If B had used actual contract costs rather than estimated costs in determining its gross income for 1986, B would have had gross income from the contract of $500 rather than $800, and thus would have had taxable income of $2,100 rather than $2,400, and would have paid tax of $966 rather than $1,104. B is entitled to receive interest on the difference between these two amounts, the hypothetical overpayment of tax of $138. Interest is computed from the due date (without regard to extensions) of B's return for 1986 until the due date for B's return for 1987. Interest stops running at this date, because B's hypothetical overpayment of tax ended when B filed its original 1987 return and received a refund for the carryback to 1986, and interest on this refund began to run only from the due date of B's 1987 return. See section 6611(f).

Example (11). C enters into a long-term contract in 1986, its first year in business, which is completed in 1988. C determines its tax liability for 1986 as follows:

1986 contract costs	$400a
Total contract costs	$1,000e
Total contract price	$2,000e
1986 completion (%)	40e
1986 gross income	$800a
less, 1986 costs	($400a)
1986 net contract income	$400a
Other 1986 net income	$2,000a
Taxable income (NOL)	$2,400a
Tax at 46%	$1,104a

C determines its tax liability for 1987 as follows:

1987 contract costs	$400a
Total contract costs	$1,066e
Total contract price	$2,000e
1987 completion (%)	75e
1987 gross income	$700a
Less, 1987 costs	($400a)
1987 net contract income	$300a
Other 1987 net income	($2,450a)
Taxable income (NOL)	($2,150a)
Tax	$10a

C carries back the net operating loss to 1986, and files an amended return for 1986, showing taxable income of $250, and receives a refund of $989 (46% x $2,150). Interest on this refund begins to run only as of the due date of C's 1987 return. See section 6611(f).

In 1988, when the contract is completed, C determines the following amounts:

1988 contract costs	$800a
Total contract costs	$1,600a
Total contract price	$2,000a

If C had used actual contract price and contract costs in determining gross income for 1986, it would have reported gross income from the contract of $500 rather than $800, taxable income of $2,100 rather than $2,400, and tax liability of $966 rather than $1,104.

If C had used actual contract price and contract costs in determining gross income for 1987, it would have reported gross income from the contract of $500 rather than $700, and would have reported a net operating loss of $2,350, rather than $2,150, which would have been carried back to 1986.

Under the look-back method, C receives interest with respect to a total 1986 hypothetical overpayment of $138 ($1,104 minus $966). C is credited with interest on $23 of this amount only from the due date of C's 1986 return until the due date of C's 1987 tax return, because this portion of C's total hypothetical overpayment for 1986 was refunded to C with interest computed from the due date of C's 1987 return and, therefore, was no longer held by the government. However, because the remainder of the total hypothetical overpayment of $115 was not refunded to C, C is credited with interest on this amount from the due date of C's 1986 return until the due date of C's 1988 tax return.

Under the look-back method, C receives no interest with respect to 1987, because C had no tax liability for 1987 using either estimated or actual contract price and costs.

(i) [Reserved].

(j) *Election not to apply look-back method in de minimis cases.* Section 460(b)(6) provides taxpayers with an election not to apply the look-back method to long-term contracts in de minimis cases, effective for contracts completed in taxable years ending after August 5, 1997. To make an election, a taxpayer must attach a statement to its timely filed original federal income tax return (including extensions) for the taxable year the election is to become effective or to an amended return for that year, provided the amended return is filed on or before March 31, 998. This statement must have the legend ''NOTIFICATION OF ELECTION UNDER SECTION 460(b)(6)''; provide the taxpayer's name and identifying number and the effective date of the election; and identify the trades or businesses that involve long-term contracts. An election applies to all long-term contracts completed during and after the taxable year for which the election is effective. An election may not be revoked without the Commissioner's consent. For taxpayers who elected to use the delayed reapplication method under paragraph (e) of this section, an election under this paragraph (j) automatically revokes the election to use the delayed reapplication method for contracts subject to section 460(b)(6). A consolidated group of corporations, as defined in §1.1502–1(h), is subject to consistency rules analogous to those in paragraph (e)(2) of this section and in paragraph (d)(4)(ii)(C) of this section (concerning election to use simplified marginal impact method).

TAXABLE YEAR FOR WHICH DEDUCTIONS TAKEN

§1.461–0 Table of contents.

This section lists the captions that appear in the regulations under section 461 of the Internal Revenue Code.

§1.461–1 General rule for taxable year of deduction.

(a) General rule.
(1) Taxpayer using cash receipts and disbursements method.
(2) Taxpayer using an accrual method.
(3) Effect in current taxable year of improperly accounting for a liability in a prior taxable year.
(4) Deductions attributable to certain foreign income.
(b) Special rule in case of death.
(c) Accrual of real property taxes.
(1) In general.
(2) Special rules.
(3) When election may be made.
(4) Binding effect of election.
(5) Apportionment of taxes on real property between seller and purchaser.
(6) Examples.
(d) Limitation on acceleration of accrual of taxes.
(e) Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts.
(1) Deduction not allowable.
(2) Computation of amounts not allowed as a deduction.
(3) When amounts allowable.

§1.461–2 Contested liabilities.

(a) General rule.
(1) Taxable year of deduction.
(2) Exception.
(3) Refunds includible in gross income.
(4) Examples.
(5) Liabilities described in paragraph (g) of §1.461–4. [Reserved]
(b) Contest of asserted liability.
(1) Asserted liability.
(2) Definition of the term ''contest.''
(3) Example.
(c) Transfer to provide for the satisfaction of an asserted liability.
(1) In general.
(2) Examples.
(d) Contest exists after transfer.
(e) Deduction otherwise allowed.
(1) In general.
(2) Example.
(f) Treatment of money or property transferred to an escrowee, trustee, or court and treatment of any income attributable thereto. [Reserved]
(g) Effective dates.

§1.461–3 Prepaid interest. [Reserved]

§1.461–4 Economic performance.

(a) Introduction.
(1) In general.
(2) Overview.
(b) Exceptions to the economic performance requirement.
(c) Definitions.
(1) Liability.
(2) Payment.
(d) Liabilities arising out of the provision of services, property, or the use of property.
(1) In general.
(2) Services or property provided to the taxpayer.
(3) Use of property provided to the taxpayer.
(4) Services or property provided by the taxpayer.
(5) Liabilities that are assumed in connection with the sale of a trade or business.
(6) Rules relating to the provision of services or property to a taxpayer.
(7) Examples.
(e) Interest.
(f) Timing of deductions from notional principal contracts.
(g) Certain liabilities for which payment is economic performance.
(1) In general.

(2) Liabilities arising under a workers compensation act or out of any tort, breach of contract, or violation of law.

(3) Rebates and refunds.

(4) Awards, prizes, and jackpots.

(5) Insurance, warranty, and service contracts.

(6) Taxes.

(7) Other liabilities.

(8) Examples.

(h) Liabilities arising under the Nuclear Waste Policy Act of 1982.

(i) [Reserved]

(j) Contingent liabilities. [Reserved]

(k) Special effective dates.

(1) In general.

(2) Long-term contracts.

(3) Payment liabilities.

(l) [Reserved]

(m) Change in method of accounting required by this section.

(1) In general.

(2) Change in method of accounting for long-term contracts and payment liabilities.

§ 1.461–5 Recurring item exception.

(a) In general.

(b) Requirements for use of the exception.

(1) General rule.

(2) Amended returns.

(3) Liabilities that are recurring in nature.

(4) Materiality requirement.

(5) Matching requirement.

(c) Types of liabilities not eligible for treatment under the recurring item exception.

(d) Time and manner of adopting the recurring item exception.

(1) In general.

(2) Change to the recurring item exception method for the first taxable year beginning after December 31, 1991.

(3) Retroactive change to the recurring item exception method.

(e) Examples.

§ 1.461–6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.

(a) Qualified assignments of certain personal injury liabilities under section 130.

(b) Section 468B.

(c) Payments to other funds or persons that constitute economic performance. [Reserved]

(d) Effective dates.

[T.D. 8408, 57 FR 12420, Apr. 10, 1992, as amended by T.D. 8593, 60 FR 18743, Apr. 13, 1995]

§ 1.461–1 General rule for taxable year of deduction.

(a) *General rule*—(1) *Taxpayer using cash receipts and disbursements method.* Under the cash receipts and disbursements method of accounting, amounts representing allowable deductions shall, as a general rule, be taken into account for the taxable year in which paid. Further, a taxpayer using this method may also be entitled to certain deductions in the computation of taxable income which do not involve cash disbursements during the taxable year, such as the deductions for depreciation, depletion, and losses under sections 167, 611, and 165, respectively. If an expenditure results in the creation of an asset having a useful life which extends substantially beyond the close of the taxable year, such an expenditure may not be deductible, or may be deductible only in part, for the taxable year in which made. An example is an expenditure for the construction of improvements by the lessee on leased property where the estimated life of the improvements is in excess of the remaining period of the lease. In such a case, in lieu of the allowance for depreciation provided by section 167, the basis shall be amortized ratably over the remaining period of the lease. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in determining whether the useful life of the improvements exceeds the remaining term of the lease where a lessee begins improvements on leased property after July 28, 1958, other than improvements which on such date and at all times thereafter, the lessee was under a binding legal obligation to make. See section 263 and the regulations thereunder for rules relating to capital expenditures.

(2) *Taxpayer using an accrual method*—(i) *In general.* Under an accrual method of accounting, a liability (as defined in § 1.446–1(c)(1)(ii)(B)) is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of this section for examples of liabilities that may not be taken into account until a taxable year subsequent to the taxable year incurred, and see §§ 1.461–4 through

1.461–6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in which a liability that has been incurred is taken into account. For example, section 162 provides that the deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of §1.263A–1(c)(3)), and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accordance with applicable Internal Revenue Code sections and guidance published by the Secretary. The principles of this paragraph (a)(2) also apply in the calculation of earnings and profits and accumulated earnings and profits.

(ii) *Uncertainty as to the amount of a liability.* While no liability shall be taken into account before economic performance and all of the events that fix the liability have occurred, the fact that the exact amount of the liability cannot be determined does not prevent a taxpayer from taking into account that portion of the amount of the liability which can be computed with reasonable accuracy within the taxable year. For example, A renders services to B during the taxable year for which A charges $10,000. B admits a liability to A for $6,000 but contests the remainder. B may take into account only $6,000 as an expense for the taxable year in which the services were rendered.

(iii) *Alternative timing rules.* (A) If any provision of the Code requires a liability to be taken into account in a taxable year later than the taxable year provided in paragraph (a)(2)(i) of this section, the liability is taken into account as prescribed in that Code provision. See, for example, section 267 (transactions between related parties) and section 464 (farming syndicates).

(B) If the liability of a taxpayer is subject to section 170 (charitable contributions), section 192 (black lung benefit trusts), section 194A (employer liability trusts), section 468 (mining and solid waste disposal reclamation and closing costs), or section 468A (certain nuclear decommissioning costs), the liability is taken into account as determined under that section and not under section 461 or the regulations thereunder. For special rules relating to certain loss deductions, see sections 165(e), 165(i), and 165(l), relating to theft losses, disaster losses, and losses from certain deposits in qualified financial institutions.

(C) Section 461 and the regulations thereunder do not apply to any amount allowable under a provision of the Code as a deduction for a reserve for estimated expenses.

(D) Except as otherwise provided in any Internal Revenue regulations, revenue procedure, or revenue ruling, the economic performance requirement of section 461(h) and the regulations thereunder is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation), section 404A (certain foreign deferred compensation plans), or section 419 (welfare benefit funds). See §1.461–4(d)(2)(iii).

(3) *Effect in current taxable year of improperly accounting for a liability in a prior taxable year.* Each year's return should be complete in itself, and taxpayers shall ascertain the facts necessary to make a correct return. The expenses, liabilities, or loss of one year generally cannot be used to reduce the income of a subsequent year. A taxpayer may not take into account in a return for a subsequent taxable year liabilities that, under the taxpayer's method of accounting, should have been taken into account in a prior taxable year. If a taxpayer ascertains that a liability should have been taken into account in a prior taxable year, the taxpayer should, if within the period of limitation, file a claim for credit or refund of any overpayment of tax arising

therefrom. Similarly, if a taxpayer ascertains that a liability was improperly taken into account in a prior taxable year, the taxpayer should, if within the period of limitation, file an amended return and pay any additional tax due. However, except as provided in section 905(c) and the regulations thereunder, if a liability is properly taken into account in an amount based on a computation made with reasonable accuracy and the exact amount of the liability is subsequently determined in a later taxable year, the difference, if any, between such amounts shall be taken into account for the later taxable year.

(4) *Deductions attributable to certain foreign income.* In any case in which, owing to monetary, exchange, or other restrictions imposed by a foreign country, an amount otherwise constituting gross income for the taxable year from sources without the United States is not includible in gross income of the taxpayer for that year, the deductions and credits properly chargeable against the amount so restricted shall not be deductible in such year but shall be deductible proportionately in any subsequent taxable year in which such amount or portion thereof is includible in gross income. See paragraph (b) of § 1.905–1 for rules relating to credit for foreign income taxes when foreign income is subject to exchange controls.

(b) *Special rule in case of death.* A taxpayer's taxable year ends on the date of his death. See section 443(a)(2) and paragraph (a)(2) of § 1.443–1. In computing taxable income for such year, there shall be deducted only amounts properly deductible under the method of accounting used by the taxpayer. However, if the taxpayer used an accrual method of accounting, no deduction shall be allowed for amounts accrued only by reason of his death. For rules relating to the inclusion of items of partnership deduction, loss, or credit in the return of a decedent partner, see subchapter K, chapter 1 of the Code, and the regulations thereunder.

(c) *Accrual of real property taxes*— (1) *In general.* If the accrual of real property taxes is proper in connection with one of the methods of accounting described in section 446(c), any taxpayer using such a method of accounting may elect to accrue any real property tax, which is related to a definite period of time, ratably over that period in the manner described in this paragraph. For example, assume that such an election is made by a calendar-year taxpayer whose real property taxes, applicable to the period from July 1, 1955, to June 30, 1956, amount to $1,200. Under section 461(c), $600 of such taxes accrue in the calendar year 1955, and the balance accrues in 1956. For special rule in the case of certain contested real property taxes in respect of which the taxpayer transfers money or other property to provide for the satisfaction of the contested tax, see § 1.461–2. For general rules relating to deductions for taxes, see section 164 and the regulations thereunder.

(2) *Special rules*—(i) *Effective date.* Section 461(c) and this paragraph do not apply to any real property tax allowable as a deduction under the Internal Revenue Code of 1939 for any taxable year beginning before January 1, 1954.

(ii) If real property taxes which relate to a period prior to the taxpayer's first taxable year beginning on or after January 1, 1954, would, but for section 461(c), be deductible in such first taxable year, the portion of such taxes which applies to the prior period is deductible in such first taxable year (in addition to the amount allowable under section 461(c)(1)).

(3) *When election may be made*—(i) *Without consent.* A taxpayer may elect to accrue real property taxes ratably in accordance with section 461(c) and this paragraph without the consent of the Commissioner for his first taxable year beginning after December 31, 1953, and ending after August 16, 1954, in which the taxpayer incurs real property taxes. Such election must be made not later than the time prescribed by law for filing the return for such year (including extensions thereof). An election may be made by the taxpayer for each separate trade or business (and for nonbusiness activities, if accounted for separately). Such an election shall apply to all real property taxes of the trade, business, or nonbusiness activity for which the election is made. The election shall be made in a statement submitted with the taxpayer's return

for the first taxable year to which the election is applicable. The statement should set forth:

(a) The trades or businesses, or nonbusiness activity, to which the election is to apply, and the method of accounting used therein;

(b) The period of time to which the taxes are related; and

(c) The computation of the deduction for real property taxes for the first year of the election (or a summary of such computation).

(ii) *With consent.* A taxpayer may elect with the consent of the Commissioner to accrue real property taxes ratably in accordance with section 461 (c) and this paragraph. A written request for permission to make such an election shall be submitted to the Commissioner of Internal Revenue, Washington, D.C. 20224, within 90 days after the beginning of the taxable year to which the election is first applicable, or before March 26, 1958, whichever date is later. The request for permission shall state:

(a) The name and address of the taxpayer;

(b) The trades or businesses, or nonbusiness activity, to which the election is to apply, and the method of accounting used therein;

(c) The taxable year to which the election first applies;

(d) The period to which the real property tax relate;

(e) The computation of the deduction for real property taxes for the first year of election (or a summary of such computation); and

(f) An adequate description of the manner in which all real property taxes were deducted in the year prior to the year of election.

(4) *Binding effect of election.* An election to accrue real property taxes ratably under section 461(c) is binding upon the taxpayer unless the consent of the Commissioner is obtained under section 446(e) and paragraph (e) of §1.446–1 to change such method of deducting real property taxes. If the last day prescribed by law for filing a return for any taxable year (including extensions thereof) to which section 461(c) is applicable falls before March 25, 1958, consent is hereby given for the taxpayer to revoke an election previously made to accrue real property taxes in the manner prescribed by section 461(c). If the taxpayer revokes his election under the preceding sentence, he must, on or before March 25, 1958, notify the district director for the district in which the return was filed of such revocation. For any taxable year for which such revocation is applicable, an amended return reflecting such revocation shall be filed on or before March 25, 1958.

(5) *Apportionment of taxes on real property between seller and purchaser.* For apportionment of taxes on real property between seller and purchaser, see section 164(d) and the regulations thereunder.

(6) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example (1). A taxpayer on an accrual method reports his taxable income for the taxable year ending June 30. He elects to accrue real property taxes ratably for the taxable year ending June 30, 1955 (which is his first taxable year beginning on or after January 1, 1954). In the absence of an election under section 461(c), such taxes would accrue on January 1 of the calendar year to which they are related. The real property taxes are $1,200 for 1954; $1,600 for 1955; and $1,800 for 1956. Deductions for such taxes for the fiscal years ending June 30, 1955, and June 30, 1956, are computed as follows:

Fiscal year ending June 30, 1955

July through December 1954	[1]None
January through June 1955 (6⁄12 of $1,600)	$800
Deduction for fiscal year ending June 30, 1955	800

[1] The taxes for 1954 were deductible in the fiscal year ending June 30, 1954, since such taxes accrued on January 1, 1954.

Fiscal year ending June 30, 1956

July through December 1955 (6⁄12 of $1,600)	$800
January through June 1956 (6⁄12 of $1,800)	900
Deduction for fiscal year ending June 30, 1956	1,700

Example (2). A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes would accrue on July 1 and are assessed for the 12-month period beginning on that date. The real property taxes assessed for the year ending June 30, 1954, are $1,200; $1,600 for the year ending June 30, 1955; and $1,800 for the year ending June 30, 1956. Deductions for such taxes for the calendar years 1954 and 1955 are computed as follows:

Year ending December 31, 1954

January through June 1954	[1]None

Year ending December 31, 1954—Continued

July through December 1954 (6⁄12 of $1,600)	$800
Deduction for year ending December 31, 1954	800

[1] The entire tax of $1,200 for the year ended June 30, 1954, was deductible in the return for 1953, since such tax accrued on July 1, 1953.

Year ending December 31, 1955

January through June 1955 (6⁄12 of $1,600)	$800
July through December 1955 (6⁄12 of $1,800)	900
Deduction for year ending December 31, 1955	1,700

Example (3). A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes, which relate to the calendar year 1954, are accruable on December 1 of the preceding calendar year. No deduction for real property taxes is allowable for the taxable year 1954 since such taxes accrued in the taxable year 1953 under section 23(c) of the Internal Revenue Code of 1939.

Example (4). A taxpayer on an accrual method reports his taxable income for the taxable year ending March 31. He elects to accrue real property taxes ratably for the taxable year ending March 31, 1955. In the absence of an election under section 461(c), such taxes are accruable on June 1 of the calendar year to which they relate. The real property taxes are $1,200 for 1954; $1,600 for 1955; and $1,800 for 1956. Deductions for such taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

Fiscal year ending March 31, 1955

April through December 1954 (9⁄12 of $1,200)	$900
January through March 1955 (3⁄12 of $1,600)	400
Taxes accrued ratably in fiscal year ending March 31, 1955	1,800
Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable year (9⁄12 of $1,200)	300
Deduction for fiscal year ending March 31, 1955	1,600

Fiscal year ending March 31, 1956

April through December 1955 (9⁄12 of $1,600)	$1,200
January through March 1956 (3⁄12 of $1,800)	450
Deduction for fiscal year ending March 31, 1956	1,650

Example (5). The facts are the same as in example (4) except that in June 1955, when the taxpayer pays his $1,600 real property taxes for 1955, he pays $400 of such amount under protest. Deductions for taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

Fiscal year ending March 31, 1955

April through December 1954 (9⁄12 of $1,200)	$900
January through March 1955 (3⁄12 of $1,200, that is, $1,600 minus $400 (the contested portion which is not properly accruable))	300
Taxes accrued ratably in fiscal year ending March 31, 1955	1,200
Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable years (3⁄12 of $1,200)	300
Deduction for fiscal year ending March 31, 1955	1,500

Fiscal year ending March 31, 1956

April through December 1955 (9⁄12 of $1,200)	$900
January through March 1956 (3⁄12 of $1,800)	450
Taxes accrued ratably in fiscal year ending March 31, 1956	1,350
Contested portion of tax relating to period January through December 1955, paid in June 1955, and deductible, under section 461(f), for taxpayer's fiscal year ending March 31, 1956	400
Deduction for fiscal year ending March 31, 1956	1,750

(d) *Limitation on acceleration of accrual of taxes.* (1) Section 461(d)(1) provides that, in the case of a taxpayer whose taxable income is computed under an accrual method of accounting, to the extent that the time for accruing taxes is earlier than it would be but for any action of any taxing jurisdiction taken after December 31, 1960, such taxes are to be treated as accruing at the time they would have accrued but for such action. Any such action which, but for the provisions of section 461(d) and this paragraph, would accelerate the time for accruing a tax is to be disregarded in determining the time for accruing such tax for purposes of the deduction allowed for such tax. Such action is to be disregarded not only with respect to a taxpayer (whose taxable income is computed under an accrual method of accounting) upon whom the tax is imposed at the time of the action, but also with respect to such a taxpayer upon whom the tax is imposed at any time subsequent to such action. Thus, in the case of a tax imposed on property, the acceleration of the time for accruing taxes is to be disregarded not only with respect to the taxpayer who owned the property at the time of such acceleration, but also with respect to any subsequent owner of the property whose taxable income is computed under an accrual method of accounting. Similarly, such action is to be disregarded with respect to all property subject to such tax, even if such property is acquired after the action. Whenever the time for accruing taxes is to be disregarded in accordance with the provisions of this paragraph, the taxpayer shall accrue the tax at the time (original accrual date) the tax would have accrued but for such action, and shall, in the absence of any action of the taxing jurisdiction placing the time for accruing such tax at a time subsequent to the original accrual date, continue to accrue the tax as of the original accrual date for all future taxable years.

(2) For purposes of this paragraph—

(i) The term ‘‘a taxpayer whose taxable income is computed under an accrual method of accounting’’ means a taxpayer who, for Federal income tax purposes, accounts for any tax which is the subject of ‘‘any action’’ (as defined in subdivision (iii) of this subparagraph) under an accrual method of accounting. See section 446 and the regulations thereunder. If a taxpayer uses an accrual method as his overall method of accounting, it shall be presumed that he is ‘‘a taxpayer whose taxable income is computed under an accrual method of accounting.’’ However, if the taxpayer establishes to the satisfaction of the district director that he has, for Federal income tax purposes, consistently accounted for such tax under the cash method of accounting, he shall be considered not to be ‘‘a taxpayer whose taxable income is computed under an accrual method of accounting.’’

(ii) The time for accruing taxes shall be determined under section 461 and the regulations in this section.

(iii) The term ‘‘any action’’ includes the enactment or reenactment of legislation, the adoption of an ordinance, the exercise of any taxing or administrative authority, or the taking of any other step, the result of which is an acceleration of the accrual event of any tax. The term also applies to the substitution of a substantially similar tax by either the original taxing jurisdiction or a substitute jurisdiction. However, the term does not include either a judicial interpretation, or an administrative determination by the Internal Revenue Service, as to the event which fixes the accrual date for the tax.

(iv) The term ‘‘any taxing jurisdiction’’ includes the District of Columbia, any State, possession of the United States, city, county, municipality, school district, or other political subdivision or authority, other than the United States, which imposes, assesses, or collects a tax.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). State X imposes a tax on intangible and tangible personal property used in a trade or business conducted in the State. The tax is assessed as of July 1, and becomes a lien as of that date. As a result of administrative and judicial decisions, July 1 is recognized as the proper date on which accrual method taxpayers may accrue their personal property tax for Federal income tax purposes. In 1961 State X, by legislative action, changes the assessment and lien dates from July 1, 1962, to December 31, 1961, for the property tax year 1962. The action taken by State X is considered to be ‘‘any action’’ of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the personal property tax imposed by State X, for the property tax year 1962, shall be treated as though it accrued on July 1, 1962.

Example (2). Assume the same facts as in example (1) except that State X repeals the personal property tax and in lieu thereof enacts a franchise tax which is imposed on the privilege of conducting a trade or business within State X, and is based on the value of intangible and tangible personal property used in the trade or business. The franchise tax is to be assessed and will become a lien as of December 31, 1961, for the franchise tax year 1962, and on December 31 for all subsequent franchise tax years. Since the franchise tax is substantially similar to the former personal property tax and since the enactment of the franchise tax has the effect of accelerating the accrual date of the personal property tax from July 1, 1962, to December 31, 1961, the action taken by State X is considered to be ‘‘any action’’ of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the franchise tax imposed by State X shall be treated as though it accrued on July 1, 1962, for the franchise tax year 1962, and on July 1 for all subsequent franchise tax years.

Example (3). Assume the same facts as in example (1) except that State X repealed the personal property tax and empowered the counties within the State to impose a personal property tax. Assuming the counties in State X subsequently imposed a personal property tax and chose December 31 of the preceding year as the assessment and lien date, the action of each of the counties would be considered to be ‘‘any action’’ of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action since it is immaterial whether the original taxing jurisdiction or a substitute jurisdiction took the action.

(4) Section 461(d)(1) shall not be applicable to the extent that it would prevent the taxpayer and all other persons, including successors in interest, from ever taking into account, for Federal income tax purposes, any tax to which that section would otherwise apply. For example, assume that State Y imposes a personal property tax on tangible personal property used in a trade or business conducted in the State during a calendar year. The tax is assessed as of February 1 of the year following the personal property tax year, and becomes a lien as of that date. As a result of administrative and judicial decisions, February 1 of the following year is recognized as the proper date on which accrual method taxpayers may accrue the personal property tax for Federal income tax purposes. In 1962 State Y, by legislative action, changes the assessment and lien dates for the personal property tax year 1962 from February 1, 1963, to December 1, 1962, and to December 1 of the personal property tax year for all subsequent years. Corporation A, an accrual method taxpayer which uses the calendar year as its taxable year, pays the tax for 1962 on December 10, 1962. On December 15, 1962, the property which was taxed is completely destroyed and, on December 20, 1962, corporation A transfers all of its remaining assets to its shareholders, and is dissolved. Since corporation A is not in existence in 1963, and therefore could not take the personal property tax into account in computing its 1963 Federal income tax if February 1, 1963, is considered to be the time for accruing the tax, and no other person could ever take such tax into account in computing his Federal income tax, such tax shall be treated as accruing as of December 1, 1962. To the extent that any person other than the taxpayer may at any time take such tax into account in computing his taxable income, the provisions of section 461(d)(1) shall apply. Thus, upon the dissolution of a corporation or the termination of a partnership between the time which, but for the provisions of section 461(d)(1) and this paragraph, would be the time for accruing any tax which was the subject of ‘‘any action’’ (as defined in subdivision (iii) of subparagraph (2)), and the original accrual date, the corporation or the partnership would be entitled to a deduction for only that portion, if any, of such tax with respect to which it can establish, to the satisfaction of the district director, that no other taxpayer can properly take into account in computing his taxable income. However, to the extent that the corporation or partnership cannot establish, at the time of its dissolution or termination, as the case may be, that no other taxpayer would be entitled to take such tax into account in computing his taxable income, and it is subsequently determined that no other taxpayer is entitled to take such tax into account in computing his taxable income, the corporation or partnership may file a claim for refund for the year of its dissolution or termination (subject to the limitations prescribed in section 6511) and claim as a deduction therein the portion of such tax determined to be not deductible by any other taxpayer.

(5) Section 461(d) and this paragraph shall apply to taxable years ending after December 31, 1960.

(e) *Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts*—(1) *Deduction not allowable*—(i) *In general.* Except as otherwise provided in this paragraph, pursuant to section 461(e) amounts paid to, or credited to the accounts of, depositors or holders of accounts as dividends or interest on their deposits or withdrawable accounts (if such amounts paid or credited are withdrawable on demand subject only to customary notice to withdraw) by a mutual savings bank not having capital stock represented by shares, a domestic building and loan association, or a cooperative bank shall not be allowed as a deduction for the taxable year to the extent such amounts are paid or credited for periods representing more than 12 months. The provisions of section 461(e) are applicable with respect to taxable years ending after December 31, 1962. Whether amounts are paid or credited for periods representing more than 12 months depends upon all the facts and circumstances in each case. For example, payments or credits which under all the facts and circumstances are in the nature of bona fide bonus interest or dividends paid or credited because a shareholder or depositor maintained a certain balance for more than 12 months, will not be considered made for more than 12 months, providing the regular payments or credits represent a period of 12 months or less. The nonallowance of a deduction to the taxpayer under section 461(e) and this subparagraph has no effect either on the proper time for reporting dividends or interest by a depositor or holder of a withdrawable account, or on the obligation of the taxpayer to make a return setting forth, among other things, the aggregate amounts paid to a depositor or shareholder under section 6049 (relating to returns regarding payments of interest) and the regulations thereunder. With respect to a short period (a taxable year consisting of a period of less than 12 months), amounts of dividends or interest paid or credited shall not be allowed as a deduction to the extent that such amounts are paid or credited for a period representing more than the number of months in such short period. In such a case, the rules contained in section 461(e) and this paragraph apply to the short period in a manner consistent with the application of such rules to a 12-month taxable year. Subparagraph (2) of this paragraph provides rules for computing amounts not allowed in the taxable year and subparagraph (3) provides rules for determining when such amounts are allowed. See section 7701(a) (19) and (32) and the regulations thereunder for the definitions of domestic building and loan association and cooperative bank.

(ii) *Exceptions.* The rule of nonallowance set forth in subdivision (i) of this subparagraph is not applicable to a taxpayer in the year in which it liquidates (other than following, or as part of, an acquisition of its assets in which the acquiring corporation, pursuant to section 381(a), takes into account certain items of the taxpayer, which for purposes of this paragraph shall be referred to as an acquisition described in section 381(a)). In addition, such rule of nonallowance is not applicable to a taxpayer which pays or credits grace interest or dividends to terminating depositors or shareholders, provided the total amount of the grace interest or dividends paid or credited during the payment or crediting period (for example, a quarterly or semiannual period) does not exceed 10 percent of the total amount of the interest or dividends paid or credited during such period, computed without regard to the grace interest or dividends. For example, providing the 10 percent limitation is met, the rule of nonallowance does not apply in a case in which a calendar year taxpayer, with regular interest payment dates of January 1, April 1, July 1, and October 1, pays grace interest for the period beginning October 1 to a depositor who terminates his account on December 10.

(2) *Computation of amounts not allowed as a deduction*—(i) *Method of computation.* The amount of the dividends or interest to which subparagraph (1) of this paragraph applies, which is not allowed as a deduction, shall be computed under the rules of this subparagraph. The amount which is not allowed as a deduction is the difference between the total amount of dividends or interest paid or credited to that class of accounts with respect to which a deduction is not allowed under subparagraph (1) of this paragraph during the taxable year (or short period, if applicable) and an amount which bears the same ratio to such total as the number 12 (or number of months in the short period) bears to the number of months with respect to which such amounts of dividends or interest are paid or credited.

(ii) *Examples.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). X Association, a domestic building and loan association filing its return on the basis of a calendar year, regularly credits dividends on its withdrawable accounts quarterly on the first day of the quarter following the quarter with respect to which they are earned. X changes the time of crediting dividends commencing with the credit for the fourth quarter of 1964. Such credit and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change X's credits for the year 1964 are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
4th quarter, 1963	Jan. 1	$250,000
1st quarter, 1964	Apr. 1	300,000
2d quarter, 1964	July 1	300,000
3d quarter, 1964	Oct. 1	300,000
4th quarter, 1964	Dec. 31	350,000
Total dividends credited		1,500,000

Since the change in the time of crediting dividends results in the crediting in 1964 of amounts of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of $1,200,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year ($1,500,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, $300,000 ($1,500,000 minus $1,200,000) is not allowed as a deduction in 1964.

Example (2). Y Association, a domestic building and loan association filing its return on the basis of a calendar year, regularly credits dividends on its withdrawable accounts on the basis of a semiannual period on March 31 and September 30 of each year. Y changes the period with respect to which credits are made from the semiannual period to the quarterly basis, commencing with the last quarter in 1964. The credit for this last quarter and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change, Y's credits for the year 1964 are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
6-month period ending Mar. 31, 1964.	Mar. 31	$300,000
6-month period ending Sept. 30, 1964.	Sept. 30	400,000
4th quarter, 1964	Dec. 31	200,000
Total dividends credited		900,000

Since the change in the basis of crediting dividends results in a crediting in 1964 of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of $720,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year ($900,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, $180,000 ($900,000 minus $720,000) is not allowed as a deduction in 1964.

Example (3). Z Association, a domestic building and loan association regularly files its return on the basis of a fiscal year ending on the last day of February and regularly credits dividends on its withdrawable accounts quarterly on the last day of the quarter with respect to which they are earned. Z receives approval from the Commissioner of Internal Revenue to change its accounting period to a calendar year and effects the change by filing a return for a short period ending on December 31, 1964. Dividend credits for the short period beginning on March 1 and ending on December 31, 1964, are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
January–March 1964	Mar. 31	$250,000
April–June 1964	June 30	300,000
July–September 1964	Sept. 30	300,000
October–December 1964	Dec. 31	350,000
Total dividends credited		1,200,000

Since the change of accounting period results in amounts of dividends credited ($1,200,000) representing periods totaling 12 months (January through December 1964), and such periods represent more than the number of months (10) in the short period, an amount shall not be allowed as a deduction in such short period which is in excess of $1,000,000, which is the amount which bears the same ratio to the amount of dividends credited in the short period ($1,200,000) as the number of months (10) in the short period bears to the number of months (12) with respect to which such dividends are credited. Thus, $200,000 ($1,200,000 minus $1,000,000) is not allowed as a deduction in the short period.

(3) *When amounts allowable.* The amount of dividends or interest not allowed as a deduction under subparagraph (1) of this paragraph shall be allowed as follows (subject to the limitation that the total of the amounts so allowed shall not exceed the amount not allowed under subparagraph (1)):

(i) Such amount shall be allowed as a deduction in a later taxable year or years subject to the limitation that, when taken together with the deductions otherwise allowable in the later taxable year or years, it does not bring the deductions for any later taxable year to a total representing a period of more than 12 months (or number of months in the short period, if applicable). However, in any event, an amount otherwise allowable under subdivision (ii) of this subparagraph shall be allowed notwithstanding the fact that it may bring the deductions allowable to a total representing a period of more than 12 months (or number of months in the short period, if applicable).

(ii) In any case in which it is established to the satisfaction of the Commissioner that the taxpayer does not intend to avoid taxes, one-tenth of such amount shall be allowed as a deduction in each of the 10 succeeding taxable years—

(a) Commencing with the taxable year for which such amount is not allowed as a deduction under subparagraph (1), or

(b) In the case of such amount not allowed for a taxable year ending before July 1, 1964, commencing with either the first or second taxable year after the taxable year for which such amount is not allowed as a deduction under subparagraph (1) if the taxpayer has not taken a deduction on his return, or filed a claim for credit or refund, in respect of such amount under *(a)*.

Normally, if the deduction not allowed under subparagraph (1) is a result of a change, not requested by the taxpayer, in the taxpayer's annual accounting period or dividend or interest payment or crediting dates solely as a consequence of a requirement of a Federal or State regulatory authority, or if the deduction is not allowed solely as a result of the taxpayer being a party to an acquisition to which section 381(a) applies, the Commissioner will permit the allowance of the amount not allowed in the manner provided in this subdivision. Nothing set forth in this subdivision shall be construed as permitting the allowance of a credit or refund for any year which is barred by the limitations on credit or refund provided by section 6511.

(iii) If the total of the amounts, if any, allowed under subdivisions (i) and (ii) of this subparagraph before the taxable year in which the taxpayer liquidates or otherwise ceases to engage in trade or business is less than the amount not allowed under subparagraph (1), there shall be allowed a deduction in such taxable year for the difference between the amount not allowed under subparagraph (1) and the amounts allowed, if any, as deductions under subdivisions (i) and (ii) unless the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a) (relating to carryovers in certain corporate acquisitions). If the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a), the acquiring corporation shall succeed to and take into account the balance of the amounts not allowed on the same basis as the taxpayer, had it not ceased to engage in business.

[T.D. 6500, 25 FR 11720, Nov. 26, 1960, as amended by T.D. 6520, 25 FR 13692, Dec. 24, 1960; T.D. 6710, 29 FR 3473, Mar. 18, 1964; T.D. 6735, 29 FR 6494, May 19, 1964; T.D. 6772, 29 FR 15753, Nov. 24, 1964; T.D. 6917, 32 FR 6682, May 2, 1967; T.D. 8408, 57 FR 12420, Apr. 10, 1992; T.D. 8482, 58 FR 42233, Aug. 9, 1993; T.D. 8554, 59 FR 36360, July 18, 1994]

§1.461–2 Contested liabilities.

(a) *General rule*—(1) *Taxable year of deduction.* If—

(i) The taxpayer contests an asserted liability,

(ii) The taxpayer transfers money or other property to provide for the satisfaction of the asserted liability,

(iii) The contest with respect to the asserted liability exists after the time of the transfer, and

(iv) But for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable),

then the deduction with respect to the contested amount shall be allowed for the taxable year of the transfer.

(2) *Exception.* Subparagraph (1) of this paragraph shall not apply in respect of the deduction for income, war profits, and excess profits taxes imposed by the authority of any foreign country or

possession of the United States, including a tax paid in lieu of a tax on income, war profits, or excess profits otherwise generally imposed by any foreign country or by any possession of the United States.

(3) *Refunds includible in gross income.* If any portion of the contested amount which is deducted under subparagraph (1) of this paragraph for the taxable year of transfer is refunded when the contest is settled, such portion is includible in gross income except as provided in § 1.111–1, relating to recovery of certain items previously deducted or credited. Such refunded amount is includible in gross income for the taxable year of receipt, or for an earlier taxable year if properly accruable for such earlier year.

(4) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example (1). X Corporation, which uses an accrual method of accounting, in 1964 contests $20 of a $100 asserted real property tax liability but pays the entire $100 to the taxing authority. In 1968, the contest is settled and X receives a refund of $5. X deducts $100 for the taxable year 1964, and includes $5 in gross income for the taxable year 1968 (assuming § 1.111–1 does not apply to such amount). If in 1964 X pays only $80 to the taxing authority, X deducts only $80 for 1964. The result would be the same if X Corporation used the cash method of accounting.

Example (2). Y Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. Y's real property taxes are assessed and become a lien on December 1, but are not payable until March 1 of the following year. On December 10, 1964, Y contests $20 of the $100 asserted real property tax which was assessed and became a lien on December 1, 1964. On March 1, 1965, Y pays the entire $100 to the taxing authority. In 1968, the contest is settled and Y receives a refund of $5. Y deducts $80 for the taxable year 1964, deducts $20 for the taxable year 1965, and includes $5 in gross income for the taxable year 1968 (assuming § 1.111–1 does not apply to such amount).

(5) *Liabilities described in paragraph (g) of § 1.461–4.* [Reserved]

(b) *Production costs*—(1) *In general; asserted liability.* For purposes of paragraph (a)(1) of this section, the term ''asserted liability'' means an item with respect to which, but for the existence of any contest in respect of such item, a deduction would be allowable under an accrual method of accounting. For example, a notice of a local real estate tax assessment and a bill received for services may represent asserted liabilities.

(2) *Definition of the term ''contest''.* Any contest which would prevent accrual of a liability under section 461(a) shall be considered to be a contest in determining whether the taxpayer satisfies paragraph (a)(1)(i) of this section. A contest arises when there is a bona fide dispute as to the proper evaluation of the law or the facts necessary to determine the existence or correctness of the amount of an asserted liability. It is not necessary to institute suit in a court of law in order to contest an asserted liability. An affirmative act denying the validity or accuracy, or both, of an asserted liability to the person who is asserting such liability, such as including a written protest with payment of the asserted liability, is sufficient to commence a contest. Thus, lodging a protest in accordance with local law is sufficient to contest an asserted liability for taxes. It is not necessary that the affirmative act denying the validity or accuracy, or both, of an asserted liability be in writing if, upon examination of all the facts and circumstances, it can be established to the satisfaction of the Commissioner that a liability has been asserted and contested.

(3) *Example.* The provisions of this paragraph are illustrated by the following example:

Example: O Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. O receives a large shipment of typewriter ribbons from S Company on January 30, 1964, which O pays for in full on February 10, 1964. Subsequent to their receipt, several of the ribbons prove defective because of inferior materials used by the manufacturer. On August 9, 1964, O orally notifies S and demands refund of the full purchase price of the ribbons. After negotiations prove futile and a written demand is rejected by S, O institutes an action for the full purchase price. For purposes of paragraph (a)(1)(i) of this section, S has asserted a liability against O which O contests on August 9, 1964. O deducts the contested amount for 1964.

(c) *Transfer to provide for the satisfaction of an asserted liability*—(1) *In general.* A taxpayer may provide for the satisfaction of an asserted liability by transferring money or other property beyond his control (i) to the person who is asserting the liability, (ii) to an escrowee or trustee pursuant to a written agreement (among the escrowee or trustee, the taxpayer, and the person who is asserting the liability) that the money or other property be delivered in accordance with the settlement of the contest, or (iii) to an escrowee or trustee pursuant to an order of the United States, any State or political subdivision thereof, or any agency or instrumentality of the foregoing, or a court that the money or other property be delivered in accordance with the settlement of the contest. A taxpayer may also provide for the satisfaction of an asserted liability by transferring money or other property beyond his control to a court with jurisdiction over the contest. Purchasing a bond to guarantee payment of the asserted liability, an entry on the taxpayer's books of account, and a transfer to an account which is within the control of the taxpayer are not transfers to provide for the satisfaction of an asserted liability. In order for money or other property to be beyond the control of a taxpayer, the taxpayer must relinquish all authority over such money or other property.

(2) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example (1). M Corporation contests a $5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M establishes a separate bank account in its own name. M then transfers $5,000 from its general account to such separate account. Such transfer does not qualify as a transfer to provide for the satisfaction of an asserted liability because M has not transferred the money beyond its control.

Example (2). M Corporation contests a $5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M transfers $5,000 to an irrevocable trust pursuant to a written agreement among the trustee, M (the taxpayer), and L (the person who is asserting the liability) that the money shall be held until the contest is settled and then disbursed in accordance with the settlement. Such transfer qualifies as a transfer to provide for the satisfaction of an asserted liability.

(d) *Contest exists after transfer.* In order for a contest with respect to an asserted liability to exist after the time of transfer, such contest must be pursued subsequent to such time. Thus, the contest must have been neither settled nor abandoned at the time of the transfer. A contest may be settled by a decision, judgment, decree, or other order of any court of competent jurisdiction which has become final, or by written or oral agreement between the parties. For example, Z Corporation, which uses an accrual method of accounting, in 1964 contests a $100 asserted liability. In 1967 the contested liability is settled as being $80 which Z accrues and deducts for such year. In 1968 Z pays the $80. Section 461(f) does not apply to Z with respect to the transfer because a contest did not exist after the time of such transfer.

(e) *Deduction otherwise allowed*—(1) *In general.* The existence of the contest with respect to an asserted liability must prevent (without regard to section 461(f)) and be the only factor preventing a deduction for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable) to provide for the satisfaction of such liability. Nothing in section 461(f) or this section shall be construed to give rise to a deduction since section 461(f) and this section relate only to the timing of deductions which are otherwise allowable under the Code.

(2) *Example.* The provisions of this paragraph are illustrated by the following example:

Example. A, an individual, makes a gift of certain property to B, an individual. A pays the entire amount of gift tax assessed against him but contests his liability for such tax. Section 275(a)(3) provides that gift taxes are not deductible. A does not satisfy the requirement of paragraph (a)(1)(iv) of this section since a deduction would not be allowed for the taxable year of the transfer even if A did not contest his liability for such tax.

(f) *Treatment of money or property transferred to an escrowee, trustee, or court and treatment of any income attributable thereto.* [Reserved]

(g) *Effective dates.* Paragraphs (a) through (e) of this section apply to transfers of money or property made in taxable years beginning after December 31, 1953, and ending after August 16, 1954.

[T.D. 6772, 29 FR 15753, Nov. 24, 1964, as amended by T.D. 8408, 57 FR 12421, Apr. 10, 1992]

§ 1.461–3 Prepaid interest. [Reserved]

§ 1.461–4 Economic performance.

(a) *Introduction*—(1) *In general.* For purposes of determining whether an accrual basis taxpayer can treat the amount of any liability (as defined in § 1.446–1(c)(1)(ii)(B)) as incurred, the all events test is not treated as met any earlier than the taxable year in which economic performance occurs with respect to the liability.

(2) *Overview.* Paragraph (b) of this section lists exceptions to the economic performance requirement. Paragraph (c) of this section provides cross-references to the definitions of certain terms for purposes of section 461 (h) and the regulations thereunder. Paragraphs (d) through (m) of this section and § 1.461–6 provide rules for determining when economic performance occurs. Section 1.461–5 provides rules relating to an exception under which certain recurring items may be incurred for the taxable year before the year during which economic performance occurs.

(b) *Exceptions to the economic performance requirement.* Paragraph (a)(2)(iii)(B) of § 1.461–1 provides examples of liabilities that are taken into account under rules that operate without regard to the all events test (including economic performance).

(c) *Definitions.* The following cross-references identify certain terms defined for purposes of section 461(h) and the regulations thereunder:

(1) *Liability.* See paragraph (c)(1)(ii)(B)d of § 1.446–1 for the definition of ‘‘liability.’’

(2) *Payment.* See paragraph (g)(1)(ii) of this section for the definition of ‘‘payment.’’

(d) *Liabilities arising out of the provision of services, property, or the use of property*—(1) *In general.* The principles of this paragraph (d) determine when economic performance occurs with respect to liabilities arising out of the performance of services, the transfer of property, or the use of property. This paragraph (d) does not apply to liabilities described in paragraph (e) (relating to interest expense) or paragraph (g) (relating to breach of contract, workers compensation, tort, etc.) of this section. In addition, except as otherwise provided in Internal Revenue regulations, revenue procedures, or revenue rulings this paragraph (d) does not apply to amounts paid pursuant to a notional principal contract. The Commissioner may provide additional rules in regulations, revenue procedures, or revenue rulings concerning the time at which economic performance occurs for items described in this paragraph (d).

(2) *Services or property provided to the Taxpayer*—(i) *In general.* Except as otherwise provided in paragraph (d)(5) of this section, if the liability of a taxpayer arises out of the providing of services or property to the taxpayer by another person, economic performance occurs as the services or property is provided.

(ii) *Long-term contracts.* In the case of any liability of a taxpayer described in paragraph (d)(2)(i) of this section that is an expense attributable to a long-term contract with respect to which the taxpayer uses the percentage of completion method, economic performance occurs—

(A) As the services or property is provided; or, if earlier,

(B) As the taxpayer makes payment (as defined in paragraph (g)(1)(ii) of this section) in satisfaction of the liability to the person providing the services or property. See paragraph (k)(2) of this section for the effective date of this paragraph (d)(2)(ii).

(iii) *Employee benefits*—(A) *In general.* Except as otherwise provided in any Internal Revenue regulation, revenue procedure, or revenue ruling, the economic performance requirement is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation), section 404A (certain foreign deferred compensation plans), and section 419 (welfare benefit funds). See § 1.461–1(a)(2)(iii)(D).

(B) *Property transferred in connection with performance of services.* [Reserved]

(iv) *Cross-references.* See *Examples 4* through *6* of paragraph (d)(7) of this section. See paragraph (d)(6) of this section for rules relating to when a taxpayer may treat services or property as provided to the taxpayer.

(3) *Use of property provided to the taxpayer*—(i) *In general.* Except as otherwise provided in this paragraph (d)(3)d and paragraph (d)(5) of this section, if the liability of a taxpayer arises out of the use of property by the taxpayer, economic performance occurs ratably over the period of time the taxpayer is entitled to the use of the property (taking into account any reasonably expected renewal periods when necessary to carry out the purposes of section 461(h)). See *Examples 6* through *9* of paragraph (d)(7) of this section.

(ii) *Exceptions.* If the liability of a taxpayer arises out of the use of property by the taxpayer and all or a portion of the liability is determined by reference to the frequency or volume of use of the property or the income from the property, economic performance occurs for the portion of the liability determined by reference to the frequency or volume of use of the property or the income from the property as the taxpayer uses the property or includes income from the property. See *Examples 8* and *9* of paragraph (d)(7) of this section. This paragraph (d)(3)(ii) shall not apply if the District Director determines, that based on the substance of the transaction, the liability of the taxpayer for use of the property is more appropriately measured ratably over the period of time the taxpayer is entitled to the use of the property.

(4) *Services or property provided by the taxpayer*—(i) *In general.* Except as otherwise provided in paragraph (d)(5) of this section, if the liability of a taxpayer requires the taxpayer to provide services for property to another person, economic performance occurs as the taxpayer incurs costs (within the meaning of §1.446–1(c)(1)(ii)) in connection with the satisfaction of the liability. See *Examples 1* through *3* of paragraph (d)(7) of this section.

(ii) *Barter transactions.* If the liability of a taxpayer requires the taxpayer to provide services, property, or the use of property, and arises out of the use of property by the taxpayer, or out of the provision of services or property to the taxpayer by another person, economic performance occurs to the extent of the lesser of—

(A) The cumulative extent to which the taxpayer incurs costs (within the meaning of §1.446–1(c)(1)(ii)) in connection with its liability to provide the services of property; or

(B) The cumulative extent to which the services or property is provided to the taxpayer.

(5) *Liabilities that are assumed in connection with the sale of a trade or business*—(i) *In general.* If, in connection with the sale or exchange of a trade or business by a taxpayer, the purchaser expressly assumes a liability arising out of the trade or business that the taxpayer but for the economic performance requirement would have been entitled to incur as of the date of the sale, economic performance with respect to that liability occurs as the amount of the liability is properly included in the amount realized on the transaction by the taxpayer. See §1.1001–2 for rules relating to the inclusion in amount realized from a discharge of liabilities resulting from a sale or exchange.

(ii) *Trade or business.* For purposes of this paragraph (d)(5), a trade or business is a specific group of activities carried on by the taxpayer for the purpose of earning income or profit if every operation that is necessary to the process of earning income or profit is included in the group. Thus, for example, the group of activities generally must include the collection of income and the payment of expenses.

(iii) *Tax avoidance.* This paragraph (d)(5) does not apply if the District Director determines that tax avoidance is one of the taxpayer's principal purposes for the sale or exchange.

(6) *Rules relating to the provision of services or property to a taxpayer.* The following rules apply for purposes of this paragraph (d):

(i) Services or property provided to a taxpayer include services or property provided to another person at the direction of the taxpayer.

(ii) A taxpayer is permitted to treat services or property as provided to the taxpayer as the taxpayer makes payment to the person providing the services or property (as defined in paragraph (g)(1)(ii) of this section), if the taxpayer can reasonably expect the person to provide the services or property within 3½ months after the date of payment.

(iii) A taxpayer is permitted to treat property as provided to the taxpayer when the property is delivered or accepted, or when title to the property passes. The method used by the taxpayer to determine when property is provided is a method of accounting that must comply with the rules of § 1.446–1(e). Thus, the method of determining when property is provided must be used consistently from year to year, and cannot be changed without the consent of the Commissioner.

(iv) If different services or items of property are required to be provided to a taxpayer under a single contract or agreement, economic performance generally occurs over the time each service is provided and as each item of property is provided. However, if a service or item of property to be provided to the taxpayer is incidental to other services or property to be provided under a contract or agreement, the taxpayer is not required to allocate any portion of the total contract price to the incidental service or property. For purposes of this paragraph (d)(6)(iv), services or property is treated as incidental only if—

(A) The cost of the services or property is treated on the taxpayer's books and records as part of the cost of the other services or property provided under the contract; and

(B) The aggregate cost of the services or property does not exceed 10 percent of the total contract price.

(7) *Examples.* The following examples illustrate the principles of this paragraph (d). For purposes of these examples, it is assumed that the requirements of the all events test other than economic performance have been met, and that the recurring item exception is not used.

Example 1. Services or property provided by the taxpayer. (i) X corporation, a calendar year, accrual method taxpayer, is an oil company. During March 1990, X enters into an oil and gas lease with Y. In November 1990, X installs a platform and commences drilling. The lease obligates X to remove its offshore platform and well fixtures upon abandonment of the well or termination of the lease. During 1998, X removes the platform and well fixtures at a cost of $200,000.

(ii) Under paragraph (d)(4)(i) of this section, economic performance with respect to X's liability to remove the offshore platform and well fixtures occurs as X incurs costs in connection with that liability. X incurs these costs in 1998 as, for example, X's employees provide X with removal services (see paragraph (d)(2) of this section). Consequently, X incurs $200,000 for the 1998 taxable year. Alternatively, assume that during 1990 X pays Z $130,000 to remove the platform and fixtures, and that Z performs these removal services in 1998. Under paragraph (d)(2) of this section, X does not incur this cost until Z performs the services. Thus, economic performance with respect to the $130,000 X pays Z occurs in 1998.

Example 2. Services or property provided by the taxpayer. (i) W corporation, a calendar year, accrual method taxpayer, sells tractors under a three-year warranty that obligates W to make any reasonable repairs to each tractor it sells. During 1990, W sells ten tractors. In 1992 W repairs, at a cost of $5,000, two tractors sold during 1990.

(ii) Under paragraph (d)(4)(i) of this section, economic performance with respect to W's liability to perform services under the warranty occurs as W incurs costs in connection with that liability. W incurs these costs in 1992 as, for example, replacement parts are provided to W (see paragraph (d)(2) of this section). Consequently, $5,000 is incurred by W for the 1992 taxable year.

Example 3. Services or property provided by the taxpayer; Long-term contracts. (i) W corporation, a calendar year, accrual method taxpayer, manufactures machine tool equipment. In November 1992, W contracts to provide X corporation with certain equipment. The contract is not a long-term contract under section 460 or § 1.451–3. In 1992, W pays Z corporation $50,000 to lease from Z, for the one-year period beginning on January 1, 1993, testing equipment to perform quality control tests required by the agreement with X. In 1992, pursuant to the terms of a contract, W pays Y corporation $100,000 for certain parts necessary to manufacture the equipment. The parts are provided to W in 1993. W's employees provide W with services necessary to manufacture the equipment during 1993, for which W pays $150,000 in 1993.

(ii) Under paragraph (d)(4) of this section, economic performance with respect to W's liability to provide the equipment to X occurs as W incurs costs in connection with that liability. W incurs these costs during 1993, as services, property, and the use of property necessary to manufacture the equipment are provided to W (see paragraphs (d)(2) and (d)(3) of this section). Thus, $300,000 is incurred by W for the 1993 taxable year. See section 263A and the regulations thereunder for rules relating to the capitalization and inclusion in inventory of these incurred costs.

(iii) Alternatively, assume that the agreement with X is a long-term contract as defined in section 460(f), and that W takes into account all items with respect to such contracts under the percentage of completion method as described in section 460(b)(1). Under paragraph (d)(2)(ii) of this section, the $100,000 W pays in 1992 for parts is incurred for the 1992 taxable year, for purposes of determining the percentage of completion under section 460(b)(1)(A). W's other costs under the agreement are incurred for the 1993 taxable year for this purpose.

Example 4. Services or property provided to the taxpayers. (i) LP1, a calendar year, accrual method limited partnership, owns the working interest in a parcel of property containing oil and gas. During December 1990, LP1 enters into a turnkey contract with Z corporation pursuant to which LP1 pays Z $200,000 and Z is required to provide a completed well by the close of 1992. In May 1992, Z commences drilling the well, and, in December 1992, the well is completed.

(ii) Under paragraph (d)(2) of this section, economic performance with respect to LP1's liability for drilling and development services provided to LP1 by Z occurs as the services are provided. Consequently, $200,000 is incurred by LP1 for the 1992 taxable year.

Example 5. Services or property provided to the taxpayer. (i) X corporation, a calendar year, accrual method taxpayer, is an automobile dealer. On Jaunary 15, 1990, X agrees to pay an additional $10 to Y, the manufacturer of the automobiles, for each automobile purchased by X from Y. Y agrees to provide advertising and promotional activities to X.

(ii) During 1990, X purchases from Y 1,000 new automobiles and pays to Y an additional $10,000 as provided in the agreement. Y, in turn, uses this $10,000 to provide advertising and promotional activities during 1992.

(iii) Under paragraph (d)(2) of this section, economic performance with respect to X's liability for advertising and promotional services provided to X by Y occurs as the services are provided. Consequently, $10,000 is incurred by X for the 1992 taxable year.

Example 6. Use of property provided to the taxpayer; services or property provided to the taxpayer. (i) V corporation, a calendar year, accrual method taxpayer, charters aircrafts. On December 20, 1990, V leases a jet aircraft from L for the four-year period that begins on January 1, 1991. The lease obligates V to pay L a base rental of $500,000 per year. In addition, the lease requires V to pay $25 to an escrow account for each hour that the aircraft is flown. The escrow account funds are held by V and are to be used by L to make necessary repairs to the aircraft. Any amount remaining in the escrow account upon termination of the lease is payable to V. During 1991, the aircraft is flown 1,000 hours and V pays $25,000 to the escrow account. The aircraft is repaired by L in 1993. In 1994, $20,000 is released from the escrow account to pay L for the repairs.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to V's base rental liability occurs ratably over the period of time V is entitled to use the jet aircraft. Consequently, the $500,000 rent is incurred by V for the 1991 taxable year and for each of the next three taxable years. Under paragraph (d)(2) of this section, economic performance with respect to the liability to place amounts in escrow occurs as the aircraft is repaired. Consequently, V incurs $20,00 for the 1993 taxable year.

Example 7. Use of property provided to the taxpayer. (i) X corporation, a calendar year, accrual method taxpayer, manufactures and sells electronic circuitry. On November 15, 1990, X enters into a contract with Y that entitles X to the exclusive use of a product owned by Y for the five-year period beginning on January 1, 1991. Pursuant to the contract, X pays Y $100,000 on December 30, 1990.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to X's liability for the use of property occurs ratably over the period of time X is entitled to use the product. Consequently, $20,000 is incurred by X for 1991 and for each of the succeeding four taxable years.

Example 8. Use of property provided to the taxpayer. (i) Y corporation, a calendar year, accrual method taxpayer, enters into a five-year lease with Z for the use of a copy machine on July 1, 1991. Y also receives elivery of the copy machine on July 1, 1991. The lease obligates Y to pay Z a base rental payment of $6,000 per year at the beginning of each lease year and an additional charge of 5 cents per copy 30 days after the end of each lease year. The machine is used to make 50,000 copies during the first lease year: 20,000 copies in 1991 and 30,000 copies from January 1, 1992, to July 1, 1992. Y pays the $6,000 base rental payment to Z on July 1, 1991, and the $2,500 variable use payment on July 30, 1992.

(ii) under paragraph (d)(3)(i) of this section, economic performance with respect to Y's base rental liability occurs ratably over the period of time Y is entitled to use the copy machine. Consequently, $3,000 rent is incurred by Y for the 1991 taxable year. Under paragraph (d)(3)(ii) of this section, economic performance with respect to Y's variable use portion of the liability occurs as Y uses the machine. Thus, the $1,000 of the $2,500 variable-use liability that relates to the 20,000 copies made in 1991 is incurred by Y for the 1991 taxable year.

Example 9. Use of property provided to the taxpayer. (i) X corporation, a calendar year, accrual method taxpayer, enters into a five-year product distribution agreement with Y, on January 1, 1992. The agreement provides for a payment of $100,000 on January 1, 1992, plus 10 percent of the gross profits earned by X from distribution of the product. The variable income portion of X's liability is payable on April 1 of each subsequent year. On January 1, 1992, X pays Y $100,000. On April 1, 1993, X pays Y $3 million representing 10 percent of X's gross profits from January 1 through December 31, 1992.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to X's $100,000 payment occurs ratably over the period of time X is entitled to use the product. Consequently, $20,000 is incurred by X for each year of the agreement beginning with 1992. Under paragraph (d)(3)(ii) of this section, economic performance with respect to X's variable income portion of the liability occurs as the income is earned by X. Thus, the $3 million variable-income liability is incurred by X for the 1992 taxable year.

(e) *Interest.* In the case of interest, economic performance occurs as the interest cost economically accrues, in accordance with the principles of relevant provisions of the Code.

(f) *Timing of deductions from notional principal contracts.* Economic performance on a notional principal contract occurs as provided under § 1.446–3.

(g) *Certain liabilities for which payment is economic perforance* —(1) *In general* —(i) *Person to which payment must be made.* In the case of liabilities described in paragraphs (g) (2) through (7) of this section, economic performance occurs when, and to the extent that, payment is made to the person to which the liability is owed. Thus, except as otherwise provided in paragraph (g)(1)(iv) of this section and § 1.461–6, economic performance does not occur as a taxpayer makes payments in connection with such a liability to any other person, including a trust, escrow account, court-administered fund, or any similar arrangement, unless the payments constitute payment to the person to which the liability is owed under paragraph (g)(1)(ii)(B) of this section. Instead, economic performance occurs as payments are made from that other person or fund to the person to which the liability is owed. The amount of economic performance that occurs as payment is made from the other person or fund to the person to which the liability is owed may not exceed the amount the taxpayer transferred to the other person or fund. For special rules relating to the taxation of amounts transferred to ''qualified settlement funds,'' see section 468B and the regulations thereunder. The Commissioner may provide additional rules in regulations, revenue procedures, and revenue rulings concerning the time at which economic performance occurs for items described in this paragraph (g).

(ii) *Payment to person to which liability is owed.* Paragraph (d)(6) of this section provides that for purposes of paragraph (d) of this section (relating to the provision of services or property to the taxpayer) in certain cases a taxpayer may treat services or property as provided to the taxpayer as the taxpayer makes payments to the person providing the services or property. In addition, this paragraph (g) provides that in the case of certain liabilities of a taxpayer, economic performance occurs as the taxpayer makes payment to persons specified therein. For these and all other purposes of section 461(h) and the regulations thereunder:

(A) *Payment.* The term *payment* has the same meaning as is used when determining whether a taxpayer using the cash receipts and disbursements method of accounting has made a payment. Thus, for example, payment includes the furnishing of cash or cash equivalents and the netting of offsetting accounts. Payment does not include the furnishing of a note or other evidence of indebtedness of the taxpayer, whether or not the evidence is guaranteed by any other instrument (including a standby letter of credit) or by any third party (including a government agency). As a further example, payment does not include a promise of the taxpayer to provide services or property in the future (whether or not the promise is evidenced by a contract or other witten agreement). In addition, payment does not include an amount transferred as a loan, refundable deposit, or contingent payment.

(B) *Person to which payment is made.* Payment to a particular person is accomplished if paragraph (g)(1)(ii)(A) of this section is satisfied and a cash basis taxpayer in the position of that person would be treated as having actually or constructively received the amount of the payment as gross income under the principles of section 451 (without regard to section 104(a) or any other provision that specifically excludes the amount from gross income). Thus, for example, the purchase of an annuity contract or any other asset generally does not constitute payment to the person to which a liability is owed unless the ownership of the contract or other asset is transferred to that person.

(C) *Liabilities that are assumed in connection with the sale of a trade or business.* Paragraph (d)(5) of this section provides rules that determine when economic performance occurs in the case of liabilities that are assumed in connection with the sale of a trade or business. The provisions of paragraph (d)(5) of this section also apply to any liability described in paragraph (g) (2) through (7) of this section that the purchaser expressly assumes in connection with the sale or exchange of a trade or business by a taxpayer, provided the taxpayer (but for the economic performance requirement) would have been entitled to incur the liability as of the date of the sale.

(iii) *Person.* For purposes of this paragraph (g), ‘‘person’’ has the same meaning as in section 7701(a)(1), except that it also includes any foreign state, the United States, any State or political subdivision thereof, any possession of the United States, and any agency or instrumentality of any of the foregoing.

(iv) *Assignments.* If a person that has a right to receive payment in satisfaction of a liability described in paragraphs (g) (2) through (7) of this section makes a valid assignment of that right to a second person, or if the right is assigned to the second person through operation of law, then payment to the second person in satisfaction of that liability constitutes payment to the person to which the liability is owed.

(2) *Liabilities arising under a workers compensation act or out of any tort, breach of contract, or violation of law.* If the liability of a taxpayer requires a payment or series of payments to another person and arises under any workers compensation act or out of any tort, breach of contract, or violation of law, economic performance occurs as payment is made to the person to which the liability is owed. See *Example 1* of paragraph (g)(8) of this section. For purposes of this paragraph (g)(2)—

(i) A liability to make payments for services, property, or other consideration provided under a contract is not a liability arising out of a breach of that contract unless the payments are in the nature of incidental, consequential, or liquidated damages; and

(ii) A liability arising out of a tort, breach of contract, or violation of law includes a liability arising out of the settlement of a dispute in which a tort, breach of contract, or violation of law, respectively, is alleged.

(3) *Rebates and refunds.* If the liability of a taxpayer is to pay a rebate, refund, or similar payment to another person (whether paid in property, money, or as a reduction in the price of goods or services to be provided in the future by the taxpayer), economic performance occurs as payment is made to the person to which the liability is owed. This paragraph (g)(3) applies to all rebates, refunds, and payments or transfers in the nature of a rebate or refund regardless of whether they are characterized as a deduction from gross income, an adjustment to gross receipts or total sales, or an adjustment or addition to cost of goods sold. In the case of a rebate or refund made as a reduction in the price of goods or services to be provided in the future by the taxpayer, ‘‘payment’’ is deemed to occur as the taxpayer would otherwise be required to recognize income resulting from a disposition at an unreduced price. See *Example 2* of paragraph (g)(8) of this section. For purposes of determining whether the recurring item exception of §1.461–5 applies, a liability that arises out of a tort, breach of contract, or violation of law is not considered a rebate or refund.

(4) *Awards, prizes, and jackpots.* If the liability of a taxpayer is to provide an award, prize, jackpot, or other similar payment to another person, economic performance occurs as payment is made to the person to which the liability is owed. See *Examples 3* and *4* of paragraph (g)(8) of this section.

(5) *Insurance, warranty, and service contracts.* If the liability of a taxpayer arises out of the provision to the taxpayer of insurance, or a warranty or service contract, economic performance occurs as payment is made to the person to which the liability is owed. See *Examples 5* through *7* of paragraph (g)(8) of this section. For purposes of this paragraph (g)(5)—

(i) A warranty or service contract is a contract that a taxpayer enters into in connection with property bought or leased by the taxpayer, pursuant to which the other party to the contract promises to replace or repair the property under specified circumstances.

(ii) The term ''insurance'' has the same meaning as is used when determining the deductibility of amounts paid or incurred for insurance under section 162.

(6) *Taxes*—(i) *In general.* Except as otherwise provided in this paragraph (g)(6), if the liability of a taxpayer is to pay a tax, economic performance occurs as the tax is paid to the governmental authority that imposed the tax. For purposes of this paragraph (g)(6), payment includes payments of estimated income tax and payments of tax where the taxpayer subsequently files a claim for credit or refund. In addition, for purposes of this paragraph (g)(6), a tax does not include a charge collected by a governmental authority for specific extraordinary services or property provided to a taxpayer by the governmental authority. Examples of such a charge include the purchase price of a parcel of land sold to a taxpayer by a governmental authority and a charge for labor engaged in by government employees to improve that parcel. In certain cases, a liability to pay a tax is permitted to be taken into account in the taxable year before the taxable year during which economic performance occurs under the recurring item exception of § 1.461–5. See *Example 8* of paragraph (g)(8) of this section.

(ii) *Licensing fees.* If the liability of a taxpayer is to pay a licensing or permit fee required by a governmental authority, economic performance occurs as the fee is paid to the governmental authority, or as payment is made to any other person at the direction of the governmental authority.

(iii) *Exceptions*—(A) *Real property taxes.* If a taxpayer has made a valid election under section 461 (c), the taxpayer's accrual for real property taxes is determined under section 461 (c). Otherwise, economic performance with respect to a property tax liability occurs as the tax is paid, as specified in paragraph (g)(6)(i) of this section.

(B) *Certain foreign taxes.* If the liability of a taxpayer is to pay an income, war profits, or excess profits tax that is imposed by the authority of any foreign country or possession of the United States and is creditable under section 901 (including a creditable tax described in section 903 that is paid in lieu of such a tax), economic performance occurs when the requirements of the all events test (as described in § 1.446–1 (c)(1)(ii)) other than economic performance are met, whether or not the taxpayer elects to credit such taxes under section 901 (a).

(7) *Other liabilities.* In the case of a taxpayer's liability for which economic perfomance rules are not provided elsewhere in this section or in any other Internal Revenue regulation, revenue ruling or revenue procedure, economic performance occurs as the taxpayer makes payments in satisfaction of the liability to the person to which the liability is owed. This paragraph (g)(7) applies only if the liability cannot properly be characterized as a liability covered by rules provided elsewhere in this section. If a liability may properly be characterized as, for example, a liability arising from the provision of services or property to, or by, a taxpayer, the determination as to when economic performance occurs with respect to that liability is made under paragraph (d) of this section and not under this paragraph (g)(7).

(8) *Examples.* The following examples illustrate the principles of this paragraph (g). For purposes of these examples, it is assumed that the requirements of the all events test other than economic performance have been met and, except as otherwise provided, that the recurring item exception is not used.

Example 1. Liabilities arising out of a tort. (i) During the period 1970 through 1975, Z corporation, a calendar year, accrual method taxpayer, manufactured and distributed industrial products that contained carcinogenic substances. In 1992, a number of lawsuits are filed against Z alleging damages due to exposure to these products. In settlement of a lawsuit maintained by A, Z agrees to purchase an annuity contract that will provide annual payments to A of $50,000 for a period of 25 years. On December 15, 1992, Z pays W, an unrelated life insurance company, $491,129 for such an annuity contract. Z retains ownership of the annuity contract.

(ii) Under paragraph (g)(2) of this section, economic performance with respect to Z's liability to A occurs as each payment is made to A. Consequently, $50,000 is incurred by Z for each taxable year that a payment is made to A under the annuity contract. (Z must also include in income a portion of amounts paid under the annuity, pursuant to section 72.) The result is the same if in 1992 Z secures its obligation with a standby letter of credit.

(iii) If Z later transfers ownership of the annuity contract to A, an amount equal to the fair market value of the annuity on the date of transfer is incurred by Z in the taxable year of the transfer (see paragraph (g)(1)(ii)(B) of this section). In addition, the transfer constitutes a transaction to which section 1001 applies.

Example 2. Rebates and refunds. (i) X corporation, a calendar year, accrual method taxpayer, manufactures and sells hardware products. X enters into agreements that entitle each of its distributors to a rebate (or discount on future purchases) from X based on the amount of purchases made by the distributor from X during any calendar year. During the 1992 calendar year, X becomes liable to pay a $2,000 rebate to distributor A. X pays A $1,200 of the rebate on January 15, 1993, and the remaining $800 on October 15, 1993. Assume the rebate is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred.

(ii) If X does not adopt the recurring item exception described in §1.461–5 with respect to rebates and refunds, then under paragraph (g)(3) of this section, economic performance with respect to the $2,000 rebate liability occurs in 1993. However, if X has made a proper election under §1.461–5, and as of December 31, 1992, all events have occurred that determine the fact of the rebate liability, X incurs $1,200 for the 1992 taxable year. Because economic performance (payment) with respect to the remaining $800 does not occur until October 15, 1993 (more than 8½ months after the end of 1992), X cannot use the recurring item exception for this portion of the liability (see §1.461–5). Thus, the $800 is not incurred by X until the 1993 taxable year. If, instead of making the cash payments to A during 1993, X adjusts the price of hardware purchased by A that is delivered to A during 1993, X's ‘‘payment'' occurs as X would otherwise be required to recognize income resulting from a disposition at an unreduced price.

Example 3. Awards, prizes, and jackpots. (i) W corporation, a calendar year, accrual method taxpayer, produces and sells breakfast cereal. W conducts a contest pursuant to which the winner is entitled to $10,000 per year for a period of 20 years. On December 1, 1992, A is declared the winner of the contest and is paid $10,000 by W. In addition, on December 1 of each of the next nineteen years, W pays $10,000 to A.

(ii) Under paragraph (g)(4) of this section, economic performance with respect to the $200,000 contest liability occurs as each of the $10,000 payments is made by W to A. Consequently, $10,000 is incurred by W for the 1992 taxable year and for each of the succeeding nineteen taxable years.

Example 4. Awards, prizes, and jackpots. (i) Y corporation, a calendar year, accrual method taxpayer, owns a casino that contains progressive slot machines. A progressive slot machine provides a guaranteed jackpot amount that increases as money is gambled through the machine until the jackpot is won or until a maximum predetermined amount is reached. On July 1, 1993, the guaranteed jackpot amount on one of Y's slot machines reaches the maximum predetermined amount of $50,000. On October 1, 1994, the $50,000 jackpot is paid to B.

(ii) Under paragraph (g)(4) of this section, economic performance with respect to the $50,000 jackpot liability occurs on the date the jackpot is paid to B. Consequently, $50,000 is incurred by Y for the 1994 taxable year.

Example 5. Insurance, warranty, and service contracts. (i) V corporation, a calendar year, accrual method taxpayer, manufactures toys. V enters into a contract with W, an unrelated insurance company, on December 15, 1992. The contract obligates V to pay W a premium of $500,000 before the end of 1995. The contract obligates W to satisfy any liability of V resulting from claims made during 1993 or 1994 against V by any third party for damages attributable to defects in toys manufactured by V. Pursuant to the contract, V pays W a premium of $500,000 on October 1, 1995.

(ii) Assuming the arrangement constitutes insurance, under paragraph (g)(5) of this section economic performance occurs as the premium is paid. Thus, $500,000 is incurred by V for the 1995 taxable year.

Example 6. Insurance, warranty, and service contracts. (i) Y corporation, a calendar year, accrual method taxpayer, is a common carrier. On December 15, 1992, Y enters into a contract with Z, an unrelated insurance company, under which Z must satisfy any liability of Y that arises during the succeeding 5 years for damages under a workers compensation act or out of any tort, provided the event that causes the damages occurs during

1993 or 1994. Under the contract, Y pays $360,000 to Z on December 31, 1993.

(ii) Assuming the arrangement constitutes insurance, under paragraph (g)(5) of this section economic performance occurs as the premium is paid. Consequently, $360,000 is incurred by Y for the 1993 taxable year. The period for which the $360,000 amount is permitted to be taken into account is determined under the capitalization rules because the insurance contract is an asset having a useful life extending substantially beyond the close of the taxable year.

Example 7. Insurance, warranty, and service contracts. Assume the same facts as in *Example 6,* except that Y is obligated to pay the first $5,000 of any damages covered by the arrangement with Z. Y is, in effect, self-insured to the extent of this $5,000 ''deductible.'' Thus, under paragraph (g)(2) of this section, economic performance with respect to the $5,000 liability does not occur until the amount is paid to the person to which the tort or workers compensation liability is owed.

Example 8. Taxes. (i) The laws of State A provide that every person owning personal property located in State A on the first day of January shall be liable for tax thereon and that a lien for the tax shall attach as of that date. In addition, the laws of State A provide that 60% of the tax is due on the first day of December following the lien date and the remaining 40% is due on the first day of July of the succeeding year. On January 1, 1992, X corporation, a calendar year, accrual method taxpayer, owns personal property located in State A. State A imposes a $10,000 tax on S with respect to that property on January 1, 1992. X pays State A $6,000 of the tax on December 1, 1992, and the remaining $4,000 on July 1, 1993.

(ii) Under paragraph (g)(6) of this section, economic performance with respect to $6,000 of the tax liability occurs on December 1, 1992. Consequently, $6,000 is incurred by X for the 1992 taxable year. Economic performance with respect to the remaining $4,000 of the tax liability occurs on July 1, 1993. If X has adopted the recurring item exception described in § 1.461–5 as a method of accounting for taxes, and as of December 31, 1992, all events have occurred that determine the liability of X for the remaining $4,000, X also incurs $4,000 for the 1992 taxable year. If X does not adopt the recurring item exception method, the $4,000 is not incurred by X until the 1993 taxable year.

(h) *Liabilities arising under the Nuclear Waste Policy Act of 1982.* Notwithstanding the principles of paragraph (d) of this section, economic performance with respect to the liability of an owner or generator of nuclear waste to make payments to the Department of Energy (''DOE'') pursuant to a contract required by the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425, 42 U.S.C. 10101–10226 (1982)) occurs as each payment under the contract is made to DOE and not when DOE satisfies its obligations under the contract. This rule applies to the continuing fee required by 42 U.S.C. 10222(a)(2) (1982), as well as the one-time fee required by 42 U.S.C. 10222 (a)(3) (1982). For rules relating to when economic performance occurs with respect to interest, see paragraph (e) of this section.

(i) [Reserved]

(j) *Contingent liabilities.* [Reserved]

(k) *Special effective dates*—(1) *In general.* Except as otherwise provided in this paragraph (k), section 461(h) and this section apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred after July 18, 1984. For example, the economic performance requirement applies to all liabilities arising under a workers compensation act or out of any tort that would, under the law in effect before the enactment of section 461(h), be incurred after July 18, 1984. For taxable years ending before April 7, 1995, see Q&A–2 of § 1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995), which provides an election to make this change in method of accounting applicable to either the portion of the first taxable year that occurs after July 18, 1984 (part-year change method), or the entire first taxable year ending after July 18, 1984 (full-year change method). With respect to the effective date rules for interest, section 461(h) applies to interest accruing under any obligation (whether or not evidenced by a debt instrument) if the obligation is incurred in any transaction occurring after June 8, 1984, and is not incurred under a written contract which was binding on March 1, 1984, and at all times thereafter until the obligation is incurred. Interest accruing under an obligation described in the preceding sentence is subject to section 461(h) even if the interest accrues before July 19, 1984. Similarly, interest accruing under any obligation incurred in a transaction occurring before June 9, 1984, (or under a written contract which was binding on

March 1, 1984, and at all times thereafter until the obligation is incurred) is not subject to section 461(h) even to the extent the interest accrues after July 18, 1984.

(2) *Long-term contracts.* Except as otherwise provided in paragraph (M)(2) of this section, in the case of liabilities described in paragraph (d)(2)(ii) of this section (relating to long-term contracts), paragraph (d)(2)(ii) of this section applies to liabilities that would, but for the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1991.

(3) *Payment liabilities.* Except as otherwise provided in paragraph (m)(2) of this section, in the case of liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section), paragraph (g) of this section applies to liabilities that would, but for the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1991.

(l) [Reserved]

(m) *Change in method of accounting required by this section*—(1) *In general.* For the first taxable year ending after July 18, 1984, a taxpayer is granted the consent of the Commissioner to change its method of accounting for liabilities to comply with the provisions of this section pursuant to any of the following procedures:

(i) For taxable years ending before April 7, 1995, the part-year change in method election described in Q&A–2 through Q&A–6 and Q&A–8 through Q&A–10 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995);

(ii) For taxable years ending before April 7, 1995, the full-year change in method election described in Q&A–2 through Q&A–6 and Q&A–8 through Q&A–10 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995); or

(iii) For taxable years ending before April 7, 1995, if no election is made, the cut-off method described in Q&A–1 and Q&A–11 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995).

(2) *Change in method of accounting for long-term contracts and payment liabilities*—(i) *First taxable year beginning after December 31, 1991.* For the first taxable year beginning after December 31, 1991, a taxpayer is granted the consent of the Commissioner to change its method of accounting for long-term contract liabilities described in paragraph (D)(2)(ii) of this section and payment liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section) to comply with the provisions of this section. The change must be made in accordance with paragraph (m)(1)(ii) or (m)(1)(iii) of this section, except the effective date is the first day of the first taxable year beginning December 31, 1991.

(ii) *Retroactive change in method of accounting for long-term contracts and payment liabilities.* For the first taxable year beginning after December 31, 1989, or the first taxable year beginning after December 31, 1990, a taxpayer is granted the consent of the Commissioner to change its method of accounting for long-term contract liabilities described in paragraph (d)(2)(ii) of this section and payment liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section) to comply with the provisions of this section. The change must be made in accordance with paragraph (m)(1)(ii) or (m)(1)(iii) of this section, except the effective date is the first day of the first taxable year beginning after December 31, 1989, or the first day of the first taxable year beginning after December 31, 1990. For taxable years ending before April 7, 1995, the taxpayer may make the change in method of accounting, including a full-year change in method election under paragraph (m)(1)(ii) of this section and Q&A–5 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995), by filing an amended return for such year, provided the amended return is filed on or before October 7, 1992.

[T.D. 8408, 57 FR 12421, Apr. 10, 1992, as amended by T.D. 8491, 58 FR 53135, Oct. 14, 1993; T.D. 8593, 60 FR 18743, Apr. 13, 1995]

§ 1.461–5 Recurring item exception.

(a) *In general.* Except as otherwise provided in paragraph (c) of this section, a taxpayer using an accrual method of accounting may adopt the recurring item exception described in paragraph (b) of this section as method of accounting for one or more types of recurring items incurred by the taxpayer. In the case of the ''other payment liabilities'' described in § 1.461–4(g)(7), the Commissioner may provide for the application of the recurring item exception by regulation, revenue procedure or revenue ruling.

(b) *Requirements for use of the exception*—(1) *General rule.* Under the recurring item exception, a liability is treated as incurred for a taxable year if—

(i) As of the end of that taxable year, all events have occurred that establish the fact of the liability and the amount of the liability can be determined with reasonable accuracy;

(ii) Economic performance with respect to the liability occurs on or before the earlier of—

(A) The date the taxpayer files a timely (including extensions) return for that taxable year; or

(B) The 15th day of the 9th calendar month after the close of that taxable year;

(iii) The liability is recurring in nature; and

(iv) Either—

(A) The amount of the liability is not material; or

(B) The accrual of the liability for that taxable year results in a better matching of the liability with the income to which it relates than would result from accruing the liability for the taxable year in which economic performance occurs.

(2) *Amended returns.* A taxpayer may file an amended return treating a liability as incurred under the recurring item exception for a taxable year if economic performance with respect to the liability occurs after the taxpayer files a return for that year, but within 8½ months after the close of that year.

(3) *Liabilities that are recurring in nature.* A liability is recurring if it can generally be expected to be incurred from one taxable year to the next. However, a taxpayer may treat such a liability as recurring in nature even if it is not incurred by the taxpayer in each taxable year. In addition, a liability that has never previously been incurred by a taxpayer may be treated as recurring if it is reasonable to expect that the liability will be incurred on a recurring basis in the future.

(4) *Materiality requirement.* For purposes of this paragraph (b):

(i) In determining whether a liability is material, consideration shall be given to the amount of the liability in absolute terms and in relation to the amount of other items of income and expense attributable to the same activity.

(ii) A liability is material if it is material for financial statement purposes under generally acepted accounting principles.

(iii) A liability that is immaterial for financial statement purposes under generally accepted accounting principles may be material for purposes of this paragraph (b).

(5) *Matching requirement.* (i) In determining whether the matching requirement of paragraph (b)(1)(iv)(B) of this section is satisfied, generally accepted accounting principles are an important factor, but are not dispositive.

(ii) In the case of a liability described in paragraph (g)(3) (rebates and refunds), paragraph (g)(4) (awards, prizes, and jackpots), paragraph (g)(5) (insurance, warranty, and service contracts), paragraph (g)(6) (taxes), or paragraph (h) (continuing fees under the Nuclear Waste Policy Act of 1982) of § 1.461–4, the matching requirement of paragraph (b)(1)(iv)(B) of this section shall be deemed satisfied.

(c) *Types of liabilities not eligible for treatment under the recurring item exception.* The recurring item exception does not apply to any liability of a taxpayer described in paragraph (e) (interest), paragraph (g)(2) (workers compensation, tort, breach of contract, and violation of law), or paragraph (g)(7) (other liabilities) of § 1.461–4. Moreover, the recurring item exception does not apply to any liability incurred by a tax shelter, as defined in section 461(i) and § 1.448–1T(b).

(d) *Time and manner of adopting the recurring item exception*—(1) *In general.* The recurring item exception is a method of accounting that must be consistently applied with respect to a type of item, or for all items, from one taxable year to the next in order to clearly reflect income. A taxpayer is permitted to adopt the recurring item exception as part of its method of accounting for any type of item for the first taxable year in which that type of item is incurred. Except as otherwise provided, the rules of section 446(e) and §1.446–1(e) apply to changes to or from the recurring item exception as a method of accounting. For taxable years ending before April 7, 1995, see Q&A–7 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995) for rules concerning the time and manner of adopting the recurring item exception for taxable years that include July 19,1984. For purposes of this section, items are to be classified by type in a manner that results in classifications that are no less inclusive than the classifications of production costs provided in the full-absorption regulations of §1.471–11(b) and(c), whether or not the taxpayer is required to maintain inventories.

(2) *Change to the recurring item exception method for the first taxable year beginning after December 31, 1991*—(i) *In general.* For the first taxable year beginning after December 31, 1991, a taxpayer is granted the consent of the Commissioner to change to the recurring item exception method of accounting. A taxpayer is also granted the consent of the Commissioner to expand or modify its use of the recurring item exception method for the first taxable year beginning after December 31, 1991. For each trade or business for which a taxpayer elects to use the recurring item exception method, the taxpayer must use the same method of change (cut-off or full-year change) it is using for that trade or business under §1.461–4(m). For taxable year sending before April 7, 1995, see Q&A–11 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995) for an explanation of how amounts are taken into account under the cut-off method (except that, for purposes of this paragraph (d)(2), the change applies to all amounts otherwise incurred on or after the first day of the first taxable year beginning after December 31, 1991). For taxable years ending before April 7, 1995, see Q&A–6 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995) for an explanation of how amounts are taken into account under the full-year change method (except that the change in method occurs on the first day of the first taxable year beginning after December 31, 1991). For taxable years ending before April 7, 1995, the full-year change in method may result in a section 481(a) adjustment that must be taken into account in the manner described in Q&A–8 and Q&A–9 of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995) (except that the taxable year of change is the first taxable year beginning after December 31, 1991).

(ii) *Manner of changing to the recurring item exception method.* For the first taxable year beginning after December 31, 1991, a taxpayer may change to the recurring item exception method by accounting for the item on its timely filed original return for such taxable year (including extensions). For taxable years ending before April 7, 1995, the automatic consent of the Commissioner is limited to those items accounted for under the recurring item exception method on the timely filed return, unless the taxpayer indicates a wider scope of change by filing the statement provided in Q&A–7(b)(2) of §1.461–7T (as it appears in 26 CFR part 1 revised April 1, 1995).

(3) *Retroactive change to the recurring item exception method.* For the first taxable year beginning after December 31, 1989, or December 31, 1990, a taxpayer is granted consent of the Commissioner to change to the recurring item exception method of accounting, provided the taxpayer complies with paragraph (d)(2) of this section on either the original return for such year or on an amended return for such year filed on or before October 7, 1991. For this purpose the effective date is the first day of the first taxable year beginning after December 31, 1989, or the first day of the first taxable year beginning after December 31, 1990. A taxpayer is also granted the consent of the Commissioner to expand or modify its use of the recurring item exception method for the first taxable year beginning

after December 31, 1989, December 31, 1990, or December 31, 1991.

