(d) Sell or lease (other than in the ordinary course of business) or otherwise dispose of any substantial part of its assets;

(e) Pay or secure any debt owing by X Corporation to A; and

(f) Pay any dividends, except in such amounts as may be required to make interest or principal payments on A's loan from the bank.

A retains the right to vote the stock unless a default occurs by A. Under paragraph (c)(2) of this section, the assets of X Corporation serve indirectly as security for A's performance of A's obligation to repay the loan and X Corporation will be considered a pledgor or guarantor with respect to that obligation. For purposes of paragraph (b) of §1.956–1, X Corporation will be considered to hold A's obligation to repay the bank $100,000 and under paragraph (e)(2) of §1.956–1, the amount taken into account in computing X Corporation's aggregate investment in United States property on December 31, 1981, is the unpaid principal amount of the obligation on that date.

(4) *Special rule for certain conduit financing arrangements.* The rule contained in subparagraph (1) of this paragraph shall not apply to a pledge or a guarantee by a controlled foreign corporation to secure the obligation of a United States person if such United States person is a mere conduit in a financing arrangement. Whether the United States person is a mere conduit

in a financing arrangement will depend upon all the facts and circumstances in each case. A United States person will be considered a mere conduit in a financing arrangement in a case in which a controlled foreign corporation pledges stock of its subsidiary corporation, which is also a controlled foreign corporation, to secure the obligation of such United States person, where the following conditions are satisfied:

(i) Such United States person is a domestic corporation which is not engaged in the active conduct of a trade or business and has no substantial assets other than those arising out of its relending of the funds borrowed by it on such obligation to the controlled foreign corporation whose stock is pledged; and

(ii) The assets of such United States person are at all times substantially offset by its obligation to the lender.

(d) *Definitions*—(1) *Meaning of ''acquired''*—(i) *Applicable rules.* For purposes of this section—

(a) Property shall be considered acquired by a foreign corporation when such corporation acquires an adjusted basis in the property;

(*b*) Property which is an obligation of a United States person with respect to which a controlled foreign corporation is a pledgor or guarantor (within the meaning of paragraph (c) of this section) shall be considered acquired when the corporation becomes liable as a pledgor or guarantor or is otherwise considered a pledgor or guarantor (within the meaning of paragraph (c)(2) of this section); and

(c) Property shall not be considered acquired by a foreign corporation if—

(1) Such property is acquired in a transaction in which gain or loss would not be recognized under this chapter to such corporation if such corporation were a domestic corporation;

(2) The basis of the property acquired by the foreign corporation is the same as the basis of the property exchanged by such corporation; and

(3) The property exchanged by the foreign corporation was not United States property (as defined in paragraph (a)(1) of this section) but would have been such property if it had been acquired by such corporation immediately before such exchange.

(ii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Foreign corporation R uses the calendar year as a taxable year and acquires before January 1, 1963, stock of domestic corporation M having as to R Corporation an adjusted basis of $10,000. The stock of M Corporation is not United States property of R Corporation on December 31, 1962, since it is not acquired in a taxable year of R Corporation beginning on or after Janury 1, 1963. On June 30, 1963, R Corporation sells the M Corporation stock for $15,000 in cash and expends such amount in acquiring stock of domestic corporation N which has as to R Corporation an adjusted basis of $15,000. For purposes of determining R Corporation's aggregate investment in United States property on December 31, 1963, R Corporation has, by virtue of acquiring the stock of N Corporation, acquired $15,000 of United States property.

Example 2. Foreign corporation S, a controlled foreign corporation for the entire period here involved, uses the calendar year as a taxable year and purchases for $100,000 on December 31, 1963, tangible property (not described in section 956(b)(2)) located in the United States and having a remaining estimated useful life of 10 years, subject to a mortgage of $80,000 payable in 5 annual installments. The property constitutes United States property as of December 31, 1963, and the amount taken into account for purposes of determining the aggregate amount of S Corporation's investment in United States property under paragraph (b) of § 1.956–1 is $20,000. No depreciation is sustained with respect to the property during the taxable year 1963. During the taxable year 1964, S Corporation pays $16,000 on the mortgage and sustains $10,000 of depreciation with respect to the property. As of December 31, 1964, the amount taken into account with respect to the property for purposes of determining the aggregate amount of S Corporation's investment in United States property under paragraph (b) of § 1.956–1 is $26,000, computed as follows:

Cost of property		$100,000
Less: Reserve for depreciation		10,000
Adjusted basis of property		90,000
Less: Liability to which property is subject:		
Gross amount of mortgage	$80,000	
Payment during 1964	16,000	
		64,000
Amount taken into account (12–31–64)		26,000

Example 3. Controlled foreign corporation T uses the calendar year as a taxable year and acquires on December 31, 1963, $10,000 of

United States property not described in section 956(b)(2); no depreciation is sustained with respect to the property during 1963. Corporation T's current and accumulated earnings and profits (determined as provided in paragraph (b) of §1.956–1) as of December 31, 1963, are in excess of $10,000, and T Corporation's United States shareholders include in their gross income under section 951(a)(1)(B) their pro rata share of T Corporation's increase ($10,000) for 1963 in earnings invested in United States property. On January 1, 1964, T Corporation acquires an additional $10,000 of United States property not described in section 956(b)(2). Each of the two items of property has an estimated useful life of 5 years, and T Corporation sustains $4,000 of depreciation with respect to such properties during its taxable year 1964. Corporation T's current and accumulated earnings and profits as of December 31, 1964, exceed $16,000, determined as provided in paragraph (b) of §1.956–1. Corporation T pays no amounts during 1963 to which section 959(c)(1) applies. Corporation T's investment of earnings in United States property at December 31, 1964, is $16,000, and its increase for 1964 in earnings invested in United States property is $6,000.

Example 4. Foreign corporation U uses the calendar year as a taxable year and acquires before January 1, 1963, stock in domestic corporation M having as to U Corporation an adjusted basis of $10,000. On December 1, 1964, pursuant to a statutory merger described in section 368(a)(1), M Corporation merges into domestic corporation N, and U Corporation receives on such date one share of stock in N Corporation, the surviving corporation, for each share of stock it held in M Corporation. Pursuant to section 354 no gain or loss is recognized to U Corporation, and pursuant to section 358 the basis of the property received (stock of N Corporation) is the same as that of the property exchanged (stock of M Corporation). Corporation U is not considered for purposes of section 956 to have acquired United States property by reason of its receipt of the stock in N Corporation.

Example 5. The facts are the same as in example 4, except that U Corporation acquires the stock of M Corporation on February 1, 1963, rather than before January 1, 1963. For purposes of determining U Corporation's aggregate investment in United States property on December 31, 1963, U Corporation has, by virtue of acquiring the stock of M Corporation, acquired $10,000 of United States property. Corporation U pays no amount during 1963 to which section 959(c)(1) applies. The reorganization and resulting acquisition on December 1, 1964, by U Corporation of N Corporation's stock also represents an acquisition of United States property; however, assuming no other change in U Corporation's aggregate investment in United States property during 1964, U Corporation's increase for such year in earnings invested in United States property is zero.

(2) [Reserved]

(Secs. 956(c), 7805, Internal Revenue Code of 1954 (76 Stat. 1017, 68A Stat. 917; (26 U.S.C. 956(c) and 7805 respectively)))

[T.D. 6704, 29 FR 2601, Feb. 20, 1964, as amended by T.D. 7712, 45 FR 52374, Aug. 7, 1980; T.D. 7797, 46 FR 57675, Nov. 25, 1981; T.D. 8209, 53 FR 22171, June 14, 1988]

§1.956–2T Definition of United States Property (temporary).

(a)—(c) [Reserved]

(d)(1) [Reserved]

(2) *Obligation defined*—(i) *Rule.* For purposes of §1.956–2 of the regulations, the term ‘‘obligation’’ includes any bond, note, debenture, certificate, bill receivable, account receivable, note receivable, open account, or other indebtedness, whether or not issued at a discount and whether or not bearing interest, except that such term shall not include:

(A) Any indebtedness arising out of the involuntary conversion of property which is not United States property within the meaning of paragraph (a)(1) of §1.956–2, or

(B) Any obligation of a United States person (as defined in section 957(c)) arising in connection with the provision of services by a controlled foreign corporation to the United States person if the amount of such obligation outstanding at any time during the taxable year of the controlled foreign corporation does not exceed an amount which would be ordinary and necessary to carry on the trade or business of the controlled foreign corporation and the United States person if they were unrelated. The amount of such obligations shall be considered to be ordinary and necessary to the extent of such receivables that are paid within 60 days.

See §1.956–2(b)(1)(v) for the exclusion from United States property of obligations arising in connection with the sale or processing of property where such obligations are ordinary and necessary as to amount.

(ii) *Effective date.* This section is effective June 14, 1988, with respect to investments made on or after June 14, 1988.

[T.D. 8209, 53 FR 22171, June 14, 1988]

§ 1.956–3T Certain trade or service receivables acquired from United States persons (temporary).

(a) *In general.* For purposes of section 956(a) and § 1.956–1, the term ''United States property'' also includes any trade or service receivable if the trade or service receivable is acquired (directly or indirectly) after March 1, 1984, from a related person who is a United States person (as defined in section 7701(a)(30)) (hereinafter referred to as a ''related United States person'') and the obligor under the receivable is a United States person. A trade or service receivable described in this paragraph shall be considered to be United States property notwithstanding the exceptions (other than subparagraph (H)) contained in section 956(b)(2). The terms ''trade or service receivable'' and ''related person'' have the respective meanings given to such terms by section 864(d) and the regulations thereunder. For purposes of this section, the exception contained in § 1.956–2T(d)(2)(i)(B) for short-term obligations shall not apply to service receivables described in this paragraph.

(b) *Acquisition of a trade or service receivable*—(1) *General rule.* The rules of § 1.864–8T(c)(1) shall be applied to determine whether a controlled foreign corporation has acquired a trade or service receivable.

(2) *Indirect acquisitions*—(i) *Acquisition through unrelated person.* A trade or service receivable will be considered to be acquired from a related person if it is acquired from an unrelated person who acquired (directly or indirectly) such receivable from a person who is a related person to the acquiring person.

(ii) *Acquisition by nominee or pass-through entity.* A controlled foreign corporation will be considered to have acquired a trade or service receivable of a related United States person held on its behalf:

(A) By a nominee or by a partnership, simple trust, S corporation or other pass-through entity to the extent the controlled foreign corporation owns (directly or indirectly) a beneficial interest in such partnership or other pass-through entity; or

(B) By another foreign corporation that is controlled by the controlled foreign corporation, if one of the principal purposes for creating, organizing, or funding such other foreign corporation (through capital contributions or debt) is to avoid the application of section 956. *See* § 1.956–1T.

The rule of this paragraph (b)(2)(ii) does not limit the application of paragraph (b)(2)(iii) of this section regarding the characterization of trade or service receivables of unrelated persons acquired pursuant to certain swap or pooling arrangements. The following examples illustrate the application of this paragraph (b)(2)(ii).

Example 1. FS1, a controlled foreign corporation with substantial accumulated earnings and profits, contributes $2,000,000 to PS, a partnership, in exchange for a 20 percent limited partnership interest in PS. PS purchases trade or service receivables of FS1's domestic parent, P. The obligors under the receivables are United States persons. PS does not purchase receivables of any person who is related to any other partner in PS. Under paragraph (b)(2)(ii)(A) of this section, there is an investment of the earnings of FS1 in United States property equal to 20 percent of PS's basis in the receivables of P.

Example 2. FS1, a controlled foreign corporation, has accumulated more than $3,000,000 in earnings and profits. It organizes a wholly-owned foreign corporation, FS2, with a $2,000,000 equity contribution. FS2 has no earnings and profits. FS2 uses the funds to purchase trade or service receivables of FS1's domestic parent, P. The obligors under the receivables are United States persons. Under paragraph (b)(2)(ii)(B) of this section, there is an investment of the earnings of FS1 in United States property equal to $2,000,000.

(iii) *Swap or pooling arrangements.* A trade or service receivable of an unrelated person will be considered to be a trade or service receivable acquired from a related United States person and subject to the rules of this section if it is acquired in accordance with an arrangement that involves two or more groups of related persons that are unrelated to each other and the effect of the arrangement is that one or more related persons in each group acquire (directly or indirectly) trade or service receivables of one or more unrelated United States persons who are also parties to the arrangement, in exchange for reciprocal purchases of receivables of United States persons in the first group. The following example illustrates the application of this paragraph (b)(2)(iii).

Example. Controlled foreign corporations A, B, C, and D are wholly-owned subsidiaries of domestic corporations M, N, O, and P, respectively. M, N, O, and P are not related persons. According to a prearranged plan, A, B, C, and D each acquire trade or service receivables of M, N, O, and/or P. The obligors under some or all of the receivables acquired by each of A, B, C, and D are United States persons. Because the effect of this arrangement is that the unrelated groups acquire each other's trade or service receivables of United States persons pursuant to the arrangement, there is an investment of the earnings of each of A, B, C, and D in United States property to the extent of the purchase price of those receivables under which the obligors are United States persons.

(iv) *Financing arrangements.* If a controlled foreign corporation participates (directly or indirectly) in a lending transaction that results in a loan to a United States person who purchases property described in section 1221(1) (hereinafter referred to as ''inventory property'') or services of a related United States person, or to any person who purchases trade or service receivables of a related United States person under which the obligor is a United States person, or to a person who is related to any such purchaser, and if the loan would not have been made or maintained on the same terms but for the corresponding purchase, then the controlled foreign corporation shall be considered to have indirectly acquired a trade or service receivable described in paragraph (a) of this section. For purposes of this paragraph (b)(2)(iv), it is immaterial that the sums lent are not, in fact, the sums used to finance the purchase of the inventory property or services or trade or service receivables of a related United States person. The amount to be taken into account with respect to the controlled foreign corporation's investment in United States property (resulting from application of this paragraph (b)(2)(iv)) shall be the amount lent pursuant to a lending transaction described in this paragraph (b)(2)(iv), if the amount lent is equal to or less than the purchase price of the inventory property, services, or trade or service receivables. If the amount lent is greater than the purchase price of the inventory property, services or receivables, the amount to be taken into account shall be the purchase price. The following examples illustrate the application of this paragraph (b)(2)(iv).

Example 1. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation. P sells equipment for $2,000,000 to X, an unrelated United States person. FS1 makes a $1,000,000 short-term loan to X, which loan would not have been made or maintained on the same terms but for X's purchase of P's equipment. Because FS1 directly participates in a lending transaction described in this paragraph (b)(2)(iv), FS1 is considered to have acquired the receivable of a related United States person. Thus, there is an investment of FS1's earnings and profits in United States property in the amount of $1,000,000.

Example 2. The facts are the same as in Example 1, except that instead of loaning money to X directly, FS1 deposits $3,000,000 with an unrelated financial institution that loans $2,000,000 to X in order for X to purchase P's equipment. The loan would not have been made or maintained on the same terms but for the corresponding deposit. Accordingly, the deposit and the loan are treated as a direct loan from FS1 to X. *See* Rev. Rul. 87–89, 1987–37 I.R.B. 16. Because FS1 indirectly participates in a lending transaction described in this paragraph (b)(2)(iv), FS1 is considered to have acquired the receivable of a related United States person. Thus, there is an investment of FS1's earnings and profits in United States property in the amount of $2,000,000.

Example 3. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation. FS1 makes a $3,000,000 loan to U, an unrelated foreign corporation, in connection with U's purchase for $2,000,000 of receivables from the sale of inventory property by P to United States obligors. Because FS1 directly participates in a lending transaction described in this paragraph (b)(2)(iv), FS1 is considered to have acquired receivables of a related United States person. Thus, there is an investment of FS1's earnings and profits in United States property in the amount of $2,000,000.

(c) *Substitution of obligor.* For purposes of this section, the substitution of another person for a United States obligor may be disregarded. Thus, if a purchaser who is a United States person arranges for a foreign person to pay a United States seller of inventory property or services and the seller transfers by sale or otherwise to its own controlled foreign corporation the foreign person's obligation for payment, then the acquisition of the foreign person's obligation shall constitute an investment in United States property by the seller's controlled foreign corporation, unless it can be demonstrated by the parties to the transaction that the primary purpose for the arrangement was not the avoidance of section 956. The following example illustrates the application of this paragraph.

Example. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation with substantial accumulated earnings and profits. P sells equipment to X, a domestic corporation unrelated to P. To pay for the equipment, X arranges for a foreign financing entity to issue a note to P. P then sells the note to FS1. FS1 has made an investment in United States property in the amount of the purchase price of the note.

[T.D. 8209, 53 FR 22169, June 14, 1988]

§ 1.957–1 Definition of controlled foreign corporation.

(a) *In general.* The term *controlled foreign corporation* means any foreign corporation of which more than 50 percent (or such lesser amount as is provided in section 957(b) or section 953(c)) of either—

(1) The total combined voting power of all classes of stock of the corporation entitled to vote; or

(2) The total value of the stock of the corporation, is owned within the meaning of section 958(a), or (except for purposes of section 953(c)) is considered as owned by applying the rules of section 958(b) and § 1.958–2, by United States shareholders on any day during the taxable year of such foreign corporation. For the definition of the term *United States shareholder,* see sections 951(b) and 953(c)(1)(A). For the definition of the term *foreign corporation,* see § 301.7701–5 of this chapter (Procedure and Administration Regulations). For the treatment of associations as corporations, see section 7701(a)(3) and §§ 301.7701–1 and 301.7701–2 of this chapter. For the definition of the term *stock,* see sections 958(a)(3) and 7701(a)(7). For the classification of a member in an association, joint stock company or insurance company as a shareholder, see section 7701(a)(8).

(b) *Percentage of total combined voting power owned by United States shareholders*—(1) *Meaning of combined voting power.* In determining for purposes of paragraph (a) of this section whether United States shareholders own the requisite percentage of total combined voting power of all classes of stock entitled to vote, consideration will be given to all the facts and circumstances of each case. In all cases, however, United States shareholders of a foreign corporation will be deemed to own the requisite percentage of total combined voting power with respect to such corporation—

(i) If they have the power to elect, appoint, or replace a majority of that body of persons exercising, with respect to such corporation, the powers ordinarily exercised by the board of directors of a domestic corporation;

(ii) If any person or persons elected or designated by such shareholders have the power, where such shareholders have the power to elect exactly one-half of the members of such governing body of such foreign corporation, either to cast a vote deciding an evenly divided vote of such body or, for the duration of any deadlock which may arise, to exercise the powers ordinarily exercised by such governing body; or

(iii) If the powers which would ordinarily be exercised by the board of directors of a domestic corporation are exercised with respect to such foreign corporation by a person whom such shareholders have the power to elect, appoint, or replace.

(2) *Shifting of formal voting power.* Any arrangement to shift formal voting power away from United States shareholders of a foreign corporation will not be given effect if in reality voting power is retained. The mere ownership of stock entitled to vote does not by itself mean that the shareholder owning such stock has the voting power of such stock for purposes of section 957. For example, if there is any agreement, whether express or implied, that any shareholder will not vote his stock or will vote it only in a specified manner, or that shareholders owning stock having not more than 50 percent of the total combined voting power will exercise voting power normally possessed by a majority of stockholders, then the nominal ownership of the voting power will be disregarded in determining which shareholders actually hold such voting power, and this determination

will be made on the basis of such agreement. Moreover, where United States shareholders own shares of one or more classes of stock of a foreign corporation which has another class of stock outstanding, the voting power ostensibly provided such other class of stock will be deemed owned by any person or persons on whose behalf it is exercised or, if not exercised, will be disregarded if the percentage of voting power of such other class of stock is substantially greater than its proportionate share of the corporate earnings, if the facts indicate that the shareholders of such other class of stock do not exercise their voting rights independently or fail to exercise such voting rights, and if a principal purpose of the arrangement is to avoid the classification of such foreign corporation as a controlled foreign corporation under section 957.

(c) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Foreign corporation R has two classes of capital stock outstanding, 60 shares of class A stock, and 40 shares of class B stock. Each share of each class of stock has one vote for all purposes. E, a United States person, owns 51 shares of class A stock. Corporation R is a controlled foreign corporation.

Example 2. Foreign corporation S has three classes of capital stock outstanding, consisting of 60 shares of class A stock, 40 shares of class B stock, and 200 shares of class C stock. The owners of a majority of class A stock are entitled to elect 6 of the 10 corporate directors, and the owners of a majority of the class B stock are entitled to elect the other 4 of the 10 directors. Class C stock has no voting rights. D, a United States person, owns all of the shares of the class C stock. He also owns 31 shares of class A stock and as such an owner can elect 6 members of the board of directors. None of the remaining shares of class A stock, or the 40 shares of class B stock, is owned, or considered as owned, within the meaning of section 958, by a United States person. Since, as owner of 31 shares of the class A stock, D has sufficient voting power to elect 6 directors, D has more than 50 percent of the total combined voting power of all classes of stock entitled to vote, and S Corporation is a controlled foreign corporation.

Example 3. M, a United States person, owns a 51-percent interest in R Company, a foreign company of which he is a member. The company, if it were domestic, would be taxable as a corporation. The remaining interest of 49 percent in the company is owned by seven other members none of whom is a United States person. The memorandum of association of R Company provides for only one manager, who with respect to the company exercises the powers ordinarily exercised by a board of directors of a domestic corporation. The manager is to be elected by unanimous agreement of all the members. Since M owns 51 percent of the company, he will be deemed to own more than 50 percent of the total combined voting power of all classes of stock of R Company entitled to vote, notwithstanding that he has power to elect a manager only with the agreement of the other members. Company R is a controlled foreign corporation.

Example 4. Domestic corporation M owns a 49-percent interest in S Company, a foreign company of which it is a member. The company, if it were domestic, would be taxable as a corporation. Company S is formed under the laws of foreign country Y. The remaining interest of 51 percent in S Company is owned by persons who are not United States persons. The organization contract of S Company provides for one manager, B, a citizen and resident of country Y who is an officer of M Corporation in charge of its foreign operations in such country, or any person M Corporation may at any time appoint to succeed B in such capacity. The manager has the sole authority with respect to S Company to exercise powers ordinarily exercised by a board of directors of a domestic corporation. Since M Corporation has the discretionary power to replace B and to appoint his successor as manager of S Company, the company is a controlled foreign corporation.

Example 5. N, a United States person, owns 50 percent of the outstanding shares of the only class of capital stock of foreign corporation R. An additional 48 percent of the outstanding shares is owned by foreign corporation S. The remaining 2 percent of shares is owned by P, a citizen and resident of foreign country T, who regularly acts as attorney for N in the conduct of N's business affairs in country T. All of the shares of the outstanding capital stock of R Corporation are bearer shares. At the time of the issuance of the shares to him, P places the certificates for such shares in a depository to which N has access. On several occasions N, with P's acquiescence, has taken such shares from the depository and, on one such occasion, used the shares as collateral in borrowing funds on a loan. Although dividends, when paid, are paid to P on his shares, his charges to N for legal fees are reduced by the amount of the dividends paid on such shares. Although P votes his shares at meetings of shareholders, the facts set forth above indicate an implied agreement between P and N that N is really to retain dominion over the stock. N is deemed to own the voting rights ostensibly attached to the stock owned by P, and R Corporation is a controlled foreign corporation.

Example 6. M, a domestic corporation which manufactures in the United States and distributes all of its production for foreign consumption through N, a person other than a related person or a United States person, forms foreign corporation S to purchase products from M Corporation and sell them to N. Corporations S and M have common directors. The outstanding capital stock of S Corporation consists of 10,000 shares of $100 par value class A stock, which has no voting rights except to vote for dissolution of the corporation on a share-for-share basis, and 500 shares of no par class B stock which has full voting rights. Each class of the outstanding stock is to participate on a share for share basis in any dividend. The class A stock has a preference as to assets on dissolution of the corporation to the extent of its par value as well as the right to participate with the class B stock in all other assets on a share for share basis. All of the shares of class A stock are issued to M Corporation in return for property having a value of $1 million. Of the class B stock, 300 of the shares are issued to N in return for $3,000 in cash and 200 shares are issued to M Corporation for $2,000 in cash. At stockholder meetings N never votes in opposition to M Corporation on important issues. Corporation S has average annual earnings of $200,000, all of which will be subpart F income if S Corporation is held to be a controlled foreign corporation. All such earnings are accumulated. Although N ostensibly has 60 percent of the voting power of S Corporation by virtue of his ownership of 300 shares of class B stock, he has the right to only approximately 3 percent of any dividends which may be paid by S Corporation; in addition, upon liquidation of S Corporation, N is entitled to share in the assets only after M Corporation has received the par value of its 10,000 shares of class A stock, or $1 million. Thus, the voting power owned by N is substantially greater than its proportionate share of the earnings of S Corporation. In addition, the facts set forth above indicate that N is not exercising his voting rights independently and that a principal purpose of the capitalization arrangement is to avoid classification of S Corporation as a controlled foreign corporation. For these reasons, the voting power ostensibly provided the class B stock will be deemed owned by M Corporation, and S Corporation is a controlled foreign corporation.

Example 7. Foreign corporation A, authorized to issue 100 shares of one class of capital stock, issues, for $1,000 per share, 45 shares to domestic corporation M, 45 shares to foreign corporation B, and 10 shares to foreign corporation C. Corporation C, a bank, lends $3 million to finance the operations of A Corporation. In the course of negotiating these financial arrangements, D, an officer of C Corporation, and E, an officer of M Corporation, orally agree that C Corporation will vote its stock as M Corporation directs. By virtue of such oral agreement M Corporation possesses the voting power ostensibly owned by C Corporation, and A Corporation is a controlled foreign corporation.

Example 8. For its prior taxable year, *JV*, a foreign corporation, had outstanding 1000 shares of class A stock, which is voting common, and 1000 shares of class B stock, which is nonvoting preferred. *DP*, a domestic corporation, and *FP*, a foreign corporation, each owned precisely 500 shares of both class A and class B stock, and each elected 5 of the 10 members of *JV*'s board of directors. The other facts and circumstances were such that *JV* was not a controlled foreign corporation on any day of the prior taxable year. On the first day of the current taxable year, *DP* purchased one share of class B stock from *FP*. *JV* was a controlled foreign corporation on the following day because over 50 percent of the total value in the corporation was held by a person that was a United States shareholder under section 951(b). See § 1.951–1(f).

Example 9. The facts are the same as in *Example 8* except that the stock of *FP* was publicly traded, *FP* had one class of stock, and on the first day of the current taxable year *DP* purchased one share of *FP* stock on the foreign stock exchange instead of purchasing one share of *JV* stock from *FP*. *JV* became a controlled foreign corporation on the following day because over 50 percent of the total value in the corporation was held by a person that was a United States shareholder under section 951(b).

Example 10. X, a foreign corporation, is incorporated under the laws of country *Y*. Under the laws of country *Y, X* is considered a mutual insurance company. *X* issues insurance policies that provide the policyholder with the right to vote for directors of the corporation, the right to a share of the assets upon liquidation in proportion to premiums paid, and the right to receive policyholder dividends in proportion to premiums paid. Only policyholders are provided with the right to vote for directors, share in assets upon liquidation, and receive distributions. United States policyholders contribute 25 percent of the premiums and have 25 percent of the outstanding rights to vote for the board of directors. Based on these facts, the United States policyholders are United States shareholders owning the requisite combined voting power and value. Thus, *X* is a controlled foreign corporation for purposes of taking into account related person insurance income under section 953(c).

(d) *Effective date.* Paragraphs (a) and (c) *Examples 8* through *10* of this section are effective for taxable years of a controlled foreign corporation beginning after November 6, 1995.

[T.D. 6688, 28 FR 11631, Oct. 31, 1963, as amended by T.D. 8216, 53 FR 27510, July 21, 1988; T.D. 8618, 60 FR 46529, Sept. 7, 1995; 60 FR 62026, Dec. 4, 1995; T.D. 8704, 62 FR 21, Jan. 2, 1997]

§1.957–2 Controlled foreign corporation deriving income from insurance of United States risks.

(a) *In general.* For purposes of taking into account only the income derived from the insurance of United States risks under §1.953–1, the term ‘‘controlled foreign corporation’’ means any foreign corporation of which more than 25 percent, but not more than 50 percent, of the total combined voting power of all classes of stock entitled to vote is owned within the meaning of section 958(a), or is considered as owned by applying the rules of ownership of section 958(b), by United States shareholders on any day of the taxable year of such foreign corporation, but only if the gross amount of premiums received by such foreign corporation during such taxable year which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with United States risks, as defined in §1.953–2 or 1.953–3, exceeds 75 percent of the gross amount of all premiums received by such foreign corporation during such year which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with all risks. The subpart F income for a taxable year of a foreign corporation which is a controlled foreign corporation for such taxable year within the meaning of this paragraph shall, subject to the provisions of section 952(b), (c), and (d), and §1.952–1, include only the income derived from the insurance of United States risks, as determined under §1.953–1.

(b) *Gross amount of premiums defined.* For a foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as—

(1) A life insurance company to which part I (sections 801 through 820) of subchapter L of the Code applies,

(2) A mutual insurance company to which part II (sections 821 through 826) of subchapter L of the Code applies, or

(3) A mutual marine insurance or other insurance company to which part III (sections 831 and 832) of subchapter L of the Code applies,

the term ‘‘gross amount of premiums’’ means, for purposes of paragraph (a) of this section, the gross amount of premiums and other consideration which are taken into account by a life insurance company under section 809(c)(1). Determinations for purposes of this paragraph shall be made without regard to section 501(a).

[T.D. 6795, 30 FR 942, Jan. 29, 1965]

§1.957–3 Corporations organized in United States possessions.

(a) *General rule.* For purposes of sections 951 through 964, a corporation created or organized in a possession of the United States or under the laws of a possession of the United States shall not be treated as a controlled foreign corporation for any taxable year if—

(1) 80 percent or more of the gross income of such corporation for the 3-year period immediately preceding the close of the taxable year or for such part of such 3-year period as such corporation was in existence or for such part of such 3-year period as occurs on and after the beginning of such corporation’s first annual accounting period beginning after December 31, 1962, whichever period is shortest, was derived from sources within a possession of the United States; and

(2) 50 percent or more of the gross income of such corporation for such period, or for such part of such period, was derived from the active conduct within a possession of the United States of one or more trades or businesses constituting—

(i) The manufacture or processing of goods, wares, merchandise, or other tangible personal property;

(ii) The processing of agricultural or horticultural products or commodities (including but not limited to livestock, poultry, or fur-bearing animals);

(iii) The catching or taking of any kind of fish, or any manufacturing or processing of any products or commodities obtained from such activities;

(iv) The mining or extraction of natural resources, or any manufacturing or processing of any products or commodities obtained from such activities; or

(v) The ownership or operation of hotels.

(b) *Special provisions.* For purposes of section 957(c) and this section—

(1) *United States defined.* The term ''United States'' includes only the States and the District of Columbia.

(2) *Possession of the United States defined.* The term ''possession of the United States'' includes Guam, the Midway Islands, the Panama Canal Zone, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Wake Island.

(3) *Determination of source of gross income.* Whether gross income of a corporation referred to in paragraph (a) of this section is derived from sources within a possession of the United States shall be determined by the application of the provisions of § 1.955–6 except that, for purposes of making such determination, the term ''produced'', as used in paragraph (d)(2) of § 1.955–6, shall also include the activities described in paragraph (a)(2)(i) through (iv) of this section and the activities considered, under subparagraph (4) of this paragraph, to be qualifying trades or businesses.

(4) *Manufacturing or processing.* The trades or businesses which qualify under the provisions of paragraph (a)(2) of this section shall include, but not be limited to, the manufacture of tabulating cards, paper tablets or pads, facial tissues, and paper napkins from rolls of paper; the manufacture of such household products as liquid starch by mixing quantities of the ingredients which are used to produce liquid starch; and the manufacture of juices and drinks from fruit concentrates. In the application of paragraph (a)(2) of this section, proper regard shall be given to the classification of a trade or business as a manufacturing or processing activity under the applicable economic incentive law of the possession involved. The fact that an activity of a corporation qualifies as a trade or business for purposes of paragraph (a) of this section does not necessarily mean that such activity constitutes a substantial transformation of property within the meaning of paragraph (a)(4) of § 1.954–3 for purposes of determining any foreign base company income of such corporation.

[T.D. 6683, 28 FR 11184, Oct. 18, 1963]

§ 1.957–4 United States person defined.

(a) *Basic rule*—(1) *In general.* The term ''United States person'' has the same meaning for purposes of sections 951 through 964 which it has under section 7701(a)(30) and in the regulations thereunder, except as provided in section 957(d) and paragraphs (b), (c), and (d) of this section which provide, with respect to corporations organized in possessions of the United States, that certain residents of such possessions are not United States persons. The effect of determining that an individual is not a United States person for such purposes is to exclude such individual in determining whether a foreign corporation created or organized in, or under the laws of, Puerto Rico, the Virgin Islands, or any possession of the United States (other than Puerto Rico or the Virgin Islands) is a controlled foreign corporation. See § 1.957–1 for definition of the term ''controlled foreign corporation''; § 1.957–2 for a special limitation on the amount of subpart F income of certain controlled foreign corporations deriving income from the insurance of United States risks; and § 1.957–3 for the exclusion of certain corporations organized in United States possessions from the definition of controlled foreign corporation.

(2) *Special provisions applicable to possessions of the United States.* For purposes of section 957(d) and this section—

(i) *Possession of the United States defined.* The term ''possession of the United States'' has the same meaning which it has under paragraph (b)(2) of § 1.957–3.

(ii) *Determination of residence in a possession.* Whether an individual is a bona fide resident of Puerto Rico, the Virgin Islands, or any other possession of the United States, shall be determined in general by applying to the facts and circumstances in each case the principles of §§1.871–2 through 1.871–5, relating to the determination of residence in the United States.

(b) *Puerto Rico corporation and resident.* With respect only to a foreign corporation created or organized in, or under the laws of, Puerto Rico—

(1) If an individual (who, without regard to this paragraph, is a United States person) is a bona fide resident of Puerto Rico during his entire taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) If 50 percent or more of the gross income of such foreign corporation is derived from sources within Puerto Rico, as determined under §1.863–6, for the 3-year period (or for such part of such 3-year period as such foreign corporation has been in existence) ending with the close of the taxable year of such foreign corporation which—

(i) Ends with or within the taxable year next preceding such taxable year of such individual and at any time, during the period beginning with the beginning of such latter taxable year of such individual and ending not later than one year after the close of such taxable year of such foreign corporation, such individual directly owns stock in such foreign corporation, or

(ii) Ends within such taxable year of such individual and at any time, during the period beginning after the close of such taxable year of such foreign corporation and ending with the close of such taxable year of such individual, such individual directly owns stock in such foreign corporation,

then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation R, incorporated under the laws of Puerto Rico, is wholly owned by D, a United States citizen. D and corporation R use the calendar year as the taxable year. For 1961, 1962, and 1963, 60 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 40 percent of the gross income of R Corporation is derived from sources within Panama, as determined under §1.863–6. During all of 1964, D is a bona fide resident of Puerto Rico. D is not a United States person with respect to R Corporation for 1964. Accordingly, R Corporation is not a controlled foreign corporation at any time in 1964.

Example 2. Foreign corporation R is incorporated on January 1, 1962, under the laws of Puerto Rico. D, a United States citizen, owns all the one class of stock of R Corporation throughout 1962 and 1963. D and corporation R use the calendar year as the taxable year. For 1962, 55 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 45 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under §1.863–6. For 1963, 40 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 60 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under §1.863–6. During all of 1963 D is a bona fide resident of Puerto Rico. With respect to R Corporation, D is not a United States person for 1963 because D is a bona fide resident of Puerto Rico for all of 1963; 55 percent of the gross income of R Corporation for 1962 is derived from sources within Puerto Rico; and D owns stock in R Corporation at some time during 1963. Accordingly, R Corporation is not a controlled foreign corporation at any time in 1963. In making this determination, it is immaterial that R Corporation does not satisfy the 50-percent gross income test for 1963, the taxable year during all of which D is a resident of Puerto Rico.

Example 3. Foreign corporation R is incorporated on January 1, 1962, under the laws of Puerto Rico. D, a United States citizen, owns all the one class of stock of R Corporation throughout 1962 and 1963. D and corporation R use the calendar year as the taxable year. For 1962, 45 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 55 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under §1.863–6. For 1963, 60 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 40 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under §1.863–6. With respect to R Corporation, D is a United States person for 1963, since R Corporation does not satisfy the 50-percent gross income test for 1962. Accordingly, R Corporation is a controlled foreign corporation for all of 1963.

Example 4. Foreign corporation S is incorporated on July 1, 1962, under the laws of Puerto Rico. Corporation S uses the fiscal year ending on June 30 as the taxable year. For its fiscal year ending on June 30, 1963, 55 percent of the gross income of S Corporation is derived from sources within Puerto Rico and 45 percent of the gross income of S Corporation is derived from sources within Switzerland, as determined under § 1.863–6. For its fiscal years ending on June 30, 1964, and June 30, 1965, respectively, 40 percent of the gross income of S Corporation is derived from sources within Puerto Rico and 60 percent of the gross income of S Corporation is derived from sources within Switzerland, as determined under § 1.863–6. B, a United States citizen, who uses the calendar year as the taxable year, is a bona fide resident of Puerto Rico for all of 1964. On July 1, 1964, B acquires, and holds throughout the remainder of 1964, all of the one class of stock of S Corporation. With respect to S Corporation for its taxable year ending June 30, 1964, B is a United States person because—

(a) Although B is a bona fide resident of Puerto Rico for his entire year 1964 in which ends S Corporation's taxable year ending June 30, 1964, and S Corporation meets the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1963, B does not own stock in S Corporation during the period beginning January 1, 1964, and ending June 30, 1964, and

(b) Although B owns stock in S Corporation during the period beginning July 1, 1964, and ending December 31, 1964, S Corporation does not meet the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1964.

Accordingly, with respect to B, S Corporation is a controlled foreign corporation for its entire taxable year ending June 30, 1964.

Example 5. The facts are the same as in example 4, except B buys all of the stock of S Corporation on June 1, 1964, rather than on July 1, 1964. With respect to S Corporation for its taxable year ending June 30, 1964, B is not a United States person because B is a bona fide resident of Puerto Rico for his entire taxable year 1964 in which ends S Corporation's taxable year ending June 30, 1964; S Corporation meets the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1963; and B owns stock in S Corporation during the period beginning January 1, 1964, and ending June 30, 1964. Accordingly, with respect to B, S Corporation is not a controlled foreign corporation at any time during its taxable year ending June 30, 1964.

(c) *Virgin Islands corporation and President.* With respect only to a foreign corporation created or organized in, or under the laws of, the Virgin Islands—

(1) If an individual (who, without regard to this paragraph, is a United States person) is a bona fide resident of the Virgin Islands as of the last day of his taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) Such individual's income tax obligations under subtitle A (relating to income taxes) of the Code for his taxable year are satisfied, in accordance with section 28(a) of the Revised Organic Act of the Virgin Islands (48 U.S.C. 1642), by paying the tax on his income derived from all sources, both within and outside the Virgin Islands, into the treasury of the Virgin Islands, then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation S, incorporated under the laws of the Virgin Islands, is wholly owned by D, a United States citizen. Corporation S uses the fiscal year ending on June 30 as the taxable year, and D uses the calendar year as the taxable year. From September 1, 1963, to December 31, 1964, inclusive, D is a bona fide resident of the Virgin Islands. For 1963 and 1964, D satisfies his income tax obligations under section 28(a) of the Revised Organic Act of the Virgin Islands by paying the tax on his income derived from all sources, both within and outside the Virgin Islands, into the treasury of the Virgin Islands. With respect to S Corporation for its taxable years ending June 30, 1963, and 1964, D is not a United States person. Accordingly, S Corporation is not a controlled foreign corporation for such taxable years of such corporation.

Example 2. The facts are the same as in example 1, except that from August 15, 1964, to December 31, 1964, inclusive, D is a bona fide resident of the United States. Thus, D does not satisfy his income tax obligations for 1964 under section 28(a) of the Revised Organic Act of the Virgin Islands. The result is the same as in example 1, except that with respect to S Corporation for its taxable year ending June 30, 1964, D is a United States person and, accordingly, S Corporation is a controlled foreign corporation for such taxable year of such corporation.

(d) *Corporation and resident of other United States possessions.* With respect only to a foreign corporation created or organized in, or under the laws of, any possession of the United States (other than Puerto Rico or the Virgin Islands)—

(1) If an individual (who, without regard to this paragraph, is a United

States person) is a bona fide resident of such possession during his entire taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) Any part or all of such individual's income (other than amounts includible in his gross income under section 951(a)) for his taxable year derived, in accordance with §1.863–6, from sources within any possession of the United States (whether or not the possession of which such individual is a resident) is not, as a result of the application of section 931, included in his gross income for his taxable year,

then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. Subparagraph (2) of this paragraph shall apply only for purposes of determining whether an individual is a United States person; after such determination has been made, section 931 shall be applied to the gross income (including amounts includible in gross income under section 951(a)) of such individual to determine the amount to be excluded from such individual's gross income under section 931. The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation R, incorporated under the laws of Guam, is wholly owned by D, a United States citizen. D and corporation R use the calendar year as the taxable year and the cash receipts and disbursements method of accounting. D is a bona fide resident of Guam for all of 1963 and all of his income of $30,000 (determined without taking into account amounts includible in his gross income under section 951(a)) is derived from sources within Guam. Of such income, $24,000 is received in Guam and $6,000 is erceived in the United States. It meets the 3-year test of section 931(a) and, but for the application of section 931(b), all of his income of $30,000 would be excluded from gross income for 1963 under section 931. However, in accordance with section 931(b) and paragraph (c) of §1.931–1, the $6,000 received in the United States is included in gross income. Nevertheless, since part ($24,000) of his income of $30,000 for 1963 derived, in accordance with §1.863–6, from sources within Guam is not, as a result of the application of section 931, included in his gross income, D is not a United States person with respect to R Corporation for its taxable year 1963. Accordingly, R Corporation is not a controlled foreign corporation for its taxable year 1963.

Example 2. The facts are the same as in example 1, except that, instead of receiving the $6,000 in the United States, D receives $10,000 of the $30,000 in Guam for services performed for an agency of the United States. Under §1.863–6, all of D's income for 1963 is income derived from sources within Guam. However, since D's income of $10,000 from the agency of the United States is deemed under section 931 (i) to be derived from sources within the United States for purposes of section 931, at least 80 percent of his gross income for 1963, determined without the application of section 931, is not derived from sources within Guam. Accordingly, since no part of D's gross income of $30,000 for 1963 derived, in accordance with §1.863–6, from sources within Guam is, as a result of the application of section 931, excluded from gross income for 1963, D is a United States person with respect to R Corporation for R Corporation's taxable year 1963. Accordingly, R Corporation is a controlled foreign corporation for its taxable year 1963.

[T.D. 6775, 29 FR 16082, Dec. 2, 1964]

§1.958–1 Direct and indirect ownership of stock.

(a) *In general.* Section 958(a) provides that, for purposes of sections 951 to 964 (other than sections 955(b)(1)(A) and (B) and 955(c)(2)(A)(ii) (as in effect before the enactment of the Tax Reduction Act of 1975), and 960(a)(1)), stock owned means—

(1) Stock owned directly; and

(2) Stock owned with the application of paragraph (b) of this section.

The rules of section 958(a) and this section provide a limited form of stock attribution primarily for use in determining the amount taxable to a United States shareholder under section 951(a). These rules also apply for purposes of other provisions of the Code and regulations which make express reference to section 958(a).

(b) *Stock ownership through foreign entities.* For purposes of paragraph (a)(2) of this section, stock owned, directly or indirectly, by or for a foreign corporation, foreign partnership, or foreign trust or foreign estate (within the meaning of section 7701(a)(31)) shall be considered as being owned proportionately by its shareholders, partners, or beneficiaries, respectively. Stock considered to be owned by reason of the application of this paragraph shall, for purposes of reapplying this paragraph, be treated as actually owned by such person. Thus, this rule creates a chain of ownership; however, since the rule applies only to stock owned by a foreign entity, attribution under the rule stops with the first United States person in the chain of ownership running from the foreign entity. The application of this paragraph may be illustrated by the following example:

Example. Domestic corporation M owns 75 percent of the one class of stock in foreign corporation R, which in turn owns 80 percent of the one class of stock in foreign corporation S, which in turn owns 90 percent of the one class of stock in foreign corporation T. Under this paragraph, R Corporation is considered as owning 80 percent of the 90 percent of the stock which S Corporation owns in T Corporation, or 72 percent. Corporation M is considered as owning 75 percent of such 72 percent of the stock in T Corporation, or 54 percent. Since M Corporation is a domestic corporation, the attribution under this paragraph stops with M Corporation, even though, illustratively, such corporation is wholly owned by domestic corporation N.

(c) *Rules of application*—(1) *Special rule for mutual insurance companies.* For purposes of applying paragraph (a) of this section in the case of a foreign mutual insurance company, the term ''stock'' shall include any certificate entitling the holder to voting power in the corporation.

(2) *Amount of interest in foreign corporation, foreign partnership, foreign trust, or foreign estate.* The determination of a person's proportionate interest in a foreign corporation, foreign partnership, foreign trust, or foreign estate will be made on the basis of all the facts and circumstances in each case. Generally, in determining a person's proportionate interest in a foreign corporation, the purpose for which the rules of section 958(a) and this section are being applied will be taken into account. Thus, if the rules of section 958(a) are being applied to determine the amount of stock owned for purposes of section 951(a), a person's proportionate interest in a foreign corporation will generally be determined with reference to such person's interest in the income of such corporation. If the rules of section 958(a) are being applied to determine the amount of voting power owned for purposes of section 951(b) or 957, a person's proportionate interest in a foreign corporation will generally be determined with reference to the amount of voting power in such corporation owned by such person. However, any arrangement which artificially decreases a United States person's proportionate interest will not be recognized. See §§ 1.951–1 and 1.957–1.

(d) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. United States persons A and B own 25 percent and 50 percent, respectively, of the one class of stock in foreign corporation M. Corporation M owns 80 percent of the one class of stock in foreign corporation N, and N Corporation owns 60 percent of the one class of stock in foreign corporation P. Under paragraph (b) of this section, M Corporation is considered to own 48 percent (80 percent of 60 percent) of the stock in P Corporation; such 48 percent is treated as actually owned by M Corporation for the purpose of again applying paragraph (b) of this section. Thus, A and B are considered to own 12 percent (25 percent of 48 percent) and 24 percent (50 percent of 48 percent), respectively, of the stock in P Corporation.

Example 2. United States person C is a 60-percent partner in foreign partnership X. Partnership X owns 40 percent of the one class of stock in foreign corporation Q. Corporation Q is a 50-percent partner in foreign partnership Y, and partnership Y owns 100 percent of the one class of stock in foreign corporation R. By the application of paragraph (b) of this section, C is considered to own 12 percent (60 percent of 40 percent of 50 percent of 100 percent) of the stock in R Corporation.

Example 3. Foreign trust Z was created for the benefit of United States persons D, E, and F. Under the terms of the trust instrument, the trust income is required to be divided into three equal shares. Each beneficiary's share of the income may either be accumulated for him or distributed to him in the discretion of the trustee. In 1970, the trust is to terminate and there is to be paid over to each beneficiary the accumulated income applicable to his share and one-third of the corpus. The corpus of trust Z is composed of 90 percent of the one class of stock in foreign corporation S. By the application of this section, each of D, E, and F is considered to own 30 percent (⅓ of 90 percent) of the stock in S Corporation.

Example 4. Among the assets of foreign estate W are Blackacre and a block of stock, consisting of 75 percent of the one class of stock of foreign corporation T. Under the terms of the will governing estate W, Blackacre is left to G, a nonresident alien, for life, remainder to H, a nonresident alien, and the block of stock is left to United States person K. By the application of this section, K is considered to own the 75 percent of the stock of T Corporation, and G and H are not considered to own any of such stock.

[T.D. 6889, 31 FR 9455, July 12, 1966, as amended by T.D. 7893, 48 FR 22509, May 19, 1983]

§1.958–2 Constructive ownership of stock.

(a) *In general.* Section 958(b) provides that, for purposes of sections 951(b), 954(d)(3), 956(b)(2), and 957, the rules of section 318(a) as modified by section 958(b) and this section shall apply to the extent that the effect is to treat a United States person as a United States shareholder within the meaning of section 951(b), to treat a person as a related person within the meaning of section 954(d)(3), to treat the stock of a domestic corporation as owned by a United States shareholder of a controlled foreign corporation under section 956(b)(2), or to treat a foreign corporation as a controlled foreign corporation under section 957. The rules contained in this section also apply for purposes of other provisions of the Code and regulations which make express reference to section 958(b).

(b) *Members of family*—(1) *In general.* Except as provided in subparagraph (3) of this paragraph, an individual shall be considered as owning the stock owned, directly or indirectly, by or for—

(i) His spouse (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance); and

(ii) His children, grandchildren, and parents.

(2) *Effect of adoption.* For purposes of subparagraph (1)(ii) of this paragraph, a legally adopted child of an individual shall be treated as a child of such individual by blood.

(3) *Stock owned by nonresident alien individual.* For purposes of this paragraph, stock owned by a nonresident alien individual (other than a foreign trust or foreign estate) shall not be considered as owned by a United States citizen or a resident alien individual. However, this limitation does not apply for purposes of determining whether the stock of a domestic corporation is owned or considered as owned by a United States shareholder under section 956(b)(2) and §1.956–2(b)(1)(viii). See section 958(b)(1).

(c) *Attribution from partnerships, estates, trusts, and corporations*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph—

(i) *From partnerships and estates.* Stock owned, directly or indirectly, by or for a partnership or estate shall be considered as owned proportionately by its partners or beneficiaries.

(ii) *From trusts—(a) To beneficiaries.* Stock owned, directly or indirectly, by or for a trust (other than an employees' trust described in section 401(a) which is exempt from tax under section 501(a)) shall be considered as owned by its beneficiaries in proportion to the actuarial interest of such beneficiaries in such trust.

(b) To owner. Stock owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under sections 671 to 678 (relating to grantors and others treated as substantial owners) shall be considered as owned by such person.

(iii) *From corporations.* If 10 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such person shall be considered as owning the stock owned, directly or indirectly, by or for such corporation, in that proportion which the value of the stock which such person so owns bears to the value of all the stock in such corporation. See section 958(b)(3).

(2) *Rules of application.* For purposes of subparagraph (1) of this paragraph, if a partnership, estate, trust, or corporation owns, directly or indirectly, more than 50 percent of the total combined voting power of all classes of stock entitled to vote in a corporation, it shall be considered as owning all the stock entitled to vote. See section 958(b)(2).

(d) *Attribution to partnerships, estates, trusts, and corporations*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph—

(i) *To partnerships and estates.* Stock owned, directly or indirectly, by or for a partner or a beneficiary of an estate shall be considered as owned by the partnership or estate.

(ii) *To trusts—(a) From beneficiaries.* Stock owned, directly or indirectly, by or for a beneficiary of a trust (other than an employees' trust described in section 401(a) which is exempt from tax under section 501(a)) shall be considered as owned by the trust, unless such beneficiary's interest in the trust is a remote contingent interest. For purposes of the preceding sentence, a contingent interest of a beneficiary in a trust shall be considered remote if, under the maximum exercise of discretion by the trustee in favor of such beneficiary, the value of such interest, computed actuarially, is 5 percent or less of the value of the trust property.

(b) From owner. Stock owned, directly or indirectly, by or for a person who is considered the owner of any portion of a trust under sections 671 to 678 (relating to grantors and others treated as substantial owners) shall be considered as owned by the trust.

(iii) *To corporations.* If 50 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such corporation shall be considered as owning the stock owned, directly or indirectly, by or for such person. This subdivision shall not be applied so as to consider a corporation as owning its own stock.

(2) *Limitation.* Subparagraph (1) of this paragraph shall not be applied so as to consider a United States person as owning stock which is owned by a person who is not a United States person. This limitation does not apply for purposes of determining whether the stock of a domestic corporation is owned or considered as owned by a United States shareholder under section 956(b)(2) and § 1.956–2(b)(1)(viii). See section 958(b)(4).

(e) *Options.* If any person has an option to acquire stock, such stock shall be considered as owned by such person. For purposes of the preceding sentence, an option to acquire such an option, and each one of a series of such options, shall be considered as an option to acquire such stock.

(f) *Rules of application.* For purposes of this section—

(1) *Stock treated as actually owned*— (i) *In general.* Except as provided in subdivisions (ii) and (iii) of this subparagraph, stock constructively owned by a person by reason of the application of paragraphs (b), (c), (d), and (e) of this section shall, for purposes of applying such paragraphs, be considered as actually owned by such person.

(ii) *Members of family.* Stock constructively owned by an individual by reason of the application of paragraph (b) of this section shall not be considered as owned by him for purposes of again applying such paragraph in order to make another the constructive owner of such stock.

(iii) *Partnerships, estates, trusts, and corporation.* Stock constructively owned by a partnership, estate, trust, or corporation by reason of the application of paragraph (d) of this section shall not be considered as owned by it for purposes of applying paragraph (c) of this section in order to make another the constructive owner of such stock.

(iv) *Option rule in lieu of family rule.* For purposes of this subparagraph, if stock may be considered as owned by an individual under paragraph (b) or (e) of this section, it shall be considered as owned by him under paragraph (e).

(2) *Coordination of different attribution rules.* For purposes of any one determination, stock which may be owned under more than one of the rules of § 1.958–1 and this section, or by more than one person, shall be owned under that attribution rule which imputes to the person, or persons, concerned the largest total percentage of such stock. The application of this subparagraph may be illustrated by the following examples:

Example 1. (a) United States persons A and B, and domestic corporation M, own 9 percent, 32 percent, and 10 percent, respectively, of the one class of stock in foreign corporation R. A also owns 10 percent of the one class of stock in M Corporation. For purposes of determining whether A is a United States shareholder with respect to R Corporation, 10 percent of the 10-percent interest of M Corporation in R Corporation is considered as owned by A. See paragraph (c)(1)(iii) of this section. Thus, A owns 10 percent (9 percent plus 10 percent of 10 percent) of the stock in R Corporation and is a United States shareholder with respect to such corporation. Corporation M and B, by reason of owning 10 percent and 32 percent, respectively, of the stock in R Corporation are United States shareholders with respect to such corporation.

(b) For purposes of determining whether R Corporation is a controlled foreign corporation, the 1 percent of the stock in R Corporation directly owned by M Corporation and considered as owned by A cannot be counted twice. Therefore, the total amount of stock in R Corporation owned by United States shareholders is 51 percent, determined as follows:

STOCK OWNERSHIP IN R CORPORATION
[percent]

A	9
B	32
M Corporation	10
Total	51

Example 2. United States person C owns 10 percent of the one class of stock in foreign corporation N, which owns 60 percent of the one class of stock in foreign corporation S. Under paragraph (a)(2) of § 1.958–1, C is considered as owning 6 percent (10 percent of 60 percent) of the stock in S Corporation. Under paragraph (c)(1)(iii) and (2) of this section N Corporation is considered as owning 100 percent of the stock in S Corporation and C is considered as owning 10 percent of such 100 percent, or 10 percent of the stock in S Corporation. Thus, for purposes of determining whether C is a United States shareholder with respect to S Corporation, the attribution rules of paragraph (c)(1)(iii) and (2) of this section are used inasmuch as C owns a larger total percentage of the stock of S Corporation under such rules.

(g) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. United States persons A and B own 5 percent and 25 percent, respectively, of the one class of stock in foreign corporation M. Corporation M owns 60 percent of the one class of stock in foreign corporation N. Under paragraph (a)(2) of § 1.958–1, A and B are considered as owning 3 percent (5 percent of 60 percent) and 15 percent (25 percent of 60 percent), respectively, of the stock in N Corporation. Under paragraph (c)(2) of this section, M Corporation is treated as owning all the stock in N Corporation, and, under paragraph (c)(1)(iii) of this section, B is considered as owning 25 percent of such 100 percent, or 25 percent of the stock in N Corporation. Inasmuch as A owns less than 10 percent of the stock in M Corporation, he is not considered as owning, under paragraph (c)(1)(iii) of this section, any of the stock in N Corporation owned by M Corporation. Thus, the attribution rules of paragraph (a)(2) of § 1.958–1 are used with respect to A inasmuch as he owns a larger total percentage of the stock of N Corporation under such rules; and the attribution rules of paragraph (c)(1)(iii) and (2) of this section are used with respect to B inasmuch as he owns a larger total percentage of the stock of N Corporation under such rules.

Example 2. United States person C owns 60 percent of the one class of stock in domestic corporation P; corporation P owns 60 percent of the one class of stock in foreign corporation Q; and corporation Q owns 60 percent of the one class of stock in foreign corporation R. Under paragraph (a)(2) of § 1.958–1, P Corporation is considered as owning 36 percent (60 percent of 60 percent) of the stock in R Corporation, and C is considered as owning none of the stock in R Corporation inasmuch as the chain of ownership stops at the first United States person and P Corporation is such a person. Under paragraph (c)(2) of this section, Q Corporation is treated as owning 100 percent of the stock in R Corporation, and under paragraph (c)(1)(iii) of this section, P Corporation is considered as owning 60 percent of such 100 percent, or 60 percent of the stock in R Corporation. For purposes of determining the amount of stock in R Corporation which C is considered as owning, P Corporation is treated under paragraph (c)(2) of this section as owning 100 percent of the stock in R Corporation; therefore, C is considered as owning 60 percent of the stock in R Corporation. Thus, the attribution rules of paragraph (c)(1)(iii) and (2) of this section are used with respect to C and P Corporation inasmuch as they each own a larger total percentage of the stock of R Corporation under such rules.

Example 3. United States person D owns 25 percent of the one class of stock in foreign corporation S. D is also a 40-percent partner in domestic partnership X, which owns 50 percent of the one class of stock in domestic corporation T. Under paragraph (d)(1)(i) of this section, the 25 percent of the stock in S Corporation owned by D is considered as being owned by partnership X; since such stock is treated as actually owned by partnership X under paragraph (f)(1)(i) of this section, such stock is in turn considered as being owned by T Corporation under paragraph (d)(1)(iii) of this section. Thus, under paragraphs (d)(1) and (f)(1)(i) of this section, T Corporation is considered as owning 25 percent of the stock in S Corporation.

Example 4. Foreign corporation U owns 100 percent of the one class of stock in domestic corporation V and also 100 percent of the one class of stock in foreign corporation W. By virtue of paragraph (d)(2) of this section, V Corporation may not be considered under paragraph (d)(1) of this section as owning the stock owned by its sole shareholder, U Corporation, in W Corporation.

Example 5. United States citizen E owns 15 percent of the one class of stock in foreign corporation Y, and United States citizen F, E's spouse, owns 5 percent of such stock. E and F's four nonresident alien grandchildren each own 20 percent of the stock in Y Corporation. Under paragraph (b)(1) of this section, E is considered as owning the stock owned by F in Y Corporation; however, by virtue of paragraph (b)(3) of this section, E may not be considered under paragraph (b)(1) of this section as owning any of the stock in Y Corporation owned by such grandchildren.

Example 6. United States person F owns 10 percent of the one class of stock in foreign corporation Z; corporation Z owns 10 percent of the one class of stock in foreign corporation K; and corporation K owns 100 percent of the one class of stock in foreign corporation L. United States person G, F's spouse, owns 9 percent of the stock in K Corporation. Under paragraph (c)(1)(iii) of this section or paragraph (a)(2) of § 1.958–1, F is considered as owning 1 percent (10 percent of 10 percent of 100 percent) of the stock in L Corporation by reason of his ownership of stock in Z Corporation, and, under paragraph (b)(1) of this section, G is considered as owning such 1 percent of the stock in L Corporation. Under paragraph (a)(2) of § 1.958–1, G is considered as owning 9 percent (9 percent of 100 percent) of the stock in L Corporation by reason of her ownership of stock in K Corporation, and, under paragraph (b)(1) of this section, F is considered as owning such 9 percent of the stock in L Corporation. Thus, for the purpose of determining whether F or G is a United States shareholder with respect to L Corporation, each of F and G is considered as owning a total of 10 percent of the stock in L Corporation by applying the rules of paragraph (a)(2) of § 1.958–1 and paragraphs (b)(1) and (c)(1)(iii) of this section.

(Secs. 956(c), 7805, Internal Revenue Code of 1954 (76 Stat. 1017, 68A Stat. 917; (26 U.S.C. 956(c) and 7805 respectively)))

[T.D. 6889, 31 FR 9455, July 12, 1966, as amended by T.D. 7712, 45 FR 52375, Aug. 7, 1980]

§ 1.959–1 Exclusion from gross income of United States persons of previously taxed earnings and profits.

(a) *In general.* Sections 951 through 964 provide that certain types of income of controlled foreign corporations will be subject to United States income tax even though such amounts are not currently distributed to the United States shareholders of such corporations. The amounts so taxed to certain United States shareholders are described as subpart F income, previously excluded subpart F income withdrawn from investment in less developed countries, previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, and increases in earnings invested in United States property. Section 959 provides that amounts taxed as subpart F income, as previously excluded subpart F income withdrawn from investment in less developed countries, or as previously excluded subpart F income withdrawn from investment in foreign base company shipping operations are not taxed again as increases in earnings invested in United States property. Section 959 also provides an exclusion whereby none of the amounts so taxed are taxed again when actually distributed directly, or indirectly through a chain of ownership described in section 958(a), to United States shareholders or to such shareholders' successors in interest. The exclusion also applies to amounts taxed to United States shareholders as income of one controlled foreign corporation and later distributed to another controlled foreign corporation in such a chain of ownership where such amounts would otherwise be again included in the income of such shareholders or their successors in interest as subpart F income of the controlled foreign corporation to which they are distributed. Section 959 also provides rules for the allocation of distributions to earnings and profits and for the nondividend treatment of actual distributions which are excluded from gross income.

(b) *Actual distributions to United States persons.* The earnings and profits for a taxable year of a foreign corporation attributable to amounts which are, or have been, included in the gross income of a United States shareholder of such corporation under section 951(a) shall not, when such amounts are distributed to such shareholder directly, or indirectly through a chain of ownership described in section 958(a), be again included in the gross income of such United States shareholder. See section 959(a)(1). Thus, earnings and profits attributable to amounts which are, or have been, included in the gross income of a United States shareholder of a foreign corporation under section 951 (a)(1)(A)(i) as subpart F income, under section 951(a)(1)(A)(ii) as previously excluded subpart F income withdrawn from investment in less developed countries, under section 951(a)(1)(A)(iii) as previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, or under section 951(a)(1)(B) as earnings invested in United States property, shall not be again included in the gross income of such shareholder when such amounts are actually distributed, directly or indirectly, to such shareholder. See paragraph (d) of this section for exclusion applicable to such shareholder's successor in interest. The application of this paragraph may be illustrated by the following example:

Example. (a) A, a United States shareholder, owns 100 percent of the only class of stock of R Corporation, a corporation organized on January 1, 1963, which is a controlled foreign corporation throughout the period here involved. Both A and R Corporation use the calendar year as a taxable year.

(b) During 1964, R Corporation derives $100 of subpart F income, and A includes such amount in his gross income under section 951(a)(1)(A)(i). Corporation R's current and accumulated earnings and profits (before taking into account distributions made during 1964) are $150. Also, during 1964, R Corporation distributes $50 to A. The $50 distribution is excludable from A's gross income for 1964 under this paragraph and §1.959–3 because such distribution represents earnings and profits attributable to amounts which are included in A's gross income for such year under section 951(a).

(c) If instead of deriving the $100 of subpart F income in 1964, R Corporation derives such amount during 1963 and has earnings and profits for 1963 in excess of $100, A must include $100 in his gross income for 1963 under section 951(a)(1)(A)(i). However, the $50 distribution made by R Corporation to A during 1964 is excludable from A's gross income for such year under this paragraph and §1.959–3 because such distribution represents earnings and profits attributable to amounts which have been included in A's gross income for 1963 under section 951(a).

(d) If, with respect to 1964—

(1) Instead of owning the stock of R Corporation directly, A owns such stock through a chain of ownership described in section 958(a), that is, A owns 100 percent of M Corporation which owns 100 percent of N Corporation which owns 100 percent of R Corporation,

(2) Both M and N Corporations use the calendar year as a taxable year and are controlled foreign corporations throughout the period here involved,

(3) Corporation R derives $100 of subpart F income and has earnings and profits in excess of $100,

(4) Neither M Corporation nor N Corporation has earnings and profits or a deficit in earnings and profits, and

(5) The $50 distribution is from R Corporation to N Corporation to M Corporation to A,

A must include $100 in his gross income for 1964 under section 951(a)(1)(A)(i) by reason of his indirect ownership of R Corporation. However, the $50 distribution is excludable from A's gross income for 1964 under this paragraph and §1.959–3 because such distribution represents earnings and profits attributable to amounts which are included in A's gross income for such year under section 951(a) and are distributed indirectly to A through a chain of ownership described in section 958(a).

(c) *Excludable investment of earnings in United States property.* The earnings and profits for a taxable year of a foreign corporation attributable to amounts which are, or have been, included in the gross income of a United States shareholder of such corporation under section 951(a)(1)(A) shall not, when such amounts would, but for section 959(a)(2) and this paragraph, be included under section 951(a)(1)(B) in the gross income of such shareholder directly, or indirectly through a chain of ownership described in section 958(a), be again included in the gross income of such United States shareholder. Thus, earnings and profits attributable to amounts which are, or have been, included in the gross income of a United States shareholder of a foreign corporation under section 951(a)(1)(A)(i) as subpart F income, under section 951(a)(1)(A)(ii) as previously excluded subpart F income withdrawn from investment in less developed countries, or under section 951(a)(1)(A)(iii) as previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, may be invested in United States property without being again included in such shareholder's income under section 951 (a). Moreover, the first amount deemed invested in United States property are amounts previously included in the gross income of a United States shareholder under section 951(a)(1)(A). See paragraph (d) of this section for exclusion applicable to such shareholder's successor in interest. The application of this paragraph may be illustrated by the following example:

Example. (a) A, a United States shareholder, owns 100 percent of the only class of stock of R Corporation, a corporation organized on January 1, 1963, which is a controlled foreign corporation throughout the period here involved. Both A and R Corporation use the calendar year as a taxable year.

(b) During 1964, R Corporation derives $35 of subpart F income, and A includes such amount in his gross income under section 951(a)(1)(A)(i). During 1964, R Corporation also invests $50 in tangible property (other than property described in section 956(b)(2)) located in the United States. Corporation R makes no distributions during the year, and its current earnings and profits are in excess of $50. Of the $50 investment of earnings in United States property, $35 is excludable from A's gross income for 1964 under section 959(a)(2) because such amount represents earnings and profits which are attributable to amounts which are included in A's gross income for such year under section 951(a)(1)(A)(i) and therefore may be invested in United States property without again being included in A's gross income. The remaining $15 is includible in A's gross income for 1964 under section 951(a)(1)(B).

(c) If, instead of deriving $35 of subpart F income in 1964, R Corporation has no subpart F income for 1964 but derives the $35 of subpart F income during 1963 and has earnings and profits for such year in excess of $35, A must include $35 in his gross income for 1963 under section 951(a)(1)(A)(i). However, of the $50 investment of earnings in United States property made by R Corporation during 1964, $35 is excludable from A's gross income for 1964 under section 959(a)(2) because such amount represents earnings and profits attributable to amounts which have been included in A's gross income for 1963 under section 951(a)(1)(A)(i). The remaining $15 is includible in A's gross income for 1964 under section 951(a)(1)(B).

(d) *Application of exclusions to shareholder's successor in interest.* If a United States person (as defined in § 1.957–4) acquires from any person any portion of the interest in the foreign corporation of a United States shareholder referred to in paragraph (b) or (c) of this section, the rules of such paragraph shall apply to such acquiring person but only to the extent that the acquiring person establishes to the satisfaction of the district director his right to the exclusion provided by such paragraph. The information to be furnished by the acquiring person to the district director with his return for the taxable year to support such exclusion shall include:

(1) The name, address, and taxable year of the foreign corporation from which the distribution is received and of all other corporations, partnerships, trusts, or estates in any applicable chain of ownership described in section 958(a);

(2) The name, address, and (in the case of information required to be furnished after June 20, 1983) taxpayer identification number of the person from whom the stock interest was acquired;

(3) A description of the stock interest acquired and its relation, if any, to a chain of ownership described in section 958(a);

(4) The amount for which an exclusion under section 959(a) is claimed; and

(5) Evidence showing that the earnings and profits for which an exclusion is claimed are attributable to amounts which were included in the gross income of a United States shareholder under section 951(a), that such amounts were not previously excluded from the gross income of a United States person, and the identity of the United States shareholder including such amounts.

The acquiring person shall also furnish to the district director such other information as may be required by the district director in support of the exclusion.

Example. (a) A, a United States shareholder, owns 100 percent of the only class of stock of R Corporation, a corporation organized on January 1, 1964, and a controlled foreign corporation throughout the period here involved. Both A and R Corporation use the calendar year as a taxable year.

(b) During 1964, R Corporation has $100 of subpart F income and earnings and profits in excess of $100. A includes $100 in his gross income for 1964 under section 951(a)(1)(A)(i). During 1965, A sells 40 percent of his stock in R Corporation to B, a United States person who uses the calendar year as a taxable year. In 1965, R Corporation has no earnings and profits and experiences no increase in earnings invested in United States property. Corporation R distributes $40 to B on December 1, 1965. If B establishes his right to the exclusion to the satisfaction of the district director, he may exclude $40 from his gross income for 1965 under section 959(a)(1).

(c) If, instead of selling his 40-percent interest directly to B, A sells on February 1, 1965, 40 percent of his stock in R Corporation to C, a nonresident alien, and on October 1, 1965, B acquires the 40-percent interest in R

Corporation from C, the result is the same as in paragraph (b) of this example, if B establishes his right to the exclusion to the satisfaction of the district director.

(d) If, instead of acquiring 40 percent, B acquires only 5 percent of A's stock in R Corporation and R Corporation distributes $5 to B during 1965, B is not a United States shareholder (within the meaning of section 951(b)) with respect to R Corporation since he owns only 5 percent of the stock of R Corporation. Notwithstanding, B may exclude the $5 distribution from his gross income for 1965 under section 959(a)(1) if he establishes his right to the exclusion to the satisfaction of the district director.

(e) If the facts are assumed to be the same as in paragraphs (a) and (b) of this example except that—

(1) A owns the stock of R Corporation indirectly through a chain of ownership described in section 958(a), that is, A owns 100 percent of M Corporation which owns 100 percent of N Corporation which owns 100 percent of R Corporation,

(2) B acquires from N Corporation 40 percent of the stock in R Corporation,

(3) Both M Corporation and N Corporation are controlled foreign corporations which use the calendar year as a taxable year,

(4) Neither M Corporation nor N Corporation has any amount in 1964 or 1965 which is includible in gross income of United States shareholders under section 951(a), and

(5) Neither M Corporation nor N Corporation has a deficit in earnings and profits for 1964;

the result is the same as in paragraph (b) of this example if B establishes his right to the exclusion to the satisfaction of the district director.

[T.D. 6795, 30 FR 943, Jan. 29, 1965, as amended by T.D. 7893, 48 FR 22509, May 19, 1983]

§1.959–2 Exclusion from gross income of controlled foreign corporations of previously taxed earnings and profits.

(a) *Applicable rule.* The earnings and profits for a taxable year of a controlled foreign corporation attributable to amounts which are, or have been, included in the gross income of a United States shareholder under section 951(a) shall not, when distributed through a chain of ownership described in section 958(a), be also included in the gross income of another controlled foreign corporation in such chain for purposes of the application of section 951(a) to such other controlled foreign corporation with respect to such United States shareholder. See section 959(b). The exclusion from the income of such other foreign corporation also applies with respect to any other United States shareholder who acquires from such United States shareholder or any other person any portion of the interest of such United States shareholder in the controlled foreign corporation, but only to the extent the acquiring shareholder establishes to the satisfaction of the district director his right to such exclusion. An acquiring shareholder claiming the exclusion under section 959(b) shall furnish to the district director with his return for the taxable year the information required under paragraph (d) of §1.959–1 to support the exclusion under this paragraph.

(b) *Illustration.* The application of this section may be illustrated by the following example:

Example. (a) A, a United States shareholder, owns 100 percent of the only class of stock of M Corporation which in turn owns 100 percent of the only class of stock of N Corporation. A and corporations M and N use the calendar year as a taxable year and corporations M and N are controlled foreign corporations throughout the period here involved.

(b) During 1963, N Corporation invests $100 in tangible property (other than property described in section 956(b)(2)) located in the United States and has earnings and profits in excess of $100. A is required to include $100 in his gross income for 1963 under section 951(a)(1)(B) by reason of his indirect ownership of the stock of N Corporation. During 1963, M Corporation has no income or investments other than the income derived from a distribution of $100 from N Corporation. Corporation M has earnings and profits of $100 for 1963. Under paragraph (a) of §1.954–2, the $100 distribution received by M Corporation from N Corporation would otherwise constitute subpart F income of M Corporation; however, by reason of section 959(b) and this section, this amount does not constitute gross income of M Corporation for purposes of determining amounts includible in A's gross income under section 951(a)(1)(A)(i).

(c) During 1964, N Corporation derives $100 of subpart F income and distributes $100 to M Corporation which has no subpart F income for 1964 but which invests the $100 distribution in tangible property (other than property described in section 956(b)(2)) located in the United States. Corporation N's earnings and profits for 1964 are in excess of $100, and M Corporation's current and accumulated earnings and profits (before taking into account distributions made during 1964) are in excess of $100. A is required with respect to N Corporation to include $100 in his gross income for 1964 under section 951(a)(1)(A)(i) by reason of his indirect ownership of the stock of N Corporation. The investment by M Corporation in United States property would otherwise constitute an investment of earnings in United States property to which section 956 applies; however, by reason of section 959(b) and this section, such amount does not constitute gross income of M Corporation for purposes of determining amounts includible in A's gross income under section 951(a)(1)(B).

(d) If during 1965, N Corporation invests $100 in tangible property (other than property described in section 956(b)(2)) located in the United States and has earnings and profits in excess of $100, A will be required with respect to N Corporation to include $100 in his gross income for 1965 under section 951(a)(1)(B), because the $100 of earnings and profits for 1964 attributable to N Corporation's subpart F income which was taxed to A in 1964 was distributed to M Corporation in such year.

(e) If, with respect to 1966—

(1) Corporation N owns 100 percent of the only class of stock of R Corporation,

(2) Corporation R derives $100 of subpart F income, has earnings and profits in excess of $100, and makes no distributions to N Corporation,

(3) Corporation N invests $25 in tangible property (other than property described in section 956(b)(2)) located in the United States and has current and accumulated earnings and profits in excess of $25, and

(4) Corporation M has no income or investments and does not have a deficit in earnings and profits,

the $100 of subpart F income derived by R Corporation is includible in A's gross income for 1966 under section 951(a)(1)(A)(i) and the $25 investment of earnings in United States property by N Corporation is includible in A's gross income for 1966 under section 951(a)(1)(B).

(f) If, however, the facts are the same as in paragraph (e) of this example except that—

(1) During 1966, R Corporation distributes $20 to N Corporation, and

(2) Corporation N makes no distributions during such year to M Corporation,

of the $25 investment in United States property by N Corporation, $20 is not includible in A's gross income for 1966 because such amount represents earnings and profits which are attributable to amounts included in A's gross income for such year under section 951(a)(1)(A)(i) with respect to R Corporation and which have been distributed to N Corporation by R Corporation. By reason of section 959(B) and this section, such $20 distribution to N Corporation does not constitute gross income of N Corporation for purposes of determining amounts includible in A's gross income under section 951(a)(1)(B); however, the remaining $5 of investment of earnings in United States property by N Corporation in 1966 is includible in A's gross income for such year under section 951(a)(1)(B).

[T.D. 6795, 30 FR 944, Jan. 29, 1965]

§ 1.959–3 Allocation of distributions to earnings and profits of foreign corporations.

(a) *In general.* For purposes of §§ 1.959–1 and 1.959–2, the source of the earnings and profits from which distributions are made by a foreign corporation as between earnings and profits attributable to increases in earnings invested in United States property, previously taxed subpart F income, previously excluded subpart F income withdrawn from investment in less developed countries, previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, and other amounts shall be determined in accordance with section 959(c) and paragraphs (b) through (e) of this section.

(b) *Applicability of section 316(a).* For purposes of this section, section 316(a) shall be applied, in determining the source of distributions from the earnings and profits of a foreign corporation, by first applying section 316(a)(2) and then by applying section 316(a)(1)—

(1) First, as provided by section 959 (c)(1), to earnings and profits attributable to amounts included in gross income of a United States shareholder under section 951(a)(1)(B) (or which would have been so included but for section 959(a)(2) and paragraph (c) of § 1.959–1),

(2) Secondly, as provided by section 959(c)(2), to earnings and profits attributable to amounts included in gross income of a United States shareholder under section 951(a)(1)(A) (but reduced by amounts not included in such gross income under section 951(a)(1)(B) because of the exclusion provided by section 959(a)(2) and paragraph (c) of § 1.959–1), and

(3) Finally, as provided by section 959(c)(3), to other earnings and profits. Thus, distributions shall be considered first attributable to amounts, if any, described in subparagraph (1) of this paragraph (first for the current taxable year and then for prior taxable years

beginning with the most recent prior taxable year), secondly to amounts, if any, described in subparagraph (2) of this paragraph (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year), and finally to the amounts, if any, described in subparagraph (3) of this paragraph (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year). See, however, paragraph (e) of §1.963–3 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975) for a special rule for determination of the source of distributions counting as minimum distributions. Earnings and profits are classified as to year and as to section 959(c) amount in the year in which such amounts are included in gross income of a United States shareholder under section 951(a) and are reclassified as to section 959(c) amount in the year in which such amounts would be so included but for the provisions of section 959(a)(2); any subsequent distribution of such amounts to a higher tier in a chain of ownership described in section 958(a) does not of itself change such classifications. For example, earnings and profits of a foreign corporation attributable to amounts of previously excluded subpart F income withdrawn from investment in less developed countries (or from investments in export trade assets or foreign base company shipping operations) shall be reclassified as amounts to which subparagraph (2), rather than subparagraph (3), of this paragraph applies for purposes of determining priority of distribution, and such earnings and profits shall be considered attributable to the taxable year in which the withdrawal occurs. This paragraph shall apply to distributions by one foreign corporation to another foreign corporation and by a foreign corporation to a United States person. The application of this paragraph may be illustrated by the following example:

Example. (a) M, a controlled foreign corporation, is organized on January 1, 1963, and is 100-percent owned by A, a United States shareholder. Both A and M Corporation use the calendar year as a taxable year, and M Corporation is a controlled foreign corporation throughout the period here involved. As of December 31, 1966, M Corporation's accumulated earnings and profits of $450 (before taking into account distributions made in 1966) applicable to A's interest in such corporation are classified for purposes of section 959(c) as follows:

Year	Classification of earnings and profits for purposes of section 959		
	(c)(1)	(c)(2)	(c)(3)
1963	$100		
1964	100	$75	
1965		75	$50
1966			50

(b) During 1966, M Corporation makes three separate distributions to A of $150 each, and the source of such distributions under section 959(c) is as follows:

	Amount	Year	Allocation of distributions under section 959
Distribution No. 1	$100	1964	(c)(1)
	50	1963	(c)(1)
	150		
Distribution No. 2	50	1963	(c)(1)
	75	1965	(c)(2)
	25	1964	(c)(2)
	150		
Distribution No. 3	50	1964	(c)(2)
	50	1966	(c)(3)
	50	1965	(c)(3)
	150		

(c) If, in addition to the above facts—

(1) M Corporation owns throughout the period here involved 100 percent of the only class of stock of N Corporation, a controlled foreign corporation which uses the calendar year as a taxable year,

(2) Corporation N derives $60 of subpart F income for 1963 which A includes in his gross income for such year under section 951(a)(1)(A)(i),

(3) Corporation N has earnings and profits for 1963 of $60 but has neither earnings or profits nor a deficit in earnings and profits for 1964, 1965, or 1966, and

(4) During 1966, N Corporation invests $20 in tangible property (not described in section 956(b)(2)) located in the United States and distributes $45 to M Corporation,

the $20 investment of earnings in United States property is excludable from A's gross income for 1966, under section 959(a)(2) and paragraph (c) of §1.959–1, with respect to N Corporation and the $45 dividend received by M Corporation does not, under section 959(b) and §1.959–2, constitute gross income of M

Corporation for 1966 for purposes of determining amounts includible in A's gross income under section 951(a)(1)(A)(i) with respect to M Corporation. However, the $45 dividend paid by N Corporation to M Corporation is allocated under section 959(c) and this paragraph to the earnings and profits of N Corporation as follows: $20 to 1963 earnings described in section 959(c)(1) and $25 to 1963 earnings described in section 959(c)(2). In such case, M Corporation's earnings and profits of $495 (before taking into account distributions made in 1966) would be classified as follows for purposes of section 959(c):

Year	Classification of earnings and profits for purposes of section 959		
	(c)(1)	(c)(2)	(c)(3)
1963	$120	$25	....
1964	100	75	....
1965	....	75	$50
1966	....	....	50

(d) The three distributions to A in 1966 of $150 each would then have the following source under section 959(c):

	Amount	Year	Allocation of distributions under section 959
Distribution No. 1	$100	1964	(c)(1)
	50	1963	(c)(1)
	150	....	....
Distribution No. 2	70	1963	(c)(1)
	75	1965	(c)(2)
	5	1964	(c)(2)
	150	....	....
Distribution No. 3	70	1964	(c)(2)
	25	1963	(c)(2)
	50	1966	(c)(3)
	5	1965	(c)(3)
	150	....	....

(c) *Treatment of deficits in earnings and profits.* For purposes of this section, a United States shareholder's pro rata share (determined in accordance with the principles of paragraph (e) of § 1.951–1) of a foreign corporation's deficit in earnings and profits, determined under section 964(a) and § 1.964–1, for any taxable year shall be applied only to earnings and profits described in paragraph (b)(3) of this section.

(d) *Treatment of certain foreign taxes.* For purposes of this section, any amount described in subparagraph (1), (2), or (3) of paragraph (b) of this section which is distributed by a foreign corporation through a chain of ownership described in section 958(a)(2) shall be reduced by any income, war profits, or excess profits taxes imposed on or with respect to such distribution by any foreign country or possession of the United States.

Example. (a) Domestic corporation M owns 100 percent of the only class of stock of foreign corporation A, which is incorporated under the laws of foreign country X and which, in turn, owns 100 percent of the only class of stock of foreign corporation B, which is incorporated under the laws of foreign country Y. All corporations use the calendar year as a taxable year and corporations A and B are controlled foreign corporations throughout the period here involved.

(b) During 1963, B Corporation (a less developed country corporation for 1963 within the meaning of § 1.955–5) derives $90 of subpart F income, after incurring $10 of foreign income tax allocable to such income under paragraph (c) of § 1.954–1, has earnings and profits in excess of $90, and makes no distributions. Corporation M must include $90 in its gross income for 1963 under section 951(a)(1)(A)(i). As of December 31, 1963, with respect to M Corporation, B Corporation has earnings and profits for 1963 described in section 959(c)(2) of $90.

(c) During 1964, B Corporation has neither earnings and profits nor a deficit in earnings and profits but distributes $90 to A Corporation, and, by reason of section 959(b) and § 1.959–2, such amount is not includible in the gross income of M Corporation for 1964 under section 951(a) with respect to A Corporation. Corporation A incurs a withholding tax of $13.50 on the $90 dividend distributed from B Corporation (15 percent of $90) and an additional foreign income tax of 10 percent or $7.65 by reason of the inclusion of the net distribution of $76.50 ($90 minus $13.50) in its taxable income for 1964. As of December 31, 1964, with respect to M Corporation, B Corporation's earnings and profits for 1963 described in section 959(c)(2) amount to zero ($90 minus $90); and A Corporation's earnings and profits for 1963 described in section 959(c)(2) amount to $68.85 ($90 minus $13.50 minus $7.65).

(e) *Determination of foreign tax credit.* For purposes of applying section 902 and section 960 in determining the foreign tax credit allowable under section 901 in a case in which distributions are made by a second-tier corporation or a first-tier corporation, as the case may be, from its earnings and profits for a taxable year which are attributable to an amount included in the gross income of a U.S. shareholder under section 951(a) or which are attributable to amounts excluded from the gross income of such foreign corporation under section 959(b) and §1.959–2 with respect to a U.S. shareholder, the rules of paragraph (b) of this section shall apply except that in applying subparagraph (1) or (2) of such paragraph—

(1) Distributions from the earnings and profits for such taxable year of the second-tier corporation shall be considered first attributable to its earnings and profits attributable to distributions from the earnings and profits of the foreign corporation, if any, next lower in the chain of ownership described in section 958(a), to the extent of such earnings and profits of the second-tier corporation, and then to the other earnings and profits of such second-tier corporation, and

(2) Distributions from the earnings and profits for such taxable year of the first-tier corporation shall be considered first attributable to its earnings and profits attributable to distributions from the earnings and profits of the second-tier corporation, to the extent of such earnings and profits of the first-tier corporation, and then to the other earnings and profits of such first-tier corporation. For purposes of this paragraph, a second-tier corporation is a foreign corporation referred to in section 960(a)(1)(B), and a first-tier corporation is a foreign corporation referred to in section 960 (a)(1)(A). The application of this paragraph may be illustrated by the following examples:

Example 1. (a) Domestic corporation A, a United States shareholder, owns 100 percent of the only class of stock of foreign corporation R which, in turn, owns 100 percent of the only class of stock of foreign corporation S. All corporations use the calendar year as a taxable year, and corporations R and S are controlled foreign corporations throughout the period here involved.

(b) Neither R Corporation nor S Corporation has subpart F income for 1963. During 1963, S Corporation increases by $100 its investment in tangible property (not described in section 956(b)(2)) located in the United States, makes no distributions, and has earnings and profits of $100. Corporation A must include $100 in its gross income for 1963 under section 951(a)(1)(B) with respect to S Corporation. During 1963, R Corporation also increases by $100 its investment in tangible property (not described in section 956(b)(2)) located in the United States, makes no distributions, and has earnings and profits of $100. Corporation A must include $100 in its gross income for 1963 under section 951(a)(1)(B) with respect to R Corporation.

(c) During 1964, S Corporation distributes $100 to R Corporation, and R Corporation distributes $100 to A Corporation. Neither corporation has any earnings or profits or deficit in earnings and profits for such year. On December 31, 1964, R Corporation has earnings and profits (computed before distributions to A Corporation made for the year) of $200, consisting of $100 of section 959(c)(1) amounts of R Corporation for 1963 and of $100 of section 959(c)(1) amounts of S Corporation for 1963. For purposes of determining the foreign tax credit under section 960 and the regulations thereunder, the $100 distribution by R Corporation shall be considered attributable to S Corporation's earnings and profits for 1963 described in section 959(c)(1).

Example 2. (a) Domestic corporation A, a United States shareholder, owns 100 percent of the only class of stock of foreign corporation T which, in turn, owns 100 percent of the only class of stock of foreign corporation U. All corporations use the calendar year as a taxable year, and corporations T and U are controlled foreign corporations throughout the period here involved.

(b) During 1964, T Corporation invests $100 in tangible property (not described in section 956(b)(2)) located in the United States. For 1964, T Corporation has no subpart F income and makes no distributions; A must include $100 in its gross income for 1964 under section 951(a)(1)(B) with respect to T Corporation. For 1964, U Corporation has no subpart F income or investment of earnings in United States property but U Corporation has $100 of earnings and profits which it distributes to T Corporation. At December 31, 1964, T Corporation has earnings and profits of $300, consisting of operating income of $100 for each of the years 1963 and 1964 and $100 in dividends received from the earnings and profits of U Corporation for 1964. These earnings and profits are classified as follows under section 959(c): $100 of section 959(c)(1) amounts of T Corporation for 1964, $100 of section 959(c)(3) amounts of U Corporation for 1964, and $100 of section 959(c)(3) amounts of T Corporation for 1963.

(c) During 1965 neither T Corporation nor U Corporation has any earnings and profits or deficit in earnings and profits or investment of earnings in U.S. property, but T Corporation distributes $100 to A Corporation. For purposes of determining the foreign tax credit under section 960 and the regulations thereunder, the $100 distribution of T Corporation shall be considered attributable to T Corporation's earnings and profits for 1964 described in section 959(c)(1).

(f) *Illustration.* The application of this section may be illustrated by the following example:

Example. (a) M, a controlled foreign corporation is organized on January 1, 1963, and is wholly owned by A, a United States shareholder. Both A and Corporation M use the calendar year as a taxable year.

(b) Corporation M's earnings and profits (before distributions) for 1963 are $200, $100, of which is attributable to subpart F income. Corporation M's earnings and profits for such year also include $25 attributable to subpart F income which is excluded from M Corporation's foreign base company income under section 954(b)(1) as dividends, interest, and gains invested in qualified investments in less developed countries. Corporation M's increase in earnings invested in tangible property (not described in section 956(b)(2)) located in the United States for 1963, is $50, and M Corporation makes a distribution of such property during such year of $20. For purposes of section 959, A's interest in M Corporation's earnings and profits as of December 31, 1963, determined after the distributions of $20, is classified as follows:

Section 959(c)(1) amounts:			
Earnings for 1963 attributable to increased investment in U.S. property which would have been included in A's gross income but for application of section 959(a)(2) and § 1.959–1(c)		$50	
Less: Distribution for 1963 allocated under section 959(c)(1) and paragraph (b)(1) of this section to such amounts		20	$30
Section 959(c)(2) amounts:			
Earnings for 1963 attributable to subpart F income included in A's gross income under section 951(a)(1)(A)(i)		100	
Less: Earnings for 1963 attributable to increased investment in U.S. property which would have been included in A's gross income but for application of section 959(a)(2) and § 1.959–1(c)		50	50
Section 959(c)(3) amounts:			
Predistribution earnings for 1963		200	
Less: Earnings for 1963 classified as:			
Section 959(c)(1) amounts	$50		
Section 959(c)(2) amounts	50	100	100
A's total interest in M Corporation's earnings and profits	....	....	180

For 1963, A is required to include $100 of subpart F income in his gross income under section 951(a)(1)(A)(i). He would have been required to include $50 in his gross income under section 951(a)(1)(B) as M Corporation's increase in earnings invested in United States property, except that section 959(a)(2) and paragraph (c) of § 1.959–1 provide in effect that earnings and profits taxed to A under section 951(a)(1)(A) with respect to M Corporation (whether in the current taxable year or in prior years) may be invested in United States property without again being included in gross income under section 951(a). The $20 dividend from M Corporation is excluded from A's gross income under section 959(a)(1) and paragraph (b) of § 1.959–1, since such distribution is allocated under section 959(c)(1) and paragraph (b)(1) of this section to amounts described in section 959(c)(1).

(c) During 1964, M Corporation's earnings and profits (before distributions) are $300, $75 of which is attributable to subpart F income. Corporation M has no change in investments in United States property during such year and withdraws $15 of previously excluded subpart F income from investment in less developed countries. Corporation M makes a cash distribution of $250 to A during 1964. For purposes of section 959, A's interest in M Corporation's earnings and profits as of December 31, 1964, determined after the distribution of $250, is classified as follows:

Section 959 (c)(1) amounts:	
Section 959(c)(1) net amount for 1963 (as determined under paragraph (b) of this example)	$30
Less: Distribution for 1964 allocated under section 959(c)(1) and paragraph (b)(1) of this section to such amount	30
Section 959(c)(2) amounts:	
Section 959(c)(2) net amount for 1963 (as determined under paragraph (b) of this example)	50
Plus: Earnings for 1964 attributable to:	
Subpart F income for 1964 included in A's gross income under section 951(a)(1)(A)(i)	75
Previously excluded subpart F income withdrawn in 1964 from investment in less developed countries and included in A's gross income under section 951(a)(1)(A)(ii)	15
	140
Less: Distribution for 1964 allocated under section 959(c)(2) and paragraph (b)(2) of this section to such amounts	140

Section 959(c)(3) amounts:				
Section 959(c)(3) net amount for 1963 (as determined under paragraph (b) of this example)			100	
Plus: Section 959(c)(3) net amount for 1964:				
Predistribution earnings for 1964	....	$300		
Less:				
Earnings for 1964 classified as section 959(c)(1) amounts ($0) and as section 959(c)(2) amounts ($75+$15)	$90			
Distributions for 1964 allocated under section 959(c)(3) and paragraph (b)(3) of this section	80	170	130	$230
A's total interest in M Corporation's earnings and profits	....	....	....	230

For 1964, A is required to include in his gross income under section 951(a)(1)(A)(i) $75 of subpart F income, and under section 951 (a)(1)(A)(ii) $15 of previously excluded subpart F income withdrawn from investment in less developed countries. Of the $250 cash distribution, A may exclude $170 from his gross income under section 959(a)(1) and paragraph (b) of §1.959–1 and $80 is includible in his gross income as a dividend.

(d) The source under section 959(c) of the 1964 distribution of $250 to A is as follows:

Year	Amount	Allocation of distribution under section 959
1963	$30	(c)(1).
1964	90	(c)(2).
1963	50	(c)(2).
1964	80	(c)(3).
	250	

[T.D. 6795, 30 FR 945, Jan. 29, 1965, as amended by T.D. 7334, 39 FR 44211, Dec. 23, 1974; T. D. 7545, 43 FR 19652, May 8, 1978; T.D. 7893, 48 FR 22510, May 19, 1983]

§1.959–4 Distributions to United States persons not counting as dividends.

Except as provided in section 960(a)(3) and §1.960–2, any distribution to a United States person which is excluded from the gross income of such person under section 959(a)(1) and §1.959–1 shall be treated for purposes of chapter 1 (relating to normal taxes and surtaxes) of subtitle A (relating to income taxes) of the Code as a distribution which is not a dividend. However, see paragraph (b)(1) of §1.956–1, relating to the dividend limitation on the amount of a controlled foreign corporation's investment of earnings in United States property.

[T.D. 7120, 36 FR 10860, June 4, 1971]

§1.960–1 Foreign tax credit with respect to taxes paid on earnings and profits of controlled foreign corporations.

(a) *Scope of regulations under section 960.* This section prescribes rules for determining the foreign income taxes deemed paid under section 960(a)(1) by a domestic corporation which is required under section 951 to include in gross income an amount attributable to a first-, second-, or third-tier corporation's earnings and profits. Section 1.960–2 prescribes rules for applying section 902 to dividends paid by a third-, second-, or first-tier corporation from earnings and profits attributable to an amount which is, or has been, included in gross income under section 951. Section 1.960–3 provides special rules for the application of the gross-up provisions of section 78 where an amount is included in gross income under section 951. Section 1.960–4 prescribes rules for increasing the applicable foreign tax credit limitation under section 904(a) of the domestic corporation for the taxable year in which it receives a distribution of earnings and profits in respect of which it was required under section 951 to include an amount in its gross income for a prior taxable year. Section 1.960–5 prescribes rules for disallowing a deduction for foreign income taxes for such taxable year of receipt where the domestic corporation received the benefits of the foreign tax credit for such previous taxable year of inclusion. Section 1.960–6 provides that the excess of such an increase in the applicable limitation under section 904(a) over the tax liability of the domestic corporation for such taxable year of receipt results in an overpayment of tax. Section 1.960–7 prescribes the effective dates for application of these rules.

(b) *Definitions.* For purposes of section 960 and §§ 1.960–1 through 1.960–7—

(1) *First-tier corporation.* The term ‘‘first-tier corporation’’ means a foreign corporation at least 10 percent of the voting stock of which is owned by the domestic corporation described in paragraph (a) of this section.

(2) *Second-tier corporation.* In the case of amounts included in the gross income of the taxpayer under section 951—

(i) For taxable years beginning before January 1, 1977, the term ‘‘second-tier corporation’’ means a foreign corporation at least 50 percent of the voting stock of which is owned by such first-tier corporation.

(ii) For taxable years beginning after December 31, 1976, the term ‘‘second-tier corporation’’ means a foreign corporation as least 10 percent of the voting stock of which is owned by such first-tier corporation.

(3) *Third-tier corporation.* In the case of amounts included in the gross income of a domestic shareholder under section 951 for taxable years beginning after December 31, 1976, the term ‘‘third-tier corporation’’ means a foreign corporation at least 10 percent of the voting stock of which is owned by such second-tier corporation.

(4) *Immediately lower-tier corporation.* In the case of a first-tier corporation the term ‘‘immediately lower-tier corporation’’ means a second-tier corporation. In the case of a second-tier corporation, the term ‘‘immediately lower-tier corporation’’ means a third-tier corporation. In the case of a third-tier corporation, the term ‘‘immediately lower-tier corporation’’ means a fourth-tier corporation.

(5) *Foreign income taxes.* The term ‘‘foreign income taxes’’ means income, war profits, and excess profits taxes, and taxes included in the term ‘‘income, war profits, and excess profits taxes’’ by reason of section 903, imposed by a foreign country or a possession of the United States.

(c) *Amount of foreign income taxes deemed paid by domestic corporation in respect of earnings and profits of foreign corporation attributable to amount included in income under section 951*—(1) *In general.* For purposes of section 901—

(i) If for the taxable year there is included in the gross income of a domestic corporation under section 951 an amount attributable to the earnings and profits of a first- or second-tier corporation for any taxable year, the domestic corporation shall be deemed to have paid the same proportion of the total foreign income taxes paid, accrued, or deemed (in accordance with paragraph (b) of § 1.960–2) to be paid by such foreign corporation on or with respect to its earnings and profits for its taxable year as the amount (in the case of a first-tier corporation, determined without regard to section 958(a)(2); in the case of a second-tier corporation, determined without regard to section 958(a)(1)(A) and, to the extent that stock of such second-tier corporation is owned by the domestic corporation through a foreign corporation other than the first-tier corporation, determined without regard to section 958(a)(2)) so included in the gross income of the domestic corporation under section 951 with respect to such foreign corporation bears to the total earnings and profits of such foreign corporation for its taxable year. This paragraph (c)(1)(i) shall not apply to amounts included in the gross income of the domestic corporation under section 951 with respect to the second-tier corporation unless the percentage-of-voting-stock requirement of section 902(b)(3)(A) is satisfied.

(ii) If for the taxable year there is included in the gross income of a domestic corporation under section 951 an amount attributable to the earnings and profits of a third-tier corporation for any taxable year, the domestic corporation shall be deemed to have paid the same proportion of the total foreign income taxes paid or accrued by such foreign corporation on or with respect to its earnings and profits for its taxable year as the amount (determined without regard to section 958(a)(1)(A) and, to the extent that stock of such third-tier corporation is owned by the domestic corporation through a foreign corporation other than the second-tier corporation, determined without regard to section 958(a)(2)) so included in the gross income of the domestic corporation under section 951 with respect to such foreign corporation bears to the total earnings and profits of such foreign corporation. This paragraph (c)(1)(ii) shall not apply unless the percentage-of-voting-stock requirement of section 902(b)(3)(B) is satisfied.

(iii) In applying paragraph (c)(1)(i) or (c)(1)(ii) of this section to a first-, second-, or third-tier corporation which for the taxable year has income excluded under section 959(b), paragraph (c)(3) of this section shall apply for purposes of excluding certain earnings and profits of such foreign corporation and foreign income taxes, if any, attributable to such excluded income.

(iv) This paragraph (c)(1) applies whether or not the first-, second-, or third-tier corporation makes a distribution for the taxable year of its earnings and profits which are attributable to the amount included in the gross income of the domestic corporation under section 951.

(v) This paragraph (c)(1) does not apply to an increase in current earnings invested in United States property which, but for paragraph (e) of §1.963–3 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975), would be included in the gross income of the domestic corporation under section 951(a)(1)(B) but which, pursuant to such paragraph, counts toward a minimum distribution for the taxable year. This subdivision shall apply in taxable years subsequent to the Tax Reduction Act of 1975 only in those cases where an adjustment is required as a result of an election made under section 963 prior to the Act.

(2) *Taxes paid or accrued on or with respect to earnings and profits of foreign corporation.* For purposes of paragraph (c)(1) of this section, the foreign income taxes paid or accrued by a first-, second- or third-tier corporation on or with respect to its earnings and profits for its taxable years shall be the total amount of the foreign income taxes paid or accrued by such foreign corporation for such taxable year.

(3) *Exclusion of earnings and profits and taxes of a first-, second-, or third-tier corporation having income excluded under section 959(b).* If in the case of a first-, second-, or third-tier corporation to which paragraph (c)(1)(i) or (c)(1)(ii) of this section is applied—

(i) The earnings and profits of such foreign corporation for its taxable year consist of (A) earnings and profits attributable to dividends received from an immediately lower-tier corporation which are attributable to amounts included in the gross income of a domestic corporation under section 951 with respect to the immediately lower- or lower-tier corporations, and (B) other earnings and profits, and

(ii) The effective rate of foreign income taxes paid or accrued by such foreign corporation in respect to the dividends to which its earnings and profits described in paragraph (c)(3)(i)(A) of this section are attributable is higher or lower than the effective rate of foreign income taxes paid or accrued by such foreign corporation in respect to the income to which its earnings and profits described in paragraph (c)(3)(i)(B) of this section are attributable,

then, for the purposes of applying paragraph (c)(1)(i) or (c)(1)(ii) of this section to the foreign income taxes paid, accrued, or deemed to be paid, by such foreign corporation on or with respect to its earnings and profits for such taxable year, the earnings and profits of such foreign corporation for such taxable year shall be considered not to include the earnings and profits described in paragraph (c)(3)(i)(A) of this section and only the foreign income taxes paid, accrued, or deemed to be paid, by such foreign corporation in respect to the income to which its earnings and profits described in paragraph (c)(3)(i)(B) of this section are attributable shall be taken into account. For purposes of applying this paragraph (c)(3), the effective rate of foreign income taxes paid or accrued in respect to income shall be determined consistently with the principles of paragraphs (b)(3)(iv) and (viii) and (c) of §1.954–1. Thus, for example, the effective rate of foreign income taxes paid or accrued in respect to dividends received by such foreign corporation shall be determined by taking into account any intercorporate dividends received deduction allowed to such corporation for such dividends.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation N owns all the one class of stock of controlled foreign corporation A. Both corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $50 attributable to the earnings and profits of A Corporation for such year, but A Corporation does not distribute any earnings and profits for such year. The foreign income taxes paid by A Corporation for 1978 which are deemed paid by N Corporation for such year under section 960(a)(1) are determined as follows upon the basis of the facts assumed:

Pretax earnings and profits of A Corporation	$100.00
Foreign income taxes (20%)	20.00
Earnings and profits	80.00
Amount required to be included in N Corporation's gross income under section 951	50.00
Dividends paid to N Corporation	0
Foreign income taxes paid on or with respect to earnings and profits of A Corporation	20.00
Foreign income taxes of A Corporation deemed paid by N Corporation under section 960(a)(1) ($50/$80×$20)	12.50

Example 2. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $45 attributable to the earnings and profits of B Corporation for such year, but is not required to include any amount in gross income under section 951 attributable to the earnings and profits of A Corporation for such year. Neither B Corporation nor A Corporation distributes any earnings and profits for 1978. The foreign income taxes paid by B Corporation for 1978 which are deemed paid by N Corporation for such year under section 960(a)(1) are determined as follows upon the basis of the facts assumed:

Pretax earnings and profits of B Corporation	$100.00
Foreign income taxes (40%)	40.00
Earnings and profits	60.00
Amounts required to be included in N Corporation's gross income under section 951 with respect to B Corporation	45.00
Dividends paid	0
Foreign income taxes paid on or with respect to earnings and profits of B Corporation	40.00
Foreign income taxes of B Corporation deemed paid by N Corporation under section 960(a)(1) ($45/$60×$40)	30.00

Example 3. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B, which owns all the one class of stock of foreign corporation C. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $80 attributable to the earnings and profits of C Corporation for such year, $45 attributable to the earnings and profits of B Corporation for such year and $50 attributable to the earnings and profits of A Corporation for such year. Neither C Corporation nor B corporation distributes any earnings and profits for 1978. The foreign income taxes which are deemed paid by N Corporation for such year under section 960(a)(1) are determined as follows upon the basis of the facts assumed:

C Corporation (third-tier corporation):

Pretax earnings of C Corporation	$150.00
Foreign income taxes (40%)	60.00
Earnings and profits	90.00
Amounts required to be included in N Corporation's gross income under section 951	80.00
Dividends paid to B Corporation	0
Foreign income taxes paid on or with respect to earnings and profits of C Corporation	60.00

B Corporation (second-tier corporation):

Pretax earnings of B Corporation	$100.00
Foreign income taxes (40%)	40.00
Earnings and profits	60.00
Amount required to be included in N Corporation's gross income under section 951	45.00
Dividends paid to A Corporation	0
Foreign income taxes paid on or with respect to earnings and profits of B Corporation	40.00

A Corporation (first-tier corporation):

Pretax earnings and profits of A Corporation	$100.00
Foreign income taxes (20%)	20.00
Earnings and profits	80.00
Amount required to be included in N Corporation's gross income under section 951	50.00
Dividends paid to N Corporation	0
Foreign income taxes paid on or with respect to earnings and profits of A Corporation	20.00

N Corporation (domestic corporation):

Foreign income taxes deemed paid by N Corporation under section 960(a)(1):	
Taxes of C Corporation $80/$90×$60	$53.33
Taxes of B Corporation $45/$60×$40	30.00
Taxes of A Corporation $50/$80×$20	12.50
Total taxes deemed paid under section 960(a)(1)	$95.83

Example 4. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns 5 percent of the one class of stock of controlled foreign corporation B. N Corporation also directly owns 95 percent of the one class of stock of B Corporation. (Under these facts, B Corporation is only a first-tier corporation with respect to N Corporation) all such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $60 attributable to the earnings and profits of B Corporation and $79.20 attributable to the earnings and profits of A Corporation. For 1978, B Corporation distributes $19 to N Corporation and $1 to A Corporation, but A

Corporation makes no distribution to N Corporation. The foreign income taxes paid by N Corporation for such year under section 960(a)(1) are determined as follows upon the basis of the facts assumed in accordance with § 1.960–1(c)(1)(i):

B Corporation (first-tier corporation):

Pretax earnings and profits	$100.00
Foreign income taxes (40%)	40.00
Earnings and profits	60.00
Amount required to be included in N Corporation's gross income under section 951 with respect to B Corporation	60.00

A Corporation (first-tier corporation):

Pretax earnings and profits (including $1 dividend from B Corporation)	$100.00
Foreign income taxes (20%)	20.00
Earnings and profits	80.00
Amount required to be included in N Corporation's gross income with respect to A Corporation ($99 − [$99×0.20]	79.20

N Corporation (domestic corporation):

Foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to—	
B Corporation ([$60×0.95/$60]×$40)	$38.00
A Corporation ($79.20/$80×$20)	19.80
Total taxes deemed paid under section 960(a)(1)	$57.80

Example 5. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $175 attributable to the earnings and profits of A Corporation for such year. For 1978, B Corporation has earnings and profits of $225, on which it pays foreign income taxes of $75. In 1978, B Corporation distributes $150, which, under paragraph (b) of § 1.960–2, consists of $100 to which section 902(b)(1) does not apply (from B Corporation's earnings and profits attributable to an amount required under section 951 to be included in N Corporation's gross income with respect to B Corporation) and $50 to which section 902(b)(1) applies (from B Corporation's other earnings and profits). The country under the laws of which A Corporation is incorporated imposes an income tax of 40 percent on all income but exempts from tax dividends received from a subsidiary corporation. A Corporation makes no distribution for 1978. Under paragraph (b) of § 1.960–2, A Corporation is deemed to have paid $25 ($50/$150×$75) of the $75 foreign income taxes paid by B Corporation on its pretax earnings and profits of $225. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) with respect to A Corporation are determined as follows upon the basis of the following assumed facts:

Pretax earnings and profits of A Corporation:			
Dividends received from B Corporation			$150.00
Other income			250.00
Total pretax earnings and profits			$400.00
Foreign income taxes:			
On dividends received from B Corporation		0	
On other income ($250×0.40)		100.00	
Total foreign income taxes			100.00
Earnings and profits:			
Attributable to dividends received from B Corporation which are attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation		100.00	
Attributable to other income:			
Attributable to dividends received from B Corporation which are attributable to amounts not included in N Corporation's gross income under 951 with respect to B Corporation	$50.00		
Attributable to other income ($250 − $100 [$250×0.40])	150.00	$200.00	
Total earnings and profits			$300.00
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to A Corporation:			
Tax paid by A Corporation in respect to its income other than dividends received from B Corporation attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation ($175/$200×$100)			87.50
Tax of B Corporation deemed paid by A Corporation under section 902(b)(1) in respect to such income ($175/$200×$25)			21.88
Total foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to A Corporation			$109.38

(d) *Time for meeting stock ownership requirements*—(1) *In general.* For purposes of applying paragraph (c) of this section to amounts included in the gross income of a domestic corporation attributable to the earnings and profits of a first-, second-, or third-tier corporation, the stock ownership requirements of paragraph (b)(1), (2), and (3) of this section and the percentage of voting stock requirements of paragraph (c)(1)(i) and (ii) of this section, if applicable, must be satisfied on the last day in the taxable year of such first-, second-, or third-tier corporation, as the case may be, on which such foreign corporation is a controlled foreign corporation. For paragraph (c) to apply to amounts included in a domestic corporation's gross income attributable to the earnings and profits of a second-tier corporation, the requirements of paragraph (b)(1) and (2) of this section and the percentage of voting stock requirement of paragraph (c)(1)(i) of this section must be met on such date. For paragraph (c) to apply to amounts included in a domestic corporation's gross income attributable to the earnings and profits of a third-tier corporation, the requirements of paragraph (b)(1), (2), and (3) of this section and the percentage of voting stock requirement of paragraph (c)(1)(ii) of this section must be met on such date.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation N is required for its taxable year ending June 30, 1978, to include in gross income under section 951 an amount attributable to the earnings and profits of controlled foreign corporation A for 1977 and another amount attributable to the earnings and profits of controlled foreign corporation B for such year. Corporations A and B use the calendar year as the taxable year. Such amounts are required to be included in N Corporation's gross income by reason of its ownership of stock in A Corporation and in turn by A Corporation's ownership of stock in B Corporation. Corporation A is a controlled foreign corporation throughout 1977, but B Corporation is a controlled foreign corporation only from January 1, 1977, through September 30, 1977. Corporation N may obtain credit under section 960(a)(1) for the year ending June 30, 1978, for foreign income taxes paid by A Corporation for 1977, only if N Corporation owns at least 10 percent of the voting stock of A Corporation on December 31, 1977. Corporation N may obtain credit under section 960(a)(1) for the year ending June 30, 1978, for foreign income taxes paid by B Corporation for 1977, only if on September 30, 1977, N Corporation owns at least 10 percent of the voting stock of A Corporation, A Corporation owns at least 10 percent of the voting stock of B Corporation, and the percentage of voting stock requirement of paragraph (c)(1)(i) of this section is met.

Example 2. The facts are the same as in example 1, except that A Corporation is a controlled foreign corporation only from January 1, 1977, through March 31, 1977. Corporation N may obtain credit under section 960(a)(1) for the year ending June 30, 1978, for foreign income taxes paid by A Corporation for 1977, only if N Corporation owns at least 10 percent of the voting stock of A Corporation on March 31, 1977. Corporation N may obtain credit under section 960(a)(1) for the year ending June 30, 1978, for foreign income taxes paid by B Corporation for 1977, only if on September 30, 1977, N Corporation owns at least 10 percent of the voting stock of A Corporation, A Corporation owns at least 10 percent of the voting stock of B Corporation, and the percentage of voting stock requirement of paragraph (c)(1)(i) of this section is met.

Example 3. Domestic Corporation N owns 100 percent of the stock of controlled foreign corporation A. A Corporation owns 20 percent of the stock of controlled foreign corporation B. B Corporation owns 10 percent of the voting stock of controlled foreign corporation C. For calendar year 1983, N Corporation is required to include amounts in its gross income attributable to the earnings and profits of A, B, and C Corporations. A, B, and C Corporations were all controlled foreign corporations throughout their respective taxable years ending as follows: A Corporation, December 31, 1983; B Corporation, November 31, 1983; and C Corporation, August 31, 1983. Paragraph (c) of this section applies to amounts included in gross income of N Corporation with respect to the earnings and profits of A Corporation because the 10 percent ownership requirement of paragraph (b)(1) of this section is met on December 31, 1983. Paragraph (c) of this section applies to amounts included in the gross income of N Corporation with respect to the earnings and profits of B Corporation because the 10 percent stock ownership requirements of paragraphs (b)(1) and (2) of this section are met on November 30, 1983, and the percentage of voting stock requirement of paragraph (c)(1)(i) of this section (5 percent) is also met on such date. The percentage of voting stock in A Corporation owned by N Corporation (100 percent) multiplied by the percentage of voting stock in B Corporation owned by A Corporation (20 percent) is 20 percent. Paragraph (c) of this section will not apply to amounts included in N Corporation's gross income attributable to the earnings and profits of C Corporation even though on August 31, 1983, the 10 percent stock ownership requirements of paragraphs (b)(1), (2), and (3) of this section are met, because the percentage of voting stock requirement of paragraph (c)(1)(ii) of this section (5 percent) is not met on such date. The percentage of voting stock of C Corporation owned by B Corporation (10 percent) multiplied by 20 percent (the percentage of voting stock of A Corporation owned by N Corporation multiplied by the percentage of voting stock of B Corporation owned by A Corporation) is 2 percent.

(e) *Information to be furnished.* If the credit for foreign income taxes claimed under section 901 includes taxes deemed paid under section 960(a)(1), the domestic corporation must furnish the same information with respect to the taxes so deemed paid as it is required to furnish with respect to the taxes actually paid or accrued by it and for which credit is claimed. See §1.905–2. For other information required to be furnished by the domestic corporation for the annual accounting period of certain foreign corporations ending with or within such corporation's taxable year, see section 6038(a) and the regulations thereunder.

(f) *Reduction of foreign income taxes paid or deemed paid.* For reduction of the amount of foreign income taxes paid or deemed paid by a foreign corporation for purposes of section 960, see section 6038(c) (as amended by section 338 of the Tax Equity and Fiscal Responsibility Act of 1982) and the regulations thereunder, relating to failure to furnish information with respect to certain foreign corporations. For reduction of the foreign income taxes deemed paid by a domestic corporation under section 960 with respect to foreign oil and gas extraction income, see section 907(a).

(g) *Amounts under section 951 treated as distributions for purposes of applying effective dates.* For purposes of applying section 902 in determining the amount of credit allowed under section 960(a)(1) and paragraph (c) of this section, the effective date provisions of the regulations under section 902 shall apply, and for purposes of so applying the regulations under section 902, any amount attributable to the earnings and profits for the taxable year of a first-, second-, or third-tier corporation which is included in the gross income of a domestic corporation under section 951 shall be treated as a distribution received by such domestic corporation on the last day in such taxable year on which such foreign corporation is a controlled foreign corporation.

(h) *Source of income and country to which tax is deemed paid*—(1) *Source of income.* For purposes of section 904—

(i) The amount included in gross income of a domestic corporation under section 951 for the taxable year with respect to a first-, second-, or third-tier corporation, plus

(ii) Any section 78 dividend to which such section 951 amount gives rise by reason of taxes deemed paid by such domestic corporation under section 960(a)(1),

shall be deemed to be derived from sources within the foreign country or possession of the United States under the laws of which such first-tier corporation, or the first-tier corporation in the same chain of ownership as such second- or third-tier corporation, is created or organized.

(2) *Country to which taxes deemed paid.* For purposes of section 904, the foreign income taxes paid by the first-, second-, or third-tier corporation and deemed to be paid by the domestic corporation under section 960(a)(1) by reason of the inclusion of the amount described in paragraph (h)(1)(i) of this section in the gross income of such domestic corporation shall be deemed to be paid to the foreign country or possession of the United States under the laws of which such first-tier corporation, or the first-tier corporation in the same chain of ownership as such second- or third-tier corporation, is created or organized.

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, incorporated under the laws of foreign country X, which owns all the one class of stock of controlled foreign corporation B, incorporated under the laws of foreign country Y. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $45 attributable to the earnings and profits of B Corporation for such year and $50 attributable to the earnings and profits of A Corporation for such year. For 1978, because of the inclusion of such amounts in gross income, N Corporation is deemed under section 960(a)(1) and paragraph (c) of this section to have paid $15 of foreign income taxes paid by B Corporation for such year and $10 of foreign income taxes paid by A Corporation for such year. For purposes of section 904, the amount ($95) included in N Corporation's gross income under section 951 attributable to the earnings and profits of corporations A and B is deemed to be derived from sources within country X, and the section 78 dividend consisting of the foreign income taxes ($25) deemed paid by N Corporation under section

960(a)(1) with respect to such $95 is deemed to be derived from sources within country X. The $25 of foreign income taxes so deemed paid by N Corporation are deemed to be paid to country X for purposes of section 904.

(i) *Computation of deemed-paid taxes in post-1986 taxable years*—(1) *General rule.* If a domestic corporation is eligible to compute deemed-paid taxes under section 960(a)(1) with respect to an amount included in gross income under section 951(a), then, such domestic corporation shall be deemed to have paid a portion of the foreign corporation's post-1986 foreign income taxes determined under section 902 and the regulations under that section in the same manner as if the amount so included were a dividend paid by such foreign corporation (determined by applying section 902(c) in accordance with section 904(d)(3)(B)).

(2) *Ordering rule for computing deemed-paid taxes under sections 902 and 960.* If a domestic corporation computes deemed-paid taxes under both sections 902 and 960 in the same taxable year, section 960 shall be applied first. After the deemed-paid taxes are computed under section 960 with respect to a deemed income inclusion, post-1986 undistributed earnings and post-1986 foreign income taxes in each separate category shall be reduced by the appropriate amounts before deemed-paid taxes are computed under section 902 with respect to a dividend distribution.

(3) *Computation of post-1986 undistributed earnings.* Post-1986 undistributed earnings (or an accumulated deficit in post-1986 undistributed earnings) are computed under section 902 and the regulations under that section.

(4) *Allocation of accumulated deficits.* For purposes of computing post-1986 undistributed earnings under sections 902 and 960, a post-1986 accumulated deficit in a separate category shall be allocated proportionately to reduce post-1986 undistributed earnings in the other separate categories. However, a deficit in any separate category shall not permanently reduce earnings in other separate categories, but after the deemed-paid taxes are computed the separate limitation deficit shall be carried forward in the same separate category in which it was incurred. In addition, because deemed-paid taxes may not exceed taxes paid or accrued by the controlled foreign corporation, in computing deemed-paid taxes with respect to an inclusion out of a separate category that exceeds post-1986 undistributed earnings in that separate category, the numerator of the deemed-paid credit fraction (deemed inclusion from the separate category) may not exceed the denominator (post-1986 undistributed earnings in the separate category).

(5) *Examples.* The application of this paragraph (i) may be illustrated by the following examples. See § 1.952–1(f)(4) for additional illustrations of these rules.

Example 1. (i) A, a U.S. person, is the sole shareholder of CFC, a controlled foreign corporation formed on January 1, 1998, whose functional currency is the u. In 1998 CFC earns 100u of general limitation income described in section 904(d)(1)(I) that is not subpart F income and 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A). In 1998 CFC also incurs a (50u) loss in the shipping category described in section 904(d)(1)(D). CFC's subpart F income for 1998, 100u, does not exceed CFC's current earnings and profits of 150u. Accordingly, all 100u of CFC's subpart F income is included in A's gross income under section 951(a)(1)(A). Under section 904(d)(3)(B) of the Internal Revenue Code and paragraph (i)(1) of this section, A includes 100u of passive limitation income in gross income for 1998.

(ii) For purposes of computing post-1986 undistributed earnings under sections 902, 904(d) and 960 with respect to the subpart F inclusion, the shipping limitation deficit of (50u) is allocated proportionately to reduce general limitation earnings of 100u and passive limitation earnings of 100u. Thus, general limitation earnings are reduced by 25u to 75u (100u general limitation earnings/200u total earnings in positive separate categories × (50u) shipping deficit = 25u reduction), and passive limitation earnings are reduced by 25u to 75u (100u passive earnings/200u total earnings in positive separate categories × (50u) shipping deficit = 25u reduction). All of CFC's post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by A under section 960 with respect to the 100u subpart F inclusion of passive income (75u inclusion (numerator limited to denominator under paragraph (i)(4) of this section)/75u passive earnings). After the inclusion and deemed-paid taxes are computed, at the close of 1998 CFC has 100u of general limitation earnings, 0 of passive limitation earnings (100u of foreign personal holding company income — 100u inclusion), and a (50u) deficit in shipping limitation earnings.

Example 2. (i) The facts are the same as in *Example 1* with the addition of the following facts. In 1999, CFC distributes 150u to A. CFC has 100u of previously-taxed earnings and profits described in section 959(c)(2) attributable to 1998, all of which is passive limitation earnings and profits. Under section 959(c), 100u of the 150u distribution is deemed to be made from earnings and profits described in section 959(c)(2). The remaining 50u is deemed to be made from earnings and profits described in section 959(c)(3). The entire dividend distribution of 50u is treated as made out of CFC's general limitation earnings and profits. See section 904(d)(3)(D).

(ii) For purposes of computing post-1986 undistributed earnings under section 902 with respect to the 1999 dividend of 50u, the shipping limitation accumulated deficit of (50u) reduces general limitation earnings and profits of 100u to 50u. Thus, 100% of CFC's post-1986 foreign income taxes with respect to general limitation earnings are deemed paid by A under section 902 with respect to the 1999 dividend of 50u (50u dividend/50u general limitation earnings). After the deemed-paid taxes are computed, at the close of 1999 CFC has 50u of general limitation earnings (100u opening balance—50u distribution), 0 of passive limitation earnings, and a (50u) deficit in shipping limitation earnings.

(6) *Effective date.* This paragraph (i) applies to taxable years of a controlled foreign corporation beginning after March 3, 1997.

[T.D. 7120, 36 FR 10852, June 4, 1971; 36 FR 11924, June 23, 1971, as amended by T.D. 7334, 39 FR 44211, Dec. 23, 1974; 40 FR 1014, Jan. 6, 1975; T.D. 7649, 44 FR 60088, 60089, Oct. 18, 1979; T.D. 7843, 47 FR 50472, Nov. 8, 1982; 47 FR 55477, Dec. 10, 1982; T.D. 7961, 49 FR 26225, June 27, 1984; T.D. 8704, 62 FR 21, Jan. 2, 1997]

§1.960–2 Interrelation of section 902 and section 960 when dividends are paid by third-, second-, or first-tier corporation.

(a) *Scope of this section.* This section prescribes rules for the application of section 902 in a case where dividends are paid by a third-, second-, or first-tier corporation, as the case may be, from its earnings and profits for a taxable year when an amount attributable to such earnings and profits is included in the gross income of a domestic corporation under section 951, or when such earnings and profits are attributable to an amount excluded from the gross income of such foreign corporation under section 959(b) and §1.959–2, with respect to the domestic corporation. In making determinations under this section, any portion of a distribution received from a first-tier corporation by the domestic corporation which is excluded from the domestic corporation's gross income under section 959(a) and §1.959–1, or any portion of a distribution received from an immediately lower-tier corporation by the third-, second-, or first-tier corporation which is excluded from such foreign corporation's gross income under section 959(b) and §1.959–2, shall be treated as a dividend for purposes of taking into account under section 902 any foreign income taxes paid by such third-, second-, or first-tier corporation which are not deemed paid by the domestic corporation under section 960(a)(1) and §1.960–1.

(b) *Application of section 902(b) to dividends received from an immediately lower-tier corporation.* For purposes of paragraph (a) of this section and paragraph (c)(1)(i) of §1.960–1, section 902(b) shall apply to all dividends received by the first- or second-tier corporation from the immediately lower-tier corporation other than dividends attributable to earnings and profits of such immediately lower-tier corporation in respect of which an amount is, or has been, included in the gross income of a domestic corporation under section 951 with respect to such immediately lower-tier corporation.

(c) *Application of section 902(a) to dividends received by domestic corporation from first-tier corporation.* For purposes of paragraph (a) of this section, section 902 (a) shall apply to all dividends received by the domestic corporation for its taxable year from the first-tier corporation other than dividends attributable to earnings and profits of such first-tier corporation in respect of which an amount is, or has been, included in the gross income of a domestic corporation under section 951 with respect to such first-tier corporation.

(d) *Allocation of earnings and profits of a first- or second-tier corporation having income excluded under section 959(b)*—(1) *First-tier corporations.* If the first-tier corporation for its taxable year receives dividends from the second-tier corporation to which in accordance with paragraph (b) of this section

902(b)(1) or section 902(b)(2) applies and other dividends from the second-tier corporation to which such sections do not apply, then in applying section 902(a) pursuant to this section and in applying section 960(a)(1) pursuant to § 1.960–1(c)(1)(i), with respect to the foreign income taxes paid and deemed paid by the second-tier corporation which are deemed paid by the first-tier corporation for such taxable year under section 902(b)(1)—

(i) The earnings and profits of the first-tier corporation for such taxable year shall be considered not to include its earnings and profits which are attributable to the dividends to which section 902(b)(1) does not apply (in determining the domestic corporation's credit for the taxes paid by the second-tier corporation) or which are attributable to the dividends to which sections 902(b)(1) and 902(b)(2) do not apply (in determining the domestic corporation's credit for taxes deemed paid by the second-tier corporation) and

(ii) For the purposes of so applying section 902(a), distributions to the domestic corporation from such earnings and profits which are attributable to the dividends to which section 902(b)(1) does not apply (in determining the domestic corporation's credit for taxes paid by the second-tier corporation) or which are attributable to the dividends to which sections 902(b)(1) and 902(b)(2) do not apply (in determining the domestic corporation's credit for taxes deemed paid by the second-tier corporation) shall not be treated as a dividend.

(2) *Second-tier corporations.* If the second-tier corporation for its taxable year receives dividends from the third-tier corporation to which, in accordance with paragraph (b) of this section, section 902(b)(2) applies and other dividends from the third-tier corporation to which such section does not apply, then in applying section 902(b)(1) pursuant to this section, and in applying section 960(a)(1) pursuant to paragraph (c)(1)(i) of § 1.960–1, with respect to the foreign taxes deemed paid by the second-tier corporation for such taxable year under section 902(b)(2)—

(i) The earnings and profits of the second-tier corporation for such taxable year shall be considered not to include its earnings and profits which are attributable to such other dividends from the third-tier corporation, and

(ii) For the purposes of so applying section 902(b)(1), distributions to the first-tier corporation from such earnings and profits which are attributable to such other dividends from the third-tier corporation shall not be treated as a dividend.

(e) *Separate determinations under sections 902(a), 902(b)(1), and 902(b)(2) in the case of a first-, second-, or third-tier corporation having income excluded under section 956(b).* If in the case of a first-, second-, or third-tier corporation to which paragraph (b) or (c) of this section is applied—

(1) The earnings and profits of such foreign corporation for its taxable year consist of—

(i) Dividends received from an immediately lower-tier corporation which are attributable to amounts included in the gross income of a domestic corporation under section 951 with respect to the immediately lower- or lower-tier corporations, and

(ii) Other earnings and profits, and

(2) The effective rate of foreign income taxes paid or accrued by such foreign corporation on the dividends described in paragraph (e)(1)(i) of this section is higher or lower than the effective rate of foreign income taxes attributable to its earnings and profits described in paragraph (e)(1)(ii) of this section,

then, for purposes of applying paragraph (b) or (c) of this section to dividends paid by such foreign corporation to the domestic corporation or the first- or second-tier corporation, sections 902(a), 902(b)(1), and 902(b)(2) shall be applied separately to the portion of the dividend which is attributable to the earnings and profits described in paragraph (e)(1)(i) of this section and separately to the portion of the dividend which is attributable to the earnings and profits described in paragraph (e)(1)(ii) of this section. In making a separate determination with respect to the earnings and profits described in paragraph (e)(1)(i) or (e)(1)(ii) of this section, only the foreign income taxes paid or accrued (or, in the case of earnings and profits of a first- or second-tier corporation described in paragraph (e)(1)(ii) of this section, deemed to be paid) by such foreign corporation on the income attributable to such earnings and profits shall be taken into account. For purposes of applying this paragraph (e), no part of the foreign income taxes paid, accrued, or deemed to be paid which are attributable to the earnings and profits described in paragraph (e)(1)(ii) of this section shall be attributed to the dividend described in paragraph (e)(1)(i) of this section; and no part of the foreign income taxes paid or accrued on the dividend described in paragraph (e)(1)(i) of this section shall be attributed to the earnings and profits described in paragraph (e)(1)(ii) of this section. Furthermore, the effective rate of foreign income taxes paid or accrued shall be determined consistently with the principles of paragraphs (b)(3)(iv) and (viii) and (c) of §1.954–1. Thus, for example, the effective rate of foreign income taxes on dividends received by such foreign corporation shall be determined by taking into account any intercorporate dividends received deduction allowed to such corporation for such dividends.

(f) *Illustrations.* The application of this section may be illustrated by the following examples. In all of the examples other than examples 6, 7, 9 and 10, it is assumed that the effective rate of foreign income taxes paid or accrued by the first- or second-tier corporation, as the case may be, in respect to dividends received from the immediately lower-tier corporation, is the same as the effective rate of foreign income taxes paid or accrued by the first- or second-tier corporation with respect to its other income:

Example 1. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include $50 in gross income attributable to the earnings and profits of A Corporation for such year, but is not required to include any amount in gross income under section 951 attributable to the earnings and profits of B Corporation. For such year, B Corporation distributes a dividend of $45, but A Corporation does not make any distributions. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1), after applying section 902(b)(1) for such year of A Corporation, are determined as follows upon the basis of the facts assumed:

B Corporation (second-tier corporation):		
Pretax earnings and profits		$100.00
Foreign income taxes (40%)		40.00
Earnings and profits		60.00
Dividends paid to A Corporation		$45.00
Foreign income taxes paid by B Corporation on or with respect to its accumulated profits		40.00
Foreign income taxes of B Corporation deemed paid by A Corporation for 1978 under section 902(b)(1) ($45/$60×$40)		30.00
A Corporation (first-tier corporation):		
Pretax earnings and profits:		
Dividends from B Corporation	$45.00	
Other income	100.00	
Total pretax earnings and profits		145.00
Foreign income taxes (20%)		29.00
Earnings and profits		116.00
Foreign income taxes paid, and deemed to be paid, by A Corporation on or with respect to its earnings and profits ($29+$30)		59.00
Amount required to be included in N Corporation's gross income under section 951 with respect to A Corporation		50.00
Dividends paid to N Corporation		0
N Corporation (domestic corporation):		
Foreign income taxes of A Corporation deemed paid by N Corporation for 1978 under section 960(a)(1) ($50/$116×$59)		25.43

Example 2. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $150 attributable to the earnings and profits of B Corporation for such year, which B Corporation distributes during such year. Corporation N is not required for 1978 to include any amount in gross income under section 951 attributable to the earnings and profits of A Corporation, but A Corporation distributes for such year $135 from its earnings and profits attributable to B Corporation's dividend. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1)(C) and section 902(a) are determined as follows upon the basis of the facts assumed:

B Corporation (second-tier corporation):		
Pretax earnings and profits		$250.00
Foreign income taxes (20%)		50.00
Earnings and profits		200.00
Amounts required to be included in N Corporation's gross income under section 951 with respect to B Corporation		150.00
Dividends paid to A Corporation		150.00
Foreign income taxes paid on or with respect to earnings and profits of B Corporation		50.00
A Corporation (first-tier corporation):		
Pretax earnings and profits:		
Dividends from B Corporation	$150.00	
Other income	200.00	
Total pretax earnings and profits		350.00
Foreign income taxes (10%)		35.00

Earnings and profits	315.00
Dividends paid to N Corporation	135.00
Foreign income taxes paid by A Corporation on or with respect to its accumulated profits	35.00
N Corporation (domestic corporation):	
Foreign income taxes of B Corporation deemed paid by N Corporation for 1978 under section 960(a)(1) ($150/$200×$50)	37.50
Foreign income taxes of A Corporation deemed paid by N Corporation for 1978 under section 902(a) ($135/$315×$35)	15.00
Total foreign income taxes deemed paid by N Corporation under section 901	52.50

Example 3. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include $180 in gross income attributable to the earnings and profits of A Corporation for such year, but is not required to include any amount in gross income under section 951 attributable to the earnings and profits of B Corporation. Corporation B distributes from its earnings and profits for 1978 a dividend of $50. For 1978, A Corporation distributes $180 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross income for such year with respect to A Corporation and $20 from its other earnings and profits. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) and section 902(a) are determined as follows upon the basis of the facts assumed:

B Corporation (second-tier corporation):		
Pretax earnings and profits		$100.00
Foreign income taxes (40%)		40.00
Earnings and profits		60.00
Dividends paid to A Corporation		50.00
Foreign income taxes paid by B Corporation on or with respect to its accumulated profits		40.00
Foreign income taxes of B Corporation deemed paid by A Corporation for 1978 under section 902(b)(1) ($50/$60×$40)		33.33
A Corporation (first-tier corporation):		
Pretax earnings and profits:		
Dividends from B Corporation	$50.00	
Other income	200.00	
Total pretax earnings and profits		250.00
Foreign income taxes (10%)		25.00
Earnings and profits		225.00
Foreign income taxes paid, and deemed to be paid, by A Corporation on or with respect to its earnings and profits ($25.00+$33.33)		58.33
Amounts required to be included in N Corporation's gross income for 1978 under section 951 with respect to A Corporation		180.00
Dividends paid to N Corporation:		
Dividends to which section 902(a) does not apply (from A Corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N Corporation's gross income with respect to A Corporation)	180.00	
Dividends to which section 902(a) applies (from A Corporation's other earnings and profits)	20.00	
Total dividends paid to N Corporation		$200.00
N Corporation (domestic corporation):		
Foreign income taxes of corporations A and B deemed paid by N Corporation under section 960(a)(1) ($180/$225×$58.33)		46.66
Foreign income taxes of corporations A and B deemed paid by N Corporation under section 902(a) ($20/$225×$58.33)		5.18
Total foreign income taxes deemed paid by N Corporation under section 901		51.84

Example 4. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $150 attributable to the earnings and profits of B Corporation for such year and $22.50 attributable to the earnings and profits of A Corporation for such year. For 1978, B Corporation distributes $175, consisting of $150 from its earnings and profits attributable to amounts required under section 951 to be included in N Corporation's gross income with respect to B Corporation and $25 from its other earnings and profits. Corporation A does not distribute any dividends for 1978. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) are determined as follows upon the basis of the facts assumed:

B Corporation (second-tier corporation):		
Pretax earnings and profits		$250.00
Foreign income taxes (20%)		50.00
Earnings and profits		200.00
Amounts required to be included in N Corporation's gross income under section 951 for 1978 with respect to B Corporation		150.00
Dividends paid by B Corporation:		
Dividends to which section 902(b) does not apply (from B Corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N Corporation's gross income with respect to B Corporation)	$150.00	

Dividends to which section 902(b)(1) applies (from B Corporation's other earnings and profits)	25.00	
Total dividends paid to A Corporation		175.00
Foreign income taxes paid by B Corporation on or with respect to its accumulated profits		50.50
Foreign income taxes of B Corporation deemed paid by A Corporation for 1978 under section 902(b)(1) ($25/$200×$50)		6.25
A Corporation (first-tier corporation):		
Pretax earnings and profits		175.00
Foreign income tax (10 percent)		17.50
Earnings and profits		157.50
Earnings and profits after exclusion of amounts attributable to dividends to which section 902(b) does not apply ($157.50 less [$150 − ($150×0.10)])		22.50
Amount required to be included in N Corporation's gross income for 1978 under section 951 with respect to A Corporation		22.50
Dividends paid to N Corporation		0
N Corporation (domestic corporation):		
Foreign income taxes deemed paid by N Corporation under section 960(a)(1)(C) with respect to A Corporation:		
Tax actually paid by A Corporation ($22.50/$157.50×$17.50)	2.50	
Tax of B Corporation deemed paid by A Corporation under section 902(b)(1) ($22.50/$22.50×$6.25)	6.25	
		8.75
Foreign income taxes deemed paid by N Corporation under section 960(a)(1)(C) with respect to B Corporation ($150/$200×$50)		37.50
Total taxes deemed paid under section 960(a)(1)(C)		46.20

Example 5. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $150 attributable to the earnings and profits of B Corporation for such year and $22.50 attributable to the earnings and profits of A Corporation for such year. For 1978, B Corporation distributes $175, consisting of $150 from its earnings and profits attributable to amounts required under section 951 to be included in N Corporation's gross income with respect to B Corporation and $25 from its other earnings and profits. For 1978, A Corporation distributes $225, consisting of $135 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross, income with respect to B Corporation, $22.50 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross income with respect to A Corporation, and $67.50 from its other earnings and profits. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) and section 902(a)(1) are determined as follows upon the basis of the facts assumed:

B Corporation (second-tier corporation):		
Pretax earnings and profits		$250.00
Foreign income taxes (20%)		50.00
Earnings and profits		200.00
Amounts required to be included in N Corporation's gross income for 1978 under section 951 with respect to B Corporation		150.00
Dividends paid by B Corporation:		
Dividends to which section 902(b) does not apply (from B Corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N Corporation's gross income with respect to B Corporation)	$150.00	
Dividends to which section 902(b) applies (from B Corporation's other earnings and profits)	$25.00	
Total dividends paid to A Corporation		$175.00
Foreign income taxes paid by B Corporation on or with respect to its accumulated profits		50.00
Foreign income taxes of B Corporation deemed paid by A Corporation for 1978 under section 902(b)(1) ($25/$200×$50)		6.25
A Corporation (first-tier corporation):		
Pretax earnings and profits:		
Dividends received from B Corporation	175.00	
Other income	100.00	
Total pretax earnings and profits		275.00
Foreign income taxes (10 percent)		27.50
Earnings and profits		247.50
Earnings and profits after exclusion of amounts attributable to dividends to which section 902(b) does not apply ($247.50 less [$150 −($150×0.10)])		112.50
Amount required to be included in N Corporation's gross income for 1978 under section 951 with respect to A Corporation		22.50
Distributions paid by A Corporation:		
Dividends to which section 902(a) does not apply (From A Corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N Corporation's gross income with respect to A Corporation)	22.50	
Dividends to which section 902(a) applies (from A Corporation's other earnings and profits)	202.50	
Total dividends paid to N Corporation	225.00	
N Corporation (domestic corporation):		
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to—		
B Corporation ($150/$200×$50)	....	37.50
A Corporation:		
Tax paid by A Corporation ($22.50/$247.50×$27.50)	2.50	

Tax of B Corporation deemed paid by A Corporation under section 902(b)(1) ($22.50/ $112.50×$6.25)	1.25	3.75
Total taxes deemed paid under section 960(a)(1)		41.25
Foreign income taxes deemed paid by N Corporation under section 902(a)(1) with respect to A Corporation:		
Tax paid by A Corporation ($200.50/$247.50×$27.50)	22.50	
Tax of B Corporation deemed paid by A Corporation ($67.50/ $112.50×$6.25)	3.75	
Total taxes deemed paid under section 902(a)(1)		26.52
Total foreign income taxes deemed paid by N Corporation under section 901		67.05

Example 6. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. A and B corporations are organized under the laws of foreign country X. All of B corporation's assets used in a trade or business are located in country X. Country X imposes an income tax of 20 percent on B corporation's income. For 1978, N Corporation is required under section 951 to include in gross income $100 attributable to the earnings and profits of B Corporation for such year. For 1978, B Corporation distributes $150, consisting of $100 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross income with respect to B Corporation and $50 from its other earnings and profits. Country X imposes an income tax of 10 percent on A Corporation's income but exempts from tax dividends received from B Corporation. N is not required to include any amount in gross income under section 951 for 1978 attributable to the earnings and profits of A Corporation for such year. For 1978, A Corporation distributes $175, consisting of $100 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross income with respect to B Corporation, and $75 from its other earnings and profits. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) and section 902(a) are determined as follows on the basis of the facts assumed:

B Corporation (2d-tier corporation):		
Pretax earnings and profits		$200.00
Foreign income taxes (20%)		40.00
Earnings and profits		160.00
Amount required to be included in N Corporation's gross income for 1978 under section 951 with respect to B Corporation		100.00
Dividends paid by B Corporation:		
Dividends to which section 902(b) does not apply (from B corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N corporation's gross income with respect to B corporation)	$100.00	
Dividends to which section 902(b)(1) applies (from B corporation's other earnings and profits)	50.00	
Total dividends paid to A corporation		150.00
Foreign income taxes of B corporation deemed paid by A corporation for 1978 under section 902(b)(1) ($50/$100× $40)	12.50	
A corporation (1st-tier corporation):		
Pretax earnings and profits:		
Dividends received from B corporation	150.00	
Other income	100.00	
Total pretax earnings and profits		250.00
Foreign income taxes:		
On dividends received from B corporation	None	
On other income ($100×0.10)	10.00	
Total foreign income taxes		10.00
Earnings and profits:		
Attributable to dividends received from B corporation to which section 902(b) does not apply		100.00
Attributable to other income:		
Attributable to dividends received from B Corporation to which section 902(b)(1) applies	50.00	
Attributable to other income ($100 − $10)	90.00	
Subtotal		140.00
Total earnings and profits		240.00
Earnings and profits after exclusion of amounts attributable to dividends to which section 902(b) does not apply ($240 − $100)		140.00
Amount required to be included in N corporation's gross income for 1978 under section 951 with respect to A corporation		None
Dividends paid by A corporation:		
Dividends to which section 902(a) does not apply (from A corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N corporation's gross income with respect to A corporation)	None	
Dividends to which section 902(a) applies (from A corporation's other earnings and profits)	$175.00	
Total dividends paid to N corporation		$175.00
N corporation (domestic corporation):		
Foreign income taxes deemed paid by N corporation under section 960(a)(1) with respect to B corporation ($100/$160×$40)		25.00

Foreign income taxes deemed paid by N corporation under section 902(a) with respect to A corporation (allocation of earnings and profits being made under pars. (c)(2) and (d) of this section):		
Tax paid by A corporation in respect to dividends received from B Corporation to which section 902(b) does not apply ($100/ $100×$0) ..	None	
Tax paid by A corporation in respect to its other income ($75/ $140×$10)	5.36	
Tax paid by B corporation deemed paid by A corporation in respect to such other income ($75/$140×$12.50) ..	6.70	
Total taxes deemed paid under section 902(a)		12.06
Total foreign income taxes deemed paid by N corporation under section 901	37.06	

Example 7. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include in gross income $150 attributable to the earnings and profits of B Corporation for such year and $47.50 attributable to the earnings and profits of A Corporation for such year. For 1978, B Corporation distributes $200, consisting of $150 from its earnings and profits attributable to the amount required under section 951 to be included in N Corporation's gross income with respect to B Corporation and $50 from its other earnings and profits. The country under the laws of which A Corporation is incorporated imposes an income tax of 5 percent on dividends received from a subsidiary corporation and 20 percent on other income. For 1978, A Corporation distributes $100 from its earnings and profits to N Corporation, such amount being attributable under paragraph (e) of §1.959–3 to the amount required under section 951 to be included in N Corporation's gross income with respect to B Corporation. The foreign income taxes deemed paid by N Corporation for 1978 under section 960(a)(1) and section 902(a) are determined as follows on the basis of the facts assumed:

B Corporation (2d-tier corporation):		
Pretax earnings and profits		$250.00
Foreign income taxes (20 percent)		150.00
Earnings and profits		200.00
Amount required to be included in N Corporation's gross income for 1978 under section 951 with respect to B corporation		150.00
Dividends paid by B corporation:		
Dividends to which section 902(b) does not apply (from B corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N corporation's gross income with respect to B corporation)	$150.00	
Dividends to which section 902(b)(1) applies (from B corporation's other earnings and profits)	50.00	
Total dividends paid to A corporation		200.00
Foreign income taxes of B corporation deemed paid by A corporation for 1978 under section 902(b)(1) ($50/$200×$50)		12.50
A corporation (1st-tier corporation):		
Pretax earnings and profits:		
Dividends received from B corporation	200.00	
Other income	100.00	
Total pretax earnings and profits		300.00
Foreign income taxes:		
On dividends received from B corporation to which section 902(b) does not apply ($150× 0.05)		7.50
On other income:		
Dividends received from B corporation to which section 902(b)(1) applies ($50× 0.05)	2.50	
Other income of A corporation ($100×0.20)	20.00	
Total		22.50
Total foreign income taxes		30.00
Earnings and profits:		
Attributable to dividends received from B corporation to which section 902(b) does not apply ($150 − $7.50)		142.50
Attributable to other income:		
Attributable to dividends received from B corporation to which section 902(b)(1) applies ($50 − $2.50)	47.50	
Attributable to other income ($100 − $20	80.00	
Total		127.50
Total earnings and profits		270.00
Earnings and profits after exclusion of amounts attributable to dividends to which section 902(b) does not apply ($270 less $142.50)		127.50
Amount required to be included in N corporation's gross income for 1978 under section 951 with respect to A corporation		47.50
Dividends paid by A Corporation:		
Dividends to which section 902(a) does not apply (from A corporation's earnings and profits in respect of which an amount is required under section 951 to be included in N corporation's gross income with respect to A corporation)	None	
Dividends to which section 902(a)(1) applies (from A corporation's other earnings and profits)	$100.00	
Total dividends paid to N corporation ...		$100.00

N Corporation (domestic corporation):		
Foreign income taxes deemed paid by N corporation under section 960(a)(1) with respect to—B corporation ($150/$200×$50)		37.50
A corporation (allocation of earnings and profits being made under § 1.960–1(c)(3) and par. (d) of this section):		
Tax paid by A corporation ($47.50/$127.50×$22.50)	8.38	
Tax of B corporation deemed paid by A corporation under section 902(b)(1) ($47.50/$127.50×$12.50)	4.66	
Total		13.04
Total taxes deemed paid under section 960(a)(1)		50.54
Foreign income taxes deemed paid by N corporation under section 902(a) with respect to A corporation (allocations of earnings and profits being made under pars. (c)(2) and (d) of this section) ($100/$142.50×$7.50)	5.26	
Total foreign income taxes deemed paid by N Corporation under section 901		55.80

Example 8. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B, which owns all the one class of stock of controlled foreign corporation C. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required under section 951 to include $50 attributable to the earnings and profits of C Corporation and $15 attributable to the earnings and profits of B Corporation in its gross income. N Corporation is not required to include any amount in its gross income with respect to A Corporation under section 951 in 1978. For such year, C Corporation distributes $75 to B Corporation. B Corporation in turn distributes $60 of its earnings and profits to A Corporation. A Corporation has no other earnings and profits for 1978 and distributes $45 of its earnings and profits to N Corporation. The foreign income taxes deemed paid by N Corporation under section 960(a)(1) and section 902(a) are determined as follows on the basis of the facts assumed:

C Corporation (third-tier corporation):

Pretax earnings and profits		$150.00
Foreign taxes paid by C Corporation (30%)		45.00
Earnings and profits		105.00
Amount required to be included in gross income of N Corporation under section 951 with respect to C Corporation		50.00
Dividend to B Corporation		75.00
Dividend from earnings and profits to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	50.00	
Dividend from earnings and profits to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income with respect to C Corporation)	$25.00	
Amount of foreign income taxes of C Corporation deemed paid by B Corporation under section 902(b)(2) and § 1.960–2(b):		

$$\frac{\text{Dividend to B Corporation less portion of dividend from earnings included in N Corporation' s gross income under section 951 with respect to C Corporation}}{\text{Earnings and profits of C Corporation}} \times \text{Taxes paid by C Corporation}$$

($25/$105×$45)		$10.71

B Corporation (second-tier corporation):

Pretax earnings and profits:		
Dividend from C Corporation	$75.00	
Other earnings and profits	225.00	
Total pretax earnings and profits		$300.00
Foreign income taxes paid by B Corporation (40%)		120.00
Earnings and profits		180.00
Earnings and profits attributable to amounts to which section 902(b)(2) does not apply (amounts included in N Corporation's gross income under section 951 with respect to C Corporation ($50 − ($50×.40))	30.00	
Other earnings and profits	150.00	
Earnings and profits of B Corporation after exclusion for amounts to which section 902(b)(2) does not apply (amounts attributable to earnings and profits which are included in N Corporation's gross income under section 951 with respect to C Corporation) ($180 − $30)		150.00
Amount to be included in gross income under section 951 of N Corporation with respect to B Corporation		15.00
Amount of dividend to A Corporation		60.00
Dividend from earnings and profits to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	30.00	

Dividend from earnings and profits to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)	15.00	
Dividend from other earnings and profits (attributable to amounts not included in N Corporation's gross income under section 951 with respect to B or C Corporation)	15.00	

Foreign income taxes of B Corporation deemed paid by A Corporation under section 902(b)(1) and § 1.960–2(b):

$$\frac{\begin{array}{c}\text{Dividend to A Corporation less portion of divi}-\\ \text{dend from earnings included in N Corporation' s}\\ \text{gross income under section 951}\\ \text{with respect to B Corporation}\end{array}}{\text{Earnings and profits of B Corporation}}\times\text{Taxes paid by B Corporation}$$

($45/$180×120)		$30.00

Foreign income taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation under section 902(b)(1) in accordance with § 1.960–2(b) and § 1.960–2(d)(2)(i) and (ii):

$$\frac{\begin{array}{c}\text{Dividend to A Corporation less portion}\\ \text{of dividend from earnings included in}\\ \text{N Corporation' s gross income under}\\ \text{section 951 with respect to}\\ \text{B Corporation and C Corporation}\end{array}}{\begin{array}{c}\text{Earnings and profits of B Corporation}\\ \text{less earnings and profits attributable to}\\ \text{amounts included in N Corporation' s gross}\\ \text{income with respect to C Corporation}\end{array}}\times\begin{array}{c}\text{Taxes paid by C Corporation}\\ \text{which are deemed paid by}\\ \text{B Corporation}\end{array}$$

($15/$150×$10.71)		1.07

A Corporation (first-tier corporation):

Pretax earnings and profits:		
Dividend from B Corporation	$60.00	
Other earnings and profits	0	
Total pretax earnings and profits		$60.00
Foreign income taxes paid by A Corporation (10%)		6.00
Earnings and profits		54.00
Earnings and profits attributable to amounts to which section 902(b)(2) does not apply (attributable to amounts previously included in N Corporation's gross income under section 951 with respect to C Corporation) ($30 − ($30X.10))	27.00	
Earnings and profits attributable to amounts to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation) ($15 − ($15X.10))	13.50	
Other earnings and profits ($15— ($15X.10))	13.50	
Earnings and profits of A Corporation after exclusion for amounts to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation) ($54.00 − $13.50)		40.50
Earnings and profits of A Corporation after exclusion for amounts to which sections 902(b)(1) and (2) do not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B or C Corporation) ($40.50 − $27.00)		13.50
Dividend to N Corporation		45.00
Dividend from earnings and profits to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$27.00	
Dividend from earnings and profits to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)	13.50	

Dividend from earnings and profits to which section 902(a) does not apply (attributable to amounts included in N Corporation’s gross income under section 951 with respect to A Corporation)	0
Dividend from other earnings and profits (attributable to amounts not included in N Corporation’s gross income under section 951 with respect to A, B, or C Corporation)	4.50

N Corporation (domestic corporation):

Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and § 1.960–1(c)(1)(ii) with respect to C Corporation:

$$\frac{\text{Amount included in N Corporation' s gross income under section 951 with respect to C Corporation}}{\text{Earnings and profits of C Corporation}} \times \text{Taxes paid by C Corporation}$$

($50/$105×$45.00)	$21.43
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and § 1.960–1(c)(1)(i) with respect to B Corporation	11.07

Taxes paid by B Corporation:

$$\frac{\text{Amount included in N Corporation' s gross income under section 951 with respect to B Corporation}}{\text{Earnings and profits of B Corporation}} \times \text{Taxes paid by B Corporation}$$

($15/$180×$120)	$10.00

Taxes deemed paid by B Corporation in accordance with § 1.960–2(d)(2)(i):

$$\frac{\text{Amount included in N Corporation' s gross income under section 951 with respect to B Corporation}}{\text{Earnings and profits of B Corporation less earnings and profits attributable to amounts included in N Corporation' s gross income with respect to C Corporation}} \times \text{Taxes paid by C Corporation which are deemed paid by B Corporation}$$

($15/$150×$10.71)	$1.07
Total taxes deemed paid by N Corporation under section 960(a)(1)	$32.50

Foreign income taxes deemed paid by N Corporation under section 902(a):

Taxes paid by A Corporation in accordance with § 1.960–2(c):

$$\frac{\text{Dividend to N Corporation less portion of dividend from earnings included in N Corporation' s gross income under section 951 with respect to A Corporation}}{\text{Earnings and profits of A Corporation}} \times \text{Taxes paid by A Corporation}$$

($45/$54×$6)	$5.00

Taxes paid by B Corporation deemed paid by A Corporation in accordance with §§1.960–2(c) and 1.960–2(d)(1)(i) and (ii):

$$\frac{\text{Dividend to N Corportion less portionof dividend from earnings included in N Corporation's gross income under section 951 with respect to A and B Corporations}}{\text{Earnings and profits of A Corporation less earnings and profits attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation}} \times \text{Taxes paid by B Corporation which are deemed paid by A Corporation}$$

($31.50/$40.50×$30.00)	23.33

Taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation in accordance with §§1.960–2(c) and 1.960–2(d)(1)(i) and (ii):

$$\frac{\text{Dividend to N Corporation less portion of dividend from earnings included in N Corporation's gross income under section 951 with respect to A, B, and C Corporations}}{\text{Earnings and profits of A Corporation less earnings and profits attributable to amounts included in N Corporation's gross income under section 951 with respect to B and C Corporations}} \times \text{Taxes deemed paid by B Corporation which are deemed paid by A Corporation}$$

($4.50/$13.50×$1.07)	.36	
Total taxes deemed paid by N Corporation under section 902(a)		$28.69
Total foreign income taxes deemed paid by N Corporation under section 901	$61.19	

Example 9. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B, which owns all the one class of stock of controlled foreign corporation C. A and B Corporations are organized under the laws of foreign country X. C Corporation is organized under the laws of foreign country Y. All of B Corporation's assets used in a trade or business are located in country X. All such corporations use the calendar year as the taxable year. For 1978, N Corporation is required to include in its gross income under section 951, $50 attributable to the earnings and profits of C Corporation and $100 attributable to the earnings and profits of B Corporation. N Corporation is not required to include any amount in its gross income under section 951 with respect to A Corporation. Country X imposes an income tax of 10 percent on dividends from foreign subsidiaries, 20 percent on dividends from domestic subsidiaries, and 40 percent on other earnings and profits. For 1978, C Corporation distributes $75 to B Corporation. For such year, B Corporation distributes $175 of its earnings

and profits to A Corporation. A Corporation has no other earnings and profits for 1978 and distributes $130 of its earnings and profits to N Corporation. The foreign income taxes deemed paid by N Corporation under sections 960(a)(1) and 902(a) are determined as follows on the basis of the facts assumed:

C Corporation (third-tier corporation):

Pretax earnings and profits		$150.00
Foreign income taxes paid by C Corporation (30%)		45.00
Earnings and profits		105.00
Amount required to be included in gross income of N Corporation under section 951 with respect to C Corporation		50.00
Dividend to B Corporation		75.00
Dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$50.00	
Dividend to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation)	25.00	
Amount of foreign income taxes of C Corporation deemed paid by B Corporation under section 902(b)(2) and § 1.960–2(b) ($25/$105×$45)		10.71
(For formula see § 1.960–2(g)(1)(i)(A))		

B Corporation (second-tier corporation):

Pretax earnings and profits:		
Dividend from C Corporation	$75.00	
Other earnings and profits	225.00	
Total pretax earnings and profits		$300.00
Foreign income taxes paid by B Corporation		97.50
On dividends received from C Corporation to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($50×.10)	$5.00	
On dividend from C Corporation to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation) ($25×.10)	2.50	
On other income of B Corporation ($225×.40)	90.00	
Earnings and profits		202.50
Attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($50 − $5)	45.00	
Attributable to dividend from C Corporation to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation) ($25 − $2.50)	$22.50	
Attributable to other income of B Corporation ($225 − $90)	135.00	
Earnings and profits after exclusion of amounts attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($202.50 − $45)		$157.50
Amount required to be included in N Corporation's gross income under section 951 with respect to B Corporation		100.00
Dividend paid by B Corporation		175.00
Dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$45.00	
Dividend to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)	100.00	
Dividend from other earnings and profits (attributable to amounts not included in N Corporation's gross income with respect to B or C Corporation)	30.00	
Foreign income taxes of B Corporation deemed paid by A Corporation under section 902(b)(1) (separate tax rate applicable to dividend received by B Corporation allocation in accordance with § 1.960–2(e)) (for formula see § 1.960–2(g)(1)(ii)(A)(*2*) (*i*) and (*ii*)):		

Tax paid by B Corporation on earnings previously taxed with respect to C Corporation or lower-tiers which is deemed paid by A Corporation:

$$\frac{\text{Portion of dividend to A Corporation from earnings included in N Corporation's gross income under section 951 with respect to C Corporation or lower-tiers}}{\text{Earnings and profits of B Corporation included in N Corporation's gross income under section 951 with respect to C Corporation or lower-tiers}} \times \text{Tax paid by B Corporation on dividend received by B Corporation from earnings included in N Corporation's gross income with respect to C Corporation or lower-tiers}$$

($45/$45×$5)	$5.00

Tax paid by B Corporation on earnings not previously taxed with respect to C Corporation or lower-tiers which is deemed paid by A Corporation:

$$\frac{\text{Portion of dividend to A Corporation which is from earnings not included in N Corporation's gross income under section 951 with respect to B Corporation or lower-tiers}}{\text{Earnings and profits of B Corporation not included in N Corporation's gross income under section 951 with respect to C Corporation or lower-tiers}} \times \text{Tax paid by B Corporation on earnings not included in N Corporation's gross income with respect to C Corporation or lower-tiers}$$

($30/157.50×$92.50)		$17.62
Foreign income taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation under section 902(b)(1) ($30/$157.50×$10.71)		2.04

(For formula see §1.960–2(g)(1)(ii)(B)(*1*))

A Corporation (first-tier corporation):

Pretax earnings and profits:		
Dividend from B Corporation	$175.00	
Other income	0	
Total pretax earnings and profits		$175.00
Foreign income taxes paid by A Corporation (20%)		35.00
Earnings and profits		140.00
Attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($45 − ($45×.20))	$36.00	
Attributable to amounts to which section 902(b)(1) does not apply (Attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation) ($100 − ($100×.20))	80.00	
Attributable to other earnings and profits (attributable to amounts not included in N Corporation's gross income with respect to B or C Corporation)	24.00	
Earnings and profits after exclusion for amounts to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation) ($140 − $80)		$60.00
Earnings and profits after exclusion for amounts to which sections 902(b)(1) and 902(b)(2) do not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B or C Corporation) ($60 − $36)		24.00

Amount required to be included in N Corporation's gross income under section 1951 with respect to A Corporation		None
Dividend to N Corporation		$130.00
Dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$36.00	
Dividend to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)	80.00	
Dividend to which section 902(a) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to A Corporation)	0	
Dividend from other earnings and profits (attributable to amounts not included in N Corporation's gross income with respect to A, B, or C Corporation)	14.00	

N Corporation (domestic corporation):

Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and §1.960–1(c) with respect to C Corporation ($50/$105×$45)	$21.43
(for formula see §1.960–2(g)(2)(i)(A))	
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to B Corporation (allocation of earnings and profits being made in accordance with §1.960–1(c)(3) and §1.960–2(e)) (Separate tax rate applicable to dividend received by B Corporation)	65.53

Taxes paid by B corporation (for formula see §1.960–2(g)(2)(ii) (A)(*2*)):

$$\frac{\text{Amount included in N Corporation's gross income under section 951 with respect to B Corporation}}{\text{Earnings and profits of B Corporation not included in N Corporation's gross income under section 951 with respect to C Corporation or lower tiers}} \times \text{Tax paid by B Corporation on earnings not included in N Corporation's gross income with respect to C Corporation or lower tiers}$$

($100/$157.50×$92.50)	$58.73	
Taxes (of C Corporation) deemed paid by B Corporation under section 902(b)(2) which are deemed paid by N Corporation under section 960(a)(1) ($100/$157.50×$10.71)	6.80	
(for formula see § 1.960–2(g)(2)(ii)(B)(*1*))		
Total taxes deemed paid by N Corporation under section 960(a)(1)		$86.96

Foreign income taxes deemed paid by N Corporation under section 902(a):

Taxes paid by A Corporation ($130/$140×$35)	$32.50
(for formula see § 1.960–2(g)(1)(iii)(A)(*1*))	

Taxes paid by B Corporation deemed paid by A Corporation (Separate tax rate applicable to dividend received by B Corporation allocation required by § 1.960–2(e)) (for formula see § 1.960–2(g)(1)(iii)(B)(*2*) (*i*) and (*ii*)):

Tax paid by B Corporation on earnings previously taxed with respect to C Corporation or lower tiers which is deemed paid by N Corporation:

$$\frac{\text{Portion of dividend to N Corporation which is from earnings included in N Corporation's gross income under section 951 with respect to C Corporation or lower tiers}}{\text{Earnings and profits of A Corporation included in N Corporation's gross income under section 951 with respect to C Corporation or lower tiers}} \times \text{Tax paid by B Corporation on earnings previously taxed with respect to C Corporation or lower tiers which is deemed paid by A Corporation}$$

($36/$36×$5)	$5.00

Tax paid by B Corporation on earnings not previously taxed with respect to C Corporation or lower tiers which is deemed paid by N Corporation:

$$\frac{\text{Portion of dividend to N Corporation which is from earnings not included in N Corporation's gross income under section 951 with respect to A Corporation or lower tiers}}{\text{Earnings and profits of A Corporation not included in N Corporation's gross income under section 951 with respect to B Corporation or lower tiers}} \times \text{Tax paid by B Corporation on earnings not previously taxed with respect to C Corporation or lower tiers which is deemed paid by A Corporation}$$

($14/$24×$17.62)	$10.28	
Taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation ($14/$24×$2.04)	1.19	
(for formula see § 1.960–2(g)(1)(iii)(C)(*1*))		
Total taxes deemed paid by N Corporation under section 902(a)		$48.97
Total foreign income taxes deemed paid by N Corporation under section 901		135.93

Example 10. The facts are the same as in example 9 except that A Corporation has other earnings and profits of $200 in 1978 and country X imposes a tax of 50 percent on A Corporation's other earnings and profits. A Corporation distributes $200 of its earnings and profits to N Corporation in 1978. The foreign income taxes paid by N Corporation under sections 960 (a)(1) and 902 (a) are determined as follows on the basis of the facts assumed:

C Corporation (third-tier corporation):

Pretax earnings and profits		$150.00
Foreign income taxes paid by C Corporation (30%)		45.00
Earnings and profits		105.00
Amount required to be included in gross income of N Corporation under section 951 with respect to C Corporation		$50.00
Dividend to B Corporation		75.00
Dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	50.00	
Dividend to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation)	25.00	
Amount of foreign income taxes of C Corporation deemed paid by B Corporation under section 902(b)(2) and §1.960–2(b) ($25/$105×$45)		10.71
(for formula see §1.960–2(g)(1)(i)(A))		

B Corporation (second-tier corporation):

Pretax earnings and profits:		
Dividend from C Corporation	$75.00	
Other earnings and profits	225.00	
Total pretax earnings and profits		$300.00
Foreign income taxes of B Corporation		$97.50
On dividends received from C Corporation to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($50×.10)	$5.00	
On dividend from C Corporation to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation) ($25×.10)	2.50	
On other income of B Corporation ($225×.40)	90.00	
Earnings and profits		$202.50
Attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($50–$5)	$45.00	
Attributable to dividend from C Corporation to which section 902(b)(2) applies (attributable to amounts not included in N Corporation's gross income under section 951 with respect to C Corporation) ($25–$2.50)	22.50	
Attributable to other income of B Corporation ($225–$90)	135.00	
Earnings and profits after exclusion of amounts attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($202.50–$45)		157.50
Amount required to be included in N Corporation's gross income under section 951 with respect to B Corporation		100.00
Dividend paid by B Corporation		175.00
Dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$45.00	
Dividend to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)	100.00	
Dividend from other earnings and profits (attributable to amounts not included in N Corporation's gross income with respect to B or C Corporation)	30.00	
Foreign income taxes of B Corporation deemed paid by A Corporation under section 902(b)(1) with allocation required by §1.960–2 (e):		
($45/$45×$5)		5.00
($30/$157.50×$92.50)		17.62
(for formula see §1.960–2(g)(1)(ii)(A)(*2*) (*i*) and (*ii*))		
Foreign income taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation under section 902(b)(1): ($30/$157.50 × $10.71)		2.04
(for formula see §1.960–2(g)(1)(ii)(B)(*1*))		

A Corporation (first-tier corporation):

Pretax earnings and profits:		
Dividend from B Corporation	$175.00	
Other earnings and profits	200.00	
Total pretax earnings and profits		$375.00
Foreign income taxes paid by A Corporation		135.00
On dividend received from B Corporation to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($45×.20)	9.00	
On dividend received from B Corporation to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation) ($100×.20)	20.00	
On dividend from B Corporation attributable to B Corporation's other earnings and profits (attributable to amounts not included in N Corporation's gross income with respect to B or C Corporation) ($30×.20)	6.00	
On other income of A Corporation ($200×.50)	100.00	
Earnings and profits		240.00

Attributable to dividend to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation) ($45 − $9)	36.00	
Attributable to dividend to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income with respect to B Corporation) ($100 − $20)	80.00	
Attributable to other earnings and profits of A Corporation (attributable to amounts not included in N Corporation's gross income with respect to A, B, or C Corporation) [($30 − $6)+($200 − $100)]	124.00	
Amount required to be included in N Corporation's gross income under section 951 with respect to A Corporation		None
Earnings and profits after exclusion of amounts attributable to dividend to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B Corporation)		160.00
Earnings and profits after exclusion of amounts attributable to dividend to which sections 902(b)(1) and 902(b)(2) do not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to B and C Corporation)		124.00
Dividend to N Corporation		200.00
Dividend attributable to amounts to which section 902(b)(2) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to C Corporation)	$36.00	
Dividend attributable to amounts to which section 902(b)(1) does not apply (attributable to amounts included in N Corporation's gross income with respect to B Corporation)	80.00	
Dividend attributable to amounts to which section 902(a) does not apply (attributable to amounts included in N Corporation's gross income under section 951 with respect to A Corporation)	0	
Dividend attributable to A Corporation's other earnings and profits (attributable to amounts not included in N Corporation's gross income under section 951 with respect to A, B, or C Corporation)	$84.00	

N Corporation (domestic corporation).

Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and § 1.960–1(c) with respect to C Corporation ($50/$150×$45) (for formula see § 1.960–2(g)(2)(i)(A))		$21.43
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) with respect to B Corporation (allocation of earning and profits being made in accordance with § 1.960–1(c)(3) and § 1.960–2(e))		65.53
Taxes paid by B Corporation ($100/$157.50×$92.50) (for formula see § 1.960–2(g)(2)(ii)(A)(*2*))	$58.73	
Taxes deemed paid by B Corporation ($100×$157.50×$10.71) (for formula see § 1.960–2(g)(2)(ii)(B)(*1*))	6.80	
Total taxes deemed paid by N Corporation under section 960(a)(1)		86.96
Foreign income taxes deemed paid by N Corporation under section 902(a) (separate tax rate applicable to dividends received by A Corporation allocation required by § 1.960–2(e)) (for formula see § 1.960–2(g)(1)(iii)(A)(*2*) (*i*) and (*ii*)):		

Tax paid by A Corporation on earnings previously taxed with respect to B Corporation or lower tiers which is deemed paid by N Corporation:

$$\frac{\text{Portion of dividend to N Corporation which is from earnings included in N Corporation's gross income under section 951 with respect to B Corporation or lower tiers}}{\text{Earnings and profits of A Corporation included in N Corporation's gross income under section 951 with respect to B Corporation or lower tiers}} \times \text{Tax paid by A Corporation on dividends received by A Corporation from earnings included in N Corporation's gross income with respect to B Corporation or lower tiers}$$

($116/$116×$29)	$29.00

Tax paid by A Corporation on earnings not previously taxed with respect to B Corporation or lower tiers which is deemed paid by N Corporation:

$$\frac{\text{Portion of dividend to N Corporation which is from earnings not included in N Corporation's gross income under section 951 with respect to A Corporation or lower tiers}}{\text{Earnings and profits of A Corporation not included in N Corporation's gross income under section 951 with respect to B Corporation or lower tiers}} \times \text{Tax paid by A Corporation on earnings not included in N Corporation's gross income with respect to B Corporation or lower tiers}$$

($84/$124×$106)	$71.81	
Taxes (paid by B Corporation) deemed paid by A Corporation allocation required by §1.960–2(e):		
($36/$36×$5)	5.00	
($84/$124×$17.62)	11.94	
(for formula see §1.960–2(g)(1)(iii)(B)(*2*) (*i*) and (*ii*))		
Taxes (of C Corporation) deemed paid by B Corporation deemed paid by A Corporation ($84/$124×$2.04)	1.38	
(for formula see §1.960–2(g)(1)(iii)(C)(*1*))		
Total taxes deemed paid by N Corporation under section 902(a) credit		$119.13
Total foreign income taxes deemed paid by N Corporation under section 901		206.09

(g) *Formulas.* This paragraph contains formulas for determining a domestic corporation's section 902 and 960 credits when amounts distributed through a chain of ownership have been included in whole or in part in the gross income of a domestic corporation under section 951 with respect to first-, second-, third-, or lower-tier corporations.

(1) *Determination of the section 902 credit*—(i) *Section 902(b)(2) credit.* If the second-tier corporation receives a dividend from a third-tier corporation attributable in whole or in part to amounts included in a domestic corporation's gross income under section 951 with respect to the third- or lower-tier corporations, the second-tier corporation's credit for taxes paid by the third-tier corporation under section 902(b)(2) is determined as follows:

(A) If the effective rate of tax on dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Dividend to second-tier corporation less portion of dividend from earnings included in domestic corporation's gross income under section 951 with respect to third-tier corporation}}{\text{Earnings and profits of third-tier corporation}} \times \text{Taxes paid by third-tier corporation}$$

(B) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*1*) Credit for tax paid by third-tier corporation on earnings included in domestic corporation's gross income with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividends to second-tier corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}}{\text{Earnings and profits of third-tier corporation included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}} \times \text{Tax paid by third-tier corporation on dividend received by third-tier corporation from earnings included in domestic corporation's gross income with respect to fourth- or lower-tier corporations}$$

(*2*) Credit for tax paid by third-tier corporation on earnings not included in domestic corporation's gross income with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividend to second-tier corporation which is from earnings not included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}}{\text{Earnings and profits of third-tier corporation not included in domestic corporation′s gross income under section 951 with respect to fourth- or lower-tier corporations}} \times \text{Tax paid by third-tier corporation on earnings not included in domestic corporation's gross income with respect to fourth- or lower-tier corporations}$$

(ii) *Section 902(b)(1) credit.* If the first-tier corporation receives a dividend from a second-tier corporation attributable in a whole or in part to amounts included in a domestic corporation's gross income under section 951 with respect to the second- or lower-tier corporations, the first-tier corporation's credit for taxes paid and deemed paid by the second-tier corporation under section 902(b)(1) is determined as follows:

(A) *Taxes paid by the second-tier corporation which are deemed paid by the first-tier corporation*—(*1*) If the effective rate of tax on dividends received by the second-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Dividend to first-tier corporation less portion of dividend from earnings included in domestic corporation's gross income under section 951 with respect to second-tier corporation}}{\text{Earnings and profits of second-tier corporation}} \times \text{Taxes paid by second-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the second-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*i*) Credit for tax paid by second-tier corporation on earnings previously taxed with respect to third- or lower-tier corporations—

$$\frac{\text{Portion of dividend to first-tier corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}}{\text{Earnings and profits of second-tier corporation included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}} \times \text{Tax paid by second-tier corporation on dividend received by second-tier corporation from earnings included in domestic corporation's gross income with respect to third- or lower-tier corporations}$$

(*ii*) Credit for tax paid by second-tier corporation on earnings not previously taxed with respect to third- or lower-tier corporations—

$$\frac{\text{Portion of dividend to first-tier corporation which is from earnings not included in domestic corporation' s gross income under section 951 with respect to second- or lower-tier corporations}}{\text{Earnings and profits of second-tier corporation not included in domestic corporation' s gross income under section 951 with respect to third- or lower- tier corporations}} \times \text{Tax paid by second-tier corporation on earnings not included in domestic corporation' s gross income with respect to third- or lower-tier corporations}$$

(B) *Taxes deemed paid by the second-tier corporation which are deemed paid by the first-tier corporation*— (*1*) If the effective rate of tax dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Dividend to first-tier corporation less portion of dividend from earnings included in domestic corporation' s gross income under section 951 with respect to second- and third-tier corporations}}{\text{Earnings and profits of second-tier corporation less earnings and profits attributable to amounts included in domestic corporation' s gross income under section 951 with respect to third-tier corporation}} \times \text{Taxes paid by third-tier corporation which are deemed paid by second-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*i*) Credit for tax paid by third-tier corporation on earnings previously taxed with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividend to first-tier corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}}{\text{Earnings and profits of second-tier corporations included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}} \times \text{Tax paid by third-tier corporation on earnings previously taxed with respect to fourth- or lower-tier corporations which is deemed paid by second-tier corporation}$$

(*ii*) Credit for tax paid by third-tier corporation on earnings not previously taxed with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividend to first-tier corporation which is from earnings not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}}{\text{Earnings and profits of second-tier corporation not included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}} \times \text{Tax paid by third-tier corporation on earnings not previously taxed with respect to fourth- or lower-tier corporations which is deemed paid by second-tier corporation}$$

(iii) *Section 902(a) credit.* If the domestic corporation receives a dividend from a first-tier corporation attributable in whole or in part to amounts included in a domestic corporation's gross income under section 951 with respect to the first- or lower-tier corporations, the domestic corporation's credit for taxes paid and deemed paid by the first-tier corporation under section 902(a) is determined as follows:

(A) *Taxes paid by the first-tier corporation which are deemed paid by domestic corporation*—(*1*) If the effective rate of tax on dividends received by the first-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Dividend to domestic corporation less portion of dividend from earnings included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation}} \times \text{Taxes paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the first-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*i*) Credit for tax paid by first-tier corporation on earnings previously taxed with respect to second- or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax paid by first-tier corporation on dividends received by first-tier corporation from earnings included in domestic corporation's gross income with respect to second- or lower-tier corporations}$$

(*ii*) Credit for tax paid by first-tier corporation on earnings not previously taxed with respect to second- or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings not included in domestic corporation's gross income under section 951 with respect to first- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax paid by first-tier corporation on earnings not included in domestic corporation's gross income with respect to second- or lower-tier corporations}$$

(B) *Taxes (paid by second-tier corporation) deemed paid by first-tier corporation which are deemed paid by domestic corporation*—(*1*) If the effective rate of tax on dividends received by the second-tier corporation is the same as its tax rate on other earnings and profits—

$$\frac{\text{Dividend to domestic corporation less portion of dividend from earnings included in domestic corporation's gross income under section 951 with respect to first- and second-tier corporations}}{\text{Earnings and profits of first-tier corporation less earnings and profits attributable to amounts included in domestic corporation's gross income under section 951 with respect to second-tier corporation}} \times \text{Taxes paid by second-tier corporation which are deemed paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the second-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*i*) Credit for tax paid by second-tier corporation on earnings previously taxed with respect to third-tier or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}} \times \text{Tax paid by second-tier corporation on earnings previously taxed with respect to third- or lower-tier corporations which is deemed paid by first-tier corporation}$$

(*ii*) Credit for tax paid by second-tier corporation on earnings not previously taxed with respect to third- or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings not included in domestic corporation's gross income under section 951 with respect to first- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax paid by second-tier corporation on earnings not previously taxed with respect to third- or lower-tier corporations which is deemed paid by first-tier corporation}$$

(C) *Taxes (of third-tier corporation) deemed paid by first-tier corporation which are deemed paid by domestic corporation*—(*1*) If the effective rate of tax on dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Dividend to domestic corporation less portion of dividend from earnings included in domestic corporation's gross income under section 951 with respect to first- second- and third-tier corporations}}{\text{Earnings and profits of first-tier corporation less earnings and profits attributable to amounts included in domestic corporation's gross income with respect to second- and third-tier corporations}} \times \text{Taxes deemed paid by second-tier corporation which are deemed paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

(*i*) Credit for tax (of third-tier corporation) deemed paid by second-tier corporation on earnings previously taxed with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}} \times \text{Tax deemed paid by second-tier corporation on earnings previously taxed with respect to fourth- or lower-tier corporations which is deemed paid by first-tier corporation}$$

(*ii*) Credit for tax (of third-tier corporation) deemed paid by second-tier on earnings not previously taxed with respect to fourth- or lower-tier corporations—

$$\frac{\text{Portion of dividend to domestic corporation which is from earnings not included in domestic corporation' s gross income under section 951 with respect to first- or lower-tier corporations}}{\text{Earnings and profits of first-tier corporation not included in domestic corpation' s gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax deemed paid by second-tier corporation on earnings not previously taxed with respect to fourth- or lower-tier corpporations which is deemed paid by first-tier corporation}$$

(2) *Determination of domestic corporation's section 960 credit for amounts included in its gross income with respect to a first-, second-, or third-tier corporation which has received a distribution previously included in the gross income of a domestic corporation under section 951*—(i) *Third-tier credit.* If a domestic corporation is required to include an amount in its gross income under section 951 with respect to a third-tier corporation which has received a distribution from a fourth-tier corporation of amounts included in a domestic corporation's gross income under section 951 with respect to the fourth- or lower-tier corporations, the domestic corporation's credit for taxes paid by the third-tier corporation under section 960(a)(1) is determined as follows:

(A) If the effective rate of tax on dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to third-tier corporation}}{\text{Earnings and profits of third-tier corporation}} \times \text{Taxes paid by third-tier corporation}$$

(B) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to third-tier corporation}}{\text{Earnings and profits of third-tier corporation not included in domestic corporation's gross income under section 951 with respect to fourth- or lower-tier corporations}} \times \text{Tax paid by third-tier corporation on earnings not included in domestic corporation's gross income with respect to fourth- or lower-tier corporations}$$

(ii) *Second-tier credit.* If a domestic corporation is required to include an amount in its gross income under section 951 with respect to a second-tier corporation which has received a distribution from a third-tier corporation of amounts included in a domestic corporation's gross income under section 951 with respect to the third- or lower-tier corporations, the domestic corporation's credit for taxes paid and deemed paid by the second-tier corporation under section 960(a)(1) is determined as follows:

(A) *Credit for taxes paid by the second-tier corporation which are deemed paid by the domestic corporation.*

(*1*) If the effective rate of tax on dividends received by the second-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation' s gross income under section 951 with respect to second-tier corporation}}{\text{Earning and profits of second-tier corporation}} \times \text{Taxes paid by second-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the second-tier is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to second-tier corporation}}{\text{Earnings and profits of second-tier corporation not included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporations}} \times \text{Tax paid by second-tier corporation on earnings not included in domestic corporation's gross income with respect to third- or lower-tier corporations}$$

(B) *Credit for taxes (of the third-tier corporation) deemed paid by the second-tier corporation under section 902(b)(2)*—(*1*) If the effective rate of tax on dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to second-tier corporation}}{\text{Earnings and profits of second-tier corporation less earnings and profits attributable to amounts included in domestic corporation's gross income with respect to third-tier corporation}} \times \text{Taxes paid by third-tier corporation which are deemed paid by second-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to second-tier corporation}}{\text{Earnings and profits of second-tier corporation not included in domestic corporation's gross income under section 951 with respect to third- or lower-tier corporation}} \times \text{Tax paid by third-tier corporation on earnings not previously taxed with respect to fourth- or lower-tier corproations which is deemed paid by second-tier corporation}$$

(iii) *First-tier credit.* If a domestic corporation is required to include amounts in its gross income under section 951 with respect to a first-tier corporation which has received a distribution from a second-tier corporation of amounts included in a domestic corporation’s gross income under section 951 with respect to the second- or lower-tier corporations, the domestic corporation’s credit for taxes paid and deemed paid by the first-tier corporation under section 960(a)(1) shall be determined as follows:

(A) *Credit for taxes paid by the first-tier corporation.*

(*1*) If the effective rate of tax on dividends received by the first-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporations}} \times \text{Taxes paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the first-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax paid by first-tier corporation on earnings not included in domestic corporation's gross income with respect to second- or lower-tier corporations}$$

(B) *Credit for taxes paid by the second-tier corporation deemed paid by the first-tier corporation under section 902(b)(1).*

(*1*) If the effective rate of tax on dividends received by the second-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation less earnings and profits attributable to amounts included in domestic corporation's gross income under section 951 with respect to second-tier corporations}} \times \text{Tax paid by second-tier corporation which are deemed paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the second-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporations}} \times \text{Tax paid by second-tier corporation on earnings not previously taxed with respect to third- or lower-tier corporations which is deemed paid by first-tier corporation}$$

(C) *Credit for taxes (of the third-tier corporation) deemed paid by the second-tier corporation which are deemed paid by first-tier corporation under section 902(b)(1).* (*1*) If the effective rate of tax on dividends received by the third-tier corporation is the same as the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation less earnings and profits attributable to amounts included in domestic corporation's gross income with respect to second- and third-tier corporation}} \times \text{Taxes deemed paid by second-tier corporation which are deemed paid by first-tier corporation}$$

(*2*) If the effective rate of tax on dividends received by the third-tier corporation is higher or lower than the effective rate of tax on its other earnings and profits—

$$\frac{\text{Amount included in domestic corporation's gross income under section 951 with respect to first-tier corporation}}{\text{Earnings and profits of first-tier corporation not included in domestic corporation's gross income under section 951 with respect to second- or lower-tier corporation}} \times \text{Tax deemed paid by second-tier corporation on earnings not previously taxed with respect to fourth- or lower-tier corporations which is deemed paid by first-tier corporation}$$

[T.D. 7120, 36 FR 10854, June 4, 1971; 36 FR 11924, June 23, 1971, as amended by T.D. 7334, 39 FR 44212, Dec. 23, 1974; 40 FR 1014, Jan. 6, 1975; 40 FR 2802, Jan. 16, 1975; T.D. 7649, 44 FR 60089, Oct. 18, 1979; T.D. 7843, 47 FR 50476, Nov. 8, 1982; 47 FR 55477, Dec. 10, 1982]

§1.960–3 Gross-up of amounts included in income under section 951.

(a) *General rule for including taxes in income.* Any taxes deemed paid by a domestic corporation for the taxable year pursuant to section 960(a)(1) shall, except as provided in paragraph (b) of this section, be included in the gross income of such corporation for such year as a dividend pursuant to section 78 and § 1.78–1.

(b) *Certain taxes not included in income.* Any taxes deemed paid by a domestic corporation for the taxable year pursuant to section 902(a) or section 960(a)(1) shall not be included in the gross income of such corporation for such year as a dividend pursuant to section 78 and § 1.78–1 to the extent that such taxes are paid or accrued by the first-, second-, or third-tier corporation, as the case may be, on or with respect to an amount which is excluded from the gross income of such foreign corporation under section 959(b) and § 1.959–2 as distributions from the earnings and profits of another controlled foreign corporation attributable to an amount which is, or has been, required to be included in the gross income of the domestic corporation under section 951.

(c) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B. All such corporations use the calendar year as the taxable year. For 1978, B Corporation, after having paid $20 of foreign income taxes, has $80 in earnings and profits, which are attributable to the amount required to be included in N Corporation's gross income for such year under section 951 with respect to B Corporation and all of which are distributed to A Corporation in such year. The dividend so received from B Corporation is excluded from A Corporation's gross income under section 959(b) and § 1.959–2. An income tax of 10 percent is required to be withheld from such dividend by the foreign country under the laws of which B Corporation is created, and the foreign country under the laws of which A Corporation is created imposes an income tax of $22 on the dividend received from B Corporation. For 1978, A Corporation's earnings and profits are $50 ($80 − [0.10×$80] − $22), which it distributes in such year to N Corporation. For 1978, N Corporation is required under section 951 to include $80 in gross income with respect to B Corporation and also is required under the gross-up provisions of section 78 to include in gross income $20 ($80/$80×$20), the amount equal to the foreign income taxes of B Corporation which are deemed paid by N Corporation under section 960(a)(1). Under paragraph (b) of this section N Corporation is not required to include in gross income the $30 ($8+$22) of foreign income taxes which are paid by A Corporation in connection with the dividend received from B Corporation and which are deemed paid by N Corporation under section 902(a) and paragraph (c) of § 1.960–2.

Example 2. Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which owns all the one class of stock of controlled foreign corporation B, which in turn owns all the one class of stock of controlled foreign corporation C. All such corporations use the calendar year as the taxable year. For 1978, C Corporation, after having paid $20 of foreign income taxes, has $80 in earnings and profits, which are attributable to the amount required to be included in N Corporation's gross income for such year under section 951 with respect to C Corporation and all of which are distributed to B Corporation in such year. After having paid foreign income taxes of $10 on the dividend received from C Corporation, B Corporation distributes the balance of $70 to A Corporation. After having paid foreign income taxes of $5 on the dividend received from B Corporation, A Corporation distributes the balance of $65 to N Corporation. The dividend so received by B Corporation, and in turn by A Corporation, is excluded from the gross income of such corporations under section 959(b) and § 1.959–2. Under paragraph (b) of this section N Corporation is not required to include in gross income the $15 ($10+$5) of foreign income taxes which are paid by corporations B and A, respectively, in connection with the dividend so received and which are deemed paid by N Corporation under section 902(a) and paragraphs (b) and (c) of § 1.960–2.

[T.D. 7120, 36 FR 10856, June 4, 1971, as amended by T.D. 7481, 42 FR 20130, Apr. 18, 1977; T.D. 7649, 44 FR 60089, Oct. 18, 1979; T.D. 7843, 47 FR 50484, Nov. 8, 1982]

§ 1.960–4 Additional foreign tax credit in year of receipt of previously taxed earnings and profits.

(a) *Increase in section 904(a) limitation for the taxable year of exclusion*—(1) *In general.* The applicable limitation under section 904(a) for a taxpayer's taxable year (hereinafter in this section referred to as the "taxable year of exclusion") in which he receives an amount which is excluded from gross income under section 959(a)(1) and which is attributable to a controlled foreign corporation's earnings and profits in respect of which an amount was required to be included in the gross income of such taxpayer under section 951(a) for a taxable year (hereinafter in this section referred to as the "taxable year of inclusion'') previous to the taxable year of exclusion shall be increased under section 960(b)(1) by the amount described in paragraph (b) of this section if the conditions described in subparagraph (2) of this paragraph are satisfied.

