee to receive a smaller amount or a less valuable right under the first benefit, right, or feature than under the second benefit, right, or feature.

(B) The optional form of benefit, ancillary benefit, or other right or feature of inherently equal or greater value must separately satisfy paragraphs (b) and (c) of this section (without regard to this paragraph (d)(4)).

(ii) *Aggregation may be applied more than once.* The aggregation rule in this paragraph (d)(4) may be applied more than once. Thus, for example, an optional form of benefit may be aggregated with another optional form of benefit that itself constitutes two separate optional forms of benefit that are aggregated and treated as a single optional form of benefit under this paragraph (d)(4).

(iii) *Examples.* The following examples illustrate the rules in this paragraph (d)(4):

Example 1. Plan A is a defined benefit plan that provides a single sum optional form of benefit to all employees. The single sum optional form of benefit is available on the same terms to all employees, except that, for employees in Division S, a five-percent discount factor is applied and, for employees of Division T, a seven-percent discount factor is applied. Under paragraph (e)(1) of this section, the single sum optional form of benefit constitutes two separate optional forms of benefit. Assume that the single sum optional form of benefit available to employees of Division S separately satisfies paragraphs (b) and (c) of this section without taking into account this paragraph (d)(4). Because a lower discount factor is applied in determining the single sum optional form of benefit available to employees of Division S than is applied in determining the single sum optional form of benefit available to employees of Division T, the first single sum optional form of benefit is of inherently greater value than the second single sum optional form of benefit. Under these facts, these two single sum optional forms of benefit may be aggregated and treated as a single optional form of benefit for purposes of this section.

Example 2. The facts are the same as in *Example 1,* except that, in order to receive the single sum optional form of benefit, employees of Division S (but not employees of Division T) must have completed at least 20 years of service. The single sum optional form of benefit available to employees of Division S is not of inherently equal or greater value than the single sum optional form of benefit available to employees of Division T, because an employee of Division S who terminates employment with less than 20 years of service would receive a smaller single sum amount (i.e., zero) than a similarly-situated employee of Division T who terminates employment with less than 20 years of service. Under these facts, the two single sum optional forms of benefit may not be aggregated and treated as a single optional form of benefit for purposes of this section.

(5) *Certain spousal benefits.* In the case of a plan that includes two or more plans that have been permissively aggregated under §1.410(b)–7(d), the aggregated plan satisfies this section with respect to the availability of any

nonsubsidized qualified joint and survivor annuities, qualified preretirement survivor annuities, or spousal death benefits described in section 401(a)(11), if each plan that is part of the aggregated plan satisfies section 401(a)(11). Whether a benefit is considered subsidized for this purpose may be determined using any reasonable actuarial assumptions. For purposes of this paragraph (d)(5), a qualified joint and survivor annuity, qualified preretirement survivor annuity, or spousal death benefit is deemed to be nonsubsidized if it is provided under a defined contribution plan.

(6) *Special ESOP rules.* An ESOP does not fail to satisfy paragraphs (b) and (c) of this section merely because it makes an investment diversification right or feature or a distribution option available solely to all qualified participants (within the meaning of section 401(a)(28)(B)(iii)), or merely because the restrictions of section 409(n) apply to certain individuals.

(7) *Special testing rule for unpredictable contingent event benefits.* A benefit, right, or feature that is contingent on the occurrence of an unpredictable contingent event (within the meaning of section 412(l)(7)(B)(ii)) is tested under this section as if the event had occurred. Thus, the current availability of a benefit that becomes an optional form of benefit upon the occurrence of an unpredictable contingent event is tested by deeming the event to have occurred and by disregarding age and service conditions on the eligibility for that benefit to the extent permitted for optional forms of benefit under paragraph (b)(2) of this section.

(e) *Definitions*—(1) *Optional form of benefit*—(i) *General rule.* The term optional form of benefit means a distribution alternative (including the normal form of benefit) that is available under a plan with respect to benefits described in section 411(d)(6)(A) or a distribution alternative that is an early retirement benefit or retirement-type subsidy described in section 411(d)(6)(B)(i), including a QSUPP. Except as provided in paragraph (e)(1)(ii) of this section, different optional forms of benefit exist if a distribution alternative is not payable on substantially the same terms as another distribution alternative. The relevant terms include all terms affecting the value of the optional form, such as the method of benefit calculation and the actuarial assumptions used to determine the amount distributed. Thus, for example, different optional forms of benefit may result from differences in terms relating to the payment schedule, timing, commencement, medium of distribution (e.g., in cash or in kind), election rights, differences in eligibility requirements, or the portion of the benefit to which the distribution alternative applies.

(ii) *Exceptions*—(A) *Differences in benefit formula or accrual method.* A distribution alternative available under a defined benefit plan does not fail to be a single optional form of benefit merely because the benefit formulas, accrual methods, or other factors (including service-computation methods and definitions of compensation) underlying, or the manner in which employees vest in, the accrued benefit that is paid in the form of the distribution alternative are different for different employees to whom the distribution alternative is available. Notwithstanding the foregoing, differences in the normal retirement ages of employees or in the form in which the accrued benefit of employees is payable at normal retirement age under a plan are taken into account in determining whether a distribution alternative constitutes one or more optional forms of benefit.

(B) *Differences in allocation formula.* A distribution alternative available under a defined contribution plan does not fail to be a single optional form of benefit merely because the allocation formula or other factors (including service-computation methods, definitions of compensation, and the manner in which amounts described in § 1.401(a)(4)–2(c)(2)(iii) are allocated) underlying, or the manner in which employees vest in, the accrued benefit that is paid in the form of the distribution alternative are different for different employees to whom the distribution alternative is available.

(C) *Distributions subject to section 417(e).* A distribution alternative available under a defined benefit plan does not fail to be a single optional form of benefit merely because, in determining the amount of a distribution, the plan applies a lower interest rate to determine the distribution for employees with a vested accrued benefit having an actuarial present value not in excess of $25,000, as required by section 417(e)(3) and §1.417(e)–1.

(D) *Differences attributable to uniform normal retirement age.* A distribution alternative available under a defined benefit plan does not fail to be a single optional form of benefit, to the extent that the differences are attributable to differences in normal retirement dates among employees, provided that the differences do not prevent the employees from having the same uniform normal retirement age under the definition of uniform normal retirement age in §1.401(a)(4)–12.