(e) *Examples.* The following examples illustrate the principles of this section:

Example 1. Requirements for use of the recurring item exception. (i) Y corporation, a calendar year, accrual method taxpayer, manufactures and distributes video cassette recorders. Y timely files its federal income tax return for each taxable year on the extended due date for the return (September 15, of the following taxable year). Y offers to refund the price of a recorder to an purchaser not satisfied with the recorder. During 1992, 100 purchasers request a refund of the $500 purchase price. Y refunds $30,000 on or before September 15, 1993, and the remaining $20,000 after such date but before the end of 1993.

(ii) Under paragraph (g)(3) of § 1.461–4, economic performance with respect to $30,000 of the refund liability occurs on September 15, 1993. Assume the refund is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred. If Y does not adopt the recurring item exception with respect to rebates and refunds, the $30,000 refund is incurred by Y for the 1993 taxable year. However, if Y has properly adopted the recurring item exception method of accounting under this section, and as of December 31, 1992, all events have occurred that determine the fact of the liability for the $30,000 refund, Y incurs that amount for the 1992 taxable year. Because economic performance (payment) with respect to the remaining $20,000 occurs after September 15, 1993 (more than 8½ months after the end of 1992), that amount is not eligible for recurring item treatment under this section. Thus, the $20,000 amount is not incurred by Y until the 1993 taxable year.

Example 2. Requirements for use of the recurring item exception; amended returns. The facts are the same as in *Example 2*, except that Y files its income tax return for 1992 on March 15, 1993, and Y does not refund the price of any recorder before that date. Under paragraph (b)(1) of this section, the refund liability is not eligible for the recurring item exception because economic performance with respect to the refund does not occur before Y files a return for the taxable year for which the item would have been incurred under the exception. However, since economic performance occurs within 8½ months after 1992, Y may file an amended return claiming the $30,000 as incurred for its 1992 taxable year (see paragraph (b)(2) of this section).

[T.D. 8408, 57 FR 12427, Apr. 10, 1992, as amended by T.D. 8593, 60 FR 18743, Apr. 13, 1995]

§ 1.461–6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.

(a) *Qualified assignments of certain personal injury liabilities under section 130.* In the case of a qualified assignment (within the meaning of section 130(c)), economic performance occurs as a taxpayer-assignor makes payments that are excludible from the income of the assignee under section 130(a).

(b) *Section 468B.* Economic performance occurs as a taxpayer makes qualified payments to a designated settlement fund under section 468B, relating to special rules for designated settlement funds.

(c) *Payments to other funds or persons that constitute economic performance.* [Reserved]

(d) *Effective dates.* The rules in paragraph (a) of this section apply to payments after July 18, 1984.

[T.D. 8408, 57 FR 12428, Apr. 10, 1992]

§ 1.463–1T Transitional rule for vested accrued vacation pay (temporary).

(a) *Introduction.* Section 91(i) of the Tax Reform Act of 1984 provides a transitional rule for the election under section 463, relating to accrual of vacation pay. Section 91(i) applies only in the case of taxpayers with respect to which a deduction was allowable (other than under section 463) for vested accrued vacation pay for the last taxable year ending or or before July 18, 1984.

(b) *Election under transitional rule.* A taxpayer described in paragraph (a) of this section that makes an election under section 463 for the first taxable year ending after July 18, 1984, shall compute the opening balance of the account described in section 463(a)(1) (‘‘accrual account’’) with respect to such vacation pay under the rules provided in paragraph (e)(3) of this section.

(c) *Multiple vacation pay accounts within a single trade or business.* (1) An election under section 463 must be made with respect to all vacation pay accounts maintained by the taxpayer within a single trade or business whether the liability is for vested accrued vacation pay or for vacation pay that is contingent.

(2) If a taxpayer has elected, in a taxable year ending on or before July 18, 1984, to treat contingent vacation pay with respect to a single trade or business under section 463, the taxpayer may elect, under the provisions of section 91(i) of the Tax Reform Act of 1984, to treat vested accrued vacation pay with respect to the same trade or business under section 463. However, no election may be made with respect to vacation pay for which a prior section 463 election was made and that is accounted for under section 463.

(d) *Time for making election.* A taxpayer described in paragraph (a) of this section that makes an election under section 463 for the first taxable year ending after July 18, 1984, must make the election on or before the due date (determined with regard to extensions) for filing the taxpayer's income tax return for such taxable year. However, if the taxpayer's income tax return was filed for the first taxable year ending after July 18, 1984, prior to March 6, 1986, the taxpayer must make the election by the later of the due date (determined with regard to extensions) for filing the taxpayer's income tax return, or May 5, 1986. In this case, the election must be made by filing an amended return (showing adjustments, if any) for such year and attaching the statement required by paragraph (e) of this section on or before the later of the due date (determined with regard to extensions) for filing the taxpayer's income tax return, or May 5, 1986.

(e) *Manner of making election.* A taxpayer must make the election described in paragraph (b) of this section by attaching a statement to the taxpayer's income tax return for the first taxable year ending after July 18, 1984. The statement must indicate that the taxpayer is electing to apply the provisions of section 463 with respect to vested accrued vacation pay for the taxpayer's first taxable year ending after July 18, 1984. The statement must contain the following information:

(1) The taxpayer's name and a description of the vacation pay plans to which the election applies.

(2) If a taxpayer has more than one trade or business and is not making the election with respect to all trades or businesses, a description of the trades or businesses to which the election applies.

(3) The opening balance in the taxpayer's accrual account. This balance equals the amount determined as if the taxpayer had maintained an account for the last taxable year ending on or before July 18, 1984, representing the taxpayer's liability for vested accrued vacation pay earned by employees before the close of the last taxable year ending on or before July 18, 1984, and payable during that taxable year or within 12 months following the close of that taxable year. If the taxpayer's liability for vacation pay includes both vested accrued vacation pay and vacation pay the liability for which is contingent, the amount in the opening balance of the accrual account that represents the taxpayer's liability for contingent vacation pay is to be determined under the rules provided in section 463(b)(2).

(4) The opening balance in the taxpayer's suspense account. This balance equals the amount determined under paragraph (e)(3) of this section less the portion allowed as deductions under section 162 for prior taxable years for vacation pay earned but not paid at the close of the last taxable year ending on or before July 18, 1984.

(f) *Vested accrued vacation pay.* For purposes of paragraphs (a) through (e) of this section, ''vested accrued vacation pay'' means any amount allowable as a deduction under section 162(a) for a taxable year with respect to vacation pay of employees of the taxpayer (determined without regard to section 463). For purposes of this section, vacation pay will be considered vested accrued vacation pay even though there is a limit or ceiling on the amount of vacation pay an employee is entitled to as of the close of any plan year.

For example, if under a vacation pay plan an employee may accumulate no more than 40 days of vacation leave by the end of any plan year and any unused days in excess of 40 days are forfeited, the taxpayer is considered to have vested accrued vacation pay (even though the plan is not fully vested) and may make an election under the transitional rule.

[T.D. 8073, 51 FR 4329, Feb. 4, 1986, as amended at 51 FR 11303, Apr. 2, 1986]

§ 1.465–1T Aggregation of certain activities (temporary).

(a) *General rule.* A partner in a partnership or an S corporation shareholder may aggregate and treat as a single activity—

(1) The holding, production, or distribution of more than one motion picture film or video tape by the partnership or S corporation,

(2) The farming (as defined in section 464 (e)) of more than one farm by the partnership or S corporation,

(3) The exploration for, or exploitation of, oil and gas resources with respect to more than one oil and gas property by the partnership or S corporation, or

(4) The exploration for, or exploitation of, geothermal deposits (within the meaning of section 613(e)(3)) with respect to more than one geothermal property by the partnership or S corporation.

Thus, for example, if a partnership or S corporation is engaged in the activity of exploring for, or exploiting, oil and gas resources with respect to 10 oil and gas properties, a partner or S corporation shareholder may aggregate those properties and treat the aggregated oil and gas activities as a single activity. If that partnership or S corporation also is engaged in the activity of farming with respect to two farms, the partner or shareholder may aggregate the farms and treat the aggregated farming activities as a single separate activity. Except as provided in section 465(c)(2)(B)(ii), the partner or shareholder cannot aggregate the farming activity with the oil and gas activity.

(b) *Effective date.* This section shall apply to taxable years beginning after December 31, 1983 and before January 1, 1985.

(Secs. 465(c)(2)(B) and 7805 of the Internal Revenue Code of 1954 (98 Stat. 814, 68A Stat. 917; 26 U.S.C. 465(c)(2)(B) and 7805))

[T.D. 8012, 50 FR 9614, Mar. 11, 1985]

§ 1.465–27 Qualified nonrecourse financing.

(a) *In general.* Notwithstanding any provision of section 465(b) or the regulations under section 465(b), for an activity of holding real property, a taxpayer is considered at risk for the taxpayer's share of any qualified nonrecourse financing which is secured by real property used in such activity.

(b) *Qualified nonrecourse financing secured by real property*—(1) *In general.* For purposes of section 465(b)(6) and this section, the term *qualified nonrecourse financing* means any financing—

(i) Which is borrowed by the taxpayer with respect to the activity of holding real property;

(ii) Which is borrowed by the taxpayer from a qualified person or represents a loan from any federal, state, or local government or instrumentality thereof, or is guaranteed by any federal, state, or local government;

(iii) For which no person is personally liable for repayment, taking into account paragraphs (b)(3), (4), and (5) of this section; and

(iv) Which is not convertible debt.

(2) *Security for qualified nonrecourse financing*—(i) *Types of property.* For a taxpayer to be considered at risk under section 465(b)(6), qualified nonrecourse financing must be secured only by real property used in the activity of holding real property. For this purpose, however, property that is incidental to the activity of holding real property will be disregarded. In addition, for this purpose, property that is neither real property used in the activity of holding real property nor incidental property will be disregarded if the aggregate gross fair market value of such property is less than 10 percent of the aggregate gross fair market value of all the property securing the financing.

(ii) *Look-through rule for partnerships.* For purposes of paragraph (b)(2)(i) of this section, a borrower shall be treated as owning directly its proportional share of the assets in a partnership in which the borrower owns (directly or indirectly through a chain of partnerships) an equity interest.

(3) *Personal liability; partial liability.* If one or more persons are personally liable for repayment of a portion of a financing, the portion of the financing for which no person is personally liable may qualify as qualified nonrecourse financing.

(4) *Partnership liability.* For purposes of section 465(b)(6) and this paragraph

(b), the personal liability of any partnership for repayment of a financing is disregarded and, provided the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property if—

(i) The only persons personally liable to repay the financing are partnerships;

(ii) Each partnership with personal liability holds only property described in paragraph (b)(2)(i) of this section (applying the principles of paragraph (b)(2)(ii) of this section in determining the property held by each partnership); and

(iii) In exercising its remedies to collect on the financing in a default or default-like situation, the lender may proceed only against property that is described in paragraph (b)(2)(i) of this section and that is held by the partnership or partnerships (applying the principles of paragraph (b)(2)(ii) of this section in determining the property held by the partnership or partnerships).

(5) *Disregarded entities.* Principles similar to those described in paragraph (b)(4) of this section shall apply in determining whether a financing of an entity that is disregarded for federal tax purposes under § 301.7701–3 of this chapter is treated as qualified nonrecourse financing secured by real property.

(6) *Examples.* The following examples illustrate the rules of this section:

Example 1. Personal liability of a partnership; incidental property. (i) X is a limited liability company that is classified as a partnership for federal tax purposes. X engages only in the activity of holding real property. In addition to real property used in the activity of holding real property, X owns office equipment, a truck, and maintenance equipment that it uses to support the activity of holding real property. X borrows $500 to use in the activity. X is personally liable on the financing, but no member of X and no other person is liable for repayment of the financing under local law. The lender may proceed against all of X's assets if X defaults on the financing.

(ii) Under paragraph (b)(2)(i) of this section, the personal property is disregarded as incidental property used in the activity of holding real property. Under paragraph (b)(4) of this section, the personal liability of X for repayment of the financing is disregarded and, provided the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property.

Example 2. Bifurcation of a financing. The facts are the same as in *Example 1,* except that A, a member of X, is personally liable for repayment of $100 of the financing. If the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, then under paragraph (b)(3) of this section, the portion of the financing for which A is not personally liable for repayment ($400) will be treated as qualified nonrecourse financing secured by real property.

Example 3. Personal liability; tiered partnerships. (i) UTP1 and UTP2, both limited liability companies classified as partnerships, are the only general partners in Y, a limited partnership. Y borrows $500 with respect to the activity of holding real property. The financing is a general obligation of Y. UTP1 and UTP2, therefore, are personally liable to repay the financing. Under section 752, UTP1's share of the financing is $300, and UTP2's share is $200. No person other than Y, UTP1, and UTP2 is personally liable to repay the financing. Y, UTP1, and UTP2 each hold only real property.

(ii) Under paragraph (b)(4) of this section, the personal liability of Y, UTP1, and UTP2 to repay the financing is disregarded and, provided the requirements of paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, UTP1's $300 share of the financing and UTP2's $200 share of the financing will be treated as qualified nonrecourse financing secured by real property.

Example 4. Personal liability; tiered partnerships. The facts are the same as in *Example 3,* except that Y's general partners are UTP1 and B, an individual. Because B, an individual, is also personally liable to repay the $500 financing, the entire financing fails to satisfy the requirement in paragraph (b)(1)(iii) of this section. Accordingly, UTP1's $300 share of the financing will not be treated as qualified nonrecourse financing secured by real property.

Example 5. Personal liability; tiered partnerships. The facts are the same as in *Example 3,* except that Y is a limited liability company and UTP1 and UTP2 are not personally liable for the debt. However, UTP1 and UTP2 each pledge property as security for the loan that is other than real property used in the activity of holding real property and other than property that is incidental to the activity of holding real property. The fair market value of the property pledged by UTP1 and UTP2 is greater than 10 percent of the sum of the aggregate gross fair market value of the property held by Y and the aggregate gross fair market value of the property pledged by UTP1 and UTP2. Accordingly, the financing fails to satisfy the requirement in paragraph (b)(1)(iii) of this section by virtue of its failure to satisfy paragraph (b)(4)(iii) of this section. Therefore, the financing is not qualified nonrecourse financing secured by real property.

Example 6. Personal liability; Disregarded entity. (i) X is a single member limited liability company that is disregarded as an entity separate from its owner for federal tax purposes under § 301.7701–3 of this chapter. X owns certain real property and property that is incidental to the activity of holding the real property. X does not own any other property. For federal tax purposes, A, the sole member of X, is considered to own all of the property held by X and is engaged in the activity of holding real property through X. X borrows $500 and uses the proceeds to purchase additional real property that is used in the activity of holding real property. X is personally liable to repay the financing, but A is not personally liable for repayment of the financing under local law. The lender may proceed against all of X's assets if X defaults on the financing.

(ii) X is disregarded so that the assets and liabilities of X are treated as the assets and liabilities of A. However, A is not personally liable for the $500 liability. Provided that the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property with respect to A.

(c) *Effective date.* This section is effective for any financing incurred on or after August 4, 1998. Taxpayers, however, may apply this section retroactively for financing incurred before August 4, 1998.

[T.D. 8777, 63 FR 41421, Aug. 4, 1998]

§ 1.466–1 Method of accounting for the redemption cost of qualified discount coupons.

(a) *Introduction.* Section 466 permits taxpayers who elect to use the method of accounting description in section 466 to deduct the redemption cost (as defined in paragraph (b) of this section) of qualified discount coupons (as defined in paragraph (c) of this section) outstanding at the end of the taxable year and redeemed during the redemption period (within the meaning of paragraph (d)(2) of this section) in addition to the redemption cost of qualified discount coupons redeemed during the taxable year which were not deducted for a prior taxable year. For the taxable year in which the taxpayer first uses this method of accounting, the taxpayer is not allowed to deduct the redemption costs of qualified discount coupons redeemed during the taxable year that would have been deductible for the prior taxable year had the taxpayer used this method of accounting for such prior year. (See paragraph (e) of this section for rules describing how this amount should be taken into account.) A taxpayer must use the accrual method of accounting for any trade or business for which an election is made under section 466. Furthermore, the taxpayer must make an election in accordance with the rules in section 466(d) and § 1.466–3 for that trade or business. The method of accounting in section 466 is applicable only to the taxpayer's redemption of qualified discount coupons. Section 466 does not apply to trading stamps or premium coupons, which are subject to the method of accounting in § 1.451–4, or to discount coupons that are not qualified discount coupons.

(b) *Redemption costs*—(1) *Costs deductible under section 466.* The deduction allowed by section 466 applies only to the redemption cost of qualified discount coupons. The term ''redemption cost'' means an amount equal to:

(i) The lesser of:

(A) The amount of the discount stated on the coupon, or

(B) The cost incurred by the taxpayer for paying the discount; plus

(ii) The amount payable to the retailer (or other person redeeming the coupon from the person receiving the price discount) for services in redeeming the coupon.

The amount payable to the retailer or other person for services in redeeming the coupon is allowed only if the amount payable is stated on the coupon.

(2) *Costs not deductible under section 466.* The term ''redemption cost'' includes only the amounts stated in paragraph (b)(1) of this section. Amounts other than those mentioned in paragraph (b)(1) of this section cannot be deducted under the method of accounting described in section 466 even though such amounts are incurred

in relation to the redemption of qualified discount coupons. Therefore, those amounts must be taken into account as if section 466 did not apply. Examples of such amounts are fees paid to the redemption center or clearinghouse and amounts payable to the retailer in excess of the amount stated on the coupon.

(c) *Qualified discount coupons*—(1) *General rule.* In order for a discount coupon (as defined in paragraph (c)(2)(i) of this section) to be considered a qualified discount coupon, all of the following requirements must be met:

(i) The coupon must have been issued by and must be redeemable by the taxpayer;

(ii) The coupon must allow a discount on the purchase price of merchandise or other tangible personal property;

(iii) The face amount of the coupon must not exceed five dollars;

(iv) The coupon, by its terms, may not be used with other coupons to bring about a price discount reimbursable by the issuer of more than five dollars with respect to any item; and

(v) There must exist a redemption chain (as defined in paragraph (c)(2)(ii) of this section) with respect to the coupon.

(2) *Definitions*—(i) *Discount coupon.* A discount coupon is a sales promotion device used to encourage the purchase of a specific product by allowing a purchaser of that product to receive a discount on its purchase price. The term ‘‘discount coupon’’ does not include trading stamps or premium coupons, which are subject to the method of accounting in §1.451–4. A discount coupon may or may not be issued as part of a prior purchase. A discount coupon normally entitles its holders to receive nothing more than a reduction in the sales price of one of the issuer's products. The discount may be stated in terms of a cash amount, a percentage or fraction of the purchase price, a ‘‘two for the price of one’’ deal, or any other similar provision. A discount coupon need not be printed on paper in the form usually associated with coupons; it may be a token or other object so long as it functions as a coupon.

(ii) *Redemption chain.* A redemption chain exists when the issuer redeems the coupon from some person other than the customer who used the coupon to receive the price discount. Thus, in order to be treated as a qualified discount coupon, the coupon must not be issued by the person that initially redeems the coupon from the customer. For purposes of determining whether a redemption chain exists, corporations that are members of the same controlled group of corporations (as defined in section 1563(a)) as the issuer of the coupon shall be treated as the issuer. Thus, if the issuer of the coupon and the retailer that initially redeems the coupon from the customer are members of the same controlled group of corporations, the coupon shall not be treated as a qualified discount coupon.

(d) *Deduction for coupons redeemed during the redemption period*—(1) *General rule.* Two special conditions must be met before the cost of redeeming qualified discount coupons during the redemption period can be deducted from the taxpayer's gross income for the taxable year preceding the redemption period. First, the qualified discount coupons must have been outstanding at the close of such taxable year. Second, the qualified discount coupons must have been received by the taxpayer before the close of the redemption period for that taxable year.

(2) *Redemption period.* The taxpayer can select any redemption period so long as the period does not extend longer than 6 months after the close of the taxapayer's taxable year. A change in the redemption period so selected shall be treated as a change in method of accounting.

(3) *Coupons received.* The deduction provided for in section 466(a)(1) is limited to the redemption costs associated with coupons that are actually received by the taxpayer within the redemption period. For purposes of this paragraph, if the issuer uses a redemption agent or clearinghouse to group, count, and verify coupons after they have been redeemed by a retailer, the coupons received by the redemption agent or clearinghouse will be considered to have been received by the issuer. Nothing in section 466, however, allows deductions to be made on the

basis of estimated redemptions, whether such estimates are made by either the issuer or some other party.

(e) *Transitional adjustment*—(1) *In general.* An election to change from some other method of accounting for the redemption of discount coupons to the method of accounting described in section 466 is a change in method of accounting that requires a transitional adjustment. Unless the taxpayer can qualify for a waiver of the suspense account requirement as provided for in section 373(c) of the Revenue Act of 1978 (92 Stat. 2865), the taxpayer should compute the transitional adjustment described in section 481(a)(2) according to the rules contained in this section. This adjustment should be taken into account according to the special rules in subsections (e) and (f) of section 466.

(2) *Net increase in taxable income.* In the case of a transitional adjustment that would result in a net increase in taxable income under section 481(a)(2) for the year of change, that increase should be taken into income over a ten-year period consisting of the year of change and the immediately succeeding nine taxable years. For example, assume that A, a calendar year taxpayer, makes an election to use the method of accounting described in section 466 for the year 1980 and for subsequent years. Assume further that the amount of the transitional adjustment computed under section 481(a)(2) would result in a net increase in taxable income of $100 for 1980. Under these facts, A should increase taxable income for 1980 and each of the next nine taxable years by $10.

(3) *Suspense account*—(i) *In general.* In the case of a transitional adjustment that would result in a net decrease in taxable income under section 481(a)(2) for the year of change, in lieu of applying section 481, the taxpayer must establish a separate suspense account for each trade or business for which the taxpayer has made an election to use section 466. The computation of the initial opening balance in the suspense account is described in paragraph (e)(3)(ii)(A) of this section. An initial adjustment to gross income for the year of election is described in paragaph (e)(3)(ii)(B) of this section. Annual adjustments to the suspense account are described in paragraph (e)(3)(iii)(A) of this section, and gross income adjustments are described in paragraph (e)(3)(iii)(B) of this section. Examples are provided in paragraph (e)(4) of this section. The effect of the suspense account is to defer some part of, or all of, the deduction of the transitional adjustment until the taxpayer no longer redeems discount coupons in connection with the trade or business to which the suspense account relates.

(ii) *Establishing a suspense account*—(A) *Initial opening balance.* To compute the initial opening balance of the suspense account for the first taxable year for which the election to use section 466 is effective, the taxpayer must determine the dollar amount of the deduction that would have been allowed for qualified discount coupon redemption costs during the redemption period for each of the three immediately preceding taxable years had the election to use section 466 been in effect for those years. The initial opening balance of the suspense account is the largest such dollar amount reduced by the sum of the adjustments attributable to the change in method of accounting that increase income for the year of change.

(B) *Initial year adjustment.* If, in computing the initial opening balance, the largest dollar amount of deduction that would have been allowed in any of the three prior years exceeds the actual cost of redeeming qualified discount coupons received during the redemption period following the close of the year immediately preceding the year of election, the excess is included in income in the year of election. Section 481(b) does not apply to this increase in gross income.

(iii) *Annual adjustments*—(A) *Adjustment to the suspense account.* Adjustments are made to the suspense account each year to account for fluctuations in coupon redemptions. To compute the annual adjustment, the taxpayer must determine the amount to be deducted under section 466(a)(1) for the taxable year. If the amount is less than the opening balance in the suspense account for the taxable year, the balance in the suspense account is reduced by the difference. Conversely, if such amount is greater than the opening balance in the suspense account for the taxable year, the account is increased by the difference (but not to an amount in excess of the initial opening balance described in paragraph (e)(3)(ii) of this section). Therefore, the balance in the suspense account will never be greater than the initial opening balance in the suspense account determined in paragraph (e)(3)(ii) of this section. However, the balance in the suspense account after adjustments may be less than this initial opening balance in the suspense account.

(B) *Gross income adjustments.* Adjustments to the suspense account for years subsequent to the year of the election also produce adjustments in the taxpayer's gross income. Adjustments which reduce the balance in the suspense account reduce gross income for the year in which the adjustment to the suspense account is made. Adjustments which increase the balance in the suspense account increase gross income for the year in which the adjustment to the suspense account is made.

(4) *Examples.* (i) The provisions of paragraph (e)(3) of this section may be illustrated by the following examples:

Example (1). Assume that the issuer of qualified discount coupons makes a timely election under section 466 for its taxable year ending December 31, 1979, and does not select a coupon redemption period shorter than the statutory period of 6 months. Assume further that the taxpayer's qualified discount coupon redemption costs in the first 6 months of 1977, 1978, and 1979 were $7, $13, and $8 respectively, and that the accounting change adjustments that increase income for 1979 are $10. Since the accounting change adjustment that increases income for 1979, ($10), is greater than the taxpayer's discount coupon redemptions during the first 6 months of 1979 ($8), the net section 481(a)(2) adjustment for the year of change results in a positive adjustment. Because of this, a suspense account is not required. The taxpayer should instead follow the rules in section 466(f) and in paragraph (e)(2) of this section in order to take this positive transitional adjustment into account.

Example (2). Assume the same facts as in example (1), except that the sum of the accounting change adjustments that increase income for 1979 is equal to $2. Under these facts the initial opening balance in the suspense account on January 1, 1979 would be $11 (that is, the largest dollar amount of qualified coupon redemption costs in the pertinent years ($13), reduced by the sum of the accounting change adjustments that increase income in the year of change ($2)). Since the coupon redemption costs taken into account in determining the initial opening balance ($13 in 1979) exceed the actual redemption costs in the first 6 months of the taxable year for which the election is first effective ($8 in 1979), the excess of $5 is added to gross income for the year of election (1979).

Example (3). Assume, in addition to the facts of example (2), that coupon redemption costs during the redemption period for the 1979 taxable year are $7. Since the qualifying redemption costs ($7) during the redemption period for the taxable year are less than the opening balance in the suspense account ($11) the taxpayer must reduce the suspense account balance by the difference ($4). The taxpayer is also allowed to take a deduction equal to the amount of this adjustment to the suspense account. Thus, the net amount deductible for the 1979 taxable year after taking into account the coupon redemptions during the redemption period, the amount deductible because of the decrease in the suspense account, and the initial year adjustment determined in example (2) is $6 ($7+$4−$5).

Example (4). Assume, in addition to the facts of example (3), that coupon redemption costs during the redemption period for the 1980 taxable year are $10. Since the qualifying redemption costs during the redemption period for the taxable year ($10) exceed the opening balance of the suspense account at the beginning of the taxable year ($7), the suspense account must be increased by the difference ($3). The taxpayer must also include $3 in gross income for the taxable year. Thus, the net amount deductible for the 1980 taxable year is $7 ($10−$3).

Example (5). Assume, in addition to the facts of example (4), that coupon redemption costs during the redemption period for the 1981 taxable year are $12. Since the qualifying redemption costs for the 1961 taxable year ($12) exceed the opening balance of the suspense account at the beginning of the taxable year ($10), the suspense account must be increased by the difference ($2) but not above the initial opening balance ($11). Thus, the taxpayer will increase the balance by $1. The taxpayer must also include $1 in gross income for the taxable year. Thus, the net amount deductible for the 1981 taxable year is $11 ($12−$1).

(ii) The following table summarizes examples (2) through (5):

	Years ending Dec. 31—					
	1977	1978	1979	1980	1981	1982
Facts:						
Actual coupon redemption costs in first six months	$7	$13	$8	$7	$10	$12
Accounting change adjustments that increase income in year of change	....	....	2	....	....	....
Net adjustment decreasing income in year of change under sec. 481(a)(2)	....	....	6	....	....	....
Adjustment to suspense account:						
Opening balance	....	....	11	7	10	11
Addition to account	....	....	....	3	1	....
Reduction to account	....	....	(4)	....	....	....
Opening balance for next year	....	....	7	10	11	....
Amount deductible:

Amount of deductible as actual coupon redemptions during redemption period	....	....	7	10	12	....
Adjustment for increase in suspense account	....	....	....	(3)	(1)	....
Adjustment for decrease in suspense account	....	....	4	....	....	....
Net amount deductible for the year for coupons redeemed during the redemption period	....	....	6	7	11	....

(f) *Subchapter C transactions*—(1) *General rule.* If a transfer of substantially all the assets of a trade or business in which discount coupons are redeemed is made to an acquiring corporation, and if the acquiring corporation determines its bases in these assets, in whole or part, with reference to the basis of these assets in the hands of the transferor, then for the purposes of section 466(e) the principles of section 381 and § 1.381(c)(4)–1 will apply. The application of this rule is not limited to the transactions described in section 381(a). Thus, the rule also applies, for example, to transactions described in section 351.

(2) *Special rules.* If, in the case of a transaction described in paragraph (f)(1) of this section, an acquiring corporation acquires assets that were used in a trade or business that was not subject to a section 466 election from a transferor that is owned or controlled directly (or indirectly through a chain of corporations) by the same interests, and if the acquiring corporation uses the acquired assets in a trade or business for which the acquiring corporation later makes an election to use section 466, then the acquiring corporation must establish a suspense account by taking into account not only its own experience but also the transferor's experience when the transferor held the assets in its trade or business. Furthermore, the transferor is not allowed a deduction for qualified discount coupons redeemed after the date of the transfer attributable to discount coupons issued by the transferor before the date of the transfer. Such redemptions shall be considered to be made by the acquiring corporation.

(3) *Example.* The provisions of paragraph (f)(2) of this section may be illustrated by the following example:

Example. Corporation S, a calendar year taxpayer, is a wholly owned subsidiary of Corporation P, a calendar year taxpayer. On December 31, 1982, S acquires from P sustantially all of the assets used in a trade or business in which qualified disount coupons are redeemed. P had not made an election under section 466 with respect to the redemption costs of the qualified discount coupons issued in connection with that trade or business. S makes an election to use section 466 for its taxable year ending December 31, 1983, for the trade or business in which the acquired assets are used, and selects a redemption period of 6 months. Assume that P's qualified discount coupon redemption costs in the first 6 months of 1981 and 1982 were $120 and $140 respectively. Assume further that S's qualified discount coupon redemption costs in the first 6 months of 1983 were $130, and that there are no accounting change adjustments that increase income with respect to the election. S must establish a suspense account by taking into account the largest dollar amount of deductions that would have been allowed under section 466(a)(1) for the 3 immediately preceding taxable years of P, including both P's and S's experience with respect to costs actually incurred during the redemption periods relating to those years. Thus, the initial opening balance of S's suspense account is $140. S must also make an initial year adjustment of $10 ($140–$130), which S must include in income for S's taxable year ending December 31, 1983. P may not take a deduction for the qualified coupon redemptions made after December 31, 1982, that are attributable to coupons issued by P before December 31, 1982. Thus, none of the $130 qualified discount coupon redemption costs incurred by S during the first six months of 1983 may be deducted by P.

[T.D. 8022, 50 FR 18474, May 1, 1985, as amended at 50 FR 21046, May 22, 1985]

§1.466–2 Special protective election for certain taxpayers.

(a) *General rule.* Section 373(c) of the Revenue Act of 1978 (92 Stat. 2865) allows certain taxpayers, who in prior years have accounted for discount coupons under a method of accounting reasonably similar to the method described in §1.451–4, to elect to treat that method of accounting as a proper one for those prior years. There are several differences between this protective election and the section 466(d) election. First, the protective election applies only to a single continuous period of taxable years the last year of which ends before January 1, 1979. Second, an otherwise qualifying protective election may apply to coupons which are discount coupons but which would not be treated as qualified discount coupons under Code section 466. Third, certain expenses such as the cost of redemption center service fees, and amounts that are payable to the retailer (or other person redeeming the coupons from the person receiving the price discount) for services in redeeming the coupons but that are not stated on the coupon, can be subtracted from gross receipts for prior years covered by a protective election (if treated as deductible under the accounting method for such years), even though such expenses would not be deductible under Code section 466.

(b) *Requirements.* In order to qualify for this special protective election, the following conditions must be met:

(1) For a continuous period of one or more prior taxable years, (the last year of which ends before Jan. 1, 1979), the taxpayer must have used a method of accounting for discount coupons that is reasonably similar to the method provided in §1.451–4 or its predecessors under the Internal Revenue Code of 1954;

(2) The taxpayer must make an election under section 466 of the Internal Revenue Code of 1954 according to the rules contained in §1.466–3 for its first taxable year ending after December 31, 1978; and

(3) The taxpayer must make an election under section 373(c) of the Revenue Act of 1978 according to the rules contained in §1.466–4 for its first taxable year ending after December 31, 1978.

(c) *Amount to be subtracted from gross receipts.* The amount the taxpayer may subtract under this section for the redemption costs of coupons shall include only:

(1) Costs of the type permitted by §1.451–4 to be included in the estimated average cost of redeeming coupons, plus

(2) Any amount designated or referred to on the coupon payable by the taxpayer to the person who allowed the discount on a sale by such person to the user of the coupon.

Nothing in this paragraph shall allow an item to be deducted more than once.

(d) *Right to amend prior tax returns.* This paragraph applies only to those taxpayers who have agreed in a prior year to discontinue the use of the method of accounting described in §1.451–4 for discount coupon redemptions. If the taxpayer used such method of accounting on the original return filed for the prior taxable year, and if any such year is not closed under the statute of limitations or by reason of a closing agreement with the Internal Revenue Service, a taxpayer who has made a protective election may file an amended return and a claim for refund for such years. In this amended return, the taxpayer should account for its discount coupon redemptions, according to the method of accounting described in §1.451–4. This is not to be construed, however, to abrogate in any way the rules regarding the close of taxable years due to the statute of limitations or a binding closing agreement between the Internal Revenue Service and the taxpayer.

(e) *Suspense account not required.* If the following three conditions are satisfied, the taxpayer need not establish the suspense account otherwise required by section 466(e). First, the taxpayer must make a timely election under these rules to protect prior years. Second, the method of accounting used in those years must have been used for all discount coupons issued by the taxpayer in those years in all the taxpayer's separate trades or businesses in which coupons were issued. Third, either before or after an amendment to the taxpayer's tax returns as described in paragraph (d) of this section, a method of accounting reasonably similar to the method of accounting described in §1.451–4 must have been used for the taxable year ending on or before December 31, 1978. If these conditions are met, the taxpayer will treat the election of the method under section 466 as a change in method of accounting to which the rules in section 481 and the regulations thereunder apply.

(f) *Definition: reasonably similar.* For purposes of paragraphs (b)(1) and (e) of this section, a taxpayer will be considered to have used a method of accounting for discount coupons that is ''reasonably similar'' to the method of accounting provided in §1.451–4 if the taxpayer followed the method of accounting described in §1.451–4 as if that method were a valid method of accounting for discount coupon redemptions.

[T.D. 8022, 50 FR 18476, May 1, 1985]

§1.466–3 Manner of and time for making election under section 466.

(a) *In general.* Section 466 provides a special method of accounting for accrual basis taxpayers who issue qualified discount coupons (as defined in section 466(b)). In order to use the special method under section 466, a taxpayer must make an election with respect to the trade or business in connection with which the qualified discount coupons are issued. If a taxpayer issues qualified discount coupons in connection with more than one trade or business, the taxpayer may use the special method of accounting under section 466 only with respect to the qualified discount coupons issued in connection with a trade or business for which an election is made. The election must be made in the manner prescribed in this section. The election does not require the prior consent of the Internal Revenue Service. An election under section 466 is effective for the taxable year for which it is made and for all subsequent taxable years, unless the taxpayer secures the prior consent of the Internal Revenue Service to revoke such election.

(b) *Manner of and time for making election*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, an election is made under section 466 and this section by filing a statement of election containing the information described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year for which the election is made. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which the election is made. Thus, the election may not be made for a taxable year by filing an amended income tax return after the time prescribed (including extensions) for filing the original return for such year.

(2) *Transitional rule.* If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election under section 466 with respect to such taxable year in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 466 and this section with respect to such taxable year if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for such taxable year, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make an election under section 466 with respect to such taxable year, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be associated with the taxpayer's income tax return for such taxable year.

For purposes of paragraph (b)(2)(i) of this section, a reasonable effort to notify the Commissioner of an intent to make an election under section 466 with respect to a taxable year includes the timely filing of an income tax return for such taxable year if the taxable income reported on the return reflects a deduction for the redemption costs of qualified discount coupons as determined under section 466(a).

(c) *Required information.* The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 466 and must set forth the following information:

(1) A description of each trade or business for which the election is made;

(2) The first taxable year for which the election is made;

(3) The redemption period (as defined in section 466(c)(2)) for each trade or business for which the election is made;

(4) If the taxpayer is required to establish a suspense account under section 466(e) for a trade or business for which the election is made, the initial opening balance of such account (as defined in section 466(e)(2)) for each such trade or business; and

(5) In the case of an election under section 466 that results in a net increase in taxable income under section 481(a)(2), the amount of such net increase.

The statement of election should be made on a Form 3115, which need contain no information other than that required by this paragraph or paragraph (c) of §1.466–4.

[T.D. 8022, 50 FR 18477, May 1, 1985]

§1.466–4 Manner of and time for making election under section 373(c) of the Revenue Act of 1978.

(a) *In general.* Section 373(c)(2) of the Revenue Act of 1978 (92 Stat. 2865) provides an election for taxpayers who satisfy the requirements of section 373(c)(2)(A) (i) and (ii) of the Act. The election is made with respect to a method of accounting for the redemption costs of discount coupons used by the electing taxpayer in a continuous period of one or more taxable years ending before January 1, 1979. The election must be made in the manner prescribed by this section. The election does not require the prior consent of the Internal Revenue Service.

(b) *Manner of and time for making election*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, the election under section 373(c) of the Revenue Act of 1978 is made by filing a statement of election containing the information described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the taxpayer's first taxable year ending after December 31, 1978. Thus, the election may not be made with an amended income tax return for such year filed after the time prescribed (including extensions) for filing the original return.

(2) *Transitional rule.* If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 373(c) of the Act and this section with respect to a continuous period if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make election under section 373(c) of the Act with respect to the continuous period, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be associated with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978.

(c) *Required information.* The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 373(c) of the Revenue Act of 1978 and must set forth the taxable years in the continuous period for which the election is made. The statement of election should be made on the same form 3115 on which the taxpayer has made a statement of election under section 466. The Form 3115 need contain no information other than that required by this paragraph or paragraph (c) of § 1466–3.

[T.D. 8022, 50 FR 18478, May 1, 1985]

§ 1.468A–0 Nuclear decommissioning costs; table of contents.

This section lists the paragraphs contained in §§ 1.468A–1 through 1.468A–8.

§ 1.468A–1 Nuclear decommissioning costs; general rules.

(a) Introduction.
(b) Definitions.
(c) Special rules applicable to certain experimental nuclear facilities.
(d) Special rules for electing taxpayers whose rates are under the jurisdiction of the Rural Electrification Administration.

§ 1.468A–2 Treatment of electing taxpayer.

(a) In general.
(b) Limitation on payments to a nuclear decommissioning fund.
(1) In general.
(2) Cost of service amount.
(c) Deemed payment rules.
(d) Treatment of distributions.
(1) In general.
(2) Exceptions to inclusion in gross income.
(i) Payment of administrative costs and incidental expenses.
(ii) Withdrawals of excess contributions.
(iii) Actual distributions of amounts included in gross income as deemed distributions.
(e) Deduction when economic performance occurs.
(f) Effect of interim rate orders and retroactive adjustments to such orders.
(1) In general.
(2) Special rule permitting withdrawal of excess contribution that results from retroactive adjustment to interim rate order.
(3) Revised schedule of ruling amounts.
(4) Example.

§ 1.468A–3 Ruling amount.

(a) In general.
(b) Level funding limitation.
(c) Funding period.
(1) General rule.
(2) Examples.
(d) Decommissioning costs allocable to a fund.
(1) General rule.
(2) Total estimated cost of decommissioning.
(3) Taxpayer's share.
(4) Qualifying percentage.
(e) Determination of estimated dates.
(f) Special rules in the case of rates established or approved by two or more public utility commissions.
(g) Requirement of determination by public utility commission of decommissioning costs to be included in cost of service.
(h) Manner of requesting schedule of ruling amounts.
(1) In general.
(2) Information required.
(3) Administrative procedures.
(i) Review and revision of schedule of ruling amounts.
(1) Mandatory review.
(2) Elective review.
(3) Determination of revised schedule of ruling amounts.
(j) Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.

§ 1.468A–4 Treatment of nuclear decommissioning fund.

(a) In general.
(b) Modified gross income.
(c) Special rules.
(1) Period for computation of modified gross income.
(2) Gain or loss upon distribution of property by a fund.
(3) Denial of credits against tax.
(4) Other corporate taxes inapplicable.
(d) Treatment as corporation for purposes of subtitle F.

§ 1.468A–5 Nuclear decommissioning fund—miscellaneous provisions.

(a) Qualification requirements.
(1) In general.
(2) Limitation on contributions.
(3) Limitation on use of fund.
(i) In general.
(ii) Definition of administrative costs and expenses.
(4) Trust provisions.
(b) Prohibitions against self-dealing.
(1) In general.
(2) Self-dealing defined.
(3) Disqualified person defined.
(c) Disqualification of nuclear decommissioning fund.
(1) In general.
(2) Exception to disqualification.

(i) In general.
(ii) Excess contribution defined.
(iii) Taxation of income attributable to an excess contribution.
(3) Effect of disqualification.
(d) Termination of nuclear decommissioning fund upon substantial completion of decommissioning.
(1) In general.
(2) Substantial completion of decommissioning defined.

§1.468A–6 Disposition of an interest in a nuclear power plant.

(a) In general.
(b) Requirements.
(c) Tax consequences.
(1) The transferor and its Fund.
(2) The transferee and its Fund.
(3) Basis.
(d) Determination of proportionate amount.
(e) Calculation of schedule of ruling amounts for dispositions described in this section.
(1) Transferor.
(2) Transferee.
(3) Example.
(f) Calculation of the qualifying percentage after dispositions described in this section.
(1) In general.
(2) Special rule.
(g) Other.
(1) Anti-abuse provision.
(2) Relief provision.
(h) Effective date.

§1.468A–7 Manner of and time for making election.

(a) In general.
(b) Required information.

§1.468A–8 Effective date and transitional rules.

(a) Effective date.
(1) In general.
(2) Cut-off method applicable to electing taxpayers.
(b) Transitional rules.
(1) Time for filing request for schedule of ruling amounts.
(2) Manner of and time for making contributions to a nuclear decommissioning fund.
(3) Manner of and time for making election.
(4) Determination of cost of service limitation.
(5) Assumptions and determinations to be used in determining ruling amounts.
(6) Exception to level funding limitation.
(7) Determination of qualifying percentage.
(8) Limitation on payments to a nuclear decommissioning fund.
(9) Denial of interest on overpayment.
(10) Determination of addition to tax for failure to pay estimated tax.
(11) Nuclear decommissioning fund qualification requirements.

[T.D. 8184, 53 FR 6804, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62199, Dec. 30, 1992; T.D. 8580, 59 FR 66473, Dec. 27, 1994]

§1.468A–1 Nuclear decommissioning costs; general rules.

(a) *Introduction.* Section 468A provides an elective method for taking into account nuclear decommissioning costs for Federal income tax purposes. In general, an eligible taxpayer that elects the application of section 468A pursuant to the rules contained in §1.468A–7 is allowed a deduction (as determined under §1.468A–2) for the taxable year in which the taxpayer makes a cash payment to a nuclear decommissioning fund. Taxpayers using an accrual method of accounting that do not elect the application of section 468A are not allowed a deduction for nuclear decommissioning costs prior to the taxable year in which economic performance occurs with respect to such costs (see section 461(h)).

(b) *Definitions.* The following terms are defined for purposes of section 468A and the regulations thereunder:

(1) The term *eligible taxpayer* means any taxpayer that possesses a qualifying interest in a nuclear power plant (including a nuclear power plant that is under construction).

(2) The term *qualifying interest* means—

(i) A direct ownership interest; and

(ii) A leasehold interest in any portion of a nuclear power plant if—

(A) The holder of the leasehold interest is subject to the jurisdiction of a public utility commission with respect to such portion of the nuclear power plant;

(B) The holder of the leasehold interest is primarily liable under Federal or State law for decommissioning such portion of the nuclear power plant; and

(C) No other person establishes a nuclear decommissioning fund with respect to such portion of the nuclear power plant.

A direct ownership interest includes an interest held as a tenant in common or joint tenant, but does not include stock in a corporation that owns a nuclear power plant or an interest in a partnership that owns a nuclear power plant. Thus, in the case of a partnership that owns a nuclear power plant, the election under section 468A must be made by the partnership and not by the partners. In the case of an unincorporated organization described in § 1.761–2(a)(3) that elects under section 761(a) to be excluded from the application of subchapter K, each taxpayer that is a co-owner of the nuclear power plant is eligible to make a separate election under section 468A.

(3) The terms *nuclear decommissioning fund* and *qualified nuclear decommissioning fund* mean a fund that satisfies the requirements of § 1.468A–5. The term *nonqualified decommissioning fund* means a fund that does not satisfy those requirements.

(4) The term *nuclear power plant* means any nuclear power reactor that is used predominantly in the trade or business of the furnishing or sale of electric energy, if the rates for the furnishing or sale, as the case may be, either have been established or approved by a public utility commission or are under the jurisdiction of the Rural Electrification Administration. Each unit (i.e., nuclear reactor) located on a multi-unit site is a separate nuclear power plant. The term *nuclear power plant* also includes the portion of the common facilities of a multi-unit site allocable to a unit on that site.

(5) The term *nuclear decommissioning costs* or *decommissioning costs* means all otherwise deductible expenses to be incurred in connection with the entombment, decontamination, dismantlement, removal and disposal of the structures, systems and components of a nuclear power plant that has permanently ceased the production of electric energy. Such term includes all otherwise deductible expenses to be incurred in connection with the preparation for decommissioning, such as engineering and other planning expenses, and all otherwise deductible expenses to be incurred with respect to the plant after the actual decommissioning occurs, such as physical security and radiation monitoring expenses. Such term does not include otherwise deductible expenses to be incurred in connection with the disposal of spent nuclear fuel under the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425). An expense is otherwise deductible for purposes of this paragraph (b)(5) if it would be deductible under chapter 1 of the Internal Revenue Code without regard to section 280B.

(6) The term *public utility commission* means any State or political subdivision thereof, any agency, instrumentality or judicial body of the United States, or any judicial body, commission or other similar body of the District of Columbia or of any State or any political subdivision thereof that establishes or approves rates for the furnishing or sale of electric energy.

(7) The term *ratemaking proceeding* means any proceeding before a public utility commission in which rates for the furnishing or sale of electric energy are established or approved. Such term includes a generic proceeding that applies to two or more taxpayers that are subject to the jurisdiction of a single public utility commission.

(c) *Special rules applicable to certain experimental nuclear facilities.* (1) The owner of a qualifying interest in an experimental nuclear facility possesses a qualifying interest in a nuclear power plant for purposes of paragraph (b) of this section if—

(i) Such person is engaged in the trade or business of the furnishing or sale of electric energy;

(ii) The rates charged for electric energy furnished or sold by such person are established or approved by a public utility commission; and

(iii) The cost of decommissioning the facility is included in the cost of service of such person.

(2) An owner of stock in a corporation that owns an experimental nuclear facility possesses a qualifying interest in a nuclear power plant for purposes of paragraph (b)(1) of this section if—

(i) Such stockholder satisfies the conditions of paragraph (c)(1) (i) through (iii) of this section; and

(ii) The corporation that directly owns the facility is not engaged in the trade or business of the furnishing or sale of electric energy.

(3) For purposes of this paragraph (c), an experimental nuclear facility is a nuclear power reactor that is used predominantly for the purpose of conducting experimentation and research.

(d) *Special rules for electing taxpayers whose rates are under the jurisdiction of the Rural Electrification Administration.* Notwithstanding any other provision of the regulations under section 468A, a schedule of ruling amounts may be provided to a taxpayer with respect to a nuclear power plant if the rates for the furnishing or sale of the plant's electricity are under the jurisdiction of the Rural Electrification Administration. This schedule will be determined on the basis of all facts and circumstances in a manner consistent with section 468A. No taxpayer will be provided a schedule of ruling amounts under section 468A for any taxable year unless the portion of the rates attributable to the decommissioning costs of that taxpayer with respect to such taxable year are treated by the taxpayer as though they were subject to section 88.

[T.D. 8184, 53 FR 6805, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62199, Dec. 30, 1992; T.D. 8580, 59 FR 66473, Dec. 27, 1994]

§1.468A–2 Treatment of electing taxpayer.

(a) *In general.* An eligible taxpayer that elects the application of section 468A pursuant to the rules contained in §1.468A–7 (an ‘‘electing taxpayer’’) is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment as provided in paragraph (c) of this section) to a nuclear decommissioning fund. The amount of the deduction for any taxable year equals the total amount of cash payments made (or deemed made) by the electing taxpayer to a nuclear decommissioning fund (or nuclear decommissioning funds) during such taxable year. A payment may not be made (or deemed made) to a nuclear decommissioning fund before the first taxable year in which all of the following conditions are satisfied:

(1) The construction of the nuclear power plant to which the nuclear decommissioning fund relates has commenced.

(2) Nuclear decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates are included in the taxpayer's cost of service for ratemaking purposes (see paragraph (b) of this section).

(3) A ruling amount is applicable to the nuclear decommissioning fund (see §1.468A–3).

(b) *Limitation on payments to a nuclear decommissioning fund*—(1) *In general.* For purposes of paragraph (a) of this section, the maximum amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year shall not exceed the lesser of:

(i) The cost of service amount applicable to the nuclear decommissioning fund for such taxable year (as defined in paragraph (b)(2) of this section); or

(ii) The ruling amount applicable to the nuclear decommissioning fund for such taxable year (as determined under §1.468A–3).

If the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of this paragraph (b)(1), the excess is not deductible by the electing taxpayer. In addition, see paragraph (c) of §1.468A–5 for rules which provide that the Internal Revenue Service may disqualify a nuclear decommissioning fund if the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of this paragraph (b)(1).

(2) *Cost of service amount.* (i) For purposes of section 468A and the regulations thereunder, the ‘‘cost of service amount applicable to a nuclear decommissioning fund for a taxable year’’ is the amount of decommissioning costs included in the electing taxpayer's cost of service for ratemaking purposes for such taxable year. Decommissioning costs are included in cost of service for a taxable year only to the extent such costs are directly or indirectly charged to customers of the taxpayer by reason of electric energy consumed during such taxable year or are otherwise required to be included in the taxpayer's income under section 88 and the regulations thereunder.

(ii) Except as otherwise provided in paragraph (b)(4)(i) of §1.468A–8 (relating to a special transitional rule), decommissioning costs shall generally not be considered included in cost of service for purposes of this section unless—

(A) The order or opinion of the applicable public utility commission identifies the amount of decommissioning costs that is included in cost of service for ratemaking purposes; or

(B) The written records of the ratemaking proceeding clearly and unambiguously indicate the amount of decommissioning costs that is included in cost of service for ratemaking purposes.

(iii) Except as otherwise provided in paragraph (f)(2) of this section (relating to a special rule that applies to certain retroactive adjustments to interim rate orders), orders or opinions of a public utility commission that are issued after the close of any taxable year shall not be considered in determining the amount of decommissioning costs included in cost of service for such taxable year.

(iv) If a taxpayer possesses a qualifying interest in two or more nuclear power plants that are the subject of a single ratemaking proceeding, the amount of decommissioning costs included in cost of service pursuant to such ratemaking proceeding must be allocated among such nuclear power plants. Such allocation must be reasonable and consistent, and must take into account the assumptions and determinations, if any, used by the public utility commission in establishing or approving the amount of decommissioning costs included in cost of service.

(c) *Deemed payment rules.* (1) The amount of any cash payment made by an electing taxpayer to a nuclear decommissioning fund on or before the 15th day of the third calendar month after the close of any taxable year (the ‘‘deemed payment deadline date’’) shall be deemed made during such taxable year if the electing taxpayer irrevocably designates the amount as relating to such taxable year on its timely filed Federal income tax return for such taxable year (see paragraph (b)(4)(iv) of § 1.468A–7 for rules relating to such designation).

(2) The amount of any cash payment made by a customer of an electing taxpayer to a nuclear decommissioning fund of such electing taxpayer shall be deemed made by the electing taxpayer if the amount is included in the gross income of the electing taxpayer in the manner prescribed by section 88 and § 1.88–1.

(d) *Treatment of distributions*—(1) *In general.* Except as otherwise provided in paragraph (d)(2) of this section, the amount of any actual or deemed distribution from a nuclear decommissioning fund shall be included in the gross income of the electing taxpayer for the taxable year in which the distribution occurs. The amount of any distribution of property equals the fair market value of the property on the date of the distribution. A distribution from a nuclear decommissioning fund shall include an expenditure from the fund or the use of the fund's assets—

(i) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the fund relates; and

(ii) To pay administrative costs and other incidental expenses of the fund.

See paragraphs (c) and (d) of § 1.468A–5 for rules relating to the deemed distribution of the assets of a nuclear decommissioning fund in the case of a disqualification or termination of the fund.

(2) *Exceptions to inclusion in gross income*—(i) *Payment of administrative costs and incidental expenses.* The amount of any payment by a nuclear decommissioning fund for administrative costs or other incidental expenses of such fund (as defined in paragraph (a)(3)(ii) of § 1.468A–5) shall not be included in the gross income of the electing taxpayer unless such amount is paid to the electing taxpayer (in which case the amount of the payment is included in the gross income of the electing taxpayer under section 61).

(ii) *Withdrawals of excess contributions.* The amount of a withdrawal of an excess contribution (as defined in paragraph (c)(2)(ii) of § 1.468A–5) by an electing taxpayer pursuant to the rules of paragraph (c)(2) of § 1.468A–5 shall not be included in the gross income of the electing taxpayer. See paragraph (b)(1) of this section, which provides that the payment of such amount to the nuclear decommissioning fund is not deductible by the electing taxpayer.

(iii) *Actual distributions of amounts included in gross income as deemed distributions.* If the amount of a deemed distribution is included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurs, no further amount is required to be included in gross income when the amount of the deemed distribution is actually distributed by the nuclear decommissioning fund. The amount of a deemed distribution is actually distributed by a nuclear decommissioning fund as the first actual distributions are made by the nuclear decommissioning fund on or after the date of the deemed distribution.

(e) *Deduction when economic performance occurs.* An electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs no earlier than the taxable year in which economic performance occurs with respect to such costs (see section 461 (h)(2)). The amount of nuclear decommissioning costs that is deductible under this paragraph (e) is determined without regard to section 280B (see paragraph (b)(5) of §1.468A–1). A deduction is allowed under this paragraph (e) whether or not a deduction was allowed with respect to such costs under section 468A(a) and paragraph (a) of this section for an earlier taxable year (see paragraph (a)(2) of §1.468A–8, however, for the effective date applicable to this paragraph (e)).

(f) *Effect of interim rate orders and retroactive adjustments to such orders*—(1) *In general.* (i) The amount of decommissioning costs included in cost of service for any taxable year that ends before the date of a retroactive adjustment to an interim rate order or interim determination of a public utility commission shall include amounts authorized pursuant to such interim rate order or interim determination unless a taxpayer elects the application of paragraph (f)(2) of this section for such taxable year. For purposes of this paragraph (f), a retroactive adjustment occurs on the effective date of the revised rate schedule that implements the retroactive adjustment.

(ii) If a retroactive adjustment to an interim rate order or interim determination reduces the amount of decommissioning costs included in cost of service for one or more taxable years ending before the date of the adjustment, the amount of such reduction must be subtracted from the amount of decommissioning costs included in cost of service (as determined under paragraph (b)(2) of this section) for one or more taxable years ending on or after the date of the adjustment. For this purpose, the amount of such reduction must be taken into account in the following manner:

(A) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for one taxable year ending before the date of the adjustment, the total amount of the reduction must be taken into account for the taxable year that includes the date of the adjustment.

(B) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for two taxable years ending before the date of the adjustment, at least one-half of the total amount of the reduction must be taken into account for the first taxable year ending on or after the date of the adjustment and the total amount of the reduction must be taken into account over the first two taxable years ending on or after the date of the adjustment.

(C) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for three or more taxable years ending before the date of the adjustment, at least one-third of the total amount of the reduction must be taken into account for the first taxable year ending on or after the date of the adjustment, at least two-thirds of the total amount of the reduction must be taken into account over the first two taxable years ending on or after the date of the adjustment, and the total amount of the reduction must be taken into account over the first three taxable years ending on or after the date of the adjustment.

(2) *Special rule permitting withdrawal of excess contribution that results from retroactive adjustment to interim rate order.* (i) If a retroactive adjustment that reduces the amount of decommissioning costs included in cost of service for a taxable year occurs on or before

the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for such taxable year, a taxpayer may elect the application of this paragraph (f)(2) for such taxable year by—

(A) Including in the amount of decommissioning costs included in cost of service for such taxable year only the amount of decommissioning costs authorized for such taxable year under the retroactive adjustment; and

(B) Withdrawing any excess contribution that results from such treatment in accordance with the rules of paragraph (c)(2) of § 1.468A–5.

(ii) If a taxpayer elects the application of this paragraph (f)(2) for any taxable year, the retroactive adjustment shall not be treated for purposes of paragraph (f)(1)(ii) of this section as a reduction in the amount of decommissioning costs included in cost of service for such taxable year.

(3) *Revised schedule of ruling amounts.* (i) If the rules provided in this paragraph (f) result in a cost of service amount applicable to a nuclear decommissioning fund for any taxable year that is less than the cost of service amount applicable to the nuclear decommissioning fund for the immediately preceding taxable year, the taxpayer must request a revised schedule of ruling amounts on or before the deemed payment deadline date for the taxable year in which the retroactive adjustment occurs. The first taxable year to which the revised schedule of ruling amount applies shall be the taxable year in which the retroactive adjustment occurs.

(ii) The requirement of this paragraph (f)(3) does not apply if the taxpayer determines its schedule of ruling amounts under a formula or method obtained under § 1.468A–3(a)(4) and the cost of service amount is a variable element of that formula or method.

(4) *Example.* The following example illustrates the application of the principles of this paragraph (f):

Example. (i) X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by a nuclear power plant owned by X. During 1989, X is authorized pursuant to an interim rate order issued by the public utility commission of State A to collect nuclear decommissioning costs of $500,000 per year beginning on January 1, 1990. On May 1, 1992, the public utility commission of State A issues a final rate order that is effective on July 1, 1992. The final rate order authorizes X to collect decommissioning costs of $400,000 per year and requires X to refund to the ratepayers of State A excess decommissioning costs of $250,000 collected between January 1, 1990, and July 1, 1992.

(ii) If X elects the application of paragraph (f)(2) of this section for the 1991 taxable year, the amount of decommissioning costs included in cost of service for such taxable year is $400,000. If X made a contribution of $500,000 to a nuclear decommissioning fund for the 1991 taxable year, X must withdraw $100,000 from the nuclear decommissioning fund on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the 1991 taxable year (see paragraph (c)(2) of § 1.468A–5).

(iii) In addition, under paragraph (f)(1)(i) of this section, the amount of decommissioning costs included in cost of service for the 1990 taxable year is $500,000, and, under paragraph (f)(1)(ii) of this section, the amount of decommissioning costs included in cost of service for the 1992 taxable year is $300,000. Because the cost of service amount for the 1991 taxable year ($400,000) is less than the cost of service amount for the 1990 taxable year ($500,000), paragraph (f)(3) of this section applies and X must file a request for a revised schedule of ruling amounts for the period beginning with the 1992 taxable year on or before March 15, 1993.

(iv) Alternatively, if X does not elect the application of paragraph (f)(2) section, the amount of decommissioning costs included in cost of service for the 1990 and 1991 taxable years is $500,000, and, under paragraph (f)(1)(ii) of this section, the amount of decommissioning costs included in cost of service for the 1992 taxable year may not exceed $300,000. Because the cost of service amount for the 1992 taxable year is less than the cost of service amount for the 1991 taxable year, paragraph (f)(3) of this section applies and X must file a request for a revised schedule of ruling amounts for the period beginning with the 1992 taxable year on or before March 15, 1993.

[T.D. 8184, 53 FR 6806, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62199, Dec. 30, 1992; T.D. 8758, 63 FR 2894, Jan. 20, 1998]

§ 1.468A–3 Ruling amount.

(a) *In general.* (1) Except as otherwise provided in paragraph (j) of this section, an electing taxpayer is allowed a deduction under section 468A(a) for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund only if the taxpayer has received a schedule of ruling amounts for the nuclear decommissioning fund that includes a ruling amount for such taxable year. Except as provided in paragraph (a) (4) or (5) of this section, a schedule of ruling amounts for a nuclear decommissioning fund (''schedule of ruling amounts'') is a ruling (within the meaning of paragraph (a)(2) of §601.201) specifying the annual payments (''ruling amounts'') that, over the taxable years remaining in the ''funding period'' as of the date the schedule first applies, will result in a projected balance of the nuclear decommissioning fund as of the last day of the funding period equal to (and in no event greater than) the ''amount of decommissioning costs allocable to the fund.'' The projected balance of a nuclear decommissioning fund as of the last day of the funding period shall be calculated by taking into account the fair market value of the assets of the fund as of the first day of the first taxable year to which the schedule of ruling amounts applies and the estimated rate of return to be earned by the assets of the fund after payment of the estimated administrative costs and incidental expenses to be incurred by the fund (as defined in paragraph (a)(3)(ii) of §1.468A–5), including all Federal, State and local income taxes to be incurred by the fund (the ''after-tax rate of return''). See paragraph (c) of this section for a definition of funding period and paragraph (d) of this section for guidance with respect to the amount of decommissioning costs allocable to a fund.

(2) To the extent consistent with the principles and provisions of this section, each schedule of ruling amounts shall be based on the reasonable assumptions and determinations used by the applicable public utility commission(s) in establishing or approving the amount of decommissioning costs to be included in cost of service for ratemaking purposes, taking into account amounts that are otherwise required to be included in the taxpayer's income under section 88 and the regulations thereunder. Thus, for example, each schedule of ruling amounts shall be based on the public utility commission's reasonable assumptions concerning—

(i) The after-tax rate of return to be earned by the amounts collected for decommissioning;

(ii) The total estimated cost of decommissioning the nuclear power plant (see paragraph (d)(2) of this section); and

(iii) The frequency of contributions to a nuclear decommissioning fund for a taxable year (*e.g.,* monthly, quarterly, semi-annual or annual contributions).

(3) The Internal Revenue Service shall provide a schedule of ruling amounts that is identical to the schedule of ruling amounts proposed by the taxpayer in connection with the taxpayer's request for a schedule of ruling amounts (see paragraph (h)(2)(viii) of this section), but no schedule of ruling amounts shall be provided unless the taxpayer's proposed schedule of ruling amounts is consistent with the principles and provisions of this section. If a proposed schedule of ruling amounts is not consistent with the principles and provisions of this section, the taxpayer may propose an amended schedule of ruling amounts that is consistent with such principles and provisions.

(4) The Internal Revenue Service will approve, at the request of the taxpayer, a formula or method for determining a schedule of ruling amounts (rather than a schedule specifying a dollar amount for each taxable year) that is consistent with the principles and provisions of this section. See paragraph (i)(1)(ii) of this section for a special rule relating to the mandatory review of ruling amounts that are determined pursuant to a formula or method.

(5) The Internal Revenue Service may, in its discretion, provide a schedule of ruling amounts that is determined on a basis other than the rules of paragraphs (a) through (g) of this section if—

(i) In connection with its request for a schedule of ruling amounts, the taxpayer explains the need for special treatment and sets forth an alternative basis for determining the schedule of ruling amounts; and

(ii) The Internal Revenue Service determines that special treatment is consistent with the purpose of section 468A.

(b) *Level funding limitation.* (1) Except as otherwise provided in paragraph (b)(4) of this section and paragraph (b)(6) of § 1.468A–8 (relating to a special transitional rule), the ruling amount specified in a schedule of ruling amounts for any taxable year in the level funding limitation period shall not be less than the ruling amount specified in such schedule for any earlier taxable year.

(2) For purposes of this section, the level funding limitation period for a nuclear decommissioning fund is the period that—

(i) Begins on the first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund (see paragraph (a) of § 1.468A–2 for rules relating to the first taxable year for which a payment may be made (or deemed made) to a nuclear decommissioning fund); and

(ii) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraphs (e) (2) and (4) of this section).

(3) The ruling amount specified in a schedule of ruling amounts for a taxable year after the end of the level funding limitation period may be less than the ruling amount specified in such schedule for an earlier taxable year.

(4) The ruling amount specified in a schedule of ruling amounts for the last taxable year in the level funding limitation period may be less than the ruling amount specified in such schedule for any earlier taxable year if the applicable public utility commission assumes for cost of service purposes that decommissioning costs will be included in cost of service for only a portion of the last taxable year in the level funding limitation period. The ruling amount for the last taxable year in the level funding limitation period, however, may not be less than the amount that bears the same relationship to the ruling amount for the preceding taxable year as the period for which decommissioning costs will be included in cost of service for such last taxable year bears to one year.

(c) *Funding period*—(1) *General rule.* For purposes of this section, the funding period for a nuclear decommissioning fund is the period that—

(i) Begins on the first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund (see paragraph (a)(1) § 1.468A–2 for rules relating to the first taxable year for which a payment may be made (or deemed made) to a nuclear decommissioning fund); and

(ii) Ends on the later of—

(A) The last day of the taxable year that includes the estimated date on which decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's cost of service for ratemaking purposes (see paragraph (e)(1) of this section); or

(B) The last day of the taxable year that includes the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e)(2) of this section).

(2) *Examples.* The following examples illustrate the application of the principles of paragraphs (a), (b) and (c) of this section:

Example (1). (i) X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by power plants owned by X. On March 15, 1995, X commences the construction of a nuclear power plant in State A. On May 15, 1995, the public utility commission of State A issues a final rate order for the four-year period beginning on January 1, 1995, that authorizes X to collect decommissioning costs from ratepayers residing in State A. For the 1995 taxable year, X is authorized to collect decommissioning costs of $500,000, and, for each taxable year during the remainder of the period to which the rate order applies, X is authorized to collect decommissioning costs in an amount equal to 105 percent of the amount authorized to be collected for the preceding taxable year.

(ii) In determining the amount of decommissioning costs to be collected from ratepayers residing in State A, the public utility commission assumes that (A) decommissioning costs will be included in cost of service for each taxable year in the period that begins with 1995 and ends with 2025 and (B) decommissioning costs collected pursuant to subsequent rate orders will increase in the same manner as amounts collected pursuant to the rate order issued on May 15, 1995. In addition, in determining the rate of return to be earned by X with respect to the nuclear power plant, the public utility commission assumes that the nuclear power plant will be included in rate base for each year in the period that begins with 2000 and ends with 2025.

(iii) X requests a schedule of ruling amounts in accordance with the rules of paragraph (h) of this section for the period beginning with the 1995 taxable year. In determining the level funding limitation period and the funding period, the Internal Revenue Service shall assume that a deductible payment will be made to a nuclear decommissioning fund for the 1995 taxable year. Thus, under paragraph (b) of this section, the level funding limitation period begins on January 1, 1995, and ends on December 31, 2025. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1995, and ends on December 31, 2025.

(iv) In its request for a schedule or ruling amounts, X proposes a ruling amount for each taxable year in the funding period that corresponds to the projected cost of service amount for such taxable year. If (A) the assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service are reasonable and (B) the amounts collected pursuant to the proposed schedule, combined with the after-tax earnings on such amounts, will result in a projected balance of the nuclear decommissioning fund as of December 31, 2025, equal to the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the initial schedule of ruling amounts shall equal the ruling amount proposed by X in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for the 1995 taxable year would be $500,000, and the ruling amount for each subsequent taxable year would be 105 percent of the ruling amount for the preceding taxable year.

Example (2). (i) Assume the same facts as in Example (1), except that on May 15, 1995, the public utility commission of State A issues a final rate order for the four-year period beginning on January 1, 1995, that authorizes X to collect decommissioning costs of $600,000 per year from ratepayers residing in State A. In determining the amount of decommissioning costs to be collected from ratepayers residing in State A, the public utility commission assumes that decommissioning costs of $600,000 will be collected for each taxable year in the period that begins with 1995 and ends with 2004 and that decommissioning costs of $200,000 will be collected for each taxable year in the period that begins with 2005 and ends with 2025.

(ii) X requests a schedule of ruling amounts in accordance with the rules of paragraph (h) of this section for the period beginning with the 1995 taxable year. In determining the level funding limitation period and the funding period, the Internal Revenue Service shall assume that a deductible payment will be made to a nuclear decommissioning fund for the 1995 taxable year. Thus, under paragraph (b) of this section, the level funding limitation period begins on January 1, 1995, and ends on December 31, 2025. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1995, and ends on December 31, 2025.

(iii) In its request for a schedule of ruling amounts, X proposes a ruling amount for each taxable year in the funding period that corresponds to the projected cost of service amount for such taxable year. A schedule of ruling amounts based on the projected cost of service amount would be inconsistent with the level funding limitation of paragraph (b) of this section because the projected cost of service amount for 2005 is less than the projected cost of service amount for 2004. Consequently, under paragraph (a)(3) of this section, no schedule of ruling amounts shall be provided to X unless X proposes an amended schedule of ruling amounts that is consistent with the level funding limitation and the other principles and provisions of this section.

(iv) Assume that X proposes an amended schedule of ruling amounts that provides for ruling amounts of $400,000 for each taxable year in the funding period. If (A) the schedule of ruling amounts proposed by X is based on the reasonable assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service and (B) the amounts collected pursuant to the proposed schedule, combined with the after-tax earnings on such amounts, will result in a projected balance of the nuclear decommissioning fund as of December 31, 2025, equal to the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the initial schedule of ruling amounts shall equal the ruling amount proposed by X in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for the 1995 taxable year and for each subsequent taxable year through 2025 would be $400,000.

(v) Under section 468A(b) and paragraph (b)(1) of §1.468A–2, the maximum amount of cash payments that X can make to a nuclear decommissioning fund for any taxable year shall not exceed the lesser of (A) the cost of service amount for such taxable year or (B) the ruling amount for such taxable year. If the projected cost of service amount that was assumed in determining rates under the rate order that was issued on May 15, 1995, is the actual cost of service amount for each taxable year in the funding period and the ruling amounts provided in the initial schedule of ruling amounts are not changed by a subsequent schedule of ruling amounts, then X would be allowed to make a deductible contribution of $400,000 to a nuclear decommissioning fund for each taxable year in the period that begins with 1995 and ends with 2004 and to make a deductible contribution of $200,000 to such nuclear decommissioning fund for each taxable year in the period that begins with 2005 and ends with 2025.

Example (3). (i) Y corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by power plants owned by Y. On June 1, 1990, a nuclear power plant owned by Y began commercial operations in State B. In the first ratemaking proceeding in which the nuclear power plant was included in rate base, the public utility commission of State B assumed that the nuclear power plant would be included in rate base for each year in the period that began with 1990 and ended with 2020. In addition, for each taxable year in the period that began with 1990 and ended with 2017, Y made a deductible contribution of $750,000 to a nuclear decommissioning fund established by Y. The $750,000 contribution equalled the cost of service amount and the ruling amount for each taxable year in the 28-year period.

(ii) On August 30, 2017, the public utility commission of State B issues a final rate order for the six-year period beginning on January 1, 2018, that authorizes Y to collect decommissioning costs of: (A) $500,000 for 2018, 2019 and 2020; (B) $1,500,000 for 2021; (C) $1,000,000 for 2022; and (D) $750,000 for 2023. In determining the amount of decommissioning costs to be collected from ratepayers residing in State B, the public utility commission assumes that decommissioning costs will no longer be included in cost of service after 2023. In addition, in determining the rate of return to be earned by Y with respect to the nuclear power plant, the public utility commission assumes that the nuclear power plant will no longer be included in rate base after 2020.

(iii) Under paragraph (i)(1)(iii) of this section, Y is required to request a revised schedule of ruling amounts on or before March 15, 2019. Assume that Y makes a timely request for a revised schedule of ruling amounts in accordance with the rules of paragraph (h) of this section. In its request, Y proposes a ruling amount for each taxable year in the period that begins with 2018 and ends with 2023 that corresponds to the amount of decommissioning costs to be included in cost of service under the rate order of August 30, 2017.

(iv) Under paragraph (b) of this section, the level funding limitation period begins on January 1, 1990, and ends on December 31, 2020. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1990, and ends on December 31, 2023.

(v) If (A) the assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service are reasonable and (B) the projected balance of the nuclear decommissioning fund as of December 31, 2023 (taking into account the fair market value of the assets of the fund as of January 1, 2018, and the estimated after-tax rate of return to be earned by the assets of the fund) will equal the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the revised schedule of ruling amounts shall equal the ruling amount proposed by Y in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for 2018, 2019 and 2020 would be $500,000, the ruling amount for 2021 would be $1,500,000, the ruling amount for 2022 would be $1,000,000 and the ruling amount for 2023 would be $750,000.

(vi) Although the ruling amount specified in the revised schedule of ruling amounts for 2018, 2019 and 2020 is less than a ruling amount specified in a prior schedule of ruling amounts for years prior to 2018, the revised schedule of ruling amounts is consistent with the level funding limitation. Under paragraph (i)(3) of this section, a ruling amount specified in a revised schedule of ruling amounts for any taxable year in level funding limitation period may be less than one or more ruling amounts specified in a prior schedule of ruling amounts for a prior taxable year. In addition, although the ruling amount specified in the revised schedule of ruling amounts for 2022 and 2023 is less than a ruling amount specified in such schedule for a prior taxable year, the revised schedule of ruling amounts is consistent with the level funding limitation because the level funding limitation period ends on December 31, 2020.

(d) *Decommissioning costs allocable to a fund.* The amount of decommissioning costs allocable to a nuclear decommissioning fund is determined for purposes of this section by applying the following rules and definitions:

(1) *General rule.* The amount of decommissioning costs allocable to a nuclear decommissioning fund is the taxpayer's share of the total estimated cost of decommissioning the nuclear

power plant to which the fund relates, multiplied by the qualifying percentage.

(2) *Total estimated cost of decommissioning.* (i) Except as otherwise provided in paragraph (d)(2)(ii) of this section, the total estimated cost of decommissioning a nuclear power plant is the reasonably estimated cost of decommissioning used by the applicable public utility commission in establishing or approving the amount of decommissioning costs to be included in cost of service for ratemaking purposes. If, in establishing or approving the amount of decommissioning costs to be included in cost of service, the public utility commission uses an estimated cost of decommissioning that is equal to a generic estimate of the cost of decommissioning as determined by the Nuclear Regulatory Commission (or an estimated cost that is based on the generic estimate adjusted for inflation), the Internal Revenue Service may, at its discretion, accept such amount as a reasonable estimate of the cost of decommissioning. In addition, if the estimated costs used by the applicable public utility commission are expected to be paid in any taxable year other than the taxable year that includes the last day of the funding period or the immediately succeeding taxable year, such costs must be adjusted (increased or decreased, as the case may be) by discounting or compounding such costs at the after-tax rate of return from the date such costs are expected to be paid to the last day of the funding period.

(ii) If, in establishing or approving the amount of decommissioning costs to be included in cost of service, the applicable public utility commission assumes a projected balance of amounts set aside for decommissioning (whether or not such amounts are provided by a nuclear decommissioning fund) that is less than the total estimated cost of decommissioning assumed by the public utility commission, the total estimated cost of decommissioning for purposes of determining the schedule of ruling amounts shall equal the projected balance of amounts set aside for decommissioning that was assumed by the public utility commission.

(3) *Taxpayer's share.* The taxpayer's share of the total estimated cost of decommissioning a nuclear power plant equals the total estimated cost of decommissioning such nuclear power plant multiplied by the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents (see paragraph (b)(2) of §1.468A–1 for circumstances in which a taxpayer possesses a qualifying interest in a nuclear power plant).

(4) *Qualifying percentage.* (i) Except as otherwise provided in paragraph (b)(7)(iii) of §1.468A–8 (relating to a special transitional rule), the qualifying percentage for any nuclear decommissioning fund is equal to the fraction, the numerator of which is the number of taxable years in the estimated period for which the nuclear decommissioning fund is to be in effect and the denominator of which is the number of taxable years in the estimated useful life of the applicable nuclear power plant.

(ii) Except as otherwise provided in paragraph (b)(7) (i) of (ii) of §1.468A–8 (relating to special transitional rules), the estimated period for which a nuclear decommissioning fund is to be in effect—

(A) Begins on the later of—

(*1*) The first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund; or

(*2*) The first day of the taxable year that includes the date the nuclear power plant to which such nuclear decommissioning fund relates begins commercial operations; and

(B) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant to which such nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e) (3) and (4) of this section).

(iii) Except as otherwise provided in paragraph (b)(7)(ii) of §1.468A–8 (relating to a special transitional rule), the estimated useful life of a nuclear power plant.

(A) Begins on the first day of the taxable year that includes the date that the nuclear power plant begins commercial operations; and

(B) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e) (3) and (4) of this section).

(e) *Determination of estimated dates.* (1) For purposes of paragraph (c)(1)(ii)(A) of this section (relating to the funding period), the estimated date on which decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's cost of service for ratemaking purposes is determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts.

(2) For purposes of paragraphs (b)(2)(ii) and (c)(1)(ii)(B) of this section (relating to the level funding limitation period and the funding period), the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes is determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts.

(3) For purposes of paragraph (d)(4)(ii)(B) and (iii)(B) of this section (relating to the qualifying percentage), the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes is determined under the ratemaking assumptions used by the applicable public utility commission in establishing or approving rates during the first ratemaking proceeding in which the nuclear power plant was included in the taxpayer's rate base.

(4) For purposes of this section, in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of § 1.468A–1, the date corresponding to ‘‘the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base’’ will be determined upon the basis of all the facts and circumstances in a manner consistent with the provisions of this section and section 468A of the Code.

(5) A formula or method obtained under paragraph (a)(4) of this section may provide for changes in an estimated date described in paragraph (e)(1) or (2) of this section to reflect changes in the ratemaking assumptions used to determine rates (whether interim or final) that are established or approved by the applicable public utility commission after the filing of the request for approval of a formula or method.

(f) *Special rules in the case of rates established or approved by two or more public utility commissions.* If two or more public utility commissions establish or approve rates for electric energy generated by a single nuclear power plant, the following rules shall apply in determining the schedule of ruling amounts for the nuclear decommissioning fund that relates to such nuclear power plant.

(1) A schedule of ruling amounts shall be separately determined pursuant to the rules of paragraphs (a) through (e) of this section for each public utility commission that has determined the amount of decommissioning costs to be included in cost of service for ratemaking purposes with respect to such nuclear power plant (see paragraph (g) of this section).

(2) The separate determination with respect to a public utility commission shall be based on the reasonable assumptions and determinations used by such public utility commission and shall take into account only that portion of the total estimated cost of decommissioning the nuclear power plant that is properly allocable to the ratepayers whose rates are established or approved by such public utility commission.

(3) The ruling amount applicable to the nuclear decommissioning fund for

any taxable year is the sum of the ruling amounts for such taxable year determined under the separate schedules of ruling amounts.

(4) The schedule of ruling amounts for the nuclear decommissioning fund is the schedule of the ruling amounts determined under paragraph (f)(3) of this section.

(g) *Requirement of determination by public utility commission of decommissioning costs to be included in cost of service.* The Internal Revenue Service shall not provide a taxpayer with a schedule of ruling amounts for any nuclear decommissioning fund unless a public utility commission that establishes or approves rates for electric energy generated by the nuclear power plant to which the nuclear decommissioning fund relates has—

(1) Determined the amount of decommissioning costs of such nuclear power plant to be included in the taxpayer's cost of service for ratemaking purposes; and

(2) Disclosed the after-tax return and any other assumption and determinations used in establshing or approving such amount for any taxable year beginning on or after January 1, 1987.

(h) *Manner of requesting schedule of ruling amounts*—(1) *In general.* (i) In order to receive a ruling amount for any taxable year, a taxpayer must file a request for a schedule of ruling amounts that complies with the requirements of this paragraph (h), the applicable procedural rules set forth in paragraph (e) of §601.201 (Statement of Procedural Rules) and the requirements of any applicable revenue procedure that is in effect on the date the request is filed.

(ii) A separate request for a schedule of ruling amounts is required for each nuclear decommissioning fund established by a taxpayer (see paragraph (a) of §1.468A–5 for rules relating to the number of nuclear decommissioning funds that a taxpayer can establish).

(iii) Except as provided by §1.468A–5 (a)(1)(iv) (relating to certain unincorporated organizations that may be taxable as corporations), a request for a schedule of ruling amounts must not contain a request for a ruling on any other issue, whether the issue involves section 468A or another section of the Internal Revenue Code.

(iv) In the case of an affiliated group of corporations that join in the filing of a consolidated return, the common parent of the group may request a schedule of ruling amounts for each member of the group that possesses a qualifying interest in the same nuclear power plant by filing a single submission with the Internal Revenue Service.

(v) Except as otherwise provided in paragraph (b)(1) of §1.468A–8, the Internal Revenue Service shall not provide or revise a ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date (as defined in paragraph (c)(1) of §1.468A–2) for such taxable year. In determining the date when a request is filed, the principles of sections 7502 and 7503 shall apply.

(vi) Except as provided in paragraph (h)(1)(vii) of this section, a request for a schedule of ruling amounts shall be considered filed only if such request complies substantially with the requirements of this paragraph (h).

(vii)(A) If a request does not comply substantially with the requirements of this paragraph (h), the Internal Revenue Service will notify the taxpayer of that fact. If the information or materials necessary to comply substantially with the requirements of this paragraph (h) are provided to the Internal Revenue Service within 30 days after this notification, the request will be considered filed on the date of the original submission. If the information or materials necessary to comply substantially with the requirements of this paragraph (h) are not provided within 30 days after this notification, the request will be considered filed on the date that all information or materials necessary to comply with the requirements of this paragraph (h) are provided.

(B) The Internal Revenue Service may waive the requirements of paragraph (h)(1)(vii)(A) of this section if the Service determines that the electing taxpayer is making a good faith effort to comply with the deadline and if the waiver is consistent with the purposes of section 468A.

(2) *Information required.* A request for a schedule of ruling amounts must contain the following information:

(i) The taxpayer's name, address and taxpayer identification number.

(ii) Whether the request is for an initial schedule of ruling amounts, a mandatory review of the schedule of ruling amounts (see paragraph (i)(1) of this section) or an elective review of the schedule of ruling amounts (see paragraph (i)(2) of this section).

(iii) The name and location of the nuclear power plant with respect to which a schedule of ruling amounts is requested.

(iv) A description of the taxpayer's qualifying interest in the nuclear power plant and the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents.

(v) An identification of each public utility commission that establishes or approves rates for the furnishing or sale by the taxpayer of electric energy generated by the nuclear power plant, and, for each public utility commission identified—

(A) Whether the public utility commission has determined the amount of decommissioning costs to be included in the taxpayer's cost of service for ratemaking purposes; and

(B) Whether a proceeding is pending before the public utility commission that may result in an increase or decrease in the amount of decommissioning costs to be included in cost of service.

(vi) For each public utility commission that has determined the amount of decommissioning costs to be included in the taxpayer's cost of service for ratemaking purposes—

(A) The amount of decommissioning costs that are to be included in the taxpayer's cost of service for each taxable year under the current determination and amounts that otherwise are required to be included in the taxpayer's income under section 88 and the regulations thereunder;

(B) A description of the assumptions, estimates and other factors that were used in determining the amounts described in paragraph (h)(2)(vi)(A) of this section, including each of the following if applicable—

(*1*) A description of the proposed method of decommissioning the nuclear power plant (for example, prompt removal/dismantlement, safe storage entombment with delayed dismantlement, or safe storage mothballing with delayed dismantlement);

(*2*) The estimated year in which substantial decommissioning costs will first be incurred;

(*3*) The estimated year in which the decommissioning of the nuclear power plant will be substantially complete (see paragraph (d)(2) of § 1.468A–5 for a definition of substantial completion of decommissioning);

(*4*) The total estimated cost of decommissioning expressed in current dollars (*i.e.,* based on price levels in effect at the time of the current determination);

(*5*) The total estimated cost of decommissioning expressed in future dollars (*i.e.,* based on anticipated price levels when expenses are expected to be paid);

(*6*) For each taxable year in the period that begins with the year specified in paragraph (h)(2)(vi)(B)(*2*) of this section (‘‘the estimated year in which substantial decommissioning costs will first be incurred’’) and ends with the year specified in paragraph (h)(2)(vi)(B)(*3*) of this section (‘‘the estimated year in which the estimated year in which the decommissioning of the nuclear power plant will be substantially complete’’), the estimated cost of decommissioning expressed in future dollars;

(*7*) A description of the methodology used in converting the estimated cost of decommissioning expressed in current dollars to the estimated cost of decommissioning expressed in future dollars;

(*8*) The assumed after-tax rate of return to be earned by the amounts collected for decommissioning (if two or more after-tax rates of return are assumed by the public utility commission, each assumed after-tax rate of return and the amounts collected for decommissioning to which each assumed after-tax rate of return applies);

(*9*) The proposed period over which decommissioning costs will be included in the cost of service of the taxpayer and the projected amount that will be included in cost of service for each taxable year in the proposed period;

(*10*) The estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes as determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts (or a corresponding date in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of §1.468A–1; see paragraph (e)(4) of this section); and

(*11*) The estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes as determined under the ratemaking assumptions that were used by the applicable public utility commission in establishing or approving rates during the first ratemaking proceeding in which the nuclear power plant was included in the taxpayer's rate base (or a corresponding date in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of §1.468A–1; see paragraph (e)(4) of this section);

(C) A copy of such portions of any order or opinion of the public utility commission as pertain to the commission's most recent determination of the amount of decommissioning costs to be included in cost of service; and

(D) A copy of each engineering or cost study that was relied on or used by the taxpayer or the public utility commission in determining the amount of decommissioning costs to be included in the taxpayer's cost of service under the current determination.

(vii) For each proceeding pending before a public utility commission that may result in an increase or decrease in the amount of decommissioning costs to be included in the taxpayer's cost of service—

(A) A description of the stage of the proceeding;

(B) The amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service for each taxable year;

(C) A description of the assumptions, estimates and other factors that were used in determining the amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service for each taxable year, including each of the items described in paragraph (h)(2)(vi)(B) of this section if applicable; and

(D) A copy of each engineering or cost study that was relied on or used by the taxpayer or the public utility commission in determining the amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service.

(viii) A proposed schedule of ruling amounts for each taxable year remaining in the funding period as of the date the schedule of ruling amounts will first apply.

(ix) A description of the assumptions, estimates and other factors that were used in determining the proposed schedule of ruling amounts, including each of the following if applicable—

(A) The level funding limitation period (as such term is defined in paragraph (b)(2) of this section);

(B) The funding period (as such term is defined in paragraph (c) of this section);

(C) The assumed after-tax rate of return to be earned by the assets of the nuclear decommissioning fund;

(D) The fair market value of the assets (if any) of the nuclear decommissioning fund as of the first day of the first taxable year to which the schedule of ruling amounts will apply;

(E) The amount expected to be earned by the assets of the nuclear decommissioning fund (based on the after-tax rate of return applicable to the fund) over the period that begins on the first day of the first taxable year to which the schedule of ruling amounts will apply and ends on the last day of the funding period;

(F) The amount of decommissioning costs allocable to the nuclear decommissioning fund (as determined under paragraph (d) of this section);

(G) The total estimated cost of decommissioning (as such term is defined in paragraph (d)(2) of this section);

(H) The taxpayer's share of the total estimated cost of decommissioning (as such term is defined in paragraph (d)(3) of this section);

(I) The qualifying percentage (as such term is defined in paragraph (d)(4)(i) of this section);

(J) The estimated period for which the nuclear decommissioning fund is to be in effect (as such term is defined in paragraph (d)(4)(ii) of this section); and

(K) The estimated useful life of the nuclear power plant (as such term is defined in paragraph (d)(4)(iii) of this section).