(2) *Conditions under which increase in limitation is allowed for the taxable year of exclusion.* The increase in limitation described in subparagraph (1) of this paragraph for the taxable year of exclusion shall be made only if the taxpayer—

(i) For the taxable year of inclusion either chose to claim a foreign tax credit as provided in section 901 or did not pay or accrue any foreign income taxes,

(ii) Chooses to claim a foreign tax credit as provided in section 901 for the taxable year of exclusion, and

(iii) For the taxable year of exclusion pays, accrues, or is deemed to have paid foreign income taxes with respect to the amount, described in subparagraph (1) of this paragraph, which is excluded from his gross income for such year under section 959(a)(1).

(b) *Amount of increase in limitation for the taxable year of exclusion.* The amount of increase under section 960 (b)(1) in the applicable limitation under section 904(a) for the taxable year of exclusion shall be—

(1) The amount by which the applicable section 904(a) limitation for the taxable year of inclusion was increased, determined as provided in paragraph (c) of this section, by reason of the inclusion of the amount in the taxpayer's income for such year under section 951(a), reduced by

(2) The amount of foreign income taxes allowed as a credit under section 901 for such taxable year of inclusion and which were allowable to such taxpayer solely by reason of the inclusion of such amount in his gross income under section 951(a), as determined under paragraph (d) of this section, and then by

(3) The additional reduction for such taxable year of inclusion arising by reason of increases in limitation under section 960(b)(1) for taxable years intervening between such taxable year of inclusion and such taxable year of exclusion, as determined under paragraph (e) of this section in respect of such inclusion under section 951(a),

except that the amount of increase determined under this paragraph for the taxable year of exclusion shall in no case exceed the amount of foreign income taxes paid, accrued, or deemed to be paid by such taxpayer for such taxable year of exclusion with respect to the amount, described in paragraph (a)(1) of this section, which is excluded from gross income for such year under section 959(a)(1).

(c) *Determination of increase in limitation for the taxable year of inclusion.* The amount of the increase in the applicable limitation under section 904(a) for the taxable year of inclusion which arises by reason of the inclusion of the amount in gross income under section 951(a) shall be the amount of the applicable limitation under section 904(a) for such year reduced by the amount which would have been the applicable limitation under section 904(a) for such year if the amount had not been included in gross income for such year under section 951(a).

(d) *Determination of foreign income taxes allowed for taxable year of inclusion by reason of section 951(a) amount.* The amount of foreign income taxes allowed as a credit under section 901 for the taxable year of inclusion which were allowable solely by reason of the inclusion of the amount in gross income for such year under section 951(a) shall be the amount of foreign income taxes allowed as a credit under section 901 for such year reduced by the amount of foreign income taxes which would have been allowed as a credit under section 901 for such year if the amount had not been included in gross income for such year under section 951(a). For purposes of this paragraph, the term ''foreign income taxes'' includes foreign income taxes paid or accrued, and foreign income taxes deemed paid under section 902, section 904(d), and section 960(a), for the taxable year of inclusion.

(e) *Additional reduction for the taxable year of inclusion arising by reason of increases in limitation for intervening years.* The amount of increase in the applicable limitation under section 904(a) for the taxable year of inclusion shall also be reduced, after first deducting the foreign income taxes described in paragraph (b)(2) of this section, by any increases in limitation which arise under section 960(b)(1)—by reason of any earlier exclusions under section 959(a)(1) in respect of the same inclusion under section 951(a) for such taxable year of inclusion—for the first, second, third, fourth, etc., succeeding taxable years of exclusion, in that order, which follow such taxable year of inclusion and precede the taxable year of exclusion in respect of which the increase in limitation under section 960(b)(1) and paragraph (b) of this section is being determined. The amount of any increase in limitation which arises under section 960(b)(1) for any such succeeding taxable year of exclusion shall be the amount of foreign income taxes allowed as a credit under section 901 for each such taxable year reduced by the amount of foreign income taxes which would have been allowed as a credit under section 901 for each such year if the limitation for each such year were not increased under section 960(b)(1). For any such succeeding taxable year of exclusion for which the taxpayer does not choose to claim a foreign tax credit as provided in section 901, the same increase in limitation under section 960(b)(1) shall be treated as having been made, for purposes of this paragraph, which would have been made for such taxable year if the taxpayer had chosen to claim the foreign tax credit for such year.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Domestic corporation N owns all of the one class of stock of controlled foreign corporation A. Corporation A, after paying foreign income taxes of $30, has earnings and profits for 1978 of $70, all of which are attributable to an amount required under section 951(a) to be included in N Corporation's gross income for 1978. Both corporations use the calendar year as the taxable year. For 1979 and 1980, A Corporation has no earnings and profits attributable to an amount required to be included in N Corporation's gross income under section 951(a); for each such year it makes a distribution of $35 (from its earnings and profits for 1978) from which a foreign income tax of $6 is withheld. For each of 1978, 1979, and 1980, N Corporation derives taxable income of $50 from sources within the United States and claims a foreign tax credit under section 901, determined by applying the overall limitation under section 904(a)(2).

The United States tax payable by N Corporation is determined as follows, assuming a corporate tax rate of 48 percent:

1978

Taxable income of N Corporation:		
U.S. sources		$50.00
Sources without the U.S.:		
Amount required to be included in N Corporation's gross income under section 951(a)	$70.00	
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and included in N Corporation's gross income under section 78 ($30×$70/$70)	30.00	100.00
Total taxable income		150.00
U.S. tax payable for 1978:		
U.S. tax before credit ($150×0.48)		72.00
Credit: Foreign income taxes of $30, but not to exceed overall limitation of $48 for 1978 ($100/$150×$72)		30.00
U.S. tax payable		42.00

1979

Taxable income of N Corporation, consisting of income from U.S. sources		$50.00
U.S. tax before credit ($50×0.48)		24.00
Section 904(a)(2) overall limitation for 1979:		
Limitation for 1979 before increase under section 960(b)(1) ($24×$0/$50)		0
Plus: Increase in overall limitation for 1979 under section 960(b)(1):		
Amount by which 1978 overall limitation was increased by reason of inclusion in N Corporation's gross income under section 951(a) for 1978 ($48 – [($50×0.48)×$0/$50])	$48.00	
Less: Foreign income taxes allowed as a credit for 1978 which were allowable solely by reason of such section 951(a) inclusion ($30 – $0)	30.00	
Balance	18.00	
But: Such balance not to exceed foreign income taxes paid by N Corporation for 1979 with respect to $35 distribution excluded under section 959(a)(1) ($6 tax withheld)	6.00	6.00
Overall limitation for 1979		6.00
U.S. tax payable for 1979:		
U.S. tax before credit ($50×0.48)		24.00
Credit: Foreign income taxes of $6, but not to exceed overall limitation of $6 for 1966		6.00

1979

U.S. tax payable	18.00

1980

Taxable income of N Corporation, consisting of income from U.S. sources		$50.00
U.S. tax before credit ($50×0.48)		24.00
Section 904(a)(2) overall limitation for 1980:		
Limitation for 1980 before increase under section 960(b)(1) ($24×$0/$50)		0
Plus: Increase in overall limitation for 1980 under section 960(b)(1):		
Amount by which 1978 overall limitation was increased by reason of inclusion in N Corporation's gross income under section 951(a) for 1978 ($48−[($50×0.48)×$0/$50])	$48.00	
Less: Foreign income taxes allowed as a credit for 1978 which were allowable solely by reason of such section 951(a) inclusion ($30−$0)	30.00	
Tentative balance	18.00	
Less: Increase in overall limitation under section 960(b)(1) for 1979 by reason of such section 951(a) inclusion	$6.00	
Balance	12.00	
But: Such balance not to exceed foreign income taxes paid by N Corporation for 1980 with respect to $35 distribution excluded under section 959(a)(1) ($6 tax withheld)	6.00	$6.00
Overall limitation for 1980		6.00
U.S. tax payable for 1980:		
U.S. tax before credit ($50×0.48)		24.00
Credit: Foreign income taxes of $6, but not to exceed overall limitation of $6 for 1967		6.00
U.S. tax payable		18.00

Example 2. The facts for 1978, 1979, and 1980, are the same as in example 1, except that in 1977, to which the section 904(a)(2) overall limitation applies, N Corporation pays $18 of foreign income taxes in excess of the overall limitation and that such excess is not absorbed as a carryback to 1975 or 1976 under section 904(c). Therefore, there is no increase under section 960(b)(1) in the overall limitation for 1979 or 1980 since the amount ($48) by which the 1978 overall limitation was increased by reason of the inclusion in N Corporation's gross income for 1978 under section 951(a), less the foreign income taxes ($48) allowed as a credit which were allowable solely by reason of such inclusion, is zero. The foreign income taxes so allowed as a credit for 1978 which were allowable solely by reason of such section 951(a) inclusion consist of the $30 of foreign income taxes deemed paid for 1978 under section 960(a)(1) and the $18 of foreign income taxes for 1977 carried over and deemed paid for 1978 under section 904(c).

Example 3. (a) Domestic corporation N owns all the one class of stock of controlled foreign corporation A, which in turn owns all the one class of stock of controlled foreign corporation B. All corporations use the calendar years as the taxable year. Corporation B, after paying foreign income taxes of $30, has earnings and profits for 1978 of $70, all of which is attributable to an amount required under section 951(a) to be included in N Corporation's gross income for 1978, and $35 of which it distributes in such year to A Corporation. For 1978, A Corporation, after paying foreign income taxes of $5 on such dividend from B Corporation, has total earnings and profits of $30, all of which it distributes in such year to N Corporation, a foreign income tax of $3 being withheld therefrom.

(b) For 1979, B Corporation has no earnings and profits, but distributes in such year to A Corporation the $35 remaining of its earnings and profits for 1965. For 1979, A Corporation, after paying foreign income taxes of $5 on such dividend from B Corporation, has total earnings and profits of $30, all of which it distributes to N Corporation, a foreign income tax of $3 being withheld therefrom.

(c) For each of 1978 and 1979, N Corporation has taxable income of $100 from United States sources and claims a foreign tax credit under section 901, determined by applying the overall limitation under section 904(a)(2). The United States tax payable by N Corporation is determined as follows, assuming a corporate tax rate of 48 percent:

1978

Taxable income of N Corporation:		
U.S. sources		$100
Sources without the U.S.:		
Amount required to be included in N Corporation's gross income under section 951(a) with respect to B Corporation	$70	
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and included in N Corporation's gross income under section 78 ($30×$70/$70)	30	100
Total taxable income		200
U.S. tax payable for 1978:		
U.S. tax before credit ($200×0.48)		96
Credit: Foreign income taxes of $38 ([$30×$70/$70]+$3), but not to exceed overall limitation of $48 ($96×$100/$200)		38
U.S. tax payable		58

1979

Taxable income of N Corporation, consisting of income from U.S. sources	$100
U.S. tax before credit ($100×0.48)	48
Section 904(a)(2) overall limitation for 1979:	
Limitation for 1979 before increase under section 960(b)(1) ($48×$0/$100)	0

1979		
Plus: Increase in overall limitation for 1979 under section 960(b)(1):		
Amount by which 1978 overall limitation was increased by reason of inclusion in N Corporation's gross income under section 951(a) for 1978 ($48 − [($100×0.48)×$0/$100]) ...	$48	
Less: Foreign income taxes allowed as a credit for 1978 which were allowable solely by reason of such section 951(a) inclusion ($38 − $0)	38	
Balance	10	
But: Such balance not to exceed foreign income taxes paid and deemed paid by N Corporation for 1979 with respect to $30 distribution excluded under section 959(a)(1) ([$5×$30/$30]+$3)	8	8
Overall limitation for 1979		8
U.S. tax payable for 1979:		
U.S. tax before credit ($100×0.48)		48
Credit: Foreign income taxes of $8 ($3+$5), but not to exceed overall limitation of $8 for 1979		8
U.S. tax payable		40

[T.D. 7120, 36 FR 10859, June 4, 1971, as amended by T.D. 7649, 44 FR 60089, Oct. 18, 1979]

§ 1.960–5 Credit for taxable year of inclusion binding for taxable year of exclusion.

(a) *Taxes not allowed as a deduction for taxable year of exclusion.* In the case of any taxpayer who—

(1) Chooses to claim a foreign tax credit as provided in section 901 for the taxable year for which he is required to include in gross income under section 951(a) an amount attributable to the earnings and profits of a controlled foreign corporation, and

(2) Does not choose to claim a foreign tax credit as provided in section 901 for a taxable year in which he receives an amount which is excluded from gross income under section 959(a)(1) and which is attributable to such earnings and profits of such controlled foreign corporation,

No deduction shall be allowed under section 164 for the taxable year of such exclusion for any foreign income taxes paid or accrued on or with respect to such excluded amount.

(b) *Illustration.* The application of this section may be illustrated by the following example:

Example. Domestic Corporation N owns all the one class of stock of controlled foreign corporation A. Both corporations use the calendar year as the taxable year. All of A Corporation's earnings and profits of $80 for 1978 (after payment of foreign income taxes of $20 on its total income of $100 for such year) are attributable to amount required under section 951(a) to be included in N Corporation's gross income for 1978. For 1978, N Corporation chooses to claim a foreign tax credit for the $20 of foreign income taxes which for such year are paid by A Corporation and deemed paid by N Corporation under section 960(a)(1) and paragraph (c)(1) of § 1.960–1. For 1979, A Corporation distributes the entire $80 of 1978 earnings and profits, a foreign income tax of $8 being withheld therefrom. Although N Corporation does not choose to claim a foreign tax credit for 1979, it may not deduct such $8 of foreign income taxes under section 164. Corporation N may, however, deduct under such section a foreign income tax of $4 which is withheld from a distribution of $40 by A Corporation during 1979 from its 1979 earnings and profits.

[T.D. 7120, 36 FR 10859, June 4, 1971, as amended by T.D. 7649, 44 FR 60089, Oct. 18, 1979]

§ 1.960–6 Overpayments resulting from increase in limitation for taxable year of exclusion.

(a) *Amount of overpayment.* If an increase in the limitation under section 960(b)(1) and § 1.960–4 for a taxable year of exclusion exceeds the tax (determined before allowance of any credits against tax) imposed by chapter 1 of the Code for such year, the amount of such excess shall be deemed an overpayment of tax for such year and shall be refunded or credited to the taxpayer in accordance with chapter 65 (section 6401 and following) of the Code.

(b) *Illustration.* The application of this section may be illustrated by the following example:

Example. Domestic corporation N owns all the one class of stock of controlled foreign corporation A. Both corporations use the calendar year as the taxable year. For 1978, A Corporation has total income of $100,000 on which it pays foreign income taxes of $20,000. All of A Corporation's earnings and profits for 1978 of $80,000 are attributable to an amount which is required under section 951(a) to be included in N Corporation's gross income for 1978. By reason of such income inclusion N Corporation is deemed for 1978 to have paid under section 960(a)(1), and is required under section 78 to include in gross income for such year, the $20,000

($20,000×$80,000/$80,000) of foreign income taxes paid by A Corporation for such year. Corporation N also derives $100,000 taxable income from sources within the United States for 1978. For 1979, N Corporation has $25,000 of taxable income, all of which is derived from sources within the United States. No part of A Corporation's earnings and profits for 1979 is attributable to an amount required under section 951(a) to be included in N Corporation's gross income. During 1979, A Corporation makes one distribution consisting of its $80,000 earnings and profits for 1978, all of which is excluded under section 959(a)(1) from N Corporation's gross income for 1979, and from which distribution foreign income taxes of $10,000 are withheld. For 1978 and 1979, N Corporation claims the foreign tax credit under section 901, determined by applying the overall limitation under section 904(a)(2). The United States tax of N Corporation is determined as follows for such years, assuming a corporate tax rate of 22 percent, a surtax of 26 percent and a surtax exemption of $25,000:

1978

Taxable income of N Corporation:		
U.S. sources		$100,000
Sources without the U.S.:		
Amount required to be included in N Corporation's gross income under section 951(a)	$80,000	
Foreign income taxes deemed paid by N Corporation under section 960(a)(1) and included in N Corporation's gross income under section 78 ($20,000×$80,000/$80,000)	20,000	100,000
Total taxable income		200,000
U.S. tax payable for 1978:		
U.S. tax before credit ([$200,000×0.22]+[$175,000×0.26])		89,500
Credit: Foreign income taxes of $20,000, but not to exceed overall limitation of $44,750 ($89,500×$100,000/$200,000)		20,000
U.S. tax payable		69,500

1979

Taxable income of N Corporation, consisting of income from U.S. sources		$25,000
U.S. tax before credit ($25,000×0.22)		5,500
Section 904(a)(2) overall limitation for 1979:		
Limitation for 1979 before increase under section 960(b)(1) ($5,500×$0/$25,000)		0
Plus: Increase in overall limitation for 1979 under section 960(b)(1):		
Amount by which 1978 overall limitation was increased by reason of inclusion in N Corporation's gross income under section 951(a) for 1978 ($44,750 − [$41,500 × $0/$100,000])	$44,750	
Less: Foreign income taxes allowed as a credit for 1978 which were allowable solely by reason of such section 951(a) inclusion ($20,000−$0)	20,000	
Balance	24,750	
But: Such balance not to exceed foreign income taxes paid by N Corporation for 1979 with respect to $80,000 distribution excluded under section 959(a)(1) ($10,000 tax withheld)	10,000	10,000
Overall limitation for 1979		10,000
U.S. tax payable for 1979:		
U.S. tax before credit ($25,000×0.22)		5,500
Credit: Foreign income taxes of $10,000, but not to exceed overall limitation of $10,000 for 1979		10,000
U.S. tax payable		None
Overpayment of tax for 1979:		
Increase in limitation under section 960(b)(1) for 1979		10,000
Less: Tax imposed for 1979 under chapter 1 of the Code		5,500
Excess treated as overpayment		4,500

[T.D. 7120, 36 FR 10859, June 4, 1971, as amended by T.D. 7649, 44 FR 60089, Oct. 18, 1979]

§1.960–7 Effective dates.

(a) *General rule.* Except as provided in paragraph (b), the rules contained in §§1.960–1—1.960–6 shall apply to taxable years of foreign corporations beginning after December 31, 1962, and taxable years of U.S. corporate shareholders within which or with which the taxable year of such foreign corporation ends.

(b) *Exception for less developed country corporations.* If for any taxable year beginning after December 31, 1962, and before January 1, 1976, a first-tier foreign corporation qualified as a less developed country corporation as defined in

26 CFR 1.902–2 revised as of April 1, 1978, the rules pertaining to less developed country corporations contained in 26 CFR 1.960–1—1.960–6 revised as of April 1, 1978, shall apply to any amounts required to be included in gross income under section 951 for such taxable year.

(c) *Third-tier credit.* The rules contained in §§ 1.960–1—1.960–6 shall apply to amounts included in the gross income of a domestic corporation under section 951 with respect to the earnings and profits of third-tier corporations (as defined in § 1.960–1) in taxable years beginning after December 31, 1976.

[T.D. 7649, 44 FR 60089, Oct. 18, 1979, as amended by T.D. 7843, 47 FR 50484, Nov. 8, 1982]

§ 1.961–1 Increase in basis of stock in controlled foreign corporations and of other property.

(a) *Increase in basis*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, the basis of a United States shareholder's—

(i) Stock in a controlled foreign corporation; or

(ii) Property (as defined in paragraph (b)(1) of this section) by reason of the ownership of which he is considered under section 958(a)(2) as owning stock in a controlled foreign corporation shall be increased under section 961(a), as of the last day in the taxable year of such corporation on which it is a controlled foreign corporation, by the amount required to be included with respect to such stock or such property in such shareholder's gross income under section 951(a) for his taxable year in which or with which such taxable year of such corporation ends. The increase in basis provided by the preceding sentence shall be made only to the extent to which such amount required to be included in gross income under section 951(a) was so included in gross income.

(2) *Limitation on amount of increase in case of election under section 962.* In the case of a United States shareholder who makes the election under section 962 for the taxable year, the amount of the increase in basis provided by subparagraph (1) of this paragraph shall not exceed the amount of United States tax paid in accordance with such election with respect to the amounts included in such shareholder's gross income under section 951(a) for such year (as determined under § 1.962–1).

(b) *Rules of application*—(1) *Property defined.* The property of a United States shareholder referred to in paragraph (a)(1)(ii) of this section shall consist of—

(i) Stock in a foreign corporation;

(ii) An interest in a foreign partnership; or

(iii) A beneficial interest in a foreign estate or trust (as defined in section 7701(a)(31)).

(2) *Increase with respect to each share of stock.* Any increase under paragraph (a) of this section in the basis of a United States shareholder's stock in a foreign corporation shall be made in the amount included in gross income under section 951(a) or in the amount of United States tax paid in accordance with an election under section 962, as the case may be, with respect to each share of such stock.

(c) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. Domestic corporation M owns 800 of the 1,000 shares of the one class of stock in controlled foreign corporation R which owns all of the one class of stock in controlled foreign corporation S. Corporations M, R, and S use the calendar year as a taxable year. In 1964, S Corporation has $100,000 of earnings and profits after the payment of $11,250 of foreign income taxes, and $100,000 of subpart F income. Corporation R has no earnings and profits. With respect to S Corporation, M Corporation is required to include in gross income $80,000 (800/1,000×$100,000) under section 951(a), and $9,000 ($80,000/$100,000×$11,250) under section 78. On December 31, 1964, M Corporation must increase the basis of each share of its stock in R Corporation by $100 ($80,000/800).

Example 2. A, an individual United States shareholder, owns all of the 1,000 shares of the one class of stock in controlled foreign corporation T. Corporation T and A use the calendar year as a taxable year. In 1964, T Corporation has $80,000 of earnings and profits after the payment of $20,000 of foreign income taxes, and $80,000 of subpart F income. A makes the election under section 962 for 1964 and in accordance with such election pays a United States tax of $23,000 with respect to the $80,000 included in his gross income under section 951(a). On December 31, 1964, A must increase the basis of each share of his stock in T Corporation by $23 ($23,000/1,000).

[T.D. 6850, 30 FR 11854, Sept. 16, 1978]

§1.961–2 Reduction in basis of stock in foreign corporations and of other property.

(a) *Reduction in basis*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, the adjusted basis of a United States person's—

(i) Stock in a foreign corporation;

(ii) Interest in a foreign partnership; or

(iii) Beneficial interest in a foreign estate or trust (as defined in section 7701(a)(31)),

with respect to which such United States person receives an amount which is excluded from gross income under section 959(a), shall be reduced under section 961(b), as of the time such person receives such excluded amount, by the sum of the amount so excluded and any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(2) *Limitation on amount of reduction in case of election under section 962.* In the case of a distribution of earnings and profits attributable to amounts with respect to which an election under section 962 has been made, the amount of the reduction in basis provided by subparagraph (1) of this paragraph shall not exceed the sum of—

(i) The amount of such distribution which is excluded from gross income under section 959(a) after the application of section 962(d) and §1.962–3; and

(ii) Any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(b) *Reduction with respect to each share of stock.* Any reduction under paragraph (a) of this section in the adjusted basis of a United States person's stock in a foreign corporation shall be made with respect to each share of such stock in the sum of—

(1)(i) The amount excluded from gross income under section 959(a); or

(ii) The amount excluded from gross income under section 959(a) after the application of section 962(d) and §1.962–3; and

(2) The amount of any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(c) *Amount in excess of basis.* To the extent that the amount of the reduction in the adjusted basis of property provided by paragraph (a) of this section exceeds such adjusted basis, the amount shall be treated as gain from the sale or exchange of property.

(d) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. (a) Domestic corporation M owns all of the 1,000 shares of the one class of stock in controlled foreign corporation R, which owns all of the 500 shares of the one class of stock in controlled foreign corporation S. Each share of M Corporation's stock in R Corporation has a basis of $200. Corporations M, R, and S use the calendar year as a taxable year. In 1963, S Corporation has $100,000 of earnings and profits after the payment of $50,000 of foreign income taxes and $100,000 of subpart F income. For 1963, M Corporation includes $100,000 in gross income under section 951(a) with respect to S Corporation. In accordance with the provisions of §1.961–1, M Corporation increases the basis of each of its 1,000 shares of stock in R Corporation to $300 ($200+$100,000/1,000) as of December 31, 1963.

(b) On July 31, 1964, M Corporation sells 250 of its shares of stock in R Corporation to domestic corporation N at a price of $350 per share. Corporation N satisfies the requirements of paragraph (d) of §1.959–1 so as to qualify as M Corporation's successor in interest. On September 30, 1964, the earnings and profits attributable to the $100,000 included in M Corporation's gross income under section 951(a) for 1963 are distributed to R Corporation which incurs a withholding tax of $10,000 on such distribution (10 percent of $100,000) and an additional foreign income tax of 33⅓ percent or $30,000 by reason of the inclusion of the net distribution of $90,000 ($100,000 minus $10,000) in its taxable income for 1964. On June 30, 1965, R Corporation distributes the remaining $60,000 of such earnings and profits to corporations M and N: Corporation M receives $45,000 (750/1,000×$60,000) and excludes such amount from gross income under section 959(a); Corporation N receives $15,000 (250/1,000×$60,000) and, as M Corporation's successor in interest, excludes such amount from gross income under section 959(a). As of June 30, 1965, M Corporation must reduce the adjusted basis of each of its 750 shares of stock in R Corporation to $200 ($300 minus ($45,000/750+$10,000/1,000+$30,000/1,000)); and N Corporation must reduce the basis of each of its 250 shares of stock in R Corporation to $250 ($350 minus ($15,000/250+$10,000/1,000+$30,000/1,000)).

Example 2. The facts are the same as in paragraph (a) of example 1, except that in addition, on July 31, 1964, R Corporation sells its 500 shares of stock in S Corporation to domestic corporation P at a price of $600 per share. Corporation P satisfies the requirements of paragraph (d) of § 1.959–1 so as to qualify as M Corporation's successor in interest. On September 30, 1964, S Corporation distributes $100,000 of earnings and profits to P Corporation, which earnings and profits are attributable to the $100,000 included in M Corporation's gross income under section 951(a) for 1963. Corporation P incurs a withholding tax of $10,000 on the distribution from S Corporation (10 percent of $100,000). As M Corporation's successor in interest, P Corporation excludes the $90,000 it receives from gross income under section 959(a). As of September 30, 1964, P Corporation must reduce the basis of each of its 500 shares of stock in S Corporation to $400 ($600 minus ($90,000/500+$10,000/500)).

[T.D. 6850, 30 FR 11854, Sept. 16, 1965]

§ 1.962–1 Limitation of tax for individuals on amounts included in gross income under section 951(a).

(a) *In general.* An individual United States shareholder may, in accordance with § 1.962–2, elect to have the provisions of section 962 apply for his taxable year. In such case—

(1) The tax imposed under chapter 1 of the Internal Revenue Code on all amounts which are included in his gross income for such taxable year under section 951(a) shall (in lieu of the tax determined under section 1) be an amount equal to the tax which would be imposed under section 11 if such amounts were received by a domestic corporation (determined in accordance with paragraph (b)(1) of this section), and

(2) For purposes of applying section 960(a)(1) (relating to foreign tax credit) such amounts shall be treated as if received by a domestic corporation (as provided in paragraph (b)(2) of this section).

Thus, an individual United States shareholder may elect to be subject to tax at corporate rates on amounts included in his gross income under section 951(a) and to have the benefit of a credit for certain foreign taxes paid with respect to the earnings and profits attributable to such amounts. Section 962 also provides rules for the treatment of an actual distribution of earnings and profits previously taxed in accordance with an election of the benefits of this section. See § 1.962–3. For transitional rules for certain taxable years, see § 1.962–4.

(b) *Rules of application.* For purposes of this section—

(1) *Application of section 11.* For purposes of applying section 11 for a taxable year as provided in paragraph (a)(1) of this section in the case of an electing United States shareholder—

(i) *Determination of taxable income.* The term ''taxable income'' as used in section 11 shall mean the sum of—

(a) All amounts required to be included in his gross income under section 951(a) for such taxable year; plus

(b) All amounts which would be required to be included in his gross income under section 78 for such taxable year with respect to the amounts referred to in *(a)* of this subdivision if such shareholder were a domestic corporation.

For purposes of this section, such sum shall not be reduced by any deduction of the United States shareholder even if such shareholder's deductions exceed his gross income.

(ii) *Limitation on surtax exemption.* The surtax exemption provided by section 11(c) shall not exceed an amount which bears the same ratio to $25,000 ($50,000 in the case of a taxable year ending after December 31, 1974, and before January 1, 1976) as the amounts included in his gross income under section 951(a) for the taxable year bear to his pro rata share of the earnings and profits for the taxable year of all controlled foreign corporations with respect to which such United States shareholder includes any amount in his gross income under section 951(a) for the taxable year.

(2) *Allowance of foreign tax credit*—(i) *In general.* Subject to the applicable limitation of section 904 and to the provisions of this subparagraph, there shall be allowed as a credit against the United States tax on the amounts described in subparagraph (1)(i) of this paragraph the foreign income, war profits, and excess profits taxes deemed paid under section 960(a)(1) by the electing United States shareholder with respect to such amounts.

(ii) *Application of section 960(a)(1).* In applying section 960(a)(1) for purposes of this subparagraph in the case of an electing United States shareholder, the term ‘‘domestic corporation’’ as used in sections 960(a)(1) and 78, and the term ‘‘corporation’’ as used in section 901, shall be treated as referring to such shareholder with respect to the amounts described in subparagraph (1)(i) of this paragraph.

(iii) *Carryback and carryover of excess tax deemed paid.* For purposes of this subparagraph, any amount by which the foreign income, war profits, and excess profits taxes deemed paid by the electing United States shareholder for any taxable year under section 960(a)(1) exceed the limitation determined under subdivision (iv)*(a)* of this subparagraph shall be treated as a carryback and carryover of excess tax paid under section 904(d), except that in no case shall excess tax paid be deemed paid in a taxable year if an election under section 962 by such shareholder does not apply for such taxable year. Such carrybacks and carryovers shall be applied only against the United States tax on amounts described in subparagraph (1)(i) of this paragraph.

(iv) *Limitation on credit.* For purposes of determining the limitation under section 904 on the amount of the credit for foreign income, war profits, and excess profits taxes—

(a) Deemed paid with respect to amounts described in subparagraph (1)(i) of this paragraph, the electing United States shareholder's taxable income shall be considered to consist only of the amounts described in such subparagraph (1)(i), and

(b) Paid with respect to amounts other than amounts described in subparagraph (1)(i) of this paragraph, the electing United States shareholder's taxable income shall be considered to consist only of amounts other than the amounts described in such subparagraph (1)(i).

(v) *Effect of choosing benefits of sections 901 to 905.* The provisions of this subparagraph shall apply for a taxable year whether or not the electing United States shareholder chooses the benefits of subpart A of part III of subchapter N of chapter 1 (sections 901 to 905) of the Internal Revenue Code for such year.

(c) *Illustration.* The application of this section may be illustrated by the following example:

Example. Throughout his taxable year ending December 31, 1964, A, an unmarried individual who is not the head of a household, owns 60 of the 100 shares of the one class of stock in foreign corporation M and 80 of the 100 shares of the one class of stock in foreign corporation N. A and corporations M and N use the calendar year as a taxable year, corporations M and N are controlled foreign corporations throughout the period here involved, and neither corporation is a less developed country corporation. The earnings and profits and subpart F income of, and the foreign income taxes paid by, such corporations for 1964 are as follows:

	M	N
Pretax earnings and profits	$500,000	$1,200,000
Foreign income taxes	200,000	400,000
Earnings and profits	300,000	800,000
Subpart F income	150,000	750,000

Apart from his section 951(a) income, A has gross income of $200,600 and $100,000 of deductions attributable to such income. He is required to include $90,000 (0.60×$150,000) in gross income under section 951(a) with respect to M Corporation and $600,000 (0.80×$750,000) with respect to N Corporation. A elects to have the provisions of section 962 apply for 1964 and computes his tax as follows:

Tax on amounts included under section 951(a):	
Income under section 951(a) from M Corporation	$90,000

Gross-up under sections 960(a)(1) and 78 ($90,000/$300,000×$200,000)	60,000		
Income under section 951(a) from N Corporation	600,000		
Gross-up under sections 960(a)(1) and 78 ($600,000/ $800,000×$400,000)	300,000		
Taxable income under section 11	1,050,000		
Normal tax (0.22×$1,050,000)		$231,000	
Surtax exemption ([$90,000+$600,000]/ [0.60×$300,000+(0.80×$800,000)]×$25,000)	21,036		
Subject to surtax under section 11 ($1,050,000−$21,036)	1,028,964		
Surtax (0.28×$1,028,964)		288,110	
Tentative U.S. tax		519,110	
Foreign tax credit ($60,000+$300,000)	360,000		
Total U.S. tax payable on amounts included under section 951(a)			$159,110
Tax with respect to other income:			
Gross income		200,600	
Less:			
Personal exemption	600		
Deductions	100,000		
	100,600		
Taxable income		100,000	
Tax with respect to such other taxable income		59,340	
Total tax ($159,110+$59,340)			218,450

[T.D. 6858, 30 FR 13695, Oct. 28, 1965, as amended by T.D. 7413, 41 FR 12640, Mar. 26, 1976]

§ 1.962–2 Election of limitation of tax for individuals.

(a) *Who may elect.* The election under section 962 may be made only by a United States shareholder who is an individual (including a trust or estate).

(b) *Time and manner of making election.* Except as provided in § 1.962–4, a United States shareholder shall make an election under this section by filing a statement to such effect with his return for the taxable year with respect to which the election is made. The statement shall include the following information:

(1) The name, address, and taxable year of each controlled foreign corporation with respect to which the electing shareholder is a United States shareholder and of all other corporations, partnerships, trusts, or estates in any applicable chain of ownership described in section 958(a);

(2) The amounts, on a corporation-by-corporation basis, which are included in such shareholder's gross income for his taxable year under section 951(a);

(3) Such shareholder's pro rata share of the earnings and profits (determined under § 1.964–1) of each such controlled foreign corporation with respect to which such shareholder includes any amount in gross income for his taxable year under section 951(a) and the foreign income, war profits, excess profits, and similar taxes paid on or with respect to such earnings and profits;

(4) The amount of distributions received by such shareholder during his taxable year from each controlled foreign corporation referred to in subparagraph (1) of this paragraph from excludable section 962 earnings and profits (as defined in paragraph (b)(1)(i) of § 1.962–3), from taxable section 962 earnings and profits (as defined in paragraph (b)(1)(ii) of § 1.962–3), and from earnings and profits other than section 962 earnings and profits, showing the source of such amounts by taxable year; and

(5) Such further information as the Commissioner may prescribe by forms and accompanying instructions relating to such election.

(c) *Effect of election*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph and § 1.962–4, an election under this section by a United States shareholder for a taxable year shall be applicable to all controlled foreign corporations with respect to which such shareholder includes any amount in gross income for his taxable year under section 951(a) and shall be binding for the taxable year for which such election is made.

(2) *Revocation.* Upon application by the United States shareholder, an election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless a material and substantial change in circumstances occurs which could not have been anticipated when the election was made. The application for consent to revocation shall be made by the United States shareholder's mailing a letter for such purpose to Commissioner of Internal Revenue, Attention: T:R, Washington, DC 20224, containing a statement of the facts upon which such shareholder relies in requesting such consent.

[T.D. 6858, 30 FR 13696, Oct. 28, 1965]

§1.962–3 Treatment of actual distributions.

(a) *In general.* Section 962(d) provides that the earnings and profits of a foreign corporation attributable to amounts which are, or have been, included in the gross income of an individual United States shareholder under section 951(a) by reason of such shareholder's ownership (within the meaning of section 958(a)) of stock in such corporation and with respect to which amounts an election under §1.962–2 applies or applied shall, when such earnings and profits are distributed to such shareholder with respect to such stock, notwithstanding the provisions of section 959(a)(1), be included in his gross income to the extent that such earnings and profits exceed the amount of income tax paid by such shareholder under this chapter on the amounts to which such election applies or applied. Thus, when such shareholder receives an actual distribution of section 962 earnings and profits (as defined in paragraph (b)(1) of this section) from a foreign corporation, only the excludable section 962 earnings and profits (as defined in paragraph (b)(1)(i) of this section) may be excluded from his gross income.

(b) *Rules of application.* For purposes of this section—

(1) *Section 962 earnings and profits defined.* With respect to an individual United States shareholder, the term ''section 962 earnings and profits'' means the earnings and profits of a foreign corporation referred to in paragraph (a) of this section. Such earnings and profits include—

(i) *Excludable section 962 earnings and profits.* Excludable section 962 earnings and profits which are the amount of the section 962 earnings and profits equal to the amount of income tax paid under this chapter by such shareholder on the amounts included in his gross income under section 951(a); and

(ii) *Taxable section 962 earnings and profits.* Taxable section 962 earnings and profits which are the excess of section 962 earnings and profits over the amount described in subdivision (i) of this subparagraph.

(2) *Determinations made separately for each taxable year.* If section 962 earnings and profits attributable to more than one taxable year are distributed by a foreign corporation the determinations under this section shall be made separately with respect to each such taxable year.

(3) *Source of distributions*—(i) *In general.* Except as otherwise provided in this subparagraph, the provisions of paragraphs (a) through (d) of §1.959–3 shall apply in determining the source of distributions of earnings and profits by a foreign corporation.

(ii) *Treatment of section 962 earnings and profits under §1.959–3.* For purposes of a section 959(c) amount and year classification under paragraph (b) of §1.959–3, a distribution of earnings and profits by a foreign corporation shall be first allocated to earnings and profits other than section 962 earnings and profits (as defined in subparagraph (1) of this paragraph) and then to section 962 earnings and profits. Thus distributions shall be considered first attributable to amounts described in paragraph (b)(1) of §1.959–3 which are not section 962 earnings and profits and then to amounts described in such paragraph (b)(1) which are section 962 earnings and profits (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year), secondly to amounts described in paragraph (b)(2) of §1.959–3 which are not section 962 earnings and profits and then to amounts described in such paragraph (b)(2) which are section 962 earnings and profits (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year), and finally to the amounts described in paragraph (b)(3) of § 1.959–3 (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year).

(iii) *Allocation to excludable section 962 earnings and profits.* A distribution of section 962 earnings and profits by a foreign corporation for any taxable year shall be considered first attributable to the excludable section 962 earnings and profits (as defined in subparagraph (1)(i) of this paragraph) and then to taxable section 962 earnings and profits.

(iv) *Allocation of deficits in earnings and profits.* A United States shareholder's pro rata share (determined in accordance with the principles of paragraph (e) of § 1.951–1) of a foreign corporation's deficit in earnings and profits (determined under § 1.964–1) for any taxable year shall be applied in accordance with the provisions of paragraph (c) of § 1.959–3 except that such deficit shall also be applied to taxable section 962 earnings and profits (as defined in subparagraph (1)(ii) of this paragraph).

(4) *Distribution in exchange for stock.* The provisions of this section shall not apply to a distribution of section 962 earnings and profits which is treated as in part or full payment in exchange for stock under subchapter C of chapter 1 of the Internal Revenue Code. The application of this subparagraph may be illustrated by the following example:

Example. Individual United States shareholder A owns 60 percent of the only class of stock in foreign corporation M, the basis of which is $10,000. Both A and M Corporation use the calendar year as a taxable year. In each of the taxable years 1964, 1965, and 1966, M Corporation has $1,000 of earnings and profits and $1,000 of subpart F income. With respect to each such amount, A includes $600 in gross income under section 951(a), makes the election under section 962, and pays a United States tax of $132 (22 percent of $600). Accordingly, A increases the basis of his stock in M corporation under section 961(a) by $132 in each of the years 1964, 1965, and 1966, and thus on December 31, 1966, the adjusted basis for A's stock in M Corporation is $10,396. In 1967, M Corporation is completely liquidated (in a transaction described in section 331) and A receives $13,800, consisting of $1,800 of earnings and profits attributable to the amounts which A included in gross income under section 951(a) in 1964, 1965, and 1966, and $12,000 attributable to the other assets of M Corporation. No amount of the $3,404 gain realized by A on such distribution ($13,800 minus $10,396) may be excluded from gross income under section 959(a)(1). However, section 962(d) will not prevent any part of such $3,404 from being treated as a capital gain under section 331.

(5) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) M, a controlled foreign corporation is organized on January 1, 1963; A and B, individual United States shareholders, own 50 percent and 25 percent, respectively, of the only class of stock in M Corporation. Corporation M, A, and B use the calendar year as a taxable year, and M Corporation is a controlled foreign corporation throughout the period here involved. For the taxable years 1963, 1964, 1965, and 1966, A and B must include amounts in gross income under section 951(a) with respect to M Corporation. For the years 1963, 1965, and 1966, A makes the election under section 962. On January 1, 1967, B sells his 25-percent interest in M Corporation to A; A satisfies the requirements of paragraph (d) of § 1.959–1 so as to qualify as B's successor in interest. As of December 31, 1967, M Corporation's accumulated earnings and profits of $675 (before taking into account distributions made in 1967) applicable to A's interest (including his interest as B's successor in interest) in such corporation are classified under § 1.959–3 and this section for purposes of section 962(d) as follows:

CLASSIFICATION OF EARNINGS AND PROFITS FOR PURPOSES OF § 1.962–3

Year	Section 959(c)(1)			Section 959(c)(2)			Section 959 (c)(3)
	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962, earnings and profits	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962 earnings and profits	
1963	$25	$11	$39				
1964	75			$60			$15
1965				75	$33	$117	

CLASSIFICATION OF EARNINGS AND PROFITS FOR PURPOSES OF §1.962–3—Continued

Year	Section 959(c)(1)			Section 959(c)(2)			Section 959 (c)(3)
	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962, earnings and profits	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962 earnings and profits	
1966				50	22	78	
1967							75

(b) During 1967, M Corporation makes three separate distributions to A of $200, $208, and $267. The source of such distributions under §1.959–3 and this section is as follows:

Distribution	Amount	Year	Classification of distributions under sections 959 and 962(d)
No. 1	$75 25 11 39 50	1964 1963 1963 1963 1966	(c)(1) non-section 962. Do. (c)(1) excludable section 962. (c)(1) taxable section 962. (c)(2) non-section 962.
Total	200		
No. 2	22 78 75 33	1966 1966 1965 1965	(c)(2) excludable section 962 (c)(2) taxable section 962. (c)(2) non-section 962. (c)(2) excludable section 962.
Total	208		
No. 3	117 60 75 15	1965 1964 1967 1964	(c)(2) taxable section 962. (c)(2) non-section 962. (c)(3). Do.
Total	267		

(c) A must include $324 in his gross income for 1967. The source of these amounts is as follows:

Distribution	Amount	Year	Classification
No. 1	$39	1963	(c)(1) taxable section 962.
No. 2	78	1966	(c)(2) taxable section 962.
No. 3	117 75 15	1965 1967 1964	Do. (c)(3). Do.
Total	324		

(c) *Treatment of shareholder's successor in interest*—(1) *In general.* If a United States person (as defined in §1.957–4) acquires from any person any portion of the interest in the foreign corporation of a United States shareholder referred to in this section, the rules of paragraphs (a) and (b) of this section shall apply to such acquiring person. However, no exclusion of section 962 earnings and profits under paragraph (a) of this section shall be allowed unless such acquiring person establishes to the satisfaction of the district director his right to such exclusion. The information to be furnished by the acquiring person to the district director with his return for the taxable year to support such exclusion shall include:

(i) The name, address, and taxable year of the foreign corporation from which a distribution of section 962 earnings and profits is received and of all other corporations, partnerships, trusts, or estates in any applicable chain of ownership described in section 958(a);

(ii) The name and address of the person from whom the stock interest was acquired;

(iii) A description of the stock interest acquired and its relation, if any, to a chain of ownership described in section 958(a);

(iv) The amount for which an exclusion under paragraph (a) of this section is claimed; and

(v) Evidence showing that the section 962 earnings and profits for which an exclusion is claimed are attributable to amounts which were included in the gross income of a United States shareholder under section 951(a) subject to an election under §1.962–2, that such amounts were not previously excluded from the gross income of a United States person, and the identity of the United States shareholder including such amount.

The acquiring person shall also furnish to the district director such other information as may be required by the district director in support of the exclusion.

(2) *Taxes previously deemed paid by an individual United States shareholder.* If a

corporate successor in interest of an individual United States shareholder receives a distribution of section 962 earnings and profits, the income, war profits, and excess profits taxes paid to any foreign country or to any possession of the United States in connection with such earnings and profits shall not be taken into account for purposes of section 902, to the extent such taxes were deemed paid by such individual United States shareholder under paragraph (b)(2) of § 1.962–1 and section 960(a)(1) for any prior taxable year.

[T.D. 6858, 30 FR 13696, Oct. 28, 1965]

§ 1.962–4 Transitional rules for certain taxable years.

(a) *Extension of time for making or revoking election.* Paragraphs (b) and (c) of this section provide additional rules with respect to making or revoking an election under section 962 which apply only to a taxable year of a United States shareholder for which the last day prescribed by law for filing his return (including any extensions of time under section 6081) occurs or occurred on or before January 31, 1966.

(b) *Manner of making election not previously made.* If a United States shareholder who has not previously made an election under section 962 for any taxable year referred to in paragraph (a) of this section desires to make such an election, he may do so by filing his return or an amended return for such taxable year together with a statement setting forth the information required under paragraph (b) of § 1.962–2. Such return or amended return and statement shall be filed on or before January 31, 1966.

(c) *Revocation of election previously made.* If a United States shareholder who has made an election under section 962 on or before November 1, 1965, for any taxable year referred to in paragraph (a) of this section desires to revoke such election, he may do so by filing an amended return to which is attached a statement that the election previously made is revoked. Such amended return and statement shall be filed on or before January 31, 1966.

[T.D. 6858, 30 FR 13698, Oct. 28, 1965]

§ 1.963–0 Repeal of section 963; effective dates.

(a) *Repeal of section 963.* Except as provided in paragraphs (b) and (c) of this section, the provisions of section 963 and §§ 1.963–1 through 1.963–7 are repealed for taxable years of foreign corporations beginning after December 31, 1975, and for taxable years of United States shareholders (within the meaning of section 951(b), within which or with which such taxable years of such foreign corporations end.

(b) *Transitional rules for chain or group election*—(1) *In general.* If a United States shareholder (within the meaning of section 951(b) makes either a chain election pursuant to § 1.963–1(e) or a group election pursuant to § 1.963–1(f) for a taxable year of such shareholder beginning after December 31, 1975, then a foreign corporation shall be includible in such election only if—

(i) It has a taxable year beginning before January 1, 1976, which ends within such taxable year of the United States shareholder, and

(ii) It is either—

(A) A controlled foreign corporation or

(B) A foreign corporation by reason of ownership of stock in which such shareholder indirectly owns (within the meaning of section 958(a)(2)) stock in a controlled foreign corporation to which this subparagraph applies.

(2) *Series rule.* If any foreign corporation in a series of foreign corporations is excluded by subparagraph (i) of this paragraph from a chain or group election of a United States shareholder for its taxable year, then any foreign corporation in which the United States shareholder owns stock indirectly by reason of ownership of stock in such excluded corporation shall also be excluded from such election to the extent of such indirect ownership regardless of when its taxable year begins.

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) M is a domestic corporation, A, B, D, and E are controlled foreign corporations, and C is a foreign corporation other than a controlled foreign corporation. All five foreign corporations, each have only one class of stock outstanding. M owns directly all of the stock of A, which in turn owns directly all of the stock of B, which in turn owns directly 60 percent of the stock of D, which in turn owns directly all of the stock of E. M also owns directly 40 percent of the stock of C, which in turn owns directly the remaining 40 percent of the stock of D. M is a United States shareholder with respect to no other foreign corporation. M and B each use the calendar year as the taxable year. A, C, D, and E each use a fiscal year ending on November 30 as the taxable year. For calendar year 1976, M may make either a first-tier election with respect to A, a chain election with respect to C and D (to the extent of M's indirect 16-percent stock interest in D by reason of its direct ownership of 40 percent of the stock of C) or a group election with respect to A, C, D (to the extent of such 16-percent stock interest) and E (to the extent of M's indirect 16-percent stock interest in E).

(b) M's indirect 100 percent stock interest in B will be excluded from any chain or group election made by M for calendar year 1976 since B is a controlled foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(c) M's indirect 60 percent stock interest through A and B in D and E will be excluded from any chain or group election made by M for calendar year 1976 since such 60 percent interests are indirectly owned by M by reason of its indirect ownership of stock in B, which is a foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(d) If C used the calendar year as its taxable year and was therefore excluded from a chain election made with respect to it and D, then D would also be excluded from such an election, since D would then be a foreign corporation in which M owns stock indirectly by reason of ownership of stock in C, which is excluded from such election.

(c) *Deficiency distributions.* The rules relating to deficiency distributions under section 963(e)(2) and §1.963–6 shall continue to apply to a taxable year beginning after the effective date of the repeal of section 963 in which it is determined that a deficiency distribution must be made for an earlier taxable year for which a United States shareholder made an election to secure the exclusion under section 963 but failed to receive a minimum distribution.

(d) *Special adjustments pursuant to section 963 to be taken into account for taxable years subsequent to the repeal of section 963.* If a United States shareholder of a controlled foreign corporation elects to receive a minimum distribution under section 963 for a taxable year, section 963 and the regulations thereunder may require certain elections and adjustments to be made in subsequent taxable years. These elections and adjustments shall be taken into account for subsequent taxable years as if section 963 were still in effect and no election to receive a minimum distribution were made after the effective date of the repeal of section 963. Examples of these elections and special adjustments include, but are not limited to, the election which may be made pursuant to §1.963–3(g)(2), relating to the special extended distribution period, and the special adjustments to be made pursuant to §1.963–4, relating to the minimum overall tax burden test.

[T.D. 7545, 43 FR 19652, May 8, 1978]

§1.963–1 Exclusion of subpart F income upon receipt of minimum distribution.

(a) *In general*—(1) *Purpose of section 963.* Section 963 sets forth an exception to section 951(a)(1)(A)(i) by providing that a United States corporate shareholder may exclude from its gross income the subpart F income of a controlled foreign corporation if for the taxable year such shareholder elects such exclusion and, where necessary, receives a distribution of the earnings and profits of such foreign corporation sufficient to bring the aggregate U.S. and foreign income taxes on the pretax earnings and profits of that corporation to a percentage level approaching the U.S. tax rate for such year on the income of a domestic corporation. The election to secure an exclusion under section 963 may be made with respect to a ‘‘single first-tier corporation’’ or a ‘‘chain’’ or ‘‘group’’ of controlled foreign corporations. This section defines the terms ‘‘single first-tier corporations,’’ ‘‘chains,’’ ‘‘group,’’ and certain other terms and prescribes the manner in which such an election is to be made. Section 1.963–2 describes the manner in which the amount of the minimum distribution for any taxable year is to be determined. Section 1.963–3 specifies the distributions counting toward a minimum distribution. Section 1.963–4 sets forth the requirement with respect to a minimum distribution from a chain or group that the overall U.S. and foreign income tax must equal either 90 percent of the U.S. corporate tax rate applied against consolidated pretax and predistribution earnings and profits or, with the application of the special rules set forth in that section, the total U.S. and foreign income taxes which would have been incurred in respect of a pro rata minimum distribution from the chain or group. Section 1.963–5 provides special rules for applying section 963 in certain cases in which the rate of foreign income tax incurred by a foreign corporation varies with the amount of distributions it makes for the taxable year. Section 1.963–6 outlines the deficiency distribution procedure that may be followed if for reasonable cause a U.S. corporate shareholder fails to receive a complete minimum distribution for a taxable year for which it elects the exclusion under section 963. Section 1.963–7 provides transitional rules for the application of section 963 for certain taxable years of U.S. shareholders ending on or before the 90th day after September 30, 1964. Section 1.963–8 provides rules for the determination of the required minimum distribution during the period the §surcharge imposed by section 51 is in effect.

(2) *Conditions for exclusion of subpart F income.* To qualify for an exclusion under section 963 for any taxable year with respect to the subpart F income of a controlled foreign corporation, a corporate United States shareholder must—

(i) Elect such exclusion on or before the last day (including any extensions of time under section 6081) prescribed by law for filing its return of the tax imposed by chapter 1 of the Code for the taxable year;

(ii) Receive, if and to the extent necessary, distributions of the type described in paragraph (a) of § 1.963–3 sufficient in amount to constitute a minimum distribution;

(iii) Incur, in the case of a chain or group election, income tax with respect to such minimum distribution sufficient to satisfy the requirements of paragraph (a) of § 1.963–4, relating to the minimum overall tax burden; and

(iv) Consent, on or before such last day for making the election, to the regulations under section 963 applicable to such taxable year and to any amendments thereof duly prescribed before such last day.

The making of the election under section 963 by filing the return on or before such last day shall constitute the consent to the regulations under such section prescribed before such last day. For an extension of the time for receiving a minimum distribution and making the consent for certain taxable years ending on or before the 90th day after September 30, 1964, see § 1.963–7.

(3) *Subpart F income excluded.* An exclusion under section 963 for a taxable year of a United States shareholder for which the election is made under such section shall apply only to the subpart F income for the taxable year of the single first-tier corporation to which the election applies or of each controlled foreign corporation in the chain or group to which the election applies. Only those amounts attributable to the stock interest to which the election relates may be excluded. Thus, in case of a first-tier election with respect to stock of a controlled foreign corporation owned directly within the meaning of section 958(a)(1)(A), the corporate United States shareholder may not exclude any subpart F income of such foreign corporation which is includible in its gross income under section 951(a)(1)(A)(i) by virtue of its indirect ownership of stock in such foreign corporation through the operation of section 958(a)(2). Subpart F income of a controlled foreign corporation which is excluded from the gross income of a United States shareholder by reason of the receipt of a minimum distribution to which section 963 applies shall not be considered to be excluded under section 954(b)(1) or section 970(a).

(4) *Affiliated group of corporations.* An affiliated group of domestic corporations which makes a consolidated return under section 1501 for the taxable year shall be treated as a single United

States shareholder for purposes of applying section 963 for such year if the common parent corporation in its return for such affiliated group makes any first-tier election, chain election, or group election under section 963 for such affiliated group; in such case, no member of such affiliated group may separately make any first-tier election, chain election, or group election under section 963 for the taxable year. If the common parent of such an affiliated group so making a consolidated return makes no first-tier election, chain election, or group election for such affiliated group, then any member may make a first-tier election, chain election, or group election to the same extent that it could so elect if such affiliated group had not filed a consolidated return; in such case, the affiliated group will not be treated as a single United States shareholder.

(b) *Definitions.* For purposes of section 963 and §§1.963–1 through 1.963–8—

(1) *Controlled foreign corporation.* The term ‘‘Controlled foreign corporation’’ shall have the meaning accorded to it by section 957 and the regulations thereunder but shall not include any foreign corporation for a taxable year beginning before January 1, 1963.

(2) *Single first-tier corporation.* The term ‘‘single first-tier corporation’’ means a controlled foreign corporation described in paragraph (d) of this section with respect to which a first-tier election has been made for the taxable year.

(3) *Chain.* The term ‘‘chain’’ means collectively the foreign corporations described in paragraph (e) of this section with respect to which a chain election has been made for the taxable year.

(4) *Group.* The term ‘‘group’’ means collectively the foreign corporations described in paragraph (f) of this section with respect to which a group election has been made for the taxable year.

(5) *First-tier election, etc.* The term ‘‘first-tier election’’ means an election described in paragraph (c)(1)(i)(a) of this section; the term ‘‘chain election’’ means an election described in paragraph (c)(1)(i)(b) of this section; and the term ‘‘group election’’ means an election described in paragraph (c)(1)(ii) of this section.

(6) *Taxable year.* (i) The term ‘‘taxable year of a single first-tier corporation,’’ ‘‘taxable year of a corporation in a chain,’’ or ‘‘taxable year of a corporation in a group,’’ means, respectively, the taxable year of such corporation ending with or within the taxable year of the electing United States shareholder for which is made under paragraph (c)(1) of this section the election establishing it as a single first-tier corporation, a corporation in a chain, or corporation in a group, as the case may be.

(ii) The term ‘‘taxable year’’ when used in reference to a chain or group refers collectively to the respective taxable years of the foreign corporations in such chain or group to which applies the election establishing such chain or group status, such taxable year being, in the case of each respective corporation in the chain or group, such corporation’s taxable year ending with or within the taxable year of the electing United States shareholder, whether or not such taxable year of the corporation is the same as that of any other foreign corporation in the chain or group.

(7) *Foreign income tax.* The term ‘‘foreign income tax’’ means income, war profits, and excess profits taxes, and taxes included in the term ‘‘income, war profits, and excess profits taxes’’ by reason of section 903, paid or accrued to a foreign country or possession of the United States and taken into account for purposes of sections 901 through 905. Except in determining the foreign tax credit under section 901, the term shall not include any tax which is deemed paid by a foreign corporation under section 902(b).

(c) *Election to exclude subpart F income*—(1) *Foreign corporations included in election.* A corporate United States shareholder may for any taxable year exercise the election to secure an exclusion under section 963 either—

(i)*(a)* Separately with respect to any foreign corporation which as to such shareholder is described in paragraph (d) of this section, and/or

(b) Separately with respect to the foreign corporation or corporations which as to such shareholder are in a

series described in paragraph (e) of this section, except to the extent of any interest (of such shareholder in any such corporation) with respect to which an election has otherwise been made under this subdivision (i); or

(ii) With respect to all foreign corporations which as to such shareholder are described in paragraph (f) of this section.

(2) *Manner of making election.* An election under subparagraph (1) of this paragraph to secure an exclusion under section 963 and the consent to the regulations under such section shall be made for a taxable year by filing with the return for such taxable year—

(i) A written statement stating that such election is made for such taxable year,

(ii) The names of the foreign corporations to which the election applies, the taxable year, country or incorporation, earnings and profits (as determined under paragraph (d) of § 1.963–2), foreign income tax taken into account under paragraph (e) of § 1.963–2, and outstanding capital stock, of each such corporation,

(iii) In case of a group election, the names of all foreign corporations excluded from such group under paragraph (f)(2) and (3) of this section and identifying characterizations for all foreign branches included in, and excluded from, such group under paragraph (f)(4) of this section, together with the authority for such exclusion or inclusion, and

(iv) Such other information relating to the election made as the Commissioner may prescribe by instructions or schedules to support such return.

(3) *Duration of election*—(i) *Year-by-year requirement.* An election under subparagraph (1) of this paragraph to secure an exclusion under section 963 may be made for each taxable year of the United States shareholder but shall be effective only with respect to the taxable year for which made. An election made for any taxable year shall be irrevocable with respect to that taxable year once the period for the making of such election has expired, except to the extent provided by subdivision (ii) of this subparagraph.

(ii) *Revocation or modification of election for reasonable cause—(a) Conditions under which allowed.* If, after the making of an election under subparagraph (1) of this paragraph, the United States shareholder establishes to the satisfaction of the Commissioner that reasonable cause exists for revocation or modification of such election, it may withdraw that election; change from a group election to first-tier elections and/or chain elections or from a chain election to a first-tier election: change from a first-tier election to a chain election or from first-tier elections and/or chain elections to a group election; or, in the case of a chain or group election, alter the composition of the chain or group by adding or eliminating corporations. The United States shareholder shall be allowed to revoke or modify elections pursuant to this subdivision only once for any taxable year of such shareholder and then only at a time prior to the expiration of the period prescribed by law for making an assessment of the tax imposed by chapter 1 of the Code for such taxable year and for any subsequent taxable year for which the tax liability of such shareholder would be affected by such revocation or modification of election. The Commissioner may, as a condition to such revocation or modification of the election, require a consent by the United States shareholder under section 6501 to extend, for the taxable year and such subsequent years affected by the revocation or modification, the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts, and assessable penalties.

(b) Nature of reasonable cause. Reasonable cause shall be deemed to exist for the revocation or modification of an election only if, after the making of such election, a material and substantial change in circumstances affecting the election occurs which reasonably could not have been anticipated when the election was made and which, to a significant degree, was beyond the control of the electing United States shareholder. For example, reasonable cause would exist if the minimum distribution were computed on the basis of a contested foreign income tax asserted by a foreign tax authority

which, as a consequence of litigation occurring after the filing of the United States shareholder's return, is refunded, with the result that the United States shareholder is not entitled under the election which was made to an exclusion under section 963.

(c) Request for revocation or modification. A United States shareholder desiring to revoke or modify the election shall mail to the Commissioner of Internal Revenue, Attention: T:R, Washington, DC, 20224, a letter requesting such revocation or modification; such letter shall set forth the information required by subparagraph (2) of this paragraph with respect to any new election and the facts and circumstances which the shareholder considers reasonable cause for such revocation or modification. The shareholder shall also consent, if required, to the extension of assessment period referred to in *(a)* of this subdivision and shall furnish such other information as may be required by the Commissioner in support of such request. If the Commissioner is satisfied that reasonable cause exists for the revocation or modification, the United States shareholder shall file an amended return consistent with any new election which is made.

(d) *Corporations to which a first-tier election may apply*—(1) *Includible interest.* A corporate United States shareholder may make a first-tier election for the taxable year only with respect to a single controlled foreign corporation in which it owns stock directly within the meaning of section 958(a)(1)(A) and only with respect to the stock so owned. The election must apply to all of the stock so owned by such shareholder and shall relate only to the subpart F income of such corporation which would otherwise be required to be included in gross income by reason of owning such stock. The shareholder may for the same taxable year make a first-tier election with respect to one or more controlled foreign corporations in which it directly owns stock and not with respect to other controlled foreign corporations in which it directly owns stock.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns all the one class of stock in each of the controlled foreign corporations A, B, and C. Corporation M may make a first-tier election for a taxable year with respect to any one of corporations A, B, and C; with respect to corporations A and B, respectively; with respect to corporations A and C, respectively; with respect to corporations B and C, respectively; or with respect to corporations A, B, and C, respectively.

Example 2. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A and 20 percent of the one class of stock of controlled foreign corporation B. Corporation A directly owns 80 percent of the stock of B Corporation. All such corporations use the calendar year as the taxable year. For 1964, M Corporation makes a first-tier election with respect to corporations A and B, respectively, and receives a minimum distribution from each. An exclusion under section 963 for 1964 will be allowed for all of A Corporation's subpart F income for such year but only for the amount of B Corporation's subpart F income which M Corporation would (without regard to section 963) be required to include in gross income for such year under section 951(a)(1)(A)(i) by reason of directly owning 20 percent of the stock of B Corporation. Corporation M may not exclude any amount which it would be required (without regard to section 963) to include in gross income under section 951(a)(1)(A)(i) for such year with respect to the subpart F income of B Corporation by reason of its indirect ownership (through the operation of section 958(a)(2)) of 80 percent of the stock of B Corporation, unless M Corporation separately elects such exclusion and receives a minimum distribution with respect to such interest. See paragraph (e) of this section relating to chain elections.

(e) *Corporations to which a chain election may apply*—(1) *Includible interests.* A Corporate United States shareholder may make a chain election for the taxable year with respect to one or more controlled foreign corporations in any series which includes only one foreign corporation described in subdivision (i), any one or more controlled foreign corporations described in subdivision (ii), and all foreign corporations described in subdivision (iii) of this subparagraph:

(i) A foreign corporation, whether or not a controlled foreign corporation, to the extent of stock owned by such shareholder—

(a) Directly (within the meaning of section 958(a)(1)(A)) in such corporation, or

(b) Indirectly (through the operation of section 958(a)(2)) by virtue of the direct ownership (within the meaning of section 958(a)(1)(A)) of stock in such corporation by a foreign trust, foreign estate, or foreign partnership, in which such shareholder is a beneficiary or partner;

(ii) To the extent that such shareholder so elects, any controlled foreign corporation to the extent that, by reason of its ownership of stock described in subdivision (i) of this subparagraph, such shareholder indirectly owns within the meaning of section 958(a)(2) stock in such controlled foreign corporation; and

(iii) All foreign corporations, whether or not controlled foreign corporations, by reason (and to the extent) of ownership of stock in which such shareholder indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation included in the series by reason of subdivision (ii) of this subparagraph.

Notwithstanding the preceding sentence, a corporate United States shareholder may make a chain election for the taxable year with respect to a single foreign corporation, but only if such foreign corporation is a controlled foreign corporation described in subdivision (i)*(b)* of this subparagraph. The shareholder may for the same taxable year make a chain election with respect to one or more series, and not with respect to other series, to which this subparagraph applies.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A, which in turn directly owns 80 percent of the one class of stock of controlled foreign corporation B. Corporation M may make a chain election with respect to corporations A and B.

Example 2. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A, which in turn directly owns 80 percent of the one class of stock of controlled foreign corporation B, which in turn directly owns all the one class of stock of controlled foreign corporation C. Corporation M also directly owns 20 percent of the stock of B Corporation. Corporation M may make a chain election either with respect to corporations A and B or with respect to corporations A, B, and C. In either case corporations B and C can be included in the chain only to the extent of M Corporation's indirect 80-percent stock interest in such corporations by reason of its direct ownership of 100 percent of the stock of A Corporation. Corporation M may also make a chain election with respect to corporations B and C, in which case the chain would include corporations B and C to the extent of the 20-percent stock interest which M Corporation owns directly in B Corporation, and indirectly owns in C Corporation by reason of its direct ownership of such stock interest in B Corporation.

Example 3. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A, which in turn directly owns all the one class of stock of controlled foreign corporations B and C. Corporation M may make a chain election either with respect to corporations A, B, and C; or with respect to corporations A and B; or with respect to corporations A and C.

Example 4. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A and 40 percent of the one class of stock of foreign corporation B, not a controlled foreign corporation. Corporation A directly owns 30 percent of the one class of stock of controlled foreign corporation C, and B Corporation directly owns the remaining 70 percent of the stock of C Corporation. Corporation M may make a chain election with respect to corporations A and C, but in such case C Corporation can be included in the chain only to the extent of M Corporation's indirect 30-percent stock interest in such corporation by reason of its direct ownership of 100 percent of the stock of A Corporation. Corporation M may instead make a chain election with respect to corporations B and C, but in such case C Corporation can be included in the chain only to the extent of M Corporation's indirect 28-percent stock interest in such corporation by reason of its direct ownership of 40 percent of the stock of B Corporation. In the latter case, B Corporation must be included in the chain even though it is not a controlled foreign corporation. Corporation M may also make two chain elections, one with respect to corporations A and C, and the other with respect to corporations B and C, as described above.

Example 5. Domestic corporation M directly owns all the one class of stock of controlled foreign corporation A, which in turn directly owns all the one class of stock of controlled foreign corporation B and 40 percent of the one class of stock of foreign corporation C, not a controlled foreign corporation. Corporation M may make a chain election with respect to corporations A and B. Corporation C may not be included in the chain since M Corporation does not, by reason of its indirect ownership of stock in C

Corporation, own stock in any controlled foreign corporation.

Example 6. Domestic corporation M directly owns a 60-percent partnership interest in foreign partnership D and by reason of such interest owns indirectly, within the meaning of section 958(a)(2), 60 percent of the one class of stock of controlled foreign corporation E (all of the stock of which is directly owned by D Partnership) and 60 percent of the one class of stock of controlled foreign corporation F (all the stock of which is also directly owned by D Partnership). By virtue of its direct interest in D Partnership, M Corporation may make a chain election with respect to E Corporation alone or with respect to F Corporation alone. Corporation M may also make two chain elections, one with respect to E Corporation, the other with respect to F Corporation.

(f) *Corporations to which a group election may apply*—(1) *Includible interests.* A corporate United States shareholder may make a group election for the taxable year with respect to a group of foreign corporations which includes, except as provided in subparagraphs (2) and (3) of this paragraph, all of the following corporations:

(i) All controlled foreign corporations in which such shareholder owns stock either directly within the meaning of section 958(a)(1)(A) or indirectly within the meaning of section 958(a)(2), and

(ii) All foreign corporations, whether or not controlled foreign corporations, by reason (and to the extent) of ownership of stock in which such shareholder, indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation described in subdivision (i) of this subparagraph.

A first-tier election or chain election may not be made for any taxable year with respect to any foreign corporation which for such taxable year has been excluded under subparagraph (2) or (3) of this paragraph from a group with respect to which a group election has been made for such year. The application of this subparagraph may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns all the one class of stock of controlled foreign corporations A and B and is a United States shareholder with respect to no other foreign corporation. M Corporation may make a group election with respect to corporations A and B.

Example 2. Domestic corporation M directly owns all the one class of stock of controlled foreign corporations A and B, and B Corporation directly owns 80 percent of the one class of stock of controlled foreign corporation C. Corporation M is a United States shareholder only with respect to corporations A, B, and C. If M Corporation makes a group election, it must make the election with respect to corporations A, B, and C.

Example 3. Domestic corporation M directly owns all the one class of stock of controlled foreign corporations A and B. Corporation A directly owns 70 percent of the one class of stock of controlled foreign corporation C. Corporation B directly owns 40 percent of the one class of stock of foreign corporation D, not a controlled foreign corporation, and D Corporation directly owns 30 percent of the stock of C Corporation. Corporation M is a United States shareholder with respect to no other foreign corporation. If M Corporation makes a group election, it must make the election with respect to corporations A, B, C, and D. Corporation D must be included in the group even though it is not a controlled foreign corporation.

(2) *Less developed country corporations.* If the United States shareholder so elects, it may for any taxable year exclude from a group for purposes of a group election every controlled foreign corporation which is a less developed country corporation as defined in section 955(c) and §1.955–5 for the taxable year of such foreign corporation ending with or within such taxable year of the shareholder but only if, by reason of ownership of stock in such foreign corporation, the shareholder does not indirectly own within the meaning of section 958(a)(2) stock in any other controlled foreign corporation which is not a less developed country corporation for its taxable year ending with or within such taxable year of the shareholder. The election under this subparagraph to exclude a less developed country corporation is required to be made with respect to all less developed country corporations of which the electing shareholder is a United States shareholder and which, under the preceding sentence, are eligible to be excluded.

Example. Domestic corporation M directly owns all the one class of stock of controlled foreign corporations A and B, not less developed country corporations. Corporation A directly owns all of the one class of stock of controlled foreign corporation C, B Corporation directly owns all the one class of stock of controlled foreign corporation D, and D Corporation directly owns all the one class of stock of controlled foreign corporation E. Corporations C, D, and E are less developed country corporations under section 955(c). Corporation M may make a group election with respect to corporations A, B, C, D, and E; it may also exclude the less developed country corporations and make a group election with respect to corporations A and B only. If E Corporation were not a less developed country corporation, however, neither D Corporation nor E Corporation could be excluded since, by reason of ownership of stock in D Corporation, M Corporation would indirectly own stock in E Corporation, a controlled foreign corporation which is not a less developed country corporation.

(3) *Foreign corporations with blocked foreign income.* If the United States shareholder so elects, it may for any taxable year exclude from a group for purposes of a group election any foreign corporation with respect to which it is established to the satisfaction of the Commissioner that an amount of earnings and profits of such corporation sufficient to constitute its share of a pro rata minimum distribution (as defined in paragraph (a)(2)(i) of § 1.963–4) by the group cannot be distributed to such United States shareholder because of currency or other restrictions or limitations imposed under the laws of any foreign country. If, by reason of ownership of stock in a foreign corporation which is excluded from the group under the preceding sentence, a United States shareholder owns stock in another foreign corporation an amount of whose earnings and profits sufficient to constitute its share of a pro rata minimum distribution by the group cannot be distributed to such United States shareholder through such excluded foreign corporation because of currency or other restrictions or limitations imposed under the laws of any foreign country, such other foreign corporation must also be excluded from the group for purposes of the group election. For purposes of this subparagraph, the determination as to whether earnings and profits cannot be distributed because of currency or other restrictions or limitations imposed under the laws of a foreign country shall be made in accordance with the regulations under section 964(b), except that such restrictions or limitations shall be considered to exist notwithstanding that distributions are made by the foreign corporation in a foreign currency if, assuming the distributee to be the United States shareholder, the distributed amounts would be excludable from the distributee's gross income for the taxable year of receipt under a method of accounting in which the reporting of blocked foreign income is deferred until the income ceases to be blocked.

(4) *Treatment of foreign branches of domestic corporation as foreign subsidiary corporations*—(i) *In general.* If the United States shareholder so elects, all branches (other than a branch excluded under subdivision (iii) of this subparagraph) maintained by such shareholder in foreign countries and possessions of the United States shall be treated, for purposes of applying subparagraph (1) of this paragraph, as wholly owned foreign subsidiary corporations of such shareholder organized under the laws of such respective foreign countries or possessions of the United States. Each branch treated as such a foreign subsidiary corporation shall be included in the group by the United States shareholder making the group election and shall be regarded, for purposes of section 963, as having distributed to such shareholder all of its earnings and profits for the taxable year, irrespective of the statutory percentage applied for the taxable year under paragraph (b) of § 1.963–2. As used in this subparagraph, the term ''branch'' shall mean a permanent organization maintained in a foreign country or a possession of the United States to engage in the active conduct of a trade or business. Whether a permanent organization is maintained in a foreign country or possession of the United States shall depend upon the facts and circumstances of the particular case. As a general rule, a permanent organization shall be considered to be maintained in such country or possession if the United States shareholder maintains therein a significant work force or significant manufacturing, mining, warehousing, sales, office, or similar business facilities of a fixed or permanent nature. If a United States shareholder so operates that it satisfies the branch test with respect to each of several foreign countries or possessions, each such branch shall be

treated as a separate wholly owned foreign subsidiary corporation organized under the laws of such country or possession in respect of which it satisfies such test. In no event shall a branch which is treated as a wholly owned foreign subsidiary corporation under this subparagraph be also treated as a less developed country corporation. The term ‘‘possession of the United States,’’ as used in this subparagraph, shall be construed to have the same meaning as that contained in paragraph (b)(2) of §1.957–3.

(ii) *Earnings and profits and taxes of a foreign branch.* The earnings and profits (or deficit in earnings and profits) for a taxable year of a branch treated as a wholly owned foreign subsidiary corporation under this subparagraph shall be determined by applying against the gross income (as defined in section 61) of the branch its allowable deductions other than any net operating loss deduction. Any excess of gross income over such deductions shall constitute earnings and profits. Any excess of such deductions over gross income shall constitute a deficit in earnings and profits. For purposes of this subparagraph, the gross income of a branch is that which is produced by the trade or business activities separately conducted by it outside the United States and which is derived from sources without the United States under the provisions of sections 861 through 864 and the regulations thereunder; the allowable deductions of a branch are those which are properly allocable to or chargeable against its gross income and which are allowable under chapter 1 of the Code to the corporation of which it is a branch. Only the foreign income tax allocable to the gross income of the branch shall be considered paid or accrued by such branch. Solely for the purpose of determining under paragraph (c)(2) of §1.963–2 the effective foreign tax rate of a group which includes a branch treated as a wholly owned foreign subsidiary corporation, the foreign income tax considered paid or accrued by the branch shall be treated as an allowable deduction of such branch even though the United States shareholder chooses to take the benefits of section 901 for the taxable year.

(iii) *Excluded branches.* For purposes of subdivision (i) of this subparagraph, a branch maintained by the United States shareholder in a possession of the United States shall not be treated as a wholly owned foreign subsidiary corporation of the United States shareholder for the taxable year unless such branch would be a controlled foreign corporation (as defined in section 957 and the regulations thereunder) for such taxable year if it were incorporated under the laws of such possession and unless the gross income of such shareholder for such taxable year includes for purposes of the tax imposed by Chapter 1 of the Code the income, if any, derived by such shareholder from sources within possessions of the United States, as determined under the provisions of sections 861 through 864 and the regulations thereunder.

(iv) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Throughout 1964, domestic corporation M directly owns all of the one class of stock of controlled foreign corporations A and B. All corporations use the calendar year as the taxable year. During 1964, M Corporation engages in foreign country X in the manufacture and sale of steel tubing and rods, maintaining therein a significant work force and significant manufacturing and sales facilities for such purpose. Corporation M also engages in foreign country Y in the mining and sale of iron ore, maintaining therein a significant work force and substantial mining and sales facilities for such purpose. For 1964, M Corporation may make a group election with respect to corporations A and B and the branches operated in country X and country Y, treating such branches as wholly owned foreign subsidiary corporations. If corporation M elects to include one such branch in the group election, it must include both.

Example 2. Throughout 1964, domestic corporation M directly owns all the one class of stock of controlled foreign corporations A and B. All corporations use the calendar year as the taxable year. During 1964, M Corporation exports tractors to foreign country Z, in which country its sole activities consist of arranging for title to the tractors to pass to the purchasers in that country. Corporation M’s only facility in country Z in 1964 is a small rented office, and its work force therein consists only of a few clerical employees. The activities of M Corporation in country Z do not constitute the maintenance of a branch therein for purposes of this subparagraph. Corporation M may make a group election, only with respect to corporations A and B.

[T.D. 6759, 29 FR 13325, Sept. 25, 1964; 29 FR 13896, Oct. 8, 1964, as amended by T.D. 6767, 29 FR 14877, Nov. 3, 1964; T.D. 7100, 36 FR 5335, Mar. 20, 1971]

§ 1.963–2 Determination of the amount of the minimum distribution.

(a) *Application of statutory percentage to earnings and profits.* The amount of the minimum distribution required to be received by a United States shareholder with respect to stock to which the election under paragraph (c) of § 1.963–1 applies for the taxable year in order to qualify for a section 963 exclusion for such year shall be the amount, if any, determined by the multiplication of the statutory percentage applicable for the taxable year by—

(1) In the case of a first-tier election, such shareholder's proportionate share (as determined under paragraph (d)(2) of this section) of the earnings and profits for the taxable year of the single first-tier corporation to which the election relates,

(2) In the case of a chain election, the consolidated earnings and profits (as determined under paragraph (d)(3) of this section) with respect to such shareholder for the taxable year of the chain to which the election relates, or

(3) In the case of a group election, the consolidated earnings and profits (as determined under paragraph (d)(3) of this section) with respect to such shareholder for the taxable year of the group to which the election relates.

For the requirement that the overall United States and foreign income tax incurred in respect of a minimum distribution from a chain or group must equal or exceed either 90 percent of the United States corporate tax rate applied against pretax and predistribution consolidated earnings and profits or, with the application of the special rules set forth therein, must equal or exceed the overall United States and foreign income tax which would have resulted from a pro rata minimum distribution, see paragraph (a)(1) of § 1.963–4.

(b) *Statutory percentage.* The statutory percentage (referred to in paragraph (a) of this section) for the taxable year shall be determined by applying the effective foreign tax rate (as defined in paragraph (c) of this section) for such year with respect to the single first-tier corporation, chain, or group, as the case may be, against—

(1) The table set forth in section 963(b)(1) in the case of an election to secure an exclusion under section 963 for a taxable year of the United States shareholder beginning in 1963 and a taxable year entirely within the surcharge period ending before January 1, 1970.

(2) The table set forth in section 963(b)(2) in the case of an election to secure an exclusion under section 963 for a taxable year of the U.S. shareholder beginning in 1964 or for a taxable year of such shareholder beginning in 1969 and ending in 1970 to the extent subparagraph (B) of section 963(b)(3) applies,

(3) The table set forth in section 963(b)(3) in the case of an election to secure an exclusion under section 963 for a taxable year of the U.S. shareholder beginning after December 31, 1964 except a taxable year which includes any part of the surcharge period, or

(4) The table set forth in paragraph (b) of § 1.963–8 in the case of an election to secure an exclusion under section 963 for the calendar year 1970.

Example. Domestic corporation M owns all the one class of stock in controlled foreign corporation A. Corporation M uses the calendar year as its taxable year, and A Corporation uses a fiscal year ending August 31. For 1964, M Corporation makes a first-tier election in order to exclude from gross income for such year the subpart F income of A Corporation for its taxable year ending on August 31, 1964. Although, such election applies to the taxable year of A Corporation beginning on September 1, 1963, the applicable table, for purposes of determining the statutory percentages to be used under paragraph (a) of this section for the taxable year, is that set forth in section 963(b)(2), which relates to taxable years of United States shareholders beginning in 1964. Thus, if for the taxable year of A Corporation ending August 31, 1964, the effective foreign tax rate is 30 percent, A Corporation would have to distribute 72 percent of its earnings and profits for such year in order for M Corporation to be entitled to an exclusion under section 963 for 1964.

(c) *Effective foreign tax rate*—(1) *Single first-tier corporation.* For purposes of section 963 the term ‘‘effective foreign tax rate’’ for a taxable year means, with respect to a single first-tier corporation, the percentage which—

(i) The United States shareholder's proportionate share (as determined under paragraph (e)(1) of this section) of the foreign income tax of such corporation for such taxable year is of—

(ii) The sum of—

(a) The United States shareholder's proportionate share (as determined under paragraph (d)(2) of this section) of the earnings and profits of such corporation for such taxable year, and

(b) The amount referred to in subdivision (i) of this subparagraph.

(2) *Chain or group of corporations.* For purposes of section 963, the term ‘‘effective foreign tax rate’’ for a taxable year means, with respect to a chain or group, the percentage which—

(i) The consolidated foreign income taxes (as determined under paragraph (e)(2) of this section) of such chain or group with respect to the United States shareholder for such taxable year is of—

(ii) The sum of—

(a) The consolidated earnings and profits (as determined under paragraph (d)(3) of this section) of such chain or group with respect to such United States shareholder for such taxable year, and

(b) The amount referred to in subdivision (i) of this subparagraph.

(3) *Treatment of United States tax as foreign tax.* For the purpose solely of determining the effective foreign tax rate under this paragraph, if a foreign corporation has pretax earnings and profits attributable to income from sources within the United States for the taxable year upon which it pays United States income tax and if distributions from the earnings and profits of such corporation for such year to the electing United States shareholder with respect to stock to which the election to secure an exclusion under section 963 relates do not entitled such shareholder to the dividends-received deduction under section 245, the amount of the United States income tax shall be taken into account as though such tax were foreign income tax. The amount so treated as foreign income tax shall not exceed 90 percent of an amount determined by multiplying such pretax earnings and profits attributable to income from sources within the United States by a percentage which is the sum of the normal tax rate and the surtax rate (determined without regard to the surtax exemption) prescribed by section 11 for the taxable year of the United States shareholder.

(d) *Determination of proportionate share of earnings and profits and consolidated earnings and profits*—(1) *Earnings and profits of foreign corporations.* For purposes of §§1.963–1 through 1.963–8, the earnings and profits, or deficit in earnings and profits, for the taxable year, of a single first-tier corporation or of a foreign corporation in a chain or group shall be the amount of its earnings and profits for such year, determined under section 964(a) and §1.964–1 but without reduction for foreign income tax or for distributions made by such corporation, less—

(i) In the case of a foreign corporation included in a chain or group, the amount of any distributions received (computed without reduction for any income tax paid or accrued by such corporation with respect to such distributions) by such corporation during its taxable year from the earnings and profits (whether or not from earnings and profits of the taxable year to which the election under section 963 applies) of another foreign corporation in the chain or group.

(ii) In the case of every foreign corporation, the amount of foreign income tax paid or accrued by such corporation during its taxable year other than foreign income tax referred to in subdivision (i) and (iii) of this subparagraph, and

(iii) In the case of a foreign corporation included in a chain or group, the foreign income tax paid or accrued by such corporation with respect to distributions from the earnings and profits of any other foreign corporation in the chain or group for the taxable year of such other corporation to which the election under section 963 applies, but only if the U.S. shareholder chooses under this subdivision to take such tax into account in determining the effective foreign tax rate rather than count it toward the amount of the minimum distribution as provided in paragraph (b)(2) of § 1.963–3.

In the event that the foreign income tax of a corporation included in a chain or group depends upon the extent to which distributions are made by such corporation, the amount of foreign income tax referred to in subdivision (ii) of this subparagraph shall, only for purposes of determining the effective foreign tax rate, be the amount which would have been paid or accrued if no distributions had been made. For the rules in other cases involving corporations whose foreign income tax varies with distributions, see § 1.963–5. For the manner of computing the earnings and profits of a foreign branch treated as a wholly owned foreign subsidiary corporation see paragraph (f)(4)(ii) of § 1.963–1.

(2) *Shareholder's proportionate share of earnings and profits*—(i) *Corporation with earnings and profits—(a) In general.* A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 relates, of the earnings and profits of a foreign corporation (not including a foreign branch described in *(b)* of this subdivision) for its taxable year shall be the share which such shareholder would receive if the total amount of such corporation's earnings and profits, as determined under subparagraph (1) of this paragraph, for such year were distributed on the last day of such corporation's taxable year on which such corporation is a controlled foreign corporation or is a foreign corporation by reason of the ownership of stock in which the United States shareholder indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation.

(b) Foreign branch treated as a foreign subsidiary corporation. A United States shareholder's proportionate share of the earnings and profits, for the taxable year, of a branch treated as a wholly owned foreign subsidiary corporation and included in a group under paragraph (f)(4) of § 1.963–1 shall be the total earnings and profits of such branch for the taxable year, as determined under paragraph (f)(4)(ii) of such section.

(c) Indirectly held foreign corporations. If the proportionate share to be determined is of earnings and profits of a foreign corporation the stock of which is owned by the United States shareholder by reason of its ownership of stock (with respect to which the election relates) in another corporation, such shareholder's proportionate share of such earnings and profits for the taxable year shall be determined on the basis of the amount such shareholder would receive from such foreign corporation with respect to stock in such foreign corporation if there were distributed for the taxable year all such earnings and profits, as determined under subparagraph (1) of this paragraph, and of all the earnings and profits of all other corporations through which such earnings and profits must pass in order to be received by such shareholder with respect to the stock to which the election relates. For purposes of the preceding sentence, the amount received by the shareholder from the earnings and profits of a foreign corporation shall be determined without taking into account deductions (whether or not allowable under chapter 1 of the Code) of other foreign corporations through which such earnings and profits are distributed.

(d) More than one class of stock. If a foreign corporation for a taxable year has more than one class of stock outstanding, the earnings and profits of such corporation for such year which shall be taken into account with respect to any one class of such stock shall be the earnings and profits which would be distributed with respect to such class if all earnings and profits of such corporation for such year were distributed on the last day of such corporation's taxable year, on which such corporation is a controlled foreign corporation or is a foreign corporation by reason of the ownership of stock in which the United States shareholder indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation. If an arrearage in dividends for prior taxable years exists with respect to a class of preferred stock of such corporation, the earnings and profits for the taxable year shall be

attributed to such arrearage only to the extent such arrearage exceeds the earnings and profits of such corporation remaining from prior taxable years beginning after December 31, 1962. For example, if a controlled foreign corporation, using the calendar year as its taxable year, has earnings and profits for 1963 of $100 accumulated at December 31, 1963, and an arrearage of $150 for such year in respect of preferred stock, the earnings and profits for 1964 attributable to such arrearage may not exceed $50 ($150 − $100).

(e) Discretionary power to allocate earnings to different classes of stock. If the allocation of a foreign corporation's earnings and profits for the taxable year between two or more classes of stock depends upon the exercise of discretion by that body of persons which exercises with respect to such corporation the power ordinarily exercised by the board of directors of a domestic corporation, the allocation of such earnings and profits to such classes shall be made for purposes of this subdivision as if such classes constituted one class of stock in which each share has the same rights to dividends as any other share, unless a different method of allocation of such earnings and profits is made by such body not later than 90 days after the close of such taxable year.

(f) Illustrations. The application of this subdivision may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns 80 percent of the one class of stock of controlled foreign corporation A, which directly owns 60 percent of the one class of stock of controlled foreign corporation B. Each such corporation has earnings and profits of $70 for the taxable year, as determined under subparagraph (1) of this paragraph. Corporation M's proportionate share of the earnings and profits is $56 (0.80×$70) as to A Corporation and $33.60 (0.80×0.60×$70) as to B Corporation.

Example 2. Throughout 1964 controlled foreign corporation A, which uses the calendar year as the taxable year, has outstanding 40 shares of common stock and 60 shares of 6-percent, nonparticipating, noncumulative preferred stock with a par value of $100 per share. Corporation A has earnings and profits of $1,000, for 1964, as determined under subparagraph (1) of this paragraph. In such case, $360 (0.06×$100×60) of earnings and profits would be taken into account with respect to the preferred stock and $640 ($1,000 − $360), with respect to the common stock. Thus, if a United States shareholder owns 10 shares of common stock and 30 shares of preferred stock for 1964, its proportionate share of the earnings and profits for such year is $340 ([10/40×$640]+[30/60×$360]).

(ii) *Deficit in earnings and profits of a corporation in a chain or group.* A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 relates, of a deficit in earnings and profits of a foreign corporation in a chain or group for a taxable year shall be the portion of such deficit which, if such corporation had earnings and profits for such year as determined under subparagraph (1) of this paragraph and all of such earnings and profits were distributed on the date described in subdivision (i)*(a)* of this subparagraph, the share of such earnings and profits such shareholder would receive bears to the total of the earnings and profits which would be so distributed on such date. For the determination of the deficit of a foreign branch treated as a wholly owned foreign subsidiary corporation and included in a group, see paragraph (f)(4)(ii) of § 1.963–1. A United States shareholder's proportionate share of the deficit of such a branch shall be the total deficit of such branch for the taxable year.

(iii) *Controlled foreign corporation for part of year.* If—

(a) Stock in a foreign corporation is owned within the meaning of section 958(a) by a United States shareholder on the last day in the taxable year of such corporation for which such corporation is a controlled foreign corporation to which applies an election by such shareholder to secure an exclusion under section 963 with respect to such stock, or

(b) Stock in a foreign corporation which is not a controlled foreign corporation is owned within the meaning of section 958(a) by a United States shareholder on the last day in the taxable year of such corporation on which another foreign corporation (which, by reason of the stock so owned, is owned by such shareholder within the meaning of section 958(a)) is a controlled foreign corporation to which applies an election by such shareholder to secure

an exclusion under section 963 with respect to such stock,

the earnings and profits of such foreign corporation for the taxable year which are taken into account in determining such shareholder's proportionate share thereof shall be an amount of such earnings and profits, determined as provided in subparagraph (1) of this paragraph, which bears to the total of such earnings and profits the same ratio which the part (computed on a daily basis) of such year during which such corporation is a controlled foreign corporation (or, in case such corporation is not a controlled foreign corporation, during which such other corporation is a controlled foreign corporation) bears to the total taxable year. If the United States shareholder by sufficient records and accounts establishes to the satisfaction of the district director the gross income received or accrued, and the deductions paid or accrued, for the part of such year during which such corporation is a controlled foreign corporation (or, in case such corporation is not a controlled foreign corporation, during which such other corporation is a controlled foreign corporation), the amount of earnings and profits based on such records and accounts may be used in lieu of the amount determined under the preceding sentence. The application of this subdivision may be illustrated by the following examples:

Example 1. Domestic corporation M on June 30, 1963, purchases 60 percent of the one class of stock of A Corporation which on July 1 becomes a controlled foreign corporation and remains such throughout the remainder of 1963. Both corporations use the calendar year as the taxable year. Corporation M makes a first-tier election with respect to A Corporation. For 1963, A Corporation has $100 of earnings and profits, as determined under subparagraph (1) of this paragraph. Corporation M's proportionate share of such earnings and profits for 1963 is $30.25 (0.60×[184/365×$100]).

Example 2. (a) Throughout 1963 domestic corporation M directly owns 20 percent of the one class of stock of foreign corporation A, not a controlled foreign corporation at any time, which directly owns 50 percent of the one class of stock of foreign corporation B, which becomes a controlled foreign corporation on July 1, 1963, and remains such throughout the remainder of 1963. All such corporations use the calendar year as the taxable year. Each of corporations A and B has earnings and profits for 1963 of $100, as determined under subparagraph (1) of this paragraph. Corporation M makes a chain election for 1963 with respect to corporations A and B. Corporation M's proportionate share of the earnings and profits of A Corporation for 1963 is $10.08 (0.20×[184/365×$100]). Corporation M's proportionate share of the earnings and profits of B Corporation for 1963 is $5.04 (0.20×0.50×[184/365×$100]).

(b) If B Corporation had been a controlled foreign corporation throughout 1963, M Corporation's proportionate share of the earnings and profits of corporations A and B for 1963 would have been $20 (0.20×$100) and $10 (0.20×0.50×$100), respectively.

(c) If corporations A and B had each been a controlled foreign corporation only for the period of January 1, 1963, through June 30, 1963, M Corporation's proportionate share of the earnings and profits of such corporations would have been $9.92 (0.20×[181/365×$100]) and $4.98 (0.20×0.50×[181/365× $100]), respectively.

(d) If A Corporation had been a controlled foreign corporation throughout 1963 or during the period of July 1, 1963, through December 31, 1963, but B Corporation had been a controlled foreign corporation only during the period of January 1, 1963, through June 30, 1963, M Corporation's proportionate share of the earnings and profits of such corporations would have been $20 (0.20×$100) and $4.96 (0.20×0.50×[181/365×$100]), respectively.

(3) *Consolidated earnings and profits with respect to United States shareholder.* The consolidated earnings and profits of a chain or group with respect to any United States shareholder for the taxable year shall be the sum of such shareholder's proportionate shares of the earnings and profits, and of the deficit in earnings and profits, determined under subparagraph (2) of this paragraph, for such year of all foreign corporations, whether or not controlled foreign corporations, in such chain or group.

(e) *Foreign income taxes used in determining effective foreign tax rate.* For purposes of determining the effective foreign tax rate under paragraph (c) of this section—

(1) *Shareholder's proportionate share of taxes of a foreign corporation.* The foreign income tax of a foreign corporation for a taxable year shall consist of the foreign income tax referred to in paragraph (d)(1)(ii) of this section with respect to such year and, if the United States shareholder chooses to take the

foreign income tax described in paragraph (d)(1)(iii) of this section into account in determining the effective foreign tax rate of a chain or group which includes such foreign corporation, the foreign income tax referred to in such paragraph with respect to such year. A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 applies, of the foreign income tax of such foreign corporation for a taxable year shall be the same proportion of such foreign income tax that such shareholder's proportionate share (as determined under paragraph (d)(2)(i) of this section) of the earnings and profits of such corporation for such year bears to the total earnings and profits of such corporation for such year. A United States shareholder's proportionate share of the foreign income tax, for the taxable year, of a branch treated as a wholly owned foreign subsidiary corporation and included in a group under paragraph (f)(4) of §1.963–1 shall be the total foreign income tax of such branch for the taxable year.

(2) *Consolidated foreign income taxes with respect to United States shareholder.* The consolidated foreign income taxes of a chain or group with respect to a United States shareholder for the taxable year of such chain or group shall be the sum of such shareholder's proportionate shares (as determined under subparagraph (1) of this paragraph) of the foreign income tax of all foreign corporations, whether or not controlled foreign corporations, in such chain or group.

(3) *Taxes paid by foreign corporation on distributions received during its distribution period.* If a distribution received by a foreign corporation in a chain or group from another foreign corporation in such chain or group after the close of the recipient's taxable year but during its distribution period for such year is allocated to the earnings and profits of such recipient corporation for such year under paragraph (c)(2) of §1.963–3, then any foreign income tax paid or accrued by such recipient corporation on such distribution shall be treated as paid or accrued for such taxable year.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. For 1966, domestic corporation M makes a first-tier election with respect to controlled foreign corporation A, 80 percent of the one class of stock of which M Corporation owns directly. Both corporations use the calendar year as the taxable year. For 1966, A Corporation has earnings and profits (before reduction for foreign income tax) of $100 with respect to which it pays foreign income tax of $30. Its earnings and profits are $70 ($100 − $30). Corporation M's proportionate share of such earnings and profits is $56 (0.80×$70), and its proportionate share of the foreign income tax is $24 ($56/$70×$30). The effective foreign tax rate is 30 percent ($24/[$56+$24]). Based on such effective foreign tax rate, the statutory percentage under section 963(b)(3) for 1966 is 69 percent. Thus, the amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is a dividend of $38.64 (0.69×$56).

Example 2. For 1966, domestic corporation M makes a first-tier election with respect to controlled foreign corporation A, all of whose one class of stock M Corporation owns directly. Both corporations use the calendar year as the taxable year. For 1966, A Corporation has earnings and profits (before reduction for income tax) of $100, of which $40 is attributable to income from sources within the United States on which $12 United States income tax is paid. The foreign country in which A Corporation is incorporated imposes an income tax at 30 percent on the $100 but allows a credit against its tax for the $12 of United States income tax, so that it imposes a net foreign income tax of $18 for 1966. In determining the effective foreign tax rate of A Corporation for 1966, such $12 of United States income tax may be treated as foreign income tax to the extent it does not exceed $17.28 ($40×0.90×0.48). Corporation A has earnings and profits of $70 for 1966. Although A Corporation's effective foreign tax rate for 1966 is 30 percent, determined by dividing $30 by the sum of $70 plus $30, none of the United States tax which is taken into account in determining such rate shall be treated as foreign income tax for purposes of determining the foreign tax credit of M Corporation under section 902. Based on such effective foreign tax rate, the statutory percentage under section 963(b)(3) for 1966 is 69 percent. Thus, the amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is a dividend of $48.30 (0.69×$70).

Example 3. Domestic corporation M directly owns throughout 1966, 60 percent of the one class of stock of controlled foreign corporation A, not a less developed country corporation under section 902(d), which has for 1966 earnings and profits of $70 (all of which is attributable to subpart F income) after having paid foreign income tax of $30. Both corporations use the calendar year as the taxable year. Corporation A is created under the laws of a foreign country which imposes a 6-percent dividend withholding tax. Corporation M would be required, but for section 963, to include $42 (0.60×$70) of A Corporation's subpart F income in gross income under section 951(a)(1)(A)(i). For 1966, however, M Corporation makes a first-tier election with respect to A Corporation. Since the tax withheld on distributions made by A Corporation is considered to have been paid by M Corporation, the effective foreign tax rate applicable to A Corporation for 1966 is only 30 percent, the percentage which such $30 of foreign income tax is of $100 (the sum of $30 plus $70). Thus, the statutory percentage under section 963(b) for 1966 is 69 percent. The amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is the distribution M Corporation will receive if A Corporation distributes 69 percent of its earnings and profits for 1966. Thus, if M Corporation receives a distribution of 69 percent of its proportionate share of such earnings and profits or $28.98 (0.69×0.60×$70), it may exclude from gross income for 1966 $42 otherwise required to be included in gross income under section 951(a)(1)(A)(i) and will determine its income tax, assuming no other income and no surtax exemption under section 11(c), as follows:

Dividend	$28.98
Gross-up under section 78 ($28.98/ $70×$30)	12.42
Taxable income	41.40
U.S. tax before foreign tax credit ($41.40×0.48)	19.87
Foreign tax credit ($12.42+[0.06 ×$28.98])	14.16
U.S. tax payable	5.71

Example 4. (a) For 1966 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all of whose one class of stock it directly owns, and controlled foreign corporation B, all of whose one class of stock is directly owned by A Corporation. Both foreign corporations are subject to a foreign income tax at a flat rate of 30 percent, and all corporations use the calendar year as a taxable year. For 1966, B Corporation has pretax earnings and profits of $100 and distributes $51.50. For 1966, A Corporation has pretax earnings and profits of $151.50, consisting of $100 from selling activities and $51.50 received as a distribution from B Corporation, upon which it pays a foreign income tax of $45.45 (i.e., 30 percent of $151.50).

(b) Corporation M chooses under paragraph (d)(1)(iii) of this section to take the foreign tax paid by A Corporation on the dividend received from B Corporation into account in determining the effective foreign tax rate of the chain rather than count it toward the amount of the minimum distribution. Thus, to determine consolidated earnings and profits of the chain for 1966, A Corporation's pretax earnings and profits of $151.50 are first reduced by the intercorporate dividend of $51.50 received from B Corporation so that A Corporation has pretax and predistribution earnings and profits of $100 ($151.50 less $51.50). Corporation A's pretax and predistribution earnings and profits of $100 are then reduced by the foreign income tax of $30 (30 percent of $100) paid on such earnings and profits, resulting in predistribution earnings and profits of $70 ($100 less $30). Since M Corporation chooses to count toward the effective foreign tax rate, rather than toward the minimum distribution, A Corporation's foreign income tax of $15.45 (0.30×51.50) imposed on the dividend received from B Corporation, such predistribution earnings and profits of $70 of A Corporation are further reduced by such $15.45 of tax to $54.55 ($70−$15.45). Corporation B, having received no dividends from any other corporation in the chain, has predistribution earnings and profits of $70 ($100 less foreign income tax of $30).

(c) The consolidated earnings and profits of the chain for 1966 are $124.55 ($54.55+$70). The consolidated foreign income taxes for such year are $75.45 ($30+$15.45+$30). The effective foreign tax rate of the chain for 1966 is 37.73 percent ($75.45/[$124.55+$75.45]). The statutory percentage for 1966 under section 963(b)(3) is 51 percent. Thus, the amount of the minimum distribution which M Corporation must receive from the 1966 consolidated earnings and profits of the chain is $63.52 (0.51×$124.55).

Example 5. The facts are the same as in example 4 except that M Corporation does not choose under paragraph (d)(1)(iii) of this section to take into account, in determining the effective foreign tax rate, the foreign income tax of $15.45 paid by A Corporation on the distribution of $51.50 received from B Corporation. In such case, the consolidated earnings and profits of the chain are $140 ($70+$70) and the consolidated foreign income taxes are $60 ($30+$30), the latter amount being determined without taking into account A Corporation's foreign income tax of $15.45 on the distribution of $51.50 received from B Corporation. The effective foreign tax rate for 1966 is 30 percent ($60/[$140+$60]), and the statutory percentage under section 963(b) is 69 percent. Thus, the amount of the minimum distribution which must be made from the 1966 consolidated earnings and profits of the chain is $96.60 (0.69×$140). For the counting of such $15.45 of A Corporation's tax toward the $96.60 amount of the minimum distribution, see paragraph (b)(2) of § 1.963–3.

Example 6. For 1966 domestic corporation M directly owns the following percentages of the one class of stock of the following controlled foreign corporations in respect of which it makes a group election: 80 percent of A Corporation, 60 percent of B Corporation, and 70 percent of C Corporation. All corporations use the calendar year as the taxable year; none of the foreign corporations is a less developed country corporation under section 902(d). Each foreign corporation makes distributions during 1966. The consolidated earnings and profits, and the consolidated foreign income taxes, of the group for 1966 with respect to M Corporation, and the amount of the minimum distribution which M Corporation must receive, are determined as follows, based on the earnings and profits and foreign income tax shown in the following table:

	Controlled foreign corporations		
	A	B	C
Predistribution and pretax earnings and profits	$100	$100	$100.00
Foreign income tax	15	25	35.00
Predistribution earnings and profits	85	75	65.00
M Corporation's proportionate share of earnings and profits:			
(0.80×$85)	68	....	....
(0.60×$75)	....	45	....
(0.70×$65)	....	....	45.50
Consolidated earnings and profits with respect to M Corporation ($68+$45+$45.50)	....	....	158.50
M Corporation's proportionate share of foreign income tax:			
($15×[$68/$85])	12	....	....
($25×[$45/$75])	....	15	....
($35×[$45.50/$65])	....	....	24.50
Consolidated foreign income taxes with respect to M Corporation ($12+$15+$24.50)	....	....	51.50

The effective foreign tax rate for 1966 is 24.5 percent ($51.50/[$158.50+$51.50]) and the statutory percentage under section 963(b)(3) for such year is 76 percent. Thus, the amount of the minimum distribution which M Corporation must receive from the 1966 consolidated earnings and profits of the group is $120.46 (0.76×$158.50).

Example 7. (a) For 1966 domestic corporation M makes a chain election with respect to the following controlled foreign corporations: A Corporation, 80 percent of whose one class of stock M Corporation owns directly; B Corporation, 60 percent of whose one class of stock is directly owned by A Corporation; and C Corporation, 70 percent of whose one class of stock is directly owned by B Corporation. All corporations use the calendar year as the taxable year; none of the foreign corporations is a less developed country corporation under section 902(d). The predistribution and pretax earnings and profits of each foreign corporation are $100. Each foreign corporation pays a flat rate of foreign income tax on all income computed without reduction for dividends paid and determined by including dividends received. Such rate is 15 percent for A Corporation, 25 percent for B Corporation, and 35 percent for C Corporation. Corporation C distributes $65, and B Corporation distributes $100, for 1966. Corporation M chooses under paragraph (d)(1)(iii) of this section to count toward the effective foreign tax rate, rather than toward the amount of the minimum distribution, the foreign income tax paid by corporations A and B, respectively, on distributions received from corporations B and C, respectively.

(b) The consolidated earnings and profits, and the consolidated foreign income taxes, of the chain, and the amount of the minimum distribution for 1966, with respect to M Corporation are determined as follows:

	Controlled foreign corporations			
	A	B	C	Total
Pretax earnings and profits	$160.00	$145.50	$100.00	....
Reduction for intercorporate dividends:				
(0.60×$100)	60.00	....	....	....
(0.70×$65)	....	45.50	....	....
Pretax and predistribution earnings and profits	100.00	100.00	100.00	....
Reduction for foreign income tax on such pretax and predistribution earnings and profits:				
(0.15×$100)	15.00	....	....	....
(0.25×$100)	....	25.00	....	....
(0.35×$100)	....	....	35.00	....
Predistribution earnings and profits	85.00	75.00	65.00	....
Reduction for foreign income tax on intercorporate distributions of 1966 earnings and profits:				
(0.15×$60)	9.00	....	....	....
(0.25×$45.50)	....	11.38	....	....
	76.00	63.62	65.00	
Consolidated earnings and profits with respect to M Corporation:				
(0.80×$76)	60.80	....	....	....
(0.80×0.60×$63.62)	....	30.54	....	....

	Controlled foreign corporations			
	A	B	C	Total
(0.80×0.60×0.70×$65)			21.84	$113.18
Consolidated foreign income taxes with respect to M Corporation:				
($60.80/$76×[$15+$9])	19.20			
($30.54/$63.62×[$25+$11.38])		17.46		
($21.84/$65×$35)			11.76	$48.42
Effective foreign tax rate ($48.42/[$113.18+$48.42])				29.96%
Statutory percentage under section 963(b)				69%
Amount of minimum distribution which M Corporation must receive from 1966 consolidated earnings and profits (0.69×$113.18), no amount of the tax on intercorporate distributions being counted toward the minimum distribution				$78.0

Example 8. The facts are the same as in example 7 except that M Corporation does not choose under paragraph (d)(1)(iii) of this section to take into account, in determining the effective foreign tax rate, the foreign income tax paid by the recipient corporations on the intercorporate distributions. The consolidated earnings and profits, the consolidated foreign income taxes, of the chain, and the amount of the minimum distribution which M Corporation must receive, for 1966 are determined as follows:

	Controlled foreign corporations			
	A	B	C	Total
Pretax earnings and profits	$160.00	$145.50	$100.00	
Reduction for intercorporate dividends:				
(0.60×$100)	60.00			
(0.70×$65)		45.50		
Pretax and predistribution earnings and profits	100.00	100.00	100.00	
Reduction for foreign income tax on such pretax and predistribution earnings and profits:				
(0.15×$100)	15.00			
(0.25×$100)		25.00		
(0.35×$100)			35.00	
Predistribution earnings and profits	85.00	75.00	65.00	
Consolidated earnings and profits with respect to M Corporation:				
(0.80×$85)	68.00			
(0.80×0.60×$75)		36.00		
(0.80×0.60×0.70×$65)			21.84	$125.84
Consolidated foreign income taxes with respect to M Corporation:				
($68/$85×$15)	12.00			
($36/$75×$25)		12.00		
($21.84/$65×$35)			11.76	$35.76
Effective foreign tax rate ($35.76/[$125.84+$35.76])				22.13%
Statutory percentage under section 963(b)				76%
Amount of minimum distribution to be made from 1966 consolidated earnings and profits with respect to M Corporation: (0.76×$125.84)				$95.64
Foreign income tax on intercorporate distributions of 1966 earnings and profits which is counted toward the minimum distribution (see § 1.963–3(b)(2)):				
($68/$85×[0.15×$60])	7.20			
($36/$75×[0.25×$45.50])		5.46		$12.66
Amount of minimum distribution which M Corporation must actually receive from the chain ($95.64 − $12.66)				$82.98

[T.D. 6759, 29 FR 13329, Sept. 25, 1964, as amended by T.D. 6767, 29 FR 14877, Nov. 3, 1964; T.D. 7100, 36 FR 5335, Mar. 20, 1971]

§ 1.963–3 Distributions counting toward a minimum distribution.

(a) *Conditions under which earnings and profits are counted toward a minimum distribution*—(1) *In general.* A distribution to the United States shareholder by a single first-tier corporation or by a foreign corporation included in a chain or group shall count toward a minimum distribution for the taxable year of such shareholder to which the election under section 963 relates only to the extent that—

(i) It is received by such shareholder during such year or within 180 days thereafter,

(ii) It is a distribution of the type described in paragraph (b) of this section,

(iii) Under paragraph (c) of this section, it is deemed to be distributed from the earnings and profits of the foreign corporations for the taxable year of such corporation to which the election relates, and

(iv) Such shareholder chooses to include it in gross income for the taxable year of such shareholder to which the election relates notwithstanding that such distribution, by reason of its receipt after the close of such year, would ordinarily be includible in the gross income of a subsequent year.

Amounts taken into account under this subparagraph as gross income of the United States shareholder for the taxable year to which the election relates shall not be considered to be includible in the gross income of such shareholder for a subsequent taxable year. For purposes of determining the foreign tax credit under sections 901 through 905, foreign income tax paid or accrued by such shareholder on or with respect to such amounts shall be treated as paid or accrued during the taxable year of such election.

(2) *Distributions made prior to acquisition of stock.* A United States shareholder which owns within the meaning of section 958(a) stock in a foreign corporation with respect to which such shareholder elects to secure an exclusion under section 963 for the taxable year may count toward the minimum distribution any distribution made with respect to such stock, and before its acquisition by the United States shareholder, to any other domestic corporation not exempt from income tax under chapter 1 of the Code, to the extent that such distribution is made out of the United States shareholder's proportionate share, as determined under paragraph (d)(2) of §1.963–2, of such corporation's earnings and profits for the taxable year and would have counted toward a minimum distribution if it had been distributed to such United States shareholder. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, which uses the calendar year as the taxable year, has for 1963 $100 of earnings and profits and 100 shares of only one class of stock outstanding. Domestic corporation M, not exempt from income tax under chapter 1 of the Code, directly owns all of such shares during the period from January 1, 1963, through June 30, 1963. On June 30, 1963, M Corporation transfers all of such shares to domestic corporation N, which owns them throughout the remainder of 1963 and elects to secure an exclusion under section 963 for such year with respect to the subpart F income of A Corporation. During June 1963, M Corporation receives a dividend of $75 from A Corporation, which would count toward a minimum distribution if it had been distributed to N Corporation for such year. Corporation N's proportionate share of the earnings and profits of A Corporation for 1963 is $100; N Corporation may count toward a minimum distribution for 1963 the entire dividend of $75 paid to M Corporation.

Example 2. The facts are the same as in example 1 except that M is a nonresident alien individual. Since A Corporation is not a controlled foreign corporation from January 1, 1963, through June 30, 1963, N Corporation's proportionate share of the earnings and profits of A Corporation for 1963 is $50.41 ($100×184/365), as determined under paragraph (d)(2)(iii) of §1.963–2. Although $25.41 ($75−$49.59) of the $75 distribution to M is paid from N Corporation's proportionate share of A Corporation's 1963 earnings and profits, N Corporation may not count toward a minimum distribution any part of the $75 dividend distributed to M, since M is not a domestic corporation.

(b) *Qualifying distributions*—(1) *Amounts not counted toward a minimum distribution.* No distribution received by a United States shareholder shall count toward a minimum distribution for the taxable year with respect to such shareholder to the extent the distribution is excludable from gross income to the extent gain on the distribution is not recognized, or to the extent the distribution is treated as a distribution in part or full payment in exchange for stock. Undistributed amounts required to be included in gross income under section 551 as undistributed foreign personal holding company income or under section 951 as undistributed amounts of a controlled foreign corporation shall not count toward a minimum distribution under section 963. An amount received by a United States shareholder as a distribution which under section 302 or section 331 is treated as a distribution in part or full payment in exchange for stock shall not count toward a minimum distribution even though such amount is includible in gross income under section 1248 as a dividend. For purposes of this subparagraph, any portion of a distribution of earnings and profits which is attributable to an increase in current earnings, invested in United States property which, but for paragraph (e) of this section, would be included in the gross income of the United States shareholder under section 951(a)(1)(B) shall not be treated as an amount excludable from gross income.

(2) *Inclusion of tax on intercorporate distributions.* In the case of a chain or group election, the United States shareholder's proportionate share of the amount of the foreign income tax paid or accrued for the taxable year by a foreign corporation in the chain or group with respect to distributions received by such corporation from the earnings and profits, of another foreign corporation in such chain or group, for the taxable year of such other corporation to which the election relates shall count toward a minimum distribution from such chain or group for the taxable year, but only if the United States shareholder does not choose under paragraph (d)(1)(iii) of § 1.963–2 to take such tax into account in determining the effective foreign tax rate of such chain or group for the taxable year. To the extent that foreign income tax counts toward a minimum distribution under this subparagraph, it shall be applied against and reduce the amount of the minimum distribution required to be received by the United States shareholder, determined without regard to this paragraph.

(c) *Rules for allocation of distributions to earnings and profits for a taxable year.* To determine whether a distribution to the United States shareholder by a single first-tier corporation or by a foreign corporation in a chain or group is made from the earnings and profits of such corporation for the taxable year to which the election under section 963 relates, the following subparagraphs shall apply:

(1) *Exception to section 316.* Section 316 shall apply except that a distribution of earnings and profits made by a foreign corporation either to another foreign corporation or to the United States shareholder shall be treated as having been paid from the earnings and profits of the distributing corporation for the taxable year of such corporation to which the election relates only if it is made during its distribution period (described in paragraph (g) of this section) for such year.

(2) *Distributions from other corporations.* The earnings and profits of a foreign corporation shall be determined in accordance with paragraph (d)(1) of § 1.963–2 (applied as though the United States shareholder had chosen under subparagraph (1)(iii) of such paragraph to take the tax described therein into account in determining the effective foreign tax rate) except that, in the case of a chain or group election, a distribution received by a foreign corporation in the chain or group from another foreign corporation in such chain or group shall be taken into account as earnings and profits of the recipient corporation for the taxable year of such recipient corporation to which the election relates but only to the extent that—

(i) The distribution is received by the recipient corporation during the distribution period for the taxable year of such recipient corporation to which the election relates,

(ii) If the distribution had been received by the United States shareholder, it would have constituted a distribution of the type described in paragraph (b) of this section, and

(iii) The distribution is made from the earnings and profits of the distributing corporation for the taxable year of such distributing corporation to which the election relates.

(d) *Year of inclusion in income of foreign corporation and effect upon subpart F income.* To the extent that a distribution to the United States shareholder counting toward a minimum distribution from a chain or group consists of earnings and profits distributed to a foreign corporation in the chain or group after the close of the recipient corporation's taxable year but during its distribution period for such year by another foreign corporation in such chain or group, such amount shall be treated as received by the recipient corporation on the last day of such taxable year and shall not be regarded as foreign personal holding company income (within the meaning of section 553(a) or 954(c)) of such corporation for the taxable year in which such amount is actually received. The extent to which a distribution counting toward a minimum distribution consists of earnings and profits distributed to a foreign corporation in a chain or group shall be determined under the ordering rules of paragraph (b)(3) of §1.963–4 (applied in each instance as though the United States shareholder had not chosen under paragraph (d)(1)(iii) of §1.963–2 to take the tax described therein into account in determining the effective foreign tax rate). However, for such purpose, the amount of foreign income tax, if any, which counts toward the minimum distribution shall be determined without regard to paragraph (b)(2) of this section but in accordance with paragraph (b)(3)(iii) of §1.963–4.

(e) *Distribution of current earnings invested in United States property.* A distribution made by a foreign corporation during its distribution period for a taxable year shall, notwithstanding section 959(c), first be attributed to earnings and profits for such year described in section 959(c)(3) and then to other earnings and profits. For such purposes, earnings and profits of such foreign corporation for such year attributable to amounts which would otherwise be included in gross income of the United States shareholder under section 951(a)(1)(B) for such year shall be treated as earnings and profits to which section 959(c)(3) applies, shall not be excluded from gross income under section 959 (a) or (b), and shall count toward a minimum distribution for such year. See paragraph (c)(1)(v) of §1.960–1 and paragraph (a) of §1.960–2.

(f) *Cumulative dividends in arrears.* A distribution in satisfaction of arrearages shall be treated as being made out of earnings and profits of the foreign corporation for the taxable year to which the election under section 963 applies only to the extent the dividend is not attributed, under paragraph (d)(2)(i)*(d)* of §1.963–2, to the earnings and profits of such corporation remaining from prior taxable years beginning after December 31, 1962. The application of this paragraph may be illustrated by the following example:

Example. For 1963, single first-tier corporation A, which uses the calendar year as the taxable year, has earnings and profits of $50; for 1964, a deficit in earnings and profits of $20; for 1965, earnings and profits of $100; and for 1966, earnings and profits of $240. For each of such years preferred dividends accumulate at the rate of $60; but no dividend is paid until 1966 during which year the current dividend is paid and $180 is distributed toward the arrearages. Of this $180, only $50 ($180 – $130) shall be treated as paid from 1966 earnings and profits.

(g) *Distribution period of a foreign corporation*—(1) *General distribution period.* Except as provided by subparagraph (2) of this paragraph, the distribution period with respect to a foreign corporation for its taxable year shall begin immediately after the close of the distribution period for the preceding taxable year and shall end with the close of the 60th day of the next succeeding taxable year. If no election to secure an exclusion under section 963 applied to the preceding taxable year, the distribution period for the taxable year shall begin with the 61st day of the taxable year.

(2) *Special extended distribution period.* If the United States shareholder of the foreign corporation so elects in statement filed with its return for the taxable year for which the election to secure the exclusion under section 963 is made, the distribution period with respect to such foreign corporation for its taxable year to which the election to secure the exclusion applies shall end with any day which occurs no earlier than the last day of such taxable year of such foreign corporation and no later than the 180th day after the close of such taxable year. The statement shall designate the day so elected as the end of the distribution period.

(h) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. For 1963 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all of whose one class of stock M Corporation directly owns, and controlled foreign corporation B, all of whose one class of stock is directly owned by A Corporation. All such corporations use the calendar year as the taxable year, and the distribution periods of corporations A and B for 1963 coincide. Corporations A and B each have earnings and profits (before distributions) of $100 for 1963. On June 1, 1963, B Corporation distributes earnings and profits of $120, of which $100 is from its earnings and profits for 1963 and $20 is from prior earnings. For 1963, A Corporation pays no income tax and distributes earnings and profits of $150 to M Corporation. Under paragraph (c) of this section, such $150 is allocated to A Corporation's earnings and profits of $200 for 1963, consisting of its total earnings and profits for that year of $220 less the $20 received as a distribution from B Corporation's prior earnings.

Example 2. Domestic corporation M directly owns all of the one class of stock of controlled foreign corporation A. Both corporations use the calendar year as the taxable year, and A Corporation's taxable year and its distribution period for 1963 coincide. For 1963, $50 is included in the gross income of M Corporation under section 951(a)(1)(B) as A Corporation's increase in earnings invested for such year in United States property. For 1964, M Corporation makes a first-tier election with respect to A Corporation. For 1964, A Corporation has earnings and profits of $100, including $10 attributable to an increase in earnings invested for such year in United States property. During 1964, A Corporation distributes earnings and profits of $80 to M Corporation. Without regard to paragraph (e) of this section, $10 of this distribution is attributable under section 959(c)(1) to A Corporation's 1964 earnings and profits required to be included in M Corporation's gross income under section 951(a)(1)(D). Pursuant to paragraph (e) of this section, however, the entire distribution of $80 counts toward a minimum distribution for 1964 and is considered to be from earnings and profits of A Corporation for 1964 described in section 959(c)(3). Thus the entire distribution of $80 is included in M Corporation's gross income as a dividend and the foreign tax credit in respect of such amount is determined in accordance with section 902 as modified by the regulations under section 963. On the other hand, if A Corporation made no distributions for 1964, no part of the $10 of A Corporation's increase in earnings invested in United States property for such year would count toward a minimum distribution for any other year but would be included in the gross income for M Corporation for 1964 under section 951(a)(1)(B), and the foreign tax credit in respect of such amount would be determined in accordance with § 1.960–1.

Example 3. For 1964 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all the one class of stock of which is owned directly by M Corporation, and controlled foreign corporation B, all the one class of stock of which is owned directly by A Corporation. Corporation M makes no election under section 963 for 1963 or 1965. Corporations M and B use the calendar year as the taxable year, and A Corporation uses for its taxable year a fiscal year ending on September 30. Corporation M elects to have the distribution period for each controlled foreign corporation end on March 29, 1965, such date being the 180th day after the close of A Corporation's taxable year ending on September 30, 1964. Corporation A's distribution period for its taxable year ending on September 30, 1964, begins on November 30, 1963, the 61st day of such taxable year. The distribution period of B Corporation for 1964 begins on March 1, 1964, the 61st day of such taxable year. A distribution counting toward a minimum distribution for 1964 may be made from the earnings and profits of B Corporation only if the amount thereof is distributed by B Corporation to A Corporation, and in turn by A Corporation to M Corporation, during the period of March 1, 1964, through March 29, 1965.

Example 4. The facts are the same as in example 3, except that for their taxable years ending in 1964, corporations A and B each have earnings and profits (before distributions) of $100. On March 10, 1965, B Corporation distributes to A Corporation a dividend of $80 upon which A Corporation incurs foreign income tax at the rate of 10 percent. On March 15, 1965, A Corporation distributes to M Corporation a dividend of $50. Corporation M chooses to take into account as gross income for 1964 from such distribution only $40. For purposes of applying this section, the distribution counting toward a minimum distribution is $44.44, consisting of the $40 of earnings and profits actually received by M Corporation plus the $4.44 ($40/$72×$8) of foreign income tax incurred by A Corporation attributable thereto; A Corporation is deemed to have received $44.44 ($40÷0.90) of the distribution from B Corporation on September 30, 1964, the last day of the taxable year of A Corporation to which the election relates; and the foreign personal holding company income derived by A Corporation for its taxable year ending in 1965 from the distribution from B is only $35.56 ($80 − $44.44). Assuming that no exceptions, exclusions, or exemptions were applicable, subpart F income would be realized by A Corporation for its taxable year ending on September 30, 1965, upon the distribution by B Corporation to A Corporation, but only in the amount of $32 ($35.56 less a deduction under section 954(b)(5) for taxes of $3.56).

[T.D. 7100, 36 FR 10860, June 4, 1971; 36 FR 11924, June 23, 1971, as amended by T.D. 7334, 39 FR 44214, Dec. 23, 1974]

§1.963–4 Limitations on minimum distribution from a chain or group.

(a) *Minimum overall tax burden*—(1) *In general.* Notwithstanding the fact that distributions of the type described in paragraph (a) of §1.963–3 are made by a chain or group to the United States shareholder in an amount sufficient to constitute a minimum distribution for the taxable year of such shareholder to which the chain or group election relates, no exclusion shall be allowable under section 963 to such shareholder with respect to such chain or group for such year unless—

(i) Without applying the special rules set forth in paragraphs (b) and (c) of this section, the overall United States and foreign income tax (as defined in subparagraph (2)(ii) of this paragraph) for the taxable year with respect to the distribution which is made equals or exceeds 90 percent of an amount determined by multiplying the sum of the consolidated earnings and profits (as determined under paragraph (d)(3) of §1.963–2) and the consolidated foreign income taxes (as determined under paragraph (e)(2) of §1.963–2) of such chain or group for the taxable year with respect to such shareholder by a percentage which equals the sum of the normal tax rate and the surtax rate (determined without regard to the surtax exemption) prescribed by section 11 for the taxable year of the shareholder, or

(ii) With the application of the special rules set forth in paragraphs (b) and (c) of this section—

(a) Such shareholder receives a pro rata minimum distribution (as defined in subparagraph (2)(i) of this paragraph) from such chain or group for such taxable year, or

(b) To the extent necessary, the amount of the foreign income tax allowable as a credit for such year under section 901 with respect to the distribution which is made is reduced and credit for the reduction is deferred, as provided in paragraph (c)(3) of this section, so that the overall United States and foreign income tax for the taxable year with respect to such distribution equals or exceeds the lesser of—

(1) The overall United States and foreign income tax which would be paid or accrued for such year with respect to a pro rata minimum distribution received by such shareholder from such chain or group for such year, and

(2) Ninety percent of an amount determined by multiplying the sum of the consolidated earnings and profits (as determined under paragraph (b)(1) of this section) and the consolidated foreign income taxes (as determined under paragraph (b)(1) of this section) of such chain or group for the taxable year with respect to such shareholder by a percentage which equals the sum of the normal tax rate and the surtax rate (determined without regard to the surtax exemption) prescribed by section 11 for the taxable year of the shareholder.

(2) *Definitions.* For purposes of §§1.963–1 through 1.963.8—

(i) *Pro rata minimum distribution.* A pro rata minimum distribution from a chain or group for the taxable year is a distribution of earnings and profits to the United States shareholder, with respect to stock to which the chain or group election relates, which is the statutory percentage (applicable with respect to such chain or group as determined under paragraph (b) of §1.963–2) of the United States shareholder's proportionate share of the taxable year's earnings and profits of each foreign corporation in such chain or group (determined in accordance with paragraph (d)(2) of §1.963–2 but without making any deduction under paragraph (d)(1)(iii) of such section).

(ii) *Overall United States and foreign income tax.* The overall United States and foreign income tax for any taxable year of a chain or group with respect to a minimum distribution is the sum of—

(a) The consolidated foreign income taxes of the chain or group for such year with respect to the United States shareholder making the chain or group election,

(b) Any other foreign income tax paid or accrued by a foreign corporation in the chain or group by reason of the receipt of any distributions counting toward such minimum distribution from such chain or group for that year, and

(c) The foreign income tax, if any, and United States income tax paid or accrued by such shareholder upon

amounts counting toward such minimum distribution from such chain or group for such year.

Such overall United States and foreign income tax shall be determined with respect to such minimum distribution without taking into account any foreign income tax which is deemed paid for such year under section 904(d), relating to carryback and carryover of excess tax paid. For purposes of this subdivision, the consolidated foreign income taxes of the chain or group shall be determined under paragraph (e)(2) of § 1.963–2, applied without regard to the second sentence of paragraph (d)(1) of that section.

(3) *Taxes paid by foreign corporation on distributions received during its distribution period.* For purposes of determining foreign income tax deemed paid by the United States shareholder for the taxable year under section 902, if a distribution received by a foreign corporation in a chain or group from another foreign corporation in such chain or group after the close of the recipient's taxable year but during its distribution period for such year is allocated to the earnings and profits of such recipient corporation for such year under paragraph (c)(2) of § 1.963–3, any foreign income tax paid or accrued by such recipient corporation on such distribution shall be treated as paid or accrued for such taxable year.

(4) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) Domestic corporation M directly owns all of the one class of stock of foreign corporation A, which in turn directly owns all of the one class of stock of foreign corporation B. Corporation M makes a chain election with respect to A Corporation and B Corporation. All such corporations use the calendar year as the taxable year. Assuming that A Corporation does not incur foreign tax on amounts distributed by B Corporation, the foreign income tax and earnings and profits of corporations A and B, the effective foreign tax rate, and the statutory percentage for 1966, are as follows:

	A	B	Consolidated
Pretax and predistribution earnings and profits	$100	$100	$200
Foreign income tax	20	40	60
Earnings and profits	80	60	140
Effective foreign tax rate ($60/[$140+$60])	....	....	30%
Statutory percentage under section 963(b)	....	....	69%

(b) Corporation M is entitled for 1966 to exclude its pro rata share of the subpart F income of corporations A and B for such year if it receives from the 1966 consolidated earnings and profits of the chain distributions totaling at least $96.60 (0.69×$140) and if—

(1) The sum of the consolidated foreign income taxes ($60) of the chain for 1966 and of the United States income tax for 1966 (determined by taking into account the foreign tax credit under section 901 without regard to paragraph (c) of this section) imposed on such distributions equals at least $86.40 (0.90×0.48×$200);

(2) Under the special rules of paragraphs (b) and (c) of this section, the distributions received consist of a distribution from each of corporations A and B which is 69 percent of the earnings and profits for 1966 of such corporation, that is, a distribution of $55.20 (0.69×$80) from A Corporation and of $41.40 (0.69×$60) from B Corporation; or

(3) Under the special rules of paragraphs (b) and (c) of this section, the foreign tax credit is reduced and deferred to such an extent that the sum of the consolidated foreign income taxes ($60) of the chain for 1966 and of the United States income tax for 1966 (determined by taking into account the foreign tax credit under section 901 as modified by paragraph (c) of this section) imposed on such distributions equals the lesser of $86.40 (0.90×0.48×$200) and the amount which the sum of such taxes would be if M Corporation were to receive a distribution of $55.20 (0.69×$80) from the 1966 earnings and profits of A Corporation and $41.40 (0.69×$60) from the 1966 earnings and profits of B Corporation.

(b) *Special rules for determining earnings and profits and foreign income taxes.* For purposes of determining the minimum overall tax burden under paragraph (a)(1)(ii) of this section, §§ 1.963–2 and 1.963–3 shall apply as modified by the following subparagraphs:

(1) *Exclusion of tax on intercorporate distributions.* The consolidated earnings and profits and consolidated foreign income taxes of a chain or group for the taxable year shall be determined in accordance with § 1.963–2, except that foreign income tax referred to in paragraph (d)(1)(iii) of such section may be

taken into account in determining the effective foreign tax rate only—

(i) To the extent that such tax is not deemed paid by the United States shareholder under section 902 (as modified by paragraph (c) of this section) for its taxable year to which the chain or group election relates, or

(ii) If, by taking the tax into account, the effective foreign tax rate with respect to such chain or group, as determined under paragraph (c)(2) of §1.963–2, exceeds the highest effective foreign tax rate requiring a distribution under section 963(b) for such year of the shareholder.

(2) *Allocation of deficits.* For purposes of determining the amount of each foreign corporation's share of a pro rata minimum distribution from a chain or group for the taxable year and for purposes of determining the foreign tax credit under paragraph (c) of this section of the United States shareholder with respect to any minimum distribution from a chain or group for the taxable year—

(i) *Deficits of foreign corporations.* The total of the United States shareholder's proportionate shares, as determined under paragraph (d)(2)(ii) of §1.963–2, of the deficit of every foreign corporation in the chain or group having a deficit for the taxable year shall be allocated against and shall reduce such shareholder's proportionate share, as determined under paragraph (d)(2)(i) of §1.963–2, of the earnings and profits for the taxable year of each other foreign corporation in the chain or group having earnings and profits for such year in an amount which bears to such total of shares of deficit the same ratio which such share of earnings and profits bears to the total of such shareholder's proportionate shares, as so determined, of the earnings and profits of all foreign corporations in the chain or group having earnings and profits for the taxable year.

(ii) *Deficits of foreign branches.* If for the taxable year a group includes under paragraph (f)(4) of §1.963–1 foreign branches the aggregate of whose allowable deductions (other than any net operating loss deduction) exceeds the aggregate of their gross incomes for the taxable year, determined as provided in paragraph (f)(4)(ii) of such section, the amount of such excess shall be allocated as provided by subdivision (i) of this subparagraph.

(3) *Distributions through a chain or group.* In determining whether and to what extent a distribution for any taxable year has been made out of the earnings and profits of a foreign corporation included in a chain of ownership described in section 958(a) consisting of two or more corporations in a chain or group for the taxable year, the following subdivisions shall apply:

(i) *Allocation first to income received as a distribution.* If any foreign corporation included in the chain or group for the taxable year receives a distribution for such year from another foreign corporation in the chain or group and in turn makes a distribution for the taxable year, the distribution so made shall first be allocated to the earnings and profits, to the extent thereof, attributable to the distribution so received; if distributions are received from more than one other corporation in the chain or group, the distribution made by the recipient corporation shall be apportioned among all such amounts. For purposes of determining whether a distribution is made or received for the taxable year, see paragraph (c) of §1.963–3.

(ii) *Successive distributions through a chain or group.* If any foreign corporation included in the chain or group for the taxable year distributes an amount from its earnings and profits of such year, the amount so distributed shall be considered to be received from such earnings and profits by the United States shareholder to the extent the amount is distributed by successive distributions made by each other foreign corporation in the chain or group for the taxable year through the chain of ownership described in section 958(a) into the hands of such shareholder.

(iii) *Distribution determined without reduction by taxes of intervening corporations.* If, for the taxable year to which the election to secure an exclusion under section 963 applies, the United States shareholder receives a distribution to which subdivision (ii) of this subparagraph applies, the entire amount distributed by the foreign corporation from such shareholder's proportionate share of its earnings and profits for the taxable year shall, except where taxes referred to in paragraph (d)(1)(iii) of § 1.963–2 are taken into account as provided by subparagraph (1) of this paragraph, count toward a minimum distribution and shall not be reduced for such purpose by an foreign income tax paid or accrued on such amount by another foreign corporation in the chain or group through which such amount is distributed by successive distributions into the hands of such shareholder. The application of this subdivision may be illustrated by the following examples:

Example 1. For 1966, domestic corporation M makes a chain election with respect to controlled foreign corporation A, all the one class of stock of which is directly owned by M Corporation, and controlled foreign corporation B, all the one class of stock of which is directly owned by A Corporation. All corporations use the calendar year as the taxable year. Corporation M complies with the special rules of this paragraph and paragraph (c) of this section for the taxable year. Corporation A's only income for 1966 is a dividend of $52.50 distributed in such year by B Corporation, on which A Corporation is subject to an income tax of $10.50. The remaining $42 ($52.50 less $10.50) is distributed by A Corporation for 1966 to M Corporation. The full $52.50 distributed by B Corporation counts toward a minimum distribution by the chain for 1966.

Example 2. For 1966, domestic corporation M makes a chain election with respect to controlled foreign corporation A, all the one class of stock of which it owns directly, and controlled foreign corporation B, all the one class of stock of which A Corporation own directly. All corporations use the calendar year as the taxable year. Corporation M complies with the special rules of this paragraph and paragraph (c) of this section for the taxable year. The predistribution and pretax earnings and profits for 1966 of B Corporation are $100, and of A Corporation, $0. Corporation B pays foreign income tax of $30 and during the year distributes $70. On such $70, A Corporation pays foreign income tax of $14. By applying paragraph (d)(1)(iii) of § 1.963–2, the consolidated foreign income taxes of the chain for 1966 are $44 ($30+$14) and the consolidated earnings and profits of the chain are $56 ($70−$14); in such case, the effective foreign tax rate of the chain for 1966 is 44 percent ($44/[$56+$44]) and thus in excess of the highest effective foreign tax rate requiring a distribution for such year under section 963(b). Since M Corporation may thus take A Corporation's tax of $14 into account, the statutory percentage under section 963(b) for 1966 is zero percent and the amount of the minimum distribution required to be made by the chain is $0.

(c) *Special foreign tax credit rules*—(1) *In general.* In determining the minimum overall tax burden under paragraph (a)(1)(ii) of this section, the foreign tax credit of the United States shareholder with respect to a minimum distribution received for the taxable year from the chain or group shall be determined under the provisions of sections 901 through 905 as modified by § 1.963–3 except that—

(i) Under subparagraph (2) of this paragraph—

(a) Taxes of a second-tier corporation making a distribution through a first-tier corporation shall not be averaged with taxes of such first-tier corporation,

(b) Taxes of a first-tier corporation or a second-tier corporation on a distribution made through such corporation shall not be averaged with such corporation's taxes on its other income; and

(c) Taxes of a first-tier corporation or a second-tier corporation shall not be deemed paid with respect to distributions from the earnings and profits of such corporation which are offset by a deficit allocated under paragraph (b)(2) of this section to the United States shareholder's proportionate share of the earnings and profits of such corporation; and

(ii) The foreign tax credit may be reduced and the reduction deferred under subparagraph (3) of this paragraph to another taxable year of the United States shareholder.

(2) *Nonaveraging of tax*—(i) *Year of minimum distribution—(a) Taxes deemed paid by a first-tier corporation and taxes actually paid by such corporation.* If, by successive distributions through a chain or group, a United States shareholder receives for a taxable year a distribution of the earnings and profits for such year of any corporation in such chain or group, and if both section 902(a) and section 902(b) apply with respect to such distribution, all the taxes deemed paid under section 902(b) by the first-tier corporation described in section 902(a) with respect to such distribution of such earnings and profits shall be deemed paid by the United States shareholder for such taxable

year under section 902(a) with respect to the earnings and profits so distributed and, notwithstanding the rules otherwise applicable under section 902, no part of the taxes so deemed paid by such first-tier corporation shall be attributed to other earnings and profits of such first-tier corporation for such year and no part of the taxes paid or accrued with respect to such other earnings and profits shall be attributed to the earnings and profits so received as a distribution.

(b) Taxes of a foreign corporation paid on intercorporate distributions and on other income. If, by successive distributions through a chain or group, a United States shareholder receives for a taxable year a distribution of the earnings and profits for such year of any corporation in such chain or group, then in applying section 902(a) with respect to such distribution through a first-tier corporation described in section 902(a), or in applying section 902(b) with respect to such distribution through a second-tier corporation described in section 902(b), as the case may be, the taxes of such corporation which shall be taken into account in determining taxes deemed paid under such section shall be the foreign income tax actually paid or accrued for the taxable year by such first-tier or second-tier corporation, as the case may be, with respect to such distribution; and, notwithstanding the rules otherwise applicable under section 902, no part of the taxes so paid by such first-tier or second-tier corporation shall be attributed to other earnings and profits of such corporation for such year and no part of the taxes paid or accrued with respect to such other earnings and profits shall be attributed to the earnings and profits so received as a distribution.

(c) Corporation with earnings and profits reduced by allocated deficits. In the application of section 902, a United States shareholder's proportionate share of the earnings and profits for the taxable year of a foreign corporation to which the chain or group election applies shall reflect the reduction of such earnings and profits by deficits allocated thereto under paragraph (b)(2) of this section. No taxes paid or accrued by such corporation shall be deemed paid under section 902 with respect to a distribution to such shareholder from the earnings and profits of such corporation for such year to the extent that such distribution exceeds the shareholder's proportionate share as so reduced.

(ii) *Year of distribution of remaining earnings and profits.* If for a taxable year in respect of which a United States shareholder receives a minimum distribution pursuant to an election under section 963 and in respect of which the provisions of this subparagraph are applied—

(a) The foreign income tax which is paid or accrued by a foreign corporation for such year, by reason of the receipt and payment of earnings and profits counting toward such minimum distribution, is deemed paid under subdivision (i) *(a)* or *(b)* of this subparagraph,

(b) The pretax and predistribution earnings and profits for such year of a foreign corporation in a chain or group with respect to stock on which such minimum distribution is received are reduced by reason of the deduction under paragraph (d)(1)(i) of §1.963–2 of distributions received from other corporations in such chain or group, or

(c) Such shareholder's proportionate share of the earnings and profits for such year of a foreign corporation in a chain or group making a distribution counting toward such minimum distribution is reduced by the allocation thereto under paragraph (b)(2) of this section of a portion of the deficits of foreign branches or other foreign corporations in such chain or group,

the pretax and predistribution earnings and profits of such foreign corporation for such year to which such minimum distribution is attributable and the foreign income tax which is taken into account in determining tax deemed paid under section 902 on such pretax and predistribution earnings and profits shall not be taken into account in the application of section 902 when other earnings and profits of such foreign corporation for such year are distributed in a subsequent taxable year of such foreign corporation to such shareholder. For the purpose of applying the preceding sentence to a case in which *(c)* of this subdivision applies, the pretax and predistribution earnings and profits of the foreign corporation for such year to which the minimum distributed is attributable shall be the amount of such corporation's earnings and profits which are distributed and count toward the minimum distribution plus the foreign income tax of such foreign corporation allocated thereto in determining the taxes deemed paid under section 902 for the taxable year of the minimum distribution.

(iii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Domestic corporation M makes a chain election for 1966 with respect to controlled foreign corporation A, which is wholly owned directly by M Corporation, and controlled foreign corporation B, which is wholly owned directly by A Corporation. Each corporation uses the calendar year as the taxable year. In 1966, corporations A and B are subject to foreign income tax at the rates of 20 percent and 30 percent, respectively, with no deduction being allowed for dividends received or paid; each such corporation has pretax and predistribution earnings and profits of $100. Corporation M receives from the chain a pro rata minimum distribution for such year and applies thereto the special rules of this paragraph and paragraph (b) of this section. Corporation A is not a less developed country corporation under section 902(d). The 1966 foreign income tax of corporations A and B which is deemed paid by M Corporation under section 902(a) for 1966, and the remaining tax which is allocated to earnings and profits to be distributed to M Corporation in future years, are determined as follows:

	A	B	Total
Pretax and predistribution earnings and profits	$100.00	$100.00	$200.00
Foreign income tax	20.00	30.00	50.00
Consolidated earnings and profits	80.00	70.00	150.00
Effective foreign tax rate ($50/[$150+$50])			25%
Statutory percentage under section 963(b)			76%
Amount distributed as pro rata minimum distribution for 1966:			
(0.76×$80)	60.80		
(0.76×$70)		53.20	114.00
Amount received by M Corporation as pro rata minimum distribution:			
A Corporation's distribution	$60.80		
B Corporation's distribution ($53.20 − [0.20 × $53.20]), or ($53.20 − $10.64)		$42.56	$103.36
Amount of tax counted toward minimum distribution			10.64
Tax deemed paid by M Corporation for 1966 for purposes of gross-up under section 78 and foreign tax credit:			
($60.80/$80×$20)	15.20		
([$42.56/$42.56×$10.64] +[$53.20/$70×$30]) or ($10.64+$22.80)		33.44	48.64
Remaining 1966 earnings and profits for future distribution to M Corporation:			
($80 − $60.80)	19.20		
($70 − $53.20)		16.80	36.00
Foreign income tax attributable to 1966 earnings and profits remaining for future distribution to M Corporation:			
($19.20/$80×$20)	4.80		
($16.80/$70×$30)		7.20	12.00

Example 2. The facts are the same as in example 1 except that A Corporation pays foreign income tax at the rate of 30 percent and B Corporation, at the rate of 20 percent; and A Corporation is allowed a deduction, in computing its income subject to tax, for the full amount of dividends received. The determination of tax deemed paid for 1966 is as follows:

	A	B	Total
Pretax and predistribution earnings and profits	$100.00	$100.00	$200.00
Foreign income tax	30.00	20.00	50.00
Consolidated earnings and profits	70.00	80.00	50.00
Effective foreign tax rate ($50/[$150+$50])			25%
Statutory percentage under section 963(b)			76%
Amount distributed by foreign corporations as a pro rata minimum distribution for 1966 and amount received by M Corporation:			
(0.76×$70)	$53.20		
(0.76×$80)		$60.80	$114.00
Tax deemed paid by M Corporation for 1966 for purposes of gross-up under section 78 and foreign tax credit:			
($53.20/$70×$30)	22.80		
($60.80/$80×$20)		15.20	38.00

	A	B	Total
Remaining 1966 earnings and profits for future distribution to M Corporation:			
($70 − $53.20)	16.80	....	....
($80 − $60.80)	....	19.20	36.00
Foreign income tax attributable to 1966 earnings and profits remaining for future distribution to M Corporation:			
($16.80/$70×$30)	7.20	....	....
($19.20/$80×$20)	....	4.80	12.00

Example 3. For 1966, domestic corporation M makes a group election with respect to controlled foreign corporations A and B, both of which are wholly owned directly by M Corporation, and foreign branch C of M Corporation. All such corporations use the calendar year as the taxable year. Corporation M receives a pro rata minimum distribution from the group for 1966 and applies thereto the special rules of this paragraph and paragraph (b) of this section. Neither foreign corporation is a less developed country corporation under section 902(d). Corporations A and B pay foreign income tax at a flat rate of 20 percent and 30 percent, respectively. The 1966 foreign income tax of corporations A and B which is deemed paid by M Corporation under section 902(a) for 1966, and the remaining tax which is allocated to earnings and profits to be distributed to M Corporation in future years, are determined as follows:

	A	B	Branch C	Total
Pretax and predistribution earnings and profits (and deficit) of the group	$60.00	$60.00	($20)	$100.00
Foreign income tax	12.00	18.00	....	30.00
Earnings and profits (and deficit)	48.00	42.00	(20)	70.00
Allocation of deficit of Branch C:				
($48/[$48+$42]×$20)	(10.67)	....	....	....
($42/[$48+$42]×$20)	....	(9.33)	....	....
Consolidated earnings and profits of the group	37.33	32.67	....	70.00
Effective foreign tax rate ($30/$100)	....	....	....	30%
Statutory percentage under section 963(b)	....	....	....	69%
Amount received by M Corporation as pro rata minimum distribution for 1966:				
(0.69×$37.33)	25.76	....	....	....
(0.69×$32.67)	....	22.54	....	$48.30
Tax deemed paid by M Corporation for 1966 for purposes of gross-up under section 78 and foreign tax credit:				
($25.76/$37.33×$12)	8.28	....	....	....
($22.54/$32.67×$18)	....	12.42	....	20.70
Remaining 1966 earnings and profits for future distribution to M Corporation:				
($48 − $25.76)	22.24	....	....	....
($42 − $22.54)	....	19.46	....	41.70
Foreign income tax attributable to 1966 earnings and profits remaining for future distribution to M Corporation:				
($12 − $8.28)	3.72	....	....	....
($18 − $12.42)	....	5.58	....	9.30

Example 4. The facts are the same as in example 3 except that the group does not make a pro rata minimum distribution but distributes $48.30, consisting of $40 distributed by A Corporation and $8.30 distributed by B Corporation. Corporation M complies with the special rules of this paragraph and paragraph (b) of this section. The 1966 foreign income tax of corporations A and B which is deemed paid by M Corporation under section 902(a) for 1966, and the remaining tax which is allocated to earnings and profits to be distributed to M Corporation in future years, are determined as follows, the minimum overall tax burden for 1966 being such as to satisfy the requirement of paragraph (a)(1)(ii)*(b)* of this section:

	A	B	Branch C	Total
Amount received by M Corporation	$40.00	$8.30	....	$48.30
Tax deemed paid by M Corporation for 1966 for purposes of gross-up under section 78 and foreign tax credit:				
($37.33/$37.33×$12)	12.00	....	....	....
($8.30/$32.67×$18)	....	4.57	....	16.57
Remaining 1966 earnings and profits for future distribution to M Corporation:				
($48 − $40)	8.00	....	....	....
($42 − $8.30)	....	33.70	....	41.70

	A	B	Branch C	Total
Foreign income tax attributable to 1966 earnings and profits remaining for future distribution to M Corporation:				
($12 – $12)	0			
($18 – $4.57)		13.43		13.43

(3) *Reduction and deferral of the foreign tax credit*—(i) *In general.* To the extent specified in paragraph (a)(1)(ii)*(b)* of this section a reduction shall be made in the foreign tax credit allowable under section 901 for the taxable year with respect to distributions counting toward a minimum distribution for such year from the chain or group; and such reduction in credit shall be allocated, as provided in subdivision (ii) of this subparagraph, to foreign corporations in such chain or group and deferred, as provided in subdivision (iii) of this subparagraph, to subsequent taxable years of the United States shareholder.

(ii) *Allocation of reduction in foreign tax credit.* The amount of any reduction in foreign tax credit for the taxable year which is made under subdivision (i) of this subparagraph with respect to a minimum distribution for any taxable year from the chain or group shall be allocated among any first-tier and second-tier corporations described in section 902 (a) and (b), respectively, which are in such chain or group. The amount of any such reduction in foreign tax credit shall be allocated among such first-tier and second-tier corporations in the ratio which the United States shareholder's proportionate share of undistributed earnings and profits of each such corporation for the taxable year bears to the total of such shareholder's proportionate shares of the undistributed earnings and profits of all such corporations for such year. None of such reduction shall be allocated to any other corporations in the chain or group or to any foreign branches included under paragraph (f)(4) of § 1.963–1 in the group as wholly owned foreign subsidiary corporations.

(iii) *Deferral of allocated credit—(a) Allowance of credit in subsequent years.* The reduction in foreign tax credit allocated to a first-tier or second-tier corporation in the chain or group for a taxable year under subdivision (ii) of this subparagraph shall be deemed paid under the principles of section 902 (applicable to foreign corporations which are not less developed country corporations) with respect to distributions, to the extent made by such corporation to the United States shareholder referred to in subdivision (ii) of this subparagraph, in a subsequent taxable year from the undistributed earnings and profits of such corporation for such year of allocation. Thus, for example, in the case of a distribution in the subsequent year from such earnings and profits by a first-tier corporation, the tax deemed paid shall be an amount which bears to the total of such reduction in foreign tax credit the same ratio that the distribution to the shareholder in the subsequent year bears to such shareholder's proportionate share of such undistributed earnings and profits for the year of allocation.

(b) Limitations on use of deferred credit. The deferred tax so deemed paid shall be deemed paid for such subsequent taxable year and shall be allowed under section 901 (without regard to the limitations under section 904) as a credit against the income tax imposed for such year by chapter 1 of the Code, but the amount of such credit shall not exceed the excess of the tax so imposed for such year over the credit (determined without regard to this subdivision (iii) allowed under sections 901 through 905 for such year. Any amount by which the deferred tax so deemed paid in such subsequent taxable year exceeds the limitation under the preceding sentence shall not be carried back or carried over under section 904(d) to another taxable year of the United States shareholder. No credit shall be allowed under this subdivision for the subsequent taxable year to the extent that the credit would reduce the tax of the United States shareholder under chapter 1 of the Code on any minimum distribution for such year to which section 963 applies.

(c) Gross-up not applicable. Any amount allowed as a credit for a subsequent taxable year under this subdivision shall not be included in the gross income of the United States shareholder for such year under section 78.

(d) Illustrations. The application of this section may be illustrated by the following examples, in which the surtax exemption provided by section 11(c) is disregarded:

Example 1. (a) For 1966, domestic corporation M makes a chain election with respect to controlled foreign corporation A, which it wholly owns directly, and controlled foreign corporation B, which A Corporation wholly owns directly. Corporation A is not a less developed country corporation under section 902(d). All corporations use the calendar year as the taxable year. For 1966, M Corporation complies with the special rules of paragraphs (b) and (c) of this section. Corporation A has pretax and predistribution earnings and profits for 1966 of $40 and is subject to foreign income tax at a flat rate of 36 percent, with no deduction being allowed for dividends received or paid. B Corporation has pretax and predistribution earnings and profits of $60 for 1966 and is subject to a foreign income tax at a flat rate of 20 percent, with no deduction being allowed for dividends received or paid. For 1967, B Corporation has no earnings and profits, A Corporation has no earnings and profits other than a dividend of $21.22 from B Corporation, and M Corporation has taxable income of $20.98 from United States sources. Corporation M uses the overall limitation under section 904(a)(2) on the foreign tax credit.

(b) If a pro rata minimum distribution were made for 1966, the overall United States and foreign income tax for such year with respect to such distribution would be $41.30, determined as follows:

	A	B	Total
Pretax and predistribution earnings and profits	$40.00	$60.00	$100.00
Foreign income tax:			
(0.36×$40)	14.40	....	....
(0.20×$60)	....	12.00	$26.40
Consolidated earnings and profits	25.60	48.00	73.60
Effective foreign tax rate ($26.40/[$73.60+$26.40])	....	....	26.4%
Statutory percentage under section 963(b)	....	....	69%
Amount distributed as pro rata minimum distribution:			
(0.69×$25.60)	17.66	....	....
(0.69×$48)	....	33.12	$50.78
Amount received by M Corporation as pro rata minimum distribution:			
Corporation's distribution	17.66	....	....
B Corporation's distribution ($33.12 – [0.36× $33.12]), or ($33.12 – $11.92)	....	21.20	38.86
Gross-up under section 78:			
($17.66/$25.60×$14.40)	9.94	....	....
($21.20/$21.20× [$11.92+($33.12/ $48×$12)]), or ($11.92+$8.28)	....	20.20	30.14
Taxable income of M Corporation	....	....	69.00
U.S. tax before foreign tax credit ($69×0.48)	....	....	33.12
Foreign tax credit (as determined under gross-up above)	....	....	30.14
U.S. tax payable	....	....	2.98
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($26.40+$11.92+$2.98)	....	....	41.30

(c) The chain, however, does not make a pro rata distribution for 1966, but distributes $24 from A Corporation's earnings and profits and $26.78 from B Corporation's earnings and profits, the total distribution of $50.78 being equal to the statutory percentage of the consolidated earnings and profits (0.69×$73.60) of the chain with respect to M Corporation. Thus, M Corporation must make such a reduction in its foreign tax credit that the overall United States and foreign income tax for 1966 with respect to the distribution equals the lesser of $41.30 (the overall United States and foreign income tax which would be paid with respect to a pro rata minimum distribution) and $43.20 (90 percent of 48 percent of pretax and predistribution consolidated earnings and profits of $100). The remaining 1956 earnings and profits of the chain are distributed late in 1967. Corporation M determines its tax as follows for such years:

1966

	A	B	Total
Distributions made	$24.00	$26.78	$50.78
Amount received by M Corporation:			
A Corporation's distribution	24.00	....	....
B Corporation's distribution ($26.78 – [0.36× 26.78]), or ($26.78 – $9.64)	....	17.14	41.14

1966

	A	B	Total
Gross-up under section 78:			
($24/$25.60×$14.40)	13.50		
($17.14/$17.14×[$9.64+ ($26.78/$48×$12)]), or ($9.64+$6.70)		16.34	29.84
Taxable income of M Corporation			$70.98
Tentative U.S. tax before foreign tax credit ($70.98×.48)			34.07
Less: Tentative foreign tax credit (as computed under gross-up above)			29.84
Tentative U.S. tax payable			4.23
Tentative overall U.S. and foreign income tax ($26.40+$9.64+$4.23)			40.27
Overall U.S. and foreign tax which would be paid with respect to a pro rata minimum distribution (part (b) of this example)			41.30
Insufficient overall U.S. and foreign income tax ($41.30 – $40.27)			1.03
Reduced foreign tax credit ($29.84 – $1.03)			28.81
U.S. tax payable ($34.07 – $28.81)			5.26
Overall U.S. and foreign income tax ($26.40+$9.64+$5.26)			41.30
Reduction in foreign tax credit to be deferred ($29.84 – $28.81)			1.03
Remaining 1966 earnings and profits of:			
A Corporation ($25.60 – $24)	$1.60		
B Corporation ($48 – $26.78)		$21.22	22.82
Allocation of reduction in foreign tax credit to remaining 1966 earnings and profits of:			
A Corporation ($1.60/22.82×$1.03)	.07		
B Corporation ($21.22/$22.82×$1.03)		.96	1.03
Foreign income tax attributable to remaining 1966 earnings and profits of:			
A Corporation ($1.60/$25.60×$14.40)	.90		
B Corporation ($21.22/$48×$12)		5.30	6.20

1967

Taxable income of M Corporation consisting of distributions from:			
A Corporation's remaining 1966 earnings and profits	1.60		
B Corporation's remaining 1966 earnings and profits ($21.22 – [.36×21.22]), or ($21.22 – $7.64)		13.58	15.18
Gross-up under section 78:			
($1.60/$1.60×$0.90)	.90		
($13.58/$13.58× [$7.64+($21.22/ 21.22×$5.30)])		12.94	13.84
Taxable income from sources without the U.S.			29.02
Taxable income from sources within the U.S.			20.98
Total taxable income of M Corporation			50.00
U.S. tax before foreign tax credit (0.48×$50)			24.00
Foreign tax credit:			
Tax deemed paid under section 902:			
$13.84, but not to exceed section 904 limitation of $13.93 ($29.02/$50×$24) (see gross-up above)			13.84
Tax deemed paid under the principles of section 902:			
($1.60/$1.60×$0.07)	.07		
($21.22/$21.22× 0.96)		.96	1.03
U.S. tax payable ($24 – [$13.84+$1.03])			9.13

Example 2. (a) For 1963, domestic corporation M makes a group election with respect to controlled foreign corporations A and B, both of which M Corporation wholly owns directly. All such corporations use the calendar year as the taxable year. Corporation A is created under the laws of foreign country X, and B Corporation is created under the laws of foreign country Y; neither of such corporations is a less developed country corporation under section 902(d). Corporation M complies with the special rules of paragraphs (b) and (c) of this section. Each foreign corporation has pretax earnings and profits of $100 for 1963. The income of A Corporation is subject to a foreign income tax rate of 20 percent, and the income of B Corporation is subject to a foreign income tax rate of 30 percent. Corporation M uses the per-country limitation under section 904(a)(1) on the foreign tax credit.

(b) If a pro rata minimum distribution were made for 1963, the group would distribute $123 based upon an effective foreign tax rate of 25 percent ($50/[$50+$150]) and a statutory percentage of 82 percent under section 963(b); of this amount $57.40 (0.82×$70) would be distributed from B Corporation's earnings and profits and $65.60 (0.82×$80) would be distributed from A Corporation's earnings and profits. In such case, the overall United States and foreign income tax for 1963 with respect to the pro rata minimum distribution would be determined as follows, using the 52 percent United States corporate income tax rate applicable for such year:

Taxable income of M Corporation from sources in—		
Y Country:		
B Corporation dividend	$57.40	
Gross-up under section 78 ($57.40/$70×$30)	24.60	$82.00
X Country:		
A Corporation dividend	65.60	
Gross-up under section 78 ($65.60/$80×$20)	16.40	82.00
Taxable income		164.00
U.S. tax before tax credit (0.52×$164)		85.28
Foreign tax credit:		
Y Country tax	24.60	
X Country tax	16.40	41.00
U.S. tax payable		44.28
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($44.28+ $50)		94.28

(c) The group, however, does not make a pro rata minimum distribution for 1963 but distributes $123, consisting of $70 from B Corporation's earnings and profits and $53 from A Corporation's earnings and profits. Thus, M Corporation must make such a reduction in its foreign tax credit that the overall United States and foreign income tax for 1963 with respect to the distribution equals the lesser of $94.28 (the overall United States and foreign income tax which would be paid with respect to a pro rata minimum distribution) and $93.60 (90 percent of 52 percent of pretax and predistribution consolidated earnings and profits of $200). The remaining 1963 earnings and profits of the group are distributed late in 1964. Neither A Corporation nor B Corporation has earnings and profits for 1964. Corporation M determines its tax as follows for such years, assuming a 52 percent (instead of 50 percent) United States corporate income tax rate for 1964:

1963

Taxable income of M Corporation from sources in—		
Y Country:		
B Corporation dividend	$70.00	
Gross-up under section 78 ($70/$70×$30)	30.00	$100.00
X Country:		
A Corporation dividend	53.00	
Gross-up under section 78 ($53/$80×$20)	13.25	66.25
Taxable income for 1963		166.25
U.S. tax before foreign tax credit (0.52×$166.25)		86.45
Less: Tentative foreign tax credit:		
Y Country tax ($30.00 but not to exceed ($100.00/$166.25×$86.45))	30.00	
X Country tax ($13.25 but not to exceed ($66.25/$166.25×$86.45))	13.24	43.25
Tentative U.S. tax payable		43.20
Tentative overall U.S. and foreign income tax ($50+$43.20)		93.60
Insufficient overall U.S. and foreign income tax ($93.60−$93.20)		.40
Reduced foreign tax credit ($43.25−$0.40)		42.85
U.S. tax payable for 1963 ($86.45−$42.85)		43.00
Overall U.S. and foreign income tax ($50+$43.60)		93.60
Reduction in foreign tax credit to be deferred ($43.25−$42.85)		.40
Remaining 1963 earnings and profits of:		
A Corporation ($80−$53)	27.00	
B Corporation ($70−$70)	0	27.00
Allocation of reduction in foreign tax credit to remaining 1963 earnings and profits of A Corporation ($27/$27× $0.40)		.40
Foreign income tax attributable to remaining 1963 earnings and profits of:		
A Corporation ($20−$13.25)	6.75	
B Corporation ($30−$30)	0	6.75

1964

Taxable income of M Corporation from sources in X Country:		
A Corporation dividend		27.00
Gross-up under section 78 ($27/$27× $6.75)		6.75
Taxable income for 1964		33.75
U.S. tax before foreign tax credit ($33.75×0.52)		17.55
Less: Foreign tax credit:		
Tax deemed paid under section 902 (as computed under gross-up, but not to exceed $33.75/$33.75 × $17.55)	6.75	
Tax deemed paid under the principles of section 902 ($27/$27×$0.40)	.40	7.15
U.S. tax payable for 1964		10.40

Example 3. (a) For 1966, domestic corporation M makes a chain election with respect to controlled foreign corporation A, which it wholly owns directly, and controlled foreign corporation B, which A Corporation wholly owns directly. Corporation A is a less developed country corporation under section 902(d). All corporations use the calendar year as the taxable year. For 1966, each of the foreign corporations has pretax and predistribution earnings and profits of $100. The income of A Corporation is subject to a

foreign income tax rate of 20 percent, with no deduction being allowed for dividends received or paid; and the income of B Corporation is subject to a foreign income tax rate of 30 percent on such basis. During 1966, B Corporation distributes $50 to A Corporation, and A Corporation distributes $104 to M Corporation. During 1967 the remaining 1966 earnings and profits of such corporations are distributed to M Corporation.

(b) If M Corporation were not to comply with the special rules of paragraphs (b) and (c) of this section and were to deduct foreign income tax on intercorporate distributions under paragraph (d)(1)(iii) of § 1.963–2, the chain would not be considered to make a minimum distribution for 1966 because, although it makes a distribution which is sufficient in amount to constitute a minimum distribution, the overall United States and foreign income tax for such year with respect to such distribution would be insufficient under paragraph (a)(1)(i) of this section. The determination that M Corporation would not be entitled to the section 963 exclusion for 1966 by reason of such distribution in such circumstances is made as follows:

	A	B	Total
Pretax earnings and profits	$150	$100	....
Reduction for intercorporate dividends	50	....	....
Pretax and predistribution earnings and profits	100	100	$200.00
Reduction for foreign income tax on such pretax and predistribution earnings and profits	20	30	50.00
Predistribution earnings and profits	80	70	150.00
Reduction for foreign income tax on intercorporate distributions of 1966 earnings and profits ($50×0.20)	10	....	10.00
Consolidated earnings and profits of the chain	70	70	140.00
Consolidated foreign income taxes ($30+$20+$10)	....	....	60.00
Effective foreign tax rate ($60/[$140+$60])	....	....	30%
Statutory percentage under section 963(b)	....	....	69%
Amount of a minimum distribution ($140×0.69)	....	....	96.60
Overall United States and foreign income tax required to be paid (part (a)(1)(i) of this section) (0.90× [0.22+0.26]×$200)	....	....	86.40
Tentative taxable income of M Corporation	....	....	$104.00
Tentative U.S. tax before foreign tax credit (0.48×$104)	....	....	49.92
Tentative foreign tax credit ($104/ $120×[($120/ $150×$30)+($50/ $100×$30)] or ($104/$120×$39)	....	....	33.80
Tentative U.S. tax payable ($49.92 − $33.80)	....	....	16.12
Overall U.S. and foreign income tax ($60+$16.12)	....	....	76.12
Insufficient overall U.S. and foreign income tax ($86.40 − $76.12)	....	....	10.28

(c) By complying with the special rules of paragraphs (b) and (c) of this section, however, M Corporation will receive a minimum distribution for 1966 if it receives the statutory percentage of consolidated earnings and profits and if the overall United States and foreign income tax with respect to the distribution which is made is at least the lesser of $86.40 (0.90×0.48×$200) and of the overall United States and foreign income tax which would be paid with respect to a pro rata minimum distribution from the chain. If a pro rata minimum distribution were made for 1966, the chain would be required to distribute earnings and profits of $114, based upon an effective foreign tax rate of 25 percent ($50/[$50+$150]) and a statutory percentage of 76 percent under section 963(b); of this amount $53.20 (0.76×$70) would be distributed from B Corporation's earnings and profits and $60.80 (0.76×$80) would be distributed from A Corporation's earnings and profits. The overall United States and foreign income tax with respect to such a pro rata minimum distribution would be $73.62, determined as follows:

Taxable income of M Corporation ($60.80+[$53.20 − ($53.20×0.20)])	....	$103.36
U.S. tax before foreign tax credit (0.48 ×$103.36)	....	49.61
Foreign tax credit:		
B Corporation's distribution ($53.20/[$70+$30]×$30)+ ($42.56+ $10.64]×$10.64)	$24.47	....
A Corporation's distribution ($60.80/[$80+20]×$20)	12.16	36.63
U.S. tax payable	....	12.98
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($50+ $10.64+$12.98)	....	73.62

(d) The United States income tax of M Corporation for 1966 and 1967 is determined as follows, assuming that the minimum overall tax burden is determined under paragraph (a)(1)(ii)(b) of this section:

1966

Dividend from earnings and profits of—		
B Corporation ($50 minus tax of $10 on A Corporation at the rate of 20 percent)	....	$40.00
A Corporation	....	64.00
Taxable income of M Corporation	....	104.00
U.S. tax before foreign tax credit (0.48×$104)	....	$49.92

1966

Less: Foreign tax credit:		
B Corporation's distribution ($50/[$70+$30]×$30+($40/[$40+$10]×$10), or ($15+$8)	$23.00	
A Corporation's distribution ($64/$80+$20]×$20)	12.80	35.80
U.S. tax payable		$14.12
Overall U.S. and foreign income tax with respect to actual distribution ($50+$10+$14.12)		74.12
Overall U.S. and foreign income tax that would be paid with respect to a pro rata minimum distribution (part (c) of this example)		73.62
Remaining 1966 earnings and profits for future distribution by:		
B Corporation ($70 − $50)		20.00
A Corporation ($80 − $64)		16.00
Total		36.00
Foreign income tax attributable to remaining 1966 earnings and profits of:		
B Corporation ($20/$70×$30)		8.57
A Corporation ($16/$80×$20)		4.00

1967

Dividend from remaining 1966 earnings and profits of—		
B Corporation ($20 minus tax of $4 on A Corporation at the rate of 20 percent)		16.00
A Corporation		16.00
Taxable income of M Corporation		32.00
U.S. tax before foreign tax credit (0.48×$32)		15.36
Less: Foreign tax credit:		
B Corporation's distribution ($20/[$20+$8.57]×$8.57)+($16/[$16+$4] ×$4), or ($6+$3.20)	$9.20	
A Corporation's distribution ($16/[$16+$4]×$4)	3.20	12.40
U.S. tax payable		2.96

Example 4. (a) Domestic corporation M directly owns 90 percent of the one class of stock of controlled foreign corporation A, which directly owns 80 percent of the one class of stock of controlled foreign corporation B, which in turn directly owns 60 percent of the one class of stock of controlled foreign corporation C. None of the foreign corporations are less developed country corporations under section 902(d); all corporations use the calendar year as the taxable year. For 1963, M Corporation makes a chain election with respect to corporations A, B, and C and receives a distribution from the consolidated earnings and profits of the chain which does not constitute a pro rata minimum distribution. The remaining 1963 consolidated earnings and profits of the chain are distributed late in 1964, for which year it is assumed that the United States corporate income tax rate is the same (52 percent) as for 1963. No corporation in the chain has earnings and profits for 1964 other than from distributions received from remaining 1963 earnings and profits of another corporation in the chain. The foreign country under the laws of which A Corporation is created does not tax dividends which are received by such corporation from B Corporation, but B Corporation is taxed on dividends received from C Corporation. Corporation M complies with the special rules of paragraphs (b) and (c) of this section and determines the minimum overall tax burden under paragraph (a)(1)(ii)(b) of this section with respect to the distribution which is made. Corporation M uses the overall limitation under section 904(a)(2) on the foreign tax credit. The distribution received by M Corporation for 1963 from the consolidated earnings and profits of the chain is sufficient in amount to constitute a minimum distribution. The overall United States and foreign income tax for 1963 with respect to the distribution which is made must be at least equal to the lesser of $32.21 (the amount payable, as determined under paragraph (b) of this example, with respect to a pro rata minimum distribution) and $31.34 (90 percent of 52 percent of pretax and predistribution consolidated earnings and profits of $66.96).

(b) If the chain were to make a pro rata minimum distribution, the distributions and the overall United States and foreign income tax for 1963 with respect to the minimum distribution would be determined as follows, based upon the facts assumed:

	A	B	C	Total
Pretax and predistribution earnings and profits	$20.00	$50.00	$30.00	
Reduction for foreign income tax on such earnings and profits (10%, 40%, and 10%, respectively)	2.00	20.00	3.00	
Predistribution earnings and profits	18.00	30.00	27.00	
Consolidated earnings and profits with respect to M Corporation:				
(0.90×$18)	16.20			
(0.90×0.80×$30) or (0.72×$30)		21.60		
(0.90×0.80×0.60×$27) or (0.432×$27)			11.66	$49.46
Consolidated foreign income taxes with respect to M Corporation:				
($16.20/$18×$2)	1.80			
($21.60/$30×$20)		14.40		
($11.66/$27×$3)			1.30	17.50

	A	B	C	Total
Effective foreign tax rate of the chain for 1963 ($17.50/[$49.46+$17.50]), or ($17.50/ $66.96)				26.14%
Statutory percentage under section 963(b)				82%
Pro rata minimum distribution (before reduction of dividend from C Corporation's share by B Corporation tax paid on such amount):				
(0.82×$16.20)	13.28			
(0.82×$21.60)		17.71		
(0.82×$11.66)			9.56	
(0.82×$49.46)				40.56
Such amounts as reduced by further foreign income tax imposed on distributions through the chain:				
No further foreign tax	13.28			
No further foreign tax		17.71		
B Corporation tax ($9.56 − [0.40×$9.56]), or ($9.56 − $3.82)			5.74	36.73
Gross-up under section 78:				
($13.28/$16.20×$1.80)	1.48			
($17.71/$21.60×$14.40)		11.81		
($5.74/$5.74×$3.82)		3.82		17.11
M Corporation's taxable income for 1963 attributable to minimum distribution ($36.73+$17.11)				53.84
U.S. tax before foreign tax credit ($53.84×0.52)				28.00
Foreign tax credit (as determined under gross-up above)				17.11
U.S. tax payable for 1963 ($28 − $17.11)				10.89
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($17.50+$3.82+$10.89)				32.21

(c) Based upon the distributions which are made by corporations A, B, and C, M. Corporation pays United States tax as follows for 1963 and 1964:

1963

	A	B	C	Total
Distribution made from consolidated earnings and profits of the chain	$9.36	$21.60	$9.60	$40.56
Excess of distribution over statutory percentage of consolidated earnings and profits for 1963 ($40.56 − [0.82×$49.46])				None
Determination of whether the overall U.S. and foreign income tax with respect to the actual distribution is equal to, or exceeds, the lesser of $32.21 (paragraph (b) of example) and $31.34 (paragraph (a) of example):				
Amount received by M Corporation after reduction by further foreign income tax imposed on distributions through the chain:				
No further foreign tax	9.36			
No further foreign tax		21.60		
B Corporation tax ($9.60 − [0.40×$9.60]), or ($9.60 − $3.84)			5.76	36.72
Gross-up under section 78:				
($9.36/$16.20×$1.80)	1.04			
($21.60/$21.60×$14.40)		14.40		
($5.76/$5.76×$3.84)		3.84		19.28
Taxable income of M Corporation for 1963 attributable to actual distribution ($36.72+$19.28)				56.00
U.S. tax before foreign tax credit ($56×0.52)				29.12
Tentative foreign tax credit (as determined under gross-up above)				19.28
Tentative U.S. tax payable ($29.12 − $19.28)				9.84
Overall U.S. and foreign income tax with respect to actual distribution ($17.50+ $3.84+$9.84)				31.18
Insufficient overall U.S. and foreign income tax ($31.34 [i.e., 0.90×0.52×$66.96] − 31,18)				.16
Reduced foreign tax credit ($19.28 − $0.16)				19.12
U.S. tax payable for 1963 ($29.12 − $19.12)				10.00
Overall U.S. and foreign income tax with respect to actual distribution ($17.50+$3.84+$10)				31.34
Allocation of reduction in foreign tax credit to undistributed consolidated 1963 earnings and profits of A and B Corporations to be deemed paid by M Corporation in future years:				
Reduction in foreign tax credit ($19.28 − $19.12)				.16
Undistributed 1963 consolidated earnings and profits of the chain:				
($16.20 − $9.36)	6.84			
($21.60 − $21.00)		0		
($11.66 − $9.60)			$2.06	8.90
Allocation of reduction in credit:				
($6.84/$6.84×$0.16)	.16			.16

1963

	A	B	C	Total
Foreign income tax attributable to undistributed 1963 earnings and profits of the chain to be taken into account in determining tax deemed paid under section 902:				
($1.80 – $1.04)	.76			
($14.40 – $14.40)				.7
1964				
Distribution from remaining 1963 consolidated earnings and profits of the chain:				
($16.20 – $9.36)	6.84			
($21.60 – $21.60)		0		
($11.66 – $9.60)			2.06	8.90
Such amounts as reduced by further foreign income tax imposed on distributions through the chain:				
No further foreign tax	6.84			
B Corporation tax ($2.06 – [0.40×$2.06]), or ($2.06 – $0.82)		1.24		8.08
Gross-up under section 78:				
($6.84/$6.84×$0.76)	0.76			
($1.24/$1.24×$0.82)		0.82		1.58
Taxable income of M Corporation for 1964 attributable to 1964 distribution ($8.08+$1.58)				9.66
U.S. tax before foreign tax credit ($9.66×0.52)				5.02
Foreign tax credit:				
Deferred credit in accordance with principles of section 902 ($6.84/$6.84×$0.16)	0.16			0.16
Tax deemed paid under section 902 (computed under gross-up above)				1.58
U.S. tax payable for 1964 ($5.02 – [$0.16+$1.58])				3.28

Example 5. (a) Domestic corporation M directly owns all the one class of stock of each of controlled foreign corporations A, B, C, and D. All such corporations use the calendar year as the taxable year. None of the foreign corporations is a less developed country corporation under section 902(d). For 1963, M Corporation makes a group election with respect to corporations A, B, C, and D and receives from the 1963 consolidated earnings and profits of the group a distribution which is not a pro rata minimum distribution. None of the foreign corporations has earnings and profits for 1964, but the remaining 1963 earnings and profits of the group are distributed late in 1964, for which year it is assumed that the United States corporate income tax rate is the same (52 percent) as for 1963. The overall limitation under section 904(a)(2) on the foreign tax credit applies for both years.

(b) Assume that M Corporation does not comply with the special rules of paragraphs (b) and (c) of this section and that for 1963 it draws a distribution of all of B Corporation's earnings and profits and enough of C Corporation's earnings and profits to receive the amount of a minimum distribution and to assure that the overall United States and foreign income tax for such year with respect to the distribution from the group satisfies the overall minimum tax requirement of paragraph (a)(1)(i) of this section. In such case, the overall United States and foreign income tax for 1963 with respect to the distribution which is made, determined by using the foreign tax credit under section 901 without applying the special credit rules of paragraph (c) of this section, must at least equal $37.44 (90 percent of 52 percent of pretax and predistribution consolidated earnings and profits of $80). Corporation M's United States income tax for 1963 and 1964 with respect to the distribution of the 1963 earnings and profits of the group is determined as follows, based upon the facts assumed:

1963

	A	B	C	D	Total
Pretax and predistribution earnings and profits (and deficits) of the group	$25.00	$25.00	$50.00	($20.00)	$80.00
Consolidated foreign income taxes	2.50	12.50	15.00		30.00
Consolidated earnings and profits	22.50	12.50	35.00	(20.00)	50.00
Effective foreign tax rate ($30/[$50+$30])					37.5%
Statutory percentage under section 963(b)					68%
Amount of a minimum distribution (0.68×$50)					34.00
Tentative distribution		12.50	21.50		34.00

1963

	A	B	C	D	Total
Tentative gross-up under section 78:					
($12.50/$12.50×$12.50)		12.50			
($21.50/$35×$15)			9.21		21.71
Tentative taxable income of M Corporation ($34+$21.71)					55.71
Tentative U.S. tax before foreign tax credit (0.52×$55.71)					28.97
Tentative foreign tax credit (as computed under gross-up above)					21.71
Tentative U.S. tax payable ($28.97 – $21.71)					7.26
Tentative overall U.S. and foreign income tax ($30+$7.26)					37.26
Minimum overall U.S. and foreign income tax required to be paid (0.90× .52×$80)					37.44
Insufficient overall U.S. and foreign income tax ($37.44 – $37.26)					.18
Revised distribution		12.50	22.07		34.57
Gross-up under section 78:					
($12.50/$12.50×$12.50)		12.50			
($22.07/$35×$15)			9.46		21.96
Taxable income of M Corporation ($34.57+$21.96)					56.53
U.S. tax before foreign tax credit (.52×$56.53)					29.40
Foreign tax credit (as computed under gross-up above)					21.96
U.S. tax payable ($29.40 – $21.96)					7.44
Overall U.S. and foreign income tax on actual distribution ($30+$7.44)					37.44

1964

Distribution of remaining 1963 consolidated earnings and profits:					
($22.50 – $0)	22.50				
($12.50 – $12.50)					
($35 – $22.07)			12.93		35.43
Gross-up under section 78:					
($22.50/$22.50×$2.50)	2.50				
($12.93/$35×$15)			5.54		8.04
Taxable income of M Corporation ($35.43+$8.04)					43.47
U.S. tax before foreign tax credit ($43.47×0.52)					22.60
Foreign tax credit (as computed under gross-up above)					8.04
U.S. tax payable ($22.60 – $8.04)					14.56

(c) Assume that M Corporation does comply with the special rules of paragraphs (b) and (c) of this section and for 1963 receives a minimum distribution consisting of $20 from A Corporation and $14 from C Corporation. In such case, the overall United States and foreign income tax for 1963 with respect to the minimum distribution must at least equal the lesser of $37.44 (0.90 × 0.52 × $80) and the overall United States and foreign income tax of $37.89 that would be paid with respect to a pro rata minimum distribution from the group for such year. In such case, the determinations would be made pursuant to subparagraphs (1) and (2) of this paragraph.

(1) If a pro rata minimum distribution were made for 1963 by the group, the overall United States and foreign income tax for such year with respect to such distribution would be $37.89, determined as follows:

	A	B	C	D	Total
Pretax and predistribution earnings and profits (and deficits) of the group	$25.00	$25.00	$50.00	($20)	$80.00
Consolidated foreign income taxes	2.50	12.50	15.00		30.00
Consolidated earnings and profits before allocation of deficits	22.50	12.50	35.00		70.00
Allocation of deficit of D Corporation:					
($22.50/$70×$20)	(6.43)				
($12.50/$70×$20)		(3.57)			
($35/$70×$20)			(10.00)		(20.00)
Consolidated earnings and profits	16.07	8.93	25.00		50.00
Effective foreign tax rate ($30/$80)					37.50%
Statutory percentage under section 963(b)					68%
Pro rata minimum distribution:					
(0.68×$16.07)	10.93				
(0.68×$8.93)		6.07			
(0.68×$25)			17.00		34.00
Gross-up under section 78:					
($10.93/$16.07×$2.50)	1.70				
($6.07/$8.93×$12.50)		8.50			

	A	B	C	D	Total
($17/$25×$15)			10.20		20.40
Taxable income of M Corporation ($34+$20.40)					54.40
U.S. tax before foreign tax credit (0.52×$54.40)					28.29
Foreign tax credit (as computed under the gross-up above)					20.40
U.S. tax payable ($28.29 − $20.40)					7.89
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($30+$7.89)					37.89

(2) Corporation M's United States income tax for 1963 and 1964 with respect to the distribution of the 1963 earnings and profits of the group is determined as follows:

1963

	A	B	C	D	Total
Distributions actually made	$20.00		$14.00		$34.00
Gross-up under section 78:					
($16.07/$16.07×$2.50)	2.50				
($14/$25×$15)			8.40		10.90
Taxable income of M Corporation ($34+$10.90)					44.90
U.S. tax before foreign tax credit (0.52×$44.90)					23.35
Foreign tax credit (as computed under gross-up above)					10.90
U.S. tax payable ($23.35 − $10.90)					12.45
Overall U.S. and foreign income tax with respect to the distribution actually made ($30+$12.45), such amount being in excess of the minimum overall tax burden of $37.44					42.45

1964

Earnings and profits for 1963 to which minimum distribution for such year was not attributable:					
($22.50 − $20)	$2.50				
($12.50 − $0)		$12.50			
($35.00 − $14)			$21.00		$36.00
Foreign income tax for 1963 not taken into account in determining tax deemed paid for such year on pretax earnings and profits to which the minimum distribution for such year was attributable:					
([$16.07 − $16.07]/$16.07×$2.50)	0				
([$8.93 − $0]/$8.93×$12.50)		12.50			
([$25 − $14]/$25×$15)			6.60		19.10
Distributions to M Corporation in 1964	2.50	12.50	21.00		36.00
Gross-up under section 78:					
($2.50/$2.50×$0)	0				
($12.50/$12.50×$12.50)		12.50			
($21/$21×$6.60)			6.60		19.10
Taxable income of M Corporation ($36+$19.10)					55.10
U.S. tax before foreign tax credit (0.52×$55.10)					28.65
Foreign tax credit (as computed under gross-up above)					19.10
U.S. tax payable ($28.65 − $19.10)					9.55

Example 6. Throughout 1963, domestic corporation M directly owns all the one class of stock of controlled foreign corporations A, B, and C, and maintains in a foreign country a branch which qualifies under paragraph (f)(4) of §1.963–1 for inclusion in a group as a wholly owned foreign subsidiary corporation. For 1963, a year for which the overall limitation under section 904(a)(2) on the foreign tax credit applies, M Corporation makes a group election with respect to A, B, and C Corporations and the foreign branch. All such corporations use the calendar year as the taxable year. The foreign branch has pretax and predistribution earnings and profits of $40 for 1963, as determined under paragraph (f)(4)(ii) of §1.963–1. None of the foreign corporations is a less developed country corporation under section 902(d). Corporation M complies with the special rules of paragraphs (b) and (c) of this section. The United States income tax of M Corporation for 1963 is as follows, based upon the facts assumed:

	A	B	C	Branch	Total
Pretax and predistribution consolidated earnings and profits of the group	$20.00	$30.00	$10	$40	$100.00
Consolidated income taxes	2.00	15.00	5	20	42.00
Effective foreign tax rate ($42/$100)					42%
Statutory percentage under section 963(b)					40%
Posttax and predistribution consolidated earnings and profits of the group	18.00	15.00	5	20	58.00
U.S. tax which would be paid on a pro rata minimum distribution from consolidated earnings and profits of the group:					
Pro rata minimum distribution (and amount which would be received by M Corporation):					
(0.40×$18)	7.20				
(0.40×$15)		6.00			
(0.40×$5)			2		
(0.40×$40)				16	31.20
Gross-up under section 78:					
($7.20/$18×$2)	.80				
($6/$15×$15)		6.00			
($2/$5×$5)			2		8.80
Taxable income of M Corporation ($31.20+$8.80)					40.00
U.S. tax before foreign tax credit (0.52×$40)					20.80
Foreign tax credit ($8.80, as computed under the gross-up, plus 40 percent of $20)					16.80
U.S. tax payable ($20.80 − $16.80)					4.00
Overall U.S. and foreign income tax with respect to a pro rata minimum distribution for 1963 ($4+$42)					46.00
Tentative tax on distribution actually received by M Corporation:					
Actual distribution received			$5	$40	$45.00
Gross-up under section 78 ($5/$5×$5)			5		5.00
Taxable income of M Corporation ($45+$5)					50.00
U.S. tax before foreign tax credit (0.52×$50)					26.00
Tentative foreign tax credit ($5, as computed under the gross-up above, plus 100 percent of $20)					25.00
Tentative U.S. tax payable ($26 − $25)					1.00
Insufficient overall U.S. and foreign income tax (the lesser of $46 or $46.80 [0.90×0.52×$100] minus $43 [$1+$42])					3.00
Reduced foreign tax credit ($25 − $3)					22.00
U.S. tax payable ($26 − $22)					4.00
Overall U.S. and foreign income tax with respect to actual distribution for 1963 ($4+$42)					46.00
Reduction in foreign tax credit for 1963 ($25 − $22)					3.00
Allocation of reduction in foreign tax credit to undistributed 1963 consolidated earnings and profits of the group:					
($18/[$18+$15]×$3.00)	1.64				
($15/[$18+$15]×$3.00)		1.36			3.00

Example 7. Domestic group M, an affiliated group of domestic corporations filing a consolidated return under section 1501, makes a group election for 1963 with respect to a group consisting of two controlled foreign corporations C and D, all of whose one class of stock is directly owned by group M, and foreign branch B, a foreign branch of a Western Hemisphere trade corporation (as defined in section 921) included in group M. No distributions are received for the taxable year from corporations C and D, but the foreign group makes a minimum distribution by reason of the deemed distribution of all of branch B's earnings and profits. Group M complies with the special rules of paragraphs (b) and (c) of this section. For 1963, a year for which the United States corporate income tax rate is 52 percent, the overall limitation under section 904(a)(2) on the foreign tax credit applies. All corporations use the calendar year as the taxable year. None of the foreign corporations is a less developed country corporation under section 902(d) for 1963. The income, and the United States and foreign income tax for 1963, are determined as follows, based upon the facts assumed:

	Branch	C	D	Total
Pretax and predistribution consolidated earnings and profits of the foreign group (before Western Hemisphere trade corporation deduction)	$100.00	$10.00	$10.00	$120.00
Western Hemisphere trade corporation deduction ($100×0.14/0.52)	26.92			26.92
Pretax and predistribution consolidated earnings and profits of the foreign group (after Western Hemisphere trade corporation deduction)	73.08	10.00	10.00	93.08

	Branch	C	D	Total
Consolidated foreign income taxes (38%, 20%, and zero rate, respectively):				
(0.38×$100)	38.00			
(0.20×$10)		2.00		40.00
Consolidated earnings and profits of the foreign group	35.08	8.00	10.00	53.08
Effective foreign tax rate ($40/$93.08)				43%
Statutory percentage under section 963(b)				40%
Tax which would be paid with respect to a pro rata minimum distribution from consolidated earnings and profits of the foreign group:				
Pro rata minimum distribution:				
(0.40×$73.08)	29.23			
(0.40×$8.00)		3.20		
(0.40×$10.00)			4.00	36.43
Gross-up under section 78: ($3.20/$8.00×$2)		.80		.80
Taxable income of group M	29.23	4.00	4.00	37.23
U.S. tax before foreign tax credit:				
(0.52×$29.23)	15.20			
(0.54×$4.00)		2.16		
(0.54×$4.00)			2.16	19.52
Foreign tax credit ($0.80, as computed under the gross-up above, plus 40 percent of $38)	15.20	.80		16.00
U.S. tax payable		1.36	2.16	3.52
Overall U.S. and foreign income tax with respect to pro rata minimum distribution ($3.52+$40)				43.52
Tentative tax on distribution actually received by group M:				
Taxable income of branch	73.08			73.08
U.S. tax before foreign tax credit (0.52×$73.08)	38.00			38.00
Tentative foreign tax credit	38.00			38.00
Tentative U.S. tax payable				0
Insufficient overall U.S. and foreign income tax (the lesser of $43.52 or $43.56 [0.90×0.52×$93.08] minus $40)				3.52
Reduced foreign tax credit ($38 − $3.52)				34.48
U.S. tax payable ($38 − $34.48)				3.52
Overall U.S. and foreign income tax ($3.52+$40.00)				43.52
Reduction in foreign tax credit for 1963 ($38 − $34.48)				3.52
Allocation of reduction in foreign tax credit to 1963 undistributed consolidated earnings and profits of the foreign group:				
($8/[$8+$10]×$3.52)		1.56		
($10/[$8+$10]×$3.52)			1.96	3.52

[T.D. 6759, 29 FR 13335, Sept. 25, 1964; 29 FR 13896, Oct. 8, 1964, as amended by T.D. 6767, 29 FR 14878, Nov. 3, 1964; T.D. 7100, 36 FR 5336, Mar. 20, 1971]

§1.963–5 Foreign corporations with variation in foreign tax rate because of distributions.