(iii) *Examples.* The following examples illustrate the rules in this paragraph (e)(1):

Example 1. Plan A is a defined benefit plan that benefits all employees of Divisions S and T. The plan offers a qualified joint and 50-percent survivor annuity at normal retirement age, calculated by multiplying an employee's single life annuity payment by a factor. For an employee of Division S whose benefit commences at age 65, the plan provides a factor of 0.90, but for a similarly-situated employee of Division T the plan provides a factor of 0.85. The qualified joint and survivor annuity is not available to employees of Divisions S and T on substantially the same terms, and thus it constitutes two separate optional forms of benefit.

Example 2. Plan B is a defined benefit plan that benefits all employees of Divisions U and V. The plan offers a single sum distribution alternative available on the same terms and determined using the same actuarial assumptions, to all employees. However, different benefit formulas apply to employees of each division. Under the exception provided in paragraph (e)(1)(ii)(A) of this section, the single sum optional form of benefit available to employees of Division U is not a separate optional form of benefit from the single sum optional form of benefit available to employees of Division V.

Example 3. Defined benefit Plan C provides an early retirement benefit based on a schedule of early retirement factors that is a single optional form of benefit. Plan C is amended to provide an early retirement window benefit that consists of a temporary change in the plan's benefit formula (e.g., the addition of five years of service to an employee's actual service under the benefit formula) applicable in determining the benefits for certain employees who terminate employment within a limited period of time. Under the exception provided in paragraph (e)(1)(ii)(A) of this section, the early retirement optional form of benefit available to window-eligible employees is not a separate optional form of benefit from the early retirement optional form of benefit available to the other employees.

(2) *Ancillary benefit.* The term ancillary benefit means social security supplements (other than QSUPPs), disability benefits not in excess of a qualified disability benefit described in section 411(a)(9), ancillary life insurance and health insurance benefits, death benefits under a defined contribution plan, preretirement death benefits under a defined benefit plan, shut-down benefits not protected under section 411(d)(6), and other similar benefits. Different ancillary benefits exist if an ancillary benefit is not available on substantially the same terms as another ancillary benefit. Principles similar to those in paragraph (e)(1)(ii) of this section apply in making this determination.

(3) *Other right or feature*—(i) *General rule.* The term other right or feature generally means any right or feature applicable to employees under the plan. Different rights or features exist if a right or feature is not available on substantially the same terms as another right or feature.

(ii) *Exceptions to definition of other right or feature.* Notwithstanding paragraph (e)(3)(i) of this section, a right or feature is not considered an other right or feature if it—

(A) Is an optional form of benefit or an ancillary benefit under the plan;

(B) Is one of the terms that are taken into account in determining whether separate optional forms of benefit or ancillary benefits exist, or that would be taken into account but for paragraph (e)(1)(ii) of this section (e.g., benefit formulas or the manner in which benefits vest); or

(C) Cannot reasonably be expected to be of meaningful value to an employee (e.g., administrative details).

(iii) *Examples.* Other rights and features include, but are not limited to—

(A) Plan loan provisions (other than those relating to a distribution of an employee's accrued benefit upon default under a loan);

(B) The right to direct investments;

(C) The right to a particular form of investment, including, for example, a particular class or type of employer securities (taking into account, in determining whether different forms of investment exist, any differences in conversion, dividend, voting, liquidation preference, or other rights conferred under the security);

(D) The right to make each rate of elective contributions described in § 1.401(k)–1(g)(3) (determining the rate based on the plan's definition of the compensation out of which the elective contributions are made (regardless of whether that definition satisfies section 414(s)), but also treating different rates as existing if they are based on definitions of compensation or other requirements or formulas that are not substantially the same);

(E) The right to make after-tax employee contributions to a defined benefit plan that are not allocated to separate accounts;

(F) The right to make each rate of after-tax employee contributions described in § 1.401(m)–1(f)(6) (determining the rate based on the plan's definition of the compensation out of which the after-tax employee contributions are made (regardless of whether that definition satisfies section 414(s)), but also treating different rates as existing if they are based on definitions of compensation or other requirements or formulas that are not substantially the same);

(G) The right to each rate of allocation of matching contributions described in § 1.401(m)–1(f)(12) (determining the rate using the amount of matching, elective, and after-tax employee contributions determined after any corrections under §§ 1.401(k)–1(f)(1)(i), 1.401(m)–1(e)(1)(i), and 1.401(m)–2(c), but also treating different rates as existing if they are based on definitions of compensation or other requirements or formulas that are not substantially the same);

(H) The right to purchase additional retirement or ancillary benefits under the plan; and

(I) The right to make rollover contributions and transfers to and from the plan.

[T.D. 8485, 58 FR 46796, Sept. 3, 1993, as amended by T.D. 8794, 63 FR 70338, Dec. 21, 1998]

§ 1.401(a)(4)–5 Plan amendments and plan terminations.

(a) *Introduction*—(1) *Overview.* This paragraph (a) provides rules for determining whether the timing of a plan amendment or series of amendments has the effect of discriminating significantly in favor of HCEs or former HCEs. For purposes of this section, a plan amendment includes, for example, the establishment or termination of the plan, and any change in the benefits, rights, or features, benefit formulas, or allocation formulas under the plan. Paragraph (b) of this section sets forth additional requirements that must be satisfied in the case of a plan termination.

(2) *Facts-and-circumstances determination.* Whether the timing of a plan amendment or series of plan amendments has the effect of discriminating significantly in favor of HCEs or former HCEs is determined at the time the plan amendment first becomes effective for purposes of section 401(a), based on all of the relevant facts and circumstances. These include, for example, the relative numbers of current and former HCEs and NHCEs affected by the plan amendment, the relative length of service of current and former HCEs and NHCEs, the length of time the plan or plan provision being amended has been in effect, and the turnover of employees prior to the plan amendment. In addition, the relevant facts and circumstances include the relative accrued benefits of current and former HCEs and NHCEs before and after the plan amendment and any additional benefits provided to current and former HCEs and NHCEs under other plans (including plans of other employers, if relevant). In the case of a plan amendment that provides additional benefits based on an employee's service prior to the amendment, the relevant facts and circumstances also include the benefits that employees

and former employees who do not benefit under the amendment would have received had the plan, as amended, been in effect throughout the period on which the additional benefits are based.

(3) *Safe harbor for certain grants of benefits for past periods.* The timing of a plan amendment that credits (or increases benefits attributable to) years of service for a period in the past is deemed not to have the effect of discriminating significantly in favor of HCEs or former HCEs if the period for which the service credit (or benefit increase) is granted does not exceed the five years immediately preceding the year in which the amendment first becomes effective, the service credit (or benefit increase) is granted on a reasonably uniform basis to all employees, benefits attributable to the period are determined by applying the current plan formula, and the service credited is service (including pre-participation or imputed service) with the employer or a previous employer that may be taken into account under §1.401(a)(4)–11(d)(3) (without regard to §1.401(a)(4)–11(d)(3)(i)(B)). However, this safe harbor is not available if the plan amendment granting the service credit (or increasing benefits) is part of a pattern of amendments that has the effect of discriminating significantly in favor of HCEs or former HCEs.