(x) If the request is for a revised schedule of ruling amounts, the after-tax rate of return earned by the assets of the nuclear decommissioning fund for each taxable year in the period that begins with the date of the inital contribution to the fund and ends with the first day of the first taxable year to which the revised schedule of ruling amounts applies.

(xi) If applicable, an explanation of the need for a schedule of ruling amounts determined on a basis other than the rules of paragraphs (a) through (g) of this section and a description of an alternative basis for determining a schedule of ruling amounts (see paragraph (a)(5) of this section).

(xii) A chart or table, based upon the assumed after-tax rate of return to be earned by the assets of the nuclear decommissioning fund, setting forth the years the fund will be in existence, the annual contribution to the fund, the estimated annual earnings of the fund and the cumulative total balance in the fund.

(xiii) If the request is for a revised schedule of ruling amounts, a copy of the most recently issued schedule of ruling amounts for the nuclear power plant to which the request relates that has been issued to the taxpayer (or a predecessor in interest) making the request.

(xiv) If the request for a schedule of ruling amounts contains a request, pursuant to § 1.468A–5 (a)(1)(iv), that the Service rule whether an unincorporated organization through which the assets of the fund are invested is an association taxable as a corporation for federal tax purposes, a copy of the legal documents establishing or otherwise governing the organization.

(xv) Any other information required by the Internal Revenue Service that may be necessary or useful in determining the schedule of ruling amounts.

(3) *Administrative procedures.* The Internal Revenue Service may prescribe administrative procedures that supplement the provisions of paragraph (h) (1) and (2) of this section. In addition, the Internal Revenue Service may, in its discretion, waive the requirements of paragraph (h) (1) and (2) of this section under appropriate circumstances.

(i) *Review and revision of schedule of ruling amounts*—(1) *Mandatory review.* (i) Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (h) of this section must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the 10th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received. The first taxable year to which the revised schedule of ruling amounts applies shall be the 10th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received.

(ii)(A) Any taxpayer that has obtained a formula or method for determining a schedule of ruling amounts for any taxable year under paragraph (a)(4) of this section must file a request for a revised schedule on or before the earlier of the deemed payment deadline for the fifth taxable year that begins after its taxable year in which the most recent formula or method was approved or the deemed payment deadline for the first taxable year that begins after a taxable year in which there is a substantial variation in the ruling amount determined under the most recent formula or method. There is a substantial variation in the ruling amount determined under the formula or method in effect for a taxable year if the ruling amount for the year and the ruling amount for any earlier year since the most recent formula or method was approved differ by more than 50 percent of the smaller amount.

(B) Any taxpayer that has determined its ruling amount for any taxable year under a formula prescribed by § 1.468A–6 (which prescribes ruling amounts for the taxable year in which there is a disposition of a qualifying interest in a nuclear power plant) must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline for its first taxable year that begins after the disposition.

(iii) A taxpayer is required to request a revised schedule of ruling amounts for a nuclear decommissioning fund if—

(A) Any public utility commission that establishes or approves rates for the furnishing or sale of electric energy generated by a nuclear power plant to which the nuclear decommissioning fund relates—

(*1*) Increases the proposed period over which decommissioning costs of such nuclear power plant will be included in cost of service for ratemaking purposes;

(*2*) Adjusts the estimated date on which such nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes; or

(*3*) Reduces the amount of decommissioning costs to be included in cost of service for any taxable year;

(B) The taxpayer's most recent request for a schedule of ruling amounts did not provide notice to the Internal Revenue Service of such action by the public utility commission; and

(C) In the case of a taxpayer that determines its schedule of ruling amounts under a formula or method obtained under paragraph (a)(4) of this section, the item increased, adjusted, or reduced is a fixed (rather than a variable) element of that formula or method.

(iv) If a taxpayer is required to request a revised schedule of ruling amounts by reason of an action described in paragraph (i)(1)(iii) of this section, the taxpayer must file the request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the first taxable year in which rates that reflect such action become effective. The first taxable year to which the revised schedule of ruling amounts applies shall be the first taxable year in which such rates become effective.

(v) A request for a schedule of ruling amounts required by this paragraph (i)(1) must be made in accordance with the rules of paragraph (h) of this section. If a taxpayer does not properly file a request for a revised schedule of ruling amounts by the date provided in paragraph (i)(1) (i), (ii) or (iv) of this section (whichever is applicable), the taxpayer's ruling amount for the first taxable year to which the revised schedule of ruling amounts would have applied and for all succeeding taxable years until a new schedule is obtained shall be zero, unless, in its discretion, the Internal Revenue Service provides otherwise in such new schedule of ruling amounts.

(vi) See paragraph (f)(3) of §1.468A–2 for the application of the rules in paragraph (i)(1) (iii), (iv), and (v) of this section in the case of certain retroactive adjustments to interim rate orders.

(2) *Elective review.* Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (h) of this section can request a revised schedule of ruling amounts. Such a request must be made in accordance with the rules of paragraph (h) of this section; thus, the Internal Revenue Service shall not provide a revised ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date for such taxable year (see paragraph (h)(1)(vi) of this section).

(3) *Determination of revised schedule of ruling amounts.* A revised schedule of ruling amounts for a nuclear decommissioning fund shall be determined under this section without regard to any schedule of ruling amounts for such nuclear decommissioning fund that was issued prior to such revised schedule. Thus, a ruling amount specified in a revised schedule of ruling amounts for any taxable year in the level funding limitation period can be less than one or more ruling amounts specified in a prior schedule of ruling amounts for a prior taxable year.

(j) *Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.* (1) If an electing taxpayer has filed a timely request for an initial or revised ruling amount for a taxable year beginning on or after January 1, 1987, and does not receive the ruling amount on or before the deemed payment deadline date for such taxable year, the taxpayer may make a payment to a nuclear decommissioning fund on the basis of the ruling amount proposed in the taxpayer's request. Thus, under the preceding sentence, an electing taxpayer may make a payment to a nuclear decommissioning fund for such taxable year that does not exceed the lesser of—

(i) The cost of service amount applicable to the nuclear decommissioning fund for such taxable year; or

(ii) The ruling amount proposed by the taxpayer for such taxable year in a timely filed request for a schedule of ruling amounts.

(2) If an electing taxpayer makes a payment to a nuclear decommissioning fund for any taxable year pursuant to paragraph (j)(1) of this section and the ruling amount that is provided by the Internal Revenue Service is greater than the ruling amount proposed by the taxpayer for such taxable year, the taxpayer is not allowed to make an additional payment to the fund for such taxable year after the deemed payment deadline date for such taxable year.

(3) If—(i) An electing taxpayer makes a payment to a nuclear decommissioning fund for any taxable year pursuant to paragraph (j)(1) of this section,

(ii) The ruling amount that is provided by the Internal Revenue Service is less than the ruling amount proposed by the taxpayer for such taxable year, and

(iii) As a result, there is an excess contribution (as defined in paragraph (c)(2)(ii) of §1.468A–5) for such taxable year,

Then the amount of the excess contribution is not deductible (see paragraph (b)(1) of §1.468A–2) and must be withdrawn by the taxpayer pursuant to the rules of paragraph (c)(2)(i) of §1.468A–5. Thus, an electing taxpayer that files a return based on a payment made pursuant to paragraph (j)(1) of this section should file an amended return if an excess contribution results when the ruling amount is issued for such taxable year.

[T.D. 8184, 53 FR 6808, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62199, Dec. 30, 1992; T.D. 8580, 59 FR 66474, Dec. 27, 1994; 60 FR 8932, Feb. 16, 1995; T.D. 8758, 63 FR 2894, Jan. 20, 1998]

§1.468A–4 Treatment of nuclear decommissioning fund.

(a) *In general.* A nuclear decommissioning fund is subject to tax on all of its modified gross income (as defined in paragraph (b) of this section). The rate of tax is 22 percent for taxable years beginning in calendar year 1994 or 1995, 20 percent for taxable years beginning after December 31, 1995, and the highest rate of tax specified by section 11(b) for other years. This tax is in lieu of any other tax that may be imposed under subtitle A of the Internal Revenue Code on the income earned by the assets of the nuclear decommissioning fund.

(b) *Modified gross income.* For purposes of this section, the term ''modified gross income'' means gross income as defined under section 61 computed with the following modifications:

(1) The amount of any payment to the nuclear decommissioning fund with respect to which a deduction is allowed under section 468A(a) is excluded from gross income.

(2) A deduction is allowed for the amount of administrative costs and other incidental expenses of the nuclear decommissioning fund (including taxes, legal expenses, accounting expenses, actuarial expenses and trustee expenses, but not including decommissioning costs) that are otherwise deductible and that are paid by the nuclear decommissioning fund to any person other than the electing taxpayer. An expense is otherwise deductible for purposes of this paragraph (b)(2) if it would be deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a corporation. For example, because Federal income taxes are not deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a

corporation, the tax imposed by section 468A(e)(2) and paragraph (a) of this section is not deductible in determining the modified gross income of a nuclear decommissioning fund. Similarly, because certain expenses allocable to tax-exempt interest income are not deductible under section 265 of the Internal Revenue Code in determining the taxable income of a corporation, such expenses are not deductible in determining the modified gross income of a nuclear decommissioning fund.

(3) A deduction is allowed for the amount of an otherwise deductible loss that is sustained by the nuclear decommissioning fund in connection with the sale, exchange or worthlessness of any investment. A loss is otherwise deductible for purposes of this paragraph (b)(3) if such loss would be deductible by a corporation under section 165 (f) or (g) and sections 1211(a) and 1212(a).

(4) A deduction is allowed for the amount of an otherwise deductible net operating loss of the nuclear decommissioning fund. For purposes of this paragraph (b), the net operating loss of a nuclear decommissioning fund for a taxable year is the amount by which the deductions allowable under paragraph (b) (2) and (3) of this section exceed the gross income of the nuclear decommissioning fund computed with the modification described in paragraph (b)(1) of this section. A net operating loss is otherwise deductible for purposes of this paragraph (b)(4) if such a net operating loss would be deductible by a corporation under section 172(a).

(c) *Special rules*—(1) *Period for computation of modified gross income.* The modified gross income of a nuclear decommissioning fund must be computed on the basis of the taxable year of the electing taxpayer. If an electing taxpayer changes its taxable year, each nuclear decommissioning fund of the electing taxpayer must change to the new taxable year. See section 442 and §1.442–1 for rules relating to the change to a new taxable year.

(2) *Gain or loss upon distribution of property by a fund.* A distribution of property by a nuclear decommissioning fund (whether an actual distribution or a deemed distribution) shall be considered a disposition of property by the nuclear decommissioning fund for purposes of section 1001. In determining the amount of gain or loss from such disposition, the amount realized by the nuclear decommissioning fund shall be the fair market value of the property on the date of disposition.

(3) *Denial of credits against tax.* The tax imposed on the modified gross income of a nuclear decommissioning fund under paragraph (a) of this section is not to be reduced or offset by any credits against tax provided by part IV of subchapter A of chapter 1 of the Internal Revenue Code other than the credit provided by section 31(c) for amounts withheld under section 3406 (back-up withholding).

(4) *Other corporate taxes inapplicable.* Although the modified gross income of a nuclear decommissioning fund is subject to tax at the rate specified by section 468A(e)(2) and paragraph (a) of this section, a nuclear decommissioning fund is not subject to the other taxes imposed on corporations under subtitle A of the Internal Revenue Code. For example, a nuclear decommissioning fund is not subject to the alternative minimum tax imposed by section 55, the accumulated earnings tax imposed by section 531, the personal holding company tax imposed by section 541, and the alternative tax imposed on a corporation under section 1201(a).

(d) *Treatment as corporation for purposes of subtitle F.* For purposes of subtitle F of the Internal Revenue Code and the regulations thereunder, a nuclear decommissioning fund is to be treated as if it were a corporation and the tax imposed by section 468A(e)(2) and paragraph (a) of this section is to be treated as a tax imposed by section 11. Thus, for example, the following rules apply:

(1) A nuclear decommissioning fund must file a return with respect to the tax imposed by section 468A(e)(2) and paragraph (a) of this section for each taxable year (or portion thereof) that the fund is in existence even though no amount is included in the gross income of the fund for such taxable year. The return is to be made on Form 1120–ND in accordance with the instructions relating to such form. For purposes of

this paragraph (d)(1), a nuclear decommissioning fund is in existence for the period that—

(i) Begins on the date that the first deductible payment is actually made to such nuclear decommissioning fund; and

(ii) Ends on the date of termination (see paragraph (d) of § 1.468A–5), the date that the entire fund is disqualified (see paragraph (c) of § 1.468A–5), or the date that the electing taxpayer disposes of its entire qualifying interest in the nuclear power plant to which the nuclear decommissioning fund relates, whichever is applicable.

(2) For each taxable year of the nuclear decommissioning fund, the return described in paragraph (d)(1) of this section must be filed on or before the 15th day of the third month following the close of such taxable year unless the nuclear decommissioning fund is granted an extension of time for filing under section 6081. If such an extension is granted for any taxable year, the return for such taxable year must be filed on or before the extended due date for such taxable year. In no event will the filing of the initial return of a nuclear decommissioning fund be required before January 6, 1987.

(3) A nuclear decommissioning fund must provide its employer identification number on returns, statements and other documents as required by the forms and instructions relating thereto. The employer identification number is obtained by filing a Form SS–4 in accordance with the instructions relating thereto.

(4) A nuclear decommissioning fund must deposit all payments of tax imposed by section 468A(e)(2) and paragraph (a) of this section (including any payments of estimated tax) with an authorized government depositary in accordance with § 1.6302–1.

(5) A nuclear decommissioning fund is subject to the addition to tax imposed by section 6655 in case of a failure to pay estimated income tax. For purposes of section 6655 and this section—

(i) The tax with respect to which the amount of the underpayment is computed in the case of a nuclear decommissioning fund is the tax imposed by section 468A(e)(2) and paragraph (a) of this section; and

(ii) The taxable income with respect to which the nuclear decommissioning fund's status as a ''large corporation'' is measured is ''modified gross income'' (as defined by paragraph (b) of this section).

[T.D. 8184, 53 FR 6814, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62199, Dec. 30, 1992]

§ 1.468A–5 Nuclear decommissioning fund qualification requirements; prohibitions against self-dealing; disqualification of nuclear decommissioning fund; termination of fund upon substantial completion of decommissioning.

(a) *Qualification requirements*—(1) *In general.* (i) A nuclear decommissioning fund must be established and maintained at all times in the United States pursuant to an arrangement that qualifies as a trust under State law. Such trust must be established for the exclusive purpose of providing funds for the decommissioning of one or more nuclear power plants, but a single trust agreement may establish multiple funds for such purpose. Thus—

(A) Two or more nuclear decommissioning funds can be established and maintained pursuant to a single trust agreement; and

(B) One or more funds that are to be used for the decommissioning of a nuclear power plant and that do not qualify as nuclear decommissioning funds under this paragraph (a) can be established and maintained pursuant to a trust agreement that governs one or more nuclear decommissioning funds.

(ii) A separate nuclear decommissioning fund is required for each electing taxpayer and for each nuclear power plant with respect to which an electing taxpayer possesses a qualifying interest. The Internal Revenue Service shall issue a separate schedule of ruling amounts with respect to each nuclear decommissioning fund and each nuclear decommissioning fund must file a separate income tax return even if other nuclear decommissioning funds or nonqualified decommissioning funds are established and maintained pursuant to the trust agreement governing such fund or the assets of other nuclear decommissioning funds or nonqualified decommissioning funds are pooled with the assets of such fund.

(iii) An electing taxpayer can maintain only one nuclear decommissioning fund for each nuclear power plant with respect to which the taxpayer elects the application of section 468A. If a nuclear power plant is subject to the ratemaking jurisdiction of two or more public utility commissions and any such public utility commission requires a separate fund to be maintained for the benefit of ratepayers whose rates are established or approved by the public utility commission, the separate funds maintained for such plant (whether or not established and maintained pursuant to a single trust agreement) shall be considered a single nuclear decommissioning fund for purposes of section 468A and §§1.468A–1 through 1.468A–5, 1.468A–7 and 1.468A–8. Thus, for example, the Internal Revenue Service shall issue one schedule of ruling amounts with respect to such nuclear power plant (see paragraph (f) of §1.468A–3), the nuclear decommissioning fund must file a single income tax return (see paragraph (d)(1) of §1.468A–4), and, if the Internal Revenue Service disqualifies the nuclear decommissioning fund, the assets of each separate fund are treated as distributed on the date of disqualification (see paragraph (c)(3) of this section).

(iv) If assets of a nuclear decommissioning fund are (or will be) invested through an unincorporated organization, within the meaning of §301.7701–2 of this chapter, the Internal Revenue Service will rule, if requested, whether the organization is an association taxable as a corporation for federal tax purposes. A request for a ruling may be made by the electing taxpayer as part of its request for a schedule of ruling amounts.

(2) *Limitation on contributions.* Except as otherwise provided in paragraph (b)(2)(ii) of §1.468A–8 (relating to a special transitional rule), a nuclear decommissioning fund is not permitted to accept any contributions in cash or property other than cash payments with respect to which a deduction is allowed under section 468A(a) and paragraph (a) of §1.468A–2. Thus, for example, unless the exception contained in paragraph (b)(2)(ii) of §1.468A–8 applies, securities may not be contributed to a nuclear decommissioning fund even if the taxpayer or a fund established by the taxpayer previously held such securities for the purpose of providing funds for the decommissioning of a nuclear power plant.

(3) *Limitation on use of fund*—(i) *In general.* The assets of a nuclear decommissioning fund are to be used exclusively—

(A) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(B) To pay administrative costs and other incidental expenses of the nuclear decommissioning fund; and

(C) To the extent that the assets of the nuclear decommissioning fund are not currently required for the purposes described in paragraph (a)(3)(i) (A) or (B) of this section, to make investments.

(ii) *Definition of administrative costs and expenses.* For purposes of paragraph (a)(3)(i) of this section, the term ‘‘administrative costs and other incidental expenses of a nuclear decommissioning fund’’ means all ordinary and necessary expenses incurred in connection with the operation of the nuclear decommissioning fund. Such term includes the tax imposed by section 468A(e)(2) and §1.468A–4(a), any State or local tax imposed on the income or the assets of the fund, legal expenses, accounting expenses, actuarial expenses and trustee expenses. Such term does not include decommissioning costs. Such term also does not include the excise tax imposed on the trustee or other disqualified person under section 4951 or the reimbursement of any expenses incurred in connection with the assertion of such tax unless such expenses are considered reasonable and necessary under section 4951(d)(2)(C) and it is determined that the trustee or other disqualified person is not liable for the excise tax.

(4) *Trust provisions.* By December 31, 1996, each qualified nuclear decommissioning fund trust agreement must provide that assets in the fund must be used as authorized by section 468A and the regulations thereunder and that

the agreement may not be amended so as to violate section 468A or the regulations thereunder.

(b) *Prohibitions against self-dealing*—(1) *In general.* Except as otherwise provided in this paragraph (b), the excise taxes imposed by section 4951 shall apply to each act of self-dealing between a disqualified person and a nuclear decommissioning fund.

(2) *Self-dealing defined.* For purposes of this paragraph (b), the term ''self-dealing'' means any act described in section 4951(d), except—

(i) A payment by a nuclear decommissioning fund for the purpose of satisfying, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(ii) A withdrawal of an excess contribution by the electing taxpayer pursuant to the rules of paragraph (c)(2) of this section;

(iii) A withdrawal by the electing taxpayer of amounts that have been treated as distributed under paragraph (c)(3) of this section;

(iv) A payment of amounts remaining in a nuclear decommissioning fund to the electing taxpayer after the termination of such fund (as determined under paragraph (d) of this section);

(v) Any act described in section 4951(d)(2) (B) or (C);

(vi) Any act described in § 53.4951–1(c) of this chapter only if undertaken to facilitate the temporary investment of assets or the payment of reasonable administrative expenses of the nuclear decommissioning fund; or

(vii) A payment by a nuclear decommissioning fund for the performance of trust functions and certain general banking services by a bank or trust company which is a disqualified person, where the banking services are reasonable and necessary to carry out the purposes of the fund, if the compensation paid to the bank or trust company, taking into account the fair interest rate for the use of the funds by the bank or trust company, for such services is not excessive. The general banking services allowed by this paragraph (b)(2)(vii) are—

(A) Checking accounts, as long as the bank does not charge interest on any overwithdrawals,

(B) Savings accounts, as long as the fund may withdraw its funds on no more than 30 days' notice without subjecting itself to a loss of interest on its money for the time during which the money was on deposit, and

(C) Safekeeping activities. (See example 3 of § 53.4941(d)–3(c)(2).)

(3) *Disqualified person defined.* For purposes of this paragraph (b), the term ''disqualified person'' includes each person described in section 4951(e)(4) and paragraph (d) of § 53.4951–1.

(c) *Disqualification of nuclear decommissioning fund*—(1) *In general.* Except as otherwise provided in paragraph (c)(2) of this section, if at any time during a taxable year of a nuclear decommissioning fund—

(i) The nuclear decommissioning fund does not satisfy the requirements of paragraph (a) of this section, or

(ii) The nuclear decommissioning fund and a disqualified person engage in an act of self-dealing (as defined in paragraph (b)(2) of this section), the Internal Revenue Service may, in its discretion, disqualify all or any portion of the fund as of the date that the fund does not satisfy the requirements of paragraph (a) of this section or the date on which the act of self-dealing occurs, whichever is applicable, or as of any subsequent date (''date of disqualification''). The Internal Revenue Service shall notify the electing taxpayer of the disqualification of a nuclear decommissioning fund and the date of disqualification by registered or certified mail to the last known address of the electing taxpayer (the ''notice of disqualification'').

(2) *Exception to disqualification*—(i) *In general.* A nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section by reason of an excess contribution or the withdrawal of such excess contribution by an electing taxpayer if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the

taxable year to which the excess contribution relates. In the case of an excess contribution that is the result of a payment made pursuant to paragraph (j)(1) of §1.468A–3, a nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the later of—

(A) The date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year to which the excess contribution relates; or

(B) The date that is 30 days after the date that the taxpayer receives the ruling amount for such taxable year.

(ii) *Excess contribution defined.* For purposes of this section, an excess contribution is the amount by which cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceed the payment limitation contained in section 468A(b) and paragraph (b) of §1.468A–2.

(iii) *Taxation of income attributable to an excess contribution.* The income of a nuclear decommissioning fund attributable to an excess contribution is required to be included in the gross income of the nuclear decommissioning fund under paragraph (b) of §1.468A–4.

(3) *Effect of disqualification.* If all or any portion of a nuclear decommissioning fund is disqualified under paragraph (c)(1) of this section, the portion of the nuclear decommissioning fund that is disqualified is treated as distributed to the electing taxpayer on the date of disqualification. Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (see paragraph (c)(2) of §1.468A–4). In addition, the electing taxpayer must include in gross income for the taxable year that includes the date of disqualification an amount equal to the product of—

(i) The fair market value of the assets of the fund determined as of the date of disqualification, reduced by—

(A) The amount of any excess contribution that was not withdrawn before the date of disqualification if no deduction was allowed with respect to such excess contribution;

(B) The amount of any deemed distribution that was not actually distributed before the date of disqualification (as determined under paragraph (d)(2)(iii) of §1.468A–2) if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(C) The amount of any tax that—

(*1*) Is imposed on the income of the fund;

(*2*) Is attributable to income taken into account before the date of disqualification or as a result of the disqualification; and

(*3*) Has not been paid as of the date of disqualification; and

(ii) The fraction of the nuclear decommissioning fund that was disqualified under paragraph (c)(1) of this section.

Contributions made to a disqualified fund after the date of disqualification are not deductible under section 468A(a) and paragraph (a) of §1.468A–2, or, if the fund is disqualified only in part, are deductible only to the extent provided in the notice of disqualification. In addition, if any assets of the fund that are deemed distributed under this paragraph (c)(3) are held by the fund after the date of disqualification (or if additional assets are acquired with nondeductible contributions made to the fund after the date of disqualification), the income earned by such assets after the date of disqualification must be included in the gross income of the electing taxpayer (see section 671) to the extent that such income is otherwise includible under chapter 1 of the Internal Revenue Code. An electing taxpayer can establish a nuclear decommissioning fund to replace a fund that has been disqualified in its entirety only if the Internal Revenue Service specifically consents to the establishment of a replacement fund in connection with the issuance of an initial schedule of ruling amounts for such replacement fund.

(d) *Termination of nuclear decommissioning fund upon substantial completion of decommissioning*—(1) *In general.* Upon substantial completion of the decommissioning of a nuclear power plant to which a nuclear decommissioning fund relates, such nuclear decommissioning fund shall be considered terminated and treated as having distributed all of its assets on the date the termination occurs. Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (see paragraph (c)(2) of § 1.468A–4). In addition, the electing taxpayer shall include in gross income for the taxable year in which the termination occurs an amount equal to the fair market value of the assets of the fund determined as of the date of termination, reduced by—

(i) The amount of any deemed distribution that was not actually distributed before the date of termination if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(ii) The amount of any tax that—

(A) Is imposed on the income of the fund;

(B) Is attributable to income taken into account before the date the termination occurs or as a result of the termination; and

(C) Has not been paid as of the date the termination occurs.

Contributions made to a nuclear decommissioning fund after the termination date are not deductible under section 468A(a) and paragraph (a) of § 1.468A–2. In addition, if any assets are held by the fund after the termination date, the income earned by such assets after the termination date must be included in the gross income of the electing taxpayer (see section 671) to the extent that such income is otherwise includible under chapter 1 of the Internal Revenue Code. Finally, an electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs that are incurred during any taxable year (see paragraph (e) of § 1.468A–2) even if such costs are incurred after substantial completion of decommissioning (*e.g.*, expenses incurred to monitor or safeguard the plant site).

(2) *Substantial completion of decommissioning defined.* (i) Except as otherwise provided in paragraph (d)(2)(ii) of this section, the substantial completion of the decommissioning of a nuclear power plant occurs on the date that the maximum acceptable radioactivity levels mandated by the Nuclear Regulatory Commission with respect to a decommissioned nuclear power plant are satisfied (the ‘‘substantial completion date’’).

(ii) If a significant portion of the total estimated decommissioning costs with respect to a nuclear power plant are not incurred on or before the substantial completion date, an electing taxpayer may request, and the Internal Revenue Service shall issue, a ruling that designates the date on which substantial completion of decommissioning occurs. The date designated in the ruling shall not be later than the last day of the third taxable year after the taxable year that includes the substantial completion date. The request for a ruling under this paragraph (d)(2)(ii) must be filed during the taxable year that includes the substantial completion date and must comply with the procedural rules in effect at the time of the request.

[T.D. 8184, 53 FR 6815, Mar. 3, 1988, as amended by T.D. 8461, 57 FR 62200, Dec. 30, 1992; T.D. 8580, 59 FR 66474, Dec. 27, 1994; 60 FR 8932, Feb. 16, 1995]

§ 1.468A–6 Disposition of an interest in a nuclear power plant.

(a) *In general.* This section describes the federal income tax consequences of a transfer of the assets of a nuclear decommissioning fund (Fund) within the meaning of § 1.468A–1(b)(3) in connection with a sale, exchange, or other disposition by a taxpayer (transferor) of all or a portion of its qualifying interest in a nuclear power plant to another taxpayer (transferee). This section also explains how a schedule of ruling amounts will be determined for the transferor and transferee.

(b) *Requirements.* This section applies if—

(1) Immediately before the disposition, the transferor maintained a Fund with respect to the interest disposed of; and

(2) Immediately after the disposition—

(i) The transferee maintains a Fund with respect to the interest acquired;

(ii) The interest acquired is a qualifying interest of the transferee in the nuclear power plant;

(iii) Either a proportionate amount (which could include all) of the assets of the transferor's Fund is transferred to a Fund of the transferee, or the transferor's entire Fund is transferred to the transferee, provided in the latter case (or if the transferee receives all of the assets in the transferor's Fund, but not the transferor's Fund) that the transferee acquires the transferor's entire qualifying interest in the plant; and

(iv) The transferee continues to satisfy the requirements of §1.468A–5(a)(iii), which permits an electing taxpayer to maintain only one Fund for each plant.

(c) *Tax consequences.* A disposition that satisfies the requirements of paragraph (b) of this section will have the following tax consequences at the time it occurs:

(1) *The transferor and its Fund.* Neither the transferor nor the transferor's Fund will recognize gain or loss or otherwise take any income or deduction into account by reason of the transfer of a proportionate amount of the assets of the transferor's Fund to the transferee's Fund (or by reason of the transfer of the transferor's entire Fund to the transferee). For purposes of the regulations under section 468A, this transfer (or the transfer of the transferor's Fund) will not be considered a distribution of assets by the transferor's Fund.

(2) *The transferee and its Fund.* Neither the transferee nor the transferee's Fund will recognize gain or loss or otherwise take any income or deduction into account by reason of the transfer of a proportionate amount of the assets of the transferor's Fund to the transferee's Fund (or by reason of the transfer of the transferor's Fund to the transferee). For purposes of the regulations under section 468A, this transfer (or the transfer of the transferor's Fund) will not constitute a payment or a contribution of assets by the transferee to its Fund.

(3) *Basis.* Transfers of assets of a Fund to which this section applies do not affect basis. Thus, the transferee's Fund will have a basis in the assets received from the transferor's Fund that is the same as the basis of those assets in the transferor's Fund immediately before the disposition.

(d) *Determination of proportionate amount.* For purposes of this section, a transferor of a qualifying interest in a nuclear power plant is considered to transfer a proportionate amount of the assets of its Fund to a Fund of a transferee of the interest if, on the date of the transfer of the interest, the percentage of the fair market value of the Fund's assets that are transferred equals the percentage of the transferor's qualifying interest that is transferred.

(e) *Calculation of schedule of ruling amounts for dispositions described in this section*—(1) *Transferor.* If a transferor disposes of all or a portion of its qualifying interest in a nuclear power plant in accordance with this section, the transferor's schedule of ruling amounts with respect to the interests disposed of and retained (if any) will be determined in accordance with paragraphs (e)(1) (i) and (ii) of this section.

(i) *Taxable year of disposition.* If a transferor does not file a request for a revised schedule of ruling amounts on or before the deemed payment deadline for the taxable year of the transferor in which the disposition of its interest in the nuclear power plant occurs (that is, the date that is two and one-half months after the close of that year), the transferor's ruling amount with respect to that plant for that year will equal the sum of—

(A) The ruling amount contained in the transferor's current schedule of ruling amounts with respect to that plant for that taxable year multiplied by the portion of the qualifying interest that is retained (if any); and

(B) The ruling amount contained in the transferor's current schedule of ruling amounts with respect to that plant for that taxable year multiplied by the product of—

(*1*) The portion of the transferor's qualifying interest that is disposed of; and

(*2*) A fraction, the numerator of which is the number of days in that taxable year that precede the date of disposition, and the denominator of which is the number of days in that taxable year.

(ii) *Taxable years after the year of disposition.* A transferor that retains a qualifying interest in a nuclear power plant must file a request for a revised schedule of ruling amounts with respect to that interest on or before the deemed payment deadline for the first taxable year of the transferor beginning after the disposition. See § 1.468A–3(i)(1)(ii)(B). If the transferor does not timely file such a request, the transferor's ruling amount with respect to that interest for the affected year or years will be zero, unless the Internal Revenue Service waives the application of this paragraph (e)(1)(ii) upon a showing of good cause for the delay.

(2) *Transferee.* If a transferee acquires all or a portion of a transferor's qualifying interest in a nuclear power plant under this section, the transferee's schedule of ruling amounts with respect to the interest acquired will be determined under paragraphs (e)(2) (i) and (ii) of this section.

(i) *Taxable year of disposition.* If a transferee does not file a request for a schedule of ruling amounts on or before the deemed payment deadline for the taxable year of the transferee in which the disposition occurs (that is, the date that is two and one-half months after the close of that year), the transferee's ruling amount with respect to the interest acquired in the nuclear power plant for that year is the amount described in the following sentence. This amount is the amount contained in the transferor's current schedule of ruling amounts for that plant for the taxable year of the transferor in which the disposition occurred, multiplied by the product of—

(A) The portion of the transferor's qualifying interest that is transferred; and

(B) A fraction, the numerator of which is the number of days in the taxable year of the transferor including and following the date of disposition, and the denominator of which is the number of days in that taxable year.

(ii) *Taxable years after the year of disposition.* A transferee of a qualifying interest in a nuclear power plant must file a request for a revised schedule of ruling amounts with respect to that interest on or before the deemed payment deadline for the first taxable year of the transferee beginning after the disposition. See § 1.468A–3(i)(1)(ii)(B). If the transferee does not timely file such a request, the transferee's ruling amount with respect to that interest for the affected year or years will be zero, unless the Internal Revenue Service waives the application of this paragraph (e)(2)(ii) upon a showing of good cause for the delay.

(3) *Example.* The following example illustrates the provisions of this paragraph (e).

Example. (i) *X* Corporation is a calendar year taxpayer engaged in the sale of electric energy generated by a nuclear power plant. The plant is owned entirely by *X*. On May 27, 1995, *X* transfers a 60 percent qualifying interest in the plant to *Y* Corporation, a calendar year taxpayer. Before the transfer, *X* had received a schedule of ruling amounts containing an annual ruling amount of $10 million for the taxable years 1993 through 2013. For 1995, neither *X* nor *Y* files a request for a revised schedule of ruling amounts.

(ii) Under paragraph (e)(1)(i) of this section, *X*'s ruling amount for 1995 is calculated as follows: ($10,000,000×40%) + ($10,000,000×60%×146/365)=$6,400,000. Under paragraph (e)(2)(i) of this section, Y's ruling amount for 1995 is calculated as follows: $10,000,000×60%×219/365=$3,600,000. Under paragraphs (e)(1)(ii) and (e)(2)(ii) of this section, *X* and *Y* must file requests for revised schedules of ruling amounts by March 15, 1997.

(f) *Calculation of the qualifying percentage after dispositions described in this section*—(1) *In general.* If a transferee acquires an interest in a nuclear power plant in a transaction that satisfies the requirements of this section, the transferee's qualifying percentage (within the meaning of § 1.468A–3(d)(4)) for the interest acquired is the transferor's qualifying percentage for that interest immediately before the disposition. If the Internal Revenue Service has not approved a qualifying percentage for the transferor with respect to the interest transferred, the qualifying percentage for that interest is determined under § 1.468A–3(d)(4).

(2) *Special rule.* The Internal Revenue Service may, in its discretion, determine a qualifying percentage for an interest in a nuclear power plant acquired by a transferee on a basis other than the rule set forth in paragraph (f)(1) of this section if—

(i) In connection with its first request for a schedule of ruling amounts after the disposition, the transferee requests special treatment, explains the need for such treatment, and sets forth an alternative basis for determining the qualifying percentage; and

(ii) The Internal Revenue Service determines that the special treatment is consistent with the purposes of section 468A.

(g) *Other*—(1) *Anti-abuse provision.* The Internal Revenue Service may treat a disposition occurring on or after December 27, 1994 as satisfying the requirements of this section if the Internal Revenue Service determines that this treatment is necessary or appropriate to carry out the purposes of section 468A and the regulations thereunder.

(2) *Relief provision.* Upon request of the electing taxpayer, the Internal Revenue Service may treat a disposition occurring after July 17, 1984, and before December 27, 1994 as satisfying the requirements of this section if the Internal Revenue Service determines that this treatment is necessary or appropriate to carry out the purposes of section 468A and the regulations thereunder.

(h) *Effective date.* Section 1.468A–6 is effective for a disposition of an interest in a nuclear power plant on or after December 27, 1994.

[T.D. 8580, 59 FR 66474, Dec. 27, 1994]

§1.468A–7 Manner of and time for making election.

(a) *In general.* An eligible taxpayer is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund only if the taxpayer elects the application of section 468A. A separate election is required for each nuclear decommissioning fund and for each taxable year with respect to which payments are to be deducted under section 468A. In the case of an affiliated group of corporations that join in the filing of a consolidated return for a taxable year, the common parent must make a separate election on behalf of each member whose payments to a nuclear decommissioning fund during such taxable year are to be deducted under section 468A. The election under section 468A for any taxable year is irrevocable and must be made by attaching a statement (‘‘Election Statement’’) and a copy of the schedule of ruling amounts provided pursuant to the rules of §1.468A–3 to the taxpayer’s Federal income tax return (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the consolidated return) for such taxable year. Except as otherwise provided in paragraph (b)(3) of §1.468A–8, the return to which the Election Statement and a copy of the schedule of ruling amounts is attached must be filed on or before the time prescribed by law (including extensions) for filing the return for the taxable year with respect to which payments are to be deducted under section 468A.

(b) *Required information.* The Election Statement must include the following information:

(1) The legend ‘‘Election Under Section 468A’’ typed or legibly printed at the top of the first page.

(2) The electing taxpayer’s name, address and taxpayer identification number (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the name, address and taxpayer identification number of each electing taxpayer).

(3) The taxable year for which the election is made.

(4) For each nuclear decommissioning fund for which an election is made—

(i) The name and location of the nuclear power plant to which the fund relates;

(ii) The name and employer identification number of the nuclear decommissioning fund;

(iii) The total amount of actual cash payments made to the nuclear decommissioning fund during the taxable year that were not treated as deemed cash payments under paragraph (c)(1) of §1.468A–2 for a prior taxable year;

(iv) The total amount of cash payments deemed made to the nuclear decommissioning fund under paragraph (c)(1) of §1.468A–2 for the taxable year; and

(v) The cost of service amount for the taxable year (see paragraph (b)(2) of § 1.468A–2).

[T.D. 8184, 53 FR 6818, Mar. 3, 1988]

§ 1.468A–8 Effective date and transitional rules.

(a) *Effective date*—(1) *In general.* Section 468A and §§ 1.468A–1 through 1.468A–5, 1.468A–7 and 1.468A–8 are effective on July 18, 1984, and apply with respect to taxable years ending on or after such date.

(2) *Cut-off method applicable to electing taxpayers.* Any amount of nuclear decommissioning costs taken into account before July 18, 1984, for a taxable year beginning before such date, is not allowable as a deduction after July 17, 1984, under section 468A(c)(2) and paragraph (e) of § 1.468A–2.

(b) *Transitional rules*—(1) *Time for filing request for schedule of ruling amounts.* The Internal Revenue Service shall provide a ruling amount for any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, if—

(i) Paragraph (g) of § 1.468A–3 is satisfied for the taxable year; and

(ii) The taxpayer files a request for a schedule of ruling amounts that includes a proposed ruling amount for the taxable year on or before June 1, 1988.

(2) *Manner of and time for making contributions to a nuclear decommissioning fund.* (i) The amount of any contribution (including a contribution of property allowed under paragraph (b)(2)(ii) of this section) to a nuclear decommissioning fund that relates to a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, shall be deemed made during such taxable year if—

(A) The taxpayer makes such contribution on or before the 30th day after the date the taxpayer receives a ruling amount applicable to such taxable year; and

(B) The taxpayer irrevocably designates the amount of such contribution as relating to such taxable year on the Election Statement attached to its Federal income tax return (or amended return) for such taxable year.

(ii)(A) An electing taxpayer may contribute property to a nuclear decommissioning fund if the property—

(*1*) Is described in paragraph (a)(3)(i)(C) of § 1.468–5;

(*2*) Was acquired after July 18, 1984, and before March 3, 1988; and

(*3*) Is contributed for any taxable year ending after July 18, 1984, and beginning before March 3, 1988.

(B) If a taxpayer contributes property to a nuclear decommissioning fund under this paragraph (b)(2)(ii)—

(*1*) The amount of the contribution (and the basis of the property to the nuclear decommissioning fund) shall equal the fair market value of the property on the date the property is contributed to the nuclear decommissioning fund;

(*2*) The contribution of the property to the nuclear decommissioning fund shall be considered a sale or exchange of the property by the taxpayer for purposes of section 1001; and

(*3*) For purposes of section 1001, the amount realized by the taxpayer shall be the fair market value of the property on the date the property was contributed to the nuclear decommissioning fund.

(iii) A fund established by a taxpayer for the purpose of paying the decommissioning costs of a nuclear power plant is not treated as a nuclear decommissioning fund before the earlier of—

(A) The date the taxpayer receives an initial schedule of ruling amounts with respect to the fund, or

(B) The first day of the first taxable year of the taxpayer that begins on or after January 1, 1987,

even if the taxpayer elects the application of section 468A for a taxable year that begins before such date. Any income earned before such date by the assets of a fund that satisfies the requirements of § 1.468A–5 must be included in the gross income of the taxpayer treated under section 671 as the owner of such assets.

(iv) If a fund is first treated as a nuclear decommissioning fund on the date described in paragraph (b)(2)(iii) of this section—

(A) The assets held in the fund on such date shall be treated for purposes of this paragraph (b)(2) as assets contributed to the nuclear decommissioning fund on such date; and

(B) The withdrawal of any such assets on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year that includes such date shall be treated in the same manner as the withdrawal of an excess contribution (see paragraph (c)(2) of §1.468A–5).

(3) *Manner of and time for making election.* A taxpayer may elect the application of section 468A for a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, by attaching the Election Statement and a copy of the schedule of ruling amounts to—

(i) A return that is filed on or before the time prescribed by law (including extensions) for filing to return for such taxable year; or

(ii) An amended return for such taxable year that is filed on or before the 90th day after the date that the taxpayer receives a ruling amount for such table year.

(4) *Determination of cost of service limitation.* (i) For purposes of section 468A(b)(1) and paragraph (b)(2)(ii) of §1.468A–2, decommissioning costs included in cost of service for any taxable year beginning before January 1, 1987, shall include decommissioning costs that can be accurately determined from information contained in the regulated books of account or other written records of the taxpayer.

(ii) For purposes of section 468A(b)(1) and paragraph (b)(2) of §1.468A–2, the cost of service amount applicable to a nuclear decommissioning fund for the taxable year that includes July 18, 1984, is the amount determined under paragraph (b)(2) of §1.468A–2 multiplied by a fraction, the numerator of which is the amount of nuclear decommissioning costs that is directly or indirectly charged to customers in such taxable year and that is included in the taxable income of the taxpayer for such taxable year and the denominator of which is the amount of nuclear decommissioning costs that is directly or indirectly charged to customers in such taxable year and that would have been included in the gross income of the taxpayer if such costs were taken into account by the taxpayer in the same manner as amounts charged for electric energy (see §1.88–1). Under the preceding sentence, an amount of decommissioning costs is included in the taxable income of a taxpayer for the taxable year that includes July 18, 1984, if the amount is included in gross income for such taxable year and no deduction (other than a deduction allowed under section 468A(a) and paragraph (a) of §1.468A–2) is claimed with respect to such amount for such taxable year.

(5) *Assumptions and determinations to be used in determining ruling amounts.* (i) To the extent consistent with the principles and provisions of §1.468A–3, a ruling amount for any taxable year beginning before January 1, 1987, shall be based on the reasonable assumptions and determinations used by the applicable public utility commission(s) in establishing or approving the amount of decommissioning costs included in cost of service for ratemaking purposes for such taxable year.

(ii) If the applicable public utility commission(s) did not disclose the after-tax rate of return used in establishing or approving the amount of decommissioning costs included in cost of service for any period during a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, the after-tax rate of return during such period is equal to 54 percent of the overpayment rate in effect under section 6621 during such period.

(iii) If the applicable public utility commission(s) did not disclose the other assumptions and determinations used in establishing or approving the amount of decommissioning costs included in cost of service for any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, ruling amount for each such taxable year shall be determined by taking into account—

(A) The amount of decommissioning costs included in cost of service for such taxable year;

(B) The qualifying percentage (as determined under paragraph (d)(4) of §1.468A–3 and paragraph (b)(7) of this section); and

(C) The amount of decommissioning costs included in cost of service for any earlier taxable year.

(6) *Exception to level funding limitation.* Notwithstanding paragraph (b) of § 1.468A–3, the Internal Revenue Service may, in its discretion, provide a schedule of ruling amounts specifying a ruling amount for a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, that is greater than the ruling amount specified in such scedule for a later taxable year.

(7) *Determination of qualifying percentage.* (i)(A) The qualifying percentage shall be determined under this paragraph (b)(7)(i) if a nuclear power plant began commercial operations on or before July 10, 1986, and a taxpayer—

(*1*) Files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988; and

(*2*) Elects the application of this paragraph (b)(7)(i) in its request for a schedule of ruling amounts.

(B) If the qualifying percentage is determined under this paragraph (b)(7)(i), the estimated period for which the nuclear decommissioning fund is to be in effect for purposes of paragraph (d)(4)(ii) of § 1.468A–3 begins on the later of—

(*1*) The first day of the taxable year that includes the date that the nuclear power plant began commercial operations; or

(*2*) The first day of the taxable year that includes July 18, 1984.

(ii)(A) The qualifying percentage shall be determined under this paragraph (b)(7)(ii) if a nuclear power plant began commercial operations before July 18, 1984, and a taxpayer—

(*1*) Files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988; and

(*2*) Elects the application of this paragraph (b)(7)(ii) in its request for a schedule of ruling amounts.

(B) If the qualifying percentage is determined under this paragraph (b)(7)(ii), the estimated period for which the nuclear decommissioning fund is to be in effect for purposes of paragraph (d)(4)(ii) of § 1.468A–3 and the estimated useful life of the nuclear power plant for purposes of paragraph (d)(4)(iii) of § 1.468A–3 shall end on the earlier of—

(*1*) The last day of the taxable year in which it is estimated that decommissioning will begin; or

(*2*) The last day of the taxable year that includes the expiration date of the Nuclear Regulatory Commission operating license as in effect on July 18, 1984, without regard to any extensions or amendments thereto.

(iii) In the case of a nuclear power plant that began commercial operations before July 18, 1984, and whose estimated useful life for ratemaking purposes was adjusted by a public utility commission before July 18, 1984, a taxpayer may elect in its request for a schedule of ruling amounts to compute the qualifying percentage in accordance with the following rules:

(A) If the taxpayer files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988, the qualifying percentage equals the percentage of original depreciation costs (determined without regard to capitalized decommissioning costs) with respect to the nuclear power plant that remains to be recovered for ratemaking purposes as of the first day of the taxable year that includes July 18, 1984.

(B) If a taxpayer does not file a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988, the qualifying percentage equals the percentage of original depreciation costs (determined without regard to capitalized decommissioning costs) with respect to the nuclear power plant that remains to be recovered for ratemaking purposes as of the first day of the first taxable year for which a deductible payment is made to the nuclear decommissioning fund that relates to such nuclear power plant.

(C) For purposes of this paragraph (b)(7)(iii), original depreciation costs with respect to a nuclear power plant include only those costs that were taken into account in determining the amount of depreciation with respect to such plant in the first ratemaking proceeding in which such depreciation was treated as a cost of service.

(8) *Limitation on payments to a nuclear decommissioning fund*—(i) The limitation on payments to a nuclear decommissioning fund (see section 468A(b) and paragraph (b) of §1.468A–2) for a taxable year that ends on or after July 18, 1984, and begin before January 1, 1987, shall be determined under paragraph (b)(8)(ii) of this section if—

(A) The electing taxpayer receives a ruling amount applicable to such taxable year after the deemed payment deadline date for such taxable year; and

(B) The requirements of paragraph (b)(8)(iii) of this section are satisfied.

(ii) If the limitation on payments to a nuclear decommissioning fund for a taxable year is determined under this paragraph (b)(8)(ii), the maximum amount of payments made (or deemed made) to the nuclear decommissioning fund during such taxable year shall not exceed the sum of—

(A) The amount determined under section 468A(b) and paragraph (b) of §1.468A–2 (*i.e.*, the lesser of the cost of service amount or the ruling amount) after application of the transitional rules contained in paragraph (b)(4), (5), (6) and (7) of this section; and

(B) The amount of after-tax earnings that would have accumulated to the date of actual payment to the nuclear decommissioning fund if the amount described in paragraph (b)(8)(ii)(A) of this section had been contributed to the nuclear decommissioning fund on the deemed payment deadline date for such taxable year.

In determining the after-tax earnings that would have accumulated to the date of payment, an electing taxpayer must use the after-tax rate of return of the nuclear decommissioning fund that was used in determining the initial schedule of ruling amounts.

(iii) In order to compute the payment limitation under paragraph (b)(8)(ii) of this section for any taxable year, an electing taxpayer must—

(A) Indicate on the Election Statement for the taxable year that the amount of the deductible payment is greater than the amount determined under section 468A(b) and paragraph (b) of §1.468A–2 because paragraph (b)(8) of §1.468A–8 applies;

(B) Not have claimed a deduction for the taxable year under section 468A(a) or paragraph (a) of §1.468A–2 on any return that is filed before the date that a ruling amount is received for the taxable year;

(C) Not have taken a deduction under section 468A (a) or paragraph (a) of §1.468A–2 into account in determining the amount properly estimated as tax for the taxable year under section 6081 (b) (relating to the automatic extension for filing corporate income tax returns); and

(D) Not take the deduction allowed with respect to such payment into account in determining the amount of any overpayment of tax (within the meaning of section 6611) or underpayment of tax (within the meaning of section 6601) for the period ending on the date of such payment (see paragraph (b)(9) of this section).

(iv) The following example illustrates the application of the principles of paragraph (b)(8) of this section:

Example. X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by a nuclear power plant owned by X. On September 15, 1987, X receives a schedule of ruling amounts from the Internal Revenue Service that includes a ruling amount of $1,000,000 for the 1986 taxable year. For purposes of this example, assume that the cost of service amount applicable to the nuclear decommissioning fund for the 1986 taxable year is also $1,000,000 and that the after-tax rate of return of the nuclear decommissioning fund that was used in determining the schedule of ruling amounts is 10 percent compounded semi-annually. On September 15, 1987, X makes a contribution of $1,050,000 to a nuclear decommissioning fund established by X. Under paragraph (b)(8)(ii) of this section, this contribution does not exceed the limitation on payments for the 1986 taxable year and the entire amount of the contribution is deductible for such year. The additional $50,000 deductible payment that is allowed under this paragraph (b)(8) reflects the foregone earnings of the fund for the six-month period beginning on the deemed payment deadline date for the 1986 taxable year (March 15, 1987) and ending on the date of the contribution (September 15, 1987).

(9) *Denial of interest on overpayment.* If a deduction is allowed by reason of paragraph (b)(2) of this section for the

amount of any payment made after the 15th day of the third calendar month after the close of the taxable year to which such payment relates, such deduction shall not be taken into account in determining the amount of any overpayment of tax (within the meaning of section 6611) or underpayment of tax (within the meaning of section 6601) for the period ending on the date of such payment.

(10) *Determination of addition to tax for failure to pay estimated tax.* In the case of any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, the tax shown on the return for such taxable year for purposes of section 6655(b) shall equal the tax that would be shown on the return if a deduction were allowed for the lesser of—

(i) The amount of the payment made to the nuclear decommissioning fund for such taxable year; or

(ii) The amount determined under section 468A(b) and paragraph (b) of § 1.468A–2 (*i.e.*, the lesser of the cost of service amount or the ruling amount) after application of the transitional rules contained in paragraph (b)(4), (5), (6) and (7) of this section but without regard to the transitional rule contained in paragraph (b)(8) of this section.

(11) *Nuclear decommissioning fund qualification requirements.* For tax years beginning prior to January 1, 1995, the Service will not assert that an unincorporated organization referred to in § 1.468A–5(a)(1)(iv), established prior to January 1, 1993, through which the assets of a nuclear decommissioning fund are invested, is an association taxable as a corporation for federal tax purposes.

(12) *Use of formula or method.* Section 1.468A–2(f)(3)(ii) and § 1.468A–3(a)(4) (to the extent it permits a formula or method when the applicable public utility commission estimates the cost of decommissioning in future dollars), (e)(5), (i)(1)(ii)(A) (to the extent it requires the taxpayer to file a request for a revised schedule because of a substantial variation in ruling amounts), and (i)(1)(iii)(C) apply only to requests for a formula or method submitted on or after January 20, 1998 and to formulas and methods obtained in response to those requests.

[T.D. 8184, 53 FR 6818, Mar. 3, 1988; 53 FR 9276, Mar. 24, 1988, as amended by T.D. 8461, 57 FR 62200, Dec. 30, 1992; T.D. 8758, 63 FR 2894, Jan. 20, 1998]

§ 1.468B Designated settlement funds.

A designated settlement fund, as defined in section 468B(d)(2), is taxed in the manner described in § 1.468B–2. The rules for transferors to a qualified settlement fund described in § 1.468B–3 apply to transferors to a designated settlement fund. Similarly, the rules for claimants of a qualified settlement fund described in § 1.468B–4 apply to claimants of a designated settlement fund. A fund, account, or trust that does not qualify as a designated settlement fund is, however, a qualified settlement fund if it meets the requirements of a qualified settlement fund described in § 1.468B–1.

§1.468B–1 Qualified settlement funds.

(a) *In general.* A qualified settlement fund is a fund, account, or trust that satisfies the requirements of paragraph (c) of this section.

(b) *Coordination with other entity classifications.* If a fund, account, or trust that is a qualified settlement fund could be classified as a trust within the meaning of §301.7701–4 of this chapter, it is classified as a qualified settlement fund for all purposes of the Internal Revenue Code (Code). If a fund, account, or trust, organized as a trust under applicable state law, is a qualified settlement fund, and could be classified as either an association (within the meaning of §301.7701–2 of this chapter) or a partnership (within the meaning of §301.7701–3 of this chapter), it is classified as a qualified settlement fund for all purposes of the Code. If a fund, account, or trust, established for contested liabilities pursuant to §1.461–2(c)(1) is a qualified settlement fund, it is classified as a qualified settlement fund for all purposes of the Code.

(c) *Requirements.* A fund, account, or trust satisfies the requirements of this paragraph (c) if—

(1) It is established pursuant to an order of, or is approved by, the United

States, any state (including the District of Columbia), territory, possession, or political subdivision thereof, or any agency or instrumentality (including a court of law) of any of the foregoing and is subject to the continuing jurisdiction of that governmental authority;

(2) It is established to resolve or satisfy one or more contested or uncontested claims that have resulted or may result from an event (or related series of events) that has occurred and that has given rise to at least one claim asserting liability—

(i) Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (hereinafter referred to as CERCLA), as amended, 42 U.S.C. 9601 *et seq.*; or

(ii) Arising out of a tort, breach of contract, or violation of law; or

(iii) Designated by the Commissioner in a revenue ruling or revenue procedure; and

(3) The fund, account, or trust is a trust under applicable state law, or its assets are otherwise segregated from other assets of the transferor (and related persons).

(d) *Definitions.* For purposes of this section—

(1) *Transferor.* A ‘‘transferor’’ is a person that transfers (or on behalf of whom an insurer or other person transfers) money or property to a qualified settlement fund to resolve or satisfy claims described in paragraph (c)(2) of this section against that person.

(2) *Related person.* A ‘‘related person’’ is any person who is related to the transferor within the meaning of sections 267(b) or 707(b)(1).

(e) *Governmental order or approval requirement*—(1) *In general.* A fund, account, or trust is ‘‘ordered by’’ or ‘‘approved by’’ a governmental authority described in paragraph (c)(1) of this section when the authority issues its initial or preliminary order to establish, or grants its initial or preliminary approval of, the fund, account, or trust, even if that order or approval may be subject to review or revision. Except as otherwise provided in paragraph (j)(2) of this section, the governmental authority’s order or approval has no retroactive effect and does not permit a fund, account, or trust to be a qualified settlement fund prior to the date the order is issued or the approval is granted.

(2) *Arbitration panels.* An arbitration award that orders the establishment of, or approves, a fund, account, or trust is an order or approval of a governmental authority described in paragraph (c)(1) of this section if—

(i) The arbitration award is judicially enforceable;

(ii) The arbitration award is issued pursuant to a bona fide arbitration proceeding in accordance with rules that are approved by a governmental authority described in paragraph (c)(1) of this section (such as self-regulatory organization-administered arbitration proceedings in the securities industry); and

(iii) The fund, account, or trust is subject to the continuing jurisdiction of the arbitration panel, the court of law that has jurisdiction to enforce the arbitration award, or the governmental authority that approved the rules of the arbitration proceeding.

(f) *Resolve or satisfy requirement*—(1) *Liabilities to provide services or property.* Except as otherwise provided in paragraph (f)(2) of this section, a liability is not described in paragraph (c)(2) of this section if it is a liability for the provision of services or property, unless the transferor’s obligation to provide services or property is extinguished by a transfer or transfers to the fund, account, or trust.

(2) *CERCLA liabilities.* A transferor’s liability under CERCLA to provide services or property is described in paragraph (c)(2) of this section if following its transfer to a fund, account, or trust the transferor’s only remaining liability to the Environmental Protection Agency (if any) is a remote, future obligation to provide services or property.

(g) *Excluded liabilities.* A liability is not described in paragraph (c)(2) of this section if it—

(1) Arises under a workers compensation act or a self-insured health plan;

(2) Is an obligation to refund the purchase price of, or to repair or replace, products regularly sold in the ordinary course of the transferor’s trade or business;

(3) Is an obligation of the transferor to make payments to its general trade creditors or debtholders that relates to a title 11 or similar case (as defined in section 368(a)(3)(A)), or a workout; or

(4) Is designated by the Commissioner in a revenue ruling or a revenue procedure (see §601.601(d)(2)(ii)(*b*) of this chapter).

(h) *Segregation requirement*—(1) *In general.* If it is not a trust under applicable state law, a fund, account, or trust satisfies the requirements of paragraph (c)(3) of this section if its assets are physically segregated from other assets of the transferor (and related persons). For example, cash held by a transferor in a separate bank account satisfies the segregation requirement of paragraph (c)(3) of this section.

(2) *Classification of fund established to resolve or satisfy allowable and non-allowable claims.* If a fund, account, or trust is established to resolve or satisfy claims described in paragraph (c)(2) of this section as well as other types of claims (*i.e.*, non-allowable claims) arising from the same event or related series of events, the fund is a qualified settlement fund. However, under §1.468B–3(c), economic performance does not occur with respect to transfers to the qualified settlement fund for non-allowable claims.

(i) [Reserved]

(j) *Classification of fund prior to satisfaction of requirements in paragraph (c) of this section*—(1) *In general.* If a fund, account, or trust is established to resolve or satisfy claims described in paragraph (c)(2) of this section, the assets of the fund, account, or trust are treated as owned by the transferor of those assets until the fund, account, or trust also meets the requirements of paragraphs (c) (1) and (3) of this section. On the date the fund, account, or trust satisfies all the requirements of paragraph (c) of this section, the transferor is treated as transferring the assets to a qualified settlement fund.

(2) *Relation-back rule*—(i) *In general.* If a fund, account, or trust meets the requirements of paragraphs (c)(2) and (c)(3) of this section prior to the time it meets the requirements of paragraph (c)(1) of this section, the transferor and administrator (as defined in §1.468B–2(k)(3)) may jointly elect (a relation-back election) to treat the fund, account, or trust as coming into existence as a qualified settlement fund on the later of the date the fund, account, or trust meets the requirements of paragraphs (c)(2) and (c)(3) of this section or January 1 of the calendar year in which all the requirements of paragraph (c) of this section are met. If a relation-back election is made, the assets held by the fund, account, or trust on the date the qualified settlement fund is treated as coming into existence are treated as transferred to the qualified settlement fund on that date.

(ii) *Relation-back election.* A relation-back election is made by attaching a copy of the election statement, signed by each transferor and the administrator, to (and as part of) the timely filed income tax return (including extensions) of the qualified settlement fund for the taxable year in which the fund is treated as coming into existence. A copy of the election statement must also be attached to (and as part of) the timely filed income tax return (including extensions), or an amended return that is consistent with the requirements of §§1.468B–1 through 1.468B–4, of each transferor for the taxable year of the transferor that includes the date on which the qualified settlement fund is treated as coming into existence. The election statement must contain—

(A) A legend, ‘‘§1.468B–1 Relation-Back Election’’, at the top of the first page;

(B) Each transferor’s name, address, and taxpayer identification number;

(C) The qualified settlement fund’s name, address, and employer identification number;

(D) The date as of which the qualified settlement fund is treated as coming into existence; and

(E) A schedule describing each asset treated as transferred to the qualified settlement fund on the date the fund is treated as coming into existence. The schedule of assets does not have to identify the amount of cash or the property treated as transferred by a particular transferor. If the schedule does not identify the transferor of each asset, however, each transferor must include with the copy of the election statement that is attached to its income tax return (or amended return) a schedule describing each asset the transferor is treated as transferring to the qualified settlement fund.

(k) *Examples.* The following examples illustrate the rules of this section:

Example 1. In a class action brought in a United States federal district court, the court holds that the defendant, Corporation X, violated certain securities laws and must pay damages in the amount of $150 million. Pursuant to an order of the court, Corporation X transfers $50 million in cash and transfers property with a fair market value of $75 million to a state law trust. The trust will liquidate the property and distribute the cash proceeds to the plaintiffs in the class action. The trust is a qualified settlement fund because it was established pursuant to the order of a federal district court to resolve or satisfy claims against Corporation X for securities law violations that have occurred.

Example 2. (i) Assume the same facts as in *Example 1,* except that Corporation X and the class of plaintiffs reach an out-of-court settlement that requires Corporation X to establish and fund a state law trust before the settlement agreement is submitted to the court for approval.

(ii) The trust is not a qualified settlement fund because it neither is established pursuant to an order of, nor has it been approved by, a governmental authority described in paragraph (c)(1) of this section.

Example 3. On June 1, 1994, Corporation Y establishes a fund to resolve or satisfy claims against it arising from the violation of certain securities laws. On that date, Corporation Y transfers $10 million to a segregated account. On December 1, 1994, a federal district court approves the fund. Assuming Corporation Y and the administrator of the qualified settlement fund do not make a relation-back election, Corporation Y is treated as the owner of the $10 million, and is taxable on any income earned on that money, from June 1 through November 30, 1994. The fund is a qualified settlement fund beginning on December 1, 1994.

Example 4. (i) On September 1, 1993, Corporation X, which has a taxable year ending on October 31, enters into a settlement agreement with a plaintiff class for asserted tort liabilities. Under the settlement agreement, Corporation X makes two $50 million payments into a segregated fund, one on September 1, 1993, and one on October 1, 1993, to resolve or satisfy the tort liabilities. A federal district court approves the settlement agreement on November 1, 1993.

(ii) The administrator of the fund and Corporation X elect to treat the fund as a qualified settlement fund prior to governmental approval under the relation-back rule of paragraph (j)(2) of this section. The administrator must attach the relation-back election statement to the fund's income tax return for calendar year 1993, and Corporation X must attach the election to its original or amended income tax return for its taxable year ending October 31, 1993.

(iii) Pursuant to the relation-back election, the fund begins its existence as a qualified settlement fund on September 1, 1993, and Corporation X is treated as transferring $50 million to the qualified settlement fund on September 1, 1993, and $50 million on October 1, 1993.

(iv) With respect to these transfers, Corporation X must provide the statement described in § 1.468B–3(e) to the administrator of the qualified settlement fund by February 15, 1994, and must attach a copy of this statement to its original or amended income tax return for its taxable year ending October 31, 1993.

Example 5. Assume the same facts as in *Example 4,* except that the court approves the settlement on May 1, 1994. The administrator must attach the relation-back election statement to the fund's income tax return for calendar year 1994, and Corporation X must attach the election statement to its original or amended income tax return for its taxable year ending October 31, 1994. Pursuant to this election, the fund begins its existence as a qualified settlement fund on January 1, 1994. In addition, Corporation X is treated as transferring to the qualified settlement fund all amounts held in the fund on January 1, 1994. With respect to the transfer, Corporation X must provide the statement described in § 1.468B–3(e) to the administrator of the qualified settlement fund by February 15, 1995, and must attach a copy of this statement to its income tax return for its taxable year ending October 31, 1994.

Example 6. Corporation Z establishes a fund that meets all the requirements of section 468B(d)(2) for a designated settlement fund, except that Corporation Z does not make the election under section 468B(d)(2)(F). Although the fund does not qualify as a designated settlement fund, it is a qualified settlement fund because the fund meets the requirements of paragraph (c) of this section.

Example 7. Corporation X owns and operates a landfill in State A. State A requires Corporation X to transfer money to a trust annually based on the total tonnage of material placed in the landfill during the year. Under the laws of State A, Corporation X will be required to perform (either itself or through contractors) specified closure activities when the landfill is full, and the trust assets will be used to reimburse Corporation X for those closure costs. The trust is not a qualified settlement fund because it is established to secure the liability of Corporation X to perform the closure activities.

[T.D. 8459, 57 FR 60989, Dec. 23, 1992; 58 FR 7865, Feb. 10, 1993]

§ 1.468B–2 Taxation of qualified settlement funds and related administrative requirements.

(a) *In general.* A qualified settlement fund is a United States person and is subject to tax on its modified gross income for any taxable year at a rate equal to the maximum rate in effect for that taxable year under section 1(e).

(b) *Modified gross income.* The ''modified gross income'' of a qualified settlement fund is its gross income, as defined in section 61, computed with the following modifications—

(1) In general, amounts transferred to the qualified settlement fund by, or on behalf of, a transferor to resolve or satisfy a liability for which the fund is established are excluded from gross income. However, dividends on stock of a transferor (or a related person), interest on debt of a transferor (or a related person), and payments in compensation for late or delayed transfers, are not excluded from gross income.

(2) A deduction is allowed for administrative costs and other incidental expenses incurred in connection with the operation of the qualified settlement fund that would be deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a corporation. Administrative costs and other incidental expenses include state and local taxes, legal, accounting, and actuarial fees relating to the operation of the qualified settlement fund, and expenses arising from the notification of claimants and the processing of their claims. Administrative costs and other incidental expenses do not include legal fees incurred by, or on behalf of, claimants.

(3) A deduction is allowed for losses sustained by the qualified settlement fund in connection with the sale, exchange, or worthlessness of property held by the fund to the extent the losses would be deductible in determining the taxable income of a corporation under section 165 (f) or (g), and sections 1211(a) and 1212(a).

(4) A deduction is allowed for the amount of a net operating loss of the qualified settlement fund to the extent the loss would be deductible in determining the taxable income of a corporation under section 172(a). For purposes of this paragraph (b)(4), the net operating loss of a qualified settlement fund for a taxable year is the amount by which the deductions allowed under paragraphs (b)(2) and (b)(3) of this section exceed the gross income of the fund computed with the modification described in paragraph (b)(1) of this section.

(c) *Partnership interests held by a qualified settlement fund on February 14, 1992*—(1) *In general.* For taxable years ending prior to January 1, 2003, a qualified settlement fund that holds a partnership interest it acquired prior to February 15, 1992, is allowed a deduction for its distributive share of that partnership's items of loss, deduction, or credit described in section 702(a) that would be deductible in determining the taxable income (or in the case of a credit, the income tax liability) of a corporation to the extent of the fund's distributive share of that partnership's items of income and gain described in section 702(a) for the same taxable year. For purposes of this paragraph (c)(1), a distributive share of a partnership credit is treated as a deduction in an amount equal to the amount of the credit divided by the rate described in paragraph (a) of this section.

(2) *Limitation on changes in partnership agreements and capital contributions.* For purposes of paragraph (c)(1) of this section, changes in a qualified settlement fund's distributive share of items of income, gain, loss, deduction, or credit are disregarded if—

(i) They result from a change in the terms of the partnership agreement on or after December 18, 1992, or a capital contribution to the partnership on or after December 18, 1992, unless the partnership agreement as in effect prior to December 18, 1992, requires the contribution; and

(ii) A principal purpose of the change in the terms of the partnership agreement or the capital contribution is to circumvent the limitation described in paragraph (c)(1) of this section.

(d) *Distributions to transferors and claimants.* Amounts that are distributed by a qualified settlement fund to, or on behalf of, a transferor or a claimant are not deductible by the fund.

(e) *Basis of property transferred to a qualified settlement fund.* A qualified settlement fund's initial basis in property it receives from a transferor (or from an insurer or other person on behalf of a transferor) is the fair market value of that property on the date of transfer to the fund.

(f) *Distribution of property.* A qualified settlement fund must treat a distribution of property as a sale or exchange of that property for purposes of section 1001(a). In computing gain or loss, the amount realized by the qualified settlement fund is the fair market value of the property on the date of distribution.

(g) *Other taxes.* The tax imposed under paragraph (a) of this section is in lieu of any other taxation of the income of a qualified settlement fund under subtitle A of the Internal Revenue Code. Thus, a qualified settlement fund is not subject to the alternative minimum tax of section 55, the accumulated earnings tax of section 531, the personal holding company tax of section 541, or the maximum capital gains rate of section 1(h). A qualified settlement fund is, however, subject to taxes that are not imposed on the income of a taxpayer, such as the tax on transfers of property to foreign entities under section 1491.

(h) *Denial of credits against tax.* The tax imposed on the modified gross income of a qualified settlement fund under paragraph (a) of this section may not be reduced or offset by any credits against tax provided by part IV of subchapter A of chapter 1 of the Internal Revenue Code.

(i) [Reserved]

(j) *Taxable year and accounting method.* The taxable year of a qualified settlement fund is the calendar year. A qualified settlement fund must use an accrual method of accounting within the meaning of section 446(c).

(k) *Treatment as corporation for purposes of subtitle F.* Except as otherwise provided in § 1.468B–5(b), for purposes of subtitle F of the Internal Revenue Code, a qualified settlement fund is treated as a corporation and any tax imposed under paragraph (a) of this section is treated as a tax imposed by section 11. Subtitle F rules that apply to qualified settlement funds include, but are not limited to—

(1) A qualified settlement fund must file an income tax return with respect to the tax imposed under paragraph (a) of this section for each taxable year that the fund is in existence, whether or not the fund has gross income for that taxable year.

(2) A qualified settlement fund is in existence for the period that—

(i) Begins on the first date on which the fund is treated as a qualified settlement fund under § 1.468B–1; and

(ii) Ends on the earlier of the date the fund—

(A) No longer satisfies the requirements of § 1.468B–1; or

(B) No longer has any assets and will not receive any more transfers. (See paragraph (m) of this section for procedures for the prompt assessment of tax.)

(3) The income tax return of the qualified settlement fund must be filed on or before March 15 of the year following the close of the taxable year of the qualified settlement fund unless the fund is granted an extension of time for filing under section 6081. The return must be made by the administrator of the qualified settlement fund. The ‘‘administrator’’ (which may include a trustee if the qualified settlement fund is a trust) of a qualified settlement fund is, in order of priority—

(i) The person designated, or approved, by the governmental authority that ordered or approved the fund for purposes of § 1.468B–1(c)(1);

(ii) The person designated in the escrow agreement, settlement agreement, or other similar agreement governing the fund;

(iii) The escrow agent, custodian, or other person in possession or control of the fund's assets; or

(iv) The transferor or, if there are multiple transferors, all the transferors, unless an agreement signed by all the transferors designates a single transferor as the administrator.

(4) The administrator of a qualified settlement fund must obtain an employer identification number for the fund.

(5) A qualified settlement fund must deposit all payments of tax imposed under paragraph (a) of this section (including any payments of estimated tax) with an authorized government depositary in accordance with §1.6302–1.

(6) A qualified settlement fund is subject to the addition to tax imposed by section 6655 in the case of an underpayment of estimated tax computed with respect to the tax imposed under paragraph (a) of this section. For purposes of section 6655(g)(2), a qualified settlement fund's taxable income is its modified gross income and a transferor is not considered a predecessor of a qualified settlement fund.

(l) *Information reporting and withholding requirements*—(1) *Payments to a qualified settlement fund.* Payments to a qualified settlement fund are treated as payments to a corporation for purposes of the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code.

(2) *Payments and distributions by a qualified settlement fund*—(i) *In general.* Payments and distributions by a qualified settlement fund are subject to the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code (Code), and the withholding requirements of subchapter A of chapter 3 of subtitle A and subtitle C of the Code.

(ii) *Special rules.* The following rules apply with respect to payments and distributions by a qualified settlement fund—

(A) A qualified settlement fund must make a return for, or must withhold tax on, a distribution to a claimant if one or more transferors would have been required to make a return or withhold tax had that transferor made the distribution directly to the claimant;

(B) For purposes of sections 6041(a) and 6041A, if a qualified settlement fund makes a payment or distribution to a transferor, the fund is deemed to make the payment or distribution to the transferor in the course of a trade or business;

(C) For purposes of sections 6041(a) and 6041A, if a qualified settlement fund makes a payment or distribution on behalf of a transferor or a claimant, the fund is deemed to make the payment or distribution to the recipient of that payment or distribution in the course of a trade or business;

(D) With respect to a distribution or payment described in paragraph (l)(2)(ii)(C) of this section and the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code, the qualified settlement fund is also deemed to have made the distribution or payment to the transferor or claimant.

(m) *Request for prompt assessment.* A qualified settlement fund is eligible to request the prompt assessment of tax under section 6501(d). For purposes of section 6501(d), a qualified settlement fund is treated as dissolving on the date the fund no longer has any assets (other than a reasonable reserve for potential tax liabilities and related professional fees) and will not receive any more transfers.

(n) *Examples.* The following examples illustrate the rules of this section:

Example 1. On June 30, 1993, a United States federal district court approves the settlement of a lawsuit under which Corporation X must transfer $10,833,000 to a qualified settlement fund on August 1, 1993. The $10,833,000 includes $10 million of damages incurred by plaintiffs on October 1, 1992, and $833,000 of interest calculated at 10 percent annually from October 1, 1992, to August 1, 1993. The $833,000 of interest is not a payment to the qualified settlement fund in compensation for a late or delayed transfer to the fund within the meaning of paragraph (b)(1) of this section because the payment of $10,833,000 to the fund is not due until August 1, 1993.

Example 2. Assume the same facts as in *Example 1* except that the settlement agreement also provides for interest to accrue at a rate of 12 percent annually on any amount not transferred to the qualified settlement fund on August 1, 1993, and the only transfer Corporation X makes to the fund is $11,374,650 on January 1, 1994. The additional payment of $541,650 ($11,374,650 paid on January 1, 1994, less $10,833,000 due on August 1, 1993) is a payment to the qualified settlement fund in compensation for a late or delayed transfer to the fund within the meaning of paragraph (b)(1) of this section.

[T.D. 8459, 57 FR 60991, Dec. 23, 1992; 58 FR 7865, Feb. 10, 1993]

§ 1.468B–3 Rules applicable to the transferor.

(a) *Transfer of property*—(1) *In general.* A transferor must treat a transfer of property to a qualified settlement fund as a sale or exchange of that property for purposes of section 1001(a). In computing the gain or loss, the amount realized by the transferor is the fair market value of the property on the date the transfer is made (or is treated as made under § 1.468B–1(g)) to the qualified settlement fund. Because the issuance of a transferor's debt, obligation to provide services or property in the future, or obligation to make a payment described in § 1.461–4(g), is generally not a transfer of property by the transferor, it generally does not result in gain or loss to the transferor under this paragraph (a)(1). If a person other than the transferor transfers property to a qualified settlement fund, there may be other tax consequences as determined under general federal income tax principles.

(2) *Anti-abuse rule.* The Commissioner may disallow a loss resulting from the transfer of property to a qualified settlement fund if the Commissioner determines that a principal purpose for the transfer was to claim the loss and—

(i) The transferor places significant restrictions on the fund's ability to use or dispose of the property; or

(ii) The property (or substantially similar property) is distributed to the transferor (or a related person).

(b) *Qualified appraisal requirement for transfers of certain property*—(1) *In general.* A transferor must obtain a qualified appraisal to support a loss or deduction it claims with respect to a transfer to a qualified settlement fund of the following types of property—

(i) Nonpublicly traded securities (as defined in § 1.170A–13(c)(7)(ix)) issued by the transferor (or a related person); and

(ii) Interests in the transferor (if the transferor is a partnership) and in a partnership in which the transferor (or a related person) is a direct or indirect partner.

(2) *Provision of copies.* The transferor must provide a copy of the qualified appraisal to the administrator of the qualified settlement fund no later than February 15 of the year following the calendar year in which the property is transferred. The transferor also must attach a copy of the qualified appraisal to (and as part of) its timely filed income tax return (including extensions) for the taxable year of the transferor in which the transfer is made.

(3) *Qualified appraisal.* A ''qualified appraisal'' is a written appraisal that—

(i) Is made within 60 days before or after the date the property is transferred to the qualified settlement fund;

(ii) Is prepared, signed, and dated by an individual who is a qualified appraiser within the meaning of § 1.170A–13(c)(5);

(iii) Includes the information required by paragraph (b)(4) of this section; and

(iv) Does not involve an appraisal fee of the type prohibited by § 1.170A–13(c)(6).

(4) *Information included in a qualified appraisal.* A qualified appraisal must include the following information—

(i) A description of the appraised property;

(ii) The date (or expected date) of the property's transfer to the qualified settlement fund;

(iii) The appraised fair market value of the property on the date (or expected date) of transfer;

(iv) The method of valuing the property, such as the comparable sales approach;

(v) The specific basis for the valuation, such as specific comparable sales or statistical sampling, including a justification for using comparable sales or statistical sampling and an explanation of the procedure employed;

(vi) The terms of any agreement or understanding entered into (or expected to be entered into) by or on behalf of the transferor (or a related person) or the qualified settlement fund that relates to the use, sale, or other disposition of the transferred property, including, for example, the terms of any agreement or understanding that temporarily or permanently—

(A) Restricts the qualified settlement fund's right to use or dispose of the property; or

(B) Reserves to, or confers upon, any person other than the qualified settlement fund any right (including designating another person as having the right) to income from the property, to possess the property (including the right to purchase or otherwise acquire the property), or to exercise any voting rights with respect to the property;

(vii) The name, address, and taxpayer identification number of the qualified appraiser; and if the qualified appraiser is acting in his or her capacity as a partner in a partnership, an employee of any person, or an independent contractor engaged by a person other than the transferor, the name, address, and taxpayer identification number of the partnership or the person who employs or engages the qualified appraiser;

(viii) The qualifications of the qualified appraiser, including the appraiser's background, experience, education, and membership, if any, in professional appraisal associations; and

(ix) A statement that the appraisal was prepared for income tax purposes.

(5) *Effect of signature of the qualified appraiser.* Any appraiser who falsely or fraudulently overstates the value of the transferred property referred to in a qualified appraisal may be subject to a civil penalty under section 6701 for aiding and abetting an understatement of tax liability and may have appraisals disregarded pursuant to 31 U.S.C. 330(c).

(c) *Economic performance*—(1) *In general.* Except as otherwise provided in this paragraph (c), for purposes of section 461(h), economic performance occurs with respect to a liability described in §1.468B–1(c)(2) (determined with regard to §1.468B–1(f) and (g)) to the extent the transferor makes a transfer to a qualified settlement fund to resolve or satisfy the liability.

(2) *Right to a refund or reversion*—(i) *In general.* Economic performance does not occur to the extent—

(A) The transferor (or a related person) has a right to a refund or reversion of a transfer if that right is exercisable currently and without the agreement of an unrelated person that is independent or has an adverse interest (e.g., the court or agency that approved the fund, or the fund claimants); or

(B) Money or property is transferred under conditions that allow its refund or reversion by reason of the occurrence of an event that is certain to occur, such as the passage of time, or if restrictions on its refund or reversion are illusory.

(ii) *Right extinguished.* With respect to a transfer described in paragraph (c)(2)(i) of this section, economic performance is deemed to occur on the date, and to the extent, the transferor's right to a refund or reversion is extinguished.

(3) *Obligations of a transferor.* Economic performance does not occur when a transferor transfers to a qualified settlement fund its debt (or the debt of a related person). Instead, economic performance occurs as the transferor (or related person) makes principal payments on the debt. Similarly, economic performance does not occur when a transferor transfers to a qualified settlement fund its obligation (or the obligation of a related person) to provide services or property in the future, or to make a payment described in §1.461–4(g). Instead, economic performance with respect to such an obligation occurs as services, property or payments are provided or made to the qualified settlement fund or a claimant.

(d) *Payment of insurance amounts.* No deduction is allowed to a transferor for a transfer to a qualified settlement fund to the extent the transferred amounts represent amounts received from the settlement of an insurance claim and are excludable from gross income. If the settlement of an insurance claim occurs after a transferor makes a transfer to a qualified settlement fund for which a deduction has been taken, the transferor must include in income the amounts received from the settlement of the insurance claim to the extent of the deduction.

(e) *Statement to the qualified settlement fund and the Internal Revenue Service*—(1) *In general.* A transferor must provide the statement described in paragraph (e)(2) of this section to the administrator of a qualified settlement fund no later than February 15 of the year following each calendar year in which the transferor (or an insurer or other person on behalf of the transferor) makes a transfer to the fund. The transferor must attach a copy of the statement to (and as part of) its timely filed income tax return (including extensions) for the taxable year of the transferor in which the transfer is made.

(2) *Required statement*—(i) *In general.* The statement required by this paragraph (e) must provide the following information—

(A) A legend, ''§ 1.468B–3 Statement'', at the top of the first page;

(B) The transferor's name, address, and taxpayer identification number;

(C) The qualified settlement fund's name, address, and employer identification number;

(D) The date of each transfer;

(E) The amount of cash transferred; and

(F) A description of property transferred and its fair market value on the date of transfer.

(ii) *Combined statements.* If a qualified settlement fund has more than one transferor, any two or more of the transferors may provide a combined statement to the administrator that does not identify the amount of cash or the property transferred by a particular transferor. If a combined statement is used, however, each transferor must include with its copy of the statement that is attached to its income tax return a schedule describing each asset that the transferor transferred to the qualified settlement fund.

(f) *Distributions to transferors*—(1) *In general.* A transferor must include in gross income any distribution (including a deemed distribution described in paragraph (f)(2) of this section) it receives from a qualified settlement fund. If property is distributed, the amount includible in gross income and the basis in that property, is the fair market value of the property on the date of the distribution.

(2) *Deemed distributions*—(i) *Other liabilities.* If a qualified settlement fund makes a distribution on behalf of a transferor to a person that is not a claimant, or to a claimant to resolve or satisfy a liability of the transferor (or a related person) other than a liability described in § 1.468B–1(c)(2) for which the fund was established, the distribution is deemed made by the fund to the transferor. The transferor, in turn, is deemed to have made a payment to the actual recipient.

(ii) *Constructive receipt.* To the extent a transferor acquires a right to a refund or reversion described in paragraph (c)(2) of this section of all or a portion of the assets of a qualified settlement fund subsequent to the transfer of those assets to the fund, the fund is deemed to distribute those assets to the transferor on the date the right is acquired.

(3) *Tax benefit rule.* A distribution described in paragraph (f)(1) or (f)(2) of this section is excluded from the gross income of a transferor to the extent provided by section 111(a).

(g) *Example.* The following example illustrates the rules of this section:

Example. On March 1, 1993, Individual A transfers $1 million to a qualified settlement fund to resolve or satisfy claims against him resulting from certain violations of securities laws. Individual A uses the cash receipts and disbursements method of accounting. Since Individual A does not use the accrual method of accounting, the economic performance rules of paragraph (c) of this section are not applicable. Therefore, whether, when, and to what extent Individual A can deduct the transfer is determined under applicable provisions of the Internal Revenue Code, such as sections 162 and 461.

[T.D. 8459, 57 FR 60992, Dec. 23, 1992]

§ 1.468B–4 Taxability of distributions to claimants.

Whether a distribution to a claimant is includible in the claimant's gross income is generally determined by reference to the claim in respect of which the distribution is made and as if the distribution were made directly by the transferor. For example, to the extent a distribution is in satisfaction of damages on account of personal injury or sickness, the distribution may be excludable from gross income under section 104(a)(2). Similarly, to the extent a distribution is in satisfaction of a claim for foregone taxable interest, the distribution is includible in the claimant's gross income under section 61(a)(4).

[T.D. 8459, 57 FR 60994, Dec. 23, 1992]

§ 1.468B–5 Effective dates and transition rules.

(a) *In general.* Section 468B, including section 468B(g), is effective as provided in the Tax Reform Act of 1986 and the

Technical and Miscellaneous Revenue Act of 1988. Except as otherwise provided in this section, §§1.468B–1 through 1.468–4 are effective on January 1, 1993. Thus, the regulations apply to income of a qualified settlement fund earned after December 31, 1992, transfers to a fund after December 31, 1992, and distributions from a fund after December 31, 1992. For purposes of §1.468B–3(c) (relating to economic performance), previously transferred assets held by a qualified settlement fund on the date these regulations first apply to the fund (i.e., January 1, 1993, or the earlier date provided under paragraph (b)(2) of this section) are treated as transferred to the fund on that date, to the extent no taxpayer has previously claimed a deduction for the transfer.

(b) *Taxation of certain pre-1996 fund income*—(1) *Reasonable method*—(i) *In general.* With respect to a fund, account, or trust established after August 16, 1986, but prior to February 15, 1992, that satisfies (or, if it no longer exists, would have satisfied) the requirements of §1.468B–1(c), the Internal Revenue Service will not challenge a reasonable, consistently applied method of taxation for transfers to the fund, income earned by the fund, and distributions made by the fund after August 16, 1986, but prior to January 1, 1996. A method is generally considered reasonable if, depending on the facts and circumstances, all transferors and the administrator of the fund have consistently treated transfers to the fund, income earned by the fund, and distributions made by the fund after August 16, 1986, as if the fund were—

(A) A grantor trust and the transferors are the grantors;

(B) A complex trust and the transferors are the grantors; or

(C) A designated settlement fund.

(ii) *Qualified settlement funds established after February 14, 1992, but before January 1, 1993.* With respect to a fund, account, or trust established after February 14, 1992, but prior to January 1, 1993, that satisfies the requirements of §1.468B–1(c), the Internal Revenue Service will not challenge a reasonable, consistently applied method of taxation as described in paragraph (b)(1)(i) of this section for transfers to, income earned by, and distributions made by the fund prior to January 1, 1993. However, pursuant to paragraph (a) of this section, sections 1.468B–1 through 1.468B–4 apply to transfers to, income earned by, and distributions made by the qualified settlement fund after 1992.

(iii) *Use of cash method of accounting.* For purposes of paragraphs (b)(i) and (b)(ii) of this section, for taxable years beginning prior to January 1, 1996, the Internal Revenue Service will not challenge the use of the cash receipts and disbursement method of accounting by a fund, account, or trust.

(iv) *Unreasonable position.* In no event is it a reasonable position to assert, pursuant to Rev. Rul. 71–119 (see §601.601(d)(2)(ii)(*b*) of this chapter), that there is no current taxation of the income of a fund established after August 16, 1986.

(v) *Waiver of penalties.* For taxable years beginning prior to January 1, 1993, if a fund, account or trust is subject to section 468B(g) and the Internal Revenue Service does not challenge the method of taxation for transfers to, income earned by, and distributions made by, the fund pursuant to paragraph (b)(1)(i) or (b)(1)(ii) of this section, penalties will not be imposed in connection with the use of such method. For example, the penalties under section 6655 for failure to pay estimated tax, section 6651(a)(1) for failure to file a return, section 6651(a)(2) for failure to pay tax, section 6656 for failure to make deposit of taxes, and section 6662 for accuracy-related underpayments will generally not be imposed.