(a) *Limited application of section.* The rules of this section shall apply to a foreign corporation only if—

(1) Under the laws of a foreign country or possession of the United States the foreign income tax of the corporation for the taxable year depends upon the extent to which distributions are made by such corporation from its earnings and profits for the taxable year, so that the rate of such tax for the taxable year on income which is distributed differs from the rate of such tax for such year on the income which is not distributed, and

(2) The corporation—

(i) Is a single first-tier corporation, or

(ii) Is for the taxable year in a chain or group from which the United States shareholder receives a minimum distribution in respect of which the minimum overall tax burden is determined in accordance with paragraph (a)(1)(ii) of §1.963–4.

(b) *Foreign income tax determined as though no distributions were made.* The foreign income tax on the pretax and predistribution earnings and profits of the foreign corporation for the taxable year shall (solely for the purpose of determining the effective foreign tax rate under paragraph (c) of §1.963–2) be determined as if the foreign corporation made no distributions for the taxable year. However, notwithstanding the second sentence of paragraph (d)(1) of §1.963–2, where the United States shareholder owns the stock (with respect to which the election under section 963 is made) in such corporation by reason of stock owned through a chain of ownership described in section 958(a) and the foreign income tax of such corporation for the taxable year decreases as distributions are made from its earnings and profits, the rule in the preceding sentence shall not apply if the electing United States shareholder does not actually receive for the taxable year its proportionate share of the earnings and profits which are actually distributed. In such case, the foreign income tax on pretax and predistribution earnings and profits shall be the actual foreign income tax of such corporation, computed on the basis of the distributions which are made. For example, assume that a second-tier foreign corporation in a chain has pretax and predistribution earnings of $100 for the taxable year and that foreign law imposes on such corporation a foreign income tax of 50 percent of the pretax earnings and profits minus dividends for such year and of 20 percent of such dividends. If the second-tier foreign corporation distributes $20 of earnings and profits to a first-tier foreign corporation which is part of the same chain, and if the first-tier corporation retains the dividend so received, the foreign income tax of the second-tier foreign corporation shall be considered to be the tax actually paid for the taxable year, that is, $44 (50 percent of $80 plus 20 percent of $20). If the first-tier foreign corporation distributes the dividend so received, the foreign income tax of the second-tier foreign corporation shall be considered to be $50 (50 percent of $100). For purposes of this paragraph, the principles of paragraph (b)(3) of §1.963–4 shall apply.

(c) *Minimum distribution*—(1) *Single first-tier corporation.* A minimum distribution for a taxable year by a single first-tier corporation described in paragraph (a)(1) of this section shall be a distribution which is equal to—

(i) The amount resulting from the multiplication of the statutory percentage specified in paragraph (b) of §1.963–2 for such year by the United States shareholder's proportionate share of the earnings and profits of such corporation, as determined under paragraph (d)(2)(i) of §1.963–2 but without the deduction for foreign income tax provided by paragraph (d)(1)(ii) and (iii) of such section, reduced by

(ii) The foreign income tax on the pretax amount determined under subdivision (i) of this subparagraph which would be paid or accrued by such corporation by reason of distributing such amount, less such tax, for such taxable year.

(2) *Corporation in a chain or group making a pro rata minimum distribution.* In case of a corporation described in paragraph (a)(2)(ii) of this section in a chain or group, such corporation's share of a pro rata minimum distribution by the chain or group for the taxable year shall be—

(i) The amount resulting from the multiplication of the statutory percentage specified in paragraph (b) of §1.963–2 for the taxable year by the United States shareholder's proportionate share of the earnings and profits of such corporation, as determined under paragraph (d)(3) of §1.963–2 but without the deduction for foreign income tax provided by paragraph (d)(1)(ii) and (iii) of such section, reduced by

(ii) The foreign income tax on the pretax amount determined under subdivision (i) of this subparagraph which would be paid or accrued by such corporation by reason of distributing such amount, less such tax, for such taxable year.

(3) *A chain or group making a distribution other than a pro rata minimum distribution.* If a chain or group contains one or more foreign corporations described in paragraph (a)(2)(ii) of this section and such chain or group makes a minimum distribution other than a pro rata minimum distribution for the taxable year, the amount of such minimum distribution to the electing United States shareholder shall be at least—

(i) The amount resulting from the multiplication of the statutory percentage specified in paragraph (b) of §1.963–2 for the taxable year by the consolidated earnings and profits of such chain or group with respect to such shareholder, as determined under paragraph (d)(3) of such section but without any deduction for foreign income tax provided by paragraph (d)(1)(ii) and (iii) of such section, reduced by

(ii) The foreign income tax on the pretax amount determined under subdivision (i) of this subparagraph which would be paid or accrued by the foreign corporations in the chain or group by reason of distributing such amount, less such tax, for such taxable year.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns 80 percent of the one class of stock of single first-tier corporation B, which for 1964 has $100 of pretax earnings and profits on which is imposed a foreign income tax of 40 percent of pretax earnings and profits minus dividends for the taxable year and of 20 percent of the amount of such dividends. Both corporations use the calendar year as the taxable year. The effective foreign tax rate applicable to B Corporation, as determined under paragraph (c) of §1.963–2, is 40 percent, and the statutory percentage under paragraph (b) of §1.963–2 for 1964 is 38 percent. Corporation M receives a minimum distribution for 1964 if it receives from B Corporation's earnings and profits for such year $22.80, that is, 80 percent of $28.50, the distribution which would be made if there were distributed that amount of earnings and profits which, together with the foreign income tax at the rate effectively applicable to pretax earnings and profits to which such distribution is attributable, equals 38 percent of $100. Such distribution may be determined by solving for ‘‘d’’ in the following formula:

$$\begin{array}{rl} & d=\$38-0.20d-0.40(\$38-d) \\ & d=\$38-0.20d-\$15.20+0.40d \\ & d=\$22.80+0.20d \\ 0.80 & d=\$22.80 \\ & d=\$22.80/0.80 \\ & d=\$28.50 \end{array}$$

Example 2. Domestic corporation M directly owns 80 percent of the one class of stock of each of controlled foreign corporations A and B, which constitute a group and each of which for 1964 has pretax earnings and profits of $100. All corporations use the calendar year as the taxable year. Corporation A is subject to foreign income tax at a flat rate of 40 percent; and B Corporation is subject to a foreign income tax of 40 percent of $100 minus dividends for the taxable year and of 20 percent of the amount of such dividends. The effective foreign tax rate with respect to the group, as determined under paragraph (c) of §1.963–2, is 40 percent, and the statutory percentage under paragraph (b) of §1.963–2 for 1964 is 38 percent. Corporation B distributes $25 for 1964 toward a minimum distribution from the group which is not a pro rata minimum distribution. The minimum distribution by the group for 1964 with respect to M Corporation is determined as follows:

M Corporation's proportionate share of B Corporation's distribution (0.80×$25)	$20.00
Pretax and predistribution consolidated earnings and profits of the group (0.80×$200)	160.00
Statutory percentage of pretax and predistribution consolidated earnings and profits (0.33×$160)	60.80
Less: portion of such statutory percentage to which the $20 dividend received from B Corporation is attributable: Total dividend paid by B Corporation	25.00
Plus: Foreign income tax on B Corporation's pretax and predistribution earnings and profits to which such dividend is attributable, letting ‘‘t’’ represent such tax:	
$t=0.20\ (\$25)+0.40t$	
$t=\$5+0.40t$	
$0.60t=\$5$	
$t=\$5/0.60$	8.33
B Corporation's pretax and predistribution earnings and profits to which such dividend is attributable	33.33
M Corporation's proportionate share of B Corporation's pretax and predistribution earnings and profits to which the dividend is attributable (0.80×$33.33)	26.67
The statutory percentage of the pretax and predistribution consolidated earnings and profits of the group to which A Corporation's distribution must be attributable	34.13
Dividend required to be received from A Corporation ($34.13 – [0.40×$34.13])	20.48
Minimum distribution to M Corporation of the taxable year's consolidated earnings and profits of the group ($20+$20.48)	40.48

Example 3. The facts are the same as in example 2 except that the $25 distribution of earnings and profits is made by A Corporation. The amount of the minimum distribution for 1964 is determined as follows:

M Corporation's proportionate share of A Corporation's distribution (0.80×$25)	$20.00
Pretax and predistribution consolidated earnings and profits of the group (0.80×$200)	160.00
Statutory percentage of pretax and predistribution consolidated earnings and profits (0.38×$160)	60.80
Less: Portion of such statutory percentage to which the $20 dividend received from A Corporation is attributable: Total dividend paid by A Corporation	25.00
Plus: Foreign income tax on A Corporation's pretax and predistribution earnings and profits to which such dividend is attributable (0.40×[$25/0.60])	16.67
A Corporation's pretax and predistribution earnings and profits to which such dividend is attributable	41.67
M Corporation's proportionate share of A Corporation's pretax and predistribution earnings and profits to which dividend is attributable ($41.67×0.80)	33.34

Portion of the statutory percentage of the pretax and predistribution consolidated earnings and profits of the group to which B Corporation's distribution must be attributable	27.46
Dividend received from B Corporation, letting "d" represent the dividend:	
d=$27.46 − 0.20d − 0.40 ($27.46 − d)	
d=$27.46 − 0.20d − $10.98+0.40d	
d=$16.48+0.20d	
0.80d=$16.48	
d=$16.48/0.80	20.60
Minimum distribution to M Corporation of the taxable year's consolidated earnings and profits of the group ($20+$20.60)	40.60

(d) *Distributions through a chain or group.* In the application of paragraph (b)(3)(i) of § 1.963–4, relating to the allocation of dividend payments first to income received as a distribution from other foreign corporations in the chain or group, if one or more of such other foreign corporations is a corporation whose foreign income tax rate decreases as the distributions are made, the allocation under such paragraph shall be made first to such corporations' distributions.

(e) *Foreign tax credit*—(1) *Year of minimum distribution.* If a United States shareholder receives for a taxable year a distribution of the earnings and profits for the taxable year of a foreign corporation described in paragraph (a) of this section and if for such year such corporation is a first-tier corporation, or a second-tier corporation described in section 902 (a) or (b), as the case may be, then, in applying paragraph (c)(2)(i) of § 1.963–4, only the foreign income tax which is effectively applicable to pretax earnings and profits to which are attributable the earnings and profits which are distributed shall be deemed paid for such year under section 902 (a) or (b), as the case may be, and the foreign income tax so paid or accrued by such corporation shall not be averaged, for purposes of such section, with its foreign income tax paid or accrued for such year on its pretax earnings and profits to which are attributable the earnings and profits which are not distributed.

(2) *Year of distribution of remaining earnings and profits.* If for a taxable year a United States shareholder receives a minimum distribution from a corporation described in paragraph (a) of this section, the pretax and predistribution earnings and profits of such corporation for the taxable year to which such minimum distribution is attributable and the foreign income tax which is taken into account, in accordance with paragraph (c)(2)(i) of § 1.963–4, in determining tax deemed paid under section 902 on such pretax and predistribution earnings and profits shall not be taken into account in the application of section 902 when other earnings and profits of such foreign corporation for such year are distributed in a subsequent taxable year of such foreign corporation to such shareholder.

(3) *Illustration.* The application of this paragraph may be illustrated by the following examples:

Example 1. (a) All the income of controlled foreign corporation B, wholly owned directly by domestic corporation M, is taxed by foreign country Y, the tax laws of which impose at the local level a corporate income tax of 10 percent of earnings and profits (before reduction for income taxes) and, at the national level, an income tax of 30 percent of such earnings and profits reduced by the local tax and by any profits which are distributed. Also, at the national level, a tax of 20 percent is imposed on B Corporation on the dividends which are paid for the taxable year. Both corporations use the calendar year as the taxable year. For 1963, B Corporation has earnings and profits (before reduction by income taxes) of $100. B Corporation is not a less developed country corporation under section 902(d). For 1963, M Corporation makes a first-tier election with respect to B Corporation and receives a minimum distribution. Corporation B has no 1964 earnings and profits, and its remaining 1963 earnings and profits are distributed late in 1964. The amount of the minimum distribution required to be received by M Corporation for 1963 and the United States tax with respect to the 1963 earnings and profits of B Corporation are determined as follows, assuming a United States corporate income tax rate of 52 percent (instead of 50 percent) for 1964 and no surtax exemption under section 11(c) for either year:

	1963
Effective foreign tax rate which obtains if no earnings and profits of B Corporation are distributed [($100×0.10)+([$100 − ($100×0.10)]×0.30)]/$100	37%
Minimum percentage of earnings and profits required under section 963(b) to be distributed, given a 37 percent effective foreign tax rate	68%

1963	
Amount of earnings and profits (before reduction by foreign income tax) to which minimum distribution would be attributable if the effective foreign tax rate of 37 percent obtained (0.68×$100)	$68.00
Minimum distribution required to be received by M Corporation, i.e., such an amount that is $68 less the foreign income tax on such $68, determined by letting "d" equal the dividend in the algebraic equation:	
d=$68 − (0.10 × $68) − 0.30 ($68 − [0.10 × $68] − d) − 0.20d	
d=$68 − $6.80 − ($20.40 − $2.04 − 0.30d) − 0.20d	
d=$61.20 − $20.40 + $2.04 + 0.30d − 0.20d	
d=$42.84 + 0.10d	
0.90d=$42.84	
d=$42.84/0.90, or	$47.60
Gross-up under section 78, using the actual foreign income tax imposed on pretax profits to which are attributable the earnings and profits distributed ($6.80+0.30 [$61.20−$47.60]+0.20 [$47.60])	$20.40
Taxable income of M Corporation for 1963 ($47.60+$20.40)	$68.00
U.S. tax before foreign tax credit ($68×0.52)	$35.36
Foreign tax credit ($47.60/$47.60× $20.40)	$20.40
U.S. tax payable for 1963 ($35.36−$20.40)	$14.96
Overall U.S. and foreign income tax rate [$14.96+$20.40+($32×0.37)]/ $100	47.20%

1964	
Dividend received by M Corporation ($32−[0.37×$32])	$20.16
Gross-up under section 78, using the foreign income tax paid or accrued on pretax earnings and profits to which are attributable 1963 earnings and profits distributed during 1964 ($20.16/$20.16×[$32× 0.37])	$11.84
Taxable income of M Corporation for 1964 ($20.16+$11.84)	$32.00
U.S. tax before foreign tax credit ($32×0.52)	$16.64
Foreign tax credit ($20.16/$20.16× $11.84)	$11.84
U.S. tax payable ($16.64−$11.84)	$4.80

(b) If B Corporation were a less developed country corporation under section 902(d), there would be no gross-up under section 78 and the foreign tax credit of M Corporation would be $14.28 for 1963 ($47.60/[47.60+ $20.40]×$20.40), and $7.46 for 1964 ($20.16/ [$20.16+$11.84]×$11.84).

Example 2. For 1963, domestic corporation M receives a dividend of $21 from B Corporation which counts toward a minimum distribution from a group, determined by applying the special rules of paragraphs (b) and (c) of § 1.963–4. Both corporations use the calendar year as the taxable year. Foreign law imposes on B Corporation an income tax of 40 percent of the year's pretax earnings and profits, less dividends paid for such year, and of 20 percent of such dividends. Corporation M directly owns 70 percent of the one class of stock of B Corporation, which for 1963 has pretax and predistribution earnings and profits of $100. Corporation B is not a less developed country corporation under section 902(d). In late 1964, M Corporation receives a distribution of all of B Corporation's 1964 earnings and profits and of $25.20 from its 1963 earnings and profits. The foreign income tax of B Corporation deemed paid for 1963 by M Corporation under section 902(a) is based on the foreign income tax actually paid by B Corporation on an amount of pretax earnings and profits which, when reduced by the tax so paid, equals the total dividend which is paid. The determination of tax deemed paid by M Corporation with respect to distributions from 1963 earnings and profits of B Corporation is as follows:

1963	
Pretax and predistribution earnings and profits of B Corporation for 1963	$100
Total dividend paid by B Corporation in 1963 ($21/ 0.70)	30
Total foreign income tax paid by B Corporation for 1963 (0.40[$100− $30]+[0.20×$30]) or ($28+$6)	34
Foreign income tax, represented by "t" in the following equation, to be taken into account with respect to total dividend in determining tax deemed paid under section 902(a) by M Corporation:	
t=(0.20×$30)+0.40t	
t=$6+0.40t	
0.60t=$6	
t=$6/0.60, or	$10
Foreign income tax deemed paid by M Corporation for 1963 ($21/$30×$10)	7

1964	
Remaining 1963 earnings and profits of B Corporation ([$100−$34]−$30) or ($66−$30)	36
Dividend received by M Corporation for 1964 (0.70×$36)	25.20
Foreign income tax deemed paid by M Corporation for 1964 ($25.20/$36× [$34−$10]) or ($25.20/ $36×$24)	16.80

[T.D. 6759, 29 Sept. 25, 1964; 29 FR 13896, Oct. 8, 1964, as amended by T.D. 6767, 29 FR 14879, Nov. 3, 1964]

§ 1.963–6 Deficiency distribution.

(a) *In general.* Section 963(e)(2) and this section provide a method under which, by virtue of a deficiency distribution, a United States shareholder may be relieved from the payment of a deficiency in tax for any taxable year arising by reason of failure to include subpart F income in gross income under section 951(a)(1)(A)(i), when it has been determined that such shareholder has failed to receive a minimum distribution for such year in respect of which it elected to secure the exclusion under section 963. In addition, this section provides rules with respect to a credit or refund of part or all of any such deficiency which has been paid. Under the method provided, the benefit of the exclusion of subpart F income from gross income of the United States shareholder is allowed retroactively for the taxable year in respect of which the election under section 963 applied, but only if the subsequent deficiency distribution meets the requirements of this section. The benefits of the retroactive exclusion will not, however, prevent the assessment of interest, additional amounts, and assessable penalties.

(b) *Requirements for deficiency distribution*—(1) *Distribution made on or after date of determination.* If—

(i) A United States shareholder, in making its return of the tax imposed by chapter 1 of the Code for any taxable year, elects to secure an exclusion under section 963 for such year,

(ii) It is subsequently determined (within the meaning of paragraph (c) of this section) that an exclusion under section 963 of subpart F income with respect to stock to which such election relates does not apply for such taxable year because of the failure of such shareholder to receive a minimum distribution for such year with respect to such stock, and

(iii) Such failure is due to reasonable cause, a deficiency distribution which is received by such shareholder with respect to such stock from a foreign corporation which was the single first-tier corporation, or a corporation in the chain or group, as the case may be, with respect to which the election was made, shall count toward a minimum distribution under section 963 for such year of election if such deficiency distribution is received (except as provided by subparagraph (2) of this paragraph) on, or within 90 days after, the date of such determination and prior to the filing of a claim under paragraph (d)(1) of this section. Such claim must be filed within 120 days after the date of such determination, and the deficiency distribution must be a dividend of such a nature (except as otherwise provided in this section) as would have permitted it to count toward a minimum distribution for the taxable year of the election if it had been received by the United States shareholder during such year. No distribution shall count as a deficiency distribution under this subparagraph unless a claim therefor is filed under paragraph (d)(1) of this section.

(2) *Distribution made before date of determination.* A deficiency distribution may also be received by a United States shareholder at any time prior to the date on which the determination required by subparagraph (1) of this paragraph is made. A distribution will count as a deficiency distribution under this subparagraph—

(i) To the extent that such distribution otherwise satisfies the requirements of this section;

(ii) If the United States shareholder files within 90 days after such distribution but before the determination date an advance claim described in paragraph (d)(2) of this section for treatment of such distribution as a deficiency distribution;

(iii) If such shareholder consents in such claim to include such deficiency distribution in gross income for the taxable year of the election to the extent necessary to complete a minimum distribution for such year and under section 6501 to extend the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts, and assessable penalties for such taxable year;

(iv) If, when requested by the district director, such shareholder consents under section 6501 in such claim to extend the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts and assessable penalties for the year of receipt of such distribution; and

(v) To the extent that such shareholder makes advance payment of tax which would result from the inclusion of such distribution in gross income as a minimum distribution for the year of such deficiency.

To the extent that such distribution is not necesasry under the determination (when made under paragraph (c) of this section) for a deficiency distribution, it shall be included in the United States shareholder's gross income for the taxable year of receipt of such distribution and paragraph (g) of this section shall not apply.

(3) *Earnings and profits of year of election to be first distributed.* If—

(i) In the case of a first-tier election, the United States shareholder's proportionate share of the earnings and profits of the foreign corporation which was the single first-tier corporation, or

(ii) In the case of a chain or group election, any portion of the share of any corporation or corporations (which were in the chain or group) of the consolidated earnings and profits with respect to the United States shareholder, for the taxable year of the election has not been distributed on the stock with respect to which the election was made, then a distribution, in order to be counted toward a deficiency distribution, must be made by such corporation or corporations and from such earnings and profits to the extent thereof. Once all such earnings and profits of such corporation or corporations have been completely distributed, a deficiency distribution may be made from other earnings and profits of such foreign corporation which was a single first-tier corporation, or of such corporation or corporations which were in such chain or group, as the case may be.

(4) *Proof of reasonable cause.* Reasonable cause for failure to receive a minimum distribution shall be deemed to exist, in the absence of circumstances demonstrating bad faith, if the electing United States shareholder receives, within the period prescribed by paragraph (a)(1)(i) of §1.963–3 with respect to the year of election, at least 80 percent of the amount of a minimum distribution (from the earnings and profits to which the election for such year relates) which if received during such period would have satisfied the conditions for the section 963 exclusion to apply to such year. If less than 80 percent of the amount of a minimum distribution is received during such period, the existence of a reasonable cause for failure to receive a minimum distribution must be established by clear and convincing evidence; however, the preceding sentence shall not be taken as a limitation on the establishment of reasonable cause by any other proof of reasonable cause. For example, reasonable cause will exist if a single first-tier corporation for its taxable year makes a distribution which would be a minimum distribution but for a refund of foreign income tax which it has paid in good faith under foreign law but which is found not to be due after the United States income tax return of the United States shareholder has been filed.

(c) *Nature and details of determination.* (1) A determination that the section 963 exclusion does not apply to a United States shareholder for a taxable year due to its failure to receive a minimum distribution for such year shall, for the purposes of this section, be established by—

(i) A decision by the Tax Court or a judgment, decree, or other order by any court of competent jurisdiction, which has become final;

(ii) A closing agreement made under section 7121; or,

(iii) An agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated, and by, or on behalf of, such shareholder and which relates to the liability of such shareholder for the tax under chapter 1 of the Code for such year.

(2) The date of determination by a decision of the Tax Court shall be the date upon which such decision becomes final, as prescribed in section 7481.

(3) The date upon which a judgment of a court becomes final shall be determined upon the basis of the facts in the particular case. Ordinarily, a judgment of a United States district court shall become final upon the expiration of the time allowed for taking an appeal, if no such appeal is duly taken within such time; and a judgment of the United States Court of Claims shall become final upon the expiration of the time allowed for filing a petition for certiorari, if no such petition is duly filed within such time.

(4) The date of determination by a closing agreement made under section 7121 shall be the date such agreement is approved by the Commissioner.

(5) The date of a determination made by an agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated, shall be the date prescribed by this subparagraph. The agreement shall be sent to the United States shareholder at his last known address by either registered or certified mail. If registered mail is used for such purpose, the date of registration shall be treated as the date of determination; if certified mail is used for such purpose, the date of the postmark on the sender's receipt for such mail shall be treated as the date of determination. However, if the deficiency distribution is received by such shareholder before such registration or postmark date but on or after the date the agreement is signed by the district director or such other official to whom authority to sign the agreement is delegated, the date of determination shall be the date on which the agreement is so signed.

(6) The determination under this paragraph shall find that, due to the United States shareholder's failure to receive a minimum distribution, the section 963 exclusion does not apply for the taxable year with respect to stock to which the election under such section relates. A determination described in subdivision (ii) or (iii) of subparagraph (1) of this paragraph shall set forth the amount of the deficiency distribution and the amount of additional income tax for which the United States shareholder is liable under Chapter 1 of the Code by reason of not including in gross income for such year the amount of the deficiency distribution. If a determination described in subdivision (i) of subparagraph (1) of this paragraph does not establish the amount of the deficiency distribution and such amount of additional tax, such amounts may be established by an agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated.

(d) *Claim for treatment of distribution as a deficiency distribution*—(1) *Claim filed after date of determination*. A claim (including any amendments thereof) for treatment of a deficiency distribution as counting toward a minimum distribution for the taxable year of election shall be filed in duplicate, within 120 days after the date of the determination described in paragraph (c) of this section, with the requisite declaration prescribed by the Commissioner on the appropriate claim form and shall be accompanied by—

(i) A copy of such determination and a description of how it became final;

(ii) If requested by the district director, or by such other official to whom authority to sign the agreement referred to in paragraph (c)(1) or (6) of this section is delegated, a consent by the United States shareholder under section 6501 to extend the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts, and assessable penalties for the taxable year of election; and

(iii) Such other information as may be required by the claim form or the district director, or other official, in support of the claim.

(2) *Advance claim*. An advance claim for treatment of a deficiency distribution as counting toward a minimum distribution for the taxable year of election shall be filed in duplicate, within 90 days after such distribution but before the date of determination described in paragraph (c) of this section, and shall satisfy all requirements of subparagraph (1) of this paragraph other than subdivision (i) of such subparagraph. However, within 120 days after the date of the determination described in paragraph (c) of this section, the advance claim shall be completed so that it satisfies all requirements of subparagraph (1) of this paragraph.

(e) *Computation of interest on deficiencies in tax*. If a United States shareholder, for the taxable year of the election under section 963, completes a minimum distribution for such year by receiving a deficiency distribution to which this section applies, the interest on the deficiency in tax due by reason of the failure to include the amount of such deficiency distribution in such shareholder's gross income for such year shall be computed for the period from the last date prescribed for payment of the tax for such year to the date such deficiency in tax is paid. No interest shall be due by reason of the failure to include Subpart F income in gross income for a taxable year in respect of which a minimum distribution under section 963 is completed by a deficiency distribution to which this section applies.

(f) *Claim for credit or refund.* If a deficiency in tax is asserted for any taxable year by reason of failure to include Subpart F income in gross income under section 951(a)(1)(A)(i) and the United States shareholder has paid any portion of such asserted deficiency, such shareholder is entitled to a credit or refund of such payment to the extent that such payment constitutes an overpayment of tax as the result of the receipt of a deficiency distribution to which this section applies. To secure credit or refund of such overpayment of tax, the United States shareholder must file a claim for refund in accordance with §301.6402–3, in addition to the claim form required under paragraph (d) of this section. No interest shall be allowed on such credit or refund. For other rules applicable to the filing of claims for credit or refund of an overpayment of tax, see section 6402 and the regulations thereunder. For the limitations applicable to the credit or refund for an overpayment of tax, see section 6511 and the regulations thereunder.

(g) *Effect of deficiency distribution*—(1) *Allocation of distributions.* The deficiency distribution shall be allocated, by applying the rules of §1.963–3 (and paragraph (b) of §1.963–4, if applicable for the year of election), as a distribution first from the earnings and profits (to the extent thereof) of the foreign corporation which was the single first-tier corporation, or of the distributing corporation or corporations which were in the chain or group, as the case may be, for the taxable year in respect of which the election was made, and then from earnings and profits (to the extent thereof) described in section 959(c)(3) and determined as provided in section 959 for the most recent taxable year and the first, second, etc., taxable years preceding such recent taxable years, in that order, of the distributing corporation or corporations. In applying the preceding sentence to taxable years other than the taxable year in respect of which the election was made, the deficiency distribution shall first be allocated, in the order of allocation prescribed by such sentence, first to taxable years in respect of which no election under section 963 was made with respect to the stock on which such distribution is received and then to taxable years in respect of which an election under such section was made.

(2) *Year of receipt.* Any deficiency distribution made with respect to a taxable year of the United States shareholder shall be treated, except as provided in paragraph (b)(2) of this section, as having been received by the shareholder in that year for which such shareholder elected to secure an exclusion under section 963; and, for purposes of the foreign tax credit under section 901, the foreign income taxes paid or accrued, or deemed paid, by the United States shareholder by reason of a distribution of any amount treated as a deficiency distribution for such year shall be treated as paid or accrued, or deemed paid, for such year.

(3) *Year of payment.* A distribution counting toward a deficiency distribution for a taxable year of election shall, except as provided in paragraph (b)(2) of this section, be treated for purposes of applying paragraph (a) of §1.963–3, relating to conditions under which earnings and profits are counted toward a minimum distribution, and paragraph (b)(3) of §1.963–4, relating to rules for distributing through a chain or group, as if it were distributed during the distribution period (as defined in paragraph (g) of §1.963–3) with respect to the distributing corporation and each foreign corporation through which such distribution is made to the United States shareholder, for the taxable year to which the election under section 963 applies; and the foreign income taxes paid by any foreign corporation by reason of such distribution shall, in the application of section 902 and of the special rules of paragraph (c) of §1.963–4, be treated as paid or accrued by such foreign corporation for its taxable year to which such election applies. The distribution shall not count toward a minimum distribution for any other taxable year.

(4) *Allocation of reduction in tax credit.* If any portion of a deficiency distribution from a corporation which was in a chain or group is paid from earnings and profits of a taxable year other than that in respect of which the election was made, then the minimum distribution toward which such deficiency distribution counts may not be treated as a pro rata minimum distribution for purposes of § 1.963–4. Moreover, the amount of the overall United States and foreign income tax with respect to such minimum distribution must satisfy the minimum tax requirements of paragraph (a)(1)(i), or paragraph (ii), of § 1.963–4, but, if the latter applies, without any reduction and deferral under paragraph (c)(3) of such section of the foreign tax credit allowable under section 901 with respect to the deficiency distribution.

[T.D. 6759, 29 FR 13346, Sept. 25, 1964, as amended by T.D. 6767, 29 FR 14879, Nov. 3, 1964; T.D. 7410, 41 FR 11020, Mar. 16, 1976]

§ 1.963–7 Transitional rules for certain taxable years.

(a) *Extension of time for making, revoking, or changing election*—(1) *In general.* Subparagraphs (2) and (3) of this paragraph provide additional rules which apply only to a taxable year of a United States shareholder for which the last day prescribed by law for filing its return (including any extensions of time under section 6081) occurs on or before the 90th day after September 30, 1964.

(2) *Manner of making the election.* The election of the United States shareholder to secure the exclusion under section 963 and the consent to the regulations under such section may be made for the taxable year—

(i) By filing with the return (or with an amended return filed on or before such 90th day) for such taxable year—

(a) A written statement stating that such election is made for such taxable year, and

(b) The names of the foreign corporations to which such election applies, the taxable year, country of incorporation, pretax earnings and profits, foreign income taxes, earnings and profits, and outstanding capital stock, of each such corporation, and such other information relating to the election made as the Commissioner may prescribe, on or before the date of filing, by instructions or schedules to support such return; or

(ii) In case of any extension of time under section 6081 with respect to such taxable year where the last day prescribed by law for filing the return by the electing United States shareholder (not including any extensions thereof) occurs on or before September 30, 1964, by filing with the request for the first such extension of time a written statement stating that such election is made for such taxable year and setting forth the names of the foreign corporations to which each election applies.

(3) *Revocation or change of election.* An election made in the manner provided by subparagraph (2) of this paragraph may be revoked or changed—

(i) By filing with the return on or before the 90th day after September 30, 1964, a written statement that such election is revoked or changed, as the case may be, and by setting forth with respect to any such modified election the information prescribed by subparagraph (2)(i)*(b)* of this paragraph, or

(ii) Where the return has been filed on or before such 90th day, by filing on or before such 90th day an amended return and an accompanying statement that such election is revoked or changed, as the case may be, and by setting forth with respect to any such modified election the information prescribed by subparagraph (2)(i)*(b)* of this paragraph.

(b) *Extension of time for making a minimum distribution*—(1) *In general.* This paragraph applies only with respect to a taxable year of a United States shareholder ending on or before September 30, 1964, for which an election to secure an exclusion under section 963 is made where, in case of a first-tier election, the distribution period of such first-tier corporation with respect to its taxable year to which such election applies ends on or before the 90th day after such date, and where, in the case of a chain or group election, the distribution period ends on or before such 90th day with respect to the taxable year to which the election applies of any of the foreign corporations in such chain or group.

(2) *Conditions for obtaining extension of time.* A distribution on stock with respect to which the election under section 963 was made which is received by the United States shareholder from a foreign corporation which was the single first-tier corporation, or a corporation in the chain or group, as the case may be, with respect to which the election was made, shall count toward a minimum distribution under section 963 for such year of election if—

(i) The distribution is made on or before such 90th day,

(ii) The shareholder, in a statement attached to its return or amended return for such year (which is filed on or before such 90th day) indicates the foreign corporation or corporations from which the distribution is made and states that, and the extent to which, the distribution is to count toward such minimum distribution,

(iii) The distribution is of such a nature as would have permitted it to count toward a minimum distribution for such taxable year of the United States shareholder if it had been made on the last day of such year, and

(iv) The United States shareholder includes the distribution in gross income as if it were received on the last day of such taxable year of election.

The distribution shall be applied against the earnings and profits of the single first-tier corporation or the foreign corporations in the chain or group for the taxable year of such corporation or corporations to which the election applies.

(3) *Year of receipt.* To the extent that a distribution counts toward a minimum distribution under this paragraph with respect to a taxable year of the United States shareholder, it shall be treated as having been received by the shareholder in that year for the purpose of determining gross income and the assessment of interest, additional amounts, and assessable penalties; and, for purposes of the foreign tax credit under section 901, the foreign income taxes paid or accrued, or deemed paid, by the United States shareholder by reason of a distribution of any amount treated as a distribution for such year under this paragraph shall be treated as paid or accrued, or deemed paid, for such year.

(4) *Year of payment.* The distribution shall be treated for purposes of applying paragraph (a) of §1.963–3, relating to conditions under which earnings and profits are counted toward a minimum distribution, and paragraph (b)(3) of §1.963–4, relating to rules for distributing through a chain or group, as if it were distributed during the distribution period (as defined in paragraph (g) of §1.963–3) with respect to the distributing corporation and each foreign corporation through which such distribution is made to the United States shareholder, for the taxable year to which the election under section 963 applies; and the foreign income taxes paid by any foreign corporation by reason of such distribution shall, in the application of section 902 and of the special rules of paragraph (c) of §1.963–4, be treated as paid or accrued by such foreign corporation for its taxable year to which such election applies. The distribution shall not count toward a minimum distribution for any other taxable year.

[T.D. 6759, 29 FR 13348, Sept. 25, 1964, as amended by T.D. 6767, 29 FR 14879, Nov. 3, 1964]

§1.963–8 Determination of minimum distribution during the surcharge period.

(a) *Taxable years not wholly within the surcharge period.* In the case of a taxable year beginning before the surcharge period and ending within the surcharge period, or beginning within the surcharge period and ending after the surcharge period, or beginning before January 1, 1970, and ending after December 31, 1969, section 963(b) provides the method for determining the required minimum distribution. Under the method prescribed in section 963(b) for such years, the required minimum distribution is an amount equal to the sums of:

(1) That portion of the minimum distribution which would be required if the provisions of section 963(b)(1) were applicable to the taxable year, which the number of days in such taxable year which are within the surcharge period and before January 1, 1970, bears to the total number of days in such taxable year.

(2) That portion of the minimum distribution which would be required if the provisions of section 963(b)(2) were applicable to such taxable year, which the number of days in such taxable year which are within the surcharge period and after December 31, 1969, bears to the total number of days in such taxable year, and

(3) That portion of the minimum distribution which would be required if the provisions of section 963(b)(3) were applicable to such taxable year, which the number of days in such taxable year which are not within the surcharge period bears to the total number of days in such taxable year.

(b) *Calendar year 1970.* For calendar year 1970, the required minimum distribution shall be an amount determined in accordance with the following table:

If the effective foreign tax rate is (percentage)—	The required minimum distribution of earnings and profits is (percentage)—
Under 9	84.983562
9 or over but less than 10	82.967123
10 or over but less than 18	80.983562
18 or over but less than 19	79.471233
19 or over but less than 26	77.487671
26 or over but less than 27	73.958904
27 or over but less than 32	70.487671
32 or over but less than 33	67.463014
33 or over but less than 36	63.991781
36 or over but less than 37	57.942466
37 or over but less than 39	51.991781
39 or over but less than 40	44.934247
40 or over but less than 41	37.495890
41 or over but less than 42	31.446575
42 or over but less than 43	19.446575
43 or over but less than 44	12.893151
44 or over but less than 45	6.446575
45 or over	0

(c) *Surcharge period.* For purposes of this section the term ‘‘surcharge period’’ means the period beginning January 1, 1968, and ending June 30, 1970.

(d) *Illustration of principles.* The application of the rules set forth in paragraphs (a), (b), and (c) of this section may be illustrated by the following example. It is assumed that all computations are carried to sufficient accuracy:

Example. (a) M, a domestic corporation, and A, its controlled corporation (the one class of stock of which is wholly owned by M), both have a taxable year beginning December 1, 1969, and ending November 30, 1970. For such taxable year M makes a first-tier election with respect to A corporation. The effective foreign tax rate for such year is 30 percent.

(b) Under section 963(b) and paragraph (b) of this section the surcharge period ends June 30, 1970. Therefore, of the 365 days in the taxable year, 153 days are not within the surcharge period. Of the remaining 212 days, 31 are within the surcharge period and before January 1, 1970 and 181 days are within the surcharge period and after December 31, 1969. If section 963(b)(1) were applicable to the entire taxable year, the required minimum distribution of earnings and profits would be 75 percent. If section 963(b)(2) were applicable to the entire taxable year, the required minimum distribution would be 72 percent. If section 963(b)(3) were applicable to the entire taxable year, the required minimum distribution would be 69 percent.

(c) Under section 963(b) and this section the required minimum distribution of earnings and profits is 71 percent, computed as follows:

$$(75\% \times 31 \div 365) + (72\% \times 181 \div 365) + (69\% \times 153 \div 365) = 71\%.$$

[T.D. 7100, 36 FR 5336, Mar. 20, 1971]

§ 1.964–1 Determination of the earnings and profits of a foreign corporation.

(a) *In general.* For purposes of sections 951 through 964, the earnings and profits (or deficit in earnings and profits) of a foreign corporation for its taxable year shall, except as provided in paragraph (f) of this section, be computed substantially as if such corporation were a domestic corporation by—

(1) Preparing a profit and loss statement with respect to such year from the books of account regularly maintained by the corporation for the purpose of accounting to its shareholders;

(2) Making the adjustments necessary to conform such statement to the accounting principles described in paragraph (b) of this section;

(3) Making the further adjustments necessary to conform such statement to the tax accounting standards described in paragraph (c) of this section;

(4) Translating the amounts shown on such adjusted statement into United States dollars in accordance with paragraph (d) of this section, and

(5) Adjusting the amount of profit or loss shown on such translated and adjusted statement in accordance with paragraph (e) of this section to reflect any exchange gain or loss determined thereunder.

The computation described in the preceding sentence may be made by following the procedures described in paragraphs (a)(1) through (5) of this section in an order other than the one listed, as long as the result so obtained would be the same. In determining earnings and profits, or the deficit in earnings and profits, of a foreign corporation under section 964, the amount of any illegal bribe, kickback, or other payment (within the meaning of section 162(c), as amended by section 288 of the Tax Equity and Fiscal Responsibility Act of 1982 in the case of payments made after September 3, 1982, and the regulations thereunder) paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government shall not be taken into account to decrease such earnings and profits or to increase such deficit. No adjustment shall be required under subparagraph (2) or (3) of this paragraph unless it is material. Whether an adjustment is material depends on the facts and circumstances of the particular case, including the amount of the adjustment, its size relative to the general level of the corporation's total assets and annual profit or loss, the consistency with which the practice has been applied, and whether the item to which the adjustment relates is of a recurring or merely a nonrecurring nature. For the treatment of earnings and profits whose distribution is prevented by restrictions and limitations imposed by a foreign government, see section 964(b) and the regulations thereunder.

(b) *Accounting adjustments*—(1) *In general.* The accounting principles to be applied in making the adjustments required by paragraph (a)(2) of this section shall be those accounting principles generally accepted in the United States for purposes of reflecting in the financial statements of a domestic corporation the operations of its foreign affiliates, including the following:

(i) *Clear reflection of income.* Any accounting practice designed for purposes other than the clear reflection on a current basis of income and expense for the taxable year shall not be given effect. For example, an adjustment will be required where an allocation is made to an arbitrary reserve out of current income.

(ii) *Physical assets, depreciation, etc.* All physical assets (as defined in paragraph (e)(5)(ii) of this section), including inventory when reflected at cost, shall be taken into account at historical cost computed either for individual assets or groups of similar assets. The historical cost of such an asset shall not reflect any appreciation or depreciation in its value or in the relative value of the currency in which its cost was incurred. Depreciation, depletion, and amortization allowances shall be based on the historical cost of the underlying asset and no effect shall be given to any such allowance determined on the basis of a factor other than historical cost. For special rules for determining historical cost where assets are acquired during a taxable year beginning before January 1, 1950, or a majority interest in the foreign corporation is acquired after December 31, 1949, but before October 27, 1964, see subparagraph (2) of this paragraph.

(iii) *Valuation of assets and liabilities.* Any accounting practice which results in the systematic undervaluation of assets or overvaluation of liabilities shall not be given effect, even though expressly permitted or required under foreign law, except to the extent allowable under paragraph (c) of this section. For example, an adjustment will be required where inventory is written down below market value. For the definition of market value, see paragraph (a) of §1.471–4.

(iv) *Income equalization.* Income and expense shall be taken into account without regard to equalization over more than one accounting period; and any equalization reserve or similar provision affecting income or expense shall not be given effect, even though expressly permitted or required under foreign law, except to the extent allowable under paragraph (c) of this section.

(v) *Foreign currency.* If transactions effected in a foreign currency other than that in which the books of the corporation are kept are translated into the foreign currency reflected in the books, such translation shall be made in a manner substantially similar to that prescribed by paragraph (d) of this section for the translation of foreign currency amounts into United States dollars.

(2) *Historical cost.* For purposes of this section, the historical cost of an asset acquired by the foreign corporation during a taxable year beginning before January 1, 1963, shall be determined, if it is so elected by or on behalf of such corporation—

(i) In the event that the foreign corporation became a majority owned subsidiary of a United States person (within the meaning of section 7701(a)(30)) after December 31, 1949, but before October 27, 1964, and the asset was held by such foreign corporation at that time, as though the asset was purchased on the date during such period the foreign corporation first became a majority owned subsidiary at a price equal to its then fair market value, or

(ii) In the event that subdivision (i) of this subparagraph is inapplicable but the asset was acquired by the foreign corporation during a taxable year beginning before January 1, 1950, as though the asset were purchased on the first day of the first taxable year of the foreign corporation beginning after December 31, 1949, at a price equal to the undepreciated cost (cost or other basis minus book depreciation) of that asset as of that date as shown on the books of account of such corporation regularly maintained for the purpose of accounting to its shareholders.

For purposes of this subparagraph, a foreign corporation shall be considered a majority owned subsidiary of a United States person if, taking into account only stock acquired by purchase (as defined in section 334(b)(3)), the United States person owns (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. The election under this subparagraph shall be made for the first taxable year beginning after December 31, 1962, in which the foreign corporation is a controlled foreign corporation (within the meaning of section 957), or for which it is included in a chain or group under section 963(c)(2)(B) or (3)(B) (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975), or has a deficit in earnings and profits sought to be taken into account under section 952(d) or pays a dividend that is included in the foreign base company shipping income of a controlled foreign corporation under § 1.954–6(f). Once made, such an election shall be irrevocable. For the time and manner in which an election may be made on behalf of a foreign corporation, see paragraph (c)(3) of this section.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Corporation M is a controlled foreign corporation which regularly maintains books of account for the purpose of accounting to its shareholders in accordance with the accounting practices prevalent in country X, the country in which it operates. As a consequence of those practices, the profit and loss statement prepared from these books of account reflects an allocation to an arbitrary reserve out of current income and depreciation allowances based on replacement values which are greater than historical cost. Adjustments are necessary to conform such statement to accounting principles generally accepted in the United States. Assuming these adjustments to be material, the unacceptable practices, will have to be eliminated from the statement, an increase in the amount of profit (or a decrease in the amount of loss) thereby resulting.

Example 2. In 1973, Corporation N is a foreign corporation which is not a controlled foreign corporation but which is included in a chain, for minimum distribution purposes, under section 963(c)(2)(B). Corporation N regularly maintains books of account for the purpose of accounting to its shareholders in accordance with the accounting practices of country Y, the country in which it operates. As a consequence of those practices, the profit and loss statement prepared from these books of account reflects the inclusion in income of stock dividends and of corporate distributions representing a return of capital. Adjustments are necessary to conform such statement to accounting principles generally accepted in the United States. Assuming these adjustments to be material, the unacceptable practices will have to be eliminated from the statement, a decrease in the amount of profit (or increase in the amount of loss) thereby resulting.

(c) *Tax adjustments*—(1) *In general.* The tax accounting standards to be applied in making the adjustments required by paragraph (a)(3) of this section shall be the following:

(i) *Accounting methods.* The method of accounting shall reflect the provisions of section 446 and the regulations thereunder.

(ii) *Inventories.* Inventories shall be taken into account in accordance with the provisions of sections 471 and 472 and the regulations thereunder.

(iii) *Depreciation.* Depreciation shall be computed as follows:

(a) For any taxable year beginning before July 1, 1972; depreciation shall be computed in accordance with section 167 and the regulations thereunder.

(b) If, for any taxable year beginning after June 30, 1972, 20 percent or more of the gross income from all sources of the corporation is derived from sources within the United States, then depreciation shall be computed in accordance with the provisions of §1.312–15.

(c) If, for any taxable year beginning after June 30, 1972, less than 20 percent of the gross income from all sources of the corporation is derived from sources within the United States, then depreciation shall be computed in accordance with section 167 and the regulations thereunder.

(iv) *Elections.* Effect shall be given to any election made in accordance with an applicable provision of the Code and the regulations thereunder and these regulations.

Except as provided in subparagraphs (2) and (3) of this paragraph, any requirements imposed by the Code or applicable regulations with respect to making an election or adopting or changing a method of accounting must be satisfied by or on behalf of the foreign corporation just as though it were a domestic corporation if such election or such adoption or change of method is to be taken into account in the computation of its earnings and profits.

(2) *Adoption of method.* For the first taxable year beginning after December 31, 1962, in which the foreign corporation is a controlled foreign corporation (within the meaning of section 957), or for which it is included in a chain or group under section 963(c)(2)(B) or (3)(B) (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975), or has a deficit in earnings and profits sought to be taken into account under section 952(d), or pays a dividend that is included in the foreign base company shipping income of a controlled foreign corporation under §1.954–6(f), there may be adopted or made by such corporation or on its behalf any method of accounting or election allowable under this section notwithstanding that, in previous years, its earnings and profits were computed, or its books or financial statements prepared, on a different basis and notwithstanding that such election is required by the Code or regulations to be made in a prior taxable year. For purposes of determining the amount of a deficit in earnings and profits taken into account pursuant to section 952(c)(1)(B), if a different basis is used in previous years, ratable adjustments shall be made in the earnings and profits attributable to such previous years to prevent any duplication or omission of amounts that would otherwise result from the adoption of such method or the making of such election. See subparagraph (3) of this paragraph for the manner in which a method of accounting or an election may be adopted or made on behalf of the foreign corporation.

(3) *Action on behalf of corporation*—(i) *In general.* An election shall be deemed made, or an adoption or change in method of accounting deemed effectuated, on behalf of the foreign corporation only if its controlling United States shareholders (as defined in subparagraph (5) of this paragraph)—

(a) Satisfy for such corporation any requirements imposed by the Code or applicable regulations with respect to such election or such adoption or change in method, such as the filing of forms, the execution of consents, securing the permission of the Commissioner, or maintaining books and records in a particular manner,

(b) File the written statement described in subdivision (ii) of this subparagraph at the time and in the manner prescribed therein, and

(c) Provide the written notice required by subdivision (iii) of this subparagraph at the time and in the manner prescribed therein.

For purposes of the preceding sentence, the books of the foreign corporation shall be considered to be maintained in a particular manner if the controlling

United States shareholders or the foreign corporation regularly keep the records and accounts required by section 964(c) and the regulations thereunder in that manner. Any election required to be made or information required to be filed with a tax return shall be deemed made or furnished on behalf of the foreign corporation if its controlling United States shareholders file the written statement described in subdivision (ii) of this subparagraph with respect to such election within the period specified therein. For a special rule postponing the time for taking action by or on behalf of a foreign corporation until the amount of its earnings and profits becomes significant, see subparagraph (6) of this paragraph.

(ii) *Written statement.* The written statement required by subdivision (i) of this subparagraph shall be jointly executed by the controlling United States shareholders, shall be filed with the Director of the Internal Revenue Service Center, 11601 Roosevelt Blvd., Philadelphia, Pennsylvania 19155, within 180 days after the close of the taxable year of the foreign corporation with respect to which the election is made or the adoption or change of method effected, or before May 1, 1965, whichever is later, and shall set forth the name and country or organization of the foreign corporation, the names, addresses, taxpayer identification numbers (in the case of statements required to be filed after June 20, 1983), and stock interests of the controlling United States shareholders, the nature of the action taken, the names, addresses, and (in the case of statements required to be filed after June 20, 1983) taxpayer identification numbers of all other United States shareholders notified of the election or adoption or change of method, and such other information as the Commissioner may by forms require.

(iii) *Notice.* Prior to the filing of the written statement described in subdivision (ii) of this subparagraph, the controlling United States shareholders shall provide written notice of the election made or the adoption or change of method effected to all other persons known by them to be United States shareholders who own (within the meaning of section 958(a)) stock of the foreign corporation. Such notice shall set forth the name and country of organization of the foreign corporation, the names, addresses, and stock interests of the controlling United States shareholders, the nature of the action taken, and such other information as the Commissioner may by forms require. However, the failure of the controlling United States shareholders to provide such notice to a person required to be notified thereunder shall not invalidate the election made or the adoption or change of method effected, if it is established to the satisfaction of the Commissioner that reasonable cause existed for such failure.

(4) *Effect of action by controlling United States shareholders.* Any action taken by the controlling United States shareholders on behalf of the foreign corporation pursuant to subparagraph (3) of this paragraph shall be reflected in the computation of the earnings and profits of such corporation under this section to the extent that it bears upon the tax liability of a United States shareholder who either—

(i) Was a controlling United States shareholder with respect to the action taken;

(ii) Received the written notice provided by subparagraph (3)(iii) of this paragraph;

(iii) Failed to file any of the returns required by section 6046 and the regulations thereunder within the period prescribed by section 6046(d); or

(iv) Was notified by the Director of the Philadelphia Service Center of the action taken—

(a) Within 61 days after the last day (including extensions of time) prescribed with respect to the taxable year of the foreign corporation by subparagraph (3)(ii) of this paragraph for filing the written statement described in such subparagraph, or

(b) Within 180 days after the close of the first taxable year in which such shareholder becomes a United States shareholder, whichever is later.

To the extent that the computation of the earnings and profits of the foreign corporation bears upon the tax liability of any United States shareholder other than those enumerated in the preceding sentence, the computation shall reflect the action taken only if such shareholder assents to such treatment. Such assent may be given at any time, but not later than 90 days after the shareholder is first apprised of such action by the Director of the Philadelphia Service Center. The shareholder shall signify his assent by filing a written statement with the Director of the Internal Revenue Service Center, 11601 Roosevelt Blvd., Philadelphia, Pennsylvania, 19155, setting forth the name and country of organization of the foreign corporation, his own name, address, and stock interest in the corporation, the nature of the action being assented to, and such other information as the Commissioner may by forms require.

(5) *Controlling United States shareholders.* For purposes of this paragraph the controlling United States shareholders of a foreign corporation shall be those United States shareholders (as defined in section 951(b)), who, in the aggregate, own (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of the stock of such corporation entitled to vote and who undertake to act on its behalf. In the event that the foreign corporation is not a controlled foreign corporation but is included in a chain or group under section 963(c)(2)(B) or (3)(B), the controlling United States shareholder with respect to such foreign corporation shall be deemed to be the domestic corporation which elects to receive the minimum distribution from such chain or group. In the event that the foreign corporation is neither a controlled foreign corporation nor included in a chain or group under section 963(c)(2)(B) or (3)(B) but has a deficit in earnings and profits sought to be taken into account under section 952(d), the controlling United States shareholder with respect to such foreign corporation shall be the shareholder seeking to take such deficit into account. In the event that the foreign corporation is a controlled foreign corporation but the United States shareholders (as defined in section 951(b)) do not, in the aggregate, own (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of the stock of such corporation entitled to vote, the controlling United States shareholders of the foreign corporation shall be all those United States shareholders who own (within the meaning of section 958(a)) stock of such corporation. In the event that a foreign corporation is not a controlled foreign corporation but pays a dividend to a controlled foreign corporation that is attributable to foreign base company shipping income under §1.954–6(f), the controlling United States shareholders (as defined in this subparagraph) of the controlled foreign corporation shall be considered the controlling United States shareholders of the foreign corporation.

(6) *Action not required until significant.* Notwithstanding any other provision of this paragraph, action by or on behalf of a foreign corporation (other than a foreign corporation subject to tax under section 882) to make an election or to adopt a method of accounting shall not be required until 180 days after the close of the first taxable year for which—

(i) An amount is includible in gross income with respect to such corporation under section 951(a);

(ii) It is sought to be established that such corporation is a less developed country corporation (within the meaning of section 955(c), as in effect before the enactment of the Tax Reduction Act of 1975);

(iii) An amount is excluded from Subpart F income (within the meaning of section 952) by section 952(c), section 952(d), or section 970(a);

(iv) Such corporation is the subject of an election to secure an exclusion under section 963 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975); or

(v) It is sought to be established that the corporation has foreign base company shipping income (within the meaning of section 954(f)).

In the event that action by or on behalf of the foreign corporation is not undertaken by the time specified in the preceding sentence and such failure is shown to the satisfaction of the Commissioner to be due to inadvertence or a reasonable cause, such action may be undertaken during any period of at least 30 days occurring after such showing is made which the Commissioner may specify as appropriate for this purpose. Where the action necessary to make an election or to adopt a method of accounting is undertaken by or on behalf of the foreign corporation in accordance with this subparagraph, such election shall be deemed to have been made, or such adoption of accounting method effected, for the first taxable year of the foreign corporation beginning after December 31, 1962, in which such corporation is a controlled foreign corporation (within the meaning of section 957) or for which it is included in a chain or group under section 963(c)(2)(B) or (3)(B) (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975) or has a deficit in earnings and profits sought to be taken into account under section 952(d) or pays a dividend that is included in the foreign base company shipping income of a controlled foreign corporation under § 1.954–6(f). For special rules for computing earnings and profits for purposes of section 1248 or income for purposes of applying an exclusion set forth in section 954(b) where the taxable year of the foreign corporation occurs prior to the making of elections or the adoption of methods of accounting under this subparagraph, see the regulations under section 952 and section 1248.

(7) *Revocation of election.* Notwithstanding any other provision of this section, any election made by or on behalf of a foreign corporation (other than a foreign corporation subject to tax under section 882) may be modified or revoked by or on behalf of such corporation for the taxable year for which made whenever the consent of the Commissioner is secured for such modification or revocation, even though such election would be irrevocable but for this subparagraph.

(8) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. X Corporation is a controlled foreign corporation which maintains its books, in accordance with the laws of the country in which it operates, by taking inventoriable items into account under the ‘‘first-in, first-out’’ method. A, B, and C, the United States shareholders of X Corporation, own 45 percent, 30 percent, and 25 percent of its voting stock, respectively. For the first taxable year of X Corporation beginning after December 31, 1962, B and C adopt on its behalf the ‘‘last-in, first-out’’ inventory method, notifying A of the action taken. Even though A may object to such action, adjustments must be made to reflect the use of the LIFO method of inventorying in the computation of the earnings and profits of X Corporation with respect to him as well as with respect to B and C.

Example 2. Y Corporation is a controlled foreign corporation which maintains its books, in accordance with the laws of the country in which it operates, by employing the straight-line method of depreciation. D and E, the United States shareholders of Y Corporation, own 51 percent and 10 percent of its voting stock, respectively. For the first taxable year of Y Corporation beginning after December 31, 1962, D adopts on its behalf the declining balance method of depreciation. However, not knowing that E is a United States shareholder of the company, D fails to provide him with notice of the action taken. Assuming that E has filed the return required by section 6046 and the regulations thereunder within the period prescribed by section 6046(d), adjustments in the computation of earnings and profits will not be required with respect to him unless the Director of International Operations notifies him of the action taken within 240 days after the close of Y’s taxable year. If notice is not provided to E within this period, he will not be compelled to make the adjustments. At his option, however, he may accept the action taken by assenting thereto not later than 90 days after he is first apprised of such action by the Director of International Operations.

(d) *Translation into United States dollars*—(1) *In general*—(i) *General rule.* Except as provided in subdivisions (ii), (iii), and (iv) of this subparagraph, the amounts to be shown on the profit and loss statement, adjusted pursuant to paragraphs (b) and (c) of this section, shall be translated into United States dollars (as required by paragraph (a)(4) of this section) at the appropriate exchange rate for the translation period (as defined in subparagraph (6) of this paragraph) to which they relate.

(ii) *Cost of goods sold.* Amounts representing items of inventory reflected in the cost of goods sold shall be translated—

(a) To the extent that such amounts represent items included in the opening inventory balance, so as to obtain the same amount of United States dollars which represented (after translation and adjustment) such items in the closing inventory balance for the preceding taxable year,

(b) To the extent that such amounts represent items purchased or otherwise first included in inventory during the taxable year, at the appropriate exchange rate for the translation period in which the historical cost of such items was incurred, and

(c) To the extent that such amounts represent items included in the closing inventory balance, at the appropriate exchange rate for the translation period in which the historical cost of such items was incurred, except that, if such amounts are written down to market value, such market value shall be determined at the year-end rate. Notwithstanding the preceding sentence, amounts representing items of inventory included in the closing inventory balance may be translated at the year-end rate even though not written down to market value; however, once such a rate is employed under those circumstances, translation may not be made for subsequent taxable years at the appropriate exchange rate for the translation period in which the historical cost of the items of inventory was incurred unless the permission of the Commissioner is secured.

(iii) *Depreciation, depletion, and amortization.* Amounts representing allowances for depreciation, depletion, or amortization shall be translated at the appropriate exchange rate for the translation period in which the historical cost of the underlying asset was incurred or is deemed to have been incurred. For purposes of this subdivision, if the historical cost of an asset is determined under paragraph (b)(2) of this section, such cost shall be deemed to have been incurred on the date the asset is considered to have been purchased under that paragraph.

(iv) *Prepaid expenses or income.* Amounts representing expenses or income paid or received in a prior taxable year shall be translated at the appropriate exchange rate for the translation period during which they were paid or received. Notwithstanding the preceding sentence, amounts representing such prepaid income or expenses may be translated at the year-end rate; however, once such a rate is employed, translation may not be made for subsequent taxable years at the appropriate exchange rate for the translation period during which such income or expenses were paid or received unless the permission of the Commissioner is secured.

(2) *Appropriate exchange rate*—(i) *In general.* Where the value of the foreign currency relative to the United States dollar does not fluctuate substantially during a translation period, a single exchange rate shall be appropriate for all amounts representing classes of items which relate to such period, such rate to be a simple average determined by dividing the sum of the closing rates for each of the calendar months ending with or within such period by the number of such months. On the other hand, where the value of the foreign currency relative to the United States dollar does fluctuate substantially during a translation period, the exchange rate appropriate to an amount representing a class of items which relates to such period shall be either *(a)* a simple average determined in accordance with the preceding sentence, or *(b)* a weighted average taking into account the volume of transactions (reflected by the amount being translated) for the calendar months ending with or within such period, depending upon which average would produce a result more representative of that which would have been obtained by translating the individual transactions reflected by that amount at the closing rate for the month to which each such transaction relates. Whether the value of the foreign currency relative to the United States dollar fluctuates substantially during the translation period is a question of fact, depending upon, among other things, the extent to which the volume of transactions varies from month to month. In general, however, the degree of fluctuation will be considered substantial if the closing rate for any calendar month ending with or within the translation period varies by more than 10 percent from the closing rate for any preceding calendar month ending within that period.

(ii) *Monthly rate.* Notwithstanding subdivision (i) of this subparagraph, if it is so elected by or on behalf of the foreign corporation, and if the closing rate for any calendar month ending with or within a translation period does not vary by more than 3 percent from the closing rate for any preceding calendar month ending within that period, the appropriate exchange rate for amounts representing all classes of items relating to such period shall be any exchange rate which is designated in the election and which does not vary by more than 3 percent from the closing rate for any calendar month ending with or within such period. An election under this subdivision may be made with respect to any translation period of any taxable year of the foreign corporation beginning after December 31, 1962. Such election shall be effective only with respect to the translation period for which it is made, and once made shall be irrevocable with respect to that period. See paragraph (c)(3) of this section for the time and manner in which an election may be made on behalf of the foreign corporation.

(iii) *Class of items.* For purposes of this subparagraph, the term ''class of items'' means any category which is reflected separately on books of account or financial statements. For example, sales is a class of items which is reflected separately on the profit and loss statement, and accounts receivable is a class of items which is reflected separately on the balance sheet.

(3) *Closing rate.* The closing rate for any calendar month shall be the exchange rate on the last day of that month determined by reference to a qualified source of exchange rates within the meaning of subparagraph (5) of this paragraph.

(4) *Year-end rate.* The year-end rate shall be the closing rate for the last calendar month of the taxable year.

(5) *Qualified source of exchange rates.* A qualified source of exchange rates shall be any source which is demonstrated to the satisfaction of the district director to reflect actual transactions conducted in a free market and involving representative amounts. In the absence of such a demonstration, the exchange rates taken into account in the computation of the earnings and profits of the foreign corporation shall be determined by reference to the free market rate set forth in the pertinent monthly issue of ''International Financial Statistics'' or a successor publication of the International Monetary Fund, or such other source of exchange rates reflecting actual transactions conducted in a free market and involving representative amounts as the Commissioner may designate as appropriate for this purpose.

(6) *Translation period*—(i) *In general.* Except as provided in subdivision (ii) of this subparagraph, the translation period shall be a taxable year.

(ii) *Currency fluctuations.* If it is so elected by or on behalf of the foreign corporation, the taxable year shall be divided into groups consisting of a calendar month or consecutive calendar months as specified in the election, each such group constituting a separate translation period. Where the value of the foreign currency relative to the United States dollar fluctuates substantially during the taxable year, the use of the weighted average referred to in subparagraph (2)(i) of this paragraph ordinarily may be avoided by dividing the taxable year into translation periods so that the first translation period begins with the first day of such year and each subsequent translation period begins with the first day of the first calendar month thereafter ending with or within such year for which the closing rate varies by more than 10 percent from the closing rate for any month in the preceding translation period. An election under this subdivision may be made with respect to any taxable year of the foreign corporation beginning after December 31, 1962. Such election shall be effective only with respect to the taxable year for which it is made, and once made shall be irrevocable with respect to such year. For the time and manner in which an election may be made on behalf of the foreign corporation, see paragraph (c)(3) of this section.

(7) *Actual transactions.* Notwithstanding any other provisions of this paragraph—

(i) *Dollar transactions.* Any transaction involving the payment or receipt of United States dollars shall be reflected in the profit and loss statement by the amount of United States dollars involved in such transaction.

(ii) *Conversion transactions.* Any transaction involving the conversion of a foreign currency into United States dollars, or the conversion of United States dollars into a foreign currency, shall be reflected in the profit and loss statement by an amount expressed in United States dollars and determined by translation at the exchange rate at which conversion was effected if the foreign corporation knows, or reasonably should know, that exchange rate.

(iii) *Daily rate.* Any transaction other than one described in subdivision (i) or (ii) may be translated into United States dollars at the exchange rate for the day on which that transaction occurred, such rate to be determined by reference to a qualified source of exchange rates within the meaning of subparagraph (5) of this paragraph.

No transaction shall be required to be taken into account under subdivision (i) or (ii) unless the United States dollars involved are material in amount.

(8) *Other methods.* Notwithstanding the other provisions of this paragraph, translation into United States dollars may be made in accordance with a system or method not otherwise described in this paragraph, provided that such system or method (i) was employed by the corporation for purposes of accounting to its shareholders prior to January 1, 1963, and (ii) is shown to the satisfaction of the Commissioner to clearly reflect the earnings and profits of the corporation.

(9) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. M Corporation, a controlled foreign corporation organized on January 1, 1963, employs the calendar year as its taxable year and maintains its books of account in abbas, the currency of the country in which it operates. During 1963 M Corporation's monthly sales amounted to 100,000 abbas per month, its total payroll and other expenses for the year amounted to 180,000 abbas, and its total inventory purchases amounted to 1,050,000 abbas. Also during 1963, M Corporation purchased depreciable assets for 1,000,000 abbas. The value of the abba relative to the United States dollar fluctuated only slightly in 1963; the monthly closing rate moved between 19.8 abbas and 20.2 abbas per United States dollar and stood at 19.9 abbas per United States dollar for most of the year and at yearend. An election under subparagraph (2)(ii) of this paragraph is made on behalf of M Corporation to use the par rate of 20 abbas per United States dollar as the exchange rate appropriate for 1963. Assuming that none of the amounts shown therein reflects a transaction described in subparagraph (7) of this paragraph, M Corporation's adjusted profit and loss statement for 1963 would be translated into United States dollars as follows:

	Local currency	Exchange rate	U.S. dollars
Sales	1,200,000	20:1	60,000
Cost of goods sold:			
Purchases	1,050,000	20:1	52,500
Less: Closing inventory	(350,000)	20:1	(17,500)
	700,000	....	35,000
Wages and other expenses	180,000	20:1	9,000
Depreciation	200,000	20:1	10,000
Total costs and expenses	1,080,000	....	54,000
Operating profit	120,000	....	6,000

Example 2. The facts are the same as in example 1 and in addition during 1964 M Corporation had annual sales of 1,470,000 abbas, annual wages and other expenses of 252,000 abbas, and inventory purchases of 910,000 abbas. Also during 1964, M Corporation purchased additional depreciable assets for 430,000 abbas, the bulk of such purchases being made in the last half of the year. The value of the abba relative to the United States dollar gradually declined in 1964, the monthly closing rate moving from 19.9 abbas per United States dollar down to 22 abbas per United States dollar. For most classes of items, the appropriate exchange rate is a simple average of monthly closing rates or 21 abbas per United States dollar. However, since the bulk of the depreciable asset purchases were made in the last half of the year, the rate representative of those transactions is a weighted average of 21.5 abbas per United States dollar. Assuming that none of the amounts shown therein reflects a transaction described in subparagraph (7) of this paragraph and that closing inventory is translated at historical rates, M Corporation's adjusted profit and loss statement for 1964 would be translated into United States dollars as follows:

	Local currency	Exchange rate	U.S. dollars
Sales	1,470,000	21:1	70,000
Cost of goods sold:			
Opening inventory	350,000	20:1	17,500
Purchases	910,000	21:1	43,333
Less: Closing inventory	(418,000)	21:1	(19,905)
	842,000	....	40,928
Wages and other expenses	252,000	21:1	12,000
Depreciation:			
1963 assets	150,000	20:1	7,500
1964 assets	86,000	21.5:1	4,000

	Local currency	Exchange rate	U.S. dollars
Total costs and expenses	1,330,000	....	64,428
Operating profit	140,000	....	5,572

Example 3. The facts are the same as in examples 1 and 2 except that the 1964 sales of M Corporation amounted to 1,260,000 abbas plus $10,500 in United States dollars. Assuming that closing inventory is translated at historical rates, M Corporation's adjusted profit and loss statement for 1964 would be translated as follows:

	Local currency	Exchange rate	U.S. dollars
Sales—Abbas	1,260,000	21:1	60,000
Sales—U.S. dollars	215,250	[1]	10,500
Total sales	1,475,250	....	70,500
Cost of goods sold:			
Opening inventory	350,000	20:1	17,500
Purchases	910,000	21:1	43,333
Less: Closing inventory	(418,000)	21:1	19,905
	842,000	....	40,928
Wages and other expenses	252,000	21:1	12,000
Depreciation:			
1963 assets	150,000	20:1	7,500
1964 assets	86,000	21.5:1	4,000
Total costs and expenses	1,330,000	....	64,428
Operating profit	145,250	....	6,072

[1] Transaction.

Example 4. The facts are the same as in examples 1 and 2. M Corporation continues to operate during 1965 and the value of the abba relative to the United States dollar declines materially during that year; the monthly closing rate drops from 22 abbas per United States dollar to 26 abbas per United States dollar, a decrease of more than 10 percent. An election under subparagraph (6)(ii) of this paragraph is made on behalf of M Corporation to divide the year into translation periods, the applicable periods being January 1 through July 31 and August 1 through December 31. For most classes of items, the appropriate exchange rate for each of these translation periods is a simple average of monthly closing rates, or 23 abbas and 25 abbas per United States dollar, respectively. However, all of the depreciable asset purchases were made at the end of the first translation period—January 1 through July 31—and, therefore, the rate representative of those transactions is a weighted average of 24 abbas per United States dollar. The classes of items reflecting M Corporation's 1965 financial transactions and the representative rates of exchange for such classes of items are as follows:

	Local currency	Exchange rate
Sales:		
Jan. 1–July 31	1,000,000	23:1
Aug. 1–Dec. 31	500,000	25:1
Inventory purchases:		
Jan. 1–July 31	559,000	23:1
Aug. 1–Dec. 31	361,000	25:1
Expenses:		
Jan. 1–July 31	115,000	23:1
Aug. 1–Dec. 31	145,000	25:1
Fixed asset purchases	216,000	24:1
Closing inventory	430,000	[1]

[1] Historical.

Assuming that M Corporation uses the first-in, first-out method of inventory valuation, the closing inventory is assumed in normal circumstances to consist of purchases made during the most recent translation period as follows:

	Local currency	Exchange rate	U.S. dollars
All of the August-December purchases	361,000	25:1	14,440
Balance from January- July purchases	69,000	23:1	3,000
Total closing inventory	430,000	....	17,440

Assuming that none of the amounts shown therein reflects a transaction described in subparagraph (7) of this paragraph, and that closing inventory is translated at historical rates, M Corporation's adjusted profit and loss statement for 1965 would be translated into United States dollars as follows:

	Local currency	Exchange rate	U.S. dollars
Sales:			
Jan. 1–July 31	1,000,000	23:1	43,478
Aug. 1–Dec. 31	500,000	25:1	20,000
	1,500,000	....	63,478
Cost of goods sold:			
Opening inventory purchases	418,000	21:1	19,905
Jan. 1–July 31	559,000	23:1	24,304
Aug. 1–Dec. 31	361,000	25:1	14,440
Less: Closing inventory	(430,000)	[1]	(17,440)
	908,000	....	41,209
Wages and other expenses:			
Jan. 1–July 31	115,000	23:1	5,000
Aug. 1–Dec. 31	145,000	25:1	5,800
Depreciation:			
1963 assets	120,000	20:1	6,000
1964 assets	64,500	21.5:1	3,000
1965 assets	43,200	24:1	1,800
Total costs and expenses	1,395,700	....	62,809
Operating profit	104,300	....	669

[1] Historical.

(e) *Exchange gain or loss*—(1) *In general.* The exchange gain or loss determined in accordance with subparagraph (2) of this paragraph shall be applied against and reduce, or applied to and increase, as the case may be, the amount of profit or loss shown on the profit and loss statement prepared pursuant to paragraph (a)(1) of this section, as adjusted and translated pursuant to paragraph (a)(2), (3), and (4) of this section. For the manner in which the exchange gain or loss is to be allocated to or applied against Subpart F income, see section 952 and the regulations thereunder.

(2) *Determination of exchange gain or loss.* The exchange gain (or loss) for the taxable year shall be the amount which equals—

(i) The retained earnings for the taxable year as determined under subparagraph (3) of this paragraph, plus

(ii) The amount of any distributions made during the taxable year translated at the exchange rate appropriate to the translation period during which such distributions were made (or taken into account) in accordance with paragraph (d)(7) of this section, if applicable, minus

(iii) The amount representing retained earnings for the preceding taxable year as determined under subparagraph (3) of this paragraph, minus

(iv) The amount of profit (or plus the amount of any loss) shown on the profit and loss statement for the taxable year prepared pursuant to paragraph (a)(1) of this section and adjusted and translated pursuant to paragraph (a)(2), (3), and (4) of this section.

(3) *Retained earnings.* The retained earnings for any taxable year shall be determined by first—

(i) Preparing a balance sheet as of the end of such year from the books of account regularly maintained by the foreign corporation for the purpose of accounting to its shareholders;

(ii) Making the adjustments necessary to conform such balance sheet to the accounting principles described in paragraph (b) of this section;

(iii) Making the further adjustments necessary to conform such balance sheet to the tax accounting standards described in paragraph (c) of this section; and

(iv) Translating the amounts shown on the balance sheet (other than amounts representing retained earnings) into United States dollars in accordance with subparagraph (4) of this paragraph.

The retained earnings shall be an amount equal to the excess of the aggregate amount representing assets on the balance sheet (as adjusted and translated under this subparagraph) over the aggregate amount representing liabilities, reserves (other than reserves out of current or accumulated earnings), and paid- in capital on the balance sheet (as adjusted and translated under this subparagraph).

(4) *Translation of balance sheet.* Amounts shown on the balance sheet as adjusted pursuant to subparagraphs (3)(ii) and (iii) of this paragraph (other than amounts representing retained earnings) shall be translated into United States dollars as follows:

(i) *Financial assets.* Amounts representing financial assets shall be translated at the year-end rate.

(ii) *Physical assets.* Amounts representing physical assets (other than inventory) shall be translated at the appropriate exchange rate for the translation period in which the historical cost of the asset was incurred or is deemed to have been incurred. For special rules for determining date on which the historical cost of certain assets acquired during taxable years beginning before January 1, 1950, or owned at the time a majority interest in the corporation was acquired after December 31, 1949, but before October 27, 1964, is deemed to have been incurred, see paragraph (b)(2) of this section.

(iii) *Depreciation and similar reserves.* Amounts representing depreciation, depletion, and amortization reserves shall be translated at the appropriate exchange rate for the translation period in which the historical cost of the underlying asset was incurred or is deemed to have been incurred.

(iv) *Inventory.* Amounts representing items of inventory included in the closing inventory balance shall be translated in accordance with paragraph (d)(1)(ii) of this section.

(v) *Bad debt reserves.* Amounts representing bad debts reserves shall be translated at the year-end rate.

(vi) *Prepaid income or expense.* Amounts representing expenses or income paid or received in a prior taxable year shall be translated in accordance with paragraph (d)(1)(iv) of this section.

(vii) *Short-term liabilities.* Amounts representing short-term liabilities shall be translated at the year-end rate.

(viii) *Long-term liabilities.* Amounts representing long-term liabilities shall be translated at the appropriate exchange rate for the translation period in which such liabilities were incurred.

(ix) *Paid-in capital.* Amounts representing paid-in capital shall be translated at the appropriate exchange rate for the translation period in which such capital was paid in.

Notwithstanding any other provisions of this subparagraph, where the amount representing an item shown on the balance sheet reflects a transaction described in paragraph (d)(7) of this section, such transaction shall be taken into account in accordance with that paragraph.

(5) *Definitions.* For purposes of this paragraph—

(i) *Financial assets.* A financial asset shall be any asset reflecting a fixed amount of foreign currency, such as cash on hand, bank deposits, and loans and accounts receivable. Securities (within the meaning of section 1236(c)) shall be considered physical assets if they have been or are reasonably expected to be held for at least six months; if not they shall be considered financial assets whether or not they reflect a fixed amount of foreign currency. Moreover, advances on open account to any corporation in which the foreign corporation and any related persons (within the meaning of section 954(d)(3) and the regulations thereunder) with respect thereto own at least 10 percent of the combined voting power of all classes of stock entitled to vote shall not be considered financial assets if such advances have remained open for more than one year.

(ii) *Physical assets.* A physical asset shall be any asset other than a financial asset and shall include goodwill, patents, and other intangibles.

(iii) *Short-term liabilities.* A short-term liability shall be any indebtedness of the foreign corporation which is due or overdue as of the date of the balance sheet or which will become due within 1 year thereafter.

(iv) *Long-term liabilities.* A long- term liability is any indebtedness of the foreign corporation other than a short-term liability.

For the definition of ‘‘appropriate exchange rate’’, ‘‘year-end rate’’, and ‘‘translation period’’, see paragraphs (d)(2), (4), and (6), respectively, of this section.

(6) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. N Corporation is a controlled foreign corporation which uses the calendar year as its taxable year and which maintains its books in yuccas, the currency of the country in which it operates. For 1963, its operating profit is 140,000 yuccas or $55,720. At the end of the year, its balance sheet, as translated and adjusted pursuant to subparagraph (3) of this paragraph, is as follows:

	Local currency	Exchange rate	U.S. dollars
Cash	77,000	2.20:1	35,000
Accounts receivable	209,000	2.20:1	95,000
Inventory	418,000	[1]	199,050
Fixed assets	1,430,000	[1]	700,000
Less: Accumulated depreciation	(436,000)	[1]	(215,000)
Total assets	1,698,000		814,050
Current liabilities	338,000	2.20:1	153,640
Long-term liabilities	300,000	[1]	150,000
Paid-in capital	800,000	[1]	400,000
Retained earnings	260,000		110,410
Total liabilities and net worth	1,698,000		814,050

[1] Historical.

N Corporation’s retained earnings for 1962 are determined on the basis of its balance sheet as of the end of that year, translated as follows:

	Local currency	Exchange rate	U.S. dollars
Cash	70,000	2.00:1	35,000
Accounts receivable	180,000	2.00:1	90,000
Inventory	350,000	[1]	175,000
Fixed assets	1,000,000	[1]	500,000
Less: Accumulated depreciation	(200,000)	[1]	(100,000)
Total assets	1,400,000		700,000

	Local currency	Exchange rate	U.S. dollars
Current liabilities	180,000	2.00:1	90,000
Long-term liabilities	300,000	[1]	150,000
Paid-in capital	800,000	[1]	400,000
Retained earnings	120,000		60,000
Total liabilities and net worth	1,400,000		700,000

[1] Historical.

The exchange gain or loss of N Corporation for 1963 may be computed as follows:

Retained earnings—1963		$110,410
Less:		
Retained earnings—1962	$60,000	
Operating profit—1963	55,720	115,720
Exchange loss		(5,310)

Example 2. Assume the same facts as in example 1. For 1964, N Corporation's operating profit is 104,300 yuccas or $15,740. It pays a dividend of 26,000 yuccas during a translation period when the appropriate exchange rate is 2.60 yuccas per United States dollar. At year-end, its balance sheet, as translated and adjusted pursuant to subparagraph (3) of this paragraph, is as follows:

	Local currency	Exchange rate	U.S. dollars
Cash	91,000	2.60:1	35,000
Accounts receivable	260,000	2.60:1	100,000
Inventory	430,000	[1]	174,400
Fixed assets	1,646,000	[1]	790,000
Less: Accumulated depreciation	(663,700)	[1]	(323,000)
Total assets	1,763,300		776,400
Current liabilities	325,000	2.60:1	125,000
Long-term liabilities	300,000	[1]	150,000
Paid-in capital	800,000	[1]	400,000
Retained earnings	338,300		101,400
Total liabilities and net worth	1,763,300		776,400

[1] Historical.

The exchange gain or loss of N Corporation for 1964 would be computed as follows:

Retained earnings—1964		$101,400
Add:		
Dividends—1964		10,000
Predistribution earnings		111,400
Less:		
Retained earnings—1963	$110,410	
Operating profit—1964	15,740	126,150
Exchange loss		(14,750)

(f) *Determination of earnings and profits as if a domestic corporation*—(1) *In general.* If the books of account regularly maintained by a foreign corporation for the purpose of accounting to its shareholders are kept in U.S. dollars and in accordance with accounting principles generally accepted in the United States, and if it is so elected by or on behalf of such corporation, the earnings and profits of the foreign corporation for a taxable year shall, except as otherwise provided in paragraph (f)(2) of this section, be determined in every respect as if it were a domestic corporation. Such election shall be effective only for the taxable year with respect to which the election is made. Once made, such election shall be irrevocable. See paragraph (c)(3) of this section for the time and manner in which an election may be made on behalf of a foreign corporation.

(2) *Illegal payments.* The amount of any illegal bribe, kickback, or other payment (within the meaning of section 162(c), as amended by section 288 of the Tax Equity and Fiscal Responsibility Act of 1982 in the case of payments made after September 3, 1982, and the regulations thereunder) paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government shall not be taken into account to decrease earnings and profits or increase the deficit in earnings and profits otherwise determined under paragraph (f)(1) of this section.

[T.D. 6764, 29 FR 14628, Oct. 27, 1964; 29 FR 15204, Nov. 11, 1964, as amended by T.D. 6787, 29 FR 18502, Dec. 29, 1964; T.D. 6995, 34 FR 832, Jan. 18, 1969; T.D. 7221, 37 FR 24747, Nov. 21, 1972; T.D. 7322, 39 FR 30931, Aug. 27, 1974; T.D. 7545, 43 FR 19652, May 8, 1978; T.D. 7862, 47 FR 56491, Dec. 17, 1982; T.D. 7893, 48 FR 22510, May 19, 1983]

§ 1.964–1T Special rules for computing earnings and profits of controlled foreign corporations in taxable years beginning after December 31, 1986 (temporary).

(a)–(f) [Reserved]

(g)(1) *Earnings and profits computed in functional currency*—(i) *Rule.* For taxable years of a controlled foreign corporation (within the meaning of section 957) beginning after December 31, 1986, earnings and profits shall be computed in the controlled foreign corporation's functional currency (determined under section 985 and the regulations thereunder) in accordance with § 1.964–1 as modified by this paragraph (g). Accordingly, § 1.964–1 (d), (e), and (f) and (to the extent inconsistent with this paragraph (g)) § 1.964–1(c) do not apply for taxable years of a controlled foreign corporation beginning after December 31, 1986. For purposes of this section, the term ''earnings and profits'' includes a deficit in earnings and profits.

(ii) *Cross reference.* In the case of a controlled foreign corporation with a functional currency other than the United States dollar (dollar), see sections 986(b) and 989(b) for rules regarding the time and manner of translating distributions or inclusions of the controlled foreign corporation's earnings and profits into dollars.

(2) *Election required when first significant.* Tax accounting methods or elections may be adopted or made by, or on behalf of, a controlled foreign corporation in the manner prescribed by the Code and regulations no later than 180 days after the close of the first taxable year of the controlled foreign corporation in which the computation of its earnings and profits is significant for United States income tax purposes with respect to its controlling United States shareholders (as defined in § 1.964–1(c)(5)). For taxable years of a controlled foreign corporation beginning before January 1, 1989, only the events listed in § 1.964–1(c)(6) are considered to cause a controlled foreign corporation's earnings and profits to have United States tax significance. For taxable years of a controlled foreign corporation beginning after December 31, 1988, events that cause a controlled foreign corporation's earnings and profits to have United States tax significance include, without limitation—

(i) The events listed in § 1.964–1(c)(6),

(ii) A distribution from the controlled foreign corporation to its shareholders with respect to their stock,

(iii) Any event making the controlled foreign corporation subject to tax under section 882,

(iv) An election by the controlled foreign corporation's controlling United States shareholders to use the tax book value method of allocating interest expense under section 864(e)(4), and

(v) A sale or exchange of the controlled foreign corporation's stock by the controlling United States shareholders.

The filing of the information return required by section 6038 shall not itself constitute a significant event.

(3) *Effect of failure to make required election.* If an accounting method or election is not timely adopted or made by, or on behalf of, a controlled foreign corporation, and such failure is not shown to the satisfaction of the Commissioner to be due to reasonable cause under § 1.964–1(c)(6), earnings and profits shall be computed in accordance with this section. Such computation shall be made as if no elections had been made and any permissible accounting methods not requiring an election and reflected in the books of account regularly maintained by the controlled foreign corporation for the purpose of accounting to its shareholders had been adopted. Thereafter, any change in a particular accounting method or methods may be made by, or on behalf of, the controlled foreign corporation only with the Commission's consent.

(4) *Computation of earnings and profits by a minority shareholder prior to majority election or significant event.* A minority United States shareholder (as defined in section 951(b)) of a controlled foreign corporation may be required to compute a controlled foreign corporation's earnings and profits before the controlled foreign corporation or its controlling United States shareholders make, or are required under this section to make, an election or adopt a method of accounting for United States tax purposes. In such a case, the minority United States shareholder must compute earnings and profits in accordance with this section. Such computation shall be made as if no elections had been made and any permissible accounting methods not requiring an election and reflected in the books of account regularly maintained by the controlled foreign corporation for the purpose of accounting to its shareholders had been adopted. However, a later, properly filed, and timely election or adoption of method by, or on

behalf of, the controlled foreign corporation shall not be treated as a change in accounting method.

(5) *Binding effect.* For taxable years beginning after December 31, 1986, except as otherwise provided in the Code or regulations, earnings and profits of a controlled foreign corporation shall be computed consistently under the rules of sections 964(a) and 986(b) for all federal income tax purposes. An election or adoption of a method of accounting for United States tax purposes by a controlled foreign corporation, or on its behalf pursuant to § 1.964–1(c) or any other provision of the regulations (*e.g.*, § 1.985–2(c)(3)), shall bind both the controlled foreign corporation and its United States shareholders as to the computation of the controlled foreign corporation's earnings and profits under section 964(a) for the year of the election or adoption and in subsequent taxable years unless the Commissioner consents to a change. The preceding sentence shall apply regardless of—

(i) Whether the election or adoption of a method of accounting was made in a pre-1987 or a post-1986 taxable year;

(ii) Whether the controlled foreign corporation was a controlled foreign corporation at the time of the election or adoption of method;

(iii) When ownership was acquired; or

(iv) Whether the United States shareholder received the written notice required by § 1.964–1(c)(3).

Adjustments to the appropriate separate category (as defined in § 1.904–5(a)(1)) of earnings and profits and income of the controlled foreign corporation shall be required using the principles of section 481 to prevent any duplication or omission of amounts attributable to previous years that would otherwise result from any such election or adoption.

(6) *Examples.* The following examples illustrate the rules of this section.

Example 1—(i) *P,* a calendar year domestic corporation, owns all of the outstanding stock of *FX,* a calendar year controlled foreign corporation. None of the significant events specified in § 1.964–1(c)(6) or this section has occurred. In addition, neither *P* nor *FX* has ever made or adopted, or been required to make or adopt, an election or method of accounting for United States tax purposes with respect to *FX*. On June 1, 1990, *FX* makes a distribution to *P*. *FX* does not act to make any election or adopt a method of accounting for United States tax purposes.

(ii) *P* must compute *FX*'s earnings and profits in order to determine if any portion of the distribution is taxable as a dividend and to determine *P*'s foreign tax credit on such portion under section 902. *P* must satisfy the requirements of § 1.964–1(c)(3) and file the written statement and notice described therein within 180 days after the close of *FX*'s 1990 taxable year in order to make an election or to adopt a method of accounting on behalf of *FX*. Any such election or adoption will govern the computation of earnings and profits of *FX* for all federal income tax purposes (including, *e.g.*, the determination of foreign tax credits on subpart F inclusions) in 1990 and subsequent taxable years unless the Commissioner consents to a change.

(iii) If *P* fails to satisfy the regulatory requirements in a timely manner and such failure is not shown to the satisfaction of the Commissioner to be due to reasonable cause, the earnings and profits of *FX* shall be computed as if no elections were made and any permissible methods of accounting not requiring an election and reflected in its books were adopted. Any subsequent attempt by *FX* or *P* to change an accounting method shall be effective only if the Commissioner consents to the change.

Example 2—(i) The facts are the same as in *Example 1,* except that *P* elects to allocate its interest expense under section 864(e)(4) for its 1989 taxable year under the tax book value method of § 1.861–12T(c) of the Temporary Income Tax Regulations.

(ii) *P* must compute the earnings and profits of *FX* in order to determine the adjustment to *P*'s basis in the stock of *FX* for *P*'s 1989 taxable year. *P* must satisfy the requirements of § 1.964–1(c)(3) and file the written statement and notice described therein within 180 days after the close of *FX*'s 1989 taxable year in order to make an election or to adopt a method of accounting on behalf of *FX*. Any such election or adoption will govern the computation of *FX*'s earnings and profits in 1989 and subsequent taxable years for all federal income tax purposes (including, *e.g.*, the characterization of the June 1, 1990 distribution and the determination of *P*'s foreign tax credit, if any, with respect thereto) unless the Commissioner consents to a change.

(iii) If *P* fails to satisfy the regulatory requirements in a timely manner and such failure is not shown to the satisfaction of the Commissioner to be due to reasonable cause, the earnings and profits of *FX* shall be computed as if no elections were made and any permissible methods of accounting not requiring an election and reflected in its books were adopted. Any subsequent attempt by *FX* or *P* to change an accounting method shall be effective only if the Commissioner consents to the change.

Example 3—(i) The facts are the same as in *Example 2,* except that *P* elects to allocate its interest expense under section 864(e)(4) for its 1988 taxable year under the tax book value method of §1.861–12T (c) of the Temporary Income Tax Regulations.

(ii) *P* must compute the earnings and profits of *FX* in order to determine the adjustment to *P*'s basis in the stock of *FX* for *P*'s 1988 taxable year. *P* must satisfy the requirements of §1.964–1(c)(3) and file the written statement and notice described therein within 180 days after the close of *FX*'s 1988 taxable year in order to make an election or to adopt a method of accounting on behalf of *FX*. Any such election or adoption will govern the computation of *FX*'s earnings and profits in 1988 and subsequent taxable years for all federal income tax purposes (including, *e.g.*, *P*'s basis adjustment for purposes of section 864(e)(4) in 1989 and the characterization of the June 1, 1990 distribution and the determination of *P*'s foreign tax credit, if any, with respect thereto) unless the Commissioner consents to a change.

(iii) If *P* fails to satisfy the regulatory requirements in a timely manner and such failure is not shown to the satisfaction of the Commissioner to be due to reasonable cause, the earnings and profits of *FX* for 1988 shall be computed as if no elections were made and any permissible methods of accounting not requiring an election and reflected in its books were adopted. However, a properly filed, timely election or adoption of method by, or on behalf of, *FX* with respect to its 1989 taxable year, when *P*'s basis adjustment for purposes of section 864(e)(4) first constitutes a significant event, shall not be treated as a change in accounting method. No recomputation of *P*'s basis adjustment for 1988 shall be required by reason of any such election or adoption of method with respect to *FX*'s 1989 taxable year, but prospective adjustments to *FX*'s earnings and profits and income shall be made to the extent required by §1.964–1T(g)(5).

Example 4—(i) The facts are the same as in *Example 3,* except that *FX* had subpart F income taxable to *P* in 1986, and *P* computed *FX*'s earnings and profits for purposes of determining the amount of the inclusion and the foreign taxes deemed paid by *P* in 1986 under section 960 pursuant to §1.964–1 (a) through (e).

(ii) Any election made or method of accounting adopted on behalf of *FX* by *P* pursuant to §1.964–1(c) in 1986 is binding on *P* and *FX* for purposes of computing *FX*'s earnings and profits in 1986 and subsequent taxable years. Thus, in determining *P*'s basis adjustment for purposes of section 864(e)(4) in 1988 and 1989 and its deemed-paid credit with respect to the 1990 dividend, *FX*'s earnings and profits must be computed consistently with the method used by *P* with regard to the 1986 subpart F inclusion. (However, §1.964–1 (d), (e), and (f) do not apply in computing *FX*'s earnings and profits in post-1986 taxable years.)

Example 5—(i) The facts are the same as in *Example 4,* except that *FX* made a dividend distribution to *P* on June 1, 1985, and *P* computed *FX*'s earnings and profits for purposes of computing the foreign taxes deemed paid by *P* in 1985 under section 902 with respect to the distribution under §1.964–1 exclusive of paragraphs (d), (e), and (f) pursuant to a timely election under §1.902–1(g)(1).

(ii) Any election made or method of accounting adopted on behalf of *FX* by *P* pursuant to §1.964–1(c) in 1985 is binding on *P* and *FX* for purposes of computing *FX*'s earnings and profits in 1985 and subsequent taxable years. Thus, in determining *P*'s basis adjustment for purposes of section 864(e)(4) in 1988 and 1989 and its deemed-paid credit with respect to the 1986 subpart F inclusion and the 1990 dividend, *FX*'s earnings and profits must be computed consistently with the method used by *P* with regard to the 1985 dividend. If, rather than choosing under §1.902–1(g)(1) to use the section 964 rules, *P* computed *FX*'s earnings and profits for purposes of section 902 in 1985 in all respects as if *FX* were a domestic corporation, then *P* would have been free to make elections or adopt a method of accounting on behalf of *FX* under §1.964–1(c) with respect to the subpart F inclusion in 1986. Any such election or adoption would be binding on *P* and *FX* as to the computation of *FX*'s earnings and profits in 1986 and subsequent taxable years.

[T.D. 8283, 55 FR 2516, Jan. 25, 1990; 55 FR 7711, Mar. 5, 1990]

§1.964–2 Treatment of blocked earnings and profits.

(a) *General rule.* If, in accordance with paragraph (d) of this section, it is established to the satisfaction of the district director that any amount of the earnings and profits of a controlled foreign corporation for the taxable year (determined under §1.964–1) was subject to a currency or other restriction or limitation imposed under the laws of any foreign country (within the meaning of paragraph (b) of this section) on its distribution to United States shareholders who own (within the meaning of section 958(a)) stock of such corporation, such amount shall not be included in earnings and profits for purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956 for such taxable year. For rules governing the treatment of amounts with respect to which such restriction or limitation is removed, see paragraph (c) of this section.

(b) *Rules of application.* For purposes of paragraph (a) of this section—

(1) *Period of restriction or limitation.* An amount of earnings and profits of a controlled foreign corporation for any taxable year shall not be included in earnings and profits for purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956 only if such amount of earnings and profits is subject to a currency or other restriction or limitation (within the meaning of subparagraph (2) of this paragraph) throughout the 150-day period beginning 90 days before the close of the taxable year and ending 60 days after the close of such taxable year.

(2) *Restriction or limitation defined.* Whether earnings and profits of a controlled foreign corporation are subject to a currency or other restriction or limitation imposed under the laws of a foreign country must be determined on the basis of all the facts and circumstances in each case. Generally, such a restriction or limitation must prevent—

(i) The ready conversion (directly or indirectly) of such currency into United States dollars, or into property of a type normally owned by such corporation in the operation of its business or other money which is readily convertible into United States dollars; or

(ii) The distribution of dividends by such corporation to its United States shareholders.

For purposes of this subparagraph, if a United States shareholder owns (within the meaning of section 958(a)), or is considered as owning by applying the rules of ownership of section 958(b), 80 percent or more of the total combined voting power of all classes of stock of a foreign corporation in a chain of ownership described in section 958(a), the distribution of dividends by such corporation to such shareholder will not be considered prevented solely by reason of the existence of a currency or other restriction or limitation at an intermediate tier in such chain if dividends may be distributed directly to such shareholders.

(3) *Foreign laws.* A currency or other restriction or limitation on the distribution of earnings and profits may be imposed in a foreign country by express statutory provisions, executive orders or decrees, rules or regulations of a governmental agency, court decisions, the actions of appropriate officials who are acting within the scope of their authority, or by any similar official action. A currency restriction will not be considered to exist unless export restrictions are also imposed which prevent the exportation of property of a type normally owned by the controlled foreign corporation in the operation of its business which could be readily converted into United States dollars.

(4) *Voluntary restriction or limitation.* A currency or other restriction or limitation arising from the voluntary act of the controlled foreign corporation or its United States shareholders during a taxable year beginning after December 31, 1962, will not be taken into account. For example, if a controlled foreign corporation—

(i) Issues a stock dividend which has the effect of capitalizing earnings and profits;

(ii) Elects to restrict its earnings and profits or to make certain investments as a means of avoiding current tax or securing a reduced rate of tax; or

(iii) Allocates earnings and profits to an optional or arbitrary reserve; such restriction is voluntary and will not be taken into account.

(5) *Treatment of earnings and profits in cases of certain mandatory reserves*—(i) *In general.* If a controlled foreign corporation is required under the laws of a foreign country to establish a reserve out of earnings and profits for the taxable year, such earnings and profits shall be considered subject to a restriction or limitation by reason of such requirement only to the extent that the amount required to be included in such reserve at the close of the taxable year exceeds the accumulated earnings and profits (determined in accordance with subdivision (ii) of this subparagraph) of such corporation at the close of the preceding taxable year.

(ii) *Determination of earnings and profits.* For purposes of determining the accumulated earnings and profits of a controlled foreign corporation under subdivision (i) of this subparagraph, such earnings and profits shall not include any amounts which are attributable to—

(a) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder under section 951(a) and have not been distributed;

(b) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such foreign corporation under section 551(b) and have not been distributed; or

(c) Amounts which become subject to a voluntary restriction or limitation (within the meaning of subparagraph (4) of this paragraph) during a taxable year beginning before January 1, 1963.

The rules of this subdivision apply only in determining the accumulated earnings and profits of a controlled foreign corporation for purposes of this subparagraph. See section 959 and the regulations thereunder for limitations on the exclusion from gross income of previously taxed earnings and profits.

(6) *Exhaustion of procedures for distributing earnings and profits.* Earnings and profits of a controlled foreign corporation for a taxable year will not be considered subject to a currency or other restriction or limitation on their distribution unless the United States shareholders of such corporation demonstrate either that the available procedures for distributing such earnings and profits have been exhausted or that the use of such procedures will be futile. As a general rule, such procedures will be considered to have been exhausted if the foreign corporation applies for dollars (or foreign currency readily convertible into dollars) at the appropriate rate of exchange and complies with the applicable laws and regulations governing the acquisition and transfer of such currency including submission of the necessary documentation to the exchange authority. The fact that available procedures for distributing earnings and profits were exhausted without success with respect to a prior year is not, of itself, sufficient evidence that such procedures would not be successful with respect to the current taxable year.

(c) *Removal of restriction or limitation*—(1) *In general.* If, during any taxable year, a currency or other restriction or limitation (within the meaning of paragraph (b) of this section) imposed under the laws of a foreign country on the distribution of earnings and profits of a controlled foreign corporation to its United States shareholders is removed—

(i) *Treatment of deferred income.* Each United States shareholder of such corporation on the last day in such year that such corporation is a controlled foreign corporation shall include in his gross income for such taxable year the amounts attributable to such earnings and profits which would have been includible in his gross income under section 951(a) for prior taxable years but for the existence of the currency or other restriction or limitation except that the amounts included under this subdivision (i) shall not exceed his pro rata share of—

(a) The earnings and profits upon which the restriction was removed determined on the basis of his stock ownership on the last day of the immediately preceding taxable year, and

(*b*) The applicable limitations under paragraph (c) of §1.952–1, paragraph (b)(2) of §1.955–1, paragraph (b)(2) of §1.955A–1, or paragraph (b) of §1.956–1, determined as of the last day of the immediately preceding taxable year, taking into account the provisions of subdivision (ii) of this subparagraph.

(ii) *Treatment of earnings and profits.* For purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956, the earnings and profits which are no longer subject to a currency or other restriction or limitation shall be treated as included in the corporation’s earnings and profits for the year in which such earnings and profits were derived.

Amounts with respect to which a currency or other restriction or limitation is removed shall be translated into United States dollars at the appropriate exchange rate for the translation period during which such currency or other restriction or limitation is removed. See paragraph (d) of § 1.964–1. Amounts with respect to which a currency or other restriction or limitation is removed shall not be taken into account in determining whether a deficiency distribution (within the meaning of § 1.963–6 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)) is required to be made for the year in which such earnings and profits were derived.

(2) *Removal of restriction or limitation defined.* An amount of earnings and profits shall be considered no longer subject to a limitation or restriction if and to the extent that—

(i) Money or property in such foreign country is readily convertible into United States dollars, or into other money or property of a type normally owned by such corporation in the operation of its business which is readily convertible into United States dollars;

(ii) Notwithstanding the existence of any laws or regulations forbidding the exchange of money or property into United States dollars, conversion is actually made into United States dollars, or other money or property of a type normally owned by such corporation in the operation of its business which is readily convertible into United States dollars; or

(iii) A mandatory reserve requirement (described in paragraph (b)(5) of this section) is removed either by a change in law of the foreign country imposing such requirement or by an accumulation of earnings and profits not subject to such requirement.

(3) *Distribution in foreign country.* If, during any taxable year, earnings and profits previously subject to a currency or other restriction or limitation are distributed in a foreign country to one or more United States shareholders of a controlled foreign corporation directly, or indirectly through a chain of ownership described in section 958(a), such earnings and profits shall be considered no longer subject to a restriction or limitation. However, distributed amounts may be excluded from such shareholder's gross income for the taxable year of receipt if such shareholder elects a method of accounting under which the reporting of blocked foreign income is deferred until the income ceases to be blocked.

(4) *Source of distribution.* If, during any taxable year, earnings and profits previously subject to a currency or other restriction or limitation is distributed to one or more United States shareholders of a controlled foreign corporation directly, or indirectly through a chain of ownership described in section 958(a), the source of such distribution shall be determined in accordance with the rules of § 1.959–3.

(5) *Illustration.* The provisions of this paragraph may be illustrated by the following example:

Example. (a) M, a United States person, owns all of the only class of stock of A Corporation, a foreign corporation incorporated under the laws of foreign country X on January 1, 1963. Both M and A Corporations use the calendar year as a taxable year and A Corporation is a controlled foreign corporation throughout the period here involved.

(b) During 1963, A Corporation derives income of $100,000 all of which is subpart F income and has earnings and profits of $100,000. Under the laws of X Country, currency cannot be exported without a license. During the last 90 days of 1963 and the first 60 days of 1964, A Corporation can obtain a license to distribute only an amount equivalent to $10,000. M must include $10,000 in his gross income for 1963 under section 951(a)(1)(A)(i) and $90,000 of A Corporation's earnings and profits for 1963 are not taken into account for purposes of sections 952, 955, and 956.

(c) During 1964, A Corporation has no income and no earnings and profits. On June 1, 1964, A Corporation converts an amount equivalent to $20,000 into property of a type normally owned by such corporation in the operation of its business which is readily convertible into United States dollars but does not distribute such amount. Corporation A must include $20,000 in its earnings and profits for 1963 for purposes of sections 952, 955, and 956. M must include $20,000 in his gross income for 1964.

(d) During 1965, A Corporation has no income and no earnings and profits. On December 15, 1965, A Corporation distributes an amount equivalent to $15,000 to M in X Country. Neither M nor A Corporation can obtain a license to export currency from X Country. In his return for the taxable year 1965, M elects a method of accounting under which the reporting of blocked foreign income is deferred until the income ceases to be blocked. Accordingly, M does not include the $15,000 in his gross income for 1965.

(e) During 1966, A Corporation has no income and no earnings and profits. On February 1, 1966, notwithstanding the laws and regulations of X Country which forbid the exchange of X Country's currency into

United States dollars, M converts an amount equivalent to $15,000 into a currency which is readily convertible into United States dollars. Since the income has ceased to be blocked, M must include $15,000 in his gross income for 1966.

(d) *Manner of claiming existence of restriction or limitation on distribution of earnings and profits.* A United States shareholder claiming that an amount of the earnings and profits of a controlled foreign corporation for the taxable year was subject to a currency or other restriction or limitation imposed under the laws of a foreign country on its distribution shall file a statement with his return for the taxable year with or within which the taxable year of the foreign corporation ends which shall include—

(1) The name and address of the foreign corporation,

(2) A description of the classes of stock of the foreign corporation and a statement of the number of shares of each class owned (within the meaning of section 958(a)) or considered as owned (by applying the rules of ownership of section 958(b)) by the United States shareholder,

(3) A description of the currency or other restriction or limitation on the distribution of earnings and profits,

(4) The total earnings and profits of the foreign corporation for the taxable year (before any amount is excluded from earnings and profits under this section) and the United States shareholder's pro rata share of such total earnings and profits,

(5) The United States shareholder's pro rata share of the amount of earnings and profits subject to a restriction or limitation on distribution,

(6) The amounts which would be includible in the United States shareholder's gross income under section 951(a) but for the existence of the currency or other restriction or limitation,

(7) A description of the available procedures for distributing earnings and profits and a statement setting forth the steps taken to exhaust such procedures or a statement setting forth the reasons that the use of such procedures would be futile, and

(8) The amount of distributions made in a foreign country and a statement as to whether a method of accounting has been elected under which the reporting of blocked income is deferred until such income ceases to be blocked, including an identification of the taxable year and place of filing of such election.

In addition, such United States shareholder shall furnish to the district director such other information as he may require to verify the status of a currency or other restriction or limitation.

[T.D. 6892, 31 FR 11142, Aug. 23, 1966, as amended by T.D. 7545, 43 FR 19652, May 8, 1978; T.D. 7893, 48 FR 22510, May 19, 1983]

§ 1.964–3 Records to be provided by United States shareholders.

(a) *Shareholder's responsibility for providing records.* For purposes of verifying his income tax liability in respect of amounts includible in income under section 951 for the taxable year of a controlled foreign corporation each United State shareholder (as defined in section 951(b)) who owns (within the meaning of section 958(a)) stock of such corporation shall, within a reasonable time after demand by the district director, provide the district director—

(1) Such permanent books of account or records as are sufficient to satisfy the requirements of section 6001 and section 964(c), or true copies thereof, as are reasonably demanded, and

(2) If such books or records are not maintained in the English language, either (i) an accurate English translation of such books or records or (ii) the services of a qualified interpreter satisfactory to the district director.

If such books or records are being used by another district director, the United States shareholder upon whom the district director has made a demand to provide such books or records shall file a statement of such fact with his district director, indicating the location of such books or records. For the length of time the United States shareholder of a controlled foreign corporation must cause such books or records as are under his control to be retained, see paragraph (e) of § 1.6001–1.

(b) *Records to be provided.* Except as otherwise provided in paragraph (c) of this section, the requirements of section 6001 and section 964(c) for record keeping shall be considered satisfied if the books or records produced are sufficient to verify for the taxable year—

(1) The subpart F income of the controlled foreign corporation and, if any part of such income is excluded from the income of the United States shareholder under section 963 or section 970(a), the application of such exclusion,

(2) The previously excluded subpart F income of such corporation withdrawn from investment in less developed countries,

(3) The previously excluded subpart F income of such corporation withdrawn from investment in foreign base company shipping operations,

(4) The previously excluded export trade income of such corporation withdrawn from investment, and

(5) The increase in earnings invested by such corporation in United States property.

(c) *Special rules.* Verification of the subpart F income of the controlled foreign corporation for the taxable year shall not be required if—

(1) It can be demonstrated to the satisfaction of the district director that—

(i) The locus and nature of such corporation's activities were such as to make it unlikely that the foreign base company income of such corporation (determined in accordance with paragraph (c)(3) of §1.952–3) exceeded 5 percent of its gross income (determined in accordance with paragraph (b)(1) of §1.952–3) for the taxable year. (For taxable years to which §1.952–3 does not apply, such amounts shall be determined under 26 CFR §1.954–1(d)(3)(i) and (ii) (Revised as of April 1, 1975))), and

(ii) If such corporation reinsures or issues insurance or annuity contracts in connection with United States risks, the 5-percent minimum premium requirement prescribed in paragraph (b) of §1.953–1 has not been exceeded for the taxable year, or

(2) The United States shareholder's pro rata share of such subpart F income is excluded in full from his income under section 963 and the books or records verify the application of such exclusion.

[T.D. 6824, 30 FR 6480, May 11, 1965, as amended by T.D. 7893, 48 FR 22510, May 19, 1983]

§1.964–4 Verification of certain classes of income.

(a) *In general.* The provisions of this section shall apply for purposes of determining when books or records are sufficient for purposes of §1.964–3 to verify the classes of income described in such section.

(b) *Subpart F income.* Books or records sufficient to verify the subpart F income of a controlled foreign corporation must establish for the taxable year—

(1) Its gross income and deductions,

(2) The income derived from the insurance of United States risks (as provided in paragraph (c) of this section),

(3) The foreign base company income (as provided in paragraph (d) of this section), and

(4) In the case of a United States shareholder claiming the benefit of the exclusion provided in section 952(b) or the limitation provided in section 952(c)—

(i) The items of income excluded from subpart F income by paragraph (b) of §1.952–1 as income derived from sources within the United States, the United States income tax incurred with respect thereto, and the deductions properly allocable thereto and connected therewith, and

(ii) The earnings and profits, or deficit in earnings and profits, of any foreign corporation necessary for the determinations provided in paragraphs (c) and (d) of §1.952–1.

(c) *Income from insurance of United States risks.* Books or records sufficient to verify the income of a controlled foreign corporation from the insurance of United States risks must establish for the taxable year—

(1) That the 5-percent minimum premium requirement prescribed in paragraph (b) of §1.953–1 has not been exceeded, or

(2) The taxable income, as determined under §1.953–4 or §1.953–5, which is attributable to the reinsuring or the issuing of any insurance or annuity contracts in connection with United States risks, as defined in §1.953–2 or §1.953–3.

(d) *Foreign base company income and exclusions therefrom.* Books or records sufficient to verify the income of a controlled foreign corporation which is foreign base company income must establish for the taxable year the following items:

(1) *Foreign personal holding company income.* The foreign personal holding company income to which section 954(c) and § 1.954–2 apply, for which purpose there must be established the gross income from—

(i) All rents and royalties,

(ii) Rents and royalties received in the active conduct of a trade or business from an unrelated person, as determined under section 954(c)(3)(A) and paragraph (d)(1) of § 1.954–2,

(iii) Rents and royalties received from a related person for the use of property in the country of incorporation of the controlled foreign corporation, as determined under section 954(c)(4)(C) and paragraph (e)(3) of § 1.954–2,

(iv) All dividends, interest, and except where the controlled foreign corporation is a regular dealer in stock or securities, all gains and losses from the sale or exchange of stock or securities,

(v) Dividends, interest, and gains from the sale or exchange of stock or securities, received in the conduct of a banking, financing, or insurance business from an unrelated person, as determined under section 954(c)(3)(B) and paragraph (d)(2) and (3) of § 1.954–2,

(vi) Dividends and interest received from a related corporation organized in the country of incorporation of the controlled foreign corporation, as determined under section 954(c)(4)(A) and paragraph (e)(1) of § 1.954–2,

(vii) Interest received in the conduct of a banking or other financing business from a related person, as determined under section 954(c)(4)(B) and paragraph (e)(2) of § 1.954–2,

(viii) All annuities,

(ix) All gains from commodities transactions described in section 553(a)(3),

(x) All income from estates and trusts described in section 553(a)(4),

(xi) All income from personal service contracts described in section 553(a)(5), and

(xii) All compensation for the use of corporate property by shareholders described in section 553(a)(6).

(2) *Foreign base company sales income.* The foreign base company sales income to which section 954(d) and § 1.954–3 apply, for which purpose there must be established the gross income from—

(i) All sales by the controlled foreign corporation of its personal property and all purchases or sales of personal property by such corporation on behalf of another person,

(ii) Purchases and/or sales of personal property in connection with transactions not involving related persons (as defined in paragraph (e)(2) of § 1.954–1),

(iii) Purchases and/or sales of personal property manufactured, produced, etc., in the country of incorporation of the controlled foreign corporation, as determined under paragraph (a)(2) of § 1.954–3,

(iv) Purchases and/or sales of personal property for use, etc., in the country of incorporation of the controlled foreign corporation, as determined under paragraph (a)(3) of § 1.954–3, and

(v) Sales of personal property manufactured or produced by the controlled foreign corporation, as determined under paragraph (a)(4) of § 1.954–3.

Where an item of income falls within more than one of subdivisions (ii) through (v) of this subparagraph, it shall be sufficient to establish that it falls within any one of them. If a branch or similar establishment is treated as a wholly owned subsidiary corporation through the application of section 954(d)(2) and paragraph (b) of § 1.954–3, the requirements of this subparagraph shall be satisfied separately for each branch or similar establishment so treated and for the remainder of the controlled foreign corporation.

(3) *Foreign base company services income.* The foreign base company services income to which section 954(e) and § 1.954–4 apply, for which purpose there must be established the gross income from—

(i) All services performed by the controlled foreign corporation,

(ii) Services other than those (as determined under paragraph (b) of § 1.954–4) performed for, or on behalf of, a related person,

(iii) Services performed in the country of incorporation of the controlled foreign corporation, as determined under paragraph (c) of § 1.954–4, and

(iv) Services performed in connection with the sale or exchange of, or with an offer or effort to sell or exchange, personal property manufactured, produced, etc., by the controlled foreign corporation, as determined under paragraph (d) of §1.954–4.

Where an item of income falls within more than one of subdivisions (ii) through (iv) of this subparagraph, it shall be sufficient to establish that it falls within any one of them.

(4) *Foreign base company oil related income.* (i) The foreign base company oil related income described in section 954(g) and §1.954–8, for which purpose there must be established, with respect to each foreign country, the gross income derived from—

(A) The processing of minerals extracted (by the taxpayer or by any other person) from oil or gas wells into their primary products, as determined under section 907(c)(2)(A),

(B) The transportation of such minerals or primary products, as determined under section 907(c)(2)(B),

(C) The distribution or sale of such minerals or primary products, as determined under section 907(c)(2)(C),

(D) The disposition of assets used by the taxpayer in a trade or business described in subdivision (A), (B) or (C), as determined under section 907(c)(2)(D),

(E) Dividends, interests, partnership distributions, and other amounts, as determined under section 907(c)(3).

Where an item of income falls within more than one of the listings in paragraphs (d)(4)(i)(A) through (E) of this section, it shall be sufficient to establish that it falls within any one of them.

(ii) If any of the items of income listed in paragraph (d)(4)(i) of this section arising from sources within a foreign country relates to oil, gas, or a primary product thereof and is described in section 954(g)(1)(A) or (B) and §1.954–8(a)(1)(i) or (ii) (and, hence, is not foreign base company oil related income), then there must be established facts sufficient to verify the amount of such item of income which is not foreign base company oil related income. In this regard, the total quantities of oil, gas and primary products thereof which gave rise to such item of income and the portions of such quantities which were extracted or sold within the foreign country must be established.

(5) *Qualified investments in less developed countries.* For rules in effect for taxable years of foreign corporations beginning before January 1, 1976, see 26 CFR 1.964–4(d)(4) (Revised as of April 1, 1975).

(6) *Income derived from aircraft or ships.* For rules in effect for taxable years of foreign corporations beginning before January 1, 1976, see CFR §1.964–4(d)(5) (Revised as of April 1, 1975).

(7) *Foreign base company shipping income.* The foreign base company shipping income to which section 954(f) and §1.954–6 apply, for which purpose there must be established—

(i) Gross income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce, as determined under §1.954–6(c),

(ii) Gross income derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce, as determined under §1.954–6(d),

(iii) Gross income incidental to income described in subdivisions (i) and (ii) of this subparagraph, as determined under §1.954–6(e),

(iv) Gross income derived from the sale, exchange, or other disposition of any aircraft or vessel used (by the seller or by a person related to the seller) in foreign commerce,

(v) Dividends, interest, and gains described in §§1.954–6(f) and 1.954(b)(1)(viii),

(vi) Income described in §1.954–6(g) (relating to partnerships, trusts, etc.), and

(vii) Exchange gain, to the extent allocable to foreign base company shipping income, as determined under §1.952–2(c)(2)(v)(*b*).

If the controlled foreign corporation has income derived from or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce, or derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce, it shall be necessary to establish, from the books and records of the controlled foreign corporation, that such aircraft or vessel was used in foreign commerce within the meaning of subparagraphs (3) and (4) of § 1.954–6(b).

(8) *Income on which taxes are not substantially reduced.* The gross income excluded from foreign base company income under section 954(b)(4) and paragraph (b)(3) or (4) of § 1.954–1 in the case of a controlled foreign corporation not availed of to substantially reduce income taxes, the income or similar taxes incurred with respect thereto, and all other factors necessary to verify the application of such exclusion.

(9) *Qualified investments in foreign base company shipping operations.* The foreign base company shipping income that is excluded from foreign base company income under section 954(b)(2) and § 1.954–1(b)(1).

(10) *Special rule for shipping income.* The distributions received through a chain of ownership described in section 958(a) which are excluded from foreign base company income under section 954(b)(6)(B) and § 1.954–1(b)(2).

(11) *Deductions.* The deductions allocable, under paragraph (c) of § 1.954–1, to each of the classes and subclasses of gross income described in subparagraphs (1) through (9) of this paragraph.

(e) *Exclusion under section 963.* Books or records sufficient to verify the application of the exclusion provided by section 963 with respect to the subpart F income for the taxable year of a controlled foreign corporation must establish that the conditions set forth in paragraph (a)(2) of § 1.963–1 have been met.

(f) *Exclusion under section 970(a).* Books or records sufficient to verify the application for the taxable year of the exclusion provided by section 970(a) in respect of export trade income which is foreign base company income must establish for such year—

(1) That the controlled foreign corporation is an export trade corporation, as defined in section 971(a) and paragraph (a) of § 1.971–1,

(2) The export trade income, as determined under section 971(b) and paragraph (b) of § 1.971–1, which constitutes foreign base company income,

(3) The export promotion expenses, as determined under section 971(d) and paragraph (d) of § 1.971–1, which are allocable to the excludable export trade income,

(4) The gross receipts, and the gross amount on which is computed compensation included in gross receipts, from property in respect of which the excludable export trade income is derived, as described in section 970(a)(1)(B) and paragraph (b)(2)(ii) of § 1.970–1, and

(5) The increase in investments in export trade assets, as determined under section 970(c)(2) and paragraph (d)(2) of § 1.970–1.

(g–1) *Withdrawal of previously excluded subpart F income from qualified investment in less developed countries.* Books or records sufficient to verify the previously excluded subpart F income of the controlled foreign corporation withdrawn from investment in less developed countries for the taxable year must establish—

(1) The sum of the amounts of income excluded from foreign base company income under section 954(b)(1) and paragraph (b)(1) of § 1.954–1 (as in effect for taxable years beginning before January 1, 1976; see 26 CFR 1.954–1(b)(1) (Revised as of April 1, 1975)) for all prior taxable years,

(2) The sum of the amounts of previously excluded subpart F income withdrawn from investment in less developed countries for all prior taxable years, as determined under section 955(a) (as in effect before the enactment of the Tax Reduction Act of 1975) and paragraph (b) of § 1.955–1, and

(3) The amount withdrawn from investment in less developed countries for the taxable year as determined under section 955(a) (as in effect before the enactment of the Tax Reduction Act of 1975) and paragraph (b) of § 1.955–1.

(g–2) *Withdrawal of previously excluded subpart F income from investment in foreign base company shipping operations.* Books or records sufficient to verify the previously excluded subpart F income of the controlled foreign corporation withdrawn from investment in foreign base company shipping operations for the taxable year must establish—

(1) The sum of the amounts of income excluded from foreign base company income under section 954(b)(2) and

paragraph (b)(1) of §1.954–1 for all prior taxable years,

(2) The sum of the amounts of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years, as determined under section 955(a) and paragraph (b) of §1.955A–1,

(3) The amount withdrawn from investment in foreign base company shipping operations for the taxable year as determined under section 955(a) and paragraph (b) of §1.955A–1, and

(4) If the carryover (as described in §1.955A–1(b)(3)) of amounts relating to investments in less developed country shipping companies (as described in §1.995–5(b)) is applicable, (i) the amount of the corporation's qualified investments (determined under §1.955–2 other than paragraph (b)(5) thereof) in less developed country shipping companies at the close of the last taxable year of the corporation beginning before January 1, 1976, and (ii) the amount of the limitation with respect to previously excluded subpart F income (determined under §1.955–1(b)(1)(i)(*b*)) for the first taxable year of the corporation beginning after December 31, 1975.

(h) *Withdrawal of previously excluded export trade income from investment.* Books or records sufficient to verify the previously excluded export trade income of the controlled foreign corporation withdrawn from investment for the taxable year must establish the United States shareholder's proportionate share of—

(1) The sum of the amounts by which the subpart F income of such corporation was reduced for all prior taxable years under section 970(a) and paragraph (b) of §1.970–1,

(2) The sum of the amounts described in section 970(b)(1)(B),

(3) The sum of the amounts of previously excluded export trade income of such corporation withdrawn from investment under section 970(b) and paragraph (c) of §1.970–1 for all prior taxable years, and

(4) The amount withdrawn from investment under section 970(b) and paragraph (c) of §1.970–1 for the taxable year.

(i) *Increase in earnings invested in United States property.* Books or records sufficient to verify the increase for the taxable year in earnings invested by the controlled foreign corporations in United States property must establish—

(1) The amount of such corporation's earnings invested in United States property (as defined in section 956(b)(1) and paragraph (a) of §1.956–2) at the close of the current and preceding taxable years, as determined under paragraph (b) of §1.956–1,

(2) The amount of excluded property described in section 956(b)(2) and paragraph (b) of §1.956–2 held by such corporation at the close of such years,

(3) The earnings and profits, to which section 959(c)(1) and paragraph (b)(1) of §1.959–3 apply, distributed by such corporation during the preceding taxable year, and

(4) The amount of increase in earnings invested by such corporation in United States property which is excluded from the United States shareholder's gross income for the taxable year under section 959(a)(2) and paragraph (c) of §1.959–1.

[T.D. 6824, 30 FR 6481, May 11, 1965, as amended by T.D. 7211, 37 FR 21436, Oct. 11, 1972; T.D. 7893, 48 FR 22511, May 19, 1983; T.D. 8331, 56 FR 2849, Jan. 25, 1991]

§1.964–5 Effective date of subpart F.

Sections 951 through 964 and §§1.951 through 1.964–4 shall apply with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders within which or with which such taxable years of such corporations end.

[T.D. 7120, 36 FR 10862, June 4, 1971

EXPORT TRADE CORPORATIONS

§1.970–1 Export trade corporations.

(a) *In general.* Sections 970 through 972 provide in general that if a controlled foreign corporation is an export trade corporation for any taxable year, the subpart F income of such corporation shall, subject to limitations provided by section 970(a) and paragraph (b) of this section, be reduced by so much of such corporation's export trade income as constitutes foreign base company income. To the extent subpart F income of an export trade corporation is reduced under section 970 and this section, an amount is required by section 970(b) and paragraph (c) of this section to be included in gross income of United States shareholders of the corporation if there is a subsequent decrease in such corporation's investments in export trade assets. See section 971(a) and paragraph (a) of § 1.971–1 for definition of the term ''export trade corporation'', section 971(b) and paragraph (b) of § 1.971–1 for definition of the term ''export trade income'', and section 971(c) and paragraph (c) of § 1.971–1 for definition of the term ''export trade assets''.

(b) *Amount by which export trade income shall reduce subpart F income*—(1) *Deductible amount.* The subpart F income, determined as provided in section 952 and the regulations thereunder but without regard to section 970 and this paragraph, of a controlled foreign corporation which is an export trade corporation for its taxable year shall be reduced by an amount equal to so much of its export trade income as constitutes foreign base company income for such taxable year, but only to the extent that such amount of export trade income does not exceed the limitation determined under subparagraph (2) of this paragraph for such taxable year. See section 972 and § 1.972–1 for rules relating to the consolidation of export trade corporations for purposes of determining the limitations described in subparagraph (2) of this paragraph.

(2) *Limitation on the amount of export trade income deductible from subpart F income.* The amount by which subpart F income of an export trade corporation may be reduced for any taxable year under subparagraph (1) of this paragraph may not exceed whichever of the following limitations is the smallest:

(i) The amount which is equal to 150 percent of the export promotion expenses, as defined in section 971(d) and paragraph (d) of § 1.971–1, of the export trade corporation paid or incurred during the taxable year which are properly allocable to the receipt or the production of so much of its export trade income as constitutes foreign base company income for such taxable year;

(ii) The amount which is equal to 10 percent of the gross receipts (other than from commissions, fees, or other compensation for services), plus 10 percent of the gross amount upon the basis of which are computed commissions, fees, or other compensation for services included in gross receipts, of the export trade corporation received or accrued during the taxable year from, or in connection with, the sale, installation, operation, maintenance, or use of property in respect of which such corporation derives export trade income which constitutes foreign base company income for such taxable year; or

(iii) The amount which bears the same ratio to the increase in investments in export trade assets, as defined in section 970(c)(2) and paragraph (d)(2) of this section, of the export trade corporation for its taxable year as the export trade income which constitutes foreign base company income of such corporation for such taxable year bears to the entire export trade income of the corporation for such year.

Under subdivision (ii) of this subparagraph, in the case of minimum or maximum fee arrangements, the determination shall be made on the basis of the actual gross amounts with respect to which such fees are paid, rather than on the basis of the amounts upon which such minimum or maximum fees are computed. All determinations of limitations under this subparagraph shall be made on an aggregate basis and not with respect to separate items or categories of income described in paragraph (b)(1) of § 1.971–1.

(3) *Determination of export promotion expense limitation.* For purposes of determining the limitation contained in subparagraph (2)(i) of this paragraph for any taxable year of the export trade corporation, there shall be taken into account with respect to those items or categories of export trade income which constitute foreign base company income the entire amount of those export promotion expenses which are directly related to such items or categories of income and a ratable part of any other export promotion expenses which are indirectly related to such items or categories of income, except that no export promotion expense shall

be allocated to an item or category of income to which it clearly does not apply and no deduction allowable to such corporation under section 882(c) and the regulations thereunder shall be taken into account.

(4) *Application of section 482.* The limitations provided in section 970(a) and subparagraph (2) of this paragraph shall not affect the authority of the district director to apply the provisions of section 482 and the regulations thereunder, relating to allocation of income and deductions among taxpayers.

(5) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as the taxable year. For 1963, A Corporation's subpart F income determined under section 952 and the regulations thereunder is $35, the total of its gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph is $310, its export promotion expenses properly allocable to its export trade income which constitutes foreign base company income are $18, its increase in investments in export trade assets is $32, and its export trade income is $40, of which $30 constitutes foreign base company income and $10 does not constitute foreign base company income. The subpart F income of A Corporation for 1963 as reduced under section 970(a) is $11, determined as follows:

(i) Subpart F income		$35
(ii) Less: $30 export trade income which constitutes foreign base company income, but deduction not to exceed the smallest of the following limitations (smallest of *(a), (b),* or *(c)):*		
(a) 150 percent of allocable export promotion expenses referred to in subparagraph (2)(i) of this paragraph (150% of $18)	$27	
(b) 10 percent of gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph (10% of $310)	$31	
(c) Amount which bears to the increase in investments in export trade assets ($32) the same ratio as the export trade income which constitutes foreign base company income ($30) bears to total export trade income ($40) (75% [$30/$40] of $32)	$24	$24
(iii) Subpart F income as reduced under section 970(a)		11

Example 2. The facts are the same as in example 1, except that A Corporation's export promotion expenses properly allocable to export trade income which constitutes foreign base company income are $14 instead of $18. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is $21 (150% of $14) instead of $24. The subpart F income as reduced under section 970(a) is $14 ($35 less $21).

Example 3. The facts are the same as in example 1, except that the total amount of A Corporation's gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph is $200 instead of $310. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is $20 (10 percent of $200) instead of $24. The subpart F income as reduced under section 970(a) is $15 ($35 less $20).

Example 4. The facts are the same as in example 1, except that A Corporation derives its export trade income which constitutes foreign base company income of $30 in a service arrangement with M Corporation under which it receives as a fee 5 percent of the gross receipts from M Corporation's sales or a minimum fee of $30. Such gross receipts are $220. The gross amounts taken into account in determining the limitation under subparagraph (2)(ii) of this paragraph are $220. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is $22 (10 percent of $220) instead of $24. The subpart F income as reduced under section 970(a) is $13 ($35 minus $22).

Example 5. The facts are the same as in example 1, except that A Corporation derives its export trade income which constitutes foreign base company income of $30 in a service arrangement with M Corporation under which it receives as a fee 9 percent of the gross receipts from M Corporation's sales or a maximum fee of $30. Such gross receipts are $400. In such instance, the limitation under (ii)*(b)* of example 1 is $40 (10 percent of $400) instead of $31. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is $24, the smallest of the three limitations. The subpart F income as reduced under section 970(a) is $11 ($35 less $24).

(c) *Withdrawal of previously excluded export trade income*—(1) *Inclusion of withdrawal in income of United States shareholders.* If—

(i) A controlled foreign corporation was an export trade corporation for any taxable year,

(ii) Such corporation in any such taxable year derived subpart F income which, under the provisions of section 970(a) and paragraph (b) of this section, was reduced, and

(iii) Such corporation has in a subsequent taxable year a decrease in investments in export trade assets, every person who is a United States shareholder, as defined in section 951(b), of such corporation on the last day of such subsequent taxable year on which such corporation is a controlled foreign corporation shall include in his gross income, under section 951(a)(1)(A)(ii) and the regulations thereunder as an amount to which section 955 (as in effect before the enactment of the Tax Reduction Act of 1975) applies, his pro rata share of the amount of such decrease in investments but only to the extent that such pro rata share does not exceed the limitations determined under subparagraph (2) of this paragraph. A United States shareholder's pro rata share of a controlled foreign corporation's decrease for any taxable year in investments in export trade assets shall be his pro rata share of such corporation's decrease for such year determined under section 970(c)(3) and paragraph (d)(3) of this section.

(2) *Limitations applicable in determining amount includible in income*—(i) *General.* A United States shareholder's pro rata share of a controlled foreign corporation's decrease in investments in export trade assets for any taxable year of such corporation shall, for purposes of determining an amount to be included in the gross income for any taxable year of such shareholder, not exceed the lesser of the limitations determined under *(a)* and *(b)* of this subdivision:

(a) Such shareholder's pro rata share of the sum of the controlled foreign corporation's earnings and profits (or deficit in earnings and profits) for the taxable year, computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year, plus his pro rata share of the sum of its earnings and profits (or deficits in earnings and profits) accumulated for prior taxable years beginning after December 31, 1962, or

(b)(1) Such shareholder's pro rata share of the sum of the amounts by which the subpart F income of such controlled foreign corporation for prior taxable years was reduced under section 970(a) and paragraph (b) of this section, plus

(2) Such shareholder's pro rata share of the sum of the amounts which were not included in the subpart F income of such controlled foreign corporation for such prior taxable years by reason of the application of section 972 and § 1.972–1, minus

(3) Such shareholder's pro rata share of the sum of the amounts which were previously included in his gross income for prior taxable years under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) and this paragraph with respect to such controlled foreign corporation.

The net amount determined under *(b)* of this subdivision with respect to any stock owned by the United States shareholder shall be determined without taking into account any amount attributable to a period prior to the date on which such shareholder acquired such stock. See section 1248 and the regulations thereunder for rules governing the treatment of gain from sales or exchanges of stock in certain foreign corporations.

(ii) *Treatment of earnings and profits.* For purposes of determining earnings and profits of a controlled foreign corporation under subdivision (i) *(a)* of this subparagraph, such earnings and profits shall be considered not to include any amounts which are attributable to—

(a) Amounts which are, or have been, included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) (other than an amount included in the gross income of a United States shareholder under section 951(a)(1)(A)(ii) or section 951(a)(1)(B) for the taxable year) and have not been distributed, or

(b)(1) Amounts which for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(2) Amounts which, for any prior taxable year, have been included in the

gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subdivision apply only in determining the limitation on a United States shareholder's pro rata share of a controlled foreign corporation's decrease in investments in export trade assets. See section 959 and the regulations thereunder for limitations on the exclusion of previously taxed earnings and profits.

(iii) *Rules of application.* The determinations made under subdivision (i) of this subparagraph for purposes of determining the United States shareholder's pro rata share of a controlled foreign corporation's decrease in investments in export trade assets for any taxable year shall be made on the basis of the stock such shareholder owns, within the meaning of section 958(a) and the regulations thereunder, in the controlled foreign corporation on the last day in the taxable year on which such corporation is a controlled foreign corporation even though such shareholder owned more or less stock in such corporation prior to that date. See section 972 and paragraph (b)(3) of §1.972–1 for rules relating to the allocation of a decrease in investments in export trade assets of export trade corporations in a consolidated chain of such corporations. See section 951(a)(3) and the regulations thereunder for an additional limitation upon the amount of a United States shareholder's pro rata share determined under this paragraph.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation A, which has one class of stock outstanding, is a wholly owned subsidiary of domestic corporation M throughout 1963 and 1964. Both corporations use the calendar year as the taxable year. For 1963, A Corporation qualifies as an export trade corporation and its subpart F income, determined in accordance with the provisions of section 952 and the regulations thereunder, is reduced by $20 under the provisions of section 970(a) and paragraph (b) of this section. Section 972 is assumed not to apply to A Corporation. For 1964, A Corporation has a decrease of $8 in investments in export trade assets. For 1963 and 1964, A Corporation has earnings and profits of $30 (determined under the provisions of subparagraph (2) of this paragraph). Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1964 which is includible in M Corporation's gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) is $8, determined as follows:

(i) Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1964 (100% of $8)	....	....	$8
(ii) Limitation on amount includible in gross income of M Corporation for 1964 (smaller of *(a)* or *(b)*):			
(a) Corporation M's pro rata share of A Corporation's earnings and profits for 1963 and 1964 determined under subparagraph (2) of this paragraph (100% of $30)	....	$30	
(b) Corporation M's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (100% of $20)	$20		
Plus: Corporation M's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 by reason of the application of section 972	0		
Total	20		
Less: Corporation M's pro rata share of the sum of amounts which were previously included in gross income of M Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation	0	20	
(iii) Corporation M's pro rata share includible in gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii))	....	....	8

Example 2. Assume the same facts as in example 1, except that on February 14, 1965, M Corporation sells 25 percent of its stock in A Corporation to N Corporation. Corporation N is a domestic corporation which also uses the calendar year as a taxable year. For 1965, A Corporation has a decrease of $16 in investments in export trade assets. Corporation A's earnings and profits for 1963 and 1964 (determined under the provisions of subparagraph (2) of this paragraph) are $22 ($30 minus $8). Corporation A's earnings and profits for 1965 are $6 (determined under the provisions of subparagraph (2) of this paragraph). For 1965, M Corporation's pro rata share of A Corporation's decrease in investments in export trade assets which is includible in M Corporation's gross income under section 951(a)(1)(A)(ii) is $9, and N Corporation's pro rata share includible in gross income under such section is $0, determined as follows:

M CORPORATION

(i) Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1965 (75% of $16)			$12
(ii) Limitation on amount includible in gross income of M Corporation for 1965 (smaller of *(a)* or *(b)):*			
(a) Corporation M's pro rata share of A Corporation's earnings and profits for 1963, 1964, and 1965 determined under subparagraph (2) of this paragraph (75% of $28)		$21	
(b) Corporation M's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (75% of $20)	$15		
Plus: Corporation M's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 and 1964 by reason of the application of section 972	0		
Total	$15		
Less: Corporation M's pro rata share of the sum of amounts which were previously included in gross income of M Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation (75% of $8)	6	9	
(iii) Corporation M's pro rata share includible in gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii))			9

N CORPORATION

(i) Corporation N's pro rata share of A Corporation's decrease in investments in export trade assets for 1965 (25% of $16)			0
(ii) Limitation on amount includible in gross income of N Corporation for 1965 (smaller of *(a)* or *(b)):*			
(a) Corporation N's pro rata share of A Corporation's earnings and profits for 1963, 1964, and 1965 determined under subparagraph (2) of this paragraph (25% of $28)		07	
(b) Corporation N's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (amounts prior to 2/14/65 not being taken into account)	0		
Plus: Corporation N's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 and 1964 by reason of the application of section 972 (amounts prior to 2/14/65 not being taken into account)	0		
Total	0		
Less: Corporation N's pro rata share of the sum of amounts which were previously included in gross income of N Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation (amounts prior to 2/14/65 not being taken into account)	0	0	
(iii) Corporation N's pro rata share includible in gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii))			0

(d) *Investments in export trade assets*—(1) *Amount of investments.* For purposes of sections 970 through 972 and §§ 1.970–1 to 1.972–1, inclusive, export trade assets shall be taken into account on the following bases:

(i) *Working capital.* Working capital to which section 971(c)(1) applies shall be taken into account at the adjusted basis of current assets, determined as of the applicable determination date, less any current liabilities (except as provided in subdivision (iii) of this subparagraph).

(ii) *Other export trade assets.* Inventory to which section 971(c)(2) applies, facilities to which section 971(c)(3) applies, and evidences of indebtedness to which section 971(c)(4) applies, shall be taken into account at their adjusted bases as of the applicable determination date, reduced by any liabilities (except as provided in subdivision (iii) of this subparagraph) to which such property is subject on such date. To be taken into account under this subparagraph, a liability must constitute a specific charge against the property involved. Thus, a liability evidenced by an open account or a liability secured only by the general credit of the controlled foreign corporation will not be taken into account. On the other hand, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the liability shall be apportioned against each of such items of property in that ratio which the adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items on such date. A liability in excess of the adjusted basis of the property which is subject to such liability will not be taken into account for the purpose of reducing the adjusted basis of other property which is not subject to such liability. See paragraph (c)(6) of §1.971–1 for treatment of export trade assets which constitute working capital to which section 971(c)(1) applies and which also constitute inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies.

(iii) *Treatment of certain liabilities.* For purposes of subdivisions (i) and (ii) of this subparagraph, a current liability, or a specific charge created with respect to any item of property, principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's investments in export trade assets shall be taken into account in such a manner as to properly reflect the controlled foreign corporation's investments in export trade assets; whether a specific charge or current liability is created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan is from a related person, as defined in section 954(d)(3) and paragraph (e) of §1.954–1.

(iv) *Statement required.* If for purposes of this section a United States shareholder of a controlled foreign corporation reduces the adjusted basis of property which constitutes an export trade asset on the ground that such property is subject to a liability, he shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(2) *Increase in investments in export trade assets.* For purposes of section 970(a) and paragraph (b) of this section, the amount of increase in investments in export trade assets of a controlled foreign corporation for a taxable year shall be, except as provided in §1.970–2, the amount by which—

(i) The amount of its investments in export trade assets at the close of such taxable year, exceeds

(ii) The amount of its investments in export trade assets at the close of the preceding taxable year.

(3) *Decrease in investments in export trade assets.* For purposes of section 970(b) and paragraph (c) of this section, the amount of the decrease in investments in export trade assets of a controlled foreign corporation for a taxable year shall be, except as provided in §1.970–2, the amount by which—

(i) The amount of its investments in export trade assets at the close of the preceding taxable year, minus

(ii) An amount equal to the excess of recognized losses over recognized gains on sales, exchanges, involuntary conversions, assets or other dispositions, of export trade during the taxable year, exceeds

(iii) The amount of its investments in export trade assets at the close of the taxable year.

For purposes of subdivision (ii) of this subparagraph, recognized losses include a write-down of inventory to lower of cost or market in accordance with a method of inventory valuation established or adopted by or on behalf of such foreign corporation under paragraph (c) of §1.964–1.

[T.D. 6755, 29 FR 12704, Sept. 9, 1964, as amended by T.D. 6795, 30 FR 947, Jan. 29, 1965; T.D. 6892, 31 FR 11144, Aug. 23, 1966; T.D. 7293, 38 FR 32802, Nov. 28, 1973; T.D. 7893, 48 FR 22511, May 19, 1983]

§1.970–2 Elections as to date of determining investments in export trade assets.

(a) *Nature of elections*—(1) *In general.* In lieu of determining the increase under the provisions of paragraph (d)(2) of §1.970–1, or the decrease under the provisions of paragraph (d)(3) of §1.970–1, in a controlled foreign corporation's investments in export trade assets for a taxable year in the manner provided in such provisions, a United States shareholder of such corporation may elect, under the provisions of section 970(c)(4) and this section, to determine such increase or decrease in accordance with the provisions of subparagraph (2) of this paragraph or, in the case of export trade assets which are facilities described in section 971(c)(3), in accordance with the provisions of subparagraph (3) of this paragraph. Separate elections may be made under subparagraph (2) and/or (3) of this paragraph with respect to each controlled foreign corporation with respect to which a person is a United States shareholder, within the meaning of section 951(b).

(2) *Election of 75-day rule.* A United States shareholder of a controlled foreign corporation may elect with respect to a taxable year of such corporation to make the determinations under subparagraphs (2)(i) and (3)(iii) of paragraph (d) of § 1.970–1 of the amount of such corporation's investments in export trade assets as of the 75th day after the close of the taxable year referred to in such subparagraphs of paragraph (d) of § 1.970–1. The election provided by this subparagraph may be made with respect to export trade assets other than facilities described in section 971(c)(3) or with respect to export trade assets which are facilities or with respect to both types of export trade assets (but the election under this paragraph with respect to export trade assets which are facilities or with respect to both types of export trade assets may be made only if the election provided by subparagraph (3) of this paragraph is not made). If the election provided by this subparagraph is made, the amount of export trade assets with respect to which such election is made at the close of the preceding taxable year which is described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970–1 shall be the amount of export trade assets which was considered by application of the 75-day rule to be the amount of export trade assets at the close of such preceding taxable year; except that for the first taxable year of the controlled foreign corporation for which the 75-day rule is elected the amount of investments in export trade assets with respect to which such election is made at the close of such preceding year described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970–1 shall be the amount of investments in export trade assets at the actual close of such preceding year. In the case of a taxable year of such corporation beginning after December 31, 1962, and before December 31, 1963, the amount of investments in export trade assets with respect to which such election is made alternatively may be determined by the United States shareholder as of the 75th day after the close of the preceding taxable year referred to in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970–1 rather than as of the close of such preceding taxable year.

(3) *Election for export trade assets which are facilities.* A United States shareholder of a controlled foreign corporation may elect with respect to a taxable year of such corporation to make the determinations under subparagraphs (2)(i) and (3)(iii) of paragraph (d) of § 1.970–1 of the amount of such corporation's investments in export trade assets which are facilities described in section 971(c)(3) as of the close of such corporation's taxable year following the taxable year referred to in such subparagraphs of paragraph (d) of § 1.970–1. The election provided by this subparagraph may be made only if the United States shareholder does not elect the 75-day rule of subparagraph (2) of this paragraph with respect to export trade assets which are facilities. If the election provided by this subparagraph is made, the amount of investments in export trade assets which are facilities at the close of the preceding taxable year which is described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970–1 shall be the amount of export trade assets which are facilities which was considered, by reason of the application of the following-year rule provided in this subparagraph with respect to such preceding taxable year, to be the amount of export trade assets which are facilities at the close of such preceding taxable year; except that for the first taxable year of the controlled foreign corporation for which such following-year rule is elected the amount of investments in export trade assets which are facilities at the close of the preceding taxable year described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970–1 shall be the amount of investments in export trade assets which are facilities at the actual close of such preceding taxable year.

(b) *Time and manner of making elections*—(1) *Without consent.* A United States shareholder may, with respect to any controlled foreign corporation, make one or both of the elections described in paragraph (a)(2) or (3) of this section without the consent of the Commissioner by filing a statement to such effect with his return for his taxable year in which or with which ends the first taxable year of such corporation in which—

(i) Such shareholder owns, within the meaning of section 958(a), or is considered as owning, by applying the rules of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such corporation, and

(ii) Such corporation realizes subpart F income which is reduced under section 970(a) and paragraph (b) of §1.970–1.

The statement shall contain the name and address of the controlled foreign corporation, identification of such first taxable year of such corporation, and an indication as to which election or elections described in paragraph (a) of this section the United States shareholder is making. If such return has been filed on or before the 90th day after the date these regulations are published in the FEDERAL REGISTER, such United States shareholder shall file such statement with the district director with which the return was filed on or before such 90th day.

(2) *With consent.* A United States shareholder may make one or both of the elections described in paragraph (a)(2) or (3) of this section with respect to any controlled foreign corporation at any time with the consent of the Commissioner. Consent will not be granted unless the shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the election will be effected. The application for consent to elect shall be made by the shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to determine an exclusion under section 970(a) in accordance with one or both of the elections provided in paragraph (a) of this section. The application shall include the following information:

(i) The name, address, and taxable year of the United States shareholder;

(ii) The name, address, and taxable year of the controlled foreign corporation;

(iii) A statement indicating which of the elections the shareholder desires to make;

(iv) The amount of the foreign corporation's investments in export trade assets (by a category which includes export trade assets other than facilities and a category which includes only export trade assets which are facilities) at the close of its preceding taxable year;

(v) The shareholder's pro rata share of the sum of the amounts by which the subpart F income of the foreign corporation, for all prior taxable years during which such shareholder was a United States shareholder of such corporation, was reduced under section 970(a) and paragraph (b) of §1.970–1;

(vi) The shareholder's pro rata share of the sum of the amounts which were not included in the subpart F income of the foreign corporation, for all prior taxable years during which such shareholder was a United States shareholder of such corporation, by reason of the application of section 972 and §1.972–1; and

(vii) The shareholder's pro rata share of the sum of the amounts which were previously included in his gross income, for all prior taxable years during which such shareholder was a United States shareholder of such corporation, under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) and paragraph (b) of §1.970–1 to the foreign corporation.

(c) *Effect of elections*—(1) *In general.* Except as provided in subparagraphs (3) and (4) of this paragraph, an election made under paragraph (a) of this section with respect to a controlled foreign corporation shall be binding on the United States shareholder and—

(i) In the case of the election described in paragraph (a)(2) of this section, shall apply to all investments in export trade assets with respect to which such election is made acquired, or disposed of, by such corporation during the 75-day period following its taxable year for which subpart F income is first computed under the election and during all succeeding corresponding 75-day periods of such corporation, or

(ii) In the case of the election described in paragraph (a)(3) of this section, shall apply to all investments in export trade assets which are facilities acquired, or disposed of, by such corporation during the taxable year following its taxable year for which subpart F income is first computed under the election and during all succeeding corresponding taxable years of such corporation.

(2) *Returns.* Any return of a United States shareholder required to be filed before the completion of a period with respect to which determinations are to be made as to a controlled foreign corporation's investments in export trade assets for purposes of computing such shareholder's taxable income shall be filed on the basis of an estimate of the amount of such corporation's investments in export trade assets at the close of the period. If the actual amount of such investments is not the same as the amount of the estimate, the shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of such shareholder's tax for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(3) *Revocation*—(i) *In general—(a) Consent required.* Upon application by the United States shareholder, an election made under paragraph (a) of this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless the shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the revocation will be effected.

(b) Revocation of 75-day rule. In the case of the revocation of an election described in paragraph (a)(2) of this section, the change in the controlled foreign corporation's investments in export trade assets with respect to which such election was made for its first taxable year for which subpart F income or a decrease in investments in export trade assets is computed without regard to the election previously made shall, unless the agreement with the Commissioner provides otherwise, be considered to be the amount by which—

(1) Such corporation's investments in export trade assets with respect to which such election was made at the close of such taxable year exceeds or, if applicable, is exceeded by

(2) Such corporation's investments in export trade assets with respect to which such election was made at the close of the 75th day after the close of the preceding taxable year of such corporation.

(c) Revocation of following-year rule. In the case of the revocation of an election described in paragraph (a)(3) of this section, the change in the controlled foreign corporation's investments in export trade assets which are facilities for its first taxable year for which subpart F income or a decrease in investments in export trade assets is computed without regard to the election previously made shall, unless the agreement with the Commissioner provides otherwise, be considered to be zero.

(ii) *Time and manner of applying for consent to revocation—(a) Application to Commissioner.* The application for consent to revocation of an election shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC, 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to determine an exclusion under section 970(a) or an inclusion under section 970(b) without regard to such election.

(b) Information required. The application shall include the following information:

(1) The name, address, and taxable year of the United States shareholder;

(2) The name, address, and taxable year of the controlled foreign corporation;

(3) A statement indicating the election the shareholder desires to revoke under this subparagraph;

(4) The information required under subdivisions (iv) through (vii) of paragraph (b)(2) of this section;

(5) In the case of an application for consent to revocation of an election made under paragraph (a)(2) of this section, the amount of the foreign corporation's investments in export trade assets with respect to which such election was made at the close of the 75th day after the close of such corporation's taxable year immediately preceding the taxable year of such corporation; and

(6) The reasons for the request for consent to revocation.

(4) *Transfer of stock*—(i) *Election of 75-day rule in force. (a)* If during any taxable year of a controlled foreign corporation—

(1) A United States shareholder who has made the election described in paragraph (a)(2) of this section with respect to such corporation sells, exchanges, or otherwise disposes of all or part of his stock in such corporation, and

(2) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange, or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the successor in interest shall consider the controlled foreign corporation's change during the first 75 days of such taxable year in investments in export trade assets with respect to which such election is made to be zero.

(b) If the United States shareholder's successor in interest makes an election under paragraph (a)(2) of this section in order to determine an exclusion under section 970(a) for the taxable year of such corporation in which the acquires such stock, the amount of the controlled foreign corporation's investments in export trade assets with respect to which such election is made at the close of its preceding taxable year shall be considered, with respect to the stock so acquired, to be the amount of such corporation's investments in export trade assets with respect to which such election is made at the close of the 75th day after the close of such preceding taxable year.

(c) If the United States shareholder's successor in interest makes an election under paragraph (a)(2) of this section in order to determine an exclusion under section 970(a) for a taxable year of such corporation subsequent to the taxable year in which he acquired the stock, the amount of the controlled foreign corporation's investments in export trade assets with respect to which such election is made at the close of its taxable year immediately preceding such subsequent taxable year shall, with respect to the stock so acquired, be the amount of such corporation's investments in such assets at the actual close of such preceding taxable year.

(ii) *Election in force with respect to export trade assets which are facilities—(a)* If during any taxable year of a controlled foreign corporation—

(1) A United States shareholder who has made the election described in paragraph (a)(3) of this section with respect to such corporation sells, exchanges, or otherwise disposes of all or part of his stock in such corporation, and

(2) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the successor in interest shall consider the controlled foreign corporation's change for such taxable year in investments in export trade assets which are facilities to be zero.

(b) If the United States shareholder's successor in interest makes an election under paragraph (a)(3) of this section in order to determine an exclusion under section 970(a) for the taxable year of such corporation in which he acquires such stock, the amount of the controlled foreign corporation's investments in export trade assets which are facilities at the close of its preceding taxable year shall be considered, with respect to the stock so acquired, to be the amount of such corporation's investments in export trade assets which are facilities at the close of the taxable year in which such stock is acquired.

(c) If the United States shareholder's successor in interest makes an election under paragraph (a)(3) of this section in order to determine an exclusion under section 970(a) for a taxable year of such corporation subsequent to the taxable

year in which he acquired the stock, the amount of the controlled foreign corporation's investments in export trade assets which are facilities at the close of its taxable year immediately preceding such subsequent taxable year shall, with respect to the stock so acquired, be the amount of such corporation's investments in such assets at the actual close of such preceding taxable year.

(d) *Illustrations.* The principles contained in this section are illustrated by the examples set forth in paragraph (d) of § 1.955.3.

[T.D. 6755, 29 FR 12707, Sept. 9, 1964]

§ 1.970–3 Effective date of subpart G.

Sections 970 through 972 and §§ 1.970–1 through 1.972–1 shall apply with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders within which or with which such taxable years of such corporations end.

[T.D. 6755, 29 FR 12709, Sept. 9, 1964]

§ 1.971–1 Definitions with respect to export trade corporations.

(a) *Export trade corporations*—(1) *In general.* For purposes of sections 970 through 972 and §§ 1.970–1 to 1.972–1, inclusive, the term ''export trade corporation'' means a controlled foreign corporation which for the period specified in subparagraph (2) of this paragraph satisfies the conditions specified in subparagraph (3) of this paragraph. However, no controlled foreign corporation may qualify as an export trade corporation for any taxable year beginning after October 31, 1971, unless it qualified as an export trade corporation for any taxable year beginning before such date. In addition, if a corporation fails to qualify as an export trade corporation for a period of any 3 consecutive taxable years beginning after October 31, 1971, then for any taxable year beginning after such 3-year period, such corporation shall not be included within the term ''export trade corporation''.

(2) *Three-year period.* The period referred to in subparagraph (1) of this paragraph is the 3-year period ending with the close of the controlled foreign corporation's current taxable year, or such part of such 3-year period as occurs on and after the beginning of the corporation's first taxable year beginning after December 31, 1962, whichever period is shorter.

(3) *Gross income requirements.* The conditions referred to in subparagraph (1) of this paragraph are that the controlled foreign corporation derives—

(i) 90 percent or more of its gross income from sources without the United States, and

(ii)*(a)* 75 percent of more of its gross income from transactions, activities, or interest described in section 971(b) and paragraph (b) of this section, or

(b) 50 percent or more of its gross income from transactions, activities, or interest described in section 971(b) and paragraph (b) of this section in respect of agricultural products grown in the United States.

(4) *Determination of sources of gross income.* The sources of gross income of a controlled foreign corporation shall be determined for purposes of subparagraph (3)(i) of this paragraph in accordance with the rules for determining sources of gross income set forth in sections 861 through 864 and the regulations thereunder.

(b) *Export trade income*—(1) *General rule.* For purposes of sections 970 through 972 and §§ 1.970–1 to 1.972–1, inclusive, the term ''export trade income'' means the gross export trade income of a controlled foreign corporation derived from transactions, activities, or interest described in subdivisions (i) through (vii) of this subparagraph, less deductions allowed under subdivision (viii) of this subparagraph.

(i) *Sale of export property.* Gross export trade income of a controlled foreign corporation includes gross income it derives from the sale of export property (as defined in paragraph (e) of this section) which it purchases, if the sale is made to an unrelated person for use, consumption, or disposition outside the United States. See section 971(b)(1). As a general rule, property will be presumed to have been sold for use, consumption, or disposition in the country of destination of the sale. However, if at the time of the sale the controlled foreign corporation knows, or should have known from the facts and circumstances surrounding the sales transaction, that the property will probably be used, consumed, or disposed of in the United States, such property will be presumed to have been sold for use, consumption, or disposition in the United States unless the controlled foreign corporation establishes that such property was used, consumed, or disposed of outside the United States. For purposes of this subdivision, export property must be sold by a controlled foreign corporation in essentially the same form in which such property is purchased. Whether export property sold is in essentially the same form in which such property is purchased shall be determined on the basis of all the facts and circumstances in each case. Storage, handling, transportation, packaging, or servicing of property will be considered not to alter the form in which property is purchased. However, manufacture or production, within the meaning of paragraph (a)(4) of §1.954–3, will be considered to alter the form in which property is purchased and no part of the gross income from the sale of such property will be treated as export trade income. The application of this subdivision may be illustrated by the following example:

Example. Controlled foreign corporation A, incorporated under the laws of foreign country Y, purchases articles manufactured in the United States from domestic corporation M and sells them in the form in which purchased to foreign corporation B, unrelated to A Corporation, for use in foreign countries, X, Y, and Z. The gross income of A Corporation from the purchase and sale of the articles constitutes gross export trade income.

(ii) *Commissions and other income derived in connection with the sale of export property.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in respect of a sale by such corporation in a transaction described in subdivision (i) of this subparagraph or in respect of the sale by any other person of export property to a person unrelated to the controlled foreign corporation for use, consumption, or disposition outside the United States. Such gross export trade income includes payments received for surveys made prior to, and in connection with, the sale of such export property (whether or not such sales are ultimately consummated). See section 971(b)(1). The term ‘‘any person’’ or ‘‘any other person’’ as used in this subdivision includes a related person as defined in section 954(d)(3) and paragraph (e) of §1.954–1. The application of this subdivision may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, receives from M Corporation a commission equal to 6 percent of the gross selling price of all personal property shipped by M Corporation as a result of services performed by A Corporation in soliciting orders in foreign countries X, Y, and Z. In fulfillment of such orders, M Corporation ships products manufactured by it in the United States. Corporation A does not assume title to the property sold. Gross commissions received by A Corporation from M Corporation in connection with the sale of such property to persons unrelated to A Corporation for use, consumption, or disposition outside the United States constitute gross export trade income.

Example 2. Foreign corporation B, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation N. Corporation N, is engaged in the business of manufacturing heavy duty electrical equipment in the United States. By contract, N Corporation engages B Corporation for the purpose of conducting engineering, technical, and financial studies required by N Corporation in the preparation of bids to supply foreign country Y with electrical equipment for a construction project to be undertaken by such country. Corporation N pays B Corporation a fee for the services, all of which are performed in country Y, which is based upon the number of hours of work performed without regard to whether a sale is ultimately consummated. Corporation N does not receive a contract from country Y on its bid to supply equipment. Income derived by B Corporation from performance of the service contract constitutes gross export trade income.

(iii) *Commissions and other income derived in connection with the installation or maintenance of export property.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in respect of the installation or maintenance of export property which has been sold by such corporation in a transaction described in subdivision (i) of this subparagraph or by any other person to a person unrelated to the controlled foreign corporation for use, consumption, or disposition outside the United States. See section 971(b)(1). The term ''any person'' or ''any other person'' as used in this subdivision includes a related person as defined in section 954(d)(3) and paragraph (e) of § 1.954–1.

(iv) *Commissions and other income derived in connection with the use of patents, copyrights, and other like property.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in connection with the use outside of the United States by an unrelated person of patents, copyrights, secret processes and formulas, goodwill, trademarks, trade brands, franchises, and other like property, including gross income derived from obtaining licensees for patents, but only if the patent, copyright, or other like property is acquired, or developed, and owned by the manufacturer, producer, grower, or extractor of any export property, in respect of which the controlled foreign corporation also derives gross export trade income within the meaning of subdivision (i), (ii), or (iii) of this subparagraph. See section 971(b)(2). The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation M, the owner of a patent registered in foreign country X, grants B Corporation, a corporation unrelated to A Corporation, the right to use such patent in foreign country Y in exchange for payment of a royalty. By a separate contract with B Corporation, A Corporation agrees for a gross fee of $100,000 to furnish, by maintaining a staff of technical representatives at the offices of B Corporation, technical services to B Corporation in connection with B Corporation's use of the patent. Corporation A also derives export trade income from the sale of export property which it purchases from M Corporation, the manufacturer of such property, and sells to C Corporation, an unrelated person, for use in country Y by C Corporation. The gross fee of $100,000 received by A Corporation for the furnishing of technical services in connection with B Corporation's use of M Corporation's patent constitutes gross export trade income since the service for which the fee is paid is performed in connection with the use outside the United States by an unrelated person (B Corporation) of a patent owned by a manufacturer (M Corporation) of export property in respect of which the controlled foreign corporation (A Corporation) derives gross export trade income from the sale to an unrelated person (C Corporation) for use outside the United States of export property purchased by it from the manufacturer (M Corporation).

(v) *Income attributable to use of export property by an unrelated person.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, rents, compensation, or other income which is received by such corporation from an unrelated person and is attributable to the use of export property by such unrelated person. See section 971(b)(3). The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A acquires by purchase bottling machines manufactured in the United States and leases the machines to B Corporation, a corporation unrelated to A Corporation, for use by B Corporation in foreign country Y. Gross rental income of A Corporation from the lease of the machines to B Corporation constitutes gross export trade income.

(vi) *Income attributable to the use of export property in the rendition of technical, scientific, or engineering services—(a) General.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income which is received by such corporation from an unrelated person and is attributable to the use of export property in the performance of technical, scientific, or engineering services to such unrelated person. See section 971(b)(3).

(b) Rule of apportionment. If a commission, fee, or other income received by a controlled foreign corporation from an unrelated person under a contract or arrangement for the performance of technical, scientific, or engineering services is not solely attributable to the use of export property in the performance of such services and the amount of the gross income attributable to such use of export property cannot be established by reference to transactions between other unrelated persons, such gross income shall be an amount which bears the same ratio to total gross income from the contract or arrangement as the cost of the export property consumed in the performance of such services, including a reasonable allowance for depreciation with respect to the export property so used, bears to the total costs and expenses attributable to the production of income under the contract or arrangement.

(c) Illustration. The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A is engaged in the seismograph service business in foreign country X. In an effort to establish the probable existence of oil in a concession area it owns in foreign country Y, B Corporation which is unrelated to A Corporation enters into a contract with A Corporation whereby A Corporation is required to make seismographic tests of the area in country Y for a fixed fee of $100,000. In performance of the contract, A Corporation hires a skilled crew to carry out the contract and utilizes equipment and supplies (for example, trucks, seismographic equipment, etc.) which constitute export property. Corporation A cannot establish by reference to transactions between other unrelated persons, the income attributable to the use of the export property in the performance of the contract. Corporation A's total costs and expenses (for example, salaries of the crew, administrative expenses, all supplies, total depreciation on property used in performance of the contract, etc.) incurred in performance of the contract are $80,000. The cost of export property consumed in performance of the contract (for example, dynamite, motor oil, and other supplies which were produced in the United States, reasonable depreciation on trucks and seismographic equipment manufactured in the United States and used in performance of the contract, etc.) is $30,000. Corporation A's gross export trade income from the contract is $37,500, that is, the amount which bears the same ratio to total gross income from the contract ($100,000) as the cost of the export property consumed in the rendition of the services ($30,000) bears to total costs and expenses attributable to the contract ($80,000).

(vii) *Interest from export trade assets.* Gross export trade income of a controlled foreign corporation includes interest derived by it from export trade assets described in section 971(c)(4) and paragraph (c)(5) of this section. See section 971(b)(4).

(viii) *Deductions to be taken into account.* Export trade income of a controlled foreign corporation for any taxable year shall be the amount determined by deducting from the items or categories of gross income described in subdivisions (i) through (vii) of this subparagraph the entire amount of those expenses, taxes, and other deductions properly allocable to such items or categories of income. For purposes of this section, expenses, taxes, and other deductions shall first be allocated to items or categories of gross income to which they directly relate; then, expenses, taxes, and other deductions which cannot definitely be allocated to some item or category of gross income shall be ratably apportioned among all items or categories of gross income, except that no expense, tax, or other deduction shall be allocated to an item or category of income to which it clearly does not apply and no deduction allowable to such controlled foreign corporation under section 882(c) and the regulations thereunder shall be taken into account.

(2) *Cross reference.* For rules governing the determination of gross income and taxable income of a foreign corporation, see §1.952–2.

(c) *Export trade assets*—(1) *In general.* For purposes of sections 970 through 972 and §§1.970–1 to 1.972–1, inclusive, the term ‘‘export trade assets’’ means—

(i) Working capital reasonably necessary for the production of export trade income,

(ii) Inventory of export property held for use, consumption, or disposition outside the United States,

(iii) Facilities located outside the United States for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property, and

(iv) Evidences of indebtedness executed by unrelated persons in connection with payment for purchases of export property for use, consumption, or disposition outside the United States, or in connection with the payment for services described in section 971(b)(2) or (3) and paragraph (b)(1)(iv), (v), or (vi) of this section.

(2) *Working capital.* For purposes of subparagraph (1)(i) of this paragraph, working capital of a controlled foreign corporation is the excess of its current assets over its current liabilities. Liabilities maturing in one year or less shall be considered current liabilities. A determination of the amount of working capital of a controlled foreign corporation which is reasonably necessary for the production of export trade income will depend upon the nature and volume of the activities of the controlled foreign corporation which produce export trade income as they exist on the applicable determination date. In determining working capital which is reasonably necessary for the production of export trade income, the anticipated future needs of the business will be taken into account to the extent that such needs relate to the year of the controlled foreign corporation following the applicable determination date; anticipated future needs relating to a later period will not be taken into account unless it is clearly established that such needs are reasonably related to the production of export trade income as of the applicable determination date.

(3) *Inventory of export property.* For purposes of subparagraph (1)(ii) of this paragraph, the inclusion of items in inventory shall be determined in accordance with rules applicable to domestic corporations. See §§ 1.471–1 through 1.471–9. Inventory of export property of a controlled foreign corporation includes export property held for use, consumption, or disposition outside the United States regardless of where it is located on the applicable determination date. Thus, such property may be physically located in the United States on such date. However, for property physically located in the United States to constitute export property, it must have been acquired by the controlled foreign corporation with a clear intent that it would dispose of the property for use, consumption, or disposition outside the United States. As a general rule, if during the year following the applicable determination date export property which was physically located in the United States on such date is actually exported for use, consumption, or disposition outside the United States, such property will be deemed held for such purpose on the applicable determination date. On the other hand, the indefinite warehousing of export property in the United States by the controlled foreign corporation, or the subsequent sale of export property by such corporation for use, consumption, or disposition in the United States, will evidence a lack of intent by such corporation on the applicable determination date to hold such property for use, consumption, or disposition outside the United States.

(4) *Facilities located outside the United States*—(i) *In general.* For purposes of subparagraph (1)(iii) of this paragraph, a facility, as defined in subdivision (ii)*(a)* of this subparagraph, will be considered an export trade asset only—

(a) If such facility is located outside the United States, and

(b) To the extent that such facility is used, within the meaning of subdivision (ii)*(c)* of this subparagraph, by the controlled foreign corporation for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property in essentially the same form in which such property is acquired by such corporation.

Thus, a facility in which property is manufactured or produced, even though export property is used or consumed in the production or becomes a component part of the manufactured article, will not qualify as an export trade asset.

(ii) *Special rules—(a) Facility defined.* For purposes of subdivision (i) of this subparagraph, the term ‘‘facility’’ includes any asset or group of assets used for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property. Thus, such term includes warehouse, storage, or sales facilities (for example, sales office equipment), transportation equipment (for example, motor trucks, vessels, etc.), and machinery and equipment (for example, packaging equipment, servicing equipment, cranes, forklift trucks used in warehouses, etc.).

(b) Determination of location of transportation facilities. A transportation facility shall be considered to be located outside the United States for purposes of subdivision (i)*(a)* of this subparagraph if such property is predominantly located outside the United States. As a general rule, on an applicable determination date a transportation facility will be considered to be predominantly located outside the United States if 70 percent or more of the miles traversed (during the 12-month period immediately preceding such determination date or for such part of such period as such facility is owned by the controlled foreign corporation) in the use of such facility are traversed outside the United States or if such facility is located outside the United States at least 70 percent of the time during such period or such part thereof.

(c) Determination of use. For purposes of subdivision (i)*(b)* of this subparagraph, the extent to which a facility is used in carrying on the activities described in such subdivision depends on the use made of the facility for the 12-month period immediately preceding the applicable determination date or for such part of such period as such facility is owned by the controlled foreign corporation. The method of measuring such use will depend upon the facts and circumstances in each case. However, such determinations of use will generally be made for a facility as a whole and not on the basis of individual items used in the operation of a facility. Thus, a determination as to the use of a warehouse facility will generally be made with respect to the entire facility and not separately for the items used in such warehouse, such as forklift trucks, storage bins, etc.

(5) *Evidences of indebtedness.* For purposes of subparagraph (1)(iv) of this paragraph, the term ‘‘evidence of indebtedness’’ shall mean a note, installment sales contract, a time bill of exchange evidencing a sale on credit, or similar written instrument executed by an unrelated person which evidences the obligation of an unrelated person to pay for export property which an unrelated person purchases for use, consumption, or disposition outside the United States or to pay for services described in section 971(b)(2) or (3) and paragraph (b)(1)(iv), (v), or (vi) of this section which are performed for an unrelated person. Receivables which arise out of the delivery of export property, or the performance of services, which are evidenced by invoices, bills of lading, bills of exchange which do not evidence a sale on credit, sales slips, and similar documents created by the unilateral act of a creditor shall not be considered evidences of indebtedness for purposes of section 971(c)(4).

(6) *Duplication of treatment and priority of application.* No asset which constitutes an export trade asset shall be taken into account more than once in determining the investments in export trade assets of a controlled foreign corporation. Assets which constitute working capital and also constitute inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies shall be taken into account in determining whether the amount of working capital of the controlled foreign corporation is reasonably necessary for the production of export trade income. However, to the extent that the amount of inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies is not included in working capital to which section 971(c)(1) applies on the ground that such amount is not reasonably necessary for the production of export trade income, the amount shall be included under section 971(c)(2) or 971(c)(4), as the case may be, in a controlled foreign corporation’s investments in export trade assets.

(d) *Export promotion expenses*—(1) *In general.* For purposes of sections 970 through 972 and §§1.970–1 to 1.972–1, inclusive, the term ‘‘export promotion expenses'' means, subject to the provisions of subparagraph (2) of this paragraph, all the ordinary and necessary expenses paid or incurred during the taxable year by the controlled foreign corporation which are reasonably allocable to the receipt or production of export trade income including—

(i) A reasonable allowance for salaries or other compensation for personal services actually rendered for such purpose,

(ii) Rentals or other payments for the use of property actually used for such purpose, and

(iii) A reasonable allowance for the exhaustion, wear and tear, or obsolescence of property actually used for such purpose.

In determining for purposes of this subparagraph whether expenses are reasonably allocable to the receipt or production of export trade income, consideration shall be given to the facts and circumstances of each case. As a general rule, if export trade income results from the sale of export property, export promotion expenses allocable to such income shall include warehousing, advertising, selling, billing, collection, other administrative, and similar costs properly allocable to the marketing activity, but shall not include cost of goods sold, income or similar tax, any expense which does not advance the distribution or sale of export property for use, consumption, or disposition outside the United States, or any expense for which the controlled foreign corporation is reimbursed. If export trade income results from the rental of export property, export promotion expenses allocable to such income shall include a reasonable allowance for depreciation and servicing of such property, and the administrative and similar costs properly allocable to the rental activity. If export trade income results from the performance of services, export promotion expenses shall include a reasonable allowance for compensation of the persons performing services for the controlled foreign corporation in the execution of the service contract or arrangement and administrative expenses reasonably allocable to the service activity. In no case shall income taxes be included in export promotion expenses.

(2) *Expenses incurred within the United States.* No expense incurred within the United States shall be treated as an export promotion expense for purposes of section 971(d) and subparagraph (1) of this paragraph unless at least—

(i) 90 percent of all salaries and other personal service compensation incurred in the receipt or the production of export trade income,

(ii) 90 percent of rents and other payments for the use of property used in the receipt or the production of export trade income,

(iii) 90 percent of the allowances for the exhaustion, wear and tear, or obsolescence of property used in the receipt or the production of export trade income, and

(iv) 90 percent of all other ordinary and necessary expenses reasonably allocable to the receipt or the production of export trade income,

is incurred outside the United States. For this purpose, personal service compensation will be considered incurred at the place where the service is performed (for example, salaries will be considered incurred at the place where the employee works; payments for art work will be considered incurred at the place where the art work is prepared, etc.); rent, depreciation, and other expenses related to real or personal property will be considered incurred at the place where the property is located; and expenses for media advertising will be considered incurred at the place where the advertising is consumed. For such purpose, newspaper or periodical advertising will be considered consumed where the newspaper or periodical is principally distributed, and television and radio advertising will be considered consumed at the place where the audience is primarily located. Technicalities of contract or payment, for example, the place where a contract is executed or the location of a bank account from which payment is made, shall not be determinative of the place where an expense is incurred.

(e) *Export property.* For purposes of sections 970 through 972 and §§ 1.970–1 to 1.972–1, inclusive, the term ''export property'' means property, or any interest in property, which is manufactured, produced, grown, or extracted in the United States. Whether property will be considered manufactured or produced in the United States will depend on the facts and circumstances of each case. As a general rule, if—

(1) The property sold, serviced, used, or rented by the controlled foreign corporation is substantially transformed in the United States prior to its export from the United States, or

(2) The operations conducted in the United States with respect to the property sold, serviced, used, or rented by the controlled foreign corporation, whether performed in the United States by one person or a series of persons in a chain of distribution, are substantial in nature and are generally considered to constitute the manufacture or production of property,

then the property sold, serviced, used, or rented will be considered to have been manufactured or produced in the United States. The rules under paragraph (a)(4)(ii) of §1.954–3, relating to the substantial transformation of property, and paragraph (a)(4)(iii) of such section, dealing with a substantive test for determining whether property will be treated as having been manufactured or produced, shall apply for purposes of making determinations under this paragraph.

(f) *Unrelated person.* For purposes of sections 970 through 972 and §§1.970–1 to 1.972–1, inclusive, the term ''unrelated person'' means a person other than a related person as defined in section 954(d)(3) and paragraph (e) of §1.954–1.

[T.D. 6755, 29 FR 12710, Sept. 9, 1964, as amended by T.D. 7293, 38 FR 32802, Nov. 28, 1973; T.D. 7533, 43 FR 6603, Feb. 15, 1978]

§1.972–1 Consolidation of group of export trade corporations.

(a) *Election to consolidate*—(1) *In general.* One or more United States shareholders (as defined in section 951(b)) owning (within the meaning of section 958(a)) or who are considered as owning by applying the rules of ownership of section 958(b) more than 50 percent of the total combined voting power of all classes of stock entitled to vote of an export trade corporation, which is the top-tier corporation in a chain (within the meaning of subparagraph (2) of this paragraph) of export trade corporations, may, subject to the provisions of this section, elect to consolidate such chain for purposes of determining—

(i) The limitations, described in section 970(a) and paragraph (b)(2) of §1.970–1, on the amount by which subpart F income of an export trade corporation in such chain shall be reduced as provided in section 970(a) and paragraph (b)(1) of §1.970–1, and

(ii) The amount includible in gross income of such shareholders under section 951(a)(1)(A)(ii) with respect to such a corporation's decrease in investments in export trade assets to which section 970(b) applies as described in paragraph (c) of §1.970–1.

(2) *''Chain'' defined.* A chain of export trade corporations shall include—

(i) The top-tier export trade corporation referred to in subparagraph (1) of this paragraph which is the first export trade corporation in a chain of ownership described in section 958(a);

(ii) All export trade corporations 80 percent or more of the total combined voting power of all classes of stock entitled to vote of which is owned directly by such top-tier export trade corporation on the last day of its taxable year; and

(iii) All export trade corporations 80 percent or more of the total combined voting power of all classes of stock entitled to vote of which is owned directly by the export trade corporations described in subdivision (ii) of this subparagraph on the last day of the taxable year of the export trade corporation described in subdivision (i) of this subparagraph.

For purposes of this section, a reference to a top-tier corporation shall mean an export trade corporation described in subdivision (i) of this subparagraph, a reference to a second-tier corporation shall mean an export trade corporation described in subdivision (ii) of this subparagraph, and a reference to a third-tier corporation shall mean an export trade corporation described in subdivision (iii) of this subparagraph.

(3) *Inclusion requirement.* If an election is made by a United States shareholder under this paragraph with respect to a chain of export trade corporations (as defined in subparagraph (2) of this paragraph), all export trade corporations which are included in the

chain must be included in the consolidation. If such an election is made, the determinations under section 970 shall be made on a consolidated basis with respect to the entire interest which the electing United States shareholder owns in each of the export trade corporations in the chain, including any minority interests owned directly or indirectly by such shareholder in second-tier and third-tier corporations in the chain. A United States shareholder may elect to consolidate his interest in export trade corporations in one chain of such corporations without electing to consolidate his interest in export trade corporations in other chains.

(4) *Conditions for making initial election*—(i) *Without consent.* The initial election to consolidate a chain of export trade corporations may be made without the consent of the Commissioner only if, immediately before the election to consolidate, each of the export trade corporations to be included in the consolidation is using the same taxable year and has the same elections under section 970(c)(4) and § 1.970–2 in force, or not in force, as the case may be. The election shall be made by the electing shareholder or shareholders with respect to the taxable year in which or with which ends the first taxable year of the top-tier corporation to which the election to consolidate applies and at the time of filing such shareholders' returns for such taxable year or within 90 days after final regulations under this section are published in the FEDERAL REGISTER, whichever date occurs later. Each United States shareholder making such an election shall attach to his return a statement showing:

(a) The name, address, and taxable year of each export trade corporation in the chain of such corporations for which an election is made,

(b) The amount and percentage of each class of stock owned by such shareholder (within the meaning of section 958), corporation by corporation, in each of such export trade corporations, and

(c) A list of the names and addresses, and a description of the ownership interests, of all other United States shareholders, if any, who are making the same election to consolidate and a statement that such shareholders are also making the election.

(ii) *With consent.* If, immediately before the election to consolidate, each of the export trade corporations in a chain of such corporations does not use the same taxable year or does not have the same elections under section 970(c)(4) and § 1.970–2 in force, or not in force, as the case may be, the initial election to consolidate such chain may be exercised by the electing shareholder or shareholders only with the consent of the Commissioner. Consent will not be granted unless each electing United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which such consolidation is to be effected and unless, subject to such terms, conditions, and adjustments as the Commissioner may prescribe, each of the export trade corporations in the chain adopts a common taxable year and has the same elections under section 970(c)(4) and § 1.970–2 in force, or not in force, as the case may be. The application for consent to consolidate shall be made by mailing a letter, signed by each of the electing United States shareholders, to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the top-tier corporation with respect to which the electing shareholder or shareholders desire to make a consolidation or before the close of the 90th day after final regulations under this section are published in the FEDERAL REGISTER, whichever date occurs later, and shall include the statement described in subdivision (i) of this subparagraph.

(5) *Effect of election.* If an election to consolidate a chain of export trade corporations is made for a taxable year of a United States shareholder, such election shall, except as provided in subparagraph (6) of this paragraph, be binding on such shareholder for such taxable year and for all succeeding taxable years. If, in a subsequent taxable year of the United States shareholder, an export trade corporation for the first time qualifies as a second-tier or third-tier corporation in such chain on the last day of the taxable year of the top-tier corporation which ends in or

with the subsequent taxable year of such shareholder, the shareholder's interest in such export trade corporation shall be included in the consolidation to which the election applies, but only if such export trade corporation as of such last day uses the same taxable year and has the same elections under section 970(c)(4) and §1.970–2 in force, or not in force, as the case may be, as such top-tier corporation. The United States shareholder shall, with respect to such additional export trade corporation, submit with his return for such subsequent taxable year the statement described in subparagraph (4)(i) of this paragraph.

(6) *Termination of election.* An election under this paragraph to consolidate a chain of export trade corporations shall terminate for the first taxable year of the foreign corporation which during the period of consolidation is a top-tier corporation—

(i) At the close of which any foreign corporation which was included in such consolidation for the preceding taxable year ceases to qualify as an export trade corporation or to be eligible under this paragraph for inclusion in such chain,

(ii) At the close of which an export trade corporation for the first time qualifies as a second-tier or third-tier corporation in such chain but does not as of such close of the year use the same taxable year or have the same elections under section 970(c)(4) and §1.970–2 in force, or not in force, as the case may be, as such top-tier corporation, or

(iii)*(a)* In respect of which the Commissioner, upon application made by a United States shareholder who made the election to consolidate, or his successor in interest, consents to a termination of the election. Approval will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the termination will be effected.

(b) The application for consent to termination shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the taxable year of the foreign corporations with respect to which the shareholder desires to terminate the consolidation and shall include the following information:

(1) The name, address, and taxable year of each export trade corporation in the chain of such corporations for which the election was made,

(2) The amount and percentage of each class of stock owned by such shareholder (within the meaning of section 958), corporation by corporation, in each of such export trade corporations, and

(3) A list of the names and addresses, and a description of the ownership interests, of all other United States shareholders, if any, who participated in making the election with such United States shareholder, or their successors in interest, and a statement whether such other persons are or are not terminating the election.

(7) *Election subsequent to initial election.* If a United States shareholder elects under subparagraph (4) of this paragraph to consolidate his interest in a chain of export trade corporations and the election to consolidate such corporations terminates under the provisions of subparagraph (6) of this paragraph, such shareholder may not thereafter elect under this section to consolidate his interest in any corporation which was in that chain of export trade corporations unless he receives the consent of the Commissioner to do so. Application to obtain such consent of the Commissioner shall be made by a letter mailed to the Commissioner of Internal Revenue, Washington, DC, 20224, before the close of the first taxable year of the top-tier corporation of the chain of export trade corporations in which the election to include such interest is to apply. Such application for consent shall include a statement showing:

(i) With respect to such chain, the information required to be shown in the statement described in subparagraph (4)(i) of this paragraph, and

(ii) The United States shareholder's interest in such chain which was previously included in a consolidation, the taxable years of such previous consolidation, and the manner in which such previous consolidation was terminated.

(8) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. Domestic corporation M owns 60 percent of the only class of stock of foreign corporation A, and 100 percent of the only class of stock of foreign corporation F, respectively. Corporation A owns 80 percent of the only class of stock of foreign corporations B and C, respectively. Corporation M also owns 20 percent of the stock of B Corporation. Corporation B owns 80 percent of the only class of stock of foreign corporation D. Corporations B and C each own 50 percent of the only class of stock of foreign corporation E. Corporation F owns 100 percent of the only class of stock of foreign corporation G, which owns 100 percent of the only class of stock of foreign corporation H. Corporation F also owns 20 percent of the stock of C Corporation. Domestic corporations N and R own 30 percent and 10 percent, respectively, of the stock of A Corporation. All corporations use the calendar year as a taxable year, and all foreign corporations qualify as export trade corporations for 1963. Corporation M may elect for 1963 to consolidate its interest in the chain (the ''A'' chain) of export trade corporations which includes corporations A, B, C, D, and E; and Corporation M need not, but may, elect to consolidate its interest in the chain (the ''F'' chain) of export trade corporations which includes corporations F, G, and H. Consolidation of M Corporation's interest in the ''A'' chain with its interest in the ''F'' chain is not permitted. If M Corporation elects to consolidate the ''A'' chain, M Corporation must include in the consolidation its 20 percent directly owned interest in B Corporation and its 20 percent indirectly owned (through F Corporation) interest in C Corporation. Either N Corporation or R Corporation, or both, may join M Corporation in electing to consolidate their interests in the ''A'' chain. However, neither N Corporation nor R Corporation may elect to consolidate the ''A'' chain unless M Corporation also agrees to so elect, because corporations N and R, neither jointly nor separately, own more than 50 percent of the total combined voting power of all classes of stock entitled to vote of A Corporation. If corporations M, N, and R elect to consolidate the ''A'' chain, the determinations specified in subparagraph (1) of this paragraph will be made on a consolidated basis with respect to such corporations' respective interest in the chain as shown in the following tabulation:

	A	B	C	D	E
	%	%	%	%	%
M Corporation's interest:					
Direct interest	60				
(60%×80%)+20% direct interest		68			
(60%×80%)+20% indirect interest			68		
(68%×80%)				54.4	
(68%×50%)+(68%×50%)					68
N Corporation's interest:					
Direct interest	30				
(30%×80%)		24			
(30%×80%)			24		
(24%×80%)				19.2	
(24%×50%)+(24%×50%)					24
R Corporation's interest:					
Direct interest	10				
(10%×80%)		8			
(10%×80%)			8		
(8%×80%)				6.4	
(8%×50%)+(8%×50%)					8
Total interests to which consolidation applies	100	100	100	80	100

(b) *Effect of consolidation*—(1) *Determination of subpart F income, export trade income, etc.* An election under paragraph (a) of this section to consolidate export trade corporations in a chain of such corporations shall have no effect on the determination of the character of income as subpart F income or on the determination of export trade income, export trade income which constitutes foreign base company income, or earnings and profits of the individual export trade corporations in the chain. Thus, the consolidation of export trade corporations under this section shall not have the effect of reducing earnings and profits of such corporations or of changing the characterization of income from that which is, for example, foreign base company income to that which is not. The application of this paragraph may be illustrated by the following example:

Example. Corporation A, incorporated under the laws of foreign country X, and corporation B, incorporated under the laws of foreign country Y, are both wholly owned subsidiaries of domestic corporation M. Corporations A and B both qualify under section 971(a) as export trade corporations. Corporation A purchases personal property produced in the United States from an unrelated person and sells the property to B Corporation for use outside of country X. Corporation B resells the property to an unrelated person for use in foreign country Z. Corporations A and B each derive foreign base company sales income described in §1.954–3 from the purchase and sale transactions. Consolidation of Corporations A and B under this section does not result in the two transactions being treated as one transaction which is a purchase of property from an unrelated person and a sale of property to an unrelated person or the nonrecognition of gain on the sale of export property by A Corporation to B Corporation.

(2) *Determination of amount by which consolidated subpart F income is reduced*—(i) *In general.* In determining the amount by which the subpart F income of each export trade corporation includible in a consolidation of export trade corporations shall be reduced as provided in section 970(a) and paragraph (b)(1) of §1.970–1 for any taxable year of consolidation, the limitations provided by section 970(a) and paragraph (b)(2) of §1.970–1 on such amount for each such export trade corporation shall be determined on the basis of such corporation's separate share of—

(a) Amounts included in the total export promotion expense,

(b) The total gross receipts from the sale, installation, operation, maintenance, or use of property in respect of which each such corporation derives such export trade income as is properly allocable to the export trade income which constitutes foreign base company income, and

(c) The total increase in investments in export trade assets,

of all export trade corporations to which the consolidation applies for the taxable year.

(ii) *Limitations not effective.* If for any taxable year each of the limitations under paragraph (b)(2) of §1.970–1, determined on a consolidated basis, equals or exceeds the total export trade income which constitutes foreign base company income of all corporations includible in the consolidation of export trade corporations, the subpart F income of each includible corporation shall be reduced under section 970(a) for such year by its separate export trade income which constitutes foreign base company income.

(iii) *Limitation effective.* If for any taxable year one of the limitations under paragraph (b)(2) of §1.970–1, determined on a consolidated basis, is less than the total export trade income which constitutes foreign base company income of all corporations includible in the consolidation of export trade corporations, the amount by which the subpart F income of each includible corporation shall be reduced under section 970(a) for such year shall be an amount which bears the same ratio to the amount by which the subpart F income may be reduced on a consolidated basis as the export trade income which constitutes foreign base company income of each includible corporation bears to the total export trade income which constitutes foreign base company income of all export trade corporations includible in the consolidation of export trade corporations.

(iv) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Domestic corporation M owns 100 percent of the only class of stock of controlled foreign corporation A, which, in turn, owns 100 percent of the only class of stock of controlled foreign corporation B. All corporations use the calendar year as the taxable year, and corporations A and B are export trade corporations throughout the period here involved. Corporation M elects under this section to consolidate corporations A and B for the entire period here involved. Corporation M elects under paragraph (a)(2) of §1.970–2 for 1963 to determine both A Corporation's and B Corporation's investments in export trade assets as of the close of the 75th day after the close of such corporations' taxable year.