(4) *Examples.* The following examples illustrate the rules in this paragraph (a):

Example 1. Plan A is a defined benefit plan that covered both HCEs and NHCEs for most of its existence. The employer decides to wind up its business. In the process of ceasing operations, but at a time when the plan covers only HCEs, Plan A is amended to increase benefits and thereafter is terminated. The timing of this plan amendment has the effect of discriminating significantly in favor of HCEs.

Example 2. Plan B is a defined benefit plan that provides a social security supplement that is not a QSUPP. After substantially all of the HCEs of the employer have benefited from the supplement, but before a substantial number of NHCEs have become eligible for the supplement, Plan B is amended to reduce significantly the amount of the supplement. The timing of this plan amendment has the effect of discriminating significantly in favor of HCEs.

Example 3. Plan C is a defined benefit plan that contains an ancillary life insurance benefit available to all employees. The plan is amended to eliminate this benefit at a time when life insurance payments have been made only to beneficiaries of HCEs. Because all employees received the benefit of life insurance coverage before Plan C was amended, the timing of this plan amendment does not have the effect of discriminating significantly in favor of HCEs or former HCEs.

Example 4. Plan D provides for a benefit of one percent of average annual compensation per year of service. Ten years after Plan D is adopted, it is amended to provide a benefit of two percent of average annual compensation per year of service, including years of service prior to the amendment. The amendment is effective only for employees currently employed at the time of the amendment. The ratio of HCEs to former HCEs is significantly higher than the ratio of NHCEs to former NHCEs. In the absence of any additional factors, the timing of this plan amendment has the effect of discriminating significantly in favor of HCEs.

Example 5. The facts are the same as in *Example 4,* except that, in addition, the years of prior service are equivalent between HCEs and NHCEs who are current employees, and the group of current employees with prior service would satisfy the nondiscriminatory classification test of §1.410(b)–4 in the current and all prior plan years for which past service credit is granted. The timing of this plan amendment does not have the effect of discriminating significantly in favor of HCEs or former HCEs.

Example 6. Employer V maintains Plan E, an accumulation plan. In 1994, Employer V amends Plan E to provide that the compensation used to determine an employee's benefit for all preceding plan years shall not be less than the employee's average annual compensation as of the close of the 1994 plan year. The years of service and percentage increases in compensation for HCEs are reasonably comparable to those of NHCEs. In addition, the ratio of HCEs to former HCEs is reasonably comparable to the ratio of NHCEs to former NHCEs. The timing of this plan amendment does not have the effect of discriminating significantly in favor of HCEs or former HCEs.

Example 7. Employer W currently has six nonexcludable employees, two of whom, H1 and H2, are HCEs, and the remaining four of whom, N1 through N4, are NHCEs. The ratio of HCEs to former HCEs is significantly higher than the ratio of NHCEs to former NHCEs. Employer W establishes Plan F, a defined benefit plan providing a benefit of one percent of average annual compensation per year of service, including years of service prior to the establishment of the plan. H1 and H2 each have 15 years of prior service, N1 has nine years of past service, N2 has five years, N3 has three years, and N4 has one year. The timing of this plan establishment has the effect of discriminating significantly in favor of HCEs.

Example 8. Assume the same facts as in *Example 7,* except that N1 through N4 were hired in the current year, and Employer W never employed any NHCEs prior to the current year. Thus, no NHCEs would have received additional benefits had Plan F been in existence during the preceding 15 years. The timing of this plan establishment does not have the effect of discriminating significantly in favor of HCEs or former HCEs.

Example 9. The facts are the same as in *Example 7,* except that Plan F limits the grant of past service credit to five years, and the grant of past service otherwise satisfies the safe harbor in paragraph (a)(3) of this section. The timing of this plan establishment is deemed not to have the effect of discriminating significantly in favor of HCEs or former HCEs.

Example 10. The facts are the same as in *Example 9,* except that, five years after the establishment of Plan F, Employer W amends the plan to provide a benefit equal to two percent of average annual compensation per year of service, taking into account all years of service since the establishment of the plan. The ratio of HCEs to former HCEs who terminated employment during the five-year period since the establishment of the plan is significantly higher than the ratio of NHCEs to former NHCEs who terminated employment during the five-year period since the establishment of the plan. Although the amendment described in this example might separately satisfy the safe harbor in paragraph (a)(3) of this section, the safe harbor is not available with respect to the amendment because, under these facts, the amendment is part of a pattern of amendments that has the effect of discriminating significantly in favor of HCEs.

Example 11. Employer Y maintains Plan G, a defined benefit plan, covering all its employees. In 1995, Employer Y acquires Division S from Employer Z. Some of the employees of Division S had been covered under a defined benefit plan maintained by Employer Z. Soon after the acquisition, Employer Y amends Plan G to cover all employees of Division S and to credit those who were in Division S's defined benefit plan with years of service for years of employment with Employer Z. Because the timing of the plan amendment was determined by the timing of the transaction, the timing of this plan amendment does not have the effect of discriminating significantly in favor of HCEs or former HCEs. See also § 1.401(a)(4)–11(d)(3) for other rules regarding the crediting of preparticipation service.

Example 12. Plan H is an insurance contract plan within the meaning of section 412(i). For all plan years before 1999, Plan H purchases insurance contracts from Insurance Company J. In 1999, Plan H shifts future purchases of insurance contracts to Insurance Company K. The shift in insurance companies is a plan amendment subject to this paragraph (a).

(b) *Pre-termination restrictions*—(1) *Required provisions in defined benefit plans.* A defined benefit plan has the effect of discriminating significantly in favor of HCEs or former HCEs unless it incorporates provisions restricting benefits and distributions as described in paragraph (b)(2) and (3) of this section at the time the plan is established or, if later, as of the first plan year to which §§ 1.401(a)(4)–1 through 1.401(a)(4)–13 apply to the plan under § 1.401(a)(4)–13(a) or (b). This paragraph (b) does not apply if the Commissioner determines that such provisions are not necessary to prevent the prohibited discrimination that may occur in the event of an early termination of the plan. The restrictions in this paragraph (b) apply to a plan within the meaning of § 1.410(b)–7(b) (i.e., a section 414(l) plan). Any plan containing a provision described in this paragraph (b) satisfies section 411(d)(2) and does not fail to satisfy section 411(a) or (d)(3) merely because of the provision.