(2) *Election to apply qualified settlement fund rules*—(i) *In general.* The person that will be the administrator of a qualified settlement fund may elect to apply §§1.468B–1 through 1.468B–4 to transfers to, income earned by, and distributions made by, the fund in taxable years ending after August 16, 1986. The election is effective beginning on the first day of the earliest open taxable year of the qualified settlement fund. For purposes of this paragraph (b)(2), a taxable year is considered open if the period for assessment and collection of tax has not expired pursuant to the rules of section 6501. The election

statement must provide the information described in paragraph (b)(2)(ii) of this section and must be signed by the person that will be the administrator. Such person must also provide each transferor of the qualified settlement fund with a copy of the election statement on or before March 15, 1993.

(ii) *Election statement.* The election statement must provide the following information—

(A) A legend, ''§ 1.468B–5(b)(2) Election'', at the top of the first page;

(B) Each transferor's name, address, and taxpayer identification number;

(C) The qualified settlement fund's name, address, and employer identification number; and

(D) The date the qualified settlement fund was established within the meaning of § 1.468B–1(j).

(iii) *Due date of returns and amended returns.* The election statement described in paragraph (b)(2)(ii) of this section must be filed with, and as part of, the qualified settlement fund's timely filed tax return for the taxable year ended December 31, 1992. In addition, the qualified settlement fund must file an amended return that is consistent with the requirements of §§ 1.468B–1 through 1.468B–4 for any taxable year to which the election applies in which the fund took a position inconsistent with those requirements. Any such amended return must be filed no later than March 15, 1993, and must include a copy of the election statement described in paragraph (b)(2)(ii) of this section.

(iv) *Computation of interest and waiver of penalties.* For purposes of section 6601 and section 6611, the income tax return for each taxable year of the qualified settlement fund to which the election applies is due on March 15 of the year following the taxable year of the fund. For taxable years of a qualified settlement fund ending prior to January 1, 1993, the income earned by the fund is deemed to have been earned on December 31 of each taxable year for purposes of section 6655. Thus, the addition to tax for failure to pay estimated tax under section 6655 will not be imposed. The penalty for failure to file a return under section 6651(a)(1), the penalty for failure to pay tax under section 6651(a)(2), the penalty for failure to make deposit of taxes under section 6656, and the accuracy-related penalty under section 6662 will not be imposed on a qualified settlement fund if the fund files its tax returns for taxable years ending prior to January 1, 1993, and pays any tax due for those taxable years, on or before March 15, 1993.

(6) Intercompany transactions.
(i) In general.
(ii) Example.
(iii) Effective dates.
(h)(7)–(k) [Reserved]

§1.469–1T General rules (temporary).

(a) Passive activity loss and credit disallowed.

(1) In general.

(2) Exceptions.

(b) Taxpayers to whom these rules apply.

(c) Cross references.

(1) Definition of passive activity.

(2) Passive activity loss.

(3) Passive activity credit.

(4) Effect of rules for other purposes.

(5) Special rule for oil and gas working interests.

(6) Treatment of disallowed losses and credits.

(7) Corporations subject to section 469.

(8) [Reserved]

(9) Joint returns.

(10) Material participation.

(11) Effective date and transition rules.

(12) Future regulations.

(d) Effect of section 469 and the regulations thereunder for other purposes.

(1) Treatment of items of passive activity income and gain.

(2) Coordination with sections 613A(d) and 1211. [Reserved]

(3) Treatment of passive activity losses.

(e) Definition of ‘‘passive activity.’’

(1) In general.

(2) Trade or business activity. [Reserved]

(3) Rental Activity.

(i) In general.

(ii) Exceptions.

(iii) Average period of customer use. [Reserved]

(A) In general. [Reserved]

(B) Average use factor. [Reserved]

(C) Average period of customer use for class of property. [Reserved]

(D) Period of Customer use. [Reserved]

(E) Class of property. [Reserved]

(F) Gross rental income and daily rent. [Reserved]

(iv) Significant personal services.

(A) In general.

(B) Excluded services.

(v) Extraordinary personal services.

(vi) Rental of property incidental to a nonrental activity of the taxpayer.

(A) In general.

(B) Property held for investment.

(C) Property used in a trade or business.

(D) Lodging rented for convenience of employer. [Reserved]

(E) Unadjusted basis. [Reserved]

(vii) Property made available for use in a nonrental activity conducted by a partnership, S corporation or joint venture in which the taxpayer owns an interest.

(viii) Examples.

(4) Special rules for oil and gas working interests.

(i) In general.

(ii) Exception for deductions attributable to a period during which liability is limited.

(A) In general.

(B) Coordination with rules governing the identification of disallowed passive activity deductions.

(C) Meaning of certain terms.

(*1*) Allocable deductions.

(*2*) Disqualified deductions.

(*3*) Net loss.

(*4*) Ratable portion.

(iii) Examples.

(iv) Definition of ‘‘working interest.’’ [Reserved]

(v) Entities that limit liability.

(A) General rule.

(B) Other limitations disregarded.

(C) Examples.

(vi) Cross reference to special rule for income from certain oil or gas properties.

(5) Rental of dwelling unit. [Reserved]

(6) Activity of trading personal property.

(i) In general.

(ii) Personal property.

(iii) Example.

(f) Treatment of disallowed passive activity losses and credits.

(1) Scope of this paragraph.

(2) Identification of disallowed passive activity deductions.

(i) Allocation of disallowed passive activity deductions.

(A) General rule.

(B) Loss from an activity.

(C) Significant participation passive activities.

(D) Examples.

(ii) Allocation with loss activities.

(A) In general.

(B) Excluded deductions.

(iii) Separately identified deductions.

(3) Identification of disallowed credits from passive activities.

(i) General rule.

(ii) Coordination rule.

(iii) Separately identified credits.

(4) Carryover of disallowed deductions and credits. [Reserved]

(i) In general.

(ii) Operations continued through C corporations or similar entities.

(iii) Examples.

(g) Application of these rules to C corporations.

(1) In general.

(2) Definitions.

(3) Participation of corporations.

(i) Material participation.

(ii) Significant participation.

(iii) Participation of individual.

(4) Modified computation of passive activity loss in the case of closely held corporations.

(i) In general.

(ii) Net active income.

(iii) Examples.

(5) Allowance of passive activity credit of closely held corporations to extent of net active income tax liability.

(i) In general.

(ii) Net active income tax liability.

(h) Special rules for affiliated group filing consolidated return.

(1)–(2) [Reserved]

(3) Disallowance of consolidated group's passive activity loss or credit.

(4) Status and participation of members. [Reserved]

(i) Determination by reference to status and participation of group. [Reserved]

(ii) Determination of status and participation of consolidated group. [Reserved]

(5) Modification of rules for identifying disallowed passive activity deductions and credits.

(i) Identification of disallowed deductions.

(ii) Ratable portion of disallowed passive activity losses.

(iii) Identification of disallowed credits.

(6) [Reserved]

(7) Disposition of stock of a member of an affiliated group.

(8) Dispositions of property used in multiple activities.

(i) [Reserved]

(j) Spouses filing joint returns.

(1) In general.

(2) Exceptions of treatment as one taxpayer.

(i) Identification of disallowed deductions and credits.

(ii) Treatment of deductions disallowed under sections 704(d), 1366(d) and 465.

(iii) Treatment of losses from working interests.

(3) Joint return no longer filed.

(4) Participation of spouses.

(k) Former passive activities and changes in status of corporations. [Reserved]

§ 1.469–2 Passive activity loss.

(a)–(c)(2)(ii) [Reserved]

(iii) Disposition of substantially appreciated property formerly used in a nonpassive activity.

(A) In general.

(B) Date of disposition.

(C) Substantially appreciated property.

(D) Investment property.

(E) Coordination with § 1.469–2T(c)(2)(ii).

(F) Coordination with section 163(d).

(G) Examples.

(iv) Taxable acquisitions.

(v) Property held for sale to customers.

(A) Sale incidental to another activity.

(*1*) Applicability.

(*i*) In general.

(*ii*) Principal purpose.

(*2*) Dealing activity not taken into account.

(B) Use in a nondealing activity incidental to sale.

(C) Examples.

(c)(3)–(c)(5) [Reserved]

(6) Gross income from certain oil or gas properties.

(i) In general.

(ii) Gross and net passive income from the property.

(iii) Property.

(iv) Examples 1 and 2.

(c)(6)(iv) Example 3–(c)(7)(iii) [Reserved]

(c)(7)(iv) through (vi) (no paragraph headings)

(d)(1)–(d)(2)(viii) [Reserved]

(d)(2)(ix) through (d)(2)(xii) (no paragraph headings)

(d)(3)–(d)(5)(ii) [Reserved]

(d)(5)(iii)(A) Applicability of rules in § 1.469–2T(c)(2).

(d)(5)(iii)(B)–(d)(6)(v)(D) [Reserved]

(d)(6)(v)(E) (no paragraph heading)

(d)(6)(v)(F)–(d)(7) [Reserved]

(8) Taxable year in which item arises.

(e)(1)–(e)(2)(i) [Reserved]

(ii) Section 707(c).

(iii) Payments in liquidation of a partner's interest in partnership property.

(A) In general.

(B) Payments in liquidation of a partner's interest in unrealized receivables and goodwill under section 736(a).

(e)(3)(i)–(iii)(A) [Reserved]

(e)(3)(iii)(B) (no paragraph heading)

(e)(3)(iii)(C)–(f)(4) [Reserved]

(5) Net income from certain property rented incidental to development activity.

(i) In general.

(ii) Commencement of use.

(iii) Services performed for the purpose of enhancing the value of property.

(iv) Examples.

(6) Property rented to a nonpassive activity.

(f)(7)–(f)(9)(ii) [Reserved]

(f)(9)(iii) through (f)(9)(iv) (no paragraph heading).

(10) Coordination with section 163(d).

(f)(11) [Reserved]

§ 1.469–2T Passive activity loss (temporary).

(a) Scope of this section.

(b) Definition of passive activity loss.

(1) In general.

(2) Cross reference.

(c) Passive activity group income.

(1) In general.

(2) Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity.

(i) In general.

(A) Treatment of gain.

(B) Dispositions of partnership interest and S corporation stock.

(C) Interest in property.

(D) Examples.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition.

(iii) Disposition of substantially appreciated property used in nonpassive activity. [Reserved]

(A) In general. [Reserved]

(B) Date of disposition. [Reserved]

(C) Substantially appreciated property. [Reserved]

(D) Investment property. [Reserved]

(E) Coordination with paragraph (c)(2)(ii) of this section. [Reserved]

(F) Coordination with section 163(d). [Reserved]

(G) Examples. [Reserved]

(iv) Taxable acquisitions. [Reserved]

(v) Property held for sale to customers. [Reserved]

(A) Sale incidental to another activity. [Reserved]

(*1*) Applicability. [Reserved]

(*i*) In general. [Reserved]

(*ii*) Principal purpose. [Reserved]

(*2*) Dealing activity not taken into account. [Reserved]

(B) Use in a nondealing activity incidental to sale. [Reserved]

(C) Examples. [Reserved]

(3) Items of portfolio income specifically excluded.

(i) In general.

(ii) Gross income derived in the ordinary course of a trade or business.

(iii) Special rules.

(A) Income from property held for investment by dealer.

(B) Royalties derived in the ordinary course of the trade or business of licensing intangible property.

(*1*) In general.

(*2*) Substantial services or costs.

(*i*) In general.

(*ii*) Exception.

(*iii*) Expenditures taken into account.

(*3*) Passthrough entities.

(*4*) Cross reference.

(C) Mineral production payments.

(iv) Examples.

(4) Items of personal service income specifically excluded.

(i) In general.

(ii) Example.

(5) Income from section 481 adjustments.

(i) In general.

(ii) Positive section 481 adjustments.

(iii) Ratable portion.

(6) Gross income from certain oil or gas properties. [Reserved]

(i) In general. [Reserved]

(ii) Gross and net passive income from the properties. [Reserved]

(iii) Property. [Reserved]

(iv) Examples.

(7) Other items specifically excluded.

(d) Passive activity deductions.

(1) In general.

(2) Exceptions.

(3) Interest expense.

(4) Clearly and directly allocable expenses.

(5) Treatment of loss from disposition.

(i) In general.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition.

(iii) Other applicable rules.

(A) Applicability or rules in paragraph (c)(2).

(B) Dispositions of partnership interest and S corporation stock.

(6) Coordination with other limitations on deductions that apply before section 469.

(i) In general.

(ii) Proration of deductions disallowed under basis limitations.

(A) Deductions disallowed under section 704(d).

(B) Deductions disallowed under section 1366(d).

(iii) Proration of deductions disallowed under at-risk limitations.

(iv) Coordination of basis and at-risk limitations.

(v) Separately identified items of deduction and loss.

(7) Deductions from section 481 adjustment.

(i) In general.

(ii) Negative section 481 adjustment.

(iii) Ratable portion.

(8) Taxable year in which item arises.

(e) Special rules for partners and S corporation shareholders.

(1) In general.

(2) Payments under sections 707(a), 707(c), and 736(b).

(i) Section 707(a).

(ii) Section 707(c).

(iii) Payments in liquidation of a partner's interest in partnership property.

(A) In general.

(B) Payments in liquidation of a partner's interest of a partnership property.

(3) Sale or exchange of interest in passthrough entity.

(i) Application of this paragraph (e)(3).

(ii) General rule.

(A) Allocation among activities.

(B) Ratable portions.

(1) Disposition on which gain is recognized.

(2) Disposition on which loss is recognized.

(C) Default rule.

(D) Special rules.

(*1*) Applicable valuation date.

(*i*) In general.

(*ii*) Exception.

(*2*) Basis adjustment.

(*3*) Tiered passthrough entities.

(E) Meaning of certain terms.

(iii) Treatment of gain allocated to certain passive activities as not from a passive activity.

(iv) Dispositions occurring in taxable years beginning before February 19, 1988.

(A) In general.

(B) Exceptions.

(v) Treatment of portfolio assets.

(vi) Definitions.

(vii) Examples.

(f) Recharacterization of passive income in certain situations.

(1) In general.

(2) Special rule for significant participation.

(i) In general.

(ii) Significant participation passive activity.

(iii) Example.

(3) Rental of nondepreciable property.

(4) Net interest income from passive equity-financed lending activity.

(i) In general.

(ii) Equity-financed lending activity.

(A) In general.

(B) Certain liabilities not taken into account.

(iii) Equity-financed interest income.

(iv) Net interest income.

(v) Interest-bearing assets.

(vi) Liabilities incurred in the activity.

(vii) Average outstanding balance.

(viii) Example.

(5) Net income from certain property rented incidental to development activity.

(i) In general. [Reserved]

(ii) Commencement of use. [Reserved]

(iii) Services performed for the purpose of enhancing the value of property. [Reserved]

(iv) Examples. [Reserved]

(6) Property rented to a nonpassive activity.

(7) Special rules applicable to the acquisition of an interest of a passthrough entity engaged in the trade or business of licensing intangible property.

(i) In general.

(ii) Royalty income from property.

(iii) Exceptions.

(iv) Capital expenditures.

(v) Example.

(8) Limitation on recharacterized income.

(9) Meaning of certain terms.

(10) Coordination with section 163(d).

(11) Effective date.

§1.469–3 Passive activity credit.

(a)–(d) [Reserved]

(e) Coordination with section 38(b).

(f) Coordination with section 50.

(g) [Reserved]

§1.469–3T Passive activity credit (temporary).

(a) Computation of passive activity credit.

(b) Credits subject to section 469.

(1) In general.

(2) Treatment of credits attributed to qualified progress expenditures.

(3) Special rule for partners and S corporations shareholders.

(4) Exception for pre-1987 credits.

(c) Taxable year to which credit is attributable.

(d) Regular tax liability allocable to passive activities.

(1) In general.

(2) Regular tax liability.

(e) Coordination with section 38(b). [Reserved]

(f) Coordination with section 47. [Reserved]

(g) Examples.

§1.469–4 Definition of activity.

(a) Scope and purpose.

(b) Definitions.

(1) Trade or business activities.

(2) Rental activities.

(c) General rules for grouping activities.

(1) Appropriate economic unit.

(2) Facts and circumstances test.

(3) Examples.

(d) Limitation on grouping certain activities.

(1) Grouping rental activities with other trade or business activities.

(i) Rule.

(ii) Examples.

(2) Grouping real property rentals and personal property rentals prohibited.

(3) Certain activities of limited partners and limited entrepreneurs.

(i) In general.

(ii) Example.

(4) Other activities identified by the Commissioner.

(5) Activities conducted through section 469 entities.

(i) In general.

(ii) Cross reference.

(e) Disclosure and consistency requirements.

(1) Original groupings.

(2) Regroupings.

(f) Grouping by Commissioner to prevent tax avoidance.

(h) Rules for grouping rental real estate activities for taxpayers qualifying under section 469(c)(7).

§1.469–5 Material participation.

(a)–(e) [Reserved]

(f) Participation.

(1) In general.

(f)(2)–(h)(2) [Reserved]

(3) Coordination with rules governing the treatment of passthroughs entities.

(i) [Reserved]

(j) Material participation for preceding taxable years.

(1) In general.

(2) Material participation test for taxable years beginning before January 1, 1987

(k) Examples (1)–(4). [Reserved]

(k) Example (5).

(k) Examples (6)–(8). [Reserved]

§1.469–5T Material participation (temporary).

(a) In general.

(b) Facts and circumstances.

(1) In general. [Reserved]

(2) Certain participation insufficient to constitute material participation under this paragraph (b).

(i) Participation satisfying standards not contained in section 469.

(ii) Certain management activities.

(iii) Participation less than 100 hours.

(c) Significant participation activity.

(1) In general.

(2) Significant participation.

(d) Personal service activity.

(e) Treatment of limited partners.

(1) General rule.

(2) Exceptions.

(3) Limited partnership interest.

(i) In general.

(ii) Limited partner holding general partner interest.

(f) Participation. [Reserved]

(1) In general. [Reserved]

(2) Exceptions.

(i) Certain work not customarily done by owners.

(ii) participation as an investor.

(A) In general.

(B) Work done in individual's capacity as an investor.

(3) Participation of spouses.

(4) Methods of proof.

(g) Material participation of trust and estates. [Reserved]

(h) Miscellaneous rules.

(1) Participation of corporations.

(2) Treatment of certain retired farmers and surviving spouses of retired or disabled farmers.

(3) Coordination with rules governing the treatment of passthroughs entities. [Reserved]

(i) [Reserved]

(j) Material participation for preceding taxable years. [Reserved]

(1) In general. [Reserved]

(2) Material participation for taxable years beginning before January 1, 1987. [Reserved]

(k) Examples.

§1.469–6 Treatment of losses upon certain dispositions. [Reserved]

§1.469–7 Treatment of self-charged items of income and expense. [Reserved]

§1.469–8 Application of section 469 to trust, estates, and their beneficiaries. [Reserved]

§1.469–9 Rules for certain rental real estate activities.

(a) Scope and purpose.

(b) Definitions.

(1) Trade or business.

(2) Real property trade or business.

(3) Rental real estate.

(4) Personal services.

(5) Material participation.

(6) Qualifying taxpayer.

(c) Requirements for qualifying taxpayers.

(1) In general.

(2) Closely held C corporations.

(3) Requirement of material participation in the real property trades or businesses.

(4) Treatment of spouses.

(5) Employees in real property trades or businesses.

(d) General rule for determining real property trades or businesses.

(1) Facts and circumstances.

(2) Consistency requirement.

(e) Treatment of rental real estate activities of a qualifying taxpayer.

(1) In general.

(2) Treatment as a former passive activity.

(3) Grouping rental real estate activities with other activities.

(i) In general.

(ii) Special rule for certain management activities.

(4) Example.

(f) Limited partnership interests in rental real estate activities.

(1) In general.

(2) De minimis exception.

(g) Election to treat all interests in rental real estate as a single rental real estate activity.

(1) In general.

(2) Certain changes not material.

(3) Filing a statement to make or revoke the election.

(h) Interests in rental real estate held by certain passthrough entities.

(1) General rule.

(2) Special rule if a qualifying taxpayer holds a fifty-percent or greater interest in a passthrough entity.

(3) Special rule for interests held in tiered passthrough entities.

(i) [Reserved]

(j) $25,000 offset for rental real estate activities of qualifying taxpayers.

(1) In general.

(2) Example.

§1.469–10 Application of section 469 to publicly traded partnerships. [Reserved]

§1.469–11 Effective date and transition rules.

(a) Generally applicable effective dates.

(b) Additional effective dates.

(1) Application of 1992 amendments for taxable years beginning before October 4, 1994.

(2) Additional transition rule for 1992 amendments.

(3) Fresh starts under consistency rules.

(i) Regrouping when tax liability is first determined under Project PS–1–89.

(ii) Regrouping when tax liability is first determined under §1.469–4.

(iii) Regrouping when taxpayer is first subject to section 469(c)(7).

(4) Certain investment credit property.

(c) Special rules.

(1) Applicability of certain income recharacterization rules.

(i) in general.

(ii) Property rented to a nonpassive activity.

(2) Qualified low-income housing projects.

(3) Effect of events occurring in years prior to 1987.

(d) Examples.

[T.D. 8417, 57 FR 20748, May 15, 1992, as amended by T.D. 8477, 58 FR 11538, Feb. 26, 1993; T.D. 8495, 58 FR 58787, Nov. 4, 1993; T.D. 8565, 59 FR 50487, Oct. 4, 1994; T.D. 8597, 60 FR 36684, July 18, 1995; T.D. 8645, 60 FR 66498, Dec. 22, 1995]

§ 1.469–1 General rules.

(a)–(c)(7) [Reserved]

(c)(8) *Consolidated groups.* Rules relating to the application of section 469 to consolidated groups are contained in paragraph (h) of this section.

(c)(9)–(d)(1) [Reserved]

(d)(2) *Coordination with sections 613A (d) and 1211.* A passive activity deduction that is not disallowed for the taxable year under section 469 and the regulations thereunder may nonetheless be disallowed for the taxable year under section 613A(d) or 1211. The following example illustrates the application of this paragraph (d)(2):

Example. In 1993, an individual derives $10,000 of ordinary income from passive activity X, no gains from the sale or exchange of capital assets or assets used in a trade or business, $12,000 of capital loss from passive activity Y, and no income, gain, deductions, or losses from any other passive activity. The capital loss from activity Y is a passive activity deduction (within the meaning of § 1.469–2T(d)). Under section 469 and the regulations thereunder, the taxpayer is allowed $10,000 of the $12,000 passive activity deduction and has a $2,000 passive activity loss for the taxable year. Since the $10,000 passive activity deduction allowed under section 469 is a capital loss, such deduction is allowable for the taxable year only to the extent provided under section 1211. Therefore, the taxpayer is allowed $3,000 of the $10,000 capital loss under section 1211 and has a $7,000 capital loss carryover (within the meaning of section 1212(b)) to the succeeding taxable year.

(d)(3)–(e)(1) [Reserved]

(e)(2) *Trade or business activities. Trade or business activities* are activities that constitute trade or business activities within the meaning of § 1.469–4(b)(1).

(e)(3)(i)–(e)(3)(ii) [Reserved]

(e)(3)(iii) *Average period of customer use*—(A) *In general.* For purposes of this paragraph (e)(3), the average period of customer use for property held in connection with an activity (the *activity's average period of customer use)* is the sum of the average use factors for each class of property held in connection with the activity.

(B) *Average use factor.* The average use factor for a class of property held in connection with an activity is the average period of customer use for that class of property multiplied by the fraction obtained by dividing—

(*1*) The activity's gross rental income attributable to that class of property; by

(*2*) The activity's gross rental income.

(C) *Average period of customer use for class of property.* In determining an activity's average period of customer use for a taxable year, the average period of customer use for a class of property held in connection with an activity is determined by dividing—

(*1*) The aggregate number of days in all periods of customer use for property in the class (taking into account only periods that end during the taxable year or that include the last day of the taxable year); by

(*2*) The number of those periods of customer use.

(D) *Period of customer use.* Each period during which a customer has a continuous or recurring right to use an item of property held in connection with the activity (without regard to whether the customer uses the property for the entire period or whether the right to use the property is pursuant to a single agreement or to renewals thereof) is treated for purposes of this paragraph (e)(3)(iii) as a separate period of customer use. The duration of a period of customer use that includes the last day of a taxable year may be determined on the basis of reasonable estimates.

(E) *Class of property.* Taxpayers may organize property into classes for purposes of this paragraph (e)(3)(iii) using any method under which items of property for which the amount of the daily rent differs significantly are not included in the same class.

(F) *Gross rental income and daily rent.* In determining an activity's average period of customer use for a taxable year—

(*1*) The activity's gross rental income is the gross income from the activity for the taxable year taking into account only income that is attributable to amounts paid for the use of property;

(*2*) The activity's gross rental income attributable to a class of property is the gross income from the activity for the taxable year taking into account only income that is attributable to amounts paid for the use of property in that class; and

(*3*) The daily rent for items of property may be determined on any basis that reasonably reflects differences during the taxable year in the amounts ordinarily paid for one day's use of those items of property.

(e)(3)(iv)–(e)(3)(vi)(C) [Reserved]

(e)(3)(vi)(D) *Lodging rented for convenience of employer.* The provision of lodging to an employee or to an employee's spouse or dependents is treated as incidental to the activity (or activities) of the taxpayer in which the employee performs services if the lodging is furnished for the taxpayer's convenience (within the meaning of section 119).

(E) *Unadjusted basis.* For purposes of this paragraph (e)(3)(vi), the term *unadjusted basis* means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis.

(e)(3)(vii)–(e)(4)(iii) [Reserved]

(e)(4)(iv) *Definition of ''working interest.''* For purposes of section 469 and the regulations thereunder, the term *working interest* means a working or operating mineral interest in any tract or parcel of land (within the meaning of §1.612–4(a)).

(e)(4)(v)–(f)(3) [Reserved]

(f)(4) *Carryover of disallowed deductions and credits*—

(i) *In general.* In the case of an activity of a taxpayer with respect to which any deductions or credits are disallowed for a taxable year under §1.469–1T (f)(2) or (f)(3) (the loss activity)—

(A) The disallowed deductions or credits is allocated among the taxpayer's activities for the succeeding taxable year in a manner that reasonably reflects the extent to which each activity continues the loss activity; and

(B) The disallowed deductions or credits allocated to an activity under paragraph (f)(4)(i)(A) of this section shall be treated as deductions or credits from the activity for the succeeding taxable year.

(ii) *Business continued through C corporations or similar entities.* If a taxpayer continues part or all of a loss activity through a C corporation or similar entity (C corporation entity), the taxpayer's interest in the C corporation entity shall be treated for purposes of this paragraph (f)(4) as an interest in a passive activity that continues that loss activity in whole or part. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of §1.469–2T(c)(3)(i)) from the interests.

(iii) *Examples.* The following examples illustrate the application of this paragraph (f)(4). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example 1. (i) The taxpayer owns interests in a convenience store and an apartment building. In each taxable year, the taxpayer's interests in the convenience store and the apartment building are treated under §1.469–4 as interests in two separate passive activities of the taxpayer. A $5,000 loss from the convenience-store activity and a $3,000 loss from the apartment-building activity are disallowed under §1.469–1T(f)(2) for 1993. Under §1.469–1T(f)(2), the $5,000 loss from the convenience-store activity is allocated among the passive activity deductions from that activity for 1993, and the $3,000 loss from the apartment-building activity is treated similarly.

(ii) In 1994, the convenience store is continued in a single activity, and the section 469 activities that constituted the apartment building is similarly continued in a separate activity. Thus, the disallowed deductions from the convenience-store activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's convenience-store activity in 1994. Similarly, the disallowed deductions from the apartment-building activity for 1993 must be allocated to the taxpayer's apartment-building activity in 1994. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the convenience-store activity in 1994 are treated as deductions from that activity for 1994, and the disallowed deductions allocated to the apartment-building activity for 1994 are treated as deductions from the apartment-building activity for 1994.

Example 2. (i) In 1993, the taxpayer acquires a restaurant and a catering business. Assume that in 1993 and 1994 the restaurant and the catering business are treated under § 1.469–4 as an interest in a single passive activity of the taxpayer (the restaurant and catering activity). A $10,000 loss from the activity is disallowed under § 1.469–1T(f)(2) for 1994. Assume that in 1995, the taxpayer's interests in the restaurant and the catering business are treated under § 1.469–4 as interests in two separate passive activities of the taxpayer.

(ii) Under § 1.469–1T(f)(2), the $10,000 loss from the restaurant and catering activity is allocated among the passive activity deductions from that activity for 1994. In 1995, the businesses that constituted the restaurant and catering activity are continued, but are treated as two separate activities under § 1.469–4. Thus, the disallowed deductions from the restaurant and catering activity for 1994 must be allocated under paragraph (f)(4)(i)(A) of this section between the restaurant activity and the catering activity in 1995 in a manner that reasonably reflects the extent to which each of the activities continues the single restaurant and catering activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the restaurant activity in 1995 are treated as deductions from the restaurant activity for 1995, and the disallowed deductions allocated to the catering activity in 1995 are treated as deductions from the catering activity for 1995.

Example 3. (i) In 1993, the taxpayer acquires a restaurant and a catering business. Assume that in 1993 and 1994 the restaurant and the catering business are treated under§ 1.469–4 as an interest in a single passive activity of the taxpayer (the restaurant and catering activity). A $10,000 loss from the activity is disallowed under § 1.469–1T(f)(2) for 1994. Assume that in 1995, the taxpayer's interests in the restaurant and the catering business are treated under § 1.469–4 as interestes in two separate passive activities of the taxpayer. In addition, a $20,000 loss from the activity was disallowed under § 1.469–1T(f)(2) for 1993, and the gross income and deductions (including deductions that were disallowed for 1993 under § 1.469–1T(f)(2)) from the restaurant and catering business for 1993 and 1994 are as follows:

	Restaurant	Catering business
1993:		
Gross income	$20,000	$60,000
Deductions	40,000	60,000
Net income (loss)	(20,000)	....
1994:		
Gross income	40,000	50,000
Deductions	[1]30,000	[2]70,000
Net income (loss)	10,000	(20,000)

[1] Includes $8,000 of deductions that were disallowed for 1993 ($20,000 x $40,000/$100,000).

[2] Includes $12,000 of deductions that were disallowed for 1993 ($20,000 x $60,000/$100,000).

(ii) Under paragraph (f)(4)(i)(A) of this section, the disallowed deductions from the restaurant and catering activity must be allocated among the taxpayer's activities for the succeeding year in a manner that reasonably reflects the extent to which those activities continue the restaurant and catering activity. The remainder of this example describes a number of allocation methods that will ordinarily satisfy the requirement of paragraph (f)(4)(i)(A) of this section. The description of specific allocation methods in this example does not preclude the use of other reasonable allocation methods for purposes of paragraph (f)(4)(i)(A) of this section.

(iii) Ordinarily, an allocation of disallowed deductions from the restaurant to the restaurant activity and disallowed deductions from the catering business to the catering activity would satisfy the requirement of paragraph (f)(4)(i)(A) of this section. Under § 1.469–1T (f)(2)(ii), a ratable portion of each deduction from the restaurant and catering activity is disallowed for 1994. Thus, $3,000 of the 1994 deductions from the restaurant are disallowed ($10,000 x $30,000/$100,000), and $7,000 of the 1994 deductions from the catering business are disallowed ($10,000 x $70,000/ $100,000). Thus, the taxpayer can ordinarily treat $3,000 of the disallowed deductions as deductions from the restaurant activity for 1995, and $7,000 of the disallowed deductions as deductions from the catering activity for 1995.

(iv) Ordinarily, an allocation of disallowed deductions between the restaurant activity and catering activity in proportion to the losses from the restaurant and from the catering business for 1994 would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant and the catering business had been treated as separate activities in 1994, the restaurant activity would have had net income of $10,000 and the catering activity would have had a $20,000 loss. Thus, the taxpayer can ordinarily treat all $10,000 of disallowed deductions as deductions from the catering activity for 1995.

(v) Ordinarily, an allocation of disallowed deductions between the restaurant activity and catering activity in proportion to the losses from the restaurant and from the catering business for 1994 (determined as if the restaurant and the catering business had been separate activities for all taxable years) would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant and the catering business had been treated as separate activities for all taxable years, the entire $20,000 loss from the restaurant in 1993 would have been allocated to the restaurant activity in 1994, and the gross income and deductions from the separate activities for 1994 would be as follows:

	Restaurant	Catering business
Gross income	$40,000	$50,000
Deductions	42,000	58,000
Net income (loss)	(2,000)	(8,000)

Thus, the taxpayer can ordinarily treat $2,000 of the disallowed deductions as deductions from the restaurant activity for 1995, and $8,000 of the disallowed deductions as deductions from the catering activity for 1995.

Example 4. (i) The taxpayer is a partner in a law partnership that acquires a building in December 1993 for use in the partnership's law practice. In taxable year 1993, four floors that are not needed in the law practice are leased to tenants; in taxable year 1994, two floors are leased to tenants; in taxable years after 1994, only one floor is leased to tenants and the rental operations are insubstantial. Assume that under §1.469–4, the law practice and the rental property are treated as a trade or business activity and a separate rental activity for taxable years 1993 and 1994. Assume further that the law practice and the rental operations are a single trade or business activity for taxable years after 1994 under §1.469–4. The trade or business activity is not a passive activity of the taxpayer. The rental activity, however, is a passive activity. Under §1.469–T(f)(2), a $12,000 loss from the rental activity is disallowed for 1993 and a $9,000 loss from the rental activity is disallowed for 1994.

(ii) Under §1.469–1T(f)(2), the $12,000 loss from the rental activity for 1993 is allocated among the passive activity deductions from that activity for 1993. In 1994, the business of the rental activity is continued in two separate activities. Only two floors of the building remain in the rental activity, and the other two floors (*i.e.*, the floors that were leased to tenants in 1993, but not in 1994) are used in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section between the rental activity and the law-practice activity in a manner that reasonably reflects the extent to which each of the activities continues business on the four floors that were leased to tenants in 1993. In these circumstances, the requirement of paragraph (f)(4)(i)(A) of this section would ordinarily be satisfied by any of the allocation methods illustrated in Example 3 or by an allocation of 50 percent of the disallowed deductions to each activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the rental activity in 1994 are treated as deductions from the rental activity for 1994, and the disallowed deductions ($6,000) allocated to the law-practice activity in 1994 are treated as deductions from the law-practice activity for 1994.

(iii) Under §1.469–1T(f)(2), the $9,000 loss from the rental activity for 1994 is allocated among the passive activity deductions from that activity for 1994. In 1995, the rental activity is continued in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1994 must be allocated under paragraph (f)(4)(ii) of this section to the taxpayer's law-practice activity in 1995. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the law-practice activity are treated as deductions from the law-practice activity for 1995.

(iv) Rules relating to former passive activities will be contained in paragraph (k) of this section. Under those rules, any disallowed deductions from the rental activity that are treated as deductions from the law-practice activity will be treated as unused deductions that are allocable to a former passive activity.

Example 5. (i) The taxpayer owns stock in a corporation that is an S corporation for the taxpayer's 1993 taxable year and a C coporation thereafter. The only activity of the corporation is a rental activity. For 1993, the taxpayer's pro rata share of the corporation's loss from the rental activity is $5,000, and the entire loss is disallowed under §1.469–1T(f)(2) of this section.

(ii) Under §1.469–1T(f)(2), the taxpayer's $5,000 loss from the rental activity is allocated among the taxpayer's deductions from that activity for 1993. In 1994, the rental activity is continued through a C corporation, and the taxpayer's interest in the C corporation is treated under paragraph (f)(4)(ii) of this section as a passive activity that continues the rental activity (the C corporation activity) for purposes of allocating the previously disallowed loss. Thus, the disallowed deductions from the rental activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1994, and are treated under paragraph (f)(4)(i)(B) of this section as deductions from the C corporation activity for 1994.

(iii) Treating the taxpayer's interest in the C corporation as an interest in a passive activity that continues the business of the rental activity does not change the character of the taxpayer's dividend income from the C corporation. Thus, the taxpayer's dividend income is portfolio income (within the meaning of §1.469–2T(c)(3)(i)) and is not included in passive activity gross income. Accordingly, the taxpayer's loss from the C corporation activity for 1994 is $5,000.

Example 6. (i) The taxpayer owns stock in a corporation that is an S corporation for the taxpayer's 1993 taxable year and a C corporation thereafter. The only activity of the corporation is a rental activity. For 1993, the taxpayer's pro rata share of the corporation's loss from the rental activity is $5,000, and the entire loss is disallowed under § 1.469–1T(f)(2). The taxpayer has $2,000 in income from other passive activities for 1994, and as a result, only 60% of the taxpayer's loss from the C corporation activity ($3,000) is disallowed for 1994 under § 1.469–1T(f)(2).

(ii) Under § 1.469–1T(f)(2), the $3,000 disallowed loss from the C corporation activity is allocated among the passive activity deductions from that activity for 1994. In effect, therefore, 60 percent of each disallowed deduction from the rental activity for 1993 is again disallowed for 1994.

(iii) Under paragraph (f)(4) of this section, the taxpayer's interest in the C corporation is treated as a loss activity and as an interest in a passive activity that continues the business of that loss activity for 1995. Thus, the disallowed deductions from the C corporation activity for 1994 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1995, and are treated under paragraph (f)(4)(i)(B) of this section as deductions from that activity for 1995.

(g)(1)–(g)(4)(ii)(B) [Reserved]

(g)(4)(ii)(C) Portfolio income (within the meaning of § 1.469–2T(c)(3)(i)), including any gross income that is treated as portfolio income under any other provision of the regulations (See, e.g., § 1.469–2(c)(2)(iii)(F) (relating to gain from the disposition of substantially appreciated property formerly held for investment) and § 1.469–2(f)(10) (relating to certain recharacterized passive activity gross income))

(5) [Reserved]

(h)(1) *In general.* This paragraph (h) provides rules for applying section 469 in computing a consolidated group's consolidated taxable income and consolidated tax liability (and the separate taxable income and tax liability of each member).

(2) *Definitions.* The definitions and nomenclature in the regulations under section 1502 apply for purposes of this paragraph (h). See, e.g., §§ 1.1502–1 (definitions of group, consolidated group, member, subsidiary, and consolidated return year), 1.1502–2 (consolidated tax liability), 1.1502–11 (consolidated taxable income), 1.1502–12 (separate taxable income), 1.1502–13 (intercompany transactions), 1.1502–21T (net operating losses (temporary)), and 1.1502–22T (consolidated net capital gain and loss (temporary)).

(3) [Reserved]

(4) *Status and participation of members*—(i) *Determination by reference to status and participation of group.* For purposes of section 469 and the regulations thereunder—

(A) Each member of a consolidated group shall be treated as a closely held corporation or personal service corporation, respectively, for the taxable year, if and only if the consolidated group is treated (under the rules of paragraph (h)(4)(ii) of this section) as a closely held corporation or personal service corporation for that year; and

(B) The determination of whether a trade or business activity (within the meaning of paragraph (e)(2) of this section) conducted by one or more members of a consolidated group is a passive activity of the members is made by reference to the consolidated group's participation in the activity.

(ii) *Determination of status and participation of consolidated group.* For purposes of determining under § 1.469–1T(g)(2) whether a consolidated group is treated as a closely held corporation or a personal service corporation, and determining under § 1.469–1T(g)(3) whether the consolidated group materially or significantly participates in any activity conducted by one or more members of the group—

(A) The members of the consolidated group shall be treated as one corporation;

(B) Only the outstanding stock of the common parent shall be treated as outstanding stock of the corporation;

(C) An employee of any member of the group shall be treated as an employee of the corporation; and

(D) An activity is treated as the principal activity of the corporation if and only if it is the principal activity (within the meaning of § 1.441–4T(f)) of the consolidated group.

(5) [Reserved]

(6) *Intercompany transactions*—(i) *In general.* Section 1.1502–13 applies to determine the treatment under section 469 of intercompany items and corresponding items from intercompany transactions between members of a consolidated group. For example, the matching rule of § 1.1502–13(c) treats

the selling member (S) and the buying member (B) as divisions of a single corporation for purposes of determining whether S's intercompany items and B's corresponding items are from a passive activity. Thus, for purposes of applying §1.469–2(c)(2)(iii) and §1.469–2T(d)(5)(ii) to property sold by S to B in an intercompany transaction—

(A) S and B are treated as divisions of a single corporation for determining the uses of the property during the 12-month period preceding its disposition to a nonmember, and generally have an aggregate holding period for the property; and

(B) §1.469–2(c)(2)(iv) does not apply.

(ii) *Example.* The following example illustrates the application of this paragraph (h)(6).

Example. (i) P, a closely held corporation, is the common parent of the P consolidated group. P owns all of the stock of S and B. X is a person unrelated to any member of the P group. S owns and operates equipment that is not used in a passive activity. On January 1 of Year 1, S sells the equipment to B at a gain. B uses the equipment in a passive activity and does not dispose of the equipment before it has been fully depreciated.

(ii) Under the matching rule of §1.1502–13(c), S's gain taken into account as a result of B's depreciation is treated as gain from a passive activity even though S used the equipment in a nonpassive activity.

(iii) The facts are the same as in paragraph (a) of this Example, except that B sells the equipment to X on December 1 of Year 3 at a further gain. Assume that if S and B were divisions of a single corporation, gain from the sale to X would be passive income attributable to a passive activity. To the extent of B's depreciation before the sale, the results are the same as in paragraph (ii) of this Example. B's gain and S's remaining gain taken into account as a result of B's sale are treated as attributable to a passive activity.

(iv) The facts are the same as in paragraph (iii) of this Example, except that B recognizes a loss on the sale to X. B's loss and S's gain taken into account as a result of B's sale are treated as attributable to a passive activity.

(iii) *Effective dates.* This paragraph (h)(6) applies with respect to transactions occurring in years beginning on or after July 12, 1995. For transactions occurring in years beginning before July 12, 1995, see §1.469–1T(h)(6) (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

(h)(7)–(k) [Reserved]

[T.D. 8417, 57 FR 20750, May 15, 1992; 57 FR 28612, June 26, 1992, as amended by T.D. 8417, 59 FR 45623, Sept. 2, 1994; T.D. 8597, 60 FR 36684, July 18, 1995; T.D. 8677, 61 FR 33322, June 27, 1996]

§1.469–1T General rules (temporary).

(a) *Passive activity loss and credit disallowed*—(1) *In general.* Except as otherwise provided in paragraph (a)(2) of this section—

(i) The passive activity loss for the taxable year shall not be allowed as a deduction; and

(ii) The passive activity credit for the taxable year shall not be allowed.

(2) *Exceptions.* Paragraph (a)(1) of this section shall not apply to the passive activity loss or the passive activity credit for the taxable year to the extent provided in—

(i) Section 469(i) and the rules to be contained in §1.469–9T (relating to losses and credits attributable to certain rental real estate activities); and

(ii) Section 1.469–11T (relating to losses and credits attributable to certain pre-enactment interests in activities).

(b) *Taxpayers to whom these rules apply.* The rules of section 469 and the regulations thereunder generally apply to—

(1) Individuals;

(2) Trusts (other than trusts (or portions of trusts) described in section 671);

(3) Estates;

(4) Personal service corporations (within the meaning of paragraph (g)(2)(i) of this section); and

(5) Closely held corporations (within the meaning of paragraph (g)(2)(ii) of this section).

(c) *Cross references*—(1) *Definition of ''passive activity.''* Rules relating to the definition of the term ''passive activity'' are contained in paragraph (e) of this section.

(2) *Passive activity loss.* Rules relating to the computation of the passive activity loss for the taxable year are contained in §1.469–2T.

(3) *Passive activity credit.* Rules relating to the computation of the passive activity credit for the taxable year are contained in §1.469–3T.

(4) *Effect of rules for other purposes.* Rules relating to the effect of section 469 and the regulations thereunder for other purposes under the Code are contained in paragraph (d) of this section.

(5) *Special rule for oil and gas working interests.* Rules relating to the treatment of losses and credits from certain interests in oil and gas wells are contained in paragraph (e)(4) of this section

(6) *Treatment of disallowed losses and credits.* Paragraph (f) of this section contains rules relating to—

(i) The treatment of deductions from passive activities in taxable years in which the passive activity loss is disallowed in whole or in part under paragraph (a)(1)(i) of this section; and

(ii) The treatment of credits from passive activities in taxable years in which the passive activity credit is disallowed in whole or in part under paragraph (a)(1)(ii) of this section.

(7) *Corporation subject to section 469.* Rules relating to the application of section 469 and regulations thereunder to C corporations are contained in paragraph (g) of this section.

(8) [Reserved]

(9) *Joint returns.* Rules relating to the application of section 469 and the regulations thereunder to spouses filing a joint return for the taxable year are contained in paragraph (j) of this section.

(10) *Material participation*. Rules defining the term ''material participation'' are contained in § 1.469–5T.

(11) *Effective date and transition rules.* Rules relating to the effective date of section 469 and the regulations thereunder and transition rules applicable to pre-enactment interests in activities are contained in § 1.469–11T.

(12) *Future regulations.* (i) Rules relating to former passive activities and changes in corporate status will be contained in paragraph (k) of this section.

(ii) Rules relating to the definition of ''activity'' will be contained in § 1.469–4T.

(iii) Rules relating to the treatment of deductions from activities that are disposed of in certain transactions will be contained in § 1.469–6T.

(iv) Rules relating to the treatment of self-charged items of income and expense will be contained in § 1.469–7T.

(v) Rules relating to the application of section 469 and the regulations thereunder to trusts, estates, and their beneficiaries will be contained in § 1.469–8T.

(vi) Rules relating to the treatment of income, deductions, and credits from certain rental real estate activities of individuals and certain estates will be contained in § 1.469–9T.

(vii) Rules relating to the application of section 469 to publicly traded partnerships will be contained in § 1.469–10T.

(d) *Effect of section 469 and the regulations thereunder for other purposes*—(1) *Treatment of items of passive activity income and gain.* Neither the provisions of section 469 (a)(1) and paragraph (a)(1) of this section nor the characterization of items of income or deduction as passive activity gross income (within the meaning of § 1.469–2T (c)) or passive activity deductions (within the meaning of § 1.469–2T (d)) affects the treatment of any item of income or gain under any provision of the Internal Revenue Code other than section 469. The following example illustrates the application of this paragraph (d)(1):

Example. (i) In 1991, an individual's only income and loss from passive activities are a $10,000 capital gain from passive activity × and a $12,000 ordinary loss from passive activity Y. The taxpayer also has a $10,000 capital loss that is not derived from a passive activity.

(ii) Under § 1.469–2T (b), the taxpayer has a $2,000 passive activity loss for the taxable year. The only effect of section 469 and the regulations thereunder is to disallow a deduction for the taxpayer's $2,000 passive activity loss for the taxable year. Thus, the taxpayer's capital loss for the taxable year is allowed because the $10,000 capital gain from passive activity × is taken into account under section 1211 (b) in computing the taxpayer's allowable capital loss for the year.

(2) *Coordination with sections 613A(d) and 1211.* [Reserved] See § 1.469–1(d)(2) for rules relating to this paragraph.

(3) *Treatment of passive activity losses.* Except as otherwise provided by regulations, a deduction that is disallowed for a taxable year under section 469 and the regulations thereunder is not taken

into account as a deduction that is allowed for the taxable year in computing the amount subject to any tax imposed by subtitle A of the Internal Revenue Code. The following example illustrates the application of this paragraph (d)(3):

Example. An individual has a $5,000 passive activity loss for a taxable year, all of which is disallowed under paragraph (a)(1) of this section. All of the disallowed loss is allocated under paragraph (f) of this section to activities that are trades or businesses (within the meaning of section 1402(c)). Such loss is not taken into account for the taxable year in computing the taxpayer's taxable income subject to tax under section 1. In addition, under this paragraph (d)(3), such loss is not taken into account for the taxable year in computing the taxpayer's net earnings from self-employment subject to tax under section 1401.

(e) *Definition of ''passive activity''*—(1) *In general.* Except as otherwise provided in this paragraph (e), an activity is a passive activity of the taxpayer for a taxable year if and only if the activity—

(i) Is a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer does not materially participate for such taxable year; or

(ii) Is a rental activity (within the meaning of paragraph (e)(3) of this section), without regard to whether or to what extent the taxpayer participates in such activity.

(2) *Trade or business activity.* [Reserved] See § 1.469–1(e)(2) for rules relating to this paragraph.

(3) *Rental activity*—(i) *In general.* Except as otherwise provided in this paragraph (e)(3), an activity is a rental activity for a taxable year if—

(A) During such taxable year, tangible property held in connection with the activity is used by customers or held for use by customers; and

(B) The gross income attributable to the conduct of the activity during such taxable year represents (or, in the case of an activity in which property is held for use by customers, the expected gross income from the conduct of the activity will represent) amounts paid or to be paid principally for the use of such tangible property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

(ii) *Exceptions.* For purposes of this paragraph (e)(3), an activity involving the use of tangible property is not a rental activity for a taxable year if for such taxable year—

(A) The average period of customer use for such property is seven days or less;

(B) The average period of customer use for such property is 30 days or less, and significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided by or on behalf of the owner of the property in connection with making the property available for use by customers;

(C) Extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided by or on behalf of the owner of the property in connection with making such property available for use by customers (without regard to the average period of customer use);

(D) The rental of such property is treated as incidental to a nonrental activity of the taxpayer under paragraph (e)(3)(vi) of this section;

(E) The taxpayer customarily makes the property available during defined business hours for nonexclusive use by various customers; or

(F) The provision of the property for use in an activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest is not a rental activity under paragraph (e)(3)(vii) of this section.

(iii) *Average period of customer use.* [Reserved] See § 1.469–1(e)(3)(iii) for rules relating to this paragraph.

(iv) *Significant personal services*—(A) *In general.* For purposes of paragraph (e)(3)(ii)(B) of this section, personal services include only services performed by individuals, and do not include excluded services (within the meaning of paragraph (e)(3)(iv)(B) of this section). In determining whether personal services provided in connection with making property available for use by customers are significant, all of the relevant facts and circumstances shall be taken into account. Relevant facts and circumstances include the frequency with which such services are provided, the type and amount of labor required to perform such services, and the value of such services relative to the amount charged for the use of the property.

(B) *Excluded services.* For purposes of paragraph (e)(3)(iv)(A) of this section, the term ''excluded services'' means, with respect to any property made available for use by customers—

(*1*) Services necessary to permit the lawful use of the property;

(*2*) Services performed in connection with the construction of improvements to the property, or in connection with the performance of repairs that extend the property's useful life for a period substantially longer than the average period for which such property is used by customers; and

(*3*) Services, provided in connection with the use of any improved real property, that are similar to those commonly provided in connection with long-term rentals of high-grade commercial or residential real property (e.g., cleaning and maintenance of common areas, routine repairs, trash collection, elevator service, and security at entrances or perimeters).

(v) *Extraordinary personal services.* For purposes of paragraph (e)(3)(ii)(C) of this section, extraordinary personal services are provided in connection with making property available for use by customers only if the services provided in connection with the use of the property are performed by individuals, and the use by customers of the property is incidental to their receipt of such services. For example, the use by patients of a hospital's boarding facilities generally is incidental to their receipt of the personal services provided by the hospital's medical and nursing staff. Similarly, the use by students of a boarding school's dormitories generally is incidental to their receipt of the personal services provided by the school's teaching staff.

(vi) *Rental of property incidental to a nonrental activity of the taxpayer*—(A) *In general.* For purposes of paragraph (e)(3)(ii)(D) of this section, the rental of property shall be treated as incidental to a nonrental activity of the taxpayer only to the extent provided in this paragraph (e)(3)(vi).

(B) *Property held for investment.* The rental of property during a taxable year shall be treated as incidental to an activity of holding such property for investment if and only if—

(*1*) The principal purpose for holding the property during such taxable year is to realize gain from the appreciation of the property (without regard to whether it is expected that such gain will be realized from the sale or exchange of the property in its current state of development); and

(*2*) The gross rental income from the property for such taxable year is less than two percent of the lesser of—

(*i*) The unadjusted basis of such property; and

(*ii*) The fair market value of such property.

(C) *Property used in a trade or business.* The rental of property during a taxable year shall be treated as incidental to a trade or business activity (within the meaning of paragraph (e)(2) of this section) if and only if—

(*1*) The taxpayer owns an interest in such trade or business activity during the taxable year;

(*2*) The property was predominantly used in such trade or business activity during the taxable year or during at least two of the five taxable years that immediately precede the taxable year; and

(*3*) The gross rental income from such property for the taxable year is less than two percent of the lesser of—

(*i*) The unadjusted basis of such property; and

(*ii*) The fair market value of such property.

(D) *Lodging for convenience of employer.* [Reserved] See § 1.469–1(e)(3)(vi)(D) for rules relating to this paragraph.

(E) *Unadjusted basis.* [Reserved] See § 1.469–1(e)(3)(vi)(E) for rules relating to this paragraph.

(vii) *Property made available for use in a nonrental activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest.* If the taxpayer owns an interest in a partnership, S corporation, or joint venture conducting an activity other than a rental activity, and the taxpayer provides property for use in the activity in the taxpayer's capacity as an owner of an interest in such partnership, S corporation, or joint venture, the provision of such property is not a rental activity. Thus, if a partner contributes the use of property to a partnership, none of the partner's distributive share of partnership income is income from a rental activity unless the partnership is engaged in a rental activity. In addition, a partner's gross income attributable to a payment described in section 707(c) is not income from a rental activity under any circumstances (see § 1.469–2T (e)(2)). The determination of whether property used in an activity is provided by the taxpayer in the taxpayer's capacity as an owner of an interest in a partnership, S corporation, or joint venture shall be made on the basis of all of the facts and circumstances.

(viii) *Examples.* The following examples illustrate the application of this paragraph (e)(3):

Example (1). The taxpayer is engaged in an activity of leasing photocopying equipment. The average period of customer use for the equipment exceeds 30 days. Pursuant to the lease agreements, skilled technicians employed by the taxpayer maintain the equipment and service malfunctioning equipment for no additional charge. Service calls occur frequently (three times per week on average) and require substantial labor. The value of the maintenance and repair services (measured by the cost to the taxpayer of employees performing these services) exceeds 50 percent of the amount charged for the use of the equipment. Under these facts, services performed by individuals are provided in connection with the use of the photocopying equipment, but the customers' use of the photocopying equipment is not incidental to their receipt of the services. Therefore, extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are not provided in connection with making the photocopying equipment available for use by customers, and the activity is a rental activity.

Example (2). The facts are the same as in example (1), except that the average period of customer use for the photocopying equipment exceeds seven days but does not exceed 30 days. Under these facts, significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided in connection with making the photocopying equipment available for use by customers and, under paragraph (e)(3)(ii)(B) of this section, the activity is not a rental activity.

Example (3). The taxpayer is engaged in an activity of transporting goods for customers. In conducting the activity, the taxpayer provides tractor-trailers to transport goods for customers pursuant to arrangements under which the tractor-trailers are selected by the taxpayer, may be replaced at the sole option of the taxpayer, and are operated and maintained by drivers and mechanics employed by the taxpayer. The average period of customer use for the tractor-trailers exceeds 30 days. Under these facts, the use of tractor-trailers by the taxpayer's customers is incidental to their receipt of personal services provided by the taxpayer. Accordingly, the services performed in the activity are extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) and, under paragraph (e)(3)(ii)(C) of this section, the activity is not a rental activity.

Example (4). The taxpayer is engaged in an activity of owning and operating a residential apartment hotel. For the taxable year, the average period of customer use for apartments exceeds seven days but does not exceed 30 days. In addition to cleaning public entrances, exists, stairways, and lobbies, and collecting and removing trash, the taxpayer provides a daily maid and linen service at no additional charge. All of the services other than maid and linen service are excluded services (within the meaning of paragraph (e)(3)(iv)(B) of this section), because such services are similar to those commonly provided in connection with long-term rentals of high-grade residential real property. The value of the maid and linen services (measured by the cost to the taxpayer of employees performing such services) is less than 10 percent of the amount charged to tenants for occupancy of apartments. Under these facts, neither significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) nor extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided in connection with making apartments available for use by customers. Accordingly, the activity is a rental activity.

Example (5). The taxpayer owns 1,000 acres of unimproved land with a fair market value of $350,000 and an unadjusted basis of $210,000. The taxpayer holds the land for the principal purpose of realizing gain from appreciation. In order to defray the cost of carrying the land, the taxpayer leases the land to a rancher, who uses the land to graze cattle and pays rent of $4,000 per year. Thus, the gross rental income from the land is less than two percent of the lesser of the fair market value and the unadjusted basis of the land (.02× $210,000=$4,200). Accordingly, under paragraph (e)(3)(ii)(D) of this section, the rental of the land is not a rental activity because the rental is treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

Example (6). (i) A calendar year taxpayer owns an interest in a farming activity which is a trade or business activity (within the meaning of paragraph (e)(2) of this section) and owns farmland which was used in the farming activity in 1985 and 1986. The fair market value of the farmland is $350,000 and its unadjusted basis is $210,000. In 1987, 1988, and 1989, the taxpayer continues to own an interest in the farming activity but does not use the land in the activity. In 1987, the taxpayer leases the land for $4,000 to a rancher, who uses the land to graze cattle. In 1988, the taxpayer leases the land for $10,000 to a film production company, which uses the land to film scenes for a movie. In 1989, the taxpayer again leases the land for $4,000 to the rancher.

(ii) For 1987 and 1989, the taxpayer owns an interest in a trade or business activity, and the farmland which the taxpayer leases to the rancher was used in such activity for two out of the five immediately preceding taxable years. In addition, the gross rental income from the land ($4,000) is less than two percent of the lesser of the fair market value and the unadjusted basis of the land (.02x$210,000=$4,200). Accordingly, the taxpayer's rental of the land is treated under paragraph (e)(3)(vi)(C) of this section as incidental to the taxpayer's farming activity, and is not a rental activity.

(iii) Because the taxpayer's gross rental income from the land for 1988 ($10,000) is not less than two percent of the lesser of the fair market value and the unadjusted basis of the land, the requirement of paragraph (e)(3)(vi)(C)(*3*) of this section is not met. Therefore, the taxpayer's rental of the land in 1988 is not treated as incidental to the taxpayer's farming activity and is a rental activity.

Example (7). (i) In 1988, the taxpayer acquires vacant land for the purpose of constructing a shopping mall. Before commencing construction, the taxpayer leases the land under a one-year lease to an automobile dealer, who uses the land to park cars held in its inventory. The taxpayer commences construction of the shopping mall in 1989.

(ii) The taxpayer acquired the land for the principal purpose of constructing the shopping mall, not for the principal purpose of realizing gain from the appreciation of the property. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

(iii) The land has not been used in any taxable year in any trade or business of the taxpayer. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(C) of this section as incidental to a trade or business activity.

(iv) Since the rental of the land in 1988 is not treated under paragraph (e)(3)(vi) of this section as incidental to a nonrental activity of the taxpayer, the rental of the land in 1988 is a rental activity. See § 1.469–2T(f)(3) for a special rule relating to the treatment of gross income from the rental of nondepreciable property.

Example (8). The taxpayer makes farmland available to a tenant farmer pursuant to an arrangement designated a ‘‘crop-share lease.’’ Under the arrangement, the tenant is required to use the tenant's best efforts to farm the land and produce marketable crops. The taxpayer is obligated to pay 50 percent of the costs incurred in the activity (without regard to whether any crops are successfully produced or marketed), and is entitled to 50 percent of the crops produced (or 50 percent of the proceeds from marketing the crops). For purposes of paragraph (e)(3)(vii) of this section, the taxpayer is treated as providing the farmland for use in a farming activity conducted by a joint venture in the taxpayer's capacity as an owner of an interest in the joint venture. Accordingly, under paragraph (e)(3)(ii)(F) of this section, the taxpayer is not engaged in a rental activity, without regard to whether the taxpayer performs any services in the farming activity.

Example (9). The taxpayer owns a taxicab which the taxpayer operates during the day and leases to another driver for use at night under a one-year lease. Under the terms of the lease, the other driver is charged a fixed rental for use of the taxicab. Assume that, under the rules to be contained in § 1.469–4T, the taxpayer is engaged in two separate activities, an activity of operating the taxicab and an activity of making the taxicab available for use by the other driver. Under these facts, the period for which the other driver uses the taxicab exceeds 30 days, and the taxpayer does not provide extraordinary personal services in connection with making the taxicab available to the other driver. Accordingly, the lease of the taxicab is a rental activity.

Example (10). The taxpayer operates a golf course. Some customers of the golf course pay green fees upon each use of the golf course, while other customers purchase weekly, monthly, or annual passes. The golf course is open to all customers from sunrise to sunset every day of the year except certain holidays and days on which the taxpayer determines that the course is too wet for play. The taxpayer thus makes the golf course available during prescribed hours for nonexclusive use by various customers. Accordingly, under paragraph (e)(3)(ii)(E) of this section, the taxpayer is not engaged in a rental activity, without regard to the average period of customer use for the golf course.

(4) *Special rule for oil and gas working interests*—(i) *In general.* Except as otherwise provided in paragraph (e)(4)(ii) of this section, an interest in an oil or gas well drilled or operated pursuant to a working interest (within the meaning of paragraph (e)(4)(iv) of this section) of a taxpayer is not an interest in a passive activity for the taxpayer's taxable year (without regard to whether the taxpayer materially participates in such activity) if at any time during such taxable year the taxpayer holds such working interest either—

(A) Directly; or

(B) Through an entity that does not limit the liability of the taxpayer with respect to the drilling or operation of such well pursuant to such working interest.

(ii) *Exception for deductions attributable to a period during which liability is limited*—(A) *In general.* If paragraph (e)(4)(i) of this section applies for a taxable year to the taxpayer's interest in an oil or gas well that would, but for the application of paragraph (e)(4)(i) of this section, by an interest in a passive activity for the taxable year, and the taxpayer has a net loss (within the meaning of paragraph (e)(4)(ii)(C)(*3*) of this section) from the well for the taxable year—

(*1*) The taxpayer's disqualified deductions (within the meaning of paragraph (e)(4)(ii)(C)(*2*) of this section) from such oil or gas well for such year shall be treated as passive activity deductions for such year (within the meaning of § 1.469–2T(d)); and

(*2*) A ratable portion (within the meaning of paragraph (e)(4)(ii)(C)(*4*) of this section) of the taxpayer's gross income from such oil or gas well for such year shall be treated as passive activity gross income for such year (within the meaning of § 1.469–2T(c)).

(B) *Coordination with rules governing the identification of disallowed passive activity deductions.* If gross income and deductions from an activity for a taxable year are treated as passive activity gross income and passive activity deductions under paragraph (e)(4)(ii)(A) of this section, such activity shall be treated as a passive activity for such year for purposes of applying paragraph (f) (2) and (4) of this section.

(C) *Meaning of certain terms.* For purposes of this paragraph (e)(4)(ii), the following terms shall have the meanings set forth below:

(*1*) *Allocable deductions.* The deductions allocable to a taxable year are any deductions that arise in such year (within the meaning of § 1.469–2T (d)(8)) and any deductions that are treated as deductions for such year under paragraph (f)(4) of this section.

(*2*) *Disqualified deductions.* The taxpayer's ‘‘disqualified deductions'' from an oil or gas well for a taxable year are the taxpayer's deductions—

(*i*) That are attributable to such well and allocable to the taxable year; and

(*ii*) With respect to which economic performance (within the meaning of section 461(h), without regard to section 461 (h)(3) or (i)(2)) occurs at a time during which the taxpayer's only interest in the working interest is held through an entity that limits the taxpayer's liability with respect to the drilling or operation of such well.

(*3*) *Net loss.* The ‘‘net loss'' of a taxpayer from an oil or gas well for a taxable year equals the amount by which the taxpayer's deductions that are attributable to such oil or gas well and allocable to such year exceeds the gross income of the taxpayer from such well for such year.

(*4*) *Ratable portion.* The ‘‘ratable portion'' of the taxpayer's gross income from an oil or gas well for a taxable year equals the total amount of such gross income multiplied by the fraction obtained by dividing—

(*i*) The disqualified deductions from such oil or gas well for the taxable year; by

(*ii*) The total amount of the deductions that are attributable to such oil or gas well and allocable to the taxable year.

(iii) *Examples.* The following examples illustrate the application of paragraphs (e)(4) (i) and (ii) of this section:

Example (1). (i) A, a calendar year individual, acquires on January 1, 1987, a general partnership interest in P, a calendar year partnership that holds a working interest in an oil or gas property. Pursuant to the partnership agreement, A is entitled to convert the general partnership interest into a limited partnership interest at any time. On December 1, 1987, pursuant to a contract with D, an independent drilling contractor, P commences drilling a single well pursuant to the working interest. Under the drilling contract, P pays D for the drilling only as the work is performed. All drilling costs are deducted by P in the year in which they are paid. At the end of 1987, A converts the general partnership interest into a limited partnership interest, effective immediately. The drilling of the well is completed on February 28, 1988. A's interest in the well would but for this paragraph (e)(4) be an interest in a passive activity.

(ii) Throughout 1987, A holds the working interest through an entity that does not limit A's liability with respect to the drilling of the well pursuant to the working interest. In 1988, however, A holds the working interest through an entity that limits A's liability with respect to the drilling and operation of the well throughout such year. Accordingly, under paragraph (e)(4)(i) of this section, A's interest in P's well is not an interest in a passive activity for 1987 but is an interest in a passive activity for 1988. Moreover, since economic performance occurs in 1987 with respect to all items of deduction for drilling costs that are allocable to 1987, A has no disqualified deductions for 1987.

Example (2). The facts are the same as in example (1), except that all costs of drilling under the contract with D (including costs of drilling performed after 1987) are paid before the end of 1987 and A has a net loss for 1987. In addition, A has $15,000 of total deductions that are attributable to the well and allocable to 1987, but economic performance (as that term is used in paragraph (e)(4)(ii)(C)(*2*)(*ii*) of this section) does not occur with respect to $5,000 of those deductions until 1988. Under paragraph (e)(4)(ii) of this section, the $5,000 of deductions with respect to which economic performance occurs in 1988 are disqualified deductions and are treated as passive activity deductions for 1987. In addition, one-third ($5,000/$15,000) of A's gross income from the well for 1987 is treated as passive activity gross income.

(iv) *Definition of ''working interest.''* [Reserved] See § 1.469–1(e)(4)(iv) for rules relating to this paragraph.

(v) *Entities that limit liability*—(A) *General rule.* For purposes of paragraph (e)(4)(i)(B) of this section, an entity limits the liability of the taxpayer with respect to the drilling or operation of a well pursuant to a working interest held through such entity if the taxpayer's interest in the entity is in the form of—

(*1*) A limited partnership interest in a partnership in which the taxpayer is not a general partner;

(*2*) Stock in a corporation; or

(*3*) An interest in any entity (other than a limited partnership or corporation) that, under applicable State law, limits the potential liability of a holder of such an interest for all obligations of the entity to a determinable fixed amount (for example, the sum of the taxpayer's capital contributions).

(B) *Other limitations disregarded.* For purposes of this paragraph (e)(4), protection against loss through any of the following is not taken into account in determining whether a taxpayer holds a working interest through an entity that limits the taxpayer's liability:

(*1*) An indemnification agreement;

(*2*) A stop loss arrangement;

(*3*) Insurance;

(*4*) Any similar arrangement; or

(*5*) Any combination of the foregoing.

(C) *Examples.* The following examples illustrate the application of this paragraph (e)(4)(v):

Example (1). A owns a 20 percent interest as a general partner in the capital and profits of P, a partnership which owns oil or gas working interests. The other partners of P agree to indemnify A against liability in excess of A's capital contribution for any of P's costs and expenses with respect to P's working interests. As a general partner, however, A is jointly and severally liable for all of P's liabilities and, under paragraph (e)(4)(v)(B)(*1*) of this section, the indemnification agreement is not taken into account in determining whether A holds the working interests through an entity that limits A's liability. Accordingly, the partnership does not limit A's liability with respect to the drilling or operation of wells pursuant to the working interests.

Example (2). B owns a 10 percent interest in X, an entity (other than a limited partnership or corporation) created under applicable State law to hold working interests in oil or gas properties. Under applicable State law, B is liable without limitation for 10 percent of X's costs and expenses with respect to X's working interests but is not liable for the remaining 90 percent of such costs and expenses. Since B's liability for the obligations of X is not limited to a determinable fixed amount (within the meaning of paragraph (e)(4)(v)(A)(*3*) of this section), the entity does not limit B's liability with respect to the drilling or operation of wells pursuant to the working interests.

Example (3). C is both a general partner and a limited partner in a partnership that owns a working interest in oil or gas property. Because C owns an interest as a general partner in each well drilled pursuant to the working interest, C's entire interest in each well drilled pursuant to the working interest is treated under paragraph (e)(4)(i) of this section as an interest in an activity that is not a passive activity (without regard to whether C materially participates in such activity).

(vi) *Cross reference to special rule for income from certain oil or gas properties.* A special rule relating to the treatment of income from certain interests in oil or gas properties is contained in § 1.469–2T(c)(6).

(5) *Rental of dwelling unit.* [Reserved] See § 1.469–2(d)(2)(xii) for rules relating to this paragraph.

(6) *Activity of trading personal property*—(i) *In general.* An activity of trading personal property for the account of owners of interests in the activity is not a passive activity (without regard to whether such activity is a trade or business activity (within the meaning of paragraph (e)(2) of this section)).

(ii) *Personal property.* For purposes of this paragraph (e)(6), the term ''personal property'' means personal property (within the meaning of section 1092(d), without regard to paragraph (3) thereof).

(iii) *Example.* The following example illustrates the application of this paragraph (e)(6):

Example. A partnership is a trader of stocks, bonds, and other securities (within the meaning of section 1236(c)). The capital employed by the partnership in the trading activity consists of amounts contributed by the partners in exchange for their partnership interests, and funds borrowed by the partnership. The partnership derives gross income from the activity in the form of interest, dividends, and capital gains. Under these facts, the partnership is treated as conducting an activity of trading personal property for the account of its partners. Accordingly, under this paragraph (e)(6), the activity is not a passive activity.

(f) *Treatment of disallowed passive activity losses and credits*—(1) *Scope of this paragraph.* The rules in this paragraph (f)—

(i) Identify the passive activity deductions that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity loss is disallowed under paragraph (a)(1)(i) of this section;

(ii) Identify the credits from passive activities that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity credit is disallowed under paragraph (a)(1)(i) of this section; and

(iii) Provide for the carryover of disallowed deductions and credits.

(2) *Identification of disallowed passive activity deductions*—(i) *Allocation of disallowed passive activity loss among activities*—(A) *General rule.* If all or any portion of the taxpayer's passive activity loss is disallowed for the taxable year under paragraph (a)(1)(i) of this section, a ratable portion of the loss (if any) from each passive activity of the taxpayer is disallowed. For purposes of the preceding sentence, the ratable portion of a loss from an activity is computed by multiplying the passive activity loss that is disallowed for the taxable year by the fraction obtained by dividing—

(*1*) The loss from the activity for the taxable year; by

(*2*) The sum of the losses for the taxable year from all activities having losses for such year.

(B) *Loss from an activity.* For purposes of this paragraph (f)(2)(i), the term ''loss from an activity'' means—

(*1*) The amount by which the passive activity deductions from the activity for the taxable year (within the meaning of § 1.469–2T(d)) exceed the passive activity gross income from the activity for the taxable year (within the meaning of § 1.469–2T(c)); reduced by

(*2*) Any part of such amount that is allowed under section 469(i) and the rules to be contained in § 1.469–9T (relating to the $25,000 allowance for certain rental real estate activities).

(C) *Significant participation passive activities.* If the taxpayer's passive activity gross income from significant participation passive activities (within the meaning of § 1.469–2T(f)(2)(ii)) for the taxable year (determined without regard to § 1.469–2T(f)(2) through (4)) exceeds the taxpayer's passive activity deductions from such activities for the taxable year, such activities shall be treated, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, as a single activity that does not have a loss for such taxable year.

(D) *Examples.* The following examples illustrate the application of this paragraph (f)(2)(i):

Example (1). An individual holds interests in three passive activities, A, B, and C. The gross income and deductions from these activities for the taxable year are as follows:

	A	B	C	Total
Gross income	$7,000	$4,000	$12,000	$23,000
Deductions	(16,000)	(20,000)	(8,000)	(44,000)
Net income (loss)	($9,000)	($16,000)	$4,000	($21,000)

The taxpayer's $21,000 passive activity loss for the taxable year is disallowed under paragraph (a)(1)(i) of this section. Therefore, a ratable portion of the losses from activities A and B is disallowed. The disallowed portion of each loss is determined as follows:

A: $21,000 × $9,000/$25,000	$7,560
B: $21,000 × $16,000/$25,000	$13,440
Total	$21,000

Example (2). An individual holds interests in four passive activities, A, B, C, and D. The results of operations of these activities for the taxable year are as follows:

	A	B	C	D	Total
Gross income	15,000	5,000	10,000	10,000	40,000
Deductions	(5,000)	(10,000)	(20,000)	(8,000)	(43,000)
Net income (loss)	10,000	(5,000)	(10,000)	2,000	(3,000)

Activities A and B are significant participation passive activities (within the meaning of § 1.469–2T(f)(2)(ii)). The gross income from these activities for the taxable year ($20,000) exceeds the passive activity deductions from those activities for the taxable year ($15,000) by $5,000 and, under § 1.469–2T(f)(2), $5,000 of gross income from those activities is treated as not from a passive activity. Therefore, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, activities A and B are treated as a single activity that does not have a loss for the taxable year. Under § 1.469–2T(b), the taxpayer's passive activity loss for the taxable year is $8,000 ($43,000 of passive activity deductions minus $35,000 of passive activity gross income). The results of treating activities A and B as a single activity that does not have a loss for the taxable year is that none of the $8,000 passive activity loss is allocated under this paragraph (f)(2)(i) to activity B for the taxable year, even though the taxpayer incurred a loss in that activity for the taxable year.

(ii) *Allocation within loss activities*—(A) *In general.* If all or any portion of a taxpayer's loss from an activity is disallowed under paragraph (f)(2)(i) of this section for the taxable year, a ratable portion of each passive activity deduction (other than an excluded deduction (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity is disallowed. For purposes of the preceding sentence, the ratable portion of a passive activity deduction of a taxpayer is the amount of the disallowed portion of the taxpayer's loss from the activity (within the meaning of paragraph (f)(2)(i)(B) of this section) for the taxable year multiplied by the fraction obtained by dividing—

(*1*) The amount of such deduction; by

(*2*) The sum of all passive activity deductions (other than excluded deductions (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity from the taxable year.

(B) *Excluded deductions.* The term ''excluded deduction'' means any passive activity deduction of a taxpayer that is taken into account in computing the taxpayer's net income from an item of property for a taxable year in which an amount of the taxpayer's gross income from such item of property is treated as not from a passive activity under § 1.469–2T(c)(6) or § 1.469–2T(f) (5), (6), or (7).

(iii) *Separately identified deductions.* In identifying the deductions from an activity that are disallowed under this paragraph (f)(2), the taxpayer need not account separately for a deduction unless such deduction may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such deduction not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702–1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Deductions that must be accounted for separately include (but are not limited to) deductions that—

(A) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in taxable years in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in such activity;

(B) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in taxable years in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in such activity; or

(C) Are taken into account under section 1211 (relating to the limitation on capital losses) or section 1231 (relating to property used in a trade or business and involuntary conversions).

(3) *Identification of disallowed credits from passive activities*—(i) *General rule.* If all or any portion of the taxpayer's passive activity credit is disallowed for the taxable year under paragraph (a)(1)(ii) of this section, a ratable portion of each credit from each passive activity of the taxpayer is disallowed. For purposes of the preceding sentence, the ratable portion of a credit of a taxpayer is computed by multiplying the portion of the taxpayer's passive activity credit that is disallowed for the taxable year by the fraction obtained by dividing—

(A) The amount of the credit; by

(B) The sum of all of the taxpayer's credits from passive activities for the taxable year.

(ii) *Coordination rule.* For purposes of paragraph (f)(3)(i) of this section, the credits from a passive activity do not include any credit or portion of a credit that—

(A) Is allowed for the taxable year under section 469(i) and the rules to be contained in § 1.469–9T (relating to the $25,000 allowance for certain rental real estate activities); or

(B) Increases the basis of property during the taxable year under section 469(j)(9) and the rules to be contained in § 1.469–6T (relating to the election to increase the basis of certain property by disallowed credits).

(iii) *Separately identified credits.* In identifying the credits from an activity that are disallowed under this paragraph (f)(3), the taxpayer need not account separately for any credit unless such credit may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such credit not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702–1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Credits that must be accounted for separately include (but are not limited to)—

(A) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) that arise in a taxable year in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in such activity;

(B) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) that arise in a taxable year in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in such activity;

(C) Low-income housing and rehabilitation investment credits from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T); and

(D) Any credit that is subject to the limitations of sections 26(a), 28(d)(2), 29(b)(5), or 38(c) in a manner that differs from the manner in which any other credit is subject to such limitations.

(4) *Carryover of disallowed deductions and credits.* [Reserved] See § 1.469–1(f)(4) for rules relating to this paragraph.

(g) *Application of these rules to C corporations*—(1) *In general.* Except as otherwise provided in the rules to be contained in paragraph (k) of this section, section 469 and the regulations thereunder do not apply to any corporation that is not a personal service corporation or a closely held corporation for the taxable year. See paragraphs (g) (4) and (5) of this section for special rules for computing the passive activity loss and passive activity credit, respectively, of a closely held corporation.

(2) *Definitions.* For purposes of section 469 and the regulations thereunder—

(i) The term *personal service corporation* means a C corporation that is a personal service corporation for the taxable year (within the meaning of § 1.441–4T(d)); and

(ii) The term *closely held corporation* means a C corporation that meets the stock ownership requirements of section 542(a)(2) (taking into account the modifications in section 465(a)(3)) for the taxable year and is not a personal service corporation for such year.

(3) *Participation of corporations*—(i) *Material participation.* For purposes of section 469 and the regulations thereunder, a corporation described in paragraph (g)(2) of this section shall be treated as materially participating in an activity for a taxable year if and only if—

(A) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as materially participating in such activity for the taxable year, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation; or

(B) In the case of a closely held corporation (within the meaning of paragraph (g)(2)(ii) of this section), the requirements of section 465(c)(7)(C) (without regard to clause (iv) thereof and taking into account section 465(c)(7)(D)) are met with respect to such activity.

(ii) *Significant participation.* For purposes of § 1.469–2T(f)(2), an activity of a corporation described in paragraph (g)(2) of this section shall be treated as a significant participation passive activity for a taxable year if and only if—

(A) The corporation is not treated as materially participating in such activity for the taxable year; and

(B) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as significantly participating in such activity, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation.

(iii) *Participation of individual.* Whether an individual is treated for purposes of this paragraph (g)(3) as materially participating or significantly participating in an activity of a corporation shall be determined under the rules of § 1.469–5T, except that in applying such rules—

(A) All activities of the corporation shall be treated as activities in which the individual holds an interest in determining whether the individual participates (within the meaning of § 1.469–5T(f)) in an activity of the corporation; and

(B) The individual's participation in all activities other than activities of the corporation shall be disregarded in determining whether the individual's participation in an activity of the corporation is treated as material participation under § 1.469–5T(a)(4) (relating to material participation in significant participation activities).

(4) *Modified computation of passive activity loss in the case of closely held corporations.*—(i) *In general.* A closely held corporation's passive activity loss for the taxable year is the amount, if any, by which the corporation's passive activity deductions for the taxable year (within the meaning of § 1.469–2T(d)) exceed the sum of—

(A) The corporation's passive activity gross income for the taxable year (within the meaning of § 1.469–2T(c)); and

(B) The corporation's net active income for the taxable year.

(ii) *Net active income.* For purposes of this paragraph (g)(4), a corporation's net active income for the taxable year is such corporation's taxable income for the taxable year, determined without regard to the following items for the year:

(A) Passive activity gross income;

(B) Passive activity deductions;

(C) [Reserved] See § 1.469–1(g)(4)(ii)(C) for rules relating to this paragraph.

(D) Gross income that is treated under § 1.469–2T(c)(6) (relating to gross income from certain oil or gas properties) as not from a passive activity;

(E) Gross income and deductions from any trade or business activity (within the meaning of paragraph (e)(2) of this section) that is described in paragraph (e)(6) of this section (relating to certain activities of trading personal property) but only if the corporation did not materially participate in such activity for the taxable year;

(F) Deductions described in § 1.469–2T(d)(2)(i), (ii), and (iv) (relating to certain deductions attributable to portfolio income); and

(G) Interest expense allocated under § 1.163–8T to a portfolio expenditure (within the meaning of § 1.163–8T(b)(6)).

(iii) *Examples.* The following examples illustrate the application of this paragraph (g)(4):

Example (1). (i) For 1987, X, a closely held corporation, is engaged in two activities, a trade or business activity in which X materially participates for 1987 and a rental activity. X also holds portfolio investments. For 1987, X has the following gross income and deductions:

Gross income:	
Rents	$60,000
Gross income from business	100,000
Portfolio income	35,000
Total	$195,000
Deductions:	
Rental deductions	($100,000)
Business deductions (80,000).	
Interest expense allocable to portfolio expenditures under § 1.163–8T	(10,000)
Deductions (other than interest expense) clearly and directly allocable to portfolio income	(5,000)
Total	($195,000)

(ii) The corporation's net active income for 1987 is $20,000, computed as follows:

Gross income		$195,000	
Amounts not taken into account in computing net active income:			
Rents (see paragraph (g)(4)(ii)(A) of this section)	$60,000		
Portfolio income (see paragraph (g)(4)(ii)(C) of this section)	$35,000		
	$95,000	($95,000)	
Gross income taken into account in computing net active income		$100,000	$100,000
Deductions		($195,000)	
Amounts not taken into account in computing net active income:			
Rental deductions (see paragraph (g)(4)(ii)(B) of this section)	($100,000)		
Interest expense allocated to portfolio expenditures (see paragraph (g)(4)(ii)(G) of this section)	($10,000)		
Other deductions clearly and directly allocable to portfolio income (see paragraph (g)(4)(ii)(F) of this section)	($5,000)		
	($115,000)	$115,000	
Deductions taken into account in computing net active income		($80,000)	($80,000)
Net active income			$20,000

(iii) Under paragraph(g)(4)(i) of this section, X's passive activity loss for 1987 is $20,000, the amount by which the passive activity deductions for the taxable year ($100,000) exceed the sum of (a) the passive activity gross income for the taxable year ($60,000) and (b) the net active income for the taxable year ($20,000). Under paragraph (f)(4) of this section, the $20,000 of deductions from X's rental activity that are disallowed for

1987 are treated as deductions from the rental activity for 1988. If computed without regard to the net active income for the taxable year, X's passive activity loss would be $40,000 ($100,000 of rental deductions minus $60,000 of rental income). Thus, the effect of the rule in paragraph (g)(4)(i) of this section is to reduce the corporation's passive activity loss for the taxable year by the amount of the corporation's net active income for such year.

(iv) Under these facts, X's taxable income for 1987 is $20,000, computed as follows:

Gross income		$195,000
Deductions:		
Total deductions	($195,000)	
Passive activity loss	$20,000	
Allowable deductions	($175,000)	($175,000)
Taxable income		$20,000

Example (2). (i) The facts are the same as in example (1), except that, in 1988, X has a loss from the trade or business activity, and a net operating loss (''NOL'') of $15,000 that is carried back under section 172(b) to 1987. Since NOL carrybacks are taken into account in computing net active income, X's net active income for 1987 must be recomputed as follows:

Net active income before NOL carryback	$20,000
NOL carryback	($15,000)
Net active income	$5,000

(ii) Under these facts, X's disallowed passive activity loss for 1987 is $35,000, the amount by which the passive activity deductions for the taxable year ($100,000) exceed the sum of (a) the passive activity gross income for the taxable year ($60,000) and (b) the net active income for the taxable year ($5,000).

(iii) Under paragraph (f)(4) of this section, the $35,000 of deductions from X's rental activity that are disallowed for 1987 are treated as deductions from the rental activity for 1988. X's taxable income for 1987 is $20,000, computed as follows:

Gross income		$195,000
Deductions:		
Total deductions	($210,000)	
Passive activity loss	$35,000	
Allowable deductions	($175,000)	($175,000)
Taxable income		$20,000

Thus, taking the NOL carryback into account in computing net active income for 1987 does not affect X's taxable income for 1987, but increases the deductions treated under paragraph (f)(4) as deductions from X's rental activity for 1988 and decreases X's NOL carryover to years other than 1987.

(5) *Allowance of passive activity credit of closely held corporations to extent of net active income tax liability*—(i) *In general.* Solely for purposes of determining the amount disallowed under paragraph (a)(1)(ii) of this section, a closely held corporation's passive activity credit for the taxable year shall be reduced by such corporation's net active income tax liability for such year.

(ii) *Net active income tax liability.* For purposes of paragraph (g)(5)(i) of this section, a corporation's net active income tax liability for a taxable year is the amount (if any) by which—

(A) The corporation's regular tax liability (within the meaning of section 26(b)) for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the corporation's passive activity gross income for such year over the corporation's passive activity deductions for such year; exceeds

(B) The sum of—

(*1*) The corporation's regular tax liability for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the sum of the corporation's net active income (within the meaning of paragraph (g)(4)(ii) of this section) and passive activity gross income for such year over the corporation's passive activity deductions for such year; and

(*2*) The corporation's credits (other than credits from passive activities) that are allowable for the taxable year (without regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469).

(h) *Special rules for affiliated group filing consolidated return.*

(1)–(2) [Reserved]

(3) *Disallowance of consolidated group's passive activity loss or credit.* A consolidated group's passive activity loss or passive activity credit for the taxable year shall be disallowed to the extent provided in paragraph (a) of this section. For purposes of the preceding sentence, a consolidated group's passive

activity loss and passive activity credit shall be determined by taking into account the following items of each member of such group:

(i) Passive activity gross income;

(ii) Passive activity deductions;

(iii) Net active income (in the case of a consolidated group treated as a closely held corporation under paragraph (h)(4)(ii) of this section); and

(iv) Credits from passive activities.

(4) [Reserved] See § 1.469–1(h)(4) for rules relating to this paragraph.

(5) *Modification of rules for identifying disallowed passive activity deductions and credits*—(i) *Identification of disallowed deductions.* In applying paragraphs (f)(2) and (4) of this section to a consolidated group for purposes of identifying the passive activity deductions of such consolidated group and of each member of such consolidated group that are disallowed for the taxable year and treated as deductions from activities for the succeeding taxable year, the following rules shall apply:

(A) A ratable portion (within the meaning of paragraph (h)(5)(ii) of this section) of the passive activity loss of the consolidated group that is disallowed for the taxable year shall be allocated to each member of the group;

(B) Pararaph (f)(2) of this section shall then be applied to each member of the group as if—

(*1*) Such member were a separate taxpayer; and

(*2*) The amount allocated to such member under paragraph (h)(5)(i)(A) of this section were the amount of such member's passive activity loss that is disallowed for the taxable year; and

(C) Paragraph (f)(4) of this section shall be applied to each member of the group as if it were a separate taxpayer.

(ii) *Ratable portion of disallowed passive activity loss.* For purposes of paragraph (h)(5)(i)(A) of this section, a member's ratable portion of the disallowed passive activity loss of the consolidated group is the amount of such disallowed loss multiplied by the fraction obtained by dividing—

(A) The amount of the passive activity loss of such member of the consolidated group that would be disallowed for the taxable year if the items of gross income and deduction of such member were the only items of the group for such year; by

(B) The sum of the amounts described in paragraph (h)(5)(ii)(A) of this section for all members of the group.

(iii) *Identification of disallowed credits.* In applying paragraph (f)(3) of this section to a consolidated group for purposes of identifying the credits from passive activities of members of such consolidated group that are disallowed for the taxable year, the consolidated group shall be treated as one taxpayer. Thus, a ratable portion of each of the group's credits from passive activities is disallowed.