(b) The following amounts are applicable to corporations A and B for 1964:

	Corporation A	Corporation B
Subpart F income	$100	$200

	Corporation A	Corporation B
Export trade income which constitutes foreign base company income	25	75
Other export trade income	10	15
Export promotion expenses allocable to export trade income which constitutes foreign base company income	10	80
Gross receipts from the sale of property in respect of which export trade income which constitutes foreign base company income is derived	400	600
Increase in investments in export trade assets for period beginning with March 16, 1964, and ending with March 16, 1965	35	120

(c) The amount by which subpart F income of corporations A and B is reduced for 1964 on a separate-company basis without regard to section 972 may be determined as set forth in items (i) through (vii) below, and the results of the consolidation of corporations A and B for 1964 are set forth in items (viii) through (x). Assuming an alternative case in which for 1964 the facts are the same as set forth in paragraphs (a) and (b) of this example except that B Corporation incurs export promotion expenses of $50 (rather than $80) which are allocable to the export trade income which constitutes foreign base company income, the results of the consolidation of corporations A and B for such year (a case where one of the limitations under paragraph (b)(2) of § 1.970–1 is effective) are set forth in items (xi) through (xiii):

	A Corporation (1)	B Corporation (2)	Total (3)
(i) Subpart F income	$100	$200	$300
(ii) Export trade income which constitutes foreign base company income	25	75	100
(iii) Other export trade income	10	15	25
(iv) Total export trade income	35	90	125
(v) Limitations under § 1.970–1(b)(2):			
(a) Increase in export trade assets limitation:			
($35×$25/$35)	25	....	....
($120×$75/$90)	....	100	....
([$35+$120]×$100/$125)	....	....	124
(b) Gross receipts limitation:			
(10% of $400)	40	....	....
(10% of $600)	....	60	....
(10% of $1,000)	....	....	100
(c) Export promotion expenses limitation:			
(150% of $10)	15	....	....
(150% of $80)	....	120	....
(150% of $90)	....	....	135
(d) Export promotion expenses limitation (alternative case):			
(150% of $10)	15	....	....
(150% of $50)	....	75	....
(150% of $60)	....	....	90
(vi) Reduction in subpart F income on a separate company basis determined without regard to section 972 (item (ii), but not to exceed smallest of items (v) *(a), (b),* and *(c),* in columns (1) and (2))	15	60	75
(vii) Subpart F income as reduced on a separate company basis (item (i) minus item (vi))	85	140	225
(viii) Reduction in subpart F income on a consolidated basis determined under section 972 (item (ii), but not to exceed smallest of items (v) *(a), (b),* and *(c),* in column (3))	....	....	100
(ix) Apportionment of reduction in subpart F income (item (ii))	25	75	100
(x) Subpart F income as reduced on a consolidated basis (item (i) minus item (ix))	75	125	200
ALTERNATIVE CASE			
(xi) Reduction in subpart F income on a consolidated basis determined under section 972 (item (ii) but not to exceed smallest of items (v) *(a), (b),* and *(d),* in column (3))	....	....	9
(xii) Apportionment of reduction in subpart F income (item (xi) times [item (ii) of column (1) over item (ii) of column (3)] and item (xi) times [item (ii) of column (2) over item (ii) of column (3)]); ($90 × $25/$100)	$22.50		
($90 × $75/$100)		$67.50	90
(xiii) Subpart F income as reduced on a consolidated basis (item (i) minus item (xii))	77.50	132.50	210

(3) *Determination of pro rata share of consolidated withdrawal of previously excluded export trade income*—(i) *In general.* If, for any taxable year, there is a decrease in investments in export trade assets under section 970(b) and paragraph (c)(1) of § 1.970–1, determined on a consolidated basis, of export trade corporations includible in a consolidated chain of such corporations, each United States shareholder who has elected under paragraph (a) of this section to

consolidate his interest in such chain of corporations shall include in his gross income, under section 951(a)(1)(A)(ii) and the regulations thereunder as an amount to which section 955 (as in effect before the enactment of the Tax Reduction Act of 1975) applies, his pro rata share of the amount of such consolidated decrease in investments but only to the extent such pro rata share does not exceed the lesser of the limitations provided by section 970(b) and paragraph (c)(2) of §1.970–1 with respect to such shareholder determined on a consolidated basis. The consolidated decrease in investments and the consolidated limitations shall be determined by aggregating the applicable amounts determined under paragraph (c) of §1.970–1 with respect to such shareholder's interest in each corporation includible in the consolidation.

(ii) *Allocation of pro rata share of consolidated decrease in investments in export trade assets.* For purposes of determining the amount referred to in paragraph (c)(2)(i)*(b)(3)* of §1.970–1 for a subsequent taxable year, a United States shareholder's pro rata share of a consolidated decrease in investments determined under subdivision (i) of this subparagraph for the current taxable year shall be allocated to such shareholder's interest in each of the export trade corporations includible in the consolidation in that ratio which—

(a) The net amount determined under paragraph (c)(2)(i)*(b)* of §1.970–1 with respect to such shareholder's interest in such corporation for all prior taxable years (whether or not a taxable year occurring during the period of consolidation) bears to

(b) The total of the net amounts determined under paragraph (c)(2)(i) *(b)* of §1.970–1 with respect to such shareholder's interests in all export trade corporations includible in such consolidation for all prior taxable years (whether or not a taxable year occurring during the period of consolidation).

(iii) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Domestic corporation M owns 60 percent of the only class of stock of controlled foreign corporation A, which, in turn, owns 100 percent of the only class of stock of controlled foreign corporation B. All corporations use the calendar year as a taxable year, and corporations A and B are export trade corporations throughout the period here involved. Corporation M elects to consolidate corporations A and B for the entire period here involved.

(b) The following amounts are applicable to corporations A and B for 1964:

	A (1)	B (2)	Consolidated (3)
(i) Consolidated decrease in investments in export trade assets (determined before application of §1.970–1(c)(2))	....	....	$100
(ii) M Corporation's pro rata share of consolidated decrease (60%)	....	....	60
(iii) M Corporation's pro rata share of earnings and profits for 1963 and 1964 (§1.970–1(c) (2)(i)*(a)*)	$120	$90	210
(iv) M Corporation's pro rata share of net amount determined under §1.970–1(c)(2)(i)*(b)* for 1963	180	60	240
(v) Amount includible in M Corporation's gross income for 1964 (smallest of items (ii), (iii), and (iv) in column (3))	....	....	60

Corporation M must include $60 in its gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)*(b)*(3) of §1.970–1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1964 is allocated as follows: to M Corporation's interest in A Corporation, $45 ($60 times $180/$240); and to its interest in B Corporation, $15 ($60 times $60/$240).

(c) The following amounts are applicable to corporations A and B for 1965:

	A(1)	B(2)	Consolidated (3)
(i) Consolidated decrease in investments in export trade assets (determined before application of §1.970–1(c)(2))	....	....	$150
(ii) M Corporation's pro rata share of consolidated decrease (60%)	....	....	90
(iii) M Corporation's pro rata share of earnings and profits (and deficits in earnings and profits) for 1963, 1964, and 1965 (§1.970–1(c)(2)(i)*(a)*)	$100	($20)	80

	A(1)	B(2)	Consolidated (3)
(iv) M Corporation's pro rata share of the net amount determined under § 1.970–1(c)(2)(i)*(b)* for 1963 and 1964			
($180 − $45)	135	....	....
($60 − $15)		45	....
Total			180
(v) Amount includible in M Corporation's gross income for 1965 (smallest of items (ii), (iii), and (iv) in column (3)).			80

Corporation M must include $80 in its gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)*(b)*(3) of § 1.970–1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1965 is allocated as follows: to M Corporation's interest in A Corporation, $60 ($80 times $135/$180); and to its interest in B Corporation, $20 ($80 times $45/$180).

(d) The following amounts are applicable to corporations A and B for 1966:

	A(1)	B(2)	Consolidated (3)
(i) Consolidated decrease in investments in export trade assets (determined before application of § 1.970–1(c)(2))	....	....	$200
(ii) M Corporation's pro rata share of consolidated decrease (60%)	....	....	120
(iii) M Corporation's pro rata share of earnings and profits (and deficits in earnings and profits) for 1963, 1964, 1965, and 1966 (§ 1.970–1(c)(2)(i)*(a)*)	$120	$50	170
(iv) M Corporation's pro rata share of the net amount determined under § 1.970–1(c)(2)(i)(b) for 1963, 1964, and 1965			
($180 minus [$45+$60])	75	....	....
($60 − [$15+$20])		25	....
Total			100
(v) Amount includible in M Corporation's gross income for 1966 (smallest of items (ii), (iii), and (iv) in column (3))	....	....	100

Corporation M must include $100 in its gross income for 1966 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)(b)(3) of § 1.970–1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1966 is allocated as follows: to M Corporation's interest in A Corporation, $75 ($100 times $75/$100); and to its interest in B Corporation, $25 ($100 times $25/$100).

[T.D. 6754, 29 FR 12714, Sept. 9, 1964, as amended by T.D. 7893, 48 FR 22512, May 19, 1983]

§ 1.981–0 Repeal of section 981; effective dates.

The provisions of section 981 are not effective for taxable years beginning after December 31, 1976. For the treatment of the community income of aliens and their spouses for taxable years beginning after December 31, 1976, see section 879 and the regulations thereunder.

[T.D. 7670, 45 FR 6929, Jan. 31, 1980]

§ 1.981–1 Foreign law community income for taxable years beginning after December 31, 1966, and before January 1, 1977.

(a) *Election for special treatment*—(1) *In general.* An individual citizen of the United States who meets the requirements of section 981(a)(1) and subparagraph (2) of this paragraph for any open taxable year beginning after December 31, 1966, and before January 1, 1977, may make a binding election with his nonresident alien spouse to have section 981(b) and paragraph (b) of this section apply to their income for such year which is treated as community income under the applicable community property laws of a foreign country or countries. Generally, the community property laws of a foreign country operate upon land situated within its jurisdiction and upon personal property owned by spouses domiciled therein. If the election is made for any taxable year, it shall also apply for all subsequent open taxable years of such citizen and his nonresident alien spouse for which all the requirements of section 981(a)(1) and subparagraph (2) of this paragraph are met, unless the Director of International Operations consents, in accordance with paragraph (c)(2) of this section, to a termination of the election. An election under section 981(a) and this section has no effect for any taxable year beginning before January 1, 1967, for which a separate election, if made, must be made under section

981(c)(1) and §1.981–2. For the definition of ‘‘open taxable year’’ see section 981(e)(2) and paragraph (a) of §1.981–3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of §1.981–3. If one of the spouses is deceased, see paragraph (d) of §1.981–3.

(2) *Requirements to be met.* In order for a U.S. citizen and his nonresident alien spouse to make an election under section 981(a) and this section for any taxable year and in order for the election to apply for any subsequent taxable year it is required under section 981(a)(1) that, for each such taxable year, such citizen be (i) a citizen of the United States, (ii) a bona fide resident of a foreign country or countries during the entire taxable year, and (iii) married at the close of the taxable year to an individual who is *(a)* a nonresident alien during the entire taxable year and *(b)*, in the case of any such subsequent taxable year, the same nonresident alien individual to whom the citizen was married at the close of the earliest of such taxable years. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated, solely for purposes of making the determination under subdivision (iii) of this subparagraph, as ending on the date of such death. A citizen of the United States shall be considered as not married at the close of his taxable year if he is legally separated from his spouse under a decree of divorce or of separate maintenance. However, the mere fact that spouses have not lived together during the course of the taxable year shall not cause them to be considered as not married at the close of the taxable year. A husband and wife who are separated under an interlocutory decree of divorce retain the relationship of husband and wife until the decree becomes final.

(3) *Determination of residence.* The principles of paragraphs (a)(2) and (b)(7) of §1.911–1 (26 CFR 1.911–1 (1978)) shall apply in order to determine for purposes of this paragraph whether a U.S. citizen is a *bona fide* resident of a foreign country or countries during the entire taxable year. The principles of §§1.871.2 through 1.871–5 shall apply in order to determine whether the alien spouse of a U.S. citizen is a nonresident during the entire taxable year.

(4) *Manner of electing.* The election under section 981(a) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income*—(1) *In general.* Community income for any taxable year to which an election under section 981(a) and this section applies, and the deductions properly allocable to such income, shall be divided between the electing U.S. citizen and nonresident alien spouses in accordance with the rules set forth in section 981(b) and subparagraphs (2) through (6) of this paragraph. Community income for this purpose means all gross income, whether derived from sources within or without the United States, which is treated as community income of the spouses under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. A spouse has ownership of the income for this purpose if under the applicable foreign law he has a proprietary vested interest in the income.

(2) *Earned income.* Wages, salaries, or professional fees, and other amounts received as compensation for personal services actually performed, which are community income for the taxable year, shall be treated as the income of the spouse who actually performed the personal services. This subparagraph does not apply, however, to community income (i) derived from any trade or business carried on by the husband or the wife, (ii) attributable to a spouse’s distributive share of the income of a partnership to which subparagraph (4) of this paragraph applies, (iii) consisting of compensation for personal services rendered to a corporation which represents a distribution of the earnings and profits of the corporation rather than a reasonable allowance as compensation for the personal services actually performed, or (iv) derived from property which is acquired as consideration for personal services performed.

(3) *Trade or business income.* If any income derived from a trade or business carried on by the husband or wife is community income for the taxable

year, all of the gross income, and the deductions attributable to such income, shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of the trade or business, in which case all of the gross income and deductions shall be treated as the gross income and deductions of the wife. This subparagraph does not apply to any income derived from a trade or business carried on by a partnership of which both or one of the spouses is a member. For purposes of this subparagraph, income derived from a trade or business includes any income derived from a trade or business in which both personal services and capital are material income producing factors. The term ''management and control'' means management and control in fact, not the management and control imputed to the husband under the community property laws of a foreign country. For example, a wife who operates a beauty parlor without any appreciable collaboration on the part of a husband is considered as having substantially all of the management and control of the business despite the provisions of any community property laws of a foreign country vesting in the husband the right of management and control of community property; and the income and deductions attributable to the operation of the beauty parlor are considered the income and deductions of the wife.

(4) *Partnership income.* If any portion of a spouse's distributive share of the income of a partnership of which such spouse is a member is community income for the taxable year, all of that distributive share shall be treated as the income of that spouse and shall not be taken into account in determining the income of the other spouse. If both spouses are members of the same partnership, the distributive share of the income of each spouse which is community income shall be treated as the income of that spouse. A spouse's distributive share of such income of a partnership shall be determined as provided in section 704, and the regulations thereunder.

(5) *Income from separate property.* Any community income for the taxable year, other than income described in section 981(b)(1) or (2) and subparagraph (2), (3), or (4) of this paragraph, which is derived from the separate property of one of the spouses shall be treated as the income of that spouse. The determination of what property is separate property for this purpose shall be made in accordance with the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that the income from such property is community income.

(6) *Other community income.* Any community income for the taxable year, other than income described in section 981(b)(1), (2), or (3), and subparagraph (2), (3), (4), or (5) of this paragraph, shall be treated as the income of that spouse who has a proprietary vested interest in that income under the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that such income is community income. Thus, for example, this subparagraph applies to community income not described in subparagraph (2), (3), (4), or (5) of this paragraph which consists of dividends, interest, rents, royalties, or gains, from community property or of the earnings of unemancipated minor children.

(7) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. H, a nonresident alien individual and W, a U.S. citizen, each of whose taxable years is the calendar year, were married throughout 1967. H and W were residents of, and domiciled in, foreign country Z during the entire taxable year. During 1967, H earned $10,000 from the performance of personal services as an employee. H also received $500 in dividend income from stock which under the community property laws of country Z is considered to be the separate property of H. W had no separate income for 1967. Under the community property laws of country Z all income earned by either spouse is considered to be community income, and one-half of such income is considered to belong to the other spouse. In addition, such laws of country Z provide that all income derived from property held separately by either spouse is to be treated as community income and treated as belonging one-half to each spouse. Thus, under the community property laws of country Z, H and W are both considered to have realized income of $5,250 during

1967, even though such laws recognize the stock as the separate property of H. If the election under this section is in effect for 1967, under the rules of subparagraphs (2) and (5) of this paragraph all of the income of $10,500 derived during 1967 shall be treated, for U.S. income tax purposes, as the income of H.

Example 2. The facts are the same as in example 1 except that H is the sole proprietor of a retail merchandising company and such company has a $10,000 profit during 1967. W exercises no management and control over the business. In addition, H is a partner in a wholesale distributing company, and his distributive share of the partnership profit is $5,000. Both of these amounts of income are treated as community income under the community property laws of country Z, and under such laws both H and W are treated as realizing $7,500 of such income. If the election under this section is in effect for 1967, under the rule of subparagraphs (3) and (4) of this paragraph all $15,000 of such income shall be treated as the income of H for U.S. income tax purposes.

Example 3. The facts are the same as in example 1 except that H also received $1,000 in dividends on stock held separately in his name. Under the community property laws of country Z the stock is considered to be community property; and the dividends, to be community income, one-half of such income being treated as the income of each spouse. If the election under this section is in effect for 1967, under the rule of subparagraph (6) of this paragraph, $500 of the dividend income shall be treated, for U.S. income tax purposes, as the income of each spouse.

(c) *Time and manner of making or terminating an election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse shall, for the first taxable year beginning after December 31, 1966, for which an election under section 981(a) and this section is to apply, make the election by filing a return, an amended return, or a claim for refund, whichever is proper, for such taxable year and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for such taxable year. The statement must show the name, address, and account number, if any, of each spouse, the name and address of the executor, administrator, or other person making the election for a deceased spouse, the taxable year to which the election applies, and the name of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(b) and paragraph (b) of this section. The statement must be signed by both persons making the election. An election under this section may be made only for a taxable year which, on the date of the election, as defined in paragraph (b) of §1.981–3, is open within the meaning of section 981(e)(2) and paragraph (a) of §1.981–3.

(2) *Termination only with consent of Director of International Operations*—(i) *In general.* An election under this section for any taxable year is binding and may not be revoked. The election shall also remain in effect for all subsequent taxable years of the spouses for which the requirements of paragraph (a)(2) of this section are met and which on the date of the election are open, within the meaning of paragraph (a) of §1.981–3, unless the election is terminated for any such subsequent taxable year or years in accordance with subdivision (ii) of this subparagraph. Any return, amended return, or claim for refund in respect of any such subsequent taxable year for which the election is in effect shall have attached thereto a copy of the statement filed in accordance with subparagraph (1) of this paragraph and an additional signed statement that for such subsequent taxable year the requirements of paragraph (a)(2) of this section are met.

(ii) *Written request to terminate required.* A request to terminate an election under this section for a subsequent taxable year or years shall be made in writing by the persons who made the election and shall be addressed to the Director of International Operations, Internal Revenue Service, Washington, DC 20225. The request must include the name, address, and account number, if any, of each spouse and must be signed by the persons making the request. It must specify the taxable year or years for which the termination is to be effective and the grounds which justify the termination. The request shall be filed not later than 90 days before the close of the period for assessing a deficiency against the U.S. citizen for the earliest taxable year of such citizen for which the termination is to be effective. The Director of International Operations may require such other information as may be necessary in order to determine whether the termination will be permitted. A copy of the consent by the Director of International Operations to terminate must be attached to an amended income tax return for each taxable year for which the termination is effective and for which a return has previously been filed.

(Secs. 913(m) (92 Stat. 3106; 26 U.S.C. 913(m)), and 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 7330, 39 FR 38372, Oct. 31, 1974, as amended by T.D. 7670, 45 FR 6929, Jan. 31, 1980; T.D. 7736, 45 FR 76143, Nov. 18, 1980]

§ 1.981–2 Foreign law community income for taxable years beginning before January 1, 1967.

(a) *Election for special treatment*—(1) *In general.* For all open taxable years beginning before January 1, 1967, for which an individual citizen of the United States meets the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph, such citizen and his nonresident alien spouse may make a joint election to have section 981(c)(2) and paragraph (b) of this section apply to their income which is treated as community income under the applicable community property laws of a foreign country or countries. However, if the conditions prescribed by section 981(d)(3) and subparagraph (3) of this paragraph are met, the nonresident alien spouse is not required to join in the election and such citizen may make a separate election to have section 981(c)(2) and paragraph (b) of this section apply to such income for such taxable years. An election under section 981(c)(1) and this section shall apply to every open taxable year of such citizen and his nonresident alien spouse beginning before January 1, 1967, for which all the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph are met. It is immaterial whether such open taxable year is a taxable year subject to the provisions of the 1954 Code, the 1939 Code, or any other internal revenue law in effect before the 1939 Code. An election under section 981(c)(1) and this section has no effect for any taxable year beginning after December 31, 1966. For the definition of ‘‘open taxable year’’ see section 981(e)(2) and paragraph (a) of § 1.981–3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of § 1.981–3. If one of the spouses is deceased, see paragraph (d) of § 1.981–3. An election under section 981(c)(1) and this section is binding and may not be revoked.

(2) *Requirements to be met.* In order for the citizen of the United States to make an election under this section, whether required to be made jointly with his nonresident alien spouse or permitted to be made separately, it is required under section 981(c)(1) that, for each taxable year to which the election applies, the citizen making the election be (i) a citizen of the United States and (ii) married at the close of the taxable year to an individual who is *(a)* a nonresident alien during the entire taxable year and *(b),* in the case of any such taxable years subsequent to the first, the same nonresident alien individual to whom the citizen was married at the close of such first taxable year. The provisions of paragraph (a)(2) of § 1.981–1 apply to determine whether a U.S. citizen making an election under section 981(c)(1) and this section is married at the close of a taxable year to an individual who is a nonresident alien during the entire taxable year.

(3) *Cases where joint election is not required.* A nonresident alien spouse is not required to join in an election under section 981(c)(1) and this section if the Director of International Operations determines in accordance with paragraph (c)(4) of this section—

(i) That an election under section 981(c)(1) and this section would not affect the liability for Federal income tax of the nonresident alien spouse for any taxable year, whether beginning on, before, or after January 1, 1967, or

(ii) That the effect of the election on the liability of the nonresident alien spouse for Federal income tax for any such taxable year cannot be ascertained and that to deny the election to the U.S. citizen spouse would be inequitable and cause undue hardship to the U.S. citizen.

If in accordance with this subparagraph the nonresident alien spouse is not required to join in the election by the U.S. citizen, the provisions of section 981(d)(2) and paragraph (e) of §1.981–3 shall not apply so as to extend the period for assessing deficiencies or filing a claim for credit or refund for any taxable year of the nonresident alien spouse.

(4) *Manner of electing.* The election under section 981(c)(1) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income*—(1) *In general.* Community income, as defined in paragraph (b)(1) of §1.981–1, for any taxable year beginning before January 1, 1967, to which an election under section 981(c)(1) and this section applies, and the deductions properly allocable to such income, shall be divided between the U.S. citizen and his nonresident alien spouse in accordance with the rules set forth in section 981(c)(2) and subparagraphs (2) and (3) of this paragraph. The income shall be divided in such manner even though the nonresident alien spouse is not required, in accordance with paragraph (a)(3) of this section, to join in the election by the U.S. citizen.

(2) *Earned income, business income, partnership income, and income from separate property.* All community income for any taxable year to which this paragraph applies which is treated as the income of one of the spouses in accordance with section 981(b)(1), (2), or (3) and paragraph (b)(2), (3), (4), or (5) of §1.981–1 shall be treated as the income of that spouse for purposes of this paragraph.

(3) *Other community income.* All community income for any taxable year to which this paragraph applies, other than income described in subparagraph (2) of this paragraph, shall be treated as the income of the spouse who, for such taxable year, has a greater amount of gross income than the other spouse, determined by adding to the amount of gross income which is treated as the gross income of that spouse in accordance with subparagraph (2) of this paragraph the amount of the gross income for the taxable year which is treated as the separate income of that spouse under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated as ending on the date of such death for the purpose of determining which spouse has the greater amount of gross income for such taxable year. Moreover, if the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the periods for which the amounts of gross income are to be compared under this subparagraph are (i) the taxable year of the citizen and (ii) that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen. See paragraph (c) of §1.981–3.

(c) *Time and manner of making election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse or, if subparagraph (4) of this paragraph applies, such citizen alone may make an election under section 981(c)(1) and this section at any time on or after November 13, 1966, for each and every taxable year beginning before January 1, 1967, which on the date of the election, as defined in paragraph (b) of §1.981–3, is open within the meaning of section 981(e)(2) and paragraph (a) of §1.981–3. The election shall be made by filing a return, an amended return, or a claim for refund, whichever is proper, for each taxable year to which the election applies and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for each such taxable year. The statement must also show the information required by subparagraph (2) of this paragraph and must, where applicable, be signed by both persons making the election.

(2) *Information required.* The statement described in subparagraph (1) of this paragraph must show—

(i) The name, address, and account number, if any, of each spouse,

(ii) The name and address of the executor, administrator, or other person making the election for a deceased spouse,

(iii) The taxable years to which the election applies,

(iv) The office of the district director, or the service center, where the return or returns, if any, for such taxable year or years were filed,

(v) The dates on which such return or returns, if any, were filed and on which the tax for such taxable year or years was paid, if the tax has been paid, and

(vi) The name of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(c)(2) and paragraph (b) of this section.

(3) *Place for filing.* Any return, amended return, or claim for refund filed under subparagraph (1) of this paragraph in respect of any taxable year shall be filed with the Director of International Operations, Internal Revenue Service, Washington, DC 20225. (See § 1.6091–3.)

(4) *Determination that joint election is not required.* A U.S. citizen spouse entitled to make an election under section 981(c)(1) and this section for open taxable years beginning before January 1, 1967, may apply to the Director of International Operations for a determination under section 981(d)(3) that the nonresident alien spouse is not required to join in the election by such citizen. This application shall be made by filing with the Director of International Operations, Internal Revenue Service, Washington, DC 20225, a statement setting forth the same information required by subparagraph (2) of this paragraph and such other information as is required by the Director of International Operations to justify a claim that the requirements of section 981(d)(3) and paragraph (a)(3) of this section are met. The Director of International Operations shall notify the U.S. citizen by letter of his determination with respect to the application. If the determination is that the nonresident alien spouse is not required to join in the election, a copy of the letter of determination shall be attached to each return, amended return, or claim for refund, to be filed pursuant to subparagraph (1) of this paragraph.

[T.D. 7330, 39 FR 38373, Oct. 31, 1974]

§ 1.981–3 Definitions and other special rules.

(a) *Open taxable years.* (1) For purposes of paragraph (a) of § 1.981–1, and paragraph (a) of § 1.981–2, a taxable year of the U.S. citizen, and the taxable year or years of his nonresident alien spouse ending or beginning within such taxable year of such citizen, shall be treated as open if the period prescribed by section 6501(a) (or section 6501(c)(4) if the period is extended by agreement) for assessing a deficiency against the citizen for his taxable year has not expired before the date of the election, determined under paragraph (b) of this section. Thus, for example, a taxable year of a U.S. citizen beginning before January 1, 1967, is open for purposes of this subparagraph if, before the election under section 981(c)(1) and § 1.981–2, such citizen has never filed a return for such year and a return was required under section 6012 without reference to section 981. For example, if a U.S. citizen spouse on a calendar year basis who has never filed a return for 1960 decides in 1975 that he wishes to make the election under section 981(c)(1) and § 1.981–2 in order to avoid being subject to tax for 1960 on his share of the community income for that year, he may in 1975 elect the benefits of section 981(c)(2) by filing an election in accordance with paragraph (c) of § 1.981–2. In such case, a taxable year or years of the nonresident alien spouse of such citizen ending or beginning within 1960 shall be treated in 1975 as an open taxable year.

(2) Subparagraph (1) of this paragraph shall apply even though the period prescribed by section 6501 for assessing a deficiency against the nonresident alien spouse for his taxable year or years ending or beginning within the taxable year of the U.S. citizen has expired before the election is made.

(3) If either spouse dies during a taxable year to which an election under § 1.981–1 or § 1.981–2 applies, the taxable year of the decedent and the surviving spouse shall be determined under this paragraph without regard to section 981(e)(4), relating to death of spouse

during the taxable year. See paragraph (a)(2) of §1.443–1.

(4) For definition of the term ''taxable year'', see section 441(b) and the regulations thereunder.

(b) *Date of election.* (1) For purposes of §1.981–1 and this section the date of an election made under section 981(a) and §1.981–1 is the date on which the return, amended return, or claim for refund required by paragraph (c)(1) of §1.981–1 is filed.

(2) For purposes of §1.981–2 and this section the date of an election made under section 981(c)(1) and §1.981–2 is the date on which the returns, amended returns, or claims for refund, required by paragraph (c)(1) of §1.981–2 are filed.

(3) For provisions treating timely mailing as timely filing, see section 7502 and the regulations thereunder.

(c) *Spouses with different taxable years.* If the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the election under §1.981–1 or §1.981–2 shall apply to each taxable year of such citizen in respect of which the election is made and to that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen.

(d) *Election on behalf of deceased spouse.* Any election, statement, or request, required to be made under paragraph (c) of §1.981–1, or paragraph (c) of §1.981–2, by one of the spouses may, if such spouse is deceased, be made by the executor, administrator, or other person charged with the property of such deceased spouse.

(e) *Extension of period of limitations on assessment or refund*—(1) *Assessment of deficiency.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and §1.981–1, or under section 981(c)(1) and §1.981–2, is properly made, the period within which a deficiency may be assessed for any taxable year to which the election applies shall, to the extent the deficiency is attributable to the application of such election, not expire before one year after the date of the election, determined under paragraph (b) of this section.

(2) *Refund of tax.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and §1.981–1, or under section 981(c)(1) and §1.981–2, is properly made, the period within which a claim for credit or refund of an overpayment for any taxable year to which the election applies may be filed shall, to the extent the overpayment is attributable to the application of the election, not expire before one year after the date of the election, determined under paragraph (b) of this section.

(3) *Exception in case of nonelecting alien.* Subparagraphs (1) and (2) of this paragraph shall not apply to any taxable year of a nonresident alien spouse who, in accordance with paragraph (a)(3) of §1.981–2, is not required to join in the election by the U.S. citizen spouse under section 981(c)(1) and §1.981–2.

(f) *Payment of interest for extension period.* To the extent that an overpayment or deficiency for any taxable year is attributable to an election made under §1.981–1 or §1.981–2, no interest shall be allowed or paid for any period ending with the day before the date which is one year after the date of the election, determined under paragraph (b) of this section.

[T.D. 7330, 39 FR 38374, Oct. 31, 1974]

§1.985–0 Outline of regulation.

This section lists the paragraphs contained in §§1.985–1 through 1.985–6.

§1.985–1 Functional currency.

(a) Applicability and effective date.
(b) Dollar functional currency.
(c) Functional currency of a QBU that is not required to use the dollar.
(d) Single functional currency for a foreign corporation.
(e) Translation of nonfunctional currency transactions.
(f) Examples.

§1.985–2 Election to use the United States dollar as the functional currency of a QBU.

(a) Background and scope.
(b) Eligible QBU.
(c) Time and manner for dollar election.
(d) Effect of dollar election.

§1.985–3 United States dollar approximate separate transactions method.

(a) Scope and effective date.
(b) Statement of method.

(c) Translation into United States dollars.
(d) Computation of DASTM gain or loss.
(e) Effect of DASTM gain or loss on gross income, taxable income, or earnings and profits.

§ 1.985–4 Method of accounting.

(a) Adoption or election.
(b) Condition for changing functional currencies.
(c) Relationship to certain other sections of the Code.

§ 1.985–5 Adjustments required upon change in functional currency.

(a) In general.
(b) Step 1—Taking into account exchange gain or loss on certain section 988 transactions.
(c) Step 2—Determining the new functional currency basis of property and the new functional currency amount of liabilities and any other relevant items.
(d) Step 3A—Additional adjustments that are necessary when a branch changes functional currency.
(e) Step 3B—Additional adjustments that are necessary when a taxpayer changes functional currency.
(f) Examples.

Section 1.985–6 Transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning in 1987.

(a) In general.
(b) Certain controlled foreign corporations.
(c) All other foreign corporations.
(d) Pre-1987 section 902 amounts.
(e) Net worth branch.
(f) Profit and loss branch.

[T.D. 8263, 54 FR 38653, Sept. 20, 1989, as amended by T.D. 8464, 58 FR 232, Jan. 5, 1993; T.D. 8556, 59 FR 37672, July 25, 1994]

§ 1.985–1 Functional currency.

(a) *Applicability and effective date*—(1) *Purpose and scope.* These regulations provide guidance with respect to defining the functional currency of a taxpayer and each qualified business unit (QBU), as defined in section 989(a). Generally, a taxpayer and each QBU must make all determinations under subtitle A of the Code (relating to income taxes) in its respective functional currency. This section sets forth rules for determining when the functional currency is the United States dollar (dollar) or a currency other than the dollar. Section 1.985–2 provides an election to use the dollar as the functional currency for certain QBUs that absent the election would have a functional currency that is a hyperinflationary currency, and explains the effect of making the election. Section 1.985–3 sets forth the dollar approximate separate transactions method that certain QBUs must use to compute their income or loss or earnings and profits. Section 1.985–4 provides that the adoption of a functional currency is a method of accounting and sets forth conditions for a change in functional currency. Section 1.985–5 provides adjustments that are required to be made upon a change in functional currency. Finally, § 1.985–6 provides transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning after December 31, 1986.

(2) *Effective date.* These regulations apply to taxable years beginning after December 31, 1986. However, any taxpayer desiring to apply temporary Income Tax Regulations § 1.985–0T through § 1.985–4T in lieu of these regulations to all taxable years beginning after December 31, 1986, and on or before October 20, 1989 may (on a consistent basis) so choose. For the text of the temporary regulations, see 53 FR 20308 (1988).

(b) *Dollar functional currency*—(1) *In general.* The dollar shall be the functional currency of a taxpayer or QBU described in paragraph (b)(1)(i) through (v) of this section regardless of the currency used in keeping its books and records (as defined in § 1.989(a)–1(d)). The dollar shall be the functional currency of—

(i) A taxpayer that is not a QBU (e.g., an individual);

(ii) A QBU that conducts its activities primarily in dollars. A QBU conducts its activities primarily in dollars if the currency of the economic environment in which the QBU conducts its activities is primarily the dollar. The facts and circumstances test set forth in paragraph (c)(2) of this section shall apply in making this determination;

(iii) Except as otherwise provided by ruling or administrative pronouncement, a QBU that has the United States, or any possession or territory of the United States where the dollar is the standard currency, as its residence (as defined in section 988(a)(3)(B));

(iv) A QBU that does not keep books and records in the currency of any economic environment in which a significant part of its activities is conducted. Whether a QBU keeps such books and records is determined in accordance with paragraph (c)(3) of this section; or

(v) A QBU that produces income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States.

(2) *QBUs operating in a hyperinflationary environment*—(i) *Taxable years beginning on or before August 24, 1994.* For taxable years beginning on or before August 24, 1994, see §1.985–2 with respect to a QBU that elects to use, or is otherwise required to use, the dollar as its functional currency.

(ii) *Taxable years beginning after August 24, 1994*—(A) *In general.* For taxable years beginning after August 24, 1994, except as otherwise provided in paragraph (b)(2)(ii)(B) of this section, any QBU that otherwise would be required to use a hyperinflationary currency as its functional currency must use the dollar as its functional currency and compute income or loss or earnings and profits under the rules of §1.985–3.

(B) *Exceptions*—(*1*)—*Certain QBU branches.* The functional currency of a QBU that otherwise would be required to use a hyperinflationary currency as its functional currency and that is a branch of a foreign corporation having a non-dollar functional currency that is not hyperinflationary shall be the functional currency of the foreign corporation. Such QBU's income or loss or earnings and profits shall be determined under §1.985–3 by substituting the functional currency of the foreign corporation for the dollar.

(*2*) *Corporation that is not a controlled foreign corporation.* A foreign corporation (or its QBU branch) operating in a hyperinflationary environment is not required to use the dollar as its functional currency pursuant to paragraph (b)(2)(ii)(A) of this section if that foreign corporation is not a controlled foreign corporation as defined in section 957 or 953(c)(1)(B). However, a noncontrolled section 902 corporation, as defined in section 904(d)(2)(E), may elect to use the dollar (or, if appropriate, the currency specified in paragraph (b)(2)(ii)(B)(*1*) of this section) as its (or its QBU branch's) functional currency under the procedures set forth in §1.985–2(c)(3).

(C) *Change in functional currency. (1) In general.* If a QBU is required to change its functional currency to the dollar under paragraph (b)(2)(ii)(A) of this section, or chooses or is required to change its functional currency to the dollar for any open taxable year (and all subsequent taxable years) under §1.985–3(a)(2)(ii), the change is considered to be made with the consent of the Commissioner for purposes of §1.985–4. A QBU changing functional currency must make adjustments described in §1.985–7 if the year of change (as defined in §1.481–1(a)(1)) begins after 1987, or the adjustments described in §1.985–6 if the year of change begins in 1987. No adjustments under section 481 are required solely because of a change in functional currency described in this paragraph (b)(2)(ii)(C).

(*2*) *Effective date.* This paragraph (b)(2)(ii)(C) applies to taxable years beginning after April 6, 1998. However, a taxpayer may choose to apply this paragraph (b)(2)(ii)(C) to all open years after December 31, 1986, provided each person, and each QBU branch of a person, that is related (within the meaning of §1.985–2(d)(3)) also applies to this paragraph (b)(2)(ii)(C).

(D) *Hyperinflationary currency.* For purposes of sections 985 through 989, the term hyperinflationary currency means the currency of a country in which there is cumulative inflation during the base period of at least 100 percent as determined by reference to the consumer price index of the country listed in the monthly issues of the ‘‘International Financial Statistics’’ or a successor publication of the International Monetary Fund. If a country's currency is not listed in the monthly issues of ‘‘International Financial Statistics,’’ a QBU may use any other reasonable method consistently applied for determining the country's consumer price index. Base period means, with respect to any taxable year, the thirty-six calendar months immediately preceding the first day of the current calendar year. For this purpose, the cumulative inflation rate for the base period is based on compounded inflation rates. Thus, if for 1991, 1992, and 1993, a country’s annual inflation rates are 29 percent, 25 percent, and 30 percent, respectively, the cumulative inflation rate for the three-year base period is 110 percent [((1.29 × 1.25 × 1.3) − 1.0 × 1.10)x100=110%] and the currency of the country for the QBU’s 1994 year is considered hyperinflationary. In making the determination whether a currency is hyperinflationary, the determination for purposes of United States generally accepted accounting principles may be used for income tax purposes provided the determination is based on criteria that is substantially similar to the rules previously set forth in this paragraph (b)(2)(ii)(D), the method of determination is applied consistently from year to year, and the same method is applied to all related persons as defined in § 1.985–3(e)(2)(vi).

(E) *Change in functional currency when currency ceases to be hyperinflationary*—(*1*) *In general.* A QBU that has been required to use the dollar as its functional currency under paragraph (b)(2) of this section, or has elected to use the dollar as its functional currency under paragraph (b)(2)(ii)(B)(*2*) of this section or § 1.985–2, must change its functional currency as of the first day of the first taxable year that follows three consecutive taxable years in which the currency of its economic environment, determined under paragraph (c)(2) of this section, is not a hyperinflationary currency. The functional currency of the QBU for such year shall be determined in accordance with paragraph (c) of this section. For purposes of § 1.985–4, the change is considered to be made with the consent of the Commissioner. See § 1.985–5 for adjustments that are required upon a change in functional currency.

(*2*) *Effective Date.* This paragraph (b)(2)(ii)(E) of this section applies to taxable years beginning after April 6, 1998.

(c) *Functional currency of a QBU that is not required to use the dollar*—(1) *General rule.* The functional currency of a QBU that is not required to use the dollar under paragraph (b) of this section shall be the currency of the economic environment in which a significant part of the QBU’s activities is conducted, if the QBU keeps, or is presumed under paragraph (c)(3) of this section to keep, its books and records in such currency.

(2) *Economic environment.* For purposes of section 985 and the regulations thereunder, the economic environment in which a significant part of a QBU’s activities is conducted shall be determined by taking into account all the facts and circumstances.

(i) *Facts and circumstances.* The facts and circumstances that are considered in determining the economic environment in which a significant part of a QBU’s activities is conducted include, but are not limited to, the following:

(A) The currency of the country in which the QBU is a resident as determined under section 988(a)(3)(B);

(B) The currencies of the QBU’s cash flows;

(C) The currencies in which the QBU generates revenues and incurs expenses;

(D) The currencies in which the QBU borrows and lends;

(E) The currencies of the QBU’s sales markets;

(F) The currencies in which pricing and other financial decisions are made;

(G) The duration of the QBU’s business operations; and

(H) The significance and/or volume of the QBU’s independent activities.

(ii) *Rate of inflation.* The rate of inflation (regardless of how it is determined) shall not be a factor used to determine a QBU’s economic environment.

(iii) *Consistency.* A taxpayer must consistently apply the facts and circumstances test set forth in this paragraph (c)(2) in evaluating the economic environment of its QBUs, *e.g.*, its branches, that engage in the same or similar trades or businesses.

(3) *Books and records presumption.* A QBU shall be presumed to keep books and records in the currency of the economic environment in which a significant part of its activities are conducted. The presumption may be overcome only if the QBU can demonstrate to the satisfaction of the district director that a substantial nontax purpose exists for not keeping any books and records in such currency. A taxpayer

may not use this presumption affirmatively in determining a QBU's functional currency.

(4) *Multiple currencies.* If a QBU has more than one currency that satisfies the requirements of paragraph (c)(1) of this section, the QBU may choose any such currency as its functional currency.

(5) *Relationship of United States accounting principles.* In making the functional currency determination under this paragraph (c), the currency of the QBU for purposes of United States generally accepted accounting principles (GAAP) will ordinarily be accepted as the functional currency of the QBU for income tax purposes, provided that the GAAP determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section.

(6) *Effect of changed circumstances.* Regardless of any change in circumstances, a QBU may change its functional currency determined under this paragraph (c) only if the QBU complies with §1.985–4 or the Commissioner's consent is considered to have been granted under §1.985–2(d)(4) or §1.985–3(a)(2)(ii). For special rules relating to the conversion to the euro, see §1.985–8T.

(d) *Single functional currency for a foreign corporation*—(1) *General rule.* This paragraph (d) applies to a foreign corporation that has two or more QBUs that do not have the same functional currency. The foreign corporation shall be treated as having a single functional currency for the corporation as a whole that is different from the functional currency of one or more of its QBUs. The determination of a foreign corporation's functional currency shall be made by first applying paragraph (d)(1)(i) and then paragraph (d)(l)(ii) of this section.

(i) *Step 1.* Each QBU of the foreign corporation determines its functional currency in accordance with the rules set forth in paragraphs (b) and (c) of this section and §1.985–2.

(ii) *Step 2.* The foreign corporation determines its functional currency applying the principles of paragraphs (b) and (c) of this section to the corporation's activities as a whole. Thus, if a foreign corporation has two branches, the corporation shall determine its functional currency by applying the principles of paragraphs (b) and (c) of this section to the combined activities of the corporation and the branches. For purposes of this paragraph (d)(1), if a QBU of a foreign corporation has the dollar as its functional currency under paragraph (b)(2) of this section, the QBU's activities shall be considered dollar activities of the corporation.

(2) *Translation of income or loss of QBUs having different functional currencies than the foreign corporation as a whole.* Where the functional currency of a foreign corporation as a whole differs from the functional currency of one or more of its QBUs, each such QBU shall determine the amount of its income or loss or earnings and profits (or deficit in earnings and profits) in its functional currency under the principles of section 987 (relating to branch transactions). The amount of income or loss or earnings and profits (or deficit in earnings and profits) of each QBU in its functional currency shall then be translated into the foreign corporation's functional currency using the appropriate exchange rate as defined in section 989(b)(4) for purposes of determining the corporation's income or loss or earnings and profits (or deficit in earnings and profits).

(e) *Translation of nonfunctional currency transactions.* Except for a QBU using the dollar approximate separate transactions method described in §1.985–3, *see* section 988 and the regulations thereunder for the treatment of nonfunctional currency transactions.

(f) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. P, a domestic corporation, operates exclusively through foreign branch X in Country A. X is a QBU within the meaning of section 989(a) and its residence is Country A as determined under section 988 (a)(3)(B). The currency of Country A is the LC. All of X's purchases, sales, and expenses are in the LC. The laws of A require X to keep books and records in the LC. It is determined that the LC is the currency of X under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, while the functional currency of P is the dollar since its residence is the United States, the functional currency of X is the LC.

Example 2. P, a publicly-held domestic regulated investment company (as defined under section 851), operates exclusively through foreign branch B in Country R. B is a QBU within the meaning of section 989(a) and its residence is Country R as determined under section 988(a)(3)(B). The currency of Country R is the LC. B's principal activities consist of purchasing and selling stock and securities of Country R companies and securities issued by Country R. It is determined that the dollar is the currency of B under United States generally accepted accounting principles. This determination is not based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, while the functional currency of P is the dollar since its residence is the United States, B may choose the LC as its functional currency because it has significant activities in the LC provided it keeps books and records in the LC. The fact that the dollar is the currency of B under generally accepted accounting principles is irrelevant for purposes of determining B's functional currency because the GAAP determination was not based on factors similar to those set forth in paragraph (c)(2) of this section.

Example 3. P, a domestic bank, operates through foreign branch X in Country R. X is a QBU within the meaning of section 989(a) and its residence is Country R as determined under section 988(a)(3)(B). The currency of Country R is the LC. The laws of R require X to keep books and records in the LC. The branch customarily loans dollars and LCs. In the case of its LC loans, X ordinarily fixes the terms of the loans by reference to a contemporary London Inter-Bank Offered Rate (LIBOR) on dollar deposits. For instance, the interest on the amount of the outstanding LC loan principal might equal LIBOR plus 2 percent and the amount of the outstanding LC loan principal would be adjusted to reflect changes in the dollar value of the LC. X is primarily funded with dollar-denominated funds borrowed from related and unrelated parties. X's only LC activities are paying local taxes, employee wages, and local expenses such as rent and electricity. Under these facts, X's activities are primarily conducted in dollars. Thus, although X keeps its books and records in LCs, X's functional currency is the dollar.

Example 4. S, a foreign corporation organized in Country U, is wholly-owned by P, a domestic corporation. The currency of Country U is the LC. S's sole function is acting as a financing vehicle for P and domestic corporations that are affiliated with P. All borrowing and lending transactions between S and P and its domestic affiliates are in dollars. Furthermore, primarily all of S's other borrowings are dollar-denominated or based on a dollar index. S's only LC activities are paying local taxes, employee wages, and local expenses such as rent and electricity. S keeps its books and records in the LC. Under these facts, S's activities are primarily conducted in dollars. Thus, although S keeps its books and records in LCs, S's functional currency is the dollar.

Example 5. D is a domestic corporation whose primary activity is the extraction of natural gas and oil through foreign branch X in Country Y. X is a QBU within the meaning of section 989(a) and its residence is Country Y as determined under section 988(a)(3)(B). The currency of Country Y is the LC. X bills a significant amount of its natural gas and oil sales in dollars and a significant amount in LCs. X also incurs significant LC and dollar expenses and liabilities. The laws of Country Y require X to keep its books and records in the LC. It is determined that the LC is the currency of X under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Absent other factors indicating that X primarily conducts its activities in the dollar, D could choose either the dollar or the LC as X's functional currency because X has significant activities in both the dollar and the LC, provided the books and records requirement is satisfied. If, instead, X's activities were determined to be primarily in the dollar, then X would have to use the dollar as its functional currency.

Example 6. S, a foreign corporation organized in Country U, is wholly-owned by P, a domestic corporation. The currency of U is the LC. S purchases the products it sells from related and unrelated parties, including P. These purchases are made in the LC. In addition, most of S's gross receipts are generated by transactions denominated in the LC. S attempts to determine its LC price for goods sold in such a manner as to obtain an LC equivalent of a certain dollar amount after reduction for all LC costs. However, local market conditions sometimes result in pricing adjustments. Thus, changes in the LC-dollar exchange rate from period to period generally result in corresponding changes in the LC price of S's products. S pays local taxes, employee wages, and other local expenses in the LC. It is determined that the dollar is the currency of S under United States generally accepted accounting principles. This determination is not based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, S could choose either the dollar or the LC as its functional currency because S has significant activities in both the dollar and the LC, provided that the books and records requirement is satisfied.

Example 7. S, a foreign corporation organized in Country X, is wholly-owned by P, a domestic corporation. S conducts all of its operations through two branches. Branch A is located in Country F and branch B is located in Country G. S, A, and B are QBUs within the meaning of section 989(a). Branch A's and branch B's residences are Country F and Country G respectively as determined under section 988(a)(3)(B). The currency of Country F is the FC and the currency of Country G is the LC. The functional currencies of S, A, and B are determined in a two step procedure.

Step 1: The functional currency of branches A and B. Branch A and branch B both conduct all activities in their respective local currencies. The FC is the currency of branch A and the LC is the currency of branch B under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, the functional currency of branch A is the FC and the functional currency of branch B is the LC.

Step 2: The functional currency of S. S's functional currency is determined by disregarding the fact that A and B are branches. When A's activities and B's activities are viewed as a whole, S determines that it only conducts significant activities in the LC. Therefore, S's functional currency is the LC. See Examples 9, 10, and 11 for how the earnings and profits of a foreign corporation, which has branches with different functional currencies, are determined.

Example 8. Assume the same facts as in Example 7, except that S does not exist and P conducts all of its operations through branch A and branch B. In this instance P's functional currency in Step 2 is the dollar, regardless of the fact that its branches' activities viewed as a whole are in the LC, because P is a taxpayer whose residence is the United States under section 988(a)(3)(B)(i). Therefore, while the functional currency of branch A is the FC and the functional currency of branch B is the LC, the functional currency of P is the dollar because its residence is the United States.

Example 9. The facts are the same as in Example 7. ln addition, assume that in 1987 branch A has earnings of 100 FC and branch B has earnings of 100 LC as determined under section 987. The weighted average exchange rate for the year is 1 FC/2 LC. Branch A's earnings are translated into 200 LC for purposes of computing S's earnings and profits in 1987. Thus, the total earnings and profits of S from branch A and branch B for 1987 is 300 LC.

Example 10. (i) X, a foreign corporation organized in Country W, is wholly-owned by P, a domestic corporation. Both X and P are calendar year taxpayers that began business during 1987. X operates exclusively through two branches, A and B both of which are located outside of Country W. The functional currency of X and A is the LC, while the functional currency of B is the DC as determined under section 985 and §1.985–1. The earnings of B must be computed under section 987, relating to branch transactions. In 1987, A earns 900 LCs of nonsubpart F income and B earns 200 DCs of nonsubpart F income. Under section 904(d)(2), A's income is financial service income and B's income is general limitation income. In order to determine X's earnings and profits, B's income must be translated into LCs (the functional currency of X). The weighted average exchange rate for 1987 is 1 LC/2 DC. Thus, in 1987 X's current earnings and profits (and its post-1986 undistributed earnings) are 1000 LCs consisting of 900 LCs of financial services income earned by A and 100 LCs (200 DC/2) of general limitation income earned by B. Neither A nor B makes any remittances during 1987.

(ii) In 1988, neither A nor B earns any income or generates any loss. On December 31, 1988, A remits 50 LCs directly to P. The remittance to P is considered to be remitted by A to X and then immediately distributed by X as a dividend. The 50 LC remittance does not result in an exchange gain or loss under section 987 to X because the functional currency of X and A is the LC. See section 987(3). Under section 904(d)(3)(D), the 50 LC dividend is treated as income in a separate category to the extent of the dividend's pro rata share of X's earnings and profits in each separate limitation category. Thus, 90 percent, or 45 LCs, is treated as financial services income, and 10 percent, or 5 LCs, is treated as general limitation income. After the dividend distribution, X has 950 LCs of accumulated earnings and profits (and post-1986 undistributed earnings) consisting of 855 LCs of financial service limitation income and 95 LCs of general limitation income.

Example 11. The facts are the same as in Example 10, except that A makes no remittance during 1988 but B remits 120 DCs to X on December 31, 1988, which X immediately converts into LCs, and X makes no dividend distribution during 1988. Assume that the appropriate exchange rate for the remittance is 1 LC/3 DCs. B's remittance triggers exchange loss to X. See section 987(3). Under section 987, the exchange loss on the remittance is 20 LCs calculated as follows: 40 LCs, which is the LC value of the 120 DC remittance (120 DCs/3), less 60 LCs, their LC basis (120 DCs/2). This loss is sourced and characterized under section 987 and regulations thereunder.

Example 12. F, a foreign corporation, has gain from the disposition of a United States real property interest (as defined in section 897(c)). The gain is taken into account as if F were engaged in a trade or business within the United States during the taxable year and as if such gain were effectively connected with such trade or business. F's disposition activity shall be treated as a separate QBU with a dollar functional currency because such activity produced income that is treated as effectively connected with a trade or business within the United States. Therefore, F must compute its gain from the disposition by giving the United States real property interest an historic dollar basis.

[T.D. 8263, 54 FR 38653, Sept. 20, 1989, as amended by T.D. 8556, 59 FR 37672, July 25, 1994; T.D. 8765, 63 FR 10774, Mar. 5, 1998; 63 FR 15760, Apr. 1, 1998; T.D. 8776, 63 FR 40368, July 29, 1998]

§ 1.985–2 Election to use the United States dollar as the functional currency of a QBU.

(a) *Background and scope*—(1) *In general.* This section permits an eligible QBU to elect to use the dollar as its functional currency for taxable years beginning on or before August 24, 1994. An election to use a dollar functional currency is not permitted for a QBU other than an eligible QBU. Paragraph (b) of this section defines an eligible QBU. Paragraph (c) of this section describes the time and manner for making the dollar election and paragraph (d) of this section describes the effect of making the election. For the definition of a QBU, see section 989(a). See § 1.985–1(b)(2)(ii) for rules requiring a QBU to use the dollar as its functional currency in taxable years beginning after August 24, 1994.

(2) *Exception.* Pursuant to § 1.985–1(b)(2)(ii)(B)(*2*), the rules of paragraph (c)(3) of this section shall apply with respect to the procedure required to be followed by a noncontrolled section 902 corporation as defined in section 904(d)(2)(E) to elect the dollar as its (or its QBU branch's) functional currency and the application of § 1.985–3.

(b) *Eligible QBU*—(1) *In general.* The term "eligible QBU" means a QBU that could have used a hyperinflationary currency as its functional currency absent the dollar election. *See* § 1.985–1 for how a QBU determines its functional currency absent the dollar election.

(2) *Hyperinflationary currency.* See § 1.985–1(b)(2)(ii)(D) for the definition of hyperinflationary currency.

(c) *Time and manner for dollar election*—(1) *QBUs that are branches of United States persons*—(i) *Rule.* If an eligible QBU is a branch of a United States person, the dollar election shall be made by attaching a completed Form 8819 to the United States person's timely filed (taking extensions into account) tax return for the first taxable year for which the election is to be effective.

(ii) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, the election shall be made in accordance with § 1.985–2T(c)(1). Failure to file an amended return within the time period prescribed in § 1.985–2T(c)(1) shall not invalidate the dollar election if it is established to the satisfaction of the district director that reasonable cause existed for such failure. A subsequent election for 1988 will not prejudice the taxpayer with respect to such reasonable cause determination. Nevertheless, each United States person making an election under the § 1.985–2T(c)(1) must file a Form 8819 in the time and manner provided in the Form's instructions.

(2) *Eligible QBUs that are controlled foreign corporations or branches of controlled foreign corporations*—(i) *Rule.* If an eligible QBU is a controlled foreign corporation (as described in section 957), or a branch of a controlled foreign corporation, the election may be made either by the foreign corporation or by the controlling United States shareholders on behalf of the foreign corporation by—

(A) Filing a completed Form 8819 in the time and manner provided in the Form's instructions, and

(B) Providing the written notice required by paragraph (c)(2)(ii) of this section at the time and in the manner prescribed therein.

The term *controlling United States shareholders* means those United States shareholders (as defined in section 951(b)) who, in the aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. If the foreign corporation is a controlled foreign corporation (as described in section 957) but the United States shareholders do not, in the aggregate, own the requisite voting power, the term "controlling United States shareholders" means all the United States shareholders (as defined in section 951(b)) who own (within the meaning of section 958(a)) stock of the controlled foreign corporation.

(ii) *Notice.* Prior to filing Form 8819, the controlling United States shareholders (or the foreign corporation, if the dollar election is made by the corporation) shall provide written notice that the dollar election will be made to all United States persons known to be shareholders who own (within the meaning of section 958(a)) stock of the foreign corporation. Such notice shall also include all information required in Form 8819.

(iii) *Reasonable cause exception.* Failure of the controlling United States shareholders (or the foreign corporation, if the dollar election is made by the corporation) to timely file Form 8819 or provide written notice to a United States person required to be notified by paragraph (c)(2)(ii) of this section shall not invalidate the dollar election, if it is established to the satisfaction of the district director that reasonable cause existed for such failure.

(iv) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, an eligible QBU described in paragraph (c)(2)(i) of this section shall make the dollar election in accordance with §1.985–2T(c)(2). Nevertheless, the person or persons that made such election must file a Form 8819 in the time and manner provided in the Form's instructions.

(3) *Eligible QBUs that are noncontrolled foreign corporations or branches of noncontrolled foreign corporations*—(i) *Rule.* If an eligible QBU is a noncontrolled foreign corporation (a foreign corporation not described in section 957), or a branch of a noncontrolled foreign corporation, the dollar election must be made by the corporation or the majority domestic corporate shareholders on behalf of the corporation by applying the rules provided in paragraph (c)(2)(i)(A) and (B), (ii), (iii), and (iv) of this section substituting ''majority domestic corporate shareholders'' for ''controlling United States shareholders'' wherever it appears therein. The term ''majority domestic corporate shareholders'' means those domestic corporate shareholders (as described in section 902(a)) who, in the aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting stock of all classes of stock of the noncontrolled foreign corporation entitled to vote that is owned (within the meaning of section 958(a)) by all the domestic corporate shareholders.

(ii) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, an eligible QBU described in paragraph (c)(3)(i) of this section shall make the dollar election in accordance with §1.985–2T(c)(3). Nevertheless, the person or persons that made such election must file a Form 8819 in the time and manner provided in the Form's instructions.

(4) *Others.* Any other person making a dollar election under this section shall elect by filing Form 8819 and fulfilling any other notice requirements that may be required by the Commissioner.

(d) *Effect of dollar election*—(1) *General rule.* If a dollar election is made (or considered made under paragraph (d)(3) of this section) by or on behalf of an eligible QBU, the QBU shall be deemed to have the dollar as its functional currency. Each United States person that owns (within the meaning of section 958(a)) stock of a foreign corporation which has the dollar as its functional currency under §1.985–2 must make all of its federal income tax calculations with respect to the foreign corporation using the dollar as the corporation's functional currency (regardless of when ownership was acquired or whether the United States person received the written notice required by paragraph (c)(2)(i)(B) of this section).

(2) *Computation*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, any eligible QBU that pursuant to this §1.985–2 has a dollar functional currency must compute income or loss or earnings and profits (or deficit in earnings and profits) in dollars using the dollar approximate separate transactions method described in §1.985–3.

(ii) *Alternative method.* An eligible QBU that has a dollar functional currency pursuant to this §1.985–2 may use a method other than the dollar approximate separate transactions method described in §1.985–3 only if the QBU demonstrates to the satisfaction of the Commissioner that it can properly employ such method. Generally, the QBU must show that it could compute foreign currency gain or loss under the principles of section 988 with respect to each of its section 988 transactions. If subsequently the QBU can no longer demonstrate to the satisfaction of the district director that it can properly employ such an alternative method, then the QBU will be deemed to have changed its method of accounting to the dollar approximate separate transactions method described in §1.985–3. This change in accounting will be treated as having been made with the consent of the Commissioner. No adjustments under either §1.985–5T (or any succeeding final regulation) or section 481(a) shall be required solely because of the change. Rather the QBU shall begin accounting for its operations under §1.985–3 based on its dollar books and records as of the time of the change.

(3) *Conformity*—(i) *General rule.* If a dollar election is made under this §1.985–2 for an eligible QBU (''electing QBU''), then the dollar shall be the functional currency of any related person (regardless of when such person became related to the electing QBU) that is an eligible QBU, or any branch of any such related person that is an eligible QBU. For purposes of the preceding sentence, the term ''related person'' means any person with a relationship defined in section 267 (b) to the electing QBU (or to the United States or foreign person of which the electing QBU is a part). In determining whether two or more corporations are members of the same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned with the application of section 267(c).

(ii) *Branches of United States and foreign persons.* If a dollar election is made for a QBU branch of any person, each eligible QBU branch of such person shall have the dollar as its functional currency.

(4) *Required adjustments.* If an eligible QBU's functional currency changes due to a dollar election, or due to the conformity requirements of paragraph (d)(3) of this section, such change shall be deemed for purposes of §1.9B5–4 to be consented to by the Commissioner. No adjustments under section 481(a) shall be required solely because of the change. However, the QBU must make those adjustments required by §1.985–5T (or any succeeding final regulation).

(5) *Taxable year conformity required.* Generally, the adjustments required by paragraph (d)(4) of this section shall be made for a related person's taxable year—

(i) That includes the date in which the electing QBU made the dollar election if the person was related to such electing QBU at any time during the QBU's taxable year that includes such date, or

(ii) During which the person first becomes related to any electing QBU, in all other cases.

For purposes of this paragraph (d)(5), the date in which the electing QBU makes the dollar election shall be the last day of the electing QBU's taxable year. The district director may permit the related party to make such adjustments beginning one taxable year later if, in the district director's sole judgment, reasonable cause exists for the related party not being able to make the required adjustments for the earlier year.

(6) *Availability of election.* A dollar election may be made by or on behalf of a QBU, or considered made under the conformity rule of paragraph (d)(3), in any year in which the QBU is an eligible QBU. If a dollar election is not made by or on behalf of a QBU for its first taxable year beginning after December 31, 1986 in which it is an eligible QBU, then any dollar election made by or on behalf of the QBU, or considered made under the conformity rules of paragraph (d)(3) of this section, that results in a change in the QBU's functional currency shall be treated as having been made with the consent of the Commissioner. In such a case, however, the taxpayer must make those adjustments required by §1.985–5T (or any succeeding final regulation).

(7) *Effect of changed circumstances.* Regardless of any change in circumstances (*e.g.*, a currency ceases to qualify as hyperinflationary), a QBU whose functional currency is the dollar

under this section may change its functional currency only if the QBU complies with §1.985–4.

(8) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. X is a calendar year domestic corporation that in 1987 establishes a branch, A, in Country Z. A's functional currency under sections 985(b)(1) and (2) and §1.985–1 is the ''h'', the currency of Country Z. The cumulative inflation in Country Z exceeds 100 percent for the thirty-six months prior to January 1987, as measured by the consumer price index of Country Z listed in the monthly issues of the ''International Financial Statistics''. Accordingly, A is an eligible QBU in 1987 because the h is a hyperinflationary currency. Thus, X may elect the dollar as the functional currency of A for 1987.

Example 2. The facts are the same as in Example (1). X does not elect the dollar as the functional currency of A for 1987. Rather, X elects the dollar as the functional currency of A for l991, a year A is an eligible QBU. The election constitutes a change in A's functional currency that is made with the consent of the Commissioner. However, A must make the adjustments required under §1.985–5T (or any succeeding final regulation).

Example 3. X is a domestic corporation that establishes A, an eligible QBU branch. X is wholly owned by domestic corporation Y. Y has an eligible QBU branch, B. Both X and Y are calendar year taxpayers. X makes a dollar election for A in 1987. Thus, A is an electing QBU. X and Y are related persons as defined in section 267(b) (*i.e.*, Y has a relationship under section 267(b)(3) to X, the corporation of which A is a part). Therefore, the dollar election by X for A in 1987 results in B, the eligible QBU branch of Y, also having the dollar as its functional currency for 1987.

Example 4. The facts are the same as in Example 3, except that Y does not have an eligible QBU branch but owns all the stock of C, a calendar year controlled foreign corporation, which is not itself an eligible QBU but which has an eligible QBU branch, D. X and C are related persons as defined in section 267(b) (*i.e.*, C has a relationship under section 267(b)(3) to X, the corporation of which A is a part). Therefore, the dollar election by X for A in 1987 results in D, the eligible QBU branch of C, also having the dollar as its functional currency for 1987.

Example 5. X, whose taxable year ends September 30, is an eligible QBU that does not use the dollar as its functional currency. X is wholly-owned by domestic corporation W. On January 1, 1989, X acquires all the stock of Y, an unrelated eligible QBU that made the dollar election under §1.985–2. Y is a calendar year taxpayer. After the stock purchase, X and Y are related persons as defined in section 267(b). Under §§1.985–2(d)(3) and (5), the dollar shall be the functional currency of X, any person related to X, and any branch of such related person that is an eligible QBU beginning with the taxable year that includes December 31, 1989. Thus, X must change to the dollar for its taxable year beginning October 1, 1988. However, the district director may allow X to change to the dollar for its taxable year beginning October 1, 1989, provided reasonable cause exists. Those QBUs changing to the dollar as their functional currency as the result of the conformity requirements must make the adjustments required under §1.985–5T (or any succeeding final regulation).

Example 6. The facts are the same as in Example 5, except that before X purchased the Y stock, X made the dollar election under §1.985–2 but Y did not use the dollar as its functional currency. Under §§1.985–2(d)(3) and (5) the dollar shall be the functional currency of Y, any person related to Y, and any branch of such related person that is an eligible QBU beginning with the taxable year that includes September 30, 1989. Thus, Y must change to the dollar for its taxable year beginning January 1, 1989. However the district director may allow Y to change to the dollar for its taxable year beginning January 1, 1990, provided reasonable cause exists. Those QBUs changing to the dollar as their functional currency as the result of the conformity requirements must make the adjustments required under §1.985–5T (or any succeeding final regulation).

[T.D. 8263, 54 FR 38656, Sept. 20, 1989, as amended by T.D. 8556, 59 FR 37673, July 25, 1994]

§1.985–3 United States dollar approximate separate transactions method.

(a) *Scope and effective date*—(1) *Scope.* This section describes the United States dollar (dollar) approximate separate transactions method of accounting (DASTM). For all purposes of subtitle A, this method of accounting must be used to compute the gross income, taxable income or loss, or earnings and profits (or deficit in earnings and profits) of a QBU (as defined in section 989(a)) that has the dollar as its functional currency pursuant to §1.985–1(b)(2).

(2) *Effective date*—(i) *In general.* This section is effective for taxable years beginning after August 24, 1994.

(ii) *DASTM prior-year election.* A taxpayer may elect to apply this section to any open taxable year beginning after December 31, 1986 (whether or not

DASTM has been previously elected for some or all of those years). In order to make this election, the taxpayer must apply § 1.985–3 to that year and all subsequent years. In addition, each person that is related (within the meaning of § 1.985–3(e)(2)(vi)) to the taxpayer on the last day of any taxable year for which the election is effective and that would have been eligible to elect DASTM must also apply these rules to that year and all subsequent years. A taxpayer that has not previously elected to apply DASTM to its prior taxable years may make the DASTM election for the pertinent years by filing amended returns and complying with the applicable election procedures of § 1.985–2. Form 8819 shall be attached to the return for the first year for which the election is to be effective. A taxpayer that has elected DASTM for prior taxable years and applied the rules under § 1.985–3 (as contained in the April 1, 1994 edition of 26 CFR part 1 (1.908 to 1.1000)) may amend its returns to apply the rules of this § 1.985–3. In either case, the DASTM election for prior taxable years shall be deemed to be made with the consent of the Commissioner.

(b) *Statement of method.* Under DASTM, income or loss or earnings and profits (or a deficit in earnings and profits) of a QBU for its taxable year shall be determined in dollars by—

(1) Preparing an income or loss statement from the QBU's books and records (within the meaning of § 1.989(a)–1(d)) as recorded in the QBU's hyperinflationary currency (as defined in § 1.985–1(b)(2)(ii)(D));

(2) Making the adjustments necessary to conform such statement to United States generally accepted accounting principles and tax accounting principles (including reversing monetary correction adjustments required by local accounting principles);

(3) Translating the amounts of hyperinflationary currency as shown on such adjusted statement into dollars in accordance with paragraph (c) of this section; and

(4) Adjusting the resulting dollar income or loss or earnings and profits (or deficit in earnings and profits) and, where necessary, particular items of gross income, deductible expense or other amounts, in accordance with paragraph (e) of this section to reflect the amount of DASTM gain or loss as determined under paragraph (d) of this section.

(c) *Translation into United States dollars*—(1) *In general.* Except as otherwise provided in this paragraph (c), the amounts shown on the income or loss statement, as adjusted under paragraph (b)(2) of this section, shall be translated into dollars at the exchange rate (as defined in paragraph (c)(6) of this section) for the translation period (as defined in paragraph (c)(7) of this section) to which they relate. However, if the QBU previously changed its functional currency to the dollar, and the rules of § 1.985–5 (or, if applicable, § 1.985–5T, as contained in the April 1, 1993 edition of 26 CFR part 1 (1.908 to 1.1000)) applied in translating its balance sheet amounts into dollars, then the spot exchange rate applied under those rules shall be used to translate any amount that would otherwise be translated at a rate determined by reference to a translation period prior to the change in functional currency. For example, depreciation with respect to an asset acquired while the QBU had a nondollar functional currency shall be translated into dollars at the spot rate on the last day of the taxable year before the year of change to a dollar functional currency, rather than at the rate for the period in which the asset was acquired.

(2) *Cost of goods sold.* The dollar value of cost of goods sold shall equal the sum of the dollar values of beginning inventory and purchases less the dollar value of closing inventory as these amounts are determined under paragraph (c)(3) of this section.

(3) *Beginning inventory, purchases, and closing inventory*—(i) *Beginning inventory.* Amounts representing beginning inventory shall be translated so as to obtain the same amount of dollars which represented such items in the closing inventory balance for the preceding taxable year.

(ii) *Purchases.* Amounts representing items purchased or otherwise first included in inventory during the taxable year shall be translated at the exchange rate for the translation period in which the cost of such items was incurred.

(iii) *Closing inventory*—(A) *In general.* Amounts representing items included in the closing inventory balance shall be translated at the exchange rate for the translation period in which the cost of such items was incurred. However, if amounts representing items included in the closing inventory balance are either valued at market or written down to market value, they shall be translated at the exchange rate existing on the last day of the taxable year. For purposes of determining lower of cost or market, items of inventory included in the closing inventory balance shall be translated into dollars at the exchange rate for the translation period in which the cost of such items was incurred and compared with market as determined in the QBU's hyperinflationary currency translated into dollars at the exchange rate existing on the last day of the taxable year.

(B) *Determination of translation period.* The method used to determine the translation period of amounts representing items of closing inventory for purposes of paragraph (c)(3)(iii)(A) of this section may be based upon reasonable approximations and averages, including rates of turnover, provided that the method is used consistently from year to year.

(4) *Depreciation, depletion, and amortization.* Amounts representing allowances for depreciation, depletion, or amortization shall be translated at the exchange rate for the translation period in which the cost of the underlying asset was incurred, except as provided in paragraph (c)(1) of this section.

(5) *Prepaid expenses or income.* Amounts representing expense or income paid or received in a prior taxable year shall be translated at the exchange rate for the translation period during which they were paid or received.

(6) *Exchange rate.* The exchange rate for a translation period may be determined under any reasonable method, provided that the method is consistently applied to all translation periods and conforms to the taxpayer's method of financial accounting. Reasonable methods include the average of beginning and ending exchange rates for the translation period and the spot rate on the last day of the translation period. Once chosen, a method for determining an exchange rate can be changed only with the consent of the district director.

(7) *Translation period*—(i) *In general.* Except as provided in paragraphs (c)(3)(iii)(B) and (c)(7)(ii) of this section, a translation period shall be each month within a QBU's taxable year.

(ii) *Exception.* A taxpayer may divide its taxable year into translation periods of equal length (with not more than one short period annually) that are less than one month. Once such a translation period is established, it may not be changed without the consent of the district director.

(8) *Dollar transactions*—(i) *In general.* Except as provided in paragraph (c)(8)(ii) of this section, no DASTM gain or loss is realized with respect to dollar transactions since the dollar is the functional currency of the QBU. Thus, the amount of any payment or receipt of dollars shall be reflected in the income or loss statement by the amount of such dollars. Also, the income or loss attributable to any transaction in which the amount that a QBU is entitled to receive (or is required to pay) by reason of such transaction is denominated in terms of the dollar, or is determined by reference to the value of the dollar, must be computed transaction by transaction. For example, if a foreign corporation lends 20 LC when 20 LC=$20 and is entitled to receive the LC equivalent of $20 at maturity plus a market rate of interest in dollars (or its LC equivalent), the loan is a dollar transaction. Similarly, this paragraph applies to any transaction that is determined to be a dollar transaction under section 988.

(ii) *Non-dollar functional currency.* If pursuant to §1.985–1(b)(2)(ii)(B)(*1*), a QBU is required to use a functional currency other than the dollar, then that currency shall be substituted for the dollar in applying paragraph (c)(8)(i) of this section.

(9) *Third currency transactions.*—A taxpayer may use any reasonable method of accounting for transactions described in sections 988(c)(1)(B) and

(C) that are denominated in, or determined by reference to, a currency other than the QBU's hyperinflationary currency or the dollar (third currency transactions) so long as such method is consistent with its method of financial accounting.

(10) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

Example 1. S is an accrual basis QBU that is required to use the dollar as its functional currency for its first taxable year beginning in 1994. S's hyperinflationary currency is the ''h.'' During 1994, S accrues 100 dollars attributable to dollar-denominated sales. Because this is a dollar transaction under paragraph (c)(8) of this section, S's income or loss for 1994 shall reflect the 100 dollars (not the hyperinflationary value of such dollars when accrued).

Example 2. (i) S is an accrual basis QBU that is required to use the dollar as its functional currency for its first taxable year beginning in 1994. S's hyperinflationary currency is the ''h.'' During 1994, S's sales amounted to 240,000,000h, its currently deductible expenses were 26,000,000h, and its total inventory purchases amounted to 100,000,000h. During January and February of 1994, S purchased depreciable assets for 80,000,000h and was allowed depreciation of 4,000,000h. At the end of 1994, S's closing inventory was 23,000,000h. No election to use a translation period other than the month is made, S had no transactions described in paragraph (c)(8) or (c)(9) of this section, and S's closing inventory was computed on the first-in, first-out inventory method. S's adjusted income or loss statement for 1994 is translated into dollars as follows:

	Hyperinflationary currency	Exchange rate	United States dollars
Sales			
(Jan.–Feb.)	10,000,000h	[1] 20:1	$500,000
(Mar.–Apr.)	20,000,000	21:1	952,381
(May.–June.)	50,000,000	22:1	2,272,727
(July)	50,000,000	23:1	2,173,913
(August)	20,000,000	26:1	769,231
(Sept.)	20,000,000	28:1	714,286
(Oct.)	20,000,000	29:1	689,655
(Nov.)	20,000,000	30:1	666,667
(Dec.)	30,000,000	31:1	967,742
Total	240,000,000h	....	9,706,602
Cost of Goods Sold			
Opening Inventory Purchases:	0	....	0
(Jan.–Feb.)	15,000,000h	20:1	750,000
(Mar.–Apr.)	10,000,000	21:1	476,190
(May–June)	30,000,000	22:1	1,363,636
(July)	20,000,000	23:1	869,565
(August)	10,000,000	26:1	384,615
(Sept.)	5,000,000	28:1	178,571
(Oct.)	5,000,000	29:1	172,414
(Nov.)	2,500,000	30:1	83,333
(Dec.)	2,500,000	31:1	80,645
Less Closing Inventory	(23,000,000)	([2])	(822,655)
	77,000,000h	....	3,536,314

[1] Where multiple months are indicated, the exchange rate applies for all months.
[2] See paragraph (ii) of this *Example.*

(ii) Since S uses the first-in, first-out inventory method, the closing inventory is assumed to consist of purchases made during the most recent translation period as follows:

	Hyperinflationary currency	Exchange rate	United States dollars
December	2,500,000h	31:1	$ 80,645
November	2,500,000	30:1	83,333
October	5,000,000	29:1	172,414
September	5,000,000	28:1	178,571
August	8,000,000	26:1	307,692
Total	23,000,000h	....	822,655

	Hyperinflationary currency	Exchange rate	United States dollars
Non-Capitalized Expenses			
(Jan.–Feb.)	4,000,000h	20:1	200,000
(Mar.–Apr.)	2,500,000	21:1	119,048
(May–June)	2,500,000	22:1	113,636
(July)	2,000,000	23:1	86,957
(August)	3,000,000	26:1	115,385
(Sept.)	3,000,000	28:1	107,143
(Oct.)	2,000,000	29:1	68,966
(Nov.)	3,000,000	30:1	100,000
(Dec.)	4,000,000	31:1	129,032
Total	26,000,000h		1,040,167
Depreciation	4,000,000h	20:1	200,000
Total Cost & Expenses	107,000,000h		4,776,481
Operating Profit	133,000,000h		4,930,121

(d) *Computation of DASTM gain or loss*—(1) *Rule.* DASTM gain or loss of a QBU equals—

(i) The net worth of the QBU (as determined under paragraph (d)(2) of this section) at the end of the taxable year minus the net worth of the QBU at the end of the preceding taxable year; plus

(ii) The dollar amount of the items described in paragraph (d)(3) of this section and minus the dollar amount of the items described in paragraph (d)(4) of this section; minus

(iii) The amount of dollar income or earnings and profits (or plus the amount of any dollar loss or deficit in earnings and profits) as determined for the taxable year pursuant to paragraphs (b)(1) through (b)(3) of this section.

(2) *Net worth.* Net worth of a QBU at the end of any taxable year equals the aggregate dollar amount representing assets on the QBU's balance sheet at the end of the taxable year less the aggregate dollar amount representing liabilities on the balance sheet. Notwithstanding any other provision in this paragraph (d)(2), the district director may adjust the amount of any asset or liability if a purpose for acquiring (or disposing of) the asset or incurring (or discharging) the liability is to manipulate the composition of the balance sheet for any period during the taxable year in order to avoid tax. The taxpayer shall determine net worth by—

(i) Preparing a balance sheet as of the end of the taxable year from the QBU's books and records (within the meaning of §1.989(a)–1(d)) as recorded in the QBU's hyperinflationary currency;

(ii) Making adjustments necessary to conform such balance sheet to United States generally accepted accounting principles and tax accounting principles (including reversing monetary correction adjustments required by local accounting principles); and

(iii) Translating the asset and liability amounts shown on the balance sheet into United States dollars in accordance with paragraph (d)(5) of this section.

(3) *Positive adjustments.* The items described in this paragraph (d)(3) are dividend distributions for the taxable year and any items that decrease net worth for the taxable year but that generally do not affect income or loss or earnings and profits (or a deficit in earnings and profits). Such items include a transfer to the home office of a QBU branch and a return of capital. Except as otherwise provided by ruling or administrative pronouncement, the amount of a transfer to the home office of a QBU branch, a dividend, or a distribution that is a return of capital shall be translated into dollars at the exchange rate on the date the amount is paid.

(4) *Negative adjustments.* The items described in this paragraph (d)(4) are items that increase net worth for the taxable year but that generally do not affect income or loss or earnings and profits (or a deficit in earnings and profits). Such items include a capital contribution or a transfer from a home

office to a QBU branch. Except as otherwise provided by ruling or administrative pronouncement, if the contribution or transfer is not in dollars, the amount of a capital contribution or transfer shall be translated into dollars at the exchange rate on the date made.

(5) *Translation of balance sheet.* Asset and liability amounts shown on the balance sheet in hyperinflationary currency (adjusted pursuant to paragraph (d)(2)(ii) of this section) shall be translated into dollars as provided in this paragraph (d)(5). However, if the QBU previously changed its functional currency to the dollar and the rules of § 1.985–5 (or, if applicable, § 1.985–5T, as contained in the April 1, 1993 edition of 26 CFR part 1 (1.908 to 1.1000)) applied in translating its balance sheet amounts into dollars, then the spot exchange rate applied under those rules shall be used to translate any amount that would otherwise be translated at a rate determined by reference to a translation period prior to the change in functional currency. For example, the basis of real property acquired while the QBU had a nondollar functional currency shall be translated into dollars at the spot rate on the last day of the taxable year before the year of change to a dollar functional currency, rather than at the rate for the period in which the cost was incurred.

(i) *Closing inventory.* Amounts representing items of inventory included in the closing inventory balance shall be translated in accordance with paragraph (c)(3)(iii) of this section.

(ii) *Bad debt reserves.* Amounts representing bad debt reserves shall be translated at the exchange rate for the last translation period for the taxable year.

(iii) *Prepaid income or expense.* Amounts representing expenses or income paid or received in a prior taxable year shall be translated in accordance with paragraph (c)(5) of this section.

(iv) *Hyperinflationary currency.* Amounts of the hyperinflationary currency and hyperinflationary demand deposit balances shall be translated at the exchange rate for the last translation period of the taxable year.

(v) *Certain assets*—(A) *In general.* Amounts representing plant, real property, equipment, goodwill, and patents and other intangibles shall be translated at the exchange rate for the translation period in which the cost of the asset was incurred.

(B) *Adjustment to certain assets.* Amounts representing depreciation, depletion, and amortization reserves shall be translated in accordance with paragraph (c)(4) of this section.

(vi) *Hyperinflationary debt obligations.* Except as provided in paragraph (d)(5)(vii) of this section, amounts representing a hyperinflationary debt obligation (including accounts receivable and payable) shall be translated at the exchange rate for the last translation period for the taxable year.

(vii) *Accrued foreign income taxes.* Amounts representing an accrued but unpaid foreign income tax shall be translated at the exchange rate on the last day of the last translation period of the taxable year of accrual.

(viii) *Certain hyperinflationary financial instruments.* Amounts representing any item described in section 988(c)(1)(B)(iii) (relating to forward contracts, futures contracts, options, or similar financial instruments) denominated in or determined by reference to the hyperinflationary currency shall be translated at the exchange rate for the last translation period for the taxable year.

(ix) *Other assets and liabilities.* Amounts representing assets and liabilities, other than those described in paragraphs (d)(5)(i) through (viii) of this section, shall be translated at the exchange rate for the translation period in which the cost of the asset or the amount of the liability was incurred.

(6) *Dollar transactions.* Notwithstanding any other provisions of this paragraph (d), where the amount representing an item shown on the balance sheet reflects a dollar transaction (described in paragraph (c)(8) of this section), the transaction shall be taken into account in accordance with that paragraph.

(7) *Third currency transactions.* A taxpayer may use any reasonable method of accounting for transactions described in section 988(c)(1)(B) and (C) that are denominated in, or determined by reference to, a currency other than

the QBU's hyperinflationary currency or the dollar (third currency transactions), so long as such method is consistent with its method of financial accounting.

(8) *Character.* The amount of DASTM gain or loss determined under paragraph (d)(1) of this section shall be ordinary income or loss.

(9) *Example.* The provisions of this paragraph (d) are illustrated by the following example:

Example. (i) S, an accrual method calendar year foreign corporation, uses DASTM. S's hyperinflationary currency is the "h." S's net worth at December 31, 1993 was $3,246,495. For 1994, S's operating profit is 81,340,000h, or $2,038,200. S made a 5,000,000h distribution in April and again in December of 1994. S's translation period is the month. None of S's assets or liabilities reflect a dollar or third currency transaction described in paragraph (c)(8) or (c)(9) of this section, respectively. The exchange rate for each month in 1994 is as follows:

January	32h:$1
Feb.–Mar.	33:1
April–May	34:1
June	35:1
July	36:1
Aug.–Sept.	37:1
Oct.	38:1
Nov.	39:1
Dec.	40:1

(ii) At the end of 1994, S's assets and liabilities, as adjusted and translated pursuant to paragraphs (d)(2) and (d)(5) of this section, are as follows:

	Hyperinflationary	Exchange rate	U.S. dollar
Hyperinflationary cash on hand	40,000h	40:1	$1,000
Checking account	400,000	40:1	10,000
Accounts Receivable- 30 Day Accounts	20,000,000	[1] 40:1	500,000
60 Day Accounts	25,000,000	40:1	625,000
Inventory	65,000,000	([2])	2,500,000
Fixed assets—Property	90,000,000	27:1	3,333,333
Plant	190,000,000	([3])	6,785,714
Accumulated Depreciation	(600,000)	([3])	(21,428)
Equipment	10,000,000	([4])	340,000
Accumulated Depreciation	(400,000)	([4])	(13,333)
Common Stock—Stock A	500,000	34:1	14,706
Stock B	400,000	26:1	15,385
Preferred Stock	1,000,000	32:1	31,250
C.D.s	5,000,000	40:1	125,000
Total Assets	406,340,000		14,246,627
Accounts Payable Long-term liabilities:	35,000,000	40:1	875,000
Liability A	150,000,000	40:1	3,750,000
Liability B	80,000,000	40:1	2,000,000
Liability C	30,000,000	40:1	750,000
Total Liabilities	295,000,000h		$7,375,000

[1] S ages its accounts receivable and groups them into two categories—those outstanding for 30 days and those outstanding for 60 days.

[2] Translated the same as closing inventory under paragraph (c)(3)(iii).

[3] The cost of S's plant was incurred in several translation periods. Therefore, the dollar cost and dollar depreciation reflect several translation rates.

[4] S has a variety of equipment. Therefore, S's dollar basis represents the sum of the hyperinflationary cost of each, translated according to the exchange rate for the translation period incurred.

(iii) The DASTM gain of S for 1994 is computed as follows:

Net worth—1994		$6,871,627
Less—Net worth—1993		$3,246,495
Plus—1994 Dividends:		
April	$149,254	
December	[1] 126,582	275,836
Less Operating Profit—1994		2,038,200
DASTM Gain		$1,862,768

[1] The exchange rates on the date of the April and December dividends were 33.5h:$1 and 39.5h:$1, respectively.

(iv) Thus, total profit = $2,038,200 + $1,862,768 = $3,900,968

(e) *Effect of DASTM gain or loss on gross income, taxable income, or earnings and profits*—(1) *In general.* For all purposes of subtitle A, the amount of DASTM gain or loss of a QBU determined under paragraph (d) of this section is taken into account by the QBU for purposes of determining the amount of its gross income, taxable income or loss, earnings and profits (or deficit in earnings and profits), and, where necessary, particular items of income, expense or other amounts. DASTM gain or loss is allocated under one of two methods. Certain small QBUs may elect the small QBU DASTM allocation described in paragraph (e)(2) of this section. All other QBUs must use the 9-step procedure described in paragraph (e)(3) of this section.

(2) *Small QBU DASTM allocation*—(i) *Election threshold.* A taxpayer may elect to use the small QBU DASTM allocation described in paragraph (e)(2)(iv) of this section with respect to a QBU that has an adjusted basis in assets (translated as provided in paragraph (d)(5) of this section) of $10 million or less at the end of any taxable year. In calculating the $10 million threshold, a QBU shall be treated as owning all of the assets of each related QBU (as defined in paragraph (e)(2)(vi) of this section) having its residence (as defined in section 988(a)(3)(B)) in the QBU's country of residence (related same- country QBU). For this purpose, appropriate adjustment shall be made to eliminate the double counting of assets created in transactions between related QBUs resident in the same country. For example, assume QBU–1, resident in country X, sells inventory to related QBU–2, also resident in country X, in exchange for an account receivable. For purposes of determining the assets of QBU–1 under this paragraph (e)(2)(i), the taxpayer shall take into account either the inventory shown on the books of QBU–2 or QBU–1's receivable from QBU–2 (but not both).

(ii) *Consent to election.* The election of the small QBU DASTM allocation or subsequent application of the rules of paragraph (e)(3) of this section due to an increase in the adjusted basis of the QBU's assets shall be deemed to have been made with the consent of the Commissioner. Once the election under paragraph (e)(2)(iii) of this section is made, it shall apply for all years in which the adjusted basis of the assets of the QBU (and any related same-country QBU) is $10 million or less, unless revoked with the Commissioner's consent. If the adjusted basis of the assets of the QBU (and any related same-country QBU) exceeds $10 million at the end of any taxable year, the rules of paragraph (e)(3) of this section shall apply to that QBU (and any related same-country QBU) for such year and each subsequent year unless such QBU again qualifies, and applies for and obtains the Commissioner's consent, to use the small QBU DASTM allocation. However, if a QBU acquires assets with a principal purpose of avoiding the application of paragraph (e)(2)(iv) of this section, the Commissioner may disregard the acquisition of such assets.

(iii) *Manner of making election*—(A) *QBUs that are branches of United States persons.* For the first year in which this election is effective, in the case of a QBU branch of a United States person, a statement shall be attached to the United States person's timely filed Federal income tax return (taking extensions into account). The statement shall identify the QBU (or QBUs) for which the election is being made by describing its business and its country of residence, state the adjusted basis of the assets of the QBU (and any related same-country QBUs) to which the election applies, and include a statement that the election is being made pursuant to § 1.985–3(e)(2).

(B) *Other QBUs.* In the case of a QBU other than one described in paragraph (e)(2)(iii)(A) of this section, an election must be made in the manner prescribed in § 1.964–1. The statement filed with the Internal Revenue Service as required under § 1.964–1 must include the information required under paragraph (e)(2)(iii)(A) of this section.

(iv) *Effect of election.* If a taxpayer elects under this paragraph (e)(2) to use the small QBU DASTM allocation, DASTM gain or loss, as determined under paragraph (d) of this section, of a small QBU shall be allocated ratably to all items of the QBU's gross income (determined prior to adjustment for DASTM gain or loss). Therefore, for purposes of the foreign tax credit, DASTM gain or loss shall be allocated on the basis of the relative amounts of gross income in each separate category as defined in §1.904–5(a)(1). In the case of a controlled foreign corporation (within the meaning of section 957 or 953(c)(1)(B)), for purposes of section 952, DASTM gain or loss shall be allocated to subpart F income in a separate category in the same ratio that the gross subpart F income in that category for the taxable year bears to its total gross income in that category for the taxable year.

(v) *Conformity.* If a person (or a QBU of such person) makes an election under this paragraph (e)(2) to use the small QBU DASTM allocation, then each QBU of any related person (as defined in paragraph (e)(2)(vi) of this section) that satisfies the threshold requirement of paragraph (e)(2)(i) of this section (after application of the aggregation rule of paragraph (e)(2)(i) of this section) shall be deemed to have made the election.

(vi) *Related person.* The term related person means any person with a relationship to the QBU (or to the United States or foreign person of which the electing QBU is a part) that is defined in section 267(b) or section 707(b).

(3) *DASTM 9-step procedure*—(i) *Step 1—prepare balance sheets.* The taxpayer shall prepare an opening and a closing balance sheet for the QBU for each balance sheet period during the taxable year. The balance sheet period is the most frequent period for which balance sheet data are reasonably available (but in no event less frequently than quarterly). The balance sheet period may not be changed without the consent of the district director. The balance sheets must be prepared under the principles of paragraph (d)(2) of this section.

(ii) *Step 2—identify certain assets and liabilities.* The taxpayer shall identify each item on the balance sheet that is described in section 988(c)(1)(B) or (C) and that would have been translated under paragraph (d)(5) of this section into dollars at the exchange rate for the last translation period for the taxable year (or the exchange rate on the last day of the last translation period of the taxable year in the case of an accrued foreign income tax liability).

(iii) *Step 3—characterize the assets.* The taxpayer shall characterize and group the assets identified in paragraph (e)(3)(ii) of this section (Step 2) according to the source and the type of income that they generate, have generated, or may reasonably be expected to generate by applying the principles of §1.861–9T(g)(3) or its successor regulation (relating to characterization of assets for purposes of interest expense allocation). If a purpose for a taxpayer's business practices is to manipulate asset characterization or groupings, the district director may allocate or apportion DASTM gain or loss attributable to the assets. Thus, if a taxpayer that previously did not separately state interest on accounts receivable begins to impose an interest charge and a purpose for the change was to manipulate tax characterizations or groupings, then the district director may require that none of the DASTM gain or loss attributable to those receivables be allocated or apportioned to interest income.

(iv) *Step 4—determine DASTM gain or loss attributable to certain assets*—(A) *General rule.* The taxpayer shall determine the dollar amount of DASTM gain or loss attributable to assets in each group identified in paragraph (e)(3)(iii) of this section (Step 3) as follows:

$$\left[(\mathrm{bb}+\mathrm{eb})\div 2\right]\times\left[\mathrm{er}-\mathrm{br}\right]$$

where

bb = the hyperinflationary currency adjusted basis of the assets in the group at the beginning of the balance sheet period.

eb = the hyperinflationary currency adjusted basis of the assets in the group at the end of the balance sheet period.

er = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the end of the balance sheet period.

br = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the beginning of the balance sheet period.

(B) *Weighting to prevent distortion.* If averaging the adjusted basis of assets in a group at the beginning and end of a balance sheet period results in an allocation of DASTM gain or loss that does not clearly reflect income, as might be the case in the event of a purchase or disposition of an asset that is not in the normal course of business, the taxpayer must use a weighting method that reflects the time the assets are held by the QBU during the translation period.

(C) *Example.* The provisions of this paragraph (e)(3)(iv) are illustrated by the following example:

Example. S is a foreign corporation that operates in the hyperinflationary currency ''h'' and computes its income or loss or earnings and profits under DASTM. S's adjusted basis in a group of assets described in section 988(c)(1)(B) or (C) that generate general limitation foreign source income (as characterized under paragraph (e)(3)(iii) of this section) at the beginning of the balance sheet period is 750,000h. S's basis in such assets at the end of the balance sheet period is 1,250,000h. The exchange rate at the beginning of the balance sheet period is $1 = 200h. The exchange rate at the end of the balance sheet period is $1 = 500h. The DASTM loss attributable to the assets described above is $3,000, determined as follows:

$$[(750{,}000h+1{,}250{,}000h)\div 2]\times [(\$1\div 500h)-(\$1\div 200h)]=(\$3000)$$

(v) *Step 5—adjust dollar gross income by DASTM gain or loss from assets.* The taxpayer shall adjust the dollar amount of the QBU's gross income (computed under paragraphs (b)(1) through (b)(3) of this section) generated by each group of assets characterized in paragraph (e)(3)(iii) of this section (Step 3) by the amount of DASTM gain or loss attributable to those assets computed under paragraph (e)(3)(iv) of this section (Step 4). Thus, if a group of assets, such as accounts receivable, generates both a category of income described in section 904(d)(1)(I) (relating to general limitation income) that is not foreign base company income as defined in section 954 and a DASTM loss under paragraph (e)(3)(iv) of this section (Step 4), the amount of the DASTM loss would reduce the amount of the QBU's gross income in that category. Similarly, if a group of assets, such as short-term bank deposits, generates both foreign personal holding company income that is passive income (described in sections 954(c)(1)(A) and 904(d)(1)(A)) and a DASTM loss under paragraph (e)(3)(iv) of this section (Step 4), the amount of the DASTM loss would reduce the amount of the QBU's foreign personal holding company income and passive income. See section 904(f) and the regulations thereunder in the case where that section would apply and DASTM loss attributable to a group of assets exceeds the income generated by such assets.

(vi) *Step 6—determine DASTM gain or loss attributable to liabilities*—(A) *General rule.* The taxpayer shall determine the dollar amount of DASTM gain or loss attributable to liabilities identified in paragraph (e)(3)(ii) of this section (Step 2), and described in paragraph (e)(3)(vi)(B) of this section as follows:

$$\left[(bl+el)\div 2\right]\times\left[br-er\right]$$

where

bl = the hyperinflationary currency amount of liabilities at the beginning of the balance sheet period.

el = the hyperinflationary currency amount of liabilities at the end of the balance sheet translation period.

br = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the beginning of the balance sheet period.

er = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the end of the balance sheet period.

(B) *Separate calculation.* The calculation shall be made separately for interest-bearing liabilities described in paragraph (e)(3)(vii) of this section (Step 7) and for each of the classes of non-interest-bearing liabilities described in paragraph (e)(3)(viii) of this section (Step 8).

(C) *Weighting to prevent distortion.* Where a distortion would result from averaging the amount of liabilities at the beginning and end of a balance sheet period, as might be the case where a taxpayer incurs or retires a substantial liability, the taxpayer must use a different method that more clearly reflects the average amount of liabilities weighted to reflect the time the liability was outstanding during the balance sheet period.

(vii) *Step 7—adjust dollar income and expense by DASTM gain or loss from interest-bearing liabilities*—(A) *In general.* The taxpayer shall apply the amount of DASTM gain on interest-bearing liabilities computed under paragraph (e)(3)(vi) of this section (Step 6) to reduce interest expense generated by such liabilities (*e.g.*, prior to the application of §1.861–9T or its successor regulation). To the extent DASTM gain on such liabilities exceeds interest expense, it shall be sourced or otherwise classified in the same manner that interest expense is allocated and apportioned under §1.861–9T or its successor regulation. The amount of DASTM loss on interest-bearing liabilities computed under paragraph (e)(3)(vi) of this section (Step 6) shall be allocated and apportioned in the same manner that interest expense is allocated and apportioned under §1.861–9T or its successor regulation (without regard to the exceptions to fungibility in §1.861–10T or its successor regulation). For purposes of this section, an interest-bearing liability is a liability that requires payment of periodic interest (whether fixed or variable), has original issue discount, or would have interest imputed under subtitle A.

(B) *Allocation of DASTM gain or loss from interest-bearing liabilities that generate related person interest expense.* DASTM gain or loss from interest-bearing liabilities that generate related person interest expense (as provided in section 954(b)(5)) shall be allocated for purposes of subtitle A (including sections 904 and 952) in the same manner that the related person interest expense of that debt is required to be allocated under the rules of section 954(b)(5) and §1.904–5(c)(2).

(C) *Modified gross income method.* In applying the modified gross income method described in §1.861–9T(j) or its successor regulation, gross income shall be adjusted for any DASTM gain or loss from assets as provided in paragraph (e)(3)(v) of this section (Step 5) and any DASTM gain or loss with respect to short-term, non-interest-bearing trade payables as provided in paragraph (e)(3)(viii)(A) of this section.

(viii) *Step 8—adjust dollar income and expense by DASTM gain or loss from non-interest bearing liabilities*—(A) *Short-term, non-interest-bearing trade payables.* The taxpayer shall allocate DASTM gain or loss on short-term non-interest-bearing trade payables for purposes of subtitle A (including sections 904 and 952) to the same category or type of gross income as the cost or expense to which the trade payable relates. For this purpose, a short-term, non-interest-bearing trade payable is a non-interest-bearing liability with a term of 183 days or less that is incurred to purchase property or services to be used by the obligor in an active trade or business.

(B) *Excise tax payables.* The taxpayer shall allocate DASTM gain or loss on excise tax payables for purposes of subtitle A (including sections 904 and 952) to the same category or type of gross income as would be derived from the activity to which the excise tax relates.

(C) *Other non-interest-bearing liabilities*—(*1*) *In general.* Except as provided in paragraphs (e)(3)(viii)(A), (e)(3)(viii)(B), and (e)(3)(viii)(C)(*2*) of this section, DASTM gain or loss on non-interest-bearing liabilities shall be allocated under paragraph (e)(3)(ix) of this section (Step 9).

(*2*) *Tracing if substantial distortion of income.* DASTM gains and losses on liabilities described in paragraph (e)(3)(viii)(C)(*1*) of this section may be attributed to the same section 904(d) separate category or subpart F category as the transaction to which the liability relates if the taxpayer demonstrates to the satisfaction of the district director, or it is determined by the district director, that application of paragraph (e)(3)(viii)(C)(*1*) of this section results in a substantial distortion of income.

(ix) *Step 9—allocate residual DASTM gain or loss.* If there is a difference between the net DASTM gain or loss determined under paragraphs (e)(3)(i) through (viii) of this section (Steps 1 through 8) and the DASTM gain or loss determined under paragraph (d) of this section, the amount of the difference must be allocated for purposes of subtitle A (including sections 904 and 952) to the QBU’s gross income (computed under paragraphs (b)(1) through (3) of this section, as adjusted under paragraphs (e)(3)(i) through (viii) of this section (Steps 1 through 8)) on the basis of the relative amounts of each category or type of gross income.

[T.D. 8556, 59 FR 37673, July 25, 1994]

§ 1.985–4 Method of accounting.

(a) *Adoption of election.* The adoption of, or the election to use, a functional currency shall be treated as a method of accounting. The functional currency shall be used for the year of adoption (or election) and for all subsequent taxable years unless permission to change is granted, or considered to be granted under § 1.985–2 or 1.985–8T, by the Commissioner.

(b) *Condition for changing functional currencies.* Generally, permission to change functional currencies shall not be granted unless significant changes in the facts and circumstances of the QBU's economic environment occur. If the determination of the functional currency of the QBU for purposes of United States generally accepted accounting principles (GAAP) is based on facts and circumstances substantially similar to those set forth in § 1.985–1(c)(2), then ordinarily the Commissioner will grant a taxpayer's request to change its functional currency (or the functional currency of its branch that is a QBU) to a new functional currency only if the taxpayer (or its QBU) also changes to the new functional currency for purposes of GAAP. However, permission to change will not necessarily be granted merely because the new functional currency will conform to the taxpayer's GAAP functional currency.

(c) *Relationship to certain other sections of the Code.* Nothing in this section shall be construed to override the provisions of any other sections of the Code of regulations that require the use of consistent accounting methods. Such provisions must be independently satisfied separate and apart from the identification of a functional currency. For instance, while separate geographical divisions of a taxpayer's trade or business may have different functional currencies, such geographical divisions may nevertheless be required to consistently use other methods of accounting.

[T.D. 8263, 54 FR 38661, Sept. 20, 1989, as amended by T.D. 8776, 63 FR 40368, July 29, 1998]

§ 1.985–5 Adjustments required upon change in functional currency.

(a) *In general.* This section applies in the case of a QBU that changes from one functional currency (old functional currency) to another functional currency (new functional currency). A taxpayer or QBU subject to the rules of this section shall make the adjustments set forth in the 3-step procedure described in paragraphs (b) through (e) of this section. The adjustments shall be made on the last day of the taxable year ending before the year of change as defined in § 1.481–1(a)(1). Gain or loss required to be recognized under paragraphs (b), (d)(2), and (e)(2) of this section is not subject to section 481 and, therefore, the full amount of the gain or loss must be included in income or earnings and profits on the last day of the taxable year ending before the year of change. Except as provided in § 1.985–6, a QBU with a functional currency for its first taxable year beginning in 1987 that is different from the currency in which it had kept its books and records for United States accounting and tax accounting purposes for its prior taxable year shall apply the principles of this § 1.985–5 for purposes of computing the relevant functional currency items, such as earnings and profits, basis of an asset, and amount of a liability, as of the first day of a taxpayer's first taxable year beginning in 1987. However, a QBU that changes to the dollar pursuant to § 1.985–1(b)(2) after 1987 shall apply § 1.985–7.

(b) *Step 1—Taking into account exchange gain or loss on certain section 988 transactions.* The QBU shall recognize or otherwise take into account for all purposes of the Code the amount of any unrealized exchange gain or loss attributable to a section 988 transaction (as defined in section 988(c)(1)(A), (B), and (C)) that, after applying section 988(d), is denominated in terms of or determined by reference to the new functional currency. The amount of such gain or loss shall be determined without regard to the limitations of section

988(b) (*i.e.*, whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988.

(c) *Step 2—Determining the new functional currency basis of property and the new functional currency amount of liabilities and any other relevant items.* The new functional currency adjusted basis of property and the new functional currency amount of liabilities and any other relevant items (*e.g.*, items described in section 988(c)(1)(B)(iii)) shall equal the product of the amount of the old functional currency adjusted basis or amount multiplied by the new functional currency/old functional currency spot exchange rate on the last day of the taxable year ending before the year of change (spot rate).

(d) *Step 3A—Additional adjustments that are necessary when a branch changes functional currency*—(1) *Branch changing to a functional currency other than the taxpayer's functional currency*—(i) *Rule.* If a QBU that is a branch of a taxpayer changes to a functional currency other than the taxpayer's functional currency, the branch shall make the adjustments set forth in either paragraph (d)(1)(ii) or (d)(1)(iii) of this section for purposes of section 987. See §1.987–5(d) for rules for computing the branch's equity pool and basis pool.

(ii) *Where prior to the change the branch and taxpayer had different functional currencies.* If the branch and the taxpayer had different functional currencies prior to the change, the branch's new functional currency equity pool shall equal the product of the old functional currency amount of the equity pool multiplied by the spot rate. No adjustment to the basis pool is necessary.

(iii) *Where prior to the change the branch and taxpayer had the same functional currency.* If the branch and the taxpayer had the same functional currency prior to the change, the branch's basis pool shall equal the difference between the branch's total old functional currency basis of its assets and its total old functional currency amount of its liabilities. The branch's equity pool shall equal the product of the basis pool multiplied by the spot rate.

(2) *Branch changing to the taxpayer's functional currency.* If a branch changes its functional currency to the taxpayer's functional currency, the branch shall be treated as if it terminated on the last day of the taxable year ending before the year of change. In such a case, the taxpayer shall realize gain or loss attributable to the branch's equity pool under the principles of section 987.

(e) *Step 3B—Additional adjustments that are necessary when a taxpayer changes functional currency*—(1) *Corporations.* The amount of a corporation's new functional currency earnings and profits and the amount of its new functional currency paid-in capital shall equal the product of the old functional currency amounts of such items multiplied by the spot rate. The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also shall be translated into the new functional currency at the spot rate.

(2) *Collateral consequences to a United States shareholder of a corporation changing to the United States dollar as its functional currency.* A United States shareholder (within the meaning of section 951(b) or section 953(c)(1)(A)) of a controlled foreign corporation (within the meaning of section 957 or section 953(c)(1)(B)) changing its functional currency to the dollar shall recognize foreign currency gain or loss computed under section 986(c) as if all previously taxed earnings and profits, if any, (including amounts attributable to pre-1987 taxable years that were translated from dollars into functional currency in the foreign corporation's first post-1986 taxable year) were distributed immediately prior to the change. Such a shareholder shall also recognize gain or loss attributable to the corporation's paid-in capital to the same extent, if any, that such gain or loss would be recognized under the regulations under section 367(b) if the corporation was liquidated completely.

(3) *Taxpayers that are not corporations.* [Reserved]

(4) *Adjustments to a branch's accounts when a taxpayer changes functional currency*—(i) *Taxpayer changing to a functional currency other than the branch's functional currency.* If a taxpayer changes to a functional currency that differs from the functional currency of a branch of the taxpayer, the branch shall adjust its basis pool in the manner prescribed in paragraph (d)(1)(ii) of this section for adjusting the equity pool, if the taxpayer's old functional currency was different from the branch's functional currency. If the taxpayer's old functional currency was the same as the branch's functional currency, the branch shall determine its equity pool and basis pool in the manner set forth in paragraph (d)(1)(iii) of this section for determining the basis pool and equity pool, respectively.

(ii) *Taxpayer changing to the same functional currency as the branch.* If a taxpayer changes to the same functional currency as a branch of the taxpayer, the taxpayer shall realize gain or loss as set forth in paragraph (d)(2) of this section.

(f) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. S, a calendar year foreign corporation, is wholly owned by domestic corporation P. The Commissioner granted permission to change S's functional currency from the LC to the FC beginning January 1, 1993. The LC/FC exchange rate on December 31, 1992 is 1 LC/2 FC. The following shows how S must convert the items on its balance sheet from the LC to the FC.

	1:2	
	LC	FC
Assets:		
Cash on hand	40,000	80,000
Accounts Receivable	10,000	20,000
Inventory	100,000	200,000
100,000 FC Bond (100,000 LC historical basis)	[1]50,000	100,000
Fixed assets:		
Property	200,000	400,000
Plant	500,000	1,000,000
Accumulated Depreciation	(200,000)	(400,000)
Equipment	1,000,000	2,000,000
Accumulated Depreciation	(400,000)	(800,000)
Total Assets	1,300,000	2,600,000
Liabilities:		
Accounts Payable	50,000	100,000
Long-term Liabilities	400,000	800,000
Paid-in-Capital	800,000	1,600,000
Retained Earnings	[2]50,000	100,000
Total Liabilities and Equity	1,300,000	2,600,000

[1] Under § 1.985–5(b), S will recognize a 50,000 LC loss (100,000 LC basis − 50,000 LC value) on the bond resulting from the change in functional currency. Thus, immediately before the change, S's basis in the FC bond (taking into account the loss) is 50,000 LC.

[2] The amount of S's LC retained earnings reflects the 50,000 LC loss on the bond.

Example 2. P, a domestic corporation, operates a foreign branch, S. The Commissioner granted permission to change S's functional currency from the LC to the FC beginning January 1, 1993. As of December 31, 1992, S's equity pool was 2,000 LC and its basis pool was $4,000. The LC/FC exchange rate on December 31, 1992 is 1 LC/2 FC. On January 1, 1993, the new functional currency amount of S's equity pool is 4,000 FC. The basis pool is not affected.

[T.D. 8464, 58 FR 233, Jan. 5, 1993; 58 FR 11099, Feb. 23, 1993, as amended by T.D. 8765, 63 FR 10774, Mar. 5, 1998]

§ 1.985–6 Transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning in 1987.

(a) *In general.* This section sets forth transition rules for a QBU that used the dollar approximate separate transactions method of accounting set forth in § 1.985–3 or § 1.985–3T (as contained in the April 1, 1989 edition of 26 CFR part 1 (1.908 to 1.1000)) for its first taxable year beginning in 1987 (DASTM QBU). A DASTM QBU must determine the dollar and hyperinflationary currency basis of its assets and the dollar and hyperinflationary currency amount of its liabilities that were acquired or incurred in taxable years beginning before January 1, 1987. In addition, a DASTM QBU must determine its net worth, including its retained earnings, at the end of the QBU's last taxable year beginning before January 1, 1987. This section provides rules for controlled foreign corporations (as defined in section 957 or section 953(c)(1)(B)), other foreign corporations, and branches of United States persons that must make these determinations.

(b) *Certain controlled foreign corporations.* If a DASTM QBU was a controlled foreign corporation for its last taxable year beginning before January

1, 1987, and it had a significant event as described in §1.964–1(c)(6) in a taxable year beginning before January 1, 1987, then the rules of this paragraph (b) shall apply.

(1) *Basis in assets and amount of liabilities.* The hyperinflationary currency adjusted basis of the QBU's assets and the hyperinflationary currency amount of the QBU's liabilities acquired or incurred by the QBU in a taxable year beginning before January 1, 1987, shall be the basis or the amount as determined under §1.964–1(e) prior to translation under §1.964–1(e)(4). The dollar adjusted basis of such assets and the dollar amount of such liabilities shall be the adjusted basis or the amount as determined under the rules of §1.964–1(e) after translation under §1.964–1(e)(4).

(2) *Retained earnings.* The dollar amount of the QBU's retained earnings at the end of its last taxable year beginning before January 1, 1987, shall be the dollar amount determined under §1.964–1(e)(3).

(c) *All other foreign corporations.* If a foreign corporation is a DASTM QBU that is not described in paragraph (b) of this section, then the hyperinflationary currency and dollar adjusted basis in the QBU's assets acquired in taxable years beginning before January 1, 1987, the hyperinflationary currency and dollar amount of the QBU's liabilities acquired or incurred in taxable years beginning before January 1, 1987, and the dollar amount of the QBU's net worth, including its retained earnings, at the end of its last taxable year beginning before January 1, 1987, shall be determined by applying the principles of §1.985–3T or §1.985–3. Thus, for example, the dollar basis of plant and equipment shall be determined using the appropriate historical exchange rate.

(d) *Pre-1987 section 902 amounts*—(1) *Translation of pre-1987 section 902 accumulated profits and taxes into United States dollars.* The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, shall be translated into dollars at the spot exchange rate on the first day of its first taxable year beginning after December 31, 1986. Once translated into dollars, these accumulated profits and taxes shall (absent a change in functional currency) remain in dollars for all federal income tax purposes.

(2) *Carryforward of accumulated deficits in accumulated profits from pre-1987 taxable years to post-1986 taxable years.* For purposes of sections 902 and 960, the post-1986 undistributed earnings of a foreign corporation that is subject to the rules of this section shall be reduced by the dollar amount of the corporation's deficit in accumulated profits, if any, determined under section 902 and the regulations thereunder, that was accumulated at the end of the corporation's last taxable year beginning before January 1, 1987. The dollar amount of the accumulated deficit shall be determined by multiplying the foreign currency amount of such deficit by the spot exchange rate on the last day of the corporation's last taxable year beginning before January 1, 1987, and shall be taken into account on the first day of the corporation's first taxable year beginning after December 31, 1986. Post-1986 undistributed earnings may not be reduced by the dollar amount of a pre-1987 deficit in retained earnings determined under §1.964–1(e).

(e) *Net worth branch.* If a DASTM QBU is a branch of a United States person and the QBU used a net worth method of accounting for its last taxable year beginning before January 1, 1987, then the rules of this paragraph (e) shall apply. A net worth method of accounting is any method of accounting under which the taxpayer calculates the taxable income of a QBU based on the net change in the dollar value of the QBU's equity (assets minus liabilities) during the course of a taxable year, taking into account any contributions or remittances made during the year. See, *e.g.*, Rev. Rul. 75–106, 1975–1 C.B. 31. (See §601.601(d)(2)(ii)(*b*) of this chapter).

(1) *Basis in assets and amount of liabilities*—(i) *Hyperinflationary amounts.* For the first taxable year beginning in 1987, the hyperinflationary currency adjusted basis of a QBU's assets or the hyperinflationary currency amounts of its liabilities acquired or incurred in a

taxable year beginning before January 1, 1987 is the hyperinflationary currency basis or amount at the date when acquired or incurred, as adjusted according to United States generally accepted accounting and tax accounting principles. If a hyperinflationary currency basis or amount was not determined at such date, the dollar basis or amount, as adjusted according to United States generally accepted accounting and tax accounting principles, shall be translated into hyperinflationary currency at the spot exchange rate on the date when the asset or liability was acquired or incurred.

(ii) *Dollar amounts.* For the first taxable year beginning in 1987, the dollar adjusted basis of the QBU's assets and the amounts of its liabilities shall be those amounts reflected on the QBU's dollar books and records at the end of the taxpayer's last taxable year beginning before January 1, 1987, after adjusting the books and records according to United States generally accepted accounting and tax accounting principles.

(2) *Ending net worth.* The dollar amount of the QBU's net worth at the end of its last taxable year beginning before January 1, 1987 shall equal the QBU's net worth at that date as determined under paragraph (e)(1)(ii) of this section.

(f) *Profit and loss branch.* If a DASTM QBU is a branch of a United States person and the QBU used a profit and loss method of accounting for its last taxable year beginning before January 1, 1987, then the United States person shall first apply the transition rules of §1.987–5 in order to determine the beginning amount and dollar basis of the branch's EQ pool, the hyperinflationary currency basis of the branch's assets, and the hyperinflationary currency amounts of its liabilities. A profit and loss method of accounting is any method of accounting under which the taxpayer calculates the profits of a QBU by computing the QBU's profits in its functional currency and translating the net result into dollars. See *e.g.*, Rev. Rul. 75–107, 1975–1 C.B. 32. (See §601.601(d)(2)(ii)(*b*) of this chapter). The QBU and the taxpayer must then make the adjustments required by §1.985–5, *e.g.*, the QBU must take into account unrealized exchange gain or loss on dollar-denominated section 988 transactions, the taxpayer must account for the deemed termination of the branch, and the taxpayer must translate the QBU's balance sheet items from hyperinflationary currency into dollars at the spot rate.

[T.D. 8464, 58 FR 234, Jan. 5, 1993]

§1.985–7 Adjustments required in connection with a change to DASTM.

(a) *In general.* If a QBU begins to use the dollar approximate separate transactions method of accounting set forth in §1.985–3 (DASTM) in a taxable year beginning after April 6, 1998, adjustments shall be made as provided by this section. For the rules with respect to foreign corporations, see paragraph (b) of this section. For the rules with respect to adjustments to the income of United States shareholders of controlled foreign corporations, see paragraph (c) of this section. For the rules with respect to adjustments relating to QBU branches, see paragraph (d) of this section. For the effective date of this section, see paragraph (e). For purposes of applying this section, the look-back period shall be the period beginning with the first taxable year after the transition date and ending on the last day prior to the taxable year of change. The term transition date means the later of the last day of the last taxable year ending before the base period as defined in §1.985–1(b)(2)(ii)(D) or the last day of the taxable year in which the QBU last applied DASTM. The taxable year of change shall mean the taxable year of change as defined in §1.481–1(a)(1). The application of this paragraph may be illustrated by the following examples:

Example 1. A calendar year QBU that has not previously used DASTM operates in a country in which the functional currency of the country is hyperinflationary as defined under §1.985–1(b)(2)(ii)(D) for the QBU's 1999 tax year. The look-back period is the period from January 1, 1996 through December 31, 1998, the transition date is December 31, 1995, and the taxable year of change is the taxable year beginning January 1, 1999.

Example 2. A QBU that has not previously used DASTM with a taxable year ending June 30, operates in a country in which the functional currency of the country is hyperinflationary for the QBU's tax year beginning July 1, 1999 as defined under §1.985–1(b)(2)(ii)(D) (where the base period is the thirty-six calendar months immediately preceding the first day of the current calendar year 1999). The look-back period is the period from July 1, 1995 through June 30, 1999, the transition date is June 30, 1995, and the taxable year of change is the taxable year beginning July 1, 1999.

(b) *Adjustments to foreign corporations*—(1) *In general.* In the case of a foreign corporation, the corporation shall make the adjustments set forth in paragraphs (b)(2) through (4) of this section. The adjustments shall be made on the first day of the taxable year of change.

(2) *Treatment of certain section 988 transactions*—(i) *Exchange gain or loss from section 988 transactions unrealized as of the transition date.* A foreign corporation shall adjust earnings and profits by the amount of any unrealized exchange gain or loss that was attributable to a section 988 transaction (as defined in sections 988(c)(1)(A), (B), and (C)) that was denominated in terms of (or determined by reference to) the dollar and was held by the corporation on the transition date. Such gain or loss shall be computed as if recognized on the transition date and shall be reduced by any gain and increased by any loss recognized by the corporation with respect to such transaction during the look-back period. The amount of such gain or loss shall be determined without regard to the limitations of section 988(b) (i.e., whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988. Proper adjustments shall be made to account for gain or loss taken into account by reason of this paragraph (b)(2). See §1.985–5(f) *Example 1, footnote 1.*

(ii) *Treatment of a section 988 transaction entered into and terminated during the look-back period.* A foreign corporation shall reduce earnings and profits by the amount of any gain, and increase earnings and profits by the amount of any loss, that was recognized with respect to any dollar denominated section 988 transactions entered into and terminated during the look-back period.

(3) *Opening balance sheet.* The opening balance sheet of a foreign corporation for the taxable year of change shall be determined as if the corporation had changed its functional currency to the dollar by applying §1.985–5(c) on the transition date and had translated its assets and liabilities acquired and incurred during the look-back period under §1.985–3.

(4) *Earnings and profits adjustments*—(i) *Pre-1987 accumulated profits.* The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that are attributable to taxable years beginning before January 1, 1987, as stated on the transition date, and that were maintained for purposes of section 902 in the old functional currency, shall be translated into dollars at the spot rate in effect on the transition date. The applicable accumulated profits shall be reduced on a last-in, first-out basis by the aggregate dollar amount (translated from functional currency in accordance with the rules of section 989(b)) attributable to earnings and profits that were distributed (or treated as distributed) during the look-back period to the extent such amounts distributed exceed the earnings and profits calculated under (b)(4)(ii) or (b)(4)(iii), as applicable. See §1.902–1(b)(2)(ii). Once translated into dollars, these pre-1987 taxes and accumulated profits or deficits in accumulated profits shall (absent a change in functional currency) remain in dollars for all federal income tax purposes.

(ii) *Post-1986 undistributed earnings of a CFC.* In the case of a controlled foreign corporation (within the meaning of section 957 or section 953(c)(1)(B))(CFC) or a foreign corporation subject to the rules of §1.904–6(a)(2), the corporation's post-1986 undistributed earnings in each separate category as defined in §1.904–5(a)(1) as of the first day of the taxable year of change (and prior to adjustment under paragraph (c)(1) of this section) shall equal the sum of—

(A) The corporation's post-1986 undistributed earnings and profits (or deficit in earnings and profits) in each separate category as defined in §1.904–5(a)(1) as stated on the transition date translated into dollars at the spot rate in effect on the transition date; and

(B) The sum of the earnings and profits (or deficit in earnings and profits) in each separate category determined under § 1.985–3 for each post-transition date taxable year prior to the taxable year of change.

Such amount shall be reduced by the aggregate dollar amount (translated from functional currency in accordance with the rules of section 989(b)) attributable to earnings and profits that were distributed (or treated as distributed) during the look-back period out of post-1986 earnings and profits in such separate category. For purposes of applying this paragraph (b)(4)(ii)(B), the opening balance sheet for calculating earnings and profits under § 1.985–3 for the first post-transition year shall be translated into dollars pursuant to § 1.985–5(c).

(iii) *Post-1986 undistributed earnings of other foreign corporations.* In the case of a foreign corporation that is not a CFC or subject to the rules of § 1.904–6(a)(2), the corporation's post-1986 undistributed earnings shall equal the sum of—

(A) The corporation's post-1986 undistributed earnings (or deficit) on the transition date translated into dollars at the spot rate in effect on the transition date; and

(B) The sum of the earnings and profits (or deficit in earnings and profits) determined under § 1.985–3 for each post-transition date taxable year (or such later year determined under section 902(c)(3)(A)) prior to the taxable year of change.

Such amount shall be reduced by the aggregate dollar amount (translated from functional currency in accordance with the rules of section 989(b)) that was distributed (or treated as distributed) during the look-back period out of post-1986 earnings and profits. For purposes of applying this paragraph (b)(4)(iii)(B), the opening balance sheet for calculating earnings and profits under § 1.985–3 for the first post-transition year shall be translated into dollars pursuant to § 1.985–5(c).

(c) *United States shareholders of controlled foreign corporations*—(1) *In general.* A United States shareholder (within the meaning of section 951(b) or section 953(c)(1)(B)) of a CFC that changes to DASTM shall make the adjustments set forth in paragraphs (c)(2) through (5) of this section on the first day of the taxable year of change. Adjustments under this section shall be taken into account by the shareholder (or such shareholder s successor in interest) ratably over four taxable years beginning with the taxable year of change. Similar rules shall apply in determining adjustments to income of United States persons who have made an election under section 1295 to treat a passive foreign investment company as a qualified electing fund.

(2) *Treatment under subpart F of income recognized on section 988 transactions.* The character of amounts taken into account under paragraph (b)(2) of this section for purposes of sections 951 through 964, shall be determined on the transition date and to the extent characterized as subpart F income shall be taken into account in accordance with the rules of paragraph (c)(1) of this section. Such amounts shall retain their character for all federal income tax purposes (including sections 902, 959, 960, 961, 1248, and 6038).

(3) *Recognition of foreign currency gain or loss on previously taxed earnings and profits on the transition date.* Gain or loss is recognized under section 986(c) as if all previously taxed earnings and profits as determined on the transition date, if any, were distributed on such date. Such gain or loss shall be reduced by any foreign currency gain and increased by any foreign currency loss that was recognized under section 986(c) with respect to distributions of previously taxed earnings and profits during the look-back period. Such amount shall be characterized in accordance with section 986(c) and taken into account in accordance with the rules of paragraph (c)(1) of this section.

(4) *Subpart F income adjustment.* Subpart F income in a separate category shall be determined under § 1.985–3 for each look-back year. For this purpose, the opening DASTM balance sheet shall be determined under § 1.985–5. The sum of the difference (positive or negative) between the amount computed pursuant to § 1.985–3 and amount that was included in income for each year

shall be taken into account in the taxable year of change pursuant to paragraph (c)(1) of this section. Such amounts shall retain their character for all federal income tax purposes (including sections 902, 959, 960, 961, 1248, and 6038). For rules applicable if an adjustment under this section results in a loss for the taxable year in a separate category, see section 904(f) and the regulations thereunder. The amount of previously taxed earnings and profits as determined under section 959(c)(2) shall be adjusted (positively or negatively) by the amount taken into account under this paragraph (c)(4) as of the first day of the taxable year of change.

(5) *Foreign tax credit.* A United States shareholder of a CFC shall compute an amount of foreign taxes deemed paid under section 960 with respect to any positive adjustments determined under paragraph (c) of this section. The amount of foreign tax deemed paid shall be computed with reference to the full amount of the adjustment and to the post-1986 undistributed earnings determined under paragraph (b)(4) (i) and (ii) of this section and the post-1986 foreign income taxes of the CFC on the first day of the taxable year of change (i.e., without taking into account earnings and taxes for the taxable year of change). For purposes of section 960, the associated taxes in each separate category shall be allocated pro rata among, and deemed paid in, the shareholder's taxable years in which the income is taken into account. (No adjustment to foreign taxes deemed paid in prior years is required solely by reason of a negative adjustment to income under paragraph (c)(1) of this section).

(d) *QBU branches*—(1) *In general.* In the case of a QBU branch, the taxpayer shall make the adjustments set forth in paragraphs (d)(2) through (d)(4) of this section. Adjustments under this section shall be taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

(2) *Treatment of certain section 988 transactions*—(i) *Exchange gain or loss from section 988 transactions unrealized as of the transition date.* A QBU branch shall adjust income by the amount of any unrealized exchange gain or loss that was attributable to a section 988 transaction (as defined in sections 988(c)(1) (A), (B), and (C)) that was denominated in terms of (or determined by reference to) the dollar and was held by the QBU branch on the transition date. Such gain or loss shall be computed as if recognized on the transition date and shall be reduced by any gain and increased by any loss recognized by the QBU branch with respect to such transaction during the look-back period. The amount of such gain or loss shall be determined without regard to the limitations of section 988(b) (i.e., whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988. Proper adjustments shall be made to account for gain or loss taken into account by reason of this paragraph (d)(2). See §1.985–5(f) *Example 1, footnote 1.*

(ii) *Treatment of a section 988 transaction entered into and terminated during the look-back period.* A QBU branch shall reduce income by the amount of any gain, and increase income by the amount of any loss, that was recognized with respect to any dollar denominated section 988 transactions entered into and terminated during the look-back period.

(3) *Deemed termination income adjustment.* The taxpayer shall realize gain or loss attributable to the QBU branch's equity pool (as stated on the transition date) under the principles of section 987, computed as if the branch terminated on the transition date. Such amount shall be reduced by section 987 gain and increased by section 987 loss that was recognized by such taxpayer with respect to remittances during the look-back period.

(4) *Branch income adjustment.* Branch income in a separate category shall be determined under §1.985–3 for each look-back year. For this purpose, the opening DASTM balance sheet shall be determined under §1.985–5. The sum of the difference (positive or negative) between the amount computed pursuant to §1.985–3 and amount taken into account for each year shall be taken into account in the taxable year of change pursuant to paragraph (d)(1) of this section. Such amounts shall retain their

character for all federal income tax purposes.

(5) *Opening balance sheet.* The opening balance sheet of a QBU branch for the taxable year of change shall be determined as if the branch had changed its functional currency to the dollar by applying § 1.985–5(c) on the transition date and had translated its assets and liabilities acquired and incurred during the look-back period under § 1.985–3.

(e) *Effective date.* This section is effective for taxable years beginning after April 6, 1998. However, a taxpayer may choose to apply this section to all open taxable years beginning after December 31, 1986, provided each person, and each QBU branch of a person, that is related (within the meaning of § 1.985–2(d)(3)) to the taxpayer also applies this section.

[T.D. 8765, 63 FR 10774, Mar. 5, 1998]

§ 1.985–8T Special rules applicable to the European Monetary Union (conversion to the euro) (temporary).

(a) *Definitions*—(1) *Legacy currency.* A legacy currency is the national currency of a participating member state of the European Union used prior to the substitution of the euro for the national currency of that state in accordance with the Treaty on European Union signed February 7, 1992. The term legacy currency shall also include the European Currency Unit.

(2) *Conversion rate.* The conversion rate is the rate at which the euro is substituted for a legacy currency.

(b) *Operative rules*—(1) *Initial adoption.* A QBU (as defined in § 1.989(a)–1(b)) whose first taxable year begins after the euro has been substituted for a legacy currency may not adopt that legacy currency as its functional currency.

(2) *QBU with a legacy functional currency*—(i) *Required change.* A QBU with a legacy currency as its functional currency is required to change its functional currency to the euro beginning the first day of the first taxable year:

(A) That begins on or after the day that the euro is substituted for that legacy currency (in accordance with the Treaty on European Union); and

(B) In which the QBU begins to maintain its books and records (as described in § 1.989(a)–1(d)) in the euro.

(ii) Notwithstanding paragraph (b)(2)(i) of this section, a QBU with a legacy currency as its functional currency is required to change its functional currency to the euro no later than the last taxable year beginning on or before the first day such legacy currency is no longer valid legal tender.

(iii) *Consent of Commissioner.* A change made pursuant to paragraph (b)(2)(i) of this section shall be deemed to be made with the consent of the Commissioner for purposes of § 1.985–4. A QBU changing its functional currency to the euro pursuant to this paragraph (b)(2) must make adjustments as provided in paragraph (c) of this section.

(3) *Statement to file upon change.* With respect to a QBU that changes its functional currency to the euro under paragraph (b)(2) of this section, an affected taxpayer shall attach to its return for the taxable year of change a statement that includes the following: ‘‘TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS CHANGED ITS FUNCTIONAL CURRENCY TO THE EURO PURSUANT TO TREAS. REG. § 1.985–8T.’’ For purposes of this paragraph (b)(3), an affected taxpayer shall be in the case where the QBU is: a QBU of an individual U.S. resident (as a result of the activities of such individual), the individual; a QBU branch of a U.S. corporation, the corporation; a controlled foreign corporation (as described in section 957)(or QBU branch thereof), each United States shareholder (as described in section 951(b)); a partnership, each partner separately; a noncontrolled section 902 corporation (as described in section 904(d)(2)(E)) (or branch thereof), each domestic shareholder as described in § 1.902–1(a)(1); or a trust or estate, the fiduciary of such trust or estate.

(c) *Adjustments required*—(1) *In general.* A QBU that changes its functional currency to the euro pursuant to paragraph (b) of this section must make the adjustments described in paragraphs (c)(2) through (5) of this section. Section 1.985–5 shall not apply.

(2) *Determining the euro basis of property and the euro amount of liabilities and other relevant items.* The euro basis in property and the euro amount of liabilities and other relevant items shall

equal the product of the legacy functional currency adjusted basis or amount of liabilities multiplied by the applicable conversion rate.

(3) *Taking into account exchange gain or loss on legacy currency section 988 transactions*—(i) *In general.* Except as provided in paragraphs (c)(3) (iii) and (iv) of this section, a legacy currency denominated section 988 transaction (determined after applying section 988(d)) outstanding on the last day of the taxable year immediately prior to the year of change shall continue to be treated as a section 988 transaction after the change and the principles of section 988 shall apply.

(ii) *Examples.* The application of this paragraph (c)(3) may be illustrated by the following examples:

Example 1. X, a calendar year QBU on the cash method of accounting, uses the deutschmark as its functional currency. X is not described in section 1281(b). On July 1, 1998, X converts 10,000 deutschmarks(DM) into Dutch guilders(fl) at the spot rate of fl 1 = DM1 and loans the 10,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on June 30, 1999. On January 1, 1999, X changes its functional currency to the euro pursuant to this section. The euro/deutschmark conversion rate is set by the European Council at 1= DM2. The euro/guilder conversion rate is set at 1 = fl 2.25. Accordingly, under the terms of the note, on June 30, 1999, X will receive 4444.44 (fl10,000/2.25) of principal and 444.44 (fl 1,000/2.25) of interest. Pursuant to this paragraph (c)(3), X will realize an exchange loss on the principal computed under the principles of § 1.988–2(b)(5). For this purpose, the exchange rate used under § 1.988–2(b)(5)(i) shall be the guilder/euro conversion rate. The amount under § 1.988–2(b)(5)(ii) is determined by translating the fl 10,000 at the guilder/deutschmark spot rate on July 1, 1998, and translating that deutschmark amount into euros at the deutschmark/euro conversion rate. Thus, X will compute an exchange loss for 1999 of 555.56 determined as follows: [4444.44 (fl 10,000/2.25)– 5000 ((fl 10,000/1)/2) =– 555.56]. Pursuant to this paragraph (c)(3), the character and source of the loss are determined pursuant to section 988 and regulations thereunder. Because X uses the cash method of accounting for the interest on this debt instrument, X does not realize exchange gain or loss on the receipt of that interest.

Example 2. (i) X, a calendar year QBU on the accrual method of accounting, uses the deutschmark as its functional currency.

On February 1, 1998, X converts 12,000 deutschmarks into Dutch guilders at the spot rate of fl 1 = DM1 and loans the 12,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on January 31, 1999. In addition, assume the average rate (deutschmark/guilder) for the period from February 1, 1998, through December 31, 1998 is fl 1.07 = DM1. Pursuant to § 1.988–2(b)(2)(ii)(C), X will accrue eleven months of interest on the note and recognize interest income of DM1028.04 (fl 1100/1.07) in the 1998 taxable year.

(ii) On January 1, 1999, the euro will replace the deutschmark as the national currency of Germany pursuant to the Treaty on European Union signed February 7, 1992. Assume that on January 1, 1999, X changes its functional currency to the euro pursuant to this section. The euro/deutschmark conversion rate is set by the European Council at 1 = DM2. The euro/guilder conversion rate is set at 1 = fl 2.25. In 1999, X will accrue one month of interest equal to 44.44 (fl 100/2.25). On January 31, 1999, pursuant to the note, X will receive interest denominated in euros of 533.33 (fl 1200/2.25). Pursuant to this paragraph (c)(3), X will realize an exchange loss in the 1999 taxable year with respect to accrued interest computed under the principles of § 1.988–2(b)(3). For this purpose, the exchange rate used under § 1.988–2(b)(3)(i) is the guilder/euro conversion rate and the exchange rate used under § 1.988–2(b)(3)(ii) is the deutschmark/euro conversion rate. Thus, with respect to the interest accrued in 1998, X will realize exchange loss of 25.13 under § 1.988–2(b)(3) as follows: [488.89 (fl 1100/2.25)– 514.02 (DM1028.04/2) = – 25.13]. With respect to the one month of interest accrued in 1999, X will realize no exchange gain or loss since the exchange rate when the interest accrued and the spot rate on the payment date are the same.

(iii) X will realize exchange loss of 666.67 on repayment of the loan principal computed in the same manner as in *Example 1* [5333.33 (fl 12,000/2.25)– 6000 fl 12,000/1)/2)]. The losses with respect to accrued interest and principal are characterized and sourced under the rules of section 988.

(iii) *Special rule for legacy nonfunctional currency.* The QBU shall realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to nonfunctional currency (as described in section 988(c)(1)(C)(ii)) that is denominated in a legacy currency as if the currency were disposed of on the last day of the taxable year immediately prior to the year of change. The character and source of the gain or loss are determined under section 988.

(iv) *Legacy currency denominated accounts receivable and payable*—(A) *In general.* A QBU may elect to realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a legacy currency denominated item described in section 988(c)(1)(B)(ii) as if the item were terminated on the last day of the taxable year ending prior to the year of change.

(B) *Time and manner of election.* With respect to a QBU that makes an election described in paragraph (c)(3)(iv)(A) of this section, an affected taxpayer (as described in paragraph (b)(3) of this section) shall attach a statement to its tax return for the taxable year ending immediately prior to the year of change which includes the following: ‘‘TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS ELECTED TO REALIZE CURRENCY GAIN OR LOSS ON LEGACY CURRENCY DENOMINATED ACCOUNTS RECEIVABLE AND PAYABLE UPON CHANGE OF FUNCTIONAL CURRENCY TO THE EURO.’’ A QBU making the election must do so for all legacy currency denominated items described in section 988(c)(1)(B)(ii).

(4) *Adjustments when a branch changes its functional currency to the euro*—(i) *Branch changing from a legacy currency to the euro in a taxable year during which taxpayer's functional currency is other than the euro.* If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is other than the euro, the branch's euro equity pool shall equal the product of the legacy currency amount of the equity pool multiplied by the applicable conversion rate. No adjustment to the basis pool is required.

(ii) *Branch changing from a legacy currency to the euro in a taxable year during which taxpayer's functional currency is the euro.* If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is the euro, the taxpayer shall realize gain or loss attributable to the branch's equity pool under the principles of section 987, computed as if the branch terminated on the last day prior to the year of change. Adjustments under this paragraph (c)(4)(ii) shall be taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

(5) *Adjustments to a branch's accounts when a taxpayer changes to the euro*—(i) *Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is other than the euro.* If a taxpayer changes its functional currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is other than the euro, the basis pool shall equal the product of the legacy currency amount of the basis pool multiplied by the applicable conversion rate. No adjustment to the equity pool is required.

(ii) *Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is the euro.* If a taxpayer changes its functional currency from a legacy currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is the euro, the taxpayer shall take into account gain or loss as determined under paragraph (c)(4)(ii) of this section.

(6) *Additional adjustments that are necessary when a corporation changes its*

functional currency to the euro. The amount of a corporation's euro currency earnings and profits and the amount of its euro paid-in capital shall equal the product of the legacy currency amounts of these items multiplied by the applicable conversion rate. The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also shall be translated into the euro at the conversion rate.

(d) *Effective date.* This section applies to tax years ending after July 29, 1998.

[T.D. 8776, 63 FR 40368, July 29, 1998; 63 FR 55333, Oct. 15, 1998]

§1.987–1 Profit and loss method of accounting for a qualified business unit of a taxpayer having a different functional currency from the taxpayer. [Reserved]

§1.987–2 Accounting for gain or loss on certain transfers of property. [Reserved]

§1.987–3 Termination. [Reserved]

§1.987–4 Special rules relating to QBU branches of foreign taxpayers. [Reserved]

§1.987–5 Transition rules for certain qualified business units using a profit and loss method of accounting for taxable years beginning before January 1, 1987.

(a) *Applicability*—(1) *In general.* This section applies to qualified business unit (QBU) branches of United States persons, whose functional currency (as defined in section 985 of the Code and the regulations thereunder) is other than the United States dollar (dollar) and that used a profit and loss method of accounting for their last taxable year beginning before January 1, 1987. Generally, a profit and loss method of accounting is any method of accounting under which the taxpayer calculates the profits of a QBU branch in its functional currency and translates the net result into dollars. For all taxable years beginning after December 31, 1986, such QBU branches must use the profit and loss method of accounting as described in section 987, except to the extent otherwise provided in regulations under section 985 or any other provision of the Code. See §1.989(c)–1 regarding transition rules for QBU branches of United States persons that have a nondollar functional currency and that used a net worth method of accounting for their last taxable year beginning before January 1, 1987.

(2) *Insolvent QBU branches.* A taxpayer may apply the principles of this section to a QBU branch that used a profit and loss method of accounting for its last taxable year beginning before January 1, 1987, whose $E pool (as defined in paragraph (d)(3)(i) of this section) is negative. For taxable years beginning on or after October 25, 1991, the principles of this section shall apply to insolvent QBU branches.

(b) *General rules.* Generally, section 987 gain or loss occurs when a QBU branch makes a remittance. A remittance is considered to be made from one or more functional currency pools under rules provided in paragraph (c) of this section. In general, the amount of section 987 gain or loss from a remittance equals the difference between the dollar value of the functional currency adjusted basis of the property remitted and the portion of the dollar basis in the applicable pool. Section 987 gain or loss is calculated under a 4-step procedure described in paragraph (d) of this section. Section 987 gain or loss attributable to a remittance is realized and must be recognized in the taxable year of the remittance except to the extent otherwise provided in regulations.

(c) *Determining the pool(s) from which a remittance is made*—(1) *Remittances made during taxable years beginning after December 31, 1986, and before October 25, 1991.* A remittance made during taxable years beginning after December 31, 1986 and before October 25, 1991, first represents an amount of the QBU branch's post-86 profits pool (including functional currency profits for the current taxable year determined without regard to remittances made during the current year). To the extent the functional currency amount of the remittance exceeds the post-86 profits pool, it is considered to come out of the EQ pool. Paragraph (d)(2) of this section describes the EQ pool and the post-86 profits pool.

(2) *Remittances made in taxable years beginning on or after October 25, 1991.* For remittances made in taxable years beginning on or after October 25, 1991, the post-86 profits and EQ pools are combined into one pool called the equity pool. Therefore, remittances made during those taxable years will only come from the equity pool. The dollar basis of, and section 987 gain or loss on, such remittances shall be calculated utilizing the principles set forth in paragraphs (d)(4) and (5) of this section.

(d) *Calculation of section 987 gain or loss*—(1) *In general.* This paragraph (d) describes the 4-step procedure for calculating section 987 gain or loss.

(2) *Step 1—Calculate the amount of the functional currency pools*—(i) *EQ pool*—(A) *Beginning pool.* The beginning amount of the EQ pool is equal to the functional currency adjusted bases of a QBU branch's assets less the functional currency amount of the QBU branch's liabilities at the end of the taxpayer's last taxable year beginning before January 1, 1987, as these amounts are determined under the rules of paragraphs (e) and (f) of the section. The district director may allow for additional adjustments to the beginning amount of the EQ pool to prevent the recognition of section 987 gain or loss due to factors unrelated to the movement of exchange rates.

(B) *Adjusting the EQ pool.* The EQ pool is increased by the functional currency amount of any transfer (as determined under section 987) to the QBU branch made during the current taxable year or any prior taxable year beginning after December 31, 1986. If the transfer is made in a nonfunctional currency, this amount is translated into the QBU branch's functional currency at the spot rate (determined under the principles of section 988 and the regulations thereunder) on the date of the transfer. The method for determining the rate must be applied consistently each quarter. The EQ pool is decreased by the functional currency amount of any remittance (as determined under section 987) made during a prior taxable year beginning after December 31, 1986, that is considered remitted from the EQ pool under paragraph (c) of this section. The EQ pool must also be decreased by any transfer from the QBU branch that is not a remittance.

(ii) *Post-86 profits pool.* The amount of a QBU branch's post-86 profits pool is calculated at the end of each taxable year beginning after December 31, 1986. The opening balance of the post-86 profits pool at the beginning of the first taxable year beginning after December 31, 1986, is zero. The post-86 profits pool is increased by the functional currency amount of the QBU branch's profits (determined under section 987) for the taxable year. The post-86 profits pool is decreased by the functional currency amount of the QBU branch's losses (determined under section 987) for the taxable year and the amount of any remittances by the QBU branch during the taxable year from the post-86 profits pool as provided under paragraph (c) of this section.

(iii) *Adjustments to the equity pool.* For remittances made in taxable years beginning on or after October 25, 1991 under paragraph (c)(2) of this section, the post-86 profits and EQ pools are combined into one pool called the equity pool. Additions to and subtractions from the equity pool shall be made utilizing the principles of paragraphs (d)(2)(i)(B) and (ii) of this section. For example, remittances shall reduce the equity pool.

(3) *Step 2—Calculate the dollar basis of the pools*—(i) *Dollar basis of the EQ pool*—(A) *Beginning dollar basis.* The beginning dollar basis of the EQ pool (hereinafter referred to as the $E pool) equals:

(*1*) The dollar amount of all the QBU branch's profits reported on the taxpayer's income tax returns for taxable years beginning before January 1, 1987, plus the total dollar amount of all transfers to the QBU branch during that period (properly reflected on the taxpayer's books), less

(*2*) The dollar amount of all the QBU branch's losses reported on the taxpayer's income tax returns for such years, and the total dollar basis of all remittances and all transfers made by the QBU branch during that period (properly reflected on the taxpayer's books).

A QBU branch’s profits and losses shall be properly adjusted for foreign taxes of the QBU branch.

(B) *Adjusting the $E pool.* The $E pool is increased by the dollar amount of any transfers to the QBU branch made during the current taxable year or any prior taxable year beginning after December 31, 1986. If a transfer is made in a currency other than the dollar, the amount of the currency is translated into dollars at the spot rate (determined under the principles of section 988 and the regulations thereunder) on the date of the transfer. The $E pool is decreased by the dollar basis of any remittance made during a prior taxable year beginning after December 31, 1986, that is considered remitted from the $E pool under paragraphs (c) and (d)(4) of these section. The $E pool is also reduced by the amount of a transfer (other than a remittance) from the QBU branch translated into dollars at the spot rate (determined under the principles of section 988 and the regulations thereunder) on the date of the transfer. The method for determining the spot rate must be applied consistently to all transfers to and from a QBU branch.

(ii) *Dollar basis of the post-86 profits pool.* The amount of a QBU branch’s dollar basis in the post-86 profits pool (the $P pool) is calculated at the end of each taxable year beginning after December 31, 1986. The opening balance of the $P pool at the beginning of the first taxable year beginning after December 31, 1986, is zero. The $P pool is increased by the functional currency amount of the QBU branch’s profits (determined under section 987) for the taxable year translated into dollars at the weighted average exchange rate (as defined in §1.989 (b)–1) for the year. The $P pool is decreased by the functional currency amount of the QBU branch’s losses (determined under section 987) for the taxable year translated into dollars at the weighted average exchange rate for the year and by the dollar basis of any remittances made by the QBU branch during the taxable year from the post-86 profits pool under paragraph (c)(1) of this section.

(iii) *Combination of the $E and the $P pools.* For taxable years beginning on or after October 25, 1991 the $P and the $E pools are combined into one pool called the basis pool. Additions to and subtractions from the basis pool shall be made utilizing the principles set forth in paragraphs (d)(3)(i) and (ii) of this section.

(4) *Step 3—Calculation of the dollar basis of a remittance.* For all taxable years beginning after December 31, 1986, the dollar basis of a remittance is calculated using the following formula:

$$\frac{\text{Amount of remittance (in QBC branch' s functional currency) from the applicable pool (EQ, post-86 profits, or equity pool)}}{\text{Balance of the applicable pool (EQ, post-86 profits or equity pool) reduced by prior remittances}} \times \text{The dollar basis of the applicable pool (\$E, \$P, or basis pool) reduced by prior remittances}$$

(5) *Step 4—Calculation of the section 987 gain or loss on a remittance.* Section 987 gains or loss equals the difference between—

(i) The dollar amount of the remittance, and

(ii) The dollar basis of the remittance as calculated under paragraph (d)(4) of this section.

(e) *Functional currency adjusted basis of QBU branch assets acquired in taxable years beginning before January 1, 1987*—(1) *Basis of asset.* For taxable years beginning after December 31, 1986, the functional currency adjusted basis of a QBU branch asset acquired in a taxable year beginning before January 1, 1987, is the functional currency basis of the asset at the date of acquisition, as adjusted according to United States tax principles. The functional currency adjusted basis of an asset for which a functional currency basis was not determined at the date of acquisition is the nonfunctional currency basis of the asset at the date of acquisition multiplied by the spot exchange rate on the date of acquisition, as adjusted according to United States tax principles.

(2) *Adjustment to basis of asset.* Any future adjustments to the functional currency adjusted basis of such an asset are determined with respect to the appropriate functional currency adjusted basis of the asset as determined under this paragraph (e).

(f) *Functional currency amount of QBU branch liabilities acquired in taxable years beginning before January 1, 1987.* For the first taxable year beginning after December 31, 1986, the amount of a QBU branch liability incurred in a taxable year beginning before January 1, 1987, is the functional currency amount of the liability at the date incurred, as adjusted according to United States tax principles. The functional currency amount of a liability for which a functional currency amount was not determined at the date incurred is the nonfunctional currency amount of the liability at the date incurred multiplied by the spot exchange rate on the date incurred, as adjusted according to the United States tax principles.

(g) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1—(i) *Facts.* U.S. is a domestic corporation. B, a QBU branch of U.S., operates in country X and was established in 1985. B's functional currency is the FC. U.S. is on a calendar taxable year and, prior to January 1, 1987, accounted for the operations of B by the profit and loss method of accounting as set forth in Rev. Rul. 75–107, 1975–1 C.B. 32. B's books and records were kept according to United States tax principles. B received a transfer of $2,000 in 1985, and had profits of $3,000 in 1985 and $5,000 in 1986. B made a remittance in 1986, the dollar basis of which was $1,000. As of December 31, 1986, the adjusted basis of B's functional currency assets exceeded the functional currency amount of its liabilities by 15,000 FC (the beginning pool of EQ). Under section 987, B has profits of 8,000 FC in 1987, which are worth $1,000 when translated at the weighted average exchange rate for 1987 as required by sections 987(2) and 989(b)(4). B has no profits or loss in 1988. There are no transfers to B in 1987 and 1988. B remits 18,000 FC in 1988. Under section 987, the appropriate exchange rate for the 1988 remittance is 10 FC/$1.

(ii) *Calculation of section 987 loss on remittance*—(A) *Post-86 profits.* Under paragraph (c)(i) of this section, the 18,000 FC remittance comes first out of the post-86 profits pool (8,000 FC) and second out of EQ (10,000 FC). The loss on the 1988 remittance out of the post-86 profits pool equals:

Dollar value of post-86 profits remitted − Dollar basis of post-86 profits remitted= (8,000 FC × 10 FC/$1) − $1,000 = $800 − $1,000 = ≤$200> loss.

(B) *EQ.* Under paragraph (d) of this section, U.S. calculates 987 gain or loss on the 10,000 FC remittance of EQ from B as follows:

Step 1. The total EQ pool equals 15,000 FC (the functional currency adjusted bases of its assets less the functional currency amount of its liabilities as of December 31, 1986). There are no adjustments necessary under paragraph (d)(2)(i)(B) of this section.

Step 2. The $E pool is $9,000 (the $2,000 transfer in 1985 plus profits of $3,000 in 1985 and $5,000 in 1986 and less than $1,000 basis of the 1986 remittance). There are no adjustments necessary under paragraph (d)(3)(i)(B) of this section.

Step 3. The entire 10,000 FC remittance is deemed to come out of EQ.

Step 4. The dollar basis of the EQ remitted equals: N x $E determined under paragraph (d)(3)(i)=

$$\frac{10{,}000\ \text{FC}}{15{,}000\ \text{FC}} \times \$9{,}000 = \$6{,}000$$

Where:

$$\text{N} = \frac{\text{Portion of remittance out of EQ}}{\begin{array}{c}\text{EQ balance determined under paragraph}\\ \text{(d)(2)(i) of this section}\end{array}}$$

Step 5. Section 987 loss of U.S. on remittance equals:

Dollar value of the EQ remitted − Dollar basis of the EQ remitted = (10,000 FC × 10 FC/$1) − $6,000 = $1,000 − $6,000 = ≤$5,000> loss.

(C) *Total loss on remittance.* The total combined loss on the remittance is ′$5,200>. The total of amounts determined in paragraphs (ii)(A) and (B) of this Example 1.

Example 2—(i) *Facts.* D is a domestic corporation. B, a QBU branch of D, operates in country X. B's functional currency is the FC. At the end of B's last taxable year beginning before October 25, 1991, B's EQ pool equals 15,000 FC and B's post-86 profits pool equals 8,000 FC. B's $E amount equals $9,000, and the $P pool equals $1,000. In B's first taxable year beginning on or after October 25, 1991, B remits 18,000 FC. Under section 987, the appropriate exchange rate for this remittance is 10FC:$1.

(ii) *Computation of the equity pool.*

15,000 FC (EQ pool) + 8,000 FC (post-86 profits pool) = 23,000 FC (equity pool)

(iii) *Computation of the basis pool.*

$$\$9{,}000\text{ (\$E amount)} + \$1{,}000\text{ (\$P amount)} = \$10{,}000$$

(iv) *Dollar basis in remittance.*

$$\frac{18{,}000\text{ FC (amount of remittance)}}{23{,}000\text{ FC (equity pool)}} \times \$10{,}000 = \$7{,}826$$

(v) *Computation of section 987 loss by U.S. on remittance.*

$$\$1{,}800\text{ (dollar value of remittance)} - \$7{,}826\text{ (dollar basis in remittance)} =<\$6{,}026> \\ \text{(loss on remittance)}$$

(h) *Character and source of section 987 gain or loss.* Section 987 gain or loss is sourced and characterized as provided by section 987 and regulations issued under that section.

[T.D. 8367, 56 FR 48434, Sept. 25, 1991; 56 FR 65684, Dec. 18, 1991]

§1.988–0 Taxation of gain or loss from a section 988 transaction; Table of Contents.

This section lists captioned paragraphs contained in §§1.988–1 through 1.988–5.

§1.988–1 Certain definitions and special rules.

(a) Section 988 transaction.

(1) In general.

(2) Description of transactions.

(3)–(5) [Reserved]

(6) Examples.

(7) Special rules for regulated futures contracts and non-equity options.

(8) Special rules for qualified funds.

(9) Exception for certain transactions entered into by an individual.

(10) Intra-taxpayer transactions.

(11) Authority of Commissioner to include or exclude transactions from section 988.

(b) Spot contract.

(c) Nonfunctional currency.

(d) Spot rate.

(1) In general.

(2) Consistency required in valuing transactions subject to section 988.

(3) Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.

(4) Currency where an official government established rate differs from a free market rate.

(e) Exchange gain or loss.

(f) Hyperinflationary currency.

(g) Fair market value.

(h) Interaction with sections 1092 and 1256 in examples.

(i) Effective date.

§1.988–2 Recognition and computation of exchange gain or loss.

(a) Disposition of nonfunctional currency.

(1) Recognition of exchange gain or loss.

(2) Computation of exchange gain or loss.

(b) Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments.

(1) Translation of interest income received with respect to a nonfunctional currency demand account.

(2) Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in §1.988–1(a)(1)(ii) and (2)(i).

(3) Exchange gain or loss recognized by the holder with respect to accrued interest income.

(4) Exchange gain or loss recognized by the obligor with respect to accrued interest expense.

(5) Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.

(6) Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.

(7) Payment ordering rules.

(8) Limitation of exchange gain or loss on payment or disposition of a debt instrument.

(9) Examples.

(10) Treatment of bond premium.

(11) Market discount.

(12) Tax exempt bonds.

(13) Nonfunctional currency debt exchanged for stock of obligor.
(14)–(15) [Reserved]
(16) Coordination with section 267 regarding debt instruments.
(17) Coordination with installment method under section 453.
(c) Item of expense or gross income or receipts which is to be paid or received after the date accrued.
(1) In general.
(2) Determination of exchange gain or loss with respect to an item of gross income or receipts.
(3) Determination of exchange gain or loss with respect to an item of expense.
(4) Examples.
(d) Exchange gain or loss with respect to forward contracts, futures contracts and option contracts.
(1) Scope.
(2) Realization of exchange gain or loss.
(3) Recognition of exchange gain or loss.
(4) Determination of exchange gain or loss.
(5) [Reserved]
(e) Currency swaps and notional principal contracts.
(1) Notional principal contract denominated in a single nonfunctional currency.
(2) Special rules for currency swaps.
(3) Amortization of swap premium or discount in the case of off market swaps.
(4) Treatment of taxpayer disposing of a currency swap.
(5) Examples.
(6) Special effective date for rules regarding currency swaps.
(7) [Reserved]
(f) Substance over form.
(1) In general.
(2) Example.
(g) Effective date.

§ 1.988–3 Character of exchange gain or loss.

(a) In general.
(b) Election to characterize exchange gain or loss on certain identified forward contracts, futures contracts and option contracts as capital gain or loss.
(1) In general.
(2) Special rule for contracts that become part of a straddle after the election is made.
(3) Requirements for making the election.
(4) Verification.
(5) Independent verification.
(6) Effective date.
(c) Exchange gain or loss treated as interest.
(1) In general.
(2) Exchange loss realized by the holder on nonfunctional currency tax exempt bonds.
(d) Effective date.

§ 1.988–4 Source of gain or loss realized on a section 988 transaction.

(a) In general.
(b) Qualified business unit.
(1) In general.
(2) Proper reflection on the books of the taxpayer or qualified business unit.
(c) Effectively connected exchange gain or loss.
(d) Residence.
(1) In general.
(2) Exception.
(3) Partner in a partnership not engaged in a U.S. trade or business under section 864(b)(2).
(e) Special rule for certain related party loans.
(1) In general.
(2) United States person.
(3) Loans by related person.
(4) 10 percent owned foreign corporation.
(f) Exchange gain or loss treated as interest under § 1.988–3.
(g) Exchange gain or loss allocated in the same manner as interest under § 1.861–9T.
(h) Effective date.

§ 1.988–5 Section 988(d) hedging transactions.

(a) Integration of a nonfunctional currency debt instrument and a § 1.988–5(a) hedge.
(1) In general.
(2) Exception.
(3) Qualifying debt instrument.
(4) Section 1.988–5(a) hedge.
(5) Definition of integrated economic transaction.
(6) Special rules for legging in and legging out of integrated treatment.
(7) Transactions part of a straddle.
(8) Identification requirements.
(9) Taxation of qualified hedging transactions.
(10) Transition rules and effective dates.
(b) Hedged executory contracts.
(1) In general.
(2) Definitions.
(3) Identification rules.
(4) Effect of hedged executory contract.
(5) References to this paragraph (b).
(c) Hedges of period between trade date and settlement date on purchase or sale of publicly traded stock or security.
(d) [Reserved]
(e) Advance rulings regarding net hedging and anticipatory hedging systems.
(f) [Reserved]
(g) General effective date.

[T.D. 8400, 57 FR 9177, Mar. 17, 1992]

§ 1.988–1 Certain definitions and special rules.

(a) *Section 988 transaction*—(1) *In general.* The term ‘‘section 988 transaction’’ means any of the following transactions—

(i) A disposition of nonfunctional currency as defined in paragraph (c) of this section;

(ii) Any transaction described in paragraph (a)(2) of this section if any amount which the taxpayer is entitled to receive or is required to pay by reason of such transaction is denominated in terms of a nonfunctional currency or is determined by reference to the value of one or more nonfunctional currencies.

A transaction described in this paragraph (a) need not require or permit payment with a nonfunctional currency as long as any amount paid or received is determined by reference to the value of one or more nonfunctional currencies. The acquisition of nonfunctional currency is treated as a section 988 transaction for purposes of establishing the taxpayer's basis in such currency and determining exchange gain or loss thereon.

(2) *Description of transactions.* The following transactions are described in this paragraph (a)(2).

(i) *Debt instruments.* Acquiring a debt instrument or becoming an obligor under a debt instrument. The term ''debt instrument'' means a bond, debenture, note, certificate or other evidence of indebtedness.

(ii) *Payables, receivables, etc.* Accruing, or otherwise taking into account, for purposes of subtitle A of the Internal Revenue Code, any item of expense or gross income or receipts which is to be paid or received after the date on which so accrued or taken into account. A payable relating to cost of goods sold, or a payable or receivable relating to a capital expenditure or receipt, is within the meaning of this paragraph (a)(2)(ii). Generally, a payable relating to foreign taxes (whether or not claimed as a credit under section 901) is within the meaning of this paragraph (a)(2)(ii). However, a payable of a domestic person relating to accrued foreign taxes of its qualified business unit (QBU branch) is not within the meaning of this paragraph (a)(2)(ii) if the QBU branch's functional currency is the U.S. dollar and the foreign taxes are claimed as a credit under section 901.

(iii) *Forward contract, futures contract, option contract, or similar financial instrument.* Except as otherwise provided in this paragraph (a)(2)(iii) and paragraph (a)(4)(i) of this section, entering into or acquiring any forward contract, futures contract, option, warrant, or similar financial instrument.

(A) *Limitation for certain derivative instruments.* A forward contract, futures contract, option, warrant, or similar financial instrument is within this paragraph (a)(2)(iii) only if the underlying property to which the instrument ultimately relates is a nonfunctional currency or is otherwise described in paragraph (a)(1)(ii) of this section. Thus, if the underlying property of an instrument is another financial instrument (*e.g.*, an option on a futures contract), then the underlying property to which such other instrument (*e.g.*, the futures contract) ultimately relates must be a nonfunctional currency. For example, a forward contract to purchase wheat denominated in a nonfunctional currency, an option to enter into a forward contract to purchase wheat denominated in a nonfunctional currency, or a warrant to purchase stock denominated in a nonfunctional currency is not described in this paragraph (a)(2)(iii). On the other hand, a forward contract to purchase a nonfunctional currency, an option to enter into a forward contract to purchase a nonfunctional currency, an option to purchase a bond denominated in or the payments of which are determined by reference to the value of a nonfunctional currency, or a warrant to purchase nonfunctional currency is described in this paragraph (a)(2)(iii).

(B) *Nonfunctional currency notional principal contracts*—(*1*) *In general.* The term ''similar financial instrument'' includes a notional principal contract only if the payments required to be made or received under the contract are determined with reference to a nonfunctional currency.

(*2*) *Definition of notional principal contract.* The term ''notional principal contract'' means a contract (*e.g.*, a swap, cap, floor or collar) that provides for the payment of amounts by one party to another at specified intervals calculated by reference to a specified index upon a notional principal amount in exchange for specified consideration or a promise to pay similar amounts. For this purpose, a ''notional principal contract'' shall only include an instrument where the underlying property to which the instrument ultimately relates is money (*e.g.*, functional currency), nonfunctional currency, or property the value of which is determined by reference to an interest rate. Thus, the term ''notional principal contract'' includes a currency swap as defined in §1.988–2(e)(2)(ii), but does not include a swap referenced to a commodity or equity index.

(C) *Effective date with respect to certain contracts.* This paragraph (a)(2)(iii) does not apply to any forward contract, futures contract, option, warrant, or similar financial instrument entered into or acquired on or before October 21, 1988, if such instrument would have been marked to market under section 1256 if held on the last day of the taxable year.

(3)–(5) [Reserved]

(6) *Examples.* The following examples illustrate the application of paragraph (a) of this section. The examples assume that X is a U.S. corporation on an accrual method with the calendar year as its taxable year. Because X is a U.S. corporation the U.S. dollar is its functional currency under section 985. The examples also assume that section 988(d) does not apply.

Example 1. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X uses the 10,000 Canadian dollars to purchase inventory. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The disposition of the 10,000 Canadian dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 2. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X converts the 10,000 Canadian dollars to U.S. dollars. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The conversion of the 10,000 Canadian dollars to U.S. dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 3. On January 1, 1989, X borrows 100,000 British pounds (£) for a period of 10 years and issues a note to the lender with a face amount of £100,000. The note provides for payments of interest at an annual rate of 10% paid quarterly in pounds and has a stated redemption price at maturity of £100,000. X's becoming the obligor under the note is a section 988 transaction pursuant to paragraphs (a)(1)(ii) and (2)(i) of this section. Because X is an accrual basis taxpayer, the accrual of interest expense under X's note is a section 988 transaction pursuant to paragraphs (a)(1)(ii) and (2)(ii) of this section. In addition, the acquisition of the British pounds to make payments under the note is a section 988 transaction for purposes of establishing X's basis in such pounds, and the disposition of such pounds is a section 988 transaction under paragraph (a)(1)(i) of this section. See §1.988–2(b) with respect to the translation of accrued interest expense and the determination of exchange gain or loss upon payment of accrued interest expense.

Example 4. On January 1, 1989, X purchases an original issue for 74,621.54 British pounds (£) a 3-year bond maturing on December 31, 1991, at a stated redemption price of £100,000. The bond provides for no stated interest. The bond has a yield to maturity of 10% compounded semiannually and has £25,378.46 of original issue discount. The acquisition of the bond is a section 988 transaction as provided in paragraphs (a)(1)(ii) and (2)(i) of this section. The accrual of original issue discount with respect to the bond is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section. See §1.988–2(b) with respect to the translation of original issue discount and the determination of exchange gain or loss upon receipt of such amounts.

Example 5. On January 1, 1989, X sells and delivers inventory to Y for 10,000,000 Italian lira for payment on April 1, 1989. Under X's method of accounting, January 1, 1989 is the accrual date. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of gross receipts on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section.

Example 6. On January 1, 1989, X agrees to purchase a machine from Y for delivery on March 1, 1990 for 1,000,000 yen. The agreement calls for X to pay Y for the machine on June 1, 1990. Under X's method of accounting, the expenditure for the machine does not accrue until delivery on March 1, 1990. The agreement to purchase the machine is not a section 988 transaction. In particular, the agreement to purchase the machine is not described in paragraph (a)(2)(ii) of this section because the agreement is not an item of expense taken into account under subtitle A (but rather is an agreement to purchase a capital asset in the future). However, the payable that will arise on the delivery date is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section even though the payable relates to a capital expenditure. In addition, the disposition of yen to satisfy the payable on June 1, 1990, is a section 988 transaction under paragraph (a)(1)(i) of this section.

Example 7. On January 1, 1989, X purchases and takes delivery of inventory for 10,000 French francs with payment to be made on

April 1, 1989. Under X's method of accounting, the expense accrues on January 1, 1989. On January 1, 1989, X also enters into a forward contract with a bank to purchase 10,000 French francs for $2,000 on April 1, 1989. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of expense on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section. Entering into the forward contract to purchase the 10,000 French francs is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(iii) of this section.

Example 8. On January 1, 1989, X acquires 100,000 Norwegian krone. On January 15, 1989, X purchases and takes delivery of 1,000 shares of common stock with the 100,000 krone acquired on January 1, 1989. On August 1, 1989, X sells the 1,000 shares of common stock and receives 120,000 krone in payment. On August 30, 1989, X converts the 120,000 krone to U.S. dollars. The acquisition of the 100,000 krone on January 1, 1989, and the acquisition of the 120,000 krone on August 1, 1989, are section 988 transactions for purposes of establishing the basis of such krone. The disposition of the 100,000 krone on January 15, 1989, and the 120,000 krone on August 30, 1989, are section 988 transactions as provided in paragraph (a)(1)(i) of this section. Neither the acquisition on January 15, 1989, nor the disposition on August 1, 1989, of the stock is a section 988 transaction.

Example 9. On May 11, 1989, X purchases a one year note at original issue for its issue price of $1,000. The note pays interest in dollars at the rate of 4 percent compounded semiannually. The amount of principal received by X upon maturity is equal to $1,000 plus the equivalent of the excess, if any, of (a) the Financial Times One Hundred Stock Index (an index of stocks traded on the London Stock Exchange hereafter referred to as the FT100) determined and translated into dollars on the last business day prior to the maturity date, over (b) £2,150, the ''stated value'' of the FT100, which is equal to 110% of the average value of the index for the six months prior to the issue date, translated at the exchange rate of £1=$1.50. The purchase by X of the instrument described above is not a section 988 transaction because the index used to compute the principal amount received upon maturity is determined with reference to the value of stock and not nonfunctional currency.

Example 10. On April 9, 1989, X enters into an interest rate swap that provides for the payment of amounts by X to its counterparty based on 4% of a 10,000 yen principal amount in exchange for amounts based on yen LIBOR rates. Pursuant to paragraphs (a)(1)(ii) and (2)(iii) of this section, this yen for yen interest rate swap is a section 988 transaction.

Example 11. On August 11, 1989, X enters into an option contract for sale of a group of stocks traded on the Japanese Nikkei exchange. The contract is not a section 988 transaction within the meaning of §1.988–1(a)(2)(iii) because the underlying property to which the option relates is a group of stocks and not nonfunctional currency.

(7) *Special rules for regulated futures contracts and non-equity options*—(i) *In general.* Except as provided in paragraph (a)(7)(ii) of this section, paragraph (a)(2)(iii) of this section shall not apply to any regulated futures contract or non-equity option which would be marked to market under section 1256 if held on the last day of the taxable year.

(ii) *Election to have paragraph (a)(2)(iii) of this section apply.* Notwithstanding paragraph (a)(7)(i) of this section, a taxpayer may elect to have paragraph (a)(2)(iii) of this section apply to regulated futures contracts and non-equity options as provided in paragraphs (a)(7)(iii) and (iv) of this section.

(iii) *Procedure for making the election.* A taxpayer shall make the election provided in paragraph (a)(7)(ii) of this section by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled ''Election to Treat Regulated Futures Contracts and Non-Equity Options as Section 988 Transactions Under Section 988 (c)(1)(D)(ii)'' that contains the following:

(A) The taxpayer's name, address, and taxpayer identification number;

(B) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(C) A statement that the taxpayer (including all members of such person's affiliated group as defined in section 1504 or in the case of an individual all persons filing a joint return with such individual) elects to have section 988(c)(1)(D)(i) and §1.988–1(a)(7)(i) not apply;

(D) The date of the beginning of the taxable year for which the election is being made;

(E) If the election is filed after the first day of the taxable year, a statement regarding whether the taxpayer has previously held a contract described in section 988(c)(1)(D)(i) or

§ 1.988–1(a)(7)(i) during such taxable year, and if so, the first date during the taxable year on which such contract was held; and

(F) The signature of the person making the election (in the case of individuals filing a joint return, the signature of all persons filing such return).

The election shall be made by the following persons: in the case of an individual, by such individual; in the case of a partnership, by each partner separately; effective for taxable years beginning after March 17, 1992, in the case of tiered partnerships, each ultimate partner; in the case of an S corporation, by each shareholder separately; in the case of a trust (other than a grantor trust) or estate, by the fiduciary of such trust or estate; in the case of any corporation other than an S corporation, by such corporation (in the case of a corporation that is a member of an affiliated group that files a consolidated return, such election shall be valid and binding only if made by the common parent, as that term is used in § 1.1502–77(a)); in the case of a controlled foreign corporation, by its controlling United States shareholders under § 1.964–1(c)(3). With respect to a corporation (other than an S corporation), the election, when made by the common parent, shall be binding on all members of such corporation's affiliated group as defined in section 1504 that file a consolidated return. The election shall be binding on any income or loss derived from the partner's share (determined under the principles of section 702(a)) of all contracts described in section 988(c)(1)(D)(i) or paragraph (a)(7)(i) of this section in which the taxpayer holds a direct interest or indirect interest through a partnership or S corporation; however, the election shall not apply to any income or loss of a partnership for any taxable year if such partnership made an election under section 988(c)(1)(E)(iii)(V) for such year or any preceding year. Generally, a copy of the election must be attached to the taxpayer's income tax return for the first year it is effective. It is not required to be attached to subsequent returns. However, in the case of a partner, a copy of the election must be attached to the taxpayer's income tax return for every year during which the taxpayer is a partner in a partnership that engages in a transaction that is subject to the election.

(iv) *Time for making the election*—(A) *In general.* Unless the requirements for making a late election described in paragraph (a)(7)(iv)(B) of this section are satisfied, an election under section 988 (c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section for any taxable year shall be made on or before the first day of the taxable year or, if later, on or before the first day during such taxable year on which the taxpayer holds a contract described in section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section. The election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section shall apply to contracts entered into or acquired after October 21, 1988, and held on or after the effective date of the election. The election shall be effective as of the beginning of the taxable year and shall be binding with respect to all succeeding taxable years unless revoked with the prior consent of the Commissioner. In determining whether to grant revocation of the election, recapture of the tax benefit derived from the election in previous taxable years will be considered.

(B) *Late elections.* A taxpayer may make an election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section within 30 days after the time prescribed in the first sentence of paragraph (a)(7)(iv)(A) of this section. Such a late election shall be effective as of the beginning of the taxable year; however, any losses recognized during the taxable year with respect to contracts described in section 988(c)(1)(D)(ii) or paragraph (a)(7)(ii) of this section which were entered into or acquired after October 21, 1988, and held on or before the date on which the late election is mailed or otherwise delivered to the Internal Revenue Service Center shall not be treated as derived from a section 988 transaction. A late election must comply with the procedures set forth in paragraph (a)(7)(iii) of this section.

(v) *Transition rule.* An election made prior to September 21, 1989 which satisfied the requirements of Notice 88–124, 1988–51 I.R.B. 6, shall be deemed to satisfy the requirements of paragraphs (a)(7)(iii) and (iv) of this section.

(vi) *General effective date provision*. This paragraph (a)(7) shall apply with respect to futures contracts and options entered into or acquired after October 21, 1988.

(8) *Special rules for qualified funds*—(i) *Definition of qualified fund.* The term ‘‘qualified fund’’ means any partnership if—

(A) At all times during the taxable year (and during each preceding taxable year to which an election under section 988(c)(1)(E)(iii)(V) applied) such partnership has at least 20 partners and no single partner owns more than 20 percent of the interests in the capital or profits of the partnership;

(B) The principa1 activity of such partnership for such taxable year (and each such preceding taxable year) consists of buying and selling options, futures, or forwards with respect to commodities;

(C) At least 90 percent of the gross income of the partnership for the taxable year (and each such preceding year) consists of income or gains described in subparagraph (A), (B), or (G) of section 7704(d)(1) or gain from the sale or disposition of capital assets held for the production of interest or dividends;

(D) No more than a de minimis amount of the gross income of the partnership for the taxable year (and each such preceding taxable year) was derived from buying and selling commodities; and

(E) An election under section 988 (c)(1)(E)(iii)(V) as provided in paragraph (a)(8)(iv) of this section applies to the taxable year.

(ii) *Special rules relating to paragraph (a)(8)(i)(A) of this section*—(A) *Certain general partners.* The interest of a general partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section for any taxable year of the partnership if, for the taxable year of the partner in which such partnership's taxable year ends, such partner (and each corporation filing a consolidated return with such partner) had no ordinary income or loss from a section 988 transaction (other than income from the partnership) which is exchange gain or loss (as the case may be).

(B) *Treatment of incentive compensation.* For purposes of paragraph (a)(8)(i)(A) of this section, any income allocable to a general partner as incentive compensation based on profits rather than capital shall not be taken into account in determining such partner's interest in the profits of the partnership.

(C) *Treatment of tax exempt partners.* The interest of a partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirements of paragraph (a)(5)(8)(A) of this section if none of the income of such partner from such partnership is subject to tax under chapter 1 of subtitle A of the Internal Revenue Code (whether directly or through one or more pass-through entities).

(D) *Look-through rule.* In determining whether the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section is met with respect to any partnership, any interest in such partnership held by another partnership shall be treated as held proportionately by the partners in such other partnership.

(iii) *Other special rules*—(A) *Related persons.* Interests in the partnership held by persons related to each other (within the meaning of section 267(b) or 707(b)) shall be treated as held by one person.

(B) *Predecessors.* Reference to any partnership shall include a reference to any predecessor thereof.

(C) *Treatment of certain debt instruments.* Solely for purposes of paragraph (a)(8)(i)(D) of this section, any debt instrument which is described in both paragraphs (a)(1)(ii) and (2)(i) of this section shall be treated as a commodity.

(iv) *Procedure for making the election provided in section 988(c)(1)(E)(iii)(V).* A partnership shall make the election provided in section 988(c)(1)(E)(iii)(V) by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled ‘‘QUALIFIED FUND ELECTION UNDER SECTION 988(c)(1)(E)(iii)(V)’’ that contains the following:

(A) The partnership's name, address, and taxpayer identification number;

(B) The name, address and taxpayer identification number of the general partner making the election on behalf of the partnership;

(C) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(D) A brief description of the activity of the partnership;

(E) A statement that the partnership is making the election provided in section 988(c)(1)(E)(iii)(V);

(F) The date of the beginning of the taxable year for which the election is being made;

(G) If the election is filed after the first day of the taxable year, then a statement regarding whether the partnership previously held an instrument referred to in section 988(c)(1)(E)(i) during such taxable year and, if so, the first date during the taxable year on which such contract was held; and

(H) The signature of the general partner making the election.

The election shall be made by a general partner with management responsibility of the partnership's activities and a copy of such election shall be attached to the partnership's income tax return (Form 1065) for the first taxable year it is effective. It is not required to be attached to subsequent returns.

(v) *Time for making the election.* The election under section 988(c)(1)(E)(iii)(V) for any taxable year shall be made on or before the first day of the taxable year or, if later, on or before the first day during such year on which the partnership holds an instrument described in section 988(c)(1)(E)(i). The election under section 988(c)(1)(E)(iii)(V) shall apply to the taxable year for which made and all succeeding taxable years. Such election may only be revoked with the consent of the Commissioner. In determining whether to grant revocation of the election, recapture by the partners of the tax benefit derived from the election in previous taxable years will be considered.

(vi) *Operative rules applicable to qualified funds*—(A) *In general.* In the case of a qualified fund, any bank forward contract or any foreign currency futures contract traded on a foreign exchange which is not otherwise a section 1256 contract shall be treated as a section 1256 contract for purposes of section 1256.

(B) *Gains and losses treated as short-term.* In the case of any instrument treated as a section 1256 contract under paragraph (a)(8)(vi)(A) of this section, subparagraph (A) of section 1256(a)(3) shall be applied by substituting ''100 percent'' for ''40 percent'' (and subparagraph (B) of such section shall not apply).

(vii) *Transition rule.* An election made prior to September 21, 1989, which satisfied the requirements of Notice 88–124, 1988–51 I.R.B. 6, shall be deemed to satisfy the requirements of § 1.988–1(a)(8)(iv) and (v).

(viii) *General effective date rules*—(A) The requirements of subclause (IV) of section 988(c)(1)(E)(iii) shall not apply to contracts entered into or acquired on or before October 21, 1988.

(B) In the case of any partner in an existing partnership, the 20 percent ownership requirements of subclause (I) of section 988(c)(1)(E)(iii) shall be treated as met during any period during which such partner does not own a percentage interest in the capital or profits of such partnership greater than 33⅓ percent (or, if lower, the lowest such percentage interest of such partner during any period after October 21, 1988, during which such partnership is in existence). For purposes of the preceding sentence, the term ''existing partnership'' means any partnership if—

(*1*) Such partnership was in existence on October 21, 1988, and principally engaged on such date in buying and selling options, futures, or forwards with respect to commodities; or

(*2*) A registration statement was filed with respect to such partnership with the Securities and Exchange Commission on or before such date and such registration statement indicated that the principal activity of such partnership will consist of buying and selling instruments referred to in paragraph (a)(8)(viii)(B)(*1*) of this section.

(9) *Exception for certain transactions entered into by an individual*—(i) *In general.* A transaction entered into by an individual which otherwise qualifies as

a section 988 transaction shall be considered a section 988 transaction only to the extent expenses properly allocable to such transaction meet the requirements of section 162 or 212 (other than the part of section 212 dealing with expenses incurred in connection with taxes).

(ii) *Examples.* The following examples illustrate the application of paragraph (a)(9) of this section.

Example 1. X is a U.S. citizen who therefore has the U.S. dollar as his functional currency. On January 1, 1990, X enters into a spot contract to purchase 10,000 British pounds (£) for $15,000 for delivery on January 3, 1990. Immediately upon delivery, X acquires at original issue a pound denominated bond with an issue price of £10,000. The bond matures on January 3, 1993, pays interest in pounds at a rate of 10% compounded semi-annually, and has no original issue discount. Assume that all expenses properly allocable to these transactions would meet the requirements of section 212. Under §1.988–2(d)(1)(ii), entering into the spot contract on January 1, 1990, is not a section 988 transaction. The acquisition of the pounds on January 3, 1990, under the spot contract is a section 988 transaction for purposes of establishing X's basis in the pounds. The disposition of the pounds and the acquisition of the bond by X are section 988 transactions. These transactions are not excluded from the definition of a section 988 transaction under paragraph (a)(9) of this section because expenses properly allocable to such transactions meet the requirements of section 212.

Example 2. X is a U.S. citizen who therefore has the dollar as his functional currency. In preparation for X's vacation, X purchases 1,000 British pounds (£) from a bank on June 1, 1989. During the period of X's vacation in the United Kingdom beginning June 10, 1989, and ending June 20, 1989, X spends £500 for hotel rooms, £300 for food and £200 for miscellaneous vacation expenses. The expenses properly allocable to such dispositions do not meet the requirements of section 162 or 212. Thus, the disposition of the pounds by X on his vacation are not section 988 transactions.

(10) *Intra-taxpayer transactions*—(i) *In general.* Except as provided in paragraph (a)(10)(ii) of this section, transactions between or among the taxpayer and/or qualified business units of that taxpayer (‘‘intra-taxpayer transactions'') are not section 988 transactions. See section 987 and the regulations thereunder.

(ii) *Certain transfers.* Exchange gain or loss with respect to nonfunctional currency or any item described in paragraph (a)(2) of this section entered into with another taxpayer shall be realized upon an intra-taxpayer transfer of such currency or item where as the result of the transfer the currency or other such item—

(A) Loses its character as nonfunctional currency or an item described in paragraph (a)(2) of this section; or

(B) Where the source of the exchange gain or loss could be altered absent the application of this paragraph (a)(10)(ii).

Such exchange gain or loss shall be computed in accordance with §1.988–2 (without regard to §1.988–2(b)(8)) as if the nonfunctional currency or item described in paragraph (a)(2) of this section had been sold or otherwise transferred at fair market value between unrelated taxpayers. For purposes of the preceding sentence, a taxpayer must use the translation rate that it uses for purposes of computing section 987 gain or loss with respect to the QBU branch that makes the transfer. In the case of a gain or loss incurred in a transaction described in this paragraph (a)(10)(ii) that does not have a significant business purpose, the Commissioner, may defer such gain or loss.

(iii) *Example.* The following example illustrates the provisions of this paragraph (a)(10).

Example. (A) X, a corporation with the U.S. dollar as its functional currency, operates through foreign branches Y and Z. Y and Z are qualified business units as defined in section 989(a) with the LC as their functional currency. X computes Y's and Z's income under section 987 (relating to branch transactions). On November 12, 1988, Y transfers $25 to the home office of X when the fair market value of such amount equals LC120. Y has a basis of LC100 in the $25. Under paragraph (a)(10)(ii) of this section, Y realizes foreign source exchange gain of LC20 (LC120—LC100) as the result of the $25 transfer. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(B) If instead Y transfers the $25 to Z, exchange gain is not realized because the $25 is nonfunctional currency with respect to Z and if Z were to immediately convert the $25 into LCs, the gain would be foreign source. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(11) *Authority to include or exclude transactions from section 988*—(i) *In general.* The Commissioner may recharacterize a transaction (or series of transactions) in whole or in part as a section 988 transaction if the effect of such transaction (or series of transactions) is to avoid section 988. In addition, the Commissioner may exclude a transaction (or series of transactions) which in form is a section 988 transaction from the provisions of section 988 if the substance of the transaction (or series of transactions) indicates that it is not properly considered a section 988 transaction.

(ii) *Example.* The following example illustrates the provisions of this paragraph (a)(11).

Example. B is an individual with the U.S. dollar as its functional currency. B holds 500,000 Swiss francs which have a basis of $100,000 and a fair market value of $400,000 as of October 15, 1989. On October 16, 1989, B transfers the 500,000 Swiss francs to a newly formed U.S. corporation, X, with the dollar as its functional currency. On October 16, 1989, B sells the stock of X for $400,000. Assume the transfer to X qualified for nonrecognition under section 351. Because the sale of the stock of X is a substitute for the disposition of an asset subject to section 988, the Commissioner may recharacterize the sale of the stock as a section 988 transaction. The same result would obtain if B transferred the Swiss francs to a partnership and then sold the partnership interest.

(b) *Spot contract.* A spot contract is a contract to buy or sell nonfunctional currency on or before two business days following the date of the execution of the contract. See §1.988–2 (d)(1)(ii) for operative rules regarding spot contracts.

(c) *Nonfunctional currency.* The term ‘‘nonfunctional currency’’ means with respect to a taxpayer or a qualified business unit (as defined in section 989 (a)) a currency (including the European Currency Unit) other than the taxpayer's or the qualified business unit's functional currency as defined in section 985 and the regulations thereunder. For rules relating to nonrecognition of exchange gain or loss with respect to certain dispositions of nonfunctional currency, see §1.988–2 (a)(1)(iii).

(d) *Spot rate*—(1) *In general.* Except as otherwise provided in this paragraph, the term ‘‘spot rate’’ means a rate demonstrated to the satisfaction of the District Director or the Assistant Commissioner (International) to reflect a fair market rate of exchange available to the public for currency under a spot contract in a free market and involving representative amounts. In the absence of such a demonstration, the District Director or the Assistant Commissioner (International), in his or her sole discretion, shall determine the spot rate from a source of exchange rate information reflecting actual transactions conducted in a free market. For example, the taxpayer or the District Director or the Assistant Commissioner (International) may determine the spot rate by reference to exchange rates published in the pertinent monthly issue of ‘‘International Financial Statistics’’ or a successor publication of the International Monetary Fund; exchange rates published by the Board of Governors of the Federal Reserve System pursuant to 31 U.S.C. section 5151; exchange rates published in newspapers, financial journals or other daily financial news sources; or exchange rates quoted by electronic financial news services.

(2) *Consistency required in valuing transactions subject to section 988.* If the use of inconsistent sources of spot rate quotations results in the distortion of income, the District Director or the Assistant Commissioner (International) may determine the appropriate spot rate.

(3) *Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.* If consistent with the taxpayer's financial accounting, a taxpayer may utilize a spot rate convention determined at intervals of one quarter year or less for purposes of computing exchange gain or loss with respect to payables and receivables denominated in a nonfunctional currency that are incurred in the ordinary course of business with respect to the acquisition or sale of goods or the obtaining or performance of services. For example, if consistent with the taxpayer's financial accounting, a taxpayer may accrue all payables and receivables incurred during the month of January at the spot rate on December 31 or January 31 (or at an average of

any spot rates occurring between these two dates) and record the payment or receipt of amounts in satisfaction of such payables and receivables consistent with such convention. The use of a spot rate convention cannot be changed without the consent of the Commissioner.

(4) *Currency where an official government established rate differs from a free market rate*—(i) *In general.* If a currency has an official government established rate that differs from a free market rate, the spot rate shall be the rate which most clearly reflects the taxpayer's income. Generally, this shall be the free market rate.

(ii) *Examples.* The following examples illustrate the application of this paragraph (d)(4).

Example 1. X is an accrual method U.S. corporation with the dollar as its functional currency. X owns all the stock of a Country L subsidiary, CFC. CFC has the currency of Country L, the LC, as its functional currency. Country L imposes restrictions on the remittance of dividends. On April 1, 1990, CFC pays a dividend to X in the amount of LC100. Assume that the official governnent established rate is $1=LC1 and the free market rate, which takes into account the remittance restrictions and which is the rate that most clearly reflects income, is $1=LC4. On April 1, 1990, X donates the LC100 in a transaction that otherwise qualifies as a charitable contribution under section 170 (c). Both the amount of the dividend income and the deduction under section 170 is $25 (LC100 x the free market rate, $.25).

Example 2. X, a corporation with the U.S. dollar as its functional currency, operates in foreign country L through branch Y. Y is a qualified business unit as defined in section 989 (a). X computes Y's income under the dollar approximate separate transactions method as described in §1.985–3. The currency of L is the LC. X can purchase legally United States dollars ($) in L only from the L government. In order to take advantage of an arbitrage between the official and secondary dollar to LC exchange rates in L:

(i) X purchases LC100 for $60 in L on the secondary market when the official exchange rate is S1=LC1;

(ii) X transfers the LC100 to Y;

(iii) Y purchases $100 for LC100; and

(iv) Y transfers $65 ($100 less an L tax withheld of $35 on the transfer) to the home office of X.

Under paragraph (a)(7) of this section, the transfer of the LC100 by X to Y is a realization event. X has a basis of $60 in the LC100. Under these facts, the appropriate dollar to LC exchange rate for computing the amount realized by X is the official exchange rate. Therefore, X realizes $40 ($100–$60) of U.S. source gain from the transfer to Y. The same result would obtain if Y rather than X purchased the LC100 on the secondary market in L with $60 supplied by X, because the substance of this transaction is that X is performing the arbitrage.

(e) *Exchange gain or loss.* The term ''exchange gain or loss'' means the amount of gain or loss realized as determined in §1.988–2 with respect to a section 988 transaction. Except as otherwise provided in these regulations (*e.g.*, §1.98B–5), the amount of exchange gain or loss from a section 988 transaction shall be separately computed for each section 988 transaction, and such amount shall not be integrated with gain or loss recognized on another transaction (whether or not such transaction is economically related to the section 988 transaction). See §1.988–2 (b)(8) for a special rule with respect to debt instruments.