(2) *Restriction of benefits upon plan termination.* A plan must provide that, in the event of plan termination, the benefit of any HCE (and any former HCE) is limited to a benefit that is nondiscriminatory under section 401(a)(4).

(3) *Restrictions on distributions*—(i) *General rule.* A plan must provide that, in any year, the payment of benefits to or on behalf of a restricted employee shall not exceed an amount equal to the payments that would be made to or on behalf of the restricted employee in that year under—

(A) A straight life annuity that is the actuarial equivalent of the accrued benefit and other benefits to which the restricted employee is entitled under the plan (other than a social security supplement); and

(B) A social security supplement, if any, that the restricted employee is entitled to receive.

(ii) *Restricted employee defined.* For purposes of this paragraph (b), the term restricted employee generally means any HCE or former HCE. However, an HCE or former HCE need not be treated as a restricted employee in the current year if the HCE or former HCE is not one of the 25 (or a larger number chosen by the employer) nonexcludable employees and former employees of the employer with the largest amount of compensation in the current or any prior year. Plan provisions defining or altering this group can be amended at any time without violating section 411(d)(6).

(iii) *Benefit defined.* For purposes of this paragraph (b), the term benefit includes, among other benefits, loans in excess of the amounts set forth in section 72(p)(2)(A), any periodic income, any withdrawal values payable to a living employee or former employee, and any death benefits not provided for by insurance on the employee's or former employee's life.

(iv) *Nonapplicability in certain cases.* The restrictions in this paragraph (b)(3) do not apply, however, if any one of the following requirements is satisfied:

(A) After taking into account payment to or on behalf of the restricted employee of all benefits payable to or on behalf of that restricted employee under the plan, the value of plan assets must equal or exceed 110 percent of the value of current liabilities, as defined in section 412(l)(7).

(B) The value of the benefits payable to or on behalf of the restricted employee must be less than one percent of the value of current liabilities before distribution.

(C) The value of the benefits payable to or on behalf of the restricted employee must not exceed the amount described in section 411(a)(11)(A) (restrictions on certain mandatory distributions).

(v) *Determination of current liabilities.* For purposes of this paragraph (b), any reasonable and consistent method may be used for determining the value of current liabilities and the value of plan assets.

(4) *Operational restrictions on certain money purchase pension plans.* A money purchase pension plan that has an accumulated funding deficiency, within the meaning of section 412(a), or an unamortized funding waiver, within the meaning of section 412(d), must comply in operation with the restrictions on benefits and distributions as described in paragraphs (b)(2) and (b)(3) of this section. Such a plan does not fail to satisfy section 411(d)(6) merely because of restrictions imposed by the requirements of this paragraph (b)(4).

[T.D. 8485, 58 FR 46800, Sept. 3, 1993]

§1.401(a)(4)–6 Contributory defined benefit plans.

(a) *Introduction.* This section provides rules necessary for determining whether a contributory DB plan satisfies the nondiscriminatory amount requirement of §1.401(a)(4)–1(b)(2). Paragraph (b) of this section provides rules for determining the amount of benefits derived from employer contributions (employer-provided benefits) under a contributory DB plan for purposes of determining whether the plan satisfies §1.401(a)(4)–1(b)(2) with respect to such amounts. Paragraph (c) of this section provides the exclusive rules for determining whether a contributory DB plan satisfies §1.401(a)(4)–1(b)(2) with respect to the amount of benefits derived from employee contributions not allocated to separate accounts (employee-provided benefits). See §1.401(a)(4)–1(b)(2)(ii)(B) for the exclusive tests applicable to employee contributions allocated to separate accounts under a section 401(m) plan.

(b) *Determination of employer-provided benefit*—(1) *General rule.* An employee's employer-provided benefit under a contributory DB plan for purposes of section 401(a)(4) equals the difference between the employee's total benefit and the employee's employee-provided benefit under the plan. The rules of section 411(c) generally must be used to determine the employee's employer-provided benefit for this purpose. However, paragraphs (b)(2) through (b)(6) of this section provide alternative methods for determining the employee's employer-provided benefit.

(2) *Composition-of-workforce method*—(i) *General rule.* A contributory DB plan that satisfies paragraph (b)(2)(ii) (A) and (B) of this section may determine employees' employer-provided benefit rates under the rules of paragraph (b)(2)(iii) of this section.

(ii) *Eligibility requirements*—(A) *Uniform rate of employee contributions.* A contributory DB plan satisfies this paragraph (b)(2)(ii)(A) if all employees make employee contributions at the same rate, expressed as a percentage of plan year compensation (the employee contribution rate). A plan does not fail to satisfy this paragraph (b)(2)(ii)(A) merely because it eliminates employee contributions for all employees with plan year compensation below a specified contribution breakpoint that is either a stated dollar amount or a stated percentage of covered compensation (within the meaning of § 1.401(l)–1(c)(7)); or merely because all employees make employee contributions at the same rate (expressed as a percentage of plan year compensation) with respect to plan year compensation up to the contribution breakpoint (base employee contribution rate) and at a higher rate (expressed as a percentage of plan year compensation) that is the same for all employees with respect to plan year compensation above the contribution breakpoint (excess employee contribution rate). A plan described in paragraph (c)(4)(i) of this section that satisfies paragraph (c)(4)(iii) of this section is deemed to satisfy this paragraph.

(B) *Demographic requirements*—(*1*) *In general.* A contributory DB plan satisfies this paragraph (b)(2)(ii)(B) if it satisfies either of the demographic tests in paragraph (b)(2)(ii)(B) (*2*) or (*3*) of this section.

(*2*) *Minimum percentage test.* This test is satisfied only if more than 40 percent of the NHCEs in the plan have attained ages at least equal to the plan's target age, and more than 20 percent of the NHCEs in the plan have attained ages at least equal to the average attained age of the HCEs in the plan. For this purpose, a plan's target age is the lower of age 50 or the average attained age of the HCEs in the plan minus X years, where X equals 20 minus the product of five times the employee contribution rate under the plan. In no case, however, may X years be fewer than zero (0) years. Thus, for example, if the average attained age of the HCEs in the plan is 53 and the employee contribution rate is two percent of plan year compensation, the plan's target age is 43 years (i.e., $53 - (20 - (5 \times 2))$).