(6) [Reserved]

(7) *Disposition of stock of a member of an affiliated group.* Any gain recognized by a member on the disposition of stock of a subsidiary (including income resulting from the recognition of an excess loss account under § 1.1502–19) shall be treated as portfolio income (within the meaning of § 1.469–2T (c)(3)(i)).

(8) *Dispositions of property used in multiple activities.* The determination of whether § 1.469–2T(c)(2)(ii) or (iii) or (d)(5)(ii) applies to a disposition (including a deemed disposition described in paragraph (h)(6)(iii)(C)(*1*) of this section) of property by a member of a consolidated group shall be made by treating such member as having held the property for the entire period that the group has owned such property and as having used the property in all of the activities in which the group has used such property

(i) [Reserved]

(j) *Spouses filing joint return*—(1) *In general.* Except as otherwise provided in the regulations under section 469, spouses filing a joint return for a taxable year shall be treated for such year as one taxpayer for purposes of section 469 and the regulations thereunder Thus, for example, spouses filing a joint return are treated as one taxpayer for purposes of—

(i) Section 1.469–2T (relating generally to the computation of such taxpayer's passive activity loss); and

(ii) Paragraph (f) of this section (relating to the allocation of such taxpayer's disallowed passive activity loss and passive activity credit among activities and the identification of disallowed passive activity deductions and credits from passive activities).

(2) *Exceptions to treatment as one taxpayer*—(i) *Identification of disallowed deductions and credits.* For purposes of paragraphs (f)(2)(iii) and (3)(iii) of this section, spouses filing a joint return for the taxable year must account separately for the deductions and credits attributable to the interests of each spouse in any activity.

(ii) *Treatment of deductions disallowed under sections 704(d), 1366(d), and 465.* Notwithstanding any other provision of this section or § 1.469–2T, this paragraph (j) shall not affect the application of section 704(d), section 1366(d), or section 465 to taxpayers filing a joint return for the taxable year.

(iii) *Treatment of losses from working interests.* Paragraph (e)(4) of this section (relating to losses and credits from certain interests in oil and gas wells) shall be applied by treating a husband and wife (whether or not filing a joint return) as separate taxpayers.

(3) *Joint return no longer filed.* If an individual—

(A) Does not file a joint return for the taxable years; and

(B) Filed a joint return for the immediately preceding taxable year;

then the passive activity deductions and credits allocable to such individual's activities for the taxable year under paragraph (f)(4) of this section shall be determined by taking into account the items of deduction and credit attributable to such individual's interests in passive activities for the immediately preceding taxable year. See paragraph (j)(2)(i) of this section.

(4) *Participation of spouses.* Rules treating an individual's participation in an activity as participation of such individual's spouse in such activity (without regard to whether the spouses file a joint return) are contained in § 1.469–5T(f)(3).

(k) *Former passive activities and changes in status of corporations.* [Reserved]

[T.D. 8175, 53 FR 5700, Feb. 25, 1988, as amended by T.D. 8253, 54 FR 20535, May 12, 1989; T.D. 8319, 55 FR 49038, Nov. 26, 1990; T.D. 8417, 57 FR 20753, May 15, 1992; 58 FR 29536, May 21, 1993; 58 FR 45059, Aug. 26, 1993; 59 FR 17478, Apr. 13, 1994; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36685, July 18, 1995]

§ 1.469–2 Passive activity loss.

(a)–(c)(2)(ii) [Reserved]

(c)(2)(iii) *Disposition of substantially appreciated property formerly used in nonpassive activity*—(A) *In general.* If an interest in property used in an activity is substantially appreciated at the time of its disposition, any gain from the disposition shall be treated as not from a passive activity unless the interest in property was used in a passive activity for either—

(*1*) 20 percent of the period during which the taxpayer held the interest in property; or

(*2*) The entire 24-month period ending on the date of the disposition.

(B) *Date of disposition.* For purposes of this paragraph (c)(2)(iii), a disposition of an interest in property is deemed to occur on the date that the interest in property becomes subject to an oral or written agreement that either requires the owner or gives the owner an option to transfer the interest in property for consideration that is fixed or otherwise determinable on that date.

(C) *Substantially appreciated property.* For purposes of this paragraph (c)(2)(iii), an interest in property is substantially appreciated if the fair market value of the interest in property exceeds 120 percent of the adjusted basis of the interest.

(D) *Investment property.* For purposes of this paragraph (c)(2)(iii), an interest in property is treated as an interest in property used in an activity other than a passive activity and as an interest in property held for investment for any period during which the interest is held through a C corporation or similar entity. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of § 1.469–2T) from the interests.

(E) *Coordination with § 1.469–2T(c)(2)(ii).* If § 1.469–2T(c)(2)(ii) applies to the disposition of an interest in property, this paragraph (c)(2)(iii) applies only to that portion of the gain from the disposition of the interest in property that is characterized as gain from a passive activity after the application of § 1.469–2T(c)(2)(ii).

(F) *Coordination with section 163(d).* Gain that is treated as not from a passive activity under this paragraph (c)(2)(iii) is treated as income described in section 469(e)(1)(A) and § 1.469–2T(c)(3)(i) if and only if the gain is from the disposition of an interest in property that was held for investment for more than 50 percent of the period during which the taxpayer held that interest in property in activities other than passive activities.

(G) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(iii):

Example 1. A acquires a building on January 1, 1993, and uses the building in a trade or business activity in which A materially participates until March 31, 2004. On April 1, 2004, A leases the building to B. On December 31, 2005, A sells the building. At the time of the sale, A's interest in the building is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). Assuming A's lease of the building to B constitutes a rental activity (within the meaning of § 1.469–1T(e)(3)), the building is used in a passive activity for 21 months (April 1, 2004, through December 31, 2005). Thus, the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 21-month period during which the building was used in a passive activity is less than 20 percent of A's holding period for the building (13 years). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

Example 2. (i) A, an individual, is a stockholder of corporation X. X is a C corporation until December 31, 1993, and is an S corporation thereafter. X acquires a building on January 1, 1993, and sells the building on March 1, 1994. At the time of the sale, A's interest in the building held through X is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). The building is leased to various tenants at all times during the period in which it is held by X. Assume that the lease of the building would constitute a rental activity (within the meaning of § 1.469–1T(e)(3)) with respect to a person that holds the building directly or through an S corporation.

(ii) Paragraph (c)(2)(iii)(D) of this section provides that an interest in property is treated for purposes of this paragraph (c)(2)(iii) as used in an activity other than a passive activity and as held for investment for any period during which the interest is held through a C corporation. Thus, for purposes of determining the character of A's gain from the sale of the building, A's interest in the building is treated as an interest in property held for investment for the period from January 1, 1993, to December 31, 1993, and as an interest in property used in a passive activity for the period from January 1, 1994, to February 28, 1994.

(iii) A's interest in the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 2-month period during which A's interest in the building was used in a passive activity is less than 20 percent of the period during which A held an interest in the building (14 months). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

(iv) Under paragraph (c)(2)(iii)(F) of this section, gain that is treated as nonpassive under this paragraph (c)(2)(iii) is treated as portfolio income (within the meaning of § 1.469–2T(c)(3)(i)) if the gain is from the disposition of an interest in property that was held for investment for more than 50 percent of the period during which the taxpayer held the interest in activities other than passive activities. In this case, A's interest in the building was treated as held for investment for the entire period during which it was used in activities other than passive activities (*i.e.,* the 12-month period from January 1, 1993, to December 31, 1993). Accordingly, A's gain from the sale is treated under this paragraph (c)(2)(iii) as portfolio income.

(iv) *Taxable acquisitions.* If a taxpayer acquires an interest in property in a transaction other than a nonrecognition transaction (within the meaning of section 7701(a)(45)), the ownership and use of the interest in property before the transaction is not taken into account for purposes of applying this paragraph (c)(2) to any subsequent disposition of the interest in property by the taxpayer.

(v) *Property held for sale to customers*—(A) *Sale incidental to another activity*—(*1*) *Applicability*—(*i*) *In general.* This paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property if and only if—

(*A*) At the time of the disposition, the taxpayer holds the interest in property in an activity that, for purposes of section 1221(1), involves holding the property or similar property primarily for sale to customers in the ordinary course of a trade or business (a dealing activity);

(*B*) One or more other activities of the taxpayer do not involve holding similar property for sale to customers in the ordinary course of a trade or business (nondealing activities) and the interest in property was used in the nondealing activity or activities for more than 80 percent of the period during which the taxpayer held the interest in property; and

(*C*) The interest in property was not acquired and held by the taxpayer for the principal purpose of selling the interest to customers in the ordinary course of a trade or business.

(*ii*) *Principal purpose.* For purposes of this paragraph (c)(2)(v)(A), a taxpayer is rebuttably presumed to have acquired and held an interest in property for the principal purpose of selling the interest to customers in the ordinary course of a trade or business if—

(*A*) The period during which the interest in property was used in nondealing activities of the taxpayer does not exceed the lesser of 24 months or 20 percent of the recovery period (within the meaning of section 168) applicable to the property; or

(*B*) The interest in property was simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which the interest in property was used in nondealing activities of the taxpayer.

For purposes of the preceding sentence, an interest in property is not considered to be offered for sale to customers solely because a lessee of the property has been granted an option to purchase the property.

(*2*) *Dealing activity not taken into account.* If paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property, holding the interest in the dealing activity is treated, for purposes of § 1.469–2T(c)(2), as the use of the interest in the last nondealing activity of the taxpayer in which the interest in property was used prior to its disposition.

(B) *Use in a nondealing activity incidental to sale.* If paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of disposition, the use of the interest in property in a nondealing activity of the taxpayer for any period during which the interest in property is also offered for sale to customers is treated, for purposes of § 1.469–2T(c)(2), as the use of the interest in property in the dealing activity of the taxpayer.

(C) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(v):

Example 1. (i) The taxpayer acquires a residential apartment building on January 1, 1993, and uses the building in a rental activity. In January 1996, the taxpayer converts the apartments into condominium units. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under § 1.469–4, and that the taxpayer materially participates in the activity.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The units are first held for sale on January 1, 1996, and the last unit is sold on December 31, 1996.

(ii) This paragraph (c)(2)(v) provides that holding an interest in property in a dealing activity (the marketing of the property) is treated for purposes of § 1.469–2T(c)(2) as the use of the interest in a nondealing activity if the marketing of the property is incidental to the nondealing use. Under paragraph (c)(2)(v)(A)(*2*) of this section, the interests in property are treated as used in the last nondealing activity in which they were used prior to their disposition. In addition, paragraph (c)(2)(v)(A)(*1*) of this section provides rules for determining whether the marketing of the property is incidental to the use of an interest in property in a nondealing activity. Under these rules, the marketing of the property is treated as incidental to the use in a nondealing activity if the interest in property was used in nondealing activities for more than 80 percent of the taxpayer's holding period in the property (the holding period requirement) and the taxpayer did not acquire and hold the interest in property for the principal purpose of selling it to customers in the ordinary course of a trade or business (a dealing purpose).

(iii) In this case, the apartments were used in a rental activity for the entire period during which they were held by the taxpayer. Thus, the apartments were used in a nondealing activity for more than 80 percent of the taxpayer's holding period in the property, and the marketing of the property satisfies the holding period requirement.

(iv) Paragraph (c)(2)(v)(A)(*1*)(*ii*) of this section provides that a taxpayer is rebuttably presumed to have a dealing purpose unless the interest in property was used in nondealing activities for more than 24 months or 20 percent of the property's recovery period (whichever is less). The same presumption applies if the interest in property was offered for sale to customers during more than 25 percent of the period in which the interest was held in nondealing activities. In this case, the taxpayer used each apartment in a nondealing activity (the rental activity) for a period of 36 to 48 months (*i.e.*, from January 1, 1993, to the date of sale in the period from January through December 1996). Thus, the apartments were used in nondealing activities for more than 24 months, and the first of the rebuttable presumptions described above does not apply. In addition, the apartments were offered for sale to customers for up to 12 months (depending on the month in which the apartment was sold) during the period in which the apartments were used in a nondealing activity. The percentage obtained by dividing the period during which an apartment was held for sale to customers by the period during which the apartment was used in nondealing activities ranges from zero in the case of apartments sold on January 1, 1996, to 25 percent (*i.e.*, 12 months/48 months) in the case of apartments sold on December 31, 1996. Thus, no apartment was offered for sale to customers during more than 25 percent of the period in which it was used in nondealing activities, and the second rebuttable presumption does not apply.

(v) Because neither of the rebuttable presumptions in paragraph (c)(2)(v)(A)(*1*)((*ii*) of this section applies in this case, the taxpayer will not be treated as having a dealing purpose unless other facts and circumstances establish that the taxpayer acquired and held the apartments for the principal purpose of selling the apartments to customers in the ordinary course of a trade or business. Assume that none of the facts and circumstances suggest that the taxpayer had such a purpose. If that is the case, the taxpayer does not have a dealing purpose.

(vi) The marketing of the property satisfies the holding period requirement, and the taxpayer does not have a dealing purpose. Thus, holding the apartments in the taxpayer's dealing activity is treated for purposes of this paragraph (c)(2) as the use of the apartments in a nondealing activity. In this case, the rental activity is the only nondealing activity in which the apartments were used prior to their disposition. Thus, the apartments are treated under paragraph (c)(2)(v)(A)(*2*) of this section as interests in property that were used only in the rental activity for the entire period during which the taxpayer held the interests. Accordingly, the rules in §1.469–2T(c)(2)(ii) and paragraph (c)(2)(iii) of this section do not apply, and all gain from the sale of the apartments is treated as passive activity gross income.

Example 2. (i) The taxpayer acquires a residential apartment building on January 1, 1993, and uses the building in a rental activity. The taxpayer converts the apartments into condominium units on July 1, 1993. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under §1.469–4, and that the taxpayer materially participates in the activities.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The first unit is sold on January 1, 1994, and the last unit is sold on December 31, 1996.

(ii) In this case, all of the apartments were simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which the apartments were used in nondealing activities. Thus, the taxpayer is rebuttably presumed to have acquired the apartments (including apartments that are used in the rental activity for at least 24 months) for the principal purpose of selling them to customers in the ordinary course of a trade or business. Assume that the facts and circumstances do not rebut this presumption. If that is the case, the taxpayer has a dealing purpose, and paragraph (c)(2)(v)(A) of this section does not apply to the disposition of the apartments.

(iii) Paragraph (c)(2)(v)(B) of this section provides that if paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of the disposition, the use of the interest in property in any nondealing activity of the taxpayer for any period during which the interest is also offered for sale to customers is treated as incidental to the use of the interest in the dealing activity. Accordingly, for purposes of applying the rules of §1.469–2T(c)(2) to the disposition of the apartments, the rental of the apartments after July 1, 1993, is treated as the use of the apartments in the taxpayer's dealing activity.

Example 3. (i) The taxpayer acquires a residential apartment building on January 1, 1993, and uses the building in a rental activity. In January 1996, the taxpayer converts the apartments into condominium units. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under § 1.469–4, and that the taxpayer materially participates in the activities.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The units are first held for sale on January 1, 1996, and the last unit is sold in 1997.

(ii) The treatment of apartments sold in 1996 is the same as in Example 1. The apartments sold in 1997, however, were simultaneously offered for sale to customers and used in a nondealing activity for more than 25 percent of the period during which the apartments were used in nondealing activities. (For example, an apartment that is sold on January 31, 1997, has been offered for sale for 13 months or 26.1 percent of the 49-month period during which it was used in nondealing activities.) Thus, the taxpayer is rebuttably presumed to have acquired the apartments sold in 1997 for the principal purpose of selling them to customers in the ordinary course of a trade of business. Assume that the facts and circumstances do not rebut this presumption. In that case, the marketing of the apartments sold in 1997 does not satisfy the principal purpose requirement, and paragraph (c)(2)(v)(A) of this section does not apply to the disposition of those apartments. Accordingly, for purposes of applying the rules of § 1.469–2T(c)(2) to the disposition of the apartments sold in 1997, the rental of the apartments after January 1, 1996, is treated, under paragraph (c)(2)(v)(B) of this section, as the use of the apartments in the taxpayer's dealing activity.

(c)(3)–(c)(5) [Reserved]

(c)(6) *Gross income from certain oil or gas properties*—(i) *In general.* Notwithstanding any other provision of the regulations under section 469, passive activity gross income for any taxable year does not include an amount of the taxpayer's gross passive income for the year from a property described in this paragraph (c)(6)(i) equal to the taxpayer's net passive income from the property for the year. Property is described in this paragraph (c)(6)(i) if the property is—

(A) An oil or gas property that includes an oil or gas well if, for any prior taxable year beginning after December 31, 1986, any of the taxpayer's loss from the well was treated, solely by reason of § 1.469–1T(e)(4) (relating to a special rule for losses from oil and gas working interests), and not by reason of the taxpayer's material participation in the activity, as a loss that is not from a passive activity; or

(B) Any property the basis of which is determined in whole or in part by reference to the basis of property described in paragraph (c)(6)(i)(A) of this section.

(ii) *Gross and net passive income from the property.* For purposes of this paragraph (c)(6)—

(A) The taxpayer's gross passive income for any taxable year from any property described in paragraph (c)(6)(i) of this section is any passive activity gross income for the year (determined without regard to this paragraph (c)(6) and § 1.469–2T(f)) from the property;

(B) The taxpayer's net passive income for any taxable year from any property described in paragraph (c)(6)(i) of this section is the excess, if any, of—

(*1*) The taxpayer's gross passive income for the taxable year from the property; over

(*2*) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for the year under § 1.469–1T(f)(4)) that are reasonably allocable to the income; and

(C) if any oil or gas well or other item of property (the item) is included in two or more properties described in paragraph (c)(6)(i) of this section (the properties), the taxpayer must allocate the passive activity gross income (determined without regard to this paragraph (c)(6) and § 1.469–2T(f) from the item and the passive activity deductions reasonably allocable to the item among the properties.

(iii) *Property.* For purposes of paragraph (c)(6)(i)(A) of this section, the term ''property'' does not have the meaning given the term by section 614(a) or the regulations thereunder, and an oil or gas property that includes an oil or gas well is—

(A) The well; and

(B) Any other item of property (including any oil or gas well) the value of which is directly enhanced by any drilling, logging, seismic testing, or other activities the costs of which were taken into account in determining the amount of the taxpayer's income or loss from the well.

(iv) *Examples.* The following examples illustrate the application of this paragraph (c)(6):

Example 1. A is a general partner in partnership P and a limited partner in partnership R. P and R own oil and gas working interests in two separate tracts of land acquired from two separate landowners. In 1993, P drills a well on its tract, and A's distributive share of P's losses from drilling the well are treated under §1.469–1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, P develops information indicating that the reservior in which the well was drilled underlies R's tract as well as P's. Under these facts, P's and R's tracts are treated as one property for purposes of this paragraph (c)(6), even if A's interests in the mineral deposits in the tracts are treated as separate properties under section 614(a). Accordingly, in 1994 and subsequent years, A's distributive share of both P's and R's income and expenses from their respective tracts is taken into account in computing A's net passive income from the property for purposes of this paragraph (c)(6).

Example 2. B is a general partner in partnership S. S owns an oil and gas working interest in a single tract of land. In 1993, S drills a well, and B's distributive share of S's losses from drilling the well is treated under §1.469–1T(e)(4) as not from a passive activity. In the course of drilling the well, S discovers two oil-bearing formations, one underlying the other. On December 1, 1993, S completes the well in the underlying formation. On January 1, 1994, B converts B's entire general partnership interest in S into a limited partnership interest. In 1994, S completes in, and commences production from, the shallow formation. Under these facts, the two mineral deposits in S's tract are treated as one property for purposes of this paragraph (c)(6), even if they are treated as separate properties under section 614(a). Accordingly, B's distributive share of S's income and expenses from both the underlying formation and from recompletion in and production from the shallow formation is taken into account in computing B's net passive income from the property for purposes of this paragraph (c)(6).

(c)(6)(iv) *Example 3*—(c)(7)(iii) [Reserved]

(c)(7)(iv) Gross income of an individual from a covenant by such individual not to compete;

(v) Gross income that is treated as not from a passive activity under any provision of the regulations under section 469, including but not limited to §1.469–1T(h)(6) (relating to income from intercompany transactions of members of an affiliated group of corporations filing a consolidated return) and §1.469–2T(f) and paragraph (f) of this section (relating to recharacterized passive income);

(vi) Gross income attributable to the reimbursement of a loss from fire, storm, shipwreck, or other casualty, or from theft (as such terms are used in section 165(c)(3)) if—

(A) The reimbursement is included in gross income under §1.165–1(d)(2)(iii) (relating to reimbursements of losses that the taxpayer deducted in a prior taxable year); and

(B) The deduction for the loss was not a passive activity deduction; and

(c)(7)(vii) Gross income or gain allocable to business or rental use of a dwelling unit for any taxable year in which section 280A(c)(5) applies to such business or rental use.

(d)(1)–(d)(2)(viii) [Reserved]

(ix) An item of loss or deduction that is carried to the taxable year under section 172(a), section 613A(d), section 1212(a)(1) (in the case of corporations), or section 1212(b) (in the case of taxpayers other than corporations);

(x) An item of loss or deduction that would have been allowed for a taxable year beginning before January 1, 1987, but for section 704(d), 1366, or 465;

(xi) A deduction for a loss from fire, storm, shipwreck, or other casualty, or from theft (as such terms are used in section 165(c)(3)) if losses that are similar in cause and severity do not recur regularly in the conduct of the activity; and

(xii) A deduction or loss allocable to business or rental use of a dwelling unit for any taxable year in which section 280A(c)(5) applies to such business or rental use.

(d)(3)–(d)(5)(ii) [Reserved]

(d)(5)(iii) *Other applicable rules*—(A) *Applicability of rules in §1.469–2T(c)(2).* For purposes of this paragraph (d)(5), a taxpayer's interests in property used in an activity and the amounts allocated to the interests shall be determined under §1.469–2T(c)(2)(i)(C). In addition, the rules contained in paragraph (c)(2)(iv) and (v) of this section apply in determining for purposes of this paragraph (d)(5) the activity (or activities) in which an interest in property is used at the time of its disposition and during the 12-month period ending on the date of its disposition.

(d)(5)(iii)(B)–(d)(6)(v)(D) [Reserved]

(d)(6)(v)(E) Are taken into account under section 613A(d) (relating to limitations on certain depletion deductions), section 1211 (relating to the limitation on capital losses), or section 1231 (relating to property used in a trade or business and involuntary conversions); or

(d)(6)(v)(F)–(d)(7) [Reserved]

(d)(8) *Taxable year in which item arises.* For purposes of § 1.469–2T(d), an item of deduction arises in the taxable year in which the item would be allowable as a deduction under the taxpayer's method of accounting if taxable income for all taxable years were determined without regard to sections 469, 613A(d) and 1211.

(e)(1)–(e)(2)(i) [Reserved]

(e)(2)(ii) *Section 707(c).* Except as provided in paragraph (e)(2)(iii)(B) of this section, any payment to a partner for services or the use of capital that is described in section 707(c), including any payment described in section 736(a)(2) (relating to guaranteed payments made in liquidation of the interest of a retiring or deceased partner), is characterized as a payment for services or as the payment of interest, respectively, and not as a distributive share of partnership income.

(iii) *Payments in liquidation of a partner's interest in partnership property*—(A) *In general.* If any gain or loss is taken into account by a retiring partner (or any other person that owns (directly or indirectly) an interest in the partner if the partner is a passthrough entity) or a deceased partner's successor in interest as a result of a payment to which section 736(b) (relating to payments made in exchange for a retired or deceased partner's interest in partnership property) applies, the gain or loss is treated as passive activity gross income or a passive activity deduction only to the extent that the gain or loss would have been passive activity gross income or a passive activity deduction of the retiring or deceased partner (or the other person) if it had been recognized at the time the liquidation of the partner's interest commenced.

(B) *Payments in liquidation of a partner's interest in unrealized receivables and goodwill under section 736(a).* (*1*) If a payment is made in liquidation of a retiring or deceased partner's interest, the payment is described in section 736(a), and any income—

(*i*) Is taken into account by the retiring partner (or any other person that owns (directly or indirectly) an interest in the partner if the partner is a passthrough entity) or the deceased partner's successor in interest as a result of the payment; and

(*ii*) Is attributable to the portion (if any) of the payment that is allocable to the unrealized receivables (within the meaning of section 751(c)) and goodwill of the partnership;

the percentage of the income that is treated as passive activity gross income shall not exceed the percentage of passive activity gross income that would be included in the gross income that the retiring or deceased partner (or the other person) would have recognized if the unrealized receivables and goodwill had been sold at the time that the liquidation of the partner's interest commenced.

(*2*) For purposes of this paragarph (e)(2)(iii)(B), the portion (if any) of a payment under section 736(a) that is allocable to unrealized receivables and goodwill of a partnership shall be determined in accordance with the principles employed under § 1.736–1(b) for determining the portion of a payment made under section 736 that is treated as a distribution under section 736(b).

(e)(3)(i)–(iii)(A) [Reserved]

(B) An amount of gain that would have been treated as gain that is not from a passive activity under paragraph (c)(2)(iii) of this section (relating to substantially appreciated property formerly used in a nonpassive activity), paragraph (c)(6) of this section (relating to certain oil or gas properties), § 1.469–2T(f)(5) (relating to certain property rented incidental to development), paragraph (f)(6) of this section (relating to property rented to a nonpassive activity), or § 1.469–2T(f)(7) (relating to certain interests in a passthrough entity engaged in the trade or business of licensing intangible property) would have been allocated to the holder (or such other person) with respect to the interest if all of the property used in the passive activity had been sold immediately prior to the disposition for its fair market value on the applicable valuation date (within the meaning of §1.469–2T(e)(3)(ii)(D)(*1*)); and

(e)(3)(iii)(C)–(f)(4) [Reserved]

(f)(5) *Net income from certain property rented incidental to development activity*—(i) *In general.* An amount of the taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from the item of property shall be treated as not from a passive activity if—

(A) Any gain from the sale, exchange, or other disposition of the item of property is included in the taxpayer's income for the taxable year;

(B) The taxpayer's use of the item of property in an activity involving the rental of the property commenced less than 12 months before the date of the disposition (within the meaning of paragraph (c)(2)(iii)(B) of this section) of such property; and

(C) The taxpayer materially participated (within the meaning of §1.469–5T) or significantly participated (within the meaning of §1.469–5T(c)(2)) for any taxable year in an activity that involved for such year the performance of services for the purpose of enhancing the value of such item of property (or any other item of property if the basis of the item of property that is sold, exchanged, or otherwise disposed of is determined in whole or in part by reference to the basis of such other item of property).

(ii) *Commencement of use*—(A) *In general.* For purposes of paragraph (f)(5)(i)(B) of this section, a taxpayer's use of an item of property in an activity involving the rental of the property commences on the first date on which—

(*1*) The taxpayer owns an interest in the property;

(*2*) Substantially all of the property is rented (or is held out for rent and is in a state of readiness for rental); and

(*3*) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) *Value-enhancing services.* For purposes of this paragraph (f)(5)(ii), the term value-enhancing services means the services described in paragraphs (f)(5) (i)(C) and (iii) of this section, except that the term does not include lease-up. Thus, in cases in which this paragraph (f)(5) applies solely because substantial lease-up remains to be performed (see paragraph (f)(5)(iii)(C) of this section), the twelve month period described in paragraph (f)(5)(i)(B) of this section will begin when the taxpayer acquires an interest in the property if substantially all of the property is held out for rent and is in a state of readiness for rental on that date.

(iii) *Services performed for the purpose of enhancing the value of property.* For purposes of paragraph (f)(5)(i)(C) of this section, services that are treated as performed for the purpose of enhancing the value of an item of property include but are not limited to—

(A) Construction;

(B) Renovation; and

(C) Lease-up (unless more than 50 percent of the property is leased on the date that the taxpayer acquires an interest in the property).

(iv) *Examples.* The following examples illustrate the application of this paragraph (f)(5):

Example 1. (i) A, a calendar year individual, is a partner in P, a calendar year partnership, which develops real estate. In 1993, P acquires an interest in undeveloped land and arranges for the financing and construction of an office building on the land. Construction is completed in February 1995, and substantially all of the building is either rented or held out for rent and in a state of readiness for rental beginning on March 1, 1995. Twenty percent of the building is leased as of March 1, 1995.

(ii) P rents the building (or holds it out for rent) for the remainder of 1995 and all of 1996, and sells the building on February 1, 1997, pursuant to a contract entered into on January 15, 1996. P did not hold the building (or any other buildings) for sale to customers in the ordinary course of P's trade or business (see paragraph (c)(2)(v) of this section). A's distributive share of P's taxable losses from the rental of the building is $50,000 for 1995 and $30,000 for 1996. All of A's losses from the rental of the building are disallowed under 1.469–1(a)(1)(i) (relating to the disallowance of the passive activity loss for the taxable year). A's distributive share of P's gain from the sale of the building is $150,000. A has no other gross income or deductions from the activity of renting the building.

(iii) The real estate development activity that A holds through P in 1993, 1994, and 1995 involves the performance of services (e.g., construction) for the purpose of enhancing the value of the building. Accordingly, an amount equal to A's net rental activity income from the building may be treated as gross income that is not from a passive activity if A's use of the building in an activity involving the rental of the building commenced less that 12 months before the date of the disposition of the building. In this case, the date of the disposition of the building is January 15, 1996, the date of the binding contract for its sale.

(iv)(A) A taxpayer's use of an item of property in an activity involving the rental of the property commences on the first date on which—

(*1*) The taxpayer owns an interest in the item of property;

(*2*) Substantially all of the property is rented (or is held out for rent and is in a state of readiness for rental); and

(*3*) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) In this case, A's use of the building in an activity involving the rental of the building commenced on March 1, 1995, less than 12 months before January 15, 1996, the date of disposition. Accordingly, if A materially (or significantly) participated in the real estate development activity in 1993, 1994, or 1995 (without regard to whether A materially participated in the activity in more than one of those years), an amount of A's gross rental activity income from the building for 1997 equal to A's net rental activity income from the building for 1997 is treated under this paragraph (f)(5) as gross income that is not from a passive activity. Under paragraph (f)(9)(iv) of this section, A's net rental activity income from the building for 1997 is $70,000 ($150,000 distributive share of gain from the disposition of the building minus $80,000 of reasonably allocable passive activity deductions).

Example 2. (i) X, a calendar year taxpayer subject to section 469, acquires a building on February 1, 1994, when the building is 25 percent leased. During 1994, X rents the building (or holds it out for rent) and materially participates in an activity that involves the lease-up of the building. X's activities do not otherwise involve the performance of construction or other services for the purpose of enhancing the value of the building, and X does not hold the building (or any other building) for sale to customers in the ordinary course of X's trade or business. X sells the building on December 1, 1994.

(ii)(A) Under paragraph (f)(5)(iii)(C) of this section, lease-up is considered a service performed for the purpose of enhancing the value of property unless more than 50 percent of the property is leased on the date the taxpayer acquires an interest in the property. Under paragraph (f)(5)(ii)(B) of this section, however, lease-up is not considered a value-enhancing service for purposes of determining when the taxpayer commences using an item of property in an activity involving the rental of the property. Accordingly, X's acquisition of the building constitutes a commencement of X's use of the building in a rental activity, because February 1, 1994, is the first date on which—

(*1*) The taxpayer owns an interest in the item of property;

(*2*) Substantially all of the property is held out for rent; and

(*3*) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) In this case, X disposes of the property within 12 months of the date X commenced using the building in a rental activity. Accordingly, an amount of X's gross rental activity income for 1994 equal to X's net rental activity income from the building for 1994 is treated under this paragraph (f)(5) as gain that is not from a passive activity.

Example 3. The facts are the same as in Example 2, except that at the time X acquires the building it is 60 percent leased. Under paragraph (f)(5)(iii)(C) of this section, lease-up is not considered a service performed for the purpose of enhancing the value of property if more than 50 percent of the property is leased on the date the taxpayer acquires an interest in the property. Therefore, additional lease-up performed by X is not taken into account under this paragraph (f)(5). Since X's activities do not otherwise involve the performance of services for the purpose of enhancing the value of the building, none of X's gross rental activity income from the building will be treated as income that is not from a passive activity under this paragraph (f)(5).

(f)(6) *Property rented to a nonpassive activity.* An amount of the taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from that item of property is treated as not from a passive activity if the property—

(i) Is rented for use in a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer materially participates (within the meaning of § 1.469–5T) for the taxable year; and

(ii) Is not described in § 1.469–2T(f)(5).

(f)(7)–(f)(9)(ii) [Reserved]

(f)(9)(iii) The gross rental activity income for a taxable year from an item of property is any passive activity gross income (determined without regard to § 1.469–2T(f)(2) through (f)(6)) that—

(A) Is income for the year from the rental or disposition of such item of property; and

(B) In the case of income from the disposition of such item of property, is income from an activity that involved the rental of such item of property during the 12-month period ending on the date of the disposition (see §1.469–2T(c)(2)(ii)); and

(iv) The net rental activity income from an item of property for the taxable year is the excess, if any, of—

(A) The gross rental activity income from the item of property for the taxable year; over

(B) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for the year under §1.469–1(f)(4)) that are reasonably allocable to the income.

(10) *Coordination with section 163(d).* Gross income that is treated as not from a passive activity under §1.469–2T(f)(3), (4), or (7) is treated as income described in section 469(e)(1)(A) and §1.469–2T(c)(3)(i) except in determining whether—

(i) Any property is treated for purposes of section 469(e)(1)(A)(ii)(I) and §1.469–2T(c)(3)(i)(C) as property that produces income of a type described in §1.469–2T(c)(3)(i)(A);

(ii) Any property is treated for purposes of section 469(e)(1)(A)(ii)(II) and §1.469–2T(c)(3)(i)(D) as property held for investment;

(iii) An expense (other than interest expense) is treated for purposes of section 469(e)(1)(A)(i)(II) and §1.469–2T(d)(4) as clearly and directly allocable to portfolio income (within the meaning of §1.469–2T(c)(3)(i); and

(iv) Interest expense is allocated under §1.163–8T to an investment expenditure (within the meaning of §1.163–8T(b)(3)) or to a passive activity expenditure (within the meaning of §1.163–8T(b)(4)).

(11) [Reserved]

[T.D. 8417, 57 FR 20754, May 15, 1992, as amended by T.D. 8477, 58 FR 11538, Feb. 26, 1993; 58 FR 13706, Mar. 15, 1993; 58 FR 29536, May 21, 1993; T.D. 8495, 58 FR 58787, Nov. 4, 1993; T.D. 8417, 59 FR 45623, Sept. 2, 1994]

§1.469–2T Passive activity loss (temporary).

(a) *Scope of this section.* This section contains rules for determining the amount of the taxpayer's passive activity loss for the taxable year for purposes of section 469 and the regulations thereunder. The rules contained in this section—

(1) Provide general guidance for identifying items of income and deduction that are taken into account in determining the amount of the passive activity loss for the taxable year;

(2) Specify particular items of income and deduction that are not taken into account in determining the amount of the passive activity loss for the taxable year; and

(3) Specify the manner in which provisions of the Internal Revenue Code and the regulations, other than section 469 and the regulations thereunder, are applied for purposes of determining the extent to which items of deduction are taken into account for a taxable year in computing the amount of the passive activity loss for such year.

(b) *Definition of passive activity loss*—(1) *In general.* In the case of a taxpayer other than a closely held corporation (within the meaning of §1.469–1T(g)(2)(ii)), the passive activity loss for the taxable year is the amount, if any, by which the passive activity deductions for the taxable year exceed the passive activity gross income for the taxable year.

(2) *Cross references.* See paragraph (c) of this section for the definition of ''passive activity gross income,'' paragraph (d) of this section for the definition of ''passive activity deduction,'' and §1.469–1T(g)(4) for the computation of the passive activity loss of a closely held corporation.

(c) *Passive activity gross income*—(1) *In general.* Except as otherwise provided in the regulations under section 469, passive activity gross income for a taxable year includes an item of gross income if and only if such income is from a passive activity.

(2) *Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity*—(i) *In general*—(A) *Treatment of gain.* Except as otherwise provided in the regulations under section 469, any gain recognized

upon the sale, exchange or other disposition (a ‘‘disposition’’) of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation is treated in the following manner:

(*1*) The gain is treated as gross income from such activity for the taxable year or years in which it is recognized;

(*2*) If the activity is a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as passive activity gross income for the taxable year or years in which it is recognized; and

(*3*) If the activity is not a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as not from a passive activity.

(B) *Dispositions of partnership interests and S corporation stock.* A partnership interest or S corporation stock is not property used in an activity for purposes of this paragraph (c)(2). See paragraph (e)(3) of this section for rules treating the gain recognized upon the disposition of a partnership interest or S corporation stock as gain from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(C) *Interest in property.* For purposes of applying this paragraph (c)(2) to a disposition of property—

(*1*) Any material portion of the property that was used, at any time before the disposition, in any activity at a time when the remainder of the property was not used in such activity shall be treated as a separate interest in property; and

(*2*) The amount realized from the disposition and the adjusted basis of the property must be allocated among the separate interests in a reasonable manner.

(D) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(i):

Example (1). A owns an interest in a trade or business activity in which A has never materially partcipated. In 1987, A sells equipment that was used exclusively in the activity and realizes a gain on the sale. Under paragraph (c)(2)(i)(A)(*2*) of this section, the gain is passive activity gross income.

Example (2). B owns an interest in a trade or business activity in which B materially participates for 1987. In 1987, B sells a building used in the activity in an installment sale and realizes a gain on the sale. B does not materially participate in the activity for 1988 or any subsequent year. Under paragraph (c)(2)(i)(A)(*3*) of this section, none of B’s gain from the sale (including gain taken into account after 1987) is passive activity gross income.

Example (3). C enters into a contract to acquire property used by the seller in a rental activity. Before acquiring the property pursuant to the contract, C sells all rights under the contract and realizes a gain on the sale. Since C’s rights under the contract are not property used in a rental activity, the gain is not income from a rental activity. The result would be the same if C owned an option to acquire the property and sold the option.

Example (4). D sells a ten-floor office building. D owned the building for three years preceding the sale and at all times during that period used seven floors of the building in a trade or business activity and three floors in a rental activity. The fair market value per square foot is substantially the same throughout the building, and D did not maintain a separate adjusted basis for any part of the building. Under paragraph (c)(2)(i)(C)(*1*) of this section, the seven floors used in the trade or business activity and the three floors used in the rental activity are treated as separate interests in property. Under paragraph (c)(2)(i)(C)(*2*) of this section, the amount realized and the adjusted basis of the building must be allocated between the separate interests in a reasonable manner. Under these facts, an allocation based on the square footage of the parts of the building used in each activity would be reasonable.

Example (5). The facts are the same as in example (4), except that two of the seven floors used in the trade or business activity were used in the rental activity until five months before the sale. Under paragraph (c)(2)(i)(C)(*1*) of this section, the five floors used exclusively in the trade or business activity and the two floors used first in the rental activity and then in the trade or business activity are treated as separate interests in property. See paragraph (c)(2)(ii) of this section for rules for allocating amount realized and adjusted basis upon a disposition of an interest in property used in more than one activity during the 12-month period ending on the date of the disposition.

(ii) *Disposition of property used in more than one activity in 12-month period preceding disposition.* In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities on a basis that reasonably reflects the use of such interest in property during such 12-month period. For purposes of this paragraph (c)(2)(ii), an allocation of the amount realized and adjusted basis solely to the activity in which an iterest in property is predominantly used during the 12-month period ending on the date of the disposition reasonably reflects the use of such interest in property if the fair market value of such interest does not exceed the lesser of—

(A) $10,000; and

(B) 10 percent of the sum of the fair market value of such interest and the fair market value of all other property used in such activity immediately before the disposition.

The following examples illustrate the application of this paragraph (c)(2)(ii):

Example (1). The facts are the same as in example (5) of paragraph (c)(2)(i)(D) of this section. Under paragraph (c)(2)(i)(C)(*2*) of this section, D allocates the amount realized and adjusted basis of the building 30 percent to the three floors used exclusively in the rental activity, 50 percent to the five floors used exclusively in the trade or business activity, and 20 percent to the two floors used first in the rental activity and then in the trade or business activity. Under this paragraph (c)(2)(ii), the amount realized and adjusted basis allocated to the two floors that were used in both activities during the 12-month period ending on the date of the disposition must also be allocated between such activities. Under these facts, an allocation of 7/12 of such amounts to the rental activity and 5/12 of such amounts to the trade or business activity would reasonably reflect the use of the two floors during the 12-month period ending on the date of the disposition.

Example (2). B is a limited partner in a partnership that sells a tractor-trailer. During the 12-month period ending on the date of the sale, the tractor-trailer was used in several activities, and the partnership allocates the amount realized from the disposition and the adjusted basis of the tractor-trailer among the activities based on the number of days during the 12-month period that the partnership used the tractor-trailer in each activity. Under these facts, the partnership's allocation reasonably reflects the use of the tractor-trailer during the 12-month period ending on the date of the sale.

Example (3). C sells a personal computer for $8,000. During the 12-month period ending on the date of the sale, 70 percent of C's use of the computer was in a passive activity. Immediately before the sale, the fair market value of all property used in the passive activity (including the personal computer) was $200,000. Under these facts, the computer was predominatly used in the passive activity during the 12-month period ending on the date of the sale, and the value of the computer, as measured by its sale price ($8,000), does not exceed the lesser of (a) $10,000, and (b) 10 percent of the value of all property used in the activity immediately before the sale ($20,000). C allocates the amount realized and the adjusted basis solely to the passive activity. Under this paragraph (c)(2)(ii), C's allocation reasonably reflects the use of the computer during the 12-month period ending on the date of the sale.

(iii) *Disposition of substantially appreciated property formerly used in nonpassive activity.* [Reserved] See § 1.469–4(c)(2)(iii) for rules relating to this paragraph.

(iv) *Taxable acquisitions.* [Reserved] See § 1.469–2(c)(iv) for rules relating to this paragraph.

(v) *Property held for sale to customers.* [Reserved] See § 1.469–2(c)(v) for rules relating to this paragraph.

(3) *Items of portfolio income specifically excluded*—(i) *In general.* Passive activity gross income does not include portfolio income. For purposes of the preceding sentence, portfolio income includes all gross income, other than income derived in the ordinary course of a trade or business (within the meaning of paragraph (c)(3)(ii) of this section), that is attributable to—

(A) Interest (including amounts treated as interest under paragraph (e)(2)(ii) of this section, relating to certain payments to partners for the use of capital); annuities; royalties (including fees and other payments for the use of intangible property); dividends on C corporation stock; and income (including dividends) from a real estate investment trust (within the meaning of section 856), regulated investment company (within the meaning of section 851), real estate mortgage investment conduit (within the meaning of section 860D), common trust fund (within the meaning of section 584), controlled foreign corporation (within the meaning of section 957), qualified electing fund (within the meaning of section 1295(a)), or cooperative (within the meaning of section 1381(a));

(B) Dividends on S corporation stock (within the meaning of section 1368(c)(2);

(C) The disposition of property that produces income of a type described in paragraph (c)(3)(i)(A) of this section; and

(D) The disposition of property held for investment (within the meaning of section 163 (d)).

(ii) *Gross income derived in the ordinary course of a trade or business.* Solely for purposes of paragraph (c)(3)(i) of this section, gross income derived in the ordinary course of a trade or business includes only—

(A) Interest income on loans and investments made in the ordinary course of a trade or business of lending money;

(B) Interest on accounts receivable arising from the performance of services or the sale of property in the ordinary course of a trade or business of performing such services or selling such property, but only if credit is customarily offered to customers of the business;

(C) Income from investments made in the ordinary course of a trade or business of furnishing insurance or annuity contracts or reinsuring risks underwritten by insurance companies;

(D) Income or gain derived in the ordinary course of an activity of trading or dealing in any property if such activity constitutes a trade or business (but see paragraph (c)(3)(iii)(A) of this section);

(E) Royalties derived by the taxpayer in the ordinary course of a trade or business of licensing intangible property (within the meaning of paragraph (c)(3)(iii)(B) of this section);

(F) Amount included in the gross income of a patron of a cooperative (within the meaning of section 1381(a), without regard to paragraph (2)(A) or (C) thereof) by reason of any payment or allocation to the patron based on patronage occurring with respect to a trade or business of the patron; and

(G) Other income identified by the Commissioner as income derived by the taxpayer in the ordinary course of a trade or business.

(iii) *Special rules*—(A) *Income from property held for investment by dealer.* For purposes of paragraph (c)(3)(i) of this section, a dealer's income or gain from an item of property is not dervied by the dealer in the ordinary course of a trade or business of dealing in such property if the dealer held the property for investment at any time before such income or gain is recognized.

(B) *Royalties derived in the ordinary course of the trade or business of licensing intangible property*—(*1*) *In general.* Royalties received by any person with respect to a license or other transfer of any rights in intangible property shall be considered to be derived in the ordinary course of the trade or business of licensing such property only if such person—

(*i*) Created such property; or

(*ii*) Performed substantial services or incurred substantial costs with respect to the development or marketing of such property.

(*2*) *Substantial services or costs*—(*i*) *In general.* Except as provided in paragraph (c)(3)(iii)(B)(*2*)(*ii*) of this section, the determination of whether a person has performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property shall be made on the basis of all the facts and circumstances.

(*ii*) *Exception.* A person has performed substantial services or incurred substantial costs for a taxable year with respect to the development or marketing of an item of intangible property if—

(*a*) The expenditures reasonably incurred by such person in such taxable year with respect to the development or marketing of the property exceed 50 percent of the gross royalties from licensing such property that are includible in such person's gross income for the taxable year; or

(*b*) The expenditures reasonably incurred by such person in such taxable year and all prior taxable years with respect to the development or marketing of the property exceed 25 percent of the aggregate capital expenditures (without any adjustment of amortization) made by such person with respect to the property in all such taxable years.

(*iii) Expenditures taken into account.* For purposes of paragraph (c)(3)(iii)(B)(*2*)(*ii*) of this section, expenditures in a taxable year include amounts chargeable to capital account for such year without regard to the year or years (if any) in which any deduction for such expenditure is allowed.

(*3*) *Passthrough entities.* For purposes of this paragraph (c)(3)(iii)(B), in the case of any intangible property held by a partnership, S corporation, estate, or trust, the determination of whether royalties from such property are derived in the ordinary course of a trade or business shall be made by applying the rules of this paragraph (c)(3)(iii)(B) to such entity and not to any holder of an interest in such entity.

(*4*) *Cross reference.* For special rules applicable to certain gross income from a trade or business of licensing intangible property, see paragraph (f)(7) of this section.

(C) *Mineral production payments.* For purposes of section 469 and the regulations thereunder—

(*1*) If a mineral production payment is treated as a loan under section 636, the portion of any payment in discharge of the production payment that is the equivalent of interest shall be treated as interest; and

(*2*) If a mineral production payment is not treated as a loan under section 636, payments in discharge of the production payment shall be treated as royalties.

(iv) *Examples.* The following examples illustrate the application of this paragraph (c)(3):

Example (1). A, an individual engaged in the trade or business of farming, disposes of farmland in an installment sale. A is not engaged in a trade or business of selling farmland. Therefore, A's interest income from the installment note is not gross income derived in the ordinary course of a trade or business.

Example (2). P, a partnership, operates a rental apartment building for low-income tenants in City Y. Under Y's laws relating to the operation of low-income housing, P is required to maintain a reserve fund to pay for the maintenance and repair of the building. P invests the reserve fund in short-term interest-bearing deposits. Because P's interest income from the investment of the reserve fund is not interest income described in paragraph (c)(3)(ii) of this section, such income is not treated as derived in the ordinary course of a trade or business. Accordingly, P's interest income from the deposits is portfolio income (within the meaning of paragraph (c)(3)(i) of this section).

Example (3). (i) B is a partner in a partnership that is engaged in an activity involving the conduct of a trade or business of dealing in securities. On February 1, the partnership acquires certain securities for investment (within the meaning of section 163(d)). On February 2, before recognizing any income with respect to the securities, the partnership determines that it would be advisable to hold the securities primarily for sale to customers and subsequently sells them to customers in the ordinary course of its business.

(ii) Under paragraph (c)(3)(iii)(A) of this section, income or gain from any security (including any security acquired pursuant to an investment of working capital) held by a dealer for investment at any time before such income or gain is recognized is not treated for purposes of paragraph (c)(3)(i) of this section as derived by the dealer in the ordinary course of its trade or business of dealing in securities. Accordingly, B's distributive share of the partnership's interest, dividends, or gains from the securities acquired by the partnership for investment on February 1 is portfolio income of B, notwithstanding that such securities were held by the partnership, subsequent to February 1, primarily for sale to customers in the ordinary course of the partnership's trade or business of dealing in securities.

Example (4). C is a partner in a partnership that is engaged in an activity of trading or dealing in royalty interests in mineral properties. The partnership derives royalty income from royalty interests held in the activity. If the activity is a trade or business activity, C's distributive share of the partnership's royalty income from such royalty interests is treated under paragraph (c)(3)(ii)(D) of this section as derived in the ordinary course of the partnership's trade or business.

Example (5). (i) D, a calendar year individual, is a partner in a calendar year partnership that is engaged in an activity of developing and marketing a design for a system that reduces air pollution in office buildings. D has a 10 percent distributive share of all items of partnership income, gain, loss, deduction, and credit. In 1987, the partnership acquired the rights to the design for $100,000. In 1987, 1988, and 1989, the partnership incurs expenditures with respect to the development and marketing of the design, and derives gross royalties from licensing the design, in the amounts set forth in the table below. The expenditures incurred in 1987 and 1988 are currently deductible expenses. The expenditures incurred in 1989 are capitalized and may be deducted only in subsequent taxable years.

Year	Gross royalties	Expenditures	Cumulative capital expenditures
1987	$20,000	$8,000	$100,000
1988	20,000	12,000	100,000
1989	60,000	15,000	115,000
1990	120,000	0	115,000

(ii) Under paragraph (c)(3)(iii)(B)(*3*) of this section, the determination of whether royalties from intangible property are derived in the ordinary course of a trade or business of a partnership is made by applying the rules of paragraph (c)(3)(iii)(B) of this section to the partnership rather than the partners. The expenditures reasonably incurred by the partnership in 1987 with respect to the development or marketing of the design ($8,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design ($20,000). In addition, the sum of such expenditures incurred in 1987 and all prior taxable years ($8,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such taxable years with respect to the design ($100,000). Accordingly, for 1987, the partnership is not treated under paragraph (c)(3)(iii)(B)(*2*)(*ii*) of this section as performing substantial services or incurring substantial costs with respect to the development or marketing of the design. Therefore, unless all of the facts and circumstances indicate that the partnership performed substantial services or incurred substantial costs with respect to the development or marketing of the design, D's distributive share of the partnership's royalty income for 1987 is portfolio income.

(iii) As of the end of 1988, the sum of the expenditures reasonably incurred by the partnership during such taxable year and all prior taxable years with respect to the development or marketing of the design ($20,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such years with respect to the design ($100,000). However, the amount of such expenditures incurred by the partnership in 1988 ($12,000) exceeds 50 percent of the partnership's gross royalties for such year from licensing the design ($20,000). Accordingly, for 1988, under paragraph (c)(3)(iii)(B)(*2*)(*ii*)(*a*) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income for 1988 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(iv) The expenditures reasonably incurred by the partnership in 1989 with respect to the development or marketing of the design ($15,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design ($60,000). However, the sum of such expenditures incurred by the partnership in 1989 and all prior taxable years ($35,000) exceeds 25 percent of the partnership's aggregate capital expenditures made in all such years with respect to the design ($115,000). Accordingly, for 1989, under paragraph (c)(3)(iii)(B)(*2*)(*ii*)(*b*) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income in 1989 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(v) The result for 1990 is the same as for 1989, notwithstanding that the partnership incurs no expenditures in 1990 with respect to the development or marketing of the design.

Example (6). The facts are the same as in example (5), except that, for 1987, D's distributive share of the partnership's development and marketing costs is 15 percent, while D's distributive share of the partnership's gross royalties is 10 percent. Although D's distributive share of the expenditures reasonably incurred by the partnership during 1987 with respect to the development and marketing of the design ($1,200) is more than 50 percent of D's distributive share of the partnership's gross royalties from licensing the design ($2,000), D is not treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design for 1987 under paragraph (c)(3)(iii)(B)(*2*)(*ii*)(*a*) of this section. This is because, under paragraph (c)(3)(iii)(B)(*3*) of this section, the determination of whether the royalties are derived in the ordinary course of a trade or business is made by applying paragraph (c)(3)(iii)(B) of this section to the partnership, and not to D.

(4) *Items of personal service income specifically excluded*—(i) *In general.* Passive activity gross income does not include compensation paid to or on behalf of an individual for personal services performed or to be performed by such individual at any time. For purposes of this paragraph (c)(4), compensation for personal services includes only—

(A) Earned income (within the meaning of section 911(d)(2)(A)), including gross income from a payment described in paragraph (e)(2) of this section that represents compensation for the performance of services by a partner;

(B) Amounts includible in gross income under section 83;

(C) Amounts includible in gross income under sections 402 and 403;

(D) Amounts (other than amounts described in paragraph (c)(4)(i)(C) of this section) paid pursuant to retirement, pension, and other arrangements for deferred compensation for services;

(E) Social security benefits (within the meaning of section 86(d)) includible in gross income under section 86; and

(F) Other income identified by the Commissioner as income derived by the taxpayer from personal services;

provided, however, that no portion of a partner's distributive share of partnership income (within the meaning of section 704(b)) or a shareholder's pro rata share of income from an S corporation (within the meaning of section 1377(a)) shall be treated as compensation for personal services.

(ii) *Example.* The following example illustrates the application of this paragraph (c)(4):

Example. C owns 50 percent of the stock of X, an S corporation. X owns rental real estate, which it manages. X pays C a salary for services performed by C on behalf of X in connection with the management of X's rental properties. Under this paragraph (c)(4), although C's pro rata share of X's gross rental income is passive activity gross income (even if the salary paid to C is less than the fair market value of C's services), the salary paid to C does not constitute passive activity gross income.

(5) *Income from section 481 adjustment*—(i) *In general.* If a change in accounting method results in a positive section 481 adjustment with respect to an activity, a ratable portion (within the meaning of paragraph (c)(5)(iii) of this section) of the amount taken into account for a taxable year as a net positive section 481 adjustment by reason of such change shall be treated as gross income from the activity for such taxable year, and such gross income shall be treated as passive activity gross income if and only if such activity is a passive activity for the year of the change (within the meaning of section 481(a)).

(ii) *Positive section 481 adjustments.* For purposes of applying this paragraph (c)(5)—

(A) The term ''net positive section 481 adjustment'' means the increase (if any) in taxable income taken into account under section 481(a) to prevent amounts from being duplicated or omitted by reason of a change in accounting method; and

(B) The term ''positive section 481 adjustment with respect to an activity'' means the increase (if any) in taxable income that would be taken into account under section 481(a) to prevent only the duplication or omission of amounts from such activity by reason of the change in accounting method.

(iii) *Ratable portion.* The ratable portion of the amount taken into account as a net positive section 481 adjustment for a taxable year by reason of a change in accounting method is determined with respect to an activity by multiplying such amount by the fraction obtained by dividing—

(A) The positive section 481 adjustment with respect to the activity; by

(B) The sum of the positive section 481 adjustments with respect to all of the activities of the taxpayer.

(6) *Gross income from certain oil or gas properties*—(i) *In general.* [Reserved] See § 1.469–2(c)(6)(i) for rules relating to this paragraph.

(ii) *Gross and net passive income from the property.* [Reserved] See § 1.469–2(c)(6)(ii) for rules relating to this paragraph.

(iii) *Property.* [Reserved] See 1.469–2(c)(6)(iii) for rules relating to this paragraph.

(iv) *Examples.* The following examples illustrate the application of this (c)(6):

Example 1. [Reserved] See § 1.469–2(c)(6)(iv) *Example 1.*

Example 2. [Reserved] See § 1.469–2(c)(6)(iv) *Example 2.*

Example (3). C is a general partner in partnership T and a limited partner in partnership U. T and U both own oil and gas working interests in tracts of land in County X. In 1987, T drills a well, and C's distributive share of T's losses from drilling the well is treated under § 1.469–1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, T develops information indicating a significant probability that substantial oil and gas reserves underlie most portions of County X. As a result, the value of all oil and gas properties in County X is enhanced. The information developed by T does not, however, indicate that the reservoir in which T's well is drilled underlies U's tract. Under these facts, T's and U's tracts are not treated as one property for purposes of this paragraph (c)(6), because the value of U's tract is not directly enhanced by T's activities.

(7) *Other items specifically excluded.* Notwithstanding any other provision of the regulations under section 469, passive activity gross income does not include the following:

(i) Gross income of an individual from intangible property, such as a patent, copyright, or literary, musical, or artistic composition, if the taxpayer's personal efforts significantly contributed to the creation of such property;

(ii) Gross income from a qualified low-income housing project (within the meaning of section 502 of the Tax Reform Act of 1986) for any taxable year in the relief period (within the meaning of section 502(b) of such Act;

(iii) Gross income attributable to a refund of any state, local, or foreign income, war profits, or excess profits tax;

(iv) [Reserved] See § 1.469–2(c)(7)(iv) for rules relating to this paragraph (c)(7)(iv).

(v) [Reserved] See § 1.469–2(c)(7)(v) for rules relating to this paragraph (c)(7)(v).

(vi) [Reserved] See § 1.469–2(c)(7)(vi) for rules relating to this paragraph (c)(7)(vi).

(d) *Passive activity deductions*—(1) *In general.* Except as otherwise provided in section 469 and the regulations thereunder, a deduction is a passive activity deduction for a taxable year if and only if such deduction—

(i) Arises (within the meaning of paragraph (d)(8) of this section) in connection with the conduct of a activity that is a passive activity for the taxable year; or

(ii) Is treated as a deduction from an activity under § 1.469–1T(f)(4) for the taxable year.

The following example illustrates the application of this paragraph (d)(1):

Example. (i) In 1987, A, a calendar year individual, acquires a partnership interest in R, a calendar year partnership. R's only activity is a trade or business activity in which A materially participates for 1987. R incurs a loss in 1987. A's distributive share of R's 1987 loss is $1,000. However, A's basis in the partnership interest at the end of 1987 (without regard to A's distributive share of partnership loss) is $600; accordingly, section 704(d) disallows any deduction in 1987 for $400 of A's distributive share of R's loss. The remainder of A's distributive share of R's loss would be allowed as a deduction for 1987 if taxable income for all taxable years were determined without regard to sections 469, 613A(d), and 1211. See paragraph (d)(8) of this section.

(ii) A does not materially participate in R's activity for 1988. In 1988, R again incurs a loss, and A's distributive share of the loss is again $1,000. At the end of 1988, A's basis in the partnership interest (without regard to A's distributive share of partnership loss) is $2,000; accordingly, in 1988 section 704(d) does not limit A's deduction for either A's $1,000 distributive share of R's 1988 loss or the $400 loss carried over from 1987 under the second sentence of section 704(d). These losses would be allowed as a deduction for 1988 if taxable income for all taxable years were determined without regard to sections 469, 613A(d) and 1211. See paragraph (d)(8) of this section.

(iii) Under these facts, only $400 of A's distributive share of R's deductions from the activity are disallowed under section 704(d) in 1987. A's remaining deductions from the activity are treated as deductions that arise in connection with the activity for 1987 under paragraph (d)(8) of this section. Because A materially participates in the activity for 1987, the activity is not a passive activity (within the meaning of § 1.469–1T(e)(1)) of A for such year. Accordingly, the deductions that are not disallowed in 1987 are not passive activity deductions.

(iv) A does not materially participate in R's activity for 1988. Accordingly, the activity is a passive activity of A for such year. No portion of A's distributive share of R's deductions from the activity is disallowed under section 704(d) in 1988. Accordingly, A's distributive share of R's deductions for 1988 and the $400 of deductions carried over from 1987 are both treated under paragraph (d)(8) of this section as deductions that arise in 1988. Since the activity is a passive activity for 1988, such deductions are passive activity deductions.

(2) *Exceptions.* Passive activity deductions do not include—

(i) A deduction for an item of expense (other than interest) that is clearly and directly allocable (within the meaning of paragraph (d)(4) of this section) to portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(ii) A deduction allowed under section 243, 244, or 245 with respect to any dividend that is not included in passive activity gross income;

(iii) Interest expense (other than interest expense described in paragraph (d)(3) of this section);

(iv) A deduction for a loss from the disposition of property of a type that produces portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(v) A deduction that, under section 469(g) and §1.469–6T (relating to the allowance of passive activity losses upon certain dispositions of interests in passive activities), is treated as a deduction that is not a passive activity deduction;

(vi) A deduction for any state, local, or foreign income, war profits, or excess profits tax;

(vii) A miscellaneous itemized deduction (within the meaning of section 67(b)) that is subject to disallowance in whole or in part under section 67(a) (without regard to whether any amount of such deduction is disallowed under section 67);

(viii) A deduction allowed under section 170 for a charitable contribution;

(ix) [Reserved] See §1.469–2(d)(2)(ix) for rules relating to this paragraph.

(x) [Reserved] See §1.469–2(d)(2)(x) for rules relating to this paragraph (d)(2)(x).

(xi) [Reserved] See §1.469–2(d)(2)(xi) for rules relating to this paragraph (d)(2)(xi).

(xii) [Reserved] See §1.469–2(d)(2)(xii) for rules relating to this paragraph (d)(2)(xii).

(3) *Interest expense.* Except as otherwise provided in the regulations under section 469, interest expense is taken into account as a passive activity deduction if and only if such interest expense—

(i) Is allocated under §1.163–8T to a passive activity expenditure (within the meaning of §1.163–8T(b)(4)); and

(ii) Is not—

(A) Qualified residence interest (within the meaning of §1.163–10T); or

(B) Capitalized pursuant to a capitalization provision (within the meaning of §1.163–8T(m)(7)(i)).

(4) *Clearly and directly allocable expenses.* For purposes of section 469 and the regulations thereunder, an expense (other than interest expense) is clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)(i) of this section) if and only if such expense is incurred as a result of, or incident to, an activity in which such gross income is derived or in connection with property from which such gross income is derived. For example, general and administrative expenses and compensation paid to officers attributable to the performance of services that do not directly benefit or are not incurred by reason of a particular activity or particular property are not clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)(i) of this section).

(5) *Treatment of loss from disposition*—(i) *In general.* Except as otherwise provided in the regulations under section 469—

(A) Any loss recognized in any year upon the sale, exchange, or other disposition (a ‘‘disposition’’) of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation and any deduction allowed on account of the abandonment or worthlessness of such an interest is treated as a deduction from such activity; and

(B) Any such deduction is a passive activity deduction if and only if the activity is a passive activity of the taxpayer for the taxable year of the disposition (or other event giving rise to the deduction).

(ii) *Disposition of property used in more than one activity in 12-month period preceding disposition.* In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities in the manner described in paragraph (c)(2)(ii) of this section.

(iii) *Other applicable rules*—

(A) *Applicability of rules in paragraph (c)(2).* [Reserved] See §1.469–2(d)(5)(iii)(A) for rules relating to this paragraph.

(B) *Dispositions of partnership interests and S corporation stock.* A partnership interest or S corporation stock is not property used in an activity for purposes of this paragraph (d)(5). See paragraph (e)(3) of this section for rules treating the loss recognized upon the disposition of a partnership interest or S corporation stock as loss from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(6) *Coordination with other limitations on deductions that apply before section 469*—(i) *In general.* An item of deduction from a passive activity that is disallowed for a taxable year under section 704(d), 1366(d), or 465 is not a passive activity deduction for the taxable year. Paragraphs (d)(6) (ii) and (iii) of this section provide rules for determining the extent to which items of deduction from a passive activity are disallowed for a taxable year under sections 704(d), 1366(d), and 465.

(ii) *Proration of deductions disallowed under basis limitations*—(A) *Deductions disallowed under section 704(d).* If any amount of a partner's distributive share of a partnership's loss for the taxable year is disallowed under section 704(d), a ratable portion of the partner's distributive share of each item of deduction or loss of the partnership is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(*1*) The amount of the partner's distributive share of partnership loss that is disallowed for the taxable year; by

(*2*) The sum of the partner's distributive shares of all items of deduction and loss of the partnership for the taxable year.

(B) *Deductions disallowed under section 1366(d).* If any amount of an S corporation shareholder's pro rata share of an S corporation's loss for the taxable year is disallowed under section 1366(d), a ratable portion of the taxpayer's pro rata share of each item of deduction or loss of the S corporation is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(*1*) The amount of the shareholder's pro rata share of S corporation loss that is disallowed for the taxable year; by

(*2*) The sum of the shareholder's pro rata shares of all items of deduction and loss of the corporation for the taxable year.

(iii) *Proration of deductions disallowed under at-risk limitation.* If any amount of the taxpayer's loss from an activity (within the meaning of section 465(c)) is disallowed under section 465 for the taxable year, a ratable portion of each item of deduction or loss from the activity is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(*1*) The amount of the loss from the activity that is disallowed for the taxable year; by

(*2*) The sum of all deductions from the activity for the taxable year.

(iv) *Coordination of basis and at-risk limitations.* The portion of any item of deduction or loss that is disallowed for the taxable year under section 704(d) or 1366(d) is not taken into account for the taxable year in determining the loss from an activity (within the meaning of section 465(c)) for purposes of applying section 465.

(v) *Separately identified items of deduction and loss.* In identifying the items of deduction and loss from an activity that are not disallowed under sections 704(d), 1366(d), and 465 (and that therefore may be treated as passive activity deductions), the taxpayer need not account separately for any item of deduction or loss unless such item may, if separately taken into account, result in an income tax liability different from that which would result were such item of deduction or loss taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702–1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Items of deduction or loss that must be accounted for separately include (but are not limited to) items of deduction or loss that—

(A) Are attributable to separate activities (within the meaning of the rules to be contained in § 1.469–4T);

(B) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in taxable years in which the taxpayer activity participates (within the meaning of section 469(i) and the rules to be contained in § 1.469–9T) in such activity;

(C) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in §1.469–9T) in taxable years in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in §1.469–9T) in such activity;

(D) Arose in a taxable year beginning before 1987 and were not allowed for such taxable year under section 704(d), 1366(d), or 465(a)(2);

(E) [Reserved] See §1.469–2(d)(6)(v)(E) for rules relating to this paragraph.

(F) Are attributable to pre-enactment interests in activities (within the meaning of §1.469–11T(c)).

(7) *Deductions from section 481 adjustment*—(i) *In general.* If a change in accounting method results in a negative section 481 adjustment with respect to an activity, a ratable portion (within the meaning of paragraph (d)(7)(iii) of this section) of the amount taken into account for a taxable year as a net negative section 481 adjustment by reason of such change shall be treated as a deduction from the activity for such taxable year, and such deduction shall be treated as a passive activity deduction if and only if such activity is a passive activity for the year of the change (within the meaning of section 481(a)). See the rules to be contained in §1.469–1T(k) for the treatment of passive activity deductions from an activity in taxable years in which the activity is a former passive activity.

(ii) *Negative section 481 adjustments.* For purposes of applying this paragraph (d)(7)—

(A) The term ‘‘net negative section 481 adjustment’’ means the decrease (if any) in taxable income taken into account under section 481(a) to prevent amounts from being duplicated or omitted by reason of a change in accounting method; and

(B) The term ‘‘negative section 481 adjustment with respect to an activity’’ means the decrease (if any) in taxable income that would be taken into account under section 481(a) to prevent only the duplication or omission of amounts from such activity by reason of the change in accounting method.

(iii) *Ratable portion.* The ratable portion of the amount taken into account as a net negative section 481 adjustments for a taxable year by reason of a change in accounting method is determined with respect to an activity by multiplying such amount by the fraction obtained by dividing—

(A) The negative section 481 adjustment with respect to the activity; by

(B) The sum of the negative section 481 adjustments with respect to all of the activities of the taxpayer.

(8) *Taxable year in which item arises.* [Reserved] See §1.469–2(d)(8) for rules relating to this paragraph.

(e) *Special rules for partners and S corporation shareholders*—(1) *In general.* For purposes of section 469 and the regulations thereunder, the character (as an item of passive activity gross income or passive activity deduction) of each item of gross income and deduction allocated to a taxpayer from a partnership or S corporation (a ‘‘passthrough entity’’) shall be determined, in any case in which participation is relevant, by reference to the participation of the taxpayer in the activity (or activities) that generated such item. Such participation is determined for the taxable year of the passthrough entity (and not the taxable year of the taxpayer). The following example illustrates the application of this paragraph (e)(1):

Example. A, a calendar year individual, is a partner in a partnership that has a taxable year ending January 31. During its taxable year ending on January 31, 1988, the partnership engages in a single trade or business activity. For the period from February 1, 1987, through January 31, 1988, A does not materially participate in this activity. In A’s calendar year 1988 return, A’s distributive share of the partnership’s gross income and deductions from the activity must be treated as passive activity gross income and passive activity deductions, without regard to A’s participation in the activity from February 1, 1988, through December 31, 1988. See also §1.469–11T(a)(4) (relating to the effective date of, and transition rules under, section 469 and the regulations thereunder).

(2) *Payments under sections 707(a), 707(c), and 736(b).* Items of gross income and deduction attributable to a transaction described in section 707(a), 707(c), or 736(b) shall be characterized for purposes of section 469 and the regulations thereunder in accordance with the following rules:

(i) *Section 707(a).* Any item of gross income or deduction attributable to a transaction that is treated under section 707(a) as a transaction between a partnership and a partner acting in a capacity other than as a member of such partnership shall be characterized for purposes of section 469 and the regulations thereunder in a manner that is consistent with the treatment of such transaction under section 707(a).

(ii) *Section 707(c).* [Reserved] See § 1.469–2(e)(ii) for rules relating to this paragraph.

(iii) *Payments in liquidation of a partner's interest in partnership property.* [Reserved] See § 1.469–2(e)(iii) for rules relating to this paragraph.

(3) *Sale or exchange of interest in passthrough entity*—(i) *Application of this paragraph (e)(3).* In the case of the sale, exchange, or other disposition (a ‘‘disposition'') of an interest in a passthrough entity, the amount of the seller's gain or loss from each activity in which such entity has an interest is determined, for purposes of section 469 and the regulations thereunder, under this paragraph (e)(3). In the case of any such disposition, except as otherwise provided in paragraph (e)(3)(iii) or (iv) of this section, paragraph (e)(3)(ii) of this section shall apply. See paragraphs (c)(2) and (d)(5) of this section for rules for determining the character of gain or loss, respectively, recognized upon a disposition of an interest in an activity held through a passthrough entity.

(ii) *General rule*—(A) *Allocation among activities.* Except as otherwise provided in this paragraph (e)(3)(ii) or in paragraph (e)(3) (iii) or (iv) of this section, if a holder of an interest in a passthrough entity disposes of such interest, a ratable portion (within the meaning of paragraph (e)(3)(ii)(B) of this section) of any gain or loss from such disposition shall be treated as gain or loss from the disposition of an interest in each trade or business, rental, or investment activity in which such passthrough entity owns an interest on the applicable valuation date.

(B) *Ratable portion*—(*1*) *Dispositions on which gain is recognized.* The ratable portion of any gain from the disposition of an interest in a passthrough entity that is allocable to an activity described in paragraph (e)(3)(ii)(A) of this section is determined by multiplying the amount of such gain by the fraction obtained by dividing—

(*i*) The amount of net gain (within the meaning of paragraph (e)(3)(ii)(E)(*3*) of this section) that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date; by

(*ii*) The sum of the amounts of net gain that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in each appreciated activity (within the meaning of paragraph (e)(3)(ii)(E)(*1*) of this section) described in paragraph (e)(3)(ii)(A) of this section for the fair market value of each such activity on the applicable valuation date.

(*2*) *Dispositions on which loss is recognized.* The ratable portion of any loss from the disposition of an interest in a passthrough entity that is allocable to an activity described in paragraph (e)(3)(ii)(A) of this section is determined by multiplying the amount of such loss by the fraction obtained by dividing—

(*i*) The amount of net loss (within the meaning of paragraph (e)(3)(ii)(E)(*4*) of this section) that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date; by

(*ii*) The sum of the amounts of net loss that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in each depreciated activity (within the meaning of paragraph (e)(3)(ii)(E)(*2*) of this section) described in paragraph (e)(3)(ii)(A) of this section for the fair market value of each such activity on the applicable valuation date.

(C) *Default rule.* If the gain or loss recognized upon the disposition of an interest in a passthrough entity cannot be allocated under paragraph (e)(3)(ii)(A) of this section, such gain or loss shall be allocated among the activities described in paragraph (e)(3)(ii)(A) of this section in proportion to the respective fair market values of the passthrough entity's interests in such activities at the applicable valuation date, and the gain or loss allocated to each activity of the passthrough entity shall be treated as gain or loss from the disposition of an interest in such activity.

(D) *Special rules.* For purposes of this paragraph (e)(3)(ii), the following rules shall apply:

(*1*) *Applicable valuation date*—(*i*) *In general.* Except as otherwise provided in paragraph (e)(3)(ii)(D)(*1*)(*ii*) of this section, the applicable valuation date with respect to any disposition of an interest in a passthrough entity is whichever one of the following dates is selected by the passthrough entity:

(*a*) The beginning of the taxable year of the passthrough entity in which such disposition occurs; or

(*b*) The date on which such disposition occurs.

(*ii*) *Exception.* If, after the beginning of a passthrough entity's taxable year in which a holder's disposition of an interest in such passthrough entity occurs and before the time of such disposition—

(*a*) The passthrough entity disposes of more than 10 percent of its interest (by value as of the beginning of such taxable year) in any activity;

(*b*) More than 10 percent of the property (by value as of the beginning of such taxable year) used in any activity of the passthrough entity is disposed of; or

(*c*) The holder of such interest contributes to the passthrough entity substantially appreciated property or substantially depreciated property with a total fair market value or adjusted basis, respectively, which exceeds 10 percent of the total fair market value of the holder's interest in the passthrough entity as of the beginning of such taxable year;

then the applicable valuation date shall be the date immediately preceding the date on which such disposition occurs.

(*2*) *Basis adjustments.* Any adjustment to the basis of partnership property under section 743(b) made with respect to the holder of an interest in a partnership shall be taken into account in computing the net gain or net loss that would have been allocated to the holder with respect to such interest if the partnership had sold its entire interest in an activity.

(*3*) *Tiered passthrough entities.* In the case of a disposition of an interest in a passthrough entity (the ''subsidiary passthrough entity'') by a holder that is also a passthrough entity, any gain or loss from such disposition that is taken into account by any person that owns (directly or indirectly) an interest in such holder shall be allocated among the activities of the subsidiary passthrough entity by applying the rules of this paragraph (e)(3)(ii) to the person taking such gain or loss into account as if such person has been the holder of an interest in such subsidiary passthrough entity and had recognized such gain or loss as a result of a disposition of such interest.

(E) *Meaning of certain terms.* For purposes of this paragraph (e)(3)(ii)—

(*1*) An activity is an appreciated activity with respect to a holder that has disposed of an interest in a passthrough entity if a net gain would have been allocated to the holder with respect to such interest if the passthrough entity has sold its entire interest in such activity for its fair market value on the applicable valuation date;

(*2*) An activity is a depreciated activity with respect to a holder that has disposed of an interest in a passthrough entity if a net loss would have been allocated to the holder with respect to such interest if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date;

(*3*) The term ''net gain'' means, with respect to the sale of a passthrough entity's entire interest in an activity, the amount by which the gains from the sale of all of the property used by (or representing the interest of) the passthrough entity in such activity exceed the losses (if any) from such sale;

(*4*) The term ''net loss'' means, with respect to the sale of a passthrough entity's entire interest in an activity, the amount by which the losses from the sale of all of the property used by (or representing the interest of) the passthrough entity in such activity exceed the gains (if any) from such sale.

(iii) *Treatment of gain allocated to certain passive activities as not from a passive activity.* If, in the case of a disposition of an interest in a passthrough entity—

(A) An amount of gain recognized on account of such disposition by the holder of such interest (or any other person that owns (directly or indirectly) an interest in such holder if such holder is a passthrough entity) is allocated to a passive activity of such holder (or such other person) under paragraph (e)(3)(ii) of this section;

(B) [Reserved] See § 1.469–2(e)(3)(iii)(B) for rules relating to this paragraph.

(C) The amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(B) of this section exceeds 10 percent of the amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(A) of this section;

then the gain of the holder (or such other person) that is described in paragraph (e)(3)(iii)(A) of this section shall be treated as gain that is not from a passive activity to the extent that such gain does not exceed the amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(B) of this section. For purposes of applying the preceding sentence to the disposition of an interest in a partnership, the amount of gain that would have been allocated to the holder (or such other person) if all of the property used in an activity had been sold shall be determined by taking into account any adjustment to the basis of partnership property made with respect to such holder (or such other person) under section 743(b).

(iv) *Dispositions occurring in taxable years beginning before February 19, 1988*—(A) *In general.* Except as otherwise provided in this paragraph (e)(3)(iv), if the holder of an interest in a passthrough entity sells, exchanges, or otherwise disposes of all or part of such interest during a taxable year of such entity beginning prior to February 19, 1988, any gain or loss recognized from such disposition shall be allocated among the activities of the passthrough entity under any reasonable method selected by the passthrough entity, and the gain or loss allocated to each activity of the passthrough entity shall be treated as gain or loss from the disposition of an interest in such activity. For purposes of the preceding sentence, a reasonable method shall include the method prescribed by paragraph (e)(3)(ii) of this section. In addition, a method that allocates gain or loss among the passthrough entity's activities on the basis of the fair market value, cost, or adjusted basis of the property used in such activities shall generally be considered a reasonable method for purposes of this paragraph (e)(3)(iv).

(B) *Exceptions.* This paragraph (e)(3)(iv) shall not apply to any disposition of an interest in a passthrough entity occurring after February 19, 1988, if after such date, but before the holder's disposition of such interest, the holder (or any other person that owns (directly or indirectly) an interest in such holder if such holder is a passthrough entity) contributes to the passthrough entity substantially appreciated portfolio assets or any other substantially appreciated property that was used in any trade or business activity (within the meaning of § 1.469–1T(e)) of the holder (or such other person) during—

(*1*) The taxable year of such person in which such contribution occurs; or

(*2*) The immediately preceding taxable year of such person;

but only if such person materially participated (within the meaning of § 1.469–5T) in the activity for such year.

(v) *Treatment of portfolio assets.* For purposes of the paragraph (e)(3), all portfolio assets owned by a passthrough entity shall be treated as held in a single investment activity.

(vi) *Definitions.* For purposes of this paragraph (e)(3)—

(A) The term ''portfolio asset'' means any property of a type that produces portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(B) The term ''substantially appreciated property'' means property with a fair market value that exceeds 120 percent of its adjusted basis; and

(C) The term ''substantially depreciated property'' means property with an adjusted basis that exceeds 120 percent of its fair market value.

(vii) *Examples*. The following examples illustrate the application of this paragraph (e)(3):

Example (1). (i) A owns a one-half interest in P, a calendar year partnership. In 1993, A sells 50 percent of such interest for $50,000. A's adjusted basis for the interest sold is $30,000. Thus, A recognizes $20,000 of gain from the sale. P is engaged in three trade or business activities, X, Y, and Z, and owns marketable securities that are portfolio assets. For 1993, A materially participates in activity Z, but does not participate in activities X and Y. Paragraph (c)(2)(iii) of this section would not have applied to any of the gain that A would have been allocated if, immediately before A's sale, P had disposed of all of the property used in its trade or business activities. During the portion of 1993 preceding A's sale, P did not sell any of the property used in its activities, and A did not contribute any property to P.

(ii) Under paragraph (e)(3)(ii) of this section, a ratable portion of A's $20,000 gain is allocated to each appreciated activity in which P owned an interest on the applicable valuation date (within the meaning of paragraph (e)(3)(ii)(D)(*1*) of this section). For this purpose, paragraph (e)(3)(v) of this section treats the marketable securities owned by P as a single investment activity.

(iii) P selects the beginning of 1993 as the applicable valuation date pursuant to paragraph (e)(3)(ii)(D)(*1*)(*i*) of this section. P is not required to use the date of A's sale as the applicable valuation date under paragraph (e)(3)(ii)(D)(*1*)(*ii*) of this section because during the portion of 1993 preceding A's sale, P did not sell any of its property and A did not contribute any property to P. At the beginning of 1993, the fair market value and adjusted basis of the property used in P's activities are as follows:

	Adjusted basis	Fair market value
X	$68,000	$48,000
Y	30,000	62,000
Z	20,000	80,000
Marketable securities	2,000	10,000
Total	120,000	200,000

(iv) Under paragraph (e)(3)(ii)(B) of this section, the portion of A's $20,000 gain that is allocated to an appreciated activity of P (i.e., activities Y and Z and the marketable securities) is the amount of such gain multiplied by the fraction obtained by dividing (a) the net gain that would have been allocated to A with respect to the interest sold by A if P had sold its entire interest in such activity at the beginning of 1993 by (b) the sum of the amounts of net gain that would have been allocated to A with respect to the interest sold by A if P had sold its entire interest in each appreciated activity at the beginning of 1993.

(v) If P had sold its entire interest in activities Y and Z and the marketable securities at the beginning of 1993, A would have been allocated the following amounts of net gain with respect to the interest in P that A sold in 1993:

Activity	Net gain
Y	$8,000
Z	15,000
Marketable securities	2,000
Total	25,000

(vi) Accordingly, under paragraph (e)(3)(ii) of this section, $6,400 of A's $20,000 gain ($20,000 × $8,000/$25,000) is allocated to activity Y, $12,000 of A's $20,000 gain ($20,000 × $15,000/$25,000) is allocated to activity Z, and $1,600 of A's $20,000 gain ($20,000 × $2,000/ $25,000) is allocated to the marketable securities. The gain allocated to activity Y is passive activity gross income. None of that gain is treated as gain that is not from a passive activity under paragraph (e)(3)(iii) of this section because paragraph (c)(2)(iii) of this section would not have applied to any of the gain that A would have been allocated if P had sold all of the property used in activity Y immediately prior to A's sale.

Example (2). (i) B and C, calendar year individuals, are equal partners in calendar year partnership R, which they formed on January 1, 2005, with contributions of property and money. The only item of property (other than money) contributed by B was a building that B had used for 12 years preceding the contribution in an activity that was not a passive activity during such period. At the time of its contribution, the building had an adjusted basis of $40,000 and a fair market value of $66,000. R is engaged in a single activity: the sale of equipment to customers in the ordinary course of the business of dealing in such property. R uses the building contributed by B in the dealership activity. B did not materially participate in the dealership activity during 2005. On July 1, 2005, D purchases one-half of B's interest in R for $37,500 in cash. At the time of the sale, the balance sheet of R, which uses the accrual method of accounting, is as follows:

	Adjusted basis per books	Fair market value
ASSETS		
Cash	$30,000	$30,000
Accounts receivable:		
Dealership	20,000	18,000
Inventory:		
Dealership	52,000	66,000
Building	40,000	66,000

	Adjusted basis per books	Fair market value
Total	142,000	180,000
LIABILITIES AND CAPITAL		
Liabilities	$30,000	$30,000
Capital:		
B	47,000	75,000
C	65,000	75,000
Total	142,000	180,000

Thus, B's gain from the sale is $14,000 ($45,000 amount realized from the sale (consisting of $37,500 of cash and $7,500 of liabilities assumed by the purchaser) minus B's $31,000 adjusted basis for the interest sold (one-half of B's total adjusted basis of $62,000)).

(ii) Under paragraph (e)(3)(ii) of this section, all $14,000 of B's gain from the sale is allocated to R's dealership activity, which is a passive activity of B for 2005. If, however, R had sold its interest in the building immediately prior to B's sale for its fair market value on the applicable valuation date (the valuation date selected by R is irrelevant since the building had a fair market value of $66,000 at the beginning of 2005 and at the time of the sale), B would have been allocated $13,000 of gain under section 704(c) with respect to the interest in R that B sold to D. This gain would have been treated as gain that is not from a passive activity under paragraph (c)(2)(iii) of this section and would have exceeded 10 percent of the total amount of B's gain that is allocated to the dealership activity under paragraph (e)(3)(ii) of this section. Accordingly, under paragraph (e)(3)(iii) of this section, B's gain from the sale ($14,000) is treated as gain that is not from a passive activity to the extent that such gain does not exceed the amount of gain subject to paragraph (c)(2)(iii) of this section that B would have been allocated with respect to the interest sold to D if R had sold all of the property used in the dealership activity immediately prior to B's sale ($13,000). Thus, $13,000 of B's gain from the sale is treated as gain that is not from a passive activity.

(f) *Recharacterization of passive income in certain situations*—(1) *In general.* This paragraph (f) sets forth rules that require income from certain passive activities to be treated as income that is not from a passive activity (regardless of whether such income is treated as passive activity gross income under section 469 or any other provision of the regulations thereunder). For definitions of certain terms used in this paragraph (f), see paragraph (f)(9) of this section.

(2) *Special rule for significant participation*—(i) *In general.* An amount of the taxpayer's gross income from each significant participation passive activity for the taxable year equal to a ratable portion of the taxpayer's net passive income from such activity for the taxable year shall be treated as not from a passive activity if the taxpayer's passive activity gross income from all significant participation passive activities for the taxable year (determined without regard to paragraphs (f) (2) through (4) of this section) exceeds the taxpayer's passive activity deductions from all such activities for such year. For purposes of this paragraph (f)(2), the ratable portion of the net passive income from an activity is determined by multiplying the amount of such income by the fraction obtained by dividing—

(A) The amount of the excess described in the preceding sentence; by

(B) The amount of the excess described in the preceding sentence taking into account only significant participation passive activities from which the taxpayer has net passive income for the taxable year.

(ii) *Significant participation passive activity.* For purposes of this paragraph (f)(2), the term ''significant participation passive activity'' means any trade or business activity (within the meaning of § 1.469–1T(e)(2)) in which the taxpayer significantly participates (within the meaning of § 1.469–5T(c)(2)) for the taxable year but in which the taxpayer does not materially participate (within the meaning of § 1.469–5T) for such year.

(iii) *Example.* The following example illustrates the application of this paragraph (f)(2):

Example. (i) A owns interests in three trade or business activities, X, Y, and Z. A does not materially participate in any of these activities for the taxable year, but participates in activity X for 110 hours, in activity Y for 160 hours, and in activity Z for 125 hours. A owns no interest in any other trade or business activity in which A does not materially participate for the taxable year but in which A participates for more than 100 hours during the taxable year. A's net passive income (or loss) for the taxable year from activities X, Y, and Z is as follows:

	X	Y	Z
Passive activity gross income	$600	$700	$900

	X	Y	Z
Passive activity deductions	(200)	(1,000)	(300)
Net passive income	400	(300)	600

(ii) Under paragraph (f)(2)(ii) of this section, activities X, Y, and Z are A's only significant participation passive activities for the taxable year. A's passive activity gross income from significant participation passive activities ($2,200) exceeds A's passive activity deductions from significant participation passive activities ($1,500) by $700 for such year. Therefore, under paragraph (f)(2)(i) of this section, a ratable portion of A's gross income from activities X and Z (A's significant participation passive activities with net passive income for the taxable year) is treated as gross income that is not from a passive activity. The ratable portion is determined by dividing (a) the amount by which A's passive activity gross income from significant participation passive activities exceeds A's passive activity deductions from significant participation passive activities for the taxable year ($700) by (b) such excess taking into account only A's significant participation passive activities having net passive income for the taxable year ($1,000). Accordingly, $280 of gross income from activity X ($400 x 700/1000) and $420 of gross income from activity Z ($600 x 700/1000) is treated as gross income that is not from a passive activity.