(f) *Hyperinflationary currency.* For the definition of hyperinflationary currency see §1.985–2 (b)(2). Unless otherwise provided, the currency in any example used in §§1.988–1 through 1.988–5 is not a hyperinflationary currency.

(g) *Fair market value.* The fair market value of an item shall, where relevant, reflect an appropriate premium or discount for the time value of money (*e.g.*, the fair market value of a forward contract to buy or sell nonfunctional currency shall reflect the present value of the difference between the units of nonfunctional currency times the market forward rate at the time of valuation and the units of nonfunctional currency times the forward rate set forth in the contract). However, if consistent with the taxpayer's method of financial accounting (and consistently applied from year to year), the preceding sentence shall not apply to a financial instrument that matures within one year from the date of issuance or acquisition. Unless otherwise provided, the fair market value given in any example used in §§1.988–1 through 1.988–5 is deemed to reflect appropriately the time value of money. If the use of inconsistent sources of forward or other market rate quotations results in the distortion of income, the

District Director or the Assistant Commissioner (International) may determine the appropriate rate.

(h) *Interaction with sections 1092 and 1256.* Unless otherwise provided, it is assumed for purposes of §§ 1.988–1 through 1.988–5 that any contract used in any example is not a section 1256 contract and is not part of a straddle as defined in section 1092. No inference is intended regarding the application of section 1092 or 1256 unless expressly stated.

(i) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

[T.D. 8400, 57 FR 9178, Mar. 17, 1992]

§ 1.988–2 Recognition and computation of exchange gain or loss.

(a) *Disposition of nonfunctional currency*—(1) *Recognition of exchange gain or loss*—(i) *In general.* Except as otherwise provided in this section, § 1.988–1(a)(7)(ii), and § 1.988–5, the recognition of exchange gain or loss upon the sale or other disposition of nonfunctional currency shall be governed by the recognition provisions of the Internal Revenue Code which apply to the sale or disposition of property (*e.g.*, section 1001 or, to the extent provided in regulations, section 1092). The disposition of nonfunctional currency in settlement of a forward contract, futures contract, option contract, or similar financial instrument is considered to be a sale or disposition of the nonfunctional currency for purposes of the preceding sentence.

(ii) *Clarification of section 1031.* An amount of one nonfunctional currency is not ‘‘property of like kind’’ with respect to an amount of a different nonfunctional currency.

(iii) *Coordination with section 988(c)(1)(C)(ii).* No exchange gain or loss is recognized with respect to the following transactions—

(A) An exchange of units of nonfunctional currency for different units of the same nonfunctional currency;

(B) The deposit of nonfunctional currency in a demand or time deposit or similar instrument (including a certificate of deposit) issued by a bank or other financial institution if such instrument is denominated in such currency;

(C) The withdrawal of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution if such instrument is denominated in such currency;

(D) The receipt of nonfunctional currency from a bank or other financial institution from which the taxpayer purchased a certificate of deposit or similar instrument denominated in such currency by reason of the maturing or other termination of such instrument; and

(E) The transfer of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution to another demand or time deposit or similar instrument denominated in the same nonfunctional currency issued by a bank or other financial institution.

The taxpayer's basis in the units of nonfunctional currency or other property received in the transaction shall be the adjusted basis of the units of nonfunctional currency or other property transferred. See paragraph (b) of this section with respect to the timing of interest income or expense and the determination of exchange gain or loss thereon.

(iv) *Example.* The following example illustrates the provisions of paragraph (a)(1)(iii) of this section.

Example. X is a corporation on the accrual method of accounting with the U.S. dollar as its functional currency. On January 1, 1989, X acquires 1,500 British pounds (£) for $2,250 (£1 = $1.50). On January 3, 1989, when the spot rate is £1 = $1.49, X deposits the £1,500 with a British financial institution in a non-interest bearing demand account. On February 1, 1989, when the spot rate is £1 = $1.45, X withdraws the £1,500. On February 5, 1989, when the spot rate is £1 = $1.42, X purchases inventory in the amount of £1,500. Pursuant to paragraph (a)(1)(iii) of this section, no exchange loss is realized until February 5, 1989, when X disposes of the £1,500 for inventory. At that time, X realizes exchange loss in the amount of $120 computed under paragraph (a)(2) of this section. The loss is not an adjustment to the cost of the inventory.

(2) *Computation of gain or loss*—(i) *In general.* Exchange gain realized from the sale or other disposition of nonfunctional currency shall be the excess of the amount realized over the adjusted basis of such currency, and exchange loss realized shall be the excess of the adjusted basis of such currency over the amount realized.

(ii) *Amount realized*—(A) *In general.* The amount realized from the disposition of nonfunctional currency shall be determined under section 1001(b). A taxpayer that uses a spot rate convention under §1.988–1(d)(3) to determine exchange gain or loss with respect to a payable shall determine the amount realized upon the disposition of nonfunctional currency paid in satisfaction of the payable in a manner consistent with such convention.

(B) *Exchange of nonfunctional currency for property.* For purpose of paragraph (a)(2) of this section, the exchange of nonfunctional currency for property (other than nonfunctional currency) shall be treated as—

(*1*) An exchange of the units of nonfunctional currency for units of functional currency at the spot rate on the date of the exchange, and

(*2*) The purchase or sale of the property for such units of functional currency.

(C) *Example.* The following example illustrates the provisions of paragraph (a)(2)(ii)(B) of this section.

Example. G is a U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1989, G enters into a contract to purchase a paper manufacturing machine for 10,000,000 British pounds (£) for delivery on January 1, 1991. On January 1, 1991, when G exchanges £10,000,000 (which G purchased for $12,000,000) for the machine, the fair market value of the machine is £17,000,000. On January 1, 1991, the spot exchange rate is £1 = $1.50. Under paragraph (a)(2)(ii)(B) of this section, the transaction is treated as an exchange of £10,000,000 for $15,000,000 and the purchase of the machine for $15,000,000. Accordingly, in computing G's exchange gain of $3,000,000 on the disposition of the £10,000,000, the amount realized is $15,000,000. G's basis in the machine is $15,000,000. No gain is recognized on the bargain purchase of the machine.

(iii) *Adjusted basis*—(A) *In general.* Except as provided in paragraph (a)(2)(iii)(B) of this section, the adjusted basis of nonfunctional currency is determined under the applicable provisions of the Internal Revenue Code (*e.g.*, sections 1011 through 1023). A taxpayer that uses a spot rate convention under §1.988–1 (d)(3) to determine exchange gain or loss with respect to a receivable shall determine the basis of nonfunctional currency received in satisfaction of such receivable in a manner consistent with such convention.

(B) *Determination of the basis of nonfunctional currency withdrawn from an account with a bank or other financial institution*—(*1*) *In general.* The basis of nonfunctional currency withdrawn from an account with a bank or other financial institution shall be determined under any reasonable method that is consistently applied from year to year by the taxpayer to all accounts denominated in a nonfunctional currency. For example, a taxpayer may use a first in first out method, a last in first out method, a pro rata method (as illustrated in the example below), or any other reasonable method that is consistently applied. However, a method that consistently results in units of nonfunctional currency with the highest basis being withdrawn first shall not be considered reasonable.

(*2*) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iii)(B).

Example. (i) X, a cash basis individual with the dollar as his functional currency, opens a demand account with a Swiss bank. Assume expenses associated with the demand account are deductible under section 212. The following chart indicates Swiss franc deposits to the account, Swiss franc interest credited to the account, the dollar basis of each deposit, and the determination of the aggregate dollar basis of all Swiss francs in the account. Assume that the taxpayer has properly translated all the amounts specified in the chart and that all transactions are subject to section 988.

Date	Swiss francs deposited	Interest received	U.S. dollar basis	Aggregate U.S. dollar basis
1/01/89	1000 Sf		$500	$500
3/31/89		50 Sf	25	525

Date	Swiss francs deposited	Interest received	U.S. dollar basis	Aggregate U.S. dollar basis
6/30/89		50 Sf	24	549
9/30/89		50 Sf	25	574
12/31/89		50 Sf	26	600

(ii) On January 1, 1990, X withdraws 500 Swiss francs from the account. X may determine his basis in the Swiss francs by multiplying the aggregate U.S. dollar basis of Swiss francs in the account by a fraction the numerator of which is the number of Swiss francs withdrawn from the account and the denominator is the total number of Swiss francs in the account. Under this method, X's basis in the 500 Swiss francs is $250 computed as follows:

$$\frac{500\ \mathrm{Sf}}{1200\ \mathrm{Sf}} \times \$600 = \$250$$

(iii) X's basis in the Swiss francs remaining in the account is $350 ($600−$250). X must use this method consistently from year to year with respect to withdrawals of nonfunctional currency from all of X's accounts.

(iv) Purchase and sale of stock or securities traded on an established securities market by cash basis taxpayer—

(A) *Amount realized.* If stock or securities traded on an established securities market are sold by a cash basis taxpayer for nonfunctional currency, the amount realized with respect to the stock or securities (as determined on the trade date) shall be computed by translating the units of nonfunctional currency received into functional currency at the spot rate on the settlement date of the sale. This rule applies notwithstanding that the stock or securities are treated as disposed of on a date other than the settlement date under another section of the Code. See section 453(k).

(B) *Basis.* If stock or securities traded on an established securities market are purchased by a cash basis taxpayer for nonfunctional currency, the basis of the stock or securities shall be determined by translating the units of nonfunctional currency paid into functional currency at the spot rate on the settlement date of the purchase.

(C) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iv).

Example. On November 1, 1989 (the trade date), X, a calendar year cash basis U.S. individual, purchases stock for £100 for settlement on November 5, 1989. On November 1, 1989, the spot value of the £100 is $140. On November 5, 1989, X purchases £100 for $141 which X uses to pay for the stock. X's basis in the stock is $141. On December 30, 1990 (the trade date), X sells the stock for £110 for settlement on January 5, 1991. On December 30, 1990, the spot value of £110 is $165. On January 5, 1991, X transfers the stock and receives £110 which, translated at the spot rate, equal $166. Under section 453(k), the stock is considered disposed of on December 30, 1990. The amount realized with respect to such disposition is the value of the £110 on January 5, 1991 ($166). Accordingly, X's gain realized on December 30, 1990, from the disposition of the stock is $25 ($166 amount realized less $141 basis). X's basis in the £110 received from the sale of the stock is $166.

(v) *Purchase and sale of stock or securities traded on an established securities market by accrual basis taxpayer.* For taxable years beginning after March 17, 1992, an accrual basis taxpayer may elect to apply the rules of paragraph (a)(2)(iv) of this section. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently from year to year and cannot be changed without the consent of the Commissioner.

(b) *Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments*—(1) *Translation of interest income received with respect to a nonfunctional currency demand account.* Interest income received with respect to a demand account with a bank or other financial institution which is denominated in (or the payments of which are determined by reference to) a nonfunctional currency shall be translated into functional currency at the spot rate on the date received or accrued or pursuant to any reasonable spot rate convention consistently applied by the taxpayer to all taxable years and to all accounts denominated in nonfunctional currency in the same financial institution. For example, a taxpayer may translate interest income received with respect to a demand account on the last day of each month of the taxable year, on the last day of each quarter of the taxable year, on the last day of each half of the taxable year, or on the last day of the taxable year. No exchange gain or loss is realized upon the receipt or accrual of interest income with respect to a demand account subject to this paragraph (b)(1).

(2) *Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in §1.988–1(a)(1)(ii) and (2)(i)*—(i) *Scope*—(A) *In general.* Paragraph (b) of this section only applies to debt instruments described in §1.988–1(a)(1)(ii) and (2)(i) where all payments are denominated in, or determined with reference to, a single nonfunctional currency. Except as provided in paragraph (b)(2)(i)(B) of this section, this paragraph (b) shall not apply to contingent payment debt instruments.

(B) *Nonfunctional currency contingent payment debt instruments*—(*1*) *Operative rules.* [Reserved]

(*2*) *Certain instruments are not contingent payment debt instruments.* For purposes of section 1275(d), a debt instrument denominated in, or all payments of which are determined with reference to, a single nonfunctional currency (with no contingencies) is not a contingent payment debt instrument. See §1.988–1(a)(4) and (5) for the treatment of dual currency and multi-currency debt instruments.

(ii) *Determination and translation of interest income or expense*—(A) *In general.* Interest income or expense on a debt instrument described in paragraph (b)(2)(i) of this section (including original issue discount determined in accordance with sections 1271 through 1275 and 163(e) as adjusted for acquisition premium under section 1272(a)(7), and acquisition discount determined in accordance with sections 1281 through 1283) shall be determined in units of nonfunctional currency and translated into functional currency as provided in paragraphs (b)(2)(ii)(B) and (C) of this section. For purposes of sections 483, 1273(b)(5) and 1274, the nonfunctional currency in which an instrument is denominated (or by reference to which payments are determined) shall be considered money.

(B) *Translation of interest income or expense that is not required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense received or paid that is not required to be accrued by the taxpayer prior to receipt or payment shall be translated at the spot rate on the date of receipt or payment. No exchange gain or loss is realized with respect to the receipt or payment of such interest income or expense (other than the exchange gain or loss that might be realized under paragraph (a) of this section upon the disposition of the nonfunctional currency so received or paid).

(C) *Translation of interest income or expense that is required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense that is required to be accrued prior to receipt or payment (*e.g.*, under section 1272, 1281 or 163(e) or because the taxpayer uses an accrual method of accounting) shall be translated at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the interest accrual period or, with respect to an interest accrual period that spans two taxable years, at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the partial period within the taxable year. See paragraphs (b)(3) and (4) of this section for the determination of exchange gain or loss on the receipt or payment of accrued interest income or expense.

(iii) *Determination of average rate or other accrual convention*—(A) *In general.* For purposes of this paragraph (b), the average rate for an accrual period (or partial period) shall be a simple average of the spot exchange rates for each business day of such period or other average exchange rate for the period reasonably derived and consistently applied by the taxpayer.

(B) *Election to use spot accrual convention.* For taxable years beginning after March 17, 1992, a taxpayer may elect to translate interest income and expense at the spot rate on the last day of the interest accrual period (and in the case of a partial accrual period, the spot rate on the last day of the taxable year). If the last day of the interest accrual period is within five business days of the date of receipt or payment, the taxpayer may translate interest income or expense at the spot rate on the date of receipt or payment. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently to all debt instruments from year to year and cannot be changed without the consent of the Commissioner.

(3) *Exchange gain or loss recognized by the holder with respect to accrued interest income.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest income on the date such accrued interest income is received or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest income shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest income is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest income received with respect to such accrual period (as determined under the ordering rules of paragraph (b)(7) of this section) into functional currency at the spot rate on the date the interest income is received or the instrument is disposed of (or deemed disposed of), and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest income accrued with respect to such income received at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the accrual period.

(4) *Exchange gain or loss recognized by the obligor with respect to accrued interest expense.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest expense on the date such accrued interest expense is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest expense shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest expense is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest expense accrued with respect to the amount of interest paid into functional currency at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for such accrual period; and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest paid (or, if the obligation to make payments is extinguished or transferred, the units accrued) with respect to such accrual period (as determined under the ordering rules in paragraph (b)(7) of this section) into functional currency at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(5) *Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is received from the obligor or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the

instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the holder's purchase price in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the holder acquired the instrument in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to the holder shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal amount shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the holder with respect to principal is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date payment is received or the instrument is disposed of (or deemed disposed of); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date the holder (or a transferor from whom the nonfunctional principal amount is carried over) acquired the instrument (is deemed to acquire the instrument).

(6) *Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the amount received by the obligor for the debt instrument in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the obligor became the obligor in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to such obligor shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the obligor is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date the obligor (or a transferor from whom the principal amount is carried over) became the obligor (or is deemed to have become the obligor); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(7) *Payment ordering rules*—(i) *Debt instruments subject to the rules of sections 163(e), or 1271 through 1288.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is subject to the rules of sections 163(e), or 1272 through 1288, units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instrument shall be treated first as a receipt or payment of periodic interest under the principles of section 1273 and the regulations thereunder, second as a receipt or payment of original issue discount to the extent accrued as of the date of the receipt or payment, and finally as a receipt or payment of principal. Units of nonfunctional currency (or an amount determined with reference to nonfunctional

currency) treated as a receipt or payment of original issue discount under the preceding sentence are attributed to the earliest accrual period in which original issue discount has accrued and to which prior receipts or payments have not been attributed. No portion thereof shall be treated as prepaid interest. These rules are illustrated by *Example 10* of paragraph (b)(9) of this section.

(ii) *Other debt instruments.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is not subject to the rules of section 163(e) or 1272 through 1288, whether units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instrument are treated as interest or principal shall be determined under section 163 or other applicable section of the Code.

(8) *Limitation of exchange gain or loss on payment or disposition of a debt instrument.* When a debt instrument described in paragraph (b)(2)(i) of this section is paid or disposed of, or when the obligation to make payments thereunder is satisfied by another person, or extinguished or assumed by another person, exchange gain or loss is computed with respect to both principal and any accrued interest (including original issue discount), as provided in paragraph (b)(3) through (7) of this section. However, pursuant to section 988(b)(1) and (2), the sum of any exchange gain or loss with respect to the principal and interest of any such debt instrument shall be realized only to the extent of the total gain or loss realized on the transaction. The gain or loss realized shall be recognized in accordance with the general principles of the Code. See *Examples 3, 4* and *6* of paragraph (b)(9) of this section.

(9) *Examples.* The preceding provisions are illustrated in the following examples. The examples assume that any transaction involving an individual is a section 988 transaction.

Example 1. (i) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1992, X converts $13,000 to 10,000 British pounds (£) at the spot rate of £1 = $1.30 and loans the £10,000 to Y for 3 years. The terms of the loan provide that Y will make interest payments of £1,000 on December 31 of 1992, 1993, and 1994, and will repay X's £10,000 principal on December 31, 1994. Assume the spot rates for the pertinent dates are as follows:

Date	Spot rate (pounds to dollars)
Jan. 1, 1992	£1=$1.30
Dec. 31, 1992	£1=$1.35
Dec. 31, 1993	£1=$1.40
Dec. 31, 1994	£1=$1.45

(ii) Under paragraph (b)(2)(ii)(B) of this section, X will trans1ate the £1,000 interest payments at the spot rate on the date received. Accordingly, X will have interest income of $1,350 in 1992, $1,400 in 1993, and $1,450 in 1994. Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of interest income.

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 principal amount determined by translating the £10,000 at the spot rate on the date it is received (£10,000×$1.45 = $14,500) and subtracting from such amount, the amount determined by translating the £10,000 at the spot rate on the date the loan was made (£10,000×$1.30 = $13,000). Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan on December 31, 1994.

Example 2. (i) Assume the same facts as in *Example 1* except that X is an accrual method taxpayer and that average rates are as follows:

Accrual period	Average rate (pounds to dollars)
1992	£1=$1.32
1993	£1=$1.37
1994	£1=$1.42

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will accrue the £1,000 interest payments at the average rate for the accrual period. Accordingly, X will have interest income of $1,320 in 1992, $1,370 in 1993, and $1,420 in 1994. Because X is an accrual basis taxpayer, X determines exchange gain or loss for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting the amounts of interest income accrued for such period. Thus, X will realize $90 of exchange gain with respect to interest received under the loan, computed as follows:

Year	Spot value interest received	Accrued interest @ average rate	Exch. gain
1992	$1,350	$1,320	$30
1993	1,400	1,370	30

Year	Spot value interest received	Accrued interest @ average rate	Exch. gain
1994	1,450	1,420	30
Total			$90

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1.* Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan principal on December 31, 1994.

Example 3. Assume the same facts as in *Example 1* except that X is a calendar year taxpayer on the accrual method of accounting that elects to use a spot rate convention to translate interest income as provided in § 1.988–2(b)(2)(iii)(B). Interest income is received by X on the last day of each accrual period. Under paragraph (b)(2)(ii)(C), X will translate the interest income at the spot rate on the last day of each interest accrual period. Accordingly, X will have interest income of $1,350 in 1992, and $1,400 in 1993, $1,450 in 1994. Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income. Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1.* Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan principal on December 31, 1994.

Example 4. Assume the same facts as in *Example 1* except that on December 31, 1993, X sells Y's note for 9,821.13 British pounds (£) after the interest payment. Under paragraph (b)(8) of this section, X will compute exchange gain on the £10,000 principal. The exchange gain is $1,000 [(£10,000×$1.40) − (£10,000×$1.30)]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X's total gain is $749.58 [(£9,821.13×$1.40) − (£10,000×$1.30)]. Thus, X will realize $749.58 of exchange gain (and will realize no market loss).

Example 5. (i) The facts are the same as in *Example 1* except that Y becomes insolvent and fails to repay the full £10,000 principal when due. Instead, X and Y agree to compromise the debt for a payment of £8,000 on December 31, 1994. Under paragraph (b)(8) of this section, X will compute exchange gain on the £10,000 originally booked. The exchange gain is $1,500 [(£10,000×$1.45) − (£10,000×$1.30) = $1,500]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X realizes an overall loss on the disposition of $1,400 [(£8,000×$1.45) − (£10,000×$1.30) = ($1,400)]. Thus, X will realize no exchange gain (and a $1400 market loss).

(ii) If the exchange rate on December 31, 1994, were £1 = $1.25, rather than £1 = $1.45, X would compute exchange loss under paragraph (b)(8) of this section, on the £10,000 originally booked. The exchange loss would be $500 [(£10,000×$1.25) − (£10,000×$1.30) = ($500)]. X's total loss on the disposition would be $3,000 [(£8,000×$1.25)–(£10,000×$1.30) = ($3,000)]. Thus, X would realize $500 of exchange loss and a $2,500 market loss on the disposition.

Example 6. (i) X is an individual with the dollar as his functional currency. X is on the cash method of accounting. On January 1, 1989, X borrows 10,000 British pounds (£) from Y, an unrelated person. The terms of the loan provide that X will make interest payments of £1,200 on December 31 of 1989 and 1990 and will repay Y's £10,000 principal on December 31, 1990. The spot rates for the pertinent dates are as follows:

Date	Spot rate[1]
Jan. 1, 1989	1=$1.50
Dec. 31, 1989	1=1.60
Dec. 31, 1990	1=1.70

[1] Pounds to dollars.

Assume that the basis of the £1,200 paid as interest by X on December 31, 1989, is $2,000, the basis of the £1,200 paid as interest by X on December 31, 1990, is $2,020 and the basis of the £10,000 principal paid by X on December 31, 1990, is $16,000.

(ii) Under paragraph (b)(2)(ii)(B) of this section, X translates the £1,200 interest payments at the spot rate on the day paid. Thus, X paid $1,920 (£1,200×$1.60) of interest on December 31, 1989, and $2,040 (£1,200×$1.70) of interest on December 31, 1990. In addition, X will realize exchange gain or loss on the disposition of the £1,200 on December 31, 1989 and 1990, under paragraph (a) of this section. Pursuant to paragraph (a)(2) of this section, X will realize an exchange loss of $80 [(£1,200×$1.60) − $2,000] on December 31, 1989, and exchange gain of $20 [(£1,200×$1.70) − $2,020] on December 31, 1990.

(iii) Under paragraph (b)(6) of this section, X will realize exchange loss on December 31, 1990, upon repayment of the £10,000 principal amount determined by translating the £10,000 received at the spot rate on January 1, 1989 (£10,000×$1.50 = $15,000) and subtracting from such amount, the amount determined by translating the £10,000 paid at the spot rate on December 31, 1990 (£10,000×$1.70 = $17,000). Thus, under paragraph (b)(6) of this section, X has an exchange loss with respect to the £10,000 principal of $2,000. Further, under paragraph (a)(2) of this section, X will realize an exchange gain upon disposition of the £10,000 on December 31, 1990. Under paragraph (a)(2) of this section, X will subtract his adjusted basis in the £10,000 ($16,000) from the amount realized upon the disposition of the £10,000 (£10,000×$1.70 = $17,000) resulting in a gain of $1,000. Accordingly, X's combined exchange gain and loss realized on December 31, 1990, with respect to the repayment of the £10,000 is a $1,000 exchange loss.

Example 7. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. On January 1, 1989, X purchases at original issue for 82.64 Canadian dollars (C$) M corporation's 2 year note maturing on December 31, 1990, at a stated redemption price of C$100. The yield to maturity in Canadian dollars is 10 percent and the accrual period is the one year period beginning January 1 and ending December 31. The note has C$17.36 of original issue discount. Assume that the spot rates are as follows: C$1 = U.S.$.72 on January 1, 1989; C$1 = U.S.$.80 on January 1, 1990; C$1 = U.S.$ .82 on December 31, 1990. Assume further that the average rate for 1989 is C$1 = U.S.$ .76 and for 1990 is C$1 = U.S. $.81.

(ii) Under paragraph (b)(2)(ii)(A) of this section, X will determine its interest income in Canadian dollars. Accordingly, under section 1272, X must take into account original issue discount in the amount of C$8.26 on December 31, 1989, and C$9.10 on December 31, 1990. Pursuant to paragraph (b)(2)(ii)(C) of this section, X will translate these amounts into U.S. dollars at the average exchange rate for the relevant accrual period. Thus, the amount of interest income taken into account in 1989 is U.S.$6.28 (C$8.26×U.S.$.76) and in 1990 is U.S.$7.37 (C$9.10×U.S.$.81). Pursuant to paragraph (b)(3)(ii) of this section, X will realize exchange gain or loss with respect to the accrued interest determined for each accrual period by translating the Canadian dollars received with respect to such accrual period into U.S. dollars at the spot rate on the date the interest is received and subtracting from that amount the amount accrued in U.S. dollars. Thus, the amount of exchange gain realized on December 31, 1990, is U.S.$.58 (U.S.$.49 from 1989+U.S.$.09 from 1990). Pursuant to paragraph (b)(5) of this section, X shall realize exchange gain or loss with respect to the principal (C$82.64) on December 31, 1990, computed by translating the C$82.64 at the spot rate on December 31, 1990 (U.S.$67.76) and subtracting the C$82.64 translated at the spot rate on January 1, 1989 (U.S.$59.50) for an exchange gain of U.S.$8.26. Thus, X's combined exchange gain is U.S.$8.84 (U.S.$.49+U.S.$.09+U.S.$8.26).

(iii) Assume instead that on January 1, 1990, X sells the note for C$86.95, which it immediately converts to U.S. dollars. X's exchange gain is computed under paragraph (b)(8) of this section with reference to the nonfunctional currency denominated principal amount (C$82.64) and the nonfunctional currency denominated accrued original issue discount (C$8.26). X will compute an exchange gain of U.S.$6.61 with respect to the issue price [(C$82.64×U.S.$ .80)−(C$82.64×U.S.$.72)] and an exchange gain of U.S.$.33 with respect to the accrued original issue discount [(C$8.26×U.S.$.80)−(C$8.26×U.S.$ .76)]. Accordingly, prior to the application of paragraph (b)(8) of this section, X's total exchange gain is U.S.$6.94 (U.S.$6.61+U.S.$.33), and X's market loss is U.S.$3.16 [(C$90.90−C$86.95)×U.S.$.80]. Pursuant to paragraph (b)(8) of this section, however, X's market loss on the note of U.S.$3.16 is netted against X's exchange gain of U.S.$6.94, resulting in a realized exchange gain of U.S.$3.78 and no market loss.

Example 8. (i) The facts are the same as in *Example 7* (i) except that on January 1, 1990, X contributes the M corporation note to Y, a wholly-owned U.S. subsidiary of X with the dollar as its functional currency, and Y collects C$100 from M corporation at maturity on December 31, 1990, when the spot rate is C$1 = U.S.$.82. The transfer of the note from X to Y qualifies for nonrecognition of gain under section 351(a). On December 31, 1990, Y includes C$9.10 of accrued interest in income which translated at the average exchange rate of C$1 = U.S.$.81 for the year results in U.S.$7.37 of interest income.

(ii) Y's exchange gain is computed under paragraph (b)(3) of this section with respect to accrued interest income and paragraph (b)(5) of this section with respect to the nonfunctional currency principal amount. Under paragraph (b)(3) of this section, Y will realize exchange gain or loss for each accrual period computed by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the day received and subtracting the amounts of interest income accrued for such period. Thus, Y will realize $.49 of exchange gain with respect to original issue discount accrued in 1989 [(C$8.26×U.S.$.82)−(C$8.26×U.S.$.76) = U.S. $.49] and $.09 of exchange gain with respect to original issue discount accrued in 1990 [(C$9.10×U.S.$.82)−(C$9.10×U.S.$.81) = $.09].

(iii) Pursuant to paragraph (b)(5) of this section, the nonfunctional currency principal amount of the M bond in the hands of Y is C$82.64, the amount carried over from X, the transferor. Y's exchange gain with respect to the nonfunctional currency principal amount is $8.26 [(C$82.64×U.S.$.82)−(C$82.64×U.S.$.72) = U.S. $8.26]. Accordingly, Y's combined exchange gain is U.S. $8.84 ($.49+$.09+$8.26). Because the amount realized in Canadian dollars equals the adjusted issue price (C$100) on retirement of the M note, there is no market loss, and the netting rule of paragraph (b)(8) of this section does not limit realization of the exchange gain.

Example 9. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. X elects to use the spot rate convention to translate interest income as provided in paragraph (b)(2)(iii)(B) of this section. On January 31, 1992, X loans £1000 to Y, an unrelated person. Under the terms of the loan, Y will pay X interest of £50 on July 31, 1992, and January 31, 1993, and will repay the £1000 principal on January 31, 1993. Assume the following spot exchange rates:

Date	Spot rate [1]
Jan. 31, 1992	£1=$1.50
July 31, 1992	£1=1.55
Dec. 31, 1992	£1=1.60
Jan. 31, 1993	£1=1.61

[1] Pounds to dollars.

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will translate the interest income at the spot rate on the last day of each interest accrual period (and in the case of a partial accrual period, at the spot rate on the last day of the taxable year). Accordingly, X will have interest income of $77.50 (£50×$1.55) on July 31, 1992. Assuming under X's method of accounting that interest is accrued daily, X will accrue $66.50 (153/184×£50)×$1.60) of interest income on December 31, 1992. On January 31, 1993, X will have interest income of $13.60 ((31/184×£50)×$1.61). Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income received on July 31, 1992. However, X will realize exchange gain on the £41.50 (153/184×£50) of accrued interest income of $.41 [(£41.50×$1.61)−(£41.50×$1.60) = $.41].

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £100 principal amount determined by translating the £100 at the spot rate on the date it is received (£100×$1.61 = $161.00) and subtracting from such amount, the amount determined by translating the £100 at the spot rate on the date the loan was made (£100×$1.50 = $150.00). Accordingly, X will realize an exchange gain of $11 on the repayment of the loan on January 31, 1993.

Example 10. (i) X, a cash basis taxpayer with the dollar as its functional currency, has the calendar year as its taxable year. On January 1, 1992, X purchases at original issue for 65.88 British pounds (£) M corporation's 5-year bond maturing on December 31, 1996, having a stated redemption price at maturity of £100. The bond provides for annual payments of interest in pounds of 1 pound per year on December 31 of each year. The bond has 34.12 British pounds of original issue discount. The yield to maturity is 10 percent in British pounds and the accrual period is the one year period beginning January 1 and ending December 31 of each calendar year. The amount of original issue discount is determined in pounds for each accrual period by multiplying the adjusted issue price expressed in pounds by the yield and subtracting from such amount the periodic interest payments expressed in pounds for such period. The periodic interest payments are translated at the spot rate on the payment date (December 31 of each year). The original issue discount is translated at the average rate for the accrual period (January 1 through December 31). The following chart describes the determination of interest income with respect to the facts presented and provides other pertinent information.

TABLE 1

Year (Dec. 31)	Periodic interest payments in pounds for the accrual period	Original issue discount in pounds for the accrual period	Issue price or adjusted issue price in pounds	Assumed spot rate on Dec. 31 (pounds to dollars)	Assumed average rate for accrual period (pounds to dollars)	Periodic interest payments in pounds multiplied by spot rate on the date of payment (column 2 times column 5)	Original issue discount in pounds multiplied by the average rate for the accrual period (column 3 times column 6)	Total interest income in dollars (column 7 plus column 8)	Adjusted issue price in dollars
1	2	3	4	5	6	7	8	9	10
Issue Date:			65.88	1=$1.20	....	....	....	....	$79.06
1992	1	5.59	71.47	1=1.30	1=$1.25	$1.30	$6.99	$8.29	86.05
1993	1	6.15	77.62	1=1.40	1=1.35	1.40	8.30	9.70	94.35
1994	1	6.76	84.38	1=1.50	1=1.45	1.50	9.80	11.30	104.15
1995	1	7.44	91.82	1=1.60	1=1.55	1.60	11.53	13.13	115.68
1996	1	8.18	100.00	1=1.70	1=1.65	1.70	13.50	15.20	129.18

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1996 totaling $7.88 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the average rate for the period. The following chart illustrates this computation:

TABLE 2

Year	OID accrued in pounds for each accrual period	Assumed spot rate on date payment received (pounds to dollars)	Interest received times spot rate on the date received (col. 2 times col. 3)	Assumed average rate for accrual period (pounds to dollars)	IOD in pounds times the average rate for the accrual period (col. 2 times col. 5)	Exchange gain or loss (col. 4 less col. 6)
1	2	3	4	5	6	7
1992	5.59	1=$1.70	$9.50	1=$1.25	$6.99	$2.51
1993	6.15	1=1.70	10.46	1=1.35	8.30	2.16
1994	6.76	1=1.70	11.49	1=1.45	9.80	1.69
1995	7.44	1=1.70	12.65	1=1.55	11.53	1.12
1996	8.18	1=1.70	13.90	1=1.65	13.50	.40
Total						$7.88

(iii) X will also realize exchange gain with respect to the principal of the loan (*i.e.*, the issue price of 65.88 British pounds) on December 31, 1996 computed by translating the units of nonfunctional currency principal received at the spot rate on the date principal is received (65.88 British pounds × $1.70 = $112.00) and subtracting from such amount, the units of nonfunctional currency principal received translated at the spot rate on the date the instrument was acquired (65.88 British pounds × $1.20 = $79.06). Accordingly, X's exchange gain on the principal is $32.94 and X's total exchange gain with respect to the accrued interest and principal is $40.82. It should be noted that, under this fact pattern, the total exchange gain may be determined in an alternative fashion. Exchange gain may be computed by subtracting the adjusted issue price in dollars at maturity ($129.18—see column 10 of Table 1) from the amount computed by multiplying the stated redemption price at maturity in pounds times the spot rate on the maturity date (£100×$1.70 = $170), which equals $40.82.

Example 11. (i) The facts are the same as in *Example 10* except that X makes an election under paragraph (b)(2)(iii) of this section to translate accrued interest on the last day of the accrual period. Accordingly, columns 8, 9 and 10 in Table 1 would change as follows:

Year (Dec. 31)	Original issue discount in pounds multiplied by the spot rate on last day of accrual period (Dec. 31)	Total interest income in dollars (column 7 plus column 8)	Adjusted issue price in dollars
1	8	9	10
			$79.06
1992	$7.27	$8.57	87.63
1993	8.61	10.01	97.64
1994	10.14	11.64	109.28
1995	11.90	13.50	122.78
1996	13.91	15.61	138.39

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1993 totaling $6.18 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the spot rate on the last day of the accrual period. Accordingly, columns 5, 6 and 7 of Table 2 would change as follows:

Year	Spot rate on last day of accrual period	OID in pounds times the spot rate on the last day of the accrual period (col 2 times col. 3)	Exchange gain or loss (col. 4 less col. 6)
1	5	6	7
1992	$1.30	$7.27	$2.23
1993	1.40	8.61	1.85
1994	1.50	10.14	1.35
1995	1.60	11.90	0.75
1996	1.70	13.90	0.00
			6.18

(iii) X will realize exchange gain with respect to the principal amount of the loan as provided in the preceding example.

Example 12. (i) C is a corporation that is a calendar year accrual method taxpayer with the dollar as its functional currency. On January 1, 1989, C lends 100 British pounds (£) in exchange for a note under the terms of which C will receive two equal payments of £57.62 on December 31, 1989, and December 31, 1990. Each payment of £57.62 represents the annual payment necessary to amortize the £100 principal amount at a rate of 10% compounded annually over a two year period. The following tables reflect the amounts of principal and interest that compose each payment and assumptions as to the relevant exchange rates:

Date	Principal	Interest
Dec. 31, 1989	£47.62	£10.00
Dec. 12, 1990	£52.38	£5.24

Date	Spot rate £1=	Average rate for year ending
Jan. 1, 1989	$1.30	
Dec. 31, 1989	1.40	1.35
Dec. 31, 1990	1.50	1.45

(ii) Because each interest payment is equal to the product of the outstanding principal balance of the obligation and a single fixed rate of interest, each stated interest payment constitutes periodic interest under the principles of section 1273. Accordingly, there is no original issue discount.

(iii) Because C is an accrual basis taxpayer, C will translate the interest income at the average rate for the annual accrual period pursuant to paragraph (b)(2)(ii)(C) of this section. Thus, C's interest income is $13.50 (£10.00×$1.35) in 1989, and $7.60 (£5.24×$1.45) in 1990. C will realize exchange gain or loss upon receipt of accrued interest computed in accordance with paragraph (b)(3) of this section. Thus, C will realize exchange gain in the amount of $.50 [(£10.00×$1.40) − $13.50] in 1989, and $.26 [(£5.24×$1.50) − $7.60] in 1990.

(iv) In addition, C will realize exchange gain or loss upon the receipt of principal each year computed under paragraph (b)(5) of this section. Thus, C will realize exchange gain in the amount of $4.76 [(£47.62×$1.40) − (£47.62×$1.30)] in 1989, and $10.48 [(£52.38×$1.50) − (£52.38×$1.30)] in 1990.

(10) *Treatment of bond premium*—(i) *In general.* Amortizable bond premium on a bond described in paragraph (b)(2)(i) of this section shall be computed in the units of nonfunctional currency in which the bond is denominated (or in which the payments are determined). Amortizable bond premium properly taken into account under section 171 or § 1.61–12 (or the successor provision thereof) shall reduce interest income or expense in units of nonfunctional currency. Exchange gain or loss is realized with respect to bond premium described in the preceding sentence by treating the portion of premium amortized with respect to any period as a return of principal. With respect to a holder that does not elect to amortize bond premium under section 171, the amount of bond premium will constitute a market loss when the bond matures. See paragraph (b)(8) of this section. The principles set forth in this paragraph (b)(10) shall apply to determine the treatment of acquisition premium described in section 1272(a)(7).

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(10).

Example. (A) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1989, X purchases Y corporation's note for 107.99 British pounds (£) from Z, an unrelated party. The note has an issue price of £100, a stated redemption price at maturity of £100, pays interest in pounds at the rate of 10% compounded annually, and matures on December 31, 1993. X elects to amortize the bond premium of £7.99 under the rules of section 171. Pursuant to paragraph (b)(10)(i) of this section, bond premium is determined and amortized in British pounds. Assume the amortization schedule is as follows:

Year ending 12/31	Bond premium amortized	Unamortized premium plus principal	Interest
		£107.99	
1989	£1.36	£106.63	£8.64
1990	£1.47	£105.16	£8.53
1991	£1.59	£103.57	£8.41

Year ending 12/31	Bond premium amortized	Unamortized premium plus principal	Interest
1992	£1.71	£101.86	£8.29
1993	£1.85	£100.00	£8.15

(B) The bond premium reduces X's pound interest income under the note. For example, the £10 stated interest payment made in 1989 is reduced by £1.36 of bond premium, and the resulting £8.64 interest income is translated into dollars at the spot rate on December 31, 1989. Exchange gain or loss is realized on the £1.36 bond premium based on the difference between the spot rates on January 1, 1989, the date the premium is paid to acquire the bond, and December 31, 1989, the date the bond premium is returned as part of the stated interest. The £1.36 bond premium reduces the unamortized premium plus principal to £106.63 (£107.99 − £1.36). On December 31, 1993, when the bond matures and the £7.99 of bond premium has been fully amortized, X will realize exchange gain or loss with respect to the remaining purchase price of £100.

(11) *Market discount*—(i) *In general.* Market discount as defined in section 1278(a)(2) shall be determined in units of nonfunctional currency in which the market discount bond is denominated (or in which the payments are determined). Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) shall be translated into functional currency at the spot rate on the date the market discount bond is disposed of. No part of such accrued market discount is treated as exchange gain or loss. Accrued market discount currently includible in income pursuant to section 1278(b) shall be translated into functional currency at the average exchange rate for the accrual period. Exchange gain or loss with respect to accrued market discount currently includible in income under section 1278(b) shall be determined in accordance with paragraph (b)(3) of this section relating to accrued interest income.

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(11).

Example. (A) X is a calendar year corporation with the U.S. dollar as its functional currency. On January 1, 1990, X purchases a bond of M corporation for 96,530 British pounds (£). The bond, which was issued on January 1, 1989, has an issue price of £100,000, a stated redemption price at maturity of £100,000, and provides for annual pound payments of interest at 8 percent. The bond matures on December 31, 1991. X purchased the bond at a market discount of 3,470 pounds and did not elect to include the market discount currently in income under section 1278(b). X holds the bond to maturity and on December 31, 1991, receives payment of £100,000 (plus £8,000 interest) when the exchange rate is £1 = $1.50.

(B) Pursuant to paragraph (b)(11) of this section, X computes market discount in units of nonfunctional currency. Thus, the market discount as defined under section 1278(a)(2) is £3,470. Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) is translated at the spot rate on the date the market discount bond is disposed of. Accordingly, X will translate the accrued market discount of £3,470 at the spot rate on December 31, 1991 (£3,470×$1.50 = $5,205). No exchange gain or loss is realized with respect to the £3,470 of accrued market discount. See paragraphs (b)(3) and (5) of this section for the realization and recognition of exchange gain or loss with respect to accrued interest and principal.

(12) *Tax exempt bonds.* See §1.988–3(c)(2), which characterizes exchange loss realized with respect to a nonfunctional currency tax exempt bond as a reduction of interest income.

(13) *Nonfunctional currency debt exchanged for stock of obligor*—(i) *In general.* Notwithstanding any other section of the Code other than section 267, 1091 or 1092, exchange gain or loss shall be realized and recognized by the holder and the obligor in accordance with the rules of paragraphs (b)(3) through (7) of this section with respect to the principal and accrued interest of a debt instrument described in paragraph (b)(2)(i) of this section that is acquired by the obligor in exchange for its stock, provided however, that such gain or loss shall be recognized only to the extent of the total gain or loss on the exchange (regardless of whether such gain or loss would otherwise be recognized). This rule shall apply whether the debt instrument is converted into stock according to its terms or exchanged pursuant to a separate agreement between the obligor and the holder. A debt instrument that is acquired by the obligor from a shareholder as a contribution to capital shall be treated for purposes of this section as exchanged for stock, whether or not additional stock is issued.

(ii) *Coordination with section 108.* Section 988 and this section shall apply before section 108. Exchange gain realized by the obligor on an exchange described in paragraph (b)(13)(i) of this section shall not be treated as discharge of indebtedness income, but shall be considered to reduce the amount of the liability for purposes of computing the obligor's income on the exchange under section 108(e)(4), section 108(e)(6) or section 108(e)(10).

(iii) *Effective date.* This paragraph (b)(13) shall be effective for exchanges of debt for stock effected after September 21, 1989.

(iv) *Examples.* The following examples illustrate the operation of this paragraph (b)(13). In each such example, assume that sections 267, 1091 and 1092 do not apply.

Example 1. (i) X is a calendar year U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1990 (the issue date), X acquired a convertible bond maturing on December 31, 1998, issued by Y corporation, a U.K. corporation with the British pound (£) as its functional currency. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. The terms of the bond also provide that at any time prior to December 31, 1998, the holder may surrender all of his interest in the bond in exchange for 20 shares of Y common stock. On January 1, 1994, X surrenders his interest in the bond for 20 shares of Y common stock. Assume the following: (a) The spot rate on January 1, 1990, is £1 = $1.30, (b) The spot rate on January 1, 1994, is £1 = $1.50, and (c) The 20 shares of Y common stock have a market value of £200,000 on January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange gain with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is converted to stock. X will compute exchange gain pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the conversion date (£100.000×$1.50 = $150,000) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond (£100,000×$1.30 = $130,000). Thus, X will realize and recognize $20,000 of exchange gain. X's basis in the 20 shares of Y common stock is $150,000 ($130,000 substituted basis + $20,000 recognized gain).

Example 2. (i) X, a foreign corporation with the British pound (£) as its functional currency, lends £100 at a market rate of interest to Y, its wholly-owned U.S. subsidiary, on January 1, 1990, on which date the spot exchange rate is £1 = $1. Y's functional currency is the U.S. dollar. On January 1, 1992, when the spot exchange rate is £1 = $.50, X cancels the debt as a contribution to capital. Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the £100 issue price of the debt instrument on January 1, 1992. Y will compute exchange gain pursuant to paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor (£100×$1 = $100) and subtracting from such amount the issue price translated at the spot rate on the date of extinguishment (£100×$.50 = $50). Thus, Y will realize and recognize $50 of exchange gain.

(ii) Under section 108(e)(6), on the acquisition of its indebtedness from X as a contribution to capital Y is treated as having satisfied the debt with an amount of money equal to X's adjusted basis in the debt (£100). For purposes of section 108(e)(6), X's adjusted basis is translated into United States dollars at the spot rate on the date Y acquires the debt (£1 = $.50). Therefore, Y is treated as having satisfied the debt for $50. Pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the exchange gain from $100 to $50. Accordingly, Y recognizes $50 of exchange gain and no discharge of indebtedness income on the extinguishment of its debt to X.

(iii) If X were a United States taxpayer with a dollar functional currency and a $100 basis in Y's obligation. X would realize and recognize an exchange loss of $50 under paragraph (b)(5) of this section on the contribution of the debt to Y. The recognized loss would reduce X's adjusted basis in the debt from $100 to $50, so that for purposes of applying section 108(e)(6) Y is treated as having satisfied the debt for $50. Accordingly, under these facts as well Y would recognize $50 of exchange gain and no discharge of indebtedness income.

Example 3. (i) X and Y are unrelated calendar year U.S. corporations with the U.S. dollar as their functional currency. On January 1, 1990 (the issue date), X acquires Y's bond maturing on December 31, 1999. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. On January 1, 1994, X and Y agree that Y will redeem its bond from X in exchange for 20 shares of Y common stock. Assume the following:

(a) The spot rate on January 1, 1990, is £1 = $1.00,

(b) The spot rate on January 1, 1994, is £1 = $.50,

(c) Interest rates on equivalent bonds have increased so that as of January 1, 1994, the value of Y's bond has declined to £90,000, and

(d) The 20 shares of Y common stock have a market value of £90,000 as of January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange loss with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is exchanged for stock. X will compute exchange loss pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the exchange date (£100,000×$.50 = $50,000) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond (£100,000×$1.00 = $100,000). Thus, X will compute $50,000 of exchange loss, all of which will be realized and recognized because it does not exceed the total $55,000 realized loss on the exchange ($45,000 worth of stock received less $100,000 basis in the exchanged bond).

(iii) Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the issue price, computed under paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor (£100,000×$1.00 = $100,000) and subtracting from such amount the issue price translated at the spot rate on the exchange date (£100,000×$.50 = $50,000). Thus, Y will realize and recognize $50,000 of exchange gain. Under section 108(e)(10), on the transfer of stock to X in satisfaction of its indebtedness Y is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the stock (£90,000×$.50 = $45,000). Pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from $100,000 to $50,000. Accordingly, Y recognizes an additional $5,000 of discharge of indebtedness income on the exchange.

Example 4. (i) The facts are the same as in *Example 3* except that interest rates on equivalent bonds have declined, rather than increased, so that the value of Y's bond on January 1, 1994, has risen to £112,500; and X and Y agree that Y will redeem its bond from X on that date in exchange for 25 shares of Y common stock worth £112,500. Pursuant to paragraphs (b)(13) and (b)(5) of this section, X will compute $50,000 of exchange loss on the exchange with respect to the £100,000 issue price of the bond. See Example 3. However, because X's total loss on the exchange is only $43,750 ($56,250 worth of stock received less $100,000 basis in the exchanged bond), under the netting rule of paragraph (b)(13) of this section the realized exchange loss is limited to $43,750.

(ii) Pursuant to paragraphs (b)(13) and (b)(6) of this section, Y will compute $50,000 of exchange gain with respect to the issue price. See *Example 3.* Under section 108(e)(10), Y is treated as having satisfied the $100,000 indebtedness with an amount of money equal to the fair market value of the stock (£112,500×$.50 = $56,250), resulting in a total gain on the exchange of $43,750. Accordingly, under paragraph (b)(13) of this section Y's realized (and recognized) exchange gain on the exchange is limited to $43,750. Also pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from $100,000 to $56,250. Accordingly, Y recognizes no discharge of indebtedness income on the exchange.

(14)–(15) [Reserved]

(16) *Coordination with section 267 regarding debt instruments*—(i) *Treatment of a creditor.* For rules applicable to a corporation included in a controlled group that is a creditor under a debt instrument see §1.267(f)–-1(h).

(ii) *Treatment of a debtor.* [Reserved]

(17) *Coordination with installment method under section 453.* [Reserved]

(c) *Item of expense or gross income or receipts which is to be paid or received after the date accrued*—(1) *In general.* Except as provided in §1.988–5, exchange gain or loss with respect to an item described in §1.988–1(a)(1)(ii) and (2)(ii) (other than accrued interest income or expense subject to paragraph (b) of this section) shall be realized on the date payment is made or received. Except as provided in the succeeding sentence, such exchange gain or loss shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. If the taxpayer's right to receive income, or obligation to pay an expense, is transferred or modified in a transaction in which gain or loss would otherwise be recognized, exchange gain or loss shall be realized and recognized only to the extent of the total gain or loss on the transaction.

(2) *Determination of exchange gain or loss with respect to an item of gross income or receipts.* Exchange gain or loss realized on an item of gross income or receipts described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency received by the spot rate on the payment date, and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency received by the spot rate on the booking date. The

term ''spot rate on the payment date'' means the spot rate determined under §1.988–1(d) on the date payment is received or otherwise taken into account. Pursuant to §1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the payment date. The term ''spot rate on the booking date'' means the spot rate determined under §1.988–1(d) on the date the item of gross income or receipts is accrued or otherwise taken into account. Pursuant to §1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date.

(3) *Determination of exchange gain or loss with respect to an item of expense.* Exchange gain or loss realized on an item of expense described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency paid by the spot rate on the booking date and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency paid by the spot rate on the payment date. The term ''spot rate on the booking date'' means the spot rate determined under §1.988–1(d) on the date the item of expense is accrued or otherwise taken into account. Pursuant to §1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date. The term ''spot rate on the payment date'' means the spot rate determined under §1.988–1(d) on the date payment is made or otherwise taken into account. Pursuant to §1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the date.

(4) *Examples.* The following examples illustrate the application of paragraph (c) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. X is on the accrual method of accounting. On January 15, 1989, X sells inventory for 10,000 Canadian dollars (C$). The spot rate on January 15, 1989, is C$1 = U.S. $.55. On February 23, 1989, when X receives payment of the C$10,000, the spot rate is C$1 = U.S. $.50. On February 23, 1989, X will realize exchange loss. X's loss is computed by multiplying the C$10,000 by the spot rate on the date the C$10,000 are received (C$10,000×.50 = U.S. $5,000) and subtracting from such amount, the amount computed by multiplying the C$10,000 by the spot rate on the booking date (C$10,000×.55 = U.S. $5,500). Thus, X's exchange loss on the transaction is U.S. $500 (U.S. $5,000 − U.S. $5,500).

Example 2. The facts are the same as in *Example 1* except that X uses a spot rate convention to determine the spot rate as provided in §1.988–1(d)(3). Pursuant to X's spot rate convention, the spot rate at which a payable or receivable is booked is determined monthly for each nonfunctional currency payable or receivable by adding the spot rate at the beginning of the month and the spot rate at the end of the month and dividing by two. All payables and receivables in a nonfunctional currency booked during the month are translated into functional currency at the rate described in the preceding sentence. Further, the translation of nonfunctional currency paid with respect to a payable, and nonfunctional currency received with respect to a receivable, is also performed pursuant to the spot rate convention. Assume the spot rate determined under the spot rate convention for the month of January is C$1 = U.S. $.54 and for the month of February is C$1 = U.S. $.51. On the last date in February, X will realize exchange loss. X's loss is computed by multiplying the C$10,000 by the spot rate convention for the month of February (C$10,000×U.S. $.51 = U.S. $5,100) and subtracting from such amount, the amount computed by multiplying the C$10,000 by the spot rate convention for the month of January (C$10,000×U.S. $.54 = $5,400). Thus, X's exchange loss on the transaction is U.S. $300 (U.S. $5,100–U.S. $5,400). X's basis in the C$10,000 is U.S. $5,400.

Example 3. The facts are the same as in *Example 2* except that X has a standing order with X's bank for the bank to convert any nonfunctional currency received in satisfaction of a receivable into U.S. dollars on the day received and to deposit those U.S. dollars in X's U.S. dollar bank account. X may use its convention to translate the amount booked into U.S. dollars, but must use the U.S. dollar amounts received from the bank with respect to such receivables to determine X's exchange gain or loss. Thus, if X receives payment of the C$10,000 on February 23, 1989, when the spot rate is C$1 = U.S.$ .50, X determines exchange gain or loss by subtracting the amount booked under X's convention (U.S.$5,400) from the amount of U.S. dollars received from the bank under the standing conversion order (assume $5,000). X's exchange loss is U.S.$400.

(d) *Exchange gain or loss with respect to forward contracts, futures contracts and option contracts*—(1) *Scope*—(i) *In general.* This paragraph (d) applies to forward contracts, futures contracts and option contracts described in

§1.988–1(a)(1)(ii) and (2)(iii). For rules applicable to currency swaps and notional principal contracts described in §1.988–1(a) (1)(ii) and (2)(iii), see paragraph (e) of this section.

(ii) *Treatment of spot contracts.* Solely for purposes of this paragraph (d), a spot contract as defined in §1.988–1(b) to buy or sell nonfunctional currency is not considered a forward contract or similar transaction described in §1.988–1(a)(2)(iii) unless such spot contract is disposed of (or otherwise terminated) prior to making or taking delivery of the currency. For example, if a taxpayer with the dollar as its functional currency enters into a spot contract to purchase British pounds, and takes delivery of such pounds under the contract, the delivery of the pounds is not a realization event under section 988(c)(5) and paragraph (e)(4)(ii) of this section because the contract is not considered a forward contract or similar transaction described in §1.988–1(a)(2)(iii). However, if the taxpayer sells or otherwise terminates the contract before taking delivery of the pounds, exchange gain or loss shall be realized and recognized in accordance with paragraphs (d)(2) and (3) of this section.

(2) *Realization of exchange gain or loss*—(i) *In general.* Except as provided in §1.988–5, exchange gain or loss on a contract described in §1.988–2(d)(1) shall be realized in accordance with the applicable realization section of the Internal Revenue Code (*e.g.*, sections 1001, 1092, and 1256). See also section 988(c)(5). For purposes of determining the timing of the realization of exchange gain or loss, sections 1092 and 1256 shall take precedence over section 988(c)(5).

(ii) *Realization by offset*—(A) *In general.* Except as provided in paragraphs (d)(2)(ii)(B) and (C) of this section, exchange gain or loss with respect to a transaction described in §1.988–1(a)(1)(ii) and (2)(iii) shall not be realized solely because such transaction is offset by another transaction (or transactions).

(B) *Exception where economic benefit is derived.* If a transaction described in §1.988–1(a)(1)(ii) and (2)(iii) is offset by another transaction or transactions, exchange gain shall be realized to the extent the taxpayer derives, by pledge or otherwise, an economic benefit (*e.g.*, cash, property or the proceeds from a borrowing) from any gain inherent in such offsetting positions. Proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain taken into account by reason of the preceding sentence. This paragraph (d)(2)(ii)(B) shall apply to transactions creating an offset after September 21, 1989.

(C) *Certain contracts traded on an exchange.* If a transaction described in §1.988–1(a)(1)(ii) and (2)(iii) is traded on an exchange and it is the general practice of the exchange to terminate offsetting contracts, entering into an offsetting contract shall be considered a termination of the contract being offset.

(iii) *Clarification of section 988(c)(5).* If the delivery date of a contract subject to section 988(c)(5) and paragraph (d)(4)(ii) of this section is different than the date the contract expires, then for purposes of determining the date exchange gain or loss is realized, the term delivery date shall mean expiration date.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (d)(1) and (2).

Example 1. On August 1, 1989, X, a calendar year corporation with the dollar as its functional currency, enters into a forward contract with Bank A to buy 100 New Zealand dollars for $80 for delivery on January 31, 1990. (The forward purchase contract is not a section 1256 contract.) On November 1, 1989, the market price for the purchase of 100 New Zealand dollars for delivery on January 31, 1990, is $76. On November 1, 1989, X cancels its obligation under the forward purchase contract and pays Bank A $3.95 (the present value of $4 discounted at 12% for the period) in cancellation of such contract. Under section 1001 (a), X realizes an exchange loss of $3.95 on November 1, 1989, because cancellation of the forward purchase contract for cash results in the termination of X's contract.

Example 2. X is a corporation with the dollar as its functional currency. On January 1, 1989, X enters into a currency swap contract with Bank A under which X is obligated to make a series of Japanese yen payments in exchange for a series of dollar payments. On February 21, 1992, X has a gain of $100,000 inherent in such contract as a result of interest rate and exchange rate movements. Also on February 21, 1992, X enters into an offsetting swap with Bank A to lock in such gain. If on February 21, 1992, X pledges the gain inherent in such offsetting positions as collateral for a loan, X's initial swap contract is treated as being terminated on February 21, 1992, under paragraph (d)(2)(ii)(B) of this section. Proper adjustment is made in the amount of any gain or loss subsequently realized for the gain taken into account by reason of paragraph (d)(2)(ii)(B) of this section.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, X enters into a forward contract to buy 100,000 Swiss francs (Sf) for delivery on March l, 1990, for $51,220. Assume that the contract is a section 1256 contract under section 1256(g)(2) and that section 1256(e) does not apply. Pursuant to section 1256(a)(1), the forward contract is treated as sold for its fair market value on December 31, 1989. Assume that the fair market value of the contract is $1,000 determined under § 1.988–1(g). Thus X will realize an exchange gain of $1,000 on December 31, 1989. Such gain is subject to the character rules of § 1.988–3 and the source rules of § 1.988–4.

(v) *Extension of the maturity date of certain contracts.* An extension of time for making or taking delivery under a contract described in paragraph (d)(1) of this section (*e.g.,* a historical rate rollover as defined in § 1.988–5(b)(2)(iii)(C)) shall be considered a sale or exchange of the contract for its fair market value on the date of the extension and the establishment of a new contract on such date. If, under the terms of the extension, the time value of any gain or loss recognized pursuant to the preceding sentence adjusts the price of the currency to be bought or sold under the new contract, the amount attributable to such time value shall be treated as interest income or expense for all purposes of the Code. However, the preceding sentence shall not apply and the amount attributable to the time value of any gain or loss recognized shall be treated as exchange gain or loss if the period beginning on the first date the contract is rolled over and ending on the date payment is ultimately made or received with respect to such contract does not exceed 183 days.

(3) *Recognition of exchange gain or loss.* Except as provided in § 1.988–5 (relating to section 988 hedging transactions), exchange gain or loss realized with respect to a contract described in paragraph (d)(1) of this section shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. For example, a loss realized with respect to a contract described in paragraph (d)(1) of this section which is part of a straddle shall be recognized in accordance with the provisions of section 1092 to the extent such section is applicable.

(4) *Determination of exchange gain or loss*—(i) *In general.* Exchange gain or loss with respect to a contract described in § 1.988–2(d)(1) shall be determined by subtracting the amount paid (or deemed paid), if any, for or with respect to the contract (including any amount paid upon termination of the contract) from the amount received (or deemed received), if any, for or with respect to the contract (including any amount received upon termination of the contract). Any gain or loss determined according to the preceding sentence shall be treated as exchange gain or loss.

(ii) *Special rules where taxpayer makes or takes delivery.* If the taxpayer makes or takes delivery in connection with a contract described in paragraph (d)(1) of this section, any gain or loss shall be realized and recognized in the same manner as if the taxpayer sold the contract (or paid another person to assume the contract) on the date on which he took or made delivery for its fair market value on such date. See paragraph (d)(2)(iii) of this section regarding the definition of the term ''delivery date.'' This paragraph (d)(4)(ii) shall not apply in any case in which the taxpayer makes or takes delivery before June 11, 1987.

(iii) *Examples.* The following examples illustrate the application of paragraph (d)(4) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, when the six month forward rate is $.4907, X enters into a forward contract to buy 100,000 New Zealand dollars (NZD) for delivery on March 1, 1990. On March 1, 1990, when X takes delivery of the 100,000 NZD, the spot rate is 1NZD equals $.48. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery of nonfunctional currency under a forward contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery is taken. If X sold the contract on March 1, 1990, the transferee would require a payment of $1,070 [($.48×100,000NZD)−($.4907×100,000NZD)] to compensate him for the loss in value of the 100,000NZD. Therefore, X realizes an exchange loss of $1,070. X has a basis in the 100,000NZD of $48,000.

Example 2. Assume the same facts as in *Example 1* except that the contract is for Swiss francs and is a section 1256 contract. Assume further that on December 31, 1989, the value to X of the contract as marked to market is $1,000. Pursuant to section 1256(a), X realizes an exchange gain of $1,000. Such gain, however, is characterized as ordinary income under §1.988–3 and will be sourced under §1.988–4.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On May 2, 1989, X enters into an option contract with Bank A to purchase 50,000 Canadian dollars (C$) for U.S. $42,500 (C$1 = U.S. $.85) for delivery on or before September 18, 1989. X pays a $285 premium to Bank A to obtain the option contract. On September 18, 1989, when X exercises the option and takes delivery of the C$50,000, the spot rate is C$1 equals U.S. $.90. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery under an option contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery is taken. If X sold the contract for its fair market value on September 18, 1989, X would receive U.S. $2,500 [(C$50,000×U.S. $.90)−(C$50,000×U.S. $.85)]. Accordingly, X is deemed to have received U.S. $2,500 on the sale of the contract at its fair market value. X will realize U.S. $2,215 ($2,500 deemed received less $285 paid) of exchange gain with respect to the delivery of Canadian dollars under the option contract. X's basis in the 50,000 Canadian dollars is U.S. $45,000.

(5) [Reserved]

(e) *Currency swaps and other notional principal contracts*—(1) *In general.* Except as provided in paragraph (e)(2) of this section or in §1.988–5, the timing of income, deduction and loss with respect to a notional principal contract that is a section 988 transaction shall be governed by section 446 and the regulations thereunder. Such income, deduction and loss is characterized as exchange gain or loss (except as provided in another section of the Internal Revenue Code (or regulations thereunder), §1.988–5, or in paragraph (f) of this section).

(2) *Special rules for currency swaps*—(i) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section, the provisions of this paragraph (e)(2) shall apply solely for purposes of determining the realization, recognition and amount of exchange gain or loss with respect to a currency swap contract, and not for purposes of determining the source of such gain or loss, or characterizing such gain or loss as interest. Except as provided in §1.988–3(c), any income or loss realized with respect to a currency swap contract shall be characterized as exchange gain or loss (and not as interest income or expense). Any exchange gain or loss realized in accordance with this paragraph (e)(2) shall be recognized unless otherwise provided in an applicable section of the Code. For purposes of this paragraph (e)(2), a currency swap contract is a contract defined in paragraph (e)(2)(ii) of this section. With respect to a contract which requires the payment of swap principal prior to maturity of such contract, see paragraph (f) of this section. For purposes of this paragraph (e), the rules of paragraph (d)(2)(ii) of this section (regarding realization by offset) apply. See Example 2 of paragraph (d)(2)(iv) of this section.

(ii) *Definition of currency swap contract*—(A) *In general.* A currency swap contract is a contract involving different currencies between two or more parties to—

(*1*) Exchange periodic interim payments, as defined in paragraph (e)(2)(ii)(C) of this section, on or prior to maturity of the contract; and

(*2*) Exchange the swap principal amount upon maturity of the contract.

A currency swap contract may also require an exchange of the swap principal amount upon commencement of the agreement.

(B) *Swap principal amount.* The swap principal amount is an amount of two different currencies which, under the terms of the currency swap contract, is used to determine the periodic interim payments in each currency and which is exchanged upon maturity of the contract. If such amount is not clearly set forth in the contract, the Commissioner may determine the swap principal amount.

(C) *Exchange of periodic interim payments.* An exchange of periodic interim payments is an exchange of one or more payments in one currency specified by the contract for one or more payments in a different currency specified by the contract where the payments in each currency are computed by reference to an interest index applied to the swap principal amount. A currency swap contract must clearly indicate the periodic interim payments, or the interest index used to compute the periodic interim payments, in each currency.

(iii) *Timing and computation of periodic interim payments*—(A) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section and §1.988–5, the timing and computation of the periodic interim payments provided in a currency swap agreement shall be determined by treating—

(*1*) Payments made under the swap as payments made pursuant to a hypothetical borrowing that is denominated in the currency in which payments are required to be made (or are determined with reference to) under the swap, and

(*2*) Payments received under the swap as payments received pursuant to a hypothetical loan that is denominated in the currency in which payments are received (or are determined with reference to) under the swap.

Except as provided in paragraph (e)(2)(v) of this section, the hypothetical issue price of such hypothetical borrowing and loan shall be the swap principal amount. The hypothetical stated redemption price at maturity is the total of all payments (excluding any exchange of the swap principal amount at the inception of the contract) provided under the hypothetical borrowing or loan other than periodic interest payments under the principles of section 1273. For purposes of determining economic accrual under the currency swap, the number of hypothetical interest compounding periods of such hypothetical borrowing and loan shall be determined pursuant to a semiannual compounding convention unless the currency swap contract indicates otherwise. For purposes of determining the timing and amount of the periodic interim payments, the principles regarding the amortization of interest (see generally, sections 1272 through 1275 and 163(e)) shall apply to the hypothetical interest expense and income of such hypothetical borrowing and loan. However, such principles shall not apply to determine the time when principal is deemed to be paid on the hypothetical borrowing and loan. See paragraph (d)(2)(iii) of this section and *Example 2* of paragraph (d)(5) of this section with respect to the time when principal is deemed to be paid. With respect to the translation and computation of exchange gain or loss on any hypothetical interest income or expense, see §1.988–2(b). The amount treated as exchange gain or loss by the taxpayer with respect to the periodic interim payments for the taxable year shall be the amount of hypothetical interest income and exchange gain or loss attributable to such interest income from the hypothetical borrowing and loan for such year less the amount of hypothetical interest expense and exchange gain or loss attributable to the interest expense from such hypothetical borrowing and loan for such year.

(B) *Effect of prepayment for purposes of section 956.* For purposes of section 956, the Commissioner may treat any prepayment of a currency swap as a loan.

(iv) *Timing and determination of exchange gain or loss with respect to the swap principal amount.* Exchange gain or loss with respect to the swap principal amount shall be realized on the day the units of swap principal in each currency are exchanged. (See paragraph (e)(2)(ii)(A)(*2*) of this section which requires that the entire swap principal amount be exchanged upon maturity of the contract.) Such gain or loss shall be determined on the date of the exchange by subtracting the value (on such date) of the units of swap principal paid from the value of the units of swap principal received. This paragraph (e)(2)(iv) does not apply to an equal exchange of the swap principal amount at the commencement of the agreement at a market exchange rate.

(v) *Anti-abuse rules*—(A) *Method of accounting does not clearly reflect income.* If the taxpayer's method of accounting for income, expense, gain or loss attributable to a currency swap does not clearly reflect income, or if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may apply principles analogous to those of section 1274 or such other rules as the Commissioner deems appropriate to clearly reflect income. For example, in order to clearly reflect income the Commissioner may determine the hypothetical issue price, the hypothetical stated redemption price at maturity, and the amounts required to be taken into account within a taxable year. Further, if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may integrate the swap with another transaction (or transactions) in order to clearly reflect income.

(B) *Terms must be clearly stated.* If the currency swap contract does not clearly set forth the swap principal amount in each currency, and the periodic interim payments in each currency (or the interest index used to compute the periodic interim payments in each currency), the Commissioner may defer any income, deduction, gain or loss with respect to such contract until termination of the contract.

(3) *Amortization of swap premium or discount in the case of off-market currency swaps*—(i) *In general.* An ‘‘off-market currency swap’’ is a currency swap contract under which the present value of the payments to be made is not equal to that of the payments to be received on the day the taxpayer enters into or acquires the contract (absent the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section). Generally, such present values may not be equal if the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) is not the spot rate, or the interest indices used to compute the periodic interim payments do not reflect current values, on the day the taxpayer enters into or acquires the currency swap.

(ii) *Treatment of taxpayer entering into or acquiring an off-market currency swap.* If a taxpayer that enters into or acquires a currency swap makes a payment (that is, the taxpayer pays a premium, ‘‘swap premium,’’ to enter into or acquire the currency swap) or receives a payment (that is, the taxpayer enters into or acquires the currency swap at a discount, ‘‘swap discount’’) in order to make the present value of the amounts to be paid equal the amounts to be received, such payment shall be amortized in a manner which places the taxpayer in the same position it would have been in had the taxpayer entered into a currency swap contract under which the present value of the amounts to be paid equal the amounts to be received (absent any swap premium or discount). Thus, swap premium or discount shall be amortized as follows—

(A) The amount of swap premium or discount that is attributable to the difference between the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) and the spot rate on the date the contract is entered into or acquired shall be taken into account as income or expense on the date the swap principal amounts are taken into account; and

(B) The amount of swap premium or discount attributable to the difference in values of the periodic interim payments shall be amortized in a manner consistent with the principles of economic accrual. *Cf.,* section 171.

Any amount taken into account pursuant to this paragraph (e)(3)(ii) shall be treated as exchange gain or loss.

(iii) *Definition of swap exchange rate.* The swap exchange rate is the single exchange rate set forth in the contract at which the swap principal amounts are determined. If the swap exchange rate is not clearly set forth in the contract, the Commissioner may determine such rate.

(iv) [Reserved]

(4) *Treatment of taxpayer disposing of a currency swap.* Any gain or loss realized on the disposition or the termination of a currency swap is exchange gain or loss.

(5) *Examples.* The following examples illustrate the application of this paragraph (e).

Example 1. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, C enters into a currency swap with J with the following terms:

(1) the principal amount is $150 and 100 British pounds (£) (the equivalent of $150 on the effective date of the contract assuming a spot rate of £1 = $1.50 on January 1, 1989);

(2) C will make payments equal to 10% of the dollar principal amount on December 31, 1989, and December 31, 1990;

(3) J will make payments equal to 12% of the pound principal amount on December 31, 1989, and December 31, 1990; and

(4) on December 31, 1990, C will pay to J the $150 principal amount and J will pay to C the £100 principal amount.

Assume that the spot rate is £1 = $1.50 on January 1, 1989, £1 = $1.40 on December 31, 1989, and £1 = $1.30 on December 31, 1990. Assume further that the average rate for 1989 is £1 = $1.45 and for 1990 is £1 = $1.35.

(ii) Solely for determining the realization of gain or loss in accordance with paragraph (e)(2) of this section (and not for purposes of determining whether any payments are treated as interest), C will treat the dollar payments made by C as payments made pursuant to a dollar borrowing with an issue price of $150, a stated redemption price at maturity of $150, and yield to maturity of 10%. C will treat the pound payments received as payments received pursuant to a pound loan with an issue price of £100, a stated redemption price at maturity of £100, and a yield of 12% to maturity. Pursuant to § 1.988–2(b), C is required to compute hypothetical accrued pound interest income at the average rate for the accrual period and then determine exchange gain or loss on the day payment is received with respect to such accrued amount. Accordingly, C will accrue $17.40 (£12×$1.45) in 1989 and $16.20 (£12×$1.35) in 1990. C also will compute hypothetical exchange loss of $.60 on December 31, 1989 [(£12×$1.40)−(£12×$1.45)] and hypothetical exchange loss of $.60 on December 31, 1990 [(£12×$1.30)−(£12×$1.35)]. All such hypothetical interest income and exchange loss are characterized and sourced as exchange gain and loss. Further, C is treated as having paid $15 ($150×10%) of hypothetical interest on December 31, 1989, and again on December 31, 1990. Such hypothetical interest expense is characterized and sourced as exchange loss. Thus, C will have a net exchange gain of $1.80 ($17.40−$.60−$15.00) with respect to the periodic interim payments in 1989 and a net exchange gain of $.60 ($16.20−$.60−$15.00) with respect to the periodic interim payments in 1990. Finally, C will realize an exchange loss on December 31, 1990, with respect to the exchange of the swap principal amount. This loss is determined by subtracting the value of the units of swap principal paid ($150) from the value of the units of swap principal received (£100×$1.30 = $130) resulting in a $20 exchange loss.

Example 2. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, when the spot rate is £1 = $1.50, C enters into a currency swap contract with J under which C agrees to make and receive the following payments:

Date	C pays	J pays
December 31, 1989	$15.00	£12.00
December 31, 1990	41.04	12.00
December 31, 1991	0.00	12.00
December 31, 1992	150.00	112.00

(ii) Under paragraph (e)(2)(iii) of this section, C must treat the dollar periodic interim payments under the swap as made pursuant to a hypothetical dollar borrowing. The hypothetical issue price is $150 and the stated redemption price at maturity is $206.04. The amount of hypothetical interest expense must be amortized in accordance with economic accrual. Thus J must include and C must deduct periodic interim payment amounts as follows:

	Amount taken into account	Adjusted issue price
December 31, 1989	$15.00	150.00
December 31, 1990	$15.00	123.96
December 31, 1991	$12.40	136.36
December 31, 1992	$13.64	

(iii) Gain or loss with respect to the periodic interim payments of the currency swap is determined under paragraph (e)(2)(iii)(A) of this section with respect to the dollar cash flow amortized as set forth above and the corresponding pound cash flow as stated in the currency swap contract. Gain or loss with respect to the principal payments (*i.e.*, $150 and £100) exchanged on December 31, 1992, is determined under paragraph (e)(2)(iv) of this section on December 31, 1992, notwithstanding that under the principles regarding amortization of interest $26.04 would have been regarded as a payment of principal on December 31, 1990.

Example 3. (i) X is a corporation on the accrual method of accounting with the dollar as its functional currency and the calendar year as its taxable year. On January 1, 1989, X enters into a three year currency swap contract with Y with the following terms. The swap principal amount is $100 and the Swiss franc (Sf) equivalent of such amount which equals Sf200 translated at the swap exchange rate of $1 = Sf2. There is no initial exchange of the swap principal amount. The interest rates used to compute the periodic interim payments are 10% compounded annually for U.S. dollar payments and 5% compounded annually for Swiss franc payments. Thus, under the currency swap, X agrees to pay Y $10 (10%×$100) on December 31st of 1989, 1990 and 1991 and to pay Y the swap principal amount of $100 on December 31, 1991. Y agrees to pay X Sf10 (5%×Sf200) on December 31st of 1989, 1990 and 1991 and to pay X the swap principal amount of Sf200 on December 31, 1991. Assume that the average rate for 1989 and the spot rate on December 31, 1989, is $1 = Sf2.5.

(ii) Under paragraph (e)(2)(iii) of this section, on December 31, 1989, X will realize an exchange loss of $6 (the sum of $10 of loss by reason of the $10 periodic interim payment paid to Y and $4.00 of gain, the value of Sf10 on December 31, 1989, from the receipt of Sf10 on such date).

(iii) On January 1, 1990, X transfers its rights and obligations under the swap contract to Z, an unrelated corporation. Z has the dollar as its functional currency, is on the accrual method of accounting, and has the calendar year as its taxable year. On January 1, 1990, the exchange rate is $1 = Sf2.50. The relevant dollar interest rate is 8% compounded annually and the relevant Swiss franc interest rate is 5% compounded annually. Because of the movement in exchange and interest rates, the agreement between X and Z to transfer the currency swap requires X to pay Z $23.56 (the swap discount as determined under paragraph (e)(3) of this section).

(iv) Pursuant to paragraph (e)(4) of this section, X may deduct the loss of $23.56 in 1990. The loss is characterized under § 1.988–3 and sourced under § 1.988–4.

(v) Pursuant to paragraph (e)(3)(ii) of this section, Z is required to amortize the $23.56 received as follows. The amount of the $23.56 payment that is attributable to movements in exchange rates ($20) is taken into account on December 31, 1991, the date the swap principal amounts are exchanged, under paragraph (e)(3)(ii)(A) of this section. This amount is the present value (discounted at 10%, the rate under the currency swap contract used to compute the dollar periodic interim payments) of the financial asset required to compensate Z for the loss in value of the hypothetical Swiss franc loan resulting from movements in exchange rates between January 1, 1989, and January 1, 1990. This amount is determined by assuming that interest rates did not change from the date the swap originally was entered into (January 1, 1989), but that the exchange rate is $1 = Sf2.50. Under this assumption, a taxpayer undertaking the obligation to pay dollars under the currency swap on January 1, 1990, would only agree to pay $8 for Sf10 on December 31, 1990, and $88 for Sf210 on December 31, 1991, because the exchange rates have moved from $1 = Sf2 to $1 = Sf2.50. Thus, Z requires $2 on December 31, 1990, and $22 on December 31, 1991, to compensate for the amount of dollar payments Z is required to make in exchange for the Swiss francs received on December 31, 1990 and 1991. The present value of $2 on December 31, 1990, and $22 on December 31, 1991, discounted at the rate for U.S. dollar payments of 10% is $20 ($1.82+$18.18). This amount is discounted at the rate for U.S. dollar payments (i.e., at the historic rate) because the amount of the $23.56 payment received by Z that is attributable to movements in interest rates is computed and amortized separately as provided in the following paragraph.

(vi) Pursuant to paragraph (e)(3)(ii)(B) of this section, Z is required to amortize the portion of the $23.56 payment attributable to movements in interest rates under principles of economic accrual over the term of the currency swap agreement. The amount of the $23.56 payment that is attributable to movements in interest rates (assuming that exchange rates have not changed) is the present value ($3.56) of the excess ($2.00 in 1990 and $2.00 in 1991) of the periodic interim payments Z is required to pay under the currency swap agreement ($10 in 1990 and $10 in 1991) over the amount Z would be required to pay if the currency swap agreement reflected current interest rates on the day Z acquired the swap contract ($8 in 1990 and $8 in 1991) discounted at the appropriate dollar interest rate on January 1, 1990. Thus, under principles of economic accrual (e.g., see section 171 of the Code), Z will include in income $1.72 on December 31, 1990, the amount that, when added to the interest ($.28) on the $3.56 computed at the 8% rate on the date Z acquired the currency swap contract, will equal the $2.00 needed to compensate Z for the movement in interest rates between January 1, 1989, and January 1, 1990. Z also will include in income $1.85 on December 31, 1991, the amount that, when added to the interest ($.15) on the $1.85 (the remaining balance of the $3.56 payment) computed at the 8% rate on the date Z acquired the currency swap contract, will equal the $2.00 needed to compensate Z for the movement in interest rates between January 1, 1990, and January 1, 1991. This amount is computed assuming exchange rates have not changed because the amount attributable to movements in exchange rates is computed and amortized separately under the preceding paragraph.

(6) *Special effective date for rules regarding currency swaps.* Paragraph (e)(3) of this section regarding amortization of swap premium or discount in the case of off-market currency swaps shall be effective for transactions entered into after September 21, 1989, unless such swap premium or discount was paid or received pursuant to a binding contract with an unrelated party that was entered into prior to such date. For transactions entered into prior to this date, see Notice 89–21, 1989–8 I.R.B. 23.

(7) [Reserved]

(f) *Substance over form*—(1) *In general.* If the substance of a transaction described in § 1.988–1(a)(1) differs from its form, the timing, source, and character of gains or losses with respect to such transaction may be recharacterized by the Commissioner in accordance with its substance. For example, if a taxpayer enters into a transaction that it designates a ''currency swap contract'' that requires the prepayment of all payments to be made or to be received (but not both), the Commissioner may recharacterize the contract as a loan. In applying the substance over form principle, separate transactions may be integrated where appropriate. See also § 1.861–9T(b)(1).

(2) *Example.* The following example illustrates the provisions of this paragraph (f).

Example. (i) On January 1, 1990, X, a U.S. corporation with the dollar as its functional currency, enters into a contract with Y under which X will pay Y $100 and Y will pay X LC100 on January 1, 1990, and X will pay Y LC109.3 and Y will pay X $133 on December 31, 1992. On January 1, 1990, the spot exchange rate is LC1 = $1 and the 3 year forward rate is LC1 = $.8218. X's cash flows are summarized below:

Date	Dollar	LC
1/1/90	(100)	100
12/31/90	0	0
12/31/91	0	0
12/31/92	133	(109.3)

(ii) X and Y designate this contract as a ''currency swap.'' Notwithstanding this designation, for purposes of determining the timing, source, and character with respect to the transaction, the transaction is characterized by the Commissioner in accordance with its substance. Thus, the January 1, 1990, exchange by X of $100 for LC 100 is treated as a spot purchase of LCs by X and the December 31, 1992, exchange by X at 109.3LC for $133 is treated as a forward sale of LCs by X. Under such treatment there would be no tax consequences to X under paragraph (e)(2) of this section in 1990, 1991, and 1992 with respect to this transaction other than the realization of exchange gain or loss on the sale of the LC109.3 on December 31, 1992. Calculation of such gain or loss would be governed by the rules of paragraph (d) of this section.

(g) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

(h) *Timing of income and deductions from notional principal contracts.* Except as otherwise provided (e.g., in § 1.988–5 or 1.446–3(g)), income or loss from a notional principal contract described in § 1.988–1(a)(2)(iii)(B) (other than a currency swap) is exchange gain or loss. For the rules governing the timing of income and deductions with respect to notional principal contracts, see § 1.446–3. See paragraph (e)(2) of this section with respect to currency swaps.

[T.D. 8400, 57 FR 9183, Mar. 17, 1992, as amended by T.D. 8491, 58 FR 53135, Oct. 14, 1993]

§ 1.988–3 Character of exchange gain or loss.

(a) *In general.* The character of exchange gain or loss recognized on a section 988 transaction is governed by section 988 and this section. Except as otherwise provided in section 988(c)(1)(E), section 1092, § 1.988–5 and this section, exchange gain or loss realized with respect to a section 988 transaction (including a section 1256 contract that is also a section 988 transaction) shall be characterized as ordinary gain or loss. Accordingly, unless a valid election is made under paragraph (b) of this section, any section providing special rules for capital gain or loss treatment, such as sections 1233, 1234, 1234A, 1236 and 1256(f)(3), shall not apply.

(b) *Election to characterize exchange gain or loss on certain identified forward contracts, futures contracts and option contracts as capital gain or loss*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a taxpayer may elect, subject to the requirements of paragraph (b)(3) of this section, to treat any gain or loss recognized on a contract described in § 1.988–2(d)(1) as capital gain or loss, but only if the contract—

(i) Is a capital asset in the hands of the taxpayer;

(ii) Is not part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)); and

(iii) Is not a regulated futures contract or nonequity option with respect to which an election under section 988(c)(1)(D)(ii) is in effect.

If a valid election under this paragraph (b) is made with respect to a section 1256 contract, section 1256 shall govern the character of any gain or loss recognized on such contract.

(2) *Special rule for contracts that become part of a straddle after an election is made.* If a contract which is the subject of an election under paragraph (b)(1) of this section becomes part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)) after the date of the election, the election shall be invalid with respect to gains from such contract and the Commissioner, in his sole discretion, may invalidate the election with respect to losses.

(3) *Requirements for making the election.* A taxpayer elects to treat gain or loss on a transaction described in paragraph (b)(1) of this section as capital gain or loss by clearly identifying such transaction on its books and records on the date the transaction is entered into. No specific language or account is necessary for identifying a transaction referred to in the preceding sentence. However, the method of identification must be consistently applied and must clearly identify the pertinent transaction as subject to the section 988(a)(1)(B) election. The Commissioner, in his sole discretion, may invalidate any purported election that does not comply with the preceding sentence.

(4) *Verification.* A taxpayer that has made an election under §1.988–3(b)(3) must attach to his income tax return a statement which sets forth the following:

(i) A description and the date of each election made by the taxpayer during the taxpayer's taxable year;

(ii) A statement that each election made during the taxable year was made before the close of the date the transaction was entered into;

(iii) A description of any contract for which an election was in effect and the date such contract expired or was otherwise sold or exchanged during the taxable year;

(iv) A statement that the contract was never part of a straddle as defined in section 1092; and

(v) A statement that all transactions subject to the election are included on the statement attached to the taxpayer's income tax return.

In addition to any penalty that may otherwise apply, the Commissioner, in his sole discretion, may invalidate any or all elections made during the taxable year under §1.988–3(b)(1) if the taxpayer fails to verify each election as provided in this §1.988–3(b)(4). The preceding sentence shall not apply if the taxpayer's failure to verify each election was due to reasonable cause or bona fide mistake. The burden of proof to show reasonable cause or bona fide mistake made in good faith is on the taxpayer.

(5) *Independent verification*—(i) *Effect of independent verification.* If the taxpayer receives independent verification of the election in paragraph (b)(3) of this section, the taxpayer shall be presumed to have satisfied the requirements of paragraphs (b)(3) and (4) of this section. A contract that is a part of a straddle as defined in section 1092 may not be independently verified and shall be subject to the rules of paragraph (b)(2) of this section.

(ii) *Requirements for independent verification.* A taxpayer receives independent verification of the election in paragraph (b)(3) of this section if—

(A) The taxpayer establishes a separate account(s) with an unrelated broker(s) or dealer(s) through which all transactions to be independently verified pursuant to this paragraph (b)(5) are conducted and reported.

(B) Only transactions entered into on or after the date the taxpayer establishes such account may be recorded in the account.

(C) Transactions subject to the election of paragraph (b)(3) of this section are entered into such account on the date such transactions are entered into.

(D) The broker or dealer provides the taxpayer a statement detailing the transactions conducted through such account and includes on such statement the following: ‘‘Each transaction identified in this account is subject to the election set forth in section 988(a)(1)(B).''

(iii) *Special effective date for independent verification.* The rules of this paragraph (b)(5) shall be effective for transactions entered into after March 17, 1992.

(6) *Effective date.* Except as otherwise provided, this paragraph (b) is effective for taxable years beginning on or after September 21, 1989. For prior taxable years, any reasonable contemporaneous election meeting the requirements of section 988(a)(1)(B) shall satisfy this paragraph (b).

(c) *Exchange gain or loss treated as interest*—(1) *In general.* Except as provided in this paragraph (c)(1), exchange gain or loss realized on a section 988 transaction shall not be treated as interest income or expense. Exchange gain or loss realized on a section 988 transaction shall be treated as interest income or expense as provided in paragraph (c)(2) of this section with regard to tax exempt bonds, § 1.988–2(e)(2)(ii)(B), § 1.988–5, and in administrative pronouncements. See § 1.861–9T(b), providing rules for the allocation of certain items of exchange gain or loss in the same manner as interest expense.

(2) *Exchange loss realized by the holder on nonfunctional currency tax exempt bonds.* Exchange loss realized by the holder of a debt instrument the interest on which is excluded from gross income under section 103(a) or any similar provision of law shall be treated as an offset to and reduce total interest income received or accrued with respect to such instrument. Therefore, to the extent of total interest income, no exchange loss shall be recognized. This paragraph (c)(2) shall be effective with respect to debt instruments acquired on or after June 24, 1987.

(d) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section. Thus, for example, a payment made prior to January 1, 1987, under a forward contract that results in the deferral of a loss under section 1092 to a taxable year beginning after December 31, 1986, is not characterized as an ordinary loss by virtue of paragraph (a) of this section because payment was made prior to January 1, 1987.

[T.D. 8400, 57 FR 9197, Mar. 17, 1992]

§ 1.988–4 Source of gain or loss realized on a section 988 transaction.

(a) *In general.* Except as otherwise provided in § 1.988–5 and this section, the source of exchange gain or loss shall be determined by reference to the residence of the taxpayer. This rule applies even if the taxpayer has made an election under § 1.988–3(b) to characterize exchange gain or loss as capital gain or loss. This section takes precedence over section 865.

(b) *Qualified business unit*—(1) *In general.* The source of exchange gain or loss shall be determined by reference to the residence of the qualified business unit of the taxpayer on whose books the asset, liability, or item of income or expense giving rise to such gain or loss is properly reflected.

(2) *Proper reflection on the books of the taxpayer or qualified business unit*—(i) *In general.* Whether an asset, liability, or item of income or expense is properly reflected on the books of a qualified business unit is a question of fact.

(ii) *Presumption if booking practices are inconsistent.* It shall be presumed that an asset, liability, or item of income or expense is not properly reflected on the books of the qualified business unit if the taxpayer and its qualified business units employ inconsistent booking practices with respect to the same or similar assets, liabilities, or items of income or expense. If not properly reflected on the books, the Commissioner may allocate any asset, liability, or item of income or expense between or among the taxpayer and its qualified business units to properly reflect the source (or realization) of exchange gain or loss.

(c) *Effectively connected exchange gain or loss.* Notwithstanding paragraphs (a) and (b) of this section, exchange gain or loss that under principles similar to those set forth in § 1.864–4(c) arises from the conduct of a United States trade or business shall be sourced in the United States and such gain or loss shall be treated as effectively connected to the conduct of a United States trade or business for purposes of sections 871(b) and 882 (a)(1).

(d) *Residence*—(1) *In general.* Except as otherwise provided in this paragraph (d), for purposes of sections 985 through 989, the residence of any person shall be—

(i) In the case of an individual, the country in which such individual's tax home (as defined in section 911(d)(3)) is located;

(ii) In the case of a corporation, partnership, trust or estate which is a United States person (as defined in section 7701(a)(30)), the United States; and

(iii) In the case of a corporation, partnership, trust or estate which is not a United States person, a country other than the United States.

If an individual does not have a tax home (as defined in section 911(d)(3)), the residence of such individual shall be the United States if such individual is a United States citizen or a resident alien and shall be a country other than the United States if such individual is not a United States citizen or resident alien. If the taxpayer is a U.S. person and has no principal place of business outside the United States, the residence of the taxpayer is the United States. Notwithstanding paragraph (d)(1)(ii) of this section, if a partnership is formed or availed of to avoid tax by altering the source of exchange gain or loss, the source of such gain or loss shall be determined by reference to the residence of the partners rather than the partnership.

(2) *Exception.* In the case of a qualified business unit of any taxpayer (including an individual), the residence of such unit shall be the country in which the principal place of business of such qualified business unit is located.

(3) *Partner in a partnership not engaged in a U.S. trade or business under section 864(b)(2).* The determination of residence shall be made at the partner level (without regard to whether the partnership is a qualified business unit of the partners) in the case of partners in a partnership that are not engaged in a U.S. trade or business by reason of section 864(b)(2).

(e) *Special rule for certain related party loans*—(1) *In general.* In the case of a loan by a United States person or a related person to a 10 percent owned foreign corporation, or a corporation that meets the 80 percent foreign business requirements test of section 861(c)(1), other than a corporation subject to §1.861–11T(e)(2)(i), which is denominated in, or determined by reference to, a currency other than the U.S. dollar and bears interest at a rate at least 10 percentage points higher than the Federal mid-term rate (as determined under section 1274(d)) at the time such loan is entered into, the following rules shall apply—

(i) For purposes of section 904 only, such loan shall be marked to market annually on the earlier of the last business day of the United States person's (or related person's) taxable year or the date the loan matures; and

(ii) Any interest income earned with respect to such loan for the taxable year shall be treated as income from sources within the United States to the extent of any notional loss attributable to such loan under paragraph (d)(1)(i) of this section.

(2) *United States person.* For purposes of this paragraph (e), the term ''United States person'' means a person described in section 7701(a)(30).

(3) *Loans by related foreign persons*—(i) *In general.* [Reserved]

(ii) *Definition of related person.* For purposes of this paragraph (e), the term ''related person'' has the meaning given such term by section 954(d)(3) except that such section shall be applied by substituting ''United States person'' for ''controlled foreign corporation'' each place such term appears.

(4) *10 percent owned foreign corporation.* For purposes of this paragraph (e), the term ''10 percent owned foreign corporation'' means any foreign corporation in which the United States person owns directly or indirectly (within the meaning of section 318(a)) at least 10 percent of the voting stock.

(f) *Exchange gain or loss treated as interest under §1.988–3.* Notwithstanding the provisions of this section, any gain or loss realized on a section 988 transaction that is treated as interest income or expense under §1.988–3(c)(1) shall be sourced or allocated and apportioned pursuant to section 861(a)(1), 862(a)(1), or 864(e) as the case may be.

(g) *Exchange gain or loss allocated in the same manner as interest under § 1.861–9T.* The allocation and apportionment of exchange gain or loss under § 1.861–9T shall not affect the source of exchange gain or loss for purposes of sections 871(a), 881, 1441, 1442 and 6049.

(h) *Effective date.* This section shall be effective for taxable years beginning after December 31, 1986. Thus, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

[T.D. 8400, 57 FR 9199, Mar. 17, 1992]

§ 1.988–5 Section 988(d) hedging transactions.

(a) *Integration of a nonfunctional currency debt instrument and a § 1.988–5(a) hedge*—(1) *In general.* This paragraph (a) applies to a qualified hedging transaction as defined in this paragraph (a)(1). A qualified hedging transaction is an integrated economic transaction, as provided in paragraph (a)(5) of this section, consisting of a qualifying debt instrument as defined in paragraph (a)(3) of this section and a § 1.988–5(a) hedge as defined in paragraph (a)(4) of this section. If a taxpayer enters into a transaction that is a qualified hedging transaction, no exchange gain or loss is recognized by the taxpayer on the qualifying debt instrument or on the § 1.988–5(a) hedge for the period that either is part of a qualified hedging transaction, and the transactions shall be integrated as provided in paragraph (a)(9) of this section. However, if the qualified hedging transaction results in a synthetic nonfunctional currency denominated debt instrument, such instrument shall be subject to the rules of § 1.988–2(b).

(2) *Exception.* This paragraph (a) does not apply with respect to a qualified hedging transaction that creates a synthetic asset or liability denominated in, or determined by reference to, a currency other than the U.S. dollar if the rate that approximates the Federal short-term rate in such currency is at least 20 percentage points higher than the Federal short term rate (determined under section 1274(d)) on the date the taxpayer identifies the transaction as a qualified hedging transaction.

(3) *Qualifying debt instrument*—(i) *In general.* A qualifying debt instrument is a debt instrument described in § 1.988–1(a)(2)(i), regardless of whether denominated in, or determined by reference to, nonfunctional currency (including dual currency debt instruments, multi-currency debt instruments and contingent payment debt instruments). A qualifying debt instrument does not include accounts payable, accounts receivable or similar items of expense or income.

(ii) *Special rule for debt instrument of which all payments are proportionately hedged.* If a debt instrument satisfies the requirements of paragraph (a)(3)(i) of this section, and all principal and interest payments under the instrument are hedged in the same proportion, then for purposes of this paragraph (a), that portion of the instrument that is hedged is eligible to be treated as a qualifying debt instrument, and the rules of this paragraph (a) shall apply separately to such qualifying debt instrument. See Example 8 in paragraph (a)(9)(iv) of this section.

(4) *Section 1.988–5(a) hedge*—(i) *In general.* A § 1.988–5(a) hedge (hereinafter referred to in this paragraph (a) as a ‘‘hedge’’) is a spot contract, futures contract, forward contract, option contract, notional principal contract, currency swap contract, similar financial instrument, or series or combination thereof, that when integrated with a qualifying debt instrument permits the calculation of a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section).

(ii) *Retroactive application of definition of currency swap contract.* A taxpayer may apply the definition of currency swap contract set forth in § 1.988–2(e)(2)(ii) in lieu of the definition of swap agreement in section 2(e)(5) of Notice 87–11, 1987–1 C.B. 423 to transactions entered into after December 31, 1986 and before September 21, 1989.

(5) *Definition of integrated economic transaction.* A qualifying debt instrument and a hedge are an integrated

economic transaction if all of the following requirements are satisfied—

(i) All payments to be made or received under the qualifying debt instrument (or amounts determined by reference to a nonfunctional currency) are fully hedged on the date the taxpayer identifies the transaction under paragraph (a) of this section as a qualified hedging transaction such that a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section) can be calculated. Any contingent payment features of the qualifying debt instrument must be fully offset by the hedge such that the synthetic debt instrument is not classified as a contingent payment debt instrument. See Examples 6 and 7 of paragraph (a)(9)(iv) of this section.

(ii) The hedge is identified in accordance with paragraph (a)(8) of this section on or before the date the acquisition of the financial instrument (or instruments) constituting the hedge is settled or closed.

(iii) None of the parties to the hedge are related. The term ‘‘related’’ means the relationships defined in section 267(b) or section 707(b).

(iv) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the qualifying debt instrument and the hedge are properly reflected on the books of such qualified business unit throughout the term of the qualified hedging transaction.

(v) Subject to the limitations of paragraph (a)(5) of this section, both the qualifying debt instrument and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the qualifying debt instrument and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(vi) With respect to a foreign person engaged in a U.S. trade or business that enters into a qualifying debt instrument or hedge through such trade or business, all items of income and expense associated with the qualifying debt instrument and the hedge (other than interest expense that is subject to §1.882–5), would have been effectively connected with such U.S. trade or business throughout the term of the qualified hedging transaction had this paragraph (a) not applied.

(6) *Special rules for legging in and legging out of integrated treatment*—(i) *Legging in.* ‘‘Legging in’’ to integrated treatment under this paragraph (a) means that a hedge is entered into after the date the qualifying debt instrument is entered into or acquired, and the requirements of this paragraph (a) are satisfied on the date the hedge is entered into (‘‘leg in date’’). If a taxpayer legs into integrated treatment, the following rules shall apply—

(A) Exchange gain or loss shall be realized with respect to the qualifying debt instrument determined solely by reference to changes in exchange rates between—

(*1*) The date the instrument was acquired by the holder, or the date the obligor assumed the obligation to make payments under the instrument; and

(*2*) The leg in date.

(B) The recognition of such gain or loss will be deferred until the date the qualifying debt instrument matures or is otherwise disposed of.

(C) The source and character of such gain or loss shall be determined on the leg in date as if the qualifying debt instrument was actually sold or otherwise terminated by the taxpayer.

(ii) *Legging out.* With respect to a qualifying debt instrument and hedge that are properly identified as a qualified hedging transaction, ‘‘legging out’’ of integrated treatment under this paragraph (a) means that the taxpayer disposes of or otherwise terminates all or a part of the qualifying debt instrument or hedge prior to maturity of the qualified hedging transaction, or the taxpayer changes a material term of the qualifying debt instrument (*e.g.*, exercises an option to change the interest rate or index, or the maturity date) or hedge (*e.g.*, changes the interest or exchange rates underlying the hedge, or the expiration date) prior to maturity of the qualified hedging transaction. A taxpayer that disposes of or terminates a qualified hedging transaction (*i.e.,* disposes of or terminates both the qualifying transaction and the hedge on the same day) shall be considered to have disposed of or otherwise terminated the synthetic debt instrument rather than as legging out. If a taxpayer legs out of integrated treatment, the following rules shall apply—

(A) The transaction will be treated as a qualified hedging transaction during the time the requirements of this paragraph (a) were satisfied.

(B) If the hedge is disposed of or otherwise terminated, the qualifying debt instrument shall be treated as sold for its fair market value on the date the hedge is disposed of or otherwise terminated (the ''leg-out date''), and any gain or loss (including gain or loss resulting from factors other than movements in exchange rates) from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date shall be used to determine exchange gain or loss on the debt instrument for the period beginning on the leg-out date and ending on the date such instrument matures or is disposed of or otherwise terminated. Proper adjustment to the principal amount of the debt instrument must be made to reflect any gain or loss taken into account. The netting rule of § 1.988–2(b)(8) shall apply.

(C) If the qualifying debt instrument is disposed of or otherwise terminated, the hedge shall be treated as sold for its fair market value on the date the qualifying debt instrument is disposed of or otherwise terminated (the ''leg-out date''), and any gain or loss from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date shall be used to determine exchange gain or loss on the hedge for the period beginning on the leg-out date and ending on the date such hedge is disposed of or otherwise terminated.

(D) Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), that part of the qualified hedging transaction that has not been terminated (*i.e.,* the remaining debt instrument in its entirety even if partially hedged, or hedge) cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

(E) If a taxpayer legs out of a qualified hedging transaction and realizes a gain with respect to the terminated instrument, then paragraph (a)(6)(ii)(B) or (C) of this section, as appropriate, shall not apply if during the period beginning 30 days before the leg-out date and ending 30 days after that date the taxpayer enters into another transaction that hedges at least 50% of the remaining currency flow with respect to the qualifying debt instrument which was part of the qualified hedging transaction (or, if appropriate, an equivalent amount under the § 1.988–5 hedge which was part of the qualified hedging transaction).

(7) *Transactions part of a straddle.* At the discretion of the Commissioner, a transaction shall not satisfy the requirements of paragraph (a)(5) of this section if the debt instrument making up the qualified hedging transaction is part of a straddle as defined in section 1092(c) prior to the time the qualified hedging transaction is identified.

(8) *Identification requirements*—(i) *Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record for each qualified hedging transaction the following information—

(A) The date the qualifying debt instrument and hedge were entered into;

(B) The date the qualifying debt instrument and the hedge are identified as constituting a qualified hedging transaction;

(C) The amount that must be deferred, if any, under paragraph (a)(6) of this section and the source and character of such deferred amount;

(D) A description of the qualifying debt instrument and the hedge; and

(E) A summary of the cash flow resulting from treating the qualifying debt instrument and the hedge as a qualified hedging transaction.

(ii) *Identification by trustee on behalf of beneficiary.* A trustee of a trust that enters into a qualified hedging transaction may satisfy the identification requirements described in paragraph (a)(8)(i) of this section on behalf of a beneficiary of such trust.

(iii) *Identification by the Commissioner.* If—

(A) A taxpayer enters into a qualifying debt instrument and a hedge but fails to comply with one or more of the requirements of this paragraph (a), and

(B) On the basis of all the facts and circumstances, the Commissioner concludes that the qualifying debt instrument and the hedge are, in substance, a qualified hedging transaction,

then the Commissioner may treat the qualifying debt instrument and the hedge as a qualified hedging transaction. The Commissioner may identify a qualifying debt instrument and a hedge as a qualified hedging transaction regardless of whether the qualifying debt instrument and the hedge are held by the same taxpayer.

(9) *Taxation of qualified hedging transactions*—(i) *In general*—(A) *General rule.* If a transaction constitutes a qualified hedging transaction, the qualifying debt instrument and the hedge are integrated and treated as a single transaction with respect to the taxpayer that has entered into the qualified hedging transaction during the period that the transaction qualifies as a qualified hedging transaction. Neither the qualifying debt instrument nor the hedge that makes up the qualified hedging transaction shall be subject to section 263(g), 1092 or 1256 for the period such transactions are integrated. However, the qualified hedging transaction may be subject to section 263(g) or 1092 if such transaction is part of a straddle.

(B) *Special rule for income or expense of foreign persons effectively connected with a U.S. trade or business.* Interest income of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph (a)(5)(vii) of this section shall be treated as effectively connected with a U.S. trade or business. Interest expense of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph (a)(5)(vii) of this section shall be allocated and apportioned under §1.882–5 of the regulations.

(C) *Special rule for foreign persons that enter into qualified hedging transactions giving rise to U.S. source income not effectively connected with a U.S. trade or business.* If a foreign person enters into a qualified hedging transaction that gives rise to U.S. source interest income (determined under the source rules for synthetic asset transactions as provided in this section) not effectively connected with a U.S. trade or business of such foreign person, for purposes of sections 871(a), 881, 1441, 1442 and 6049, the provisions of this paragraph (a) shall not apply and such sections of the Internal Revenue Code shall be applied separately to the qualifying debt instrument and the hedge. To the extent relevant to any foreign person, if the requirements of this paragraph (a) are otherwise met, the provisions of this paragraph (a) shall apply for all other purposes of the Internal Revenue Code (*e.g.*, for purposes of calculating the earnings and profits of a controlled foreign corporation that enters into a qualified hedging transaction through a qualified business unit resident outside the United States, income or expense with respect to such qualified hedging transaction shall be calculated under the provisions of this paragraph (a)).

(ii) *Income tax effects of integration.* The effect of integrating and treating a transaction as a single transaction is to create a synthetic debt instrument for income tax purposes, which is subject to the original issue discount provisions of sections 1272 through 1288 and 163(e), the terms of which are determined as follows:

(A) *Denomination of synthetic debt instrument.* In the case where the qualifying debt instrument is a borrowing, the denomination of the synthetic debt instrument is the same as the currency paid under the terms of the hedge to acquire the currency used to make payments under the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the denomination of the synthetic debt instrument is the same as the currency received under the terms of the hedge in exchange for amounts received under the qualifying debt instrument. For example, if the hedge is a forward contract to acquire British pounds for dollars, and the qualifying debt instrument is a borrowing denominated in

British pounds, the synthetic debt instrument is considered a borrowing in dollars.

(B) *Term and accrual periods.* The term of the synthetic debt instrument shall be the period beginning on the identification date and ending on the date the qualifying debt instrument matures or such earlier date that the qualifying debt instrument or hedge is disposed of or otherwise terminated. Unless otherwise clearly indicated by the payment interval under the hedge, the accrual period shall be a six month period which ends on the dates determined under section 1272(a)(5).

(C) *Issue price.* The issue price of the synthetic debt instrument is the adjusted issue price of the qualifying debt instrument translated into the currency in which the synthetic debt instrument is denominated at the spot rate on the identification date.

(D) *Stated redemption price at maturity.* In the case where the qualifying debt instrument is a borrowing, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be paid under the hedge to acquire the currency necessary to make interest and principal payments on the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be received under the hedge in exchange for the interest and principal payments received pursuant to the terms of the qualifying debt instrument.

(iii) *Source of interest income and allocation of expense.* Interest income from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be sourced by reference to the source of income under sections 861 (a)(1) and 862(a)(1) of the qualifying debt instrument. The character for purposes of section 904 of interest income from a synthetic debt instrument shall be determined by reference to the character of the interest income from qualifying debt instrument. Interest expense from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be allocated and apportioned under §§ 1.861–8T through 1.861–12T or the successor sections thereof or under § 1.882–5.

(iv) *Examples.* The following examples illustrate the application of this paragraph (a)(9).

Example 1. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1989, K agrees to close the following transaction on December 31, 1989. K will borrow from an unrelated party on December 31, 1989, 100 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(a) K will swap, on December 31, 1989, the £100 obtained from the borrowing for $100; and

(b) K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1990	8	10
December 31, 1991	8	10
December 31, 1992	108	110

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1989. On December 31, 1989, K borrows the £100 and swaps such pounds for $100. Assume x has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $8 in 1990, $8 in 1991, and $108 in 1992).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $100. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $100 as a return of principal in 1992.

(E) K must allocate and apportion its interest expense with respect to the synthetic dollar borrowing under the rules of §§ 1.861–8T through 1.861–12T.

Example 2. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On December 24, 1989, when the spot rate for Swiss francs (Sf) is Sf1 = $1, K enters into a forward contract to purchase Sf100 in exchange for $100.04 for delivery on December 31, 1989. The Sf100 are to be used for the purchase of a franc denominated debt instrument on December 31, 1989. The instrument will have a term of 3 years, an issue price of Sf100, and will bear interest at 6 percent, payable annually, with no repayment of principal until the final installment. On December 24, 1989, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

Date	U.S. dollars	Francs
December 31, 1990	6.12	6
December 31, 1991	6.23	6
December 31, 1992	112.16	106

(ii) On December 31, 1989, K takes delivery of the Sf100 and purchases the franc denominated debt instrument. Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated and treated as one transaction with the following consequences:

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument in an amount equal to the dollars exchanged under the forward contract to purchase the francs necessary to acquire the franc debt instrument. Accordingly, the issue price is $100.04 (section 1273(b)(2) of the Code).

(B) The total amount of interest and principal received by K with respect to the synthetic dollar debt instrument is equal to the dollars received under the forward sales contracts (i.e., $6.12 in 1990, $6.23 in 1991, and $112.16 in 1992).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is $106.15 (i.e., $6.12 of the payments in 1990, 1991, and 1992 are treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of $6.11.

(D) The yield to maturity of the synthetic dollar debt instrument is 8.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of $8.00 in 1990 (of which $1.88 constitutes OID), $8.15 in 1991 (of which $2.03 constitutes OID), and $8.32 in 1992 (of which $2.20 constitutes OID). The amount of the final payment received by K in excess of the interest income includible is a return of principal and a payment of previously accrued OID.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

Example 3. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1 = $1.50. On January 1, 1993, when the spot rate is £1 = $1.60, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1993	12.80	10
December 31, 1994	12.80	10
December 31, 1994	160.00	100

(ii) Assume that British pound interest rates are still 10% and that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(8) of this section. Under paragraph (a)(6)(i) of this section, K must realize exchange gain or loss with respect to the pound borrowing determined solely by reference to changes in exchange rates between January 1, 1992 and January 1, 1993. (Thus, gain or loss from other factors such as movements in interest rates or changes in credit quality of K are not taken into account). Recognition of such gain or loss is deferred until K terminates its pound borrowing. Accordingly, K must defer exchange loss in the amount of $10 [(£100×1.50) − (£100×1.60)].

(iii) Additionally, the qualified hedging transaction is treated as a synthetic U.S. dollar debt instrument with an issue date of January 1, 1993, and a maturity date of December 31, 1994. The issue price of the synthetic debt instrument is $160 (£100×1.60, the spot rate on January 1, 1993) and the total amount of interest and principal is $185.60. The accrual period is the one year period beginning on January 1 and ending December 31 of each year. The stated redemption price at maturity is $160. Thus, K is treated as paying $12.80 of interest in 1993, $12.80 of interest in 1994, and $160 of principal in 1994. The interest expense from the synthetic instrument is allocated and apportioned in accordance with the rules of §§ 1.861–8T through 1.861–12T. Sections 263(g), 1092, and 1256 do not apply to the positions comprising the synthetic dollar borrowing.

Example 4. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1990, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1990, is £1 = $1.50. Also on January 1, 1990, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1990	12.00	10
December 31, 1991	12.00	10
December 31, 1992	162.00	110

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $12 in 1990, $12 in 1991, and $162 in 1992).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $12 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $150 as a return of principal in 1992.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861–8T through 1.861–12T.

(iv) Assume that on January 1, 1991, the spot exchange rate is £1 = $1.60, interest rates have not changed since January 1, 1990, (accordingly, assume that the market value of K's bond in pounds has not changed) and that K transfers its rights and obligations under the currency swap contract in exchange for $10. Under § 1.988–2(e)(3)(iii), K will include in income as exchange gain $10 on January 1, 1991. Pursuant to paragraph (a)(6)(ii) of this section, the pound borrowing and the currency swap contract are treated as a qualified hedging transaction for 1990. The loss inherent in the pound borrowing from January 1, 1990, to January 1, 1991, is realized and recognized on January 1, 1991. Such loss is exchange loss in the amount of $10.00 [(£100×$1.50, the spot rate on January 1, 1990)—(£100×$1.60, the spot rate on January 1, 1991)]. For purposes of determining exchange gain or loss on the £100 principal amount of the debt instrument for the period January 1, 1991, to December 31, 1992, the spot rate on January 1, 1991 is used rather than the spot rate on the issue date. Thus, assuming that the spot rate on December 31, 1992, the maturity date, is £1 = $1.80, K realizes exchange loss in the amount of $20 [(£100×$1.60) − (£100×$1.80)]. Except as provided in paragraph (a)(8)(iii) (regarding identification by the Commissioner), the pound borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 5. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On January 1, 1990, when the spot rate for Swiss francs (Sf) is Sf1 = $.50, K converts $100 to Sf200 and purchases a franc denominated debt instrument. The instrument has a term of 3 years, an adjusted issue price of Sf200, and will bear interest at 5 percent, payable annually, with no repayment of principal until the final installment. The U.S. dollar interest rate on an equivalent instrument is 8% on January 1, 1990, compounded annually. On January 1, 1990, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

Date	U.S. dollars	Francs
December 31, 1990	5.14	10
December 31, 1991	5.29	10
December 31, 1992	114.26	210

(ii) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. Assume further that on January 1, 1991, the spot exchange rate is Sf1 = U.S.$.5143, the U.S. dollar interest rate is 10%, compounded annually, and the Swiss franc interest rate is the same as on January 1, 1990 (5%, compounded annually). On January 1, 1991, K disposes of the forward contracts that were to mature on December 31, 1991, and December 31, 1992 and incurs a loss of $3.62 (the present value of $.10 with respect to the 1991 contract and $4.27 with respect to the 1992 contract).

(iii) The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated for the period beginning January 1, 1990, and ending January 1, 1991.

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument with an issue price of $100.

(B) The total amount of interest and principal to be received by K with respect to the synthetic dollar debt instrument is equal to the dollars to be received under the forward sales contracts (i.e., $5.14 in 1990, $5.29 in 1991, and $114.26 in 1992).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is $109.27 (i.e., $5.14 of the payments in 1990, 1991, and 1992 is treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of $9.27.

(D) The yield to maturity of the synthetic dollar debt instrument is 8.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of $8.00 in 1990 (of which $2.86 constitutes OID).

(E) The source of the interest income is determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

(iv) Because K disposed of the forward contracts on January 1, 1991, the rules of paragraph (a)(6)(ii) of this section shall apply. Accordingly, the $3.62 loss from the disposition of the forward contracts is realized and recognized on January 1, 1991. Additionally, K is deemed to have sold the franc debt instrument for $102.86, its fair market value in dollars on January 1, 1991. K will compute gain or loss with respect to the deemed sale of the franc debt instrument by subtracting its adjusted basis in the instrument ($102.86—the value of the Sf200 issue price at the spot rate on the identification date plus $2.86 of original issue discount accrued on the synthetic dollar debt instrument for 1990) from the amount realized on the deemed sale of $102.86. Thus K realizes and recognizes no gain or loss from the deemed sale of the debt instrument. The dollar amount used to determine exchange gain or loss with respect to the franc debt instrument is the Sf200 issue price on January 1, 1991, translated into dollars at the spot rate on January 1, 1991, of Sf1 = U.S.$.5143. Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), the franc borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 6. (i) K is a U.S. corporation with the dollar as its functional currency. On January 1, 1992, K issues a debt instrument with the following terms: the issue price is $1,000, the instrument pays interest annually at a rate of 8% on the $1,000 principal amount, the instrument matures on December 31, 1996, and the amount paid at maturity is the greater of zero or $2,000 less the U.S. dollar value (determined on December 31, 1996) of 150,000 Japanese yen.

(ii) Also on January 1, 1992, K enters into the following hedges with respect to the instrument described in the preceding paragraph: a forward contract under which K will sell 150,000 yen for $1,000 on December 31, 1996 (note that this forward rate assumes that interest rates in yen and dollars are equal); and an option contract that expires on December 31, 1996, under which K has the right (but not the obligation) to acquire 150,000 yen for $2,000. K will pay for the option by making payments to the writer of the option equal to $5 each December 31 from 1992 through 1996.

(iii) The net economic effect of these transactions is that K has created a liability with a principal amount and amount paid at maturity of $1,000, with an interest cost of 8.5% (8% on debt instrument, 0.5% option price) compounded annually. For example, if on December 31, 1996, the spot exchange rate is $1 = 100 yen, K pays $500 on the bond [$2,000 − (150,000 yen/$100)], and $500 in satisfaction of the forward contract [$1,000 − (150,000 yen/$100)]. If instead the spot exchange rate on December 31, 1996 is $1 = 200 yen, K pays $1,250 on the bond [$2,000 − (150,000 yen/$200)] and K receives $250 in satisfaction of the forward contract [$1,000 − (150,000 yen/$200)]. Finally, if the spot exchange rate on December 31, 1996 is $1 = 50 yen, K pays $0 on the bond [$2,000 − (150,000 yen/$50), but the bond holder is not required under the terms of the instrument to pay additional principal]; K exercises the option to buy 150,000 yen for $2,000; and K then delivers the 150,000 yen as required by the forward contract in exchange for $1,000.

(iv) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The debt instrument described in paragraph (i) of this *Example 6* (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the forward contract and option contract described in paragraph (ii) of this example (which constitute a hedge under paragraph (a)(4) of this section and are collectively referred to hereafter as ''the contracts'') together are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to K, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of $1000, a stated redemption price at maturity of $1000 and a yield to maturity of 8.5% compounded annually (with no original issue discount). K must allocate and apportion its annual interest expense of $85 under the rules of §§ 1.861–8T through 1.861–12T.

Example 7. (i) R is a U.S. corporation with the dollar as its functional currency. On January 1, 1995, R issues a debt instrument with the following terms: the issue price is 504 British pounds (£), the instrument pays interest at a rate of 3.7% (compounded semi-annually) on the £504 principal amount, the instrument matures on December 31, 1999, with a repayment at maturity of the £504 principal plus the proportional gain, if any, in the ''Financial Times'' 100 Stock Exchange (FTSE) index (determined by the excess of the value of the FTSE index on the maturity date over the value of the FTSE on the issue date, divided by the value of the FTSE index on the issue date, multiplied by the number of FTSE index contracts that could be purchased on the issue date for £504).

(ii) Also on January 1, 1995, R enters into a contract with a bank under which on January 1, 1995, R will swap the £504 for $1,000 (at the current spot rate). R will make U.S. dollar payments to the bank equal to 8.15% on the notional principal amount of $1,000 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. R will receive pound payments from the bank equal to 3.7% on the notional principal amount of £504 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. On December 31, 1999, R will swap with the bank $1,000 for £504 plus the proportional gain, if any, in the FTSE index (computed as provided above).

(iii) Economically, both the indexed debt instrument and the hedging contract are hybrid instruments with the following components. The indexed debt instrument is composed of a par pound debt instrument that is assumed to have a 10.85% coupon (compounded semi-annually) plus an embedded FTSE equity index option for which the investor pays a premium of 7.15% (amortized semi-annually) on the pound principal amount. The combined effect is that the premium paid by the investor partially offsets the coupon payments resulting in a return of 3.7% (10.85% − 7.15%). Similarly, the dollar payments under the hedging contract to be made by R are computed by multiplying the dollar notional principal amount by an 8.00% rate (compounded semi-annually) which the facts assume would be the rate paid on a conventional currency swap plus a premium of 0.15% (amortized semi-annually) on the dollar notional principal amount for an embedded FTSE equity index option.

(iv) Assume R satisfies the identification requirements of paragraph (a)(8) of this section. The indexed debt instrument described in paragraph (i) of this *Example 7* constitutes a qualifying debt instrument under paragraph (a)(3) of this section. The hedging contract described in paragraph (ii) of this *Example 7* constitutes a hedge under paragraph (a)(4) of this section. Since both the pound exposure of the indexed debt instrument and the exposure to movements of the FTSE embedded in the indexed debt instrument are hedged such that a yield to maturity can be determined in dollars, the transaction satisfies the requirement of paragraph (a)(5)(i) of this section. Assuming the transactions satisfy the other requirements of paragraph (a)(5) of this section, the indexed debt instrument and hedge are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to R, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of $1000, a stated redemption price at maturity of $1000 and a yield to maturity of 8.15% compounded semi-annually (with no original issue discount). K must allocate and apportion its interest expense from the synthetic instrument under the rules §§ 1.861–8T through 1.861–12T.

Example 8. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1992, K agrees to close the following transaction on December 31, 1992. K will borrow from an unrelated party on December 31, 1992, 200 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(A) K will swap, on December 31, 1992, £100 obtained from the borrowing for $100; and

(B) K will exchange dollars for pounds pursuant to the following table:

Date	U.S. dollars	Pounds
December 31, 1993	8	10
December 31, 1994	8	10
December 31, 1995	108	110

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1992. On December 31, 1992, K borrows the £200 and swaps £100 for $100. Assume K has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The £200 debt instrument satisfies the requirements of paragraph (a)(3)(i) of this section. Because all principal and interest payments under the instrument are hedged in the same proportion (50% of all interest and principal payments are hedged), 50% of the payments under the £200 instrument (principal amount of £100 and annual interest of £10) are treated as a qualifying debt instrument for purposes of paragraph (a) of this section. Thus, the distinct £100 borrowing and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, £100 of the pound borrowing and the swap are integrated and treated as one synthetic dollar transaction with the following consequences:

(A) The integration of £100 of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $8 in 1993, $8 in 1994, and $108 in 1995).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $100. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $100 as a return of principal in 1995.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§1.861–8T through 1.861–12T.

That portion of the £200 pound debt instrument that is not hedged (*i.e.*, £100) is treated as a separate debt instrument subject to the rules of §1.988–2 (b) and §§1.861–8T through 1.861–12T.

Example 9. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. On the same day, K enters into a currency swap agreement with an unrelated bank under which K agrees to the following:

(A) On January 1, 1992, K will exchange the £100 borrowed for $150.

(B) For the period beginning January 1, 1992 and ending December 31, 1994, K will pay at the end of each month an amount determined by multiplying $150 by one month LIBOR less 65 basis points and receive from the bank on December 31st of 1992, 1993, and 1994, £10.

(C) On December 31, 1994, K will exchange $150 for £100.

Assume K satisfies the identification requirements of paragraph (a)(8) of this section.

(ii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract.

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the monthly variable interest payments under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $150 as a return of principal in 1994.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§1.861–8T through 1.861–12T.

Example 10. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K loans 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1 = $1.50. Also on January 1, 1992, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange pounds for dollars pursuant to the following table:

Date	Pounds	Dollars
December 31, 1992	10	12
December 31, 1993	10	12
December 31, 1994	110	162

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound loan (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound loan and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound loan and the swap results in a synthetic dollar loan with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar loan is equal to the dollar payments received by K under the currency swap contract (i.e., $12 in 1992, $12 in 1993, and $162 in 1994).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar loan.

(D) K must include in income as interest $12 in 1992, 1993, and 1994.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the pound interest income that would have been received had the transaction not been integrated.

(iv) On January 1, 1993, K transfers both the pound loan and the currency swap to B, its wholly owned U.S. subsidiary, in exchange for B stock in a transfer that satisfies the requirements of section 351. Under paragraph (a)(6) of this section, the transfer of both instruments is not ‘‘legging out.’’ Rather, K is considered to have transferred the synthetic dollar loan to B in a transaction in which gain or loss is not recognized. B’s basis in the loan under section 362 is $100.

(10) *Transition rules and effective dates for certain provisions*—(i) *Coordination with Notice 87–11.* Any transaction entered into prior to September 21, 1989, which satisfied the requirements of Notice 87–11, 1987–1 C.B. 423, shall be deemed to satisfy the requirements of paragraph (a) of this section.

(ii) *Prospective application to contingent payment debt instruments.* In the case of a contingent payment debt instrument, the definition of qualifying debt instrument set forth in paragraph (a)(3)(i) of this section applies to transactions entered into after March 17, 1992.

(iii) *Prospective application of partial hedging rule.* Paragraph (a)(3)(ii) of this section is effective for transactions entered into after March 17, 1992.

(iv) *Effective date for paragraph (a)(6)(i) of this section.* The rules of paragraph (a)(6)(i) of this section are effective for qualified hedging transactions that are legged into after March 17, 1992.

(b) *Hedged executory contracts*—(1) *In general.* If the taxpayer enters into a hedged executory contract as defined in paragraph (b)(2) of this section, the executory contract and the hedge shall be integrated as provided in paragraph (b)(4) of this section.

(2) *Definitions*—(i) *Hedged executory contract.* A hedged executory contract is an executory contract as defined in paragraph (b)(2)(ii) of this section that is the subject of a hedge as defined in paragraph (b)(2)(iii) of this section, provided that the following requirements are satisfied—

(A) The executory contract and the hedge are identified as a hedged executory contract as provided in paragraph (b)(3) of this section.

(B) The hedge is entered into (*i.e.*, settled or closed, or in the case of nonfunctional currency deposited in an account with a bank or other financial institution, such currency is acquired and deposited) on or after the date the executory contract is entered into and before the accrual date as defined in paragraph (b)(2)(iv) of this section.

(C) The executory contract is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3) of this section and ending on or after the accrual date.

(D) None of the parties to the hedge are related. The term related means the relationships defined in section 267(b) and section 707(c)(1).

(E) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the executory contract and the hedge are properly reflected on the books of the same qualified business unit.

(F) Subject to the limitations of paragraph (b)(2)(i)(E) of this section, both the executory contract and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the executory contract and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(G) With respect to a foreign person engaged in a U.S. trade or business that enters into an executory contract or hedge through such trade or business, all items of income and expense associated with the executory contract and the hedge would have been effectively connected with such U.S. trade or business throughout the term of the hedged executory contract had this paragraph (b) not applied.

(ii) *Executory contract*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, an executory contract is an agreement entered into before the accrual date to pay nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the purchase of property used in the ordinary course of the taxpayer's business, or the acquisition of a service (or services), in the future, or to receive nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the sale of property used or held for sale in the ordinary course of the taxpayer's business, or the performance of a service (or services), in the future. Notwithstanding the preceding sentence, a contract to buy or sell stock shall be considered an executory contract. (Thus, for example, a contract to sell stock of an affiliate is an executory contract for this purpose.) On the accrual date, such agreement ceases to be considered an executory contract and is treated as an account payable or receivable.

(B) *Exceptions.* An executory contract does not include a section 988 transaction. For example, a forward contract to purchase nonfunctional currency is not an executory contract. An executory contract also does not include a transaction described in paragraph (c) of this section.

(C) *Effective date for contracts to buy or sell stock.* That part of paragraph (b)(2)(ii)(A) of this section which provides that a contract to buy or sell stock shall be considered an executory contract applies to contracts to buy or sell stock entered into on or after March 17, 1992.

(iii) *Hedge*—(A) *In general.* For purposes of this paragraph (b), the term hedge means a deposit of nonfunctional currency in a hedging account (as defined paragraph (b)(3)(iii)(D) of this section), a forward or futures contract described in §1.988–1(a)(1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations by reference to the taxpayer's functional currency with respect to nonfunctional currency payments made or received under an executory contract. The term hedge also includes an option contract described in §1.988–1(a)(1)(ii) and (2)(iii), but only if the option's expiration date is on or before the accrual date. The premium paid for an option that lapses shall be integrated with the executory contract.

(B) *Special rule for series of hedges.* A series of hedges as defined in paragraph (b)(3)(iii)(A) of this section shall be considered a hedge if the executory contract is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3)(i) of this section and ending on or after the accrual date. A taxpayer that enters into a series of hedges will be deemed to have satisfied the preceding sentence if the hedge that succeeds a hedge that has been terminated is entered into no later than the business day following such termination.

(C) *Special rules for historical rate rollovers*—(*1*) *Definition.* A historical rate rollover is an extension of the maturity date of a forward contract where the new forward rate is adjusted on the rollover date to reflect the taxpayer's gain or loss on the contract as of the rollover date plus the time value of such gain or loss through the new maturity date.

(*2*) *Certain historical rate rollovers considered a hedge.* A historical rate rollover is considered a hedge if the rollover date is before the accrual date.

(*3*) *Treatment of time value component of certain historical rate rollovers that are hedges.* Interest income or expense determined under §1.988–2(d)(2)(v) with respect to a historical rate rollover shall be considered part of a hedge if the period beginning on the first date a hedging contract is rolled over and ending on the date payment is made or received under the executory contract does not exceed 183 days. Such interest income or expense shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract. For the treatment of such interest income or expense that is not considered part of a hedge, see § 1.988–2(d)(2)(v).

(D) *Special rules regarding deposits of nonfunctional currency in a hedging account.* A hedging account is an account with a bank or other financial institution used exclusively for deposits of nonfunctional currency used to hedge executory contracts. For purposes of determining the basis of units in such account that comprise the hedge, only those units in the account as of the accrual date shall be taken into consideration. A taxpayer may adopt any reasonable convention (consistently applied to all hedging accounts) to determine which units comprise the hedge as of the accrual date and the basis of the units as of such date.

(E) *Interest income on deposit of nonfunctional currency in a hedging account.* Interest income on a deposit of nonfunctional currency in a hedging account may be taken into account for purposes of determining the amount of a hedge if such interest is accrued on or before the accrual date. However, such interest income shall be included in income as provided in section 61. For example, if a taxpayer with the dollar as its functional currency enters into an executory contract for the purchase and delivery of a machine in one year for 100 British pounds (£), and on such date deposits £90.91 in a properly identified bank account that bears interest at the rate of 10%, the interest that accrues prior to the accrual date shall be included in income and may be considered a hedge.

(iv) *Accrual date.* The accrual date is the date when the item of income or expense (including a capital expenditure) that relates to an executory contract is required to be accrued under the taxpayer's method of accounting.

(v) *Payment date.* The payment date is the date when payment is made or received with respect to an executory contract or the subsequent corresponding account payable or receivable.

(3) *Identification rules*—(i) *Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record a clear description of the executory contract and the hedge and indicate that the transaction is being identified in accordance with paragraph (b)(3) of this section.

(ii) *Identification by the Commissioner.* If a taxpayer enters into an executory contract and a hedge but fails to satisfy one or more of the requirements of paragraph (b) of this section and, based on the facts and circumstances, the Commissioner concludes that the executory contract in substance is hedged, then the Commissioner may apply the provisions of paragraph (b) of this section as if the taxpayer had satisfied all of the requirements therein, and may make appropriate adjustments. The Commissioner may apply the provisions of paragraph (b) of this section regardless of whether the executory contract and the hedge are held by the same taxpayer.

(4) *Effect of hedged executory contract*—(i) *In general.* If a taxpayer enters into a hedged executory contract, amounts paid or received under the hedge by the taxpayer are treated as paid or received by the taxpayer under the executory contract, or any subsequent account payable or receivable, or that portion to which the hedge relates. Also, the taxpayer recognizes no exchange gain or loss on the hedge. If an executory contract, on the accrual date, becomes an account payable or receivable, the taxpayer recognizes no exchange gain or loss on such payable or receivable for the period covered by the hedge.

(ii) *Partially hedged executory contracts.* The effect of integrating an executory contract and a hedge that partially hedges such contract is to treat the amounts paid or received under the hedge as paid or received under the portion of the executory contract being hedged, or any subsequent account payable or receivable. The income or expense of services performed or received under the executory contract, or the amount realized or basis of property sold or purchased under the executory contract, that is attributable to that portion of the executory contract that is not hedged shall be translated into functional currency on the accrual date. Exchange gain or loss shall be realized when payment is made or received with respect to any payable or receivable arising on the accrual date with respect to such unhedged amount.

(iii) *Disposition of a hedge or executory contract prior to the accrual date*—(A) *In general.* If a taxpayer identifies an executory contract as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of (or otherwise terminates) the executory contract prior to the accrual date, the hedge shall be treated as sold for its fair market value on the date the executory contract is disposed of and any gain or loss shall be realized and recognized on such date. Such gain or loss shall be an adjustment to the amount received or expended with respect to the disposition or termination, if any. The spot rate on the date the hedge is treated as sold shall be used to determine subsequent exchange gain or loss on the hedge. If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge prior to the accrual date, any gain or loss realized on such disposition shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract.

(B) *Certain events in a series of hedges treated as a termination of the hedged executory contract.* If the rules of paragraph (b)(2)(iii)(B) of this section are not satisfied, the hedged executory contract shall be terminated and the provisions of paragraph (b)(4)(iii)(A) of this section shall apply to any gain or loss previously realized with respect to such hedge. Any subsequent hedging contracts entered into to reduce the risk of exchange rate movements with respect to such executory contract shall not be considered a hedge as defined in paragraph (b)(2)(iii) of this section.

(C) *Executory contracts between related persons.* If an executory contract is between related persons as defined in sections 267(b) and 707(b), and the taxpayer disposes of the hedge or terminates the executory contract prior to the accrual date, the Commissioner may redetermine the timing, source, and character of gain or loss from the hedge or the executory contract if he determines that a significant purpose for disposing of the hedge or terminating the executory contract prior to the accrual date was to affect the timing, source, or character of income, gain, expense, or loss for Federal income tax purposes.

(iv) *Disposition of a hedge on or after the accrual date.* If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge on or after the accrual date, no gain or loss is recognized on the hedge and the booking date as defined in §1.988–2(c)(2) of the payable or receivable for purposes of computing exchange gain or loss shall be the date such hedge is disposed of. See *Example 3* of paragraph (b)(4)(iv) of this section.

(v) *Sections 263(g), 1092, and 1256 do not apply.* Sections 263(g), 1092, and 1256 do not apply with respect to an executory contract or hedge which comprise a hedged executory contract as defined in paragraph (b)(2) of this section. However, sections 263(g), 1092 and 1256 may apply to the hedged executory contract if such transaction is part of a straddle.

(vi) *Examples.* The principles set forth in paragraph (b) of this section are illustrated in the following examples. The examples assume that K is an accrual method, calendar year U.S. corporation with the dollar as its functional currency.

Example 1. (i) On January 1, 1992, K enters into a contract with JPF, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Also on January 1, 1992, K enters into a foreign currency forward agreement to purchase

500,000 Swiss francs for $250,000 for delivery on June 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3)(i) of this section. On June 1, 1993, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract and makes payment of 500,000 Swiss francs to JPF in exchange for the machine. Assume that the accrual date is June 1, 1993.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore, K is deemed to have paid $250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. K's basis in the machine is $250,000. Section 1256 does not apply to the forward contract.

Example 2. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for $250,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of machine. Assume that under K's method of accounting the delivery date is the accrual date. On September 1, 1993, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract and makes payment of 500,000 Swiss francs to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. Thus K's basis in the machine is $250,000. In addition, no exchange gain or loss is recognized on the payable in existence from June 1, 1993, to September 1, 1993. Section 1256 does not apply to the forward contract.

Example 3. The facts are the same as in *Example 2* except that K disposed of the forward contract on August 1, 1993 for $10,000. Pursuant to paragraph (b)(4)(iv) of this section, K does not recognize the $10,000 gain. K's basis in the machine is $250,000 (the amount fixed by the forward contract), regardless of the amount in dollars that K actually pays to acquire the Sf500,000 when K pays for the machine. K has a payable with a booking date of August 1, 1993, payable on September 1, 1993 for 500,000 Swiss francs. Thus, K will realize exchange gain or loss on the difference between the amount booked on August 1, 1993 and the amount paid on September 1, 1993 under § 1.988–2(c).

Example 4. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine repair firm, to pay 500,000 Swiss francs for repairs to be performed on June 1, 1992. Under the contract, K is not obligated to pay for the repairs until September 1, 1992. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for $250,000 for delivery on August 1, 1992. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1992, S performs the repair services. Assume that under K's method of accounting this date is the accrual date. On August 1, 1992, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract. On the same day, K deposits the Sf500,000 in a separate account with a bank and properly identifies the transaction as a continuation of the hedged executory contract. On September 1, 1992, K makes payment of the Sf500,000 in the account to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $250,000 for the services and there is no exchange gain or loss on the foreign currency forward contract or on the disposition of Sf500,000 in the account. Any interest on the Swiss francs in the account is included in income but is not considered part of the hedge (because the amount paid for the services must be set on or before the accrual date). In addition, no exchange gain or loss is recognized on the payable in existence from June 1, 1992, to September 1, 1992. Section 1256 does not apply to the forward contract.

Example 5. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 250,000 Swiss francs for $125,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of the machine. Assume that under K's method of accounting the delivery date is the accrual date. Assume further that the exchange rate is Sf1 = $.50 on June 1, 1993. On August 30, 1993, K purchases Sf250,000 for $135,000. On September 1, 1993, K takes delivery of the 250,000 Swiss francs (in exchange for $125,000) under the forward contract and makes payment of 500,000 Swiss francs (the Sf250,000 received under the contract plus the Sf250,000 purchased on August 30, 1993) to S. Assume the spot rate on September 1, 1993, is 1 Sf = $.5420 (Sf250,000 equal $135,500).

(ii) Under paragraph (b)(1) of this section, the partial hedge is integrated with the executory contract. K is deemed to have paid $250,000 for the machine [$125,000 on the hedged portion of the Sf500,000 and $125,000 ($.50, the spot rate on June 1, 1993, times

Sf250,000) on the unhedged portion of the Sf500,000]. K's basis in the machine therefore is $250,000. K recognizes no exchange gain or loss on the foreign currency forward contract but K will realize exchange gain of $500 on the disposition of the Sf250,000 purchased on August 30, 1993 under §1.988–2(a). In addition, exchange loss is realized on the unhedged portion of the payable in existence from June 1, 1993, to September 1, 1993. Thus, K will realize exchange loss of $10,500 ($125,000 booked less $135,500 paid) under §1.988–2(c) on the payable. Section 1256 does not apply to the forward contract.

Example 6. (i) On January 1, 1990, K enters into a contract with S, a Swiss steel manufacturer, to buy steel for 1,000,000 Swiss francs (Sf) for delivery and payment on December 31, 1990. On January 1, 1990, the spot rate is Sf1 = $.50, the U.S. dollar interest rate is 10% compounded annually, and the Swiss franc rate is 5% compounded annually. Under K's method of accounting, the delivery date is the accrual date.

(ii) Assume that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $523,800 for delivery on December 31, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract constitutes a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward contract are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid $523,800 for the steel and will have a basis in the steel of $523,800. No gain or loss is realized with respect to the forward contract and section 1256 does not apply to such contract.

(iii) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is Sf1 = $.53, K cancels the forward contract in exchange for $17,800 ($530,000 − $512,200). On July 1, 1990, K enters into a second forward agreement to buy Sf1,000,000 for $542,900 for delivery on December 31, 1990. K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered into on January 1, 1990, and the forward contract entered into on July 1, 1990, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid $525,100 for the steel (the forward price in the second forward agreement of $542,900 less the gain on the first forward agreement of $17,800) and will have a basis in the steel of $525,100. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(iv) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is Sf1 = $.53, K enters into a historical rate rollover of its $17,800 gain ($530,000 − $512,200) on the forward agreement. Thus, K enters into a second foreign currency forward agreement to buy Sf1,000,000 for $524,210 for delivery on December 31, 1990. (The forward price of $524,210 is the market forward price on July 1, 1990, for the purchase of Sf1,000,000 for delivery on December 31, 1990, of $542,900 less the $17,800 gain on January 1, 1990, contract and less the time value of such gain of $890.) K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. On December 31, 1990, when the spot rate is Sf1 = $.54, K takes delivery of the Sf1,000,000 (in exchange for $524,210) and purchases the steel for Sf1,000,000. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered into on January 1, 1990, and the forward contract entered into on July 1, 1990, which incorporates the rollover of K's gain on the January 1, 1990, contract, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Because the period from the rollover date to the date payment is made under the executory contract does not exceed 183 days, the $890 of interest income is considered part of the hedge and is not recognized. Thus, K is deemed to have paid $524,210 for the steel and will have a basis in the steel of $524,210. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(v) Assume instead that on January 1, 1990, K purchases Sf952,380.95 (the present value of Sf1,000,000 to be paid on December 31, 1990) for $476,190.48 and on the same day deposits the Swiss francs in a separate bank account that bears interest at a rate of 5%, compounded annually. K properly identifies the transaction as a hedged executory contract. Over the period beginning January 1, 1990, and ending December 31, 1990, K receives Sf47,619.05 in interest on the account that is included in income and that has a basis of $25,714.29. (Assume that under §1.988–2(b)(1), K uses the spot rate of Sf1 = $.54 to translate the interest income). On December 31, 1990, K makes payment of the Sf1,000,000 principal and accrued interest in the account to S. Pursuant to paragraph (b)(2)(iii) of this section, the principal in the bank account and the interest constitute a hedge. Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $501,904.77 (the basis of the principal deposited plus the basis of the interest) for the steel and there is no exchange gain or loss on the disposition of the Sf1,000,000. K's basis in the steel therefore is $501,904.77.

(5) *References to this paragraph (b).* If the rules of this paragraph (b) are referred to in another paragraph of this section (*e.g.*, paragraph (c) of this section), then the rules of this paragraph (b) shall be applied for purposes of such other paragraph by substituting terms appropriate for such other paragraph. For example, paragraph (c)(2) of this section refers to the identification rules of paragraph (b)(3) of this section. Accordingly, for purposes of paragraph (c)(2), the rules of paragraph (b)(3) will be applied by substituting the term ''stock or security'' for ''executory contract''.

(c) *Hedges of period between trade date and settlement date on purchase or sale of publicly traded stock or security.* If a taxpayer purchases or sells stocks or securities which are traded on an established securities market and—

(1) Hedges all or part of such purchase or sale for any part of the period beginning on the trade date and ending on the settlement date; and

(2) Identifies the hedge and the underlying stock or securities as an integrated transaction under the rules of paragraph (b)(3) of this section;

then any gain or loss on the hedge shall be an adjustment to the amount realized or the adjusted basis of the stock or securities sold or purchased (and shall not be taken into account as exchange gain or loss). The term hedge means a deposit of nonfunctional currency in a hedging account (within the meaning of paragraph (b)(2)(iii)(D) of this section), or a forward or futures contract described in §1.988–1(a)(1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations for any portion of the period beginning on the trade date and ending on the settlement date. The provisions of paragraphs (b)(2)(i)(D) through (G), and (b)(2)(iii)(D) and (E) of this section shall apply. Sections 263(g), 1092, and 1256 do not apply with respect to stock or securities and a hedge which are subject to this paragraph (c).

(d) [Reserved]

(e) *Advance rulings regarding net hedging and anticipatory hedging systems.* In his sole discretion, the Commissioner may issue an advance ruling addressing the income tax consequences of a taxpayer's system of hedging either its net nonfunctional currency exposure or anticipated nonfunctional currency exposure. The ruling may address the character, source, and timing of both the section 988 transaction(s) making up the hedge and the underlying transactions being hedged. The procedures for obtaining a ruling shall be governed by such pertinent revenue procedures and revenue rulings as the Commissioner may provide. The Commissioner will not issue a ruling regarding hedges of a taxpayer's investment in a foreign subsidiary.

(f) [Reserved]

(g) *General effective date.* Except as otherwise provided in this section, the rules of this section shall apply to qualified hedging transactions, hedged executory contracts and transactions described in paragraph (c) of this section entered into on or after September 21, 1989. This section shall apply even if the transaction being hedged (*e.g.*, the debt instrument) was entered into or acquired prior to such date. The effective date regarding advance rulings for net and anticipatory hedging shall be governed by such revenue procedures that the Commissioner may publish.

[T.D. 8400, 57 FR 9199, Mar. 17, 1992]

§1.989(a)–1 Definition of a qualified business unit.

(a) *Applicability*—(1) *In general.* This section provides rules relating to the definition of the term ''qualified business unit'' (QBU) within the meaning of section 989.

(2) *Effective date.* These rules shall apply to taxable years beginning after December 31, 1986. However, any person may apply on a consistent basis §1.989(a)–1T (c) of the Temporary Income Tax Regulations in lieu of §1.989(a)–1 (c) to all taxable years beginning after December 31, 1986, and on

or before February 5, 1990. For the text of the temporary regulation, see 53 FR 20612 (June 8, 1988).

(b) *Definition of a qualified business unit*—(1) *In general.* A QBU is any separate and clearly identified unit of a trade or business of a taxpayer provided that separate books and records are maintained.

(2) *Application of the QBU definition*—(i) *Persons.* A corporation is QBU. An individual is not a QBU. A partnership, trust, or estate is a QBU of a partner or beneficiary.

(ii) *Activities.* Activities of a corporation, partnership, trust, estate, or individual qualify as a QBU if—

(A) The activities constitute a trade or business; and

(B) A separate set of books and records is maintained with respect to the activities.

(3) *Special rule.* Any activity (wherever conducted and regardless of its frequency) that produces income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States shall be treated as a separate QBU, provided the books and records requirement of paragraph (d)(2) of this section is satisfied.

(c) *Trade or business.* The determination as to whether activities constitute a trade or business is ultimately dependent upon an examination of all the facts and circumstances. Generally, a trade or business for purposes of section 989(a) is a specific unified group of activities that constitutes (or could constitute) an independent economic enterprise carried on for profit, the expenses related to which are deductible under section 162 or 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes). To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. Such group of activities must ordinarily include the collection of income and the payment of expenses. It is not necessary that the activities carried out by a QBU constitute a different trade or business from those carried out by other QBUs of the taxpayer. A vertical, functional, or geographic division of the same trade or business may be a trade or business for this purpose provided that the activities otherwise qualify as trade or business under this paragraph (c). However, activities that are merely ancillary to a trade or business will not constitute a trade or business under this paragraph (c). Activities of an individual as an employee are not considered by themselves to constitute a trade or business under this paragraph (c).

(d) *Separate books and records*—(1) *General rule.* Except as provided in paragraph (d)(2) of this section, a separate set of books and records shall include books of original entry and ledger accounts, both general and subsidiary, or similar records. For example, in the case of a taxpayer using the cash receipts and disbursements method of accounting, the books of original entry include a cash receipts and disbursements journal where each receipt and each disbursement is recorded. Similarly, in the case of a taxpayer using an accrual method of accounting, the books of original entry include a journal to record sales (accounts receivable) and a journal to record expenses incurred (accounts payable). In general, a journal represents a chronological account of all transactions entered into by an entity for an accounting period. A ledger account, on the other hand, chronicles the impact during an accounting period of the specific transactions recorded in the journal for that period upon the various items shown on the entity's balance sheet (*i.e.*, assets, liabilities, and capital accounts) and income statement (*i.e.*, revenues and expenses).

(2) *Special rule.* For purposes of paragraph (b)(3) of this section, books and records include books and records used to determine income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Corporation X is a domestic corporation. Corporation X manufactures widgets in the U.S. for export. Corporation X sells widgets in the United Kingdom through a branch office in London. The London office has its own employees and solicits and processes orders. Corporation X maintains in the U.S. a separate set of books and records for all transactions conducted by the London office. Corporation X is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. The London branch office is a QBU under paragraph (b)(2)(ii) of this section because (1) the sale of widgets is a trade or business as defined in paragraph (c) of this section; and (2) a complete and separate set of books and records (as described in paragraph (d) of this section) is maintained with respect to its sales operations.

Example 2. A domestic corporation incorporates a wholly-owned subsidiary in Switzerland. The domestic corporation is a manufacturer that markets its product abroad primarily through the Swiss subsidiary. To facilitate sales of the parent's product in Europe, the Swiss subsidiary has branch offices in France and West Germany that are responsible for all marketing operations in those countries. Each branch has its own employees, solicits and processes orders, and maintains a separate set of books and records. The domestic corporation and the Swiss subsidiary are both QBUs under paragraph (b)(2)(i) of this section because of their corporate status. The French and West German branches are QBUs of the Swiss subsidiary. They satisfy paragraph (b)(2)(ii) because each constitutes a trade or business (as defined in paragraph (c) of this section) and because separate sets of books and records (as described in paragraph (d) of this section) of their respective operations is maintained. Each branch is considered to have a trade or business although each is a geographical division of the same trade or business.

Example 3. W is a domestic corporation that manufactures product X in the United States for sale worldwide. All of W's sales functions are conducted exclusively in the United States. W employs individual Q to work in France. Q's sole function is to act as a courier to deliver sales documents to customers in France. With respect to Q's activities in France, a separate set of books and records as described in paragraph (d) is maintained. Under paragraph (c) of this section, Q's activities in France do not constitute a QBU since they are merely ancillary to W's manufacturing and selling business. Q is not considered to have a QBU because an individual's activities as an employee are not considered to constitute a trade or business of the individual under paragraph (c).

Example 4. The facts are the same as in example (3) except that the courier function is the sole activity of a wholly-owned French subsidiary of W. Under paragraph (b)(2)(i) of this section, the French subsidiary is considered to be a QBU.

Example 5. A corporation incorporated in the Netherlands is a subsidiary of a domestic corporation and a holding company for the stock of one or more subsidiaries incorporated in other countries. The Dutch corporation's activities are limited to paying its directors and its administrative expenses, receiving capital contributions from its United States parent corporation, contributing capital to its subsidiaries, receiving dividend distributions from its subsidiaries, and distributing dividends to its domestic parent corporation. Under paragraph (b)(2)(i) of this section, the Netherlands corporation is considered to be a QBU.

Example 6. Taxpayer A, an individual resident of the United States, is engaged in a trade or business wholly unrelated to any type of investment activity. A also maintains a portfolio of foreign currency-denominated investments through a foreign broker. The broker is responsible for all activities necessary to the management of A's investments and maintains books and records as described in paragraph (d) of this section, with respect to all investment activities of A. A's investment activities qualify as a QBU under paragraph (b)(2)(ii) of this section to the extent the activities engaged in by A generate expenses that are deductible under section 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes).

Example 7. Taxpayer A, an individual resident of the United States, is the sole shareholder of foreign corporation (FC) whose activities are limited to trading in stocks and securities. FC is a QBU under paragraph (b)(2)(i) of this section.

Example 8. Taxpayer A, an individual resident of the United States, markets and sells in Spain and in the United States various products produced by other United States manufacturers. A has an office and employs a salesman to manage A's activities in Spain, maintains a separate set of books and records with respect to his activities in Spain, and is engaged in a trade or business as defined in paragraph (c) of this section. Therefore, under paragraph (b)(2)(ii) of this section, the activities of A in Spain are considered to be a QBU.

Example 9. Foreign corporation FX is incorporated in Mexico and is wholly owned by a domestic corporation. The domestic corporation elects to treat FX as a domestic corporation under section 1504(d). FX operates entirely in Mexico and maintains a separate set of books and records with respect to its activities in Mexico. FX is a QBU under paragraph (b)(2)(i) of this section. The activities of FX in Mexico also constitute a QBU under paragraph (b)(2)(ii) of this section.

Example 10. F, a foreign corporation, computes a gain of $100 from the disposition of a United States real property interest (as defined in section 897(c)). The gain is taken into account as if F were engaged in a trade or business in the United States and as if such gain were effectively connected with such trade or business. F is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. F's disposition activity constitutes a separate QBU under paragraph (b)(3) of this section.

[T.D. 8279, 55 FR 284, Jan. 4, 1990]

§1.989(b)–1 Definition of weighted average exchange rate.

For purposes of section 989(b)(3) and (4), the term ''weighted average exchange rate'' means the simple average of the daily exchange rates (determined by reference to a qualified source of exchange rates within the meaning of §1.964–1(d)(5)), excluding weekends, holidays and any other nonbusiness days for the taxable year.

[T.D. 8263, 54 FR 38664, Sept. 20, 1989. Redesignated by T.D. 8367, 56 FR 48437, Sept. 25, 1991; 57 FR 6060, Feb. 18, 1992]

§1.989(c)–1 Transition rules for certain branches of United States persons using a net worth method of accounting for taxable years beginning before January 1, 1987.

(a) *Applicability*—(1) *In general.* This section applies to qualified business units (QBU) branches of United States persons, whose functional currency (as defined in section 985 of the Code and regulations issued thereunder) is other than the United States dollar (dollar) and that used a net worth method of accounting for their last taxable year beginning before January 1, 1987. Generally, a net worth method of accounting is any method of accounting under which the taxpayer calculates the taxable income of a QBU branch based on the net change in the dollar value of the QBU branch's equity over the course of a taxable year, taking into account any remittance made during the year. QBU branch equity is the excess of QBU branch assets over QBU branch liabilities. For all taxable years beginning after December 31, 1986, such QBU branches must use the profit and loss method of accounting as described in section 987, except to the extent otherwise provided in regulations under section 985 or any other provision of the Code.

(2) *Insolvent QBU branches.* A taxpayer may apply the principles of this section to a QBU branch that used a net worth method of accounting for its last taxable year beginning before January 1, 1987, whose $E pool (as defined in paragraph (d)(3)(i) of this section) is negative. For taxable years beginning on or after October 25, 1991, the principles of this section shall apply to insolvent QBU branches.

(b) *General rules.* For the general rules, see §1.987–5(b).

(c) *Determining the pool(s) from which a remittance is made.* To determine from which pool(s) a remittance is made, see §1.987–5(c).

(d) *Calculation of section 987 gain or loss*—(1) *In general.* See §1.987–5(d)(1) for rules to make this calculation.

(2) *Step 1—Calculate the amount of the functional currency pools.* For calculation of the amount of the functional currency pools, see §1.987–5(d)(2).

(3) *Step 2—Calculate the dollar basis pools*—(i) *Dollar basis of the EQ pool*—(A) *Beginning dollar basis.* The beginning dollar basis of the EQ pool (hereinafter referred to as the $E pool) equals the final net worth of the QBU branch. Final net worth of the QBU branch equals the QBU branch's equity value (assets less liabilities) measured in dollars at the end of the taxpayer's last taxable year beginning before January 1, 1987, determined on the basis of the QBU branch's books and records as adjusted according to United States tax principles.

(B) *Adjusting the $E pool.* For adjustments to be made to the $E pool, see §1.987–5(d)(3)(i)(B).

(ii) *Dollar basis of the post-86 profits pool.* To calculate the dollar basis of the post-86 profits pool, see §1.987–5(d)(3)(ii).

(iii) *Dollar basis of the equity pool.* To calculate the dollar basis of the equity pool, see §1.987–5(d)(3)(iii).

(4) *Step 3—Calculation of the dollar basis of a remittance.* To calculate the dollar basis of the EQ remitted, see §1.987–5(d)(4).

(5) *Step 4—Calculation of the section 987 gain or loss on a remittance.* To calculate 987 gain or loss determined on a remittance, see §1.987–5(d)(5).

(e) *Functional currency adjusted basis of QBU branch assets acquired in taxable years beginning before January 1, 1987.* To determine the functional currency adjusted basis of QBU branch assets acquired in taxable years beginning before January 1, 1987, see § 1.987–5(e).

(f) *Functional currency amount of QBU branch liabilities acquired in taxable years beginning before January 1, 1987.* To determine the functional currency amount of QBU branch liabilities acquired in taxable years beginning before January 1, 1987, see § 1.987–5(f).

[T.D. 8367, 56 FR 48437, Sept. 25, 1991]

DOMESTIC INTERNATIONAL SALES CORPORATIONS

§ 1.991–1 Taxation of a domestic international sales corporation.

(a) *In general.* A corporation which is a DISC for a taxable year is not subject to any tax imposed by subtitle A of the Code (sections 1 through 1564) for such taxable year, except for the tax imposed by chapter 5 thereof (sections 1491 through 1494) on certain transfers to avoid tax. Thus, for example, a corporation which is a DISC for a taxable year is not subject for such year to the corporate income tax (section 11), the minimum tax on tax preferences (sections 56 through 58), or the accumulated earnings tax (sections 531 through 537). A DISC is liable for the payment of all taxes payable by corporations under other subtitles of the Code, such as, for example, income taxes withheld at the source and other employment taxes under subtitle C and the interest equalization tax and other miscellaneous excise taxes imposed by subtitle D. In addition, a DISC is subject to the provisions of chapter 3 of subtitle A (including section 1461), relating to withholding of tax on nonresident aliens and foreign corporations and tax-free covenant bonds. See § 1.992–1 for the definition of the term ''DISC.''

(b) *Determination of taxable income*—(1) *In general.* Although a DISC is not subject to tax under subtitle A of the Code (other than chapter 5 thereof), a DISC's taxable income shall be determined for each taxable year in order to determine, for example, the amount deemed distributed for that taxable year to its shareholders pursuant to § 1.995–2. Except as otherwise provided in the Code and the regulations thereunder, the taxable income of a DISC shall be determined in the same manner as if the DISC were a domestic corporation which had not elected to be treated as a DISC. Thus, for example, a DISC chooses its method of depreciation, inventory method, and annual accounting period in the same manner as if it were a corporation which had not elected to be treated as a DISC. Any elections affecting the determination of taxable income shall be made by the DISC. Thus, as a further example, a DISC which makes an installment sale described in section 453 is able to avail itself of the benefits of section 453: *Provided,* The DISC complies with the election requirements of such section. See § 1.995–2(e) and § 1.996–8 and the regulations thereunder for rules relating to the application for a taxable year of a DISC of a deduction under section 172 for a net operating loss carryback or carryover or of a capital loss carryback or carryover under section 1212.

(2) *Choice of method of accounting.* A DISC may, generally, choose any method of accounting permissible under section 446(c) and the regulations thereunder. However, if a DISC is a member of a controlled group (as defined in § 1.993–1(k)), the DISC may not choose a method of accounting which, when applied to transactions between the DISC and other members of the controlled group, will result in a material distortion of the income of the DISC or any other member of the controlled group. Such a material distortion of income would occur, for example, if a DISC chooses to use the cash method of accounting where the DISC acts as commission agent in a substantial volume of sales of property by a related corporation which uses the accrual method of accounting and which customarily pays commissions to the DISC more than 2 months after such sales. As a further example, a material distortion of income would occur if a DISC chooses to use the accrual method of accounting where the DISC leases a substantial amount of property from a related corporation which uses the cash method of accounting, if the DISC customarily accrues any portion of the rent on such property more than 2 months before the rent is paid. Changes in the method of accounting of a DISC

are subject to the requirements of section 446(e) and the regulations thereunder.

(3) *Choice of annual accounting period*—(i) *In general.* A DISC may choose its annual accounting period without regard to the annual accounting period of any of its stockholders. In general, changes in the annual accounting period of a DISC are subject to the requirements of section 442 and the regulations thereunder.

(ii) *Transition rule for change in taxable year in order to become a DISC.* A corporation may, without the consent of the Commissioner, change its annual accounting period and adopt a new taxable year beginning on the first day of any month in 1972: *Provided,* That—

(a) Such change has the effect of accelerating the time as of which such corporation can become a DISC,

(b) The Commissioner is notified of such change by means of a statement filed (with the regional service center with which such corporation files its election to be treated as a DISC) not later than the end of the period during which such corporation may file an election to be treated as a DISC for such new taxable year, and

(c) The short period required to effect such change is not a taxable year in which such corporation has a net operating loss as defined in section 172.

Thus, for example, if a corporation which uses the calendar year for its taxable year does not complete arrangements to become a DISC until May 15, 1972, such corporation can, pursuant to this subdivision, change its annual accounting period and adopt a taxable year beginning on the first day of any month in 1972 after May. A change to a new annual accounting period made pursuant to this subdivision is effective only if the corporation which makes such change qualifies as a DISC for such new period. A corporation may change its annual accounting period and adopt a new taxable year pursuant to this subdivision without regard to the provisions of §1.1502–76 (relating to the taxable year of members of a group). A copy of the statement described in *(b)* of this subdivision shall be attached to the return of a corporation for the new taxable year to which such corporation changes pursuant to this subdivision. A corporation which changes its annual accounting period pursuant to this subparagraph will not be permitted under section 442 to change its annual accounting period at any time before 1982, except with the consent of the Commissioner as provided in §1.442–1(b)(1) or pursuant to subparagraph (4) of this paragraph.

(4) *Transition rule for change of taxable year of certain DISC's.* In the case of a DISC all of the shares of which are held by a single shareholder or by members of a group who file a consolidated return, such DISC may (without the consent of the Commissioner) change its annual accounting period and adopt a taxable year beginning in 1972 which is the same as the taxable year of such shareholder or the members of such group. A change to a new annual accounting period may be made by a DISC pursuant to this subparagraph even if such DISC has changed its annual accounting period pursuant to subparagraph (3)(ii) of this paragraph.

(5) *Transition rule for beginning of first taxable year of certain corporations.* If a corporation organized before January 1, 1972, neither acquires assets (other than cash or other property acquired as consideration for the issuance of stock) nor begins doing business prior to January 1, 1972, the first taxable year of such corporation is deemed to begin at the time such corporation acquires any asset (other than cash or other property acquired as consideration for the issuance of stock) or begins doing business, whichever is earlier: *Provided,* That such corporation is a DISC for such first taxable year. For purposes of §1.6012–2(a), such corporation is treated as not coming into existence until the beginning of such first taxable year.

(c) *Effective date.* The provisions of this section and the regulations under sections 992 through 997 apply with respect to taxable years ending after December 31, 1971, except that a corporation may not be a DISC for any taxable year beginning before January 1, 1972.

(d) *Related statutes.* For rules relating to the transfer, during a taxable year beginning before January 1, 1976, to a DISC of assets of an export trade corporation (as defined in section 971), where a parent owns all the outstanding stock of both such DISC and such export trade corporation, see section 505(b) of the Revenue Act of 1971 (85 Stat. 551). For rules regarding limitations on the qualification of a corporation as an export trade corporation for any taxable year beginning after October 31, 1971, see section 971(a)(3).

[T.D. 7323, 39 FR 34402, Sept. 25, 1974, as amended by T.D. 7854, 47 FR 51738, Nov. 17, 1982]

§ 1.992–1 Requirements of a DISC.

(a) *''DISC'' defined.* The term ''DISC'' refers to a domestic international sales corporation. The term ''DISC'' means a corporation which, for a taxable year—

(1) Is duly incorporated and existing under the laws of any State or the District of Columbia,

(2) Satisfies the gross receipts test described in paragraph (b) of this section,

(3) Satisfies the assets test described in paragraph (c) of this section,

(4) Satisfies the capitalization requirement described in paragraph (d) of this section,

(5) Satisfies the requirement that an election to be treated as a DISC be in effect for such year, as described in paragraph (e) of this section,

(6) [Reserved]

(7) Maintains separate books and records, and

(8) Is not an ineligible corporation described in paragraph (f) of this section.

A corporation which satisfies the requirements described in subparagraphs (1) through (8) of this paragraph for a taxable year is treated as a separate corporation for Federal tax purposes and qualifies as a DISC, even though such corporation would not be treated (if it were not a DISC) as a corporate entity for Federal income tax purposes. An association cannot qualify as a DISC even if such association is taxable as a corporation pursuant to section 7701(a)(3). In addition, a corporation created or organized in, or under the law of, a possession of the United States cannot qualify as a DISC. The rules contained in this paragraph constitute a relaxation of the general rules of corporate substance otherwise applicable under the Code. The separate incorporation of a DISC is required under section 992(a)(1) to make it possible to keep a better record of the income which is subject to the special treatment provided by sections 991 through 996, but this does not necessitate in all other respects the separate relationships which otherwise would be required between a parent corporation and its subsidiary. However, this relaxation of the general rules of corporate substance does not apply with respect to other corporations in other contexts. In the case of a transaction between a DISC and a person related to such DISC for purposes of section 482, see § 1.993–1(l) for rules for determining whether income is income of a DISC to which the intercompany pricing rules authorized by section 994 apply.

(b) *Gross receipts test.* In order for a corporation described in paragraph (a)(1) of this section to be a DISC for a taxable year, 95 percent or more of its gross receipts (as defined in § 1.993–6) for such year must consist of qualified export receipts (as defined in § 1.993–1). Gross receipts for a taxable year are determined in accordance with the method of accounting adopted by the corporation pursuant to § 1.991–1(b)(2). However, for rules regarding gross receipts in the case of a commission sale by such corporation, see § 1.993–6.

(c) *Assets test*—(1) *In general.* In order for a corporation described in paragraph (a)(1) of this section to be a DISC for a taxable year, the adjusted basis (determined under section 1011) of its qualified export assets at the close of such year must equal or exceed 95 percent of the sum of the adjusted bases (determined under section 1011) of all assets of such corporation at the close of such year.

(2) *Assets acquired to meet assets test.* For purposes of determining whether the requirements of subparagraph (1) of this paragraph are satisfied by a corporation at the end of a taxable year, an asset which is a qualified export asset is treated as not being an asset of such corporation at such time if such asset is held for a total of 60 days or less and is acquired directly or indirectly through borrowing, unless the acquisition of such asset is established to the satisfaction of the Commissioner or his delegate to have been for bona

fide purposes. Such acquisition is deemed to have been for bona fide purposes if, for example, it is made in the usual course of the corporation's trade or business.

(d) *Capitalization requirement*—(1) *In general.* To qualify as a DISC for a taxable year, a corporation must have, on each day of that taxable year, only one class of stock. The par value (or, in the case of stock without par value, the stated value) of the corporation's outstanding stock must be on each day of the taxable year at least $2,500. In the case of a corporation which elects to be treated as a DISC for its first taxable year, the requirements of this paragraph (d)(1) are satisfied if the corporation has no more than one class of stock at any time during the year and if the par value (or, in the case of stock without par value, the stated value) of the corporation's outstanding stock is at least $2,500 on the last day of the period within which the election must be made and on each succeeding day of the year. For purposes of this paragraph (d)(1), the stated value of shares is the aggregate amount of the consideration paid for such shares which is not allotted to paid in surplus, or other surplus. The law of the State of incorporation of the DISC determines what consideration may be used to capitalize the DISC. A corporation will not be a qualified DISC unless at least $2,500 of valid consideration was used for this purpose. If a corporation has a realized or unrealized loss during a taxable year which results in the impairment of all or part of the capital required under this paragraph (d)(1), that impairment does not result in disqualification under this paragraph (d)(1), provided that the corporation does not take any legal or formal action under State law to reduce capital for that year below the amount required under this paragraph (d)(1).

(2) *Treatment of debt payable to shareholders*—(i) *In general.* Purported debt of a DISC payable to any person, whether or not such person is a shareholder or a member of a controlled group (as defined in §1.993–1(k)) of which such DISC is a member, is treated as debt for all purposes of the Code, provided that such purported debt—

(a) Would qualify as debt for purposes of the Code if the DISC were a corporation which did not qualify as a DISC,

(b) Qualifies under subdivision (ii) of this subparagraph, or

(c) Are trade accounts payable described in subdivision (iii) of this subparagraph.

Such debt is not treated as stock, and interest payable by the DISC on such debt is treated as interest by both the DISC and the holder of such debt. Payment of the principal of such debt by a DISC does not constitute the payment of a dividend by such DISC. The provisions of this subparagraph apply for a taxable year of a DISC, even though debt described in this subparagraph would be treated as stock of the corporation if such corporation did not qualify as a DISC for such year.

(ii) *Safe harbor rule.* Purported debt of a DISC will in no event be treated as other than debt for purposes of subdivision (i) of this subparagraph if—

(a) It is a written obligation to pay a sum certain on or before a fixed maturity date,

(b) Interest is payable on such purported debt at an arm's length interest rate (as determined under §1.482–2(a)(2)), expressed as a fixed dollar amount or a fixed percentage of principal,

(c) Such purported debt is not convertible into stock or into other purported debt unless such other purported debt qualifies under this subparagraph as debt of the DISC,

(d) Such purported debt does not confer voting rights upon its holder, except in the event of default thereon, and

(e) Interest and principal are paid in accordance with the terms of such purported debt or with any modification of such terms consistent with *(a)* through *(d)* of this subdivision.

The determination of whether purported debt of a DISC constitutes debt described in this subdivision is made without regard to the proportion of debt of the DISC held by any of its shareholders, to the ratio of the outstanding debt of the DISC to its equity, or to the amount of outstanding debt of such DISC. The provisions of *(e)* of this subdivision do not prevent the modification of the terms of debt of a

DISC where, for example, a DISC becomes unable to make timely payments of principal required under such terms, provided that such modification is consistent with *(a)* through *(d)* of this subdivision.

(iii) *Trade accounts payable.* Trade accounts payable of a DISC which arise in the normal course of its trade or business (such as in consideration for inventory or supplies) constitute debt of the DISC (whether or not such accounts payable are debt described in subdivision (i) *(a)* or *(b)* of this subparagraph), provided that such accounts are payable within 15 months after they arise. If such accounts are payable more than 15 months after they arise, they are debt of such DISC only if they are debt described in subdivision (i) *(a)* or *(b)* of this subparagraph.

(iv) *Relation of subparagraph to other corporations.* The provisions of this subparagraph generally constitute a relaxation of the ordinary rules used in determining whether purported debt of a corporation is debt or equity. This relaxation is in recognition of the principle that a corporation may qualify as a DISC even though it has relatively little capital. This relaxation does not apply with respect to purported debt of other corporations in other contexts. The provisions of subdivisions (i), (ii), and (iii) of this subparagraph apply only for taxable years for which a corporation qualifies (or is treated) as a DISC.

(3) *Classes of stock.* [Reserved]

(e) *Election in effect.* In order for a corporation to be a DISC for a taxable year, an election to be treated as a DISC must be made by such corporation pursuant to § 1.992–2 and must be in effect for such taxable year. A corporation does not become or remain a DISC solely by making such an election. A corporation is a DISC for a taxable year only if such an election is in effect for that year and the corporation also satisfies the requirements of paragraphs (a) through (d) of this section. See § 1.992–2 for rules regarding the time and manner of making such an election.

(f) *Ineligible corporations.* The following corporations shall not be eligible to be treated as a DISC—

(1) A corporation exempt from tax by reason of section 501,

(2) A personal holding company (as defined in section 542),

(3) A financial institution to which section 581 or 593 applies,

(4) An insurance company subject to the tax imposed by subchapter L,

(5) A regulated investment company (as defined in section 851(a)),

(6) A China Trade Act corporation receiving the special deduction provided in section 941(a), or

(7) An electing small business corporation (as defined in section 1371(b)).

(g) *Status as DISC after having filed return as a DISC.* Under section 992(a)(2), notwithstanding the failure of a corporation to meet the requirements of paragraph (a) of this section for a taxable year, such corporation will be treated as a DISC for purposes of the Code for such taxable year (and, thus, will not be able to claim that it is not eligible to be a DISC) if—

(1) Such corporation files a return as a DISC for such taxable year,

(2) Such corporation does not notify the district director, more than 30 days before the expiration of the period of limitation (including extensions thereof) on assessment for underpayment of tax for such taxable year (as determined under section 6501 and the regulations thereunder), that it is not a DISC for such taxable year, and

(3) The Internal Revenue Service has not issued, within such period of limitation (including extensions thereof) on assessment for underpayment of tax for such taxable year, a notice of deficiency based on a determination that such corporation is not a DISC for such taxable year.

A corporation is treated as a DISC, for all purposes, pursuant to the provisions of this paragraph for any taxable year for which it meets the requirements of this paragraph, even if such corporation is an ineligible corporation described in paragraph (f) of this section for such taxable year. Thus, for example, a corporation which is treated as a DISC for a taxable year pursuant to this paragraph is treated as a DISC for that taxable year for purposes of § 1.992–2(e)(3) (relating to the termination of a DISC election if a corporation is not a DISC for each of any 5 consecutive taxable years). If a corporation is treated as a DISC for a taxable year pursuant to this paragraph, persons who held stock of such corporation at any time during such taxable year are treated, with respect to such stock, as holders of stock in a DISC for the period or periods during which they held such stock within such taxable year.

(h) *Definition of ''former DISC''.* Under section 992(a)(3), the term ''former DISC'' refers to a corporation which is not a DISC for a taxable year but which was (or was treated as) a DISC for a prior taxable year. However, a corporation is not a former DISC for a taxable year unless such corporation has, at the beginning of such taxable year, undistributed previously taxed income (as defined in §1.996–3(c) or accumulated DISC income (as defined in §1.996–3(b)). A corporation which is a former DISC for a taxable year is a former DISC for all purposes of the Code.

(Secs. 385 and 7805 of the Internal Revenue Code of 1954 (83 Stat. 613 and 68A Stat. 917; 26 U.S.C. 385 and 7805))

[T.D. 7323, 39 FR 34403, Sept. 25, 1974, as amended by T.D. 7420, 41 FR 20654, May 20, 1976; 41 FR 22267, June 2, 1976; T.D. 7747, 45 FR 86459, Dec. 31, 1980; T.D. 7920, 48 FR 50712, Nov. 3, 1983; T.D. 8371, 56 FR 55234, Oct. 25, 1991]

§1.992–2 Election to be treated as a DISC.

(a) *Manner and time of election*—(1) *Manner*—(i) *In general.* A corporation can elect to be treated as a DISC for a taxable year beginning after December 31, 1971. Except as provided in paragraph (a)(1)(ii) of this section, the election is made by the corporation filing Form 4876 with the service center with which it would file its income tax return if it were subject for such taxable year to all the taxes imposed by subtitle A of the Internal Revenue Code of 1954. The form shall be signed by any person authorized to sign a corporation return under section 6062, and shall contain the information required by such form. Except as provided in paragraphs (b)(3) and (c) of this section, such election to be treated as a DISC shall be valid only if the consent of every person who is a shareholder of the corporation as of the beginning of the first taxable year for which such election is effective is on or attached to such Form 4876 when filed with the service center.

(ii) *Transitional rule for corporations electing during 1972.* If the first taxable year for which an election by a corporation to be treated as a DISC is a taxable year beginning after December 31, 1971, and on or before December 31, 1972, such election may be made either in the manner prescribed in subdivision (i) of this subparagraph or by filing, at the place prescribed in subdivision (i) of this subparagraph, a statement captioned ''Election to be Treated as a DISC.'' Such statement of election shall be valid only if the consent of each shareholder is filed with the service center in the form, and at the time, prescribed in paragraph (b) of this section. Such statement shall be signed by any person authorized to sign a corporation return under section 6062 and shall include the name, address, and employer identification number (if known) of the corporation, the beginning date of the first taxable year for which the election is effective, the number of shares of stock of the corporation issued and outstanding as of the earlier of the beginning of the first taxable year for which the election is effective or the time the statement is filed, the number of shares held by each shareholder as of the earlier of such dates, and the date and place of incorporation. As a condition of the election being effective, a corporation which elects to become a DISC by filing a statement in accordance with this subdivision must furnish (to the service center with which the statement was filed) such additional information as is required by Form 4876 by March 31, 1973.

(2) *Time of making election*—(i) *In general.* In the case of a corporation making an election to be treated as a DISC for its first taxable year, such election shall be made within 90 days after the beginning of such taxable year. In the case of a corporation which makes an election to be treated as a DISC for any taxable year beginning after March 31, 1972 (other than the first taxable year of such corporation), the election shall

be made during the 90-day period immediately preceding the first day of such taxable year.

(ii) *Transitional rules for certain corporations electing during 1972.* In the case of a corporation which makes an election to be treated as a DISC for a taxable year beginning after December 31, 1971, and on or before March 31, 1972 (other than its first taxable year), the election shall be made within 90 days after the beginning of such taxable year.

(b) *Consent by shareholders*—(1) *In general*—(i) *Time and manner of consent.* Under paragraph (a)(1)(i) of this section, subject to certain exceptions, the election to be treated as a DISC is not valid unless each person who is a shareholder as of the beginning of the first taxable year for which the election is effective signs either the statement of consent on Form 4876 or a separate statement of consent attached to such form. A shareholder's consent is binding on such shareholder and all transferees of his shares and may not be withdrawn after a valid election is made by the corporation. In the case of a corporation which files an election to become a DISC for a taxable year beginning after December 31, 1972, if a person who is a shareholder as of the beginning of the first taxable year for which the election is effective does not consent by signing the statement of consent set forth on Form 4876, such election shall be valid (except in the case of an extension of the time for filing granted under the provisions of subparagraph (3) of this paragraph or paragraph (c) of this section) only if the consent of such shareholder is attached to the Form 4876 upon which such election is made.

(ii) *Form of consent.* A consent other than the statement of consent set forth on Form 4876 shall be in the form of a statement which is signed by the shareholder and which sets forth *(a)* the name and address of the corporation and of the shareholder and *(b)* the number of shares held by each such shareholder as of the time the consent is made and (if the consent is made after the beginning of the corporation's taxable year for which the election is effective) as of the beginning of such year. If the consent is made by a recipient of transferred shares pursuant to paragraph (c) of this section, the statement of consent shall also set forth the name and address of the person who held such shares as of the beginning of such taxable year and the number of such shares. Consent shall be made in the following form: ''I (insert name of shareholder), a shareholder of (insert name of corporation seeking to make the election) consent to the election of (insert name of corporation seeking to make the election) to be treated as a DISC under section 992(b) of the Internal Revenue Code. The consent so made by me is irrevocable and is binding upon all transferees of my shares in (insert name of corporation seeking to make the election).'' The consents of all shareholders may be incorporated in one statement.

(iii) *Who may consent.* Where stock of the corporation is owned by a husband and wife as community property (or the income from such stock is community property), or is owned by tenants in common, joint tenants, or tenants by the entirety, each person having a community interest in such stock or the income therefrom and each tenant in common, joint tenant, and tenant by the entirety must consent to the election. The consent of a minor shall be made by his legal guardian or by his natural guardian if no legal guardian has been appointed. The consent of an estate shall be made by the executor or administrator thereof. The consent of a trust shall be made by the trustee thereof. The consent of an estate or trust having more than one executor, administrator, or trustee, may be made by any executor, administrator, or trustee, authorized to make a return of such estate or trust pursuant to section 6012(b)(5). The consent of a corporation or partnership shall be made by an officer or partner authorized pursuant to section 6062 or 6063, as the case may be, to sign the return of such corporation or partnership. In the case of a foreign person, the consent may be signed by any individual (whether or not a U.S. person) who would be authorized under sections 6061 through 6063 to sign the return of such foreign person if he were a U.S. person.

(2) *Transitional rule for corporations electing during 1972.* In the case of a corporation which files an election to be treated as a DISC for a taxable year beginning after December 31, 1971, and on or before December 31, 1972, such election shall be valid only if the consent of each person who is a shareholder as of the beginning of the first taxable year for which such election is effective is filed with the service center with which the election was filed within 90 days after the first day of such taxable year or within the time granted for an extension of time for filing such consent. The form of such consent shall be the same as that prescribed in subparagraph (1) of this paragraph. Such consent shall be attached to the statement of election or shall be filed separately (with such service center) with a copy of the statement of election. An extension of time for filing a consent may be granted in the manner, and subject to the conditions, described in subparagraph (3) of this paragraph.

(3) *Extension of time to consent.* An election which is timely filed and would be valid except for the failure to attach the consent of any shareholder to the Form 4876 upon which the election was made or to comply with the 90-day requirement in subparagraph (2) of this paragraph or paragraph (c)(1) of this section, as the case may be, will not be invalid for such reason if it is shown to the satisfaction of the service center that there was reasonable cause for the failure to file such consent, and if such shareholder files a proper consent to the election within such extended period of time as may be granted by the Internal Revenue Service. In the case of a late filing of a consent, a copy of the Form 4876 or statement of election shall be attached to such consent and shall be filed with the same service center as the election. The form of such consent shall be the same as that set forth in paragraph (b)(1)(ii) of this section. In no event can any consent be made pursuant to this paragraph on or after the last day of the first taxable year for which a corporation elects to be treated as a DISC.

(c) *Consent by holder of transferred shares*—(1) *In general.* If a shareholder of a corporation transfers—

(i) Prior to the first day of the first taxable year for which such corporation elects to be treated as a DISC, some or all of the shares held by him without having consented to such election, or

(ii) On or before the 90th day after the first day of the first taxable year for which such corporation elects to be treated as a DISC, some or all of the shares held by him as of the first day of such year (or if later, held by him as of the time such shares are issued) without having consented to such election, then consent may be made by any recipient of such shares on or before the 90th day after the first day of such first taxable year. If such recipient fails to file his consent on or before such 90th day, an extension of time for filing such consent may be granted in the manner, and subject to the conditions, described in paragraph (b)(3) of this section. In addition, if the transfer occurs more than 90 days after the first day of such taxable year, an extension of time for filing such consent may be granted to such recipient only if it is determined under paragraph (b)(3) of this section that an extension of time would have been granted the transferor for the filing of such consent if the transfer had not occurred. A consent which is not attached to the original Form 4876 or statement of election (as the case may be) shall be filed with the same service center as the original Form 4876 or statement of election and shall have attached a copy of such original form or statement of election. The form of such consent shall be the same as that set forth in paragraph (b)(1)(ii) of this section. For the purposes of this paragraph, a transfer of shares includes any sale, exchange, or other disposition, including a transfer by gift or at death.

(2) *Requirement for the filing of an amended Form 4876 or statement of election.* In any case in which a consent to a corporation's election to be treated as a DISC is made pursuant to subparagraph (1) of this paragraph, such corporation must file an amended Form 4876 or statement of election (as the case may be) reflecting all changes in ownership of shares. Such form must be filed with the same service center with which the original Form 4876 or

statement of election was filed by such corporation.

(d) *Effect of election*—(1) *Effect on corporation.* A valid election to be treated as a DISC remains in effect (without regard to whether the electing corporation qualifies as a DISC for a particular year) until terminated by any of the methods provided in paragraph (e) of this section. While such election is in effect, the electing corporation is subject to sections 991 through 997 and other provisions of the Code applicable to DISC's for any taxable year for which it qualifies as a DISC (or is treated as qualifying as a DISC pursuant to § 1.992–1(g)). Such corporation is also subject to such provisions for any taxable year for which it is treated as a former DISC as a result of qualifying or being treated as a DISC for any taxable year for which such election was in effect.

(2) *Effect on shareholders.* A valid election by a corporation to be treated as a DISC subjects the shareholders of such corporation to the provisions of section 995 (relating to the taxation of the shareholders of a DISC or former DISC) and to all other provisions of the Code relating to the shareholders of a DISC or former DISC. Such provisions of the Code apply to any person who is a shareholder of a DISC or former DISC whether or not such person was a shareholder at the time the corporation elected to become a DISC.

(e) *Termination of election*—(1) *In general.* An election to be treated as a DISC is terminated only as provided in subparagraph (2) or (3) of this paragraph.

(2) *Revocation of election*—(i) *Manner of revocation.* An election by a corporation to be treated as a DISC may be revoked by the corporation for any taxable year of the corporation after the first taxable year for which the election is effective. Such revocation shall be made by the corporation filing a statement that the corporation revokes its election under section 992(b) to be treated as a DISC. Such statement shall indicate the corporation's name, address, employer identification number, and the first taxable year of the corporation for which the revocation is to be effective. The statement shall be signed by any person authorized to sign a corporation return under section 6062. Such revocation shall be filed with the service center with which the corporation filed its election, except that, if it filed an annual information return under section 6011(e)(2), the revocation shall be filed with the service center with which it filed its last such return.

(ii) *Years for which revocation is effective.* If a corporation files a statement revoking its election to be treated as a DISC during the first 90 days of a taxable year (other than the first taxable year for which such election is effective), such revocation will be effective for such taxable year and all taxable years thereafter. If the corporation files a statement revoking its election to be treated as a DISC after the first 90 days of a taxable year, the revocation will be effective for all taxable years following such taxable year.

(3) *Continued failure to be a DISC.* If a corporation which has elected to be treated as a DISC does not qualify as a DISC (and is not treated as a DISC pursuant to § 1.992–1(g)) for each of any 5 consecutive taxable years, such election terminates and will not be effective for any taxable year after such fifth taxable year. Such termination will be effective automatically, without notice to such corporation or to the Internal Revenue Service. If, during any 5-year period for which an election is effective, the corporation should qualify as a DISC (or be treated as a DISC pursuant to § 1.992–1(g)) for a taxable year, a new 5-year period shall automatically start at the beginning of the following taxable year.

(4) *Election after termination.* If a corporation has made a valid election to be treated as a DISC and such election terminates in either manner described in subparagraph (2) or (3) of this paragraph, such corporation is eligible to reelect to be treated as a DISC at any time by following the procedures described in paragraphs (a) through (c) of this section. If a corporation terminates its election and subsequently reelects to be treated as a DISC, the corporation and its shareholders continue to be subject to sections 995 and 996 with respect to the period during which its first election was in effect. Thus,

for example, distributions upon disqualification includible in the gross incomes of shareholders of a corporation pursuant to section 995(b)(2) continue to be so includible for taxable years for which a second election of such corporation is in effect without regard to the second election.

[T.D. 7323, 39 FR 34405, Sept. 25, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976]

§1.992–3 Deficiency distributions to meet qualification requirements.

(a) *In general.* A corporation which meets the requirements described in §1.992–1 for treatment as a DISC for a taxable year, other than the 95 percent of gross receipts test described in §1.992–1(b) or the 95-percent assets test described in §1.992–1(c), or both tests, may nevertheless qualify as a DISC for such year by making deficiency distributions (attributable to its gross receipts other than qualified export receipts and its assets other than qualified export assets) if all of the following requirements are satisfied:

(1) The corporation distributes the amount determined under paragraph (b) of this section as a deficiency distribution. The amount of a deficiency distribution is determined without regard to the amount by which the corporation fails to meet either test.

(2) The reasonable cause requirements prescribed in paragraph (c)(1) of this section are satisfied with respect to both the corporation's failure to meet either test and its failure to make a deficiency distribution prior to the time the distribution is made.

(3) The corporation makes such deficiency distribution pro rata to all its shareholders.

(4) The corporation designates the distribution, at the time of the distribution, as a deficiency distribution, pursuant to section 992(c), to meet the qualification requirements to be a DISC. Such designation shall be in the form of a communication sent at the time of such distribution to each shareholder and to the service center with which the corporation has filed or will file its return for the taxable year to which the distribution relates. A corporation may not retroactively designate a prior distribution as a deficiency distribution to meet qualification requirements. Subject to the limitation described in paragraph (c)(3) of this section, a corporation may make a deficiency distribution with respect to a taxable year at any time after the close of such taxable year or, in the case of a deficiency distribution made on or before September 29, 1975, at any time during or after such taxable year. See sections 246(d), 904(f), 995, and 996 for rules regarding the treatment of a deficiency distribution to meet qualification requirements by the shareholders and the corporation.

(b) *Amount of deficiency distribution*—(1) *In general.* In order to meet the requirements of paragraph (a) of this section, the amount of a deficiency distribution must be, if the corporation fails to meet—

(i) The 95 percent of gross receipts test, the amount determined in subparagraph (2) of this paragraph,

(ii) The 95-percent assets test, the amount determined in subparagraph (3) of this paragraph, and

(iii) Both such tests, except as provided in subparagraph (4) of this paragraph, the sum of the amounts determined in subparagraphs (2) and (3) of this paragraph.

(2) *Computation of deficiency distribution to meet 95 percent of gross receipts test*—(i) *In general.* If a corporation fails to meet the 95 percent of gross receipts test described in §1.992–1(b) for its taxable year, the amount of the deficiency distribution required by this subparagraph is an amount equal to the sum of its taxable income (if any) from each transaction giving rise to gross receipts (as defined in §1.993–6) which are not qualified export receipts (as defined in §1.993–1). A corporation's taxable income from a transaction shall be the amount of such gross receipts from such transaction reduced only by *(a)* its cost of goods sold attributable to such gross receipts, and by *(b)* its expenses, losses, and other deductions properly apportioned or allocated thereto in a manner consistent with the rules set forth in §1.861–8. For purposes of this subdivision, however, any expenses, losses, or other deductions which cannot definitely be allocated to some item or class of gross income in such manner shall not reduce such

gross receipts. If the corporation is a commission agent for a principal in a transaction, the corporation's taxable income is the amount of the commission from such transaction reduced only by the amounts described in *(b)* of this subdivision.