(*3*) *Ratio test.* This test is satisfied only if the percentage of all nonhighly compensated nonexcludable employees, who are in the plan and who have attained ages at least equal to the average attained age of the HCEs in the plan, is at least 70 percent of the percentage of all highly compensated nonexcludable employees, who are in the plan and who have attained ages at least equal to the average attained age of the HCEs in the plan. Attained ages must be determined as of the beginning of the plan year. In lieu of determining the actual distribution of the attained ages of the HCEs, an employer may assume that 50 percent of all HCEs have attained ages at least equal to the average attained age of the HCEs.

(iii) *Determination of employer-provided benefit*—(A) *Safe harbor plans other than section 401(l) plans.* For purposes of applying the exception to the safe harbor in § 1.401(a)(4)–3(b)(6)(viii) with respect to employer-provided benefits under a plan other than a section 401(l) plan, the employee's entire accrued benefit is treated as employer-provided.

(B) *Section 401(l) plans*—(*1*) *General rule.* For purposes of applying the exception to the safe harbor in § 1.401(a)(4)–3(b)(6)(viii) with respect to employer-provided benefits under a section 401(l) plan, an employee's base benefit percentage and excess benefit percentage are reduced, or an employee's gross benefit percentage is reduced, by subtracting the product of the employee contribution rate and the factor determined under paragraph (b)(2)(iv) of this section from the respective percentages for the plan year. For this purpose, the employee contribution rate is the highest rate of employee contributions applicable to any potential level of plan year compensation for that plan year under the plan.

(*2*) *Excess plans with varying contribution rates.* In the case of a defined benefit excess plan described in the second sentence of paragraph (b)(2)(ii)(A) of this section, solely for purposes of reducing an employee's base benefit percentage as required under paragraph (b)(2)(iii)(B)(*1*) of this section, it may be assumed that the employee's employee contribution rate equals the weighted average of the base employee contribution rate and the excess employee contribution rate. In determining this weighted average, the weight of the base employee contribution rate is equal to a fraction, the numerator of which is the lesser of the integration level and the contribution breakpoint and the denominator of which is the integration level. The weight of the excess employee contribution rate is equal to the difference between one and the weight of the base employee contribution rate.

(*3*) *Offset plans with varying contribution rates.* In the case of an offset plan described in the second sentence of paragraph (b)(2)(ii)(A) of this section, an equivalent adjustment to the alternative method in paragraph (b)(2)(iii)(B)(*2*) of this section may be made to the offset percentage.

(C) *Employer-provided benefits under the general test.* For purposes of applying the general test of §1.401(a)(4)–3(c) with respect to employer-provided benefits, an employee's normal and most valuable accrual rates otherwise determined under §1.401(a)(4)–3(d) (without applying any of the options under §1.401(a)(4)–3(d)(3) other than the fresh-start alternative of §1.401(a)(4)–3(d)(3)(iii)) are each reduced by subtracting the product of the employee's contributions (expressed as a percentage of plan year compensation) and the factor determined under paragraph (b)(2)(iv) of this section from the respective accrual rates. A plan may then apply the optional rules in §1.401(a)(4)–3(d)(3) (i) and (ii) to this resulting accrual rate.

(D) *Additional limitation.* A plan may not use the composition-of-workforce method provided in this paragraph (b)(2) to determine an employee's base benefit percentage, excess benefit percentage, gross benefit percentage, offset percentage, or accrual rates unless employee contributions have been made at the same rate (or rates) throughout the period after the fresh-start date or throughout the measurement period used to determine accrual rates.

(iv) *Determination of plan factor.* The factor for a plan is determined under the following table based on the average entry age of the employees in the plan and on whether the plan determines benefits based on average compensation. For this purpose, average entry age equals the average attained age of all employees in the plan, minus the average years of participation of all employees in the plan. A plan is treated as determining benefits based on average compensation if it determines benefits based on compensation averaged over a specified period not exceeding five consecutive years (or the employee's entire period of employment with the employer, if shorter).

TABLE OF FACTORS

Average entry age	Factors	
	Average compensation benefit formula	Other formulas
Less than 30	0.5	0.75
30 to 40	0.4	0.6
Over 40	0.2	0.3

(v) *Examples.* The following examples illustrate the rules of this paragraph (b)(2):

Example 1. Plan A is a contributory DB plan that is a defined benefit excess plan providing a benefit equal to 2.0 percent of employees' average annual compensation at or below covered compensation, plus 2.5 percent of average annual compensation above covered compensation, times years of service up to 35. Under the plan, average annual compensation is determined using a five-consecutive-year period for purposes of §1.401(a)(4)–3(e)(2). The plan requires employee contributions at a rate of four percent of plan year compensation for all employees. Assume that the plan satisfies the demographic requirements of paragraph (b)(2)(ii)(B) of this section. Under these facts, the plan satisfies the eligibility requirements of paragraph (b)(2)(ii) of this section. Assume, further, that the average attained age for all employees in the plan is 55, and that the average years of participation of all employees in the plan is 10. The average entry age for the plan is therefore 45, and, accordingly, the appropriate factor under the table is 0.2. Thus, in applying the safe harbor requirements of §1.401(a)(4)–3(b) to this plan for the plan year (including the requirements of §1.401(l)–3), the employee's base benefit percentage and excess benefit percentage are each reduced by 0.8 percent (4 percent × 0.2) and equal 1.2 percent and 1.7 percent, respectively.

Example 2. The facts are the same as in *Example 1,* except that the employee contribution rate is two percent of plan year compensation up to the covered compensation level, and four percent for plan year compensation at or above that contribution breakpoint. The employer elects to apply the alternative method in paragraph (b)(2)(iii)(B)(*2*) of this section to determine the reduction in the base benefit percentage. Because the contribution breakpoint is equal to the integration level, the weight of the employee contribution rate below the contribution breakpoint is 100 percent, and the weight of the employee contribution rate above the contribution breakpoint is zero. Thus, the weighted average of employee contribution rates is two percent. Under the alternative method in paragraph (b)(2)(iii)(B)(*2*) of this section, the reduction in the employee's base benefit percentage is 0.4. In applying the safe harbor requirements of § 1.401(a)(4)–3(b) to this plan (including the requirements of § 1.401(l)–3), the employee's base benefit percentage is 1.6 percent, and the employee's excess benefit percentage is 1.7.