(3) *Rental of nondepreciable property.* If less than 30 percent of the unadjusted basis of the property used or held for use by customers in a rental activity (within the meaning of § 1.469–1T(e)(3)) during the taxable year is subject to the allowance for depreciation under section 167, an amount of the taxpayer's gross income from the activity equal to the taxpayer's net passive income from the activity shall be treated as not from a passive activity. For purposes of this paragraph (f)(3), the term ''unadjusted basis'' means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis. The following example illustrates the application of this paragraph (f)(3):

Example. C is a limited partner in a partnership. The partnership acquires vacant land for $300,000, constructs improvements on the land at a cost of $100,000, and leases the land and improvements to a tenant. The partnership then sells the land and improvements for $600,000, thereby realizing a gain on the disposition. The unadjusted basis of the improvements ($100,000) equals 25 percent of the unadjusted basis of all property ($400,000) used in the rental activity. Therefore, under this paragraph (f)(3), an amount of C's gross income from the activity equal to the net passive income from the activity (which is computed by taking into account the gain from the disposition, including gain allocable to the improvements) is treated as not from a passive activity.

(4) *Net interest income from passive equity-financed lending activity*—(i) *In general.* An amount of the taxpayer's gross income for the taxable year from any equity-financed lending activity equal to the lesser of—

(A) The taxpayer's equity-financed interest income from the activity for such year; and

(B) The taxpayer's net passive income from the activity for such year

shall be treated as not from a passive activity.

(ii) *Equity-financed lending activity*—(A) *In general.* For purposes of this paragraph (f)(4), an activity is an equity-financed lending activity for a taxable year if—

(*1*) The activity involves a trade or business of lending money; and

(*2*) The average outstanding balance of the liabilities incurred in the activity for the taxable year does not exceed 80 percent of the average outstanding balance of the interest-bearing assets held in the activity for such year.

(B) *Certain liabilities not taken into account.* For purposes of paragraph (f)(4)(ii)(A)(*2*) of this section, liabilities incurred principally for the purpose of increasing the percentage described in paragraph (f)(4)(ii)(A)(*2*) of this section shall not be taken into account in computing such percentage.

(iii) *Equity-financed interest income.* For purposes of this paragraph (f)(4), the taxpayer's equity-financed interest income from an activity for a taxable year is the amount of the taxpayer's net interest income from the activity for such year multiplied by the fraction obtained by dividing—

(A) The excess of the average outstanding balance for such year of the interest-bearing assets held in the activity over the average outstanding balance for such year of the liabilities incurred in the activity; by

(B) The average outstanding balance for such year of the interest-bearing assets held in the activity.

(iv) *Net interest income.* For purposes of this paragraph (f)(4), the net interest income from an activity for a taxable year is—

(A) The gross interest income from the activity for such year; reduced by

(B) Expenses from the activity (other than interest on liabilities described in paragraph (f)(4)(vi) of this section) for such year that are reasonably allocable to such gross interest income.

(v) *Interest-bearing assets.* For purposes of this paragraph (f)(4), the interest-bearing assets held in an activity include all assets that produce interest income, including loans to customers.

(vi) *Liabilities incurred in the activity.* For purposes of this paragraph (f)(4), liabilities incurred in an activity include all fixed and determinable liabilities incurred in the activity that bear interest or are issued with original issue discount other than debts secured by tangible property used in the activity. In the case of an activity conducted by an entity in which the taxpayer owns a interest, liabilities incurred in an activity include only liabilities with respect to which the entity is the borrower.

(vii) *Average outstanding balance.* For purposes of this paragraph (f)(4), the average outstanding balance of liabilities incurred in an activity or of the interest-bearing assets held in an activity may be computed on a daily, monthly, or quarterly basis at the option of the taxpayer.

(viii) *Example.* The following example illustrates the application of this paragraph (f)(4):

Example: (i) A, a calendar year individual, acquires on January 1, 1988, a limited partnership interest in P, a calendar year partnership. Under the partnership agreement, A has a one percent share of each item of income, gain, loss, deduction, and credit of P. A acquires the partnership interest for $90,000, using $50,000 of unborrowed funds and $40,000 of proceeds of a loan bearing interest at an annual rate of 10 percent. A pays $4,000 of interest on the loan in 1988.

(ii) P's sole activity is a trade or business of lending money. A does not materially participate in the activity for 1988. During 1988, the average outstanding balance of P's interest-bearing assets (including loans to customers, temporary deposits with other lending institutions, and government and corporate securities) is $20 million. P incurs numerous interest-bearing liabilities in connection with its lending activity, including liabilities for deposits taken from customers, unsecured short-term and long-term loans from other lending institutions, and a mortgage loan secured by the building, owned by P, in which P conducts its business. For 1988, the average outstanding balance of all of these liabilities (other than the mortgage loan) is $11 million. None of these liabilities was incurred by P principally for the purpose of increasing the percentage described in paragraph (f)(4)(ii)(A)(*2*) of this section.

(iii) The interest income derived by P for 1988 from its interest-bearing assets is $2.2 million. The interest expense paid by P for 1988 with respect to the liabilities incurred in connection with its lending activity (other than the mortgage loan) is $990,000. P's other expenses for 1988 that are reasonably allocable to P's gross interest income (including expenses for advertising, loan processing and servicing, and insurance, and depreciation on P's building) total $250,000. P's interest expense for 1988 on the mortgage loan secured by the building used in P's lending activity is $50,000. All of the interest expense paid or incurred by P for 1988 is allocated under § 1.63–8T to expeditures in connection with P's lending activity.

(iv) Under paragraph (f)(4)(ii) of this section, P's activity is an equity-financed lending activity for 1988, since, for 1988, the activity involves a trade or business of lending money and the average outstanding balance of the liabilities incurred in the activity ($11 million) does not exceed 80 percent of the average outstanding balance of the interest-bearing assets held in the activity ($20 million). Accordingly, under paragraph (f)(4)(i) of this section, an amount of A's gross income from the activity equal to the lesser of (a) A's equity-financed interest income from the activity for 1988, or (b) A's net passive income from the activity for 1988, is treated as income that is not from a passive activity.

(v) Under paragraph (f)(4)(iii) of this section, A's equity-financed interest income from the activity for 1988 is determined by multiplying A's net interest income from the activity for 1988 by the fraction obtained by dividing $9 million (the excess of the average interest-bearing assets for 1988 over the average interest-bearing liabilities for 1988) by $20 million (the average interest-bearing assets for 1988). Under paragraph (f)(4)(iv) of this section, A's net interest income from the activity for 1988 is $19,000 (A's distributive share of $2.2 million of gross interest income less A's distributive share of $300,000 of expenses described in paragraph (f)(4)(iv)(B) of this section, including interest expense on the mortgage loan). A's distributive share of P's other interest expense ($990,000) is not taken into account in computing A's net interest income for 1988. Accordingly, A's equity-financed interest income from the activity for 1988 is $8,550 ($19,000 x $9 million/$20 million).

(vi) Under paragraph (f)(9)(i) of this section, A's net passive income from the activity for 1988 is determined by taking into account A's distributive share of P's gross income and deductions from the activity for 1988, as well as any interest expense incurred by A individually that is taken into account under § 1.163–8T in determining A's income or loss from the activity for 1988. Assuming that for 1988 all $4,000 of interest expense on the loan that A used to finance the acquisition of A's interest in P is allocated under § 1.163–8T to expenditures of A in connection with the lending activity for 1988, A's net passive income from the activity for 1988 is $5,100, computed as set forth in the following table:

Gross income:	
Interest income	$22,000
Deductions:	
Distributive share of P's expenses from the activity	(12,900)
Interest expense on A's acquisition debt	(4,000)
Net passive income	5,100

(vii) A's net passive income from the activity for 1988 ($5,100) is less than A's equity-financed income from the activity for 1988 ($8,550). Accordingly, under this paragraph (f)(4), $5,100 of A's gross income from the activity for 1988 is treated as not from a passive activity.

(5) *Net income from certain property rented incidental to development activity*—

(i) *In general.* [Reserved] See § 1.469–2(f)(5)(i) for rules relating to this paragraph.

(ii) *Commencement.* [Reserved] See § 1.469–2(f)(5)(ii) for rules relating to this paragraph (f)(5)(ii).

(iii) *Services performed for the purpose of enhancing the value of property.* [Reserved] See § 1.469–2(f)(5)(iii) for rules relating to this paragraph (f)(5)(iii).

(iv) *Examples.* [Reserved] See § 1.469–2(f)(5)(iv) for examples relating to this paragraph (f)(5)(iv).

(6) *Property rented to a nonpassive activity.* [Reserved] See § 1.469–2(f)(6) for rules relating to this paragraph.

(7) *Special rules applicable to the acquisition of an interest in a passthrough entity engaged in the trade or business of licensing intangible property*—(i) *In general.* If a taxpayer acquires an interest in an entity described in paragraph (c)(3)(iii)(B)(*3*) of this section (the ''development entity'') after the development entity has created an item of intangible property or performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property, an amount of the taxpayer's gross royalty income for the taxable year from such item of property equal to the taxpayer's net royalty income for the year from such item of property shall be treated as not from a passive activity.

(ii) *Royalty income from property.* For purposes of this paragraph (f)(7)—

(A) A taxpayer's gross royalty income for a taxable year from an item of property is the taxpayer's share of passive activity gross income for such year (determined without regard to paragraphs (f)(2) through (7) of this section) from the licensing or transfer of any right in such property; and

(B) A taxpayer's net royalty income for a taxable year from an item of property is the excess, if any, of—

(*1*) The taxpayer's gross royalty income for the taxable year from such item of property; over

(*2*) Any passive activity deductions for such taxable year (including any deduction treated as a deduction for such year under § 1.469–1T (f)(4)) that are reasonably allocable to such item of property.

(iii) *Exceptions.* Paragraph (f)(7)(i) of this section shall not apply to a taxpayer's gross royalty income for a taxable year from the licensing of an item of intangible property if—

(A) The expenditures reasonably incurred by the development entity for the taxable year of the entity ending with or within the taxpayer's taxable year with respect to the development or marketing of such property satisfy paragraph (c)(3)(iii)(B)(*2*)(*ii*) (*a*) of this section; or

(B) The taxpayer's share of the expenditures reasonably incurred by the development entity with respect to the development or marketing of such property for all taxable years of the entity beginning with the taxable year of the entity in which the taxpayer acquired the interest in the entity and ending with the taxable year of the entity ending with or within the taxpayer's current taxable year exceeds 25 percent of the fair market value of the taxpayer's interest in such property at the time the taxpayer acquired the interest in the entity.

(iv) *Capital expenditures.* For purposes of paragraph (f)(7)(iii)(B) of this section, a capital expenditure shall be taken into account for the taxable year of the entity in which such expenditure is chargeable to capital account, and the taxpayer's share of such expenditure shall be determined as though such expenditure were allowed as a deduction for such year.

(v) *Example.* The following example illustrates the application of this paragraph (f)(7):

Example. (i) The facts are the same as in example (5) in paragraph (c)(3)(iv) of this section, except that, in 1988, D's 10 percent partnership interest is sold to F for $13,000, all of which is attributable to the design licensed by the partnership.

(ii) For 1988, the expenditures reasonably incurred by the partnership with respect to the development or marketing of the design satisfy paragraph (c)(3)(iii)(B)(*2*)(*ii*)(*a*) of this section. Accordingly, under paragraph (f)(7)(iii)(A) of this section, paragraph (f)(7)(i) of this section does not apply to F's distributive share of the partnership's gross income from licensing the design.

(iii) For 1989, the expenditures reasonably incurred by the partnership with respect to the development or marketing of the design do not satisfy paragraph (c)(3)(iii)(B)(*2*)(*ii*)(*a*) of this section. Moreover, F's distributive share of such expenditures reasonably incurred by the partnership for 1988 and 1989 ($27,000 x .10 = $2,700) does not exceed 25 percent of the fair market value of F's interest in the design at the time F acquired the partnership interest ($13,000). Accordingly, neither of the exceptions provided in paragraph (f)(7)(iii) of this section applies for 1989 and, under paragraph (f)(7)(i) of this section, an amount of F's gross royalty income from the design equal to F's net royalty income from the design is treated as not from a passive activity.

(8) *Limitation on recharacterized income.* The amount of gross income from an activity that is treated as not from a passive activity for the taxable year under subparagraphs (f) (2) through (4) of this paragraph (f) shall not exceed the greatest amount of gross income treated as not from a passive activity under any one of such subparagraphs.

(9) *Meaning of certain terms.* For purposes of this paragraph (f), the terms set forth below shall have the following meanings:

(i) The net passive income from an activity for a taxable year is the amount by which the taxpayer's passive activity gross income from the activity for the taxable year (determined without regard to paragraphs (f) (2) through (4) of this section) exceeds the taxpayer's passive activity deductions from the activity for such year;

(ii) The net passive loss from an activity for a taxable year is the amount by which the taxpayer's passive activity deductions from the activity for the taxable year exceeds the taxpayer's passive activity gross income from the activity for such year (determined without regard to paragraphs (f) (2) through (4) of this section).

(iii) [Reserved] See § 1.469–2(f)(9)(iii) for rules relating to this paragraph.

(iv) [Reserved] See § 1.469–2(f)(9)(iv) for rules relating to this paragraph.

(10) *Coordination with section 163(d).* [Reserved] See paragraph 1.469–2(f)(10) for rules relating to this paragraph.

(11) *Effective date.* For the effective date of the rules in this paragraph (f), see § 1.469–11T (relating to effective date and transition rules).

[T.D. 8175, 53 FR 5711, Feb. 25, 1988; 53 FR 15494, Apr. 29, 1988; as amended by T.D. 8253, 54 FR 20538, May 12, 1989; T.D. 8290, 55 FR 6981, Feb. 28, 1990; T.D. 8318, 55 FR 48108, Nov. 19, 1990; 55 FR 51688, Dec. 17, 1990; T.D. 8417, 57 FR 20758, May 15, 1992; T.D. 8477, 58 FR 11538, Feb. 26, 1993; T.D. 8495, 58 FR 58788, Nov. 4, 1993]

§ 1.469–3 Passive activity credit.

(a)–(d) [Reserved]

(e) *Coordination with section 38(b).* Any credit described in section 38(b) (1) through (5) is taken into account in computing the current year business credit for the first taxable year in which the credit is subject to section 469 and is not disallowed by section 469 and the regulations thereunder.

(f) *Coordination with section 50.* In the case of any cessation described in section 50(a) (1) or (2), the credits allocable to the taxpayer's activities under § 1.469–1(f)(4) shall be adjusted by reason of the cessation.

(g) [Reserved]

[T.D. 8417, 57 FR 20758, May 15, 1992]

§1.469–3T Passive activity credit (temporary).

(a) *Computation of passive activity credit.* The taxpayer's passive activity credit for the taxable year is the amount (if any) by which—

(1) The sum of all of the taxpayer's credits that are subject to section 469 for such year; exceeds

(2) The taxpayer's regular tax liability allocable to all passive activities for such year.

(b) *Credits subject to section 469*—(1) *In general.* Except as otherwise provided in this paragraph (b), a credit is subject to section 469 for a taxable year if and only if—

(i) Such credit—

(A) Is attributable to such taxable year and arises in connection with the conduct of an activity that is a passive activity for such taxable year; and

(B) Is described in—

(*1*) Section 38(b) (1) through (5) (relating to general business credits);

(*2*) Section 27(b) (relating to corporations described in section 936);

(*3*) Section 28 (relating to clinical testing of certain drugs); or

(*4*) Section 29 (relating to fuel from nonconventional sources); or

(ii) Such credit is allocable to an activity for such taxable year under §1.469–1T(f)(4).

(2) *Treatment of credits attributable to qualified progress expenditures.* Any credit attributable to an increase in qualified investment under section 46(d)(1)(A) (relating to qualified progress expenditures) with respect to progress expenditure property (as defined in section 46(d)(2)) is subject to section 469 for a taxable year if—

(i) Such credit is attributable to such taxable year;

(ii) Such credit is described in paragraph (b)(1)(i)(B) of this section; and

(iii) It is reasonable to believe that such progress expenditure property will be used in a passive activity of the taxpayer when it is placed in service.

(3) *Special rule for partners and S corporation shareholders.* The character of a credit of a taxpayer arising in connection with an activity conducted by a partnership or S corporation (as a credit subject to section 469) shall be determined, in any case in which participation is relevant, by reference to the participation of the taxpayer in such activity. Such participation is determined for the taxable year of the partnership or S corporation (and not the taxable year of the taxpayer). See §1.469–2T(e)(1).

(4) *Exception for pre-1987 credits.* A credit is not subject to section 469 if it is attributable to a taxable year of the taxpayer beginning prior to January 1, 1987.

(c) *Taxable year to which credit is attributable.* A credit is attributable to the taxable year in which such credit would be (or would have been) allowed if the credits regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469.

(d) *Regular tax liability allocable to passive activities*—(1) *In general.* For purposes of paragraph (a)(2) of this section, the taxpayer's regular tax liability allocable to all passive activities for the taxable year is the excess (if any) of—

(i) The taxpayer's regular tax liability for such taxable year; over

(ii) The amount of such regular tax liability determined by reducing the taxpayer's taxable income for such year by the excess (if any) of the taxpayer's passive activity gross income for such year over the taxpayer's passive activity deductions for such year.

(2) *Regular tax liability.* For purposes of this section, the term ''regularly tax liability'' has the meaning given such term in section 26(b).

(e) *Coordination with section 38(b).* [Reserved] See §1.469–3(e) for rules relating to this paragraph.

(f) *Coordination with section 50.* [Reserved] See §1.469–3(f) for rules relating to this paragraph.

(g) *Examples.* The following examples illustrate the application of this section:

Example (1). (i) A, a calendar year individual, is a general partner in calendar year partnership P. P purchases a building in 1987 and, in 1987, 1988, and 1989, incurs rehabilitation costs with respect to the building. The building is placed in service in the rental activity in 1989. P's rehabilitation costs are qualified rehabilitation expenditures (within the meaning of section 48(g)(2)) and are taken into account in determining the amount of the investment credit for rehabilitation expenditures. P's qualified rehabilitation expenditures are not qualified progress expenditures (within the meaning of section 46(d)).

(ii) Because, under section 46(c)(1), the credit is allowable for the taxable year in which the rehabilitated property is placed in service, the credit allowable for P's qualified rehabilitation expenditures arises in connection with the activity in which the property is placed in service. In addition, the credit is attributable to 1989, the year in which the property is placed in service, because it would be allowed for such year if A's credits allowed for all taxable years were determined without regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469. Accordingly, under paragraph (b)(1) of this section, A's distributive share of the credit is subject to section 469 for 1989 because the credit arises in connection with a rental activity for such year.

Example (2). The facts are the same as in example (1), except that the rehabilitation costs are incurred in anticipation of placing the building in service in a rental activity, the qualified rehabilitation expenditures in 1987 and 1988 are qualified progress expenditures (''QPEs'') (within the meaning of section 46(d)(3)), the improvements resulting from the expenditures are progress expenditure property (within the meaning of paragraph (d)(2) of this section), and it is reasonable to expect that such property will be transition property (within the meaning of section 49(e)) when the property is placed in service. Therefore, under section 46(d)(1)(A), the qualified investment for 1987 and 1988 is increased by an amount equal to the aggregate of the applicable percentage of the qualified rehabilitation expenditures incurred in such years. The credits that are based on these expenditures are attributable (under paragraph (c) of this section) to 1987 and 1988, respectively. It is reasonable to believe in 1987 and 1988 that the progress expenditure property will be used in a rental activity when it is placed in service. Accordingly, under paragraph (b)(2) of this section, A's distributive share of the credit for 1987 and 1988 is subject to section 469. Under paragraph (b)(1) of this section (as in example (1)), A's distributive share of the credit for 1989 is also subject to section 469.

Example (3). (i) B, a single individual, acquires an interest in a partnership that, in 1988, rehabilitates a building and places it in service in a trade or business activity in which B does not materially participate. For 1988, B has the following items of gross income, deduction, and credit:

Gross income:		
Income other than passive activity gross income	$110,000	
Passive activity gross income	20,000	$130,000
Deductions:		
Deductions other than passive activity deductions	23,950	
Passive activity deductions	18,000	(41,950)
Taxable income	....	88,050
Credits:		
Rehabilitation credit from the passive activity	....	8,000

(ii) For 1988, the amount by which B's passive activity gross income exceeds B's passive activity deductions (B's net passive income) is $2,000. Under paragraph (d) of this section, B's regular tax liability allocable to passive activities for 1988 is determined as follows:

(A) Taxable income	$88,050	
(B) Regular tax liability	....	$24,578.50
(C) Taxable income minus net passive income	86,050	
(D) Regular tax liability for taxable income of $86,050.00	....	23,918.50
(E) Regular tax liability allocable to passive activities ((B) minus (D))	....	$660.00

(iii) Under paragraph (a) of this section, B's passive activity credit for 1988 is the amount by which B's credits that are subject to section 469 for 1988 ($8,000) exceed B's regular tax liability allocable to passive activities for 1988 ($660.00). Accordingly, B's passive activity credit for 1988 is $7,340.

Example (4). (i) The facts are the same as in example (3) except that, in 1988, B also has additional deductions of $100,000 from a trade or business activity in which B materially participates for 1988. Thus, B has a taxable loss for 1988 of $11,950, determined as follows:

Gross income:		
Income other than passive activity gross income	$110,000	
Passive activity gross income	20,000	$130,000
Deductions:		
Deductions other than passive activity deductions	123,950	
Passive activity deductions	18,000	(141,950)
Taxable income	....	(11,950)

(ii) Under section 26(b) and paragraph (d)(2) of this section, the regular tax liability for a taxable year cannot exceed the tax imposed by chapter 1 of subtitle A of the Internal Revenue Code for the taxable year. Therefore, under paragraph (d)(1) of this section, B's regular tax liability allocable to passive activities for 1988 is zero. Although B's net operating loss for the taxable year is reduced by B's net passive income, and B's regular tax liability for other taxable years may increase as a result of the reduction, such an increase does not change B's regular tax liability allocable to passive activities for 1988. Accordingly, B's passive activity credit for 1988 is $8,000.

[T.D. 8175, 53 FR 5724, Feb. 25, 1988; 53 FR 15494, Apr. 29, 1988; T.D. 8253, 54 FR 20542, May 12, 1989; T.D. 8417, 57 FR 20758, May 15, 1992]

§1.469–4 Definition of activity.

(a) *Scope and purpose.* This section sets forth the rules for grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity loss and credit limitation rules of section 469. A taxpayer's activities include those conducted through C corporations that are subject to section 469, S corporations, and partnerships.

(b) *Definitions.* The following definitions apply for purposes of this section—

(1) *Trade or business activities. Trade or business activities* are activities, other than rental activities or activities that are treated under §1.469–1T(e)(3)(vi)(B) as incidental to an activity of holding property for investment, that—

(i) Involve the conduct of a trade or business (within the meaning of section 162);

(ii) Are conducted in anticipation of the commencement of a trade or business; or

(iii) Involve research or experimental expenditures that are deductible under section 174 (or would be deductible if the taxpayer adopted the method described in section 174(a)).

(2) *Rental activities. Rental activities* are activities that constitute rental activities within the meaning of §1.469–1T(e)(3).

(c) *General rules for grouping activities*—(1) *Appropriate economic unit.* One or more trade or business activities or rental activities may be treated as a single activity if the activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of section 469.

(2) *Facts and circumstances test.* Except as otherwise provided in this section, whether activities constitute an appropriate economic unit and, therefore, may be treated as a single activity depends upon all the relevant facts and circumstances. A taxpayer may use any reasonable method of applying the relevant facts and circumstances in grouping activities. The factors listed below, not all of which are necessary for a taxpayer to treat more than one activity as a single activity, are given the greatest weight in determining whether activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of section 469—

(i) Similarities and differences in types of trades or businesses;

(ii) The extent of common control;

(iii) The extent of common ownership;

(iv) Geographical location; and

(v) Interdependencies between or among the activities (for example, the extent to which the activities purchase or sell goods between or among themselves, involve products or services that are normally provided together, have the same customers, have the same employees, or are accounted for with a single set of books and records).

(3) *Examples.* The following examples illustrate the application of this paragraph (c).

Example 1. Taxpayer *C* has a significant ownership interest in a bakery and a movie theater at a shopping mall in Baltimore and in a bakery and a movie theater in Philadelphia. In this case, after taking into account all the relevant facts and circumstances, there may be more than one reasonable method for grouping *C*'s activities. For instance, depending on the relevant facts and circumstances, the following groupings may or may not be permissible: a single activity; a movie theater activity and a bakery activity; a Baltimore activity and a Philadelphia activity; or four separate activities. Moreover, once *C* groups these activities into appropriate economic units, paragraph (e) of this section requires *C* to continue using that grouping in subsequent taxable years unless a material change in the facts and circumstances makes it clearly inappropriate.

Example 2. Taxpayer *B*, an individual, is a partner in a business that sells non-food items to grocery stores (partnership *L*). *B* also is a partner in a partnership that owns and operates a trucking business (partnership *Q*). The two partnerships are under common control. The predominant portion of *Q*'s business is transporting goods for *L*, and *Q* is the only trucking business in which *B* is involved. Under this section, *B* appropriately treats *L*'s wholesale activity and *Q*'s trucking activity as a single activity.

(d) *Limitation on grouping certain activities.* The grouping of activities under this section is subject to the following limitations:

(1) *Grouping rental activities with other trade or business activities*—(i) *Rule.* A rental activity may not be grouped with a trade or business activity unless the activities being grouped together constitute an appropriate economic unit under paragraph (c) of this section and—

(A) The rental activity is insubstantial in relation to the trade or business activity;

(B) The trade or business activity is insubstantial in relation to the rental activity; or

(C) Each owner of the trade or business activity has the same proportionate ownership interest in the rental activity, in which case the portion of the rental activity that involves the rental of items of property for use in the trade or business activity may be grouped with the trade or business activity.

(ii) *Examples.* The following examples illustrate the application of paragraph (d)(1)(i) of this section:

Example 1. (i) *H* and *W* are married and file a joint return. *H* is the sole shareholder of an S corporation that conducts a grocery store trade or business activity. *W* is the sole shareholder of an S corporation that owns and rents out a building. Part of the building is rented to *H*'s grocery store trade or business activity (the grocery store rental). The grocery store rental and the grocery store trade or business are not insubstantial in relation to each other.

(ii) Because they file a joint return, *H* and *W* are treated as one taxpayer for purposes of section 469. See § 1.469–1T(j). Therefore, the sole owner of the trade or business activity (taxpayer *H–W*) is also the sole owner of the rental activity. Consequently, each owner of the trade or business activity has the same proportionate ownership interest in the rental activity. Accordingly, the grocery store rental and the grocery store trade or business activity may be grouped together (under paragraph (d)(1)(i) of this section) into a single trade or business activity, if the grouping is appropriate under paragraph (c) of this section.

Example 2. Attorney *D* is a sole practitioner in town *X*. *D* also wholly owns residential real estate in town *X* that *D* rents to third parties. *D*'s law practice is a trade or business activity within the meaning of paragraph (b)(1) of this section. The residential real estate is a rental activity within the meaning of § 1.469–1T(e)(3) and is insubstantial in relation to *D*'s law practice. Under the facts and circumstances, the law practice and the residential real estate do not constitute an appropriate economic unit under paragraph (c) of this section. Therefore, *D* may not treat the law practice and the residential real estate as a single activity.

(2) *Grouping real property rentals and personal property rentals prohibited.* An activity involving the rental of real property and an activity involving the rental of personal property (other than personal property provided in connection with the real property or real property provided in connection with the personal property) may not be treated as a single activity.

(3) *Certain activities of limited partners and limited entrepreneurs*—(i) *In general.* Except as provided in this paragraph, a taxpayer that owns an interest, as a limited partner or a limited entrepreneur (as defined in section 464(e)(2)), in an activity described in section 465(c)(1), may not group that activity with any other activity. A taxpayer that owns an interest as a limited partner or a limited entrepreneur in an activity described in the preceding sentence may group that activity with another activity in the same type of business if the grouping is appropriate under the provisions of paragraph (c) of this section.

(ii) *Example.* The following example illustrates the application of this paragraph (d)(3):

Example. (i) Taxpayer *A*, an individual, owns and operates a farm. *A* is also a member of *M*, a limited liability company that conducts a cattle-feeding business. *A* does not actively participate in the management of *M* (within the meaning of section 464(e)(2)(B)). In addition, *A* is a limited partner in *N*, a limited partnership engaged in oil and gas production.

(ii) Because *A* does not actively participate in the management of *M*, *A* is a limited entrepreneur in *M*'s activity. *M*'s cattle-feeding business is described in section 465(c)(1)(B) (relating to farming) and may not be grouped with any other activity that does not involve farming. Moreover, *A*'s farm may not be grouped with the cattle-feeding activity unless the grouping constitutes an appropriate economic unit for the measurement of gain or loss for purposes of section 469.

(iii) Because *A* is a limited partner in *N* and *N*'s activity is described in section 465(c)(1)(D) (relating to exploring for, or exploiting, oil and gas resources), *A* may not group *N*'s oil and gas activity with any other activity that does not involve exploring for, or exploiting, oil and gas resources. Thus, *N*'s activity may not be grouped with *A*'s farm or with *M*'s cattle-feeding business.

(4) *Other activities identified by the Commissioner.* A taxpayer that owns an interest in an activity identified in guidance issued by the Commissioner as an activity covered by this paragraph (d)(4) may not group that activity with any other activity, except as provided in the guidance issued by the Commissioner.

(5) *Activities conducted through section 469 entities*—(i) *In general.* A C corporation subject to section 469, an S corporation, or a partnership (a section 469 entity) must group its activities under the rules of this section. Once the section 469 entity groups its activities, a shareholder or partner may group those activities with each other, with activities conducted directly by the shareholder or partner, and with activities conducted through other section 469 entities, in accordance with the rules of this section. A shareholder or partner may not treat activities grouped together by a section 469 entity as separate activities.

(ii) *Cross reference.* An activity that a taxpayer conducts through a C corporation subject to section 469 may be grouped with another activity of the taxpayer, but only for purposes of determining whether the taxpayer materially or significantly participates in the other activity. See §1.469–2T(c)(3)(i)(A) and (c)(4)(i) for the rules regarding dividends on C corporation stock and compensation paid for personal services.

(e) *Disclosure and consistency requirements*—(1) *Original groupings.* Except as provided in paragraph (e)(2) of this section and §1.469–11, once a taxpayer has grouped activities under this section, the taxpayer may not regroup those activities in subsequent taxable years. Taxpayers must comply with disclosure requirements that the Commissioner may prescribe with respect to both their original groupings and the addition and disposition of specific activities within those chosen groupings in subsequent taxable years.

(2) *Regroupings.* If it is determined that a taxpayer's original grouping was clearly inappropriate or a material change in the facts and circumstances has occurred that makes the original grouping clearly inappropriate, the taxpayer must regroup the activities and must comply with disclosure requirements that the Commissioner may prescribe.

(f) *Grouping by Commissioner to prevent tax avoidance*—(1) *Rule.* The Commissioner may regroup a taxpayer's activities if any of the activities resulting from the taxpayer's grouping is not an appropriate economic unit and a principal purpose of the taxpayer's grouping (or failure to regroup under paragraph (e) of this section) is to circumvent the underlying purposes of section 469.

(2) *Example.* The following example illustrates the application of this paragraph (f):

Example. (i) Taxpayers *D*, *E*, *F*, *G*, and *H* are doctors who operate separate medical practices. *D* invested in a tax shelter several years ago that generates passive losses and the other doctors intend to invest in real estate that will generate passive losses. The taxpayers form a partnership to engage in the trade or business of acquiring and operating X-ray equipment. In exchange for equipment contributed to the partnership, the taxpayers receive limited partnership interests. The partnership is managed by a general partner selected by the taxpayers; the taxpayers do not materially participate in its operations. Substantially all of the partnership's services are provided to the taxpayers or their patients, roughly in proportion to the doctors' interests in the partnership. Fees for the partnership's services are set at a level equal to the amounts that would be charged if the partnership were dealing with the taxpayers at arm's length and are expected to assure the partnership a profit. The taxpayers treat the partnership's services as a separate activity from their medical practices and offset the income generated by the partnership against their passive losses.

(ii) For each of the taxpayers, the taxpayer's own medical practice and the services provided by the partnership constitute an appropriate economic unit, but the services provided by the partnership do not separately constitute an appropriate economic unit. Moreover, a principal purpose of treating the medical practices and the partnership's services as separate activities is to circumvent the underlying purposes of section 469. Accordingly, the Commissioner may require the taxpayers to treat their medical practices and their interests in the partnership as a single activity, regardless of whether the separate medical practices are conducted through C corporations subject to section 469, S corporations, partnerships, or sole proprietorships. The Commissioner may assert penalties under section 6662 against the taxpayers in appropriate circumstances.

(g) *Treatment of partial dispositions.* A taxpayer may, for the taxable year in which there is a disposition of substantially all of an activity, treat the part disposed of as a separate activity, but only if the taxpayer can establish with reasonable certainty—

(1) The amount of deductions and credits allocable to that part of the activity for the taxable year under § 1.469–1(f)(4) (relating to carryover of disallowed deductions and credits); and

(2) The amount of gross income and of any other deductions and credits allocable to that part of the activity for the taxable year.

(h) *Rules for grouping rental real estate activities for taxpayers qualifying under section 469(c)(7).* See § 1.469–9 for rules for certain rental real estate activities.

[T.D. 8565, 59 FR 50487, Oct. 4, 1994, as amended by T.D. 8645, 60 FR 66499, Dec. 22, 1995]

§ 1.469–4T Definition of activity (temporary).

(a) *Overview*—(1) *Purpose and effect of overview.* This paragraph (a) contains a general description of the rules contained in this section and is intended solely as an aid to readers. The provisions of this paragraph (a) are not a substitute for the more detailed rules contained in the remainder of this section and cannot be relied upon in cases in which those rules qualify the general description contained in this paragraph (a).

(2) *Scope and structure of § 1.469–4T.* This section provides rules under which a taxpayer's business and rental operations are treated as one or more activities for purposes of section 469 and the regulations thereunder. (See paragraph (b)(2)(ii) of this section for the definition of business and rental operations.) In general, these rules are divided into three groups:

(i) Rules that identify the business and rental operations that constitute an undertaking (the undertaking rules).

(ii) Rules that identify the undertaking or undertakings that constitute an activity (the activity rules).

(iii) Rules that apply only under certain special circumstances (the special rules).

(3) *Undertaking rules*—(i) *In general.* The undertaking is generally the smallest unit that can constitute an activity. (See paragraph (b)(1) of this section for the general rule and paragraph (k)(2)(iii) of this section for a special rule that permits taxpayers to treat a single rental real estate undertaking as multiple activities.) An undertaking may include diverse business and rental operations.

(ii) *Basic undertaking rule.* The basic undertaking rule identifies the business and rental operations that constitute an undertaking by reference to their location and ownership. Under this rule, business and rental operations that are conducted at the same location and are owned by the same person are generally treated as part of the same undertaking. Conversely, business and rental operations generally constitute separate undertakings to the extent that they are conducted at different locations or are not owned by the same person. (See paragraph (c)(2)(i) of this section.)

(iii) *Circumstances in which location is disregarded.* In some circumstances, the undertaking in which business and rental operations are included does not depend on the location at which the operations are conducted. Operations that are not conducted at any fixed place of business or that are conducted at the customer's place of business are treated as part of the undertaking with which the operations are most closely associated (see paragraph (c)(2)(iii)(C) of this section). In addition, operations that are conducted at a location but do not relate to the production of property at that location or to the transaction of business with customers at that location are treated, in effect, as part of the undertaking or undertakings that the operations support (see paragraph (c)(2)(ii) of this section).

(iv) *Rental undertakings.* The basic undertaking rule is also modified if the undertaking determined under that rule includes both rental and nonrental operations. In such cases, the rental operations and the nonrental operations generally must be treated as separate undertakings (see paragraph (d)(1) of this section). This rule does not apply if more than 80 percent of the income of the undertaking determined under the basic rule is attributable to one class of operations (*i.e.*, rental or nonrental) or if the rental operations would not be treated as part of a rental activity because of the exceptions contained in § 1.469–1T(e)(3)(ii) (see paragraph (d)(2) of this section). In applying the rental undertaking rules, short-term rentals of real property (*e.g.*, hotel-room rentals) are generally treated as nonrental operations (see paragraph (d)(3)(ii) of this section).

(v) *Oil and gas wells.* Another exception to the basic undertaking rule treats oil and gas wells that are subject to the working-interest exception in § 1.469–1T(e)(4) as separate undertakings (see paragraph (e) of this section).

(4) *Activity rules*—(i) *In general.* The basic activity rule treats each undertaking in which a taxpayer owns an interest as a separate activity of the taxpayer (see paragraph (b)(1) of this section). In the case of trade or business undertakings, professional service undertakings, and rental real estate undertakings, additional rules may either require or permit the aggregation of two or more undertakings into a single activity.

(ii) *Aggregation of trade or business undertakings*—(A) *Trade or business undertakings.* Trade or business undertakings include all nonrental undertakings other than oil and gas undertakings described in paragraph (a)(3)(v) of this section and professional service undertakings described in paragraph (a)(4)(iii) of this section (see paragraph (f)(1)(ii) of this section).

(B) *Similar, commonly-controlled undertakings treated as a single activity.* An aggregation rule treats trade or business undertakings that are both similar and controlled by the same interests as part of the same activity. This rule is, however, generally inapplicable to small interests held by passive investors in such undertakings, except to the extent such interests are held through the same passthrough entity. (See paragraph (f)(2) of this section.) Undertakings are similar for purposes of this rule if more than half (by value) of their operations are in the same line of business (as defined in a revenue procedure issued pursuant to paragraph (f)(4)(iv) of this section) or if the undertakings are vertically integrated (see paragraph (f)(4)(iii) of this section). All the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests for purposes of the aggregation rule (see paragraph (j)(1) of this section). If, however, each member of a group of five or fewer persons owns a substantial interest in each of the undertakings, the undertakings may be rebuttably presumed to be controlled by the same interests (see paragraph (j)(2) and (3) of this section).

(C) *Integrated businesses treated as a single activity.* Trade or business undertakings (including undertakings that have been aggregated because of their similarity and common control) are subject to a second aggregation rule. Under this rule undertakings that constitute an integrated business and are controlled by the same interests must be treated as part of the same activity. (See paragraph (g) of this section.)

(iii) *Aggregation of professional service undertakings.* Professional service undertakings are nonrental undertakings that predominantly involve the provision of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting (see paragraph (h)(1)(ii) of this section). In general, professional service undertakings that are either similar, related, or controlled by the same interests must be treated as part of the same activity (see paragraph (h)(2) of this section). The rules for determining whether trade or business undertakings are controlled by the same interests also apply with respect to professional service undertakings. Professional service undertakings are similar, however, if more than 20 percent (by value) of their operations are in the same field, and two professional service undertakings are related if one of the undertakings derives more than 20 percent of its gross income from persons who are customers of the other undertaking (see paragraph (h)(3) of this section).

(iv) *Rules for rental real estate*—(A) *Taxpayers permitted to determine rental real estate activities.* The rules for aggregating rental real estate undertakings are generally elective. They permit taxpayers to treat any combination of rental real estate undertakings as a single activity. Taxpayers may also divide their rental real estate undertakings and then treat portions of the undertakings as separate activities or recombine the portions into activities that include parts of different undertakings. (See paragraph (k)(2) (i) and (iii) of this section.)

(B) *Limitations on fragmentation and aggregation of rental real estate.* Taxpayers may not fragment their rental real estate in a manner that is inconsistent with their treatment of such property in prior taxable years or with the treatment of such property by the passthrough entity through which it is held (see paragraph (k) (2)(ii) and (3) of this section). There are no comparable limitations on the aggregation of rental real estate into a single activity. If however, the income or gain from a rental real estate undertaking is subject to recharacterization under § 1.469–2T(f)(3) (relating to the rental of nondepreciable property), a coordination rule provides that the undertaking must be treated as a separate activity (see paragraph (k)(6) of this section.)

(v) *Election to treat nonrental undertakings as separate activities.* Another elective rule permits taxpayers to treat a nonrental undertaking as a separate activity even if the undertaking would be treated as part of a larger activity under the aggregation rules applicable to the undertaking (see paragraph (o)(2) of this section). This elective rule is limited by consistency requirements similar to those that apply to rental real estate operations (see paragraph (o) (3) and (4) of this section). Moreover, in cases in which a taxpayer elects to treat a nonrental undertaking as a separate activity, the taxpayer's level of participation (*i.e.,* material, significant, or otherwise) in the separate activity is the same as the taxpayer's level of participation in the larger activity in which the undertaking would be included but for the election (see paragraph (o)(6) of this section).

(5) *Special rules*—(i) *Consolidated groups and publicly traded partnerships.* Special rules apply to the business and rental operations of consolidated groups of corporations and publicly traded partnerships. Under these rules, a consolidated group is treated as one taxpayer in determining its activities and those of its members (see paragraph (m) of this section), and business and rental operations owned through a publicly traded partnership cannot be aggregated with operations that are not owned through the partnership (see paragraph (n) of this section).

(ii) *Transitional rule.* A special rule applies for taxable years ending before August 10, 1989. In those years, taxpayers may organize business and rental operations into activities under any reasonable method (see paragraph (p)(1) of this section). A taxpayer will also be permitted to use any reasonable method to allocate disallowed deductions and credits among activities for the first taxable year in which the taxpayer's activities are determined under the general rules of § 1.469–4T (see paragraph (p)(3) of this section).

(b) *General rule and definitions of general application*—(1) *General rule.* Except as otherwise provided in this section, each undertaking in which a taxpayer owns an interest shall be treated as a separate activity of the taxpayer. See paragraphs (f), (g), and (h) of this section for rules requiring certain nonrental undertakings to be treated as part of the same activity and paragraph (k) of this section for rules identifying the rental real estate undertakings (or portions thereof) that are included in an activity.

(2) *Definitions of general application*. The following definitions set forth the meaning of certain terms for purposes of this section:

(i) *Passthrough entity.* The term ''passthrough entity'' means a partnership, S corporation, estate, or trust.

(ii) *Business and rental operations*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, the term ‘‘business and rental operations’’ means all endeavors that are engaged in for profit or the production of income and satisfy one or more of the following conditions for the taxable year:

(*1*) Such endeavors involve the conduct of a trade or business (within the meaning of section 162) or are conducted in anticipation of such endeavors becoming a trade or business;

(*2*) Such endeavors involve making tangible property available for use by customers; or

(*3*) Research or experimental expenditures paid or incurred with respect to such endeavors are deductible under section 174 (or would be deductible if the taxpayer adopted the method described in section 174(a)).

(B) *Operations conducted through non-passthrough entities.* For purposes of applying section 469 and the regulations thereunder, a taxpayer's activities do not include operations that a taxpayer conducts through one or more entities (other than passthrough entities). The following example illustrates the operation of this paragraph (b)(2)(ii)(B):

Example. (i) A, an individual, owns stock of X, a closely held corporation (within the meaning of §1.469–1T(g)(2)(ii) that is directly engaged in the conduct of a real estate development business. A participates in X's real estate development business, but does not own any interest in the business other than through ownership of the stock of X.

(ii) X is subject to section 469 (see §1.469–1T(b)(5)) and does not hold the real estate development business through another entity. Accordingly, for purposes of section 469 and the regulations thereunder, the operations of X's real estate development business are treated as part of X's activities.

(iii) A is also subject to section 469 (see §1.469–1T(b)(1)), but A's only interest in the real estate development business is held through X. X is a C corporation and therefore is not a passthrough entity. Thus, for purposes of section 469 and the regulations thereunder, A's activities do not include the operations of X's real estate development business. Accordingly, A's participation in X's busines is not participation in an activity of A, and is not taken into account in determining whether A materially participates (within the meaning of §1.469–5T) or significantly participates (within the meaning of §1.469–1T(c)(2)) in any activity. (See, however, §1.469–1T(g)(3) for rules under which a shareholder's participation is taken into account for purposes of determining whether a corporation materially or significantly participates in an activity.

(c) *Undertaking*—(1) *In general.* Except as otherwise provided in paragraphs (d), (e), and (k)(2)(iii) of this section, business and rental operations that constitute a separate source of income production shall be treated as a single undertaking that is separate from other undertakings.

(2) *Operations treated as a separate source of income production*—(i) *In general.* Except as otherwise provided in this paragraph (c)(2), business and rental operations shall be treated for purposes of this paragraph (c) as a separate source of income production if and only if—

(A) Such operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section); and

(B) Income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) owned by such person are conducted at such location.

(ii) *Treatment of support operations*—(A) *In general.* For purposes of section 469 and the regulations thereunder—

(*1*) The support operations conducted at a location shall not be treated as part of an undertaking under paragraph (c)(2)(i) of this section; and

(*2*) The income and expenses that are attributable to such operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity or activities that include such undertaking.

(B) *Support operations.* For purposes of this paragraph (c)(2), the business and rental operations conducted at a location are treated as support operations to the extent that—

(*1*) Such operations and an undertaking that is conducted at a different location are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section);

(*2*) Such operations involve the provision of property or services to such undertaking; and

(*3*) Such operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section).

(iii) *Location.* For purposes of this paragraph (c)(2)—

(A) The term ''location'' means, with respect to any business and rental operations, a fixed place of business at which such operations are regularly conducted;

(B) Business and rental operations are conducted at the same location if they are conducted in the same physical structure or within close proximity of one another;

(C) Business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises shall be treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated;

(D) All the facts and circumstances (including, in particular, the factors listed in paragraph (c)(3) of this section) are taken into account in determining the location with which business and rental operations are most closely associated; and

(E) Oil and gas operations that are conducted for the development of a common reservoir are conducted within close proximity of one another.

(iv) *Income-producing operations.* For purposes of this paragraph (c)(2), the term ''income-producing operations'' means business and rental operations that are conducted at a location and relate to (or are conducted in reasonable anticipation of)—

(A) The production of property at such location;

(B) The sale of property to customers at such location;

(C) The performance of services for customers at such location;

(D) Transactions in which customers take physical possession at such location of property that is made available for their use; or

(E) Any other transactions that involve the presence of customers at such location.

(v) *Ownership by the same person.* For purposes of this paragraph (c)(2), business and rental operations are owned by the same person if and only if one person (within the meaning of section 7701(a)(1)) is the direct owner of such operations.

(3) *Facts and circumstances determinations.* In determining whether a location is the location with which business and rental operations are most closely associated for purposes of paragraph (c)(2)(iii)(D) of this section, the following relationships between operations that are conducted at such location and other operations are generally the most significant:

(i) The extent to which other persons conduct similar operations at one location;

(ii) Whether such operations are treated as a unit in the primary accounting records reflecting the results of such operations;

(iii) The extent to which other persons treat similar operations as a unit in the primary accounting records reflecting the results of such similar operations;

(iv) The extent to which such operations involve products or services that are commonly provided together;

(v) The extent to which such operations serve the same customers;

(vi) The extent to which the same personnel, facilities, or equipment are used to conduct such operations;

(vii) The extent to which such operations are conducted in coordination with or reliance upon each other;

(viii) The extent to which the conduct of any such operations is incidental to the conduct of the remainder of such operations;

(ix) The extent to which such operations depend on each other for their economic success; and

(x) Whether such operations are conducted under the same trade name.

(4) *Examples.* The following examples illustrate the application of this paragraph (c). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusion relate to a single taxable year.

Example (1). The taxpayer is the sole owner of a department store and a restaurant and conducts both businesses in the same building. Thus, the department store and restaurant operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, property is sold to customers and services are performed for customers on the premises of the department store). Accordingly, the department store and restaurant operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

Example (2). (i) The facts are the same as in example (1), except that the taxpayer is also the sole owner of an automotive center that services automobiles and sells tires, batteries, motor oil, and accessories. The taxpayer operates the automotive center in a separate structure in the shopping mall in which the department store is located. Although the automotive center operations and the department store and restaurant operations are not conducted in the same physical structure, they are conducted within close proximity (within the meaning of paragraph (c)(2)(iii)(B) of this section) of one another. Thus, the department store, restaurant, and automotive center operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section).

(ii) As in example (1), the operations conducted at the same location are owned by the same person, and the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location. Accordingly, the department store, restaurant, and automotive center operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

Example (3). (i) The facts are the same as in example (2), except that the automotive center is located several blocks from the shopping mall. As in example (1), the department store and restaurant operations are treating as a single undertaking that is separate from other undertakings. Because, however, the automotive center operations are not conducted within close proximity (within the meaning of paragraph (c)(2)(iii)(B) of this section) of the department store and restaurant operations, all of the taxpayer's operations are not conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section).

(ii) All of the automotive center operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, property is sold to customers and services are performed for customers on the premises of the automotive center). Accordingly, the automotive center operations are also treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (g) of this section for rules under which certain trade or business activities are treated as a single activity.

Example (4). The taxpayer is the sole owner of a building and rents residential, office, and retail space in the building to various tenants. The taxpayer manages these rental operations from an office located in the building. The rental operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, customers take physical possession in the building of property made available for their use). Accordingly, the rental operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See paragraph (d) of this section for rules for determining whether this undertaking is a rental undertaking and paragraph (k) of this section for rules for identifying rental real estate activities.

Example (5). (i) The facts are the same as in example (4), except that the taxpayer also uses the rental office in the building (''Building #1'') to manage rental operations in another building (''Building #2'') that the taxpayer owns. The rental operations conducted in Building #2 are treated as a separate source of income production under paragraph (c)(2) of this section and as a single undertaking that is separate from other undertakings (the ''Building #2 undertaking'') under paragraph (c)(1) of this section.

(ii) The operations conducted at the rental office in Building #1 and the Building #2 undertaking are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the operations conducted at the rental office with respect to the Building #2 undertaking relate to transactions in which customers take physical possession at another location of property that is made available for their use (*i.e.*, the operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section)). Thus, to the extent the operations conducted at the rental office involve the management of the Building #2 undertaking, they are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to the Building #2 undertaking.

(iii) Paragraph (c)(2)(ii)(A)(*1*) of this section provides that support operations are not treated as part of an undertaking under paragraph (c)(2)(i) of this section. Therefore, the support operations conducted at the rental office are not treated as part of the undertaking that consists of the rental operations conducted in Building #1 (the ‘‘Building #1 undertaking’’). Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses that are attributable to support operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity that includes such undertaking. Accordingly, the income and expenses of the rental office that are reasonably allocable to the Building #2 undertaking are taken into account in determining the income or loss from the activity or activities that include the Building #2 undertaking. See paragraph (k) of this section for rules for identifying rental real estate activities.

(iv) Rental office operations that involve the management of rental operations conducted in Building #1 are not support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) because they relate to an undertaking that is conducted at the same location (the ‘‘Building #1 undertaking’’). Thus, the rules for support operations in paragraph (c)(2)(ii)(A) of this section do not apply to such operations, and they are treated as part of the Building #1 undertaking.

Example (6). (i) The taxpayer conducts business and rental operations at eleven different locations (within the meaning of paragraph (c)(2)(iii) of this section). At ten of the locations the taxpayer owns grocery stores, and at the eleventh location the taxpayer owns a warehouse that receives goods and supplies them to the taxpayer’s stores. The operations of each store are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at each location (*i.e.*, property is sold to customers on the store premises, and customers take physical possession on the store premises of property made available for their use). Accordingly, the operations of each of the ten grocery stores are treated as a separate source of income production (see paragraph (c)(2) of this section), and each store is treated as a single undertaking (a ‘‘grocery store undertaking’’) that is separate from other undertakings (see paragraph (c)(1) of this section). The operations conducted at the warehouse, however, do not include any income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section). Accordingly, the warehouse operations do not satisfy the requirements of paragraph (c)(2)(i) of this section and are not treated as a separate undertaking under paragraph (c)(1) of this section.

(ii) The warehouse operations and the grocery store undertakings are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations), the operations conducted at the warehouse involve the provision of property to the grocery store undertakings, and the warehouse operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section). Thus, the warehouse operations are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to the grocery store undertakings. Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses that are attributable to support operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity or activities that include such undertaking. Accordingly, the income and expenses of the warehouse operations that are reasonably allocable to a grocery store undertaking are taken into account in determining the income or loss from the activity or activities that include such undertaking. See paragraph (f) of this section for rules under which certain similar, commonly-controlled undertakings are treated as a single activity.

Example (7). (i) The facts are the same as in example (6), except that the warehouse operations also include the sale of goods to grocery stores that the taxpayer does not own (‘‘other grocery stores’’). Because of these sales, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the warehouse. The warehouse operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). Accordingly, prior to the application of the rules for support operations in paragraph (c)(2)(ii) of this section, the warehouse operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking (the ‘‘separate warehouse undertaking’’) that is separate from other undertakings (see paragraph (c)(1) of this section).

(ii) As in example (6), the warehouse operations that involve supplying goods to the taxpayer’s grocery store undertakings are support operations with respect to those undertakings. Therefore, those operations are not treated as part of the separate warehouse undertaking (see paragraph (c)(2)(ii)(A)(*1*) of this section), and the income and expenses of such operations are taken into account, as in example (6), in determining the income or loss from the activity or activities that include the taxpayer's grocery store undertakings.

Example (8). (i) A partnership is formed to acquire real property and construct a building on the property. The partnership hires brokers to locate a suitable parcel of land, lawyers to negotiate zoning variances, easements, and building permits, and architects and engineers to design the improvements. After the architects and engineers have designed the improvements and other preliminaries have been completed, the partnership hires a general contractor who hires subcontractors and oversees construction. During the construction process and after construction has been completed, the partnership leases out space in the building. The partnership then operates the building as a rental property. The operations of acquiring the real property, negotiating contracts, overseeing the designing and construction of the improvements, leasing up the building, and operating the building are conducted at an office (the ''management office'') that is not at the same location (within the meaning of paragraph (c)(2)(iii) of this section) as the building.

(ii) The operations conducted at the building site (*e.g.*, excavating the land, pouring the concrete for the foundation, erecting the frame of the building, completing the exterior of the building, and building out the interior of the building) are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the partnership is the direct owner of the operations). In addition, the partnership conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, during the construction period property (the building) is produced at the building site, and during the rental period customers take physical possession in the building of property made available for their use). Accordingly, the operations conducted at the building site are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

(iii) The operations conducted at the management office and the undertaking conducted at the building site are owned by the same person (*i.e.*, the partnership is the direct owner of the operations). In addition, the operations conducted at the management office relate to transactions in which customers take physical possession at another location of property that is made available for their use (*i.e.*, the operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section)). Thus, to the extent the operations conducted at the management office involve the provision of services to the undertaking conducted at the building site, they are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to such undertaking.

(iv) Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses of support operations that are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity that includes such undertaking. Accordingly, the income and expenses of the management office that are reasonably allocable to the undertaking conducted at the building site are taken into account in determining the income or loss from the activity or activities that include such undertaking.

(v) Until the building is first held out for rent and is in a state of readiness for rental, the undertaking conducted at the building site is a trade or business undertaking (within the meaning of paragraph (f)(1)(ii) of this section). See paragraph (d) of this section for rules for determining whether the undertaking is a rental undertaking for periods after the building is first held out for rent and is in a state of readiness for rental and paragraph (k) of this section for rules for identifying rental real estate activities.

Example (9). The taxpayer owns 15 oil wells pursuant to a single working interest (within the meaning of § 1.469–1T (e)(4)(iv). All of the wells are drilled and operated for the development of a common reservoir. Thus, all of the wells are at the same location (see paragraph (c)(2)(iii)(E) of this section). All of the wells are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations), and the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, oil wells are drilled in reasonable anticipation of producing oil at the location). Accordingly, the operations of the wells are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See paragraph (e) of this section for rules under which certain oil and gas operations are treated as multiple undertakings even if they would be part of the same undertaking under the rules of this paragraph (c).

Example (10). (i) Partnership X owns an automobile dealership and partnership Y owns an automobile repair shop. The dealership and repair shop operations are conducted in the same physical structure. Individuals A, B, and C are the only partners in partnerships X and Y, and each of the partners owns a one-third interest in both partnerships.

(ii) The dealership operations and the repair-shop operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section), but are owned by different persons (*i.e.,* X is the direct owner of the dealership operations, and Y is the direct owner of the repair-shop operations). Moreover, indirect ownership of the operations is not taken into account under paragraph (c)(2)(v) of this section. Thus, it is irrelevant that the two partnerships are owned by the same persons in identical proportions. Accordingly, the dealership and repair-shop operations are not treated as part of the same source of income production (see paragraph (c)(2) of this section) or as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (g) of this section for rules under which certain trade or business activities are treated as a single activity.

Example (11). (i) The taxpayer owns and operates a delivery service. The business consists of a central office, retail establishments, and messengers who transport packages from one place to another. Customers may bring their packages to a retail establishment for delivery elsewhere or, by calling the central office, may have packages picked up at their homes or offices. The central office dispatches messengers and coordinates all pickups and deliveries. Customers may pay for deliveries when they drop off or pick up packages at a retail establishment, or the central office will bill the customer for services rendered. In addition, many packages are routed through the central office.

(ii) The operations conducted at the central office are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.,* the taxpayer is the direct owner of the operations). The operations actually conducted at the central office, however, do not include any income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section).

(iii) Under paragraph (c)(2)(iii) (C) and (D) of this section, business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises are treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated, and all the facts and circumstances are taken into account in determining the location with which business and rental operations are most closely associated. The facts and circumstances in this case (including the facts that the central office dispatches messengers, coordinates all pickups and deliveries, and is the transshipment point for many packages) establish that the operations of delivering packages from one location to another are most closely associated with the central office. Thus, the delivery operations are treated as operations that are conducted at the central office, and the deliveries are treated as income-producing operations (*i.e.,* the performance of services for customers) that the taxpayer conducts at the central office. Accordingly, the operations conducted at the central office are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

(iv) The operations conducted at each retail establishment are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.,* the taxpayer is the direct owner of the operations). At each retail establishment, the taxpayer's operations include transactions that involve the presence of customers at the establishment. Thus, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv)(E) of this section) at the retail establishments. Accordingly, the operations of each retail establishment are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (f) of this section for rules under which certain similar, commonly-controlled undertakings are treated as a single activity.

Example (12). (i) The taxpayer is the sole owner of a saw mill and a lumber yard. The taxpayer's business operations consist of converting timber into lumber and other wood products and selling the resulting products. The timber is processed at the saw mill, and the resulting products are transported to the lumber yard where they are sold. The saw mill and the lumber yard are at different locations (within the meaning of paragraph (c)(2)(iii) of this section). The transportation operations are managed at the saw mill.

(ii) The operations conducted at the saw mill are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.,* the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.,* lumber is produced at the mill). Similarly, the selling operations at the lumber yard are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.,* the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, lumber is sold to customers at the lumber yard). Thus, the milling operations and the selling operations are treated as separate sources of income production (see paragraph (c)(2) of this section) and as separate undertakings (see paragraph (c)(1) of this section).

(iii) The operations conducted at the mill involve the provision of property to the lumber-yard undertaking. Nonetheless, the milling operations are income-producing operations because they relate to the production of property at the mill, and an undertaking's income-producing operations are not treated as support operations (see paragraph (c)(2)(ii)(B)(*3*) of this section). Accordingly, the milling operations are not support operations with respect to the lumber-yard undertaking. See, however, paragraph (f) of this section for rules under which certain vertically-integrated undertakings are treated as part of the same activity.

(iv) The operations of transporting finished products from the saw mill to the lumber yard are not conducted at a fixed location. Under paragraphs (c)(2)(iii) (C) and (D) of this section, business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises are treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated, and all the facts and circumstances are taken into account in determining the location with which business and rental operations are most closely associated. The facts and circumstances in this case (including the fact that the transportation operations are managed at the saw mill) establish that the transportation operations are most closely associated with the saw mill. Thus, the transportation operations are treated as operations that are conducted at the mill and as part of the undertaking that consists of the milling operations.

(d) *Rental undertaking*—(1) *In general.* This paragraph (d) applies to operations that are treated, under paragraph (c) of this section and before the application of paragraph (d)(1)(i) of this section, as a single undertaking that is separate from other undertakings (a ''paragraph (c) undertaking''). For purposes of this section—

(i) A paragraph (c) undertaking's rental operations and its operations other than rental operations shall be treated, except as otherwise provided in paragraph (d)(2) of this section, as two separate undertakings;

(ii) The income and expenses that are reasonably allocable to an undertaking (determined after the application of paragraph (d)(1)(i) of this section) shall be taken into account in determining the income or loss from the activity or activities that include such undertaking; and

(iii) An undertaking (determined after the application of paragraph (d)(1)(i) of this section) shall be treated as a rental undertaking if and only if such undertaking, considered as a separate activity, would constitute a rental activity (within the meaning of § 1.469–1T(e)(3)).

(2) *Exceptions.* Paragraph (d)(1)(i) of this section shall not apply to a paragraph (c) undertaking for any taxable year in which—

(i) The rental operations of the paragraph (c) undertaking, considered as a separate activity, would not constitute a rental activity (within the meaning of § 1.469–1T(e)(3));

(ii) Less than 20 percent of the gross income of the paragraph (c) undertaking is attributable to rental operations; or

(iii) Less than 20 percent of the gross income of the paragraph (c) undertaking is attributable to operations other than rental operations.

(3) *Rental operations.* For purposes of this paragraph (d), a paragraph (c) undertaking's rental operations are determined under the following rules:

(i) *General rule.* Except as otherwise provided in paragraph (d)(3) (ii) or (iii) of this section, a paragraph (c) undertaking's rental operations are all of the undertaking's business and rental operations that involve making tangible property available for use by customers and the provision of property and services in connection therewith.

(ii) *Real property provided for short-term use.* A paragraph (c) undertaking's operations that involve making short-term real property available for use by customers and the provision of property and services in connection therewith shall not be treated as rental operations if such operations, considered as a separate activity, would not constitute a rental activity. An item of property is treated as short-term real property for this purpose if and only if such item is real property that the paragraph (c) undertaking makes available for use by customers and the average period of customer use (within the meaning of § 1.469–1T(e)(3)(iii)) for all of the paragraph (c) undertaking's real property of the same type as such item is 30 days or less.

(iii) *Property made available to licensees.* A paragraph (c) undertaking's operations that involve making tangible property available during defined business hours for nonexclusive use by various customers shall not be treated as rental operations. (See § 1.469–1T(e)(3)(ii)(E).)

(4) *Examples.* The following examples illustrate the application of this paragraph (d). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusions relate to a single taxable year.

Example (1) . (i) The taxpayer owns a building in which the taxpayer rents office space to tenants and operates a parking garage that is used by tenants and other persons. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The taxpayer's tenants typically occupy an office for at least one year, and the services provided to tenants are those customarily provided in office buildings. Some persons (including tenants) rent spaces in the parking garage on a monthly or annual basis. In general, however, spaces are rented on an hourly or daily basis, and the average period for which all customers (including tenants) use the parking garage is less than 24 hours. The paragraph (c) undertaking derives 75 percent of its gross income from office-space rentals and 25 percent of its gross income from the parking garage. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of § 1.469–1T(e)(3)(vi)).

(ii) The parking spaces are real property and the average period of customer use (within the meaning of § 1.469–1T(e)(3)(iii)) for the parking spaces is 30 days or less. Thus, the parking spaces are short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section). (For this purpose, individual parking spaces that are rented on a monthly or annual basis are, nevertheless, short-term real properties because all the parking spaces are property of the same type, and the average rental period taking all parking spaces into account is 30 days or less.) In addition, the parking-garage operations involve making short-term real properties available for use by customers and the provision of property and services in connection therewith.

(iii) Paragraph (d)(3) (i) and (ii) of this section provides, in effect, that a paragraph (c) undertaking's operations that involve making short-term real properties available for use by customers and the provision of property and services in connection therewith are treated as rental operations if and only if the operations, considered as a separate activity, would constitute a rental activity (within the meaning of § 1.469–1T(e)(3)). In this case, the parking-garage operations, if considered as a separate activity, would not constitute a rental activity because the average period of customer use for the parking spaces is seven days or less (see § 1.469–1T(e)(3)(ii)(A)). Accordingly, the parking-garage operations are not treated as rental operations.

(iv) The paragraph (c) undertaking's remaining operations involve the provision of tangible property (the office spaces) for use by customers and the provision of property and services in connection therewith. The average period of customer use for the office spaces exceeds 30 days. Thus, the office spaces are not short-term real properties, and the undertaking's operations involving the rental of office spaces are rental operations.

(v) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, at least 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the office-space operations) and at least 20 percent is attributable to operations other than rental operations (the parking-garage operations). Thus, the exceptions in paragraph (d)(2) (ii) and (iii) of this section do not apply. In addition, the average period of customer use for the office spaces exceeds 30 days, extraordinary personal services (within the meaning of § 1.469–1T(e)(3)(v)) are not provided, and the rental of the office spaces is not treated as incidental to a nonrental activity under § 1.469–1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the rental operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)(2)(i) of this section does not apply. Accordingly, the rental operations and the parking-garage operations are treated as two separate undertakings (the ''office-space undertaking'' and the ''parking-garage undertaking'').

(vi) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the office-space undertaking, if considered as a separate activity, would constitute a rental activity (see (v) above), and the parking-garage undertaking, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Accordingly, the office-space undertaking is treated as a rental undertaking, and the parking-garage undertaking is not.

Example (2). (i) The taxpayer owns a building in which the taxpayer rents apartments to tenants and operates a restaurant. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The taxpayer's tenants typically occupy an apartment for at least one year, and the services provided to tenants are those customarily provided in residential apartment buildings. The paragraph (c) undertaking derives 85 percent of its gross income from apartment rentals and 15 percent of its gross income from the restaurant. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469–1T(e)(3)(vi)).

(ii) The operations with respect to apartments (the ‘‘apartment operations’’) involve the provision of tangible property (the apartments) for use by customers and the provision of property and services in connection therewith. In addition, the apartments are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469–1T(e)(3)(iii)) for the apartments exceeds 30 days. Accordingly, the apartment operations are rental operations (within the meaning of paragraph (d)(3) of this section). The restaurant operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the restaurant operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(iii) of this section applies because less than 20 percent of the paragraph (c) undertaking's gross income is attributable to operations other than rental operations (the restaurant operations). Accordingly, the rental operations and the restaurant operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the apartment operations and the restaurant operations, and the gross income of this undertaking represents amounts paid principally for the use of tangible property (the apartments). Moreover, the average period of customer use for the apartments exceeds 30 days, extraordinary personal services (within the meaning of §1.469–1T(e)(3)(v)) are not provided, and the rental of the apartments is not treated as incidental to a nonrental activity under §1.469–1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the undertaking, if considered as a separate activity, would constitute a rental activity. Accordingly, the undertaking is treated as a rental undertaking.

Example (3). (i) The taxpayer owns a building in which the taxpayer rents hotel rooms, meeting rooms, and parking spaces to customers, rents space to various retailers, and operates a restaurant and health club. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) Although some customers occupy hotel rooms for extended periods (including some customers who reside in the hotel), customers use hotel rooms for an average period of two days and meeting rooms for an average period of one day. The services provided to persons using the hotel rooms and meeting rooms are those customarily provided in hotels (including wake-up calls, valet services, and delivery of food and beverages to rooms). Some customers rent spaces in the parking garage on a monthly or annual basis. In general, however, parking spaces are rented on an hourly or daily basis, and the average period for which customers use the parking garage is less than 24 hours. Retail tenants typically occupy their space for at least one year, and the services provided to retail tenants are those customarily provided in commercial buildings. The paragraph (c) undertaking derives 45 percent of its gross income from renting hotel rooms, meeting rooms, and parking spaces, 35 percent of its gross income from renting retail space, and 20 percent of its gross income from the restaurant and health club. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469–1T(e)(3)(vi)).

(ii) The parking spaces, hotel rooms, and meeting rooms are real property of three different types, but the average period of customer use (within the meaning of §1.469–1T (e)(3)(iii)) for property of each type is 30 days or less. Thus, the parking spaces, hotel rooms, and meeting rooms are short-term real properties. (For this purpose, individual parking spaces or hotel rooms that are rented for extended periods are, nevertheless, short-term real properties if the average rental period for all parking spaces is 30 days or less and the average rental period for all hotel rooms is 30 days or less.) In addition, the parking garage operations, the operations with respect to hotel rooms (the ''hotel-room operations''), and the operations with respect to meeting rooms (the ''meeting-room operations'') involve making short-term real properties available for use by customers and the provision of property and services in connection therewith.

(iii) Paragraph (d)(3) (i) and (ii) of this section provides, in effect, that a paragraph (c) undertaking's operations that involve making short-term real properties available for use by customers and the provision of property and services in connection therewith are treated as rental operations if and only if the operations, considered as a separate activity, would constitute a rental activity (within the meaning of § 1.469–1T (e)(3)). In this case the parking-garage, hotel-room and meeting-room operations, if considered as separate activities, would not constitute rental activities because the average period of customer use for parking spaces, hotel rooms, and meeting rooms does not exceed seven days (see § 1.469–1T (e)(3)(ii)(A)). Accordingly, the parking-garage, hotel-room, and meeting-room operations are not treated as rental operations.

(iv) The operations with respect to retail space in the building (the ''retail-space operations'') involve the provision of tangible property (the retail spaces) for use by customers and the provision of property and services in connection therewith. In addition, the retail spaces are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of § 1.469–1T (e)(3)(iii)) for the retail spaces exceeds 30 days. Accordingly, the retail-space operations are rental operations.

(v) The health-club operations involve making tangible property available for use by customers, but the property is customarily made available during defined business hours for nonexclusive use by various customers. Accordingly, the health-club operations are not rental operations (see paragraph (d)(3)(iii) of this seciton). The restaurant operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Accordingly, the restaurant operations also are not rental operations.

(vi) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, at least 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (35 percent of the paragraph (c) undertaking's gross income is from the retail-space operations) and at least 20 percent is attributable to operations other than rental operations (45 percent from the hotel-room, meeting-room and parking-garage operations and 20 percent from the restaurant and health-club operations). Thus, the exceptions in paragraph (d)(2) (ii) and (iii) of this section do not apply. In addition, the average period of customer use for the retail space exceeds 30 days, extraordinary personal services (within the meaning of § 1.469–1T (e)(3)(v)) are not provided, and the rental of the retail space is not treated as incidental to a nonrental activity under § 1.469–1T (e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the retail-space operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)(2)(i) of this section does not apply. Accordingly, the retail-space operations are treated as an undertaking (the ''retail-space undertaking'') and all the other operations conducted in the building (*i.e.*, renting hotel and meeting rooms and parking spaces and operating the restaurant and health club) are treated as a separate undertaking (the ''hotel undertaking'').

(vii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the retail-space undertaking, if considered as a separate activity, would constitute a rental activity (see (iv) above). Accordingly, the retail-space undertaking is treated as a rental undertaking. The hotel undertaking, if considered as a separate activity, would not constitute a rental activity because all tangible property provided for the use of customers in the hotel undertaking is either property for which the average period of customer use is seven days or less (see § 1.469–1T (e)(3)(ii)(A)) or property customarily made available during defined business hours for nonexclusive use by various customers (see § 1.469–1T (e)(3)(ii)(E)). Accordingly, the hotel undertaking is not treated as a rental undertaking.

Example (4). (i) A law partnership owns a ten-story building. The partnership uses eight floors of the building in its law practice and leases two floors to one or more tenants. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) Tenants typically occupy space on the two rented floors for at least one year, and the services provided to tenants are those customarily provided in office buildings. The paragraph (c) undertaking derives 90 percent of its gross income from rendering legal services and 10 percent of its gross income from renting space. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469–1T (e)(3)(vi)).

(ii) The operations with respect to the office space leased to tenants (the ‘‘office-space operations’’) involve the provision of tangible property (the office space) for use by customers and the provision of property and services in connection therewith. In addition, the office spaces are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469–1T(e)(3)(iii)) for the office space exceeds 30 days. Accordingly, the office-space operations are rental operations (within the meaning of paragraph (d)(3) of this section).

(iii) The operations that involve the performance of legal services (the ‘‘law-practice operations’’) do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Accordingly, the law-practice operations are not rental operations.

(iv) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking’s rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(ii) of this section applies because less than 20 percent of the paragraph (c) undertaking’s gross income is attributable to rental operations (the office-space operations). Accordingly, the law-practice operations and the office-space operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(v) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the law-practice operations and the office-space operations, and the gross income of this undertaking does not represent amounts paid principally for the use of tangible property. Thus, the undertaking, if considered as a separate activity, would not constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (5). (i) The facts are the same as in example (4), except that the building is owned by a separate partnership (the ‘‘real estate partnership’’), which leases eight floors of the building to the law partnership for use in its law practice and two floors to one or more other tenants. The law partnership and real estate partnership are owned by the same individuals in identical proportions.

(ii) The operations conducted in the building are owned by two different persons (*i.e.*, the law partnership and the real estate partnership). (See paragraph (c)(2)(v) of this section.) Thus, the operations conducted in the building are not treated as a single undertaking under paragraph (c)(1) of this section. Instead, each partnership’s share of such operations is treated as a separate paragraph (c) undertaking (the ‘‘law-practice undertaking’’ and the ‘‘office-space undertaking’’).

(iii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the office-space undertaking, if considered as a separate activity, would constitute a rental activity because all of the undertaking’s gross income (including rents paid by the law partnership) represents amounts paid principally for the use of tangible property (the office space), the average period of customer use for the office space exceeds 30 days, extraordinary personal services (within the meaning of §1.469–1T(e)(3)(v)) are not provided, and the rental of the office space is not treated as incidental to a nonrental activity under §1.469–1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Accordingly, the office-space undertaking is treated as a rental undertaking. See, however, §1.469–2T(f)(6) (relating to certain rentals of property to a trade or business activity in which the taxpayer materially participates).

(iv) The law-practice undertaking, if considered as a separate activity, would not constitute a rental activity because none of the undertaking’s gross income represents amounts paid principally for the use of tangible property. Accordingly, the law-practice undertaking is not treated as a rental undertaking.

Example (6). (i) The taxpayer owns a building in which the taxpayer operates a nursing home and a medical clinic. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The nursing-home operations consist of renting apartments in the nursing home to elderly and handicapped persons and providing medical care, meals, and social activities. (Assume that these services are extraordinary personal services (within the meaning of §1.469–1T(e)(3)(v)). The medical clinic provides medical care to nursing-home residents and other individuals. Nursing-home residents typically occupy an apartment for at least one year. The paragraph (c) undertaking derives 55 percent of its gross income from nursing-home operations (including the provision of medical services to nursing-home residents) and 45 percent of its gross income from medical-clinic operations. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of § 1.469–1T(e)(3)(vi)).

(ii) The paragraph (c) undertaking's nursing-home operations involve the provision of tangible property (the apartments) for use by customers and the provision of property and services in connection therewith. In addition, the apartments are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of § 1.469–1T(e)(3)(iii)) for the apartments exceeds 30 days. Accordingly, the nursing-home operations are rental operations (within the meaning of paragraph (d)(3) of this section). The medical-clinic operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the medical-clinic operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the nursing-home operations, if considered as a separate activity, would not constitute a rental activity because extraordinary personal services are provided in connection with making nursing-home apartments available for use by customers (see § 1.469–T(e)(3)(ii)(C)). Thus, the exception in paragraph (d)(2)(i) of this section applies, and the nursing-home operations and the medical-clinic operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the nursing-home operations, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Thus, an undertaking that includes no rental operations other than the nursing-home operations would not, if considered as a separate activity, constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (7). (i) The taxpayer rents and sells videocassettes. (Assumes that, under paragraph (c)(1) of this section, the videocassette operations are treated as a single paragraph (c) undertaking.) Renters of videocassettes typically keep the videocassettes for one or two days, and do not receive any other property or services in connection with videocassette rentals. The paragraph (c) undertaking derives 70 percent of its gross income from renting videocassettes and 30 percent of its gross income from selling videocassettes. The videocassette operations are not incidental to any other activity of the taxpayer (within the meaning of § 1.469–1T(e)(3)(vi)).

(ii) The rental of videocassettes involves the provision of tangible property (the videocassettes) for use by customers. In addition, the special rules for short-term real properties contained in paragraph (d)(3)(ii) of this section do not apply in this case because the videocassettes are not real property. Thus, the operations that involve videocassette rentals are rental operations (within the meaning of paragraph (d)(3) of this section). The sale of videocassettes does not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the operations that involve videocassette sales are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the rental operations, if considered as a separate activity, would not constitute a rental activity because the average period of customer use for rented videocassettes does not exceed seven days (see § 1.469–1T(e)(3)(ii)(A)). Accordingly, the exception in paragraph (d)(2)(i) of this section applies, and the videocassette-rental operations and videocassette-sales operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the videocassette-rental operations, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Thus, an undertaking that includes no rental operations other than the videocassette-rental operations would not, if considered as a separate activity, constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (8). (i) The taxpayer owns a building in which the taxpayer sells, leases, and services automobiles. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The minimum lease term for any leased automobile is 31 days, and the services provided to lessees (including periodic oil changes, lubrication, and routine services and repairs) are those customarily provided in long-term automobile leases. The paragraph (c) undertaking derives 75 percent of its gross income from selling automobiles, 15 percent of its gross income from servicing automobiles other than leased automobiles, and 10 percent of its gross income from leasing automobiles. The taxpayer's automobile operations are not incidental to any other activity of the taxpayer (within the meaning of §1.469–1T(e)(3)(vi)).

(ii) The paragraph (c) undertaking's automobile-leasing operations involve the provision of tangible property (the automobiles) for use by customers and the provision of services in connection therewith. In addition, the special rules for short-term real properties contained in paragraph (d)(3)(ii) of this section do not apply in this case because the automobiles are not real property. Accordingly, the automobile-leasing operations are rental operations (within the meaning of paragraph (d)(3) of this section). The paragraph (c) undertaking's automobile-sales operations and servicing operations for automobiles other than leased automobiles (the ''selling-and-servicing operations'') do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the selling-and-servicing operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(ii) of this section applies because less than 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the ''automobile-leasing operations''). Accordingly, the rental operations and the selling-and-servicing operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the selling-and-servicing operations and the automobile-leasing operations, and the gross income of the undertaking does not represent amounts paid principally for the use of tangible property. Thus, the undertaking, if considered as a separate activity, would not constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (9). (i) The facts are the same as in example (8), except that the paragraph (c) undertaking derives 60 percent of its gross income from selling automobiles, 15 percent of its gross income from servicing automobiles other than leased automobiles, and 25 percent of its gross income from leasing automobiles.

(ii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, more than 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the automobile-leasing operations), and more than 20 percent is attributable to operations other than rental operations (the selling-and-servicing operations). Thus, the exceptions in paragraph (d)(2) (ii) and (iii) of this section do not apply. In addition, the average period of customer use for leased automobiles exceeds 30 days, extraordinary personal services (within the meaning of §1.469–1T(e)(3)(v)) are not provided, and the leasing of the automobiles is not treated as incidental to a nonrental activity under §1.469–1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the leasing operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)(2)(i) of this section does not apply. Accordingly, the rental operations and the selling-and-servicing operations are treated as two separate undertakings (the ''automobile-leasing undertaking'' and the ''automobile selling-and-servicing undertaking'').

(iii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the automobile-leasing undertaking would, if considered as a separate activity, constitute a rental activity, and the automobile selling-and-servicing undertaking would not, if considered as a separate activity, constitute a rental activity (see example (8) and (ii) above). Accordingly, the automobile-leasing undertaking is treated as a rental undertaking, and the automobile selling-and-servicing undertaking is not.

(e) *Special rules for certain oil and gas operations*—(1) *Wells treated as nonpassive under §1.469–1T(e)(4)(i).* An oil or gas well shall be treated as an undertaking that is separate from other undertakings in determining the activities of a taxpayer for a taxable year if the following conditions are satisfied:

(i) The well is drilled or operated pursuant to a working interest (within the meaning of § 1.469–1T(e)(4)(iv)) and at any time during such taxable year the taxpayer holds such working interest either—

(A) Directly; or

(B) Through an entity that does not limit the liability of the taxpayer with respect to the drilling or operation of such well pursuant to such working interest; and

(ii) The taxpayer would not be treated as materially participating (within the meaning of § 1.469–5T) for the taxable year in the activity in which such well would be included if the taxpayer's activities were determined without regard to this paragraph (e).

(2) *Business and rental operations that constitute an undertaking.* In any case in which an oil or gas well is treated under this paragraph (e) as an undertaking that is separate from other undertakings, the business and rental operations that constitute such undertaking are the business and rental operations that are attributable to such well.

(3) *Examples.* The following examples illustrate the application of this paragraph (e). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example (1). During 1989, A directly owns an undivided interest in a working interest (within the meaning of § 1.469–1T(e)(4)(iv)) in two oil wells. A does not participate in the activity in which the wells would be included if A's activities were determined without regard to this paragraph (e). Under paragraph (e)(1) of this section, each well is treated as a separate undertaking in determining A's activities for 1989 because A holds the working interest directly and would not be treated as materially participating for 1989 in the activity in which the wells would be included if A's activities were determined without regard to this paragraph (e). The aggregation rules in paragraph (f) of this section do not apply to these undertakings (see paragraph (f)(1)(ii)(B) of this section). Thus, each of the undertakings is treated as a separate activity under paragraph (b)(1) of this section. The result is the same even if A has net income from one or both wells for 1989 and even if the wells would otherwise be treated as part of the same undertaking under paragraph (c) of this section. The result would also be the same if A held the working interest through an entity, such as a general partnership, that does not limit A's liability with respect to the drilling or operation of the wells pursuant to the working interest.

Example (2). (i) During 1989, B is a general partner in a partnership that owns a working interest (within the meaning of § 1.469–1T(e)(4)(iv)) in an oil well. B does not own any interest in the well other than through the partnership. At the end of 1989, however, B's partnership interest is converted into a limited partnership interest, and during 1990 B holds the working interest only as a limited partner. B does not participate in the activity in which the well would be included if B's activities were determined without regard to this paragraph (e).

(ii) Under paragraph (e)(1) of this section, the well is treated as a separate undertaking in determining B's activities for 1989 because B holds the working interest during 1989 through an entity that does not limit B's liability with respect to the drilling or operation of the well pursuant to the working interest, and B would not be treated as materially participating for 1989 in the activity in which the well would be included if B's activities were determined without regard to this paragraph (e). Throughout 1990, however, B's liability with respect to the drilling and operation of the well is limited by the entity through which B holds the working interest (*i.e.*, the limited partnership). Accordingly, paragraph (e)(1) of this section does not apply to the well in 1990, and the well may be included under paragraph (c) of this section in an undertaking that includes other operations.

Example (3). The facts are the same as in example (2), except that B's partnership interest is converted into a limited partnership interest at the end of November 1989. An oil or gas well may be treated as a separate undertaking under paragraph (e)(1) of this section if at any time during the taxable year the taxpayer holds a working interest in the well directly or through an entity that does not limit the taxpayer's liability with respect to the drilling or operation of the well pursuant to the working interest (see § 1.469–1T(e)(4)(i)). Thus, although B's liability with respect to the drilling and operation of the well is limited during December 1989, the result in both 1989 and 1990 is the same as in example (2). In 1989, however, disqualified deductions and a ratable portion of the gross income from the well may be treated under § 1.469–1T(e)(4)(ii) as passive activity deductions and passive activity gross income, respectively.

(f) *Certain trade or business undertakings treated as part of the same activity*—(1) *Applicability*—(i) *In general.* This paragraph (f) applies to a taxpayer's interests in trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section).

(ii) *Trade or business undertaking.* For purposes of this paragraph (f), the term ''trade or business undertaking'' means any undertaking in which a taxpayer has an interest, other than—

(A) A rental undertaking (within the meaning of paragraph (d) of this section);

(B) An oil or gas well treated as an undertaking that is separate from other undertakings under paragraph (e) of this section; or

(C) A professional service undertaking (within the meaning of paragraph (h) of this section).

(2) *Treatment as part of the same activity.* A taxpayer's interests in two or more trade or business undertakings that are similar (within the meaning of paragraph (f)(4) of this section) and controlled by the same interests (within the meaning of paragraph (j) of this section) shall be treated as part of the same activity of the taxpayer for any taxable year in which the taxpayer—

(i) Owns interests in each such undertaking through the same passthrough entity;

(ii) Owns a direct or substantial indirect interest (within the meaning of paragraph (f)(3) of this section) in each such undertaking; or

(iii) Materially or significantly participates (within the meaning of § 1.469–5T) in the activity that would result if such undertakings were treated as part of the same activity.

(3) *Substantial indirect interest*—(i) *In general.* For purposes of this paragraph (f), a taxpayer owns a substantial indirect interest in an undertaking for a taxable year if at any time during such taxable year the taxpayer's ownership percentage (determined in accordance with paragraph (j)(3) of this section) in a passthrough entity that directly owns such undertaking exceeds ten percent.

(ii) *Coordination rule.* A taxpayer shall be treated for purposes of this paragraph (f) as owning a substantial indirect interest in each of two or more undertakings for any taxable year in which—

(A) Such undertakings are treated as part of the same activity of the taxpayer under paragraph (f)(2)(i) of this section; and

(B) The taxpayer owns a substantial indirect interest (within the meaning of paragraph (f)(3)(i) of this section) in any such undertaking.

(4) *Similar undertakings*—(i) *In general.* Except as provided in paragraph (f)(4)(iii) of this section, two undertakings are similar for purposes of this paragraph (f) if and only if—

(A) There are predominant operations in each such undertaking; and

(B) The predominant operations of both undertakings are in the same line of business.

(ii) *Predominant operations.* For purposes of paragraph (f)(4)(i)(A) of this section, there are predominant operations in an undertaking if more than 50 percent of the undertaking's gross income is attributable to operations in a single line of business.

(iii) *Vertically-integrated undertakings.* If an undertaking (the ''supplier undertaking'') provides property or services to other undertakings (the ''recipient undertakings''), the following rules apply for purposes of this paragraph (f):

(A) *Supplier undertaking similar to recipient undertaking.* If the supplier undertaking predominantly involves the provision of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the supplier undertaking shall be treated as similar to the recipient undertaking. For purposes of applying the preceding sentence—

(*1*) If a supplier undertaking and two or more recipient undertakings that are similar (within the meaning of paragraph (f)(4)(i) of this section) are controlled by the same interests, such recipient undertakings shall be treated as a single undertaking; and

(*2*) A supplier undertaking predominantly involves the provision of property and services to a recipient undertaking for any taxable year in which such recipient undertaking obtains more than 50 percent (by value) of all property and services provided by the supplier undertaking.

(B) *Recipient undertaking similar to supplier undertaking.* If the supplier undertaking is the predominant provider of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the recipient undertaking shall be treated, except as otherwise provided in paragraph (f)(4)(iii)(C) of this section, as similar to the supplier undertaking. For purposes of the preceding sentence, a supplier undertaking is the predominant provider of property and services to a recipient undertaking for any taxable year in which the supplier undertaking provides more than 50 percent (by value) of all property and services obtained by the recipient undertaking.

(C) *Coordination rules.* (*1*) Paragraph (f)(4)(iii)(B) of this section does not apply if, under paragraph (f)(4)(iii)(A) of this section—

(*i*) The supplier undertaking is treated as an undertaking that is similar to any recipient undertaking;

(*ii*) The recipient undertaking is treated as a supplier undertaking that is similar to another recipient undertaking; or

(*iii*) Another supplier undertaking is treated as an undertaking that is similar to the recipient undertaking.