(ii) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example. (*a*) X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, which seeks to qualify as a DISC for 1973. During 1973, X manufactures a machine which is eligible to be export property as defined in § 1.993–3. Y is made a commission agent with respect to exporting such machine. Thereafter, during 1973 Y is considered to receive gross receipts of $100,000, as determined under section 993(f), attributable to X's sale of the machine in a manner which causes the gross receipts to be excluded receipts pursuant to section 993(a)(2) and, therefore, not qualified export receipts. Y's total gross receipts for 1973 are $1 million of which $900,000 (*i.e.*, 90 percent) are qualified export receipts. Therefore, Y does not satisfy the 95 percent of gross receipts test for 1973 because less than 95 percent of its gross receipts are qualified export receipts. Y has $9,000 of expenses properly apportioned or allocated to its gross income from such sale and $1,000 of other expenses which cannot definitely be allocated to some item or class of gross income, determined in a manner consistent with the rules set forth in § 1.861–8. In order to satisfy the 95 percent of gross receipts test for 1973, if the commission due from X to Y were $15,000, Y must make a deficiency distribution of $6,000 computed as follows:

Y's commission (gross income) from the transaction	$15,000
Less: Y's expenses apportioned or allocated to its gross income from the transaction	9,000
Required deficiency distribution by reason of $100,000 of gross receipts which are not qualified export receipts	6,000

(*b*) If the commission due from X to Y were $9,400, resulting in a net loss of $600 to Y ($9,400 to $10,000), Y must make a deficiency distribution of $400 computed as follows:

Y's commissions (gross income) from the transaction	$9,400
Less: Y's expenses apportioned or allocated to its gross income from the transaction	9,000
Required deficiency distribution by reason of $100,000 of gross receipts which are not qualified export receipts	400

(*c*) If the commission due from X to Y were $8,500, Y would not be required to make a deficiency distribution since, under this subparagraph, there would be no taxable income attributable to gross receipts from the sale.

(3) *Computation of deficiency distribution to meet 95 percent assets test*—(i) *In general.* If a corporation fails to meet the 95 percent assets test described in § 1.992–1(c) for its taxable year, the amount of the deficiency distribution required by this subparagraph is an amount equal to the fair market value as of the last day of such taxable year of the assets which are not qualified export assets held by such corporation on such last day.

(ii) *Asset held for more than 1 year.* In the case of a corporation which holds continuously an asset which is not a qualified export asset at the close of more than 1 taxable year, it must distribute an amount equal to its fair market value (or, if greater, the amount determined under subparagraph (4) of this paragraph) only once if, at the close of the first such taxable year, such corporation reasonably believed that such asset was a qualified export asset. This subdivision shall not apply for any taxable year beginning after the date the corporation knows (or a reasonable man would have known) that an asset is not a qualified export asset and in order to qualify for each such year, the corporation must distribute the fair market value of such asset for each such year.

(4) *Computation in the case of a failure to meet both tests as a result of a single transaction.* If a corporation fails to meet both the 95 percent of gross receipts test and the 95 percent assets test for a taxable year, and if the corporation holds at the end of such year assets (other than cash or qualified export assets) which were received as proceeds of a sale or exchange during such year which resulted in gross receipts other than qualified export receipts, then the amount of the deficiency distribution required by this paragraph with respect to such sale or exchange and assets held is the larger of the amount required by subparagraph (2) of this paragraph with respect to the sale or exchange or the amount required by subparagraph (3) of this paragraph with respect to such assets held. Thus, for example, if a corporation sells property which is not a qualified export asset for $100, receives $85 in cash and a note for

$15, and derives $25 of taxable income from the sale as determined under subparagraph (2) of this paragraph, it must distribute $25. If the provisions of this subparagraph are applied with respect to assets of a DISC (other than qualified export assets), such provisions do not apply to any property received as proceeds from a sale or exchange of such assets.

(c) *Reasonable cause for failure*—(1) *In general.* If for a taxable year, a corporation has failed to meet the 95 percent of gross receipts test, the 95 percent assets test, or both tests, such corporation may satisfy any such test for such year by means of a deficiency distribution in the amount determined under paragraph (b) of this section only if the reasonable cause requirements of this subparagraph are satisfied. Such reasonable cause requirements are satisfied if—

(i) There is reasonable cause (as determined in accordance with subparagraph (2) of this paragraph) for such corporation's failure to satisfy such test and to make such distribution prior to the date on which it was made, the time limit in subparagraph (3) of this paragraph for making the distribution is satisfied, and interest (if required) is paid in the amount and in the manner prescribed by subparagraph (4) of this paragraph, or

(ii) The time and ''70-percent'' requirements of the reasonable cause test of paragraph (d) of this section are satisfied.

(2) *Determination of reasonable cause.* In general, whether a corporation's failure to meet the 95 percent of gross receipts test, the 95 percent assets test, or both tests for a taxable year and its failure to make a pro rata distribution prior to the date on which it was made will be considered for reasonable cause where the action or inaction which resulted in such failure occurred in good faith, such as failure to meet the 95 percent assets test resulting from blocked currency or expropriation, or failure to meet either test because of reasonable uncertainty as to what constitutes a qualified export receipt or a qualified export asset. For further examples, if a corporation's reasonable determination of the percentage of its total gross receipts that are qualified export receipts is subsequently redetermined to be less than 95 percent as a result of a price adjustment by the Internal Revenue Service under section 482, or if the corporation has a casualty loss for which it receives an unanticipated insurance recovery which causes its qualified export receipts to be less than 95 percent of its total gross receipts, then the failure to satisfy the 95 percent of gross receipts test is considered to be due to reasonable cause.

(3) *Time limit for deficiency distribution.* Except as otherwise provided in this subparagraph, the time limit prescribed by this subparagraph for making a deficiency distribution is satisfied if the amount of the distribution required by paragraph (b) of this section is made within 90 days from the date of the first written notification to the corporation by the Internal Revenue Service that it had not satisfied the 95 percent of gross receipts test or the 95 percent assets test or both tests, for a taxable year. Upon a showing by the corporation that an extension of the 90-day time limit is reasonable and necessary, the Commissioner may grant such extension of such time limit. In any case in which a corporation contests the decision of the Internal Revenue Service that such corporation has not met the 95 percent of gross receipts test, the 95 percent assets test, or both tests, an extension of the 90-day time limit will be allowed until 30 days after the final determination of such contest. The date of the final determination of such contest shall, for purposes of section 992(c), be established in the manner specified in subdivisions (i) through (iv) of this subparagraph:

(i) The date of final determination by a decision of the United States Tax Court is the date upon which such decision becomes final, as prescribed in section 7481.

(ii) The date of final determination in a case which is contested in a court (and upon which there is a judgment) other than the Tax Court is the date upon which the judgment becomes final and will be determined on the basis of the facts and circumstances of each particular case. For example, ordinarily a judgment of a United States district court becomes final upon the expiration of the time allowed for taking an appeal, if no such appeal is duly taken within such time; and a judgment of the United States Court of Claims becomes final upon the expiration of the time allowed for filing a petition for certiorari if no such petition is duly filed within such time.

(iii) The date of a final determination by a closing agreement, made under section 7121, is the date such agreement is approved by the Commissioner.

(iv) A final determination under section 992(c) may be made by an agreement signed by the district director or director of the service center with which the corporation files its annual return or by such other official to which authority to sign has been delegated, and by or on behalf of the taxpayer. The agreement shall set forth the total amount of the deficiency distribution to be paid to the shareholders of the DISC for the taxable year or years. An agreement under this subdivision shall be sent to the taxpayer at his last known address by either registered or certified mail. If registered mail is used for such purpose, the date of registration is considered the date of final determination; if certified mail is used for such purpose, the date of postmark on the sender's receipt for such mail is considered the date of final determination. If the corporation makes a deficiency distribution before such registration or postmark date but on or after the date the district director or director of the service center or other official has signed the agreement, the date of signature by the district director or director of the service center or other official is considered the date of final determination. If the corporation makes a deficiency distribution before the district director or director of the service center or other official signs the agreement, the date of final determination is considered to be the date of the making of the deficiency distribution. During any extension of time the interest charge provided in subparagraph (4) of this paragraph will continue to accrue at the rate provided for in such subparagraph.

(4) *Payment of interest for delayed distribution*—(i) *In general.* If a corporation makes a deficiency distribution after the 15th day of the ninth month after the close of the taxable year with respect to which such distribution is made, such distribution will not be deemed to satisfy the 95 percent of gross receipts test or the 95 percent assets test for such year unless such corporation pays to the Internal Revenue Service a charge determined by multiplying (a) an amount equal to 4½ percent of such distribution by *(b)* the number of its taxable years which begin *(1)* after the taxable year with respect to which the distribution is made and *(2)* before such distribution is made. Such charge must be paid, within the 30-day period beginning with the day on which such distribution is made, to the service center with which the corporation files its annual information return for its taxable year in which the distribution is made. For purposes of the Internal Revenue Code, such charge is considered interest.

(ii) *Example.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. X corporation, which uses the calendar year as its taxable year, meets the 95 percent assets test but fails to meet the 95 percent of gross receipts test for 1972 and does not by September 15, 1973, make the deficiency distribution required by reason of its failure to meet such test. Assume that reasonable cause exists for the corporation's failure to meet the 95 percent of gross receipts test and failure to make the required deficiency distribution. If X makes the required deficiency distribution, in the amount of $10,000, on April 1, 1976, X must pay on or before April 30, 1976, to the service center with which it files its annual information return a charge of $1,800, computed as follows:

Deficiency distribution made by X	$10,000
Multiplied by 4½ percent	.045
Intermediate product	450
Multiplied by: Number of X's taxable years beginning after 1972 and before April 1, 1976	4
Charge to be paid service center because of late deficiency distribution (which is considered interest)	1,800

(d) *Certain distributions deemed for reasonable cause.* If a corporation makes a distribution in the amount required by paragraph (b) of this section with respect to a taxable year on or before the 15th day of the ninth month after the close of such year, it will be deemed to have acted with reasonable cause with respect to its failure to satisfy the 95 percent of gross receipts test, the 95 percent assets test, or both tests, for such year and its failure to make such distribution prior to the date on which the distribution was made if—

(1) At least 70 percent of the gross receipts of such corporation for such taxable year consist of qualified export receipts, and

(2) The sum of the adjusted bases of the qualified export assets held by such corporation on the last day of each month of the taxable year equals or exceeds 70 percent of the sum of the adjusted bases of all assets held by the corporation on each such day.

[T.D. 7323, 39 FR 34407, Sept. 25, 1974; 39 FR 36009, Oct. 7, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976; T.D. 7854, 47 FR 51739, Nov. 17, 1982]

§1.992–4 Coordination with personal holding company provisions in case of certain produced film rents.

(a) *In general.* Section 992(d)(2) provides that a personal holding company is not eligible to be treated as a DISC. Section 543(a)(5)(B) provides that, for purposes of section 543, the term ‘‘produced film rents’’ means payments received with respect to an interest in a film for the use of, or the right to use, such film, but only to the extent that such interest was acquired before substantial completion of production of such film. Under section 992(e), if such produced film rents are included in the ordinary gross income (as defined in section 543(b)(1)) of a qualified subsidiary for a taxable year of such subsidiary, and such interest was acquired by such subsidiary from its parent, such interest is deemed (for purposes of the application of sections 541, 543(b)(1), and 992(d)(2), and §1.992–1(f) for such taxable year) to have been acquired by such subsidiary at the time such interest was acquired by such parent. Thus, for example, if a parent acquires an interest in a film before it is substantially completed, then substantially completes such film prior to transferring an interest in such motion picture to a qualified subsidiary, the qualified subsidiary is considered as having acquired such interest prior to substantial completion of such motion picture for purposes of determining whether payments from the rental of such motion picture will be classified as produced film rents of such subsidiary. The provisions of section 992(e) and this section are not applicable in determining whether payments received with respect to an interest in a film are included in the ordinary gross income of a parent or a qualified subsidiary. Thus, even though a qualified subsidiary is treated pursuant to this section as having acquired an interest in a film at the time such interest was acquired by such subsidiary’s parent, payments received by such parent with respect to such interest prior to the transfer of such interest to such subsidiary are includible in the ordinary gross income of such parent and not includible in the ordinary gross income of such subsidiary.

(b) *Definitions*—(1) *Qualified subsidiary.* For purposes of this section, a corporation is a qualified subsidiary for a taxable year if—

(i) Such corporation was established for the purpose of becoming a DISC,

(ii) Such corporation would qualify (or be treated) as a DISC for such taxable year if it is not a personal holding company, and

(iii) On every day of such taxable year on which shares of such corporation are outstanding, at least 80 percent of such shares are held directly by a second corporation.

(2) *Parent.* For purposes of this section, the term ‘‘parent’’ means a second corporation referred to in subparagraph (1)(iii) of this paragraph.

[T.D. 7323, 39 FR 34409, Sept. 25, 1974]

§1.993–1 Definition of qualified export receipts.

(a) *In general.* For a corporation to qualify as a DISC, at least 95 percent of its gross receipts for a taxable year must consist of qualified export receipts. Under section 993(a), the term ‘‘qualified export receipts’’ means any of the eight amounts described in paragraphs (b) through (i) of this section, except to the extent that any of the eight amounts is an excluded receipt within the meaning of paragraph (j) of this section. For purposes of this section and §§1.993–2 through 1.993–6—

(1) *DISC.* All references to a DISC mean a DISC, except when the context

indicates that such term means a corporation in the process of meeting the conditions necessary for that corporation to become a DISC, or a corporation being tested as to whether it qualifies as a DISC.

(2) *Sale, lease, and license.* The term ''sale'' includes an exchange or other disposition and the term ''lease'' includes a rental or a sublease. The term ''license'' includes a sublicense. All rules under this section and §§ 1.993–2 through 1.993–6 applicable to leases of export property apply in the same manner to licenses of export property. See § 1.993–3(f)(3) for a description of intangible property which cannot be export property.

(3) *Gross receipts.* The term ''gross receipts'' is defined by section 993(f) and § 1.993–6.

(4) *Qualified export assets.* The term ''qualified export assests'' is defined by section 993(b) and § 1.993–2.

(5) *Export property.* The term ''export property'' is defined by section 993(c) and § 1.993–3.

(6) *Related person.* The term ''related person'' means a person who is related to another person if either immediately before or after a transaction—

(i) The relationship between such persons would result in a disallowance of losses under section 267 (relating to disallowance of losses, etc., between related taxpayers), or section 707(b) (relating to losses disallowed, etc., between partners and controlled partnerships), and the regulations thereunder, or

(ii) Such persons are members of the same controlled group of corporations, as defined in section 1563(a) (relating to definition of controlled group of corporations), except that (*a*) ''more than 50 percent'' shall be substituted for ''at least 80 percent'' each place it appears in section 1563(a) and the regulations thereunder, and (*b*) the provisions of section 1563(b) shall not apply in determining whether such persons are members of the same controlled group.

(7) *Related supplier.* The term ''related supplier'' is defined by § 1.994–1(a)(3)(ii).

(8) *Controlled group.* The term ''controlled group'' is defined by paragraph (k) of this section.

(b) *Sales of export property.* Qualified export receipts of a DISC include gross receipts from the sale of export property by such DISC, or by any principal for whom such DISC acts as a commission agent (whether or not such principal is a related supplier), pursuant to the terms of a contract entered into with a purchaser by such DISC or by such principal at any time or by any other person and assigned to such DISC or such principal at any time prior to the shipment of such property to the purchaser. Any agreement, oral or written, which constitutes a contract at law, satisfies the contractual requirement of this paragraph. Gross receipts from the sale of export property, whenever received, do not constitute qualified export receipts unless the seller (or the corporation acting as commission agent for the seller) is a DISC at the time of the shipment of such property to the purchaser. For example, if a corporation which sells export property under the installment method is not a DISC for the taxable year in which the property is shipped to the purchaser, gross receipts from such sale do not constitute qualified export receipts for any taxable year of the corporation.

(c) *Leases of export property*—(1) *In general.* Qualified export receipts of a DISC include gross receipts from the lease of export property provided that—

(i) Such property is held by such DISC (or by a principal for whom such DISC acts as commission agent with respect to the lease) either as an owner or lessee at the beginning of the term of such lease, and

(ii) Such DISC qualified (or was treated) as a DISC for its taxable year in which the term of such lease began.

(2) *Prepayment of lease receipts.* If part or all of the gross receipts from a lease of property are prepaid, then—

(i) All such prepaid gross receipts are qualified export receipts of a DISC if it is reasonably expected at the time of such prepayment that throughout the term of such lease they would be qualified export receipts if received not as a prepayment; or

(ii) If it is reasonably expected at the time of such prepayment that throughout the term of such lease they would not be qualified export receipts if received not as a prepayment, then only those prepaid receipts, for the taxable years of the DISC for which they would be qualified export receipts, are qualified export receipts.

Thus, for example, if a lessee makes a prepayment of the first and last years' rent, and it is reasonably expected that the leased property will be export property for the first half of the lease period but not the second half of such period, the amount of the prepayment which represents the first year's rent will be considered qualified export receipts if it would otherwise qualify, whereas the amount of the prepayment which represents the last year's rent will not be considered qualified export receipts.

(d) *Related and subsidiary services*—(1) *In general.* Qualified export receipts of a DISC include gross receipts from services furnished by such DISC which are related and subsidiary to any sale or lease (as described in paragraph (b) or (c) of this section) of export property by such DISC or with respect to which such DISC acts as a commission agent, provided that such DISC derives qualified export receipts from such sale or lease. Such services may be performed within or without the United States.

(2) *Services furnished by DISC.* Services are considered to be furnished by a DISC for purposes of this paragraph if such services are provided by—

(i) The person who sold or lease the export property to which such services are related and subsidiary, provided that the DISC acts as a commission agent with respect to the sale or lease of such property and with respect to such services,

(ii) The DISC as principal, or any other person pursuant to a contract between such person and such DISC, provided the DISC acted as principal or commission agent with respect to the sale or lease of such property, or

(iii) A member of the same controlled group as the DISC where the sale or lease of the export property is made by another member of such controlled group provided, however, that the DISC act as principal or commission agent with respect to such sale or lease and as commission agent with respect to such services.

(3) *Related services.* A service is related to a sale or lease of export property if—

(i) Such service is of the type customarily and usually furnished with the type of transaction in the trade or business in which such sale or lease arose and

(ii) The contract to furnish such service—

(*a*) Is expressly provided for in or is provided for by implied warranty under the contract of sale or lease,

(*b*) Is entered into on or before the date which is 2 years after the date on which the contract under which such sale or lease was entered into, provided that the person described in subparagraph (2) of this paragraph which is to furnish such service delivers to the purchaser or lessor a written offer or option to furnish such services on or before the date on which the first shipment of goods with respect to which the service is to be performed is delivered, or

(*c*) Is a renewal of the services contract described in (*a*) or (*b*) of this subdivision. Services which may be related to a sale or lease of export property include but are not limited to warranty service, maintenance service, repair service, and installation service. Transportation (including insurance related to such transportation) may be related to a sale or lease of export property, provided that the cost of such transportation is included in the sale price or rental of the property or, if such cost is separately stated, is paid by the DISC (or its principal) which sold or leased the property to the person furnishing the transportation service. Financing or the obtaining of financing for a sale or lease is not a related service for purposes of this paragraph.

(4) *Subsidiary services*—(i) *In general.* Services related to a sale or lease of export property are subsidiary to such sale or lease only if it is reasonably expected at the time of such sale or lease that the gross receipts from all related services furnished by the DISC (as defined in subparagraphs (2) and (3) of this paragraph) will not exceed 50 percent of the sum of (a) the gross receipts from such sale or lease and (b) the gross receipts from related services furnished by the DISC (as described in

subparagraph (2) of this paragraph). In the case of a sale, reasonable expectations at the time of the sale are based on the gross receipts from all related services which may reasonably be expected to be performed at any time before the end of the 10-year period following the date of such-sale. In the case of a lease, reasonable expectations at the time of the lease are based on the gross receipts from all related services which may reasonably be expected to be performed at any time before the end of the term of such lease (determined without regard to renewal options).

(ii) *Allocation of gross receipts from services.* In determining whether the services related to a sale or lease of export property are subsidiary to such sale or lease, the gross receipts to be treated as derived from the furnishing of services may not be less than the amount of gross receipts reasonably allocated to such services as determined under the facts and circumstances of each case without regard to whether—

(*a*) Such services are furnished under a separate contract or under the same contract pursuant to which such sale or lease occurs or

(*b*) The cost of such services is specified in the contract of sale or lease.

(iii) *Transactions involving more than one item of export property.* If more than one item of export property is sold or leased in a single transaction pursuant to one contract, the total gross receipts from such transaction and the total gross receipts from all services related to such transaction are each taken into account in determining whether such services are subsidiary to such transaction. However, the provisions of this subdivision apply only if such items could be included in the same product line, as determined under § 1.994–1(c)(7).

(iv) *Renewed service contracts.* If under the terms of a contract for related services, such contract is renewable within 10 years after a sale of export property, or during the term of a lease of export property, related services to be performed under the renewed contract are subsidiary to such sale or lease if it is reasonably expected at the time of such renewal that the gross receipts from all related services which have been and which are to be furnished by the DISC (as described in subparagraph (2) of this paragraph) will not exceed 50 percent of the sum of (*a*) the gross receipts from such sale or lease and (*b*) the gross receipts from related services furnished by the DISC (as so described). Reasonable expectations are determined as provided in subdivision (i) of this subparagraph.

(v) *Parts used in services.* In a services contract described in subparagraph (3) of this paragraph provides for the furnishing of parts in connection with the furnishing of related services, gross receipts from the furnishing of such parts are not taken into account in determining whether under this subparagraph the services are subsidiary. See paragraph (b) or (c) of this section to determine whether the gross receipts from the furnishing of parts consitute qualified export receipts. See § 1.993–3(c)(2)(iv) and (e)(3) for rules regarding the treatment of such parts with respect to the manufacture of export property and the foreign content of such property, respectively.

(5) *Relation to leases.* If the gross receipts for services which are related and subsidiary to a lease of property have been prepaid at any time for all such services which are to be performed before the end of the term of such lease, then as of the time of the prepayment the rules in paragraph (c)(2) of this section (relating to prepayment of lease receipts) will determine whether prepaid services under this subdivision are qualified export receipts. Thus, for example if it is reasonably expected that leased property will be export property for the first year of the term of the lease but will not be export property for the second year of the term, prepaid gross receipts for related and subsidiary services to be furnished in the first year may be qualified export receipts. However, any prepaid gross receipts for such services to be furnished in the second year cannot be qualified export receipts.

(6) *Relation with export property determination.* The determination as to whether gross receipts from the sale or lease of export property constitute qualified export receipts does not depend upon whether services connected with such sale or lease are related and

subsidiary to such sale or lease. Thus, for example, assume that a DISC receives gross receipts of $1,000 from the sale of export property and gross, receipts of $1,100 from installation and maintenance services which are to be furnished by such DISC within 10 years after the sale and which are related to such sale. The $1,100 which the DISC receives for such services would not be qualified export receipts since the gross receipts from the services exceed 50 percent of the sum of the gross receipts from the sale and the gross receipts from the related services furnished by such DISC. The $1,000 which the DISC receives from the sale of export property would, however, be a qualified export receipt if the sale met the requirements of paragraph (b) of this section.

(e) *Gains from sales of certain qualified export assets.* Qualified export receipts of a DISC include gross receipts from the sale by such DISC of any assets (wherever located) which, as of the date of such sale, are qualified export assets as defined in §1.993–2 even though such assets are not export property (as defined in §1.993–3). Gross receipts are derived from the sale of such assets only where such sale results in recognized gain (see §1.993–6(a)). For purposes of this paragraph, losses from the sale of such qualified export assets shall not be taken into account for purposes of determining the DISC's qualified export receipts.

(f) *Dividends.* Qualified export receipts of a DISC for a taxable year include all dividends includible in the gross income of such DISC for such taxable year with respect to the stock of related foreign export corporations (as defined in §1.993–5) and all amounts includible in the gross income of such DISC with respect to such corporations pursuant to section 951 (relating to amounts included in the gross income of U.S. shareholders of controlled foreign corporations).

(g) *Interest on obligations which are qualified export assets.* Qualified export receipts of a DISC include interest on any obligation which is a qualified export asset of such DISC, including any amount includible in gross income as interest (such as, for example, an amount treated as original issue discount pursuant to section 1232) or as imputed interest under section 483. Gain from the sale of obligations described in this paragraph is treated (to the extent such gain is not treated as interest on such obligations) as qualified export receipts pursuant to paragraph (e) of this section.

(h) *Engineering and architectural services*—(1) *In general.* Qualified export receipts of a DISC include gross receipts from engineering services (as described in subparagraph (5) of this paragraph) or architectural services (as described in subparagraph (5) of this paragraph) or architectural services (as described in subparagraph (6) of this paragraph) furnished by such DISC (as described in subparagraph (7) of this paragraph) for a construction project (as defined in subparagraph (8) of this paragraph) located, or proposed for location, outside the United States. Such services may be performed within or without the United States.

(2) *Services included.* Engineering and architectural services include feasibility studies for a proposed construction project whether or not such project is ultimately initiated.

(3) *Excluded services.* Engineering and architectural services do not include—

(i) Services connected with the exploration for minerals or

(ii) Technical assistance or knowhow.

For purposes of this paragraph, the term ‘‘technical assistance or knowhow’’ includes activities or programs designed to enable business, commerce, industrial establishments, and governmental organizations to acquire or use scientific, architectural, or engineering information.

(4) *Other services.* Receipts from the performance of construction activities other than engineering and architectural services constitute qualified export receipts to the extent that such activities are related and subsidiary services (within the meaning of paragraph (d) of this section) with respect to a sale or lease of export property.

(5) *Engineering services.* For purposes of this paragraph, engineering services in connection with any construction project (within the meaning of subparagraph (8) of this paragraph) include

any professional services requiring engineering education, training, and experience and the application of special knowledge of the mathematical, physical, or engineering sciences to such professional services as consultation, investigation, evaluation, planning, design, or responsible supervision of construction for the purpose of assuring compliance with plans, specifications, and design.

(6) *Architectural services.* For purposes of this paragraph, architectural services include the offering or furnishing of any professional services such as consultation, planning, aesthetic, and structural design, drawings and specifications, or responsible supervision of construction (for the purpose of assuring compliance with plans, specifications, and design) or erection, in connection with any construction project (within the meaning of subparagraph (8) of this paragraph).

(7) *Definition of ''furnished by such DISC''.* For purposes of this paragraph, architectural and engineering services are considered furnished by a DISC if such services are provided—

(i) By the DISC,

(ii) By another person (whether or not a United States person) pursuant to a contract entered into by such person with the DISC at any time prior to the furnishing of such services, provided that the DISC acts as principal with respect to the furnishing of such services, or

(iii) By another person (whether or not a United States person) pursuant to a contract for the furnishing of such services entered into at any time prior to the furnishing of such services provided that the DISC acts as commission agent with respect to such services.

(8) *Definition of ''construction project''.* For purposes of this paragraph, the term ''construction project'' includes the erection, expansion, or repair (but not including minor remodeling or minor repairs) of new or existing buildings or other physical facilities including, for example, roads, dams, canals, bridges, tunnels, railroad, tracks, and pipelines. The term also includes site grading and improvement and installation of equipment necessary for the construction. Gross receipts from the sale or lease of construction equipment are not qualified export receipts unless such equipment is export property (as defined in § 1.993–3).

(i) *Managerial services*—(1) *In general.* Qualified export receipts of a first DISC for its taxable year include gross receipts from the furnishing of managerial services provided for another DISC, which is not a related person, to aid such unrelated DISC in deriving qualified export receipts, provided that at least 50 percent of the gross receipts of the first DISC for such year consists of qualified export receipts derived from the sale or lease of export property and the furnishing of related and subsidiary services, as described in paragraph (b), (c), and (d) of this section, respectively.

For purposes of this paragraph, managerial services are considered furnished by a DISC if such services are provided—

(i) By the first DISC,

(ii) By another person (whether or not a United States person) pursuant to a contract entered into by such person with the first DISC at any time prior to the furnishing of such services, provided that the first DISC acts as principal with respect to the furnishing of such services, or

(iii) By another person (whether or not a United States person) pursuant to a contract for the furnishing of such services entered into at any time prior to the furnishing of such services provided that the DISC acts as commission agent with respect to such services.

(2) *Definition of ''managerial services.''* The term ''managerial services'' as used in this paragraph means activities relating to the operation of another unrelated DISC which derives qualified export receipts from the sale or lease of export property and from the furnishing of services related and subsidiary to such sales or leases. Such term includes staffing and operational services necessary to operate such other DISC, but does not include legal, accounting, scientific, or technical services. Examples of managerial services are: (i) Export market studies, (ii) making shipping arrangements, and (iii) contracting potential foreign purchasers.

(3) *Status of recipient of managerial services*—(i) *In general.* Qualified export receipts of a first DISC include receipts from the furnishing of managerial services during any taxable year of a recipient if such recipient qualifies as a DISC (within the meaning of §1.992–1(a) for such taxable year.

(ii) *Recipient deemed to qualify as a DISC.* For purposes of subdivision (i) of this subparagraph, a recipient is deemed to qualify as a DISC for its taxable year if the first DISC obtains from such recipient a copy of such recipient's election to be treated as a DISC as described in §1.992–2(a) together with such recipient's sworn statement that such election has been filed with the Internal Revenue Service Center. The recipient may mark out the names of its shareholders on a copy of its election to be treated as a DISC before submitting it to the first DISC. The copy of the election and the sworn statement of such recipient must be received by the first DISC within 6 months after the beginning of the first taxable year of the recipient during which such first DISC furnishes managerial services for such recipient. The copy of the election and the sworn statement of the recipient need not be obtained by the first DISC for subsequent taxable years of the recipient.

(iii) *Recipient not treated as a DISC.* For purposes of subdivision (i) of this subparagraph, a recipient of managerial services is not treated as a DISC with respect to such services performed during a taxable year for which such recipient does not qualify as a DISC if the DISC performing such services does not believe or if a reasonable person would not believe (taking into account the furnishing DISC's managerial relationship with such recipient DISC) at the beginning of such taxable year that the recipient will qualify as a DISC for such taxable year.

(j) *Excluded receipts*—(1) *In general.* Notwithstanding the provisions of paragraphs (b) through (i) of this section, qualified export receipts of a DISC do not include any of the five amounts described in subparagraphs (2) through (6) of this paragraph.

(2) *Sales and leases of property for ultimate use in the United States.* Property which is sold or leased for ultimate use in the United States does not constitute export property. See §1.993–3(d)(4) (relating to determination of where the ultimate use of the property occurs). Thus, qualified export receipts of a DISC described in paragraph (b) or (c) of this section do not include gross receipts of the DISC from the sale or lease of such property.

(3) *Sales of export property accomplished by subsidy.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (b) of this section if the sale of export property (whether or not such property consists of agricultural products) is pursuant to any of the following:

(i) The development loan program, or grants under the technical cooperation and development grants program of the Agency for International Development, or grants under the military assistance program administered by the Department of Defense, pursuant to the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2151), unless the DISC shows to the satisfaction of the district director that, under the conditions existing at the time of the sale, the purchaser had a reasonable opportunity to purchase, on competitive terms and from a seller who was not a U.S. person, goods which were substantially identical to such property and which were not manufactured, produced, grown, or extracted (as described in §1.993–3(c)) in the United States,

(ii) The Pub. L. 480 program authorized under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701–1710),

(iii) For taxable years ending before January 1, 1974, the Barter program of the Commodity Credit Corporation authorized by section 4(h) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714b(h)), and section 303 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1692) but only if the taxpayer treats such sales as sales giving rise to excluded receipts,

(iv) The Export Payment program of the Commodity Credit Corporation authorized by sections 5(d) and (f) of the Commodity Credit Corporation Charter

Act, as amended (15 U.S.C. 714c (d) and (f)),

(v) The section 32 export payment programs authorized by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c), and

(vi) For taxable years beginning after November 3, 1972, the Export Sales program of the Commodity Credit Corporation authorized by sections 5 (d) and (f) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714c (d) and (f)), other than the GSM–4 program provided under 7 CFR part 1488, and section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), for the purpose of disposing of surplus agricultural commodities and exporting or causing to be exported agricultural commodities, except that for taxable years beginning on or before November 3, 1972, the taxpayer may treat such sales as sales giving rise to excluded receipts.

(4) *Sales or lease of export property and furnishing of engineering or architectural services for use by the United States*—(i) *In general.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (b), (c), or (h) of this section if a sale or lease of export property, or the furnishing of engineering or architectural services, is for use by the United States or an instrumentality thereof in any case in which any law or regulation requires in any manner the purchase or lease of property manufactured, produced, grown, or extracted in the United States or requires the use of engineering or architectural services performed by a U.S. person. For example, a sale by a DISC of export property to the Department of Defense for use outside the United States would not produce qualified export receipts for such DISC if the Department of Defense purchased such property from appropriated funds subject to any provisions of the Armed Services Procurement Regulations (32 CFR subchapter A, part 6, subpart A) or any appropriations act for the Department of Defense for the applicable year which restricts the availability of such appropriated funds to the procurement of items which are grown, reprocessed, reused, or produced in the United States.

(ii) *Direct or indirect sales or leases.* Any sale or lease of export property is for use by the United States or an instrumentality thereof is such property is sold or leased by a DISC (or by a principal for whom such DISC acts as commission agent) to—

(*a*) A person who is a related person with respect to such DISC or such principal and who sells or leases such property for use by the United States or an instrumentality thereof or

(*b*) A person who is not a related person with respect to such DISC or such principal if, at the time of such sale or lease, there is an agreement or understanding that such property will be sold or leased for use by the United States or an instrumentality thereof (or if a reasonable person would have known at the time of such sale or lease that such property would be sold or leased for use by the United States or an instrumentality thereof) within 3 years after such sale or lease.

(iii) *Excluded programs.* The provisions of subdivisions (i) and (ii) of this subparagraph do not apply in the case of a purchase by the United States or an instrumentality thereof if such purchase is pursuant to—

(*a*) The Foreign Military Sales Act, as amended (22 U.S.C. 2751 *et seq.*), or a program under which the U.S. Government purchases property for resale, on commercial terms, to a foreign government or agency or instrumentality thereof, or

(*b*) A program (whether bilateral or multilateral) under which sales to the U.S. Government are open to international competitive bidding.

(5) *Services.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (d) of this section (concerning related and subsidiary services) if the services from which such gross receipts are derived are related and subsidiary to the sale or lease of property which results in excluded receipts pursuant to this paragraph.

(6) *Receipts within controlled group*—(i) *In general.* Gross receipts of a corporation do not constitute qualified export receipts for any taxable year of such corporation if—

(*a*) At the time of the sale, lease, or other transaction resulting in such gross receipts, such corporation and the person from whom such receipts are directly or indirectly derived (whether or not such corporation and such person are the same person) are members of the same controlled group (as defined in paragraph (k) of this section) and

(*b*) Such corporation and such person each qualifies (or is treated under section 992(a)(2)) as a DISC for its taxable year in which its receipts arise.

Thus, for example, assume that R, S, X, and Y are members of the same controlled group and that X and Y are DISC's. If R sells property to S and pays X a commission relating to that sale and if S sells the same property to an unrelated foreign party and pays Y a commission relating to that sale, the receipts received by X from the sale of such property by R to S will be considered to be derived from Y, a DISC which is a member of the same controlled group as X, and thus will not result in qualified export receipts to X. The receipts received by Y from the sale to an unrelated foreign party may, however, result in qualified export receipts to Y. For another example, if R and S both assign the commissions to X, receipts derived from the sale from R to S will be considered to be derived from X acting as commission agent for S and will not result in qualified export receipts to X. Receipts derived by X from the sale of property by S to an unrelated foreign party, may, however, constitute qualified export receipts.

(ii) *Leased property*. See §1.993–3(f)(2) regarding property not constituting export property in certain cases where such property is leased to any corporation which is a member of the same controlled group as the lessor.

(k) *Definition of ''controlled group''*. For purposes of sections 991 through 996 and the regulations thereunder, the term ''controlled group'' has the same meaning as is assigned to the term ''controlled group of corporations'' by section 1563(a), except that (1) the phrase ''more than 50 percent'' is substituted for the phrase ''at least 80 percent'' each place the latter phrase appears in section 1563(a), and (2) section 1563(b) shall not apply. Thus, for example, a foreign corporation subject to tax under section 881 may be a member of a controlled group. Furthermore, two or more corporations (including a foreign corporation) are members of a controlled group at any time such corporations meet the requirements of section 1563(a) (as modified by this paragraph).

(l) *DISC's entitlement to income*—(1) *Application of section 994.* A corporation which meets the requirements of §1.992–1(a) to be treated as a DISC for a taxable year is entitled to income, and the intercompany pricing rules of section 994(a)(1) or (2) apply, in the case of any transactions described in §1.994–1(b) between such DISC and its related supplier (as defined in §1.994–1(a)(3)). For purposes of this subparagraph, such DISC need not have employees or perform any specific function.

(2) *Other transactions.* In the case of a transaction to which the provisions of subparagraph (1) of this paragraph do not apply but from which a DISC derives gross receipts, the income to which the DISC is entitled as a result of the transaction is determined pursuant to the terms of the contract for such transaction and, if applicable, section 482 and the regulations thereunder.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. P Corporation forms S Corporation as a wholly-owned subsidiary. S qualifies as a DISC for its taxable year. S has no employees on its payroll. S is granted a franchise with respect to specified exports of P. P will sell such exports to S for resale by S. Such exports are of a type which produce qualified export receipts as defined in paragraph (b) of this section. P's sales force will solicit orders in the name of S using S's order forms. S places orders with P only when S itself has received orders. No inventory is maintained by S. P makes shipments directly to customers of S. Employees of P will act for S and billings and collections will be handled by P in the name of S. Under these facts, the income derived by S for such taxable year from the purchase and resale of the specified export is treated for Federal income tax purposes as the income of S, and the amount of income allocable to S will be determined under section 994 of the Code.

Example 2. P Corporation forms S Corporation as a wholly-owned subsidiary. S qualifies as a DISC for its taxable year. S has no employees on its payroll. S is granted a sales franchise with respect to specified exports of P and will receive commissions with respect to such exports. Such exports are of a type which will produce gross receipts for S which are qualified export receipts as defined in paragraph (b) of this section. P's sales force will solicit orders in the name of P. Billings and collections are handled directly by P. Under these facts, the commissions paid to S for such taxable year with respect to the specified exports shall be treated for Federal income tax purposes as the income of S, and the amount of income allocable to S is determined under section 994 of the Code.

[T.D. 7514, 42 FR 55454, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977, as amended by T.D. 7854, 47 FR 51739, Nov. 17, 1982]

§ 1.993–2 Definition of qualified export assets.

(a) *In general.* For a corporation to qualify as a DISC, at the close of its taxable year it must have qualified export assets with adjusted bases equal to at least 95 percent of the sum of the adjusted bases of all its assets. An asset which is a qualified export asset under more than one paragraph of this section shall be taken into account only once in determining the sum of the adjusted bases of all qualified export assets. Under section 993(b), the qualified export assets held by a corporation are—

(1) Export property as defined in § 1.993–3 (see paragraph (b) of this section),

(2) Business assets described in paragraph (c) of this section,

(3) Trade receivables described in paragraph (d) of this section,

(4) Temporary investments to the extent described in paragraph (e) of this section,

(5) Producer's loans as defined in § 1.993–4 (see paragraph (f) of this section),

(6) Stock or securities (described in paragraph (g) of this section) of related foreign export corporations as defined in § 1.993–5,

(7) Export-Import Bank and other obligations described in paragraph (h) of this section,

(8) Financing obligations described in paragraph (i) of this section, and

(9) Funds awaiting investment described in paragraph (j) of this section.

(b) *Export property.* In general, export property is certain property held for sale or lease which meets the requirements of § 1.993–3.

(c) *Business assets.* For purposes of this section, business assets are assets used by a DISC (other than as a lessor) primarily in connection with—

(1) The sale, lease, storage, handling, transportation, packaging, assembly, or servicing of export property, or

(2) The performance of engineering or architectural services (described in § 1.993–1(h)) or managerial services (described in § 1.993–1(i)) in furtherance of the production of qualified export receipts.

Assets used primarily in the manufacture, production, growth, or extraction (within the meaning of § 1.993–3(c)) of property are not business assets.

(d) *Trade receivables*—(1) *In general.* For purposes of this section, trade receivables are accounts receivable and evidences of indebtedness which arise by reason of transactions of such corporation or of another corporation which is a DISC and which is a member of a controlled group which includes such corporation described in subparagraph (A), (B), (C), (D), (G), or (H), of section 993(a)(1) and which are due the DISC (or, if it acts as an agent, due its principal) and held by the DISC.

(2) *Trade receivables representing commissions.* If a DISC acts as commission agent for a principal in a transaction described in § 1.993–1 (b), (c), (d), (e), (h), or (i) which results in qualified export receipts for the DISC, and if an account receivable or evidence of indebtedness held by the DISC and representing the commission payable to the DISC as a result of the transaction arises (and, in the case of an evidence of indebtedness, designated on its face as representing such commission), such account receivable or evidence of indebtedness shall be treated as a trade receiveable. If, however, the principal is a related supplier (as defined in § 1.994–1(a)(3)) with respect to the DISC, such account receivable or evidence of indebtedness will not be treated as a trade receivable unless it is payable and paid in a time and manner which satisfy the requirements of § 1.994–1(e)(3) or (5) (relating to initial payment of transfer price or commission and procedure for adjustments to transfer price or commission, respectively), as the case may be. However, see subparagraph (3) of

this paragraph for rules regarding certain accounts receivable representing commissions payable to a DISC by its related supplier.

(3) *Indebtedness arising under §1.994–1(e).* An indebtedness arising under §1.994–1(e)(3)(iii) (relating to initial payment of transfer price or commission) in favor of a DISC is not a qualified export asset. An indebtedness arising under §1.994–1(e)(5)(i) (relating to procedure for adjustments to transfer price or commission) in favor of a DISC is a trade receivable if it is paid in the time and manner described in §1.994–1(e)(5)(i) and (ii) and if it otherwise satisfies the requirements of subparagraph (2) of this paragraph. If such an indebtedness is not paid in the time and manner described in §1.994–1(e)(5)(i) and (ii), it is not a qualified export asset.

(e) *Temporary investments*—(1) *In general.* For purposes of this section, temporary investments are money, bank deposits (not including time deposits of more than 1 year), and other similar temporary investments to the extent maintained by a DISC as reasonably necessary to meet its requirements for working capital. For purposes of this paragraph, a temporary investment is an obligation, including an evidence of indebtedness as defined in paragraph (d)(1) of this section, which is a demand obligation or has a period remaining to maturity of not more than 1 year at the date it is acquired by the DISC. A temporary investment does not include trade receivables.

(2) *Determination of amount of working capital maintained.* For purposes of this paragraph—

(i) The working capital of a DISC is the excess of its current assets over current liabilities.

(ii) Current assets are cash and other assets (other than trade receivables) which may reasonably be expected to be converted into cash or sold or consumed during the current normal operating cycle of the DISC's trade or business.

(iii) Current liabilities are obligations (or portions of obligations) due within the current normal operating cycle of the trade or business of the DISC whose satisfaction when due is reasonably expected to require the use of current assets.

(iv) Generally accepted financial accounting treatments will be accepted, and

(v) Current assets (other than temporary investments) are taken into account before temporary investments, and trade receivables are never taken into account, in determining whether such temporary investments are maintained by the DISC as reasonably necessary to meet his current liabilities and its requirements for working capital.

(3) *Determination of amount of working capital reasonably required.* For purposes of this paragraph, a determination of the amount of money, bank deposits, and other similar temporary investments reasonably necessary to meet the requirements of the DISC for working capital will depend upon the nature and volume of the activities of the DISC existing at the end of the DISC's taxable year for which such determination is made, such as, for example—

(i) In the case of a DISC which purchases and sells inventory, the amount of working capital reasonably required is limited to an amount reasonably necessary to meet the ordinary operating expenses during the current normal operating cycle of the trade or business of the DISC, an amount reasonably needed to meet specific and definite plans for expansion and any amounts necessary for reasonably anticipated extraordinary business expenses.

(ii) In the case of a DISC which actively conducts a trade or business (including the employment of a sales force) and receives commissions in respect of goods to which such DISC does not have title, the amount of working capital required will depend upon the nature and volume of the activities of the DISC which produce such income as they exist on the applicable determination date. In determining the amount of working capital which is reasonably required for the production of such income, the anticipated future needs of the business will be taken into account to the extent that such needs relate to the year of the DISC following the applicable determination date. Anticipated future needs relating to a later period will not be taken into account unless it is clearly established that such needs are reasonably related to the production of such income as of the applicable determination date.

(iii) In the case of a DISC which does not actively conduct a trade or business, and which receives commissions solely by reason of section 994(a)(1), (a)(2), or (b) with respect to goods to which such DISC does not have title, no working capital would be required beyond a de minimis amount unless it appears from the facts and circumstances that additional working capital will be required.

(iv) In the case of a DISC deriving income from the leasing of property, the amount of working capital required will be determined on the basis of the facts and circumstances in such case.

(4) *Relationship of working capital to other qualified export assets.* If a temporary investment is a qualified export asset under any provision of this section (other than this paragraph), this paragraph shall not affect its status as a qualified export asset. However, any such temporary investment is taken into account before other temporary investments in determining whether such other temporary investments are maintained by a DISC as reasonably necessary to meet its requirements for working capital. Current assets (other than temporary investments) are taken into account before temporary investments, and trade receivables are never taken into account, in determining whether such temporary investments are maintained by the DISC as reasonably necessary requirements for working capital. An obligation issued or incurred by a member of a controlled group (as defined in § 1.993–1(k)) of which the DISC is a member is not a qualified export asset under this paragraph. For rules regarding working capital as of the end of each month of a taxable year for purposes of the 70-percent reasonableness standard with respect to certain deficiency distributions, see paragraph (j)(3) of this section.

(f) *Producer's loans.* For purposes of this section, a producer's loan is an evidence of indebtedness arising in connection with producer's loans which are made by a DISC and which meet the requirements of § 1.993–4. If a producer's loan is a qualified export asset, interest accrued with respect to the producer's loan will also be treated as a qualified export asset provided that payment is made in the form of money, property (valued at its fair market value on its date of transfer and including accounts receivable for sales by or through a DISC), a written obligation which qualifies as a debt under the safe harbor rule of § 1.992–1(d)(2)(ii), or an accounting entry offsetting the account receivable against an existing debt owed by the person in whose favor the account receivable was established to the person with whom it engaged in the transaction and that payment is made no later than 60 days following the close of the taxable year of accrual of the interest. This paragraph (f) is effective for taxable years beginning after January 10, 1985 except that the taxpayer may at its option apply the provisions of this paragraph to taxable years ending after December 31, 1971.

(g) *Stock or securities of related foreign corporations.* For purposes of this section, the term ''stock or securities'', with respect to a related foreign export corporation (as defined in § 1.993–5), has the same meaning as such term has as used in section 351 (relating to transfers to controlled corporations), except that the term ''securities'' does not include obligations which are repaid, in whole or in part, at any time during the taxable year of the DISC following the taxable year of the DISC during which such obligations were acquired by the DISC or were issued, unless the DISC demonstrates to the satisfaction of the district director that the repayment was for bona fide business purposes and not for the purpose of avoidance of Federal income taxes.

(h) *Export-Import Bank obligations.* For purposes of this section, the term ''Export-Import Bank obligations'' means obligations issued, guaranteed, insured, or reinsured (in whole or in part) by the Export-Import Bank of the United States or by the Foreign Credit Insurance Association, but only if such obligations are acquired by the DISC—

(1) From the Export-Import Bank of the United States,

(2) From the Foreign Credit Insurance Association, or

(3) From the person selling or purchasing the goods or services by reason

of which such obligations arose, or from any corporation which is a member of the same controlled group (as defined in §1.993–1(k)) as such person.

For purposes of this paragraph, obligations issued by a person described in subparagraphs (1), (2), and (3) of this paragraph are treated as acquired from such person by the DISC if acquired from any person not more than 90 days after the date of original issue (as defined in §1.1232–3(b)(3)). Examples of specific types of Export-Import Bank obligations include debentures issued by such bank and certificates of loan participation.

(i) *Financing obligations.* For purposes of this section, financing obligations are obligations (held by a DISC) of a domestic corporation organized solely for the purpose of financing sales of export property pursuant to an agreement with the Export-Import Bank of the United States under which such corporation makes export loans guaranteed by such Bank.

(j) *Funds awaiting investment*—(1) *In general.* For purposes of this section, subject to the limitation descibed in subparagraph (2) of this paragraph, if, at the close of a DISC's taxable year, the sum of the DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section to exceed an amount reasonably necessary to meet the DISC's requirements for working capital, the amount of the DISC's bank deposits in the United States to the extent of the amount of this excess are funds awaiting investment at the close of such taxable year.

(2) *Limitation.* Bank deposits described in subparagraph (1) of this paragraph are funds awaiting investment only if, by the last day of each of the sixth, seventh, and eighth months after the close of such taxable year, the sum of the adjusted bases of the qualified export assets of the DISC (other than such bank deposits) equals or exceeds 95 percent of the sum of the adjusted bases of all assets of the DISC (including such bank deposits) it held on the last day of such taxable year. For purposes of this subparagraph, the adjusted bases of assets of a DISC are determined as of the end of each of the months referred to in this subparagraph. Funds awaiting investment as described in this paragraph need not be traceable to any of the qualified export assets held by the DISC at the end of any of the months referred to in this subparagraph.

(3) *Coordination with certain deficiency distribution provisions.* Under section 992(c)(3) and §1.992–3(d) a deficiency distribution made on or before the 15th day of the ninth month after the end of a corporation's taxable year is deemed to be for reasonable cause if certain requirements are met, including the requirement (described in section 992(c)(3)(B) and §1.992–3(d)(2)) that the sum of the adjusted bases of the qualified export assets held by the corporation on the last day of each month of such year equals or exceeds 70 percent of the sum of the adjusted bases of all assets held by the corporation on each such last day. If, on any such last day, the sum or a DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section to exceed an amount reasonably necessary to meet the DISC's requirements for working capital, the amount of the DISC's bank deposits to the extent of the amount of this excess are funds awaiting investment on such last day, if either—

(i) The requirements of subparagraph (2) of this paragraph are satisfied with respect to the taxable year of the DISC which includes such month or

(ii) At the close of such taxable year the sum of the DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section not to exceed an amount reasonably necessary to meet the DISC's requirements for working capital.

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7514, 42 FR 55459, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977, as amended by T.D. 7854, 47 FR 51740, Nov. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§ 1.993–3 Definition of export property.

(a) *General rule.* Under section 993(c), except as otherwise provided with respect to excluded property in paragraph (f) of this section and with respect to certain short supply property in paragraph (i) of this section, export property is property in the hands of any person (whether or not a DISC)—

(1) Manufactured, produced, grown, or extracted in the United States by any person or persons other than a DISC (see paragraph (c) of this section),

(2) Held primarily for sale or lease in the ordinary course of a trade or business to any person for direct use, consumption, or disposition outside the United States (see paragraph (d) of this section),

(3) Not more than 50 percent of the fair market value of which is attributable to articles imported into the United States (see paragraph (e) of this section), and

(4) Which is not sold or leased by a DISC, or with a DISC as commission agent, to another DISC which is a member of the same controlled group (as defined in § 1.993–1(k)) as the DISC.

(b) *Services.* For purposes of this section, services (including the written communication of services in any form) are not export property. Whether an item is property or services shall be determined on the basis of the facts and circumstances attending the development and disposition of the item. Thus, for example, the preparation of a map of a particular construction site would constitute services and not export property, but standard maps prepared for sale to customers generally would not constitute services and would be export property if the requirements of this section were otherwise met.

(c) *Manufacture, production, growth, or extraction of property*—(1) *By a person other than a DISC.* Export property may be manufactured, produced, grown, or extracted in the United States by any person, provided that such person does not qualify (and is not treated) as a DISC. Property held by a DISC which was manufactured, produced, grown, or extracted by it at a time when it did not qualify (and was not treated) as a DISC is not export property of the DISC. Property which sustains further manufacture or production outside the United States prior to sale or lease by a person but after manufacture or production in the United States will not be considered as manufactured, produced, grown, or extracted in the United States by such person.

(2) *Manufactured or produced*—(i) *In general.* For purposes of this section, property which is sold or leased by a person is considered to be manufactured or produced by such person if such property is manufactured or produced (within the meaning of either subdivision (ii), (iii), or (iv) of this subparagraph) by such person or by another person pursuant to a contract with such person. Except as provided in subdivision (iv) of this subparagraph, manufacture or production of property does not include assembly or packaging operations with respect to property.

(ii) *Substantial transformation.* Property is manufactured or produced by a person if such property is substantially transformed by such person. Examples of substantial transformation of property would include the conversion of woodpulp to paper, steel rods to screws and bolts, and the canning of fish.

(iii) *Operations generally considered to constitute manufacturing.* Property is manufactured or produced by a person if the operations performed by such person in connection with such property are substantial in nature and are generally considered to constitute the manufacture or production of property.

(iv) *Value added to property.* Property is manufactured or produced by a person if with respect to such property conversion costs (direct labor and factory burden including packaging or assembly) of such person account for 20 percent of more of—

(*a*) The cost of goods sold or inventory amount of such person for such property is such property is sold or held for sale, or

(*b*) The adjusted basis of such person for such property, as determined in accordance with the provisions of section 1011, if such property is held for lease or leased.

The value of parts provided pursuant to a services contract, as described in § 1.993–1 (d)(4)(v), is not taken into account in applying this subdivision.

(d) *Primary purpose of which property is held*—(1) *In general*—(i) *General rule.* Under paragraph (a)(2) of this section, export property (*a*) must be held primarily for the purpose of sale or lease in the ordinary course of trade or business to a DISC, or to any other person, and (*b*) such sale or lease must be for direct use, consumption, or disposition outside the United States. Thus, property cannot qualify as export property unless it is sold or leased for direct use, consumption or disposition outside the United States. Property is sold or leased for direct use, consumption, or disposition outside the United States if such sale or lease satisfies the destination test described in subparagraph (2) of this paragraph, the proof of compliance requirements described in subparagraph (3) of this paragraph, and the use outside the United States test described in subparagraph (4) of this paragraph.

(ii) *Factors not taken into account.* In determining whether property which is sold or leased to a DISC is sold or leased for direct use consumption, or disposition outside the United States, the fact that the acquiring DISC holds the property in inventory or for lease prior to the time it sells or leases it for direct use, consumption, or disposition outside the United States will not affect the characterization of the property as export property. Export property need not be physically segregated from other property.

(2) *Destination test.* (i) For purposes of subparagraph (1) of this paragraph the destination test in this subparagraph is satisfied with respect to property sold or leased by a seller or lessor only if it is delivered by such seller or lessor (or an agent of such seller or lessor) regardless of the F.O.B. point or the place at which title passes or risk of loss shifts from the seller or lessor—

(*a*) Within the United States to a carrier or freight forwarder for ultimate delivery outside the United States to a purchaser or lessee (or to a subsequent purchaser or sublessee),

(*b*) Within the United States to a purchaser or lessee, if such property is ultimately delivered, directly used, or directly consumed outside the United States (including delivery to a carrier or freight forwarder for delivery outside the United States) by the purchaser or lessee (or a subsequent purchaser or sublessee) within 1 year after such sale or lease,

(*c*) Within or outside the United States to a purchaser or lessee which, at the time of the sale or lease, is a DISC and is not a member of the same controlled group (as defined in § 1.993–1(k)) as the seller or lessor,

(*d*) From the United States to the purchaser or lessee (or a subsequent purchaser or sublessee) at a point outside the United States by means of a ship, aircraft, or other delivery vehicle, owned, leased, or chartered by the seller or lessor,

(*e*) Outside the United States to a purchaser or lessee from a warehouse, a storage facility, or assembly site located outside the United States, if such property was previously shipped by such seller or lessor from the United States, or

(*f*) Outside the United States to a purchaser or lessee if such property was previously shipped by such seller or lessor from the United States and if such property is located outside the United States pursuant to a prior lease by the seller or lessor, and either (*1*) such prior lease terminated at the expiration of its term (or by the action of the prior lessee acting alone), (*2*) the sale occurred or the term of the subsequent lease began after the time at which the term of the prior lease would have expired, or (*3*) the lessee under the subsequent lease is not a related person (as defined in § 1.993–1(a)(6)) with respect to the lessor and the prior lease was terminated by the action of the lessor (acting alone or together with the lessee).

(ii) For purposes of this subparagraph (other than (*c*) and (*f*)(*3*) of subdivision (i) thereof), any relationship between the seller or lessor and any purchaser, subsequent purchaser, lessee, or sublessee is immaterial.

(iii) In no event is the destination test of this subparagraph satisfied with respect to property which is subject to any use (other than a resale or sublease), manufacture, assembly, or other processing (other than packaging) by any person between the time of the sale or lease by such seller or lessor and the delivery or ultimate delivery outside the United States described in this subparagraph.

(iv) If property is located outside the United States at the time it is purchased by a person or leased by a person as lessee, such property may be export property in the hands of such purchaser or lessee only if it is imported into the United States prior to its further sale or lease (including a sublease) outside the United States. Paragraphs (a)(3) and (e) of this section (relating to 50 percent foreign content test) are applicable in determining whether such property is export property. Thus, for example, if such property is not subjected to manufacturing or production (as defined in paragraph (c) of this section) within the United States after such importation, it does not qualify as export property.

(3) *Proof of compliance with destination test*—(i) *Delivery outside the United States.* For purposes of subparagraph (2) of this paragraph (other than subdivision (i)(*c*) thereof), a seller or lessor shall establish ultimate delivery, use, or consumption of property outside the United States by providing—

(a) A facsimile or carbon copy of the export bill of lading issued by the carrier who delivers the property,

(b) A certificate of an agent or representative of the carrier disclosing delivery of the property outside the United States,

(c) A facsimile or carbon copy of the certificate of lading for the property executed by a customs officer of the country to which the property is delivered,

(d) If such country has no customs administration, a written statement by the person to whom delivery outside the United States was made,

(e) A facsimile or carbon copy of the shipper's export declaration, a monthly shipper's summary declaration filed with the Bureau of Customs, or a magnetic tape filed in lieu of the Shipper's Export Declaration, covering the property,

(*f*) Any other proof (including evidence as to the nature of the property or the nature of the transaction) which establishes to the satisfaction of the Commissioner that the property was ultimately delivered, or directly sold, or directly consumed outside the United States within 1 year after the sale or lease.

(ii) The requirements of subdivision (i) *(a), (b), (c),* or *(e)* of this subparagraph will be considered satisfied even though the name of the ultimate consignee and the price paid for the goods is marked out provided that, in the case of a Shipper's Export Declaration or other document listed in such subdivision *(e)* or a document such as an export bill of lading such document still indicates the country in which delivery to the ultimate consignee is to be made and, in the case of a certificate of an agent or representative of the carrier, that such document indicates that the property was delivered outside the United States.

(iii) A seller or lessor shall also establish the meeting of the requirement of subparagraph (2)(i) of this paragraph (other than subdivision *(c)* thereof), that the property was delivered outside the United States without further use, manufacture, assembly, or other processing within the United States.

(iv) *Sale or lease to an unrelated DISC.* For purposes of subparagraph (2)(i)(*c*) of this paragraph, a purchaser or lessee of property is deemed to qualify as a DISC for its taxable year if the seller or lessor obtains from such purchaser or lessee a copy of such purchaser's or lessee's election to be treated as a DISC as described in § 1.992–2(a) together with such purchaser's or lessee's sworn statement that such election has been filed with the Internal Revenue Service Center. The copy of the election and the sworn statement of such purchaser or lessee must be received by the seller or lessor within 6 months after the sale or lease. A purchaser or lessee is not treated as a DISC with respect to a sale or lease during a taxable year for which such purchaser or lessee does not qualify as a DISC if the seller or lessor does not believe or if a reasonable person would not believe at the time such sale or lease is made that the purchaser or lessee will qualify as a DISC for such taxable year.

(v) *Failure of proof.* If a seller or lessor fails to provide proof of compliance with the destination test as required by this subparagraph, the property sold or leased is not export property.

(4) *Sales and leases of property for ultimate use in the United States*—(i) *In general.* For purposes of subparagraph (1) of this paragraph, the use test in this subparagraph is satisfied with respect to property which—

(a) Under subdivisions (ii) through (iv) of this subparagraph is not sold for ultimate use in the United States or

(b) Under subdivision (v) of this subparagraph is leased for ultimate use outside the United States.

(ii) *Sales of property for ultimate use in the United States.* For purposes of subdivision (i) of this subparagraph, a purchaser of property (including components, as defined in subdivision (vii) of this subparagraph) is deemed to use such property ultimately in the United States if any of the following conditions exists:

(a) Such purchaser is a related person (as defined in §1.993–1(a)(6)) with respect to the seller and such purchaser ultimately uses such property, or a second product into which such property is incorporated as a component, in the United States.

(b) At the time of the sale, there is an agreement or understanding that such property, or a second product into which such property is incorporated as a component, will be ultimately used by the purchaser in the United States.

(c) At the time of the sale, a reasonable person would have believed that such property or such second product would be ultimately used by such purchaser in the United States unless, in the case of a sale of components, the fair market value of such components at the time of delivery to the purchaser constitutes less than 20 percent of the fair market value of the second product into which such components are incorporated (determined at the time of completion of the production, manufacture or assembly of such second product).

For purposes of (b) of this subdivision, there is an agreement or understanding that property will ultimately be used in the United States if, for example, a component is sold abroad under an express agreement with the foreign purchaser that the component is to be incorporated into a product to be sold back to the United States. As a further example there would also be such an agreement or understanding if the foreign purchaser indicated at the time of the sale or previously that the component is to be incorporated into a product which is designed principally for the United States market. However, such an agreement or understanding does not result from the mere fact that a second product, into which components exported from the United States have been incorporated and which is sold on the world market, is sold in substantial quantities in the United States.

(iii) *Use in the United States.* For purposes of subdivision (ii) of this subparagraph, property (including components incorporated into a second product) is or would be ultimately used in the United States by such purchaser if, at any time within 3 years after the purchase of such property or components, either such property or components (or the second product into which such components are incorporated) is resold by such purchaser for use by a subsequent purchaser within the United States or such purchaser or subsequent purchaser fails, for any period of 365 consecutive days, to use such property or second product predominantly outside the United States as defined in subdivision (vi) of this subparagraph).

(iv) *Sales to retailers.* For purposes of subdivision (ii)(*c*) of this subparagraph, property sold to any person whose principal business consists of selling from inventory to retail customers at retail outlets ouside the United States will be considered as property for ultimate use outside the United States.

(v) *Leases of property for ultimate use outside the United States.* For purposes of subdivision (i) of this subparagraph a lessee of property is deemed to use such property ultimately outside the United States during a taxable year of the lessor if such property is used predominantly outside the United States (as defined in subdivision (vi) of this subparagraph) by the lessee during the portion of the lessor's taxable year which is included within the term of the lease. A determination as to whether the ultimate use of leased property satisfies the requirements of this subdivision is made for each taxable year of the lessor. Thus, leased property may be used predominantly outside the

United States for a taxable year of the lessor (and thus, constitute export property if the remaining requirements of this section are met) even if the property is not used predominantly outside the United States in earlier taxable years or later taxable years of the lessor.

(vi) *Predominant use outside the United States.* For purposes of this subparagraph, property is used predominantly outside the United States for any period if, during such period, such property is located outside the United States more than 50 percent of the time. An aircraft, railroad rolling stock, vessel, motor vehicle, container, or other property used for transportation purposes in deemed to be used predominantly outside the United States for any period if, during such period, either such property is located outside the United States more than 50 percent of the time or more than 50 percent of the miles traversed in the use of such property are traversed in outside the United States. However, any such property is deemed to be within the United States at all times during which it is engaged in transport between any two points within the United States, except where such transport constitutes uninterrupted international air transportation within the meaning of section 4262(c)(3) and the regulations thereunder (relating to tax on air transportation of persons). For purposes of applying section 4262(c)(3) to this subdivision, the term ''United States'' has the same meaning as in § 1.993–7.

(vii) *Component.* For purposes of this subparagraph, a component is property which is (or is reasonably expected to be) incorporated into a second product by the purchaser of such component by means of production, manufacture, or assembly.

(e) *Foreign content of property*—(1) *The 50 percent test.* Under paragraph (a)(3) of this section, no more than 50 percent of the fair market value of export property may be attributable to the fair market value of articles which were imported into the United States. For purposes of this paragraph, articles imported into the United States are referred to as ''foreign content''. The fair market value of the foreign content of export property is computed in accordance with subparagraph (4) of this paragraph. The fair market value of export property which is sold to a person who is not a related person with respect to the seller is the sale price for such property (not including interest finance or carrying charges, or similar charges)

(2) *Application of 50 percent test.* The 50 percent test described in subparagraph (1) of this paragraph is applied on an item-by-item basis If, however, a person sells or leases a substantial volume of substantially identical export property in a taxable year and if all of such property contains substantially identical foreign content is substantially the same proportion, such person may determine the portion of foreign content contained in such property on an aggregate basis.

(3) *Parts and services.* If, at the time property is sold or leased the seller or lessor agrees to furnish parts pursuant to a services contract (as provided in § 1.993–1(d)(4)(v)) and the price for the parts is not separately stated, the 50 percent test described in subparagraph (1) of this paragraph is applied on an aggregate basis to the property and parts. If the price for the parts is described in subparagraph (1) of this paragraph is applied separately to the property and to the parts.

(4) *Computation of foreign content*— (i) *Valuation.* For purposes of applying the 50 percent test described in subparagraph (1) of this paragraph, it is necessary to determine the fair market value of all articles which constitute foreign content of the property being tested to determine if it is export property. The fair market value of such imported articles is determined as of the time such articles are imported into the United States. With respect to articles imported into the United States before July 1, 1980, the fair market value of such articles is their appraised value as determined under section 402 or 402a of the Tariff Act of 1930 (19 U.S.C. 1401a or 1402) in connection with their importation. With respect to articles imported into the United States on or after July 1, 1980, the fair market value of such articles is their appraised value as determined under section 402 of the Tariff Act of 1930 (19 U.S.C.

1401a) in connection with their importation. The appraised value of such articles is the full dutiable value of such articles, determined, however, without regard to any special provision in the United States tariff laws which would result in a lower dutiable value. Thus, an article which is imported into the United States is treated as entirely imported even if all or a portion of such article was originally manufactured, produced, grown, or extracted in the United States.

(ii) *Evidence of fair market value.* For purposes of subdivision (i) of this subparagraph, the fair market value of imported articles constituting foreign content may be evidenced by the customs invoice issued on the importation of such articles into the United States. If the holder of such articles is not the importer (or a related person with respect to the importer), the fair market value of such articles may be evidenced by a certificate based upon information contained in the customs invoice and furnished to the holder by the person from whom such articles (or property incorporating such articles) were purchased. If a customs invoice or certificate described in the preceding sentence is not available to a person purchasing property, such person shall establish that no more than 50 percent of the fair market value of such property is attributable to the fair market value of articles which were imported into the United States.

(iii) *Interchangeable component articles—(a)* Where identical or similar component articles can be incorporated interchangeably into property and a person acquires some such component articles that are imported into the United States and other such component articles that are not imported into the United States, the determination whether imported component articles were incorporated in such property as is exported from the United States shall be made on a substitution basis as in the case of the rules relating to drawback accounts under the customs laws. See section 313(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1313(b)).

(*b*) The provisions of (*a*) of this subdivision may be illustrated by the following example:

Example. Assume that a manufacturer produces a total of 20,000 electronic devices. The manufacturer exports 5,000 of the devices and subsequently sells 11,000 of the devices to a DISC which exports the 11,000 devices. The major single component article in each device is a tube which represents 60 percent of the fair market value of the device at the time the device is sold by the manufacturer. The manufacturer imports 8,000 of the tubes and produces the remaining 12,000 tubes. For purposes of this subdivision, in accordance with the substitution principle used in the customs drawback laws, the 5,000 devices exported by the manufacturer are each treated as containing an imported tube because the devices were exported prior to the sale to the DISC. The remaining 3,000 imported tubes are treated as being contained in the first 3,000 devices purchased and exported by the DISC. Thus, since the 50 percent test is not met with respect to the first 3,000 devices purchased and exported by the DISC, those devices are not export property. The remaining 8,000 devices purchased and exported by the DISC are treated as containing tubes produced in United States, and those devices are export property (if they otherwise meet the requirements of this section).

(f) *Excluded property*—(1) *In general.* Notwithstanding any other provision of this section, the following property is not export property—

(i) Property described in subparagraph (2) of this paragraph (relating to property leased to a member of a controlled group),

(ii) Property described in subparagraph (3) of this paragraph (relating to certain types of intangible property),

(iii) Products described in paragraph (g) of this section (relating to depletable products), and

(iv) Products described in paragraph (h) of this section (relating to certain export controlled products).

(2) *Property leased to member of controlled group*—(i) *In general.* Property leased to a person (whether or not a DISC) which is a member of the same controlled group (as defined in §1.993–1(k)) as the lessor constitutes export property for any period of time only if during the period—

(*a*) Such property is held for sublease, or is subleased, by such person to a third person for the ultimate use of such third person;

(*b*) Such third person is not a member of the same controlled group; and (*c*) Such property is used predominantly outside the United States by such third person.

(ii) *Predominant use.* The provisions of paragraph (d)(4)(vi) of this section apply in determining under subdivision (i)(*c*) of this subparagraph whether such property is used predominently outside the United States by such third person.

(iii) *Leasing rule.* For purposes of this subparagraph, leased property is deemed to be ultimately used by a member of the same controlled group as the lessor if such property is leased to a person which is not a member of such controlled group but which subleases such property to a person which is a member of such controlled group. Thus, for example, if X, a DISC for the taxable year, leases a movie film to Y, a foreign corporation which is not a member of the same controlled group as X, and Y then subleases the film to persons which are members of such group for showing to the general public, the film is not export property. On the other hand, if X, a DISC for the taxable year, leases a movie film to Z, a foreign corporation which is a member of the same controlled group as X, and Z then subleases the film to Y, another foreign corporation, which is not a member of the same controlled group for showing to the general public, the film is not disqualified under this subparagraph from being export property.

(iv) *Certain copyrights.* With respect to a copyright which is not excluded by subparagraph (3) of this paragraph from being export property, the ultimate use of such property is the sale or exhibition of such property to the general public. Thus, if A, a DISC for the taxable year, leases recording tapes to B, a foreign corporation which is a member of the same controlled group as A, and if B makes records from the recording tape and sells the records to C, another foreign corporation, which is not a member of the same controlled group, for sale by C to the general public, the recording tape is not disqualified under this subparagraph from being export property, notwithstanding the leasing of the recording tape by A to a member of the same controlled group, since the ultimate use of the tape is the sale of the records (*i.e.*, property produced from the recording tape).

(3) *Intangible property.* Export property does not include any patent, invention, model, design, formula, or process, whether or not patented, or any copyright (other than films, tapes, records, or similar reproductions, for commercial or home use), goodwill, trademark, tradebrand, franchise, or other like property. Although a copyright such as a copyright on a book does not constitute export property, a copyrighted article (such as a book) if not accompanied by a right to reproduce it is export property if the requirements of this section are otherwise satisfied. However, a license of a master recording tape for reproduction outside the United States is not disqualified under this subparagraph from being export property.

(g) *Depletable products*—(1) *In general.* Under section 993(c)(2)(C), a product or commodity which is a depletable product (as defined in subparagraph (2) of this paragraph) or contains a depletable product is not export property if—

(i) It is a primary product from oil, gas, coal, or uranium (as described in subparagraph (3) of this paragraph), or

(ii) It does not qualify as a 50-percent manufactured or processed product (as described in subparagraph (4) of this paragraph).

(2) *Definition of ''depletable product''.* For purposes of this paragraph, the term ''depletable product'' means any product or commodity of a character with respect to which a deduction for depletion is allowable under section 613 or 613A. Thus, the term depletable product includes any mineral extracted from a mine, an oil or gas well, or any other natural deposit, whether or not the DISC or related supplier is allowed a deduction, or is eligible to take a deduction, for depletion with respect to the mineral in computing its taxable income. Thus, for example, iron ore purchased by a DISC from a broker is a depletable product in the hands of the DISC for purposes of this paragraph even though the DISC is not eligible to take a deduction for depletion under section 613 or 613A.

(3) *Primary product from oil, gas, coal, or uranium.* A primary product from oil, gas, coal, or uranium is not export

property. For purposes of this paragraph—

(i) *Primary product from oil.* The term ''primary product from oil'' means crude oil and all products derived from the destructive distillation of crude oil, including—

(a) Volatile products,

(b) Light oils such as motor fuel and kerosene,

(c) Distillates such as naphtha,

(d) Lubricating oils,

(e) Greases and waxes, and

(f) Residues such as fuel oil.

For purposes of this paragraph, a product or commodity derived from shale oil which would be a primary product from oil if derived from crude oil is considered a primary product from oil.

(ii) *Primary product from gas.* The term ''primary product from gas'' means all gas and associated hydrocarbon components from gas wells or oil wells, whether recovered at the lease or upon further processing, including—

(a) Natural gas,

(b) Condensates,

(c) Liquefied petroleum gases such as ethane, propane, and butane, and

(d) Liquid products such as natural gasoline.

(iii) *Primary product from coal.* The term ''primary product from coal'' means coal and all products recovered from the carbonization of coal including—

(a) Coke,

(b) Coke-oven gas,

(c) Gas liquor,

(d) Crude light oil, and

(e) Coal tar.

(iv) *Primary product from uranium.* The term ''primary product from uranium'' means uranium ore and uranium concentrates (known in the industry as ''yellow cake''), and nuclear fuel materials derived from the refining of uranium ore and uranium concentrates, or produced in a nuclear reaction, including—

(a) Uranium hexafluoride,

(b) Enriched uranium hexafluoride,

(c) Uranium metal,

(d) Uranium compounds, such as uranium carbide,

(e) Uranium dioxide, and

(f) Plutonium fuels.

(v) *Primary products and changing technology.* The primary products from oil, gas, coal, or uranium described in subdivisions (i) through (iv) of this subparagraph and the processes described in those subdivisions are not intended to represent either the only primary products from oil, gas, coal, or uranium, or the only processes from which primary products may be derived under existing and future technologies, such as the gasification and liquefaction of coal.

(vi) *Petrochemicals.* For purposes of this paragraph, petrochemicals are not considered primary products from oil, gas, or coal.

(4) *50-percent manufactured or processed product*—(i) *In general.* A product or commodity (other than a primary product from oil, gas, coal, or uranium) which is or contains a depletable product is not excluded from the term ''export property'' by reason of section 993(c)(2)(C) if it is a 50-percent manufactured or processed product. Such a product or commodity is a ''50-percent manufactured or processed product'' if, after the cutoff point of the depletable product, it is manufactured or processed (as defined in subdivision (ii) of this subparagraph) and either the cost test described in subdivision (iv) of this subparagraph or the fair market value test described in subdivision (v) of this subparagraph is satisfied. To determine cutoff point, see subdivisions (vi) and (vii) of this subparagraph.

(ii) *Manufactured or processed.* A product is manufactured or processed if it is manufactured or produced within the meaning of paragraph (c)(2) of this section, except that for purposes of this subdivision the term manufacturing or processing does not include any excluded process (as defined in subdivision (iii) of this subparagraph) and the term conversion costs (as used in subdivision (iv) of such paragraph (c)(2)) does not include any costs attributable to any excluded process.

(iii) *Excluded processes.* For purposes of this paragraph, excluded processes are extracting *(i.e.,* all processes which are applied before the cutoff point of the mineral to which such processes are applied), and handling, packing, packaging, grading, storing, and transporting.

(iv) *Cost test.* A product or commodity will qualify as a 50-percent manufactured or processed product if—

(a) Its manufacturing and processing costs (that is, the portion of the cost of goods sold or inventory amount of the product or commodity attributable to the aggregate cost of manufacturing or processing each mineral contained therein) equal or exceed—

(b) An amount equal to either of the following:

(1) 50 percent of its cost of goods sold or inventory amount (decreased, at the DISC's option, by the portion of such cost or amount the DISC establishes is allocable to the difference between each prior owner's selling price for each depletable product contained in such product or commodity and such prior owner's cost of goods sold with respect thereto).

(2) The aggregate of the cost at the cutoff point (see subdivisions (vi) and (vii) of this subparagraph) properly attributable to each mineral contained in such product or commodity. However, if this subdivision *(2)* is applied, then the amount in *(a)* of this subparagraph (iv) shall be decreased and the amount in this subdivision *(2)* shall be increased, by so much of the cost of goods sold or inventory amount of the product or commodity as is properly allocable to any process other than transportation applied after the cutoff point of such mineral which would be a mining process (within the meaning of § 1.613–4) were it applied before such point.

(v) *Fair market value test.* A product or commodity will qualify as a 50-percent manufactured or processed product if—

(a) The excess of its fair market value on the date it is sold, exchanged, or otherwise disposed of (or, if not sold, exchanged, or otherwise disposed of, the last day of the DISC's taxable year) over the portion thereof properly allocable to excluded processes other than extracting is equal to or greater than

(*b*) Twice the aggregate of the fair market value at the cutoff point for each mineral contained in such product or commodity.

For purposes of this subdivision (v), the fair market value of a product or commodity on the date it is sold, exchanged, or otherwise disposed of is the price at which it is disposed of, subject to any adjustment that may be required under the arm's length standard of section 482 and the regulations thereunder. If such product or commodity is not sold, exchanged, or otherwise disposed of, then, for purposes of section 992(a)(1)(B) (relating to the 95-percent test with respect to qualified export assets), the fair market value of a product or commodity on the last day of the DISC's taxable year is the arm's length price at which such product or commodity would have been sold on such date, determined by applying the principles of section 482 and the regulations thereunder.

(vi) *Cutoff point of a mineral.* For purposes of this subparagraph:

(*a*) The cutoff point is the point at which gross income from the property (within the meaning of section 613(a)) was in fact determined.

(*b*) The cost at the cutoff point is deemed to be the amount of the gross income from the property of the taxpayer eligible for a depletion deduction with respect to the mineral.

(*c*) The fair market value at the cutoff point is deemed to be the amount of the gross income from the property of the taxpayer eligible for a depletion deduction with respect to the mineral, except that, if (*1*) the fair market value of a product or commodity on the date specified in subdivision (v)(*a*) of this subparagraph exceeds the aggregate of the fair market value at the cutoff point for each mineral contained therein and (*2*) 10 percent or more of such excess is attributable to a net increase in the fair market values of such minerals by reason of factors other than manufacturing or processing or the application of excluded processes (such as, for example, increases in the fair market values of some minerals by reason of inflation or speculation exceed decreases in such values of other minerals by reason of deflation or speculation), then the aggregate of the fair market value at the cutoff point for each such mineral shall be increased to reflect the net excess so attributable.

(*d*) The provisions of this subdivision (vi) are illustrated by the following example.

Example. An integrated manufacturer, X, on February 1, 1976, had gross income from the property (within the meaning of section 613(a)) of $50 with respect to a specified volume of a mineral. Thus, the cost at the cutoff point of the mineral was $50. X converted the mineral into a product which it sold on July 15, 1976, for $75. Of the $25 excess of the selling price over the gross income from the property, $23 was attributable to manufacturing, processing, and the application or excluded processes, and $2 was attributable to an increase in the fair market value of the mineral due to inflation between February 1 and July 15, 1976. Since only 8 percent of such excess ($2/$25) was attributable to factors other than manufacturing, processing, and the application of excluded processes, the fair market value at the cutoff point of the mineral is $50. However, had $3 of the $25 excess, or 12 percent, been attributable to an increase in the fair market value of the mineral due to inflation, then the fair market value at the cutoff point of the mineral would be $53.

(vii) [Reserved]

(viii) *Special rule for certain used products and scrap products.* If a product or commodity is a used 50-percent manufactured or processed product, or is recovered as scrap from a 50-percent manufactured or processed product, such product or commodity will be treated as a 50-percent manufactured or processed product.

(ix) *Special rule for byproducts and waste products.* For purposes of applying the cost test or fair market value test of subdivision (iv) or (v) of this subparagraph if a depletable product is recovered from a manufacturing process as a byproduct or waste product, then the cost and fair market value at the cutoff point are each deemed to be the lesser of—

(*a*) The fair market value of the waste product or byproduct containing the depletable product, determined as of the date the byproduct or waste product is recovered, or

(*b*) The amount the cost at the cutoff point would be for a depletable product of like kind and grade which is extracted, determined as of the date the byproduct or waste product is recovered.

For purposes of (*b*) of this subdivision the cutoff point for the depletable product of like kind and grade is deemed to be the point at which gross income from the property would be determined if such depletable product were sold by the taxpayer eligible to take a deduction for depletion after the completion of all mining processes applied to the depletable product and before the application of any nonmining process.

(x) *Proof of satisfaction of 50-percent manufactured or processed test.* (*a*) No substantiation is required to establish that either the cost test or the fair market value test of subdivisions (iv) or (v) of this subparagraph is satisfied or that a product or commodity qualifies under (viii) of this subdivision as either a used 50-percent manufactured or processed product or as scrap from a 50-percent manufactured or processed product as long as it is reasonably obvious, on the basis of all relevant facts and circumstances, that either the cost test or fair market value test is satisfied, or that the product or commodity qualifies as either as used 50-percent manufactured or processed product or as scrap from a 50-percent manufactured or processed product. Thus, for example, in the case of a DISC exporting a high precision lens at least 50 percent of the fair market value of which is obviously attributable to grinding, no substantiation of gross income from the property properly allocable to the depletable products contained in the lens, cost, or fair market values will be required.

(*b*) In cases in which satisfaction of either the cost test or the fair market value test is not reasonably obvious, a DISC will be required to substantiate the gross income from the property properly allocable to each depletable product in a product or commodity and either all costs or fair market values relied upon the DISC.

(*c*) For purposes of substantiating (*1*) gross income from the property properly allocable to a depletable product, (*2*) costs, and (*3*) fair market values, the DISC and related supplier shall each identify items in (or that were in) inventory in the same manner each used to identify items in inventory for purposes of computing Federal income tax.

(xi) *Application of 50-percent test.* The 50-percent test described in this subparagraph is applied on an item-by-item basis. If, however, a DISC sells a substantial volume of substantially identical products or commodities and if all or a group of such products or commodities contain substantially identical depletable products in substantially the same proportions and have cost or fair market value relationships (as the case may be) that are in substantially the same proportions, such DISC may apply the 50-percent test on an aggregate basis with respect to all such products or commodities, or group, as the case may be.

(5) *Effective dates.* Except as provided in subparagraph (6) of this paragraph, section 993(c)(2)(C) applies—

(i) With respect to any product or commodity not owned by a DISC, to sales, exchanges, or other dispositions made after March 18, 1975, with respect to which the DISC derives gross receipts.

(ii) With respect to any product or commodity acquired by a DISC after March 18, 1975.

(iii) With respect to any product or commodity owned by a DISC on March 18, 1975, to sales, exchanges, or other dispositions made after March 18, 1976, and to owning such product or commodity after such date.

For purposes of this paragraph and subparagraph (6) of this paragraph, the date of a sale, exchange, or other disposition of a product or commodity is the date as of which title to such product or commodity passes. The accounting method of a person is not determinative of the date of a sale, exchange, or other disposition.

(6) *Fixed contracts.* Section 1101(f) of the Tax Reform Act of 1976 provides an exception to the effective date rules in this paragraph and in paragraph (h) of this section. Section 1101(f)(2) of the Act provides that section 993(c)(2)(C) and (D) shall not apply to sales, exchanges, and other dispositions made after March 18, 1975, but before March 19, 1980, if they are made pursuant to a fixed contract. Section 1101(f)(2) also defines fixed contract. Under that definition, if the seller can vary the price of the product for unspecified cost increases (which could include tax cost increases), or if the quantity of products or commodities to be sold can be increased or decreased under the contract by the seller without penalty, the contract is not to be considered a fixed contract with respect to the amount over which the seller has discretion. For example, if a contract calls for a minimum delivery of *x* amount of a product but allows the seller to refuse to deliver goods beyond that minimum amount (or allows a renegotiation of the sales price of goods beyond that amount), then with respect to the amount above the minimum the contract is not a fixed quantity contract.

(h) *Export controlled products*—(1) *In general.* An export controlled product is not export property. A product or commodity may be an export controlled product at one time but not an export controlled product at another time. For purposes of this paragraph, a product or commodity is an ‘‘export controlled product’’ at a particular time if at that time the export of such product or commodity is prohibited or curtailed under section 4(b) of the Export Administration Act of 1969 or section 7(a) of the Export Administration Act of 1979, to effectuate the policy relating to the protection of the domestic economy set forth in such Acts (paragraph (2)(A) of section 3 of the Export Administration Act of 1969 and paragraph (2)(C) of section 3 of the Export Administration Act of 1979). Such policy is to use export controls to the extent necessary ‘‘to protect the domestic economy from the excessive drain of scarce materials and to reduce the serious inflationary impact of foreign demand.’’

(2) *Products considered export controlled products*—(i) *In general.* For purposes of this paragraph, an export controlled product is a product or commodity which is subject to short supply export controls under 15 CFR part 377. A product or commodity is considered an export controlled product for the duration of each control period which applies to such product or commodity. A control period of a product or commodity begins on and includes the initial control date (as defined in subdivision (ii) of this subparagraph) and ends on and includes the final control date (as defined in subdivision (iii) of this subparagraph).

(ii) *Initial control date.* The initial control date of a product or commodity which was subject to short supply export controls on March 19, 1975, is

March 19, 1975. The initial control date of a product or commodity which is subject to short supply export controls after March 19, 1975, is the effective date stated in the regulations to 15 CFR part 377 which subjects such product or commodity to short supply export controls. If there is no effective date stated in such regulations, the initial control date of such product or commodity is the date on which such regulations are filed for publications in the FEDERAL REGISTER.

(iii) *Final control date.* The final control date of a product or commodity is the effective date stated in the regulations to 15 CFR part 377 which removes such product or commodity from short supply export controls. If there is no effective date stated in such regulations, the final control date of such product or commodity is the date on which such regulations are filed for publication in the FEDERAL REGISTER.

(iv) *Expiration of Export Administration Act.* An initial control date and a final control date cannot occur after the expiration date of the Export Administration Act under the authority of which the short supply export controls were issued.

(3) *Effective dates*—(i) *Products controlled on March 19, 1975.* Except as provided in paragraph (g)(6) of this section, if a product or commodity was subject to short supply export controls on March 19, 1975, this paragraph applies—

(*a*) With respect to any such product or commodity not owned by a DISC, to sales, exchanges, other dispositions, or leases made after March 18, 1975, with respect to which the DISC derives gross receipts.

(*b*) With respect to any such product or commodity acquired by a DISC after March 18, 1975, and

(*c*) With respect to any such product or commodity owned by a DISC on March 18, 1975, to sales, exchanges, other dispositions, and leases made after March 18, 1976, and to owning such product or commodity after such date.

(ii) *Products first controlled after March 19, 1975.* If a product or commodity becomes subject to short supply export controls after March 19, 1975, this paragraph applies to sales, exchanges, other dispositions, or leases of such product or commodity made on or after the initial control date of such product or commodity, and to owning such product or commodity on or after such date.

(iii) *Date of sale, exchange, lease, or other disposition.* For purposes of this subparagraph, the date of sale, exchange, or other disposition of a product or commodity is the date as of which title to such product or commodity passes. The date of a lease is the date as of which the lessee takes possession of a product or commodity. The accounting method of a person is not determinative of the date of sale, exchange, other disposition, or lease.

(iv) *Property in short supply.* If the President determines that the supply of any property which is otherwise export property as defined in this section is insufficient to meet the requirements of the domestic economy, he may by Executive order designate such property as in short supply. Any property so designated will be treated as property which is not export property during the period beginning with the date specified in such Executive order and ending with the date specified in an Executive order setting forth the President's determination that such property is no longer in short supply.

[T.D. 7514, 42 FR 55461, Oct. 17, 1977, as amended by T.D. 7513, 42 FR 57309, Nov. 2, 1977; T.D. 7854, 47 FR 51740, Nov. 17, 1982]

§1.993–4 Definition of producer's loans.

(a) *General rule*—(1) *Definition.* Under section 993(d), a loan made by a DISC to a person, referred to in this section as the ''borrower,'' is a producer's loan if—

(i) The loan is made out of accumulated DISC income within the meaning of subparagraph (3) of this paragraph.

(ii) The loan is evidenced by an obligation described in subparagraph (4) of this paragraph.

(iii) The requirement as to the trade or business of the borrower described in subparagraph (5) of this paragraph is satisfied.

(iv) At the time the loan is made, the obligation referred to in subdivision (ii) of this subparagraph bears a legend stating ''This Obligation Is Designated

A Producer's Loan Within The Meaning of section 993(d) of the Internal Revenue Code'' or words of substantially the same meaning.

(v) The limitation as to the export-related assets of the borrower described in paragraph (b) of this section is satisfied.

(vi) The requirement as to the increased investment of the borrower in export-related assets described in paragraph (c) of this section is satisfied, and

(vii) The requirement of paragraph (d) of this section as to proof of compliance with paragraphs (b) and (c) of this section is satisfied.

(2) *Application of this section*—(i) *In general.* A loan which is a producer's loan is a qualified export asset of the DISC (see § 1.993–2(a)(5) and (F)). The interest on a producer's loan is a qualified export receipt of the DISC (see § 1.993–1(g)). A producer's loan is not a dividend to a borrower which is also a shareholder of the DISC making the loan. For rules with respect to deemed distributions by reason of the amount of foreign investment attributable to producer's loans, see section 995(b)(1)(G) and (d) and the regulations thereunder.

(ii) *No tracing of loan proceeds.* For purposes of applying this section, in order to qualify as a producer's loan, the proceeds of the loan need not be traced to an investment in any specific asset.

(iii) *Unrelated borrower.* For purposes of applying this section, it is not necessary for a borrower to be a related person with respect to the DISC from which it receives a producer's loan, or a member of the same controlled group as the DISC.

(iv) *Unpaid balance of producer's loans.* For purposes of applying this section, the unpaid balance of producer's loans does not include the unpaid balance of any producer's loan to the extent the loan has been deducted or charged off by the DISC as totally or partially worthless under section 165 or 166.

(v) *Refinancing, renewal, and extension.* For purposes of applying this section, the refinancing, renewal, or extension of a producer's loan shall be treated as the making of a new loan which may qualify as a producer's loan only if the requirements of subparagraph (1) of this paragraph are met.

(vi) *Events subsequent to time loan is made.* The determination as to whether a loan qualifies as a producer's loan is made on the basis of the relevant facts taken into account for purposes of determining whether the loan was a producer's loan when made. Thus, for example, if the accumulated DISC income of the lender is later reduced below the unpaid balance of all producer's loans previously made by the DISC, such subsequent decrease in the amount of accumulated DISC income will not result in later disqualification of such loan (or part thereof) as a producer's loan. Similarly, if a loan (or part of a loan) does not qualify as a producer's loan because of an insufficient amount of accumulated DISC income at the time the loan is made, a subsequent increase in the amount of accumulated DISC income will not result in later qualification of such loan (or part thereof) as a producer's loan. As a further example, for purposes of applying the borrower's export related assets limitation described in paragraph (b) of this section, a loan which qualifies as a producer's loan when made will not later be disqualified if property, the gross receipts from the sale or lease of which were includible in the numerator of the fraction described in paragraph (b)(3)(i) of this section at the time of sale or lease by the borrower, is later characterized as excluded property (as defined in § 1.993–3(f)).

(vii) *Application of tests under paragraphs (b) and (c) on controlled group bases.* If the borrower is a member of a controlled group (as defined in § 1.993–1(k)) at the time a loan is made, all amounts that must be determined for purposes of applying the limitation and increased investment requirement with respect to the export-related assets of the borrower (described in paragraphs (b) and (c), respectively, of this section) may be determined at the election of the borrower by aggregating such amounts for all members of the controlled group, determined for the taxable year of each member of the controlled group during which the loan is made, excluding only such members of the group as are DISC's or foreign corporations for such year. However, such amounts may be included only to the extent that such amounts have not already been taken into account in applying the limitation and increased investment requirement with respect to any other borrower. Amounts to be aggregated for all such members if such election is made include, for example, gross receipts (described in paragraphs (b)(3)(i) and (ii) of this section) and export-related assets (described in paragraph (b)(2) of this section). The borrower may make such election by causing its written statement of election to be attached to the lending DISC's return under section 6011(e)(2) for the first taxable year of the lending DISC within which or with which the borrower's taxable year for which the election is to apply ends. An election once made is binding on all members of the controlled group which includes the borrower with respect to all taxable years of the borrower beginning with its first taxable year for which the election is made. A borrower who makes such election may revoke it only if it secures the consent of the Commissioner to such revocation upon application made through the lending DISC.

(3) *Loan out of accumulated DISC income*—(i) *In general.* A loan is a producer's loan only to the extent that it is made out of accumulated DISC income. A loan is made out of accumulated DISC income only if the amount of the loan, when added to the unpaid balance at the time such loan is made of all other producer's loans made by a DISC, does not exceed the amount of accumulated DISC income of the DISC at the beginning of the month in which the loan is made. The amount of accumulated DISC income at the beginning of any month is determined as if the DISC's taxable year closed at the end of the immediately preceding month.

(ii) *Presumption.* A loan made during a taxable year shall be deemed under subdivision (i) of this subparagraph to have been made out of accumulated DISC income if the balance of producer's loans at the beginning of the year and those made during the year do not exceed accumulated DISC income at the end of the year.

(iii) *Deemed distributions.* For purposes of this subparagraph, accumulated DISC income as of the end of any taxable year (or month) shall be determined without regard to deemed distributions under section 995(b)(1)(G) for the amount of foreign investment attributable to producer's loans for such year (or for the taxable year for which such month is a part) but actual distributions shall be taken into account.

(4) *Evidence and terms of obligation.* A loan is a producer's loan only if the loan is evidenced by a note or other evidence of indebtedness which is made by the borrower and which has a stated maturity date not more than 5 years from the date the loan is made. Accordingly, a loan which does not have a stated maturity date or which has a stated maturity date more than 5 years from the date such loan is made can never meet the 5-year requirement of this subparagraph. Thus, for example, even if there is a period of less than 5 years remaining to the stated maturity date of a loan, the loan can never be a producer's loan if it had a stated maturity date more than 5 years from the date it was made. For a further example, if a loan having a period remaining to maturity of 2 years is extended for a further period of 3 years (making a total of 5 years to maturity from the date of the extension), the extension of the loan would under subparagraph (2)(v) of this paragraph constitute the making of a new producer's loan and the original producer's loan would terminate. If, however, a loan having a period remaining to maturity of 2 years is extended for a further period of 4 years (making a total of 6 years to maturity from the date of the extension), the original producer's loan will terminate and the new loan will not be a producer's loan. If a producer's loan is not paid in full at its maturity date and is not formally refinanced, renewed, or extended, such loan shall be deemed to be a new loan which does not have a stated maturity date and, thus, will not be a producer's loan. For purposes of this subparagraph, an evidence of indebtedness is a written instrument of indebtedness. Section 482 and the regulations thereunder are applicable to determine, in the case of a loan by the DISC to a borrower which

is owned or controlled directly or indirectly by the same interests as the DISC within the meaning of section 482, whether the interest charged on such loan is at an arm's length rate.

(5) *Borrower's trade or business.* A loan is a producer's loan only if the loan is made to a person engaged in the United States in the manufacture, production, growth, or extraction (within the meaning of §1.993–3(c)) of export property determined without regard to §1.993–3(f)(1)(iii) and (iv). The borrower may also be engaged in other trades or businesses and the loan need not be traceable to specific investments in export property.

(b) *Borrower's export related assets limitation*—(1) *General rule.* A loan to a borrower is a producer's loan only to the extent that the amount of the loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower which are outstanding at the time the loan is made, does not exceed an amount equal to the amount of the borrower's export-related assets (determined under subparagraph (2) of this paragraph) multiplied by the fraction set forth in subparagraph (3) of this paragraph.

(2) *Amount of export-related assets*—(i) *In general.* For purposes of subparagraph (1) of this paragraph, the amount of the borrower's export-related assets is the sum of the amounts described in subdivisions (ii), (iii), and (iv) of this subparagraph.

(ii) *Borrower's plant and equipment.* The amount described in this subdivision is the sum of the borrower's adjusted bases (determined as of the beginning of the borrower's taxable year in which a loan is made to it) for plant, machinery, equipment, and supporting production facilities, which are located in the United States. Supporting production facilities are all property used primarily in connection with the manufacture, production, growth, or extraction (within the meaning of §1.993–3(c)) or storage, handling, transportation, or assembly of property by the borrower.

(iii) *Borrower's property held primarily for sale or lease.* The amount described in this subdivision is the amount of the borrower's property (at the beginning of the taxable year of the borrower in which a loan is made to it) held primarily for sale or lease to customers in the ordinary course of its trade or business. The amount of such property held for sale is determined under the methods of identifying and valuing inventory normally used by the borrower. The amount of such property held for lease or leased is the borrower's adjusted bases, determined under section 1011, for such property.

(iv) *Borrower's research and experimental expenditures.* The amount described in this subdivision is the aggregate amount, whether or not charged to capital account, of research and experimental expenditures (within the meaning of section 174) incurred in the United States by the borrower during each of its taxable years which begin after December 31, 1971, and precede the taxable year in which the loan is made to the borrower. Such research and experimental expenditures need bear no relationship to export property (as defined in §1.993–3) of the borrower. The aggregate amount of all such expenditures for each of such preceding taxable years is taken into account for purposes of this subparagraph, regardless of whether all or any portion of the aggregate amount has been taken into account with respect to producer's loans made to the borrower by any DISC in preceding taxable years. The aggregate amount of all such expenditures shall include such expenditures of a corporation, the assets of which were acquired by the borrower in a distribution or a transfer described in section 381(a)(1) or (2) (relating to carryovers in certain corporate acquisitions).

(3) *Fraction referred to in subparagraph (1) of this paragraph*—(i) *Numerator of fraction.* The numerator of the fraction set forth in this subparagraph is the sum of the borrower's gross receipts for each of its 3 taxable years immediately preceding the taxable year in which the loan is made (but not including any taxable year beginning before January 1, 1972) from the sale or lease of export property (determined without regard to §1.993–3(f)(1)(iii) and (iv)) which is manufactured, produced, grown, or extracted (within the meaning of §1.993–3(c)) by the borrower whether or not

sold or leased directly or through a related domestic person (notwithstanding §1.993–3(a)(4) and (f)(2)). For purposes of the preceding sentence, with respect to a sale or lease to a related DISC in which the transfer price is determined under section 994(a)(1) or (2), the rules under §1.994–1(c)(5) (relating to incomplete transactions) shall be applied, and with respect to all other sales and leases the rules under §1.994–1(c)(5) other than subdivision (i)(*d*) thereof shall be applied.

(ii) *Denominator of fraction.* The denominator of the fraction set forth in this subparagraph is the sum of the amount included in the numerator and all other gross receipts of the borrower, for each of its taxable years for which gross receipts are included in the numerator of the fraction, from all sales or leases of all property held by the borrower primarily for sale or lease to customers in the ordinary course of its trade or business. For purposes of subdivision (i) of this subparagraph and this subdivision, if such property is sold or leased to a domestic related person which resells or subleases such property, the borrower's gross receipts shall be the gross receipts derived by the domestic related person from the resale or sublease of the export property.

(iii) *Taxable years.* If the borrower has not engaged in the sale or lease of property (as described in this subparagraph) for the 3 immediately preceding taxable years, or if 3 taxable years beginning after December 31, 1971, have not elapsed, the fraction will be computed on the basis of such gross receipts for its taxable years immediately preceding the loan and beginning after December 31, 1971, during which the borrower has so engaged. No producer's loans can be made to a borrower until after the end of the first taxable year of the borrower beginning after December 31, 1971.

(c) *Requirement for increased investment in export-related assets*—(1) *In general.* A loan to a borrower is a producer's loan only to the extent that the amount of the loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower during the borrower's taxable year during which such loan is made, does not exceed the amount of the borrower's increase for the year in investment in export-related assets. Such increase for any taxable year is the sum of—

(i) The increase (if any) in the borrowers adjusted basis of certain types of assets as determined under subparagraph (2) of this paragraph and

(ii) The amount (if any) during the year of its research and experimental expenditures as determined under paragraph (b)(2)(iv) of this section.

(2) *Increase in adjusted basis.* The amount under this subparagraph is the amount (not less than zero) by which—

(i) The borrower's adjusted basis (determined as of the end of its taxable year in which the producer's loan is made) in all of its property which is described in paragraph (b)(2)(ii) (plant and equipment), and (iii) (property held primarily for sale or lease) of this section, including any such property acquired by it during such taxable year, exceeds

(ii) Its adjusted bases in all such property (determined as of the beginning of such year).

(3) *Ordering rule.* If during the borrower's taxable year the amount of increase in investment in export-related assets determined under this subparagraph is exceeded by amounts loaned to the borrower during such year that would otherwise qualify as producer's loans, such loans shall be applied in the order made against the amount of such increase in order to determine which loans qualify as producer's loans.

(d) *Proof of borrower's compliance with paragraphs (b) and (c) of this section.* For purposes of paragraphs (b) and (c) of this section, a DISC shall be prepared to establish initially the compliance of the borrower with the requirements of such paragraphs by providing the written statement of the borrower, certified by a certified public accountant, stating that the borrower has complied with the limitation and increased investment requirement in section 993(d)(2) and (3) of the Internal Revenue Code of 1954. In lieu of certification by a certified public accountant, the DISC may attach to its return a statement signed by the borrower under penalties of perjury on a form provided by the Internal Revenue Service certifying that the borrower has complied with the limitation and increased investment requirement in section 993(d)(2) and (3) of the Internal Revenue Code of 1954. For taxable years ending after October 17, 1977, the DISC must attach either the certification by the certified public accountant or the certification by the borrower to its return. Additional full substantiation of the borrower's compliance with the requirements of such paragraphs may be required by the district director. If full substantiation of such compliance is not provided by the DISC (or the borrower) when required, the loan shall be deemed not to be a producer's loan.

(e) *Special limitation in the case of domestic film maker*—(1) *General rule.* The limitation of paragraph (b) of this section as to the export-related assets of the borrower will be considered satisfied if the DISC—

(i) Is engaged in the trade or business of selling or leasing films which are export property, or is acting as a commission agent for a person who is so engaged,

(ii) Makes a loan to a borrower which is a domestic film maker (as defined in subparagraph (5) of this paragraph) for the purpose of making a film, and

(iii) The amount of such loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower which are outstanding at the time the loan is made, does not exceed an amount determined by multiplying—

(a) The sum of *(1)* the amount of the export-related assets of the borrower (determined under paragraph (b)(2)(i) of this section as of the beginning of the borrower's taxable year in which the loan is made), plus *(2)* the amount of a reasonable estimate of the amount of such export related assets obtained or to be obtained by the borrower during such year and subsequent years with respect to films as to which filming begins within such year by

(b) The percentage which, based on the experience of other film makers of similar films for the 5 calendar years preceding the calendar year in which the loan is made, the annual gross receipts (as described in § 1.993–6(a)(1), whether or not such films constitute property described therein) of such other film makers from the sale or lease of such films outside the United States is of the annual gross receipts of such other film makers from all sales or leases of such films.

(2) *Purpose of loan.* A loan by a DISC will be deemed to be for the making of a film if there exists a written agreement between the DISC and the borrower, executed at or before the time the loan is made, stating that the loan is made or to be made to enable the borrower to make such film.

(3) *Reasonable estimate of amounts.* For purposes of subparagraph (1)(iii)*(a)(2)* of this paragraph, a reasonable estimate shall be based on the conditions known by the DISC and borrower to exist at the time a loan is made (or which the DISC and borrower have reason to know to exist at such time).

(4) *Experience of film makers.* For purposes of subparagraph (1)(iii)(*b*) of this paragraph, the experience of other film makers of similar films for the 5 calendar years preceding the calendar year in which the loan is made shall be derived from such records and statistics as are acknowledged in the trade as reasonably reliable.

(5) *Domestic film maker.* For purposes of this section, a borrower is a domestic film maker with respect to a film if—

(i) The borrower is a U.S. person within the meaning of section 7701(a)(30), except that *(a)* with respect to a partnership all of the partners must be U.S. persons and *(b)* with respect to a corporation all of its officers and at least a majority of its directors must be U.S. persons,

(ii) The borrower is engaged in the trade or business of making the film with respect to which the loan is made,

(iii) Each studio, if any, used or to be used for filming or for recording sound incorporated into such film is located in the United States (as defined in section 7701(a)(9)),

(iv) At least 80 percent of the aggregate playing time of the film is or will be photographed within the United States (as defined in section 7701(a)(9)), and

(v) At least 80 percent of the total amount (not including any amount which is contingent upon receipts or profits of such film and which is fully taxable by the United States) paid or to be paid for services performed in the making of the film is either paid or to be paid to persons who are U.S. persons at the time such services are performed or consists of amounts which are fully taxable by the United States.

(6) *Amounts as fully taxable.* For purposes of subparagraph (5)(v) of this paragraph, an amount is considered fully taxable by the United States if the entire amount is included in gross income under section 61 or is subject to withholding under any provision of U.S. law or treaty to which the U.S. is a party and is not exempt from taxation under any provision of such law or treaty. Where a nonresident alien individual is engaged for the making of a film or where a foreign corporation is engaged to furnish the services of one of its officers or employees for the making of a film, the amount paid such individual or corporation will be considered as fully taxable by the United States only if it meets the test of this subparagraph.

[T.D. 7514, 42 FR 55464, Oct. 17, 1977, as amended by T.D. 7513, 42 FR 57311, Nov. 2, 1977; T.D. 7514, 42 FR 60910, Nov. 30, 1977; T.D. 7854, 47 FR 51741, Nov. 17, 1982]

§1.993–5 Definition of related foreign export corporation.

(a) *General rule*—(1) *Definition.* Under section 993(e), a foreign corporation is a related foreign export corporation with respect to a DISC if—

(i) It is a foreign international sales corporation described in paragraph (b) of this section,

(ii) It is a real property holding company described in paragraph (c) of this section, or

(iii) It is an associated foreign corporation described in paragraph (d) of this section.

(2) *Application of this section.* It is necessary to determine whether a foreign corporation is a related foreign export corporation with respect to a DISC for the following two purposes:

(i) *Qualified export assets.* Under §1.993–2(g), the stock or securities of a related foreign export corporation held by the DISC are qualified export assets.

(ii) *Qualified export receipts.* Under §1.993–1 (e), (f), and (g), certain receipts of the DISC with respect to stock or securities of a related foreign export corporation held by the DISC are qualified export receipts.

(b) *Foreign international sales corporation*—(1) *In general.* A foreign corporation is a foreign international sales corporation with respect to a taxable year of a DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC owns directly stock of the foreign corporation possessing more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote as determined under the principles of §1.957–1(b) (relating to definition of controlled foreign corporation),

(ii) 95 percent or more of such foreign corporation's gross receipts (as defined in §1.993–6) for its taxable year ending with or within such taxable year of the DISC consists of qualified export receipts described in §1.993–1 (b) through (e) or interest described in §1.993–1(g) derived from any obligations described in §1.993–2 (d) or (e), and

(iii) The sum of the adjusted bases of the assets of the foreign corporation which are qualified export assets described in §1.993–2 (b) through (e) and which are held by the foreign corporation at the close of its taxable year which ends with or within such taxable year of the DISC equals or exceeds 95 percent of the sum of the adjusted bases of all assets held by the foreign corporation at the close of such taxable year.

(2) *Certain determinations.* The determinations as to whether gross receipts are qualified export receipts described in subparagraph (1)(ii) of this paragraph and as to whether assets are qualified export assets described in subparagraph (1)(iii) of this paragraph are made by applying the requirements of §§1.993–1 and 1.993–2 to the foreign corporation as if it were a domestic corporation being tested to determine whether it is a DISC. For purposes of making either of such determinations, the principles of accounting applicable for purposes of computing earnings and profits under §1.964–1 (relating to a controlled foreign corporation's earnings and profits) shall apply.

(c) *Real property holding company*—(1) *In general.* A foreign corporation is a real property holding company with respect to a taxable year of a DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC owns directly stock of the foreign corporation possessing more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote as determined under the principles of § 1.957–1(b) and

(ii) The sole function of the foreign corporation is to hold title to real property situated outside the United States for the exclusive use of the DISC, title to which may not be held by the DISC (and, if the DISC subleases such property to a related supplier, as described in subparagraph (3) of this paragraph, by such related supplier) under the law of the country in which such property is situated.

(2) *Activities of the foreign corporation.* For purposes of subparagraph (1)(ii) of this paragraph, a foreign corporation which holds title to real property situated outside the United States may also perform activities with respect to such property (such as management, maintenance, and payment of taxes) which are ancillary to its function of holding title to such property.

(3) *Exclusive use by the DISC.* Real property held by the foreign corporation must be used exclusively by the DISC whether under a lease or any other arrangement. Real property is not so used by the DISC if the DISC subleases such property to any other person. If, however, during a taxable year of the DISC—

(i) 90 percent or more of the qualified export receipts of the DISC for such year are derived from transactions with respect to which it is a commission agent for a related supplier (as defined in § 1.994–1(a)(3)(ii)), and

(ii) The DISC subleases such property to such related supplier

then such property will be considered as used exclusively by the DISC during such year if such related supplier does not sublease such property.

(d) *Associated foreign corporation*—(1) *In general.* A foreign corporation is an associated foreign corporation with respect to a taxable year of the DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC, or one or more members of the same controlled group of corporations (as defined in subparagraph (2) of this paragraph) as the DISC, owns (within the meaning of section 1563 (d) and (e)) stock of the foreign corporation possessing less than 10 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote, as determined under the principles of § 1.957–1(b), or owns no stock of such corporation, and

(ii) The ownership of stock, or of securities (as defined in § 1.993–2(g)), of the foreign corporation by the DISC or by one or more members of such controlled group of corporations reasonably furthers a transaction or transactions giving rise to qualified export receipts for the DISC.

(2) *Controlled group of corporations.* For purposes of this paragraph, the term ‘‘controlled group of corporations’’ has the same meaning assigned to the term in section 1563(a) and not section 993(a)(3) and § 1.993–1(k). Thus, for purposes of this paragraph, the test of control is 80 percent control and, since the rules of section 1563(b) apply, only domestic members are considered to be members of the controlled group.

(3) *Furtherance of qualified export receipts.* Ownership of stock or securities of a foreign corporation will be considered as reasonably furthering a transaction or transactions giving rise to qualified export receipts for a DISC if—

(i) The ownership is necessary to obtain or maintain the foreign corporation as a customer of the DISC or of a related supplier, as defined in § 1.994–1(a)(3)(ii) of the DISC or to aid the sales distribution system of the DISC or of such related supplier, and

(ii) The amount of the investment in the foreign corporation bears a reasonable relationship to the amount of the DISC's annual net profit from transactions in its trade or business which it may reasonably expect to derive on account of such ownership.

In determining whether the amount of the investment is reasonable, there shall be taken into account any stock or securities of the foreign corporation owned by any other foreign corporation which, if it were a domestic corporation, would be a member of the same controlled group of corporations as the DISC.

[T.D. 7514, 42 FR 55467, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977]

§1.993–6 Definition of gross receipts.

(a) *General rule.* Under section 993(f), for purposes of sections 991 through 996, the gross receipts of a person for a taxable year are—

(1) The total amounts received or accrued by the person from the sale or lease of property held primarily for sale or lease in the ordinary course of a trade or business, and

(2) Gross income recognized from all other sources, such as, for example, from—

(i) The furnishing of services (whether or not related to the sale or lease of property described in subparagraph (1) of this paragraph),

(ii) Dividends and interest,

(iii) The sale at a gain of any property not described in subparagraph (1) of this paragraph, and

(iv) Commission transactions as and to the extent described in paragraph (e) of this section.

(b) *Nongross receipts items.* For purposes of paragraph (a) of this section, gross receipts do not include amounts received or accrued by a person from—

(1) The proceeds of a loan or of the repayment of a loan, or

(2) A receipt of property in a transaction to which section 118 (relating to contribution to capital) or 1032 (relating to exchange of stock for property) applies.

(c) *Nonreduction of total amounts.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person are not reduced by returns and allowances, costs of goods sold, expenses, losses, a deduction for dividends received under section 243, or any other deductible amounts.

(d) *Method of accounting.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person shall be determined under the method of accounting used in computing its taxable income. If, for example, a DISC receives advance or installment payments for the sale or lease of property described in paragraph (a)(1) of this section, for the furnishing of services, or which represent recognized gain from the sale of property not described in paragraph (a)(1) of this section, any amount of such advance payments is considered to be gross receipts of the DISC for the taxable year for which such amount is included in the gross income of the DISC.

(e) *Commission transactions.* (1) In the case of transactions which give rise to a commission on the sale or lease of property or the furnishing of services by a principal, the amount recognized by the commission agent as gross income from all such transactions shall be the gross receipts derived by the principal from the sale or lease of the property, or the gross income derived by the principal from the furnishing of services, with respect to which the commissions are derived. In the case of a commission agent for a related supplier (as defined in §1.994–1(a)(3)(ii)), the gross receipts or gross income of such agent shall be determined as if it used the same method of accounting as its related supplier. In the case of a commission agent for a principal other than a related supplier, the gross receipts or gross income of such principal shall be determined as if such principal used the same method of accounting as its agent.

(2) If the commission arrangement provides that the commission agent will receive a commission only with respect to sales or leases of export property, or the furnishing of services, which result in qualified export receipts, the commission agent will not take into account the gross receipts or gross income, as the case may be, derived by the principal from any transaction for which the commission agent would not be entitled to a commission under the commission arrangement.

(f) *Example.* The provisions of this section may be illustrated by the following example:

Example. During 1973, M, a related supplier (as defined in §1.994–1(a)(3)(ii)) of N, is engaged in the manufacture of machines in the United States. N, a calendar year taxpayer, is engaged in the sale and lease of such machines in foreign countries. N furnishes services which are related and subsidiary to its sale and lease of such machines. N also acts as a commission agent in foreign countries for Z, an unrelated supplier, with respect to Z's sale of products. N receives dividends on stock owned by it in a related foreign export corporation (as defined in § 1.993–5), interest on producer's loans made to M, and proceeds from sales of business assets located outside the United States resulting in a recognized gains and losses. N's gross receipts for 1973 are $3,550, computed on the basis of the additional facts assumed in the table below:

(1) N's sales receipts for machines manufactured by M (without reduction for cost of goods sold and selling expenses)	$1,500
(2) N's lease receipts for machines manufactured by M (without reduction for depreciation and leasing expenses)	500
(3) N's gross income from services for machines manufactured by M (without reduction for service expenses)	400
(4) Z's sale receipts for products manufactured by Z (without reduction for Z's cost of goods sold, commissions on sales, and commission sales expenses)	550
(5) Dividends received by N	150
(6) Interest received by N on producer's loans	200
(7) Proceeds received by N representing recognized gain (but not losses) from sales of business assets located outside the United States	250
(8) N's gross receipts	3,550

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

§ 1.993–7 Definition of United States.

Under section 993(g), the term ''United States'' includes the States, the District of Columbia, the Commonwealth of Puerto Rico, and possessions of the United States. For the requirement that a DISC must be incorporated and existing under the laws of a State or the District of Columbia, see § 1.992–1(a)(1).

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

§ 1.994–1 Inter-company pricing rules for DISC's.

(a) *In general*—(1) *Scope.* In the case of a transaction described in paragraph (b) of this section, section 994 permits a person related to a DISC to determine the allowable transfer price charged the DISC (or commission paid the DISC) by its choice of three methods described in paragraph (c)(2), (3), and (4) of this section: The ''4 percent'' gross receipts method, the ''50–50'' combined taxable income method, and the section 482 method. Under the first two methods, the DISC is entitled to 10 percent of its export promotion expenses as additional taxable income. When the gross receipts method or combined taxable income method is applied to a transaction, the Commissioner may not make distributions, apportionments, or allocations as provided by section 482 and the regulations thereunder. For rules as to certain ''incomplete transactions'' and for computing combined taxable income, see paragraph (c)(5) and (6) of this section. Grouping of transactions for purposes of applying the method chosen is provided by paragraph (c)(7) of this section. The rules in paragraph (c) of this section are directly applicable only in the case of sales or exchanges of export property to a DISC for resale, and are applicable by analogy to leases, commissions, and services as provided in paragraph (d) of this section. For rules limiting the application of the gross receipts method and combined taxable income method so that the supplier related to the DISC will not incur a loss on transactions, see paragraph (e)(1) of this section. Paragraph (e)(2) of this section provides for the applicability of section 482 to resales by the DISC to related persons. Paragraph (e)(3) of this section provides for the time by which a reasonable estimate of the transfer price (including commissions and other payments) should be paid. The subsequent determination and further adjustments to transfer prices are set forth in paragraph (e)(4) of this section. Export promotion expenses are defined in paragraph (f) of this section. Paragraph (g) of this section has several examples illustrating the provisions of this section. Section 1.994–2 prescribes the marginal costing rules authorized by section 994(b)(2).

(2) *Performance of substantial economic functions.* The application of section 994(a)(1) or (2) does not depend on the extent to which the DISC performs substantial economic functions (except with respect to export promotion expenses). See paragraph (l) of § 1.993–1.

(3) *Related party and related supplier.* For the purposes of this section—

(i) The term ''related party'' means a person which is owned or controlled directly or indirectly by the same interests as the DISC within the meaning of section 482 and §1.482–1(a).

(ii) The term ''related supplier'' means a related party which singly engages in a transaction directly with the DISC which is subject to the rules of section 994 and this section. However, a DISC may have different related suppliers with respect to different transactions. If, for example, X owns all the stock of Y, a corporation, and of Z, a DISC, and sells a product to Y which is resold to Z, only Y is the related supplier of Z, and, thus, only the resale from Y to Z is subject to section 994 and this section. If, however, X sells directly to Z and Y also sells directly to Z, then, as to the transactions involving direct sales to Z, each of X and Y is a related supplier of Z.

(b) *Transactions to which section 994 applies.* Section 994(a)(3) may be applied, as described in paragraph (a) of this section, to any transaction between a related supplier and a DISC. Section 994(a)(1) or (2) may be applied, as described in paragraph (a) of this section, to a transaction between a related supplier and a DISC only in the following cases:

(1) Where the related supplier sells export property to the DISC for resale or where the DISC is commission agent for the related supplier on sales by the related supplier of export property to third parties whether or not related parties. For purposes of this section, references to sales include exchanges.

(2) Where the related supplier leases export property to the DISC for sublease for a comparable period with comparable terms of payment or where the DISC is commission agent for the related supplier on leases by the related supplier of export property to third parties whether or not related parties.

(3) Where services are furnished by a related supplier which are related and subsidiary to any sale or lease by the DISC, acting as principal or commission agent, of export property under subparagraph (1) or (2) of this paragraph.

(4) Where engineering or architectural services for construction projects located (or proposed for location) outside of the United States are furnished by a related supplier where the DISC is acting as principal or commission agent with respect to the furnishing of such services to a third party whether or not a related party.

(5) Where the related supplier furnishes managerial services in furtherance of the production of qualified export receipts of an unrelated DISC where the related DISC is acting as principal or commission agent with respect to the furnishing of such services to an unrelated DISC.

Transactions are included, for purposes of this paragraph, only if they give rise to qualified export receipts (within the meaning of section 993(a)) in the hands of the related DISC. If a transaction is not included in subparagraph (1), (2), (3), (4), or (5) of this paragraph, the rules of section 994(a)(1) or (2) do not apply. Thus, for example, the rules of sectoin 994(a)(1) or (2) would not apply if a DISC purchased export property from its related supplier and leased such property to a third party.

(c) *Transfer price for sales of export property*—(1) *In general.* Under this paragraph, rules are prescribed for computing the allowable price for a transfer from a related supplier to a DISC in the case of a sale of export property described in paragraph (b)(1) of this section.

(2) *The ''4-percent'' gross receipts method.* Under the gross receipts method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 4 percent of the qualified export receipts of the DISC derived from the sale of the export property (as defined in section 993 (c)) and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(3) *The ''50–50'' combined taxable income method.* Under the combined taxable income method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 50 percent of

the combined taxable income (as defined in subparagraph (6) of this paragraph) of the DISC and its related supplier attributable to the qualified export receipts from such sale and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(4) *Section 482 method.* If the rules of subparagraphs (2) and (3) of this paragraph are inapplicable to a sale or a taxpayer does not choose to use them, the transfer price for a sale by the related supplier to the DISC is to be determined on the basis of the sale price actually charged but subject to the rules provided by section 482 and the regulations thereunder.

(5) *Incomplete transactions.* (i) For purposes of the gross receipts and combined taxable income methods, where property (encompassed within a transaction or group chosen under subparagraph (7) of this paragraph) is transferred by a related supplier to a DISC during a taxable year of either the DISC or related supplier, but some or all of such property is not sold by the DISC during such year—

(a) The transfer price of such property sold by the DISC during such year shall be computed separately from the transfer price of the property not sold by the DISC during such year,

(b) With respect to such property not sold by the DISC during such year, the transfer price paid by the DISC for such year shall be the related supplier's cost of goods sold (see subparagraph (6)(ii) of this paragraph) with respect to the property, except that, with respect to such taxable years ending on or before August 15, 1975, the transfer price paid by the DISC shall be at least (but need not exceed) the related supplier's cost of goods sold with respect to the property.

(c) For the subsequent taxable year during which such property is resold by the DISC, an additional amount shall be paid by the DISC (to be treated as income for such year by the related supplier) equal to the excess of the amount which would have been the transfer price under this section had the transfer to the DISC by the related supplier and the resale by the DISC taken place during the taxable year of the DISC during which it resold the property over the amount already paid under *(b)* of this subdivision.

(d) The time and manner of payment of transfer prices required by *(b)* and *(c)* of this subdivision shall be determined under paragraphs (e)(3), (4), and (5) of this section.

(ii) For purposes of this paragraph, a DISC may determine the year in which it receives property from a related supplier and the year in which it sells property in accordance with the method of identifying goods in its inventory properly used under section 471 or 472 (relating respectively to general rule for inventories and to LIFO inventories). Transportation expense of the related supplier in connection with a transaction to which this subparagraph applies shall be treated as an item of cost of goods sold with respect to the property if the related supplier includes the cost of intracompany transportation between its branches, divisions, plants, or other units in its cost of goods sold (see subparagraph (6)(ii) of this paragraph).

(6) *Combined taxable income.* For purposes of this section, the combined taxable income of a DISC and its related supplier from a sale of export property is the excess of the gross receipts (as defined in section 993(f)) of the DISC from such sale over the total costs of the DISC and related supplier which relate to such gross receipts. Gross receipts from a sale do not include interest with respect to the sale. Combined taxable income under this paragraph shall be determined after taking into account under paragraph (e)(2) of this section all adjustments required by section 482 with respect to transactions to which such section is applicable. In determining the gross receipts of the DISC and the total costs of the DISC and related supplier which relate to such gross receipts, the following rules shall be applied:

(i) Subject to subdivisions (ii) through (v) of this subparagraph, the taxpayer's method of accounting used in computing taxable income will be accepted for purposes of determining amounts and the taxable year for which items of income and expense (including depreciation) are taken into account. See § 1.991–1(b)(2) with respect to the method of accounting which may be used by a DISC.

(ii) Cost of goods sold shall be determined in accordance with the provisions of §1.61–3. See sections 471 and 472 and the regulations thereunder with respect to inventories. With respect to property to which an election under section 631 applies (relating to cutting of timber considered as a sale or exchange), cost of goods sold shall be determined by applying §1.631–1(d)(3) and (e) (relating to fair market value as of the beginning of the taxable year of the standing timber cut during the year considered as its cost).

(iii) Costs (other than cost of goods sold) which shall be treated as relating to gross receipts from sales of export property are *(a)* the expenses, losses, and other deductions definitely related, and therefore allocated and apportioned, thereto, and *(b)* a ratable part of any other expenses, losses, or other deductions which are not definitely related to a class of gross income, determined in a manner consistent with the rules set forth in §1.861–8.

(iv) The taxpayer's choice in accordance with subparagraph (7) of this paragraph as to the grouping of transactions shall be controlling, and costs deductible in a taxable year shall be allocated and apportioned to the items or classes of gross income of such taxable year resulting from such grouping.

(v) If an account receivable arising with respect to a sale of export property is transferred by the related supplier to a DISC which is a member of the same controlled group within the meaning of §1.993–1(k) for an amount reflecting a discount from the selling price taken into account in computing (without regard to this subdivision) combined taxable income of the DISC and its related supplier, then the combined taxable income from such sale shall be reduced by the amount of the discount.

(7) *Grouping transactions.* (i) Generally, the determinations under this section are to be made on a transaction-by-transaction basis. However, at the annual choice of the taxpayer some or all of these determinations may be made on the basis of groups consisting of products or product lines.

(ii) A determination by a taxpayer as to a product or a product line will be accepted by a district director if such determination conforms to any one of the following standards: *(a)* A recognized industry or trade usage, or *(b)* the 2-digit major groups (or any inferior classifications or combinations thereof, within a major group) of the Standard Industrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President.

(iii) A choice by the taxpayer to group transactions for a taxable year on a product or product line basis shall apply to all transactions with respect to that product or product line consummated during the taxable year. However, the choice of a product or product line grouping applies only to transactions covered by the grouping and, as to transactions not encompassed by the grouping, the determinations are made on a transaction-by-transaction basis. For example, the taxpayer may choose a product grouping with respect to one product and use the transaction-by-transaction method for another product within the same taxable year.

(iv) For rules as to grouping certain related and subsidiary services, see paragraph (d)(3)(ii) of this section.

(d) *Rules under section 994(a)(1) and (2) for transactions other than sales.* The following rules are prescribed for purposes of applying the gross receipts method or combined taxable income method to transactions other than sales:

(1) *Leases.* In the case of a lease of export property by a related supplier to a DISC for sublease by the DISC to produce gross receipts, for any taxable year the amount of rent the DISC must pay to the related supplier shall be determined under the DISC's lease with its related supplier but must be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales and resales of export property under the gross receipts method or combined taxable income method. For purposes of applying this subparagraph, transactions may not be so grouped on a product or product line basis under the rules of paragraph (c)(7)

of this section as to combine in any one group of transactions both lease transactions and sale transactions involving the same product or product line.

(2) *Commissions.* If any transaction to which section 994 applies is handled on a commission basis for a related supplier by a DISC and such commissions give rise to qualified export receipts under section 993(a)—

(i) The amount of the income that may be earned by the DISC in any year is the amount, computed in a manner consistent with paragraph (c) of this section, which the DISC would have been permitted to earn under the gross receipts method, the combined taxable income method, or section 482 method if the related supplier had sold (or leased) the property or service to the DISC and the DISC in turn sold (or subleased) to a third party, whether or not a related party, and

(ii) The maximum commission the DISC may charge the related supplier is the sum of the amount of income determined under subdivision (i) of this subparagraph plus the DISC's total costs for the transaction as determined under paragraph (c)(6) of this section.

(3) *Receipts from services*—(i) *Related and subsidiary services attributable to the year of the export transaction.* The gross receipts for related and subsidiary services described in paragraph (b)(3) of this section shall be treated as part of the receipts from the export transaction to which such services are related and subsidiary, but only if, under the arrangement between the DISC and its related supplier and the accounting method otherwise employed by the DISC, the income from such services is includible for the same taxable year as income from such export transaction.

(ii) *Other services.* In the case of related and subsidiary services to which subdivision (i) of this subparagraph does not apply and other services described in paragraph (b)(4) or (5) of this section performed by a related supplier (relating respectively to engineering and architectural services and certain managerial services), the amount of taxable income which the DISC may derive for any taxable year shall be determined under the arrangement between the DISC and its related supplier and shall be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales for resale of export property under the gross receipts method or combined taxable income method. Related and subsidiary services to which subdivision (i) of this subparagraph does not apply may be grouped, under the rules for grouping of transactions in paragraph (c)(7) of this section, with the products or product lines to which they are related and subsidiary, so long as the grouping of services chosen is consistent with the grouping of products or product lines chosen for the taxable year in which either the product or product lines were sold or in which payment for such services is received or accrued. The rules for grouping of transactions in paragraph (c)(7) of this section shall not apply with respect to the determination of taxable income which the DISC may derive from other services described in paragraph (b)(4) or (5) of this section performed by a related supplier or commissions on such services, and such determination shall be made only on a transaction-by-transaction basis.

(e) *Methods of applying paragraphs (c) and (d) of this section*—(1) *Limitation on DISC income (''no loss'' rule)*—(i) *In general.* Except as otherwise provided in this subparagraph, neither the gross receipts method nor the combined taxable income method may be applied to cause in any taxable year a loss to the related supplier, but either method may be applied to the extent it does not cause a loss. A loss to a related supplier would result if the taxable income of the DISC would exceed the combined taxable income of the related supplier and the DISC. If, however, there is no combined taxable income of the DISC and the related supplier (because, for example, a combined loss is incurred), a transfer price (or commission) will not be deemed to cause a loss to the related supplier if it allows the DISC to recover an amount not in excess of its costs (if any).

(ii) *Special rule for applying ''4 percent'' gross receipts method to sales.* A transfer price or commission, determined under the ‘‘4 percent’’ gross receipts method (determined without regard to subdivision (i) of this subparagraph), for a sale of export property referred to in paragraph (b)(1) of this section, will not be considered to cause a loss for the related supplier if for the DISC's taxable year, the ratio that (a) the taxable income of the DISC derived from such sale by using such price or commission bears to *(b)* the DISC's gross receipts from such sale is not greater than the ratio that *(c)* all of the taxable income of the related supplier and the DISC from all sales of the same product or product line (domestic and foreign) to third parties whether or not related parties bears to *(d)* the total gross receipts of the related supplier and the DISC from such sales. For purposes of the preceding sentence, sales between the DISC and its related suppliers shall not be taken into account under *(c)* or *(d)* of this subdivision. For example, assume that for a taxable year of a DISC the total costs of the related supplier and the DISC with respect to all sales ($150 for domestic and $44 for foreign) of a product line are $194 and the total gross receipts of the related supplier and the DISC with respect to such sales are $200 so that the total taxable income of the related supplier and the DISC with respect to such sales is $6. The parties would thus be entitled to compute a transfer price determined under the gross receipts method on any given sale of product A of such product line by the related supplier to the DISC which would allocate to the DISC taxable income equal to not more than 3 percent (*i.e.*, $6/$200) of its gross receipts derived from its resale of such product. If the DISC were to resell an item of product A for $10, the transfer price paid by the DISC to the related supplier determined under the gross receipts method could be as low as $9.70.

(iii) *Grouping transactions.* For purposes of subdivision (i) of this subparagraph, the basis for grouping transactions chosen by the taxpayer under paragraph (c)(7) of this section for the taxable year shall be applied. For purposes of making the computations of subdivision (ii) *(c)* and *(d)* of this subparagraph, however, the taxpayer may choose any basis for grouping transactions permissible under paragraph (c)(7) of this section, even though it may not be the same basis as that already chosen under paragraph (c)(7) of this section for computing transfer prices or commissions to a DISC. If, for example, the taxpayer has chosen to group transactions on a product basis for computing transfer prices or commissions to a DISC for a taxable year, the taxpayer may still group transactions on a product line basis for purposes of computing taxable income and total gross receipts under subdivision (ii) *(c)* and *(d)* of this subparagraph. For a further example, if the taxpayer computes taxable income for one group of transactions under the gross receipts method and computes taxable income for a second group of transactions under the combined taxable income method, the taxpayer may aggregate these transactions for purposes of computing taxable income and total gross receipts under subdivision (ii) *(c)* and *(d)* of this subparagraph.

(2) *Relationship to section 482.* In applying the rules under section 994, it may be necessary to first take into account the price of a transfer (or other transaction) between the DISC (or related supplier) and a related party which is subject to the arm's length standard of section 482. Thus, for example, where a related supplier sells export property to a DISC which the related supplier purchased from related parties, the costs taken into account in computing the combined taxable income of the DISC and the related supplier are determined after any necessary adjustment under section 482 of the price paid by the related supplier to the related parties. In applying section 482 to a transfer by a DISC, however, the DISC and its related supplier are treated as if they were a single entity carrying on all the functions performed by the DISC and the related supplier with respect to the transaction and the DISC shall be allowed to receive under the section 482 standard the amount the related supplier would have received had there been no DISC.

(3) *Initial payment of transfer price or commission.* (i) The amount of a transfer price (or reasonable estimate thereof) actually charged by a related supplier

to a DISC, or a sales commission (or reasonable estimate thereof) actually charged by a DISC to a related supplier, in a transaction to which section 994 applies must be paid no later than 60 days following the close of the taxable year of the DISC during which the transaction occurred.

(ii) Payment must be in the form of money, property (including accounts receivable from sales by or through the DISC), a written obligation which qualifies as debt under the safe harbor rule of § 1.992–1(d)(2)(ii), or an accounting entry offsetting the account receivable against an existing debt owed by the person in whose favor the account receivable was established to the person with whom it engaged in the transaction. The form of the payment to a DISC need not be a qualified export asset under § 1.993–2. However, for the requirement that the adjusted basis of the qualified export assets of the DISC at the close of its taxable year must equal or exceed 95 percent of the sum of the adjusted bases of all assets of the DISC at the close of its taxable year, see section 992(a)(1)(B).

(iii) If the district director can demonstrate, based upon the data available as of the 60th day after the close of such taxable year, that the amount actually paid did not represent a reasonable estimate of the transfer price or commission (as the case may be) to be determined under section 994 and this section, an indebtedness will be deemed to arise, from the person required to make the payment in favor of the person to whom the payment is required to be made, in an amount equal to the difference between the amount of the transfer price or commission determined under section 994 and this section and the amount (if any) actually paid and received. Such indebtedness will be deemed to arise as of the date the transaction occurred which gave rise to the indebtedness, except that, if such transaction occurred in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the indebtedness will be deemed to arise as of the date by which payment was required under subdivision (i) of this paragraph (e)(3). Such indebtedness owed to a DISC shall be treated as an asset but shall not be treated as a trade receivable or other qualified export asset (see § 1.993–2(d)(3)) as of the end of the taxable year of the DISC in which the indebtedness is deemed to arise.

(iv)*(a)* Except with respect to incomplete transactions to which paragraph (c)(5)(i)*(b)* of this section applies, if the amount actually paid results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction as reported in its tax return for the taxable year the transaction is completed, then the amount actually paid shall be deemed to be a reasonable estimate of such transfer price or commission.

(b) With respect to incomplete transactions to which paragraph (c)(5)(i)*(b)* of this section applies and which were initiated during a taxable year ending after August 15, 1975, the amount actually paid shall be deemed to be a reasonable estimate of such transfer price if any one of the following three tests is met:

(1) The amount actually paid by the DISC to the related supplier in respect of the property does not exceed the related supplier's cost of goods sold (see paragraph (c)(6)(ii) of this section) with respect to the property.

(2) If the transaction is completed by the date on which the DISC's return is required to be filed for the year in which the transaction was initiated, the amount actually paid by the DISC to the related supplier in respect of the property results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction when completed.

(3) The percentage that *(i)* an amount equal to *(a)* the amount actually paid by the DISC to the related supplier in respect of the property minus *(b)* the related supplier's cost of goods sold with respect to the property, bears to *(ii)* the related supplier's cost of goods sold in respect of the property, is not greater than 50 percent of the percentage that *(iii)* the combined taxable income for completed transactions of the same group as the property during the DISC's taxable year in which the incomplete transaction was initiated, bears to *(iv)* the cost of goods sold of the related supplier and DISC with respect to such transactions.

(c) For purposes of this subdivision (iv), whether the transfer price or commission actually paid is deemed a reasonable estimate may be determined on the basis for grouping transactions chosen by the taxpayer under paragraph (c)(5) and (7) of this section.

(v) An indebtedness arising under subdivision (iii) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by §1.482–2(a)(2) from the 61st day after the close of the DISC's taxable year in which the transaction occurred which gave rise to the indebtedness to the date of payment. The interest so computed shall be accrued and included in the taxable income of the person to whom the indebtedness is owed for each taxable year during which the indebtedness is unpaid.

(4) *Subsequent determination of transfer price or commission.* The DISC and its related supplier would ordinarily determine under section 994 and this section the transfer price payable by the DISC (or the commission payable to the DISC) for a transaction before the DISC files its return for the taxable year of the transaction. After the DISC has filed its return, a redetermination of the transfer price (or commission) may only be made if permitted by the Code and the regulations thereunder. Such a redetermination would include a redetermination by reason of an adjustment under section 482 and the regulations thereunder or section 861 and §1.861–8 which affects the amounts which entered into the determination of the transfer price or commission.

(5) *Procedure for adjustments to transfer price or commission*—(i)*(a)* If the transfer price (or commission) for a transaction determined under section 994 is different from the price (or commission) actually charged, the person who received too small a transfer price (or commission) or paid too large a transfer price (or commission) shall establish (or be deemed to have established), at the date of the determination or redetermination under subparagraph (4) of this paragraph of the transfer price (or commission) under section 994, an account receivable due the DISC from the person with whom it engaged in the transaction equal to the difference in amount between the transfer price (or commission) so determined and the transfer price (or commission) previously paid and received. If the account receivable is paid within 90 days after the date it is established (or deemed established), then as of the end of the taxable year of the DISC in which the transaction occurred which gave rise to the indebtedness, the account receivable shall be treated as an asset and, under §1.993–2(d)(3) as a trade receivable, and thus as a qualified export asset.

(b) If, for example, during 1972, a DISC which uses the calendar year as its taxable year sold a product which it purchased that year from its related supplier and paid a price of $10,000 which price is a reasonable estimate under subparagraph (3)(iii) of this paragraph but is later determined under section 994 to be $8,000 immediately before the DISC filed its return for 1972, the DISC must be paid $2,000 (i.e., $10,000 − $8,000) by its related supplier or establish an account receivable from its related supplier of $2,000. The account receivable may be paid without tax consequences, provided that such account receivable is paid within 90 days after the date it is established (or deemed established). Such account receivable paid within such 90 days will be considered to relate to the taxable year in which the transaction occurred which gave rise thereto rather than the taxable year during which it is established or paid.

(ii) Payment must be in a form specified in subparagraph (3) of this paragraph.

(iii) If an account receivable of a DISC described in subdivision (i) of this paragraph (e)(5) is not paid within 90 days of the date it is established (or deemed established), then, as of the end of the taxable year of the DISC in which the transaction occurred which gives rise to the indebtedness, the account receivable shall be treated as an asset except that, if the account receivable is established (or deemed established) in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the account receivable shall be treated as an asset as of the end of such taxable year. However, under §1.993–2(d)(3), an account receivable referred to in the preceding sentence shall not be treated as a trade receivable or other qualified export asset.

(iv) An account receivable established in accordance with subdivision (i) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by § 1.482–2(a)(2) from the day after the date the account receivable is deemed established to the date of payment. The interest so computed shall be accrued and included in the taxpayer's taxable income for each taxable year during which the account receivable is outstanding.

(v)(*a*) In lieu of establishing an account receivable in accordance with subdivision (i) of this subparagraph for all or part of an amount due a related supplier, the related supplier and DISC are permitted to treat all or part of any distribution which was made by the DISC out of its previously taxed income with respect to the year to which the determination or redetermination relates as an additional payment of transfer price or repayment of commission (and not as a distribution) made as of the date the distribution was made. Any additional amount arising on the determination or redetermination due the related supplier after this treatment shall be represented by an account receivable established under subdivision (i) of this subparagraph. To the extent that a distribution is so treated under this subdivision (v), it shall cease to qualify as distribution for any Federal income tax purpose, and the DISC's account for previously taxed income shall be adjusted accordingly. If all or part of any distribution made to a shareholder other than the related supplier is recharacterized under this subdivision (v), the related supplier shall establish an account receivable from that shareholder for the amount so recharacterized. Such account receivable shall be paid in the time and manner set forth in this paragraph (e)(5). In order to obtain the relief provided by this subdivision (v), the conditions and procedures prescribed by Revenue Procedure 84–3 must be met. The provisions of this paragraph (e)(5)(v) shall apply to all open taxable years ending after December 31, 1971.

(*b*) If, for example, during 1982, a DISC commission from a related supplier with respect to a transaction completed in 1980 was redetermined to be $1,000 less than the commission actually charged by, and paid to, the DISC, the amount of any distribution previously made by the DISC from its 1980 previously taxed income to the related supplies as a shareholder may, to the extent of $1,000, be treated not as a distribution but as a repayment of the commission.

(vi) The procedure for adjustments to transfer price provided by this subparagraph does not apply to incomplete transactions described in paragraph (c)(5)(i)*(b)* of this section. Such procedure will, however, be applied to any such transaction with respect to the taxable year in which the transaction is completed.

(6) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) During 1975, a DISC which uses the calendar year as its taxable year purchased a product from its related supplier and made an initial payment of $8,500. If $8,500 were determined to be the transfer price under section 994, the DISC's taxable income from the transaction would be $1,000. Immediately before the DISC filed its return for 1975, under section 994 it is determined that the transfer price is $8,000 and the DISC's taxable income is $1,500. Thus, the requirement of a reasonable estimate under subparagraph (3) of this paragraph was met because the amount ($8,500) actually paid resulted in the DISC realizing taxable income of $1,000 which is not less than 50 percent of the DISC's taxable income ($1,500) from the transaction as determined under section 994.

(ii) Pursuant to subparagraph (5) of this paragraph, an account receivable due the DISC for $500, i.e., $8,500 − $8,000, is established on September 15, 1976, the date the DISC files its return for 1975, and is paid on December 1, 1976. The account receivable for $500 will be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto and will be a qualified export asset under § 1.993–2(d)(3) for the last day of such year.

Example 2. Assume the same facts as in example 1 except that the account receivable for $500 is paid on January 1, 1977. The account receivable for $500 will still be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto. However, such account receivable will be treated as an asset which is not a qualified export asset under §1.993–2(d)(3) for the last day of such year.

(f) *Export promotion expenses*—(1) *Purpose of expense*. (i) In order for an expense or cost of a type described in subparagraph (2) of this paragraph to be an export promotion expense, the expense or cost must be incurred or treated as incurred by the DISC (under subparagraph (7) of this paragraph) to advance the sale, lease, or other distribution of export property for use, consumption, or distribution outside the United States. Costs of services in performing installation (but not assembly) on the site and for meeting warranty commitments if such services are related and subsidiary (within the meaning of §1.993–1(d)) to any qualified sale, lease, or other distribution of export property by the DISC (or with respect to which the DISC received a commission) will be considered to advance the sale, lease, or other distribution of export property. General and administrative expenses attributable to billing customers, other clerical functions of the DISC, or generally operating the DISC, will also be considered to advance the sale, lease, or other distribution of export property.

(ii) Where an expense or cost incurred or treated as incurred by the DISC qualifies only in part as an export promotion expense, such expense or cost must be allocated between the qualified portion and such other portion on a reasonable basis. See §1.994–2(b)(2) for the option of the related supplier not to claim expenses as export promotion expenses.

(2) *Types of expenses*. The only expenses or costs which may be export promotion expenses are those expenses or costs meeting the test of subparagraph (1) of this paragraph which constitute—

(i) Ordinary and necessary expenses of the DISC paid or incurred during the DISC's taxable year in carrying on any trade or business, allowable as deductions under section 162, such as expenses for market studies, advertising, salaries and wages (including contributions or compensations deductible under section 404) of sales, clerical, and other personnel, rentals on property, sales commissions, warehousing, and other selling expenses,

(ii) A reasonable allowance under section 167 for exhaustion, wear and tear, or obsolescence of the property of the DISC,

(iii) Costs of freight (subject to the limitations of subparagraph (4) of this paragraph),

(iv) Costs of packaging for export (as defined in subparagraph (5) of this paragraph), or

(v) Costs of designing and labeling packages exclusively for export markets (under subparagraph (6) of this paragraph).

(3) *Ineligible expenses*. Items ineligible to be export promotion expenses include, for example, interest expenses, bad debt expenses, freight insurance, State and local income and franchise taxes, the cost of manufacture or assembly operations, and items of cost of goods sold (except as otherwise provided in this paragraph in the case of certain freight, packaging, and designing and labeling expenses). Income or similar taxes eligible for a foreign tax credit under sections 901 and 903 are also not eligible to be export promotion expenses.

(4) *Freight expenses*—(i) *In general*. Export promotion expenses include one-half of the freight expense (not including insurance) for shipping export property aboard a U.S.-flag carrier in those cases where law or regulation of the United States or of any State or political subdivision thereof or of any agency or instrumentality of any of these does not require that the export property be shipped aboard a U.S.-flag carrier. For purposes of this paragraph, the term ''freight expense'' includes charges paid for c.o.d. service, miscellaneous ground charges, such as charges incurred for services normally performed by U.S.-flag carriers, charges for services of loading aboard U.S.-flag carriers normally performed by such carriers, freight forwarders, or independent contractors engaged in loading property, and charges attributable to a freight consolidation function normally performed by freight forwarders. In order for one-half of freight expenses paid to the owner (or the agent of the owner) of a U.S.-flag carrier to be claimed as an export promotion expense, the DISC must obtain

a written statement (such as, for example, a bill of lading) from the owner (or the agent) disclosing that the export property was shipped aboard the owner's U.S.-flag carrier or another U.S.-flag carrier, and the DISC must have no reasonable basis for disbelieving such statement of the owner (or the agent). For the requirement of a written statement from a freight forwarder, see subdivision (iv) of this subparagraph.

(ii) *U.S.-flag carrier defined.* For purposes of this paragraph, the term ''U.S.-flag carrier'' is an airplane owned and operated by a U.S. person or persons (as defined in section 7701(a)(30)) or a ship documented under the laws of the United States. Shipment initiated by delivery to the U.S. Postal Service shall be considered shipment aboard a U.S.-flag carrier, but not if shipped to a place to which mail shipments from the United States are ordinarily accomplished by land transportation, such as to Canada or Mexico, unless airmail is specified.

(iii) *Shipment pursuant to law or regulation.* Shipment pursuant to law or regulation includes instances where a U.S.-flag carrier must be used in order to obtain permission from the Government to make the export. If the law or regulation requires a fixed portion of the export property to be shipped aboard a U.S.-flag carrier, the freight expense on that portion of such export property that was so shipped in order to satisfy such requirement cannot qualify as an export promotion expense.

(iv) *Freight forwarders.* A payment to a freight forwarder shall be considered freight expense within the meaning of this paragraph to the extent the forwarder utilizes a U.S.-flag carrier. For purposes of this paragraph, the term ''freight forwarder'' includes air freight consolidators and carriers owned and operated by U.S. persons utilizing U.S.-flag carriers such as non-vessel-owning common carriers. In order for one-half of freight expenses paid to a freight forwarder to be claimed as export promotion expenses, the DISC must obtain a written statement (such as, for example, a bill of lading) from the freight forwarder disclosing that the export property was shipped aboard a U.S.-flag carrier, and the DISC must have no reasonable basis for disbelieving such statement of the freight forwarder.

(v) *Freight within the United States.* A DISC may not claim as export promotion expense any amount that is attributable to carriage of export property between points within the United States. If, however, export property is carried from the United States to a foreign country on a through shipment pursuant to a single bill of lading or similar document aboard one or more U.S.-flag carriers, the freight expense of such carriage shall not be apportioned between the domestic and foreign portions of such carriage, even though a carrier may stop en route within the United States or the export property may be shifted from one carrier to another, and one-half of such freight expense may be claimed as an export promotion expense. Freight expense does not include the cost of transporting the export property to the depot of the U.S.-flag carrier or freight forwarder for shipment abroad. The expense of shipment of export property initiated by delivery to the U.S. Postal Service for ultimate delivery outside the United States shall be considered as attributable entirely to carriage of such property outside the United States.

(5) *Packaging for export.* (i) Export promotion expenses include the direct and indirect cost of packaging export property (including the cost of the package) for export whether or not the packaging is the same as domestic packaging. Such packaging costs do not include costs of manufacturing (as defined in the regulations under section 993) and assembly. Thus, if a DISC buys and packages export property for resale, its costs of packaging the export property are export promotion expenses. If, however, the process of such packaging by the DISC is physically integrated with the process of manufacturing the export property by the related supplier, the costs of such packaging are not export promotion expenses.

(ii) The cost of containers leased from a shipping company to which the DISC also pays freight for the property packaged is not a cost of packaging. However, in such circumstances, one-half of the rental charge may be allowable as a freight expense if permitted under subparagraph (4) of this paragraph.

(6) *Designing and labeling packages.* Export promotion expenses include the direct and indirect costs of designing and labeling packages, including bottles, cans, jars, boxes, cartons, or containers, to the extent incurred for export markets. Thus, for example, to the extent incurred for supplying export markets, the cost of designing labels in a foreign language and the cost of printing such labels are export promotion expenses.

(7) *DISC must incur export promotion expenses*—(i) *In general.* In order for an expense to be an export promotion expense it must be incurred or treated as incurred under this subparagraph by the DISC. For example, an expense is incurred by a DISC if the expense results from *(a)* the DISC incurring an obligation to pay compensation to its employees, *(b)* depreciation of property owned by the DISC and used by its employees, *(c)* the DISC incurring an obligation to pay for office supplies used by its employees, *(d)* the DISC incurring an obligation to pay space costs for use by its employees, or *(e)* the DISC incurring an obligation to pay other costs supporting efforts by its employees.

(ii) *Payments to independent contractors.* A payment to an independent contractor, directly or indirectly, is treated as incurred by the DISC if the cost of performing the function performed by the independent contractor would be considered an export promotion expense described in subparagraphs (1) and (2) of this paragraph if performed by the DISC, and if, in a case where the services of the independent contractor were engaged by a party related to the DISC, such related party and such DISC agreed in writing before the contract was entered into that a specified portion or all of the contract was for the benefit of the DISC and that all of the expenses of the contract (eligible to be considered as export promotion expenses) with respect to such portion would be borne by the DISC.

(iii) *Expenses incurred by related parties.* Reimbursements or other payments by a DISC to a related party are export promotion expenses only if the expenses of the related party for which reimbursement is made are for space in a building actually used by employees of the DISC or for export property owned by the DISC. Except as otherwise provided in the preceding sentence, expenses incurred by a foreign international sales corporation (FISC) or a real property holding company (as defined in section 993(e)(1) and (2), respectively) shall not be treated as export promotion expenses of its DISC.

(iv) *Selling commissions paid by a DISC.* A commission paid by a DISC to a person other than a related person, with respect to a transaction which gives rise to qualified export receipts of the DISC, is an export promotion expense of the DISC. A commission paid by a DISC to a related person is not an export promotion expense.

(v) *Sales of promotional material.* If a DISC sells promotional material to a buyer of export property from the DISC at a price which is greater than the costs of the DISC for such material, such costs are not export promotion expenses. If, however, the DISC sells promotional material at a price which is less than its costs for such material, the excess of such costs over such price is an export promotion expense. For rules relating to the status of promotional material as qualified export assets and export property, see §§1.993–2 and 1.993–3, respectively.

(vi) An expense may be incurred by the DISC under subdivisions (i) through (v) of this subparagraph even if the accounting for and payment of such expense is handled by a related party and the DISC reimburses the related party for such expenses.

(8) *Incomplete transactions.* Expenses eligible to be treated as export promotion expenses which are attributable to the sale, lease, or other distribution of export property and which are incurred prior to the taxable year of sale, lease, or other distribution by the DISC are not treated as export promotion expenses until the taxable year of sale, lease, or other distribution or until the taxable year in which it is first determined that no transaction is reasonably expected to result from the expense incurred (whether or not a transaction subsequently results).

Thus, for example, if a DISC incurs a packaging cost which is otherwise eligible to be treated as an export promotion expense, the DISC may not include such charge as an export promotion expense until the year in which the export property with respect to which the packaging cost was incurred is actually sold by the DISC. If no transaction is reasonably expected to result from the packaging cost, such cost should be allocated as an export promotion expense to the group of transactions to which such cost is most closely related.

(g) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. J and K are calendar year taxpayers. J, a domestic manufacturing company, owns all the stock of K, a DISC for the taxable year. During 1972, J manufactures only 100 units of a product (which is eligible to be export property as defined in section 993(c)). J enters into a written agreement with K whereby K is granted a sales franchise with respect to exporting such property and K will receive commissions with respect to such exports equal to the maximum amount permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold for $1,000. J's cost of goods sold attributable to the 100 units is $650. J's direct selling expenses so attributable are $100. Although J has other deductible expenses, for purposes of this example assume that J has no other deductible expenses. K pays $230 to independent contractors which qualify as export promotion expenses under paragraph (f)(7)(ii) of this section. K does not perform functions substantial enough to entitle it to an allocation of income which meets the arm's length standard of section 482. The income which K may earn under section 994 under the franchise is $20, computed as follows:

(1) Combined taxable income:		
(a) K's sales price		$1,000
(b) Less deductions:		
J's cost of goods sold	$650	
J's direct selling expenses	100	
K's export promotion expenses	230	
Total deductions		980
(c) Combined taxable income		20
(2) K's profit under combined taxable income method (before application of loss limitation):		
(a) 50 percent of combined taxable income		10
(b) Plus: 10 percent of K's export promotion expenses (10% of $230)		23
(c) K's profit		33
(3) K's profit under gross receipts method (before application of loss limitation):		
(a) 4 percent of K's sales price (4% of $1,000)		40
(b) Plus: 10 percent of K's export promotion expenses (10% of $230)		23
(c) K's profit		63

Since combined taxable income ($20) is lower than both K's profit under the combined taxable income method ($33) and under the gross receipts method ($63), the maximum income K may earn is $20. Accordingly, the commissions K may receive from J are $250, *i.e.*, K's expenses ($230) plus K's profit ($20).

Example 2. M and N are calendar year taxpayers. M, a domestic manufacturing company, owns all the stock of N, a DISC for the taxable year. During 1972, M produces and sells a particular product line of export property to N for $75, a price which can be justified as satisfying the standard of arm's length price of section 482. N performs substantial functions with respect to the transaction and resells the export property for $100. M's cost of goods sold attributable to the export property is $60. M's direct selling expenses so attributable (relating to advertising of the product line in foreign markets) are $12. Although M has other deductible expenses, for purposes of this example, assume that M has no other deductible expenses. N's expenses attributable to resale of the export property are $22 of which $20 are export promotion expenses. The maximum profit which N may earn with respect to the product line is $6, computed as follows:

(1) Combined taxable income:		
(a) N's sales price		$100
(b) Less deductions:		
M's cost of goods sold	$60	
M's direct selling expenses	12	
N's expenses	22	
Total deductions		94
(c) Combined taxable income		6
(2) N's profit under combined taxable income method (before application of loss limitation):		
(a) 50 percent of combined taxable income		3
(b) Plus: 10 percent of N's export promotion expenses (10% of $20)		2
(c) N's profit		5
(3) N's profit under gross receipts method (before application of loss limitation):		
(a) 4 percent of N's sales price (4% of $100)		4
(b) Plus: 10 percent of N's export promotion expenses (10% of $20)		2
(c) N's profit		6
(4) N's profit under section 482 method:		
(a) N's sales price		100
(b) Less deductions:		
N's cost of goods sold (price paid by N to M)	75	

N's expenses	22	
Total deductions		97
(c) N's profit		3

Since the gross receipts method results in greater profit to N ($6) than does the combined taxable income method ($5) or section 482 method ($3), and does not exceed combined taxable income ($6), N may earn a maximum profit of $6. Accordingly, the transfer price from M to N may be readjusted as long as the transfer price is not readjusted below $72, computed as follows:

(5) Transfer price from M to N:		
(a) N's sales price		$100
(b) Less:		
N's expenses	$22	
N's profit	6	
Total subtractions		28
(c) Transfer price		72

Example 3. Q and R are calendar year taxpayers. Q, a domestic manufacturing company, owns all the stock of R, a DISC for the taxable year. During 1972, Q produces and sells a product line of export property to R for $170, a price which can be justified as satisfying the standards of arm's length price of section 482, and R resells the export property for $200. Q's cost of goods sold attributable to the export property is $115 so that the combined gross income from the sale of the export property is $85 (*i.e.,* $200 minus $115). Q's expenses incurred in connection with the property sold are $35. Q's deductible overhead and other supportive expenses allocable to all gross income are $6. Apportionment of these supportive expenses on the basis of gross income does not result in a material distortion of income and is a reasonable method of apportionment. Q's gross income from sources other than the transaction is $170 making total gross income of Q and R (excluding the transfer price paid by R) $255 (i.e., $85 plus $170). R's expenses attributable to resale of the export property are $20, all of which are export promotion expenses. The maximum profit which R may earn with respect to the product line is $16, computed as follows:

(1) Combined taxable income:			
(a) R's sales price			$200
(b) Less deductions:			
(i) Q's cost of goods sold		115	
(ii) Q's expenses incurred in connection with the property sold		35	
(iii) Apportionment of Q's supportive expenses:			
Q's supportive expenses	$6		
Combined gross income from sale of export property	85		
Total gross income of Q and R	255		
Apportionment	(6×85)/255	2	
(iv) R's expenses		20	
Total deductions			172
(c) Combined taxable income			28
(2) R's profit under combined taxable income method (before application of loss limitation):			
(a) 50 percent of combined taxable income			14
(b) Plus: 10 percent of R's export promotion expenses (10% of $20)			2
(c) R's profit			16
(3) R's profit under gross receipts method (before application of loss limitation):			
(a) 4 percent of R's sales price (4% of $200)			8
(b) Plus: 10 percent of R's export promotion expenses (10% of $20)			2
(c) R's profit			10
(4) R's profit under section 482 method:			
(a) R's sales price			200
(b) Less deductions:			
R's cost of goods sold (price paid by R to Q)		170	
R's expenses		20	
Total deductions			190
(c) R's profit			10

Since the combined taxable income method results in greater profit to R ($16) than does the gross receipts method ($10) or section 482 method ($10), and does not exceed combined taxable income ($28), R may earn a maximum profit of $16. Accordingly, the transfer price from Q to R may be readjusted as long as the transfer price is not readjusted below $164 computed as follows:

(5) Transfer price from Q to R:		
(a) R's sales price		$200
(b) Less:		
R's expenses	$20	
R's profit	16	
Total		36
(c) Transfer price		164

Example 4. S and T are calendar year taxpayers. S, a domestic manufacturing company, owns all the stock of T, a DISC for the taxable year. During 1972, S produces and sells 100 units of a particular product to T under a written agreement which provides that the transfer price between S and T shall be that price which allocates to T the maximum permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold by T for $950. S's cost of goods sold attributable to the 100 units is $650. S's other deductible expenses so attributable are $300. Although S has other deductible expenses, for purposes of this example, assume that S has no deductible expenses not definitely allocable to

any item of gross income. T's expenses attributable to the resale of the 100 units are $50. S chooses not to apply the section 482 method. T may not earn any income under the gross receipts or combined taxable income method with respect to resale of the 100 units because combined taxable income is a negative figure, computed as follows:

(1) Combined taxable income:		
(a) T's sales price		$950
(b) Less deductions:		
S's cost of goods sold	$650	
S's expenses	300	
T's expenses	50	
Total deductions		1,000
(c) Combined taxable income (loss)		($50)

Under paragraph (e)(1)(i) of this section, T is permitted to recover its expenses attributable to the 100 units ($50) even though such recovery results in a loss or increased loss to the related supplier. Accordingly, the transfer price from S to T may be readjusted as long as the transfer price is not readjusted below $900, computed as follows:

(2) Transfer price from S to T:	
(a) T's sales price	$950
(b) Less: T's expenses	50
(c) Transfer price	900

Example 5. Assume the same facts as in example 4 except that S chooses to apply the section 482 method and that under arm's length dealings T would have derived $10 of income. Accordingly, the transfer price from S to T may be set at an amount not less than $890, computed as follows:

(1) Transfer price from S to T:		
(a) T's sales price		$950
(b) Less:		
T's expenses	$50	
T's profit	10	
Total deductions		60
(c) Transfer price		890

Example 6. X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, a DISC for the taxable year. During March 1972, X manufactures a particular product of export property which it leases on April 1, 1972, to Y for a term of 1 year at a monthly rental of $1,000, a rent which satisfies the standard of arm's length rental under section 482. Y subleases the product on April 1, 1972, for a term of 1 year at a monthly rental of $1,200. X's cost for the product leased is $40,000. X's other deductible expenses attributable to the product are $900, all of which are incurred in 1972. Although X has other deductible expenses, for purposes of this example, assume that X has no other deductible expenses. Y's expenses attributable to sublease of the export property are $450, all of which are incurred in 1972 and are export promotion expenses. X depreciates the property on a straight line basis without the use of an averaging convention, assuming a useful life of 8 years and no salvage value. The profit which Y may earn with respect to the transaction is $2,895 for 1972 and $1,175 for 1973, computed as follows:

COMPUTATION FOR 1972

(1) Combined taxable income:		
(a) Y's sublease rental receipts for year ($1,200×9 months)		$10,800
(b) Less deductions:		
X's depreciation ($40,000×1/8×9/12)	$3,750	
X's other expenses	900	
Y's expenses	450	
Total deductions		5,100
(c) Combined taxable income		5,700
(2) Y's profit under combined taxable income method (before application of loss limitation):		
(a) 50 percent of combined taxable income		2,850
(b) Plus: 10 percent of Y's export promotion expenses (10% of $450)		45
(c) Y's profit		2,895
(3) Y's profit under gross receipts method (before application of loss limitation):		
(a) 4 percent of Y's sublease rental receipts for year (4% of $10,800)		432
(b) Plus: 10 percent of Y's export promotion expenses (10% of $450)		45
(c) Y's profit		477
(4) Y's profit under section 482 method:		
(a) Y's sublease rental receipts for year		$10,800
(b) Less deductions:		
Y's lease rental payments for year	$9,000	
Y's expenses	450	
Total deductions		9,450
(c) Y's profit		1,350

Since the combined taxable income method results in greater profit to Y ($2,895) than does the gross receipts method ($477) or section 482 method ($1,350), Y may earn a profit of $2,895 for 1972. Accordingly, the monthly rental payable by Y to X for 1972 may be readjusted as long as the monthly rental payable is not readjusted below $828.33, computed as follows:

(5) Monthly rental payable by Y to X for 1972:		
(a) Y's sublease rental receipts for year		$10,800.00
(b) Less:		
Y's expenses	450.00	
Y's profit	2,895.00	
Total		3,345.00
(c) Rental payable for 1972		7,455.00

(d) Rental payable each month ($7,455÷9 months)	828.33

COMPUTATION FOR 1973

(1) Combined taxable income:	
(a) Y's sublease rental receipts for year ($1,200×3 months)	$3,600
(b) Less: X's depreciation ($40,000×1/8×3/12)	1,250
(c) Combined taxable income	2,350
(2) Y's profit under combined taxable income method (before application of loss limitation):	
(a) 50 percent of combined taxable income	$1,175
(b) Y's profit	1,175
(3) Y's profit under gross receipts method (before application of loss limitation):	
(a) 4 percent of Y's sublease rental receipts for year (4% of $3,600)	144
(b) Y's profit	144
(4) Y's profit under section 482 method:	
(a) Y's sublease rental receipts for year	3,600
(b) Less: Y's lease rental payments for year	3,000
(c) Y's profit	600

Since the combined taxable income method results in greater profit to Y ($1,175) than does the gross receipts method ($144) or section 482 method ($600), Y may earn a profit of $1,175 for 1973. Accordingly, the monthly rental payable by Y to X for 1973 may be readjusted as long as the monthly rental payable is not readjusted below $808.33, computed as follows:

(5) Monthly rental payable by Y to X for 1973:	
(a) Y's sublease rental receipts for year	$3,600.00
(b) Less: Y's profit	1,175.00
(c) Rental payable for 1973	2,425.00
(d) Rental payable for each month ($2,425÷3 months)	808.33

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7364, 40 FR 29827, July 16, 1975, as amended by T.D. 7435, 41 FR 43142, Sept. 30, 1976; T.D. 7854, 47 FR 51741, Nov. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§1.994–2 Marginal costing rules.

(a) *In general.* This section prescribes the marginal costing rules authorized by section 994(b)(2). If under paragraph (c)(1) of this section a DISC is treated for its taxable year as seeking to establish or maintain a foreign market for sales of an item, product, or product line of export property (as defined in §1.993–3) from which qualified export receipts are derived, the marginal costing rules prescribed in paragraph (b) of this section may be applied to allocate costs between gross receipts derived from such sales and other gross receipts for purposes of computing, under the ‘‘50–50’’ combined taxable income method of §1.994–1(c)(3), the combined taxable income of the DISC and related supplier derived from such sales. Such marginal costing rules may be applied whether or not the related supplier manufactures, produces, grows, or extracts (within the meaning of §1.993–3(c)) the export property sold. Such marginal costing rules do not apply to sales of export property which in the hands of a purchaser related under section 954(d)(3) to the seller give rise to foreign base company sales income as described in section 954(d) unless, for the purchaser's year in which it resells the export property, section 954(b)(3)(A) is applicable or such income is under the exceptions in section 954(b)(4). Such marginal costing rules do not apply to leases of property or the performance of any services whether or not related and subsidiary services (as defined in §1.994–1(b)(3).

(b) *Marginal costing rules for allocations of costs*—(1) *In general.* Marginal costing is a method under which only marginal or variable costs of producing and selling a particular item, product, or product line are taken into account for purposes of section 994. Where this section is applicable, costs attributable to deriving qualified export receipts for the DISC's taxable year from sales of an item, product, or product line may be determined in any manner the related supplier (as defined in §1.994–1(a)(3)(ii)) chooses, provided that the requirements of both subparagraphs (2) and (3) of this paragraph are met.

(2) *Variable costs taken into account.* There are taken into account in computing the combined taxable income of the DISC and its related supplier from sales of an item, product, or product line the following costs:

(i) Direct production costs (as defined in §1.471–11(b)(2)(i)) and

(ii) Costs which are export promotion expenses, but only if they are claimed as export promotion expenses in determining taxable income derived by the

DISC under the combined taxable income method of § 1.994–1(c)(3).

At the taxpayer's option, all, a part, or none of the costs which qualify as export promotion expenses may be so claimed as export promotion expenses.

(3) *Overall profit percentage limitation.* As a result of such determination of costs attributable to such qualified export receipts for the DISC's taxable year, the combined taxable income of the DISC and its related supplier from sales of such item, product, or product line for the DISC's taxable year does not exceed gross receipts (determined under § 1.993–6) of the DISC derived from such sales, multiplied by the overall profit percentage (determined under paragraph (c)(2) of this section).

(c) *Definitions*—(1) *Establishing or maintaining a foreign market.* A DISC shall be treated for its taxable year as seeking to establish or maintain a foreign market with respect to sales of an item, product, or product line of export property from which qualified export receipts are derived if the combined taxable income computed under paragraph (b) of this section is greater than the combined taxable income computed under § 1.994–1(c)(6).

(2) *Overall profit percentage.* (i) For purposes of this section, the overall profit percentage for a taxable year of the DISC for a product or product line is the percentage which—

(a) The combined taxable income of the DISC and its related supplier plus all other taxable income of its related supplier from all sales (domestic and foreign) of such product or product line during the DISC's taxable year, computed under the full costing method, is of

(b) The total gross receipts (determined under § 1.993–6) from all such sales.

(ii) At the annual option of the related supplier, the overall profit percentage for the DISC's taxable year for all products and product lines may be determined by aggregating the amounts described in subdivision (i) *(a)* and *(b)* of this subparagraph of the DISC, and all domestic members of the controlled group (as defined in § 1.993–1(k)) of which the DISC is a member, for the DISC's taxable year and for taxable years of such members ending with or within the DISC's taxable year.

(iii) For purposes of determining the amounts in subdivisions (i) *(b)* and (ii) of this subparagraph, a sale of property between a DISC and its related supplier or between domestic members of the controlled group shall be taken into account only during the DISC's taxable year (or taxable year of the member ending within the DISC's taxable year) during which the property is ultimately sold to a person which is neither the DISC nor such a domestic member.

(3) *Grouping of transactions.* (i) In general, for purposes of this section, an item, product, or product line is the item or group consisting of the product or product line pursuant to § 1.994–1(c)(7) used by the taxpayer for purposes of applying the intercompany pricing rules of § 1.994–1.

(ii) However, for purposes of determining the overall profit percentage under subparagraph (2) of this paragraph, any product or product line grouping permissible under § 1.994–1(c)(7) may be used at the annual choice of the taxpayer, even though it may not be the same item or grouping referred to in subdivision (i) of this subparagraph, as long as the grouping chosen for determining the overall profit percentage is at least as broad as the grouping referred to in such subdivision (i).

(4) *Full costing method.* For purposes of this section, the term ''full costing method'' is the method for determining combined taxable income set forth in § 1.994–1(c)(6).

(d) *Application of limitation on DISC income (''no loss'' rule).* If the marginal costing rules of this section are applied, the combined taxable income method of § 1.994–1(c)(3) may not be applied to cause in any taxable year a loss to the related supplier, but such method may be applied to the extent it does not cause a loss. For purposes of the preceding sentence, a loss to a related supplier would result if the taxable income of the DISC would exceed the combined taxable income of the related supplier and the DISC determined in accordance with paragraph (b) of this section. If, however, there is no combined taxable income (so determined), see the last sentence of § 1.994–1(e)(1)(i).

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, a DISC for the taxable year. During 1973, X manufactures a product line which is eligible to be export property (as defined in § 1.993–3). X enters into a written agreement with Y whereby Y is granted a sales franchise with respect to exporting such product line from which qualified export receipts will be derived and Y will receive commissions with respect to such exports equal to the maximum amount permitted to be received under the intercompany pricing rules of section 994. Commissions are computed using the combined taxable income method under § 1.994–1(c)(3). For purposes of applying the combined taxable income method, X and Y compute their combined taxable income attributable to the product line of export property under the marginal costing rules in accordance with the additional facts assumed in the table below:

(1) Maximum combined taxable income (determined under paragraph (b)(2) of this section):		
(a) Y's gross receipts from export sales		$95.00
(b) Less:		
(i) Direct materials	40.00	
(ii) Direct labor	20.00	
(iii) Y's export promotion expenses claimed in determining Y's DISC taxable income	5.00	
(iv) Total deductions	65.00	
(c) Maximum combined taxable income		30.00
(2) Overall profit percentage limitation (determined under paragraph (b)(3) of this section):		
(a) Gross receipts of X and Y from all domestic and foreign sales		400.00
(b) Less deductions:		
(i) Direct materials	160.00	
(ii) Direct labor	80.00	
(iii) Other costs (of which $8 are costs of the DISC including $5 of export promotion expenses claimed in determining Y's taxable income)	40.00	
(c) Total deductions		280.00
(d) Total taxable income from all sales computed on a full costing method		120.00
(e) Overall profit percentage (line (d) ($120) divided by line (a) ($400)) (percent)		30%
(f) Multiply by gross receipts from Y's export sales (line (1)(a))		$95.00
(g) Overall profit percentage limitations		28.50

Since the overall profit percentage limitation under line (2)(g) ($28.50) is less than maximum combined taxable income under line (1)(c) ($30), combined taxable income under marginal costing is limited to $28.50. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is $28.50. Accordingly, the costs attributable to export sales (other than for direct material, direct labor, and export promotion expenses) are $1.50, *i.e.*, line (1)(c) ($30) minus line (2)(g) ($28.50). Under the combined taxable income method of § 1.994–1(c)(3), Y will have taxable income attributable to the sales of $14.75, i.e., the sum of 1/2 of combined taxable income (1/2 of $28.50) and 10 percent of Y's export promotion expenses claimed in determining Y's taxable income (10 percent of $5). Accordingly, the commissions Y receives from X are $22.75, i.e., Y's costs ($8, see line (2)(b)(iii)) plus Y's profit ($14.75).

Example 2. (1) Assume the same facts as in example 1, except that gross receipts from export sales are only $85 and gross receipts from all sales remain at $400. For purposes of applying the combined taxable income method, X and Y may compute their combined taxable income attributable to the product line of export property under the marginal costing rules as follows:

(1) Maximum combined taxable income (determined under paragraph (b)(2) of this section):		
(a) Y's gross receipts from export sales		$85.00
(b) Less:		
(i) Direct materials	40.00	
(ii) Direct labor	20.00	
(iii) Y's export promotion expenses claimed in determining Y's taxable income	5.00	
(iv) Total deductions		65.00
(c) Maximum combined taxable income		20.00
(2) Overall profit percentage limitation (determined under paragraph (b)(3) of this section):		
(a) Gross receipts from Y's export sales (line (1)(a))		85.00
(b) Multiply by overall profit percentage (as determined in example 1) (percent)		30%
(c) Overall profit percentage limitation		25.50

Since maximum combined taxable income under line (1)(c) ($20) is less than the overall profit percentage limitation under line (2)(c) ($25.50), combined taxable income under marginal costing is limited to $20. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is $20. Accordingly, no costs (other than for direct material, direct labor, and export promotion expenses) will be attributed to export sales. Under the combined taxable income method of § 1.994–1(c)(3), Y will have taxable income attributable to the sales of $10.50, i.e., the sum of 1/2 of combined taxable income (1/2 of $20) and 10 percent of Y's export promotion expenses claimed in determining Y's taxable income (10 percent of $5). Accordingly, the Commissions Y receives from X are $18.50, *i.e.*, Y's costs ($8, see line (2)(b)(iii) of example 1) plus Y's profit ($10.50).

(2) If export promotion expenses are not claimed in determining taxable income of Y under the combined taxable income method, the taxable income of Y would be increased to $12.50 and commissions payable to Y would be increased to $20.50, computed as follows:

(3) Maximum combined taxable income (determined under paragraph (b)(2) of this section):		
(a) Y's gross receipts from export sales	$85.00	
(b) Less:		
(i) Direct materials	40.00	
(ii) Direct labor	20.00	
(iii) Total deductions		60.00
(c) Maximum combined taxable income		25.00
(4) Overall profit percentage limitation (line (2)(c))		25.50

Since maximum combined taxable income under line (3)(c) ($25) is less than the overall profit percentage under line (4) ($25.50), combined taxable income under marginal costing is limited to $25. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is $25. Accordingly, no costs (other than for direct material and direct labor) will be attributed to export sales. Under the combined taxable income method of §1.994–1(c)(3), Y will have taxable income attributable to the sales of $12.50, i.e., 1/2 of combined taxable income (1/2 of $25). Accordingly, the commissions Y receives from X are $20.50, *i.e.*, Y's costs ($8, see line (2)(b)(iii) of example 1) plus Y's profit ($12.50).

Example 3. (1) Assume the same facts as in example 1, except that gross receipts from export sales are only $85, gross receipts from all sales remain at $400, and Y has costs of $40 consisting of Y's export promotion expenses of $35 and costs of $5 other than for direct material, direct labor, or export promotion expenses. For purposes of applying the combined taxable income method, X and Y may compute their combined taxable income attributable to the product line of export property under the marginal costing rules as follows:

(1) Maximum combined taxable income (determined under paragraph (b)(2) of this section):		
(a) Y's gross receipts from export sales	$85.00	
(b) Less:		
(i) Direct materials	40.00	
(ii) Direct labor	20.00	
(iii) Y's export promotion expenses claimed in determining Y's taxable income	35.00	
(iv) Total deductions		95.00
(c) Maximum combined taxable income (loss)		(10.00)
(2) Overall profit percentage limitation (as determined in example 2)		25.50

Since maximum combined taxable income under line (1)(c) (which is a loss of $10) is less than the overall profit percentage limitation under line (2)(c) ($25.50), combined taxable income under marginal costing is a loss of $10 and, under the combined taxable income method of §1.994–1(c)(3), Y will have no taxable income or loss attributable to the sales. Accordingly, the commissions Y receives from X are $40, *i.e.*, Y's costs ($40).

(2) If export promotion expenses are not claimed in determining Y's taxable income under the combined taxable income method, the taxable income of Y would be increased to $12.50 and commissions payable to Y would be increased to $52.50 computed as follows:

(3) Maximum combined taxable income (determined under paragraph (b)(2) of this section) (line (3)(c) of example 2)	$25.00
(4) Overall profit percentage limitation (as determined in example 2)	25.50

The results would be the same as in part (2) of example 2, except that the commissions Y receives from X are $52.50, *i.e.*, Y's costs ($40) plus Y's profit ($12.50).

[T.D. 7364, 40 FR 29836, July 16, 1975; 40 FR 33972, Aug. 13, 1975]

§1.995–1 Taxation of DISC income to shareholders.

(a) *In general.* (1) Under §1.991–1(a), a corporation which is a DISC for a taxable year is not subject to any tax imposed by subtitle A of the Code (sections 1 through 1564) for the taxable year, except for the tax imposed by chapter 5 thereof (sections 1491 through 1494) on certain transfers to avoid tax.

(2) Under section 995(a), the shareholders of a DISC, or a former DISC, are subject to taxation on the earnings and profits of the DISC in accordance with the provisions of chapter 1 of the

Code generally applicable to shareholders, but subject to the modifications provided in sections 995, 996, and 997.

(3) Under §1.996–3, three divisions of earnings and profits of a DISC, or former DISC, are defined: ‘‘accumulated DISC income’’, ‘‘previously taxed income’’, and ‘‘other earnings and profits’’. Under §1.995–2, certain amounts of the DISC’s earnings and profits are deemed to be distributed as dividends to shareholders of the DISC at the close of the DISC’s taxable year in which such earnings were derived. Such deemed distributions do not cause a reduction in the DISC’s earnings and profits, but are taken into account in §1.996–3(c) as an increase in previously taxed income. To the extent the DISC’s earnings and profits are paid out in a subsequent distribution which is, under §1.996–1, treated as made out of such ‘‘previously taxed income,’’ they will not be taxable to the shareholders a second time.

(4) In general, ‘‘accumulated DISC income’’ is the earnings and profits of the DISC which have not been deemed distributed and which may be deferred from taxation so long as they are not actually distributed with respect to its stock. However, deferral of taxation on ‘‘accumulated DISC income’’ may be terminated, in whole or in part, in the event of: (i) Certain foreign investment attributable to producer’s loans (see §1.995–2(a)(5) and §1.995–5); (ii) revocation of the election to be treated as a DISC or other disqualification (see §1.995–3); and (iii) certain dispositions of DISC stock in which gain is realized (see §1.995–4).

(5) Since a DISC is not taxed on its taxable income, section 246(d) and §1.246–4 provide that the deduction otherwise allowed under section 243 shall not be allowed with respect to a dividend from a DISC, or former DISC, paid or treated as paid out of accumulated DISC income or previously taxed income or with respect to a deemed distribution in a qualified year under §1.995–2(a).

(b) *Amounts and character of amounts includible in shareholder’s gross income.* Each shareholder of a corporation which is a DISC, or former DISC, shall include in his gross income—

(1) Amounts actually distributed to him that are includible in his gross income in accordance with paragraph (c) of this section.

(2) Amounts which, pursuant to §1.995–2, he is deemed to receive as a distribution taxable as a dividend on the last day of each of the corporation’s taxable years for which it qualifies as a DISC,

(3) Amounts which, pursuant to §1.995–3, he is deemed to receive as a distribution taxable as a dividend in the event the corporation revokes its election to be treated as a DISC or otherwise is disqualified as a DISC, and

(4) Gain realized on certain dispositions of stock in the corporation which, under §1.995–4, is includible in his gross income as a dividend.

(c) *Treatment of actual distributions.* (1) Except as provided in subparagraph (3) of this paragraph, amounts actually distributed to a shareholder of a DISC, or former DISC, with respect to his stock are includible in his gross income in accordance with section 301.

(2) Since a deemed distribution does not reduce the earnings and profits of a DISC, it does not affect the determination as to whether a subsequent actual distribution is a ‘‘dividend’’ under section 316(a). Since, however, the amount of a deemed distribution increases ‘‘previously taxed income’’, it does affect the determination as to whether a subsequent actual distribution is excluded (as described in subparagraph (3) of this paragraph) from gross income.

(3) Under §1.996–1(c), the amount of any actual distribution (including a deficiency distribution made pursuant to §1.992–3), with respect to stock in a DISC, or former DISC, which is treated under §1.996–1 as made out of previously taxed income, is excluded by the distributee from gross income, but only to the extent that such amount does not exceed the adjusted basis of the distributee’s stock. Under §1.996–5(b), that portion of any actual distribution which is treated as made out of previously taxed income shall be applied against and reduce the adjusted basis of the stock and, to the extent that it exceeds the adjusted basis of the stock, it shall be treated as gain from the sale or exchange of property.

(4) A deficiency distribution pursuant to § 1.992–3 may be made after the close of the DISC's taxable year with respect to which it is made. The determinations as to whether such deficiency distribution is a dividend under section 301 and as to which division of earnings and profits is the source thereof depend upon the status of the DISC's earnings and profits account and divisions thereof at the time the distribution is actually made. See § 1.996–1(d) for the priority of such deficiency distribution over other actual distributions made during the same taxable year.

(d) *Personal holding company income.* (1) Any amount includible in a shareholder's gross income as a dividend with respect to the stock of a DISC, or former DISC, pursuant to paragraph (b) of this section shall be treated as a dividend for all purposes of the Code, except that for purposes of determining whether such shareholder is a personal holding company within the meaning of section 542 any amount deemed distributed for qualified years under § 1.995–2 or upon disqualification under § 1.995–3, any amount of gain on certain dispositions of DISC stock to which § 1.995–4 applies, and any amount treated under § 1.996–1 as distributed out of accumulated DISC income or previously taxed income shall not be treated as a dividend or any other kind of income described in section 543(a).

(2) Notwithstanding subparagraph (1) of this paragraph, the shareholder may treat as an item of income described under section 543 (for example, rents) any amount to which the exception in such subparagraph (1) applies, if it establishes to the satisfaction of the district director that such amount is attributable to earnings and profits derived from such item of income.

[T.D. 7324, 39 FR 35109, Sept. 30, 1974]

§ 1.995–2 Deemed distributions in qualified years.

(a) *General rule.* Under section 995 (b)(1), each shareholder of a DISC shall be treated as having received a distribution taxable as a dividend with respect to his stock on the last day of each taxable year of the DISC, in an amount which is equal to his pro rata share of the sum (as limited by paragraph (b) of this section), of the following seven items:

(1) An amount equal to the gross interest derived by the DISC during such year from producer's loans (as defined in § 1.993–4).

(2) An amount equal to the lower of—

(i) Any gain recognized by the DISC during such year on the sale or exchange of property (other than property which in the hands of the DISC is a qualified export asset) which was previously transferred to it in a transaction in which the transferor realized gain which was not recognized in whole or in part, or

(ii) The amount of the transferor's gain which was not recognized on the previous transfer of the property to the DISC.

For purposes of this subparagraph, each item of property shall be considered separately. See paragraph (d) of this section for special rules with respect to certain tax-free acquisitions of property by the DISC.

(3) An amount equal to the lower of—

(i) Any gain recognized by the DISC during such year on the sale or exchange of property which in the hands of the DISC is a qualified export asset (other than stock in trade or property described in section 1221(1)) and which was previously transferred to the DISC in a transaction in which the transferor realized gain which was not recognized in whole or in part, or

(ii) The amount of the transferor's gain which was not recognized on the previous transfer of the property to the DISC and which would have been includible in the transferor's gross income as ordinary income if its entire realized gain had been recognized upon the transfer.

For purposes of this subparagraph, each item of property shall be considered separately. See paragraph (d) of this section for special rules with respect to certain tax-free acquisitions of property by the DISC.

(4) For taxable years beginning after December 31, 1975, an amount equal to 50 percent of the taxable income of the DISC for the taxable years attributable to military property (as defined in § 1.995–6).

(5) For taxable years beginning after December 31, 1975, the taxable income

for the taxable year attributable to base period export gross receipts (as defined in §1.995–7).

(6) The sum of—

(i)(A) In the case of a corporate share holder, an amount equal to 57.5 percent of the excess (if any) (one-half for DISCs' taxable years beginning before January 1, 1983) of the taxable income of the DISC for such year (computed as provided in §1.991–1(b)(1)) over the sum of the amounts deemed distributed for the taxable year in accordance with subparagraphs (1), (2), (3), (4) and (5) of this paragraph, or

(B) In the case of a non-corporate share holder, an amount equal to one-half of the excess (if any) of the taxable income of the DISC for such year (computed as provided in §1.991–1(b)(1)) over the sum of the amounts deemed distributed for the taxable year in accordance with subparagraphs (1), (2), (3), (4), and (5) of this paragraph.

(ii)(A) An amount equal to the amount under subdivision (i) of paragraph (a)(6) of this section multiplied by the international boycott factor as determined under section 999 (c)(1) , or

(B) In lieu of the amount determined under subdivision (ii)(A) of paragraph (a)(6) of this section, the amount described under section 999 (c)(2) of such international boycott income, and

(iii) An amount equal to the sum of any illegal bribes, kickbacks, or other payments paid by or on behalf of the DISC directly or indirectly to an official, employee, or agent in fact of a government. An amount is paid by a DISC where it is paid by any officer, director, employee, shareholder, or agent of the DISC for the benefit of such DISC. For purposes of this section, the principles of section 162 (c) and the regulations thereunder shall apply. The fair market value of an illegal payment made in the form of property or services shall be considered the amount of such illegal payment.

(7) The amount of foreign investment attributable to producer's loans of the DISC, as of the close of the ''group taxable year'' ending with such taxable year of the DISC, determined in accordance with §1.995–5. The amount of such foreign investment attributable to producer's loans so determined for any taxable year of a former DISC shall be deemed distributed as a dividend to the shareholders of such former DISC on the last day of such taxable year. See §1.995–3(e) for the effect that such deemed distribution has on scheduled installments of deemed distributions of accumulated DISC income under §1.995–3(a) upon disqualification.

(b) *Limitation on amount of deemed distributions under section 995(b)(1).* (1) The sum of the amounts described in paragraph (a)(1) through (a)(6) of this section which is deemed distributed pro rata to the DISC's shareholders a dividend for any taxable year of the corporation shall not exceed the DISC's earnings and profits for such year.

(2) The amount of foreign investment attributable to producer's loans of the DISC (as described in paragraph (a)(7) of this section) which is deemed to be distributed pro rata to the DISC's shareholders as dividends for any taxable year of the corporation shall not exceed the lower of the corporation's accumulated DISC income at the beginning of such year or the corporation's accumulated earnings and profits at the beginning of such year (but not less than zero)—

(i) Increased by any DISC income of the corporation for such year as defined in §1.996–3(b)(2) (*i.e.*, any excess of the DISC's earnings and profits for such year over the sum of the amounts described in paragraph (a)(1) through (a)(6) of this section), or

(ii) Decreased by any deficit in the corporation's earnings and profits for such year.

Thus, for example, if a DISC has a deficit in accumulated earnings and profits at the beginning of a taxable year of $10,000, current earnings and profits of $12,000, no amounts described in paragraphs (a)(1) through (a)(6) of this section for the year, and foreign investment attributable to producer's loans for the taxable year of $5,000, the DISC would have a deemed distribution described in paragraph (a)(7) of this section of $5,000 for the taxable year. On the other hand, suppose the DISC had accumulated earnings and profits of $13,000 at the beginning of the taxable year, accumulated DISC income of $10,000 at the beginning of the taxable year, a deficit in earnings and profits for the taxable year of $12,000, no amounts described in paragraphs (a)(1) through (a)(6) of this section for the taxable year, and foreign investment attributable to producer's loans for the taxable year of $5,000. Under these facts the DISC would have no deemed distribution described in paragraph (a)(7) of this section because the corporation had no DISC income for the taxable year and the current year's deficit in earnings and profits subtracted from the DISC's accumulated DISC income at the beginning of the year produces a negative amount. For rules relating to the carryover to a subsequent year of the $5,000 of foreign investment attributable to producer's loans, see § 1.995–5(a)(6).