Example 3. The facts are the same as in *Example 1,* except that the employee contribution rate is two percent of plan year compensation up to 50 percent of the covered compensation level, and four percent for plan year compensation at or above that contribution breakpoint. Because the contribution breakpoint is equal to 50 percent of the integration level, the weight of the employee contribution rate below the contribution breakpoint is 50 percent, and the weight of the employee contribution rate above the contribution breakpoint is 50 percent. Thus, the weighted average of employee contribution rates is three percent. Under the alternative method in paragraph (b)(2)(iii)(B)(*2*) of this section, the reduction in the employee's base benefit percentage is 0.6. In applying the safe harbor requirements of § 1.401(a)(4)–3(b) to this plan (including the requirements of § 1.401(l)–3), the employee's base benefit percentage is 1.4 percent, and the employee's excess benefit percentage is 1.7.

Example 4. The facts are the same as in *Example 1,* except that the plan is tested using the general test in § 1.401(a)(4)–3(c). Assume Employee M benefits under Plan A and has a normal accrual rate for the plan year (calculated with respect to Employee M's total accrued benefit) of 2.2 percent of average annual compensation. In applying the general test in § 1.401(a)(4)–3(c) with respect to employer-provided benefits, this rate is reduced by 0.8 to yield a normal accrual rate of 1.4 percent. This rate may then be adjusted using either of the optional rules in § 1.401(a)(4)–3(d)(3)(i) or (ii).

(3) *Minimum-benefit method*—(i) *Application of uniform factors.* A contributory DB plan that satisfies the uniform rate requirement of paragraph (b)(2)(ii)(A) of this section and the minimum benefit requirement of paragraph (b)(3)(ii) of this section may apply the adjustments provided in paragraph (b)(2)(iii) of this section as if the average entry age of employees in the plan were within the range of 30 to 40, without regard to the actual demographics of the employees in the plan.

(ii) *Minimum benefit requirement.* This requirement is satisfied if the plan provides that, in plan years beginning on or after the effective date of these regulations, as set forth in § 1.401(a)(4)–13(a) and (b), each employee will accrue a benefit that equals or exceeds the sum of—

(A) The accrued benefit derived from employee contributions made for plan years beginning on or after the effective date of these regulations, determined in accordance with section 411(c); and

(B) Fifty percent of the total benefit accrued in plan years beginning on or after the effective date of these regulations, as determined under the plan benefit formula without regard to that portion of the formula designed to satisfy the minimum benefit requirement of this paragraph (b)(3)(ii).

(iii) *Example.* The following example illustrates the minimum-benefit method of this paragraph (b)(3):

Example. Plan A is contributory DB plan. For the plan year beginning in 1994, Employee M participates in Plan A and accrues a benefit under the terms of the plan (without regard to the minimum benefit requirement of paragraph (b)(3)(ii) of this section) of $3,000. The portion of Employee M's benefit accrual for the plan year beginning in 1994 derived from employee contributions is $2,000, determined by applying the rules of section 411(c) to such contributions. The requirement of paragraph (b)(3)(ii) of this section is not satisfied for the plan year beginning in 1994 unless the plan provides that Employee M's benefit accrual for the plan year beginning in 1994 is equal to $3,500 ($2,000 + (50 percent × $3,000)).

(4) *Grandfather rule for plans in existence on May 14, 1990.* A contributory DB plan that satisfies paragraph (c)(4) of

this section may determine an employee's employer-provided benefit by subtracting from the employee's total benefit the employee-provided benefits determined using any reasonable method set forth in the plan, provided that it is the same method used in determining whether the plan satisfies paragraph (c)(4)(ii)(D) of this section.

(5) *Government-plan method.* A contributory DB plan that is established and maintained for its employees by the government of any state or political subdivision or by any agency or instrumentality thereof may treat an employee's total benefit as entirely employer-provided.

(6) *Cessation of employee contributions.* If a contributory DB plan provides that no employee contributions may be made to the plan after the last day of the first plan year beginning on or after the effective date of these regulations, as set forth in §1.401(a)(4)–13 (a) and (b), the plan may treat an employee's total benefit as entirely employer-provided.

(c) *Rules applicable in determining whether employee-provided benefits are nondiscriminatory in amount*—(1) *In general.* A contributory DB plan satisfies §1.401(a)(4)–1(b)(2) with respect to the amount of employee-provided benefits for a plan year only if the plan satisfies the requirements of paragraph (c)(2), (c)(3), or (c)(4) of this section for the plan year. This requirement applies regardless of the method used to determine the amount of employer-provided benefits under paragraph (b) of this section.

(2) *Same rate of contributions.* This requirement is satisfied for a plan year if the employee contribution rate (within the meaning of paragraph (b)(2)(ii)(A) of this section) is the same for all employees for the plan year.

(3) *Total-benefits method.* This requirement is satisfied for a plan year if—

(i) The total benefits (i.e., the sum of employer-provided and employee-provided benefits) under the plan would satisfy §1.401(a)(4)–3 if all benefits were treated as employer-provided benefits; and

(ii) The plan's contribution requirements satisfy paragraph (b)(2)(ii)(A) of this section.

(4) *Grandfather rules for plans in existence on May 14, 1990*—(i) *In general.* This requirement is satisfied for a plan year if the plan contained provisions as of May 14, 1990, that meet the requirements of paragraph (c)(4)(ii) or (c)(4)(iii) of this section.

(ii) *Graded contribution rates.* The plan's provisions meet the requirements of this paragraph (c)(4)(ii) if all the following requirements are met:

(A) The provisions require employee contributions at a greater rate (expressed as a percentage of compensation) at higher levels of compensation than at lower levels of compensation.

(B) The required rate of employee contributions is not increased after May 14, 1990, although the level of compensation at which employee contributions are required may be increased or decreased.

(C) All employees are permitted to make employee contributions under the plan at a uniform rate with respect to all compensation, beginning no later than the last day of the first plan year to which these regulations apply, as set forth in §1.401(a)(4)–13 (a) and (b).

(D) The benefits provided on account of employee contributions at lower levels of compensation are comparable to those provided on account of employee contributions at higher levels of compensation.

(iii) *Prior year compensation.* The plan's provisions meet the requirements of this paragraph (c)(4)(iii) if they are part of a plan maintained by more than one employer that requires employee contributions and the rate of required employee contributions, expressed as a percentage of compensation for the last calendar year ending before the beginning of the plan year, is the same for all employees.

[T.D. 8485, 58 FR 46802, Sept. 3, 1993]

§1.401(a)(4)–7 Imputation of permitted disparity.