(*2*) If paragraph (f)(4)(iii)(A) of this section applies to a supplier undertaking, the supplier undertaking shall be treated as similar to undertakings that are similar to the recipient undertaking and shall not otherwise be treated as similar to undertakings to which the supplier undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(*3*) If paragraph (f)(4)(iii)(B) of this section applies to a recipient undertaking, the recipient undertaking shall be treated as similar to undertakings that are similar to the supplier undertaking and shall not otherwise be treated as similar to undertakings to which the recipient undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(iv) *Lines of business.* The Commissioner shall establish, by revenue procedure, lines of business for purposes of this paragraph (f)(4). Business and rental operations that are not included in the lines of business established by the Commissioner shall nonetheless be included in a line of business for purposes of this paragraph (f)(4). Such operations shall be included in a single line of business or in multiple lines of business on a basis that reasonably reflects—

(A) Similarities and differences in the property or services provided pursuant to such operations and in the markets to which such property or services are offered; and

(B) The treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences.

(5) *Examples.* The following examples illustrate the application of this paragraph (f). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) The taxpayer is a partner in partnerships A, B, C, and D and owns a five-percent interest in each partnership. Each partnership owns a single undertaking (undertakings A, B, C, and D), and the undertakings are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that are controlled by the same interests (within the meaning of paragraph (j) of this section). In addition, undertakings A, B, and D are similar (within the meaning of paragraph (f)(4) of this section). The taxpayer is not related to any of the other partners, and does not participate in any of the undertakings.

(ii) In general, each undertaking in which a taxpayer owns an interest is treated as a single activity that is separate from other activities of the taxpayer (see paragraph (b)(1) of this section). This paragraph (f) provides aggregation rules for trade or business undertakings that are similar and controlled by the same interests. These aggregation rules do not apply, however, unless the taxpayer owns interests in the undertakings through the same passthrough entity, owns direct or substantial indirect interests in the undertakings, or materially or significantly participates in the undertakings. In this case, the taxpayer does not satisfy any of these conditions, and the aggregation rules in this paragraph (f) do not apply. Accordingly, except as otherwise provided in paragraph (g) of this section (relating to an aggregation rule for integrated businesses), undertakings A, B, C, and D are treated as separate activities of the taxpayer under paragraph (b)(1) of this section.

Example (2). (i) The facts are the same as in example (1), except that the taxpayer owns a 25-percent interest in partnership A, a 15-percent interest in partnership B, and a 40-percent interest in partnership C.

(ii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the taxpayer owns more than ten percent of partnerships A, B, and C, and these partnerships directly own undertakings A, B, and C. Thus, the taxpayer owns a substantial indirect interest in undertakings A, B, and C (see paragraph (f)(3)(i) of this section). Of these undertakings, only undertakings A and B are both similar and controlled by the same interests. Accordingly, the taxpayer's interests in undertakings A and B are treated as part of the same activity. As in example (1), the aggregation rules in this paragraph (f) do not apply to undertakings C and D, and except as otherwise provided in paragraph (g) of this section, undertakings C and D are treated as separate activities.

Example (3). (i) The facts are the same as in example (1), except that the taxpayer participates (within the meaning of § 1.469–5T(f)) for 60 hours in undertaking A and for 60 hours in undertaking B.

(ii) Paragraph (f)(2)(iii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer materially or significantly participates (within the meaning of § 1.469–5T) in the activity that would result from the treatment of similar, commonly-controlled undertakings as part of the same activity. In this case, the activity that would result from treating the similar, commonly-controlled undertakings as part of the same activity consists of undertakings A, B, and D, and the taxpayer participates for 120 hours in the activity that results from this treatment. Accordingly, undertakings A, B, and D are treated as part of the same activity because the taxpayer significantly participates (within the meaning of § 1.469–5T(c)(2)) in the activity that results from this treatment. The result is the same whether the taxpayer participates in one, two, or all three of the similar, commonly-controlled undertakings, so long as the taxpayer's aggregate participation in undertakings A, B, and D exceeds 100 hours. As in example (1), the aggregation rules in this paragraph (f) do not apply to undertaking C, and except as otherwise provided in paragraph (g) of this section, undertaking C is treated as a separate activity.

Example (4). (i) The taxpayer owns a 5-percent interest in partnership A. Partnership A owns interests in partnerships B and C, each of which owns a single undertaking (undertakings B and C). In addition, the taxpayer is a partner in partnerships C and D and directly owns a 15-percent interest in each partnership. Partnership D also owns a single undertaking (undertaking D). Undertakings B, C, and D are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that are similar (within the meaning of paragraph (f)(4) of this section) and controlled by the same interests (within the meaning of paragraph (j) of this section). The taxpayer does not participate in undertaking B, C, or D.

(ii) Paragraph (f)(2)(i) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns interests in the undertakings through the same passthrough entity. In this case, the taxpayer owns interests in undertakings B and C through partnership A. Thus, the taxpayer's interests in undertakings B and C are treated as part of the same activity.

(iii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the taxpayer owns more than ten percent of partnerships C and D, and these partnerships directly own undertakings C and D. Thus, the taxpayer owns a substantial indirect interest in undertakings C and D (see paragraph (f)(3)(i) of this section).

(iv) The coordination rule in paragraph (f)(3)(ii) of this section applies to undertakings B and C because they are treated as part of the same activity under paragraph (f)(2)(i) of this section, and the taxpayer owns a substantial indirect interest in undertaking C. Under the coordination rule, the taxpayer is treated as owning a substantial indirect interest in undertaking B as well as undertaking C. Accordingly, the taxpayer's interests in undertakings B, C, and D are treated as part of the same activity.

Example (5). (i) Undertakings A, B, C, and D are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section), each of which involves the operation of a department store, restaurants, and movie theaters. The following table shows, for each undertaking, the percentages of gross income attributable to the various operations of the undertaking.

	Department store	Restaurants	Movie Theaters
Undertaking A	70%	20%	10%
Undertaking B	60%	20%	20%
Undertaking C	35%	35%	30%

	Department store	Restaurants	Movie Theaters
Undertaking D	35%	10%	55%

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that ‘‘general merchandise stores,’’ ‘‘eating and drinking places,’’ and ‘‘motion picture services’’ are three separate lines of business.)

(iii) Undertaking A and undertaking B each derives more than 50 percent of its gross income from department-store operations, which are in the general-merchandise-store line of business. Thus, there are predominant operations in undertaking A and undertaking B, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings A and B are similar.

(iv) Undertaking C does not derive more than 50 percent of its gross income from operations in any single line of business. Thus, there are no predominant operations in undertaking C, and undertaking C is not similar to any of the other undertakings.

(v) Undertaking D derives more than 50 percent of its gross income from movie-theater operations, which are in the motion-picture-services line of business. Thus, there are predominant operations in undertaking D. The predominant operations of undertaking D, however, are not in the same line of business as those of undertakings A and B. Accordingly, undertaking D is not similar to undertakings A and B.

Example (6). (i) Undertakings A and B are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that derive all of their gross income from the sale of automobiles. Undertakings C and D derive all of their gross income from the rental of automobiles. Undertaking C is not a rental undertaking (within the meaning of paragraph (d)(1)(iii) of this section) because the average period of customer use (within the meaning of § 1.469–1T(e)(3)(iii)) for its automobiles does not exceed seven days (see § 1.469–1T(e)(3)(ii)(A)). Undertaking D, on the other hand, leases automobiles for periods of one year or more and is a rental undertaking.

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that (a) ‘‘automotive dealers and service stations’’ (automotive retail) and (b) ‘‘auto repair, services (including rentals), and parking’’ (automotive services) are two separate lines of business.)

(iii) Undertakings A and B both derive more than 50 percent of their gross income from operations in the automotive-retail line of business (the automobile-sales operations). Similarly, undertakings C and D both derive more than 50 percent of their gross income from operations in the automotive-services line of business (the automobile-rental operations). Thus, there are predominant operations in each undertaking, the predominant operations of undertakings A and B are in the same line of business, and the predominant operations of undertakings C and D are in the same line of business. Accordingly, undertakings A and B are similar, undertakings C and D are similar, and undertakings A and B are not similar to undertakings C and D.

(iv) Paragraph (f)(1) of this section provides that this paragraph (f) applies only to trade or business undertakings and that a rental undertaking is not a trade or business undertaking. Accordingly, this paragraph (f) does not apply to undertaking D, and undertakings C and D, although similar, are not treated, under this paragraph (f), as part of the same activity.

Example (7). (i) Undertakings A, B, and C are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that involve real estate operations. Undertaking A derives all of its gross income from the development of real property, undertaking B derives all of its gross income from the management of real property and the performance of services as a leasing agent with respect to real property, and undertaking C derives all of its gross income from buying, selling, or arranging purchases and sales of real property. Undertaking D derives all of its gross income from the rental of residential apartments and is a rental undertaking (within the meaning of paragraph (d)(1)(iii) of this section).

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that real estate development and services (including the development and management of real property, dealing in real property, and the performance of services as a leasing agent with respect to real property) is a single line of business (the ‘‘real-estate’’ line of business).)

(iii) Undertakings A, B, and C all derive more than 50 percent of their gross income from operations in the real-estate line of business. Thus, there are predominant operations in undertakings A, B, and C, and the predominant operations of the three undertakings are in the same line of business. Accordingly, undertakings A, B, and C are similar.

(iv) Undertaking D also derives more than 50 percent of its gross income from operations in the real-estate line of business. Thus, there are predominant operations in undertaking D, and the predominant operations of undertaking D are in the same line of business as those of undertakings A, B, and C. Paragraph (f)(1) of this section provides, however, that this paragraph (f) applies only to trade or business undertakings and that a rental undertaking is not a trade or business undertaking. Accordingly, this paragraph (f) does not apply to undertaking D, and undertaking D, although similar to undertakings A, B, and C, is not treated, under this paragraph (f), as part an activity that includes undertaking A, B, or C.

Example (8). (i) Undertakings A and B are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section), both of which involve the provision of moving services. Undertaking A derives its gross income principally from local moves, and undertaking B derives its gross income principally from long-distance moves.

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. Under paragraph (f)(4)(iv) of this section, operations that are not in the lines of business established by the applicable revenue procedure are nonetheless included in a line of business. In addition, such operations are included in a single line of business or in multiple lines of business on a basis that reasonably reflects (a) similarities and differences in the property or services provided pursuant to such operations and in the markets to which such property or services are offered, and (b) the treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences. (Assume that the provision of moving services is not in any line of business established by the Commissioner and that within the lines of business established by the Commissioner services that differ only in the distance over which they are performed (*e.g.*, local and long-distance telephone services) are generally treated as part of the same line of business.)

(iii) Undertakings A and B provide the same types of services to similar customers, and the only significant difference in the services provided is the distance over which they are performed. Thus, treating local and long-distance moving services as a single line of business (the ‘‘moving-services’’ line of business) reasonably reflects the treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences.

(iv) Each undertaking derives more than 50 percent of its gross income from operations in the moving-services line of business. Thus, there are predominant operations in each undertaking, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings A and B are similar.

Example (9). (i) Undertakings A, B, C, D, and E are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Undertakings A, B, and C derive all of their gross income from retail sales of dairy products, and undertakings D and E derive all of their gross income from the processing of dairy products. Undertakings D and E sell less than ten percent of their dairy products to undertakings A, B, and C, and sell the remainder to unrelated undertakings. Undertakings A, B, and C purchase less than ten percent of their inventory from undertakings D and E and purchase the remainder from unrelated undertakings.

(ii) Paragraph (f)(4)(i) of this section provides that, except as provided in paragraph (f)(4)(iii) of this section, undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that (a) ‘‘food stores’’ and (b) ‘‘manufacturing—food and kindred products’’ are two separate lines of business.)

(iii) Undertakings A, B, and C all derive more than 50 percent of their gross income from operations in the food-store line of business (the dairy-sales operations). Thus, there are predominant operations in undertakings A, B, and C, and the predominant operations of the three undertakings are in the same line of business. Accordingly, undertakings A, B, and C are similar.

(iv) Undertakings D and E both derive more than 50 percent of their gross income from operations in the food-manufacturing line of business (the dairy-processing operations). Thus, there are predominant operations in undertakings D and E, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings D and E are similar. The predominant operations of undertakings D and E are not in the same line of business as those of undertakings A, B, and C. Accordingly, undertakings D and E are not similar to undertakings A, B, and C.

(v) Paragraph (f)(4)(iii) of this section provides rules under which certain undertakings whose operations are not in the same line of business nevertheless are similar to one another if one of the undertakings (the ''supplier undertaking'') provides property or services to the other undertaking (the ''recipient undertaking''), and the undertakings are controlled by the same interests. These rules apply, however, only if the supplier undertaking predominantly involves the provision of property and services to the recipient undertaking (see paragraph (f)(4)(iii)(A) of this section), or the supplier undertaking is the predominant provider of property and services to the recipient undertaking (see paragraph (f)(4)(iii)(B) of this section). In this case, undertakings D and E are supplier undertakings, and undertakings A, B, and C are recipient undertakings. Undertakings D and E, however, sell less than ten percent of their dairy products to undertakings A, B, and C and thus do not predominantly involve the provision of property and services to recipient undertakings. Similarly, undertakings D and E are not the predominant providers of property and services to undertakings A, B, and C. Thus, the rules for vertically-integrated undertakings in paragraph (f)(4)(iii) of this section do not apply in this case.

Example (10). (i) The facts are the same as in example (9), except that undertaking D sells 75 percent of its dairy products to undertakings A, B, and C.

(ii) Paragraph (f)(4)(iii)(A) of this section applies if a supplier undertaking predominantly involves the provision of property to a recipient undertaking that is controlled by the same interests. Paragraph (f)(4)(iii)(A)(*2*) of this section provides that a supplier undertaking predominantly involves the provision of property to a recipient undertaking if the supplier undertaking provides more than 50 percent of its property to such recipient undertaking. In addition, paragraph (f)(4)(iii)(A)(*1*) of this section provides that if a supplier undertaking and two or more similar recipient undertakings are controlled by the same interests, the recipient undertakings are treated as a single undertaking for purposes of applying paragraph (f)(4)(iii)(A) of this section. Undertakings D and E both provide dairy products to undertakings A, B, and C. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertakings D and E are supplier undertakings and undertakings A, B, and C are recipient undertakings. Undertaking D predominantly involves the provision of property to undertakings A, B, and C. Moreover, undertakings A, B, and C are treated as a single undertaking under paragraph (f)(4)(iii)(A)(*1*) of this section because undertakings A, B, and C are similar to one another under paragraph (f)(4)(i) of this section, and undertakings A, B, C, and D are controlled by the same interests. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings A, B, C, and D.

(iii) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii) (A) and (C)(*2*) of this section as an undertaking that is similar to the recipient undertakings and to undertakings to which the recipient undertakings are similar. Accordingly, undertaking D is similar, for purposes of this paragraph (f), to undertakings A, B, and C.

(iv) Undertaking E does not predominantly involve the provision of property to undertakings A, B, and C, or to any other related undertakings. Thus, paragraph (f)(4)(iii)(A) of this section does not apply to undertaking E, and undertaking E is not similar to undertakings A, B, and C. Moreover, undertakings D and E are not similar because, under paragraph (f)(4)(iii)(C)(*2*) of this section, undertaking D is not similar to any undertaking that is not similar to undertakings A, B, and C.

Example (11). (i) The facts are the same as in example (10), except that 75 percent of undertaking D's dairy products are sold to undertakings A and B, and none are sold to undertaking C.

(ii) In this case, undertaking D is a supplier undertaking only with respect to undertakings A and B. Accordingly, paragraph (f)(4)(iii)(A) applies only to undertakings A, B, and D. As in example (10), undertaking D is similar to undertakings A and B, and is not similar to undertaking E. In addition, if paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(C)(*2*) of this section as an undertaking that is similar to the recipient undertakings and undertakings to which the recipient undertakings are similar. Accordingly, even though undertaking D does not provide any property or services to undertaking C, undertaking D is similar to undertaking C because undertaking C is similar to undertakings A and B.

Example (12). (i) The facts are the same as in example (9), except that undertakings A and B purchase 80 percent of their inventory from undertaking D.

(ii) Paragraph (f)(4)(iii)(B) of this section applies, except as provided in paragraph (f)(4)(iii)(C) of this section, if a supplier undertaking is the predominant provider of property to a recipient undertaking that is controlled by the same interests. Undertakings D and E both provide dairy products to undertakings A, B, and C. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertakings D and E are supplier undertakings, and undertakings A, B, and C are recipient undertakings. In addition, undertaking D is the predominant provider of property and services to undertakings A and

B, and undertakings A, B and D are controlled by the same interests. Thus, except as provided in paragraph (f)(4)(iii)(C) of this section, paragraph (f)(4)(iii)(B) of this section applies to undertakings A, B, and D.

(iii) The coordination rules in paragraph (f)(4)(iii)(C)(*1*) of this section provide that paragraph (f)(4)(iii)(B) of this section does not apply in certain cases to which paragraph (f)(4)(iii)(A) of this section applies. These coordination rules would apply if undertaking D or E (or any other undertaking that is controlled by the interests that control undertakings A, B, and C) predominantly involved the provision of property and services to undertakings A, B, and C. The coordination rules in paragraph (f)(4)(iii)(C)(*1*) of this section would also apply if undertaking A, B, or D predominantly involved the provision of property or services to a recipient undertaking that is controlled by the same interests. Assume that these coordination rules do not apply in this case.

(iv) If paragraph (f)(4)(iii)(B) of this section applies to supplier and recipient undertakings, the recipient undertakings are treated under paragraph (f)(4)(iii) (B) and (C)(*3*) of this section as undertakings that are similar to the supplier undertaking and to undertakings to which the supplier undertaking is similar. Accordingly, undertakings A and B are similar, for purposes of this paragraph (f), to undertaking D and, because undertakings D and E are similar, to undertaking E.

(v) The principal providers of property and services to undertaking C are unrelated undertakings. Thus, paragraph (f)(4)(iii)(B) of this section does not apply to undertaking C, and undertaking C is not similar to undertakings D and E. Moreover, undertaking C is not similar to undertakings A and B because, under paragraph (f)(4)(iii)(C)(*3*) of this section, undertakings A and B are not similar to any undertaking that is not similar to undertaking D.

Example (13). (i) Undertakings A through Z are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Undertaking A derives all of its gross income from the manufacture and sale of men's and women's clothing, undertaking B derives all of its gross income from sales of men's and women's clothing to retail stores, and undertakings C through Z derive all of their gross income from retail sales of men's and women's clothing. Undertaking A sells clothing exclusively to undertaking B. Undertaking B sells 75 percent of its clothing to undertakings C through Z, and sells the remainder to unrelated retail stores. Undertaking B purchases 80 percent of its inventory from undertaking A, and undertakings C through Z purchase 60 to 90 percent of their inventory from undertaking B.

(ii) Paragraph (f)(4)(iii)(A) of this section applies if a supplier undertaking predominantly involves the provision of property to a recipient undertaking that is controlled by the same interests. In addition, paragraph (f)(4)(iii)(A)(*1*) of this section provides that if a supplier undertaking and two or more similar recipient undertakings are controlled by the same interests, the recipient undertaking are treated as a single undertaking for this purpose. Undertaking B provides men's and women's clothing to undertaking C through Z. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertaking B is a supplier undertaking and undertakings C through Z are recipient undertakings. In addition, undertaking B predominantly involves the provision of property to undertakings C through Z, and undertakings C through Z are treated as a single undertaking for purposes of paragraph (f)(4)(iii)(A) of this section. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings B and C through Z.

(iii) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(A) of this section as an undertaking that is similar to the recipient undertakings. Accordingly, undertaking B is similar, for purposes of this paragraph (f), to undertakings C through Z.

(iv) Undertaking A provides men's and women's clothing to undertaking B. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertaking A is a supplier undertaking and undertaking B is a recipient undertaking. In addition, undertaking A predominantly involves the provision of property to undertaking B, and undertakings A and B are controlled by the same interests. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings A and B, and undertaking A is similar to undertaking B.

(v) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(C)(*2*) of this section as an undertaking that is similar to undertakings to which the recipient undertakings are similar. Accordingly, undertaking A is also similar, for purposes of this paragraph (f), to undertakings C through Z.

(vi) The coordination rule in paragraph (f)(4)(iii)(C)(*1*)(*i*) of this section provides that paragraph (f)(4)(iii)(B) of this section does not apply if, as described above, the supplier undertaking predominantly involves the provision of property to recipient undertakings and is treated under paragraph (f)(4)(iii)(A) of this section as an undertaking that is similar to such recipient undertakings. Accordingly, paragraph (f)(4)(iii)(B) of this section does not apply to undertakings B through Z, even though undertaking B is the predominant provider of property and services to undertakings C through Z, and undertakings B through Z are controlled by the same interests. For the same reason, paragraph (f)(4)(iii)(B) of this section does not apply to undertaking A and B. (Paragraph (f)(4)(iii)(B) of this section is also inapplicable to undertakings A and B because the coordination rule in paragraph (f)(4)(iii)(C)(*1*)(*ii*) of this section applies if the recipient undertaking (undertaking B) is itself a supplier undertaking that is treated under paragraph (f)(4)(iii)(A) of this section as an undertaking that is similar to its recipient undertakings (undertakings C through Z).)

(g) *Integrated businesses*—(1) *Applicability*—(i) *In general.* This paragraph (g) applies to a taxpayer's interests in trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section).

(ii) *Trade or business activity.* For purposes of this paragraph (g), the term ''trade or business activity'' means any activity (determined without regard to this paragraph (g)) that consists of interests in one or more trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section).

(2) *Treatment as a single activity.* A taxpayer's interests in two or more trade or business activities shall be treated as a single activity if and only if—

(i) The operations of such trade or business activities constitute a single integrated business, activities constitute a single integrated business; and

(ii) Such activities are controlled by the same interests (within the meaning of paragraph (j) of this section).

(3) *Facts and circumstances test.* In determining whether the operations of two or more trade or business activities constitute a single integrated business for purposes of this paragraph (g), all the facts and circumstances are taken into account, and the following factors are generally the most significant:

(i) Whether such operations are conducted at the same location;

(ii) The extent to which other persons conduct similar operations at one location;

(iii) Whether such operations are treated as a unit in the primary accounting records reflecting the results of such operations;

(iv) The extent to which other persons treat similar operations as a unit in the primary accounting records reflecting the results of such similar operations;

(v) Whether such operations are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section);

(vi) The extent to which such operations involve products or services that are commonly provided together;

(vii) The extent to which such operations serve the same customers;

(viii) The extent to which the same personnel, facilities, or equipment are used to conduct such operations;

(ix) The extent to which such operations are conducted in coordination with or reliance upon each other;

(x) The extent to which the conduct of any such operations is incidental to the conduct of the remainder of such operations;

(xi) The extent to which such operations depend on each other for their economic success; and

(xii) Whether such operations are conducted under the same trade name.

(4) *Examples.* The following examples illustrate the application of this paragraph (g). The facts, analysis, and conclusion in each example relate to a single taxable year, and the trade or business activities described in each example are controlled by the same interests (within the meaning of paragraph (j) of this section).

Example (1). (i) The taxpayer owns a number of department stores and auto-supply stores. Some of the taxpayer's department stores include auto-supply departments. In other cases, the taxpayer operates a department store and an auto-supply store at the same location (within the meaning of paragraph (c)(2)(iii) of this section), or at different locations from which the same group of customers can be served. In cases in which a department store and an auto-supply store are operated at the same location, the department-store operations are the predominant operations (within the meaning of paragraph (f)(4)(ii) of this section), and the undertaking that includes the stores is treated as a department-store undertaking for purposes of paragraph (f) of this section. Under paragraph (f) of this section, the department-store undertakings are all treated as part of the same activity of the taxpayer (the ''department-store activity''). Similarly, the auto-supply undertakings (*i.e.*, the auto-supply stores that are not operated at a department-store location) are all treated as part of the same activity (the ‘‘auto-supply activity’’). (Assume that department-store undertakings and auto-supply undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) The department stores and auto-supply stores use a common trade name and coordinate their marketing activities (*e.g.*, the stores advertise in the same catalog and the same newspaper supplements, honor the same credit cards (including credit cards issued by the department stores), and jointly conduct sales and other promotional activities). Although sales personnel generally work only in a particular store or in a particular department within a store, other employees (*e.g.*, cashiers, janitorial and maintenance workers, and clerical staff) may work in or perform services for various stores, including both department and auto-supply stores. In addition, the management of store operations is organized on a geographical basis, and managers above the level of the individual store generally supervise operations in both types of store. A central office provides payroll, financial, and other support services to all stores and establishes pricing and other business policies. Most inventory for both types of stores is acquired through a central purchasing department and inventory for all stores in an area is stored in a common warehouse.

(iii) Based on the foregoing facts and circumstances, the operations of the department-store activity and the auto-supply activity constitute an integrated business. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the conduct of department-store and auto-supply operations at the same location, the location of department and auto-supply stores at sites where the same group of customers can be served, the treatment of all such operations as a unit in the taxpayer’s financial statements, the taxpayer’s ownership and the common management of all such operations, the use of the same personnel, facilities, and equipment to conduct and support the operations, the use of a common trade name, and the coordination (as evidenced by the coordinated marketing activities) of department-store and auto-supply operations.

(iv) Paragraph (g)(2) of this section provides that a taxpayer’s interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. The department-store activity and the auto-supply activity consist of trade or business undertakings and, thus, are trade or business activities. In addition, the activities are controlled by the same interests (the taxpayer), and the operations of the activities constitute an integrated business. Accordingly, the department-store activity and the auto-supply activity are treated as a single activity of the taxpayer.

Example (2). (i) The taxpayer owns a number of stores that sell stereo equipment and a repair shop that services stereo equipment. Under paragraph (f) of this section, the stores are all treated as part of the same activity of the taxpayer (the ‘‘store activity’’). The repair shop does not sell stereo equipment, does not predominantly involve the provision of services to the taxpayer’s stores, and is treated as a separate activity (the ‘‘repair-shop activity’’). (Assume that stereo-sales undertakings and stereo-repair undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) The stores sell stereo equipment produced by manufacturers for which the stores are an authorized distributor. The repair shop’s operations principally involve the servicing of stereo equipment produced by the same manufacturers. These operations include repairs on equipment under warranty for which reimbursement is received from the manufacturer and reconditioning of equipment taken as trade-ins by the taxpayer’s stores. The majority of the operations, however, involve repairs that are performed for customers and are not covered by a warranty. The taxpayer’s distribution agreements with manufacturers generally require the taxpayer to repair and service equipment produced by the manufacturer both during and after the warranty period. In some cases, the distribution agreements require that the taxpayer’s repair facility meet the manufacturer’s standards and provide for periodic inspections to ensure that these standards are met.

(iii) The stores and the repair shop use a common trade name. Sales personnel generally work only in a particular store and stereo technicians work only in the repair shop. The stores and the repair shop are, however, managed from a central office, which supervises both store and repair-shop operations, provides payroll, financial, and other support services to the stores and the repair shop, and establishes pricing and other business policies. In addition, inventory for the stores and supplies for the repair shop are acquired through a central purchasing department and are stored in a single warehouse.

(iv) Based on the foregoing facts and circumstances, the operations of the store activity and the repair-shop activity constitute an integrated business. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the treatment of all such operations as a unit in the taxpayer's financial statements, the taxpayer's ownership and the common management of all such operations, the use of the same personnel and facilities to support the operations, the use of a common trade name, the extent to which the same customers patronize both the stores and the repair shop, the similarity of the products (*i.e.*, stereo equipment) involved in both store and repair-shop operations, and the extent to which the provision of repair services contributes to the taxpayer's ability to obtain the stereo equipment sold in store operations.

(v) Paragraph (g)(2) of this section provides that a taxpayer's interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. The store activity and repair-shop activity consist of trade or business undertakings and thus are trade or business activities. In addition, the activities are controlled by the same interests (the taxpayer), and the operations of the activities constitute an integrated business. Accordingly, the store activity and the repair-shop activity are treated as a single activity of the taxpayer.

Example (3). (i) The taxpayer owns interests in three partnerships. One partnership owns a television station, the second owns a professional sports franchise, and the third owns a motion-picture production company. The operations of the partnerships are treated as three separate undertakings. Although other persons own interests in the partnerships, all three undertakings are controlled (within the meaning of paragraph (j) of this section) by the taxpayer. The operations of the partnerships are treated as three separate activities (the ''television activity,'' the ''sports activity,'' and the ''motion-picture activity''). (Assume that the undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) Each partnership prepares financial statements that reflect only the results of that partnership's operations, and each of the activities is conducted under its own trade name. The taxpayer participates extensively in the management of each partnership and makes the major business decisions for all three partnerships. Each partnership, however, employs separate management and other personnel who conduct its operations on a day-to-day basis. The taxpayer generally arranges the partnerships' financing and often obtains loans for two, or all three, partnerships from the same source. Although the assets of one partnership are not used as security for loans to another partnership, the taxpayer's interest in a partnership may secure loans to the other partnerships. The television station broadcasts the sports franchise's games, and the motion-picture production company occasionally prepares programming for the television station. In addition, support staff of one partnership may, during periods of peak activity or in the case of emergency, be made available to another partnership on a temporary basis. There are no other significant transactions between the partnerships. Moreover, all transactions between the partnerships involve essentially the same terms as would be provided in transactions between unrelated persons.

(iii) Based on the foregoing facts and circumstances, the television activity, the sports activity, and the motion-picture activity constitute three separate businesses. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the treatment of the activities as separate units in the partnerships' financial statements, the use of a different trade name for each activity, the separate day-to-day management of the activities, and the limited extent to which the activities contribute to or depend on each other (as evidenced by the small number of significant transactions between the partnerships and the arm's length nature of those transactions). The taxpayer's participation in management and financing are taken into account in this determination, as are the transactions between the partnerships, but these factors do not of themselves support a determination that the activities constitute an integrated business.

(iv) Paragraph (g)(2) of this section provides that a taxpayer's interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer only if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. In this case, the taxpayer's activities do not constitute an integrated business, and the aggregation rule in paragraph (g)(2) of this section does not apply. Accordingly, the television activity, the sports activity, and the motion-picture activity are treated as three separate activities of the taxpayer.

(h) *Certain professional service undertakings treated as a single activity*—(1) *Applicability*—(i) *In general.* This paragraph (h) applies to a taxpayer's interests in professional service undertakings (within the meaning of paragraph (h)(1)(ii) of this section).

(ii) *Professional service undertaking.* For purposes of this paragraph (h), an undertaking is treated as a professional service undertaking for any taxable year in which the undertaking derives more than 50 percent of its gross income from the provision of services that are treated, for purposes of section 448 (d)(2)(A) and the regulations thereunder, as services performed in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

(2) *Treatment as a single activity*—(i) *Undertakings controlled by the same interest.* A taxpayer's interests in two or more professional service undertakings that are controlled by the same interests (within the meaning of paragraph (j) of this section) shall be treated as part of the same activity of the taxpayer.

(ii) *Undertakings involving significant similar or significant related services.* A taxpayer's interests in two or more professional service undertakings that involve the provision of significant similar services or significant related services shall be treated as part of the same activity of the taxpayer.

(iii) *Coordination rule.* (A) Except as provided in paragraph (h)(2)(iii)(B) of this section, a taxpayer's interests in two or more undertakings (the ‘‘original undertakings'') that are treated as part of the same activity of the taxpayer under the provisions of paragraph (h)(2) (i) or (ii) of this section shall be treated as interests in a single professional service undertaking (the ‘‘aggregated undertaking'') for purposes of reapplying such provisions.

(B) If any original undertaking included in an aggregated undertaking and any other undertaking that is not included in such aggregated undertaking involve the provision of significant similar or related services, the aggregated undertaking and such other undertaking shall be treated as undertakings that involve the provision of significant similar or related services for purposes of reapplying the provisions of paragraph (h)(2)(ii) of this section.

(3) *Significant similar or significant related services.* For purposes of this paragraph (h)—

(i) Services (other than consulting services) in any field described in paragraph (h)(1)(ii) of this section are similar to all other services in the same field;

(ii) All the facts and circumstances are taken into account in determining whether consulting services are similar;

(iii) Two professional service undertakings involve the provision of significant similar services if and only if—

(A) Each such undertaking provides significant professional services; and

(B) Significant professional services provided by one such undertaking are similar to significant professional services provided by the other such undertaking;

(iv) Services are significant professional services if and only if such services are in a field described in paragraph (h)(1)(ii) of this section and more than 20 percent of the undertaking's gross income is attributable to services in such field (or, in the case of consulting services, to similar services in such field); and

(v) Two professional service undertakings involve the provision of significant related services if and only if more than 20 percent of the gross income of one such undertaking is derived from customers that are also customers of the other such undertaking.

(4) *Examples.* The following examples illustrate the application of this paragraph (h). In each example that does not state otherwise, the taxpayer is an individual, and the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) The taxpayer is a partner in a law partnership that has offices in various cities. Some of the partnership's offices provide a full range of legal services. Other offices, however, specialize in a particular area or areas of the law (*e.g.*, litigation, tax law, corporate law, *etc.*). In either case, substantially all of the office's gross income is derived from the provision of legal services. Under paragraph (c)(1) of this section, each of the law partnership's offices is treated as a single undertaking that is separate from other undertakings (a ‘‘law-office undertaking'').

(ii) Each law-office undertaking derives more than 50 percent of its gross income from the provision of services in the field law. Thus, each such undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Each law-office undertaking derives more than 20 percent of its gross income from services in the field of law. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of law. In addition, all services in the field of law are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the law-office undertakings involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interest in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the law-office undertakings are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section even if the undertakings are not controlled by the same interests (within the meaning of paragraph (j) of this section).

Example (2). (i) The taxpayer is a partner in medical partnerships A and B. Both partnerships derive all of their gross income from the provision of medical services, but partnership A specializes in internal medicine and partnership B operates a radiology laboratory. Under paragraph (c)(1) of this section, the medical-service business of each partnership is treated as a single undertaking that is separate from other undertakings (a ''medical-service undertaking''). Partnerships A and B are not controlled by the same interests (within the meaning of paragraph (j) of this section).

(ii) Each partnership's medical-service undertaking derives more than 50 percent of its gross income from the provision of services in the field of health. Thus, each partnership's medical-service undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Each partnership's medical-service undertaking derives more than 20 percent of its gross income from services in the field of health. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of health. In addition, all services in the field of health are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the medical-services undertakings of partnerships A and B involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the medical-service undertakings of partnerships A and B are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section even though the undertakings are not controlled by the same interests.

Example (3). (i) The facts are the same as in example (2), except that the taxpayer withdraws from partnership A in 1989 and becomes a partner in partnership B in 1990. In addition, the taxpayer was a full-time participant in the operations of partnership A from 1970 through 1989, but does not participate in the operations of partnership B.

(ii) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. This rule is not limited to cases in which the taxpayer holds such interests simultaneously. Thus, as in example (2), the taxpayer's interests in the medical-service undertakings of partnerships A and B are treated as part of the same activity of the taxpayer.

(iii) The activity that includes the taxpayer's interests in the medical-service undertakings of partnerships A and B is a personal service activity (within the meaning of § 1.469–5T(d)) because it involves the performance of personal services in the field of health. In addition, the taxpayer materially participated in the activity for three or more taxable years preceding 1990 (see § 1.469–5T(j)(1)). Thus, even if the taxpayer does not work in the activity after 1989, the taxpayer is treated, under § 1.469–5T(a)(6), as materially participating in the activity for 1990 and subsequent taxable years.

Example (4). (i) The taxpayer is a partner in an accounting partnership that has offices in various cities (partnership A) and in a management-consulting partnership that has a single office (partnership B). Each of partnership A's offices derives substantially all of its gross income from services in the field of accounting, and partnership B derives substantially all of its gross income from services in the field of consulting. Under paragraph (c)(1) of this section, partnership B's consulting business is treated as a single undertaking that is separate from other undertakings (the ''consulting undertaking'') and each of partnership A's offices is similarly treated (the ''accounting undertakings''). The accounting undertakings are controlled by the same interests, but partnerships A and B are not controlled by the same interests (within the meaning of paragraph (j) of this section). Partnership B's consulting business derives 50 percent of its gross income from customers of partnership A's accounting undertakings, but does not derive more than 20 percent of its gross income from the customers of any single accounting undertaking.

(ii) Each accounting undertaking derives more than 50 percent of its gross income from the provision of services in the field of accounting, and the consulting undertaking derives more than 50 percent of its gross income from the provision of services in the field of consulting. Thus, each accounting undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section), and the consulting undertaking is also treated as a professional service undertaking.

(iii) Each accounting undertaking derives more than 20 percent of its gross income from services in the field of accounting. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of accounting. In addition, all services in the field of accounting are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the accounting undertakings involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2) (i) and (ii) of this section provides that a taxpayer's interests in professional service undertakings that are controlled by the same interests or that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. The accounting undertakings are controlled by the same interests (see (i) above) and involve the provision of significant similar services (see (iii) above). Accordingly, the taxpayer's interests in the accounting undertakings are treated as part of the same activity under paragraph (h)(2) (i) and (ii) of this section.

(v) The consulting undertaking derives more than 20 percent of its gross income from services in the field of consulting. If, based on all the facts and circumstances, these services are determined to be similar consulting services under paragraph (h)(3)(ii) of this section, the consulting undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section). In this case, however, the consulting undertaking and the accounting undertakings do not involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section) because consulting services and accounting services are not treated as similar services under paragraph (h)(3)(i) of this section.

(vi) The consulting undertaking does not derive more than 20 percent of its gross income from the customers of any single accounting undertaking of partnership A. If, however, partnership A's accounting undertakings are aggregated, the consulting undertaking derives more than 20 percent of its gross income from customers of the aggregated undertakings. Paragraph (h)(3)(v) of this section provides that two professional service undertakings involve the provision of significant related services if more than 20 percent of the gross income of one undertaking is derived from customers of the other undertaking. For purposes of applying this rule, partnership A's accounting undertakings are treated as a single undertaking under paragraph (h)(2)(iii) of this section because the accounting undertakings are treated as part of the same activity under paragraph (h)(2)(i) and (ii) of this section. Thus, the consulting undertaking and the accounting undertakings involve the provision of significant related services.

(vii) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant related services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the consulting undertaking and the accounting undertakings are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section.

Example (5). (i) The facts are the same as in example (4), except that partnership B's consulting business derives only 15 percent of its gross income from customers of partnership A's accounting undertakings.

(ii) As in example (4), the taxpayer's interests in the accounting undertakings are treated as part of the same activity under paragraph (h)(2)(i) and (ii) of this section and are treated under paragraph (h)(2)(iii) of this section as a single undertaking for purposes of reapplying those provisions. In this case, however, the consulting undertaking does not derive more than 20 percent of its gross income from the customers of partnership A's accounting undertakings. Thus, the consulting undertaking and the accounting undertakings do not involve the provision of significant related services. Accordingly, the accounting undertakings and the consulting undertaking are not treated as part of the same activity under paragraph (h)(2)(i) or (ii) of this section because they are not controlled by the same interests and do not involve the provision of significant similar or related services.

Example (6). (i) The taxpayer is a partner in partnerships A, B, and C. Partnership A derives substantially all of its gross income from the provision of engineering services, partnership B derives substantially all of its gross income from the provision of architectural services, and partnership C derives 40 percent of its gross income from the provision of engineering services and the remainder from the provision of architectural services. Under paragraph (c)(1) of this section, each partnership's service business is treated as a single undertaking that is separate from other undertakings. Partnerships A, B, and C are not controlled by the same interests (within the meaning of paragraph (j) of this section).

(ii) Each partnership's undertaking derives more than 50 percent of its gross income from the provision of services in the fields of architecture and engineering. Thus, each such undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Partnership A's undertaking (''undertaking A'') derives more than 20 percent of its gross income from services in the field of engineering, partnership B's undertaking (''undertaking B'') derives more than 20 percent of its gross income from services in the field of architecture, and partnership C's undertaking (''undertaking C'') derives more than 20 percent of its gross income from services in the field of engineering and more than 20 percent of its gross income from services in the field of architecture. Thus, undertaking A involves significant services in the field of engineering, undertaking B involves significant services in the field of architecture, and undertaking C involves significant services in both fields. Under paragraph (h)(3)(i) of this section, all services within each field are treated as similar services, but engineering services and architectural services are not treated as similar services. Thus, undertakings A and C, and undertakings B and C, involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in undertakings A and C are treated as part of the same activity of the taxpayer.

(v) Under paragraph (h)(2)(iii)(A) of this section, undertakings A and C are also treated as a single undertaking for purposes of determining whether undertaking B involves the provision of significant similar services. Paragraph (h)(2)(iii)(B) of this section in effect provides that treating undertakings A and C as a single undertaking does not affect the conclusion that the architectural services provided by undertakings B and C are significant similar services. Thus, undertaking B and the single undertaking in which undertakings A and C are included under paragraph (h)(3)(iii) of this section involve the provision of significant similar services, and the taxpayer's interests in undertakings A, B, and C are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section.

(i) [Reserved]

(j) *Control by the same interests and ownership percentage*—(1) *In general.* Except as otherwise provided in paragraph (j)(2) of this section, all the facts and circumstances are taken into account in determining, for purposes of this section, whether undertakings are controlled by the same interests. For this purpose, control includes any kind of control, direct or indirect, whether legally enforceable, and however exercisable or exercised. It is the reality of control that is determinative, and not its form or mode of exercise.

(2) *Presumption*—(i) *In general.* Undertakings are rebuttably presumed to be controlled by the same interests if such undertakings are part of the same common-ownership group.

(ii) *Common-ownership group.* Except as provided in paragraph (j)(2)(iii) of this section, two or more undertakings of a taxpayer are part of the same common-ownership group for purposes of this paragraph (j)(2) if and only if the sum of the common-ownership percentages of any five or fewer persons (within the meaning of section 7701(a)(1), but not including passthrough entities) with respect to such undertakings exceeds 50 percent. For this purpose, the common-ownership percentage of a person with respect to such undertakings is the person's smallest ownership percentage (determined in accordance with paragraph (j)(3) of this section) in any such undertaking.

(iii) *Special aggregation rule.* If, without regard to this paragraph (j)(2)(iii), an undertaking of a taxpayer is part of two or more common-ownership groups, any undertakings of the taxpayer that are part of any such common-ownership group shall be treated for purposes of this paragraph (j)(2) as part of a single common-ownership group in determining the activities of such taxpayer.

(3) *Ownership percentage*—(i) *In general.* For purposes of this section, a person's ownership percentage in an undertaking or in a passthrough entity shall include any interest in such undertaking or passthrough entity that the person holds directly and the person's share of any interest in such undertaking or passthrough entity that is held through one or more passthrough entities.

(ii) *Passthrough entities.* The following rules apply for purposes of applying paragraph (j)(3)(i) of this section:

(A) A partner's interest in a partnership and share of any interest in a passthrough entity or undertaking held through a partnership shall be determined on the basis of the greater of such partner's percentage interest in the capital (by value) of such partnership or such partner's largest distributive share of any item of income or gain (disregarding guaranteed payments under section 707(c)) of such partnership.

(B) A shareholder's interest in an S corporation and share of any interest in a passthrough entity or undertaking held through an S corporation shall be determined on the basis of such shareholder's stock ownership.

(C) A beneficiary's interest in a trust or estate and share of any interest in a passthrough entity or undertaking held through a trust or estate shall not be taken into account.

(iii) *Attribution rules*—(A) *In general.* Except as otherwise provided in paragraph (j)(3)(iii)(B) of this section, a person's ownership percentage in a passthrough entity or in an undertaking shall be determined by treating such person as the owner of any interest that a person related to such person owns (determined without regard to this paragraph (j)(3)(iii)) in such passthrough entity or in such undertaking.

(B) *Determination of common-ownership percentage.* The common-ownership percentage of five or fewer persons with respect to two or more undertakings shall be determined, in any case in which, after the application of paragraph (j)(3)(iii)(A) of this section, two or more such persons own the same interest in any such undertaking (the ''related-party owners'') by treating as the only owner of such interest (or portion thereof) the related-party owner whose ownership of such interest (or a portion thereof) would result in the highest common-ownership percentage.

(C) *Related person.* A person is related to another person for purposes of this paragraph (j)(3)(iii) if the relationship of such persons is described in section 267(b) or 707(b)(1).

(4) *Special rule for trade or business activities.* In determining whether two or more trade or business activities are controlled by the same interests for purposes of paragraph (g) of this section, each such activity shall be treated as a separate undertaking in applying this paragraph (j).

(5) *Examples.* The following examples illustrate the application of this paragraph (j):

Example (1). (i) Partnership X is the sole owner of an undertaking (undertaking X), and partnership Y is the sole owner of another undertaking (undertaking Y). Individuals A, B, C, D, and E are the only partners in partnerships X and Y, and the partnership agreements of both X and Y provide that no action may be taken or decision made on behalf of the partnership without the unanimous consent of the partners. Moreover, each partner actually participates in, and agrees to, all major decisions that affect the operations of either partnership. The ownership percentages (within the meaning of paragraph (j)(3) of this section) of A, B, C, D, and E in each partnership (and in the undertaking owned by the partnership) are as follows:

Partner	PARTNERSHIP/UNDERTAKING	
	X (percent)	Y (percent)
A	15	5
B	10	60
C	10	20
D	77	12
E	8	20
	120	117

The sum of the ownership percentages exceeds 100 percent for both X and Y because, under paragraph (j)(3)(ii)(A) of this section, each partner's ownership percentage is determined on the basis of the greater of the partner's percentage interest in the capital of the partnership or the partner's largest distributive share of any item of income or gain of the partnership.

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common-ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, the common-ownership percentages of A, B, C, D, and E with respect to undertakings X and Y are as follows:

Partner	Common-ownership percentage
A	5
B	10
C	10
D	12
E	8
	45

(iii) Paragraph (j)(2)(i) of this section provides that undertakings are rebuttably presumed to be controlled by the same interests if the undertakings are part of the same common-ownership group. In general, undertakings are part of a common-ownership group only if the sum of the common-ownership percentages of any five or fewer persons with respect to such undertakings exceeds 50 percent. In this case, the sum of the partners' common-ownership percentages with respect to undertakings X and Y is only 45 percent. Thus, undertakings X and Y are not part of the same common-ownership group.

(iv) If the presumption in paragraph (j)(2)(i) of this section does not apply, all the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests (see paragraph (j)(1) of this section). In this case, all actions and decisions in both undertakings require the unanimous consent of the same persons and each of those persons actually participates in, and agrees to, all major decisions. Accordingly, undertakings X and Y are controlled by the same interests (*i.e.*, A, B, C, D, and E).

Example (2). (i) Partnerships W, X, Y, and Z are each the sole owner of an undertaking (undertakings W, X, Y, and Z). Individuals A, B, and C are partners in each of the four partnerships, and the remaining interests in each partnership are owned by a number of unrelated individuals, none of whom owns more than a one-percent interest in any of the partnerships. The ownership percentages (within the meaning of paragraph (j)(3) of this section) of A, B, and C in each partnership (and in the undertaking owned by the partnership) are as follows:

Partnership/Undertaking	Partner		
	A	B	C
W	23%	21%	40%
X	19%	30%	22%
Y	25%	25%	20%
Z	8%	4%	2%

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common-ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, the common-ownership percentages of A, B, and C in undertakings W, X, Y, and Z are as follows:

Partner	Common-ownership percentage
A	8
B	4
C	2
	14

(iii) The sum of the common-ownership percentages of A, B, and C with respect to undertakings W, X, Y, and Z is 14 percent, and no other person owns more than a one-percent interest in any of the undertakings. Thus, the sum of the common-ownership percentages of any five or fewer persons with respect to all four undertakings cannot exceed 50 percent. Accordingly, undertakings W, X, Y, and Z are not part of the same common-ownership group (see paragraph (j)(2)(ii) of this section) and are not rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section).

(iv) The common-ownership percentages of A, B, and C in undertakings W, X, and Y are as follows:

Partner	Common ownership percentage
A	19
B	21
C	20
	60

(v) The sum of the common-ownership percentages of A, B, and C, taking into account only undertakings W, X, and Y, is 60 percent. Because the sum of the common-ownership percentages exceeds 50 percent, undertakings W, X, and Y are part of the same common-ownership group (see paragraph (j)(2)(ii) of this section and are rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section).

Example (3). (i) Corporation X, an S corporation, is the sole owner of an undertaking (undertaking X), and corporation Y, another S corporation, is the sole owner of another undertaking (undertaking Y). Individuals A, B, and C are shareholders in corporations X and Y. Both A and B are related (within the meaning of paragraph (j)(3)(iii)(C) of this section) to C, but not to each other. A, B, and C are not related to any other person that owns an interest in either corporation X or corporation Y. The ownership percentages (determined without regard to the attribution rules of paragraph (j)(3)(iii) of this section) of A, B, and C in each corporation (and in the undertaking owned by the corporation) are as follows:

CORPORATION/UNDERTAKING

Shareholder	X (percent)	Y (percent)
A	20	
B		20
C	5	5

(ii) In general, a person's ownership percentage is determined by treating the person as the owner of interests that are actually owned by related persons (see paragraph (j)(3)(iii)(A) of this section). If A, B, and C are treated as owning interests that are actually owned by related persons, their ownership percentages are as follows:

CORPORATION/UNDERTAKING

Shareholder	X (percent)	Y (percent)
A	25	5
B	5	25
C	25	25

(iii) Paragraph (j)(3)(iii)(B) of this section provides that, in determining the sum of the common-ownership percentages of any five or fewer persons with respect to any undertakings, each interest in such undertakings is counted only once. If two or more persons are treated as owners of the same interest under paragraph (j)(3)(iii)(A) of this section, the person whose ownership would result in the highest sum is treated as the only owner of the interest. In this case, C's common-ownership percentage with respect to undertakings X and Y, determined by treating C as the owner of the interests actually owned by A and B, is 25 percent. If, however, A and B are treated as the owners of the interests actually owned by C, each has a common-ownership percentage of only five percent. Thus, in determining the sum of common-ownership percentages with respect to undertakings X and Y, C is treated as the owner of the interests actually owned by A and B because this treatment results in the highest sum of common-ownership percentages with respect to such undertakings.

Example (4). (i) The ownership percentages of individuals A, B, and C in undertakings X, Y, and Z are as follows:

UNDERTAKING

Individual	X	Y	Z
A	30%	30%	30%
B	30%	30%	30%
C	....	30%	30%

No other person owns an interest in more than one of the undertakings.

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, A's common-ownership percentage with respect to undertakings X, Y, and Z is 30 percent, and the common-ownership percentages of B and C (and all other persons owning interests in such undertakings) with respect to such undertakings is zero. Accordingly, the sum of the common ownership percentages with respect to undertakings X, Y, and Z is only 30 percent, and undertakings X, Y, and Z are not treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section.

(iii) B's common-ownership percentage with respect to undertakings X and Y is 30 percent, and the sum of A's and B's common-ownership percentages with respect to such undertakings is 60 percent. Thus, undertakings X and Y are treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section. Similarly, C's common-ownership percentage with respect to undertakings Y and Z is 30 percent, and the sum of A's and C's common-ownership percentages with respect to such undertakings is 60 percent. Thus, undertakings Y and Z are also treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section.

(iv) Paragraph (j)(2)(iii) of this section requires the aggregation of common-ownership groups that include the same undertaking. In this case, undertaking Y is treated as part of the common-ownership group XY and as part of the common-ownership group YZ. Accordingly, undertakings X, Y, and Z are treated as part of a single common-ownership group and are rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section) even though B does not own an interest in undertaking Z and C does not own an interest in undertaking X. The fact that B and C are not common owners with respect to undertakings X and Z is taken into account, however, in determining whether this presumption is rebutted.

(k) *Identification of rental real estate activities*—(1) *Applicability*—(i) *In general.* Except as otherwise provided in paragraph (k)(6) of this section, this paragraph (k) applies to a taxpayer's interests in rental real estate undertakings (within the meaning of paragraph (k)(1)(ii) of this section).

(ii) *Rental real estate undertaking.* For purposes of this paragraph (k), a rental real estate undertaking is a rental undertaking (within the meaning of paragraph (d) of this section) in which at least 85 percent of the unadjusted basis (within the meaning of § 1.469–2T(f)(3)) of the property made available for use by customers is real property. For this purpose the term ''real property'' means any tangible property other than tangible personal property (within the meaning of § 1.48–1(c)).

(2) *Identification of activities*—(i) *Multiple undertakings treated as a single activity or multiple activities by taxpayer.* Except as otherwise provided in this paragraph (k), a taxpayer may treat two or more rental real estate undertakings (determined after the application of paragraph (k)(2) (ii) and (iii) of this section) as a single activity or may treat such undertakings as separate activities.

(ii) *Multiple undertakings treated as a single activity by passthrough entity.* A taxpayer must treat two or more rental real estate undertakings as a single rental real estate undertaking for a taxable year if any passthrough entity through which the taxpayer holds such undertakings treats such undertakings as a single activity on the applicable return of the passthrough entity for the taxable year of the taxpayer.

(iii) *Single undertaking treated as multiple undertakings.* Notwithstanding that a taxpayer's interest in leased property would, but for the application of this paragraph (k)(2)(iii), be treated as used in a single rental real estate undertaking, the taxpayer may, except as otherwise provided in paragraph (k)(3) of this section, treat a portion of the leased property (including a ratable portion of any common areas or facilities) as a rental real estate undertaking that is separate from the undertaking or undertakings in which the remaining portion of the property is treated as used. This paragraph (k)(2)(iii) shall apply for a taxable year if and only if—

(A) Such portion of the leased property can be separately conveyed under applicable State and local law (taking into account the limitations, if any, imposed by any special rules or procedures, such as condominium conversion laws, restricting the separate conveyance of parts of the same structure); and

(B) The taxpayer holds such leased property directly or through one or more passthrough entities, each of which treats such portion of the leased property as a separate activity on the applicable return of the passthrough entity for the taxable year of the taxpayer.

(3) *Treatment in succeeding taxable years.* All rental real estate undertakings or portions of such undertakings that are treated, under this paragraph (k), as part of the same activity for a taxable year ending after August 9, 1989 must be treated as part of the same activity in each succeeding taxable year.

(4) *Applicable return of passthrough entity.* For purposes of this paragraph (k), the applicable return of a passthrough entity for a taxable year of a taxpayer is the return reporting the passthrough entity's income, gain, loss, deductions, and credits taken into account by the taxpayer for such taxable year.

(5) *Evidence of treatment required.* For purposes of this paragraph (k), a person (including a passthrough entity) does not treat a rental real estate undertaking as multiple undertakings for a taxable year or, except as otherwise provided in paragraph (k) (2)(ii) or (3) of this section, treat multiple rental real estate undertakings as a single undertaking for a taxable year unless such treatment is reflected on a schedule attached to the person's return for the taxable year.

(6) *Coordination rule for rental of nondepreciable property.* This paragraph (k) shall not apply to a rental real estate undertaking if less than 30 percent of the unadjusted basis (within the meaning of §1.469–2T(f)(3)) of property used or held for use by customers in such undertaking during the taxable year is subject to the allowance for depreciation under section 167.

(7) *Coordination rule for rental of dwelling unit.* For any taxable year in which section 280A(c)(5) applies to a taxpayer's use of a dwelling unit—

(i) Paragraph (k) (2) and (3) of this section shall not apply to the taxpayer's interest in such dwelling unit; and

(ii) The taxpayer's interest in such dwelling unit shall be treated as a separate activity of the taxpayer.

(8) *Examples.* The following examples illustrate the application of this paragraph (k). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example (1). (i) In 1989, the taxpayer directly owns five condominium units (units A, B, C, D, and E) in three different buildings. Units A, B, and C are in one of the buildings and constitute a single rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). Units D and E are in the other two buildings, and each of these units constitutes a separate rental real estate undertaking. Each of the units can be separately conveyed under applicable State and local law.

(ii) Paragraph (k)(2)(iii) of this section permits a taxpayer to treat a portion of the property included in a rental real estate undertaking as a separate rental real estate undertaking if the property can be separately conveyed under applicable State and local law and the taxpayer owns the property directly. Thus, the taxpayer can treat units A, B, and C as three separate undertakings. Alternatively, the taxpayer could treat two of those units (*e.g.*, units A and C) as an undertaking and the remaining unit as a separate undertaking, or could treat units A, B, and C as a single undertaking.

(iii) Paragraph (k)(2)(i) of this section permits a taxpayer to treat two or more rental real estate undertakings as a single activity, or to treat such undertakings as separate activities. Thus, the taxpayer, by combining undertakings, can treat all five units as a single activity. Alternatively, the taxpayer could treat each undertaking as a separate activity, or could combine some, but not all, undertakings. Thus, for example, the taxpayer could treat units A, B, C, and D as an activity and unit E as a separate activity.

(iv) For purposes of paragraph (k)(2)(i) of this section, a taxpayer's rental real estate undertakings are determined after the application of paragraph (k)(2)(iii) of this section. Thus, the taxpayer, by treating units as separate undertakings under paragraph (k)(2)(iii) of this section and combining them with other units under paragraph (k)(2)(i) of this section, can treat any combination of units as a single activity. For example, the taxpayer could treat units A and B as a separate rental real estate undertaking, and then treat units A, B, and D as a single activity. In that case, the taxpayer could treat units C and E either as a single activity or as two separate activities.

Example (2). (i) The facts are the same as in example (1). In addition, the taxpayer treats all five units as a single activity for 1989 and sells unit E in 1990. (See paragraph (k)(5) of this section for a rule providing that the units are treated as a single activity only if such treatment is reflected on a schedule attached to the taxpayer's return.)

(ii) Under paragraph (k)(3) of this section, rental real estate undertakings that are treated as part of the same activity for a taxable year must be treated as part of the same activity in each succeeding year. In this case, all five units were treated as part of the same activity for 1989 and must therefore be treated as part of the same activity for 1990. Accordingly, the taxpayer's sale of unit E in 1990 cannot be treated as a disposition of the taxpayer's entire interest in an activity for purposes of section 469(g) and the rules to be contained in § 1.469–6T (relating to the treatment of losses upon certain dispositions of passive and former passive activities).

Example (3). (i) The facts are the same as in example (1), except that the taxpayer is a partner in a partnership that is the direct owner of the five condominium units. In its return for its taxable year ending on November 30, 1989, the partnership treats the five units as a single activity. (See paragraph (k)(5) of this section for a rule providing that the units are treated as a single activity only if such treatment is reflected on a schedule attached to the partnership's return.) The partnership sells unit E on November 1, 1990.

(ii) Paragraph (k)(2)(ii) of this section provides that a taxpayer who holds rental real estate undertakings through a passthrough entity must treat those undertakings as a single rental real estate undertaking if they are treated as a single activity on the applicable return of the passthrough entity. Under paragraph (k)(4) of this section, the applicable return of the partnership for the taxpayer's 1989 taxable year is the partnership's return for its taxable year ending on November 30, 1989. Accordingly, the taxpayer must treat the five condominium units as a single rental real estate undertaking (and thus as part of the same activity) for 1989 because they are treated as a single activity on the partnership's return for its taxable year ending in 1989.

(iii) Under paragraph (k)(3) of this section, the taxpayer must continue treating the condominium units as part of the same activity for taxable years after 1989. Accordingly, as in example (2), the five condominium units are treated as part of the same activity for 1990, and the sale of unit E in 1990 cannot be treated as a disposition of the taxpayer's interest in an activity for purposes of section 469(g) and the rules to be contained in § 1.469–6T.

Example (4). (i) The taxpayer owns a shopping center and a vacant lot that are separate rental real estate undertakings (within the meaning of paragraph (k)(1)(ii) of this section). The taxpayer rents space in the shopping center to various tenants and rents the vacant lot to a parking lot operator. Most of the unadjusted basis of the property used in the shopping-center undertaking (taking into account the land on which the shopping center is built) is subject to the allowance for depreciation, but no depreciable property is used in the parking-lot undertaking.

(ii) This paragraph (k) provides rules for identifying rental real estate activities (including the rule in paragraph (k)(2)(i) of this section that permits a taxpayer to treat two or more rental real estate undertakings as a single activity). Paragraph (k)(6) of this section provides, however, that these rules do not apply to a rental real estate undertaking if less than 30 percent of the unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation. Thus, the taxpayer may not combine the parking-lot undertaking, which includes no depreciable property, with the shopping-center undertaking or any other rental real estate undertaking under paragraph (k)(2)(i) of this section. Accordingly, the parking lot undertaking is treated as a separate activity under paragraph (b)(1) of this section.

Example (5). (i) The facts are the same as in example (4), except that the shopping center and the vacant lot are at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are part of the same rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). Taking into account the property used in the shopping center operations (including the land on which the shopping center is built) and the vacant lot, 50 percent of the unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation.

(ii) In this case, the vacant lot is used in a rental real estate undertaking in which depreciable property is also used. Moreover, the exception in paragraph (k)(6) of this section does not apply to the undertaking consisting of the shopping center and the parking lot because at least 30 percent of unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation. Accordingly, the taxpayer may combine the undertaking with other rental real estate undertakings and treat the combined undertakings as a single activity under paragraph (k)(2)(i) of this section.

(l) [Reserved.]

(m) *Consolidated groups*—(1) *In general.* The activities of a consolidated group (within the meaning of § 1.469–1T(h)(2)(ii)) and of each member of such group shall be determined under this section as if the consolidated group were one taxpayer.

(2) *Examples.* The following examples illustrate the application of this paragraph (m). In each example, the facts, analysis, and conclusions relate to a single taxable year.

Example (1) . (i) Corporations M, N, and O are the members of a consolidated group (within the meaning of § 1.469–1T(h)(2)(ii)). Under § 1.469–1T(h)(4)(i)(A) and (ii), the consolidated group and its members are treated as closely held corporations (within the meaning of § 1.469–1T(g)(2)(ii)). Each member of the consolidated group owns a two-percent interest in partnership X and a two-percent interest in partnership Y, and owns interests in a number of trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) through the partnerships. Each of these undertakings is directly owned by partnership X or Y, and all the undertakings of partnerships X and Y are controlled by the same interests (within the meaning of paragraph (j) of this section) and are similar (within the meaning of paragraph (f)(4) of this section). The employees of the consolidated group and the shareholders of its common parent do not participate in the undertakings that the member corporations own through the partnerships.

(ii) Paragraph (f)(2)(i) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns interests in the undertakings through the same passthrough entity. In this case, the member corporations own interests in similar, commonly-controlled undertakings through both partnerships, and such interests are treated under this paragraph (m) as interests owned by one taxpayer (the consolidated group). Accordingly, the member corporations' interests in the undertakings owned through partnership X are treated as part of the same activity of the consolidated group, and their interests in the undertakings owned through partnership Y are treated similarly.

Example (2) . (i) The facts are the same as in example (1), except that each member of the consolidated group owns a five-percent interest in partnership X and a five-percent interest in partnership Y.

(ii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the member corporations own, in the aggregate, a 15-percent interest in partnership X and a 15-percent interest in partnership Y, and such interests are treated under this paragraph (m) as interests owned by one taxpayer (the consolidated group). Thus, the consolidated group owns a substantial indirect interest in the similar, commonly-controlled undertakings owned by partnerships X and Y (see paragraph (f)(3)(i) of this section). Accordingly, the member corporations' interests in the undertakings owned through partnerships X and Y are treated as part of the same activity of the consolidated group.

(n) *Publicly traded partnerships.* The rules of this section shall apply to a taxpayer's interest in business and rental operations held through a publicly traded partnership (within the meaning of section 469(k)(2)) as if the taxpayer had no interest in any other business and rental operations. The following example illustrates the application of this paragraph (n):

Example. (i) The taxpayer, an individual, owns a 20-percent interest in partnership X and a 15-percent interest in partnership Y. Partnership X directly owns a hotel (''hotel 1'') and a commercial office building (''building 1''). Partnership Y directly owns two hotels (''hotels 2 and 3'') and two commercial office buildings (''buildings 2 and 3''). Each of the three hotels is a separate trade or business undertaking (within the meaning of paragraph (f)(1)(ii) of this section), and each of the three office buildings is a separate rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). The three hotel undertakings are similar (within the meaning of paragraph (f)(4) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Partnership X is not a publicly traded partnership (within the meaning of section 469(k)(2)). Partnership Y, however, is a publicly traded partnership and is not treated as a corporation under section 7704.

(ii) This paragraph (n) provides that the rules of this section apply to a taxpayer's interest in business and rental operations held through a publicly traded partnership as if the taxpayer had no interest in any other business and rental operations. Thus, undertakings owned through partnership Y may be treated as part of the same activity under the rules of this section, but an undertaking owned through partnership Y and an undertaking that is not owned through partnership Y may not be treated as part of the same activity.

(iii) Paragraph (f)(2)(i) of this section provides that a taxpayer's interests in two or more trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity if the taxpayer owns interests in each undertaking through the same passthrough entity. Partnership Y's hotel undertakings (*i.e.,* hotels 2 and 3) are similar and are controlled by the same interests. In addition, the taxpayer owns interests in both undertakings through the same partnership. Accordingly, the taxpayer's interests in partnership Y's hotel undertakings are treated as part of the same activity.

(iv) The hotel undertaking owned through partnership X (*i.e.,* hotel 1) and the hotel undertakings owned through partnership Y are similar and controlled by the same interests, and the taxpayer owns a substantial indirect interest in each of the undertakings (see paragraph (f)(3)(i) of this section). Thus, the three undertakings would ordinarily be treated as part of the same activity under paragraph (f)(2)(ii) of this section. Under this paragraph (n), however, undertakings that are owned through a publicly traded partnership cannot be treated as part of the same activity as any undertaking not owned through that partnership. Accordingly, the hotel undertaking that the taxpayer owns through partnership X and the hotel undertakings that the taxpayer owns through partnership Y are treated as two separate activities.

(v) Paragraph (k)(2)(i) of this section provides that, with certain exceptions, a taxpayer may treat two or more rental real estate undertakings as a single activity or as separate activities. Thus, the taxpayer's interests in the rental real estate undertakings owned through partnership Y (*i.e.,* buildings 2 and 3) may be treated as a single activity or as separate activities. Under this paragraph (n), however, undertakings that are owned through a publicly traded partnership cannot be treated as part of the same activity as any undertaking not owned through that partnership. Accordingly, the taxpayer's interest in the rental real estate undertaking owned through partnership X (building 1) cannot be treated as part of an activity that includes any rental real estate undertaking owned through partnership Y.

(o) *Elective treatment of undertakings as separate activities*—(1) *Applicability.* This paragraph applies to a taxpayer's interest in any undertaking (other than a rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section)) that would otherwise be treated under this section as part of an activity that includes the taxpayer's interest in any other undertaking.

(2) *Undertakings treated as separate activities.* Except as otherwise provided in this paragraph (o), a person (including a passthrough entity) shall treat an undertaking to which this paragraph (o) applies as an activity separate from the remainder of the activity in which such undertaking would otherwise be included for a taxable year if and only if, for such taxable year or any preceding taxable year, such person made an election with respect to such undertaking under this paragraph (o).

(3) *Multiple undertakings treated as a single activity by passthrough entity.* A person (including a passthrough entity) must treat interests in two or more undertakings as part of the same activity for a taxable year if any passthrough entity through which the person holds such undertakings treats such undertakings as part of the same activity on the applicable return of the passthrough entity for the taxable year of such person.

(4) *Multiple undertakings treated as a single activity for a preceding taxable year.* If a person (including a passthrough entity) treats undertakings as part of the same activity on such person's return for a taxable year ending after August 9, 1989, such person may not treat such undertakings as part of different activities under this paragraph (o) for any subsequent taxable year.

(5) *Applicable return of passthrough entity.* For purposes of this paragraph (o), the applicable return of a passthrough entity for a taxable year of a taxpayer is the return reporting the passthrough entity's income, gain, loss, deductions, and credits taken into account by the taxpayer for such taxable year.

(6) *Participation.* The following rules apply to multiple activities (the ''separate activities'') that would be treated as a single activity (the ''original activity'') if the taxpayer's activities were determined without regard to this paragraph (o):

(i) The taxpayer shall be treated as materially participating (within the meaning of § 1.469–5T) for the taxable year in the separate activities if and only if the taxpayer would, but for the application of this paragraph (o), be treated as materially participating for the taxable year in the original activity.

(ii) The taxpayer shall be treated as significantly participating (within the meaning of § 1.469–5T(c)(2)) for the taxable year in the separate activities if and only if the taxpayer would, but for the application of this paragraph (o), be treated as significantly participating for the taxable year in the original activity.

(7) *Election*—(i) *In general.* A person makes an election with respect to an undertaking under this paragraph (o) by attaching the written statement described in paragraph (o)(7)(ii) of this section to such person's return for the taxable year for which the election is made (see paragraph (o)(2) of this section).

(ii) *Written statement.* The written statement required by paragraph (o)(7)(i) of this section must—

(A) State the name, address, and taxpayer identification number of the person making the election;

(B) Contain a declaration that an election is being made under § 1.469–4T(o);

(C) Identify the undertaking with respect to which such election is being made; and

(D) Identify the remainder of the activity in which such undertaking would otherwise be included.

(8) *Examples.* The following examples illustrate the application of this paragraph (o):

Example (1). (i) During 1989, the taxpayer, an individual whose taxable year is the calendar year, acquires and is the direct owner of ten grocery stores. The operations of each grocery store are treated under paragraph (c)(1) of this section as a single undertaking that is separate from other undertakings (a ''grocery-store undertaking''), and the taxpayer's interests in the grocery-store undertakings would be treated as part of the same activity of the taxpayer under paragraph (f)(2) of this section.

(ii) Paragraph (o)(2) of this section provides that, with certain exceptions, undertakings that would be treated as part of the same activity under other rules in this section may, at the election of the taxpayer, be treated as separate activities. Thus, the taxpayer may elect to treat each grocery-store undertaking as a separate activity for 1989. Alternatively, the taxpayer may combine grocery-store undertakings in any manner and treat each combination of undertakings (and each uncombined undertaking) as a separate activity for 1989. In either case, the election must be made by attaching the written statement described in paragraph (o)(7)(ii) of this section to the taxpayer's 1989 return.

Example (2). (i) The facts are the same as in example (1). In addition, the taxpayer, in 1989, elects to treat each grocery-store undertaking as a separate activity and participates for 15 hours in each of the grocery-store undertakings.

(ii) The taxpayer's interest in each grocery-store undertaking is treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1989 (a ''grocery-store activity''). In 1989, however, the taxpayer participates for more than 100 hours in the activity in which the undertakings would be included (but for the election to treat the grocery-store undertakings as separate activities) and would be treated under § 1.469–5T(c)(2) as significantly participating in such activity. Accordingly, the taxpayer is treated under paragraph (o)(6)(ii) of this section as significantly participating in each of the grocery-store activities for 1989.

Example (3). (i) The facts are the same as in example (1). In addition, the taxpayer, in 1989, elects to treat each grocery-store undertaking as a separate activity. The taxpayer does not participate in any of the grocery-store undertakings in 1989 or 1990, and sells one of the grocery stores in 1990.

(ii) As in example (2), the taxpayer's interests in each grocery-store undertaking is treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1989. Because the taxpayer elected to treat the undertakings as separate activities for a preceding taxable year (1989), each grocery-store undertaking is also treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1990. In addition, each of the taxpayer's grocery-store activities is a passive activity for 1989 and 1990 because the taxpayer does not participate in any of the grocery store undertakings for 1989 and 1990. Accordingly, the taxpayer's sale of the grocery store will generally be treated as a disposition of the taxpayer's entire interest in a passive activity for purposes of section 469(g) and the rules to be contained in § 1.469–6T (relating to the treatment of losses upon certain dispositions of passive and former passive activities).

Example (4). (i) The facts are the same as in example (3), except that the taxpayer elects to treat the grocery-store undertakings as two separate activities. One of the activities includes three grocery-store undertakings, and the store sold in 1990 is part of this activity. The other activity includes the seven remaining grocery-store undertakings.

(ii) Paragraph (o)(4) of this section provides that a person who treats undertakings as part of the same activity for a taxable year ending after August 9, 1989, may not elect to treat those undertakings as separate activities for a subsequent taxable year. The grocery store sold in 1990 was treated for 1989 as part of an activity that includes two other grocery stores. Thus, those three stores must be treated as part of the same activity for 1990. Accordingly, the taxpayer's sale of the grocery store cannot be treated as a disposition of the taxpayer's entire interest in a passive activity for purposes of section 469(g) and the rules to be contained in § 1.469–6T.

Example (5). (i) The facts are the same as in example (1), except that the taxpayer is a partner in a partnership that acquires and is the direct owner of the ten grocery stores. The taxable year of the partnership ends on November 30, and the partnership acquires the grocery stores in its taxable year ending on November 30, 1989. In its return for that taxable year, the partnership treats the grocery-store undertakings as a single activity.

(ii) Paragraph (o)(3) of this section provides that a person who holds undertakings through a passthrough entity may not elect to treat those undertakings as separate activities if they are treated as part of the same activity on the applicable return of the passthrough entity. Under paragraph (o)(5) of this section, the applicable return of the partnership for the taxpayer's 1989 taxable year is the partnership's return for its taxable year ending on November 30, 1989. Accordingly, the taxpayer must treat the grocery-store undertakings as a single activity for 1989 because those undertakings are treated as a single activity on the partnership's return for its taxable year ending in 1989.

(iii) Under paragraph (o)(4) of this section, the taxpayer must continue treating the grocery-store undertakings as part of the same activity for taxable years after 1989. This rule applies even if the partnership subsequently distributes its interest in the grocery stores to the taxpayer, and the taxpayer becomes the direct owner of the grocery-store undertakings.

(p) Special rule for taxable years ending before August 10, 1989—(1) *In general.* For purposes of applying section 469 and the regulations thereunder for a taxable year ending before August 10, 1989, a taxpayer's business and rental operations may be organized into activities under the rules or paragraphs (b) through (n) of this section or under any other reasonable method. For example, for such taxable years a taxpayer may treat each of the taxpayer's undertakings as a separate activity, or a taxpayer may treat undertakings that involve the provision of similar goods or services as a single activity.

(2) *Unreasonable methods.* A method of organizing business and rental operations into activities is not reasonable if such method—

(i) Treats rental operations (within the meaning of paragraph (d)(3) of this section) that are not ancillary to a trade or business activity (within the meaning of § 1.469–1T(e)(2)) as part of a trade or business activity;

(ii) Treats operations that are not rental operations and are not ancillary to a rental activity (within the meaning of § 1.469–1T(e)(3)) as part of a rental activity;

(iii) Includes in a passive activity of a taxpayer any oil or gas well that would be treated, under paragraph (e)(1) of this section, as a separate undertaking in determining the taxpayer's activities;

(iv) Includes in a passive activity of a taxpayer any interest in a dwelling unit that would be treated, under paragraph (K)(7) of this section, as a separate activity of the taxpayer; or

(v) Is inconsistent with the taxpayer's method of organizing business and rental operations into activities for the taxpayer's first taxable year beginning after December 31, 1986.

(3) *Allocation of dissallowed deductions in succeeding taxable year.* If any of the taxpayer's passive activity deductions or the taxpayer's credits from passive

activities are disallowed under § 1.469–1T for the last taxable year of the taxpayer ending before August 10, 1989, such disallowed deductions or credits shall be allocated among the taxpayer's activities for the first taxable year of the taxpayer ending after August 9, 1989, using any reasonable method. See § 1.469–1T(f)(4).

[T.D. 8253, 54 FR 20542, May 12, 1989]

§ 1.469–5 Material participation.

(a)–(e) [Reserved]

(f) *Participation*—(1) *In general.* Except as otherwise provided in this paragraph (f), any work done by an individual (without regard to the capacity in which the individual does the work) in connection with an activity in which the individual owns an interest at the time the work is done shall be treated for purposes of this section as participation of the individual in the activity.

(f)(2)–(h)(2) [Reserved]

(h)(3) *Coordination with rules governing the treatment of passthrough entities.* If a taxpayer takes into account for a taxable year of the taxpayer any item of gross income or deduction from a partnership or S corporation that is characterized as an item of gross income or deduction from an activity in which the taxpayer materially participated under § 1.469–2T(e)(1), the taxpayer is treated as materially participating in the activity for the taxable year for purposes of applying § 1.469–5T(a)(5) and (6) to any succeeding taxable year of the taxpayer.

(i) [Reserved]

(j) *Material participation for preceding taxable years*—(1) *In general.* For purposes of § 1.469–5T(a)(5) and (6), a taxpayer has materially participated in an activity for a preceding taxable year if the activity includes significant section 469 activities that are substantially the same as significant section 469 activities that were included in an activity in which the taxpayer materially participated (determined without regard to § 1.469–5T(a)(5)) for the preceding taxable year.

(2) *Material participation for taxable years beginning before January 1, 1987.* In any case in which it is necessary to determine whether an individual materially participated in any activity for a taxable year beginning before January 1, 1987 (other than a taxable year of a partnership, S corporation, estate, or trust ending after December 31, 1986), the determination shall be made without regard to paragraphs (a)(2) through (7) of this section.

(k) *Examples.* Example (1)—Example (4) [Reserved]

Example (5). In 1993, D, an individual, acquires stock in an S corporation engaged in a trade or business activity (within the meaning of § 1.469–1(e)(2)). For every taxable year from 1993 through 1997, D is treated as materially participating (without regard to § 1.469–5T(a)(5)) in the activity. D retires from the activity at the beginning of 1998, and would not be treated as materially participating in the activity for 1998 and subsequent taxable years if material participation of those years were determined without regard to § 1.469–5T(a)(5). Under § 1.469–5T(a)(5) of this section, however, D is treated as materially participating in the activity for taxable years 1998 through 2003 because D materially participated in the activity (determined without regard to § 1.469–5T(a)(5) for five taxable years during the ten taxable years that immediately precede each of those years. D is not treated under § 1.469–5T(a)(5) as materially participating in the activity for taxable years beginning after 2003 because for those years D has not materially participated in the activity (determined without regard to § 1.469–5T(a)(5) for five of the last ten immediately preceding taxable years.

[T.D. 8417, 57 FR 20758, May 15, 1992]

§ 1.469–5T Material participation (temporary).

(a) *In general.* Except as provided in paragraphs (e) and (h)(2) of this section, an individual shall be treated, for purposes of section 469 and the regulations thereunder, as materially participating in an activity for the taxable year if and only if—

(1) The individual participates in the activity for more than 500 hours during such year;

(2) The individual's participation in the activity for the taxable year constitutes substantially all of the participation in such activity of all individuals (including individuals who are not owners of interests in the activity) for such year;

(3) The individual participates in the activity for more than 100 hours during the taxable year, and such individual's participation in the activity for the

taxable year is not less than the participation in the activity of any other individual (including individuals who are not owners of interests in the activity) for such year;

(4) The activity is a significant participation activity (within the meaning of paragraph (c) of this section) for the taxable year, and the individual's aggregate participation in all significant participation activities during such year exceeds 500 hours;

(5) The individual materially participated in the activity (determined without regard to this paragraph (a)(5)) for any five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year;

(6) The activity is a personal service activity (within the meaning of paragraph (d) of this section), and the individual materially participated in the activity for any three taxable years (whether or not consecutive) preceding the taxable year; or

(7) Based on all of the facts and circumstances (taking into account the rules in paragraph (b) of this section), the individual participates in the activity on a regular, continuous, and substantial basis during such year.

(b) *Facts and circumstances*—(1) *In general.* [Reserved]

(2) *Certain participation insufficient to constitute material participation under this paragraph (b)* —(i) *Participation satisfying standards not contained in section 469.* Except as provided in section 469(h)(3) and paragraph (h)(2) of this section (relating to certain retired individuals and surviving spouses in the case of farming activities), the fact that an individual satisfies the requirements of any participation standard (whether or not referred to as ''material participation'') under any provision (including sections 1402 and 2032A and the regulations thereunder) other than section 469 and the regulations thereunder shall not be taken into account in determining whether such individual materially participates in any activity for any taxable year for purposes of section 469 and the regulations thereunder.

(ii) *Certain management activities.* An individual's services performed in the management of an activity shall not be taken into account in determining whether such individual is treated as materially participating in such activity for the taxable year under paragraph (a)(7) of this section unless, for such taxable year—

(A) No person (other than such individual) who performs services in connection with the management of the activity receives compensation described in section 911(d)(2)(A) in consideration for such services; and

(B) No individual performs services in connection with the management of the activity that exceed (by hours) the amount of such services performed by such individual.

(iii) *Participation less than 100 hours.* If an individual participates in an activity for 100 hours or less during the taxable year, such individual shall not be treated as materially participating in such activity for the taxable year under paragraph (a)(7) of this section.

(c) *Significant participation activity* —(1) *In general.* For purposes of paragraph (a)(4) of this section, an activity is a significant participation activity of an individual if and only if such activity—

(i) Is a trade or business activity (within the meaning of §1.469–1T(e)(2)) in which the individual significantly participates for the taxable year; and

(ii) Would be an activity in which the individual does not materially participate for the taxable year if material participation for such year were determined without regard to paragraph (a)(4) of this section.

(2) *Significant participation.* An individual is treated as significantly participating in an activity for a taxable year if and only if the individual participates in the activity for more than 100 hours during such year.

(d) *Personal service activity.* An activity constitutes a personal service activity for purposes of paragraph (a)(6) of this section if such activity involves the performance of personal services in—

(1) The fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting; or

(2) Any other trade or business in which capital is not a material income-producing factor.

(e) *Treatment of limited partners*—(1) *General rule.* Except as otherwise provided in this paragraph (e), an individual shall not be treated as materially participating in any activity of a limited partnership for purposes of applying section 469 and the regulations thereunder to—

(i) The individual's share of any income, gain, loss, deduction, or credit from such activity that is attributable to a limited partnership interest in the partnership; and

(ii) Any gain or loss from such activity recognized upon a sale or exchange of such an interest.

(2) *Exceptions.* Paragraph (e)(1) of this section shall not apply to an individual's share of income, gain, loss, deduction, and credit for a taxable year from any activity in which the individual would be treated as materially participating for the taxable year under paragraph (a)(1), (5), or (6) of this section if the individual were not a limited partner for such taxable year.

(3) *Limited partnership interest*—(i) *In general.* Except as provided in paragraph (e)(3)(ii) of this section, for purposes of section 469(h)(2) and this paragraph (e), a partnership interest shall be treated as a limited partnership interest if—

(A) Such interest is designated a limited partnership interest in the limited partnership agreement or the certificate of limited partnership, without regard to whether the liability of the holder of such interest for obligations of the partnership is limited under the applicable State law; or

(B) The liability of the holder of such interest for obligations of the partnership is limited, under the law of the State in which the partnership is organized, to a determinable fixed amount (for example, the sum of the holder's capital contributions to the partnership and contractural obligations to make additional capital contributions to the partnership).

(ii) *Limited partner holding general partner interest.* A partnership interest of an individual shall not be treated as a limited partnership interest for the individual's taxable year if the individual is a general partner in the partnership at all times during the partnership's taxable year ending with or within the individual's taxable year (or the portion of the partnership's taxable year during which the individual (directly or indirectly) owns such limited partnership interest).

(f) *Participation*—(1) [Reserved] See §1.469–5(f)(1) for rules relating to this paragraph.

(2) *Exceptions*—(i) *Certain work not customarily done by owners.* Work done in connection with an activity shall not be treated as participation in the activity for purposes of this section if—

(A) Such work is not of a type that is customarily done by an owner of such an activity; and

(B) One of the principal purposes for the performance of such work is to avoid the disallowance, under section 469 and the regulations thereunder, of any loss or credit from such activity.

(ii) *Participation as an investor*—(A) *In general.* Work done by an individual in the individual's capacity as an investor in an activity shall not be treated as participation in the activity for purposes of this section unless the individual is directly involved in the day-to-day management or operations of the activity.

(B) *Work done in individual's capacity as an investor.* For purposes of this paragraph (f)(2)(ii), work done by an individual in the individual's capacity as an investor in an activity includes—

(*1*) Studying and reviewing financial statements or reports on operations of the activity;

(*2*) Preparing or compiling summaries or analyses of the finances or operations of the activity for the individual's own use; and

(*3*) Monitoring the finances or operations of the activity in a non-managerial capacity.

(3) *Participation of spouse.* In the case of any person who is a married individual (within the meaning of section 7703) for the taxable year, any participation by such person's spouse in the activity during the taxable year (without regard to whether the spouse owns an interest in the activity and without regard to whether the spouses file a joint return for the taxable year) shall be treated, for purposes of applying section 469 and the regulations thereunder to such person, as participation

by such person in the activity during the taxable year.

(4) *Methods of proof.* The extent of an individual's participation in an activity may be established by any reasonable means. Contemporaneous daily time reports, logs, or similar documents are not required if the extent of such participation may be established by other reasonable means. Reasonable means for purposes of this paragraph may include but are not limited to the identification of services performed over a period of time and the approximate number of hours spent performing such services during such period, based on appointment books, calendars, or narrative summaries.

(g) *Material participation of trusts and estates.* [Reserved]

(h) *Miscellaneous rules*—(1) *Participation of corporations.* For rules relating to the participation in an activity of a personal service corporation (within the meaning of § 1.468–1T(g)(2)(i)) or a closely held corporation (within the meaning of § 1.469–1T(g)(2)(ii)), see § 1.469–1T(g)(3).

(2) *Treatment of certain retired farmers and surviving spouses of retired or disabled farmers.* An individual shall be treated as materially participating for a taxable year in any trade or business activity of farming if paragraph (4) or (5) of section 2032A(b) would cause the requirements of section 2032A(b)(1)(C)(ii) to be met with respect to real property used in such activity had the individual died during such taxable year.

(3) *Coordination with rules governing the treatment of passthrough entities.* [Reserved] See § 1.469–5(h)(3) for rules relating to this paragraph.

(i) [Reserved]

(j) *Material participation for preceding taxable years.* [Reserved] See § 1.469–5(j) for rules relating to this paragraph.

(k) *Examples.* The following examples illustrate the application of this section:

Example 1. A, a calendar year individual, owns all of the stock of X, a C corporation. X is the general partner, and A is the limited partner, in P, a calendar year partnership. P has a single activity, a restaurant, which is a trade or business activity (within the meaning of § 1.469–1T(e)(2)). During the taxable year, A works for an average of 30 hours per week in connection with P's restaurant activity. Under paragraphs (a)(1) and (e)(2) of this section, A is treated as materially participating in the activity for the taxable year because A participates in the restaurant activity during such year for more than 500 hours. In addition, under § 1.469–1T(g)(3)(i), A's participation will cause X to be treated as materially participating in the restaurant activity.

Example 2. The facts are the same as in example (1), except that the partnership agreement provides that P's restaurant activity is to be managed by X, and A's work in the activity is performed pursuant to an employment contract between A and X. Under paragraph (f)(1) of this section, work done by A in connection with the activity in any capacity is treated as participation in the activity by A. Accordingly, the conclusion is the same as in example (1). The conclusion would be the same if A owned no stock in X at any time, although in that case A's participation would not be taken into account in determining whether X materially participates in the restaurant activity.

Example 3. B, an individual, is employed fulltime as a carpenter. B also owns an interest in a partnership which is engaged in a van conversion activity, which is a trade or business activity (within the meaning of § 1.469–1T(e)(2)). B and C, the other partner, are the only participants in the activity for the taxable year. The activity is conducted entirely on Saturdays. Each Saturday throughout the taxable year, B and C work for eight hours in the activity. Although B does not participate in the activity for more than 500 hours during the taxable year, under paragraph (a)(3) of this section, B is treated for such year as materially participating in the activity because B participates in the activity for more than 100 hours during the taxable year, and B's participation in the activity for such year is not less than the participation of any other person in the activity for such year.

Example 4. C, an individual, is employed full-time as an accountant. C also owns interests in a restaurant and a shoe store. The restaurant and shoe store are trade or business activities (within the meaning of § 1.469–1T(e)(2)) that are treated as separate activities under the rules to be contained in § 1.469–4T. Each activity has several full-time employees. During the taxable year, C works in the restaurant activity for 400 hours and in the shoe store activity for 150 hours. Under paragraph (c) of this section, both the restaurant and shoe store activities are significant participation activities of C for the taxable year. Accordingly, since C's aggregate participation in the restaurant and shoe store activities during the taxable year exceeds 500 hours, C is treated under paragraph (a)(4) of this section as materially participating in both activities.