(3) If, by reason of the limitation in subparagraph (1) of this paragraph, less than the sum of the amounts described in paragraphs (a)(1) through (a)(6) of this section is deemed distributed, then the portion of such sum which is deemed distributed shall be attributed first to the amount described in subparagraph (1) of such paragraph, to the extent thereof; second to the amount described in subparagraph (2) of such paragraph, to the extent thereof; third to the amount described in subparagraph (3) of such paragraph, to the extent thereof; and so forth, and finally to the amount described in paragraph (b)(6) of this paragraph.

(c) *Examples.* Paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example 1. Y is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. X is its sole shareholder. In 1972, X transfers certain property to Y in exchange for Y's stock in a transaction in which X does not recognize gain or loss by reason of the application of section 351(a). Included in the property transferred to Y is depreciable property described in paragraph (a)(3) of this section on which X realizes, but does not recognize by reason of the application of section 1245(b)(3), a gain of $20,000. If X had sold such property for cash, the $20,000 gain would have been recognized as ordinary income under section 1245. Also included in the transfer to Y is 100 shares of stock in a third corporation (which is not a related foreign export corporation) on which X realizes, but does not recognize, a gain of $5,000. In 1973, Y sells such property and recognizes a gain of $25,000 on the depreciable property and $8,000 on the 100 shares of stock. Y has accumulated earnings and profits at the beginning of 1973 of $5,000, earnings and profits for 1973 of $72,000, and taxable income for 1973 of $100,000. At the beginning of 1973, Y has $6,000 of accumulated DISC income, no previously taxed income, and a deficit of $1,000 of other earnings and profits. Under these facts and the additional facts assumed in the table below, X is treated as having received a deemed distribution taxable as a dividend of $76,000 on December 31, 1973, determined as follows:

(1) Gross interest derived by Y in 1973 from producer's loans	$7,000
(2) Amount of gain on depreciable property (lower of Y's recognized gain ($25,000) or X's gain not recognized on section 1245 property ($20,000))	20,000
(3) Amount of gain on stock (lower of X's gain not recognized or Y's recognized gain ($8,000) ($5,000))	5,000
(4) One-half excess of taxable income for 1973 over the sum of lines (1), (2), and (3) (1/2 of ($100,000 minus $32,000))	34,000
(5) Limitation on lines (1) through (4):	
(a) Sum of lines (1) through (4)	66,000
(b) Earnings and profits for 1973	72,000
(c) Lower of lines (a) and (b)	66,000
(6) Amount under paragraph (a)(5) of this section:	
(a) Foreign investment attributable to producer's loans under § 1.995–5	10,000
(b) Sum of the lower of accumulated earnings and profits at beginning of 1973 ($5,000) or accumulated DISC income at beginning of 1973 ($6,000) and excess of earnings and profits for 1973 over line (5)(c) ($72,000 minus $66,000)	11,000
(c) Lower of lines (a) and (b)	10,000
(7) Total deemed distribution (sum of lines (5)(c) and (6)(c))	76,000

Example 2. Assume the facts are the same as in example 1, except that earnings and profits for 1973 amount to only $60,000. Under these facts, X is treated as receiving a deemed distribution taxable as a dividend of $65,000 on December 31, 1973, determined as follows:

(5) Limitation on lines (1) through (4):	
(a) Line (5)(a) of example 1	$66,000
(b) Earnings and profits for 1973	60,000
(c) Lower of lines (a) and (b)	60,000
(6) Amount under paragraph (a)(5) of this section:	
(a) Line (6)(a) of example 1	10,000
(b) Sum of the lower of accumulated earnings and profits at beginning of 1973 ($5,000) or accumulated DISC income at beginning of 1973 ($6,000) plus excess of earnings and profits for 1973 over line (5)(c) ($60,000 minus $60,000)	5,000
(c) Lower of lines (a) and (b)	5,000

(7) Total deemed distribution (sum of lines (5)(c) and (6)(c))	65,000

Example 3. Assume the facts are the same as in example 1, except that Y has a deficit in accumulated earnings and profits at the beginning of 1973 of $4,000. Such deficit is comprised of accumulated DISC income of $1,000, no previously taxed income, and a deficit in other earnings and profits of $5,000. Under these facts, X is treated as receiving a deemed distribution taxable as a dividend in the amount of $72,000 on December 31, 1973, determined as follows:

(5) Limitation on lines (1) through (4):	
(a) Line (5)(a) of example 1	$66,000
(b) Earnings and profits for 1973	72,000
(c) Lower of lines (a) and (b)	66,000
(6) Amount under paragraph (a)(5) of this section:	
(a) Line (6)(a) of example 1	10,000
(b) Sum of accumulated earnings and profits at beginning of 1973 (not less than $0), and excess of earnings and profits for 1973 over amount in line (5)(c) ($72,000 minus $66,000)	6,000
(c) Lower of lines (a) and (b)	6,000
(7) Total deemed distribution sum of lines (5)(c) and (6)(c)	72,000

(d) *Special rules for certain tax-free acquisitions of property by the DISC.* (1) For purposes of paragraph (a)(2)(i) and (3)(i) of this section, if—

(i) A DISC acquires property in a first transaction and in a second transaction it disposes of such property in exchange for other property, and

(ii) By reason of the application of section 1031 (relating to like-kind exchanges) or section 1033 (relating to involuntary conversions), the basis in the DISC's hands of the other property acquired in such second transaction is determined in whole or in part with reference to the basis of the property acquired in the first transaction,

then upon a disposition of such other property in a third transaction by the DISC such other property shall be treated as though it had been transferred to the DISC in the first transaction. Thus, if the first transaction is a purchase of the property for cash, then paragraphs (a)(2) and (3) of this section will not apply to a sale by the DISC of the other property acquired in the second transaction.

(2) For purposes of paragraphs (a)(2)(i) and (3)(i) of this section, if a DISC acquires property in a first transaction and it transfers such property to a transferee DISC in a second transaction in which the transferor DISC's gain is not recognized in whole or in part, then such property shall be treated as though it had been transferred to the transferee DISC in the same manner in which it was acquired in the first transaction by the transferor DISC. For example, if X and Y both qualify as DISC's and X transfers property to Y in a second transaction in which gain or loss is not recognized, paragraph (a)(2) or (3) of this section does not apply to a sale of such property by Y in a third transaction if X had acquired the property in a first transaction by a purchase for cash. If, however, X acquired the property from a transferor other than a DISC in the first transaction in which the transferor's realized gain was not recognized, then paragraph (a)(2) or (3) of this section may apply to the sale by Y if the other conditions of such paragraph (a)(2) or (3) are met.

(3) If a DISC acquires property in a second transaction described in subparagraph (1) or (2) of this paragraph in which it (or, in the case of a second transaction described in subparagraph (2) of this paragraph, the transferor DISC) recognizes a portion (but not all) of the realized gain, then the amount described in paragraph (a)(2)(ii) or (a)(3)(ii) of this section with respect to a disposition by the DISC of such acquired property in a third transaction shall not exceed the transferor's gain which was not recognized on the first transaction minus the amount of gain recognized by the DISC (or transferor DISC) on the second transaction.

(4) The provisions of this paragraph may be illustrated by the following examples:

Example 1. X and Y are corporations each of which qualifies as a DISC and uses the calendar year as its taxable year. In 1972, X acquires section 1245 property in a first transaction in which the transferor's entire realized gain of $17 is not recognized. In 1973, X transfers such property to Y in a second transaction in which X realizes a gain of $20 of which only $4 is recognized. (On December 31, 1973, X's shareholders are treated as having received a deemed distribution of a dividend which includes such $4 under paragraph (a)(3) of this section, provided the limitation in paragraph (b) of this section is met.) In a third transaction in 1974, Y sells such property and recognizes a gain of $25. With respect to Y's shareholders on December 31, 1974, the amount described in paragraph (a)(3)(ii) of this section would be limited to $13, which is the amount of the transferor's gain which was not recognized on the first transaction ($17) minus the amount of gain recognized by X on the second transaction ($4).

Example 2. Z is a DISC using the calendar year as its taxable year. In a first transaction in 1972, in exchange for its stock, Z acquires section 1245 property from A, an individual who is its sole shareholder, in a transaction in which A's realized gain of $30 is not recognized by reason of the application of section 351(a). In a second transaction in 1973, Z exchanges such property for other property in a like-kind exchange to which section 1031(b) applies and recognizes $10 of a realized gain of $35. (On December 31, 1973, A is treated as having received a deemed distribution of a dividend which includes such $10 under paragraph (a)(3) of this section, provided the limitation in paragraph (b) of this section is met.) In a third transaction in 1974, Z sells the property acquired in the like-kind exchange and recognizes a gain of $25. With respect to A on December 31, 1974, the amount described in paragraph (a)(3)(ii) of this section is limited to $20, which is the amount of A's gain which was not recognized on the first transaction ($30) minus the amount of gain recognized by Z on the second transaction ($10).

(e) *Carry back of net operating loss and capital loss to prior DISC taxable year.* For purposes of sections 991, 995, and 996, the amount of the deduction for the taxable year under section 172 for a net operating loss carryback or carryover or under section 1212 for a capital loss carryback or carryover shall be determined in the same manner as if the DISC were a domestic corporation which had not elected to be treated as a DISC. Thus, the amount of the deduction will be the same whether or not the corporation was a DISC in the year of the loss or in the year to which the loss is carried. For provisions setting forth adjustments to the DISC's, or former DISC's, deemed distributions, adjustments to its divisions of earnings and profits, and other tax consequences arising from such carrybacks, see § 1.996–8.

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7324, 39 FR 35110, Sept. 30, 1974, as amended by T.D. 7862, 47 FR 56492, Dec. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§ 1.995–3 Distributions upon disqualification.

(a) *General rule.* Under section 995 (b)(2), a shareholder of a corporation which is disqualified from being a DISC, either because pursuant to § 1.992–2(e)(2) it revoked its election to be treated as a DISC or because it has failed to satisfy the requirements as set forth in § 1.992–1 to be a DISC for a taxable year, shall be deemed to have received (at the times specified in paragraph (b) of this section) distributions taxable as dividends aggregating an amount equal to his pro rata share of the accumulated DISC income (as defined in § 1.996–3(b)) of such corporation which was accumulated during the immediately preceding consecutive taxable years for which the corporation was a DISC. The pro rata share referred to in the preceding sentence shall be determined as of the close of the last of such consecutive taxable years for which the corporation was a DISC. See § 1.996–7(c) for rules relating to the carryover of, and maintaining a separate account for, such accumulated DISC income in certain reorganizations.

(b) *Time of receipt of deemed distributions.* Distributions described in paragraph (a) of this section shall be deemed to be received in equal installments on the last day of each of the 10 taxable years of the corporation following the year of the disqualification described in paragraph (a) of this section, except that in no case may the number of equal installments exceed the number of the immediately preceding consecutive taxable years for which the corporation was a DISC.

(c) *Transfer of shares.* Deemed distributions are includible under paragraphs (a) and (b) of this section in a shareholder's gross income as a dividend only so long as he continues to hold the shares with respect to which the distribution is deemed made. Thus, the transferee of such shareholder will include in his gross income under paragraphs (a) and (b) of this section the remaining installments of the deemed distribution which the transferor would have included in his gross income as a dividend had he not transferred the shares. However, if the transferee acquires the shares in a transaction in which the transferor's gain is treated under §1.995–4 in whole or in part as a dividend, then under §1.996–4(a) such transferee does not include subsequent installments in his gross income to the extent that the transferee treats such subsequent installments as made out of previously taxed income.

(d) *Effect of requalification.* Deemed distributions under paragraphs (a) and (b) of this section continue and are includible in gross income as dividends by the shareholders whether or not the corporation subsequently requalifies and is treated as a DISC.

(e) *Effect of actual distributions and deemed distributions under section 995(b)(1)(G).* If, during the period a shareholder of a DISC, or former DISC, is taking into account deemed distributions under paragraphs (a) and (b) of this section, an actual distribution is made to him out of accumulated DISC income or a deemed distribution because of foreign investment attributable to producer's loans is made under §1.995–2(a)(5) out of accumulated DISC income, such actual or deemed distribution shall first reduce the last installment of the deemed distributions scheduled to be included in the shareholder's gross income as a dividend, and then the preceding scheduled installments in reverse order. If deemed distributions are scheduled to be included in gross income for two or more disqualifications, an actual distribution or a deemed distribution under §1.995–2 (a)(5) which is treated as made out of accumulated DISC income reduces the deemed distributions resulting from the earlier disqualification first.

(f) *Examples.* This section may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. X qualifies as a DISC for taxable years 1972 through 1975, but, pursuant to §1.992–2(e)(2), revokes its election as of January 1, 1976, and is disqualified as a DISC. On that date, X has $24,000 of accumulated DISC income. X's shareholders will be deemed to receive $6,000 in distributions taxable as a dividend on the last day of each of X's four succeeding taxable years (1977, 1978, 1979, and 1980).

Example 2. Assume the same facts as in example 1, except that in 1978 X makes an actual distribution of $22,000 to its shareholders of which $10,000 is treated under §1.996–1 as made out of accumulated DISC income. (The remaining $12,000 of such distribution is treated as made out of previously taxed income.) The actual distribution would first reduce the $6,000 deemed distribution scheduled for 1980 to zero and then reduce the $6,000 deemed distribution scheduled for 1979 to $2,000. Thus, X's shareholders include in 1978 $16,000 is gross income as dividends ($10,000 of actual distributions and the $6,000 deemed distribution scheduled for that year) and $2,000 as a dividend in 1979.

Example 3. Assume the same facts as in example 2, except that X requalifies as a DISC for taxable year 1977 during which it derives $7,000 of DISC income (computed after taking into account a deemed distribution under §1.995–2(a)(4) of $7,000), but is again disqualified in 1978. In addition X makes an actual distribution in 1977 equal to the deemed distribution of $7,000. Such actual distribution is excluded from gross income under §1.996–1(c). In 1977. X's shareholders include in gross income as dividends the $6,000 deemed distribution upon disqualification (in addition to the deemed distributions of $7,000 under §1.995–2 for 1977 when it was treated as a DISC). The actual distribution in 1978 still reduces the installments resulting from the earlier disqualification. Thus, in 1978, X's shareholders include $16,000 in gross income as dividends. In 1979, X's shareholders include $9,000 in gross income as dividends (the final installment of $2,000 from the earlier disqualification plus the single deemed distribution of $7,000 resulting from the later disqualification).

[T.D. 7324, 39 FR 35112, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51741, Nov. 17, 1982]

§1.995–4 Gain on disposition of stock in a DISC.

(a) *Disposition in which gain is recognized*—(1) *In general.* If a shareholder disposes, or is treated as disposing, of stock in a DISC, or former DISC, then any gain recognized on such disposition shall be included in the shareholder's gross income as a dividend, notwithstanding any other provision of the Code, to the extent of the accumulated DISC income amount (described in paragraph (d) of this section). To the extent the recognized gain exceeds the accumulated DISC income amount, it is taxable as gain from the sale or exchange of the stock.

(2) *Nonapplication of subparagraph (1).* The provisions of subparagraph (1) of this paragraph do not apply (i) to the extent gain is not recognized (such as, for example, in the case of a gift or an exchange of stock to which section 354 applies) and (ii) to the amount of any recognized gain which is taxable as a dividend (such as, for example, under section 301 or 356(a)(2)) or as gain from the sale or exchange of property which is not a capital asset. The amount taxable as a dividend under section 301 or 356(a)(2) is subject to the rules provided in § 1.995–1(c) for the treatment of actual distributions by a DISC.

(b) *Disposition in which separate corporate existence of DISC is terminated*—(1) *General.* If stock in a corporation that is a DISC, or former DISC, is disposed of in a transaction in which its separate corporate existence as a DISC, or former DISC, is terminated, then, notwithstanding any other provision of the Code, an amount of realized gain shall be recognized and included in the transferor's gross income as a dividend. The realized gain shall be recognized to the extent that such gain—

(i) Would not have been recognized but for the provisions of this paragraph, and

(ii) Does not exceed the accumulated DISC income amount (described in paragraph (d) of this section).

(2) *Cessation of separate corporate existence as a DISC, or former DISC.* For purposes of subparagraph (1) of this paragraph, separate corporate existence as a DISC, or former DISC, will be treated as having ceased if, as a result of the transaction, there is no separate entity which is a DISC and to which is carried over the accumulated DISC income and other tax attributes of the DISC, or former DISC, the stock of which is disposed of. Thus, for example, if stock in a DISC, or former DISC, is exchanged in a transaction described in section 381(a) (relating to carryovers in certain corporate acquisitions), the gain realized on the transfer of such stock will not be recognized under subparagraph (1) of this paragraph if the assets of such DISC, or former DISC, are acquired by a corporation which immediately after the acquisition qualifies as a DISC. For a further example, if a DISC, or former DISC, is liquidated in a transaction to which section 332 (relating to complete liquidations of subsidiaries) applies, the transaction will be subject to subparagraph (1) of this paragraph if the basis to the transferee corporation of the assets acquired on the liquidation is determined under section 334(b)(2) (as in effect prior to amendment by the Tax Equity and Fiscal Responsibility Act of 1982) or if immediately after such liquidation the transferee of such assets does not qualify as a DISC. However, separate corporate existence as a DISC, or former DISC, will not be treated as having ceased in the case of a mere change in place of organization, however effected. See § 1.996–7 for rules for the carryover of the divisions of a DISC's earnings and profits to one or more DISC's.

(c) *Disposition to which section 311, 336, or 337 applies*—(1) *In general.* If, after December 31, 1976, a shareholder distributes, sells, or exchanges stock in a DISC, or former DISC, in a transaction to which section 311, 336, or 337 applies, then an amount equal to the excess of the fair market value of such stock over its adjusted basis in the hands of the shareholder shall, notwithstanding any other provision of the Code, be included in gross income of the shareholder as a dividend to the extent of the accumulated DISC income amount (described in paragraph (d) of this section).

(2) *Nonapplication of subparagraph (1).* Subparagraph (1) shall not apply if the person receiving the stock in the disposition has a holding period for the stock which includes the period for which the stock was held by the shareholder disposing of such stock.

(d) *Accumulated DISC income amount*—(1) *General.* For purposes of this section, the accumulated DISC income amount is the accumulated DISC income of the DISC or former DISC which is attributable to the stock disposed of and which was accumulated in taxable years of such DISC or former DISC during the period or periods such stock was held by the shareholder who disposed of such stock.

(2) *Period during which a shareholder has held stock.* For purposes of this section, the period during which a shareholder has held stock includes the period he is considered to have held it by reason of the application of section 1223 and, if his basis is determined in whole or in part under the provisions of section 1014(d) (relating to special rule for DISC stock acquired from decedent), the holding period of the decedent. Such holding period is to exclude the day of acquisition but include the day of disposition. Thus, for example, if A purchases stock in a DISC on December 31, 1972, and makes a gift of such stock to B on June 30, 1973, then on December 31, 1974, B will be treated as having held the stock for 2 full years. If the basis of the stock in C's hands is determined under section 1014(d) upon a transfer from B's estate on December 31, 1976, by reason of B's death on June 30, 1974, then on December 31, 1976, C will be treated as having held the stock for 4 full years.

(e) *Accumulated DISC income allocable to shareholder under section 995(c)(2)*—(1) *In general.* Under this paragraph, rules are prescribed for purposes of paragraph (d) of this section as to the manner of determining, with respect to the stock of a DISC, or former DISC, disposed of, the amount of accumulated DISC income which is attributable to such stock and which was accumulated in taxable years of the corporation during the period or periods the stock disposed of was held or treated under paragraph (d)(2) of this section as held by the transferor. Subparagraphs (2), (3), and (4) of this paragraph set forth a method of computation which may be employed to determine such amount. Any other method may be employed so long as the result obtained would be the same as the result obtained under such method.

(2) *Step 1.* Determine the increase (or decrease) in accumulated DISC income for each taxable year of the DISC, or former DISC, by subtracting from the amount of accumulated DISC income (as defined in §1.996–3(b)) at the close of each taxable year the amount thereof as of the close of the immediately preceding taxable year.

(3) *Step 2.* (i) Determine for each taxable year of the DISC, or former DISC, the increase (or decrease) in accumulated DISC income per share by dividing such increase (or decrease) for the year by the number of shares outstanding or deemed outstanding on each day of such year.

(ii) If the number of shares of stock in the corporation outstanding on each day of a taxable year of the DISC, or former DISC, is not constant, then the number of such shares deemed outstanding on each day of such year shall be the sum of the fractional amounts in respect of each share which was outstanding on any day of the taxable year. The fractional amount in respect of a share shall be determined by dividing the number of days in the taxable year on which such share was outstanding (excluding the day the share became outstanding, but including the day the share ceased to be outstanding), by the total number of days in such taxable year.

(iii) If for any taxable year of a DISC, or former DISC, the share disposed of was not held (or treated under paragraph (d)(2) of this section as held) by the disposing shareholder for the entire year, then the amount of increase (or decrease) in accumulated DISC income attributable to such share for such year is the amount determined as if he held the share until the end of such year multiplied by a fraction the numerator of which is the number of days in the taxable year on which the shareholder held (or under paragraph (d)(2) of this section is treated as having held) such share and the denominator of which is the total number of days in the taxable year.

(4) *Step 3.* Add the amounts computed in step 2 for each taxable year of the DISC, or former DISC, in which the shareholder held such share of stock.

(5) *Examples.* This paragraph may be illustrated by the following examples:

Example 1. X Corporation uses the calendar year as its taxable year and elects to be a DISC for the first time for 1973. On January 1, 1973, X has 20 shares issued and outstanding. A and B each own 10 shares. On July 1, 1976, X issues 10 shares to C. On December 31, 1977, A sells his 10 shares to D and recognizes a gain of $120. Under these facts and other facts assumed in the table below, A includes in his gross income for 1977 a dividend under paragraph (b) of this section of $61.30 and long-term capital gain of $58.70.

Year	(a)—Year end accumulated DISC income	(b)—Increase (decrease) in accumulated DISC income	(c)—Shares outstanding	(d)—Increase (decrease) per share (column (b) divided by column (c))
1973	$80	$80	20	$4.00
1974	50	(30)	20	(1.50)
1975	80	30	20	1.50
1976	100	20	[1]25	.80
1977	140	40	30	1.33
(1) Total increase in accumulated DISC income for each share disposed of (sum of amounts in column (d))				6.13
Multiply by number of shares disposed of				10
(2) Total amount of accumulated DISC income attributable to A's shares disposed of				61.30
(3) A's gain				120.00
(4) Portion of A's gain taxable as a dividend (lower of lines (2) and (3))				61.30
(5) Portion of A's gain taxable as long-term capital gain (line (3) minus line (4))				58.70

[1] Under subparagraph (3)(ii) of this paragraph, the aggregate fractional amounts of the 10 shares issued on July 1, 1976, is 5 shares, i.e., 10 shares, multiplied by (183 days/366 days). Thus, the number of shares deemed outstanding for 1976 is 25 shares, i.e., 20 shares plus 5 shares.

Example 2. Assume the same facts as in example 1, except that A sells his 10 shares to D on July 1, 1977. Under subparagraph (3)(iii) of this paragraph, the amount of increase in accumulated DISC income for 1977 which is attributable to each share disposed of is limited to $.67, *i.e.*, $1.33 multiplied by 182 days/365 days. Therefore, the sum of the yearly increases (and decreases) in accumulated DISC income for each share is reduced by $.66 (*i.e.*, $1.33 minus $.67). The total increase in accumulated DISC income for each share disposed of is $5.47 (i.e., $6.13 minus $.66). Under these facts, A would include in his gross income for 1977 a dividend of $54.70 and long-term capital gain of $65.30 determined as follows:

(1) Total increase in accumulated DISC income for each share disposed of	$5.47
Multiplied by number of shares disposed of	10
(2) Total amount of accumulated DISC income attributable of to all shares disposed of	54.70
(3) A's gain	120.00
(4) Portion of A's gain taxable as a dividend (lower of lines (2) and (3))	54.70
(5) Portion of A's gain taxable as long-term capital gain (line (3) minus line (4))	65.30

[T.D. 7324, 39 FR 35112, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51741, Nov. 17, 1982]

§ 1.995–5 Foreign investment attributable to producer's loans.

(a) *In general*—(1) *Limitation.* Under section 995(d), the amount as of the close of a ‘‘group taxable year’’ (as defined in subparagraph (3) of this paragraph) of foreign investment attributable to producer's loans of a DISC for purposes of section 995(b)(1)(G) shall be the excess (as of the close of such year) of—

(i) The smallest of—

(a) The amount of the net increase in foreign assets (as defined in paragraph (b) of this section) by domestic and foreign members of the controlled group which includes the DISC,

(b) The amount of the actual foreign investment by the domestic members of such group (as determined under paragraph (c) of this section), or

(c) The amount of outstanding producer's loans (as determined under § 1.993–4) by such DISC to members of such controlled group, over

(ii) The amount (determined under § 1.995–2 (a)(5) and (b)(2)) of foreign investment attributable to producer's loans treated under section 995(b)(1)(G) as deemed distributions by the particular DISC taxable as dividends for prior taxable years of that particular DISC.

Thus, for example, if the shareholders of a DISC which uses the calendar year as its taxable year (and which is a member of a controlled group in which all of the members use the calendar year as their taxable year) are treated under section 995(b)(1)(G) as receiving foreign investment attributable to producer's loans of a DISC of $0 in 1972, $10 in 1973, and $30 in 1974, or a total of $40, and if the smallest of the amounts described in subdivision (i) of this subparagraph at the end of 1975 is $90, then the amount of the foreign investment attributable to producer's loans of a DISC at the end of 1975 is $50, *i.e.*, the excess (as of the close of 1975) of the smallest of the amounts described in subdivision (i) of this subparagraph ($90) over the sum of the amounts of foreign investment attributable to producer's loans treated under section 995(b)(1)(G) as deemed distributions by the DISC taxable as dividends for prior taxable years of the DISC ($40). If the separate corporate existence of the DISC as to which the amount described in subdivision (ii) of this subparagraph relates ceases to exist within the meaning of § 1.995–4(c)(2), then such amount shall no longer be taken into account by the group for any purpose. For inclusion of amounts because of certain corporate acquisitions, see paragraph (d) of this section.

(2) *Controlled group; domestic and foreign member.* For purposes of this section—

(i) The term ''controlled group'' has the meaning assigned to such term by § 1.993–1(k).

(ii) The term *domestic member* means a domestic corporation which is a member of a controlled group, and the term *foreign member* means a foreign corporation which is a member of a controlled group.

(3) *Group taxable year.* (i) The term *group taxable year* refers collectively to the taxable year of the DISC and to the taxable year of each corporation in the controlled group which includes the DISC ending with or within the taxable year of the DISC. Thus, for example, if a corporation has a subsidiary which uses the calendar year as its taxable year and which elects to be treated as a DISC, and if the parent has a taxable year ending on October 31, the ''group taxable year'' for 1973 would refer to calendar year 1973 for the DISC and to the parent's taxable year ending October 31, 1973.

(ii) In cases in which the DISC makes a return for a short taxable year, that is, for a taxable year consisting of a period of less than 12 months, pursuant to section 443 and the regulations thereunder, or § 1.991–1(b)(3), the following rules shall apply—

(a) In the case of a change in the annual accounting period of the DISC resulting in a short taxable year, the *group taxable year* refers collectively to the short taxable year and to the taxable year of each corporation in the controlled group which includes the DISC ending with or within the short taxable year.

(b) In the case of a DISC which is in existence during only part of what would otherwise be its taxable year, the *group taxable year* refers collectively to the short period during which the DISC was in existence and to the taxable year of each corporation in the controlled group which includes the DISC ending with or within the 12-month period ending on the last day of the short period.

(iii) With respect to periods prior to the first taxable year for which a member of the group qualified (or is treated) as a DISC, each group taxable year shall be determined under subdivision (i) of this subparagraph as if such member was in existence, it qualified as a DISC, and its taxable year ended on that date corresponding to the date such member's first taxable year ended after it qualified (or is treated) as a DISC whether or not the corporation which qualifies (or is treated) as a DISC used the same taxable year before it so qualified (or is so treated). Thus, for example, if a corporation which is organized on March 3, 1975, uses the calendar year as its taxable year, and is a member of a controlled group which does not include a DISC, first qualifies (or is treated) as a DISC for calendar year 1975, then the term ''group taxable year'' with respect to years prior to 1975 refers collectively to such prior calendar years and to the taxable year of each corporation in the group ending with or within such prior calendar years.

(iv) For special rules in the case of a group which includes more than one DISC, see paragraph (g) of this section.

(4) *Amounts determined for prior years.* Unless the 3-year limitation is properly elected under subparagraph (5) of this paragraph, the amounts described in paragraphs (b) (relating to net increase in foreign assets) and (c) (relating to actual foreign investments by domestic members) of this section reflect, as of the close of a group taxable year, amounts for all taxable years of members of the group beginning after December 31, 1971 (and amounts arising after December 31, 1971, or such other date prescribed in paragraph (b)(7) of this section), provided that such amounts relate to such group taxable year and preceding group taxable years. Thus, for example, if all members of a controlled group use the calendar year as the taxable year, and 1980 is the first taxable year for which any member of the group qualifies (or is treated) as a DISC, then, unless the 3-year limitation is elected under subparagraph (5) of this paragraph, the amounts described in paragraphs (b) and (c) of this section will be taken into account beginning with the dates specified in the preceding sentence. For rules as to carryovers on certain corporate acquisitions and reorganizations, see paragraph (d) of this section.

(5) *Three-year elective limitation.* (i) A DISC may elect to take into account only amounts described in paragraphs (b) (relating to net increase in foreign assets) and (c) (relating to actual foreign investment by domestic members) of this section for the 3 taxable years of each member immediately preceding its taxable year included in that first group taxable year which includes a member's first taxable year during which it qualifies (or is treated) as a DISC. For purposes of the preceding sentence, determinations shall be made by reference to the taxable year of the issuer or transferor (as the case may be). If an election is made under this subdivision, the offset for uncommitted transitional funds under paragraph (b)(7) of this section is not allowed. If an election is made under this subdivision, the 3-year limitation applies to amounts described in paragraphs (b)(4) and (c)(1) and (2) of this section.

(ii) An election under subdivision (i) of this subparagraph shall not apply with respect to amounts which must be carried over under paragraph (d) of this section in the case of certain corporate acquisitions and reorganizations.

(iii) An election under subdivision (i) of this subparagraph shall be made by the DISC attaching to its first return, filed under section 6011(e)(2), a statement to the effect that the 3-year limitation is being elected under §1.995–5(a)(5)(i).

(6) *Cumulative basis.* Pursuant to section 995(d)(5), all determinations of amounts specified in this section are to be made on a cumulative basis from the 1st year (or date) provided for in this section. Thus, each such determination shall take into account a net increase or a net decrease during the year, as the case may be. However, if the 3-year limitation is elected under subparagraph (5) of this paragraph, then only amounts with respect to periods specified in such subparagraph (5) are amounts taken into account for years before a member of the group qualifies (or is treated) as a DISC. The computations described in this section may be made in any way chosen by the DISC (including a corporation being tested as to whether it qualifies as a DISC), provided such method results in the amount prescribed by this section.

(7) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. X Corporation, which uses the calendar year as its taxable year, is a member of a controlled group (within the meaning of subparagraph (2) of this paragraph). X elects to be treated as a DISC beginning with 1972. The amount of foreign investment attributable to X's producer's loans treated under section 995(b)(1)(G) as a distribution taxable as a dividend as of the close of each group taxable year with respect to each taxable year of X from 1972 through 1975 are set forth in the table below, computed on the basis of the facts assumed (the amounts on lines (1), (2), (3), and (5) being running balances):

Taxable year of X	1972	1973	1974	1975
(1) Net increase (or decrease) in foreign assets since January 1, 1972, at close of group taxable year	($30)	$10	$100	$150
(2) Actual foreign investment at close of group taxable year	20	60	80	140
(3) Outstanding producer's loans of X (the DISC) as of the close of group taxable year	0	40	90	120
(4) Smallest of lines (1), (2), or (3) (not less than zero)	0	10	80	120
(5) Less section 995(b)(1)(G) deemed distributions for prior taxable years (sum of lines (5) and (6) from prior year)	0	0	10	80
(6) Section 995(b)(1)(G) deemed distribution as of close of taxable year	0	10	70	40

(b) *Net increase in foreign assets*—(1) *In general.* (i) The term *net increase in foreign assets* when used in this section means the excess for the controlled group (as of the close of the group taxable year) of *(a)* the investment in foreign assets to be taken into account under subparagraph (2) of this paragraph over *(b)* the aggregate of the five offsets allowed by subparagraphs (3) through (7) of this paragraph.

(ii) No amount described in this paragraph (other than amounts described in subparagraphs (4) and (7) of this paragraph) with respect to a member of the group (or foreign branch of a member) shall be taken into account unless it is attributable to a taxable year of such member beginning after December 31, 1971. For a 3-year elective limitation with respect to the first taxable year for which a member qualifies (or is treated) as a DISC, see paragraph (a)(5) of this section. For manner of determining amounts on a cumulative basis, see paragraph (a)(6) of this section.

(2) *Investments made in foreign assets.* (i) For purposes of subparagraph (1) of this paragraph, there shall be taken into account as investment in foreign assets the aggregate of the amounts expended (within the meaning of subdivision (ii) of this subparagraph) during the period described in subparagraph (1)(ii) of this paragraph by all members of the controlled group which includes the DISC to acquire assets described in section 1231(b) (determined without regard to any holding period therein provided) which are located outside the United States (as defined in §1.993–7) reduced by the aggregate of the amounts received by all such members of the controlled group from the sale, exchange, or involuntary conversion of such assets described in section 1231(b) which are located outside the United States. For purposes of this section, amounts expended for assets which are qualified export assets (as defined in §1.993–2) of a DISC (or which would be qualified export assets if owned by a DISC) shall not be taken into account. Thus, for example, if a DISC acquires a qualified export asset located outside the United States, the asset is not to be taken into account for purposes of determining the net increase in foreign assets.

(ii) As used in subdivision (i) of this subparagraph, the term *amounts expended* (or amounts received) means the amount of any money or the fair market value (on the date of acquisition, sale, exchange, or involuntary conversion) of any property (other than money) used to acquire (or received for) the assets described in such subdivision (i).

(iii) For purposes of this subparagraph, an asset (other than an aircraft or vessel) is considered as located outside the United States if it was used predominantly outside the United States during the group taxable year. The determination as to whether such an asset is used predominantly outside the United States during the group taxable year in which it was acquired or sold, exchanged, or involuntarily converted shall be made by applying the rules of §1.993–3(d) except that an aircraft described in section 48(a)(2)(B)(i) or a vessel described in section 48(a)(2)(B)(iii) shall be considered located in the United States and all other aircraft or vessels shall be considered located outside the United States. Thus, for example, if a member of a controlled group which includes a

DISC acquires a vessel which is documented under the laws of a foreign country, the amount expended to acquire that vessel is an amount described in subdivision (i) of this subparagraph.

(iv) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, is a domestic member of a controlled group (within the meaning of paragraph (a)(2) of this section). During 1972, in a transaction to which section 1031 applies, X acquires a warehouse located outside the United States and having a fair market value of $100. As consideration, X transfers $20 in cash and a warehouse located within the United States and having a fair market value of $80. Under these facts, $100 will be taken into account as investment in foreign assets.

Example 2. The facts are the same as in example 1, except that the warehouse transferred by X as consideration is located outside the United States. Under these facts, only $20 will be taken into account as investment in foreign assets because the amount expended for such assets (*i.e.,* $100) is reduced by the fair market value of any property located outside the United States received in exchange for such assets (*i.e.,* $80).

(3) *Depreciation with respect to all foreign assets of a controlled group.* (i) An offset allowed by this subparagraph is the depreciation (determined under subdivision (ii) of this subparagraph) or depletion (determined under subdivision (iii) of this subparagraph) attributable to taxable years of the member beginning after December 31, 1971, with respect to all of the group's foreign assets described in subparagraph (2) of this paragraph including such assets acquired prior to the date provided in such subparagraph (2), and without regard to whether the 3-year election in paragraph (a)(5) of this section is made. Thus, for example, depreciation for a taxable year of a member beginning after December 31, 1971, with respect to an asset described in section 1231(b) which is located outside of the United States and which was acquired during a taxable year of the member beginning before January 1, 1972, is an offset allowed by this subparagraph. For a further example, depreciation with respect to a qualified export asset is not such an offset.

(ii) The depreciation taken into account under subdivision (i) of this subparagraph shall be—

(a) In the case of an asset owned by a domestic member, only the amount allowed under section 167(b)(1) (relating to the allowance of the straight-line method of depreciation) and § 1.162–11 (b) (relating to amortization in lieu of depreciation), but not the amount allowed under section 179 (relating to the additional first-year depreciation allowance).

(b) In the case of an asset owned by a foreign member, the depreciation and amortization (referred to in *(a)* of this subdivision) allowable for purposes of computing earnings and profits under subparagraph (5)(i) of this paragraph.

(iii) The depletion taken into account under subdivision (i) of this subparagraph shall be limited to cost depletion computed under sections 611 and 612 and the regulations thereunder. Thus, percentage depletion is not to be taken into account in computing the offset under this subparagraph.

(4) *Amount of outstanding stock or debt.* (i) An offset allowed by this subparagraph is the outstanding amount of stock (including treasury stock) or debt obligations of any member of the group issued, sold, or exchanged after December 31, 1971, by any member (whether or not the same member) to persons who (on the date of such issuance, sale, or exchange) were neither United States persons (within the meaning of section 7701(a)(30)) nor members of the group: *Provided,* That, in the case of a debt obligation, such obligation is not repaid within 12 months after such issuance, sale, or exchange. Thus, for example, if stock is issued to a member of the group before January 1, 1972, and after December 31, 1971, it is sold to a person who is neither a United States person nor a member of the group, an offset allowed by this subparagraph includes the outstanding amount of such stock. For purposes of this subparagraph, foreign branches of United States banks are not considered to be United States persons.

(ii) The outstanding amount of stock or debt obligations shall be determined in accordance with the following provisions:

(a) The outstanding amount of stock or debt obligations described in subdivision (i) of this subparagraph is equal to the net amount described in *(b)* of this subdivision reduced (but not below zero) by the amount described in *(c)* of this subdivision.

(b) The net amount described in this subdivision *(b)* is the excess of *(1)* the aggregate of the amount of money and the fair market value of property (other than money) transferred by persons who are not members of the group and who are not U.S. persons as consideration for such stock and debt obligations over *(2)* fees and commission expenses borne by the issuer or transferror with respect to their issuance, sale, or exchange.

(c) The amount described in this subdivision *(c)* is the aggregate amount of money and fair market value of property (other than money) distributed to such persons on distributions in respect of such stock from other than earnings and profits or on distributions in redemption of such stock and the amount of principal paid pursuant to such debt obligations.

(d) For purposes of this subdivision (ii), in the case of a redemption, the stock or debt redeemed shall be charged against the earliest of such stock or debt issued, sold, or exchanged in order to determine the amount by which the balance of outstanding stock or debt is to be reduced. For purposes of this subparagraph, the fair market value of property received as consideration shall be determined as of the date the transaction occurs, and a contribution to capital within the meaning of section 118 shall be treated as the issuance of stock.

(iii) The provisions of subdivision (i) of this subparagraph apply regardless of the treatment under the Code of the transaction in which the stock or debt was issued, sold, or exchanged. Thus, for example, if X Corporation, a member of a controlled group which includes a DISC, acquires from a nonresident alien individual in exchange solely for X's voting stock all of the stock of Y Corporation pursuant to a reorganization as defined in section 368(a)(1)(B), the fair market value of the Y stock on the date of the exchange would be an offset allowed by this subparagraph.

(iv) The provisions of this subparagraph may be illustrated by the following example:

Example. X Corporation is a member of a controlled group (within a meaning of paragraph (a)(2) of this section) every member of which uses the calendar year as its taxable year. On January 1, 1972, X issues in a public offering its stock to persons described in subdivision (i) of this subparagraph who, in the aggregate, pay $1,000 as consideration. X pays $100 in underwriting fees. On the same date, X receives $425 upon issuing a $500 debt obligation to such persons at a discount of $75 and pays $25 in underwriting fees. On December 31, 1972, the offset allowed under this subparagraph is $1,300, i.e., ($1,000 minus $100) plus ($425 minus $25). If, during 1973, X makes a distribution of $150 (not in redemption) from other than earnings and profits with respect to such stock, then the offset is reduced to $1,150.

(5) *Earnings and profits.* (i) An offset allowed by this subparagraph is one-half the aggregate of the earnings and profits accumulated for all taxable years beginning after December 31, 1971, computed (without regard to any distributions from earnings and profits by a foreign corporation to a domestic corporation in accordance with §1.964–1 (relating to a controlled foreign corporation's earnings and profits), of each foreign member of the group which is controlled directly or indirectly (as determined under the principles of section 958 and the regulations thereunder) by a domestic member of the group and each foreign branch of a domestic member of the group (computed as if the branch were a foreign corporation). The DISC is bound by any action on behalf of a foreign member that was taken pursuant to §1.964–1(c)(3) or by any failure to take action by or on behalf of a foreign member within the time specified in §1.964–1(c)(6). With respect to a foreign member for which action was not previously required under §1.964–1(c)(6) to be taken, the DISC may take action on behalf of such member by attaching a statement to that effect to the return of the DISC under section 6011(e)(2) for the first taxable year during which it qualifies (or is treated) as a DISC and there is outstanding a producer's loan made by such DISC to a member of the

controlled group which includes the DISC.

(ii) If the aggregate of the accumulated earnings and profits described in subdivision (i) of this subparagraph is a deficit, the amount allowable as an offset under this subparagraph is zero.

(6) *Royalties and fees.* An offset allowed by this subparagraph is one-half the royalties and fees paid by foreign members of the group to domestic members of the group and by foreign branches of domestic members of the group to domestic members of the group during the taxable years of such members beginning after December 31, 1971.

(7) *Uncommitted transitional funds.* (i) An offset allowed by this subparagraph for the uncommitted transitional funds of the group is the sum described in subdivision (ii) of this subparagraph of the amount of certain capital raised under the foreign direct investment program and the amounts described in subdivision (iv) of this subparagraph of certain foreign excess working capital held on October 31, 1971.

(ii) The amount described in this subdivision of certain capital raised under the foreign direct investment program is the excess (if any) of—

(a) The amount of the offset allowed by subparagraph (4) of this paragraph, determined, however, with respect to the stock and debt obligations of domestic members of the group outstanding on December 31, 1971 (including amounts treated as stock outstanding by reason of a contribution to capital), whether or not outstanding after such date, which were issued, sold, or exchanged on or after January 1, 1968, by any member (whether or not the same member) to persons who (on the date of such issuance, sale, or exchange) were neither United States persons (within the meaning of section 7701(a)(30)) nor members of the group, but only to the extent the taxpayer establishes that such amount constitutes a long-term borrowing (see 15 CFR 1000.324[1]) for purposes of the foreign direct investment program (see 15 CFR part 1000[1]), over

(b) The amount (determined under paragraph (c) of this section) of actual foreign investment by the domestic members of the group during the portion of the period such stock or debt obligations have been outstanding prior to January 1, 1972, such determination to be made by substituting January 1, 1968, for the December 31, 1971, date specified in such paragraph (c) and by not taking into account the earnings and profits described in paragraph (c)(3) of this section.

For purposes of this subparagraph, foreign branches of United States banks are not considered to be United States persons.

(iii)*(a)* A taxpayer may establish that an amount under subdivision (ii) *(a)* of this subparagraph constitutes a long-term borrowing for purposes of the foreign direct investment program by keeping records sufficient to demonstrate that appropriate reports were filed with the Office of Foreign Direct Investment of the Department of Commerce with respect to the foreign borrowing or by any other method satisfactory to the district director.

(b) The amounts described in subdivision (ii) *(a)* of this subparagraph include amounts with respect to which an election under section 4912(c), to subject certain obligations of a United States person to the interest equalization tax, has been made: *Provided,* That the obligations to which such amounts relate were issued by an ‘‘overseas financing subsidiary’’ described in 15 CFR part 1000[1] and were assumed by a United States person from such overseas financing subsidiary. Thus, for example, if an overseas financing subsidiary issues its notes to a foreign person in 1968, and such notes are assumed by its United States parent in 1973, which parent elects under section 4912(c) to have the notes subject to the interest equalization tax, then the amount of money received by the subsidiary is an amount described in subdivision (ii)*(a)* of this subparagraph.

(iv) The amount described in this subdivision of foreign excess working capital is the amount of liquid assets held by the foreign members of such group and foreign branches of domestic members of such group on October 31,

[1] EDITORIAL NOTE: 15 CFR part 1000 was removed at 39 FR 30481, Aug. 23, 1974.

1971 (whether or not so held after such date) in excess of their reasonable working capital needs (as defined in §1.993–2 (e)) on that date, but only to the extent not included in subdivision (ii) of this subparagraph. For purposes of this subdivision, the term *liquid assets* means money, bank deposits (not including time deposits), and indebtedness of any kind (including time deposits) which on the day acquired had a maturity of 2 years or less.

(8) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. X Corporation, which uses the calendar year as its taxable year is a member of a controlled group (within the meaning of paragraph (a)(2) of this section). X elects to be treated as a DISC beginning with 1972. The amount of net increase in foreign assets of the group at the close of each group taxable year with respect to each taxable year of X from 1972 through 1975 are set forth in the table below, computed on the basis of the facts assumed (the amounts on each line being running balances):

Taxable year of X	1972	1973	1974	1975
(1) Investment in foreign assets	$150	$165	$260	$300
(2) Depreciation with respect to foreign assets of group	20	40	60	80
(3) Amount of stock or debt outstanding issued after December 31, 1971	30	30	30	30
(4) One-half earnings and profits of foreign members	40	70	100	130
(5) Royalties and fees paid by foreign members to domestic members	10	15	20	20
(6) Uncommitted transitional funds	10	10	10	10
(7) Sum of lines (2) through (6)	110	165	220	270
(8) Net increase in foreign assets (line (1) minus line (6))	40	0	40	30

(c) *Actual foreign investment by domestic members.* For purposes of determining the limitation in paragraph (a) of this section, the amount of the actual foreign investment by domestic members of a controlled group is the sum (as of the close of the group taxable year) determined on a cumulative basis (see paragraph (a)(6) of this section) of—

(1) *Outstanding stock or debt (including contributions to capital).* The outstanding amount (determined in accordance with the principles of paragraph (b)(4)(ii) of this section, applied with respect to stock or debt obligations described in this subparagraph) of stock (including treasury stock) or debt obligations (other than normal trade indebtedness) of foreign members of the group issued, sold, or exchanged after December 31, 1971, by any person (whether or not a member) which is not a domestic member to domestic members of the group: *Provided,* That the outstanding amount of debt obligations of any foreign member shall be the greater of such amount outstanding at the close of the taxable year of such member or the highest such amount outstanding at any time during the immediately preceding 90 days,

(2) *Transfers to foreign branches.* The amount of money or the fair market value of property (other than money) transferred by domestic members of the group after December 31, 1971, to foreign branches of such members in transactions which would, if the branch were a corporation, be in consideration for the sale of stock or debt obligations of (or a contribution of capital to) such foreign branches (as determined under subparagraph (1) of this paragraph), and

(3) *Earnings and profits of foreign members.* One-half of the earnings and profits (computed in accordance with paragraph (b)(5) of this section for purposes of computing net increase in foreign assets) of foreign members of the group which are controlled directly or indirectly (as determined under the principles of section 958 and the regulations thereunder) by a domestic member of the group and foreign branches (treated for this purpose as a corporation) of domestic members of the group accumulated during the taxable years of such foreign members (or branches) beginning after December 31, 1971, or, if later, the taxable year referred to in paragraph (a)(5)(i) of this section if the 3-year election provided for in such paragraph (a)(5)(i) is made.

(d) *Carryovers on certain corporate acquisitions and reorganizations*—(1) *Certain corporate acquisitions.* (i) If—

(a) A member of a controlled group (''first controlled group'') acquires in a transaction to which section 381 applies the assets of a corporation which is a member of a second controlled group or acquires stock in such a corporation pursuant to a reorganization as defined in section 368(a)(1)(B) to which section 361 applies, or

(b) A member or combination of members of the first controlled group acquire in a transaction not described in *(a)* of this subdivision a majority interest (as defined in paragraph (e)(2) of this section) in the stock of a corporation which is a member of a second controlled group which includes a DISC so that such DISC after the acquisition is a member of the new controlled group,

then, for purposes of computing foreign investment attributable to producer's loans with respect to the new controlled group as constituted after such acquisition, all amounts described in paragraphs (a) through (c) of this section, including the amount specified in paragraph (a)(1)(ii) of this section (relating to amounts treated under section 995(b)(1)(G) as deemed distributions by the DISC taxable as dividends for prior taxable years of the DISC), with respect to members of the second controlled group which become members of the new controlled group shall carry over to such new controlled group. For purposes of this subdivision (i), a controlled group may consist of only one member. With respect to certain transactions involving foreign corporations, see section 367.

(ii) If a member or combination of members of a controlled group, immediately after an acquisition of stock to which subdivision (i) of this subparagraph applies, do not control the total combined voting power (determined under § 1.957–1(b)) of the corporation whose stock was acquired, proper apportionment consistent with the principles of paragraph (e)(5) of this section shall be made with respect to amounts to which paragraphs (a) through (c) of this section apply.

(iii)*(a)* If subdivision (i) of this subparagraph applies, then for purposes of determining the application of the 3-year elective limitation provided for in paragraph (a)(5) of this section, the rules in *(b), (c),* and *(d)* of this subdivision (iii) apply.

(b) If both the ''first controlled group'' and the ''second controlled group'' (as those terms are defined in subdivision (i) of this subparagraph) include a DISC, and a DISC in either group has elected the 3-year limitation provided in paragraph (a)(5) of this section, then only those amounts taken into account under such paragraph (a)(5) by the electing DISC or DISC's shall be taken into account.

(c) If one of the groups includes a DISC and the other does not, and if the DISC has elected the 3-year limitation provided in paragraph (a)(5) of this section, then, for purposes of computing foreign investment attributable to producer's loans with respect to the new controlled group as constituted after the acquisition, all amounts described in paragraphs (a) through (c) of this section with respect to members of the controlled group which did not include the DISC shall carry over to such new controlled group, but only to the extent provided in such paragraph (a)(5), computed as if the group taxable year in which the acquisition occurred was the first group taxable year which includes a member's first taxable year during which it qualifies (or is treated) as a DISC.

(d) If *(c)* of this subdivision (iii) applies, except that the DISC has not elected the 3-year limitation provided in paragraph (a)(5) of this section, then the DISC in the new controlled group as constituted after the acquisition may, with respect to members of the controlled group which did not include the DISC, make the election provided in such paragraph (a)(5), and treat the year in which the acquisition occurred as if it were the first group taxable year which includes a member's first taxable year during which it qualifies (or is treated) as a DISC.

(iv) If a majority interest, or an interest in addition to a majority interest, is acquired in a transaction other than a transaction described in subdivision (i) of this subparagraph, then the rules in paragraph (e) of this section (relating to the acquisition of the foreign assets of a corporation) apply.

(2) *Corporation ceasing to be a member.* As of the date a corporation which is a

member of a controlled group ceases to be a member of such group, the amounts of such group described in paragraphs (a) through (c) of this section will be reduced by such amounts which are attributable to the corporation which is no longer a member of the group.

(e) *Acquisition of a majority interest in a corporation*—(1) *In general.* If paragraph (d)(1)(i) of this section (relating to certain corporate acquisitions in which all amounts described in paragraphs (a) through (c) of this section carry over) does not apply, then, for purposes of determining under paragraph (b)(2) of this section the investments made in foreign assets by a controlled group, the acquisition of a majority interest (as defined in subparagraph (2) of this paragraph) or an interest in addition to a majority interest in a corporation by any member or combination of members of the controlled group is considered an acquisition of the assets (to the extent provided in subparagraph (5) of this paragraph) of the acquired corporation by the group, including the assets of any foreign corporation in which the acquired corporation owns a majority interest (to the extent provided in subparagraph (5) of this paragraph). For the rules concerning the date upon which an acquisition of a majority interest is considered to have occurred, see subparagraph (3) of this paragraph.

(2) *Majority interest.* For purposes of this section, a majority interest is more than 50 percent of the total combined voting power of all classes of a corporation's stock entitled to vote, as determined under §1.957–1(b).

(3) *Acquisition date.* For purposes of this paragraph, an acquisition of a majority interest shall be considered to have occurred on the day on which the combined voting power of the group first reached the percentage required in subparagraph (2) of this paragraph.

(4) *Valuation of assets.* For purposes of this section, the amount of a corporation's assets deemed acquired is the fair market value of the assets on the date a majority interest, or an interest in addition to a previously held majority interest, is acquired.

(5) *Apportionment in the case of the acquisition of less than all of the voting stock.* (i) If the acquisition described in subparagraph (1) of this paragraph of a majority interest is of less than 100 percent of the total combined voting power of all classes of stock of the acquired corporation entitled to vote, then for purposes of subparagraph (1) of this paragraph the amount of the foreign assets of the corporation deemed acquired as of the day the majority interest is considered acquired shall be an amount equal to the fair market value of all of the corporation's foreign assets described in paragraph (b)(2) of this section as of such day multiplied by the percentage of the total combined voting power (determined under §1.957–1(b)) held by members of the group on the day the majority interest is considered acquired.

(ii) If any member or combination of members of the controlled group hold a majority interest in a corporation, then for purposes of subparagraph (1) of this paragraph the acquisition of additional combined voting power by members of the controlled group shall be considered an acquisition of its foreign assets described in paragraph (b)(2) of this section in an amount equal to the fair market value of all such assets held by the foreign corporation on the date of the acquisition, multiplied by the increase (expressed in percentage points) in total combined voting power (as determined under §1.957–1(b)) which occurred.

(6) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. M Corporation uses the calendar year as its taxable year. On November 18, 1973, M acquires from A, an individual United States person, for $1 million cash all 10,000 shares of the voting stock of N, a foreign corporation. N's only asset is a warehouse located in France with a fair market value on the date of acquisition of $1 million. Under subparagraph (1) of this paragraph, the controlled group of which M is a member is considered to have expended $1 million for the acquisition of foreign assets described in paragraph (b)(2) of this section.

Example 2. The facts are the same as in example 1, except that on November 18, 1973, M acquires only 80 percent of N's voting stock. M is considered to have expended $800,000 for the acquisition of assets described in paragraph (b)(2) of this section, computed as follows:

(1) Fair market value of N's foreign assets described in paragraph (b)(2) of this section	$1,000,000
(2) Multiply by percentage of total combined voting power of all classes of N stock entitled to vote acquired by M	.8
(3) Amount considered expended	$800,000

Example 3. The facts are the same as in example 2, except that individual A is not a United States person, and M acquires the 80 percent of N voting stock in exchange for cash of $100,000 and M stock having a fair market value on the date of the acquisition of $700,000. M is considered to have acquired assets described in paragraph (b)(2) of this section in the amount of $800,000 (see computations in example 2) and to have an offset under paragraph (b)(4) of this section (relating to outstanding stock or debt) of $700,000 (the fair market value of the M stock transferred to A who is not a United States person). However, the controlled group of which M is a member is not considered to have acquired any other amounts described in paragraphs (a) through (c) of this section with respect to N for taxable years prior to the taxable year of N during which the acquisition occurred.

Example 4. P Corporation, which uses the calendar year as its taxable year, is a member of a controlled group which includes a DISC. During 1973, P acquires from B, an individual United States person, for cash, 30 percent of the total combined voting power of all classes of stock entitled to vote of Q, a foreign corporation. All of Q's assets are assets described in paragraph (b)(2) of this section. No additional interest in Q is acquired by members of the group during 1973. The controlled group of which Q is a member is not considered to have made any investments in foreign assets described in such paragraph (b)(2) as of the close of 1973.

Example 5. Assume the same facts as in example 4. Assume further that during 1974, R Corporation, a member of the controlled group which includes P, acquires for cash 40 percent of the total combined voting power of all classes of stock of Q entitled to vote as follows: 20 percent on July 31, and 20 percent on December 31. Thus, on December 31, 1974, members of the controlled group own 70 percent of Q's voting power (30+20+20) and on that date are considered to have acquired a majority interest in Q. The fair market value of Q's assets on December 31, 1974, is $5 million. The group is considered to have expended $3,500,000 for the acquisition of assets described in paragraph (b)(2) of this section computed as follows:

(1) Fair market value of Q's foreign assets described in paragraph (b)(2) of this section as of the date the acquisition is deemed to have occurred under subparagraph (3) of this paragraph (December 31, 1974)	$5,000,000
(2) Multiply by percentage of total combined voting power of all classes of Q stock entitled to vote held by members of the group on such date	.7
	$3,500,000

Example 6. The facts are the same as in example 5. Assume further that on July 15, 1975, P acquires the remaining 30 percent of the total combined voting power of all classes of Q stock entitled to vote, and on such date the fair market value of Q's assets is $5,500,000. The group is considered to have expended $5,150,000 for the acquisition of assets described in paragraph (b)(2) of this section as of the close of 1975, computed as follows:

(1) Amount of prior years' investment	$3,500,000
(2) Investment during 1975:	
(a) Fair market value of Q's foreign assets described in paragraph (b)(2) of this section on July 15, 1975	$5,500,000
(b) Multiply by additional percentage acquired of total combined voting power of all classes of Q stock entitled to vote	.3
(c) Investment during 1975	$1,650,000
(3) Amount considered expended for foreign assets described in paragraph (b)(2) of this section by reason of the acquisition of Q stock	$5,150,000

(f) *Records.* A DISC shall keep or be readily able to produce such permanent books of account or records as are sufficient to establish the transactions and amounts described in this section. Where applicable, such books of account or records shall be cumulative and shall show transactions and amounts of the members of the controlled group which includes the DISC which occurred prior to the date the DISC qualified (or is treated) as a DISC.

(g) *Multiple DISC's*—(1) *Allocation among DISC's.* In the case of a controlled group which includes more than one DISC, the amounts described in paragraphs (b) and (c) of this section shall be allocated among the DISC's in order to determine the limitation in paragraph (a) of this section. Each DISC's allocable portion of these amounts shall be equal to the total of such amounts multiplied by a fraction the numerator of which is the individual DISC's outstanding producer's loans to members of the group, and the denominator of which is the aggregate amounts of outstanding producer's loans to members of the group by all

DISC's which are members of the group.

(2) *Different taxable years.* If all of the DISC's which are members of the controlled group do not have the same taxable year, then one such DISC shall on behalf of all such DISC's elect to make all computations under section 995(d) as if all DISC's that are members of the group use the same taxable year as the actual taxable year of any one of the DISC's. The election as to which DISC's taxable year is to be used shall be made by the electing DISC attaching to its first return, filed under section 6011(e)(2), a statement indicating which such taxable year will be used. Once such an election is made it may not be revoked until such time as all of the DISC's which are members of the group use the same taxable year. If this subparagraph applies, books and records must be kept by the group which are adequate to show the necessary computations under section 995(d).

(3) This paragraph may be illustrated by the following example:

Example. Corporation X and corporation Y are members of the same controlled group and each has elected to be treated as a DISC. X uses a taxable year ending March 31, and Y uses a taxable year ending November 30. Notwithstanding the fact that all other members of the group use the calendar year as their taxable year, all computations for purposes of determining the amount of foreign investment attributable to producer's loans under section 995(d) must be made as if both DISC's use a taxable year ending either March 31 (X's taxable year) or November 30 (Y's taxable year).

[T.D. 7324, 39 FR 35114, Sept. 30, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976; T.D. 7854, 47 FR 51742, Nov. 17, 1982]

§1.995–6 Taxable income attributable to military property.

(a) *Gross income attributable to military property.* For purposes of section 995(b)(3)(A)(i), the term ''gross income which is attributable to military property'' includes income from the sale, exchange, lease, or rental of military property (as described in paragraph (c) of this section). The term also includes gross income from the performance of services which are related and subsidiary (as defined in §1.993–1(d)) to any qualified sale, exchange, lease, or rental of military property. Where gross income cannot be determined on an item by item basis, the gross income with respect to those items not so determinable shall be apportioned. Such apportionment shall be accomplished using appropriate facts and circumstances, so that the gross income apportioned to sale of military property bears a reasonably close factual relationship to the actual gross income earned on such sales. The apportionment shall be based on methods which include the fair market value of property sold or exchanged, the fair rental value of any leaseholds granted, the fair market value of any related or subsidiary services performed in connection with such sale or leases or methods based on gross receipts or costs of goods sold, where appropriate.

(b) *Deductions.* For purposes of section 995(b)(3)(A)(ii), deductions shall be properly allocated and apportioned to gross income, described in paragraph (a) of this section, in accordance with the rules of §1.861–8. These deductions include all applicable deductions from gross income provided under part VI of subchapter B of chapter 1 of the Code.

(c) *Military property.* For purposes of this section, the term *military property* means any property which is an arm, ammunition, or implement of war designated in the munitions list published pursuant to section 38 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2778 which superseded 22 U.S.C. 1934) and the regulations thereunder (22 CFR 121.01).

(d) *Illustration.* The principles of this section may be illustrated by the following example:

Example. X Corporation elects to be a DISC for the first time in 1976. X has taxable income of $50,000, of which $30,000 is attributable to military property and $10,000 to interest on producer's loans. The total deemed distributions with respect to X are as follows:

(1) Gross interest from Producer's loans in 1976	$10,000
(2) 50 percent of the taxable income of the DISC attributable to military property in 1976	15,000
(3) One-half of the excess of taxable income for 1976 over the sum of lines (1) and (2) (½ of ($50,000 minus $25,000))	12,500

(4) Total deemed distributions (sum of total lines (1), (2), and (3))	37,500

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7984, 49 FR 40019, Oct. 12, 1984]

§ 1.996–1 Rules for actual distributions and certain deemed distributions.

(a) *General rule.* Under section 996(a)(1), any actual distribution (other than a distribution described in paragraph (b) of this section or to which § 1.995–4 applies) to a shareholder by a DISC, or former DISC, which is made out of earnings and profits shall be treated as made—

(1) First, out of ''previously taxed income'' (as defined in § 1.996–3(c)) to the extent thereof,

(2) Second, out of ''accumulated DISC income'' (as defined in § 1.996–3(b)) to the extent thereof, and

(3) Third, out of ''other earnings and profits'' (as defined in § 1.996–3(d)) to the extent thereof.

(b) *Rules for qualifying distributions and deemed distributions under section 995(b)(1)(G)*—(1) *In general.* Except as provided in subparagraph (2), any actual distribution to meet qualification requirements made pursuant to § 1.992–3 and any deemed distribution pursuant to § 1.995–2(a)(5) (relating to foreign investment attributable to producer's loans) which is made out of earnings and profits shall be treated as made—

(i) First, out of ''accumulated DISC income'' (as defined in § 1.996–3(b)) to the extent thereof.

(ii) Second, out of ''other earnings and profits'' (as defined in § 1.996–3(d)) to the extent thereof, and

(iii) Third, out of ''previously taxed income'' (as defined in § 1.996–3(c)) to the extent thereof.

(2) *Special rule.* For taxable years beginning after December 31, 1975, paragraph (b)(1) of this section shall apply to one-half of the amount of an actual distribution made pursuant to § 1.992–3 to satisfy the condition of § 1.992–1(b) (the gross receipts test) and paragraph (a) of this section shall apply to the remaining one-half of such amount.

(c) *Exclusion from gross income.* Under section 996(a)(3), amounts distributed out of previously taxed income shall be excluded by the distributee from gross income. However, see § 1.996–5(b) for treatment as gain from the sale or exchange of property of the portion of an actual distribution out of previously taxed income to the extent it exceeds the adjusted basis of the stock with respect to which the distribution is made.

(d) *Priority of distributions.* Under section 996(c), for purposes of determining their treatment under paragraphs (a), (b), and (c) of this section, distributions made during a taxable year shall be treated as being made in the following order—

(1) Deemed distributions under §§ 1.995–2 and 1.995–3.

(2) Actual distributions to meet qualification requirements made pursuant to § 1.992–3 in the order in which they are made, and

(3) Other actual distributions in the order in which they are made.

Thus, the treatment of any distribution shall be determined after the divisions of earnings and profits have been properly adjusted by taking into account distributions of higher priority which are made or deemed made during the same taxable year.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Y Corporation, which uses the calendar year as its taxable year elects to be treated as a DISC beginning with 1972. During 1973, Y makes a cash distribution of $100 to X Corporation, Y's sole shareholder. For 1973, Y has no earnings and profits. As of the beginning of 1973, Y has $300 of accumulated earnings and profits, which consist of $70 of accumulated DISC income, $40 of previously taxed income, and $190 of other earnings and profits. The entire $100 distribution is a dividend under section 316. However, $40 thereof is treated as made out of previously taxed income and is thus excluded from gross income. Accordingly, only $60 is treated as distributed out of accumulated DISC income and includible in gross income. See § 1.246–4 for the inapplicability of the dividend received deduction with respect to the entire distribution of $100.

Example 2. Assume the same facts as in example 1, except that the cash distribution is designated as a distribution to meet qualification requirements made pursuant to § 1.992–3. Under these facts, X includes the entire distribution in its gross income as a dividend. Of the $100 distributed, $70 is treated as made out of accumulated DISC income and the remaining $30 is treated as made out of other earnings and profits. The dividend received deduction under section 243 is available only with respect to such $30.

Example 3. Y Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. As of the end of 1975, Y had failed to meet the gross receipts test for that year. In 1975 Y had $100 of taxable income, $80 of which was attributable to qualified export receipts and $20 of which was attributable to receipts that did not qualify as qualified export receipts. As of the beginning of 1976, Y had $300 of accumulated earnings and profits, which consisted of $70 of accumulated DISC income, $40 of previously taxed income, and $190 of other earnings and profits. In 1976 Y makes a cash distribution of $20 pursuant to §1.992–3 in order to satisfy the gross receipts test for 1975. For 1976 Y has no earnings and profits and no deemed distributions. The entire $20 distribution is a dividend under section 316. Under §1.996–1(b)(2), half of the $20 cash distribution is treated pursuant to §1.996–1(b)(1) and half is treated pursuant to §1.996–1(a). Thus, $10 is treated as distributed out of accumulated DISC income and is includible in gross income. The other $10 is treated as made out of previously taxed income and is thus excluded from gross income. As of the beginning of 1977, Y has $280 of accumulated earnings and profits, which consists of $60 of accumulated DISC income, $30 of previously taxed income, and $190 of other earnings and profits.

[T.D. 7324, 39 FR 35120, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51742, Nov. 17, 1982]

§1.996–2 Ordering rules for losses.

(a) *In general.* Under section 996(b), if for any taxable year a DISC, or a former DISC, incurs a deficit in earnings and profits, such deficit shall be charged—

(1) First, to other earnings and profits (as defined in §1.996–3(d)) to the extent thereof,

(2) Second, to accumulated DISC income (as defined in §1.996–3(b)) to the extent thereof, subject to the special rule in paragraph (b) of this section,

(3) Third, to previously taxed income (as defined in §1.996–3(c)) to the extent thereof, and

(4) To the extent that the amount of such deficit exceeds the sum of the amounts charged in accordance with subparagraphs (1), (2), and (3) of this paragraph, to other earnings and profits (as defined in §1.996–3(d)).

Thus, the excess deficit charged to other earnings and profits under subparagraph (4) of this paragraph will create a deficit therein in the amount of such excess. To determine the amount of any division of earnings and profits for the purpose of determining under §1.996–1 the treatment of any actual and certain deemed distributions, the portion of a deficit in earnings and profits chargeable under this paragraph to such division prior to such distribution shall be determined in a manner consistent with the rules in §1.316–2(b) for determining the amount of earnings and profits available on the date of any distribution.

(b) *Deficits subsequent to a disqualification.* A deficit in earnings and profits of a DISC, or former DISC, shall not be charged to accumulated DISC income which has been determined is to be deemed distributed to the shareholders pursuant to §1.995–3 as a result of a revocation of election or other disqualification. Thus, in accordance with paragraph (a) of this section as modified by this paragraph, a deficit incurred by a former DISC following such a revocation or disqualification shall be charged first to other earnings and profits and then to previously taxed income with any balance being charged to other earnings and profits and creating a deficit therein. The preceding sentence shall also apply in the case of a deficit incurred by a DISC which has no accumulated DISC income accumulated during its current taxable year and all immediately preceding consecutive taxable years for which it was a DISC. If as a result of the application of this paragraph the amount of a deficit in other earnings and profits exceeds the amount of a deficit in accumulated earnings and profits, then upon any subsequent actual distribution the deficit in other earnings and profits shall be reduced by the lower of (1) the amount of such actual distribution chargeable to accumulated DISC income or previously taxed income or (2) the amount of such excess.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, becomes a DISC beginning with 1976. In addition to other facts assumed in the table below, X incurs a deficit in earnings and profits for 1979 of $70. Such deficit is charged to the divisions of X's earnings and profits pursuant to paragraph (a) of this section in the manner set forth in such table.

	Accumulated DISC income	Previously taxed income	Other earnings and profits
Balance January 1, 1976	....	....	$50
Increase for 1976	$10	$8	
Increase for 1977	10	8	
Increase for 1978	10	8	
Balance January 1, 1979	30	24	50
Deficit for 1979 of $70:			
Charge No. 1	....	....	(50)
Charge No. 2	(20)	....	....
Balance January 1, 1980	10	....	0

Example 2. Assume the same facts as in example 1, except that effective for taxable years beginning with 1979, X revokes its election to be treated as a DISC. Under § 1.995–3, X has $30 of accumulated DISC income which is to be deemed distributed $10 per year in 1980, 1981, and 1982. The deficit in earnings and profits for 1979 is charged to the divisions of X's earnings and profits pursuant to paragraph (b) of this section in the manner set forth in the table below:

	Accumulated DISC income	Previously taxed income	Other earnings and profits
Balance January 1, 1979	$30	$24	$50
Deficit for 1979 of $70:.			
Charge No. 1	....	....	(50)
Charge No. 2	....	(20)	....
Balance January 1, 1980	30	4	0

Example 3. Assume the same facts as in example 2, except that the deficit in earnings and profits for 1979 is $120. Assume further that for 1980, 1981, and 1982, during which years X's shareholders are receiving scheduled installments of the deemed distributions of accumulated DISC income under § 1.995–3, X, a former DISC, has neither earnings and profits nor a deficit in earnings and profits. The $120 deficit for 1979 is charged to the divisions of X's earnings and profits pursuant to paragraph (b) of this section in the manner set forth in the table below:

	Accumulated DISC income	Previously taxed income	Other earnings and profits	Accumulated earnings and profits
Balance January 1, 1979	$30	$24	$50	$104
Deficit for 1979 of $120	....	....	....	(120)
Charge No. 1	....	....	(50)	....
Charge No. 2	....	(24)	....	....
Charge No. 3	....	....	(46)	....
Balance January 1, 1980	30	0	(46)	(16)
Deemed distributions in 1980 under § 1.995–3	(10)	10	....	....
Balance January 1, 1981	20	10	(46)	(16)

Example 4. Assume the same facts as in example 3, except that on December 31, 1980, X makes an actual distribution of $10 out of previously taxed income. On January 1, 1981, X has $20 of accumulated DISC income, no previously taxed income, and a deficit of $36 in other earnings and profits. The deficit of $16 in accumulated earnings and profits remains the same.

[T.D. 7324, 39 FR 35120, Sept. 30, 1974]

§ 1.996–3 Divisions of earnings and profits.

(a) *In general.* For purposes of sections 991 through 997, the earnings and profits of a DISC, or former DISC, shall be treated as composed of the following three divisions:

(1) Accumulated DISC income (as defined in paragraph (b) of this section),

(2) Previously taxed income (as defined in paragraph (c) of this section), and

(3) Other earnings and profits (as defined in paragraph (d) of this section),

(b) *Accumulated DISC income defined.* (1) Accumulated DISC income is that portion of a corporation's earnings and profits which were derived during taxable years for which it qualified as a DISC and which were deferred from taxation. Accumulated DISC income as of the close of each taxable year of the corporation is—

(i) The amount of accumulated DISC income as of the close of the immediately preceding taxable year increased by,

(ii) The amount of DISC income for the year (as determined in subparagraph (2) of this paragraph) and reduced (but not below zero) by,

(iii) The items enumerated in subparagraph (3) of this paragraph.

(2) Under section 996(f)(1), DISC income is (i) the earnings and profits derived by the corporation during a taxable year for which such corporation is a DISC minus (ii) amounts deemed distributed under §1.995–2 other than the amount of foreign investment attributable to producer's loans described in §1.995–2(a)(5). For example, the earnings and profits of a DISC for a taxable year include any amounts includible in such DISC's gross income pursuant to section 951(a) (relating to controlled foreign corporations). Deemed distributions under §1.995–2(a)(5) are taken into account under subparagraph (3) of this paragraph as a reduction in computing accumulated DISC income.

(3) The accumulated DISC income (as increased by DISC income for the year determined under subparagraph (2) of this paragraph) is reduced by each of the following items in the following order:

(i) Any amount deemed distributed for such year under §1.995–3 (relating to deemed distributions upon disqualification),

(ii) Any amount of foreign investment attributable to producer's loans deemed distributed for such year under §1.995–2(a)(5) to the extent it is charged to accumulated DISC income under §1.996–1(b)(1)(i),

(iii) The amount of any adjustment to accumulated DISC income for such year under §1.966–4(b)(1), and

(iv) To the extent they are treated, under §1.996–1 (a) or (b) (relating to ordering rules for distributions), as made out of accumulated DISC income, the amounts of any actual qualifying distributions pursuant to §1.992–3 in the order in which they are made, and thereafter by the amounts of any other actual distributions in the order in which they are made, except that, prior to each actual distribution, accumulated DISC income shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under §1.996–2(a)(2) to accumulated DISC income.

(4) Every distribution or other reduction in accumulated DISC income pursuant to subparagraph (3) of this paragraph shall be charged to the most recently accumulated DISC income.

(c) *Previously taxed income.* Under section 996(f)(2), previously taxed income as of the close of each taxable year of the corporation is an amount equal to—

(1) The sum of—

(i) The amount of previously taxed income as of the close of the immediately preceding taxable year,

(ii) Amounts deemed distributed for the current year under §1.995–2 (relating to deemed distributions in qualified years),

(iii) Amounts deemed distributed for the current year under §1.995–3 (relating to deemed distributions upon disqualification),

(iv) With respect to a distribution in redemption to which §1.996–4(b)(1) applies, an amount equal to the excess (if any) of *(a)* the amount of the reduction under §1.996–4(b)(1) in accumulated DISC income over *(b)* the reduction in the corporation's earnings and profits (see section 312(e)), and

(v) Any amount by which accumulated DISC income is reduced under paragraph (b)(3)(ii) of this section by reason of a deemed distribution as a dividend, under §1.995–2(a)(5), of an amount of foreign investment attributable to producer's loans,

(2) Decreased (but not below zero), to the extent they are treated, under §1.996–1 (a) or (b) (relating to ordering rules for distributions), as made out of previously taxed income, by the amounts of any actual qualifying distributions pursuant to §1.992–3 in the order in which they are made, and thereafter by the amounts of any other actual distributions in the order in which they are made, except that, prior to any actual distribution, previously taxed income shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under §1.996–2(a)(3) to previously taxed income.

(d) *Other earnings and profits.* Under section 996(f)(3), other earnings and profits consist of earnings and profits other than accumulated DISC income and previously taxed income described respectively in paragraphs (b) and (c) of this section. Other earnings and profits as of the close of each taxable year of the corporation is (subject to paragraph (e) of this section) an amount equal to the amount of other earnings and profits as of the close of the immediately preceding taxable year decreased (if necessary, below zero) in the following order by—

(1) To the extent they are treated, under § 1.996–1 (a) or (b) (relating to ordering rules for distributions), as made out of other earnings and profits, the amounts of any actual qualifying distributions pursuant to § 1.992–3 in the order in which they are made, and thereafter the amounts of any other actual distributions in the order in which they are made, except that, prior to any actual distribution, other earnings and profits shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under § 1.996–2(a)(1) to other earnings and profits, and

(2) With respect to a distribution in redemption to which § 1.996–4(b)(1) applies, an amount equal to the excess (if any) of *(a)* the reduction in the corporation's earnings and profits (see section 312(e)) over *(b)* the amount of the reduction under § 1.996–4(b)(1) in accumulated DISC income.

(e) *Distributions in kind.* (1) For purposes of determining, under paragraphs (b), (c), and (d) of this section, the amount by which any division of earnings and profits is reduced by reason of a distribution of property (other than money or the DISC's, or former DISC's, own obligations), the amount of such distribution is the fair market value of such property at the time of the distribution.

(2) For any taxable year in which the DISC makes a distribution of such property, the amount of other earnings and profits determined under paragraph (d) of this section (without regard to this subparagraph) shall be—

(i) Increased by the excess (if any) of the amount of such distribution treated as a dividend under section 316(a) over the adjusted basis of such property, and

(ii) Decreased by the excess (if any) of the adjusted basis of such property over the amount of such distribution treated as a dividend under section 316 (a).

Each item of property shall be considered separately for purposes of making the adjustment under this subparagraph.

(f) *Examples.* The provisions of §§ 1.996–1, 1.996–2, and this section may be illustrated by the following examples:

Example 1. M Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1974. During 1975, M derives no earnings and profits and makes no deemed or actual distributions, except that on December 31, 1975, M's shareholders are treated as having received a dividend distribution of $100 under § 1.995–2 (a)(5) (relating to foreign investment attributable to producer's loans). M's earnings and profits are adjusted as shown on line (2) of the table below on the basis of facts assumed therein.

	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1975	$450	$100	$250	$100
(2) Adjustments (see paragraphs (b)(3)(ii) and (c)(1)(v) of this section)	0	(100)	100	0
(3) Balance January 1, 1976	450	0	350	100

Example 2. N Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. During 1973, N derives no earnings and profits for the year and makes no deemed or actual distributions, except that A, a shareholder, realized $200 of gain upon receiving an actual cash distribution of $300 in redemption of N stock having an adjusted basis of $100 in his hands. The redemption is treated as an exchange under section 302(a) but, under section 995(c), A includes the $200 of gain in his gross income as a dividend. Assuming that, under section 312(e), $240 is properly chargeable to capital account of N and that, under § 1.996–4(b), accumulated DISC income is reduced by $200, N's accounts are adjusted on line (2) of the table below on the basis of facts assumed therein.

	Capital	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1973	$2,000	$400	$300	$100	0
(2) Adjustments (see §1.996–4(b) and paragraph (c)(1)(iv) of this section)	(240)	(60)	(200)	140	0
(3) Balance January 1, 1974	1,760	340	100	240	0

Example 3. P Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1973. During 1974, P derives no earnings and profits for the year and makes no deemed or actual distributions, except for a distribution to B, its sole shareholder, of property with a fair market value of $100 and an adjusted basis in P's hands of $40. Under §1.996–1(a)(1), B treats the entire amount of the distribution as being made out of previously taxed income and, under §1.996–1(c), excludes it from his gross income. P's earnings and profits, divisions are adjusted on lines (2) and (3) of the table below on the basis of facts assumed therein.

	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1974	$200	$80	$120	0
(2) Adjustment under paragraphs (c)(2) and (e)(1) this section	(40)	0	(100)	0
(3) Adjustment under paragraph (e)(2)(i) of this section	0	0	0	$60
(4) Balance January 1, 1975	160	80	20	60

Example 4. Q Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1974. On January 1, 1975, Q has accumulated earnings and profits of $1,200 and, during 1975, Q incurs a deficit in earnings and profits of $365. The amount of such deficit incurred as of any date before the close of 1975 cannot be shown. On July 1, 1975, Q makes a cash distribution of $650, with respect to its stock to C, Q's sole shareholder. C subsequently transfers by gift all of his Q stock to D. On December 31, 1975, Q makes a cash distribution of $650, with respect to its stock, to D. Under these facts and additional facts assumed in the table below, C is treated as having received a dividend of $650 of which $320 is treated as distributed out of previously taxed income and excluded from gross income. D is treated as receiving a dividend of $186. Adjustments to Q's earnings and profits accounts are illustrated in the table below:

	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1975	$1,200	$800	$320	$80
(2) Portion of 1975 deficit of $365 chargeable as of June 30, 1975, pursuant to §1.996–2(a)	(181)	(101)	0	(80)
(3) Balance July 1, 1975	1,019	699	320	0
(4) $650 distributed to C on July 1, 1975	(650)	(330)	(320)	0
(5) Portion of 1975 deficit of $365 chargeable as of December 30, 1975, pursuant to §1.996–2(a)	(183)	(183)	0	0
(6) Balance December 31, 1975	$186	$186	0	0
(7) $650 distributed to D on December 31, 1975[1]	(186)	(186)	0	0
(8) Balance January 1, 1976	0	0	0	0

[1] $60 treated as return of capital pursuant to section 301(c)(2).

Examples 5—(1) *Facts.* R Corporation, which uses the calendar year as its taxable year elects to be treated as a DISC beginning with 1972. X Corporation is its sole shareholder. At the beginning of 1974, R has a deficit in earnings and profits of $60 all of which is composed of "other earnings and profits".

For 1974, R has earnings and profits of $80 before reduction for any distributions and taxable income of $70. On June 15, 1974, R makes a cash distribution to X of $60, with respect to its stock, to which section 301 applies. On August 15, 1974, R makes a cash distribution to X of $30 designated as a distribution to meet qualification requirements pursuant to § 1.992–3. Under § 1.995–2(a), X is deemed to receive, on December 31, 1974, a distribution of a dividend of $35, i.e., one-half of R's taxable income of $70. The tax consequences of these facts to X and their effect on R's earnings and profits are set forth in the subsequent subparagraphs of this example.

(2) *Dividend treatment of actual distributions.* Since R had $80 of earnings and profits for 1974 and a deficit in accumulated earnings and profits at the beginning of 1974, only $80 of the actual distributions ($90) are treated as dividends under sections 301(c)(1) and 316(a)(2). ($10 of the actual distribution, which is not treated as a dividend is treated in the manner specified in section 301(c) (2) and (3).) Thus, under § 1.316–2(b), $26.67 of the actual qualifying distribution made on August 15, 1974 ($30× $80/$90), and $53.33 of the actual distribution made on June 15, 1974 ($60×$80/$90), are considered made out of earnings and profits.

(3) *Priority of distributions.* Under § 1.996–1(d), for purposes of adjusting the divisions of R's earnings and profits and determining the treatment of subsequent distributions, the sequence in which each distribution is treated as having been made is—

(i) First, the deemed distribution of $35,

(ii) Second, the actual qualifying distribution of $30 made on August 15, 1974, pursuant to § 1.992–3, and

(iii) Finally, the actual distribution of $60 made on June 15, 1974.

(4) *Treatment and effect of deemed distribution.* Under § 1.995–2(a), on December 31, 1974, X includes the deemed distribution of $35 in its gross income as a dividend. Under paragraph (c)(1)(ii) of this section, R's previously taxed income is increased by $35 as shown on line (3) of the table in subparagraph (7) of this example. Under paragraph (b)(1)(ii) and (2) of this section, accumulated DISC income is increased by $45 of DISC income, i.e., R's earnings and profits for 1974, $80, minus the deemed distribution of $35, as shown on line (4) of the table.

(5) *Treatment and effect of actual qualifying distribution of $30.* As indicated in subparagraph (2) of this example, $26.67 of the $30 qualifying distribution on August 15, 1974, is treated as made out of earnings and profits for 1974. Under § 1.996–1(b)(1)(i), the entire $26.67 is treated as distributed out of accumulated DISC income. Thus, on August 15, 1974, X includes $26.67 in its gross income as a dividend. No deduction is allowable under section 243. Under paragraph (b)(3)(iv) of this section, R's accumulated DISC income is reduced by $26.67 as shown on line (6) of the table in subparagraph (7) of this example.

(6) *Treatment and effect of actual distribution of $60.* As indicated in subparagraph (2) of this example, $53.33 of the $60 distribution on June 15, 1974, is treated as made out of earnings and profits for 1974. Under § 1.996–1(a), the $53.33 is treated as distributed out of previously taxed income to the extent thereof, $35, and then out of accumulated DISC income, $18.33. Thus, on June 15, 1974, X includes $18.33 in its gross income as a dividend. Under § 1.996–1(c), the distribution of $35 out of previously taxed income is excluded from gross income. No deduction is allowable under section 243 with respect to the actual distribution of $53.33. Under paragraph (b)(3)(iv) of this section, accumulated DISC income is reduced by $18.33 and, under paragraph (c)(2) of this section, previously taxed income is reduced by $35, as shown on line (7) of the table in subparagraph (7) of this example.

(7) *Summary.* The effects on earnings and profits and the divisions of earnings and profits are summarized in the following table:

	Earnings and profits for year	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1974		($60.00)			($60.00)
(2) Earnings and profits for year before reduction for distributions	$80.00				
(3) Deemed distribution of $35 to X on December 31, 1974, under § 1.995–2(a)				$35.00	
(4) DISC income for 1974 of $45 as defined in paragraph (b)(2) of this section (line 2 ($80) minus line 3 ($35))			$45.00		
(5) Balance before actual distributions	80.00	(60.00)	45.00	35.00	(60.00)
(6) Qualifying distribution of $30 to X on August 15, 1974, pursuant to § 1.992–3	(26.67)		(26.67)		
(7) Actual distribution to P of $60 on June 15, 1974	(53.33)		(18.33)	(35.00)	
(8) Balance January 1, 1975	0	(60.00)	0		(60.00)

Example 6. Assume the facts are the same as in example 5, except that at the beginning of 1974 R's accumulated earnings and profits amount to $60 consisting of accumulated DISC income of $20, previously taxed income of $10, and other earnings and profits of $30. In addition, on August 1, 1974, X transfers all R's stock to Y Corporation in a reorganization described in section 368(a)(1)(B) in which under section 354 X recognizes no gain or loss. Under these facts, X includes in its gross income for 1974 a dividend of $15 which is attributable to the actual distribution of $60 paid out of earnings and profits on June 15, 1974. X excludes from gross income the balance of the $60 distribution ($45) paid out of earnings and profits because, under §1.996–1(a), it is treated as paid out of previously taxed income. Y includes in its gross income for 1974 a dividend of $65 of which $35 is attributable to the deemed distribution of a dividend to Y on December 31, 1974, under §1.995–2(a) and $30 is attributable to the qualifying distribution paid out of earnings and profits to Y on August 15, 1974. The adjustments to R's earnings and profits are summarized in the following table:

	Earnings and profits for year	Accumulated earnings and profits	Accumulated DISC income	Previously taxed income	Other earnings and profits
(1) Balance January 1, 1974		$60	$20	$10	$30
(2) Earnings and profits for year before reduction for distributions	$80				
(3) Deemed distribution of $35 to Y on December 31, 1974, under §1.995–2(a)				35	
(4) DISC income for 1974 of $45 as defined in paragraph (b)(2) of this section (line 2 ($80) minus line 3 ($35))			45		
(5) Balance before actual distributions	80	60	65	45	30
(6) Qualifying distribution of $30 to Y on August 15, 1974, pursuant to §1.992–3	(26.67)	(3.33)	(30)		
(7) Actual distribution to X of $60 on June 15, 1974	(53.33)	(6.67)	(15)	(45)	
(8) Balance January 1, 1975		50	20	0	30

(g) *DISCs having corporate and noncorporate shareholders.* In the case of a DISC having one or more corporate shareholders but less than all of its shareholders subject to the special rules of section 291(a)(4), relating to certain deferred DISC income as a corporate preference item, accumulated DISC income and previously taxed income of the DISC are divided between the corporate shareholders, as a class, and the other shareholders, as a class, in proportion to amounts of DISC income not deemed distributed and amounts deemed distributed to each class. Subsequent taxation of actual and qualifying distributions shall be based upon this division. Thus, if a DISC is owned 50 percent by corporate shareholders and 50 percent by individual shareholders and has undistributed taxable income of $2,000 for its year, the division is made as follows:

Corporate shareholders:	
Previously taxed income (57.5% of $2,000÷2)	$575
Accumulated DISC income (42.5% of $2,000÷2)	425
Individual shareholders:	
Previously taxed income (50% of $2,000÷2)	500
Accumulated DISC income (50% of $2,000÷2)	500

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat. 917, 26 U.S.C. 7805))

[T.D. 7324, 39 FR 35121, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51742, Nov. 17, 1982; T.D. 7984, 49 FR 40024, Oct. 12, 1984]

§1.996–4 Subsequent effect of previous disposition of DISC stock.

(a) *Shareholder adjustment for previously taxed income.* (1) Under section 996(d)(1), except as provided in subparagraph (2) of this paragraph, if—

(i) Gain with respect to a share of stock of a DISC, or former DISC, is treated under §1.995–4 as a dividend, and

(ii) With respect to such share, any person subsequently receives an actual distribution made out of accumulated DISC income, or a deemed distribution made, pursuant to § 1.995–3, by reason of disqualification, out of accumulated DISC income,

then such person shall treat such distribution in the same manner as a distribution from previously taxed income (and thus excludable from gross income under § 1.996–1(c)) to the extent that the gain referred to in subdivision (i) of this subparagraph exceeds the aggregate amount of any other distributions with respect to such share which were treated under this subparagraph as made from previously taxed income.

(2) In applying subparagraph (1) of this paragraph with respect to a share of stock in a DISC, or former DISC, the gain referred to in subparagraph (1)(i) of this paragraph does not include any gain to a shareholder on a redemption of such share which qualifies as an exchange under section 302(a) or any gain on a disposition of such share prior to such redemption. Distributions described in subparagraph (1)(ii) of this paragraph do not include a distribution in a redemption which qualifies as an exchange under section 302(a). For adjustments to accumulated DISC income by reason of dividend treatment under § 1.995–4 with respect to gain upon a redemption of DISC stock to which section 302(a) applies and upon a prior disposition of such stock, see paragraph (b) of this section.

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. In 1974, under § 1.995–4, A, a shareholder of a DISC, on the sale of his DISC stock to B, is required to treat $20 of his gain as a dividend. The DISC has no previously taxed income and $40 of accumulated DISC income. Subsequently in the same year, B, the purchaser of the stock, receives an actual dividend distribution of $15 with respect to such stock which, under § 1.996–1(a), is treated as made out of accumulated DISC income. The amounts of the DISC's previously taxed income and accumulated DISC income were not adjusted by reason of the $20 treated as a dividend on the prior sale. However, even though the DISC had no previously taxed income, the purchaser would treat the $15 as though it had been paid out of previously taxed income and, therefore would not include the $15 in gross income. If in 1975, B receives another actual distribution of $9 with respect to such stock, $5 (*i.e.*, $20 dividend on A's sale less the $15 distribution to B in 1974 which was treated under subparagraph (1) of this paragraph as made from previously taxed income) is treated as made from previously taxed income and excluded from gross income. The result would be the same if, on January 1, 1975, B had transferred such stock to C by gift and the $9 distribution had been made to C.

(b) *Corporate adjustment upon redemption.* (1) Under section 996(d)(2), if by reason of § 1.995–4 gain on a redemption of stock in a DISC, or former DISC, is included in the shareholder's gross income as a dividend, then the accumulated DISC income shall be reduced by an amount equal to the sum of—

(i) The amount of gain on such redemption which, under § 1.995–4, is treated as a dividend, and

(ii) The amount of any gain with respect to such redeemed stock which, under § 1.995–4, was treated as a dividend on a disposition prior to such redemption minus the amount of distributions with respect to such stock which have been treated as made out of previously taxed income by reason of the application of paragraph (a)(1) of this section.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. The entire stock of a DISC, which uses the calendar year as its taxable year, has been owned equally by A, B, C, and D since it was organized. At the close of 1976, when the DISC has $100 of accumulated DISC income, it redeems all of A's shares in a transaction qualifying as an exchange under section 302(a) and A, under § 1.995–4, includes $25 in his gross income as a dividend. The redemption has the effect of reducing accumulated DISC income by $25 to $75.

Example 2. Assume the same facts as in example 1 except that the stock of the DISC has not been held equally by A, B, C, and D since its organization. A purchased his shares from X in 1974 in a transaction in which X, under § 1.995–4, included in his gross income $30 as a dividend. In 1975, A receives a distribution of $10 out of accumulated DISC income which, under paragraph (a)(1) of this section, is treated as made out of previously taxed income. Under these facts, the redemption of A's stock in 1976 has the effect of reducing accumulated DISC income by $45 to $55 determined as follows:

(a) Accumulated DISC income		$100
(b) Minus sum of:		
(1) Dividend on redemption of A's stock	$25	

(2) Excess of dividend on X's sale ($30) over distribution to A treated as made out of previously taxed income ($10)	$20	
Total		45
(c) Accumulated DISC income on 12/31/76		55

[T.D. 7324, 39 FR 35121, Sept. 30, 1974]

§1.996–5 Adjustment to basis.

(a) *Addition to basis.* Under section 996(e)(1) amounts representing deemed distributions as provided in section 995(b) shall increase the basis of the stock with respect to which the distribution is made.

(b) *Reductions of basis.* Under section 996(e)(2), the portion of an actual distribution treated as made out of previously taxed income shall reduce the basis of the stock with respect to which it is made and, to the extent that it exceeds the adjusted basis of such stock, shall be treated as gain from the sale or exchange of property. In the case of stock includible in the gross estate of a decedent for which an election is made under section 2032 (relating to alternate valuation), this paragraph shall not apply to any distribution made after the date of the decendent's death and before the alternate valuation date provided by section 2032. See section 1014(d) for a special rule for determining the basis of stock in a DISC, or former DISC, acquired from a decedent.

[T.D. 7324, 39 FR 35124, Sept. 30, 1974]

§1.996–6 Effectively connected income.

In the case of a shareholder who is a nonresident alien individual or a foreign corporation, trust, or estate, amounts taxable as dividends by reason of the application of §1.995–4 (relating to gain on disposition of stock in a DISC), amounts treated under §1.996–1 as distributed out of accumulated DISC income, and amounts deemed distributed under §1.995–2(a) (1) through (4) shall be treated as gains and distributions which are effectively connected with the conduct of a trade or business conducted through a permanent establishment of such shareholder within the United States, and shall be subject to tax in accordance with the provisions of section 871(b) and the regulations thereunder in the case of nonresident alien individuals, trusts, or estates, or section 882 and the regulations thereunder in the case of foreign corporations. In no case, however shall other income of such shareholder be taxable as effectively connected with the conduct of a trade or business through a permanent establishment in the United States solely because of the application of this section.

[T.D. 7324, 39 FR 35124, Sept. 30, 1974]

§1.996–7 Carryover of DISC tax attributes.

(a) *In general.* Carryover of a DISC's divisions of earnings and profits to acquiring corporations in nontaxable transactions shall be subject to rules generally applicable to other corporate tax attributes. For example, a DISC which acquires the assets of another DISC in a transaction to which section 381(a) applies shall succeed to, and take into account, the divisions of the earnings and profits of the transferor DISC in accordance with section 381(c)(2).

(b) *Allocation of divisions of earnings and profits in corporate separations.* (1) If one DISC transfers part of its assets to a controlled DISC in a transaction to which section 368(a)(1)(D) applies and immediately thereafter the stock of the controlled DISC is distributed in a distribution or exchange to which section 355 (or so much of section 356 as relates to section 355) applies, then—

(i) The earnings and profits of the distributing DISC immediately before the transaction shall be allocated between the distributing DISC and the controlled DISC in accordance with the provisions of §1.312–10.

(ii) Each of the divisions of such earnings and profits, namely previously taxed income, accumulated DISC income, and other earnings and profits, shall be allocated between the distributing DISC and the controlled DISC on the same basis as the earnings and profits are allocated.

(iii) Any assets of the distributing DISC whose status as qualified export assets is limited by its accumulated DISC income (e.g., producer's loans described in §1.993–4, Export-Import Bank and other obligations described in §1.993–2(h), and financing obligations described in §1.993–2(i)) shall be treated as having been allocated, for the purpose of determining the classification of such assets in the hands of the distributing DISC or the controlled DISC, on the same basis as the earnings and profits are allocated regardless of how such assets are actually allocated.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. On January 1, 1974, P Corporation transfers part of its assets to S Corporation, a newly organized subsidiary of P, in a transaction described in section 368(a)(1)(D) and distributes all the S stock in a transaction which qualifies under section 355. Immediately before such transfer, P had earnings and profits of $120,000 of which $100,000 constitutes accumulated DISC income. The unpaid balance of P's producer's loans is $80,000 all of which is retained by P. Pursuant to § 1.312–10, 25 percent of P's accumulated DISC income is allocated to S (*i.e.*, $25,000). P's producer's loans will be treated as allocated to S in the same proportion. Accordingly, for purposes of determining, under § 1.993–4(a)(3), the amount of producer's loans which S is entitled to make, S is treated as having an unpaid balance of producer's loans of $20,000 (*i.e.*, 25% × $80,000) and P is treated as having an unpaid balance of $60,000 (*i.e.*, 75% × $80,000).

(c) *Accumulated DISC income accounts of separate DISC's maintained after corporate combination.* If two or more DISC's combine to form a new DISC, or if the assets of one DISC are acquired by another DISC, in a transaction described in section 381(a), accumulated DISC income of the acquired DISC or DISC's shall carry over and be taken into account by the acquiring or new DISC, except that a separate account shall be maintained for the accumulated DISC income of any DISC scheduled to be received as a deemed distribution by its shareholders under § 1.995–3 (relating to deemed distributions upon disqualification). If, as a part of such transaction, the stock of the DISC which has accumulated DISC income scheduled to be deemed distributed is exchanged for stock of the acquiring or new DISC to which such accumulated DISC income is carried over and which maintains a separate account, then such accumulated DISC income shall be deemed distributed pro rata to shareholders of the acquiring or new DISC on the basis of stock ownership immediately after the exchange.

[T.D. 7324, 39 FR 35125, Sept. 30, 1974]

§ 1.996–8 Effect of carryback of capital loss or net operating loss to prior DISC taxable year.

(a) Under § 1.995–2(e), the deduction under section 172 for a net operating loss carryback or under section 1212 for a capital loss carryback is determined as if the DISC were a domestic corporation which had not elected to be treated as a DISC. A carryback of a net operating loss or of a capital loss of any corporation which reduces its taxable income for a preceding taxable year for which it qualified as a DISC will have the consequences enumerated in paragraphs (b) through (e) of this section.

(b) For such preceding taxable year, the amount of a deemed distribution of one-half of certain taxable income described in § 1.995–2(a)(4) will ordinarily be reduced in effect (but not below zero) by one-half of the sum of the amount of the deduction under section 172 for such year for net operating loss carrybacks and the amount of the deduction under section 1212 for such year for capital loss carrybacks.

(c) The amount of reduction in the deemed distribution under paragraph (b) of this section will have the effect of increasing the limitation, provided in § 1.995–2(b)(2), on the amount of foreign investment attributable to producer's loans which is deemed distributed under § 1.995–2(a)(5).

(d) If the amount of a deemed distribution for a preceding taxable year is reduced as described in paragraph (b) of this section, then for such preceding taxable year the previously taxed income (as defined in § 1.996–3(c)) shall be decreased by the amount of such reduction and the accumulated DISC income (as defined in § 1.996–3(b)) shall be increased by the amount of such reduction. Such adjustments shall be made as of the time the deemed distribution for such preceding taxable year is treated as having occurred. See § 1.996–1(d) for the priority of such deemed distribution in relation to other distributions made in that preceding taxable year.

(e) The amount and treatment of any actual distribution made in such preceding taxable year or a year subsequent to such preceding year, and the treatment of gain on a disposition (in any such year) of the DISC's stock to which §1.995–4 applies, shall be properly adjusted to reflect the adjustments to previously taxed income and accumulated DISC income described in paragraph (d) of this section.

[T.D. 7324, 39 FR 35125, Sept. 30, 1974]

§1.997–1 Special rules for subchapter C of the Code.

(a) For purposes of applying the provisions of sections 301 through 395 of the Code, any distribution in property to a corporation by a DISC, or former DISC, which is made out of previously taxed income or accumulated DISC income shall be treated as a distribution in the same amount as if such distribution of property were made to an individual, and have a basis, in the hands of the recipient corporation, equal to such amount treated as having been distributed.

(b) This section may be illustrated by the following example:

Example. X Corporation is the sole shareholder of Y Corporation which is a DISC. Y makes an actual distribution of property to X with respect to X's stock in Y. The property has a basis of $50 and a fair market value of $100. The distribution is treated as made out of accumulated DISC income under section 996(a) and is taxable as a dividend under section 301(c)(1). Even though X is a corporation, the amount of the distribution is $100 notwithstanding the provisions of section 301(b)(1)(B) and the basis the property in X's hands is $100 notwithstanding the provisions of section 301(d)(2).

[T.D. 7324, 39 FR 35125, Sept. 30 1974]

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES (Continued)

NORMAL TAXES AND SURTAXES (CONTINUED)

GAIN OR LOSS ON DISPOSITION OF PROPERTY

DETERMINATION OF AMOUNT OF AND RECOGNITION OF GAIN OR LOSS

Sec.
1.1001–1 Computation of gain or loss.
1.1001–2 Discharge of liabilities.
1.1001–3 Modifications of debt instruments.
1.1001–4 Modifications of certain notional principal contracts.
1.1001–5T European Monetary Union (conversion to the euro)(temporary).
1.1002–1 Sales or exchanges.

BASIS RULES OF GENERAL APPLICATION

1.1011–1 Adjusted basis.
1.1011–2 Bargain sale to a charitable organization.
1.1012–1 Basis of property.
1.1012–2 Transfers in part a sale and in part a gift.
1.1013–1 Property included in inventory.
1.1014–1 Basis of property acquired from a decedent.
1.1014–2 Property acquired from a decedent.
1.1014–3 Other basis rules.
1.1014–4 Uniformity of basis; adjustment to basis.
1.1014–5 Gain or loss.
1.1014–6 Special rule for adjustments to basis where property is acquired from a decedent prior to his death.
1.1014–7 Example applying rules of §§ 1.1014–4 through 1.1014–6 to case involving multiple interests.
1.1014–8 Bequest, devise, or inheritance of a remainder interest.
1.1014–9 Special rule with respect to DISC stock.
1.1015–1 Basis of property acquired by gift after December 31, 1920.
1.1015–2 Transfer of property in trust after December 31, 1920.
1.1015–3 Gift or transfer in trust before January 1, 1921.
1.1015–4 Transfers in part a gift and in part a sale.
1.1015–5 Increased basis for gift tax paid.
1.1016–1 Adjustments to basis; scope of section.
1.1016–2 Items properly chargeable to capital account.
1.1016–3 Exhaustion, wear and tear, obsolescence, amortization, and depletion for periods since February 28, 1913.
1.1016–4 Exhaustion, wear and tear, obsolescence, amortization, and depletion; periods during which income was not subject to tax.
1.1016–5 Miscellaneous adjustments to basis.
1.1016–6 Other applicable rules.
1.1016–10 Substituted basis.
1.1017–1 Basis reductions following a discharge of indebtedness.
1.1018–1 Adjusted basis; exception to section 270 of the Bankruptcy Act, as amended.
1.1019–1 Property on which lessee has made improvements.
1.1020–1 Election as to amounts allowed in respect of depreciation, etc., before 1952.
1.1021–1 Sale of annuities.

COMMON NONTAXABLE EXCHANGES

1.1031–0 Table of contents.
1.1031(a)–1 Property held for productive use in trade or business or for investment.
1.1031(a)–2 Additional rules for exchanges of personal property.
1.1031(b)–1 Receipt of other property or money in tax-free exchange.
1.1031(b)–2 Safe harbor for qualified intermediaries.
1.1031(c)–1 Nonrecognition of loss.
1.1031(d)–1 Property acquired upon a tax-free exchange.
1.1031(d)–1T Coordination of section 1060 with section 1031 (temporary).
1.1031(d)–2 Treatment of assumption of liabilities.
1.1031(e)–1 Exchange of livestock of different sexes.
1.1031(j)–1 Exchanges of multiple properties.
1.1031(k)–1 Treatment of deferred exchanges.
1.1032–1 Disposition by a corporation of its own capital stock.
1.1032–2 Disposition by a corporation of stock of a controlling corporation in certain triangular reorganizations.
1.1033(a)–1 Involuntary conversions; nonrecognition of gain.
1.1033(a)–2 Involuntary conversion into similar property, into money or into dissimilar property.
1.1033(a)–3 Involuntary conversion of principal residence.
1.1033(b)–1 Basis of property acquired as a result of an involuntary conversion.
1.1033(c)–1 Disposition of excess property within irrigation project deemed to be involuntary conversion.
1.1033(d)–1 Destruction or disposition of livestock because of disease.
1.1033(e)–1 Sale or exchange of livestock solely on account of drought.
1.1033(g)–1 Condemnation of real property held for productive use in trade or business or for investment.
1.1033(h)–1 Effective date.
1.1034–1 Sale or exchange of residence.

1.1035–1 Certain exchanges of insurance policies.
1.1036–1 Stock for stock of the same corporation.
1.1037–1 Certain exchanges of United States obligations.
1.1038–1 Reacquisitions of real property in satisfaction of indebtedness.
1.1038–2 Reacquisition and resale of property used as a principal residence.
1.1038–3 Election to have section 1038 apply for taxable years beginning after December 31, 1957.
1.1039–1 Certain sales of low-income housing projects.
1.1041–1T Treatment of transfer of property between spouses or incident to divorce (temporary).
1.1042–1T Questions and answers relating to the sales of stock to employee stock ownership plans or certain cooperatives (temporary).
1.1044(a)–1 Time and manner for making election under the Omnibus Budget Reconciliation Act of 1993.

SPECIAL RULES

1.1051–1 Basis of property acquired during affiliation.
1.1052–1 Basis of property established by Revenue Act of 1932.
1.1052–2 Basis of property established by Revenue Act of 1934.
1.1052–3 Basis of property established by the Internal Revenue Code of 1939.
1.1053–1 Property acquired before March 1, 1913.
1.1054–1 Certain stock of Federal National Mortgage Association.
1.1055–1 General rule with respect to redeemable ground rents.
1.1055–2 Determination of amount realized on the transfer of the right to hold real property subject to liabilities under a redeemable ground rent.
1.1055–3 Basis of real property held subject to liabilities under a redeemable ground rent.
1.1055–4 Basis of redeemable ground rent reserved or created in connection with transfers of real property before April 11, 1963.
1.1059(e)–1 Non-pro rata redemptions.
1.1059A–1 Limitation on taxpayer's basis or inventory cost in property imported from related persons.
1.1060–1T Special allocation rules for certain asset acquisitions (temporary).

CHANGES TO EFFECTUATE F.C.C. POLICY

1.1071–1 Gain from sale or exchange to effectuate policies of Federal Communications Commission.
1.1071–2 Nature and effect of election.
1.1071–3 Reduction of basis of property pursuant to election under section 1071.
1.1071–4 Manner of election.

EXCHANGES IN OBEDIENCE TO S.E.C. ORDERS

1.1081–1 Terms used.
1.1081–2 Purpose and scope of exception.
1.1081–3 Exchanges of stock or securities solely for stock or securities.
1.1081–4 Exchanges of property for property by corporations.
1.1081–5 Distribution solely of stock or securities.
1.1081–6 Transfers within system group.
1.1081–7 Sale of stock or securities received upon exchange by members of system group.
1.1081–8 Exchanges in which money or other nonexempt property is received.
1.1081–9 Requirements with respect to order of Securities and Exchange Commission.
1.1081–10 Nonapplication of other provisions of the Internal Revenue Code of 1954.
1.1081–11 Records to be kept and information to be filed with returns.
1.1082–1 Basis for determining gain or loss.
1.1082–2 Basis of property acquired upon exchanges under section 1081 (a) or (e).
1.1082–3 Reduction of basis of property by reason of gain not recognized under section 1081(b).
1.1082–4 Basis of property acquired by corporation under section 1081(a), 1081(b), or 1081(e) as contribution of capital or surplus, or in consideration for its own stock or securities.
1.1082–5 Basis of property acquired by shareholder upon tax-free distribution under section 1081(c) (1) or (2).
1.1082–6 Basis of property acquired under section 1081(d) in transactions between corporations of the same system group.
1.1083–1 Definitions.

WASH SALES OF STOCK OR SECURITIES

1.1091–1 Losses from wash sales of stock or securities.
1.1091–2 Basis of stock or securities acquired in ‘‘wash sales’’.
1.1092(b)–1T Coordination of loss deferral rules and wash sale rules (temporary).
1.1092(b)–2T Treatment of holding periods and losses with respect to straddle positions (temporary).
1.1092(b)–3T Mixed straddles; straddle-by-straddle identification under section 1092(b)(2)(A)(i)(I) (temporary).
1.1092(b)–4T Mixed straddles; mixed straddle account (temporary).
1.1092(b)–5T Definitions (temporary).
1.1092(d)–1 Definitions and special rules.
1.1092(d)–2 Personal property.

CAPITAL GAINS AND LOSSES

TREATMENT OF CAPITAL GAINS

1.1201–1 Alternative tax.
1.1202–0 Table of contents.

1.1202–1 Deduction for capital gains.
1.1202–2 Qualified small business stock; effect of redemptions.

TREATMENT OF CAPITAL LOSSES

1.1211–1 Limitation on capital losses.
1.1212–1 Capital loss carryovers and carrybacks.

GENERAL RULES FOR DETERMINING CAPITAL GAINS AND LOSSES

1.1221–1 Meaning of terms.
1.1221–2 Hedging transactions.
1.1222–1 Other terms relating to capital gains and losses.
1.1223–1 Determination of period for which capital assets are held.

SPECIAL RULES FOR DETERMINING CAPITAL GAINS AND LOSSES

1.1231–1 Gains and losses from the sale or exchange of certain property used in the trade or business.
1.1231–2 Livestock held for draft, breeding, dairy, or sporting purposes.
1.1232–1 Bonds and other evidences of indebtedness; scope of section.
1.1232–2 Retirement.
1.1232–3 Gain upon sale or exchange of obligations issued at a discount after December 31, 1954.
1.1232–3A Inclusion as interest of original issue discount on certain obligations issued after May 27, 1969.
1.1232–4 Obligations with excess coupons detached.
1.1233–1 Gains and losses from short sales.
1.1233–2 Hedging transactions.
1.1234–1 Options to buy or sell.
1.1234–2 Special rule for grantors of straddles applicable to certain options granted on or before September 1, 1976.
1.1234–3 Special rules for the treatment of grantors of certain options granted after September 1, 1976.
1.1234–4 Hedging transactions.
1.1235–1 Sale or exchange of patents.
1.1235–2 Definition of terms.
1.1236–1 Dealers in securities.

GAIN OR LOSS ON DISPOSITION OF PROPERTY

DETERMINATION OF AMOUNT OF AND RECOGNITION OF GAIN OR LOSS

§1.1001–1 Computation of gain or loss.

(a) *General rule.* Except as otherwise provided in subtitle A of the Code, the gain or loss realized from the conversion of property into cash, or from the exchange of property for other property differing materially either in kind or in extent, is treated as income or as loss sustained. The amount realized from a sale or other disposition of property is the sum of any money received plus the fair market value of any property (other than money) received. The fair market value of property is a question of fact, but only in rare and extraordinary cases will property be considered to have no fair market value. The general method of computing such gain or loss is prescribed by section 1001 (a) through (d) which contemplates that from the amount realized upon the sale or exchange there shall be withdrawn a sum sufficient to restore the adjusted basis prescribed by section 1011 and the regulations thereunder (i.e., the cost or other basis adjusted for receipts, expenditures, losses, allowances, and other items chargeable against and applicable to such cost or other basis). The amount which remains after the adjusted basis has been restored to the taxpayer constitutes the realized gain. If the amount realized upon the sale or exchange is insufficient to restore to the taxpayer the adjusted basis of the property, a loss is sustained to the extent of the difference between such adjusted basis and the amount realized. The basis may be different depending upon whether gain or loss is being computed. For example, see section 1015(a) and the regulations thereunder. Section 1001(e) and paragraph (f) of this section prescribe the method of computing gain or loss upon the sale or other disposition of a term interest in property the adjusted basis (or a portion) of which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent) or section 1015 (relating to the basis of property acquired by gift or by a transfer in trust).

(b) *Real estate taxes as amounts received.* (1) Section 1001(b) and section 1012 state rules applicable in making an adjustment upon a sale of real property with respect to the real property taxes apportioned between seller and purchaser under section 164(d). Thus, if the seller pays (or agrees to pay) real property taxes attributable to the real property tax year in which the sale occurs, he shall not take into account, in determining the amount realized from the sale under section 1001(b), any amount received as reimbursement for taxes which are treated under section 164(d) as imposed upon the purchaser. Similarly, in computing the cost of the property under section 1012, the purchaser shall not take into account any amount paid to the seller as reimbursement for real property taxes which are treated under section 164(d) as imposed upon the purchaser. These rules apply whether or not the contract of sale calls for the purchaser to reimburse the seller for such real property taxes paid or to be paid by the seller.

(2) On the other hand, if the purchaser pays (or is to pay) an amount representing real property taxes which are treated under section 164(d) as imposed upon the seller, that amount shall be taken into account both in determining the amount realized from the sale under section 1001(b) and in computing the cost of the property under section 1012. It is immaterial whether or not the contract of sale specifies that the sale price has been reduced by, or is in any way intended to reflect, the taxes allocable to the

seller. See also paragraph (b) of § 1.1012–1.

(3) Subparagraph (1) of this paragraph shall not apply to a seller who, in a taxable year prior to the taxable year of sale, pays an amount representing real property taxes which are treated under section 164(d) as imposed on the purchaser, if such seller has elected to capitalize such amount in accordance with section 266 and the regulations thereunder (relating to election to capitalize certain carrying charges and taxes).

(4) The application of this paragraph may be illustrated by the following examples:

Example 1. Assume that the contract price on the sale of a parcel of real estate is $50,000 and that real property taxes thereon in the amount of $1,000 for the real property tax year in which occurred the date of sale were previously paid by the seller. Assume further that $750 of the taxes are treated under section 164(d) as imposed upon the purchaser and that he reimburses the seller in that amount in addition to the contract price. The amount realized by the seller is $50,000. Similarly, $50,000 is the purchaser's cost. If, in this example, the purchaser made no payment other than the contract price of $50,000, the amount realized by the seller would be $49,250, since the sales price would be deemed to include $750 paid to the seller in reimbursement for real property taxes imposed upon the purchaser. Similarly, $49,250 would be the purchaser's cost.

Example 2. Assume that the purchaser in example (1), above, paid all of the real property taxes. Assume further that $250 of the taxes are treated under section 164(d) as imposed upon the seller. The amount realized by the seller is $50,250. Similarly, $50,250 is the purchaser's cost, regardless of the taxable year in which the purchaser makes actual payment of the taxes.

Example 3. Assume that the seller described in the first part of example (1), above, paid the real property taxes of $1,000 in the taxable year prior to the taxable year of sale and elected under section 266 to capitalize the $1,000 of taxes. In such a case, the amount realized is $50,750. Moreover, regardless of whether the seller elected to capitalize the real property taxes, the purchaser in that case could elect under section 266 to capitalize the $750 of taxes treated under section 164(d) as imposed upon him, in which case his adjusted basis would be $50,750 (cost of $50,000 plus capitalized taxes of $570).

(c) *Other rules.* (1) Even though property is not sold or otherwise disposed of, gain is realized if the sum of all the amounts received which are required by section 1016 and other applicable provisions of subtitle A of the Code to be applied against the basis of the property exceeds such basis. Except as otherwise provided in section 301(c)(3)(B) with respect to distributions out of increase in value of property accrued prior to March 1, 1913, such gain is includible in gross income under section 61 as ''income from whatever source derived''. On the other hand, a loss is not ordinarily sustained prior to the sale or other disposition of the property, for the reason that until such sale or other disposition occurs there remains the possibility that the taxpayer may recover or recoup the adjusted basis of the property. Until some identifiable event fixes the actual sustaining of a loss and the amount thereof, it is not taken into account.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: A, an individual on a calendar year basis, purchased certain shares of stock subsequent to February 28, 1913, for $10,000. On January 1, 1954, A's adjusted basis for the stock had been reduced to $1,000 by reason of receipts and distributions described in sections 1016(a)(1) and 1016(a)(4). He received in 1954 a further distribution of $5,000, being a distribution covered by section 1016(a)(4), other than a distribution out of increase of value of property accrued prior to March 1, 1913. This distribution applied against the adjusted basis as required by section 1016(a)(4) exceeds that basis by $4,000. The $4,000 excess is a gain realized by A in 1954 and is includible in gross income in his return for that calendar year. In computing gain from the stock, as in adjusting basis, no distinction is made between items of receipts or distributions described in section 1016. If A sells the stock in 1955 for $5,000, he realizes in 1955 a gain of $5,000, since the adjusted basis of the stock for the purpose of computing gain or loss from the sale is zero.

(d) *Installment sales.* In the case of property sold on the installment plan, special rules for the taxation of the gain are prescribed in section 453.

(e) *Transfers in part a sale and in part a gift.* (1) Where a transfer of property is in part a sale and in part a gift, the transferor has a gain to the extent that the amount realized by him exceeds his adjusted basis in the property. However, no loss is sustained on such a transfer if the amount realized is less than the adjusted basis. For the determination of basis of property in the hands of the transferee, see §1.1015–4. For the allocation of the adjusted basis of property in the case of a bargain sale to a charitable organization, see §1.1011–2.

(2) *Examples.* The provisions of subparagraph (1) may be illustrated by the following examples:

Example 1. A transfers property to his son for $60,000. Such property in the hands of A has an adjusted basis of $30,000 (and a fair market value of $90,000). A's gain is $30,000, the excess of $60,000, the amount realized, over the adjusted basis, $30,000. He has made a gift of $30,000, the excess of $90,000, the fair market value, over the amount realized, $60,000.

Example 2. A transfers property to his son for $30,000. Such property in the hands of A has an adjusted basis of $60,000 (and a fair market value of $90,000). A has no gain or loss, and has made a gift of $60,000, the excess of $90,000, the fair market value, over the amount realized, $30,000.

Example 3. A transfers property to his son for $30,000. Such property in A's hands has an adjusted basis of $30,000 (and a fair market value of $60,000). A has no gain and has made a gift of $30,000, the excess of $60,000, the fair market value, over the amount realized, $30,000.

Example 4. A transfers property to his son for $30,000. Such property in A's hands has an adjusted basis of $90,000 (and a fair market value of $60,000). A has sustained no loss, and has made a gift of $30,000, the excess of $60,000, the fair market value, over the amount realized, $30,000.

(f) *Sale or other disposition of a term interest in property*—(1) *General rule.* Except as otherwise provided in subparagraph (3) of this paragraph, for purposes of determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in subparagraph (2) of this paragraph) a taxpayer shall not take into account that portion of the adjusted basis of such interest which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent) or section 1015 (relating to the basis of property acquired by gift or by a transfer in trust) to the extent that such adjusted basis is a portion of the adjusted uniform basis of the entire property (as defined in §1.1014–5). Where a term interest in property is transferred to a corporation in connection with a transaction to which section 351 applies and the adjusted basis of the term interest (i) is determined pursuant to section 1014 or 1015 and (ii) is also a portion of the adjusted uniform basis of the entire property, a subsequent sale or other disposition of such term interest by the corporation will be subject to the provisions of section 1001(e) and this paragraph to the extent that the basis of the term interest so sold or otherwise disposed of is determined by reference to its basis in the hands of the transferor as provided by section 362(a). See subparagraph (2) of this paragraph for rules relating to the characterization of stock received by the transferor of a term interest in property in connection with a transaction to which section 351 applies. That portion of the adjusted uniform basis of the entire property which is assignable to such interest at the time of its sale or other disposition shall be determined under the rules provided in §1.1014–5. Thus, gain or loss realized from a sale or other disposition of a term interest in property shall be determined by comparing the amount of the proceeds of such sale with that part of the adjusted basis of such interest which is not a portion of the adjusted uniform basis of the entire property.

(2) *Term interest defined.* For purposes of section 1001(e) and this paragraph, a *term interest in property* means—

(i) A life interest in property,

(ii) An interest in property for a term of years, or

(iii) An income interest in a trust.

Generally, subdivisions (i), (ii), and (iii) refer to an interest, present or future, in the income from property or the right to use property which will terminate or fail on the lapse of time, on the occurrence of an event or contingency, or on the failure of an event or contingency to occur. Such divisions do not refer to remainder or reversionary interests in the property itself or other interests in the property which will ripen into ownership of the entire property upon termination or failure of a preceding term interest. A *term interest in property* also includes any property received upon a sale or other disposition of a life interest in property, an interest in property for a term of years, or an income interest in a trust by the original holder of such interest, but only to the extent that the adjusted basis of the property received is determined by reference to the adjusted basis of the term interest so transferred.

(3) *Exception.* Paragraph (1) of section 1001(e) and subparagraph (1) of this paragraph shall not apply to a sale or other disposition of a term interest in property as a part of a single transaction in which the entire interest in the property is transferred to a third person or to two or more other persons, including persons who acquire such entire interest as joint tenants, tenants by the entirety, or tenants in common. See § 1.1014–5 for computation of gain or loss upon such a sale or other disposition where the property has been acquired from a decedent or by gift or transfer in trust.

(4) *Illustrations.* For examples illustrating the application of this paragraph, see paragraph (c) of § 1.1014–5.

(g) *Debt instruments issued in exchange for property*—(1) *In general.* If a debt instrument is issued in exchange for property, the amount realized attributable to the debt instrument is the issue price of the debt instrument as determined under § 1.1273–2 or § 1.1274–2, whichever is applicable. If, however, the issue price of the debt instrument is determined under section 1273(b)(4), the amount realized attributable to the debt instrument is its stated principal amount reduced by any unstated interest (as determined under section 483).

(2) *Certain debt instruments that provide for contingent payments*—(i) *In general.* Paragraph (g)(1) of this section does not apply to a debt instrument subject to either § 1.483–4 or § 1.1275–4(c) (certain contingent payment debt instruments issued for nonpublicly traded property).

(ii) *Special rule to determine amount realized.* If a debt instrument subject to § 1.1275–4(c) is issued in exchange for property, and the income from the exchange is not reported under the installment method of section 453, the amount realized attributable to the debt instrument is the issue price of the debt instrument as determined under § 1.1274–2(g), increased by the fair market value of the contingent payments payable on the debt instrument. If a debt instrument subject to § 1.483–4 is issued in exchange for property, and the income from the exchange is not reported under the installment method of section 453, the amount realized attributable to the debt instrument is its stated principal amount, reduced by any unstated interest (as determined under section 483), and increased by the fair market value of the contingent payments payable on the debt instrument. This paragraph (g)(2)(ii), however, does not apply to a debt instrument if the fair market value of the contingent payments is not reasonably ascertainable. Only in rare and extraordinary cases will the fair market value of the contingent payments be treated as not reasonably ascertainable.

(3) *Coordination with section 453.* If a debt instrument is issued in exchange for property, and the income from the exchange is not reported under the installment method of section 453, this paragraph (g) applies rather than § 15a.453–1(d)(2) to determine the taxpayer's amount realized attributable to the debt instrument.

(4) *Effective date.* This paragraph (g) applies to sales or exchanges that occur on or after August 13, 1996.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7142, 36 FR 18950, Sept. 24, 1971; T.D. 7207, 37 FR 20797, Oct. 5, 1972; T.D. 7213, 37 FR 21992, Oct. 18, 1972; T.D. 8517, 59 FR 4807, Feb. 2, 1994; T.D. 8674, 61 FR 30139, June 14, 1996]

§ 1.1001–2 Discharge of liabilities.

(a) *Inclusion in amount realized*—(1) *In general.* Except as provided in paragraph (a) (2) and (3) of this section, the amount realized from a sale or other disposition of property includes the amount of liabilities from which the transferor is discharged as a result of the sale or disposition.

(2) *Discharge of indebtedness.* The amount realized on a sale or other disposition of property that secures a recourse liability does not include amounts that are (or would be if realized and recognized) income from the discharge of indebtedness under section 61(a)(12). For situations where amounts arising from the discharge of indebtedness are not realized and recognized, see section 108 and § 1.61–12(b)(1).

(3) *Liability incurred on acquisition.* In the case of a liability incurred by reason of the acquisition of the property, this section does not apply to the extent that such liability was not taken into account in determining the transferor's basis for such property.

(4) *Special rules.* For purposes of this section—

(i) The sale or other disposition of property that secures a nonrecourse liability discharges the transferor from the liability;

(ii) The sale or other disposition of property that secures a recourse liability discharges the transferor from the liability if another person agrees to pay the liability (whether or not the transferor is in fact released from liability);

(iii) A disposition of property includes a gift of the property or a transfer of the property in satisfaction of liabilities to which it is subject;

(iv) Contributions and distributions of property between a partner and a partnership are not sales or other dispositions of property; and

(v) The liabilities from which a transferor is discharged as a result of the sale or disposition of a partnership interest include the transferor's share of the liabilities of the partnership.

(b) *Effect of fair market value of security.* The fair market value of the security at the time of sale or disposition is not relevant for purposes of determining under paragraph (a) of this section the amount of liabilities from which the taxpayer is discharged or treated as discharged. Thus, the fact that the fair market value of the property is less than the amount of the liabilities it secures does not prevent the full amount of those liabilities from being treated as money received from the sale or other disposition of the property. However, see paragraph (a)(2) of this section for a rule relating to certain income from discharge of indebtedness.

(c) *Examples.* The provisions of this section may be illustrated by the following examples. In each example assume the taxpayer uses the cash receipts and disbursements method of accounting, makes a return on the basis of the calendar year, and sells or disposes of all property which is security for a given liability.

Example 1. In 1976 A purchases an asset for $10,000. A pays the seller $1,000 in cash and signs a note payable to the seller for $9,000. A is personally liable for repayment with the seller having full recourse in the event of default. In addition, the asset which was purchased is pledged as security. During the years 1976 and 1977, A takes depreciation deductions on the asset in the amount of $3,100. During this same time period A reduces the outstanding principal on the note to $7,600. At the beginning of 1978 A sells the asset. The buyer pays A $1,600 in cash and assumes personal liability for the $7,600 outstanding liability. A becomes secondarily liable for repayment of the liability. A's amount realized is $9,200 ($1,600 + $7,600). Since A's adjusted basis in the asset is $6,900 ($10,000 − $3,100) A realizes a gain of $2,300 ($9,200 − $6,900).

Example 2. Assume the same facts as in example (1) except that A is not personally liable on the $9,000 note given to the seller and in the event of default the seller's only recourse is to the asset. In addition, on the sale of the asset by A, the purchaser takes the asset subject to the liability. Nevertheless, A's amount realized is $9,200 and A's gain realized is $2,300 on the sale.

Example 3. In 1975 L becomes a limited partner in partnership GL. L contributes $10,000 in cash to GL and L's distributive share of partnership income and loss is 10 percent. L is not entitled to receive any guaranteed payments. In 1978 M purchases L's entire interest in partnership GL. At the time of the sale L's adjusted basis in the partnership interest is $20,000. At that time L's proportionate share of liabilities, of which no partner has assumed personal liability, is $15,000. M pays $10,000 in cash for L's interest in the partnership. Under section 752(d) and this section, L's share of partnership liabilities, $15,000, is treated as money received. Accordingly, L's amount realized on the sale of the partnership interest is $25,000 ($10,000 + $15,000). L's gain realized on the sale is $5,000 ($25,000 − $20,000).

Example 4. In 1976 B becomes a limited partner in partnership BG. In 1978 B contributes B's entire interest in BG to a charitable organization described in section 170(c). At the time of the contribution all of the partnership liabilities are liabilities for which neither B nor G has assumed any personal liability and B's proportionate share of which is $9,000. The charitable organization does not pay any cash or other property to B, but takes the partnership interest subject to the $9,000 of liabilities. Assume that the contribution is treated as a bargain sale to a charitable organization and that under section 1011(b) $3,000 is determined to be the portion of B's basis in the partnership interest allocable to the sale. Under section 752(d) and this section, the $9,000 of liabilities is treated by B as money received, thereby making B's amount realized $9,000. B's gain realized is $6,000 ($9,000 − $3,000).

Example 5. In 1975 C, an individual, creates T, an irrevocable trust. Due to certain powers expressly retained by C, T is a ''grantor trust'' for purposes of subpart E of part 1 of subchapter J of the code and therefore C is treated as the owner of the entire trust. T purchases an interest in P, a partnership. C, as owner of T, deducts the distributive share of partnership losses attributable to the partnership interest held by T. In 1978, when the adjusted basis of the partnership interest held by T is $1,200, C renounces the powers previously and expressly retained that initially resulted in T being classified as a grantor trust. Consequently, T ceases to be a grantor trust and C is no longer considered to be the owner of the trust. At the time of the renunciation all of P's liabilities are liabilities on which none of the partners have assumed any personal liability and the proportionate share of which of the interest held by T is $11,000. Since prior to the renunciation C was the owner of the entire trust, C was considered the owner of all the trust property for Federal income tax purposes, including the partnership interest. Since C was considered to be the owner of the partnership interest, C not T, was considered to be the partner in P during the time T was a ''grantor trust''. However, at the time C renounced the powers that gave rise to T's classification as a grantor trust, T no longer qualified as a grantor trust with the result that C was no longer considered to be the owner of the trust and trust property for Federal income tax purposes. Consequently, at that time, C is considered to have transferred ownership of the interest in P to T, now a separate taxable entity, independent of its grantor C. On the transfer, C's share of partnership liabilities ($11,000) is treated as money received. Accordingly, C's amount realized is $11,000 and C's gain realized is $9,800 ($11,000 − $1,200).

Example 6. In 1977 D purchases an asset for $7,500. D pays the seller $1,500 in cash and signs a note payable to the seller for $6,000. D is not personally liable for repayment but pledges as security the newly purchased asset. In the event of default, the seller's only recourse is to the asset. During the years 1977 and 1978 D takes depreciation deductions on the asset totaling $4,200 thereby reducing D's basis in the asset to $3,300 ($7,500 − $4,200). In 1979 D transfers the asset to a trust which is not a ''grantor trust'' for purposes of subpart E of part 1 of subchapter J of the Code. Therefore D is not treated as the owner of the trust. The trust takes the asset subject to the liability and in addition pays D $750 in cash. Prior to the transfer D had reduced the amount outstanding on the liability to $4,700. D's amount realized on the transfer is $5,450 ($4,700 + $750). Since D's adjusted basis is $3,300, D's gain realized is $2,150 ($5,450 − $3,300).

Example 7. In 1974 E purchases a herd of cattle for breeding purposes. The purchase price is $20,000 consisting of $1,000 cash and a $19,000 note. E is not personally liable for repayment of the liability and the seller's only recourse in the event of default is to the herd of cattle. In 1977 E transfers the herd back to the original seller thereby satisfying the indebtedness pursuant to a provision in the original sales agreement. At the time of the transfer the fair market value of the herd is $15,000 and the remaining principal balance on the note is $19,000. At that time E's adjusted basis in the herd is $16,500 due to a deductible loss incurred when a portion of the herd died as a result of disease. As a result of the indebtedness being satisfied, E's amount realized is $19,000 notwithstanding the fact that the fair market value of the herd was less than $19,000. E's realized gain is $2,500 ($19,000 − $16,500).

Example 8. In 1980, F transfers to a creditor an asset with a fair market value of $6,000 and the creditor discharges $7,500 of indebtedness for which F is personally liable. The amount realized on the disposition of the asset is its fair market value ($6,000). In addition, F has income from the discharge of indebtedness of $1,500 ($7,500 − $6,000).

[T.D. 7741, 45 FR 81744, Dec. 12, 1980]

§ 1.1001–3 Modifications of debt instruments.

(a) *Scope*—(1) *In general.* This section provides rules for determining whether a modification of the terms of a debt instrument results in an exchange for purposes of § 1.1001–1(a). This section applies to any modification of a debt instrument, regardless of the form of the modification. For example, this section applies to an exchange of a new instrument for an existing debt instrument, or to an amendment of an existing debt instrument. This section also applies to a modification of a debt instrument that the issuer and holder accomplish indirectly through one or more transactions with third parties. This section, however, does not apply to exchanges of debt instruments between holders.

(2) *Qualified tender bonds.* This section does not apply for purposes of determining whether tax-exempt bonds that are qualified tender bonds are reissued for purposes of sections 103 and 141 through 150.

(b) *General rule.* For purposes of §1.1001–1(a), a significant modification of a debt instrument, within the meaning of this section, results in an exchange of the original debt instrument for a modified instrument that differs materially either in kind or in extent. A modification that is not a significant modification is not an exchange for purposes of §1.1001–1(a). Paragraphs (c) and (d) of this section define the term *modification* and contain examples illustrating the application of the rule. Paragraphs (e) and (f) of this section provide rules for determining when a modification is a significant modification. Paragraph (g) of this section contains examples illustrating the application of the rules in paragraphs (e) and (f) of this section.

(c) *Modification defined*—(1) *In general*—(i) *Alteration of terms.* A *modification* means any alteration, including any deletion or addition, in whole or in part, of a legal right or obligation of the issuer or a holder of a debt instrument, whether the alteration is evidenced by an express agreement (oral or written), conduct of the parties, or otherwise.

(ii) *Alterations occurring by operation of the terms of a debt instrument.* Except as provided in paragraph (c)(2) of this section, an alteration of a legal right or obligation that occurs by operation of the terms of a debt instrument is not a modification. An alteration that occurs by operation of the terms may occur automatically (for example, an annual resetting of the interest rate based on the value of an index or a specified increase in the interest rate if the value of the collateral declines from a specified level) or may occur as a result of the exercise of an option provided to an issuer or a holder to change a term of a debt instrument.

(2) *Exceptions.* The alterations described in this paragraph (c)(2) are modifications, even if the alterations occur by operation of the terms of a debt instrument.

(i) *Change in obligor or nature of instrument.* An alteration that results in the substitution of a new obligor, the addition or deletion of a co-obligor, or a change (in whole or in part) in the recourse nature of the instrument (from recourse to nonrecourse or from nonrecourse to recourse) is a modification.

(ii) *Property that is not debt.* An alteration that results in an instrument or property right that is not debt for Federal income tax purposes is a modification unless the alteration occurs pursuant to a holder's option under the terms of the instrument to convert the instrument into equity of the issuer (notwithstanding paragraph (c)(2)(iii) of this section).

(iii) *Certain alterations resulting from the exercise of an option.* An alteration that results from the exercise of an option provided to an issuer or a holder to change a term of a debt instrument is a modification unless—

(A) The option is unilateral (as defined in paragraph (c)(3) of this section); and

(B) In the case of an option exercisable by a holder, the exercise of the option does not result in (or, in the case of a variable or contingent payment, is not reasonably expected to result in) a deferral of, or a reduction in, any scheduled payment of interest or principal.

(3) *Unilateral option.* For purposes of this section, an option is unilateral only if, under the terms of an instrument or under applicable law—

(i) There does not exist at the time the option is exercised, or as a result of the exercise, a right of the other party to alter or terminate the instrument or put the instrument to a person who is related (within the meaning of section 267(b) or section 707(b)(1)) to the issuer;

(ii) The exercise of the option does not require the consent or approval of—

(A) The other party;

(B) A person who is related to that party (within the meaning of section 267(b) or section 707(b)(1)), whether or not that person is a party to the instrument; or

(C) A court or arbitrator; and

(iii) The exercise of the option does not require consideration (other than incidental costs and expenses relating to the exercise of the option), unless, on the issue date of the instrument, the consideration is a de minimis amount, a specified amount, or an amount that is based on a formula that uses objective financial information (as defined in § 1.446–3(c)(4)(ii)).

(4) *Failure to perform*—(i) *In general.* The failure of an issuer to perform its obligations under a debt instrument is not itself an alteration of a legal right or obligation and is not a modification.

(ii) *Holder's temporary forbearance.* Notwithstanding paragraph (c)(1) of this section, absent a written or oral agreement to alter other terms of the debt instrument, an agreement by the holder to stay collection or temporarily waive an acceleration clause or similar default right (including such a waiver following the exercise of a right to demand payment in full) is not a modification unless and until the forbearance remains in effect for a period that exceeds—

(A) Two years following the issuer's initial failure to perform; and

(B) Any additional period during which the parties conduct good faith negotiations or during which the issuer is in a title 11 or similar case (as defined in section 368(a)(3)(A)).

(5) *Failure to exercise an option.* If a party to a debt instrument has an option to change a term of an instrument, the failure of the party to exercise that option is not a modification.

(6) *Time of modification*—(i) *In general.* Except as provided in this paragraph (c)(6), an agreement to change a term of a debt instrument is a modification at the time the issuer and holder enter into the agreement, even if the change in the term is not immediately effective.

(ii) *Closing conditions.* If the parties condition a change in a term of a debt instrument on reasonable closing conditions (for example, shareholder, regulatory, or senior creditor approval, or additional financing), a modification occurs on the closing date of the agreement. Thus, if the reasonable closing conditions do not occur so that the change in the term does not become effective, a modification does not occur.

(iii) *Bankruptcy proceedings.* If a change in a term of a debt instrument occurs pursuant to a plan of reorganization in a title 11 or similar case (within the meaning of section 368(a)(3)(A)), a modification occurs upon the effective date of the plan. Thus, unless the plan becomes effective, a modification does not occur.

(d) *Examples.* The following examples illustrate the provisions of paragraph (c) of this section:

Example 1. Reset bond. A bond provides for the interest rate to be reset every 49 days through an auction by a remarketing agent. The reset of the interest rate occurs by operation of the terms of the bond and is not an alteration described in paragraph (c)(2) of this section. Thus, the reset of the interest rate is not a modification.

Example 2. Obligation to maintain collateral. The original terms of a bond provide that the bond must be secured by a certain type of collateral having a specified value. The terms also require the issuer to substitute collateral if the value of the original collateral decreases. Any substitution of collateral that is required to maintain the value of the collateral occurs by operation of the terms of the bond and is not an alteration described in paragraph (c)(2) of this section. Thus, such a substitution of collateral is not a modification.

Example 3. Alteration contingent on an act of a party. The original terms of a bond provide that the interest rate is 9 percent. The terms also provide that, if the issuer files an effective registration statement covering the bonds with the Securities and Exchange Commission, the interest rate will decrease to 8 percent. If the issuer registers the bond, the resulting decrease in the interest rate occurs by operation of the terms of the bond and is not an alteration described in paragraph (c)(2) of this section. Thus, such a decrease in the interest rate is not a modification.

Example 4. Substitution of a new obligor occurring by operation of the terms of the debt instrument. Under the original terms of a bond issued by a corporation, an acquirer of substantially all of the corporation's assets may assume the corporation's obligations under the bond. Substantially all of the corporation's assets are acquired by another corporation and the acquiring corporation becomes the new obligor on the bond. Under paragraph (c)(2)(i) of this section, the substitution of a new obligor, even though it occurs by operation of the terms of the bond, is a modification.

Example 5. Defeasance with release of covenants. (i) A corporation issues a 30-year, recourse bond. Under the terms of the bond, the corporation may secure a release of the financial and restrictive covenants by placing in trust government securities as collateral that will provide interest and principal payments sufficient to satisfy all scheduled payments on the bond. The corporation remains obligated for all payments, including the contribution of additional securities to the trust if necessary to provide sufficient amounts to satisfy the payment obligations. Under paragraph (c)(3) of this section, the option to defease the bond is a unilateral option.

(ii) The alterations occur by operation of the terms of the debt instrument and are not described in paragraph (c)(2) of this section. Thus, such a release of the covenants is not a modification.

Example 6. Legal defeasance. Under the terms of a recourse bond, the issuer may secure a release of the financial and restrictive covenants by placing in trust government securities that will provide interest and principal payments sufficient to satisfy all scheduled payments on the bond. Upon the creation of the trust, the issuer is released from any recourse liability on the bond and has no obligation to contribute additional securities to the trust if the trust funds are not sufficient to satisfy the scheduled payments on the bond. The release of the issuer is an alteration described in paragraph (c)(2)(i) of this section, and thus is a modification.

Example 7. Exercise of an option by a holder that reduces amounts payable. (i) A financial institution holds a residential mortgage. Under the original terms of the mortgage, the financial institution has an option to decrease the interest rate. The financial institution anticipates that, if market interest rates decline, it may exercise this option in lieu of the mortgagor refinancing with another lender.

(ii) The financial institution exercises the option to reduce the interest rate. The exercise of the option results in a reduction in scheduled payments and is an alteration described in paragraph (c)(2)(iii) of this section. Thus, the change in interest rate is a modification.

Example 8. Conversion of adjustable rate to fixed rate mortgage. (i) The original terms of a mortgage provide for a variable interest rate, reset annually based on the value of an objective index. Under the terms of the mortgage, the mortgagor may, upon the payment of a fee equal to a specified percentage of the outstanding principal amount of the mortgage, convert to a fixed rate of interest as determined based on the value of a second objective index. The exercise of the option does not require the consent or approval of any person or create a right of the holder to alter the terms of, or to put, the instrument.

(ii) Because the required consideration to exercise the option is a specified amount fixed on the issue date, the exercise of the option is unilateral as defined in paragraph (c)(3) of this section. The conversion to a fixed rate of interest is not an alteration described in paragraph (c)(2) of this section. Thus, the change in the type of interest rate occurs by operation of the terms of the instrument and is not a modification.

Example 9. Holder's option to increase interest rate. (i) A corporation issues an 8-year note to a bank in exchange for cash. Under the terms of the note, the bank has the option to increase the rate of interest by a specified amount upon a certain decline in the corporation's credit rating. The bank's right to increase the interest rate is a unilateral option as described in paragraph (c)(3) of this section.

(ii) The credit rating of the corporation declines below the specified level. The bank exercises its option to increase the rate of interest. The increase in the rate of interest occurs by operation of the terms of the note and does not result in a deferral or a reduction in the scheduled payments or any other alteration described in paragraph (c)(2) of this section. Thus, the change in interest rate is not a modification.

Example 10. Issuer's right to defer payment of interest. A corporation issues a 5-year note. Under the terms of the note, interest is payable annually at the rate of 10 percent. The corporation, however, has an option to defer any payment of interest until maturity. For any payments that are deferred, interest will compound at a rate of 12 percent. The exercise of the option, which results in the deferral of payments, does not result from the exercise of an option by the holder. The exercise of the option occurs by operation of the terms of the debt instrument and is not a modification.

Example 11. Holder's option to grant deferral of payment. (i) A corporation issues a 10-year note to a bank in exchange for cash. Interest on the note is payable semi-annually. Under the terms of the note, the bank may grant the corporation the right to defer all or part of the interest payments. For any payments that are deferred, interest will compound at a rate 150 basis points greater than the stated rate of interest.

(ii) The corporation encounters financial difficulty and is unable to satisfy its obligations under the note. The bank exercises its option under the note and grants the corporation the right to defer payments. The exercise of the option results in a right of the corporation to defer scheduled payments and, under paragraph (c)(3)(i) of this section, is not a unilateral option. Thus, the alteration is described in paragraph (c)(2)(iii) of this section and is a modification.

Example 12. Alteration requiring consent. The original terms of a bond include a provision that the issuer may extend the maturity of the bond with the consent of the holder. Because any extension pursuant to this term requires the consent of both parties, such an extension does not occur by the exercise of a unilateral option (as defined in paragraph (c)(3) of this section) and is a modification.

Example 13. Waiver of an acceleration clause. Under the terms of a bond, if the issuer fails to make a scheduled payment, the full principal amount of the bond is due and payable immediately. Following the issuer's failure to make a scheduled payment, the holder temporarily waives its right to receive the full principal for a period ending one year from the date of the issuer's default to allow the issuer to obtain additional financial resources. Under paragraph (c)(4)(ii) of this section, the temporary waiver in this situation is not a modification. The result would be the same if the terms provided the holder with the right to demand the full principal amount upon the failure of the issuer to make a scheduled payment and, upon such a failure, the holder exercised that right and then waived the right to receive the payment for one year.

(e) *Significant modifications.* Whether the modification of a debt instrument is a significant modification is determined under the rules of this paragraph (e). Paragraph (e)(1) of this section provides a general rule for determining the significance of modifications not otherwise addressed in this paragraph (e). Paragraphs (e) (2) through (6) of this section provide specific rules for determining the significance of certain types of modifications. Paragraph (f) of this section provides rules of application, including rules for modifications that are effective on a deferred basis or upon the occurrence of a contingency.

(1) *General rule.* Except as otherwise provided in paragraphs (e)(2) through (e)(6) of this section, a modification is a significant modification only if, based on all facts and circumstances, the legal rights or obligations that are altered and the degree to which they are altered are economically significant. In making a determination under this paragraph (e)(1), all modifications to the debt instrument (other than modifications subject to paragraphs (e) (2) through (6) of this section) are considered collectively, so that a series of such modifications may be significant when considered together although each modification, if considered alone, would not be significant.

(2) *Change in yield*—(i) *Scope of rule.* This paragraph (e)(2) applies to debt instruments that provide for only fixed payments, debt instruments with alternative payment schedules subject to § 1.1272–1(c), debt instruments that provide for a fixed yield subject to § 1.1272–1(d) (such as certain demand loans), and variable rate debt instruments. Whether a change in the yield of other debt instruments (for example, a contingent payment debt instrument) is a significant modification is determined under paragraph (e)(1) of this section.

(ii) *In general.* A change in the yield of a debt instrument is a significant modification if the yield computed under paragraph (e)(2)(iii) of this section varies from the annual yield on the unmodified instrument (determined as of the date of the modification) by more than the greater of—

(A) ¼ of one percent (25 basis points); or

(B) 5 percent of the annual yield of the unmodified instrument (.05 × annual yield).

(iii) *Yield of the modified instrument*—(A) *In general.* The yield computed under this paragraph (e)(2)(iii) is the annual yield of a debt instrument with—

(*1*) An issue price equal to the adjusted issue price of the unmodified instrument on the date of the modification (increased by any accrued but unpaid interest and decreased by any accrued bond issuance premium not yet taken into account, and increased or decreased, respectively, to reflect payments made to the issuer or to the holder as consideration for the modification); and

(*2*) Payments equal to the payments on the modified debt instrument from the date of the modification.

(B) *Prepayment penalty.* For purposes of this paragraph (e)(2)(iii), a commercially reasonable prepayment penalty for a pro rata prepayment (as defined in § 1.1275–2(f)) is not consideration for a modification of a debt instrument and is not taken into account in determining the yield of the modified instrument.

(iv) *Variable rate debt instruments.* For purposes of this paragraph (e)(2), the annual yield of a variable rate debt instrument is the annual yield of the equivalent fixed rate debt instrument (as defined in § 1.1275–5(e)) which is constructed based on the terms of the instrument (either modified or unmodified, whichever is applicable) as of the date of the modification.

(3) *Changes in timing of payments*—(i) *In general.* A modification that changes

the timing of payments (including any resulting change in the amount of payments) due under a debt instrument is a significant modification if it results in the material deferral of scheduled payments. The deferral may occur either through an extension of the final maturity date of an instrument or through a deferral of payments due prior to maturity. The materiality of the deferral depends on all the facts and circumstances, including the length of the deferral, the original term of the instrument, the amounts of the payments that are deferred, and the time period between the modification and the actual deferral of payments.

(ii) *Safe-harbor period.* The deferral of one or more scheduled payments within the safe-harbor period is not a material deferral if the deferred payments are unconditionally payable no later than at the end of the safe-harbor period. The safe-harbor period begins on the original due date of the first scheduled payment that is deferred and extends for a period equal to the lesser of five years or 50 percent of the original term of the instrument. For purposes of this paragraph (e)(3)(ii), the term of an instrument is determined without regard to any option to extend the original maturity and deferrals of de minimis payments are ignored. If the period during which payments are deferred is less than the full safe-harbor period, the unused portion of the period remains a safe-harbor period for any subsequent deferral of payments on the instrument.

(4) *Change in obligor or security*—(i) *Substitution of a new obligor on recourse debt instruments*—(A) *In general.* Except as provided in paragraph (e)(4)(i) (B), (C), or (D) of this section, the substitution of a new obligor on a recourse debt instrument is a significant modification.

(B) *Section 381(a) transaction.* The substitution of a new obligor is not a significant modification if the acquiring corporation (within the meaning of section 381) becomes the new obligor pursuant to a transaction to which section 381(a) applies, the transaction does not result in a change in payment expectations, and the transaction (other than a reorganization within the meaning of section 368(a)(1)(F)) does not result in a significant alteration.

(C) *Certain asset acquisitions.* The substitution of a new obligor is not a significant modification if the new obligor acquires substantially all of the assets of the original obligor, the transaction does not result in a change in payment expectations, and the transaction does not result in a significant alteration.

(D) *Tax-exempt bonds.* The substitution of a new obligor on a tax-exempt bond is not a significant modification if the new obligor is a related entity to the original obligor as defined in section 168(h)(4)(A) and the collateral securing the instrument continues to include the original collateral.

(E) *Significant alteration.* For purposes of this paragraph (e)(4), a significant alteration is an alteration that would be a significant modification but for the fact that the alteration occurs by operation of the terms of the instrument.

(F) *Section 338 election.* For purposes of this section, an election under section 338 following a qualified stock purchase of an issuer's stock does not result in the substitution of a new obligor.

(G) *Bankruptcy proceedings.* For purposes of this section, the filing of a petition in a title 11 or similar case (as defined in section 368(a)(3)(A)) by itself does not result in the substitution of a new obligor.

(ii) *Substitution of a new obligor on nonrecourse debt instruments.* The substitution of a new obligor on a nonrecourse debt instrument is not a significant modification.

(iii) *Addition or deletion of co-obligor.* The addition or deletion of a co-obligor on a debt instrument is a significant modification if the addition or deletion of the co-obligor results in a change in payment expectations. If the addition or deletion of a co-obligor is part of a transaction or series of related transactions that results in the substitution of a new obligor, however, the transaction is treated as a substitution of a new obligor (and is tested under paragraph (e)(4)(i)) of this section rather than as an addition or deletion of a co-obligor.

(iv) *Change in security or credit enhancement*—(A) *Recourse debt instruments.* A modification that releases, substitutes, adds or otherwise alters the collateral for, a guarantee on, or other form of credit enhancement for a recourse debt instrument is a significant modification if the modification results in a change in payment expectations.

(B) *Nonrecourse debt instruments.* A modification that releases, substitutes, adds or otherwise alters a substantial amount of the collateral for, a guarantee on, or other form of credit enhancement for a nonrecourse debt instrument is a significant modification. A substitution of collateral is not a significant modification, however, if the collateral is fungible or otherwise of a type where the particular units pledged are unimportant (for example, government securities or financial instruments of a particular type and rating). In addition, the substitution of a similar commercially available credit enhancement contract is not a significant modification, and an improvement to the property securing a nonrecourse debt instrument does not result in a significant modification.

(v) *Change in priority of debt.* A change in the priority of a debt instrument relative to other debt of the issuer is a significant modification if it results in a change in payment expectations.

(vi) *Change in payment expectations*—(A) *In general.* For purposes of this section, a change in payment expectations occurs if, as a result of a transaction—

(*1*) There is a substantial enhancement of the obligor's capacity to meet the payment obligations under a debt instrument and that capacity was primarily speculative prior to the modification and is adequate after the modification; or

(*2*) There is a substantial impairment of the obligor's capacity to meet the payment obligations under a debt instrument and that capacity was adequate prior to the modification and is primarily speculative after the modification.

(B) *Obligor's capacity.* The obligor's capacity includes any source for payment, including collateral, guarantees, or other credit enhancement.

(5) *Changes in the nature of a debt instrument*—(i) *Property that is not debt.* A modification of a debt instrument that results in an instrument or property right that is not debt for Federal income tax purposes is a significant modification. For purposes of this paragraph (e)(5)(i), any deterioration in the financial condition of the obligor between the issue date of the unmodified instrument and the date of modification (as it relates to the obligor's ability to repay the debt) is not taken into account unless, in connection with the modification, there is a substitution of a new obligor or the addition or deletion of a co-obligor.

(ii) *Change in recourse nature*—(A) *In general.* Except as provided in paragraph (e)(5)(ii)(B) of this section, a change in the nature of a debt instrument from recourse (or substantially all recourse) to nonrecourse (or substantially all nonrecourse) is a significant modification. Thus, for example, a legal defeasance of a debt instrument in which the issuer is released from all liability to make payments on the debt instrument (including an obligation to contribute additional securities to a trust if necessary to provide sufficient funds to meet all scheduled payments on the instrument) is a significant modification. Similarly, a change in the nature of the debt instrument from nonrecourse (or substantially all nonrecourse) to recourse (or substantially all recourse) is a significant modification. If an instrument is not substantially all recourse or not substantially all nonrecourse either before or after a modification, the significance of the modification is determined under paragraph (e)(1) of this section.

(B) *Exceptions*—(*1*) *Defeasance of tax-exempt bonds.* A defeasance of a tax-exempt bond is not a significant modification even if the issuer is released from any liability to make payments under the instrument if the defeasance occurs by operation of the terms of the original bond and the issuer places in trust government securities or tax-exempt government bonds that are reasonably expected to provide interest and principal payments sufficient to satisfy the payment obligations under the bond.

(*2*) *Original collateral.* A modification that changes a recourse debt instrument to a nonrecourse debt instrument is not a significant modification if the instrument continues to be secured only by the original collateral and the modification does not result in a change in payment expectations. For this purpose, if the original collateral is fungible or otherwise of a type where the particular units pledged are unimportant (for example, government securities or financial instruments of a particular type and rating), replacement of some or all units of the original collateral with other units of the same or similar type and aggregate value is not considered a change in the original collateral.

(6) *Accounting or financial covenants.* A modification that adds, deletes, or alters customary accounting or financial covenants is not a significant modification.

(f) *Rules of application*—(1) *Testing for significance*—(i) *In general.* Whether a modification of any term is a significant modification is determined under each applicable rule in paragraphs (e) (2) through (6) of this section and, if not specifically addressed in those rules, under the general rule in paragraph (e)(1) of this section. For example, a deferral of payments that changes the yield of a fixed rate debt instrument must be tested under both paragraphs (e) (2) and (3) of this section.

(ii) *Contingent modifications.* If a modification described in paragraphs (e) (2) through (5) of this section is effective only upon the occurrence of a substantial contingency, whether or not the change is a significant modification is determined under paragraph (e)(1) of this section rather than under paragraphs (e) (2) through (5) of this section.

(iii) *Deferred modifications.* If a modification described in paragraphs (e) (4) and (5) of this section is effective on a substantially deferred basis, whether or not the change is a significant modification is determined under paragraph (e)(1) of this section rather than under paragraphs (e) (4) and (5) of this section.

(2) *Modifications that are not significant.* If a rule in paragraphs (e) (2) through (4) of this section prescribes a degree of change in a term of a debt instrument that is a significant modification, a change of the same type but of a lesser degree is not a significant modification under that rule. For example, a 20 basis point change in the yield of a fixed rate debt instrument is not a significant modification under paragraph (e)(2) of this section. Likewise, if a rule in paragraph (e)(4) of this section requires a change in payment expectations for a modification to be significant, a modification of the same type that does not result in a change in payment expectations is not a significant modification under that rule.

(3) *Cumulative effect of modifications.* Two or more modifications of a debt instrument over any period of time constitute a significant modification if, had they been done as a single change, the change would have resulted in a significant modification under paragraph (e) of this section. Thus, for example, a series of changes in the maturity of a debt instrument constitutes a significant modification if, combined as a single change, the change would have resulted in a significant modification. The significant modification occurs at the time that the cumulative modification would be significant under paragraph (e) of this section. In testing for a change of yield under paragraph (e)(2) of this section, however, any prior modification occurring more than 5 years before the date of the modification being tested is disregarded.

(4) *Modifications of different terms.* Modifications of different terms of a debt instrument, none of which separately would be a significant modification under paragraphs (e) (2) through (6) of this section, do not collectively constitute a significant modification. For example, a change in yield that is not a significant modification under paragraph (e)(2) of this section and a substitution of collateral that is not a significant modification under paragraph (e)(4)(iv) of this section do not together result in a significant modification. Although the significance of each modification is determined independently, in testing a particular modification it is assumed that all

other simultaneous modifications have already occurred.

(5) *Definitions.* For purposes of this section:

(i) *Issuer* and *obligor* are used interchangeably and mean the issuer of a debt instrument or a successor obligor.

(ii) *Variable rate debt instrument* and *contingent payment debt instrument* have the meanings given those terms in section 1275 and the regulations thereunder.

(iii) *Tax-exempt bond* means a state or local bond that satisfies the requirements of section 103(a).

(iv) *Conduit loan* and *conduit borrower* have the same meanings as in § 1.150–1(b).

(6) *Certain rules for tax-exempt bonds*—(i) *Conduit loans.* For purposes of this section, the obligor of a tax-exempt bond is the entity that actually issues the bond and not a conduit borrower of bond proceeds. In determining whether there is a significant modification of a tax-exempt bond, however, transactions between holders of the tax-exempt bond and a borrower of a conduit loan may be an indirect modification under paragraph (a)(1) of this section. For example, a payment by the holder of a tax-exempt bond to a conduit borrower to waive a call right may result in an indirect modification of the tax-exempt bond by changing the yield on that bond.

(ii) *Recourse nature*—(A) *In general.* For purposes of this section, a tax-exempt bond that does not finance a conduit loan is a recourse debt instrument.

(B) *Proceeds used for conduit loans.* For purposes of this section, a tax-exempt bond that finances a conduit loan is a recourse debt instrument unless both the bond and the conduit loan are nonrecourse instruments.

(C) *Government securities as collateral.* Notwithstanding paragraphs (f)(6)(ii) (A) and (B) of this section, for purposes of this section a tax-exempt bond that is secured only by a trust holding government securities or tax-exempt government bonds that are reasonably expected to provide interest and principal payments sufficient to satisfy the payment obligations under the bond is a nonrecourse instrument.

(g) *Examples.* The following examples illustrate the provisions of paragraphs (e) and (f) of this section:

Example 1. Modification of call right. (i) Under the terms of a 30-year, fixed-rate bond, the issuer can call the bond for 102 percent of par at the end of ten years or for 101 percent of par at the end of 20 years. At the end of the eighth year, the holder of the bond pays the issuer to waive the issuer's right to call the bond at the end of the tenth year. On the date of the modification, the issuer's credit rating is approximately the same as when the bond was issued, but market rates of interest have declined from that date.

(ii) The holder's payment to the issuer changes the yield on the bond. Whether the change in yield is a significant modification depends on whether the yield on the modified bond varies from the yield on the original bond by more than the change in yield as described in paragraph (e)(2)(ii) of this section.

(iii) If the change in yield is not a significant modification, the elimination of the issuer's call right must also be tested for significance. Because the specific rules of paragraphs (e)(2) through (e)(6) of this section do not address this modification, the significance of the modification must be determined under the general rule of paragraph (e)(1) of this section.

Example 2. Extension of maturity and change in yield. (i) A zero-coupon bond has an original maturity of ten years. At the end of the fifth year, the parties agree to extend the maturity for a period of two years without increasing the stated redemption price at maturity (i.e., there are no additional payments due between the original and extended maturity dates, and the amount due at the extended maturity date is equal to the amount due at the original maturity date).

(ii) The deferral of the scheduled payment at maturity is tested under paragraph (e)(3) of this section. The safe-harbor period under paragraph (e)(3)(ii) of this section starts with the date the payment that is being deferred is due. For this modification, the safe-harbor period starts on the original maturity date, and ends five years from this date. All payments deferred within this period are unconditionally payable before the end of the safe-harbor period. Thus, the deferral of the payment at maturity for a period of two years is not a material deferral under the safe-harbor rule of paragraph (e)(3)(ii) of this section and thus is not a significant modification.

(iii) Even though the extension of maturity is not a significant modification under paragraph (e)(3)(ii) of this section, the modification also decreases the yield of the bond. The change in yield must be tested under paragraph (e)(2) of this section.

Example 3. Change in yield resulting from reduction of principal. (i) A debt instrument issued at par has an original maturity of ten years and provides for the payment of $100,000 at maturity with interest payments at the rate of 10 percent payable at the end of each year. At the end of the fifth year, and after the annual payment of interest, the issuer and holder agree to reduce the amount payable at maturity to $80,000. The annual interest rate remains at 10 percent but is payable on the reduced principal.

(ii) In applying the change in yield rule of paragraph (e)(2) of this section, the yield of the instrument after the modification (measured from the date that the parties agree to the modification to its final maturity date) is computed using the adjusted issue price of $100,000. With four annual payments of $8,000, and a payment of $88,000 at maturity, the yield on the instrument after the modification for purposes of determining if there has been a significant modification under paragraph (e)(2)(i) of this section is 4.332 percent. Thus, the reduction in principal is a significant modification.

Example 4. Deferral of scheduled interest payments. (i) A 20-year debt instrument issued at par provides for the payment of $100,000 at maturity with annual interest payments at the rate of 10 percent. At the beginning of the eleventh year, the issuer and holder agree to defer all remaining interest payments until maturity with compounding. The yield of the modified instrument remains at 10 percent.

(ii) The safe-harbor period of paragraph (e)(3)(ii) of this section begins at the end of the eleventh year, when the interest payment for that year is deferred, and ends at the end of the sixteenth year. However, the payments deferred during this period are not unconditionally payable by the end of that 5-year period. Thus, the deferral of the interest payments is not within the safe-harbor period.

(iii) This modification materially defers the payments due under the instrument and is a significant modification under paragraph (e)(3)(i) of this section.

Example 5. Assumption of mortgage with increase in interest rate. (i) A recourse debt instrument with a 9 percent annual yield is secured by an office building. Under the terms of the instrument, a purchaser of the building may assume the debt and be substituted for the original obligor if the purchaser has a specified credit rating and if the interest rate on the instrument is increased by one-half percent (50 basis points). The building is sold, the purchaser assumes the debt, and the interest rate increases by 50 basis points.

(ii) If the purchaser's acquisition of the building does not satisfy the requirements of paragraphs (e)(4)(i) (B) or (C) of this section, the substitution of the purchaser as the obligor is a significant modification under paragraph (e)(4)(i)(A) of this section.

(iii) If the purchaser acquires substantially all of the assets of the original obligor, the assumption of the debt instrument will not result in a significant modification if there is not a change in payment expectations and the assumption does not result in a significant alteration.

(iv) The change in the interest rate, if tested under the rules of paragraph (e)(2) of this section, would result in a significant modification. The change in interest rate that results from the transaction is a significant alteration. Thus, the transaction does not meet the requirements of paragraph (e)(4)(i)(C) of this section and is a significant modification under paragraph (e)(4)(i)(A) of this section.

Example 6. Assumption of mortgage. (i) A recourse debt instrument is secured by a building. In connection with the sale of the building, the purchaser of the building assumes the debt and is substituted as the new obligor on the debt instrument. The purchaser does not acquire substantially all of the assets of the original obligor.

(ii) The transaction does not satisfy any of the exceptions set forth in paragraph (e)(4)(i) (B) or (C) of this section. Thus, the substitution of the purchaser as the obligor is a significant modification under paragraph (e)(4)(i)(A) of this section.

(iii) Section 1274(c)(4), however, provides that if a debt instrument is assumed in connection with the sale or exchange of property, the assumption is not taken into account in determining if section 1274 applies to the debt instrument unless the terms and conditions of the debt instrument are modified in connection with the sale or exchange. Because the purchaser assumed the debt instrument in connection with the sale of property and the debt instrument was not otherwise modified, the debt instrument is not retested to determine whether it provides for adequate stated interest.

Example 7. Substitution of a new obligor in section 381(a) transaction. (i) The interest rate on a 30-year debt instrument issued by a corporation provides for a variable rate of interest that is reset annually on June 1st based on an objective index.

(ii) In the tenth year, the issuer merges (in a transaction to which section 381(a) applies) into another corporation that becomes the new obligor on the debt instrument. The merger occurs on June 1st, at which time the interest rate is also reset by operation of the terms of the instrument. The new interest rate varies from the previous interest rate by more than the greater of 25 basis points and 5 percent of the annual yield of the unmodified instrument. The substitution of a new obligor does not result in a change in payment expectations.

(iii) The substitution of the new obligor occurs in a section 381(a) transaction and does not result in a change in payment expectations. Although the interest rate changed by more than the greater of 25 basis points and

5 percent of the annual yield of the unmodified instrument, this alteration did not occur as a result of the transaction and is not a significant alteration under paragraph (e)(4)(i)(E) of this section. Thus, the substitution meets the requirements of paragraph (e)(4)(i)(B) of this section and is not a significant modification.

Example 8. Substitution of credit enhancement contract. (i) Under the terms of a recourse debt instrument, the issuer's obligations are secured by a letter of credit from a specified bank. The debt instrument does not contain any provision allowing a substitution of a letter of credit from a different bank. The specified bank, however, encounters financial difficulty and rating agencies lower its credit rating. The issuer and holder agree that the issuer will substitute a letter of credit from another bank with a higher credit rating.

(ii) Under paragraph (e)(4)(iv)(A) of this section, the substitution of a different credit enhancement contract is not a significant modification of a recourse debt instrument unless the substitution results in a change in payment expectations. While the substitution of a new letter of credit by a bank with a higher credit rating does not itself result in a change in payment expectations, such a substitution may result in a change in payment expectations under certain circumstances (for example, if the obligor's capacity to meet payment obligations is dependent on the letter of credit and the substitution substantially enhances that capacity from primarily speculative to adequate).

Example 9. Improvement to collateral securing nonrecourse debt. A parcel of land and its improvements, a shopping center, secure a nonrecourse debt instrument. The obligor expands the shopping center with the construction of an additional building on the same parcel of land. After the construction, the improvements that secure the nonrecourse debt include the new building. The building is an improvement to the property securing the nonrecourse debt instrument and its inclusion in the collateral securing the debt is not a significant modification under paragraph (e)(4)(iv)(B) of this section.

(h) *Effective date.* This section applies to alterations of the terms of a debt instrument on or after September 24, 1996. Taxpayers, however, may rely on this section for alterations of the terms of a debt instrument after December 2, 1992, and before September 24, 1996.

[T.D. 8675, 61 FR 32930, June 26, 1996; 61 FR 47822, Sept. 11, 1996]

§ 1.1001–4 Modifications of certain notional principal contracts.

(a) *Dealer assignments.* For purposes of § 1.1001–1(a), the substitution of a new party on an interest rate or commodity swap, or other notional principal contract (as defined in § 1.446–3(c)(1)), is not treated as a deemed exchange by the nonassigning party of the original contract for a modified contract that differs materially either in kind or in extent if—

(1) The party assigning its rights and obligations under the contract and the party to which the rights and obligations are assigned are both dealers in notional principal contracts, as defined in § 1.446–3(c)(4)(iii); and

(2) The terms of the contract permit the substitution.

(b) *Effective date.* This section applies to assignments of interest rate swaps, commodity swaps, and other notional principal contracts occurring on or after September 23, 1996.

[T.D. 8763, 63 FR 4396, Jan. 29, 1998]

§ 1.1001–5T European Monetary Union (conversion to the euro)(temporary).

(a) *Conversion of currencies.* For purposes of § 1.1001–1(a), the conversion to the euro of legacy currencies (as defined in § 1.985–8T(a)(1)) is not the exchange of property for other property differing materially in kind or extent.

(b) *Effect of currency conversion on other rights and obligations.* For purposes of § 1.1001–1(a), if, solely as the result of the conversion of legacy currencies to the euro, rights or obligations denominated in a legacy currency become rights or obligations denominated in the euro, that event is not the exchange of property for other property differing materially in kind or extent. Thus, for example, when a debt instrument that requires payments of amounts denominated in a legacy currency becomes a debt instrument requiring payments of euros, that alteration is not a modification within the meaning of § 1.1001–3(c).

(c) *Effective date.* This section applies to tax years ending after July 29, 1998.

[T.D. 8776, 63 FR 40369, July 29, 1998]

§1.1002–1 Sales or exchanges.

(a) *General rule.* The general rule with respect to gain or loss realized upon the sale or exchange of property as determined under section 1001 is that the entire amount of such gain or loss is recognized except in cases where specific provisions of subtitle A of the code provide otherwise.

(b) *Strict construction of exceptions from general rule.* The exceptions from the general rule requiring the recognition of all gains and losses, like other exceptions from a rule of taxation of general and uniform application, are strictly construed and do not extend either beyond the words or the underlying assumptions and purposes of the exception. Nonrecognition is accorded by the Code only if the exchange is one which satisfies both (1) the specific description in the Code of an excepted exchange, and (2) the underlying purpose for which such exchange is excepted from the general rule. The exchange must be germane to, and a necessary incident of, the investment or enterprise in hand. The relationship of the exchange to the venture or enterprise is always material, and the surrounding facts and circumstances must be shown. As elsewhere, the taxpayer claiming the benefit of the exception must show himself within the exception.

(c) *Certain exceptions to general rule.* Exceptions to the general rule are made, for example, by sections 351(a), 354, 361(a), 371(a)(1), 371(b)(1), 721, 1031, 1035 and 1036. These sections describe certain specific exchanges of property in which at the time of the exchange particular differences exist between the property parted with and the property acquired, but such differences are more formal than substantial. As to these, the Code provides that such differences shall not be deemed controlling, and that gain or loss shall not be recognized at the time of the exchange. The underlying assumption of these exceptions is that the new property is substantially a continuation of the old investment still unliquidated; and, in the case of reorganizations, that the new enterprise, the new corporate structure, and the new property are substantially continuations of the old still unliquidated.

(d) *Exchange.* Ordinarily, to constitute an exchange, the transaction must be a reciprocal transfer of property, as distinguished from a transfer of property for a money consideration only.

BASIS RULES OF GENERAL APPLICATION

§1.1011–1 Adjusted basis.

The adjusted basis for determining the gain or loss from the sale or other disposition of property is the cost or other basis prescribed in section 1012 or other applicable provisions of subtitle A of the code, adjusted to the extent provided in sections 1016, 1017, and 1018 or as otherwise specifically provided for under applicable provisions of internal revenue laws.

§1.1011–2 Bargain sale to a charitable organization.

(a) *In general.* (1) If for the taxable year a charitable contributions deduction is allowable under section 170 by reason of a sale or exchange of property, the taxpayer's adjusted basis of such property for purposes of determining gain from such sale or exchange must be computed as provided in section 1011(b) and paragraph (b) of this section. If after applying the provisions of section 170 for the taxable year, including the percentage limitations of section 170(b), no deduction is allowable under that section by reason of the sale or exchange of the property, section 1011(b) does not apply and the adjusted basis of the property is not required to be apportioned pursuant to paragraph (b) of this section. In such case the entire adjusted basis of the property is to be taken into account in determining gain from the sale or exchange, as provided in §1.1011–1(e). In ascertaining whether or not a charitable contributions deduction is allowable under section 170 for the taxable year for such purposes, that section is to be applied without regard to this section and the amount by which the contributed portion of the property must be reduced under section 170(e)(1) is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if the contributed portion of the property had been sold by the donor at its fair market value at the time of the sale or exchange.

(2) If in the taxable year there is a sale or exchange of property which gives rise to a charitable contribution which is carried over under section 170(b)(1)(D)(ii) or section 170(d) to a subsequent taxable year or is postponed under section 170(a)(3) to a subsequent taxable year, section 1011(b) and paragraph (b) of this section must be applied for purposes of apportioning the adjusted basis of the property for the year of the sale or exchange, whether or not such contribution is allowable as a deduction under section 170 in such subsequent year.

(3) If property is transferred subject to an indebtedness, the amount of the indebtedness must be treated as an amount realized for purposes of determining whether there is a sale or exchange to which section 1011(b) and this section apply, even though the transferee does not agree to assume or pay the indebtedness.

(4)(i) Section 1011(b) and this section apply where property is sold or exchanged in return for an obligation to pay an annuity and a charitable contributions deduction is allowable under section 170 by reason of such sale or exchange.

(ii) If in such case the annuity received in exchange for the property is nonassignable, or is assignable but only to the charitable organization to which the property is sold or exchanged, and if the transferor is the only annuitant or the transferor and a designated survivor annuitant or annuitants are the only annuitants, any gain on such exchange is to be reported as provided in example (8) in paragraph (c) of this section. In determining the period over which gain may be reported as provided in such example, the life expectancy of the survivor annuitant may not be taken into account. The fact that the transferor may retain the right to revoke the survivor's annuity or relinquish his own right to the annuity will not be considered, for purposes of this subdivision, to make the annuity assignable to someone other than the charitable organization. Gain on an exchange of the type described in this subdivision pursuant to an agreement which is entered into after December 19, 1969, and before May 3, 1971, may be reported as provided in example (8) in paragraph (c) of this section, even though the annuity is assignable.

(iii) In the case of an annuity to which subdivision (ii) of this subparagraph applies, the gain unreported by the transferor with respect to annuity payments not yet due when the following events occur is not required to be included in gross income of any person where—

(*a*) The transferor dies before the entire amount of gain has been reported and there is no surviving annuitant, or

(*b*) The transferor relinquishes the annuity to the charitable organization.

If the transferor dies before the entire amount of gain on a two-life annuity has been reported, the unreported gain is required to be reported by the surviving annuitant or annuitants with respect to the annuity payments received by them.

(b) *Apportionment of adjusted basis.* For purposes of determining gain on a sale or exchange to which this paragraph applies, the adjusted basis of the property which is sold or exchanged shall be that portion of the adjusted basis of the entire property which bears the same ratio to the adjusted basis as the amount realized bears to the fair market value of the entire property. The amount of such gain which shall be treated as ordinary income (or long-term capital gain) shall be that amount which bears the same ratio to the ordinary income (or long-term capital gain) which would have been recognized if the entire property had been sold by the donor at its fair market value at the time of the sale or exchange as the amount realized on the sale or exchange bears to the fair market value of the entire property at such time. The terms *ordinary income* and *long-term capital gain,* as used in this section, have the same meaning as they have in paragraph (a) of § 1.170A–4. For determining the portion of the adjusted basis, ordinary income, and long- term capital gain allocated to the contributed portion of the property for purposes of applying section 170(e)(1) and paragraph (a) of § 1.170A–4 to the contributed portion of the property, and for determining the donee's basis in such contributed portion, see paragraph (c) (2) and (4) of §1.170A–4. For determining the holding period of such contributed portion, see section 1223(2) and the regulations thereunder.

(c) *Illustrations.* The application of this section may be illustrated by the following examples, which are supplemented by other examples in paragraph (d) of §1.170A–4:

Example 1. In 1970, A, a calendar-year individual taxpayer, sells to a church for $4,000 stock held for more than 6 months which has an adjusted basis of $4,000 and a fair market value of $10,000. A's contribution base for 1970, as defined in section 170(b)(1)(F), is $100,000, and during that year he makes no other charitable contributions. Thus, A makes a charitable contribution to the church of $6,000 ($10,000 value −$4,000 amount realized). Without regard to this section, A is allowed a deduction under section 170 of $6,000 for his charitable contribution to the church, since there is no reduction under section 170(e)(1) with respect to the long-term capital gain. Accordingly, under paragraph (b) of this section the adjusted basis for determining gain on the bargain sale is $1,600 ($4,000 adjusted basis × $4,000 amount realized / $10,000 value of property). A has recognized long-term capital gain of $2,400 ($4,000 amount realized − $1,600 adjusted basis) on the bargain sale.

Example 2. The facts are the same as in example (1) except that A also makes a charitable contribution in 1970 of $50,000 cash to the church. By reason of section 170(b)(1)(A), the deduction allowed under section 170 for 1970 is $50,000 for the amount of cash contributed to the church; however, the $6,000 contribution of property is carried over to 1971 under section 170(d). Under paragraphs (a)(2) and (b) of this section the adjusted basis for determining gain for 1970 on the bargain sale in that year is $1,600 ($4,000 × $4,000 / $10,000). A has a recognized long-term capital gain for 1970 of $2,400 ($4,000 − $1,600) on the sale.

Example 3. In 1970, C, a calendar-year individual taxpayer, makes a charitable contribution of $50,000 cash to a church. In addition, he sells for $4,000 to a private foundation not described in section 170(b)(1)(E) stock held for more than 6 months which has an adjusted basis of $4,000 and a fair market value of $10,000. Thus, C makes a charitable contribution of $6,000 of such property to the private foundation ($10,000 value − $4,000 amount realized). C's contribution base for 1970, as defined in section 170(b)(1)(F), is $100,000, and during that year he makes no other charitable contributions. By reason of section 170(b)(1)(A), the deduction allowed under section 170 for 1970 is $50,000 for the amount of cash contributed to the church. Under section 170(e)(1)(B)(ii) and paragraphs (a)(1) and (c)(2)(i) of §1.170A–4, the $6,000 contribution of stock is reduced to $4,800 ($6,000 − [50% × ($6,000 value of contributed portion of stock − $3,600 adjusted basis)]). However, by reason of section 170(b)(1)(B)(ii), applied without regard to section 1011(b), no deduction is allowed under section 170 for 1970 or any other year for the reduced contribution of $4,800 to the private foundation. Accordingly, paragraph (b) of this section does not apply for purposes of apportioning the adjusted basis of the stock sold to the private foundation, and under section 1.1011–1(e) the recognized gain on the bargain sale is $0 ($4,000 amount realized − $4,000 adjusted basis).

Example 4. In 1970, B, a calendar-year individual taxpayer, sells to a church for $2,000 stock held for not more than 6 months which has an adjusted basis of $4,000 and a fair market value of $10,000. B's contribution base for 1970, as defined in section 170(b)(1)(F), is $20,000 and during such year B makes no other charitable contributions. Thus, he makes a charitable contribution to the church of $8,000 ($10,000 value − $2,000 amount realized). Under paragraph (b) of this section the adjusted basis for determining gain on the bargain sale is $800 ($4,000 adjusted basis × $2,000 amount realized / $10,000 value of stock). Accordingly, B, has a recognized short-term capital gain of $1,200 ($2,000 amount realized − $800 adjusted basis) on the bargain sale. After applying section 1011(b) and paragraphs (a)(1) and (c)(2)(i) of §1.170A–4, B is allowed a charitable contributions deduction for 1970 of $3,200 ($8,000 value of gift − [$8,000 − ($4,000 adjusted basis of property × $8,000 value of gift / $10,000 value of property)]).

Example 5. The facts are the same as in Example 4 except that B sells the property to the church for $4,000. Thus, B makes a charitable contribution to the church of $6,000 ($10,000 value −$4,000 amount realized). Under paragraph (b) of this section the adjusted basis for determining gain on the bargain sale is $1,600 ($4,000 adjusted basis × $4,000 amount realized / $10,000 value of stock). Accordingly, B has a recognized short-term capital gain of $2,400 ($4,000 amount realized − $1,600 adjusted basis) on the bargain sale. After applying section 1011(b) and paragraphs (a)(1) and (c)(2)(i) of §1.170A–4, B is allowed a charitable contributions deduction for 1970 of $2,400 ($6,000 value of gift − [$6,000 − ($4,000 adjusted basis of property × $6,000 value of gifts / $10,000 value of property)]).

Example 6. The facts are the same as in Example 4 except that B sells the property to the church for $6,000. Thus, B makes a charitable contribution to the church of $4,000 ($10,000 value −$6,000 amount realized). Under paragraph (b) of this section the adjusted basis for determining gain on the bargain sale is $2,400 ($4,000 adjusted basis

×$6,000 amount realized/$10,000 value of stock). Accordingly, B has a recognized short-term capital gain of $3,600 ($6,000 amount realized −$2,400 adjusted basis) on the bargain sale. After applying section 1011(b) and paragraphs (a)(1) and (c)(2)(i) of § 1.170A–4, B is allowed a charitable contributions deduction for 1970 of $1,600 ($4,000 value of gift −[$4,000 −($4,000 adjusted basis of property ×$4,000 value of gift/$10,000 value of property]).

Example 7. In 1970, C, a calendar-year individual taxpayer, sells to a church for $4,000 tangible personal property used in his business for more than 6 months which has an adjusted basis of $4,000 and a fair market value of $10,000. Thus, C makes a charitable contribution to the church of $6,000 ($10,000 value −$4,000 adjusted basis). C's contribution base for 1970, as defined in section 170(b)(1)(F) is $100,000 and during such year he makes no other charitable contributions. If C had sold the property at its fair market value at the time of its contribution, it is assumed that under section 1245 $4,000 of the gain of $6,000 ($10,000 value −$4,000 adjusted basis) would have been treated as ordinary icome. Thus, there would have been long-term capital gain of $2,000. It is also assumed that the church does not put the property to an unrelated use, as defined in paragraph (b)(3) of § 1.170A–4. Under paragraph (b) of this section the adjusted basis for determining gain on the bargain sale is $1,600 ($4,000 adjusted basis ×$4,000 amount realized/ $10,000 value of property). Accordingly, C has a recognized gain of $2,400 ($4,000 amount realized −$1,600 adjusted basis) on the bargain sale, consisting of ordinary income of $1,600 ($4,000 ordinary income ×$4,000 amount realized/$10,000 value of property) and of long-term capital gain of $800 ($2,000 long-term gain ×$4,000 amount realized/$10,000 value of property). After applying section 1011(b) and paragraphs (a) and (c)(2)(i) of § 1.170A–4, C is allowed a charitable contributions deduction for 1970 of $3,600 ($6,000 gift −[$4,000 ordinary income ×$6,000 value of gift/$10,000 value of property]).

Example 8. (a) On January 1, 1970, A, a male of age 65, transfers capital assets consisting of securities held for more than 6 months to a church in exchange for a promise by the church to pay A a nonassignable annuity of $5,000 per year for life. The annuity is payable monthly with the first payment to be made on February 1, 1970. A's contribution base for 1970, as defined in section 170(b)(1)(F), is $200,000, and during that year he makes no other charitable contributions. On the date of transfer the securities have a fair market value of $100,000 and an adjusted basis to A of $20,000.

(b) The present value of the right of a male age 65 to receive a life annuity of $5,000 per annum, payable in equal installments at the end of each monthly period, is $59,755 ($5,000 × [11.469 + 0.482]), determined in accordance with section 101(b) of the Code, paragraph (e)(1)(iii)(b)(2) of § 1.101–2, and section 3 of Rev. Rul. 62–216, C.B. 1962–2, 30. Thus, A makes a charitable contribution to the church of $40,245 ($100,000 −$59,755). See Rev. Rul. 84–162, 1984–2 C.B. 200, for transfers for which the valuation date falls after November 23, 1984. (See § 601.601(d)(2)(ii)(*b*) of this chapter). For the applicable valuation tables in connection therewith, see § 20.2031–7(d)(6) of this chapter. See, however, § 1.7520–3(b) (relating to exceptions to the use of standard actuarial factors in certain circumstances).

(c) Under paragraph (b) of this section, the adjusted basis for determining gain on the bargain sale is $11,951 ($20,000 × $59,755 / $100,000). Accordingly, A has a recognized long-term capital gain of $47,804 ($59,755 − $11,951) on the bargain sale. Such gain is to be reported by A ratably over the period of years measured by the expected return multiple under the contract, but only from that portion of the annual payments which is a return of his investment in the contract under section 72 of the Code. For such purposes, the investment in the contract is $59,755, that is, the present value of the annuity.

(d) The computation and application of the exclusion ratio, the gain, and the ordinary annuity income are as follows, determined by using the expected return multiple of 15.0 applicable under table I of § 1.72–9:

A's expected return (annual payments of $5,000 × 15)	$75,000.00
Exclusion ratio ($59,755 investment in contract divided by expected return of $75,000)	79.7%
Annual exclusion (annual payments of $5,000 × 79.7%)	$3,985.00
Ordinary annuity income ($5,000−$3,985)	$1,015.00
Long-term capital gain per year ($47,804/15) with respect to the annual exclusion	$3,186.93

(e) The exclusion ratio of 79.7 percent applies throughout the life of the contract. During the first 15 years of the annuity, A is required to report ordinary income of $1,015 and long-term capital gain of $3,186.93 with respect to the annuity payments he receives. After the total long-term capital gain of $47,804 has been reported by A, he is required to report only ordinary income of $1,015.00 per annum with respect to the annuity payments he receives.

(d) *Effective date.* This section applies only to sales and exchanges made after December 19, 1969.

(e) *Cross reference.* For rules relating to the treatment of liabilities on the sale or other disposition or encumbered property, see §1.1001–2.

[T.D. 7207, 37 FR 20798, Oct. 5, 1972, as amended by T.D. 7741, 45 FR 81745, Dec. 12, 1980; T.D. 8176, 53 FR 5570, Feb. 25, 1988; 53 FR 11002, Apr. 4, 1988; T.D. 8540, 59 FR 30148, June 10, 1994]

§1.1012–1 Basis of property.

(a) *General rule.* In general, the basis of property is the cost thereof. The cost is the amount paid for such property in cash or other property. This general rule is subject to exceptions stated in subchapter O (relating to gain or loss on the disposition of property), subchapter C (relating to corporate distributions and adjustments), subchapter K (relating to partners and partnerships), and subchapter P (relating to capital gains and losses), chapter 1 of the code.

(b) *Real estate taxes as part of cost.* In computing the cost of real property, the purchaser shall not take into account any amount paid to the seller as reimbursement for real property taxes which are treated under section 164(d) as imposed upon the purchaser. This rule applies whether or not the contract of sale calls for the purchaser to reimburse the seller for such real estate taxes paid or to be paid by the seller. On the other hand, where the purchaser pays (or assumes liability for) real estate taxes which are treated under section 164(d) as imposed upon the seller, such taxes shall be considered part of the cost of the property. It is immaterial whether or not the contract of sale specifies that the sale price has been reduced by, or is in any way intended to reflect, real estate taxes allocable to the seller under section 164(d). For illustrations of the application of this paragraph, see paragraph (b) of §1.1001–1.

(c) *Sale of stock*—(1) *In general.* If shares of stock in a corporation are sold or transferred by a taxpayer who purchased or acquired lots of stock on different dates or at different prices, and the lot from which the stock was sold or transferred cannot be adequately identified, the stock sold or transferred shall be charged against the earliest of such lots purchased or acquired in order to determine the cost or other basis of such stock and in order to determine the holding period of such stock for purposes of subchapter P, chapter 1 of the code. If, on the other hand, the lot from which the stock is sold or transferred can be adequately identified, the rule stated in the preceding sentence is not applicable. As to what constitutes ‘‘adequate identification’’, see subparagraphs (2), (3), and (4) of this paragraph.

(2) *Identification of stock.* An adequate identification is made if it is shown that certificates representing shares of stock from a lot which was purchased or acquired on a certain date or for a certain price were delivered to the taxpayer's transferee. Except as otherwise provided in subparagraph (3) or (4) of this paragraph, such stock certificates delivered to the transferee constitute the stock sold or transferred by the taxpayer. Thus, unless the requirements of subparagraph (3) or (4) of this paragraph are met, the stock sold or transferred is charged to the lot to which the certificates delivered to the transferee belong, whether or not the taxpayer intends, or instructs his broker or other agent, to sell or transfer stock from a lot purchased or acquired on a different date or for a different price.

(3) *Identification on confirmation document.* (i) Where the stock is left in the custody of a broker or other agent, an adequate identification is made if—

(*a*) At the time of the sale or transfer, the taxpayer specifies to such broker or other agent having custody of the stock the particular stock to be sold or transferred, and

(*b*) Within a reasonable time thereafter, confirmation of such specification is set forth in a written document from such broker or other agent.