(a) *Introduction.* In determining whether a plan satisfies section 401(a)(4) with respect to the amount of contributions or benefits, section 401(a)(5)(C) allows the disparities permitted under section 401(l) to be taken into account. For purposes of satisfying the safe harbors of §§1.401(a)(4)–2(b)(2) and 1.401(a)(4)–3(b), permitted disparity may be taken into account only by satisfying section 401(l) in form in accordance with § 1.401(l)–2 or 1.401(l)–3, respectively. For purposes of the general tests of §§ 1.401(a)(4)–2(c) and 1.401(a)(4)–3(c), permitted disparity may be taken into account only in accordance with the rules of this section. In general, this section allows permitted disparity to be arithmetically imputed with respect to employer-provided contributions or benefits by determining an adjusted allocation or accrual rate that appropriately accounts for the permitted disparity with respect to each employee. Paragraph (b) of this section provides rules for imputing permitted disparity with respect to employer-provided contributions by adjusting each employee's unadjusted allocation rate. Paragraph (c) of this section provides rules for imputing permitted disparity with respect to employer-provided benefits by adjusting each employee's unadjusted accrual rate. Paragraph (d) of this section provides rules of general application.

(b) *Adjusting allocation rates*—(1) *In general.* The rules in this paragraph (b) produce an adjusted allocation rate for each employee by determining the excess contribution percentage under the hypothetical formula that would yield the allocation actually received by the employee, if the plan took into account the full disparity permitted under section 401(l)(2) and used the taxable wage base as the integration level. This adjusted allocation rate is used to determine whether the amount of contributions under the plan satisfies the general test of § 1.401(a)(4)–2(c) and to apply the average benefit percentage test on the basis of contributions under § 1.410(b)–5(d). Paragraphs (b)(2) and (b)(3) of this section apply to employees whose plan year compensation does not exceed and does exceed, respectively, the taxable wage base, and paragraph (b)(4) of this section provides definitions.

(2) *Employees whose plan year compensation does not exceed taxable wage base.* If an employee's plan year compensation does not exceed the taxable wage base, the employee's adjusted allocation rate is the lesser of the A rate and the B rate determined under the formulas below, where the permitted disparity rate and the unadjusted allocation rate are determined under paragraph (b)(4) (ii) and (iv) of this section, respectively.

A Rate=2×unadjusted allocation rate

B Rate=unadjusted allocation rate+permitted disparity rate

(3) *Employees whose plan year compensation exceeds taxable wage base.* If an employee's plan year compensation exceeds the taxable wage base, the employee's adjusted allocation rate is the lesser of the C rate and the D rate determined under the formulas below, where allocations and the permitted disparity rate are determined under paragraph (b)(4) (i) and (ii) of this section, respectively.

$$\text{C Rate} = \frac{\text{allocations}}{\text{plan year compensation} - \frac{1}{2}\ \text{taxable wage base}}$$

$$\text{D Rate} = \frac{\text{allocations} + (\text{permitted disparity rate} \times \text{taxable wage base})}{\text{plan year compensation}}$$

(4) *Definitions.* In applying this paragraph (b), the following definitions govern—

(i) *Allocations.* Allocations means the amount determined by multiplying the employee's plan year compensation by the employee's unadjusted allocation rate.

(ii) *Permitted disparity rate*—(A) *General rule.* Permitted disparity rate means the rate in effect as of the beginning of the plan year under section 401(l)(2)(A)(ii) (e.g., 5.7 percent for plan years beginning in 1990).

(B) *Cumulative permitted disparity limit.* Notwithstanding paragraph (b)(4)(ii)(A) of this section, the permitted disparity rate is zero for an employee who has benefited under a defined benefit plan taken into account under §1.401(l)–5(a)(3) for a plan year that begins on or after one year from the first day of the first plan year to which these regulations apply, as set forth in §1.401(a)(4)–13 (a) and (b), if imputing permitted disparity would result in a cumulative disparity fraction for the employee, as defined in §1.401(l)–5(c)(2), that exceeds 35. See §1.401(l)–5(c)(1) for special rules for determining whether an employee has benefited under a defined benefit plan for this purpose.

(iii) *Taxable wage base.* Taxable wage base means the taxable wage base, as defined in §1.401(l)–1(c)(32), in effect as of the beginning of the plan year.

(iv) *Unadjusted allocation rate.* Unadjusted allocation rate means the employee's allocation rate determined under §1.401(a)(4)–2(c)(2)(i) for the plan year (expressed as a percentage of plan year compensation), without imputing permitted disparity under this section.

(5) *Example.* The following example illustrates the rules in this paragraph (b):

Example. (a) Employees M and N participate in a defined contribution plan maintained by Employer X. Employee M has plan year compensation of $30,000 in the 1990 plan year and has an unadjusted allocation rate of five percent. Employee N has plan year compensation of $100,000 in the 1990 plan year and has an unadjusted allocation rate of eight percent. The taxable wage base in 1990 is $51,300.

(b) Because Employee M's plan year compensation does not exceed the taxable wage base, Employee M's A rate is 10 percent (2×5 percent), and Employee M's B rate is 10.7 percent (5 percent+5.7 percent). Thus, Employee M's adjusted allocation rate is 10 percent, the lesser of the A rate and the B rate.

(c) Employee N's allocations are $8,000 (8 percent×$100,000). Because Employee N's plan year compensation exceeds the taxable wage base, Employee N's C rate is 10.76 percent ($8,000 divided by ($100,000−(½×$51,300))), and Employee N's D rate is 10.92 percent (($8,000+(5.7 percent×$51,300)) divided by $100,000). Thus, Employee N's adjusted allocation rate is 10.76 percent, the lesser of the C rate and the D rate.

(c) *Adjusting accrual rates*—(1) *In general.* The rules in this paragraph (c) produce an adjusted accrual rate for each employee by determining the excess benefit percentage under the hypothetical plan formula that would yield the employer-provided accrual actually received by the employee, if the plan took into account the full permitted disparity under section 401(l)(3)(A) in each of the first 35 years of an employee's testing service under the plan and used the employee's covered compensation as the integration level. This adjusted accrual rate is used to determine whether the amount of employer-provided benefits under the plan satisfies the alternative safe harbor for flat benefit plans under §1.401(a)(4)–3(b)(4)(i)(C)(*3*) or the general test of §1.401(a)(4)–3(c), and to apply the average benefit percentage test on the basis of benefits under §1.410(b)–5. Paragraphs (c)(2) and (c)(3) of this section apply to employees whose average annual compensation does not exceed and does exceed, respectively, covered compensation, and paragraph (c)(4) of this section provides definitions. Paragraph (c)(5) of this section provides a special rule for employees with negative unadjusted accrual rates.

(2) *Employees whose average annual compensation does not exceed covered compensation.* If an employee's average annual compensation does not exceed the employee's covered compensation, the employee's adjusted accrual rate is the lesser of the A rate and the B rate determined under the formulas below, where the permitted disparity factor and the unadjusted accrual rate are determined under paragraph (c)(4)(iii) and (v) of this section, respectively.

$$\text{A Rate} = 2 \times \text{unadjusted accrual rate}$$

$$\text{B Rate} = \text{unadjusted accrual rate} + \text{permitted disparity factor}$$

(3) *Employees whose average annual compensation exceeds covered compensation.* If an employee's average annual compensation exceeds the employee's covered compensation, the employee's adjusted accrual rate is the lesser of the C rate and D rate determined under the formulas below, where the employer-provided accrual and the permitted disparity factor are determined under paragraph (c)(4)(ii) and (iii) of this section, respectively.

$$\text{C Rate} = \frac{\text{employer-provided accrual}}{\text{average annual compensation} - \frac{1}{2}\ \text{covered compensation}}$$

$$\text{D Rate} = \frac{\text{employer-provided accrual} + (\text{permitted disparity factor} \times \text{covered compensation})}{\text{average annual compensation}}$$

(4) *Definitions.* For purposes of this paragraph (c), the following definitions apply.

(i) *Covered compensation.* Covered compensation means covered compensation as defined in § 1.401(l)–1(c)(7). Notwithstanding § 1.401(l)–1(c)(7)(iii), an employee's covered compensation must be automatically adjusted each plan year for purposes of applying this paragraph (c).

(ii) *Employer-provided accrual.* Employer-provided accrual means the amount determined by multiplying the employee's average annual compensation by the employee's unadjusted accrual rate.

(iii) *Permitted disparity factor*—(A) *General rule.* Permitted disparity factor for an employee means the sum of the employee's annual permitted disparity factors determined under paragraph (c)(4)(iii)(B) of this section for each of the years in the measurement period used for determining the employee's accrual rate in § 1.401(a)(4)–3(d)(1), divided by the employee's testing service during that measurement period.

(B) *Annual permitted disparity factor*—(*1*) *Definition.* An employee's annual permitted disparity factor is generally 0.75 percent adjusted, pursuant to § 1.401(l)–3(e), using as the age at which benefits commence the lesser of age 65 or the employee's testing age. No adjustments are made in the annual permitted disparity factor unless an employee's testing age is different from the employee's social security retirement age. An annual permitted disparity factor that is less than the annual permitted disparity factor described in the first sentence of this paragraph (c)(4)(iii)(B)(*1*) may be used if it is a uniform percentage of that factor (e.g., 50 percent of the annual permitted disparity factor) or a fixed percentage (e.g., 0.65 percent) for all employees.

(*2*) *Annual permitted disparity factor after 35 years.* For purposes of determining the sum described in paragraph (c)(4)(iii)(A) of this section, the annual permitted disparity factor for each of the employee's first 35 years of testing service is the amount described in paragraph (c)(4)(iii)(B)(*1*) of this section, and the annual permitted disparity factor in any subsequent year equals zero. This rule applies regardless of whether the end of the measurement period extends beyond an employee's first 35 years of testing service. Thus, for example, if the measurement period is the current plan year and the employee completed 35 years of testing service prior to the beginning of the current plan year, under this paragraph (c)(4)(iii)(B)(*2*) the annual permitted disparity factor in the current plan year (and hence the sum of the annual permitted disparity factors for each year in the measurement period) is zero.

(*3*) *Cumulative permitted disparity limit.* The 35 years used in paragraph (c)(4)(iii)(B)(*2*) of this section must be reduced by the employee's cumulative disparity fraction, as defined in § 1.401(l)–5(c)(2), but determined solely with respect to the employee's total years of service under all plans taken into account under § 1.401(l)–5(a)(3) during the measurement period, other than the plan being tested.

(iv) *Social security retirement age.* Social security retirement age means social security retirement age as defined in section 415(b)(8).

(v) *Unadjusted accrual rate.* Unadjusted accrual rate means the normal or most valuable accrual rate, whichever is being determined for the employee under §1.401(a)(4)–3(d), expressed as a percentage of average annual compensation, without imputing permitted disparity under this section.

(5) *Employees with negative unadjusted accrual rates.* Notwithstanding the formulas in paragraph (c)(2) and (c)(3) of this section, if an employee's unadjusted accrual rate is less than zero, the employee's adjusted accrual rate is deemed to be the employee's unadjusted accrual rate.

(6) *Example.* The following example illustrates the rules in this paragraph (c):

Example. (a) Employees M and N participate in a defined benefit plan that uses a normal retirement age of 65. The plan is being tested for the plan year under §1.401(a)(4)–3(c), using unadjusted accrual rates determined using a plan year measurement period under §1.401(a)(4)–3(d)(1)(iii)(A). Employee M has an unadjusted normal accrual rate of 1.48 percent, average annual compensation of $21,000, and an employer-provided accrual of $311 (1.48 percent×$21,000). Employee N has an unadjusted normal accrual rate of 1.7 percent, average annual compensation of $106,000, and an employer-provided accrual of $1,802 (1.7 percent×$106,000). The covered compensation of both Employees M and N is $25,000, and social security retirement age for both employees is 65. Neither employee has testing service of more than 35 years and neither has ever participated in another plan.

(b) Because Employee M's average annual compensation does not exceed covered compensation, Employee M's A rate is 2.96 percent (2.0×1.48 percent), and Employee M's B rate is 2.23 percent (1.48 percent+0.75 percent). Thus, Employee M's adjusted accrual rate is 2.23 percent, the lesser of the A rate and the B rate.

(c) Because Employee N's average annual compensation exceeds covered compensation, Employee N's C rate is 1.93 percent ($1,802/($106,000−(0.5×$25,000))), and Employee N's D rate is 1.88 percent (($1,802+(0.75 percent×$25,000))/$106,000). Thus, Employee N's adjusted accrual rate is 1.88 percent, the lesser of the C rate and the D rate.

(d) *Rules of general application*—(1) *Eligible plans.* The rules in this section may be used only for those plans to which the permitted disparity rules of section 401(l) are available. See §1.401(l)–1(a)(3).

(2) *Exceptions from consistency requirements.* A plan does not fail to satisfy the consistency requirements of §1.401(a)(4)–2(c)(2)(vi) or §1.401(a)(4)–3(d)(2)(i) merely because the plan does not impute disparity for some employees to the extent required to comply with paragraph (d)(3) of this section, or because the plan does not impute disparity for any employees (including self-employed individuals within the meaning of section 401(c)(1)) who are not covered by any of the taxes under section 3111(a), section 3221, or section 1401.