Stock identified pursuant to this subdivision is the stock sold or transferred by the taxpayer, even though stock certificates from a different lot are delivered to the taxpayer's transferee.

(ii) Where a single stock certificate represents stock from different lots, where such certificate is held by the taxpayer rather than his broker or other agent, and where the taxpayer sells a part of the stock represented by such certificate through a broker or other agent, an adequate identification is made if—

(*a*) At the time of the delivery of the certificate to the broker or other agent, the taxpayer specifies to such broker or other agent the particular stock to be sold or transferred, and

(*b*) Within a reasonable time thereafter, confirmation of such specification is set forth in a written document from such broker or agent.

Where part of the stock represented by a single certificate is sold or transferred directly by the taxpayer to the purchaser or transferee instead of through a broker or other agent, an adequate identification is made if the taxpayer maintains a written record of the particular stock which he intended to sell or transfer.

(4) *Stock held by a trustee, executor, or administrator.* Where stock is held by a trustee or by an executor or administrator of an estate (and not left in the custody of a broker or other agent), an adequate identification is made if at the time of a sale, transfer, or distribution, the trustee, executor, or administrator—

(i) Specifies in writing in the books and records of the trust or estate the particular stock to be sold, transferred, or distributed, and

(ii) In the case of a distribution, also furnishes the distributee with a written document setting forth the particular stock distributed to him.

Stock identified pursuant to this subparagraph is the stock sold, transferred, or distributed by the trust or estate, even though stock certificates from a different lot are delivered to the purchaser, transferee, or distributee.

(5) *Subsequent sales.* If stock identified under subparagraph (3) or (4) of this paragraph as belonging to a particular lot is sold, transferred, or distributed, the stock so identified shall be deemed to have been sold, transferred, or distributed, and such sale, transfer, or distribution will be taken into consideration in identifying the taxpayer's remaining stock for purposes of subsequent sales, transfers, or distributions.

(6) *Bonds.* The provisions of subparagraphs (1) through (5) of this paragraph shall apply to the sale or transfer of bonds after July 13, 1965.

(7) *Book-entry securities.* (i) In applying the provisions of subparagraph (3)(i)(*a*) of this paragraph in the case of a sale or transfer of a book-entry security (as defined in subdivision (iii) (*a*) of this subparagraph) which is made after December 31, 1970, pursuant to a written instruction by the taxpayer, a specification by the taxpayer of the unique lot number which he has assigned to the lot which contains the securities being sold or transferred shall constitute specification as required by such subparagraph. The specification of the lot number shall be made either—

(*a*) In such written instruction, or

(*b*) In the case of a taxpayer in whose name the book entry by the Reserve Bank is made, in a list of lot numbers with respect to all book-entry securities on the books of the Reserve Bank sold or transferred on that date by the taxpayer, provided such list is mailed to or received by the Reserve Bank on or before the Reserve Bank's next business day.

This subdivision shall apply only if the taxpayer assigns lot numbers in numerical sequence to successive purchases of securities of the same loan title (series) and maturity date, except that securities of the same loan title (series) and maturity date which are purchased at the same price on the same date may be included within the same lot.

(ii) In applying the provisions of subparagraph (3)(i)(*b*) of this paragraph in the case of a sale or transfer of a book-entry security which is made pursuant to a written instruction by the taxpayer, a confirmation as required by such subparagraph shall be deemed made by—

(*a*) In the case of a sale or transfer made after December 31, 1970, the furnishing to the taxpayer of a written advice of transaction, by the Reserve Bank or the person through whom the taxpayer sells or transfers the securities, which specifies the amount and description of the securities sold or transferred and the date of the transaction, or

(*b*) In the case of a sale or transfer made before January 1, 1971, the furnishing of a serially-numbered advice of transaction by a Reserve Bank.

(iii) For purposes of this subparagraph:

(*a*) The term *book-entry security* means—

(*1*) In the case of a sale or transfer made after December 31, 1970, a transferable Treasury bond, note, certificate of indebtedness, or bill issued under the Second Liberty Bond Act (31 U.S.C. 774 (2)), as amended, or other security of the United States (as defined in (*b*) of this subdivision (iii)) in the form of an entry made as prescribed in 31 CFR part 306, or other comparable Federal regulations, on the records of a Reserve Bank, or

(*2*) In the case of a sale or transfer made before January 1, 1971, a transferable Treasury bond, note, certificate of indebtedness, or bill issued under the Second Liberty Bond Act, as amended, in the form of an entry made as prescribed in 31 CFR part 306, subpart O, on the records of a Reserve Bank which is deposited in an account with a Reserve Bank (*i*) as collateral pledged to a Reserve Bank (in its individual capacity) for advances by it, (*ii*) as collateral pledged to the United States under Treasury Department Circular No. 92 or 176, both as revised and amended, (*iii*) by a member bank of the Federal Reserve System for its sole account for safekeeping by a Reserve Bank in its individual capacity, (*iv*) in lieu of a surety or sureties upon the bond required by section 61 of the Bankruptcy Act, as amended (11 U.S.C. 101), of a banking institution designated by a judge of one of the several courts of bankruptcy under such section as a depository for the moneys of a bankrupt's estate, (*v*) pursuant to 6 U.S.C. 15, in lieu of a surety or sureties required in connection with any recognizance, stipulation, bond, guaranty, or undertaking which must be furnished under any law of the United States or regulations made pursuant thereto, (*vi*) by a banking institution, pursuant to a State or local law, to secure the deposit in such banking institution of public funds by a State, municipality, or other political subdivision, (*vii*) by a State bank or trust company or a national bank, pursuant to a State or local law, to secure the faithful performance of trust or other fiduciary obligations by such State bank or trust company or national bank, or (*viii*) to secure funds which are deposited or held in trust by a State bank or trust company or a national bank and are awaiting investment, but which are used by such State bank or trust company or national bank in the conduct of its business;

(*b*) The term *other security of the United States* means a bond, note, certificate of indebtedness, bill, debenture, or similar obligation which is subject to the provisions of 31 CFR part 306 or other comparable Federal regulations and which is issued by (*1*) any department or agency of the Government of the United States, or (*2*) the Federal National Mortgage Association, the Federal Home Loan Banks, the Federal Home Loan Mortgage Corporation, the Federal Land Banks, the Federal Intermediate Credit Banks, the Banks for Cooperatives, or the Tennessee Valley Authority;

(*c*) The term *serially-numbered advice of transaction* means the confirmation (prescribed in 31 CFR 306.116) issued by the Reserve Bank which is identifiable by a unique number and indicates that a particular written instruction to the Reserve Bank with respect to the deposit or withdrawal of a specified book-entry security (or securities) has been executed; and

(*d*) The term *Reserve Bank* means a Federal Reserve Bank and its branches acting as Fiscal Agent of the United States.

(d) *Obligations issued as part of an investment unit.* For purposes of determining the basis of the individual elements of an investment unit (as defined in paragraph (b)(2)(ii)(*a*) of §1.1232–3) consisting of an obligation and an option (which is not an excluded option under paragraph (b)(1)(iii)(*c*) of §1.1232–3), security, or other property, the cost of such investment unit shall be allocated to such individual elements on the basis of their respective fair market values. In the case of the initial issuance of an investment unit consisting of an obligation and an option, security, or other property, where neither the obligation nor the option, security, or other property has a readily ascertainable fair market value, the portion of the cost of the unit which is allocable to the obligation shall be an amount equal to the issue price of the obligation as determined under paragraph (b)(2)(ii)(*a*) of § 1.1232–3.

(e) *Election as to certain regulated investment company stock*—(1) *General rule*—(i) *In general.* Notwithstanding paragraph (c) of this section, and except as provided in subdivision (ii) of this subparagraph, if—

(*a*) Shares of stock of a regulated investment company (as defined in subparagraph (5) of this paragraph) are left by a taxpayer in the custody of a custodian or agent in an account maintained for the acquisition or redemption of shares of such company, and

(*b*) The taxpayer purchased or acquired shares of stock held in the account at different prices or bases, the taxpayer may elect to determine the cost or other basis of shares of stock he sells or transfers from such account by using one of the methods described in subparagraphs (3) and (4) of this paragraph. The cost or other basis determined in accordance with either of such methods shall be known as the *average basis.* For purposes of this paragraph, securities issued by unit investment trusts shall be treated as shares of stock and the term *share* or *shares* shall include fractions of a share.

(ii) *Certain gift shares.* (*a*) Except as provided in subdivision (*b*) of this subdivision (ii), this paragraph shall not apply to any account which contains shares which were acquired by the taxpayer by gift after December 31, 1920, if the basis of such shares (adjusted for the period before the date of the gift as provided in section 1016) in the hands of the donor or the last preceding owner by whom it was not acquired by gift was greater than the fair market value of such shares at the time of the gift. However, shares acquired by a taxpayer as a result of a taxable dividend or a capital gain distribution from such an account may be included in an account to which this paragraph applies.

(*b*) Notwithstanding the provisions of subdivision (*a*) of this subdivision (ii), this paragraph shall apply with respect to accounts containing gift shares described in such subdivision (*a*) if, at the time the election described in this paragraph is made in the manner prescribed in subparagraph (6) of this paragraph, the taxpayer includes a statement, in writing, indicating that the basis of such gift shares shall be the fair market value of such gift shares at the time they were acquired by the taxpayer by gift and that such basis shall be used in computing average basis in the manner described in subparagraph (3) or (4) of this paragraph. Such statement shall be effective with respect to gift shares acquired prior to making such election and with respect to gift shares acquired after such time and shall remain in effect so long as such election remains in effect.

(2) *Determination of average basis.* Average basis shall be determined using either the method described in subparagraph (3) of this paragraph (the double-category method) or the method described in subparagraph (4) of this paragraph (the single-category method). The taxpayer shall specify, in the manner described in subparagraph (6) of this paragraph, the method used. Such method shall be used with respect to an account until such time as the election is revoked with the consent of the Commissioner. Although a taxpayer may specify different methods with respect to accounts in different regulated investment companies, the same method shall be used with respect to all of the taxpayer's accounts in the same regulated investment company.

(3) *Double-category method*—(i) *In general.* In determining average basis using the double category method, all shares in an account at the time of each sale or transfer shall be divided into two categories. The first category shall include all shares in such account having, at the time of the sale or transfer, a holding period of more than 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) (the ''more-than 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)'' category), and the second category shall include all shares in such account having, at such time, a holding period of 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) or less (the ''1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less'' category). The cost or other basis of each

share in a category shall be an amount equal to the remaining aggregate cost or other basis of all shares in that category at the time of the sale or transfer divided by the aggregate number of shares in that category at such time.

(ii) *Order of disposition of shares old or transferred.* Prior to a sale or transfer of shares from such an account, the taxpayer may specify, to the custodian or agent having custody of the account, from which category (described in subdivision (i) of this subparagraph) the shares are to be sold or transferred. Shares shall be deemed sold or transferred from the category specified without regard to the stock certificates, if any, actually delivered if, within a reasonable time thereafter, confirmation of such specification is set forth in a written document from the custodian or agent having custody of the account. In the absence of such specification or confirmation, shares sold or transferred shall be charged against the more-than-1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) category. However, if the number of shares sold or transferred exceeds the number in such category, the additional shares sold or transferred shall be charged against the shares in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category. Any gain or loss attributable to a sale or transfer which is charged against shares in the more-than-1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) category shall constitute long-term gain or loss, and any gain or loss attributable to a sale or transfer which is charged against shares in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category shall constitute short-term gain or loss. As to adjustments from wash sales, see section 1091(d) and subdivisions (iii) (*c*) and (*d*) of this subparagraph.

(iii) *Special rules with respect to shares from the 1 year-or-less category. (a)* After the taxpayer's holding period with respect to a share is more than 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977), such share shall be changed from the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category to the more-than 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) category. For purposes of such change, the basis of a changed share shall be its actual cost or other basis to the taxpayer or its basis determined in accordance with the rules contained in subdivision (*b*)(*2*) of this subdivision (iii) if the rules of such subdivision (*b*)(*2*) are applicable.

(*b*) If, during the period that shares are in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category some but not all of the shares in such category are sold or transferred, then—

(*1*) The shares sold or transferred (the basis of which was determined in the manner prescribed by subdivision (i) of this subparagraph) shall be assumed to be those shares in such category which were earliest purchased or acquired, and

(*2*) The basis of those shares which are not sold or transferred and which are changed from the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category to the more-than-1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977) category shall be the average basis of the shares in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category at the time of the most recent sale or transfer of shares from such category. For such purposes, the average basis shall be determined in the manner prescribed in subdivision (i) of this subparagraph.

(*c*) Paragraph (a) of §1.1091–2 contains examples which illustrate the general application of section 1091(d), relating to unadjusted basis in the case of a wash sale of stock. However, in the case of certain wash sales of stock from the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category, the provisions of section 1091(d) shall be applied in the manner described in subdivision (*d*) of this subdivision (iii).

(*d*) In the case of a wash sale of stock (determined in accordance with the provisions of section 1091) from the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category which occurs after the acquisition of shares of stock into such category, the aggregate cost or other basis of all shares remaining in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category after such sale shall be increased by the amount of the loss which is not deductible because of the provisions of section 1091 and the regulations thereunder. The provisions of this subdivision may be illustrated by the following example:

Example: Assume the following acquisitions to, and sale from, the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category:

1-YEAR (6-MONTHS FOR TAXABLE YEARS BEGINNING BEFORE 1977; 9-MONTHS FOR TAXABLE YEARS BEGINNING IN 1977)-OR-LESS CATEGORY

Date	Action	Number shares	Price/ share	Aggregate
1–5–71	Purchase	10	$110	$1,100
2–5–71	do	10	100	1,000
3–5–71	do	10	90	900
Average		30	100	3,000
3–15–71	Sale	10	90	900
	Loss	10	10	100

In this example, the unadjusted basis of the shares remaining in the account after the sale is $2,000 (aggregate basis of $3,000 before the sale, less $1,000, the aggregate basis of the shares sold after the averaging of costs). The adjusted basis of the shares remaining in the 1-year (6-months for taxable years beginning before 1977; 9-months for taxable years beginning in 1977)-or-less category after the sale and after adjustment is $2,100 (the unadjusted basis of $2,000, plus the $100 loss resulting from the sale).

(4) *Single-category method*—(i) *In general.* In determining average basis using the single-category method, the cost or other basis of all shares in an account at the time of each sale or transfer (whether such shares have a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977)-or-less) shall be used in making the computation. The cost or other basis of each share in such account shall be an amount equal to the remaining aggregate cost or other basis of all shares in such account at the time of the sale or transfer divided by the aggregate number of shares in such account at such time.

(ii) *Order of disposition of shares sold or transferred.* In the case of the sale or transfer of shares from an account to which the election provided by this paragraph applies, and with respect to which the taxpayer has specified that he uses the single-category method of determining average basis, shares sold or transferred shall be deemed to be those shares first acquired. Thus, when shares are sold or transferred from an account such shares will be those with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) to the extent that such account contains shares with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). If the number of shares sold or transferred exceeds the number of shares in the account with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), any such excess shares sold or transferred will be deemed to be shares with a holding period of 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less. Any gain or loss attributable to shares held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) shall constitute long-term gain or loss, and any gain or loss attributable to shares held for 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less shall constitute short-term gain or loss. For example, if a taxpayer sells or transfers

50 shares from an account containing 100 shares with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and 100 shares with a holding period of 6 months or less, all of the shares sold or transferred will be deemed to be shares with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). If, however, the account contains 40 shares with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and 100 shares with a holding period of 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less, the taxpayer will be deemed to have sold or transferred 40 shares with a holding period of more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and 10 shares with a holding period of 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) or less.

(iii) *Restriction on use of single-category method.* The single-category method of determining average basis shall not be used where it appears from the facts and circumstances that a purpose of using such single-category method is to convert long-term capital gains or losses to short-term capital gains or losses or to convert short-term capital gains or losses to long-term capital gains or losses.

(iv) *Wash sales.* The provisions of section 1091(d) (relating to unadjusted basis in the case of a wash sale of stock) and the regulations thereunder shall apply in the case of wash sales of stock from an account with respect to which the single-category method of determining average basis is being used.

(5) *Definition.* (i) For purposes of this paragraph, a *regulated investment company* means any domestic corporation (other than a personal holding company as defined in section 542) which meets the limitations of section 851(b) and § 1.851–2, and which is registered at all times during the taxable year under the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 to 80b–2), either as a management company, or as a unit investment trust.

(ii) Notwithstanding subdivision (i), this paragraph shall not apply in the case of a unit investment trust unless it is one—

(*a*) Substantially all of the assets of which consist (*1*) of securities issued by a single management company (as defined in such Act) and securities acquired pursuant to subdivision (*b*) of this subdivision (ii), or (*2*) securities issued by a single other corporation, and

(*b*) Which has no power to invest in any other securities except securities issued by a single other management company, when permitted by such Act or the rules and regulations of the Securities and Exchange Commission.

(6) *Election.* (i) An election to adopt one of the methods described in this paragraph shall be made in an income tax return for the first taxable year ending on or after December 31, 1970, for which the taxpayer desires the election to apply. If the taxpayer does not file a timely return (taking into account extensions of the time for filing) for such taxable year, the election shall be filed at the time the taxpayer files his first return for such year. The election may be made with an amended return only if such amended return is filed no later than the time prescribed by law (including extensions thereof) for filing the return for such taxable year. If the election is made, the taxpayer shall clearly indicate on his income tax return for each year to which the election is applicable that an average basis has been used in reporting gain or loss from the sale or transfer of shares sold or transferred. In addition, the taxpayer shall specify on such return the method (either the single-category method or the double-category method) used in determining average basis. The taxpayer shall also indicate in a statement described in subparagraph (1)(ii)(*b*) of this paragraph if the election is to apply to accounts described in subparagraph (1)(ii) of this paragraph. Such statement shall be attached to, or incorporated in, such return. A taxpayer making the election shall maintain such records as are necessary to substantiate the average

basis (or bases) used on his income tax return.

(ii) An election made with respect to some of the shares of a regulated investment company sold or transferred from an account described in subparagraph (1)(i) of this paragraph applies to all such shares in the account. Such election also applies to all shares of that regulated investment company held in other such accounts (i.e., those described in subparagraph (1)(i) of this paragraph) by the electing taxpayer for his own benefit. Thus, the election shall apply to all shares of the regulated investment company held by the electing taxpayer (for his own benefit) in such accounts on or after the first day of the first taxable year for which the election is made. Such election does not apply to shares held in accounts described in subparagraph (1)(ii) of this paragraph unless the taxpayer indicates, in the manner described in subdivision (i) of this subparagraph, that the election is to apply to shares held in such accounts. An election made pursuant to the provisions of this paragraph may not be revoked without the prior written permission of the Commissioner.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) On January 11, 1971, taxpayer A, who files his income tax return on a calendar year basis, enters into an agreement with the W Bank establishing an account for the periodic acquisition of shares of the Y Company, an open-end mutual fund. The agreement provides (1) that the bank is to purchase, for A, shares of Y stock as A may from time to time direct, (2) that all shares in the account are to be left in the custody of the bank, and (3) that the bank is to reinvest any dividends paid by Y (including capital gain dividends) in additional shares of Y stock. Pursuant to the agreement, on January 11, 1971, February 1, 1971, and March 1, 1971, respectively, the bank purchases, at A's direction, 100 shares of Y stock for a total of $1,880, 20 shares of Y stock for a total of $400, and 20 shares of Y stock for a total of $410. On March 15, 1971, the bank reinvests a $1-per-share capital gain dividend (that is, a total of $140) in seven additional shares of Y stock. The acquisitions to A's account, are, therefore, as follows:

Date	Number of shares	Basis
January 11, 1971	100	$1,880
February 1, 1971	20	400
March 1, 1971	20	410
March 15, 1971	7	140

On August 20, 1971, at A's direction, the bank redeems (i.e., sells) 40 shares of Y stock, and on September 20, 1971, 30 shares. A elects to determine the gain or loss from the sales of the stock by reference to its average basis using the double-category method of determining average basis. A did not specify from which category the sales were to take place, and therefore, each sale is deemed to have been made from the more-than-6-months category.

(ii) The average basis for the shares sold on August 20, 1971, is $19, and the total average basis for the 40 shares which are sold is $760, computed as follows:

Number of shares in the more-than-6-months category at the time of sale	Basis
100	$1,880
20	400
Total 120	2,280

Average cost or other basis: $2,280 ÷ 120 = $19.40 shares × $19 each = $760, total average basis. Therefore, after the sale on August 20, 1971, 80 shares remain in the more-than-6-months category, and their remaining aggregate cost is $1,520.

(iii) The average basis for the shares sold on September 20, 1971, must reflect the sale which was made on August 20, 1971. Accordingly, such average basis would be $19.35 and may be computed as follows:

Number of shares in the more-than-6-months category at the time of sale	Basis
80	$1,520
20	410
7	140
Total 107	2,070

Average cost or other basis: $2,070 ÷ 107 shares = $19.35 (to the nearest cent).

Example 2. Taxpayer B, who files his income tax returns on a calendar year basis, enters into an agreement with the X Bank establishing an account for the periodic acquisition of shares of the Z Company, an open-end mutual fund. X acquired for B's account shares of Z on the following dates in the designated amounts:

January 15, 1971	50 shares.
February 16, 1971	30 shares.
March 15, 1971	25 shares.

Pursuant to B's direction, the Bank redeemed (i.e., sold) 25 shares from the account on February 1, 1971, and 20 shares on April 1, 1971, for a total of 45 shares. All of such shares had been held for less than 6 months. B elects to determine the gain or loss from the sales of the stock by reference to its average basis using the double-category method of determining average basis. Thus, the 45 shares which were sold are assumed to be from the 50 shares which were purchased on January 15, 1971. Accordingly, on July 16, 1971, only five shares from those shares which had been purchased on January 15, 1971, remain to be transferred from the 6-months-or-less category to the more- than-6-months category. The basis of such five shares for purposes of the change to the more-than-6-months category would be the average basis of the shares in the 6-months-or-less category at the time of the sale on April 1, 1971.

Example 3. Assume the same facts as in example (2), except that an additional sale of 18 shares was made on May 3, 1971. There were, therefore, a total of 63 shares sold during the 6-month period beginning on January 15, 1971, the date of the earliest purchase. Fifty of the shares which were sold during such period shall be assumed to be the shares purchased on January 15, 1971, and the remaining 13 shares shall be assumed to be from the shares which were purchased on February 16, 1971. Thus, none of the shares which were purchased on January 15, 1971, remain to be changed from the 6-months-or-less category to the more-than-6-months category. In the absence of further dispositions of shares during the 6-month holding period for the shares purchased on February 16, 1971, there would be 17 of such shares to be changed over after the expiration of that period since 13 of the shares sold on May 3, 1971, were assumed to be from the shares purchased on February 16, 1971. The basis of the 17 shares for purposes of the change to the more-than-6-months category would be the average basis of the shares in the 6-months-or-less category at the time of the sale on May 3, 1971.

Example 4. Taxpayer C, who files his income tax returns on a calendar year basis, enters into an agreement with Y Bank establishing an account for the periodic acquisition of XYZ Company, a closed-end mutual fund. Y acquired for B's account shares of XYZ on the following dates in the designated amounts:

Date	Number of shares	Cost
January 8, 1971	25	$200
February 8, 1971	24	200
March 8, 1971	23	200
April 8, 1971	23	200

Pursuant to C's direction, the bank redeemed (i.e., sold) 40 shares from the account on July 15, 1971, for $10 per share or a total of $400. C elects to determine the gain or loss from the sale of the stock by reference to its average basis using the single-category method of determining average basis. The average basis for the shares sold on July 15, 1971 (determined by dividing the total number of shares in the account at such time (95) into the aggregate cost of such shares ($800)) is $8.42 (to the nearest cent). Under the rules of subparagraph (4) of this paragraph the shares sold would be deemed to be those first acquired. Thus, C would realize a $39.50 ($1.58 × 25) long-term capital gain with respect to the 25 shares acquired on January 8, 1971, and he would realize a $23.70 ($1.58 × 15 short-term capital gain with respect to 15 of the shares acquired on February 8, 1971. The next sale occurred on August 16, 1971. At that time, absent further intervening acquisitions or dispositions, the account contained nine shares (the 24 shares acquired on February 8, 1971, less 15 of such shares which were sold on July 15, 1971) with a holding period of more than 6 months, and 46 shares with a holding period of 6 months or less.

Example 5. Taxpayer D owns four separate accounts (D–1, D–2, D–3, and D–4) for the periodic acquisition of shares of the Y Company, an open-end mutual fund. Account D–4 contains shares which D acquired by gift on April 15, 1970. These shares had an adjusted basis in the hands of the donor which was greater than the fair market value of the donated shares on such date. For his taxable year ending on December 31, 1971, D elects to use an average basis for shares sold from account D–1 during such year using the single-category method of determining average basis. Under the provisions of subparagraph (1)(ii) of this paragraph, D may use an average basis for shares sold or transferred from account D–4 if he includes with his statement of election a statement, in writing, indicating that the basis of such gift shares in account D–4 shall be the fair market value of such shares at the time he acquired such shares and that such basis shall be used in computing the average basis of shares in account D–4. In addition, since D elected to use an average basis for shares sold from account D–1, he must also use an average basis for all shares sold or transferred from accounts D–2 and D–3 (as well as account D–1) for his taxable year ending on December 31, 1971, and for all subsequent years until he revokes (with the consent of the Commissioner) his election to use an average basis for such accounts. Further, D must use the single-category method of determining average basis with respect to accounts D–2, D–3 (and D–4 if the above-mentioned statement is filed).

(f) *Special rules.* For special rules for determining the basis for gain or loss in the case of certain vessels acquired through the Maritime Commission (or its successors) or pursuant to an agreement with the Secretary of Commerce, see sections 510, 511, and 607 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1160, 1161) and parts 2 and 3 of this chapter. For special rules for determining the unadjusted basis of property recovered in respect of war losses, see section 1336. For special rules with respect to taxable years beginning before January 1, 1964, for determining the basis for gain or loss in the case of a disposition of a share of stock acquired pursuant to the timely exercise of a restricted stock option where the option price was between 85 percent and 95 percent of the fair market value of the stock at the time the option was granted, see paragraph (b) of § 1.421–5. See section 423(c)(1) or 424(c)(1), whichever is applicable, for special rules with respect to taxable years ending after December 31, 1963, for determining the basis for gain or loss in the case of the disposition of a share of stock acquired pursuant to the timely exercise of a stock option described in such sections. See section 422(c)(1) for special rules with respect to taxable years ending after December 31, 1963, for determining the basis for gain or loss in the case of an exercise of a qualified stock option.

(g) *Debt instruments issued in exchange for property*—(1) *In general.* For purposes of paragraph (a) of this section, if a debt instrument is issued in exchange for property, the cost of the property that is attributable to the debt instrument is the issue price of the debt instrument as determined under § 1.1273–2 or § 1.1274–2, whichever is applicable. If, however, the issue price of the debt instrument is determined under section 1273(b)(4), the cost of the property attributable to the debt instrument is its stated principal amount reduced by any unstated interest (as determined under section 483).

(2) *Certain tax-exempt obligations.* This paragraph (g)(2) applies to a tax-exempt obligation (as defined in section 1275(a)(3)) that is issued in exchange for property and that has an issue price determined under § 1.1274–2(j) (concerning tax-exempt contingent payment obligations and certain tax-exempt variable rate debt instruments subject to section 1274). Notwithstanding paragraph (g)(1) of this section, if this paragraph (g)(2) applies to a tax-exempt obligation, for purposes of paragraph (a) of this section, the cost of the property that is attributable to the obligation is the sum of the present values of the noncontingent payments (as determined under § 1.1274–2(c)).

(3) *Effective date.* This paragraph (g) applies to sales or exchanges that occur on or after August 13, 1996.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.1012–1, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 1.1012–2 Transfers in part a sale and in part a gift.

For rules relating to basis of property acquired in a transfer which is in part a gift and in part a sale, see §§ 1.170A–4(c), 1.1011–2(b), and § 1.105–4.

[T.D. 7207, 37 FR 20799, Oct. 5, 1972]

§ 1.1013–1 Property included in inventory.

The basis of property required to be included in inventory is the last inventory value of such property in the hands of the taxpayer. The requirements with respect to the valuation of an inventory are stated in subpart D (section 471 and following), part II, subchapter E, chapter 1 of the Code, and the regulations thereunder.

§ 1.1014–1 Basis of property acquired from a decedent.

(a) *General rule.* The purpose of section 1014 is, in general, to provide a basis for property acquired from a decedent which is equal to the value placed upon such property for purposes of the Federal estate tax. Accordingly, the general rule is that the basis of property acquired from a decedent is the fair market value of such property at the date of the decedent's death, or, if the decedent's executor so elects, at the alternate valuation date prescribed in section 2032, or in section 811(j) of the Internal Revenue Code of 1939. Property acquired from a decedent includes, principally, property acquired by bequest, devise, or inheritance, and, in the case of decedents dying after December 31, 1953, property required to be included in determining the value of the decedent's gross estate under any provision of the Internal Revenue Code of 1954 or the Internal Revenue Code of 1939. The general rule governing basis of property acquired from a decedent, as well as other rules prescribed elsewhere in this section, shall have no application if the property is sold, exchanged, or otherwise disposed of before the decedent's death by the person who acquired the property from the decedent. For general rules on the applicable valuation date where the executor of a decedent's estate elects under section 2032, or under section 811(j) of the Internal Revenue Code of 1939, to value the decedent's gross estate at the alternate valuation date prescribed in such sections, see paragraph (e) of §1.1014–3.

(b) *Scope and application.* With certain limitations, the general rule described in paragraph (a) of this section is applicable to the classes of property described in paragraphs (a) and (b) of §1.1014–2, including stock in a DISC or former DISC. In the case of stock in a DISC or former DISC, the provisions of this section and §§1.1014–2 through 1.1014–8 are applicable, except as provided in §1.1014–9. Special basis rules with respect to the basis of certain other property acquired from a decedent are set forth in paragraph (c) of §1.1014–2. These special rules concern certain stock or securities of a foreign personal holding company and the surviving spouse's one-half share of community property held with a decedent dying after October 21, 1942, and on or before December 31, 1947. In this section and §§1.1014–2 to 1.1014–6, inclusive, whenever the words *property acquired from a decedent* are used, they shall also mean *property passed from a decedent,* and the phrase *person who acquired it from the decedent* shall include the *person to whom it passed from the decedent.*

(c) *Property to which section 1014 does not apply.* Section 1014 shall have no application to the following classes of property:

(1) Property which constitutes a right to receive an item of income in respect of a decedent under section 691; and

(2) Restricted stock options described in section 421 which the employee has not exercised at death if the employee died before January 1, 1957. In the case of employees dying after December 31, 1956, see paragraph (d)(4) of §1.421–5. In the case of employees dying in a taxable year ending after December 31, 1963, see paragraph (c)(4) of §1.421–8 with respect to an option described in part II of subchapter D.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6527, 26 FR 413, Jan. 19, 1961; T.D. 6887, 31 FR 8812, June 24, 1966; T.D. 7283, 38 FR 20825, Aug. 3, 1973]

§1.1014–2 Property acquired from a decedent.

(a) *In general.* The following property, except where otherwise indicated, is considered to have been acquired from a decedent and the basis thereof is determined in accordance with the general rule in §1.1014–1:

(1) Without regard to the date of the decedent's death, property acquired by bequest, devise, or inheritance, or by the decedent's estate from the decedent, whether the property was acquired under the decedent's will or under the law governing the descent and distribution of the property of decedents. However, see paragraph (c)(1) of this section if the property was acquired by bequest or inheritance from a decedent dying after August 26, 1937, and if such property consists of stock or securities of a foreign personal holding company.

(2) Without regard to the date of the decedent's death, property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent, with the right reserved to the decedent at all times before his death to revoke the trust.

(3) In the case of decedents dying after December 31, 1951, property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent with the right reserved to the decedent at all times before his death to make any change in the enjoyment thereof through the exercise of a power to alter, amend, or terminate the trust.

(4) Without regard to the date of the decedent's death, property passing without full and adequate consideration under a general power of appointment exercised by the decedent by will.

(See section 2041(b) for definition of general power of appointment.)

(5) In the case of decedents dying after December 31, 1947, property which represents the surviving spouse's one-half share of community property held by the decedent and the surviving spouse under the community property laws of any State, Territory, or possession of the United States or any foreign country, if at least one-half of the whole of the community interest in that property was includible in determining the value of the decedent's gross estate under part III, chapter 11 of the Internal Revenue Code of 1954 (relating to the estate tax) or section 811 of the Internal Revenue Code of 1939. It is not necessary for the application of this subparagraph that an estate tax return be required to be filed for the estate of the decedent or that an estate tax be payable.

(6) In the case of decedents dying after December 31, 1950, and before January 1, 1954, property which represents the survivor's interest in a joint and survivor's annuity if the value of any part of that interest was required to be included in determining the value of the decedent's gross estate under section 811 of the Internal Revenue Code of 1939. It is necessary only that the value of a part of the survivor's interest in the annuity be includible in the gross estate under section 811. It is not necessary for the application of this subparagraph that an estate tax return be required to be filed for the estate of the decedent or that an estate tax be payable.

(b) *Property acquired from a decedent dying after December 31, 1953*—(1) *In general.* In addition to the property described in paragraph (a) of this section, and except as otherwise provided in subparagraph (3) of this paragraph, in the case of a decedent dying after December 31, 1953, property shall also be considered to have been acquired from the decedent to the extent that both of the following conditions are met: (i) The property was acquired from the decedent by reason of death, form of ownership, or other conditions (including property acquired through the exercise or non-exercise of a power of appointment), and (ii) the property is includible in the decedent's gross estate under the provisions of the Internal Revenue Code of 1954, or the Internal Revenue Code of 1939, because of such acquisition. The basis of such property in the hands of the person who acquired it from the decedent shall be determined in accordance with the general rule in § 1.1014–1. See, however, § 1.1014–6 for special adjustments if such property is acquired before the death of the decedent. See also subparagraph (3) of this paragraph for a description of property not within the scope of this paragraph.

(2) *Rules for the application of subparagraph (1) of this paragraph.* Except as provided in subparagraph (3) of this paragraph, this paragraph generally includes all property acquired from a decedent, which is includible in the gross estate of the decedent if the decedent died after December 31, 1953. It is not necessary for the application of this paragraph that an estate tax return be required to be filed for the estate of the decedent or that an estate tax be payable. Property acquired prior to the death of a decedent which is includible in the decedent's gross estate, such as property transferred by a decedent in contemplation of death, and property held by a taxpayer and the decedent as joint tenants or as tenants by the entireties is within the scope of this paragraph. Also, this paragraph includes property acquired through the exercise or nonexercise of a power of appointment where such property is includible in the decedent's gross estate. It does not include property not includible in the decedent's gross estate such as property not situated in the United States acquired from a nonresident who is not a citizen of the United States.

(3) *Exceptions to application of this paragraph.* The rules in this paragraph are not applicable to the following property:

(i) Annuities described in section 72;

(ii) Stock or securities of a foreign personal holding company as described in section 1014(b)(5) (see paragraph (c)(1) of this section);

(iii) Property described in any paragraph other than paragraph (9) of section 1014(b). See paragraphs (a) and (c) of this section.

In illustration of subdivision (ii), assume that A acquired by gift stock of a character described in paragraph (c)(1) of this section from a donor and upon the death of the donor the stock was includible in the donor's estate as being a gift in contemplation of death. A's basis in the stock would not be determined by reference to its fair market value at the donor's death under the general rule in section 1014(a). Furthermore, the special basis rules prescribed in paragraph (c)(1) of this section are not applicable to such property acquired by gift in contemplation of death. It will be necessary to refer to the rules in section 1015(a) to determine the basis.

(c) *Special basis rules with respect to certain property acquired from a decedent*—(1) *Stock or securities of a foreign personal holding company.* The basis of certain stock or securities of a foreign corporation which was a foreign personal holding company with respect to its taxable year next preceding the date of the decedent's death is governed by a special rule. If such stock was acquired from a decedent dying after August 26, 1937, by bequest or inheritance, or by the decedent's estate from the decedent, the basis of the property in the hands of the person who so acquired it (notwithstanding any other provision of section 1014) shall be the fair market value of such property at the date of the decedent's death or the adjusted basis of the stock in the hands of the decedent, whichever is lower.

(2) *Spouse's interest in community property of decedent dying after October 21, 1942, and on or before December 31, 1947.* In the case of a decedent dying after October 21, 1942, and on or before December 31, 1947, a special rule is provided for determining the basis of such part of any property, representing the surviving spouse's one-half share of property held by the decedent and the surviving spouse under the community property laws of any State, Territory, or possession of the United States or any foreign country, as was included in determining the value of the decedent's gross estate, if a tax under chapter 3 of the Internal Revenue Code of 1939 was payable upon the decedent's net estate. In such case the basis shall be the fair market value of such part of the property at the date of death (or the optional valuation elected under section 811(j) of the Internal Revenue Code of 1939) or the adjusted basis of the property determined without regard to this subparagraph, whichever is the higher.

§1.1014–3 Other basis rules.

(a) *Fair market value.* For purposes of this section and §1.1014–1, the value of property as of the date of the decedent's death as appraised for the purpose of the Federal estate tax or the alternate value as appraised for such purpose, whichever is applicable, shall be deemed to be its fair market value. If no estate tax return is required to be filed under section 6018 (or under section 821 or 864 of the Internal Revenue Code of 1939), the value of the property appraised as of the date of the decedent's death for the purpose of State inheritance or transmission taxes shall be deemed to be its fair market value and no alternate valuation date shall be applicable.

(b) *Property acquired from a decedent dying before March 1, 1913.* If the decedent died before March 1, 1913, the fair market value on that date is taken in lieu of the fair market value on the date of death, but only to the same extent and for the same purposes as the fair market value on March 1, 1913, is taken under section 1053.

(c) *Reinvestments by a fiduciary.* The basis of property acquired after the death of the decedent by a fiduciary as an investment is the cost or other basis of such property to the fiduciary, and not the fair market value of such property at the death of the decedent. For example, the executor of an estate purchases stock of X company at a price of $100 per share with the proceeds of the sale of property acquired from a decedent. At the date of the decedent's death the fair market value of such stock was $98 per share. The basis of such stock to the executor or to a legatee, assuming the stock is distributed, is $100 per share.

(d) *Reinvestments of property transferred during life.* Where property is transferred by a decedent during life and the property is sold, exchanged, or otherwise disposed of before the decedent's death by the person who acquired the property from the decedent, the general rule stated in paragraph (a) of § 1.1014–1 shall not apply to such property. However, in such a case, the basis of any property acquired by such donee in exchange for the original property, or of any property acquired by the donee through reinvesting the proceeds of the sale of the original property, shall be the fair market value of the property thus acquired at the date of the decedent's death (or applicable alternate valuation date) if the property thus acquired is properly included in the decedent's gross estate for Federal estate tax purposes. These rules also apply to property acquired by the donee in any further exchanges or in further reinvestments. For example, on January 1, 1956, the decedent made a gift of real property to a trust for the benefit of his children, reserving to himself the power to revoke the trust at will. Prior to the decedent's death, the trustee sold the real property and invested the proceeds in stock of the Y company at $50 per share. At the time of the decedent's death, the value of such stock was $75 per share. The corpus of the trust was required to be included in the decedent's gross estate owing to his reservation of the power of revocation. The basis of the Y company stock following the decedent's death is $75 per share. Moreover, if the trustee sold the Y Company stock before the decedent's death for $65 a share and reinvested the proceeds in Z company stock which increased in value to $85 per share at the time of the decedent's death, the basis of the Z company stock following the decedent's death would be $85 per share.

(e) *Alternate valuation dates.* Section 1014(a) provides a special rule applicable in determining the basis of property described in § 1.1014–2 where—

(1) The property is includible in the gross estate of a decedent who died after October 21, 1942, and

(2) The executor elects for estate tax purposes under section 2032, or section 811(j) of the Internal Revenue Code of 1939, to value the decedent's gross estate at the alternate valuation date prescribed in such sections.

In those cases, the value applicable in determining the basis of the property is not the value at the date of the decedent's death but (with certain limitations) the value at the date one year after his death if not distributed, sold, exchanged, or otherwise disposed of in the meantime. If such property was distributed, sold, exchanged, or otherwise disposed of within one year after the date of the decedent's death by the person who acquired it from the decedent, the value applicable in determining the basis is its value as of the date of such distribution, sale, exchange, or other disposition. For illustrations of the operation of this paragraph, see the estate tax regulations under section 2032.

§ 1.1014–4 Uniformity of basis; adjustment to basis.

(a) *In general.* (1) The basis of property acquired from a decedent, as determined under section 1014(a), is uniform in the hands of every person having possession or enjoyment of the property at any time under the will or other instrument or under the laws of descent and distribution. The principle of uniform basis means that the basis of the property (to which proper adjustments must, of course, be made) will be the same, or uniform, whether the property is possessed or enjoyed by the executor or administrator, the heir, the legatee or devisee, or the trustee or beneficiary of a trust created by a will or an inter vivos trust. In determining the amount allowed or allowable to a taxpayer in computing taxable income as deductions for depreciation or depletion under section 1016(a)(2), the uniform basis of the property shall at all times be used and adjusted. The sale, exchange, or other disposition by a life tenant or remainderman of his interest in property will, for purposes of this section, have no effect upon the uniform basis of the property in the hands of those who acquired it from the decedent. Thus, gain or loss on sale of trust assets by the trustee will be determined without regard to the prior sale of any interest in the property. Moreover, any adjustment for depreciation shall be made to the uniform basis of the property without regard to such prior sale, exchange, or other disposition.

(2) Under the law governing wills and the distribution of the property of decedents, all titles to property acquired by bequest, devise, or inheritance relate back to the death of the decedent, even though the interest of the person taking the title was, at the date of death of the decedent, legal, equitable, vested, contingent, general, specific, residual, conditional, executory, or otherwise. Accordingly, there is a common acquisition date for all titles to property acquired from a decedent within the meaning of section 1014, and, for this reason, a common or uniform basis for all such interests. For example, if distribution of personal property left by a decedent is not made until one year after his death, the basis of such property in the hands of the legatee is its fair market value at the time when the decedent died, and not when the legatee actually received the property. If the bequest is of the residue to trustees in trust, and the executors do not distribute the residue to such trustees until five years after the death of the decedent, the basis of each piece of property left by the decedent and thus received, in the hands of the trustees, is its fair market value at the time when the decedent dies. If the bequest is to trustees in trust to pay to A during his lifetime the income of the property bequeathed, and after his death to distribute such property to the survivors of a class, and upon A's death the property is distributed to the taxpayer as the sole survivor, the basis of such property, in the hands of the taxpayer, is its fair market value at the time when the decedent died. The purpose of the Code in prescribing a general uniform basis rule for property acquired from a decedent is, on the one hand, to tax the gain, in respect of such property, to him who realizes it (without regard to the circumstances that at the death of the decedent it may have been quite uncertain whether the taxpayer would take or gain anything); and, on the other hand, not to recognize as gain any element of value resulting solely from the circumstance that the possession or enjoyment of the taxpayer was postponed. Such postponement may be, for example, until the administration of the decedent's estate is completed, until the period of the possession or enjoyment of another has terminated, or until an uncertain event has happened. It is the increase or decrease in the value of property reflected in a sale or other disposition which is recognized as the measure of gain or loss.

(3) The principles stated in subparagraphs (1) and (2) of this paragraph do not apply to property transferred by an executor, administrator or trustee, to an heir, legatee, devisee or beneficiary under circumstances such that the transfer constitutes a sale or exchange. In such a case, gain or loss must be recognized by the transferor to the extent required by the revenue laws, and the transferee acquires a basis equal to the fair market value of the property on the date of the transfer. Thus, for example, if the trustee of a trust created by will transfers to a beneficiary, in satisfaction of a specific bequest of $10,000, securities which had a fair market value of $9,000 on the date of the decedent's death (the applicable valuation date) and $10,000 on the date of the transfer, the trust realizes a taxable gain of $1,000 and the basis of the securities in the hands of the beneficiary would be $10,000. As a further example, if the executor of an estate transfers to a trust property worth $200,000, which had a fair market value of $175,000 on the date of the decedent's death (the applicable valuation date), in satisfaction of the decedent's bequest in trust for the benefit of his wife of cash or securities to be selected by the executor in an amount sufficient to utilize the marital deduction to the maximum extent authorized by law (after taking into consideration any other property qualifying for the marital deduction), capital gain in the amount of $25,000 would be realized by the estate and the basis of the property in the hands of the trustees would be $200,000. If, on the other hand, the decedent bequeathed a fraction of his residuary estate to a trust for the benefit of his wife, which fraction will not change regardless of any fluctuations in value of property in the decedent's estate after his death, no gain or loss would be realized by the estate upon transfer of property to the trust, and the basis

of the property in the hands of the trustee would be its fair market value on the date of the decedent's death or on the alternate valuation date.

(b) *Multiple interests.* Where more than one person has an interest in property acquired from a decedent, the basis of such property shall be determined and adjusted without regard to the multiple interests. The basis of computing gain or loss on the sale of any one of such multiple interests shall be determined under §1.1014–5. Thus, the deductions for depreciation and for depletion allowed or allowable, under sections 167 and 611, to a legal life tenant as if the life tenant were the absolute owner of the property, constitute an adjustment to the basis of the property not only in the hands of the life tenant, but also in the hands of the remainderman and every other person to whom the same uniform basis is applicable. Similarly, the deductions allowed or allowable under sections 167 and 611, both to the trustee and to the trust beneficiaries, constitute an adjustment to the basis of the property not only in the hands of the trustee, but also in the hands of the trust beneficiaries and every other person to whom the uniform basis is applicable. See, however, section 262. Similarly, adjustments in respect of capital expenditures or losses, tax-free distributions, or other distributions applicable in reduction of basis, or other items for which the basis is adjustable are made without regard to which one of the persons to whom the same uniform basis is applicable makes the capital expenditures or sustains the capital losses, or to whom the tax-free or other distributions are made, or to whom the deductions are allowed or allowable. See §1.1014–6 for adjustments in respect of property acquired from a decedent prior to his death.

(c) *Records.* The executor or other legal representative of the decedent, the fiduciary of a trust under a will, the life tenant and every other person to whom a uniform basis under this section is applicable, shall maintain records showing in detail all deductions, distributions, or other items for which adjustment to basis is required to be made by sections 1016 and 1017, and shall furnish to the district director such information with respect to those adjustments as he may require.

§1.1014–5 Gain or loss.

(a) *Sale or other disposition of a life interest, remainder interest, or other interest in property acquired from a decedent.* (1) Except as provided in paragraph (b) of this section with respect to the sale or other disposition after October 9, 1969, of a term interest in property, gain or loss from a sale or other disposition of a life interest, remainder interest, or other interest in property acquired from a decedent is determined by comparing the amount of the proceeds with the amount of that part of the adjusted uniform basis which is assignable to the interest so transferred. The adjusted uniform basis is the uniform basis of the entire property adjusted to the date of sale or other disposition of any such interest as required by sections 1016 and 1017. The uniform basis is the unadjusted basis of the entire property determined immediately after the decedent's death under the applicable sections of part II of subchapter O of chapter 1 of the Code.

(2) Except as provided in paragraph (b) of this section, the proper measure of gain or loss resulting from a sale or other disposition of an interest in property acquired from a decedent is so much of the increase or decrease in the value of the entire property as is reflected in such sale or other disposition. Hence, in ascertaining the basis of a life interest, remainder interest, or other interest which has been so transferred, the uniform basis rule contemplates that proper adjustments will be made to reflect the change in relative value of the interests on account of the passage of time.

(3) The factors set forth in the tables contained in §20.2031–7 or, for certain prior periods, §20.2031–7A, of part 20 of this chapter (Estate Tax Regulations) shall be used in the manner provided therein in determining the basis of the life interest, the remainder interest, or the term certain interest in the property on the date such interest is sold. The basis of the life interest, the remainder interest, or the term certain interest is computed by multiplying the uniform basis (adjusted to the time of the sale) by the appropriate factor.

In the case of the sale of a life interest or a remainder interest, the factor used is the factor (adjusted where appropriate) which appears in the life interest or the remainder interest column of the table opposite the age (on the date of the sale) of the person at whose death the life interest will terminate. In the case of the sale of a term certain interest, the factor used is the factor (adjusted where appropriate) which appears in the term certain column of the table opposite the number of years remaining (on the date of sale) before the term certain interest will terminate.

(b) *Sale or other disposition of certain term interests.* In determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in paragraph (f)(2) of §1.1001–1) the adjusted basis of which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent) or section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), that part of the adjusted uniform basis assignable under the rules of paragraph (a) of this section to the interest sold or otherwise disposed of shall be disregarded to the extent and in the manner provided by section 1001(e) and paragraph (f) of §1.1001–1.

(c) *Illustrations.* The application of this section may be illustrated by the following examples, in which references are made to the actuarial tables contained in part 20 of this chapter (Estate Tax Regulations):

Example 1. Securities worth $500,000 at the date of decedent's death on January 1, 1971, are bequeathed to his wife, W, for life, with remainder over to his son, S. W is 48 years of age when the life interest is acquired. The estate does not elect the alternate valuation allowed by section 2032. By reference to §20.2031–7A(c), the life estate factor for age 48, female, is found to be 0.77488 and the remainder factor for such age is found to be 0.22512. Therefore, the present value of the portion of the uniform basis assigned to W's life interest is $387,440 ($500,000 × 0.77488), and the present value of the portion of the uniform basis assigned to S's remainder interest is $112,560 ($500,000 × 0.22512). W sells her life interest to her nephew, A, on February 1, 1971, for $370,000, at which time W is still 48 years of age. Pursuant to section 1001(e), W realizes no loss; her gain is $370,000, the amount realized from the sale. A has a basis of $370,000 which he can recover by amortization deductions over W's life expectancy.

Example 2. The facts are the same as in example (1) except that W retains the life interest for 12 years, until she is 60 years of age, and then sells it to A on February 1, 1983, when the fair market value of the securities has increased to $650,000. By reference to §20.2031–7A(c), the life estate factor for age 60, female, is found to be 0.63226 and the remainder factor for such age is found to be 0.36774. Therefore, the present value on February 1, 1983, of the portion of the uniform basis assigned to W's life interest is $316,130 ($500,000 × 0.63226) and the present value on that date of the portion of the uniform basis assigned to S's remainder interest is $183,870 ($500,000 × 0.36774). W sells her life interest for $410,969, that being the commuted value of her remaining life interest in the securities as appreciated ($650,000 × 0.63226). Pursuant to section 1001(e), W's gain is $410,969, the amount realized. A has a basis of $410,969 which he can recover by amortization deductions over W's life expectancy.

Example 3. Unimproved land having a fair market value of $18,800 at the date of the decedent's death on January 1, 1970, is devised to A, a male, for life, with remainder over to B, a female. The estate does not elect the alternate valuation allowed by section 2032. On January 1, 1971, A sells his life interest to S for $12,500. S is not related to A or B. At the time of the sale, A is 39 years of age. By reference to §20.2031–7A(c), the life estate factor for age 39, male, is found to be 0.79854. Therefore, the present value of the portion of the uniform basis assigned to A's life interest is $15,012.55 ($18,800 × 0.79854). This portion is disregarded under section 1001(e). A realizes no loss; his gain is $12,500, the amount realized. S has a basis of $12,500 which he can recover by amortization deductions over A's life expectancy.

Example 4. The facts are the same as in example (3) except that on January 1, 1971, A and B jointly sell the entire property to S for $25,000 and divide the proceeds equally between them. A and B are not related, and there is no element of gift or compensation in the transaction. By reference to §20.2031–7A(c), the remainder factor for age 39, male, is found to be 0.20146. Therefore, the present value of the uniform basis assigned to B's remainder interest is $3,787.45 ($18,800 × 0.20146). On the sale A realizes a loss of $2,512.55 ($15,012.55 less $12,500), the portion of the uniform basis assigned to his life interest not being disregarded by reason of section 1001(e)(3). B's gain on the sale is $8,712.55 ($12,500 less $3,787.45). S has a basis in the entire property of $25,000, no part of which, however, can be recovered by amortization deductions over A's life expectancy.

Example 5. (a) Nondepreciable property having a fair market value of $54,000 at the date of decedent's death on January 1, 1971, is devised to her husband, H, for life and, after his death, to her daughter, D, for life, with remainder over to her grandson, G. The estate does not elect the alternate valuation allowed by section 2032. On January 1, 1973, H sells his life interest to D for $32,000. At the date of the sale, H is 62 years of age, and D is 45 years of age. By reference to § 20.2031–7A(c), the life estate factor for age 62, male, is found to be 0.52321. Therefore, the present value on January 1, 1973, of the portion of the adjusted uniform basis assigned to H's life interest is $28,253 ($54,000 × 0.52321). Pursuant to section 1001(e), H realizes no loss; his gain is $32,000, the amount realized from the sale. D has a basis of $32,000 which she can recover by amortization deductions over H's life expectancy.

(b) On January 1, 1976, D sells both life estates to G for $40,000. During each of the years 1973 through 1975, D is allowed a deduction for the amortization of H's life interest. At the date of the sale H is 65 years of age, and D is 48 years of age. For purposes of determining gain or loss on the sale by D, the portion of the adjusted uniform basis assigned to H's life interest and the portion assigned to D's life interest are not taken into account under section 1001(e). However, pursuant to § 1.1001–1(f)(1), D's cost basis in H's life interest, minus deductions for the amortization of such interest, is taken into account. On the sale, D realizes gain of $40,000 minus an amount which is equal to the $32,000 cost basis (for H's life estate) reduced by amortization deductions. G is entitled to amortize over H's life expectancy that part of the $40,000 cost which is attributable to H's life interest. That part of the $40,000 cost which is attributable to D's life interest is not amortizable by G until H dies.

Example 6. Securities worth $1,000,000 at the date of decedent's death on January 1, 1971, are bequeathed to his wife, W, for life, with remainder over to his son, S. W is 48 years of age when the life interest is acquired. The estate does not elect the alternate valuation allowed by section 2032. By reference to § 20.2031–7A(c), the life estate factor for age 48, female, is found to be 0.77488, and the remainder factor for such age is found to be 0.22512. Therefore, the present value of the portion of the uniform basis assigned to W's life interest is $774,880 ($1,000,000 × 0.77488), and the present value of the portion of the uniform basis assigned to S's remainder interest is $225,120 ($1,000,000 × 0.22512). On February 1, 1971, W transfers her life interest to corporation X in exchange for all of the stock of X pursuant to a transaction in which no gain or loss is recognized by reason of section 351. On February 1, 1972, W sells all of her stock in X to S for $800,000. Pursuant to section 1001(e) and § 1.1001–1(f)(2), W realizes no loss; her gain is $800,000, the amount realized from the sale. On February 1, 1972, X sells to N for $900,000 the life interest transferred to it by W. Pursuant to section 1001(e) and § 1.1001–1(f)(1), X realizes no loss; its gain is $900,000, the amount realized from the sale. N has a basis of $900,000 which he can recover by amortization deductions over W's life expectancy.

[T.D. 7142, 36 FR 18951, Sept. 24, 1971, as amended by T.D. 8540, 59 FR 30102, June 10, 1994]

§ 1.1014–6 Special rule for adjustments to basis where property is acquired from a decedent prior to his death.

(a) *In general.* (1) The basis of property described in section 1014(b)(9) which is acquired from a decedent prior to his death shall be adjusted for depreciation, obsolescence, amortization, and depletion allowed the taxpayer on such property for the period prior to the decedent's death. Thus, in general, the adjusted basis of such property will be its fair market value at the decedent's death, or the applicable alternate valuation date, less the amount allowed (determined with regard to section 1016(a)(2)(B)) to the taxpayer as deductions for exhaustion, wear and tear, obsolescence, amortization, and depletion for the period held by the taxpayer prior to the decedent's death. The deduction allowed for a taxable year in which the decedent dies shall be an amount properly allocable to that part of the year prior to his death. For a discussion of the basis adjustment required by section 1014(b)(9) where property is held in trust, see paragraph (c) of this section.

(2) Where property coming within the purview of subparagraph (1) of this paragraph was held by the decedent and his surviving spouse as tenants by the entirety or as joint tenants with right of survivorship, and joint income tax returns were filed by the decedent and the surviving spouse in which the deductions referred to in subparagraph (1) were taken, there shall be allocated to the surviving spouse's interest in the property that proportion of the deductions allowed for each period for which the joint returns were filed which her income from the property bears to the total income from the property. Each spouse's income from the property shall be determined in accordance with local law.

(3) The application of this paragraph may be illustrated by the following examples:

Example 1. The taxpayer acquired income-producing property by gift on January 1, 1954. The property had a fair market value of $50,000 on the date of the donor's death, January 1, 1956, and was included in his gross estate at that amount for estate tax purposes as a transfer in contemplation of death. Depreciation in the amount of $750 per year was allowable for each of the taxable years 1954 and 1955. However, the taxpayer claimed depreciation in the amount of $500 for each of these years (resulting in a reduction in his taxes) and his income tax returns were accepted as filed. The adjusted basis of the property as of the date of the decedent's death is $49,000 ($50,000, the fair market value at the decedent's death, less $1,000, the total of the amounts actually allowed as deductions).

Example 2. On July 1, 1952, H purchased for $30,000 income-producing property which he conveyed to himself and W, his wife, as tenants by the entirety. Under local law each spouse was entitled to one-half of the income therefrom. H died on January 1, 1955, at which time the fair market value of the property was $40,000. The entire value of the property was included in H's gross estate. H and W filed joint income tax returns for the years 1952, 1953, and 1954. The total depreciation allowance for the year 1952 was $500 and for each of the other years 1953 and 1954 was $1,000. One-half of the $2,500 depreciation will be allocated to W. The adjusted basis of the property in W's hands of January 1, 1955, was $38,750 ($40,000, value on the date of H's death, less $1,250, depreciation allocated to W for periods before H's death). However, if, under local law, all of the income from the property was allocable to H, no adjustment under this paragraph would be required and W's basis for the property as of the date of H's death would be $40,000.

(b) *Multiple interests in property described in section 1014(b)(9) and acquired from a decedent prior to his death.* (1) Where more than one person has an interest in property described in section 1014(b)(9) which was acquired from a decedent before his death, the basis of such property and of each of the several interests therein shall, in general, be determined and adjusted in accordance with the principles contained in §§1.1014–4 and 1.1014–5, relating to the uniformity of basis rule. Application of these principles to the determination of basis under section 1014(b)(9) is shown in the remaining subparagraphs of this paragraph in connection with certain commonly encountered situations involving multiple interests in property acquired from a decedent before his death.

(2) Where property is acquired from a decedent before his death, and the entire property is subsequently included in the decedent's gross estate for estate tax purposes, the uniform basis of the property, as well as the basis of each of the several interests in the property, shall be determined by taking into account the basis adjustments required by section 1014(a) owing to such inclusion of the entire property in the decedent's gross estate. For example, suppose that the decedent transfers property in trust, with a life estate to A, and the remainder to B or his estate. The transferred property consists of 100 shares of the common stock of X Corporation, with a basis of $10,000 at the time of the transfer. At the time of the decedent's death the value of the stock is $20,000. The transfer is held to have been made in contemplation of death and the entire value of the trust is included in the decedent's gross estate. Under section 1014(a), the uniform basis of the property in the hands of the trustee, the life tenant, and the remainderman, is $20,000. If immediately prior to the decedent's death, A's share of the uniform basis of $10,000 was $6,000, and B's share was $4,000, then, immediately after the decedent's death, A's share of the uniform basis of $20,000 is $12,000, and B's share is $8,000.

(3)(i) In cases where, due to the operation of the estate tax, only a portion of property acquired from a decedent before his death is included in the decedent's gross estate, as in cases where the decedent retained a reversion to take effect upon the expiration of a life estate in another, the uniform basis of the entire property shall be determined by taking into account any basis adjustments required by section 1014(a) owing to such inclusion of a portion of the property in the decedent's gross estate. In such cases the uniform basis is the adjusted basis of the entire property immediately prior to the decedent's death increased (or decreased) by an amount which bears the same relation to the total appreciation (or diminution) in value of the entire property (over the adjusted basis of the entire property immediately prior to the decedent's death) as the value of the property included in the decedent's gross estate bears to the value of the entire property. For example, assume that the decedent creates a trust to pay the income to A for life, remainder to B or his estate. The trust instrument further provides that if the decedent should survive A, the income shall be paid to the decedent for life. Assume that the decedent predeceases A, so that, due to the operation of the estate tax, only the present value of the remainder interest is included in the decedent's gross estate. The trust consists of 100 shares of the common stock of X Corporation with an adjusted basis immediately prior to the decedent's death of $10,000 (as determined under section 1015). At the time of the decedent's death, the value of the stock is $20,000, and the value of the remainder interest in the hands of B is $8,000. The uniform basis of the entire property following the decedent's death is $14,000, computed as follows:

Uniform basis prior to decedent's death	$10,000
plus	
Increase in uniform basis (determined by the following formula)	4,000
[Increase in uniform basis (to be determined)/ $10,000 (total appreciation)]=	
[$8,000 (value of property included in gross estate)/$20,000 (value of entire property)]	
Uniform basis under section 1014(a)	14,000

(ii) In cases of the type described in subdivision (i) of this subparagraph, the basis of any interest which is included in the decedent's gross estate may be ascertained by adding to (or subtracting from) the basis of such interest determined immediately prior to the decedent's death the increase (or decrease) in the uniform basis of the property attributable to the inclusion of the interest in the decedent's gross estate. Where the interest is sold or otherwise disposed of at any time after the decedent's death, proper adjustment must be made in order to reflect the change in value of the interest on account of the passage of time, as provided in § 1.1014–5. For an illustration of the operation of this subdivision, see step 6 of the example in § 1.1014–7.

(iii) In cases of the type described in subdivision (i) of this subparagraph (cases where, due to the operation of the estate tax, only a portion of the property is included in the decedent's gross estate), the basis for computing the depreciation, amortization, or depletion allowance shall be the uniform basis of the property determined under section 1014(a). However, the manner of taking into account such allowance computed with respect to such uniform basis is subject to the following limitations:

(*a*) In cases where the value of the life interest is not included in the decedent's gross estate, the amount of such allowance to the life tenant under section 167(h) (or section 611(b)) shall not exceed (or be less than) the amount which would have been allowable to the life tenant if no portion of the basis of the property was determined under section 1014(a). Proper adjustment shall be made for the amount allowable to the life tenant, as required by section 1016. Thus, an appropriate adjustment shall be made to the uniform basis of the property in the hands of the trustee, to the basis of the life interest in the hands of the life tenant, and to the basis of the remainder in the hands of the remainderman.

(*b*) Any remaining allowance (that is, the increase in the amount of depreciation, amortization, or depletion allowable resulting from any increase in the uniform basis of the property under section 1014(a)) shall not be allowed to the life tenant. The remaining allowance shall, instead, be allowed to the trustee to the extent that the trustee both (*1*) is required or permitted, by the governing trust instrument (or under local law), to maintain a reserve for depreciation, amortization, or depletion, and (*2*) actually maintains such a reserve. If, in accordance with the preceding sentence, the trustee does maintain such a reserve, the remaining allowance shall be taken into account, under section 1016, in adjusting the uniform basis of the property in the hands of the trustee and in adjusting the basis of the remainder interest in the hands of the remainderman, but shall not be taken into account, under section 1016, in determining the basis of the life interest in the hands of the life tenant. For an example of the operation of this subdivision, see paragraph (b) of §1.1014–7.

(4) In cases where the basis of any interest in property is not determined under section 1014(a), as where such interest (i) is not included in the decedent's gross estate, or (ii) is sold, exchanged or otherwise disposed of before the decedent's death, the basis of such interest shall be determined under other applicable provisions of the Code. To illustrate, in the example shown in subparagraph (3)(i) of this paragraph the basis of the life estate in the hands of A shall be determined under section 1015, relating to the basis of property acquired by gift. If, on the other hand, A had sold his life interest prior to the decedent's death, the basis of the life estate in the hands of A's transferee would be determined under section 1012.

(c) *Adjustments for deductions allowed prior to the decedent's death.* (1) As stated in paragraph (a) of this section, section 1014(b)(9) requires a reduction in the uniform basis of property acquired from a decedent before his death for certain deductions allowed in respect of such property during the decedent's lifetime. In general, the amount of the reduction in basis required by section 1014(b)(9) shall be the aggregate of the deductions allowed in respect of the property, but shall not include deductions allowed in respect of the property to the decedent himself. In cases where, owing to the operation of the estate tax, only a part of the value of the entire property is included in the decedent's gross estate, the amount of the reduction required by section 1014(b)(9) shall be an amount which bears the same relation to the total of all deductions (described in paragraph (a) of this section) allowed in respect of the property as the value of the property included in the decedent's gross estate bears to the value of the entire property.

(2) The application of this paragraph may be illustrated by the following examples:

Example 1. The decedent creates a trust to pay the income to A for life, remainder to B or his estate. The property transferred in trust consists of an apartment building with a basis of $50,000 at the time of the transfer. The decedent dies 2 years after the transfer is made and the gift is held to have been made in contemplation of death. Depreciation on the property was allowed in the amount of $1,000 annually. At the time of the decedent's death the value of the property is $58,000. The uniform basis of the property in the hands of the trustee, the life tenant, and the remainderman, immediately after the decedent's death is $56,000 ($58,000, fair market value of the property immediately after the decedent's death, reduced by $2,000, deductions for depreciation allowed prior to the decedent's death).

Example 2. The decedent creates a trust to pay the income to A for life, remainder to B or his estate. The trust instrument provides that if the decedent should survive A, the income shall be paid to the decedent for life. The decedent predeceases A and the present value of the remainder interest is included in the decedent's gross estate for estate tax purposes. The property transferred consists of an apartment building with a basis of $110,000 at the time of the transfer. Following the creation of the trust and during the balance of the decedent's life, deductions for depreciation were allowed on the property in the amount of $10,000. At the time of decedent's death the value of the entire property is $150,000, and the value of the remainder interest is $100,000. Accordingly, the uniform basis of the property in the hands of the trustee, the life tenant, and the remainderman, as adjusted under section 1014(b)(9), is $126,666, computed as follows:

Uniform basis prior to decedent's death	$100,000
plus	
Increase in uniform basis—before reduction (determined by the following formula)	33,333
[Increase in uniform basis (to be determined)/ $50,000 (total appreciation of property since time of transfer)]=	
[$100,000 (value of property included in gross estate)/$150,000 (value of entire property)]	
less	133,333
Deductions allowed prior to decedent's death—taken into account under section 1014(b)(9) (determined by the following formula)	6,667
[Prior deductions taken into account (to be determined) $10,000 (total deductions allowed prior to decedent's death)]=	
[$100,000 (value of property included in gross estate) $150,000 (value of entire property)]	
Uniform basis under section 1014	126,666

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3656, Mar. 24, 1964; T.D. 7142, 36 FR 18952, Sept. 24, 1971]

§1.1014–7 Example applying rules of §§1.1014–4 through 1.1014–6 to case involving multiple interests.

(a) On January 1, 1950, the decedent creates a trust to pay the income to A for life, remainder to B or his estate.

The trust instrument provides that if the decedent should survive A, the income shall be paid to the decedent for life. The decedent, who died on January 1, 1955, predeceases A, so that, due to the operation of the estate tax, only the present value of the remainder interest is included in the decedent's gross estate. The trust consists of an apartment building with a basis of $30,000 at the time of transfer. Under the trust instrument the trustee is required to maintain a reserve for depreciation. During the decedent's lifetime depreciation is allowed in the amount of $800 annually. At the time of the decedent's death the value of the apartment building is $45,000. A, the life tenant, is 43 years of age at the time of the decedent's death. Immediately after the decedent's death, the uniform basis of the entire property under section 1014(a) is $32,027; A's basis for the life interest is $15,553; and B's basis for the remainder interest is $16,474, computed as follows:

Step 1. Uniform basis (adjusted) immediately prior to decedent's death:	
Basis at time of transfer	$30,000
less	
Depreciation allowed under section 1016 before decedent's death ($800 × 5)	4,000
	26,000
Step 2. Value of property included in decedent's gross estate:	
0.40180 (remainder factor, age 43) ×$45,000 (value of entire property)	$18,081
Step 3. Uniform basis of property under section 1014(a), before reduction required by section 1014(b)(9):	
Uniform basis (adjusted) prior to decedent's death	26,000
Increase in uniform basis (determined by the following formula)	7,634
Increase in uniform basis (to be determined) $19,000 (total appreciation, $45,000 − $26,000)]=	
$18,081 (value of property included in gross estate) $45,000 (value of entire property)]	
	33,634
Step 4. Uniform basis reduced as required by section 1014(b)(9) for deductions allowed prior to death:	
Uniform basis before reduction	$33,634
less	
Deductions allowed prior to decedent's death—taken into account under section 1014(b)(9) (determined by the following formula)	1,607
Prior deductions taken into account (to be determined) $4,000 (total deductions allowed prior to decedent's death)]=	
$18,081 (value of property included in gross estate) $45,000 (value of entire property)	
	32,027

Step 5. A's basis for the life interest at the time of the decedent's death, determined under section 1015: 0.59820 (life factor, age 43) × $26,000		15,553
Step 6. B's basis for the remainder interest, determined under section 1014(a): Basis prior to the decedent's death:		
0.40180 (remainder factor, age 43) × $26,000		10,447
plus		
Increase in uniform basis owing to decedent's death:		
Increase in uniform basis	$7,634	
plus		
Reduction required by section 1014(b)(9)	1,607	
		6,027
		16,474

(b) Assume the same facts as in paragraph (a) of this section. Assume further, that following the decedent's death depreciation is allowed in the amount of $1,000 annually. As of January 1, 1964, when A's age is 52, the adjusted uniform basis of the entire property is $23,027; A's basis for the life interest is $9,323; and B's basis for the remainder interest is $13,704, computed as follows:

Step 7. Uniform basis (adjusted) as of January 1, 1964:	
Uniform basis determined under section 1014(a), reduced as required by section 1014(b)(9)	$32,027
less	
Depreciation allowed since decedent's death ($1,000 × 9)	9,000
	23,027
Step 8. Allocable share of adjustment for depreciation allowable in the nine years since the decedent's death:	
A's interest	
0.49587 (life factor, age 52) ×$7,200 ($800, depreciation attributable to uniform basis before increase under section 1014(a), ×9)	3,570
B's interest	
0.50413 (remainder factor, age 52) ×$7,200 ($800, depreciation attributable to uniform basis before increase under section 1014(a), ×9)	3,630
plus	
$200 (annual depreciation attributable to increase in uniform basis under section 1014(a)) ×9	1,800
	5,430
Step 9. Tentative bases of A's and B's interests as of January 1, 1964 (before adjustment for depreciation).	
A's interest	
0.49587 (life factor, age 52) ×$26,000 (adjusted uniform basis immediately before decedent's death)	12,893
B's interest	
0.50413 (remainder factor, age 52) ×$26,000 (adjusted uniform basis immediately before decedent's death)	13,107
plus	
Increase in uniform basis owing to inclusion of remainder in decedent's gross estate	6,027
	19,134

Step 10. Bases of A's and B's interests as of January 1, 1964.

A	
Tentative basis (Step 9)	12,893
less	
Allocable depreciation (Step 8)	3,570
	9,323
B	
Tentative basis (Step 9)	19,134
less	
Allocable depreciation (Step 8)	5,430
	13,704

§1.1014–8 Bequest, devise, or inheritance of a remainder interest.

(a)(1) Where property is transferred for life, with remainder in fee, and the remainderman dies before the life tenant, no adjustment is made to the uniform basis of the property on the death of the remainderman (see paragraph (a) of §1.1014–4). However, the basis of the remainderman's heir, legatee, or devisee for the remainder interest is determined by adding to (or subtracting from) the part of the adjusted uniform basis assigned to the remainder interest (determined in accordance with the principles set forth in §§1.1014–4 through 1.1014–6) the difference between—

(i) The value of the remainder interest included in the remainderman's estate, and

(ii) The basis of the remainder interest immediately prior to the remainderman's death.

(2) The basis of any property distributed to the heir, legatee, or devisee upon termination of a trust (or legal life estate) or at any other time (unless included in the gross income of the legatee or devisee) shall be determined by adding to (or subtracting from) the adjusted uniform basis of the property thus distributed the difference between—

(i) The value of the remainder interest in the property included in the remainderman's estate, and

(ii) The basis of the remainder interest in the property immediately prior to the remainderman's death.

(b) The provisions of paragraph (a) of this section are illustrated by the following examples:

Example 1. Assume that, under the will of a decedent, property consisting of common stock with a value of $1,000 at the time of the decedent's death is transferred in trust, to pay the income to A for life, remainder to B or to B's estate. B predeceases A and bequeaths the remainder interest to C. Assume that B dies on January 1, 1956, and that the value of the stock originally transferred is $1,600 at B's death. A's age at that time is 37. The value of the remainder interest included in B's estate is $547 (0.34185, remainder factor age 37, ×$1,600), and hence $547 is C's basis for the remainder interest immediately after B's death. Assume that C sells the remainder interest on January 1, 1961, when A's age is 42. C's basis for the remainder interest at the time of such sale is $596, computed as follows:

Basis of remainder interest computed with respect to uniform basis of entire property (0.39131, remainder factor age 42, ×$1,000, uniform basis of entire property)		$391
plus		
Value of remainder interest included in B's estate	$547	
less		
Basis of remainder interest immediately prior to B's death (0.34185, remainder factor age 37, ×$1,000)	342	
		205
Basis of C's remainder interest at the time of sale		596

Example 2. Assume the same facts as in example (1), except that C does not sell the remainder interest. Upon A's death terminating the trust, C's basis for the stock distributed to him is computed as follows:

Uniform basis of the property, adjusted to date of termination of the trust		$1,000
plus		
Value of remainder interests in the property at the time of B's death	$547	
less		
B's share of uniform basis of the property at the time of his death	342	
		205
C's basis for the stock distributed to him upon the termination of the trust		1,205

Example 3. Assume the same facts as in example (2), except that the property transferred is depreciable. Assume further that $100 of depreciation was allowed prior to B's death and that $50 of depreciation is allowed between the time of B's death and the termination of the trust. Upon A's death terminating the trust, C's basis for the property distributed to him is computed as follows:

Uniform basis of the property, adjusted to date of termination of the trust:		
Uniform basis immediately after decedent's death	$1,000	
Depreciation allowed following decedent's death	150	
		$350
plus		
Value of remainder interest in the property at the time of B's death	547	
less		
B's share of uniform basis of the property at the time of his death (0.34185×$900, uniform basis at B's death)	308	

C's basis for the property distributed to him upon the termination of the trust	1,089

(c) The rules stated in paragraph (a) of this section do not apply where the basis of the remainder interest in the hands of the remainderman's transferee is determined by reference to its cost to such transferee. See also paragraph (a) of § 1.1014–4. Thus, if, in example (*1*) of paragraph (b) of this section B sold his remainder interest to C for $547 in cash, C's basis for the stock distributed to him upon the death of A terminating the trust is $547.

§ 1.1014–9 Special rule with respect to DISC stock.

(a) *In general.* If property consisting of stock of a DISC or former DISC (as defined in section 992(a) (1) or (3) as the case may be) is considered to have been acquired from a decedent (within the meaning of paragraph (a) or (b) of § 1.1014–2), the uniform basis of such stock under section 1014, as determined pursuant to §§ 1.1014–1 through 1.1014–8 shall be reduced as provided in this section. Such uniform basis shall be reduced by the amount (hereinafter referred to in this section as the amount of reduction), if any, which the decedent would have included in his gross income under section 995(c) as a dividend if the decedent had lived and sold such stock at its fair market value on the estate tax valuation date. If the alternate valuation date for Federal estate tax purposes is elected under section 2032, in computing the gain which the decedent would have had if he had lived and sold the stock on the alternate valuation date, the decedent's basis shall be determined with reduction for any distributions with respect to the stock which may have been made, after the date of the decedent's death and on or before the alternate valuation date, from the DISC's previously taxed income (as defined in section 996(f)(2)). For this purpose, the last sentence of section 996(e)(2) (relating to reductions of basis of DISC stock) shall not apply. For purposes of this section, if the corporation is not a DISC or former DISC at the date of the decedent's death but is a DISC for a taxable year which begins after such date and on or before the alternate valuation date, the corporation will be considered to be a DISC or former DISC only if the alternate valuation date is elected. The provisions of this paragraph apply with respect to stock of a DISC or former DISC which is included in the gross estate of the decedent, including but not limited to property which—

(1) Is acquired from the decedent before his death, and the entire property is subsequently included in the decedent's gross estate for estate tax purposes, or

(2) Is acquired property described in paragraph (d) of § 1.1014–3.

(b) *Portion of property acquired from decedent before his death included in decedent's gross estate*—(1) *In general.* In cases where, due to the operation of the estate tax, only a portion of property which consists of stock of a DISC or former DISC and which is acquired from a decedent before his death is included in the decedent's gross estate, the uniform basis of such stock under section 1014, as determined pursuant to §§ 1.1014–1 through 1.1014–8, shall be reduced by an amount which bears the same ratio to the amount of reduction which would have been determined under paragraph (a) of this section if the entire property consisting of such stock were included in the decedent's gross estate as the value of such property included in the decedent's gross estate bears to the value of the entire property.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example: The decedent creates a trust during his lifetime to pay the income to A for life, remainder to B or his estate. The trust instrument further provides that if the decedent shall survive A, the income shall be paid to the decedent for life. The decedent predeceases A, so that, due to the operation of the estate tax, only the present value of the remainder interest is included in the decedent's gross estate. The trust consists of 100 shares of the stock of X corporation (which is a DISC at the time the shares are transferred to the trust and at the time of the decedent's death) with an adjusted basis immediately prior to the decedent's death of $10,000 (as determined under section 1015). At the time of the decedent's death the value of the stock is $20,000, and the value of the remainder interest in the hands of B is $8,000. Applying the principles of paragraph (b)(3)(i) of § 1.1014–6, the uniform basis of the entire property following the decedent's death, prior to reduction pursuant to this paragraph, is $14,000. The amount of reduction which would have been determined under paragraph (a) of this section if the entire property consisting of such stock of X corporation were included in the decedent's gross estate is $5,000. The uniform basis of the entire property following the decedent's death, as reduced pursuant to this paragraph, is $12,000, computed as follows:

Uniform basis under section 1014(a), prior to reduction pursuant to this paragraph	$14,000
Less decrease in uniform basis (determined by the following formula)	2,000
[Reduction in uniform basis (to be determined)/ $5,000 (amount of reduction if paragraph (a) applied)] =	
[$8,000 (value of property included in gross estate/$20,000 (value of entire property)]	
Uniform basis under section 1014(a) reduced pursuant to this paragraph	12,000

(c) *Estate tax valuation date.* For purposes of section 1014(d) and this section, the estate tax valuation date is the date of the decedent's death or, in the case of an election under section 2032, the applicable valuation date prescribed by that section.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. At the date of A's death, his DISC stock has a fair market value of $100. The estate does not elect the alternate valuation allowed by section 2032, and A's basis in such stock is $60 at the date of his death. The person who acquires such stock from the decedent will take as a basis for such stock its fair market value at A's death ($100), reduced by the amount which would have been included in A's gross income under section 995(c) as a dividend if A had sold stock on the date he died. Thus, if the amount that would have been treated as a dividend under section 995(c) were $30, such person will take a basis of $70 for such stock ($100, reduced by $30). If such person were immediately to sell the DISC stock so received for $100, $30 of the proceeds from the sale would be treated as a dividend by such person under section 995(c).

Example 2. Assume the same facts as in example (1) except that the estate elects the alternate valuation allowed by section 2032, the DISC stock has a fair market value of $140 on the alternate valuation date, the amount that would have been treated as a dividend under section 995(c) in the event of a sale on such date is $50 and the DISC has $20 of previously taxed income which accrued after the date of the decedent's death and before the alternate valuation date. The basis of the person who acquires such stock will be $90 determined as follows:

(1) Fair market value of DISC stock at alternate valuation date	$140
(2) Less: Amount which would have been treated as a dividend under section 995(c)	50
(3) Basis of person who acquires DISC stock	90

If a distribution of $20 attributable to such previously taxed income had been made by the DISC on or before the alternate valuation date (with the DISC stock having a fair market value of $120 after such distribution), the basis of the person who acquires such stock will be $70 determined as follows:

(1) Fair market value of DISC stock at alternate valuation date	$120
(2) Less: Amount which would have been treated as a dividend under section 995(c)	50
(3) Basis of person who acquires DISC stock	70

[T.D. 7283, 38 FR 20825, Aug. 3, 1973]

§1.1015–1 Basis of property acquired by gift after December 31, 1920.

(a) *General rule.* (1) In the case of property acquired by gift after December 31, 1920 (whether by a transfer in trust or otherwise), the basis of the property for the purpose of determining gain is the same as it would be in the hands of the donor or the last preceding owner by whom it was not acquired by gift. The same rule applies in determining loss unless the basis (adjusted for the period prior to the date of gift in accordance with sections 1016 and 1017) is greater than the fair market value of the property at the time of the gift. In such case, the basis for determining loss is the fair market value at the time of the gift.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example.

Example: A acquires by gift income-producing property which has an adjusted basis of $100,000 at the date of gift. The fair market value of the property at the date of gift is $90,000. A later sells the property for $95,000. In such case there is neither gain nor loss. The basis for determining loss is $90,000; therefore, there is no loss. Furthermore, there is no gain, since the basis for determining gain is $100,000.

(3) If the facts necessary to determine the basis of property in the hands of the donor or the last preceding

owner by whom it was not acquired by gift are unknown to the donee, the district director shall, if possible, obtain such facts from such donor or last preceding owner, or any other person cognizant thereof. If the district director finds it impossible to obtain such facts, the basis in the hands of such donor or last preceding owner shall be the fair market value of such property as found by the district director as of the date or approximate date at which, according to the best information the district director is able to obtain, such property was acquired by such donor or last preceding owner. See paragraph (e) of this section for rules relating to fair market value.

(b) *Uniform basis; proportionate parts of.* Property acquired by gift has a single or uniform basis although more than one person may acquire an interest in such property. The uniform basis of the property remains fixed subject to proper adjustment for items under sections 1016 and 1017. However, the value of the proportionate parts of the uniform basis represented, for instance, by the respective interests of the life tenant and remainderman are adjustable to reflect the change in the relative values of such interest on account of the lapse of time. The portion of the basis attributable to an interest at the time of its sale or other disposition shall be determined under the rules provided in § 1.1014–5. In determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in § 1.1001–1(f)(2)) the adjusted basis of which is determined pursuant, or by reference, to section 1015, that part of the adjusted uniform basis assignable under the rules of § 1.1014– 5(a) to the interest sold or otherwise disposed of shall be disregarded to the extent and in the manner provided by section 1001(e) and § 1.1001–1(f).

(c) *Time of acquisition.* The date that the donee acquires an interest in property by gift is when the donor relinquishes dominion over the property and not necessarily when title to the property is acquired by the donee. Thus, the date that the donee acquires an interest in property by gift where he is a successor in interest, such as in the case of a remainderman of a life estate or a beneficiary of the distribution of the corpus of a trust, is the date such interests are created by the donor and not the date the property is actually acquired.

(d) *Property acquired by gift from a decedent dying after December 31, 1953.* If an interest in property was acquired by the taxpayer by gift from a donor dying after December 31, 1953, under conditions which required the inclusion of the property in the donor's gross estate for estate tax purposes, and the property had not been sold, exchanged, or otherwise disposed of by the taxpayer before the donor's death, see the rules prescribed in section 1014 and the regulations thereunder.

(e) *Fair market value.* For the purposes of this section, the value of property as appraised for the purpose of the Federal gift tax, or, if the gift is not subject to such tax, its value as appraised for the purpose of a State gift tax, shall be deemed to be the fair market value of the property at the time of the gift.

(f) *Reinvestments by fiduciary.* If the property is an investment by the fiduciary under the terms of the gift (as, for example, in the case of a sale by the fiduciary of property transferred under the terms of the gift, and the reinvestment of the proceeds), the cost or other basis to the fiduciary is taken in lieu of the basis specified in paragraph (a) of this section.

(g) *Records.* To insure a fair and adequate determination of the proper basis under section 1015, persons making or receiving gifts of property should preserve and keep accessible a record of the facts necessary to determine the cost of the property and, if pertinent, its fair market value as of March 1, 1913, or its fair market value as of the date of the gift.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6693, 28 FR 12818, Dec. 3, 1963; T.D. 7142, 36 FR 18952, Sept. 24, 1971]

§ 1.1015–2 Transfer of property in trust after December 31, 1920.

(a) *General rule.* (1) In the case of property acquired after December 31, 1920, by transfer in trust (other than by a transfer in trust by a gift, bequest, or devise) the basis of property so acquired is the same as it would be in the hands of the grantor increased in the amount of gain or decreased in the amount of loss recognized to the grantor upon such transfer under the law applicable to the year in which the transfer was made. If the taxpayer acquired the property by a transfer in trust, this basis applies whether the property be in the hands of the trustee, or the beneficiary, and whether acquired prior to the termination of the trust and distribution of the property, or thereafter.

(2) The principles stated in paragraph (b) of §1.1015–1 concerning the uniform basis are applicable in determining the basis of property where more than one person acquires an interest in property by transfer in trust after December 31, 1920.

(b) *Reinvestment by fiduciary.* If the property is an investment made by the fiduciary (as, for example, in the case of a sale by the fiduciary of property transferred by the grantor, and the reinvestment of the proceeds), the cost or other basis to the fiduciary is taken in lieu of the basis specified in paragraph (a) of this section.

§1.1015–3 Gift or transfer in trust before January 1, 1921.

(a) In the case of property acquired by gift or transfer in trust before January 1, 1921, the basis of such property is the fair market value thereof at the time of the gift or at the time of the transfer in trust.

(b) The principles stated in paragraph (b) of §1.1015–1 concerning the uniform basis are applicable in determining the basis of property where more than one person acquires an interest in property by gift or transfer in trust before January 1, 1921. In addition, if an interest in such property was acquired from a decedent and the property had not been sold, exchanged, or otherwise disposed of before the death of the donor, the rules prescribed in section 1014 and the regulations thereunder are applicable in determining the basis of such property in the hands of the taxpayer.

§1.1015–4 Transfers in part a gift and in part a sale.

(a) *General rule.* Where a transfer of property is in part a sale and in part a gift, the unadjusted basis of the property in the hands of the transferee is the sum of—

(1) Whichever of the following is the greater:

(i) The amount paid by the transferee for the property, or

(ii) The transferor's adjusted basis for the property at the time of the transfer, and

(2) The amount of increase, if any, in basis authorized by section 1015(d) for gift tax paid (see §1.1015–5).

For determining loss, the unadjusted basis of the property in the hands of the transferee shall not be greater than the fair market value of the property at the time of such transfer. For determination of gain or loss of the transferor, see §1.1001–1(e) and §1.1011–2. For special rule where there has been a charitable contribution of less than a taxpayer's entire interest in property, see section 170(e)(2) and §1.170A–4(c).

(b) *Examples.* The rule of paragraph (a) of this section is illustrated by the following examples:

Example 1. If A transfers property to his son for $30,000, and such property at the time of the transfer has an adjusted basis of $30,000 in A's hands (and a fair market value of $60,000), the unadjusted basis of the property in the hands of the son is $30,000.

Example 2. If A transfers property to his son for $60,000, and such property at the time of transfer has an adjusted basis of $30,000 in A's hands (and a fair market value of $90,000), the unadjusted basis of such property in the hands of the son is $60,000.

Example 3. If A transfers property to his son for $30,000, and such property at the time of transfer has an adjusted basis in A's hands of $60,000 (and a fair market value of $90,000), the unadjusted basis of such property in the hands of the son is $60,000.

Example 4. If A transfers property to his son for $30,000 and such property at the time of transfer has an adjusted basis of $90,000 in A's hands (and a fair market value of $60,000), the unadjusted basis of the property in the hands of the son ins $90,000. However, since the adjusted basis of the property in A's hands at the time of the transfer was greater than the fair market value at that time, for the purpose of determining any loss on a later sale or other disposition of the property by the son its unadjusted basis in his hands is $60,000.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6693, 28 FR 12818, Dec. 3, 1963; T.D. 7207, 37 FR 20799, Oct. 5, 1972]

§ 1.1015–5 Increased basis for gift tax paid.

(a) *General rule in the case of gifts made on or before December 31, 1976.* (1)(i) Subject to the conditions and limitations provided in section 1015(d), as added by the Technical Amendments Act of 1958, the basis (as determined under section 1015(a) and paragraph (a) of § 1.1015–1) of property acquired by gift is increased by the amount of gift tax paid with respect to the gift of such property. Under section 1015(d)(1)(A), such increase in basis applies to property acquired by gift on or after September 2, 1958 (the date of enactment of the Technical Amendments Act of 1958). Under section 1015(d)(1)(B), such increase in basis applies to property acquired by gift before September 2, 1958, and not sold, exchanged, or otherwise disposed of before such date. If section 1015(d)(1)(A) applies, the basis of the property is increased as of the date of the gift regardless of the date of payment of the gift tax. For example, if the property was acquired by gift on September 8, 1958, and sold by the donee on October 15, 1958, the basis of the property would be increased (subject to the limitation of section 1015(d)) as of September 8, 1958 (the date of the gift), by the amount of gift tax applicable to such gift even though such tax was not paid until March 1, 1959. If section 1015(d)(1)(B) applies, any increase in the basis of the property due to gift tax paid (regardless of date of payment) with respect to the gift is made as of September 2, 1958. Any increase in basis under section 1015(d) can be no greater than the amount by which the fair market value of the property at the time of the gift exceeds the basis of such property in the hands of the donor at the time of the gift. See paragraph (b) of this section for rules for determining the amount of gift tax paid in respect of property transferred by gift.

(ii) With respect to property acquired by gift before September 2, 1958, the provisions of section 1015(d) and this section do not apply if, before such date, the donee has sold, exchanged, or otherwise disposed of such property. The phrase *sold, exchanged, or otherwise disposed of* includes the surrender of a stock certificate for corporate assets in complete or partial liquidation of a corporation pursuant to section 331. It also includes the exchange of property for property of a like kind such as the exchange of one apartment house for another. The phrase does not, however, extend to transactions which are mere changes in form. Thus, it does not include a transfer of assets to a corporation in exchange for its stock in a transaction with respect to which no gain or loss would be recognizable for income tax purposes under section 351. Nor does it include an exchange of stock or securities in a corporation for stock or securities in the same corporation or another corporation in a transaction such as a merger, recapitalization, reorganization, or other transaction described in section 368(a) or 355, with respect to which no gain or loss is recognizable for income tax purposes under section 354 or 355. If a binding contract for the sale, exchange, or other disposition of property is entered into, the property is considered as sold, exchanged, or otherwise disposed of on the effective date of the contract, unless the contract is not subsequently carried out substantially in accordance with its terms. The effective date of a contract is normally the date it is entered into (and not the date it is consummated, or the date legal title to the property passes) unless the contract specifies a different effective date. For purposes of this subdivision, in determining whether a transaction comes within the phrase *sold, exchanged, or otherwise disposed of,* if a transaction would be treated as a mere change in the form of the property if it occurred in a taxable year subject to the Internal Revenue Code of 1954, it will be so treated if the transaction occurred in a taxable year subject to the Internal Revenue Code of 1939 or prior revenue law.

(2) Application of the provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. In 1938, A purchased a business building at a cost of $120,000. On September 2, 1958, at which time the property had an adjusted basis in A's hands of $60,000, he gave the property to his nephew, B. At the time of the gift to B, the property had a fair market value of $65,000 with respect to which A paid a gift tax in the amount of $7,545. The basis of the property in B's hands at the time of the gift, as determined under section 1015(a) and §1.1015–1, would be the same as the adjusted basis in A's hands at the time of the gift, or $60,000. Under section 1015(d) and this section, the basis of the building in B's hands as of the date of the gift would be increased by the amount of the gift tax paid with respect to such gift, limited to an amount by which the fair market value of the property at the time of the gift exceeded the basis of the property in the hands of A at the time of gift, or $5,000. Therefore, the basis of the property in B's hands immediately after the gift, both for determining gain or loss on the sale of the property, would be $65,000.

Example 2. C purchased property in 1938 at a cost of $100,000. On October 1, 1952, at which time the property had an adjusted basis of $72,000 in C's hands, he gave the property to his daughter, D. At the date of the gift to D, the property had a fair market value of $85,000 with respect to which C paid a gift tax in the amount of $11,745. On September 2, 1958, D still held the property which then had an adjusted basis in her hands of $65,000. Since the excess of the fair market value of the property at the time of the gift to D over the adjusted basis of the property in C's hands at such time is greater than the amount of gift tax paid, the basis of the property in D's hands would be increased as of September 2, 1958, by the amount of the gift tax paid, or $11,745. The adjusted basis of the property in D's hands, both for determining gain or loss on the sale of the property, would then be $76,745 ($65,000 plus $11,745).

Example 3. On December 31, 1951, E gave to his son, F, 500 shares of common stock of the X Corporation which shares had been purchased earlier by E at a cost of $100 per share, or a total cost of $50,000. The basis in E's hands was still $50,000 on the date of the gift to F. On the date of the gift, the fair market value of the 500 shares was $80,000 with respect to which E paid a gift tax in the amount of $10,695. In 1956, the 500 shares of X Corporation stock were exchanged for 500 shares of common stock of the Y Corporation in a reorganization with respect to which no gain or loss was recognized for income tax purposes under section 354. F still held the 500 shares of Y Corporation stock on September 2, 1958. Under such circumstances, the 500 shares of X Corporation stock would not, for purposes of section 1015(d) and this section, be considered as having been *sold, exchanged, or otherwise disposed of* by F before September 2, 1958. Therefore, the basis of the 500 shares of Y Corporation stock held by F as of such date would, by reason of section 1015(d) and this section, be increased by $10,695, the amount of gift tax paid with respect to the gift to F of the X Corporation stock.

Example 4. On November 15, 1953, G gave H property which had a fair market value of $53,000 and a basis in the hands of G of $20,000. G paid gift tax of $5,250 on the transfer. On November 16, 1956, H gave the property to J who still held it on September 2, 1958. The value of the property on the date of the gift to J was $63,000 and H paid gift tax of $7,125 on the transfer. Since the property was not sold, exchanged, or otherwise disposed of by J before September 2, 1958, and the gift tax paid on the transfer to J did not exceed $43,000 ($63,000, fair market value of property at time of gift to J, less $20,000, basis of property in H's hands at that time), the basis of property in his hands is increased on September 2, 1958, by $7,125, the amount of gift tax paid by H on the transfer. No increase in basis is allowed for the $5,250 gift tax paid by G on the transfer to H, since H had sold, exchanged, or otherwise disposed of the property before September 2, 1958.

(b) *Amount of gift tax paid with respect to gifts made on or before December 31, 1976.* (1)(i) If only one gift was made during a certain *calendar period* (as defined in §25.2502–1(c)(1)), the entire amount of the gift tax paid under chapter 12 or the corresponding provisions of prior revenue laws for that calendar period is the amount of the gift tax paid with respect to the gift.

(ii) If more than one gift was made during a certain calendar period, the amount of the gift tax paid under chapter 12 or the corresponding provisions of prior revenue laws with respect to any specified gift made during that calendar period is an amount, A, which bears the same ratio to B (the total gift tax paid for that calendar period) as C (the *amount of the gift,* computed as described in this paragraph (b)(1)(ii)) bears to D (the total taxable gifts for the calendar period computed without deduction for the gift tax specific exemption under section 2521 (as in effect prior to its repeal by the Tax Reform Act of 1976) or the corresponding provisions of prior revenue laws). Stated algebraically, the amount of the gift tax paid with respect to a gift equals:

[*Amount of the gift* (C) / TOTAL TAXABLE GIFTS, PLUS SPECIFIC EXEMPTION ALLOWED (D)] × TOTAL GIFT TAX PAID (B)

For purposes of the ratio stated in the preceding sentence, the *amount of the gift* referred to as factor ''C'' is the value of the gift reduced by any portion excluded or deducted under section 2503(b) (annual exclusion), 2522 (charitable deduction), or 2523 (marital deduction) of the Code or the corresponding provisions of prior revenue laws. In making the computations described in this paragraph, the values to be used are those finally determined for purposes of the gift tax.

(iii) If a gift consists of more than one item of property, the gift tax paid with respect to each item shall be computed by allocating to each item a proportionate part of the gift tax paid with respect to the gift, computed in accordance with the provisions of this paragraph.

(2) For purposes of this paragraph, it is immaterial whether the gift tax is paid by the donor or the donee. Where more than one gift of a present interest in property is made to the same donee during a *calendar period* (as defined in § 25.2502–1(c)(1)), the annual exclusion shall apply to the earliest of such gifts in point of time.

(3) Where the donor and his spouse elect under section 2513 or the corresponding provisions of prior law to have any gifts made by either of them considered as made one-half by each, the amount of gift tax paid with respect to such a gift is the sum of the amounts of tax (computed separately) paid with respect to each half of the gift by the donor and his spouse.

(4) The method described in section 1015(d)(2) and this paragraph for computing the amount of gift tax paid in respect of a gift may be illustrated by the following examples:

Example 1. Prior to 1959 H made no taxable gifts. On July 1, 1959, he made a gift to his wife, W, of land having a value for gift purposes of $60,000 and gave to his son, S, certain securities valued at $60,000. During the year 1959, H also contributed $5,000 in cash to a charitable organization described in section 2522. H filed a timely gift tax return for 1959 with respect to which he paid gift tax in the amount of $6,000, computed as follows:

Value of land given to W		$60,000	
Less: Annual exclusion	$3,000		
Marital deduction	30,000	33,000	
Included amount of gift			$27,000
Value of securities given to S		60,000	
Less: Annual exclusion		3,000	
Included amount of gift			57,000
Gift to charitable organization		5,000	
Less: Annual exclusion	3,000		
Charitable deduction	2,000	5,000	
Included amount of gift			0
Total included gifts			84,000
Less: Specific exemption allowed			30,000
Taxable gifts for 1959			54,000
Gift tax on $54,000			6,000

In determining the gift tax paid with respect to the land given to W, amount C of the ratio set forth in subparagraph (1)(ii) of this paragraph is $60,000, value of property given to W, less $33,000 (the sum of $3,000, the amount excluded under section 2503(b), and $30,000, the amount deducted under section 2523), or $27,000. Amount D of the ratio is $84,000 (the amount of taxable gifts, $54,000, plus the gift tax specific exemption, $30,000). The gift tax paid with respect to the land given to W is $1,928.57, computed as follows:

$$\$27{,}000(C) \div \$84{,}000(D) \times \$6{,}000(B)$$

Example 2. The facts are the same as in example (1) except that H made his gifts to W and S on July 1, 1971, and that prior to 1971, H made no taxable gifts. Furthermore, H made his charitable contribution on August 12, 1971. These were the only gifts made by H during 1971. H filed his gift tax return for the third quarter of 1971 on November 15, 1971, as required by section 6075(b). With respect to the above gifts H paid a gift tax in the amount of $6,000 on total taxable gifts of $54,000 for the third quarter of 1971. The gift tax paid with respect to the land given to W is $1,928.57. The computations for these figures are identical to those used in example (1).

Example 3. On January 15, 1956, A made a gift to his nephew, N, of land valued at $86,000, and on June 30, 1956, gave N securities valued at $40,000. On July 1, 1956, A gave to his sister, S, $46,000 in cash. A and his wife, B, were married during the entire calendar year 1956. The amount of A's taxable gifts for prior years was zero although in arriving at that amount A had used in full the specific exemption authorized by section 2521. B did not make any gifts before 1956. A and B elected under section 2513 to have all gifts made by either during 1956 treated as made one-half by A and one-half by B. Pursuant to that election, A and B each filed a gift tax return for 1956. A paid gift tax of $11,325 and B paid gift tax of $5,250, computed as follows:

	A	B
Value of land given to N	$43,000	$43,000
Less: exclusion	3,000	3,000
Included amount of gift	40,000	40,000
Value of securities given to N	20,000	20,000
Less: exclusion	None	None

	A	B
Included amount of gift	20,000	20,000
Cash gift to S	23,000	23,000
Less: exclusion	3,000	3,000
Included amount of gift	20,000	20,000
Total included gifts	80,000	80,000
Less: specific exemption	None	30,000
Taxable gifts for 1956	80,000	50,000
Gift tax for 1956	11,325	5,250

The amount of the gift tax paid by A with respect to the land given to N is computed as follows:

$40,000(C) / $80,000(D) × $11,325(B) = $5,662.50

The amount of the gift tax paid by B with respect to the land given to N is computed as follows:

$40,000(C) / $80,000(D) × $5,250(B) = $2,625

The amount of the gift tax paid with respect to the land is $5,662.50 plus $2,625, or $8,287.50. Computed in a similar manner, the amount of gift tax paid by A with respect to the securities given to N is $2,831.25, and the amount of gift tax paid by B with respect thereto is $1,312.50, or a total of $4,143.75.

Example 4. The facts are the same as in example (3) except that A gave the land to N on January 15, 1972, the securities to N on February 3, 1972, and the cash to S on March 7, 1972. As in example (3), the amount of A's taxable gifts for taxable years prior to 1972 was zero, although in arriving at that amount A had used in full the specific exemption authorized by section 2521. B did not make any gifts before 1972. Pursuant to the election under section 2513, A and B treated all gifts made by either during 1972 as made one-half by A and one-half by B. A and B each filed a gift tax return for the first quarter of 1972 on May 15, 1972, as required by section 6075(b). A paid gift tax of $11,325 on taxable gifts of $80,000 and B paid gift tax of $5,250 on taxable gifts of $50,000. The amount of the gift tax paid by A and B with respect to the land given to N is $5,662.50 and $2,625, respectively. The computations for these figures are identical to those used in example (3).

(c) *Special rule for increased basis for gift tax paid in the case of gifts made after December 31, 1976*—(1) *In general.* With respect to gifts made after December 31, 1976 (other than gifts between spouses described in section 1015(e)), the increase in basis for gift tax paid is determined under section 1015(d)(6). Under section 1015(d)(6)(A), the increase in basis with respect to gift tax paid is limited to the amount (not in excess of the amount of gift tax paid) that bears the same ratio to the amount of gift tax paid as the net appreciation in value of the gift bears to the amount of the gift.

(2) *Amount of gift.* In general, for purposes of section 1015(d)(6)(A)(ii), the amount of the gift is determined in conformance with the provisions of paragraph (b) of this section. Thus, the amount of the gift is the amount included with respect to the gift in determining (for purposes of section 2503(a)) the total amount of gifts made during the calendar year (or calendar quarter in the case of a gift made on or before December 31, 1981), reduced by the amount of any annual exclusion allowable with respect to the gift under section 2503(b), and any deductions allowed with respect to the gift under section 2522 (relating to the charitable deduction) and section 2523 (relating to the marital deduction). Where more than one gift of a present interest in property is made to the same donee during a calendar year, the annual exclusion shall apply to the earliest of such gifts in point of time.

(3) *Amount of gift tax paid with respect to the gift.* In general, for purposes of section 1015(d)(6), the amount of gift tax paid with respect to the gift is determined in conformance with the provisions of paragraph (b) of this section. Where more than one gift is made by the donor in a calendar year (or quarter in the case of gifts made on or before December 31, 1981), the amount of gift tax paid with respect to any specific gift made during that period is the amount which bears the same ratio to the total gift tax paid for that period (determined after reduction for any gift tax unified credit available under section 2505) as the amount of the gift (computed as described in paragraph (c)(2) of this section) bears to the total taxable gifts for the period.

(4) *Qualified domestic trusts.* For purposes of section 1015(d)(6), in the case of a qualified domestic trust (QDOT) described in section 2056A(a), any distribution during the noncitizen surviving spouse's lifetime with respect to which a tax is imposed under section 2056A(b)(1)(A) is treated as a transfer by gift, and any estate tax paid on the distribution under section

2056A(b)(1)(A) is treated as a gift tax. The rules under this paragraph apply in determining the extent to which the basis in the assets distributed is increased by the tax imposed under section 2056A(b)(1)(A).

(5) *Examples.* Application of the provisions of this paragraph (c) may be illustrated by the following examples:

Example 1. (i) Prior to 1995, X exhausts X's gift tax unified credit available under section 2505. In 1995, X makes a gift to X's child Y, of a parcel of real estate having a fair market value of $100,000. X's adjusted basis in the real estate immediately before making the gift was $70,000. Also in 1995, X makes a gift to X's child Z, of a painting having a fair market value of $70,000. X timely files a gift tax return for 1995 and pays gift tax in the amount of $55,500, computed as follows:

Value of real estate transferred to Y	$100,000	....
Less: Annual exclusion	10,000	....
Included amount of gift (C)	....	$90,000
Value of painting transferred to Z	$70,000	....
Less: annual exclusion	10,000	....
Included amount of gift	....	60,000
Total included gifts (D)	....	$150,000
Total gift tax liability for 1995 gifts (B)	....	$55,500

(ii) The gift tax paid with respect to the real estate transferred to Y, is determined as follows:

$$\frac{\$90{,}000\ (C)}{\$150{,}000\ (D)} \times \$55{,}500\ (B) = \$33{,}300$$

(iii)(A) The amount by which Y's basis in the real property is increased is determined as follows:

$$\frac{\$30{,}000\ \text{(net appreciation)}}{\$90{,}000\ \text{(amount of gift)}} \times \$33{,}300 = \$11{,}100$$

(B) Y's basis in the real property is $70,000 plus $11,100, or $81,100. If X had not exhausted any of X's unified credit, no gift tax would have been paid and, as a result, Y's basis would not be increased.

Example 2. (i) X dies in 1995. X's spouse, Y, is not a United States citizen. In order to obtain the marital deduction for property passing to X's spouse, X established a QDOT in X's will. In 1996, the trustee of the QDOT makes a distribution of principal from the QDOT in the form of shares of stock having a fair market value of $70,000 on the date of distribution. The trustee's basis in the stock (determined under section 1014) is $50,000. An estate tax is imposed on the distribution under section 2056A(b)(1)(A) in the amount $38,500, and is paid. Y's basis in the shares of stock is increased by a portion of the section 2056A estate tax paid determined as follows:

$$\frac{\$20{,}000\ \text{(net appreciation)}}{\$70{,}000\ \text{(distribution)}} \times \$38{,}500\ \text{(section 2056A estate tax)} = \$11{,}000$$

(ii) Y's basis in the stock is $50,000 plus $11,000, or $61,000.

(6) *Effective date.* The provisions of this paragraph (c) are effective for gifts made after August 22, 1995.

(d) *Treatment as adjustment to basis.* Any increase in basis under section 1015(d) and this section shall, for purposes of section 1016(b) (relating to adjustments to a substituted basis), be treated as an adjustment under section 1016(a) to the basis of the donee's property to which such increase applies. See paragraph (p) of § 1.1016–5.

[T.D. 6693, 28 FR 12818, Dec. 3, 1963, as amended by T.D. 7238, 37 FR 28715, Dec. 29, 1972; T.D. 7910, 48 FR 40372, Sept. 7, 1983; T.D. 8612, 60 FR 43537, Aug. 22, 1995]

§1.1016–1 Adjustments to basis; scope of section.

Section 1016 and §§1.1016–2 to 1.1016–10, inclusive, contain the rules relating to the adjustments to be made to the basis of property to determine the adjusted basis as defined in section 1011. However, if the property was acquired from a decedent before his death, see §1.1014–6 for adjustments on account of certain deductions allowed the taxpayer for the period between the date of acquisition of the property and the date of death of the decedent. If an election has been made under the Retirement-Straight Line Adjustment Act of 1958 (26 U.S.C. 1016 note), see §1.9001–1 for special rules for determining adjusted basis in the case of a taxpayer who has changed from the retirement to the straight-line method of computing depreciation allowances.

§1.1016–2 Items properly chargeable to capital account.

(a) The cost or other basis shall be properly adjusted for any expenditure, receipt, loss, or other item, properly chargeable to capital account, including the cost of improvements and betterments made to the property. No adjustment shall be made in respect of any item which, under any applicable provision of law or regulation, is treated as an item not properly chargeable to capital account but is allowable as a deduction in computing net or taxable income for the taxable year. For example, in the case of oil and gas wells no adjustment may be made in respect of any intangible drilling and development expense allowable as a deduction in computing net or taxable income. See the regulations under section 263(c).

(b) The application of the foregoing provisions may be illustrated by the following example:

Example: A, who makes his returns on the calendar year basis, purchased property in 1941 for $10,000. He subsequently expended $6,000 for improvements. Disregarding, for the purpose of this example, the adjustments required for depreciation, the adjusted basis of the property is $16,000. If A sells the property in 1954 for $20,000, the amount of his gain will be $4,000.

(c) Adjustments to basis shall be made for carrying charges such as taxes and interest, with respect to property (whether real or personal, improved or unimproved, and whether productive or unproductive), which the taxpayer elects to treat as chargeable to capital account under section 266, rather than as an allowable deduction. The term *taxes* for this purpose includes duties and excise taxes but does not include income taxes.

(d) Expenditures described in section 173 to establish, maintain, or increase the circulation of a newspaper, magazine, or other periodical are chargeable to capital account only in accordance with and in the manner provided in the regulations under section 173.

§1.1016–3 Exhaustion, wear and tear, obsolescence, amortization, and depletion for periods since February 28, 1913.

(a) *In general*—(1) *Adjustment where deduction is claimed.* (i) For taxable periods beginning on or after January 1, 1952, the cost or other basis of property shall be decreased for exhaustion, wear and tear, obsolescence, amortization, and depletion by the greater of the following two amounts:

(*a*) The amount allowed as deductions in computing taxable income, to the extent resulting in a reduction of the taxpayer's income taxes, or

(*b*) The amount allowable for the years involved.

See paragraph (b) of this section. Where the taxpayer makes an appropriate election the above rule is applicable for periods since February 28, 1913, and before January 1, 1952. See paragraph (d) of this section. For rule for such periods where no election is made, see paragraph (c) of this section.

(ii) The determination of the amount properly allowable for exhaustion, wear and tear, obsolescence, amortization, and depletion shall be made on the basis of facts reasonably known to exist at the end of the taxable year. A taxpayer is not permitted to take advantage in a later year of his prior failure to take any such allowance or his taking an allowance plainly inadequate under the known facts in prior years. In the case of depreciation, if in prior years the taxpayer has consistently taken proper deductions under one method, the amount allowable for such prior years shall not be increased even though a greater amount would have been allowable under another proper method. For rules governing losses on retirement of depreciable property, including rules for determining basis, see § 1.167(a)–8. This subdivision may be illustrated by the following example:

Example: An asset was purchased January 1, 1950, at a cost of $10,000. The useful life of the asset is 10 years. It has no salvage value. Depreciation was deducted and allowed for 1950 to 1954 as follows:

1950	$500
1951	....
1952	1,000
1953	1,000
1954	1,000
Total amount allowed	3,500

The correct reserve as of December 31, 1954, is computed as follows:

December 31:	
1950 ($10,000÷10)	$1,000
1951 ($9,000÷9)	1,000
1952 ($8,000÷8)	1,000
1953 ($7,000÷7)	1,000
1954 ($6,000÷6)	1,000
Reserve December 31, 1954	5,000
Depreciation for 1955 is computed as follows:	
Cost	10,000
Reserve as of December 31, 1954	5,000
Unrecovered cost	5,000
Depreciation allowable for 1955 ($5,000÷5)	1,000

(2) *Adjustment for amount allowable where no depreciation deduction claimed.* (i) If the taxpayer has not taken a depreciation deduction either in the taxable year or for any prior taxable year, adjustments to basis of the property for depreciation allowable shall be determined by using the straight-line method of depreciation. (See § 1.1016–4 for adjustments in the case of persons exempt from income taxation.)

(ii) For taxable years beginning after December 31, 1953, and ending after August 16, 1954, if the taxpayer with respect to any property has taken a deduction for depreciation properly under one of the methods provided in section 167(b) for one or more years but has omitted the deduction in other years, the adjustment to basis for the depreciation allowable in such a case will be the deduction under the method which was used by the taxpayer with respect to that property. Thus, if A acquired property in 1954 on which he properly computed his depreciation deduction under the method described in section 167(b)(2) (the declining-balance method) for the first year of its useful life but did not take a deduction in the second and third year of the asset's life, the adjustment to basis for depreciation allowable for the second and third year will be likewise computed under the declining-balance method.

(3) *Adjustment for depletion deductions with respect to taxable years before 1932.* Where for any taxable year before the taxable year 1932 the depletion allowance was based on discovery value or a percentage of income, then the adjustment for depletion for such year shall not exceed a depletion deduction which would have been allowable for such year if computed without reference to discovery value or a percentage of income.

(b) *Adjustment for periods beginning on or after January 1, 1952.* The decrease required by paragraph (a) of this section for deductions in respect of any period beginning on or after January 1, 1952, shall be whichever is the greater of the following amounts:

(1) The amount allowed as deductions in computing taxable income under subtitle A of the Code or prior income tax laws and resulting (by reason of the deductions so allowed) in a reduction for any taxable year of the taxpayer's taxes under subtitle A of the Code (other than chapter 2, relating to tax on self-employment income) or prior income, war-profits, or excess-profits tax laws; or

(2) The amount properly allowable as deductions in computing taxable income under subtitle A of the Code or prior income tax laws (whether or not the amount properly allowable would have caused a reduction for any taxable year of the taxpayer's taxes).

(c) *Adjustment for periods since February 28, 1913, and before January 1, 1952, where no election made.* If no election has been properly made under section 1020, or under section 113(d) of the Internal Revenue Code of 1939 (see paragraph (d) of this section), the decrease required by paragraph (a) of this section for deductions in respect of any period since February 28, 1913, and before January 1, 1952, shall be whichever of the following amounts is the greater:

(1) The amount allowed as deductions in computing net income under chapter 1 of the Internal Revenue Code of 1939 or prior income tax laws;

(2) The amount properly allowable in computing net income under chapter 1 of the Internal Revenue Code of 1939 or prior income tax laws.

For the purpose of determining the decrease required by this paragraph, it is immaterial whether or not the amount under subparagraph (1) of this paragraph or the amount under subparagraph (2) of this paragraph would have resulted in a reduction for any taxable year of the taxpayer's taxes.

(d) *Adjustment for periods since February 28, 1913, and before January 1, 1952, where election made.* If an election has been properly made under section 1020, or under section 113(d) of the Internal Revenue Code of 1939, the decrease required by paragraph (a) of this section for deductions in respect of any period since February 28, 1913, and before January 1, 1952, shall be whichever is the greater of the following amounts:

(1) The amount allowed as deductions in computing net income under chapter 1 of the Internal Revenue Code of 1939 or prior income tax laws and resulting (by reason of the deductions so allowed) in a reduction for any taxable year of the taxpayer's taxes under such chapter 1 (other than subchapter E, relating to tax on self-employment income), subchapter E, chapter 2, of the Internal Revenue Code of 1939, or prior income, war-profits, or excess-profits tax laws;

(2) The amount properly allowable as deductions in computing net income under chapter 1 of the Internal Revenue Code of 1939 or prior income tax laws (whether or not the amount properly allowable would have caused a reduction for any taxable year of the taxpayer's taxes).

(e) *Determination of amount allowed which reduced taxpayer's taxes.* (1) As indicated in paragraphs (b) and (d) of this section, there are situations in which it is necessary to determine (for the purpose of ascertaining the basis adjustment required by paragraph (a) of this section) the extent to which the amount allowed as deductions resulted in a reduction for any taxable year of the taxpayer's taxes under subtitle A (other than chapter 2 relating to tax on self-employment income) of the Code, or prior income, war-profits, or excess-profits tax laws. This amount (amount allowed which resulted in a reduction of the taxpayer's taxes) is hereinafter referred to as the *tax-benefit amount allowed.* For the purpose of determining whether the tax-benefit amount allowed exceeded the amount allowable, a determination must be made of that portion of the excess of the amount allowed over the amount allowable which, if disallowed, would not have resulted in an increase in any such tax previously determined. If the entire excess of the amount allowed over the amount allowable could be disallowed without any such increase in tax, the tax-benefit amount allowed shall not be considered to have exceeded the amount allowable. In such a case (if paragraph (b) or (d) of this section is applicable) the reduction in basis required by paragraph (a) of this section would be the amount properly allowable as a deduction. If only part of such excess could be disallowed without any such increase in tax, the tax-benefit amount allowed shall be considered to exceed the amount allowable to the extent of the remainder of such excess. In such a case (if paragraph (b) or (d) of this section is applicable), the reduction in basis required by paragraph (a) of this section would be the amount of the tax-benefit amount allowed.

(2) For the purpose of determining the tax-benefit amount allowed the tax previously determined shall be determined under the principles of section 1314. The only adjustments made in determining whether there would be an increase in tax shall be those resulting from the disallowance of the amount allowed. The taxable years for which the determination is made shall be the taxable year for which the deduction was allowed and any other taxable year which would be affected by the disallowance of such deduction. Examples of such other taxable years are taxable years to which there was a carryover or carryback of a net operating loss from the taxable year for which the deduction was allowed, and taxable years for which a computation under section

111 or section 1333 was made by reference to the taxable year for which the deduction was allowed. In determining whether the disallowance of any part of the deduction would not have resulted in an increase in any tax previously determined, proper adjustment must be made for previous determinations under section 1311, or section 3801 of the Internal Revenue Code of 1939, and for any previous application of section 1016(a)(2)(B), or section 113(b) (1)(B)(ii) of the Internal Revenue Code of 1939.

(3) If a determination under section 1016(a)(2)(B) must be made with respect to several properties for each of which the amount allowed for the taxable year exceeded the amount allowable, the tax-benefit amount allowed with respect to each of such properties shall be an allocated portion of the tax-benefit amount allowed determined by reference to the sum of the amounts allowed and the sum of the amounts allowable with respect to such several properties.

(4) In the case of property held by a partnership or trust, the computation of the tax-benefit amount allowed shall take into account the tax benefit of the partners or beneficiaries, as the case may be, from the deduction by the partnership or trust of the amount allowed to the partnership or the trust. For this purpose, the determination of the amount allowed which resulted in a tax benefit to the partners or beneficiaries shall be made in the same manner as that provided above with respect to the taxes of the person holding the property.

(5) A taxpayer seeking to limit the adjustment to basis to the tax-benefit amount allowed for any period, in lieu of the amount allowed, must establish the tax-benefit amount allowed. A failure of adequate proof as to the tax-benefit amount allowed with respect to one period does not preclude the taxpayer from limiting the adjustment to basis to the tax-benefit amount allowed with respect to another period for which adequate proof is available. For example, a corporate transferee may have available adequate records with respect to the tax effect of the deduction of erroneous depreciation for certain taxable years, but may not have available adequate records with respect to the deduction of excessive depreciation for other taxable years during which the property was held by its transferor. In such case the corporate transferee shall not be denied the right to apply this section with respect to the erroneous depreciation for the period for which adequate proof is available.

(f) *Determination of amount allowable in prior taxable years.* (1) One of the factors in determining the adjustment to basis as of any date is the amount of depreciation, depletion, etc., allowable for periods prior to such date. The amount allowable for such prior periods is determined under the law applicable to such prior periods; all adjustments required by the law applicable to such periods are made in determining the adjusted basis of the property for the purpose of determining the amount allowable. Provisions corresponding to the rules in section 1016(a)(2)(B) described in paragraphs (d) and (e) of this section, which limit adjustments to the *tax-benefit amount allowed* where an election is properly exercised, were first enacted by the Act of July 14, 1952 (66 Stat. 629). That law provided that corresponding rules are deemed to be includible in all revenue laws applicable to taxable years ending after December 31, 1931. Accordingly, those rules shall be taken into account in determining the amount of depreciation, etc., allowable for any taxable year ending after December 31, 1931. For example, if the adjusted basis of property held by the taxpayer since January 1, 1930, is determined as of January 1, 1955, and if an election was properly made under section 1020, or section 113(d) of the Internal Revenue Code of 1939, then the amount allowable which is taken into account in computing the adjusted basis as of January 1, 1955, shall be determined by taking those rules into account for all taxable years ending after December 31, 1931. The Act of July 14, 1952, made no change in the law applicable in determining the amount allowable for taxable years ending before January 1, 1932. If there was a final decision of a court prior to the enactment of the Act of July 14, 1952, determining the amount allowable for a particular taxable year, such determination shall be adjusted. In such case the adjustment shall be made only for the purpose of taking the provision of that law into account and only to the extent made necessary by such provisions.

(2) Although the Act of July 14, 1952, amended the law applicable to all taxable years ending after December 31, 1931, the amendment does not permit refund, credit, or assessment of a deficiency for any taxable year for which such refund, credit, or assessment was barred by any law or rule of law.

(g) *Property with transferred basis.* The following rules apply in the determination of the adjustments to basis of property in the hands of a transferee, donee, or grantee which are required by section 1016(b), or section 113(b)(2) of the Internal Revenue Code of 1939, with respect to the period the property was held by the transferor, donor, or grantor:

(1) An election or a revocation of an election under section 1020, or section 113(d) of the Internal Revenue Code of 1939, by a transferor, donor, or grantor, which is made after the date of the transfer, gift, or grant of the property shall not affect the basis of such property in the hands of the transferee, donee, or grantee. An election or a revocation of an election made before the date of the transfer, gift, or grant of the property shall be taken into account in determining under section 1016(b) the adjustments to basis of such property as of the date of the transfer, gift, or grant, whether or not an election or a revocation of an election under section 1020, or section 113(d) of the Internal Revenue Code of 1939, was made by the transferee, donee, or grantee.

(2) An election by the transferee, donee, or grantee or a revocation of such an election shall be applicable in determining the adjustments to basis for the period during which the property was held by the transferor, donor, or grantor, whether or not the transferor, donor, or grantor had made an election or a revocation of an election, provided that the property was held by the transferee, donee, or grantee at any time on or before the date on which the election or revocation was made.

(h) *Examples.* The application of section 1016(a) (1) and (2) may be illustrated by the following examples:

Example 1. The case of Corporation A discloses the following facts:

The cost or other basis is to be adjusted by $16,500 with respect to the years 1952–54, that is, by the amount allowable but not less than the amount allowed which reduced the taxpayer's taxes. An adjustment must also be made with respect to the years 1949–1951, the amount of such adjustment depending upon whether an election was properly made under section 1020, or section 113(d) of the Internal Revenue Code of 1939. If no such election was made, the amount of the adjustment with respect to the years 1949–1951 is $19,500, that is, the amount allowed but not less than the amount allowable. If an election was properly made, the amount of the adjustment with respect to the years 1949–1951 is $19,000, that is, the amount allowable but not less than the amount allowed which reduced the taxpayer's taxes.

(1)—Year	(2)—Amount allowed	(3)—Amount allowed which reduced taxpayer's taxes	(4)—Amount allowable	(5)—Amount allowable but not less than amount allowed	(6)—Amount allowable but not less than amount allowed which reduced taxpayer's taxes
1949	$6,000	$5,500	$5,000	$6,000	$5,500
1950	7,000	7,000	6,500	7,000	7,000
1951	5,000	4,000	6,500	6,500	6,500
Total, 1949–1951	....	....	....	19,500	19,000
1952	6,500	6,500	6,000	....	6,500
1953	5,000	4,000	4,000	....	4,000

(1)—Year	(2)—Amount allowed	(3)—Amount allowed which reduced taxpayer's taxes	(4)—Amount allowable	(5)—Amount allowable but not less than amount allowed	(6)—Amount allowable but not less than amount allowed which reduced taxpayer's taxes
1954	4,500	4,500	6,000	....	6,000
Total, 1952–1954	....	....	....	....	16,500

Example 2. Corporation A, which files its returns on the basis of a calendar year, purchased a building on January 1, 1950, at a cost of $100,000. On the basis of the facts reasonably known to exist at the end of 1950, a period of 50 years should have been used as the correct useful life of the building; nevertheless, depreciation was computed by Corporation A on the basis of a useful life of 25 years, and was allowed for 1950 through 1953 as a deduction in an annual amount of $4,000. The building was sold on January 1, 1954. Corporation A did not make an election under section 1020, or section 113(d) of the Internal Revenue Code of 1939. No part of the amount allowed Corporation A for any of the years 1950 through 1953 resulted in a reduction of Corporation A's taxes. The adjusted basis of the building as of January 1, 1954, is $88,166, computed as follows:

Taxable year	Adjustments to basis as of beginning of taxable year	Adjusted basis on January 1	Remaining life on January 1	Depreciation allowable	Depreciation allowed
1950	....	$100,000	50	$2,000	$4,000
1951	$4,000	96,000	49	1,959	4,000
1952	8,000	92,000	48	1,917	4,000
1953	9,917	90,083	47	1,917	4,000
1954	11,834	88,166	....	....	....

Example 3. The facts are the same as in example (2), except that Corporation A made a proper election under section 1020. In such case, the adjusted basis of the building as of January 1, 1954, is $92,000 computed as follows:

Taxable year	Adjustments to basis as of beginning of taxable year	Adjusted basis on January 1	Remaining life on January 1	Depreciation allowable	Depreciation allowed
1950	....	$100,000	50	$2,000	$4,000
1951	$2,000	98,000	49	2,000	4,000
1952	4,000	96,000	48	2,000	4,000
1953	6,000	94,000	47	2,000	4,000
1954	8,000	92,000			

Example 4. If it is assumed that in example (2), or in example (3), all of the deduction allowed Corporation A for 1953 had resulted in a reduction of A's taxes, the adjustment to the basis of the building for depreciation for 1953 would reflect the entire $4,000 deduction. In such case, the adjusted basis of the building as of January 1, 1954, would be $86,083 in example (2), and $90,000 in example (3).

Example 5. The facts are the same as in example (2), except that for the year 1950 all of the $4,000 amount allowed Corporation A as a deduction for depreciation for that year resulted in a reduction of A's taxes. In such case, the adjustments to the basis of the building remain the same as those set forth in example (2).

Example 6. The facts are the same as in example (3), except that for the year 1950 all of the $4,000 amount allowed Corporation A as a deduction for depreciation resulted in a reduction of A's taxes. In such case, the adjusted basis of the building as of January 1, 1954, is $90,123, computed as follows:

Taxable year	Adjustments to basis as of beginning of taxable year	Adjusted basis on January 1	Remaining life on January 1	Depreciation allowable	Depreciation allowed
1950	....	$100,000	50	$2,000	$4,000
1951	$4,000	96,000	49	1,959	4,000
1952	5,959	94,041	48	1,959	4,000
1953	7,918	92,082	47	1,959	4,000
1954	9,877	90,123			

§1.1016–4 Exhaustion, wear and tear, obsolescence, amortization, and depletion; periods during which income was not subject to tax.

(a) Adjustments to basis must be made for exhaustion, wear and tear, obsolescence, amortization, and depletion to the extent actually sustained in respect of:

(1) Any period before March 1, 1913,

(2) Any period since February 28, 1913, during which the property was held by a person or organization not subject to income taxation under chapter 1 of the Code or prior income tax laws,

(3) Any period since February 28, 1913, and before January 1, 1958, during which the property was held by a person subject to tax under part I, subchapter L, chapter 1 of the Code, or prior income tax law, to the extent that section 1016(a)(2) does not apply, and

(4) Any period since February 28, 1913, during which such property was held by a person subject to tax under part II of subchapter L, chapter 1 of the Code, or prior income tax law, to the extent that section 1016(a)(2) does not apply.

(b) The amount of the adjustments described in paragraph (a) of this section actually sustained is that amount charged off on the books of the taxpayer where such amount is considered by the Commissioner to be reasonable. Otherwise, the amount actually sustained will be the amount that would have been allowable as a deduction:

(1) During the period described in paragraph (a) (1) or (2) of this section, had the taxpayer been subject to income tax during those periods, or

(2) During the period described in paragraph (a) (3) or (4) of this section, with respect to property held by a taxpayer described in that paragraph, to the extent that section 1016(a)(2) was inapplicable to such property during that period.

In the case of a taxpayer subject to the adjustment required by subparagraph (1) or (2) of this paragraph, depreciation shall be determined by using the straight line method.

[T.D. 6681, 28 FR 11131, Oct. 17, 1963]

§1.1016–5 Miscellaneous adjustments to basis.

(a) *Certain stock distributions.* (1) In the case of stock, the cost or other basis must be diminished by the amount of distributions previously made which, under the law applicable to the year in which the distribution was made, either were tax free or were applicable in reduction of basis (not including distributions made by a corporation which was classified as a personal service corporation under the provisions of the Revenue Act of 1918 (40 Stat. 1057) or the Revenue Act of 1921 (42 Stat. 227), out of its earnings or profits which were taxable in accordance with the provisions of section 218 of the Revenue Act of 1918 or the Revenue Act of 1921). For adjustments to basis in the case of certain corporate distributions, see section 301 and the regulations thereunder.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example: A, who makes his returns upon the calendar year basis, purchased stock in 1923 for $5,000. He received in 1924 a distribution of $2,000 paid out of earnings and profits of the corporation accumulated before March 1, 1913. The adjusted basis for determining the gain or loss from the sale or other disposition of the stock in 1954 is $5,000 less $2,000, or $3,000, and the amount of the gain or loss from the sale or other disposition of the stock is the difference between $3,000 and the amount realized from the sale or other disposition.

(b) *Amortizable bond premium*—(1) *In general.* A holder's basis in a bond is reduced by the amount of bond premium used to offset qualified stated interest income under §1.171–2. This reduction occurs when the holder takes the qualified stated interest into account under the holder's regular method of accounting.

(2) *Special rules for taxable bonds.* A holder's basis in a taxable bond is reduced by the amount of bond premium allowed as a deduction under § 1.171–3(c)(5)(ii) (relating to the issuer's call of a taxable bond) or under § 1.171–2(a)(4)(i)(A) (relating to excess bond premium).

(3) *Special rule for tax-exempt obligations.* A holder's basis in a tax-exempt obligation is reduced by the amount of excess bond premium that is treated as a nondeductible loss under § 1.171–2(a)(4)(ii).

(c) *Municipal bonds.* In the case of a municipal bond (as defined in section 75(b)), basis shall be adjusted to the extent provided in section 75 or as provided in section 22(o) of the Internal Revenue Code of 1939, and the regulations thereunder.

(d) *Sale or exchange of residence.* Where the acquisition of a new residence results in the nonrecognition of any part of the gain on the sale, or exchange, or involuntary conversion of the old residence, the basis of the new residence shall be reduced by the amount of the gain not so recognized pursuant to section 1034(a), or section 112(n) of the Internal Revenue Code of 1939, and the regulations thereunder. See section 1034(e) and the regulations thereunder.

(e) *Loans from Commodity Credit Corporation.* In the case of property pledged to the Commodity Credit Corporation, the basis of such property shall be increased by the amount received as a loan from such corporation and treated by the taxpayer as income for the year in which received under section 77, or under section 123 of the Internal Revenue Code of 1939. The basis of such property shall be reduced to the extent of any deficiency on such loan with respect to which the taxpayer has been relieved from liability.

(f) *Deferred development and exploration expenses.* Expenditures for development and exploration of mines or mineral deposits treated as deferred expenses under sections 615 and 616, or under the corresponding provisions of prior income tax laws, are chargeable to capital account and shall be an adjustment to the basis of the property to which they relate. The basis so adjusted shall be reduced by the amount of such expenditures allowed as deductions which results in a reduction for any taxable year of the taxpayer's taxes under subtitle A (other than chapter 2 relating to tax on self-employment income) of the Code, or prior income, war-profits, or excess-profits tax laws, but not less than the amounts allowable under such provisions for the taxable year and prior years. This amount is considered as the *tax-benefit amount allowed* and shall be determined in accordance with paragraph (e) of § 1.1016–3. For example, if a taxpayer purchases unexplored and undeveloped mining property for $1,000,000 and at the close of the development stage has incurred exploration and development costs of $9,000,000 treated as deferred expenses, the basis of such property at such time for computing gain or loss will be $10,000,000. Assuming that the taxpayer in this example has operated the mine for several years and has deducted allowable percentage depletion in the amount of $2,000,000 and has deducted allowable deferred exploration and development expenditures of $2,000,000, the basis of the property in the taxpayer's hands for purposes of determining gain or loss from a sale will be $6,000,000.

(g) *Sale of land with unharvested crop.* In the case of an unharvested crop which is sold, exchanged, or involuntarily converted with the land and which is considered as property used in the trade or business under section 1231, the basis of such crop shall be increased by the amount of the items which are attributable to the production of such crop and which are disallowed, under section 268, as deductions in computing taxable income. The basis of any other property shall be decreased by the amount of any such items which are attributable to such other property, notwithstanding any provisions of section 1016 or of this section to the contrary. For example, if the items attributable to the production of an unharvested crop consist only of fertilizer costing $100 and $50 depreciation on a tractor used only to cultivate such crop, and such items are disallowed under section 268, the adjustments to the basis of such crop shall include an increase of $150 for such items and the adjustments to the basis of the tractor shall incude a reduction of $50 for depreciation.

(h) *Consent dividends.* (1) In the case of amounts specified in a shareholder's consent to which section 28 of the Internal Revenue Code of 1939 applies, the basis of the consent stock shall be increased to the extent provided in subsection (h) of such section.

(2) In the case of amounts specified in a shareholder's consent to be treated as a consent dividend to which section 565 applies, the basis of the consent stock shall be increased by the amount which, under section 565(c)(2), is treated as contributed to the capital of the corporation.

(i) *Stock in foreign personal holding company.* In the case of the stock of a United States shareholder in a foreign personal holding company, basis shall be adjusted to the extent provided in section 551(f) or corresponding provisions of prior income tax laws.

(j) *Research and experimental expenditures.* Research and experimental expenditures treated as deferred expenses under section 174(b) are chargeable to capital account and shall be an adjustment to the basis of the property to which they relate. The basis so adjusted shall be reduced by the amount of such expenditures allowed as deductions which results in a reduction for any taxable year of the taxpayer's taxes under subtitle A (other than chapter 2 relating to tax on self-employment income) of the Code, or prior income, war-profits, or excess-profits tax laws, but not less than the amounts allowable under such provisions for the taxable year and prior years. This amount is considered as the *tax-benefit amount allowed* and shall be determined in accordance with paragraph (e) of § 1.1016–3.

(k) *Deductions disallowed in connection with disposal of coal or domestic iron ore.* Basis shall be adjusted by the amount of the deductions disallowed under section 272 with respect to the disposal of coal or domestic iron ore covered by section 631.

(l) *Expenditures attributable to grants or loans covered by section 621.* In the case of expenditures attributable to a grant or loan made to a taxpayer by the United States for the encouragement of exploration for, or development or mining of, critical and strategic minerals or metals, basis shall be adjusted to the extent provided in section 621, or in section 22(b)(15) of the Internal Revenue Code of 1939.

(m) *Trademark and trade name expenditures.* Trademark and trade name expenditures treated as deferred expenses under section 177 are chargeable to capital account and shall be an adjustment to the basis of the property to which they relate. The basis so adjusted shall be reduced by the amount of such expenditures allowed as deductions which results in a reduction for any taxable year of the taxpayer's taxes under subtitle A (other than chapter 2, relating to tax on self-employment income) of the Code, but not less than the amounts allowable under such section for the taxable year and prior years. This amount is considered as the *tax-benefit amount allowed* and shall be determined in accordance with paragraph (e) of § 1.1016–3.

(n) *Life insurance companies.* In the case of any evidence of indebtedness referred to in section 818(b), the basis shall be adjusted to the extent of the adjustments required under section 818(b) (or the corresponding provisions of prior income tax laws) for the taxable year and all prior taxable years. The basis of any such evidence of indebtedness shall be reduced by the amount of the adjustment required under section 818(b) (or the corresponding provision of prior income tax laws) on account of amortizable premium and shall be increased by the amount of the adjustment required under section 818(b) on account of accruable discounts.

(o) *Stock and indebtedness of electing small business corporation.* In the case of a shareholder of an electing small business corporation, as defined in section 1371(b), the basis of the shareholder's stock in such corporation, and the basis of any indebtedness of such corporation owing to the shareholder, shall be adjusted to the extent provided in §§ 1.1375–4, 1.1376–1, and 1.1376–2.

(p) *Gift tax paid on certain property acquired by gift.* Basis shall be adjusted by that amount of the gift tax paid in respect of property acquired by gift which, under section 1015(d), is an increase in the basis of such property.

(q) *Section 38 property.* In the case of property which is or has been section 38 property (as defined in section 48(a)), the basis shall be adjusted to the extent provided in section 48(g) and in section 203(a)(2) of the Revenue Act of 1964.

(r) *Stock in controlled foreign corporations and other property.* In the case of stock in controlled foreign corporations (or foreign corporations which were controlled foreign corporations) and of property by reason of which a person is considered as owning such stock, the basis shall be adjusted to the extent provided in section 961.

(s) *Original issue discount.* In the case of certain corporate obligations issued at a discount after May 27, 1969, the basis shall be increased under section 1232(a)(3)(E) by the amount of original issue discount included in the holder's gross income pursuant to section 1232(a)(3).

(t) *Section 23 credit.* In the case of property with respect to which a credit has been allowed under section 23 or former section 44C (relating to residential energy credit), basis shall be adjusted as provided in paragraph (k) of § 1.23–3.

(u) *Gas guzzler tax.* In the case of an automobile upon which the gas guzzler tax was imposed, the basis shall be reduced as provided in section 1016 (d).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.1016–5, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 1.1016–6 Other applicable rules.

(a) Adjustments must always be made to eliminate double deductions or their equivalent. Thus, in the case of the stock of a subsidiary company, the basis thereof must be properly adjusted for the amount of the subsidiary company's losses for the years in which consolidated returns were made.

(b) In determining basis, and adjustments to basis, the principles of estoppel apply, as elsewhere under the Code, and prior internal revenue laws.

§ 1.1016–10 Substituted basis.

(a) Whenever it appears that the basis of property in the hands of the taxpayer is a substituted basis, as defined in section 1016(b), the adjustments indicated in §§ 1.1016–1 to 1.1016–6, inclusive, shall be made after first making in respect of such substituted basis proper adjustments of a similar nature in respect of the period during which the property was held by the transferor, donor, or grantor, or during which the other property was held by the person for whom the basis is to be determined. In addition, whenever it appears that the basis of property in the hands of the taxpayer is a substituted basis, as defined in section 1016(b)(1), the adjustments indicated in §§ 1.1016–7 to 1.1016–9, inclusive, and in section 1017 shall also be made, whenever necessary, after first making in respect of such substituted basis a proper adjustment of a similar nature in respect of the period during which the property was held by the transferor, donor, or grantor. Similar rules shall also be applied in the case of a series of substituted bases.

(b)cation of this section may be illustrated by the following example:

Example: A, who makes his returns upon the calendar year basis, in 1935 purchased the X Building and subsequently gave it to his son B. B exchanged the X Building for the Y Building in a tax-free exchange, and then gave the Y Building to his wife C. C, in determining the gain from the sale or disposition of the Y Building in 1954, is required to reduce the basis of the building by deductions for depreciation which were successively allowed (but not less than the amount allowable) to A and B upon the X Building and to B upon the Y Building, in addition to the deductions for depreciation allowed (but not less than the amount allowable) to herself during her ownership of the Y Building.

§ 1.1017–1 Basis reductions following a discharge of indebtedness.

(a) *General rule for section 108(b)(2)(E).* This paragraph (a) applies to basis reductions under section 108(b)(2)(E) that are required by section 108(a)(1) (A) or (B) because the taxpayer excluded discharge of indebtedness (COD income) from gross income. A taxpayer must reduce in the following order, to the extent of the excluded COD income (but not below zero), the adjusted bases of property held on the first day of the taxable year following the taxable year that the taxpayer excluded COD income from gross income (in proportion to adjusted basis):—

(1) Real property used in a trade or business or held for investment, other than real property described in section 1221(1), that secured the discharged indebtedness immediately before the discharge;

(2) Personal property used in a trade or business or held for investment, other than inventory, accounts receivable, and notes receivable, that secured the discharged indebtedness immediately before the discharge;

(3) Remaining property used in a trade or business or held for investment, other than inventory, accounts receivable, notes receivable, and real property described in section 1221(1);

(4) Inventory, accounts receivable, notes receivable, and real property described in section 1221(1); and

(5) Property not used in a trade or business nor held for investment.

(b) *Operating rules*—(1) *Prior tax-attribute reduction.* The amount of excluded COD income applied to reduce basis does not include any COD income applied to reduce tax attributes under sections 108(b)(2) (A) through (D) and, if applicable, section 108(b)(5). For example, if a taxpayer excludes $100 of COD income from gross income under section 108(a) and reduces tax attributes by $40 under sections 108(b)(2) (A) through (D), the taxpayer is required to reduce the adjusted bases of property by $60 ($100−$40) under section 108(b)(2)(E).

(2) *Multiple discharged indebtednesses.* If a taxpayer has COD income attributable to more than one discharged indebtedness resulting in the reduction of tax attributes under sections 108(b)(2) (A) through (D) and, if applicable, section 108(b)(5), paragraph (b)(1) of this section must be applied by allocating the tax-attribute reductions among the indebtednesses in proportion to the amount of COD income attributable to each discharged indebtedness. For example, if a taxpayer excludes $20 of COD income attributable to secured indebtedness A and excludes $80 of COD income attributable to unsecured indebtedness B (a total exclusion of $100), and if the taxpayer reduces tax attributes by $40 under sections 108(b)(2) (A) through (D), the taxpayer must reduce the amount of COD income attributable to secured indebtedness A to $12 ($20 − ($20 / $100 × $40)) and must reduce the amount of COD income attributable to unsecured indebtedness B to $48 ($80 − ($80 / $100 × $40)).

(3) *Limitation on basis reductions under section 108(b)(2)(E) in bankruptcy or insolvency.* If COD income arises from a discharge of indebtedness in a title 11 case or while the taxpayer is insolvent, the amount of any basis reduction under section 108(b)(2)(E) shall not exceed the excess of—

(i) The aggregate of the adjusted bases of property and the amount of money held by the taxpayer immediately after the discharge; over

(ii) The aggregate of the liabilities of the taxpayer immediately after the discharge.

(c) *Modification of ordering rules for basis reductions under sections 108(b)(5) and 108(c)*—(1) *In general.* The ordering rules prescribed in paragraph (a) of this section apply, with appropriate modifications, to basis reductions under sections 108(b)(5) and (c). Thus, a taxpayer that elects to reduce basis under section 108(b)(5) may, to the extent that the election applies, reduce only the adjusted basis of property described in paragraphs (a) (1), (2), and (3) of this section and, if an election is made under paragraph (f) of this section, paragraph (a) (4) of this section. Within paragraphs (a) (1), (2), (3) and (4) of this section, such a taxpayer may reduce only the adjusted bases of depreciable property. A taxpayer that elects to apply section 108(c) may reduce only the adjusted basis of property described in paragraphs (a) (1) and (3) of this section and, within paragraphs (a)(1) and (3) of this section, may reduce only the adjusted bases of depreciable real property. Furthermore, for basis reductions under section 108(c), a taxpayer must reduce the adjusted basis of the qualifying real property to the extent of the discharged qualified real property business indebtedness before reducing the adjusted bases of other depreciable real property. The term *qualifying real property* means real property with respect to which the indebtedness is qualified real property business indebtedness within the meaning of section 108(c)(3).

See paragraphs (f) and (g) of this section for elections relating to section 1221(1) property and partnership interests.

(2) *Partial basis reductions under section 108(b)(5).* If the amount of basis reductions under section 108(b)(5) is less than the amount of the COD income excluded from gross income under section 108(a), the taxpayer must reduce the balance of its tax attributes, including any remaining adjusted bases of depreciable and other property, by following the ordering rules under section 108(b)(2). For example, if a taxpayer excludes $100 of COD income from gross income under section 108(a) and elects to reduce the adjusted bases of depreciable property by $10 under section 108(b)(5), the taxpayer must reduce its remaining tax attributes by $90, starting with net operating losses under section 108(b)(2).

(3) *Modification of fresh start rule for prior basis reductions under section 108(b)(5).* After reducing the adjusted bases of depreciable property under section 108(b)(5), a taxpayer must compute the limitation on basis reductions under section 1017(b)(2) using the aggregate of the remaining adjusted bases of property. For example, if, immediately after the discharge of indebtedness in a title 11 case, a taxpayer's adjusted bases of property is $100 and its undischarged indebtedness is $70, and if the taxpayer elects to reduce the adjusted bases of depreciable property by $10 under section 108(b)(5), section 1017(b)(2) limits any further basis reductions under section 108(b)(2)(E) to $20 (($100 − $10) − $70).

(d) *Changes in security.* If any property is added or eliminated as security for an indebtedness during the one-year period preceding the discharge of that indebtedness, such addition or elimination shall be disregarded where a principal purpose of the change is to affect the taxpayer's basis reductions under section 1017.

(e) *Depreciable property.* For purposes of this section, the term *depreciable property* means any property of a character subject to the allowance for depreciation or amortization, but only if the basis reduction would reduce the amount of depreciation or amortization which otherwise would be allowable for the period immediately following such reduction. Thus, for example, a lessor cannot reduce the basis of leased property where the lessee's obligation in respect of the property will restore to the lessor the loss due to depreciation during the term of the lease, since the lessor cannot take depreciation in respect of such property.

(f) *Election to treat section 1221(1) real property as depreciable*—(1) *In general.* For basis reductions under section 108(b)(5) and basis reductions relating to qualified farm indebtedness, a taxpayer may elect under sections 1017(b)(3)(E) and (4)(C), respectively, to treat real property described in section 1221(1) as depreciable property. This election is not available, however, for basis reductions under section 108(c).

(2) *Time and manner.* To make an election under section 1017(b) (3)(E) or (4)(C), a taxpayer must enter the appropriate information on Form 982, *Reduction of Tax Attributes Due to Discharge of Indebtedness (and Section 1082 Basis Adjustment),* and attach the form to a timely filed (including extensions) Federal income tax return for the taxable year in which the taxpayer has COD income that is excluded from gross income under section 108(a). An election under this paragraph (f) may be revoked only with the consent of the Commissioner.

(g) *Partnerships*—(1) *Partnership COD income.* For purposes of paragraph (a) of this section, a taxpayer must treat a distributive share of a partnership's COD income as attributable to a discharged indebtedness secured by the taxpayer's interest in that partnership.

(2) *Partnership interest treated as depreciable property*—(i) *In general.* For purposes of making basis reductions, if a taxpayer makes an election under section 108(b)(5) (or 108(c)), the taxpayer must treat a partnership interest as depreciable property (or depreciable real property) to the extent of the partner's proportionate share of the partnership's basis in depreciable property (or depreciable real property), provided that the partnership consents to a corresponding reduction in the partnership's basis (inside basis) in depreciable property (or depreciable real property) with respect to such partner.

(ii) *Request by partner and consent of partnership*—(A) *In general.* Except as otherwise provided in this paragraph (g)(2)(ii), a taxpayer may choose whether or not to request that a partnership reduce the inside basis of its depreciable property (or depreciable real property) with respect to the taxpayer, and the partnership may grant or withhold such consent, in its sole discretion. A request by the taxpayer must be made before the due date (including extensions) for filing the taxpayer's Federal income tax return for the taxable year in which the taxpayer has COD income that is excluded from gross income under section 108(a).

(B) *Request for consent required.* A taxpayer must request a partnership's consent to reduce inside basis if, at the time of the discharge, the taxpayer owns (directly or indirectly) a greater than 50 percent interest in the capital and profits of the partnership, or if reductions to the basis of the taxpayer's depreciable property (or depreciable real property) are being made with respect to the taxpayer's distributive share of COD income of the partnership.

(C) *Granting of request required.* A partnership must consent to reduce its partners' shares of inside basis with respect to a discharged indebtedness if consent is requested with respect to that indebtedness by partners owning (directly or indirectly) an aggregate of more than 80 percent of the capital and profits interests of the partnership or five or fewer partners owning (directly or indirectly) an aggregate of more than 50 percent of the capital and profits interests of the partnership. For example, if there is a cancellation of partnership indebtedness that is secured by real property used in a partnership's trade or business, and if partners owning (in the aggregate) 90 percent of the capital and profits interests of the partnership elect to exclude the COD income under section 108(c), the partnership must make the appropriate reductions in those partners' shares of inside basis.

(iii) *Partnership consent statement*—(A) *Partnership requirement.* A consenting partnership must include with the Form 1065, U.S. Partnership Return of Income, for the taxable year following the year that ends with or within the taxable year the taxpayer excludes COD income from gross income under section 108(a), and must provide to the taxpayer on or before the due date of the taxpayer's return (including extensions) for the taxable year in which the taxpayer excludes COD income from gross income, a statement that—

(*1*) Contains the name, address, and taxpayer identification number of the partnership; and

(*2*) States the amount of the reduction of the partner's proportionate interest in the adjusted bases of the partnership's depreciable property or depreciable real property, whichever is applicable.

(B) *Taxpayer's requirement.* Statements described in paragraph (g)(2)(iii)(A) of this section must be attached to a taxpayer's timely filed (including extensions) Federal income tax return for the taxable year in which the taxpayer has COD income that is excluded from gross income under section 108(a).

(iv) *Partner's share of partnership's adjusted basis.* [Reserved]

(3) *Partnership basis reduction.* The rules of this section (including this paragraph (g)) apply in determining the properties to which the partnership's basis reductions must be made.

(h) *Special allocation rule for cases to which section 1398 applies.* If a bankruptcy estate and a taxpayer to whom section 1398 applies (concerning only individuals under Chapter 7 or 11 of title 11 of the United States Code) hold property subject to basis reduction under section 108(b) (2)(E) or (5) on the first day of the taxable year following the taxable year of discharge, the bankruptcy estate must reduce all of the adjusted bases of its property before the taxpayer is required to reduce any adjusted bases of property.

(i) *Effective date.* This section applies to discharges of indebtedness occurring on or after October 22, 1998.

[T.D. 8787, 63 FR 56563, Oct. 22, 1998]

§1.1018–1 Adjusted basis; exception to section 270 of the Bankruptcy Act, as amended.

The adjustment to basis provided by section 270 of the Bankruptcy Act, as amended (11 U.S.C. 670), and by

§§ 1.1016–7 and 1.1016–8 shall not be made if, in a proceeding under section 77B of such Act, as amended (11 U.S.C. 207; 48 Stat. 912), indebtedness was canceled in pursuance of a plan of reorganization which was consummated by adjustment of the capital or debt structure of the insolvent corporation, and the final judgment or decree in such proceeding was entered before September 22, 1938. Section 1018 and this section do not apply if the plan of reorganization under such section 77B was consummated by the transfer of assets of the insolvent corporation to another corporation.

§ 1.1019–1 Property on which lessee has made improvements.

In any case in which a lessee of real property has erected buildings or made other improvements upon the leased property and the lease is terminated by forfeiture or otherwise resulting in the realization by such lessor of income which, were it not for the provisions of section 109, would be includible in gross income of the lessor, the amount so excluded from gross income shall not be taken into account in determining the basis or the adjusted basis of such property or any portion thereof in the hands of the lessor. If, however, in any taxable year beginning before January 1, 1942, there has been included in the gross income of the lessor an amount representing any part of the value of such property attributable to such buildings or improvements, the basis of each portion of such property shall be properly adjusted for the amount so included in gross income. For example, A leased in 1930 to B for a period of 25 years unimproved real property and in accordance with the terms of the lease B erected a building on the property. It was estimated that upon expiration of the lease the building would have a depreciated value of $50,000, which value the lessor elected to report (beginning in 1931) as income over the term of the lease. This method of reporting was used until 1942. In 1952 B forfeits the lease. The amount of $22,000 reported as income by A during the years 1931 to 1941, inclusive, shall be added to the basis of the property represented by the improvements in the hands of A. If in such case A did not report during the period of the lease any income attributable to the value of the building erected by the lessee and the lease was forfeited in 1940 when the building was worth $75,000, such amount, having been included in gross income under the law applicable to that year, is added to the basis of the property represented by the improvements in the hands of A. As to treatment of such property for the purposes of capital gains and losses, see subchapter P (section 1201 and following), chapter 1 of the Code.

§ 1.1020–1 Election as to amounts allowed in respect of depreciation, etc., before 1952.

(a) *In general.* (1) Any person may elect to have the adjustments to the cost or other basis of property under section 1016(a)(2) determined in accordance with subparagraph (B) of such section by filing a statement of election in accordance with the requirements set forth in paragraph (b) of this section. Any election made after 1952 shall be irrevocable when made. Any election made after 1952 shall apply with respect to all property held by the person making the election at any time on or before December 31, 1952, and shall apply to all periods since February 28, 1913, and before January 1, 1952, during which such person held such property or for which adjustments must be made under section 1016(b). For rules with respect to an election made on or before December 31, 1952, see paragraph (c) of this section.

(2) An election by a partner on his own behalf is not an election for the partnership of which he is a member. A separate election must be made on behalf of the partnership. (See section 703(b) (relating to elections of the partnership).) An election on behalf of the partnership applies only with respect to the partnership, and does not apply to the separate property of the partners. A similar rule applies with respect to elections by trusts and beneficiaries of trusts. These rules also apply with respect to a revocation of an election where such election was made on or before December 31, 1952.

(b) *Rules applicable to making of election.* The following rules are applicable to the making of an election under section 1020:

(1) *Form of election.* The election shall be in the form of a statement in writing, shall state the name and address of the taxpayer making the election, and shall contain a statement that such taxpayer elects to have the provisions of section 1016(a)(2)(B) apply in respect of all periods since February 28, 1913, and before January 1, 1952.

(2) *Signature.* The statement shall be signed by the taxpayer making the election, if an individual, or, if the taxpayer making the election is not an individual, the statement shall be signed by the person or persons required to sign the income return of such taxpayer.

(3) *Filing.* The statement must be filed on or before December 31, 1954, in the office of the district director for the internal revenue district in which the income tax return for the year of the election is required to be filed. For rules as to when timely mailing will be treated as timely filing of the statement see section 7502.

(4) *Filing of duplicate.* A copy of the statement of election must be filed with the first return, amended return, or claim for refund filed on or after the date on which the election is made.

(c) *Election made on or before December 31, 1952.* An election made on or before December 31, 1952, in accordance with the provisions of section 113(d) of the Internal Revenue Code of 1939, may be revoked by filing on or before December 31, 1954, in the same office in which the election was filed, a statement of revocation signed in the same manner as the election. Such statement made by any person is irrevocable when made with respect to such person, and no new election may thereafter be made by such person. A copy of the revocation must be filed with the first return, amended return, or claim for refund, filed after the date of the revocation. For additional rules with respect to election made on or before December 31, 1952, see 26 CFR (1939) 39.113(b)(1)–1 (Regulations 118).

(d) *Validity of elections or revocation of elections.* An election or revocation of an election which conforms in substance to the provisions of this section will not be deemed invalid solely because it was filed before the date on which the regulations in this section were promulgated.

(e) *Effect of election.* For rules relating to the effect of an election under this section, see section 1016(a)(2) and the regulations thereunder.

§1.1021–1 Sale of annuities.

In the case of a transfer for value of an annuity contract to which section 72(g) and paragraph (a) of §1.72–10 apply, the transferor shall adjust his basis in such contract as of the time immediately prior to such transfer by subtracting from the premiums or other consideration he has paid or is deemed to have paid for such contract all amounts he has received or is deemed to have received under such annuity contract to the extent that such amounts were not includible in the gross income of the transferor or other recipient under the applicable income tax law. In any case where the amounts which were not includible in the gross income of the recipient were received or deemed to have been received by such transferor exceed the amounts paid or deemed paid by him, the adjusted basis of the contract shall be zero. The income realized by the transferor on such a transfer shall not exceed the total of the amounts received as consideration for the transfer.

COMMON NONTAXABLE EXCHANGES

§ 1.1031(a)–1 Property held for productive use in trade or business or for investment.

(a) *In general*—(1) *Exchanges of property solely for property of a like kind.* Section 1031(a)(1) provides an exception from the general rule requiring the recognition of gain or loss upon the sale or exchange of property. Under section 1031(a)(1), no gain or loss is recognized if property held for productive use in a trade or business or for investment is exchanged solely for property of a like kind to be held either for productive use in a trade or business or for investment. Under section 1031(a)(1), property held for productive use in a trade or business may be exchanged for property held for investment. Similarly, under section 1031(a)(1), property held for investment may be exchanged for property held for productive use in a trade or business. However, section 1031(a)(2) provides that section 1031(a)(1) does not apply to any exchange of—

(i) Stock in trade or other property held primarily for sale;

(ii) Stocks, bonds, or notes;

(iii) Other securities or evidences of indebtedness or interest;

(iv) Interests in a partnership;

(v) Certificates of trust or beneficial interests; or

(vi) Choses in action.

Section 1031(a)(1) does not apply to any exchange of interests in a partnership regardless of whether the interests exchanged are general or limited partnership interests or are interests in the same partnership or in different partnerships. An interest in a partnership that has in effect a valid election under section 761(a) to be excluded from the application of all of subchapter K is treated as an interest in each of the assets of the partnership and not as an interest in a partnership for purposes of section 1031(a)(2)(D) and paragraph (a)(1)(iv) of this section. An exchange of an interest in such a partnership does not qualify for nonrecognition of gain or loss under section 1031 with respect to any asset of the partnership that is described in section 1031(a)(2) or to the extent the exchange of assets of the partnership does not otherwise satisfy the requirements of section 1031(a).

(2) *Exchanges of property not solely for property of a like kind.* A transfer is not within the provisions of section 1031(a) if, as part of the consideration, the taxpayer receives money or property which does not meet the requirements of section 1031(a), but the transfer, if otherwise qualified, will be within the provisions of either section 1031 (b) or (c). Similarly, a transfer is not within the provisions of section 1031(a) if, as part of the consideration, the other party to the exchange assumes a liability of the taxpayer (or acquires property from the taxpayer that is subject to a liability), but the transfer, if otherwise qualified, will be within the provisions of either section 1031 (b) or (c).

A transfer of property meeting the requirements of section 1031(a) may be within the provisions of section 1031(a) even though the taxpayer transfers in addition property not meeting the requirements of section 1031(a) or money. However, the nonrecognition treatment provided by section 1031(a) does not apply to the property transferred which does not meet the requirements of section 1031(a).

(b) *Definition of ''like kind.''* As used in section 1031(a), the words *like kind* have reference to the nature or character of the property and not to its grade or quality. One kind or class of property may not, under that section, be exchanged for property of a different kind or class. The fact that any real estate involved is improved or unimproved is not material, for that fact relates only to the grade or quality of the property and not to its kind or class. Unproductive real estate held by one other than a dealer for future use or future realization of the increment in value is held for investment and not primarily for sale. For additional rules for exchanges of personal property, see §1.1031 (a)–2.

(c) *Examples of exchanges of property of a ''like kind.''* No gain or loss is recognized if (1) a taxpayer exchanges property held for productive use in his trade or business, together with cash, for other property of like kind for the same use, such as a truck for a new truck or a passenger automobile for a new passenger automobile to be used for a like purpose; or (2) a taxpayer who is not a dealer in real estate exchanges city real estate for a ranch or farm, or exchanges a leasehold of a fee with 30 years or more to run for real estate, or exchanges improved real estate for unimproved real estate; or (3) a taxpayer exchanges investment property and cash for investment property of a like kind.

(d) *Examples of exchanges not solely in kind.* Gain or loss is recognized if, for instance, a taxpayer exchanges (1) Treasury bonds maturing March 15, 1958, for Treasury bonds maturing December 15, 1968, unless section 1037(a) (or so much of section 1031 as relates to section 1037(a)) applies to such exchange, or (2) a real estate mortgage for consolidated farm loan bonds.

(e) *Effective date relating to exchanges of partnership interests.* The provisions of paragraph (a)(1) of this section relating to exchanges of partnership interests apply to transfers of property made by taxpayers on or after April 25, 1991.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6935, 32 FR 15822, Nov. 17, 1967; T.D. 8343, 56 FR 14854, Apr. 12, 1991; T.D. 8346, 56 FR 19937, May 1, 1991]

§1.1031(a)–2 Additional rules for exchanges of personal property.

(a) *Introduction.* Section 1.1031(a)–1(b) provides that the nonrecognition rules of section 1031 do not apply to an exchange of one kind or class of property for property of a different kind or class. This section contains additional rules for determining whether personal property has been exchanged for property of a like kind or like class. Personal properties of a like class are considered to be of a ''like kind'' for purposes of section 1031. In addition, an exchange of properties of a like kind may qualify under section 1031 regardless of whether the properties are also of a like class. In determining whether exchanged properties are of a like kind, no inference is to be drawn from the fact that the properties are not of a like class. Under paragraph (b) of this section, depreciable tangible personal properties are of a like class if they are either within the same General Asset Class (as defined in paragraph (b)(2) of this section) or within the same Product Class (as defined in paragraph (b)(3) of this section). Paragraph (c) of this section provides rules for exchanges of intangible personal property and nondepreciable personal property.

(b) *Depreciable tangible personal property*—(1) *General rule.* Depreciable tangible personal property is exchanged for property of a ''like kind'' under section 1031 if the property is exchanged for property of a like kind or like class. Depreciable tangible personal property is of a like class to other depreciable tangible personal property if the exchanged properties are either within the same General Asset Class or within the same Product Class. A single property may not be classified within more than one General Asset Class or within more than one Product Class. In addition, property classified within any General Asset Class may not be classified within a Product Class. A property's General Asset Class or Product Class is determined as of the date of the exchange.

(2) *General Asset Classes.* Except as provided in paragraphs (b)(4) and (b)(5) of this section, property within a General Asset Class consists of depreciable tangible personal property described in one of asset classes 00.11 through 00.28 and 00.4 of Rev. Proc. 87–56, 1987–2 C.B. 674. These General Asset Classes describe types of depreciable tangible personal property that frequently are used in many businesses. The General Asset Classes are as follows:

(i) Office furniture, fixtures, and equipment (asset class 00.11),

(ii) Information systems (computers and peripheral equipment) (asset class 00.12),

(iii) Data handling equipment, except computers (asset class 00.13),

(iv) Airplanes (airframes and engines), except those used in commercial or contract carrying of passengers or freight, and all helicopters (airframes and engines) (asset class 00.21),

(v) Automobiles, taxis (asset class 00.22),

(vi) Buses (asset class 00.23),

(vii) Light general purpose trucks (asset class 00.241),

(viii) Heavy general purpose trucks (asset class 00.242),

(ix) Railroad cars and locomotives, except those owned by railroad transportation companies (asset class 00.25),

(x) Tractor units for use over-the-road (asset class 00.26),

(xi) Trailers and trailer-mounted containers (asset class 00.27),

(xii) Vessels, barges, tugs, and similar water-transportation equipment, except those used in marine construction (asset class 00.28), and

(xiii) Industrial steam and electric generation and/or distribution systems (asset class 00.4).

(3) *Product Classes.* Except as provided in paragraphs (b)(4) and (b)(5) of this section, property within a Product Class consists of depreciable tangible personal property that is listed in a 4-digit product class within Division D of the Standard Industrial Classification codes, set forth in Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual (1987) (SIC Manual). Copies of the SIC Manual may be obtained from the National Technical Information Service, an agency of the U.S. Department of Commerce. Division D of the SIC Manual contains a listing of manufactured products and equipment. For this purpose, any 4-digit product class ending in a ''9'' (i.e., a miscellaneous category) will not be considered a Product Class. If a property is listed in more than one product class, the property is treated as listed in any one of those product classes. A property's 4-digit product classification is referred to as the property's ''SIC Code.''

(4) *Modifications of Rev. Proc. 87–56 and SIC Manual.* The asset classes of Rev. Proc. 87–56 and the product classes of the SIC Manual may be updated or otherwise modified from time to time. In the event Rev. Proc. 87–56 is modified, the General Asset Classes will follow the modification, and the modification will be effective for exchanges occurring on or after the date the modification is published in the Internal Revenue Bulletin, unless otherwise provided. Similarly, in the event the SIC Manual is modified, the Product Classes will follow the modification, and the modification will be effective for exchanges occurring on or after the effective date of the modification. However, taxpayers may rely on the unmodified SIC Manual for exchanges occurring during the one-year period following the effective date of the modification. The SIC Manual generally is modified every five years, in years ending in a 2 or 7 (e.g., 1987 and 1992). The effective date of the modified SIC Manual is announced in the FEDERAL REGISTER and generally is January 1 of the year the SIC Manual is modified.

(5) *Modified classification through published guidance.* The Commissioner may, by guidance published in the Internal Revenue Bulletin, supplement the guidance provided in this section relating to classification of properties. For example, the Commissioner may determine not to follow, in whole or in part, any modification of Rev. Proc. 87–

56 or the SIC Manual. The Commissioner may also determine that two types of property that are listed in separate product classes each ending in a ''9'' are of a like class, or that a type of property that has a SIC Code is of a like class to a type of property that does not have a SIC Code.

(6) *No inference outside of section 1031.* The rules provided in this section concerning the use of Rev. Proc. 87–56 and the SIC Manual are limited to exchanges under section 1031. No inference is intended with respect to the classification of property for other purposes, such as depreciation.

(7) *Examples.* The application of this paragraph (b) may be illustrated by the following examples:

Example 1. Taxpayer A transfers a personal computer (asset class 00.12) to B in exchange for a printer (asset class 00.12). With respect to A, the properties exchanged are within the same General Asset Class and therefore are of a like class.

Example 2. Taxpayer C transfers an airplane (asset class 00.21) to D in exchange for a heavy general purpose truck (asset class 00.242). The properties exchanged are not of a like class because they are within different General Asset Classes. Because each of the properties is within a General Asset Class, the properties may not be classified within a Product Class. The airplane and heavy general purpose truck are also not of a like kind. Therefore, the exchange does not qualify for nonrecognition of gain or loss under section 1031.

Example 3. Taxpayer E transfers a grader to F in exchange for a scraper. Neither property is within any of the General Asset Classes, and both properties are within the same Product Class (SIC Code 3533). With respect to E, therefore, the properties exchanged are of a like class.

Example 4. Taxpayer G transfers a personal computer (asset class 00.12), an airplane (asset class 00.21) and a sanding machine (SIC Code 3553), to H in exchange for a printer (asset class 00.12), a heavy general purpose truck (asset class 00.242) and a lathe (SIC Code 3553). The personal computer and the printer are of a like class because they are within the same General Asset Class; the sanding machine and the lathe are of a like class because neither property is within any of the General Asset Classes and they are within the same Product Class. The airplane and the heavy general purpose truck are neither within the same General Asset Class nor within the same Product Class, and are not of a like kind.

(c) *Intangible personal property and nondepreciable personal property*—(1) *General rule.* An exchange of intangible personal property of nondepreciable personal property qualifies for nonrecognition of gain or loss under section 1031 only if the exchanged properties are of a like kind. No like classes are provided for these properties. Whether intangible personal property is of a like kind to other intangible personal property generally depends on the nature or character of the rights involved (e.g., a patent or a copyright) and also on the nature or character of the underlying property to which the intangible personal property relates.

(2) *Goodwill and going concern value.* The goodwill or going concern value of a business is not of a like kind to the goodwill or going concern value of another business.

(3) *Examples.* The application of this paragraph (c) may be illustrated by the following examples:

Example 1. Taxpayer K exchanges a copyright on a novel for a copyright on a different novel. The properties exchanged are of a like kind.

Example 2. Taxpayer J exchanges a copyright on a novel for a copyright on a song. The properties exchanged are not of a like kind.

(d) *Effective date.* Section 1.1031(a)–2 is effective for exchanges occurring on or after April 11, 1991.

[T.D. 8343, 56 FR 14854, Apr. 12, 1991]

§1.1031(b)–1 Receipt of other property or money in tax-free exchange.

(a) If the taxpayer receives other property (in addition to property permitted to be received without recognition of gain) or money—

(1) In an exchange described in section 1031(a) of property held for investment or productive use in trade or business for property of like kind to be held either for productive use or for investment,

(2) In an exchange described in section 1035(a) of insurance policies or annuity contracts,

(3) In an exchange described in section 1036(a) of common stock for common stock, or preferred stock for preferred stock, in the same corporation and not in connection with a corporate reorganization, or

(4) In an exchange described in section 1037(a) of obligations of the United States, issued under the Second Liberty Bond Act (31 U.S.C. 774 (2)), solely for other obligations issued under such Act, the gain, if any, to the taxpayer will be recognized under section 1031(b) in an amount not in excess of the sum of the money and the fair market value of the other property, but the loss, if any, to the taxpayer from such an exchange will not be recognized under section 1031(c) to any extent.

(b) The application of this section may be illustrated by the following examples:

Example 1. A, who is not a dealer in real estate, in 1954 exchanges real estate held for investment, which he purchased in 1940 for $5,000, for other real estate (to be held for productive use in trade or business) which has a fair market value of $6,000, and $2,000 in cash. The gain from the transaction is $3,000, but is recognized only to the extent of the cash received of $2,000.

Example 2. (a) B, who uses the cash receipts and disbursements method of accounting and the calendar year as his taxable year, has never elected under section 454(a) to include in gross income currently the annual increase in the redemption price of non-interest-bearing obligations issued at a discount. In 1943, for $750 each, B purchased four $1,000 series E U.S. savings bonds bearing an issue date of March 1, 1943.

(b) On October 1, 1963, the redemption value of each such bond was $1,396, and the total redemption value of the four bonds was $5,584. On that date B submitted the four $1,000 series E bonds to the United States in a transaction in which one of such $1,000 bonds was reissued by issuing four $100 series E U.S. savings bonds bearing an issue date of March 1, 1943, and by considering six $100 series E bonds bearing an issue date of March 1, 1943, to have been issued. The redemption value of each such $100 series E bond was $139.60 on October 1, 1963. Then, as part of the transaction, the six $100 series E bonds so considered to have been issued and the three $1,000 series E bonds were exchanged, in an exchange qualifying under section 1037(a), for five $1,000 series H U.S. savings bonds plus $25.60 in cash.

(c) The gain realized on the exchange qualifying under section 1037(a) is $2,325.60, determined as follows:

Amount realized:		
Par value of five series H bonds		$5,000.00
Cash received		25.60
Total realized		5,025.60
Less: Adjusted basis of series E bonds surrendered in the exchange:		
Three $1,000 series E bonds	$2,250.00	
Six $100 series E bonds at $75 each	450.00	
		2,700.00
Gain realized		2,325.60

(d) Pursuant to section 1031(b), only $25.60 (the money received) of the total gain of $2,325.60 realized on the exchange is recognized at the time of exchange and must be included in B's gross income for 1963. The $2,300 balance of the gain ($2,325.60 less $25.60) must be included in B's gross income for the taxable year in which the series H bonds are redeemed or disposed of, or reach final maturity, whichever is earlier, as provided in paragraph (c) of § 1.454–1.

(e) The gain on the four $100 series E bonds, determined by using $75 as a basis for each such bond, must be included in B's gross income for the taxable year in which such bonds are redeemed or disposed of, or reach final maturity, whichever is earlier.

Example 3. (a) The facts are the same as in example (2), except that, as part of the transaction, the $1,000 series E bond is reissued by considering ten $100 series E bonds bearing an issue date of March 1, 1943, to have been issued. Six of the $100 series E bonds so considered to have been issued are surrendered to the United States as part of the exchange qualifying under section 1037(a) and the other four are immediately redeemed.

(b) Pursuant to section 1031(b), only $25.60 (the money received) of the total gain of $2,325.60 realized on the exchange qualifying under section 1037(a) is recognized at the time of the exchange and must be included in B's gross income for 1963. The $2,300 balance of the gain ($2,325.60 less $25.60) realized on such exchange must be included in B's gross income for the taxable year in which the series H bonds are redeemed or disposed of, or reach final maturity, whichever is earlier, as provided in paragraph (c) of § 1.454–1.

(c) The redemption on October 1, 1963, of the four $100 series E bonds considered to have been issued at such time results in gain of $258.40, which is then recognized and must be included in B's gross income for 1963. This gain of $258.40 is the difference between the $558.40 redemption value of such bonds on the date of the exchange and the $300 (4×$75) paid for such series E bonds in 1943.

Example 4. On November 1, 1963, C purchased for $91 a marketable U.S. bond which was originally issued at its par value of $100 under the Second Liberty Bond Act. On February 1, 1964, in an exchange qualifying under section 1037(a), C surrendered the bond to the United States for another marketable U.S. bond, which then had a fair market value of $92, and $1.85 in cash, $0.85 of which was interest. The $0.85 interest received is includible in gross income for the taxable year of the exchange, but the $2 gain ($93 less $91) realized on the exchange is recognized for such year under section 1031(b) to the extent of $1 (the money received). Under section 1031(d), C's basis in the bond received in exchange is $91 (his basis of $91 in the bond surrendered, reduced by the $1 money received and increased by the $1 gain recognized).

(c) Consideration received in the form of an assumption of liabilities (or a transfer subject to a liability) is to be treated as *other property or money* for the purposes of section 1031(b). Where, on an exchange described in section 1031(b), each party to the exchange either assumes a liability of the other party or acquires property subject to a liability, then, in determining the amount of *other property or money* for purposes of section 1031(b), consideration given in the form of an assumption of liabilities (or a receipt of property subject to a liability) shall be offset against consideration received in the form of an assumption of liabilities (or a transfer subject to a liability). See §1.1031(d)–2, examples (1) and (2).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6935, 32 FR 15822, Nov. 17, 1967]

§1.1031(b)–2 Safe harbor for qualified intermediaries.

(a) In the case of simultaneous transfers of like-kind properties involving a qualified intermediary (as defined in §1.1031(k)–1(g)(4)(iii)), the qualified intermediary is not considered the agent of the taxpayer for purposes of section 1031(a). In such a case, the transfer and receipt of property by the taxpayer is treated as an exchange.

(b) In the case of simultaneous exchanges of like-kind properties involving a qualified intermediary (as defined in §1.1031(k)–1(g)(4)(iii)), the receipt by the taxpayer of an evidence of indebtedness of the transferee of the qualified intermediary is treated as the receipt of an evidence of indebtedness of the person acquiring property from the taxpayer for purposes of section 453 and §15a.453–1(b)(3)(i) of this chapter.

(c) Paragraph (a) of this section applies to transfers of property made by taxpayers on or after June 10, 1991.

(d) Paragraph (b) of this section applies to transfers of property made by taxpayers on or after April 20, 1994. A taxpayer may choose to apply paragraph (b) of this section to transfers of property made on or after June 10, 1991.

[T.D. 8346, 56 FR 19937, May 1, 1991, as amended by T.D. 8535, 59 FR 18749, Apr. 20, 1994]

§1.1031(c)–1 Nonrecognition of loss.

Section 1031(c) provides that a loss shall not be recognized from an exchange of property described in section 1031(a), 1035(a), 1036(a), or 1037(a) where there is received in the exchange other property or money in addition to property permitted to be received without recognition of gain or loss. See example (4) of paragraph (a)(3) of §1.1037–1 for an illustration of the application of this section in the case of an exchange of U.S. obligations described in section 1037(a).

[T.D. 6935, 32 FR 15822, Nov. 17, 1967]

§1.1031(d)–1 Property acquired upon a tax-free exchange.

(a)If, in an exchange of property solely of the type described in section 1031, section 1035(a), section 1036(a), or section 1037(a), no part of the gain or loss was recognized under the law applicable to the year in which the exchange was made, the basis of the property acquired is the same as the basis of the property transferred by the taxpayer with proper adjustments to the date of the exchange. If additional consideration is given by the taxpayer in the exchange, the basis of the property acquired shall be the same as the property transferred increased by the amount of additional consideration given (see section 1016 and the regulations thereunder).

(b) If, in an exchange of properties of the type indicated in section 1031, section 1035(a), section 1036(a), or section 1037(a), gain to the taxpayer was recognized under the provisions of section 1031(b) or a similar provision of a prior revenue law, on account of the receipt of money in the transaction, the basis of the property acquired is the basis of the property transferred (adjusted to the date of the exchange), decreased by the amount of money received and increased by the amount of gain recognized on the exchange. The application of this paragaph may be illustrated by the following example:

Example: A, an individual in the moving and storage business, in 1954 transfers one of his moving trucks with an adjusted basis in his hands of $2,500 to B in exchange for a truck (to be used in A's business) with a fair market value of $2,400 and $200 in cash. A realizes a gain of $100 upon the exchange, all of which is recognized under section 1031(b). The basis of the truck acquired by A is determined as follows:

Adjusted basis of A's former truck	$2,500
Less: Amount of money received	200
Difference	2,300
Plus: Amount of gain recognized	100
Basis of truck acquired by A	2,400

(c) If, upon an exchange of properties of the type described in section 1031, section 1035(a), section 1036(a), or section 1037(a), the taxpayer received other property (not permitted to be received without the recognition of gain) and gain from the transaction was recognized as required under section 1031(b), or a similar provision of a prior revenue law, the basis (adjusted to the date of the exchange) of the property transferred by the taxpayer, decreased by the amount of any money received and increased by the amount of gain recognized, must be allocated to and is the basis of the properties (other than money) received on the exchange. For the purpose of the allocation of the basis of the properties received, there must be assigned to such other property an amount equivalent to its fair market value at the date of the exchange. The application of this paragraph may be illustrated by the following example:

Example: A, who is not a dealer in real estate, in 1954 transfers real estate held for investment which he purchased in 1940 for $10,000 in exchange for other real estate (to be held for investment) which has a fair market value of $9,000, an automobile which has a fair market value of $2,000, and $1,500 in cash. A realizes a gain of $2,500, all of which is recognized under section 1031(b). The basis of the property received in exchange is the basis of the real estate A transfers ($10,000) decreased by the amount of money received ($1,500) and increased in the amount of gain that was recognized ($2,500), which results in a basis for the property received of $11,000. This basis of $11,000 is allocated between the automobile and the real estate received by A, the basis of the automobile being its fair market value at the date of the exchange, $2,000, and the basis of the real estate received being the remainder, $9,000.

(d) Section 1031(c) and, with respect to section 1031 and section 1036(a), similar provisions of prior revenue laws provide that no loss may be recognized on an exchange of properties of a type described in section 1031, section 1035(a), section 1036(a), or section 1037(a), although the taxpayer receives other property or money from the transaction. However, the basis of the property or properties (other than money) received by the taxpayer is the basis (adjusted to the date of the exchange) of the property transferred, decreased by the amount of money received. This basis must be allocated to the properties received, and for this purpose there must be allocated to such other property an amount of such basis equivalent to its fair market value at the date of the exchange.

(e) If, upon an exchange of properties of the type described in section 1031, section 1035(a), section 1036(a), or section 1037(a), the taxpayer also exchanged other property (not permitted to be transferred without the recognition of gain or loss) and gain or loss from the transaction is recognized under section 1002 or a similar provision of a prior revenue law, the basis of the property acquired is the total basis of the properties transferred (adjusted to the date of the exchange) increased by the amount of gain and decreased by the amount of loss recognized on the other property. For purposes of this rule, the taxpayer is deemed to have received in exchange for such other property an amount equal to its fair market value on the date of the exchange. The application of this paragraph may be illustrated by the following example:

Example: A exchanges real estate held for investment plus stock for real estate to be held for investment. The real estate transferred has an adjusted basis of $10,000 and a fair market value of $11,000. The stock transferred has an adjusted basis of $4,000 and a fair market value of $2,000. The real estate acquired has a fair market value of $13,000. A is deemed to have received a $2,000 portion of the acquired real estate in exchange for the stock, since $2,000 is the fair market value of the stock at the time of the exchange. A $2,000 loss is recognized under section 1002 on the exchange of the stock for real estate. No gain or loss is recognized on the exchange of the real estate since the property received is of the type permitted to be received without recognition of gain or loss. The basis of the real estate acquired by A is determined as follows:

Adjusted basis of real estate transferred	$10,000
Adjusted basis of stock transferred	4,000
	14,000
Less: Loss recognized on transfer of stock	2,000
Basis of real estate acquired upon the exchange	12,000

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6935, 32 FR 15823, Nov. 17, 1967]

§1.1031(d)–1T Coordination of section 1060 with section 1031 (temporary).

If the properties exchanged under section 1031 are part of a group of assets which constitute a trade or business under section 1060, the like-kind property and other property or money which are treated as transferred in exchange for the like-kind property shall be excluded from the allocation rules of section 1060. However, section 1060 shall apply to property which is not like-kind property or other property or money which is treated as transferred in exchange for the like-kind property. For application of the section 1060 allocation rules to property which is not part of the like-kind exchange, see §1.1060–1T (b), (d), and (g) *Example 3.*

[T.D. 8215, 53 FR 27044, July 18, 1988]

§1.1031(d)–2 Treatment of assumption of liabilities.

For the purposes of section 1031(d), the amount of any liabilities of the taxpayer assumed by the other party to the exchange (or of any liabilities to which the property exchanged by the taxpayer is subject) is to be treated as money received by the taxpayer upon the exchange, whether or not the assumption resulted in a recognition of gain or loss to the taxpayer under the law applicable to the year in which the exchange was made. The application of this section may be illustrated by the following examples:

Example 1. B, an individual, owns an apartment house which has an adjusted basis in his hands of $500,000, but which is subject to a mortgage of $150,000. On September 1, 1954, he transfers the apartment house to C, receiving in exchange therefor $50,000 in cash and another apartment house with a fair market value on that date of $600,000. The transfer to C is made subject to the $150,000 mortgage. B realizes a gain of $300,000 on the exchange, computed as follows:

Value of property received	$600,000
Cash	50,000
Liabilities subject to which old property was transferred	150,000
Total consideration received	800,000
Less: Adjusted basis of property transferred	500,000
Gain realized	300,000

Under section 1031(b), $200,000 of the $300,000 gain is recognized. The basis of the apartment house acquired by B upon the exchange is $500,000, computed as follows:

Adjusted basis of property transferred		500,000
Less: Amount of money received:		
Cash	$50,000	
Amount of liabilities subject to which property was transferred	150,000	
		200,000
Difference		300,000
Plus: Amount of gain recognized upon the exchange		200,000
Basis of property acquired upon the exchange		500,000

Example 2. (a) D, an individual, owns an apartment house. On December 1, 1955, the apartment house owned by D has an adjusted basis in his hands of $100,000, a fair market value of $220,000, but is subject to a mortgage of $80,000. E, an individual, also owns an apartment house. On December 1, 1955, the apartment house owned by E has an adjusted basis of $175,000, a fair market value of $250,000, but is subject to a mortgage of $150,000. On December 1, 1955, D transfers his apartment house to E, receiving in exchange therefore $40,000 in cash and the apartment house owned by E. Each apartment house is transferred subject to the mortgage on it.

(b) D realizes a gain of $120,000 on the exchange, computed as follows:

Value of property received		$250,000
Cash		40,000
Liabilities subject to which old property was transferred		80,000
Total consideration received		370,000
Less:		
Adjusted basis of property transferred	$100,000	
Liabilities to which new property is subject	150,000	
		250,000
Gain realized		120,000

For purposes of section 1031(b), the amount of *other property or money* received by D is $40,000. (Consideration received by D in the form of a transfer subject to a liability of $80,000 is offset by consideration given in the form of a receipt of property subject to a

$150,000 liability. Thus, only the consideration received in the form of cash, $40,000, is treated as *other property or money* for purposes of section 1031(b).) Accordingly, under section 1031(b), $40,000 of the $120,000 gain is recognized. The basis of the apartment house acquired by D is $170,000, computed as follows:

Adjusted basis of property transferred		$100,000
Liabilities to which new property is subject		150,000
Total		250,000
Less:		
Amount of money received:		
Cash	$40,000	
Amount of liabilities subject to which property was transferred	80,000	
		120,000
Difference		130,000
Plus: Amount of gain recognized upon the exchange		40,000
Basis of property acquired upon the exchange		170,000

(c) E realizes a gain of $75,000 on the exchange, computed as follows:

Value of property received		$220,000
Liabilities subject to which old property was transferred		150,000
Total consideration received		370,000
Less:		
Adjusted basis of property transferred	$175,000	
Cash	40,000	
Liabilities to which new property is subject	80,000	
		295,000
Gain realized		75,000

For purposes of section 1031(b), the amount of *other property or money* received by E is $30,000. (Consideration received by E in the form of a transfer subject to a liability of $150,000 is offset by consideration given in the form of a receipt of property subject to an $80,000 liability and by the $40,000 cash paid by E. Although consideration received in the form of cash or other property is not offset by consideration given in the form of an assumption of liabilities or a receipt of property subject to a liability, consideration given in the form of cash or other property is offset against consideration received in the form of an assumption of liabilities or a transfer of property subject to a liability.) Accordingly, under section 1031(b), $30,000 of the $75,000 gain is recognized. The basis of the apartment house acquired by E is $175,000, computed as follows:

Adjusted basis of property transferred		$175,000
Cash		40,000
Liabilities to which new property is subject		80,000
Total		295,000
Less:		
Amount of money received:		
Amount of liabilities subject to which property was transferred	$150,000	
		150,000
Difference		145,000
Plus: Amount of gain recognized upon the exchange		30,000
Basis of property acquired upon the exchange		175,000

§ 1.1031(e)–1 Exchange of livestock of different sexes.

Section 1031(e) provides that livestock of different sexes are not property of like kind. Section 1031(e) and this section are applicable to taxable years to which the Internal Revenue Code of 1954 applies.

[T.D. 7141, 36 FR 18792, Sept. 22, 1971]

§ 1.1031(j)–1 Exchanges of multiple properties.

(a) *Introduction*—(1) *Overview.* As a general rule, the application of section 1031 requires a property-by-property comparison for computing the gain recognized and basis of property received in a like-kind exchange. This section provides an exception to this general rule in the case of an exchange of multiple properties. An exchange is an exchange of multiple properties if, under paragraph (b)(2) of this section, more than one exchange group is created. In addition, an exchange is an exchange of multiple properties if only one exchange group is created but there is more than one property being transferred or received within that exchange group. Paragraph (b) of this section provides rules for computing the amount of gain recognized in an exchange of multiple properties qualifying for nonrecognition of gain or loss under section 1031. Paragraph (c) of this section provides rules for computing the basis of properties received in an exchange of multiple properties qualifying for nonrecognition of gain or loss under section 1031.

(2) *General approach.* (i) In general, the amount of gain recognized in an exchange of multiple properties is computed by first separating the properties transferred and the properties received by the taxpayer in the exchange into exchange groups in the manner described in paragraph (b)(2) of this section. The separation of the properties transferred and the properties received in the exchange into exchange groups involves matching up properties of a like kind of like class to the extent possible. Next, all liabilities assumed by the taxpayer as part of the transaction are offset by all liabilities of which the taxpayer is relieved as part of the transaction, with the excess liabilities assumed or relieved allocated in accordance with paragraph (b)(2)(ii) of this section. Then, the rules of section 1031 and the regulations thereunder are applied separately to each exchange group to determine the amount of gain recognized in the exchange. See §§1.1031(b)–1 and 1.1031(c)–1. Finally, the rules of section 1031 and the regulations thereunder are applied separately to each exchange group to determine the basis of the properties received in the exchange. See §§1.1031(d)–1 and 1.1031(d)–2.

(ii) For purposes of this section, the exchanges are assumed to be made at arms' length, so that the aggregate fair market value of the property received in the exchange equals the aggregate fair market value of the property transferred. Thus, the amount realized with respect to the properties transferred in each exchange group is assumed to equal their aggregate fair market value.