Example 5. [Reserved] See § 1.469–5(k) *Example 5* for this example.

Example 6. The facts are the same as in example (5), except that D does not acquire any stock in the S corporation until 1994. Under paragraph (f)(1) of this section, D is not treated as participating in the activity for any taxable year prior to 1994 because D does not own as interest in the activity for any such taxable year. Accordingly, D materially participates in the activity for only one taxable year prior to 1995, and D is not treated under paragraph (a)(5) of this section as materially participating in the activity for 1995 or subsequent taxable years.

Example 7. (i) E, a married individual filing a separate return for the taxable year, is employed full-time as an attorney. E also owns an interest in a professional football team that is a trade or business activity (within the meaning of § 1.469–1T(e)(2)). E does no work in connection with this activity. E anticipates that, for the taxable year, E's deductions from the activity will exceed E's gross income from the activity and that, if E does not materially participate in the activity for the taxable year, part or all of F's passive activity loss for the taxable year will be disallowed under § 1.469–1T(a)(1)(i). Accordingly, E pays E's spouse to work as an office receptionist in connection with the activity for an average of 15 hours per week during the taxable year.

(ii) Under paragraph (f)(3) of this section any participation in the activity by E's spouse is treated as participation in the activity by E. However, under paragraph (f)(2)(i) of this section, the work done by E's spouse is not treated as participation in the activity because work as an office receptionist is not work of a type customarily done by an owner of a football team, and one of E's principal purposes for paying E's spouse to do this work is to avoid the disallowance under § 1.469–1T(a)(1)(i) of E's passive activity loss. Accordingly, E is not treated as participating in the activity for the taxable year.

Example 8. (i) F, an individual, owns an interest in a partnership that feeds and sells cattle. The general partner of the partnership periodically mails F a letter setting forth certain proposed actions and decisions with respect to the cattle-feeding operation. Such actions and decisions include, for example, what kind of feed to purchase, how much to purchase, and when to purchase it, how often to feed cattle, and when to sell cattle. The letters explain the proposed actions and decisions, emphasize that taking or not taking a particular action or decision is solely within the discretion of F and other partners, and ask F to indicate a decision with respect to each proposed action by answering certain questions. The general partner receives a fee that constitutes earned income (within the meaning of section 911 (d)(2)(A)) for managing the cattle-feeding operation. F is not treated as materially participating in the cattle-feeding operation under paragraph (a) (1) through (6) of this section.

(ii) F's only participation in the cattle-feeding operation is to make certain managerial decisions. Under paragraph (b)(2)(ii) of this section, such management services are not taken into account in determining whether the taxpayer is treated as materially participating in the activity for a taxable year under paragraph (a)(7) of this section, if any other person performs services in connection with the management of the activity and receives compensation described in section 911(d)(2)(A) for such services. Therefore, F is not treated as materially participating for the taxable year in the cattle-feeding operation.

[T.D. 8175, 53 FR 5725, Feb. 25, 1988; 53 FR 15494, Apr. 29, 1988, as amended by T.D. 8253, 54 FR 20565, May 12, 1989; T.D. 8417, 57 FR 20759, May 15, 1992; 61 FR 14247, Apr. 1, 1996]

§ 1.469–6 Treatment of losses upon certain dispositions. [Reserved]

§ 1.469–7 Treatment of self-charged items of income and expense. [Reserved]

§ 1.469–8 Application of section 469 to trust, estates, and their beneficiaries. [Reserved]

§ 1.469–9 Rules for certain rental real estate activities.

(a) *Scope and purpose.* This section provides guidance to taxpayers engaged in certain real property trades or businesses on applying section 469(c)(7) to their rental real estate activities.

(b) *Definitions.* The following definitions apply for purposes of this section:

(1) *Trade or business.* A *trade or business* is any trade or business determined by treating the types of activities in § 1.469–4(b)(1) as if they involved the conduct of a trade or business, and any interest in rental real estate, including any interest in rental real estate that gives rise to deductions under section 212.

(2) *Real property trade or business. Real property trade or business* is defined in section 469(c)(7)(C).

(3) *Rental real estate. Rental real estate* is any real property used by customers or held for use by customers in a rental activity within the meaning of § 1.469–1T(e)(3). However, any rental real estate that the taxpayer grouped with a

trade or business activity under §1.469–4(d)(1)(i)(A) or (C) is not an interest in rental real estate for purposes of this section.

(4) *Personal services. Personal services* means any work performed by an individual in connection with a trade or business. However, personal services do not include any work performed by an individual in the individual's capacity as an investor as described in §1.469–5T(f)(2)(ii).

(5) *Material participation. Material participation* has the same meaning as under §1.469–5T. Paragraph (f) of this section contains rules applicable to limited partnership interests in rental real estate that a qualifying taxpayer elects to aggregate with other interests in rental real estate of that taxpayer.

(6) *Qualifying taxpayer.* A *qualifying taxpayer* is a taxpayer that owns at least one interest in rental real estate and meets the requirements of paragraph (c) of this section.

(c) *Requirements for qualifying taxpayers*—(1) *In general.* A qualifying taxpayer must meet the requirements of section 469(c)(7)(B).

(2) *Closely held C corporations.* A closely held C corporation meets the requirements of paragraph (c)(1) of this section by satisfying the requirements of section 469(c)(7)(D)(i). For purposes of section 469(c)(7)(D)(i), gross receipts do not include items of portfolio income within the meaning of §1.469–2T(c)(3).

(3) *Requirement of material participation in the real property trades or businesses.* A taxpayer must materially participate in a real property trade or business in order for the personal services provided by the taxpayer in that real property trade or business to count towards meeting the requirements of paragraph (c)(1) of this section.

(4) *Treatment of spouses.* Spouses filing a joint return are qualifying taxpayers only if one spouse separately satisfies both requirements of section 469(c)(7)(B). In determining the real property trades or businesses in which a married taxpayer materially participates (but not for any other purpose under this paragraph (c)), work performed by the taxpayer's spouse in a trade or business is treated as work performed by the taxpayer under §1.469–5T(f)(3), regardless of whether the spouses file a joint return for the year.

(5) *Employees in real property trades or businesses.* For purposes of paragraph (c)(1) of this section, personal services performed during a taxable year as an employee generally will be treated as performed in a trade or business but will not be treated as performed in a real property trade or business, unless the taxpayer is a five-percent owner (within the meaning of section 416(i)(1)(B)) in the employer. If an employee is not a five-percent owner in the employer at all times during the taxable year, only the personal services performed by the employee during the period the employee is a five-percent owner in the employer will be treated as performed in a real property trade or business.

(d) *General rule for determining real property trades or businesses*—(1) *Facts and circumstances.* The determination of a taxpayer's real property trades or businesses for purposes of paragraph (c) of this section is based on all of the relevant facts and circumstances. A taxpayer may use any reasonable method of applying the facts and circumstances in determining the real property trades or businesses in which the taxpayer provides personal services. Depending on the facts and circumstances, a real property trade or business consists either of one or more than one trade or business specifically described in section 469(c)(7)(C). A taxpayer's grouping of activities under §1.469–4 does not control the determination of the taxpayer's real property trades or businesses under this paragraph (d).

(2) *Consistency requirement.* Once a taxpayer determines the real property trades or businesses in which personal services are provided for purposes of paragraph (c) of this section, the taxpayer may not redetermine those real property trades or businesses in subsequent taxable years unless the original determination was clearly inappropriate or there has been a material change in the facts and circumstances that makes the original determination clearly inappropriate.

(e) *Treatment of rental real estate activities of a qualifying taxpayer*—(1) *In general.* Section 469(c)(2) does not apply to any rental real estate activity of a taxpayer for a taxable year in which the taxpayer is a qualifying taxpayer under paragraph (c) of this section. Instead, a rental real estate activity of a qualifying taxpayer is a passive activity under section 469 for the taxable year unless the taxpayer materially participates in the activity. Each interest in rental real estate of a qualifying taxpayer will be treated as a separate rental real estate activity, unless the taxpayer makes an election under paragraph (g) of this section to treat all interests in rental real estate as a single rental real estate activity. Each separate rental real estate activity, or the single combined rental real estate activity if the taxpayer makes an election under paragraph (g), will be an activity of the taxpayer for all purposes of section 469, including the former passive activity rules under section 469(f) and the disposition rules under section 469(g). However, section 469 will continue to be applied separately with respect to each publicly traded partnership, as required under section 469(k), notwithstanding the rules of this section.

(2) *Treatment as a former passive activity.* For any taxable year in which a qualifying taxpayer materially participates in a rental real estate activity, that rental real estate activity will be treated as a former passive activity under section 469(f) if disallowed deductions or credits are allocated to the activity under § 1.469–1(f)(4).

(3) *Grouping rental real estate activities with other activities*—(i) *In general.* For purposes of this section, a qualifying taxpayer may not group a rental real estate activity with any other activity of the taxpayer. For example, if a qualifying taxpayer develops real property, constructs buildings, and owns an interest in rental real estate, the taxpayer's interest in rental real estate may not be grouped with the taxpayer's development activity or construction activity. Thus, only the participation of the taxpayer with respect to the rental real estate may be used to determine if the taxpayer materially participates in the rental real estate activity under § 1.469–5T.

(ii) *Special rule for certain management activities.* A qualifying taxpayer may participate in a rental real estate activity through participation, within the meaning of §§ 1.469–5(f) and 5T(f), in an activity involving the management of rental real estate (even if this management activity is conducted through a separate entity). In determining whether the taxpayer materially participates in the rental real estate activity, however, work the taxpayer performs in the management activity is taken into account only to the extent it is performed in managing the taxpayer's own rental real estate interests.

(4) *Example.* The following example illustrates the application of this paragraph (e).

Example. (i) Taxpayer *B* owns interests in three rental buildings, *U, V* and *W*. In 1995, *B* has $30,000 of disallowed passive losses allocable to Building *U* and $10,000 of disallowed passive losses allocable to Building *V* under § 1.469–1(f)(4). In 1996, *B* has $5,000 of net income from Building *U*, $5,000 of net losses from Building *V*, and $10,000 of net income from Building *W*. Also in 1996, *B* is a qualifying taxpayer within the meaning of paragraph (c) of this section. Each building is treated as a separate activity of *B* under paragraph (e)(1) of this section, unless *B* makes the election under paragraph (g) to treat the three buildings as a single rental real estate activity. If the buildings are treated as separate activities, material participation is determined separately with respect to each building. If *B* makes the election under paragraph (g) to treat the buildings as a single activity, all participation relating to the buildings is aggregated in determining whether *B* materially participates in the combined activity.

(ii) Effective beginning in 1996, *B* makes the election under paragraph (g) to treat the three buildings as a single rental real estate activity. *B* works full-time managing the three buildings and thus materially participates in the combined activity in 1996 (even if *B* conducts this management function through a separate entity, including a closely held C corporation). Accordingly, the combined activity is not a passive activity of *B* in 1996. Moreover, as a result of the election under paragraph (g), disallowed passive losses of $40,000 ($30,000+$10,000) are allocated to the combined activity. B's net income from the activity for 1996 is $10,000 ($5,000 − $5,000+$10,000). This net income is nonpassive income for purposes of section

469. However, under section 469(f), the net income from a former passive activity may be offset with the disallowed passive losses from the same activity. Because Buildings *U, V* and *W* are treated as one activity for all purposes of section 469 due to the election under paragraph (g), and this activity is a former passive activity under section 469(f), *B* may offset the $10,000 of net income from the buildings with an equal amount of disallowed passive losses allocable to the buildings, regardless of which buildings produced the income or losses. As a result, *B* has $30,000 ($40,000 − $10,000) of disallowed passive losses remaining from the buildings after 1996.

(f) *Limited partnership interests in rental real estate activities*—(1) *In general.* If a taxpayer elects under paragraph (g) of this section to treat all interests in rental real estate as a single rental real estate activity, and at least one interest in rental real estate is held by the taxpayer as a limited partnership interest (within the meaning of §1.469–5T(e)(3)), the combined rental real estate activity will be treated as a limited partnership interest of the taxpayer for purposes of determining material participation. Accordingly, the taxpayer will not be treated under this section as materially participating in the combined rental real estate activity unless the taxpayer materially participates in the activity under the tests listed in §1.469–5T(e)(2) (dealing with the tests for determining the material participation of a limited partner).

(2) *De minimis exception.* If a qualifying taxpayer elects under paragraph (g) of this section to treat all interests in rental real estate as a single rental real estate activity, and the taxpayer's share of gross rental income from all of the taxpayer's limited partnership interests in rental real estate is less than ten percent of the taxpayer's share of gross rental income from all of the taxpayer's interests in rental real estate for the taxable year, paragraph (f)(1) of this section does not apply. Thus the taxpayer may determine material participation under any of the tests listed in §1.469–5T(a) that apply to rental real estate activities.

(g) *Election to treat all interests in rental real estate as a single rental real estate activity*—(1) *In general.* A qualifying taxpayer may make an election to treat all of the taxpayer's interests in rental real estate as a single rental real estate activity. This election is binding for the taxable year in which it is made and for all future years in which the taxpayer is a qualifying taxpayer under paragraph (c) of this section, even if there are intervening years in which the taxpayer is not a qualifying taxpayer. The election may be made in any year in which the taxpayer is a qualifying taxpayer, and the failure to make the election in one year does not preclude the taxpayer from making the election in a subsequent year. In years in which the taxpayer is not a qualifying taxpayer, the election will not have effect and the taxpayer's activities will be those determined under §1.469–4. If there is a material change in the taxpayer's facts and circumstances, the taxpayer may revoke the election using the procedure described in paragraph (g)(3) of this section.

(2) *Certain changes not material.* The fact that an election is less advantageous to the taxpayer in a particular taxable year is not, of itself, a material change in the taxpayer's facts and circumstances. Similarly, a break in the taxpayer's status as a qualifying taxpayer is not, of itself, a material change in the taxpayer's facts and circumstances.

(3) *Filing a statement to make or revoke the election.* A qualifying taxpayer makes the election to treat all interests in rental real estate as a single rental real estate activity by filing a statement with the taxpayer's original income tax return for the taxable year. This statement must contain a declaration that the taxpayer is a qualifying taxpayer for the taxable year and is making the election pursuant to section 469(c)(7)(A). The taxpayer may make this election for any taxable year in which section 469(c)(7) is applicable. A taxpayer may revoke the election only in the taxable year in which a material change in the taxpayer's facts and circumstances occurs or in a subsequent year in which the facts and circumstances remain materially changed from those in the taxable year for which the election was made. To revoke the election, the taxpayer must file a statement with the taxpayer's original income tax return for the year of revocation. This statement must

contain a declaration that the taxpayer is revoking the election under section 469(c)(7)(A) and an explanation of the nature of the material change.

(h) *Interests in rental real estate held by certain passthrough entities*—(1) *General rule.* Except as provided in paragraph (h)(2) of this section, a qualifying taxpayer's interest in rental real estate held by a partnership or an S corporation (passthrough entity) is treated as a single interest in rental real estate if the passthrough entity grouped its rental real estate as one rental activity under § 1.469–4(d)(5). If the passthrough entity grouped its rental real estate into separate rental activities under § 1.469–4(d)(5), each rental real estate activity of the passthrough entity will be treated as a separate interest in rental real estate of the qualifying taxpayer. However, the qualifying taxpayer may elect under paragraph (g) of this section to treat all interests in rental real estate, including the rental real estate interests held through passthrough entities, as a single rental real estate activity.

(2) *Special rule if a qualifying taxpayer holds a fifty-percent or greater interest in a passthrough entity.* If a qualifying taxpayer owns, directly or indirectly, a fifty-percent or greater interest in the capital, profits, or losses of a passthrough entity for a taxable year, each interest in rental real estate held by the passthrough entity will be treated as a separate interest in rental real estate of the qualifying taxpayer, regardless of the passthrough entity's grouping of activities under § 1.469–4(d)(5). However, the qualifying taxpayer may elect under paragraph (g) of this section to treat all interests in rental real estate, including the rental real estate interests held through passthrough entities, as a single rental real estate activity.

(3) *Special rule for interests held in tiered passthrough entities.* If a passthrough entity owns a fifty-percent or greater interest in the capital, profits, or losses of another passthrough entity for a taxable year, each interest in rental real estate held by the lower-tier entity will be treated as a separate interest in rental real estate of the upper-tier entity, regardless of the lower-tier entity's grouping of activities under § 1.469–4(d)(5).

(i) [Reserved]

(j) *$25,000 offset for rental real estate activities of qualifying taxpayers*—(1) *In general.* A qualifying taxpayer's passive losses and credits from rental real estate activities (including prior-year disallowed passive activity losses and credits from rental real estate activities in which the taxpayer materially participates) are allowed to the extent permitted under section 469(i). The amount of losses or credits allowable under section 469(i) is determined after the rules of this section are applied. However, losses allowable by reason of this section are not taken into account in determining adjusted gross income for purposes of section 469(i)(3).

(2) *Example.* The following example illustrates the application of this paragraph (j).

Example (i) Taxpayer *A* owns building *X* and building *Y*, both interests in rental real estate. In 1995, *A* is a qualifying taxpayer within the meaning of paragraph (c) of this section. *A* does not elect to treat *X* and *Y* as one activity under section 469(c)(7)(A) and paragraph (g) of this section. As a result, *X* and *Y* are treated as separate activities pursuant to section 469(c)(7)(A)(ii). *A* materially participates in *X* which has $100,000 of passive losses disallowed from prior years and produces $20,000 of losses in 1995. *A* does not materially participate in *Y* which produces $40,000 of income in 1995. *A* also has $50,000 of income from other nonpassive sources in 1995. *A* otherwise meets the requirements of section 469(i).

(ii) Because *X* is not a passive activity in 1995, the $20,000 of losses produced by *X* in 1995 are nonpassive losses that may be used by *A* to offset part of the $50,000 of nonpassive income. Accordingly, *A* is left with $30,000 ($50,000–$20,000) of nonpassive income. In addition, A may use the prior year disallowed passive losses of *X* to offset any income from *X* and passive income from other sources. Therefore, *A* may offset the $40,000 of passive income from *Y* with $40,000 of passive losses from *X*.

(iii) Because *A* has $60,000 ($100,000–$40,000) of passive losses remaining from *X* and meets all of the requirements of section 469(i), *A* may offset up to $25,000 of nonpassive income with passive losses from *X* pursuant to section 469(i). As a result, *A* has $5,000 ($30,000–$25,000) of nonpassive income remaining and disallowed passive losses from *X* of $35,000 ($60,000–$25,000) in 1995.

[T.D. 8645, 60 FR 66499, Dec. 22, 1995]

§1.469–10 Application of section 469 to publicly traded partnerships.

(a) [Reserved].

(b) *Publicly traded partnership*—(1) *In general.* For purposes of section 469(k), a partnership is a publicly traded partnership only if the partnership is a publicly traded partnership as defined in §1.7704–1.

(2) *Effective date.* This section applies for taxable years of a partnership beginning on or after December 17, 1998.

[T.D. 8799, 63 FR 69553, Dec. 17, 1998]

§1.469–11 Effective date and transition rules.

(a) *Generally applicable effective dates.* Except as otherwise provided in this section—

(1) The rules contained in §§1.469–1, 1.469–1T, 1.469–2, 1.469–2T, 1.469–3, 1.469–3T, 1.469–4, 1.469–5, and 1.469–5T apply for taxable years ending after May 10, 1992.

(2) The rules contained in 26 CFR 1.469–1T, 1.469–2T, 1.469–3T, 1.469–4T, 1.469–5T, 1.469–11T (b) and (c) (as contained in the CFR edition revised as of April 1, 1992) apply for taxable years beginning after December 31, 1986, and ending on or before May 10, 1992;

(3) The rules contained in §1.469–9 apply for taxable years beginning on or after January 1, 1995, and to elections made under §1.469–9(g) with returns filed on or after January 1, 1995; and

(4) This section applies for taxable years beginning after December 31, 1986.

(b) *Additional effective dates.*—(1) *Application of 1992 amendments for taxable years beginning before October 4, 1994.* Except as provided in paragraph (b)(2) of this section, for taxable years that end after May 10, 1992, and begin before October 4, 1994, a taxpayer may determine tax liability in accordance with Project PS–1–89 published at 1992–1 C.B. 1219 (see §601.601(d)(2)(ii)(b) of this chapter).

(2) *Additional transition rule for 1992 amendments.* If a taxpayer's first taxable year ending after May 10, 1992, begins on or before that date, the taxpayer may treat the taxable year, for purposes of paragraph (a) of this section, as a taxable year ending on or before May 10, 1992.

(3) *Fresh starts under consistency rules*—(i) *Regrouping when tax liability is first determined under Project PS–1–89.* For the first taxable year in which a taxpayer determines its tax liability under Project PS–1–89, the taxpayer may regroup its activities without regard to the manner in which the activities were grouped in the preceding taxable year and must regroup its activities if the grouping in the preceding taxable year is inconsistent with the rules of Project PS–1–89.

(ii) *Regrouping when tax liability is first determined under §1.469–4.* For the first taxable year in which a taxpayer determines its tax liability under §1.469–4, rather than under the rules of Project PS–1–89, the taxpayer may regroup its activities without regard to the manner in which the activities were grouped in the preceding taxable year and must regroup its activities if the grouping in the preceding taxable year is inconsistent with the rules of §1.469–4.

(iii) *Regrouping when taxpayer is first subject to section 469(c)(7).* For the first taxable year beginning after December 31, 1993, a taxpayer may regroup its activities to the extent necessary or appropriate to avail itself of the provisions of section 469(c)(7) and without regard to the manner in which the activities were grouped in the preceding taxable year.

(4) *Certain investment credit property.* (i) The rules contained in §1.469–3(f) apply with respect to property placed in service after December 31, 1990 (other than property described in section 11813 (c)(2) of the Omnibus Reconciliation Act of 1990 (P.L. 101–508)).

(ii) The rules contained in 26 CFR 1.469–3T(f) (as contained in the CFR edition revised as of April 1, 1992) apply with respect to property placed in service on or before December 31, 1990, and property described in section 11813(c)(2) of the Omnibus Reconcilation Act of 1990.

(c) *Special rules*—(1) *Application of certain income recharacterization rules*—(i) *In general.* No amount of gross income shall be treated under §1.469–2T(f)(3) through (7) as income that is not from a passive activity for any taxable year of the taxpayer beginning before January 1, 1988.

(ii) *Property rented to a nonpassive activity.* In applying § 1.469–2(f)(6) or § 1.469–2T(f)(6) to a taxpayer's rental of an item of property, the taxpayer's net rental activity income (within the meaning of § 1.469–2(f)(9)(iv) or § 1.469–2T(f)(9)(iv)) from the property for any taxable year beginning after December 31, 1987, does not include the portion of the income (if any) that is attributable to the rental of that item of property pursuant to a written binding contract entered into before February 19, 1988.

(2) *Qualified low-income housing projects.* For a transitional rule concerning the application of section 469 to losses from qualified low-income housing projects, see section 502 of the Tax Reform Act of 1986.

(3) *Effect of events occurring in years prior to 1987.* The treatment for a taxable year beginning after December 31, 1986, of any item of income, gain, loss, deduction, or credit as an item of passive activity gross income, passive activity deduction, or credit from a passive activity, is determined as if section 469 and the regulations thereunder had been in effect for taxable years beginning before January 1, 1987, but without regard to any passive activity loss or passive activity credit that would have been disallowed for any taxable year beginning before January 1, 1987, if section 469 and the regulations thereunder had been in effect for that year. For example, in determining whether a taxpayer materially participates in an activity under § 1.469–5T(a)(5) (relating to taxpayers who have materially participated in an activity for five of the ten immediately preceding taxable years) for any taxable year beginning after December 31, 1986, the taxpayer's participation in the activity for all prior taxable years (including taxable years beginning before 1987) is taken into account. See § 1.469–5(j) (relating to the determination of material participation for taxable years beginning before January 1, 1987).

(d) *Examples.* The following examples illustrate the application of paragraph (c) of this section:

Example 1. A, a calendar year individual, is a partner in a partnership with a taxable year ending on January 31. During its taxable year ending January 31, 1987, the partnership was engaged in a single activity involving the conduct of a trade or business. In applying section 469 and the regulations thereunder to A for calendar year 1987, A's distributive share of partnership items for the partnership's taxable year ending January 31, 1987, is taken into account. Therefore, under § 1.469–2T(e)(1) and paragraph (c)(3) of this section, A's participation in the activity throughout the partnership's taxable year beginning February 1, 1986, and ending January 31, 1987, is taken into account for purposes of determining the character under section 469 of the items of gross income, deduction, and credit allocated to A for the partnership's taxable year ending January 31, 1987.

Example 2. B, a calendar year individual, is a beneficiary of a trust described in section 651 that has a taxable year ending January 31. The trust conducts a rental activity (within the meaning of § 1.469–1T(e)(3)). Because the trust's taxable year ending January 31, 1987, began before January 1, 1987, section 469 and the regulations thereunder do not applying to the trust for that year. Section 469 and the regulations thereunder do apply, however, to B for B's calender year 1987. Therefore, income of the trust from the rental activity for the trust's taxable year ending January 31, 1987, that is included in B's gross income for 1987 is taken into account in apply section 469 to B for 1987.

[T.D. 8417, 57 FR 20759, May 15, 1992, as amended by T.D. 8417, 59 FR 45623, Sept. 2, 1994; T.D. 8565, 59 FR 50489, Oct. 4, 1994; T.D. 8645, 60 FR 66501, Dec. 22, 1995]

INVENTORIES

§ 1.471–1 Need for inventories.

In order to reflect taxable income correctly, inventories at the beginning and end of each taxable year are necessary in every case in which the production, purchase, or sale of merchandise is an income-producing factor. The inventory should include all finished or partly finished goods and, in the case of raw materials and supplies, only those which have been acquired for sale or which will physically become a part of merchandise intended for sale, in which class fall containers, such as kegs, bottles, and cases, whether returnable or not, if title thereto will pass to the purchaser of the product to be sold therein. Merchandise should be included in the inventory only if title thereto is vested in the taxpayer. Accordingly, the seller should include in his inventory goods under contract for sale but not yet segregated and applied to the contract and goods out upon consignment, but should exclude from inventory goods sold (including containers), title to which has passed to the purchaser. A purchaser should include in inventory merchandise purchased (including containers), title to which has passed to him, although such merchandise is in transit or for other reasons has not been reduced to physical possession, but should not include goods ordered for future delivery, transfer of title to which has not yet been effected. (But see §1.472–1.)

[T.D. 6500, 25 FR 11724, Nov. 26, 1960]

§1.471–2 Valuation of inventories.

(a) Section 471 provides two tests to which each inventory must conform:

(1) It must conform as nearly as may be to the best accounting practice in the trade or business, and

(2) It must clearly reflect the income.

(b) It follows, therefore, that inventory rules cannot be uniform but must give effect to trade customs which come within the scope of the best accounting practice in the particular trade or business. In order to clearly reflect income, the inventory practice of a taxpayer should be consistent from year to year, and greater weight is to be given to consistency than to any particular method of inventorying or basis of valuation so long as the method or basis used is in accord with §§1.471–1 through 1.471–11.

(c) The bases of valuation most commonly used by business concerns and which meet the requirements of section 471 are (1) cost and (2) cost or market, whichever is lower. (For inventories by dealers in securities, see §1.471–5.) Any goods in an inventory which are unsalable at normal prices or unusable in the normal way because of damage, imperfections, shop wear, changes of style, odd or broken lots, or other similar causes, including second-hand goods taken in exchange, should be valued at bona fide selling prices less direct cost of disposition, whether subparagraph (1) or (2) of this paragraph is used, or if such goods consist of raw materials or partly finished goods held for use or consumption, they shall be valued upon a reasonable basis, taking into consideration the usability and the condition of the goods, but in no case shall such value be less than the scrap value. Bona fide selling price means actual offering of goods during a period ending not later than 30 days after inventory date. The burden of proof will rest upon the taxpayer to show that such exceptional goods as are valued upon such selling basis come within the classifications indicated above, and he shall maintain such records of the disposition of the goods as will enable a verification of the inventory to be made.

(d) In respect of normal goods, whichever method is adopted must be applied with reasonable consistency to the entire inventory of the taxpayer's trade or business except as to those goods inventoried under the last-in, first-out method authorized by section 472 or to animals inventoried under the elective unit, livestock-price-method authorized by §1.471–6. See paragraph (d) of §1.446–1 for rules permitting the use of different methods of accounting if the taxpayer has more than one trade or business. Where the taxpayer is engaged in more than one trade or business the Commissioner may require that the method of valuing inventories with respect to goods in one trade or business also be used with respect to similar goods in other trades or businesses if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essential to a clear reflection of income. Taxpayers were given an option to adopt the basis of either (1) cost or (2) cost or market, whichever is lower, for their 1920 inventories. The basis properly adopted for that year or any subsequent year is controlling, and a change can now be made only after permission is secured from the Commissioner. Application for permission to change the basis of valuing inventories shall be made in writing and filed with the Commissioner as provided in paragraph (e) of §1.446–1. Goods taken in the inventory which have been so intermingled that they cannot be identified with specific invoices will be deemed to be the goods most recently purchased or produced, and the cost thereof will be the actual cost of the goods purchased or produced during the period in which the quantity of goods in the inventory has been acquired. But see section 472 as to last-in, first-out inventories. Where the taxpayer maintains book inventories in accordance with a sound accounting system in which the respective inventory accounts are charged with the actual cost of the goods purchased or produced and credited with the value of goods used, transferred, or sold, calculated upon the basis of the actual cost of the goods acquired during the taxable year (including the inventory at the beginning of the year), the net value as shown by such inventory accounts will be deemed to be the cost of the goods on hand. The balances shown by such book inventories should be verified by physical inventories at reasonable intervals and adjusted to conform therewith.

(e) Inventories should be recorded in a legible manner, properly computed and summarized, and should be preserved as a part of the accounting records of the taxpayer. The inventories of taxpayers on whatever basis taken will be subject to investigation by the district director, and the taxpayer must satisfy the district director of the correctness of the prices adopted.

(f) The following methods, among others, are sometimes used in taking or valuing inventories, but are not in accord with the regulations in this part:

(1) Deducting from the inventory a reserve for price changes, or an estimated depreciation in the value thereof.

(2) Taking work in process, or other parts of the inventory, at a nominal price or at less than its proper value.

(3) Omitting portions of the stock on hand.

(4) Using a constant price or nominal value for so-called normal quantity of materials or goods in stock.

(5) Including stock in transit, shipped either to or from the taxpayer, the title to which is not vested in the taxpayer.

(6) Segregating indirect production costs into fixed and variable production cost classifications (as defined in § 1.471–11(b)(3)(ii)) and allocating only the variable costs to the cost of goods produced while treating fixed costs as period costs which are currently deductible. This method is commonly referred to as the ''direct cost'' method.

(7) Treating all or substantially all indirect production costs (whether classified as fixed or variable) as period costs which are currently deductible. This method is generally referred to as the ''prime cost'' method.

[T.D. 6500, 25 FR 11724, Nov. 26, 1960, as amended by T.D. 7285, 38 FR 26185, Sept. 19, 1973]

§ 1.471–3 Inventories at cost.

Cost means:

(a) In the case of merchandise on hand at the beginning of the taxable year, the inventory price of such goods.

(b) In the case of merchandise purchased since the beginning of the taxable year, the invoice price less trade or other discounts, except strictly cash discounts approximating a fair interest rate, which may be deducted or not at the option of the taxpayer, provided a consistent course is followed. To this net invoice price should be added transportation or other necessary charges incurred in acquiring possession of the goods. For taxpayers acquiring merchandise for resale that are subject to the provisions of section 263A, see §§ 1.263A–1 and 1.263A–3 for additional amounts that must be included in inventory costs.

(c) In the case of merchandise produced by the taxpayer since the beginning of the taxable year, (1) the cost of raw materials and supplies entering into or consumed in connection with the product, (2) expenditures for direct labor, and (3) indirect production costs incident to and necessary for the production of the particular article, including in such indirect production costs an appropriate portion of management expenses, but not including any cost of selling or return on capital, whether by way of interest or profit. See §§ 1.263A–1 and 1.263A–2 for more specific rules regarding the treatment of production costs.

(d) In any industry in which the usual rules for computation of cost of production are inapplicable, costs may be approximated upon such basis as may be reasonable and in conformity with established trade practice in the particular industry. Among such cases are:

(1) Farmers and raisers of livestock (see §1.471–6);

(2) Miners and manufacturers who by a single process or uniform series of processes derive a product of two or more kinds, sizes, or grades, the unit cost of which is substantially alike (see §1.471–7); and

(3) Retail merchants who use what is known as the ''retail method'' in ascertaining approximate cost (see §1.471–8).

Notwithstanding the other rules of this section, cost shall not include an amount which is of a type for which a deduction would be disallowed under section 162 (c), (f), or (g) and the regulations thereunder in the case of a business expense.

[T.D. 6500, 25 FR 11725, Nov. 26, 1960, as amended by T.D. 7285, 38 FR 26185, Sept. 19, 1973; T.D. 7345, 40 FR 7439, Feb. 20, 1975; T.D. 8131, 52 FR 10084, Mar. 30, 1987; T.D. 8482, 58 FR 42233, Aug. 9, 1993]

§1.471–4 Inventories at cost or market, whichever is lower.

(a) *In general*—(1) *Market definition.* Under ordinary circumstances and for normal goods in an inventory, *market* means the aggregate of the current bid prices prevailing at the date of the inventory of the basic elements of cost reflected in inventories of goods purchased and on hand, goods in process of manufacture, and finished manufactured goods on hand. The basic elements of cost include direct materials, direct labor, and indirect costs required to be included in inventories by the taxpayer (e.g., under section 263A and its underlying regulations for taxpayers subject to that section). For taxpayers to which section 263A applies, for example, the basic elements of cost must reflect all direct costs and all indirect costs properly allocable to goods on hand at the inventory date at the current bid price of those costs, including but not limited to the cost of purchasing, handling, and storage activities conducted by the taxpayer, both prior to and subsequent to acquisition or production of the goods. The determination of the current bid price of the basic elements of costs reflected in goods on hand at the inventory date must be based on the usual volume of particular cost elements purchased (or incurred) by the taxpayer.

(2) *Fixed price contracts.* Paragraph (a)(1) of this section does not apply to any goods on hand or in process of manufacture for delivery upon firm sales contracts (i.e., those not legally subject to cancellation by either party) at fixed prices entered into before the date of the inventory, under which the taxpayer is protected against actual loss. Any such goods must be inventoried at cost.

(3) *Examples.* The valuation principles in paragraph (a)(1) of this section are illustrated by the following examples:

Example 1. (i) Taxpayer A manufactures tractors. A values its inventory using cost or market, whichever is lower, under paragraph (a)(1) of this section. At the end of 1994, the cost of one of A's tractors on hand is determined as follows:

Direct materials	$3,000
Direct labor	4,000
Indirect costs under section 263A	3,000
Total section 263A costs (cost)	$10,000

(ii) A determines that the aggregate of the current bid prices of the materials, labor, and overhead required to reproduce the tractor at the end of 1994 are as follows:

Direct materials	$3,100
Direct labor	4,100
Indirect costs under section 263A	3,100
Total section 263A costs (market)	$10,300

(iii) In determining the lower of cost or market value of the tractor, A compares the cost of the tractor, $10,000, with the market value of the tractor, $10,300, in accordance with paragraph (c) of this section. Thus, under this section, A values the tractor at $10,000.

Example 2. (i) Taxpayer B purchases and resells several lines of shoes and is subject to section 263A. B values its inventory using cost or market, whichever is lower, under paragraph (a)(1) of this section. At the end of 1994, the cost of one pair of shoes on hand is determined as follows:

Acquisition cost	$200
Indirect costs under section 263A	10
Total section 263A costs (cost)	$210

(ii) B determines the aggregate current bid prices prevailing at the end of 1994 for the elements of cost (both direct costs and indirect costs incurred prior and subsequent to acquisition of the shoes) based on the volume of the elements usually purchased (or incurred) by B as follows:

Acquisition cost	$178
Indirect costs under section 263A	12
Total § 263A costs (market)	$190

(iii) In determining the lower of cost or market value of the shoes, B compares the cost of the pair of shoes, $210, with the market value of the shoes, $190, in accordance with paragraph (c) of this section. Thus, under this section, B values the shoes at $190.

(b) *Inactive markets.* Where no open market exists or where quotations are nominal, due to inactive market conditions, the taxpayer must use such evidence of a fair market price at the date or dates nearest the inventory as may be available, such as specific purchases or sales by the taxpayer or others in reasonable volume and made in good faith, or compensation paid for cancellation of contracts for purchase commitments. Where the taxpayer in the regular course of business has offered for sale such merchandise at prices lower than the current price as above defined, the inventory may be valued at such prices less direct cost of disposition, and the correctness of such prices will be determined by reference to the actual sales of the taxpayer for a reasonable period before and after the date of the inventory. Prices which vary materially from the actual prices so ascertained will not be accepted as reflecting the market.

(c) *Comparison of cost and market.* Where the inventory is valued upon the basis of cost or market, whichever is lower, the market value of each article on hand at the inventory date shall be compared with the cost of the article, and the lower of such values shall be taken as the inventory value of the article.

(d) *Effective date.* This section applies to inventory valuations for taxable years beginning after December 31, 1993. For taxable years beginning before January 1, 1994, taxpayers must take reasonable positions on their federal income tax returns with respect to the application of section 263A, and must have otherwise complied with § 1.471–4 (as contained in the 26 CFR part 1 edition revised April 1, 1993). For purposes of this paragraph (d), a reasonable position as to the application of section 263A is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1994. (See § 601.601(d)(2)(ii)(*b*) of this chapter.)

[T.D. 6500, 25 FR 11725, Nov. 26, 1960, as amended by T.D. 8482, 58 FR 42233, Aug. 9, 1993]

§ 1.471–5 Inventories by dealers in securities.

A dealer in securities who in his books of account regularly inventories unsold securities on hand either—

(a) At cost,

(b) At cost or market, whichever is lower, or

(c) At market value,

may make his return upon the basis upon which his accounts are kept, provided that a description of the method employed is included in or attached to the return, that all the securities are inventoried by the same method, and that such method is adhered to in subsequent years, unless another method is authorized by the Commissioner pursuant to a written application therefor filed as provided in paragraph (e) of § 1.446–1. A dealer in securities in whose books of account separate computations of the gain or loss from the sale of the various lots of securities sold are made on the basis of the cost of each lot shall be regarded, for the purposes of this section, as regularly inventorying his securities at cost. For the purposes of this section, a dealer in securities is a merchant of securities, whether an individual, partnership, or corporation, with an established place of business, regularly engaged in the purchase of securities and their resale to customers; that is, one who as a merchant buys securities and sells them to customers with a view to the gains and profits that may be derived therefrom. If such business is simply a branch of the activities carried on by such person, the securities inventoried as provided in this section may include only those held for purposes of resale and not for investment. Taxpayers who buy and sell or hold securities for investment or speculation, irrespective of whether such buying or selling constitutes the carrying on of a trade or business, and officers of corporations and members of partnerships who in their individual capacities buy and sell securities, are not dealers in securities within the meaning of this section. See §§1.263A–1 and 1.263A–3 for rules regarding the treatment of costs with respect to property acquired for resale.

[T.D. 6500, 25 FR 11725, Nov. 26, 1960, as amended by T.D. 8131, 52 FR 10084, Mar 30, 1987; T.D. 8482, 58 FR 42234, Aug. 9, 1993]

§1.471–6 Inventories of livestock raisers and other farmers.

(a) A farmer may make his return upon an inventory method instead of the cash receipts and disbursements method. It is optional with the taxpayer which of these methods of accounting is used but, having elected one method, the option so exercised will be binding upon the taxpayer for the year for which the option is exercised and for subsequent years unless another method is authorized by the Commissioner as provided in paragraph (e) of §1.446–1.

(b) In any change of accounting method from the cash receipts and disbursements method to an inventory method, adjustments shall be made as provided in section 481 (relating to adjustments required by change in method of accounting) and the regulations thereunder.

(c) Because of the difficulty of ascertaining actual cost of livestock and other farm products, farmers who render their returns upon an inventory method may value their inventories according to the ‘‘farm-price method’’, and farmers raising livestock may value their inventories of animals according to either the ‘‘farm-price method’’ or the ‘‘unit-livestock-price method’’. In addition, these inventory methods may be used to account for the costs of property produced in a farming business that are required to be capitalized under section 263A regardless of whether the property being produced is otherwise treated as inventory by the taxpayer, and regardless of whether the taxpayer is otherwise using the cash or an accrual method of accounting. Thus, for example, the unit livestock method may be utilized by a taxpayer in accounting under section 263A for the costs of raising animals that will be used for draft, breeding, or dairy purposes.

(d) The ‘‘farm-price method’’ provides for the valuation of inventories at market price less direct cost of disposition. If this method of valuation is used, it generally must be applied to all property produced by the taxpayer in the trade or business of farming, except as to livestock accounted for, at the taxpayer’s election, under the unit livestock method of accounting. However, see §1.263A–4T(c)(3) for an exception to this rule. If the use of the ‘‘farm-price method’’ of valuing inventories for any taxable year involves a change in method of valuing inventories from that employed in prior years, permission for such change shall first be secured from the Commissioner as provided in paragraph (e) of §1.446–1.

(e) The ‘‘unit-livestock-price method’’ provides for the valuation of the different classes of animals in the inventory at a standard unit price for each animal within a class. A livestock raiser electing this method of valuing his animals must adopt a reasonable classification of the animals in his inventory with respect to the age and kind included so that the unit prices assigned to the several classes will reasonably account for the normal costs incurred in producing the animals within such classes. Thus, if a cattle raiser determines that it costs approximately $15 to produce a calf, and $7.50 each year to raise the calf to maturity, his classifications and unit prices would be as follows: Calves, $15; yearlings, $22.50; 2-year olds, $30; mature animals, $37.50. The classification selected by the livestock raiser, and the unit prices assigned to the several classes, are subject to approval by the district director upon examination of the taxpayer’s return.

(f) A taxpayer who elects to use the ‘‘unit-livestock-price method’’ must apply it to all livestock raised, whether for sale or for draft, breeding, or dairy purposes. Except as otherwise provided in this paragraph, once established, the unit prices and classifications selected by the taxpayer must be consistently applied in all subsequent taxable years.

For taxable years beginning after August 22, 1997, a taxpayer using the unit livestock method must, however, annually reevaluate the unit livestock prices and must adjust the prices upward to reflect increases in the costs of raising livestock. The consent of the Commissioner is not required to make such upward adjustments. No other changes in the classification of animals or unit prices shall be made without the consent of the Commissioner. See § 1.263A–4T for rules regarding the computation of costs for purposes of the unit livestock method.

(g) A livestock raiser who uses the ''unit-livestock-price method'' must include in his inventory at cost any livestock purchased, except that animals purchased for draft, breeding, or dairy purposes can, at the election of the livestock raiser, be included in inventory or be treated as capital assets subject to depreciation after maturity. If the animals purchased are not mature at the time of purchase, the cost should be increased at the end of each taxable year in accordance with the established unit prices, except that no increase is to be made in the taxable year of purchase if the animal is acquired during the last six months of that year. If the records maintained permit identification of a purchased animal, the cost of such animal will be eliminated from the closing inventory in the event of its sale or loss. Otherwise, the first-in, first-out method of valuing inventories must be applied.

(h) If a taxpayer using the ''farm-price method'' desires to adopt the ''unit-livestock-price method'' in valuing his inventories of livestock, permission for the change shall first be secured from the Commissioner as provided in paragraph (e) of § 1.446–1. However, a taxpayer who has filed returns on the basis of inventories at cost, or cost or market whichever is lower, may adopt the ''unit-livestock-price method'' for valuing his inventories of livestock without formal application for permission, but the classifications and unit prices selected are subject to approval by the district director upon examination of the taxpayer's return. A livestock raiser who has adopted a constant unit-price method of valuing livestock inventories and filed returns on that basis will be considered as having elected the ''unit-livestock-price method''.

(i) If returns have been made in which the taxable income has been computed upon incomplete inventories, the abnormality should be corrected by submitting with the return for the current taxable year a statement for the preceding taxable year. In this statement such adjustments shall be made as are necessary to bring the closing inventory for the preceding taxable year into agreement with the opening complete inventory for the current taxable year. If necessary clearly to reflect income, similar adjustments may be made as at the beginning of the preceding year or years, and the tax, if any be due, shall be assessed and paid at the rate of tax in effect for such year or years.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960, as amended by T.D. 8131, 52 FR 10084, Mar. 30, 1987; T.D. 8729, 62 FR 44551, Aug. 22, 1997]

§ 1.471–7 Inventories of miners and manufacturers.

A taxpayer engaged in mining or manufacturing who by a single process or uniform series of processes derives a product of two or more kinds, sizes, or grades, the unit cost of which is substantially alike, and who in conformity to a recognized trade practice allocates an amount of cost to each kind, size, or grade of product, which in the aggregate will absorb the total cost of production, may, with the consent of the Commissioner, use such allocated cost as a basis for pricing inventories, provided such allocation bears a reasonable relation to the respective selling values of the different kinds, sizes, or grades of product. See section 472 as to last-in, first-out inventories.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960]

§ 1.471–8 Inventories of retail merchants.

(a) Retail merchants who employ what is known as the ''retail method'' of pricing inventories may make their returns upon that method, provided that the use of such method is designated upon the return, that accurate accounts are kept, and that such method is consistently adhered to unless a change is authorized by the Commissioner as provided in paragraph (e) of §1.446–1. Under the retail method the total of the retail selling prices of the goods on hand at the end of the year in each department or of each class of goods is reduced to approximate cost by deducting therefrom an amount which bears the same ratio to such total as—

(1) The total of the retail selling prices of the goods included in the opening inventory plus the retail selling prices of the goods purchased during the year, with proper adjustment to such selling prices for all mark-ups and mark-downs, less

(2) The cost of the goods included in the opening inventory plus the cost of the goods purchased during the year, bears to (1).

The result should represent as accurately as may be the amounts added to the cost price of the goods to cover selling and other expenses of doing business and for the margin of profit. See §§1.263A–1 and 1.263A–3 for rules regarding the computation of costs with respect to property acquired for resale.

(b) For further adjustments to be made in the case of a retail merchant using the last-in, first-out inventory method authorized by section 472, see paragraph (k) of §1.472–1.

(c) A taxpayer maintaining more than one department in his store or dealing in classes of goods carrying different percentages of gross profit should not use a percentage of profit based upon an average of his entire business, but should compute and use in valuing his inventory the proper percentages for the respective departments or classes of goods.

(d) A taxpayer (other than one using the last-in, first-out inventory method) who previously has determined inventories in accordance with the retail method, except that, to obtain a basis of approximate cost or market, whichever is lower, has consistently and uniformly followed the practice of adjusting the retail selling prices of the goods included in the opening inventory and purchased during the taxable year for mark-ups but not for mark-downs, may continue such practice subject to the conditions prescribed in this section. The adjustments must be bona fide and consistent and uniform. Where mark-downs are not included in the adjustments, mark-ups made to cancel or correct mark-downs shall not be included; and the mark-ups included must be reduced by the mark-downs made to cancel or correct such mark-ups.

(e) In no event shall mark-downs not based on actual reduction of retail sale prices, such as mark-downs based on depreciation and obsolescence, be recognized in determining the retail selling prices of the goods on hand at the end of the taxable year.

(f) A taxpayer (other than one using the last-in, first-out inventory method) who previously has determined inventories without following the practice of eliminating mark-downs in making adjustments to retail selling prices may adopt such practice, provided permission to do so is obtained in accordance with, and subject to the terms provided by, paragraph (e) of §1.446–1. A taxpayer filing a first return of income may adopt such practice subject to approval by the district director upon examination of the return.

(g) A taxpayer using the last-in, first-out inventory method in conjunction with retail computations must adjust retail selling prices for mark-downs as well as mark-ups, in order that there may be reflected the approximate cost of the goods on hand at the end of the taxable year regardless of market values.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960, as amended by T.D. 8131, 52 FR 10084, Mar. 30, 1987; T.D. 8482, 58 FR 42234, Aug. 9, 1993]

§1.471–9 Inventories of acquiring corporations.

For additional rules in the case of certain corporate acquisitions specified in section 381(a), see section 381(c)(5) and the regulations thereunder.

[T.D. 6500, 25 FR 11727, Nov. 26, 1960]

§1.471–10 Applicability of long-term contract methods.

See §1.451–3 for rules providing for the application of the long-term contract methods to certain manufacturing contracts.

[T.D. 8067, 51 FR 393, Jan. 6, 1986]

§ 1.471–11 Inventories of manufacturers.

(a) *Use of full absorption method of inventory costing.* In order to conform as nearly as may be possible to the best accounting practices and to clearly reflect income (as required by section 471 of the Code), both direct and indirect production costs must be taken into account in the computation of inventoriable costs in accordance with the ''full absorption'' method of inventory costing. Under the full absorption method of inventory costing production costs must be allocated to goods produced during the taxable year, whether sold during the taxable year or in inventory at the close of the taxable year determined in accordance with the taxpayer's method of identifying goods in inventory. Thus, the taxpayer must include as inventoriable costs all direct production costs and, to the extent provided by paragraphs (c) and (d) of this section, all indirect production costs. For purposes of this section, the term ''financial reports'' means financial reports (including consolidated financial statements) to shareholders, partners, beneficiaries or other proprietors and for credit purposes. See also § 1.263A–1T with respect to the treatment of production costs incurred in taxable years beginning after December 31, 1986, and before January 1, 1994. See also §§ 1.263A–1 and 1.263A–2 with respect to the treatment of production costs incurred in taxable years beginning after December 31, 1993.

(b) *Production costs*—(1) *In general.* Costs are considered to be production costs to the extent that they are incident to and necessary for production or manufacturing operations or processes. Production costs include direct production costs and fixed and variable indirect production costs.

(2) *Direct production costs.* (i) Costs classified as ''direct production costs'' are generally those costs which are incident to and necessary for production or manufacturing operations or processes and are components of the cost of either direct material or direct labor. Direct material costs include the cost of those materials which become an integral part of the specific product and those materials which are consumed in the ordinary course of manufacturing and can be identified or associated with particular units or groups of units of that product. See § 1.471–3 for the elements of direct material costs. Direct labor costs include the cost of labor which can be identified or associated with particular units or groups of units of a specific product. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor. For the treatment of rework labor, scrap, spoilage costs, and any other costs not specifically described as direct production costs see § 1.471–11(c)(2).

(ii) Under the full absorption method, a taxpayer must take into account all items of direct production cost in his inventoriable costs. Nevertheless, a taxpayer will not be treated as using an incorrect method of inventory costing if he treats any direct production costs as indirect production costs, provided such costs are allocated to the taxpayer's ending inventory to the extent provided by paragraph (d) of this section. Thus, for example, a taxpayer may treat direct labor costs as part of indirect production costs (for example, by use of the conversion cost method), provided all such costs are allocated to ending inventory to the extent provided by paragraph (d) of this section.

(3) *Indirect production costs*—(i) *In general.* The term ''indirect production costs'' includes all costs which are incident to and necessary for production or manufacturing operations or processes other than direct production costs (as defined in subparagraph (2) of this paragraph). Indirect production costs may be classified as to kind or type in accordance with acceptable accounting principles so as to enable convenient identification with various production or manufacturing activities or functions and to facilitate reasonable groupings of such costs for purposes of determining unit product costs.

(ii) *Fixed and variable classifications.* For purposes of this section, fixed indirect production costs are generally those costs which do not vary significantly with changes in the amount of goods produced at any given level of production capacity. These fixed costs may include, among other costs, rent and property taxes on buildings and machinery incident to and necessary for manufacturing operations or processes. On the other hand, variable indirect production costs are generally those costs which do vary significantly with changes in the amount of goods produced at any given level of production capacity. These variable costs may include, among other costs, indirect materials, factory janitorial supplies, and utilities. Where a particular cost contains both fixed and variable elements, these elements should be segregated into fixed and variable classifications to the extent necessary under the taxpayer's method of allocation, such as for the application of the practical capacity concept (as described in paragraph (d) (4) of this section).

(c) *Certain indirect and production costs*—(1) *General rule.* Except as provided in paragraph (c)(3) of this section and in paragraph (d)(6)(v) of §1.451–3, in order to determine whether indirect production costs referred to in paragraph (b) of this section must be included in a taxpayer's computation of the amount of inventoriable costs, three categories of costs have been provided in subparagraph (2) of this paragraph. Costs described in subparagraph (2)(i) of this paragraph must be included in the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(ii) of this paragraph need not enter into the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(iii) of this paragraph must be included in or excluded from the taxpayer's computation of the amount inventoriable costs in accordance with the treatment of such costs by the taxpayer in his financial reports and generally accepted accounting principles. For the treatment of indirect production costs described in subparagraph (2) of this paragraph in the case of a taxpayer who is not using comparable methods of accounting for such costs for tax and financial reporting see paragraph (c)(3) of this section. For contracts entered into after December 31, 1982, notwithstanding this section, taxpayers who use an inventory method of accounting for extended period long-term contracts (as defined in paragraph (b)(3) of §1.451–3) for tax purposes may be required to use the cost allocation rules provided in paragraph (d)(6) of §1.451–3 rather than the cost allocation rules provided in this section. See paragraph (d)(6)(v) of §1.451–3. After a taxpayer has determined which costs must be treated as indirect production costs includible in the computation of the amount of inventoriable costs, such costs must be allocated to a taxpayer's ending inventory in a manner prescribed by paragraph (d) of this section.

(2) *Includibility of certain indirect production costs*—(i) *Indirect production* costs included in inventoriable costs. Indirect production costs which must enter into the computation of the amount of inventoriable costs (regardless of their treatment by a taxpayer in his financial reports) include:

(a) Repair expenses,

(b) Maintenance,

(c) Utilities, such as heat, power and light,

(d) Rent,

(e) Indirect labor and production supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan,

(f) Indirect materials and supplies,

(g) Tools and equipment not capitalized, and

(h) Costs of quality control and inspection,

to the extent, and only to the extent, such costs are incident to and necessary for production or manufacturing operations or processes.

(ii) *Costs not included in inventoriable costs.* Costs which are not required to be included for tax purposes in the computation of the amount of inventoriable costs (regardless of their treatment by a taxpayer in his financial reports) include:

(a) Marketing expenses,

(b) Advertising expenses,

(c) Selling expenses,

(d) Other distribution expenses,

(e) Interest,

(f) Research and experimental expenses including engineering and product development expenses,

(g) Losses under section 165 and the regulations thereunder,

(h) Percentage depletion in excess of cost depletion,

(i) Depreciation and amortization reported for Federal income tax purposes in excess of depreciation reported by the taxpayer in his financial reports,

(j) Income taxes attributable to income received on the sale of inventory,

(k) Pension contributions to the extent that they represent past services cost,

(l) General and administrative expenses incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes, and

(m) Salaries paid to officers attributable to the performance of services which are incident to and necessary for the taxpayer's activities taken as a whole rather than to production or manufacturing operations or processes.

Notwithstanding the preceding sentence, if a taxpayer consistently includes in his computation of the amount of inventoriable costs any of the costs described in the preceding sentence, a change in such method of inclusion shall be considered a change in method of accounting within the meaning of sections 446, 481, and paragraph (e)(4) of this section.

(iii) *Indirect production costs includible in inventoriable costs depending upon treatment in taxpayer's financial reports.* In the case of costs listed in this subdivision, the inclusion or exclusion of such costs from the amount of inventoriable costs for purposes of a taxpayer's financial reports shall determine whether such costs must be included in or excluded from the computation of inventoriable costs for tax purposes, but only if such treatment is not inconsistent with generally accepted accounting principles. In the case of costs which are not included in subdivision (i) or (ii) of this subparagraph, nor listed in this subdivision, whether such costs must be included in or excluded from the computation of inventoriable costs for tax purposes depends upon the extent to which such costs are similar to costs included in subdivision (i) or (ii), and if such costs are dissimilar to costs in subdivision (i) or (ii), such costs shall be treated as included in or excludable from the amount of inventoriable costs in accordance with this subdivision. The costs listed in this subdivision are:

(a) Taxes. Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes) attributable to assets incident to and necessary for production or manufacturing operations or processes. Thus, for example, the cost of State and local property taxes imposed on a factory or other production facility and any State and local taxes imposed on inventory must be included in or excluded from the computation of the amount of inventoriable costs for tax purposes depending upon their treatment by a taxpayer in his financial reports.

(b) Depreciation and depletion. Depreciation reported in financial reports and cost depletion on assets incident to and necessary for production or manufacturing operations or processes. In computing cost depletion under this section, the adjusted basis of such assets shall be reduced by cost depletion and not by percentage depletion taken thereon.

(c) Employee benefits. Pension and profit-sharing contributions representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor incident to and necessary for production or manufacturing operations or processes. These other benefits include workmen's compensation expenses, payments under a wage continuation plan described in section 105(d), amounts of a type which would be includible in the gross income of employees under nonqualified pension, profit-sharing and stock bonus plans, premiums on life and health insurance and miscellaneous benefits provided for employees

such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deductions under chapter 1 of the Code.

(d) Costs attributable to strikes, rework labor, scrap and spoilage. Costs attributable to rework labor, scrap and spoilage which are incident to and necessary for production or manufacturing operations or processes and costs attributable to strikes incident to production or manufacturing operation or processes.

(e) Factory administrative expenses. Administrative costs of production (but not including any cost of selling or any return on capital) incident to and necessary for production or manufacturing operations or processes.

(f) Officers' salaries. Salaries paid to officers attributable to services performed incident to and necessary for production or manufacturing operations or processes.

(g) Insurance costs. Insurance costs incident to and necessary for production or manufacturing operations or processes such as insurance on production machinery and equipment. A change in the taxpayer's treatment in his financial reports of costs described in this subdivision which results in a change in treatment of such costs for tax purposes shall constitute a change in method of accounting within the meaning of sections 446 and 481 to which paragraph (e) applies.

(3) *Exception.* Except as provided in paragraph (d)(6) of §1.451–3, in the case of a taxpayer whose method of accounting for production costs in his financial reports is not comparable to his method of accounting for such costs for tax purposes (such as a taxpayer using the prime cost method for purposes of financial reports), the following rules apply:

(i) *Indirect production costs included in inventoriable costs.* Indirect production costs which must enter into the computation of the amount of inventoriable costs (to the extent, and only to the extent, such costs are incident to and necessary for production or manufacturing operations or processes) include:

(a) Repair expenses,

(b) Maintenance,

(c) Utilities, such as heat, power and light,

(d) Rent,

(e) Indirect labor and production supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan,

(f) Indirect materials and supplies,

(g) Tools and equipment not capitalized,

(h) Costs of quality control and inspection,

(i) Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes),

(j) Depreciation and amortization reported for financial purposes and cost depletion,

(k) Administrative costs of production (but not including any cost of selling or any return on capital) incident to and necessary for production or manufacturing operations or processes,

(l) Salaries paid to officers attributable to services performed incident to and necessary for production or manufacturing operations or processes, and

(m) Insurance costs incident to and necessary for production or manufacturing operations or processes such as insurance on production machinery and equipment.

(ii) *Costs not included in inventoriable costs.* Costs which are not required to be included in the computation of the amount of inventoriable costs include:

(a) Marketing expenses,

(b) Advertising expenses,

(c) Selling expenses,

(d) Other distribution expenses,

(e) Interest,

(f) Research and experimental expenses including engineering and product development expenses,

(g) Losses under section 165 and the regulations thereunder,

(h) Percentage depletion in excess of cost depletion,

(i) Depreciation reported for Federal income tax purposes in excess of depreciation reported by the taxpayer in his financial reports,

(j) Income taxes attributable to income received on the sale of inventory,

(k) Pension and profit-sharing contributions representing either past service costs or representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor. These other benefits include workmen's compensation expenses, payments under a wage continuation plan described in section 105(d), amounts of a type which would be includible in the gross income of employees under nonqualified pension, profit-sharing and stock bonus plans, premiums on life and health insurance and miscellaneous benefits provided for employees such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deductions under chapter 1 of the Code,

(l) Cost attributable to strikes, rework labor, scrap and spoilage,

(m) General and administrative expenses incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes, and

(n) Salaries paid to officers attributable to the performance of services which are incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes.

(d) *Allocation methods*—(1) *In general.* Indirect production costs required to be included in the computation of the amount of inventoriable costs pursuant to paragraphs (b) and (c) of this paragraph must be allocated to goods in a taxpayer's ending inventory (determined in accordance with the taxpayer's method of identification) by the use of a method of allocation which fairly apportions such costs among the various items produced. Acceptable methods for allocating indirect production costs to the cost of goods in the ending inventory include the manufacturing burden rate method and the standard cost method. In addition, the practical capacity concept can be used in conjunction with either the manufacturing burden rate or standard cost method.

(2) *Manufacturing burden rate method*—(i) *In general.* Manufacturing burden rates may be developed in accordance with acceptable accounting principles and applied in a reasonable manner. In developing a manufacturing burden rate, the factors described in paragraph (d)(2)(ii) of this section may be taken into account. Furthermore, if the taxpayer chooses, he may allocate different indirect production costs on the basis of different manufacturing burden rates. Thus, for example, the taxpayer may use one burden rate for allocating rent and another burden rate for allocating utilities. The method used by the taxpayer in allocating such costs in his financial reports shall be given great weight in determining whether the taxpayer's method employed for tax purposes fairly allocates indirect production costs to the ending inventory. Any change in a manufacturing burden rate which is merely a periodic adjustment to reflect current operating conditions, such as increases in automation or changes in operation, does not constitute a change in method of accounting under section 446. However, a change in the concept upon which such rates are developed does constitute a change in method of accounting requiring the consent of the Commissioner. The taxpayer shall maintain adequate records and working papers to support all manufacturing burden rate calculations.

(ii) *Development of manufacturing burden rate.* The following factors, among others, may be taken into account in developing manufacturing burden rates:

(a) The selection of an appropriate level of activity and period of time upon which to base the calculation of rates which will reflect operating conditions for purposes of the unit costs being determined;

(b) The selection of an appropriate statistical base such as direct labor hours, direct labor dollars, or machine hours, or a combination thereof, upon which to apply the overhead rate to determine production costs; and

(c) The appropriate budgeting, classification and analysis of expenses (for example, the analysis of fixed and variable costs).

(iii) *Operation of the manufacturing burden rate method. (a)* The purpose of the manufacturing burden rate method used in conjunction with the full absorption method of inventory costing is to allocate an appropriate amount of indirect production costs to a taxpayer's goods in ending inventory by the use of predetermined rates intended to approximate the actual amount of indirect production costs incurred. Accordingly, the proper use of the manufacturing burden rate method under this section requires that any net negative or net positive difference between the total predetermined amount of indirect production costs allocated to the goods in ending inventory and the total amount of indirect production costs actually incurred and required to be allocated to such goods (i.e., the under or over-applied burden) must be treated as an adjustment to the taxpayer's ending inventory in the taxable year in which such difference arises. However, if such adjustment is not significant in amount in relation to the taxpayer's total actual indirect production costs for the year then such adjustment need not be allocated to the taxpayer's goods in ending inventory unless such allocation is made in the taxpayer's financial reports. The taxpayer must treat both positive and negative adjustments consistently.

(b) Notwithstanding subdivision *(a),* the practical capacity concept may be used to determine the total amount of fixed indirect production costs which must be allocated to goods in ending inventory. See subparagraph (4) of this paragraph.

(3) *Standard cost method*—(i) *In general.* A taxpayer may use the so-called ''standard cost'' method of allocating inventoriable costs to the goods in ending inventory, provided he treats variances in accordance with the procedures prescribed in paragraph (d)(3)(ii) of this section. The method used by the taxpayer in allocating such costs in his financial reports shall be given great weight in determining whether the taxpayer's method employed for tax purposes fairly allocates indirect production costs to the ending inventory. For purposes of this subparagraph, a ''net positive overhead variance'' shall mean the excess of total standard (or estimated) indirect production costs over total actual indirect production costs and a ''net negative overhead variance'' shall mean the excess of total actual indirect production costs over total standard (or estimated) indirect production costs.

(ii) *Treatment of variances. (a)* The proper use of the standard cost method pursuant to this subparagraph requires that a taxpayer must reallocate to the goods in ending inventory a pro rata portion of any net negative or net positive overhead variances and any net negative or net positive direct production cost variances. The taxpayer must apportion such variances among his various items in ending inventory. However, if such variances are not significant in amount in relation to the taxpayer's total actual indirect production costs for the year then such variances need not be allocated to the taxpayer's goods in ending inventory unless such allocation is made in the taxpayer's financial reports. The taxpayer must treat both positive and negative variances consistently.

(b) Notwithstanding subdivision *(a),* the practical capacity concept may be used to determine the total amount of fixed indirect production costs which must be allocated to goods in ending inventory. See subparagraph (4) of this paragraph.

(4) *Practical capacity concept*—(i) *In general.* Under the practical capacity concept, the percentage of practical capacity represented by actual production (not greater than 100 percent), as calculated under subdivision (ii) of this subparagraph, is used to determine the total amount of fixed indirect production costs which must be included in the taxpayer's computation of the amount of inventoriable costs. The portion of such costs to be included in the taxpayer's computation of the amount of inventoriable costs is then combined with variable indirect production costs and both are allocated to the goods in ending inventory in accordance with this paragraph. See the example in subdivision (ii)*(d)* of this subparagraph. The difference (if any) between the amount of all fixed indirect production costs and the fixed indirect production costs which are included in the computation of the amount of inventoriable costs under the practical

capacity concept is allowable as a deduction for the taxable year in which such difference occurs.

(ii) *Calculation of practical capacity—(a) In general.* Practical capacity and theoretical capacity (as described in *(c)* of this subdivision) may be computed in terms of tons, pounds, yards, labor hours, machine hours, or any other unit of production appropriate to the cost accounting system used by a particular taxpayer. The determination of practical capacity and theoretical capacity should be modified from time to time to reflect a change in underlying facts and conditions such as increased output due to automation or other changes in plant operation. Such a change does not constitute a change in method of accounting under sections 446 and 481.

(b) Based upon taxpayer's experience. In selecting an appropriate level of production activity upon which to base the calculation of practical capacity, the taxpayer shall establish the production operating conditions expected during the period for which the costs are being determined, assuming that the utilization of production facilities during operations will be approximately at capacity. This level of production activity is frequently described as practical capacity for the period and is ordinarily based upon the historical experience of the taxpayer. For example, a taxpayer operating on a 5-day, 8-hour basis may have a ''normal'' production of 100,000 units a year based upon three years of experience.

(c) Based upon theoretical capacity. Practical capacity may also be established by the use of ''theoretical'' capacity, adjusted for allowances for estimated inability to achieve maximum production, such as machine breakdown, idle time, and other normal work stoppages. Theoretical capacity is the level of production the manufacturer could reach if all machines and departments were operated continously at peak efficiency.

(d) Example. The provisions of *(c)* of this subdivision may be illustrated by the following example:

Corporation X operates a stamping plant with a theoretical capacity of 50 units per hour. The plant actually operates 1960 hours per year based on an 8-hour day, 5 day week basis and 15 shutdown days for vacations and holidays. A reasonable allowance for down time (the time allowed for ordinary and necessary repairs and maintenance) is 5 percent of practical capacity before reduction for down time. Assuming no loss of production during starting up, closing down, or employee work breaks, under these facts and circumstances X may properly make a practical capacity computation as follows:

Practical capacity without allowance for down time based on theoretical capacity per hour is (1960×50)	98,000
Reduction for down time (98,000×5 percent)	4,900
Practical capacity	93,100

The 93,100 unit level of activity (*i.e.*, practical capacity) would, therefore, constitute an appropriate base for calculating the amount of fixed indirect production costs to be included in the computation of the amount of inventoriable costs for the period under review. On this basis if only 76,000 units were produced for the period, the effect would be that approximately 81.6 percent (76,000, the actual number of units produced, divided by 93,100, the maximum number of units producible at practical capacity) of the fixed indirect production costs would be included in the computation of the amount of inventoriable costs during the year. The portion of the fixed indirect production costs not so included in the computation of the amount of inventoriable costs would be deductible in the year in which paid or incurred. Assume further that 7,600 units were on hand at the end of the taxable year and the 7,600 units were in the same proportion to the total units produced. Thus, 10 percent (7,600 units in inventory at the end of the taxable year, divided by 76,000, the actual number of units produced) of the fixed indirect production costs included in the computation of the amount of inventoriable costs (the above-mentioned 81.6 percent) and 10 percent of the variable indirect production costs would be included in the cost of the goods in the ending inventory, in accordance with a method of allocation provided by this paragraph.

(e) *Transition to full absorption method of inventory costing*—(1) *In general*—(i) *Mandatory requirement.* A taxpayer not using the full absorption method of inventory costing, as prescribed by paragraph (a) of this section, must change to that method. Any change to the full absorption method must be made by the taxpayer with respect to all trades or businesses of the taxpayer to which this section applies. A taxpayer not using the full absorption method of inventory costing, as prescribed by paragraph (a) of this section, who makes the special election provided in subdivision (ii) of this subparagraph during the transition period described in subdivision (ii) of this subparagraph need not change to the full absorption method of inventory costing for taxable years prior to the year for which such election is made. In determining whether the taxpayer is changing to a more or less inclusive method of inventory costing, all positive and negative adjustments for all items and all trades or businesses of the taxpayer shall be aggregated. If the net adjustment is positive, paragraph (e)(3) shall apply, and if the net adjustment is negative, paragraph (e)(4) shall apply to the change. The rules otherwise prescribed in sections 446 and 481 and the regulations thereunder shall apply to any taxpayer who fails to make the special election in subdivision (ii) of this subparagraph. The transition rules of this paragraph are available only to those taxpayers who change their method of inventory costing.

(ii) *Special election during two-year-transition period.* If a taxpayer elects to change to the full absorption method of inventory costing during the transition period provided herein, he may elect on Form 3115 to change to such full absorption method of inventory costing and, in so doing, employ the transition procedures and adopt any of the transition methods prescribed in subparagraph (3) of this paragraph. Such election shall be made during the first 180 days of any taxable year beginning on or after September 19, 1973 and before September 19, 1975 (i.e., the ‘‘transition period’’) and the change in inventory costing method shall be made for the taxable year in which the election is made. Notwithstanding the preceding sentence if the taxpayer’s prior returns have been examined by the Service prior to Sept. 19, 1973, and there is a pending issue involving the taxpayer’s method of inventory costing, the taxpayer may request the application of this regulation by agreeing and filing a letter to that effect with the district director, within 90 days after September 19, 1973 to change to the full absorption method for the first taxable year of the taxpayer beginning after Sept. 19, 1973 and subsequently filing Form 3115 within the first 180 days of such taxable year of change.

(iii) *Change initiated by the Commissioner.* A taxpayer who properly makes an election under subdivision (ii) of this subparagraph shall be considered to have made a change in method of accounting not initiated by the taxpayer, notwithstanding the provisions of §1.481–1(c)(5). Thus, any of the taxpayer’s ‘‘pre-1954 inventory balances’’ with respect to such inventory shall not be taken into account as an adjustment under section 481. For purposes of this paragraph, a ‘‘pre-1954 inventory balance’’ is the net amount of the adjustments which would have been required if the taxpayer had made such change in his method of accounting with respect to his inventory in his first taxable year which began after December 31, 1953, and ended after August 16, 1954. See section 481(a)(2) and §1.481–3.

(2) *Procedural rules for change.* If a taxpayer makes an election pursuant to subparagraph (1)(ii) of this paragraph, the Commissioner’s consent will be evidenced by a letter of consent to the taxpayer, setting forth the values of inventory, as provided by the taxpayer, determined under the full absorption method of inventory costing, except to the extent that no determination of such values is necessary under subparagraph (3)(ii)(B) of this paragraph (the cut off method), the amount of the adjustments (if any) required to be taken into account by section 481, and the treatment to be accorded to any such adjustments. Such full absorption values shall be subject to verification on examination by the district director. The taxpayer shall preserve at his principal place of business all records, data, and other evidence relating to the full absorption values of inventory.

(3) *Transition methods.* In the case of a taxpayer who properly makes an election under subparagraph (1)(ii) of this paragraph during the transition period—

(i) *10-year adjustment period.* Such taxpayer may elect to take any adjustment required by section 481 with respect to any inventory being revalued under the full absorption method into account ratably over a period designated by the taxpayer at the time of such election, not to exceed the lesser of 10 taxable years commencing with the year of transition or the number of years the taxpayer has been on the inventory method from which he is changing. If the taxpayer dies or ceases to exist in a transaction other than one to which section 381(a) of the Code applies or if the taxpayer's inventory (determined under the full absorption method) on the last day of any taxable year is reduced (by other than a strike or involuntary conversion) by more than an amount equal to 33⅓ percent of the taxpayer's inventory (determined under the full absorption method) as of the beginning of the year of change, the entire amount of the section 481 adjustment not previously taken into account in computing income shall be taken into account in computing income for the taxable year in which such taxpayer so ceases to exist or such taxpayer's inventory is so reduced.

(ii) *Additional rules for LIFO taxpayers.* A taxpayer who uses the LIFO method of inventory identification may either—

(a) Employ the special transition rules described in subdivision (i) of this subparagraph. Accordingly, all LIFO layers must be revalued under the full absorption method and the section 481 adjustment must be computed for all items in all layers in inventory, but no pre-1954 inventory balances shall be taken into account as adjustments under section 481; or

(b)(1) Employ a cut-off method whereby the full absorption method is only applied in costing layers of inventory acquired during all taxable years beginning with the year for which an election is made under subparagraph (e)(1)(ii).

(2) In the case of a taxpayer using dollar value LIFO, employ a cut-off method whereby the taxpayer must use, for the year of change, the full absorption method in computing the base year cost and current cost of a dollar value inventory pool for the beginning of such year. The taxpayer shall not be required to recompute his LIFO inventories based on the full absorption method for a taxable year beginning prior to the year of change to the full absorption method. The base cost and layers of increment previously computed shall be retained and treated as if such base cost and layers of increment had been computed under the method authorized by this section. The taxpayer shall use the year of change as the base year in applying the double extension method or other method approved by the Commissioner, instead of the earliest year for which he adopted the LIFO method for any items in the pool.

(4) *Transition to full absorption method of inventory costing from a method more* inclusive of indirect production costs—(i) *Taxpayer has not previously changed to his present method pursuant to subparagraphs (1), (2), and (3) of this paragraph.* If a taxpayer wishes to change to the full absorption method of inventory costing (as prescribed by paragraph (a) of this section) from a method of inventory costing which is more inclusive of indirect production costs and he has not previously changed to his present method by use of the special transition rules provided by subparagraphs (1), (2) and (3) of this paragraph, he may elect on Form 3115 to change to the full absorption method of inventory costing and, in so doing, take into account any resulting section 481 adjustment generally over 10 taxable years commencing with the year of transition. The Commissioner's consent to such election will be evidenced by a letter of consent to the taxpayer setting forth the values of inventory, as provided by the taxpayer determined under the full absorption method of inventory costing, except to the extent that no determination of such values is necessary under subparagraph (3)(ii)*(b)* of this paragraph, the amount of the adjustments (if any) required to be taken into account by section 481, and the treatment to be accorded such adjustments, subject to terms and conditions specified by the Commissioner to prevent distortions of income. Such election must be made within the transition period described in subparagraph (1)(ii) of this paragraph. A change pursuant to this subparagraph shall be a change initiated by the taxpayer as provided by § 1.481–1(c)(5). Thus, any of the taxpayers ''pre-1954 inventory

balances'' will be taken into account as an adjustment under section 481.

(ii) *Taxpayer has previously changed to his present method pursuant to subparagraph (1), (2), and (3) of this paragraph or would satisfy all the requirements of subdivision (i) of this subparagraph but fails to elect within the transition period.* If a taxpayer wishes to change to the full absorption method of inventory costing (as prescribed by paragraph (a) of this section) from a method of inventory costing which is more inclusive of indirect production costs and he has previously changed to his present method pursuant to subparagraphs (1), (2), and (3) of this paragraph or he would satisfy the requirements of subdivision (i) of this subparagraph but he fails to elect within the transition period, he must secure the consent of the Commissioner prior to making such change.

[T.D. 7285, 38 FR 26185, Sept. 19, 1973, as amended by T.D. 8067, 51 FR 393, Jan. 6, 1986; T.D. 8131, 52 FR 10084, Mar. 30, 1987; T.D. 8482, 58 FR 42234, Aug. 9, 1993]

§1.472–1 Last-in, first-out inventories.

(a) Any taxpayer permitted or required to take inventories pursuant to the provisions of section 471, and pursuant to the provisions of §§1.471–1 to 1.471–9, inclusive, may elect with respect to those goods specified in his application and properly subject to inventory to compute his opening and closing inventories in accordance with the method provided by section 472, this section, and §1.472–2. Under this last-in, first-out (LIFO) inventory method, the taxpayer is permitted to treat those goods remaining on hand at the close of the taxable year as being:

(1) Those included in the opening inventory of the taxable year, in the order of acquisition and to the extent thereof, and

(2) Those acquired during the taxable year.

The LIFO inventory method is not dependent upon the character of the business in which the taxpayer is engaged, or upon the identity or want of identity through commingling of any of the goods on hand, and may be adopted by the taxpayer as of the close of any taxable year.

(b) If the LIFO inventory method is used by a taxpayer who regularly and consistently, in a manner similar to hedging on a futures market, matches purchases with sales, then firm purchases and sales contracts (i.e., those not legally subject to cancellation by either party) entered into at fixed prices on or before the date of the inventory may be included in purchases or sales, as the case may be, for the purpose of determining the cost of goods sold and the resulting profit or loss, provided that this practice is regularly and consistently adhered to by the taxpayer and provided that, in the opinion of the Commissioner, income is clearly reflected thereby.

(c) A manufacturer or processor who has adopted the LIFO inventory method as to a class of goods may elect to have such method apply to the raw materials only (including those included in goods in process and in finished goods) expressed in terms of appropriate units. If such method is adopted, the adjustments are confined to costs of the raw material in the inventory and the cost of the raw material in goods in process and in finished goods produced by such manufacturer or processor and reflected in the inventory. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Assume that the opening inventory had 10 units of raw material, 10 units of goods in process, and 10 units of finished goods, and that the raw material cost was 6 cents a unit, the processing cost 2 cents a unit, and overhead cost 1 cent a unit. For the purposes of this example, it is assumed that the entire amount of goods in process was 50 percent processed.

OPENING INVENTORY

	Raw material	Goods in process	Finished goods
Raw material	$0.60	$0.60	$0.60
Processing cost	....	.10	.20
Overhead	....	.05	.10

In the closing inventory there are 20 units of raw material, 6 units of goods in process, and 8 units of finished goods and the costs were: Raw material 10 cents, processing cost 4 cents, and overhead 1 cent.

CLOSING INVENTORY

[Based on cost and prior to adjustment]

	Raw material	Goods in process	Finished goods
Raw material	$2.00	$0.60	$0.80
Processing costs		.12	.32
Overhead		.03	.08
Total	2.00	.75	1.20

There were 30 units of raw material in the opening inventory and 34 units in the closing inventory. The adjustment to the closing inventory would be as follows:

CLOSING INVENTORY AS ADJUSTED

	Raw material	Goods in process	Finished goods
Raw material:			
20 at 6 cents	$1.20		
6 at 6 cents		$0.36	
4 at 6 cents			$0.24
4 at 10 cents [1]			.40
Processing costs		.12	.32
Overhead		.03	.08
Total	1.20	.51	1.04

[1] This excess is subject to determination of price under section 472(b)(1) and § 1.472–2. If the excess falls in goods in process, the same adjustment is applicable.

The only adjustment to the closing inventory is the cost of the raw material; the processing costs and overhead cost are not changed.

Example (2). Assume that the opening inventory had 5 units of raw material, 10 units of goods in process, and 20 units of finished goods, with the same prices as in example (1), and that the closing inventory had 20 units of raw material, 20 units of goods in process, and 10 units of finished goods, with raw material costs as in the closing inventory in example (1). The adjusted closing inventory would be as follows in so far as the raw material is concerned:

Raw material, 20 at 6 cents	$1.20
Goods in process:	
15 at 6 cents	.90
5 at 10 cents [1]	.50
Finished goods:	
None at 6 cents	0.00
10 at 10 cents [1]	1.00

[1] This excess is subject to determination of price under section 472(b)(1) and § 1.472–2.

The 20 units of raw material in the raw state plus 15 units of raw material in goods in process make up the 35 units of raw material that were contained in the opening inventory.

(d) For the purposes of this section, raw material in the opening inventory must be compared with similar raw material in the closing inventory. There may be several types of raw materials, depending upon the character, quality, or price, and each type of raw material in the opening inventory must be compared with a similar type in the closing inventory.

(e) In the cotton textile industry there may be different raw materials depending upon marked differences in length of staple, in color or grade of the cotton. But where different staple lengths or grades of cotton are being used at different times in the same mill to produce the same class of goods, such differences would not necessarily require the classification into different raw materials.

(f) As to the pork packing industry a live hog is considered as being composed of various raw materials, different cuts of a hog varying markedly in price and use. Generally a hog is processed into approximately 10 primal cuts and several miscellaneous articles. However, due to similarity in price and use, these may be grouped into fewer classifications, each group being classed as one raw material.

(g) When the finished product contains two or more different raw materials as in the case of cotton and rayon mixtures, each raw material is treated separately and adjustments made accordingly.

(h) Upon written notice addressed to the Commissioner of Internal Revenue, Attention T:R, Washington, D.C. 20224 by the taxpayer, a taxpayer who has heretofore adopted the LIFO inventory method in respect of any goods may adopt the method authorized in this section and limit the election to the raw material including raw materials entering into goods in process and in finished goods. If this method is adopted as to any specific goods, it must be used exclusively for such goods for any prior taxable year (not closed by agreement) to which the prior election applies and for all subsequent taxable years, unless permission to change is granted by the Commissioner.

(i) The election may also be limited to that phase in the manufacturing process where a product is produced that is recognized generally as a salable product as, for example, in the textile industry where one phase of the process is the production of yarn. Since yarn is generally recognized as a salable product, the election may be limited to that portion of the process when yarn is produced. In the case of copper and brass processors, the election may be limited to the production of bars, plates, sheets, etc., although these may be further processed into other products.

(j) The election may also apply to any one raw material, when two or more raw materials enter into the composition of the finished product; for example, in the case of cotton and rayon yarn, the taxpayer may elect to inventory the cotton only. However, a taxpayer who has previously made an election to use the LIFO inventory method may not later elect to exclude any raw materials that were covered by such previous election.

(k) If a taxpayer using the retail method of pricing inventories, authorized by §1.471–8, elects to use in connection therewith the LIFO inventory method authorized by section 472 and this section, the apparent cost of the goods on hand at the end of the year, determined pursuant to §1.471–8, shall be adjusted to the extent of price changes therein taking place after the close of the preceding taxable year. The amount of any apparent inventory increase or decrease to be eliminated in this adjustment shall be determined by reference to acceptable price indexes established to the satisfaction of the Commissioner. Price indexes prepared by the United States Bureau of Labor Statistics which are applicable to the goods in question will be considered acceptable to the Commissioner. Price indexes which are based upon inadequate records, or which are not subject to complete and detailed audit within the Internal Revenue Service, will not be approved.

(l) If a taxpayer uses consistently the so-called ‘‘dollar-value’’ method of pricing inventories, or any other method of computation established to the satisfaction of the Commissioner as reasonably adaptable to the purpose and intent of section 472 and this section, and if such taxpayer elects under section 472 to use the LIFO inventory method authorized by such section, the taxpayer’s opening and closing inventories shall be determined under section 472 by the use of the appropriate adaptation. See §1.472–8 for rules relating to the use of the dollar-value method.

[T.D. 6500, 25 FR 11727, Nov. 26, 1960, as amended by T.D. 6539, 26 FR 518, Jan. 20, 1961]

§1.472–2 Requirements incident to adoption and use of LIFO inventory method.

Except as otherwise provided in §1.472–1 with respect to raw material computations, with respect to retail inventory computations, and with respect to other methods of computation established to the satisfaction of the Commissioner as reasonably adapted to the purpose and intent of section 472, and in §1.472–8 with respect to the ‘‘dollar-value’’ method, the adoption and use of the LIFO inventory method is subject to the following requirements:

(a) The taxpayer shall file an application to use such method specifying with particularity the goods to which it is to be applied.

(b) The inventory shall be taken at cost regardless of market value.

(c) Goods of the specified type included in the opening inventory of the taxable year for which the method is first used shall be considered as having been acquired at the same time and at a unit cost equal to the actual cost of the aggregate divided by the number of units on hand. The actual cost of the aggregate shall be determined pursuant to the inventory method employed by the taxpayer under the regulations applicable to the prior taxable year with the exception that restoration shall be made with respect to any writedown to market values resulting from the pricing of former inventories.

(d) Goods of the specified type on hand as of the close of the taxable year in excess of what were on hand as of the beginning of the taxable year shall be included in the closing inventory, regardless of identification with specific invoices and regardless of specific cost accounting records, at costs determined pursuant to the provisions of subparagraph (1) or (2) of this paragraph, dependent upon the character of the transactions in which the taxpayer is engaged:

(1)(i) In the case of a taxpayer engaged in the purchase and sale of merchandise, such as a retail grocer or druggist, or engaged in the initial production of merchandise and its sale without processing, such as a miner selling his ore output without smelting or refining, such costs shall be determined—

(a) By reference to the actual cost of the goods most recently purchased or produced;

(b) By reference to the actual cost of the goods purchased or produced during the taxable year in the order of acquisition;

(c) By application of an average unit cost equal to the aggregate cost of all of the goods purchased or produced throughout the taxable year divided by the total number of units so purchased or produced, the goods reflected in such inventory increase being considered for the purposes of section 472 as having been acquired all at the same time; or

(d) Pursuant to any other proper method which, in the opinion of the Commissioner, clearly reflects income.

(ii) Whichever of the several methods of valuing the inventory increase is adopted by the taxpayer and approved by the Commissioner shall be consistently adhered to in all subsequent taxable years so long as the LIFO inventory method is used by the taxpayer.

(iii) The application of subdivisions (i) and (ii) of this subparagraph may be illustrated by the following examples:

Example (1). Suppose that the taxpayer adopts the LIFO inventory method for the taxable year 1957 with an opening inventory of 10 units at 10 cents per unit, that it makes 1957 purchases of 10 units as follows:

January	1 at	$0.11=	$0.11
April	2 at	.12=	.24
July	3 at	.13=	.39
October	4 at	.14=	.56
Totals	10		1.30

and that it has a 1957 closing inventory of 15 units. This closing inventory, depending upon the taxpayer's method of valuing inventory increases, will be computed as follows:

(a) Most recent purchases—

	10 at	$0.10	$1.00
October	4 at	.14	.56
July	1 at	.13	.13
Totals	15		1.69

(*b*) In order of acquisitions—

	10 at	$0.10	$1.00
January	1 at	.11	.11
April	2 at	.12	.24
July	2 at	.13	.26
Totals	15		1.61

or

(c) At an annual average—

	10 at	$0.10	$1.00
(130/10)	5 at	.13	.65
Totals	15		1.65

Example (2). Suppose that the taxpayer's closing inventory for 1958, the year following that involved in example (1) of this subdivision, reflects an inventory decrease for the year, and not an increase; suppose that there is, accordingly, a 1958 closing inventory of 13 units. Inasmuch as the decreased closing inventory will be determined wholly by reference to the 15 units reflected in the opening inventory for the year, and will be taken ''in the order of acquisition'' pursuant to section 472 (b) (1), and inasmuch as the character of the taxpayer's opening inventory for 1958 will be dependent upon its method of valuing its 5-unit inventory increase for 1957, the closing inventory for 1958 will be computed as follows:

(a) In case the increase for 1957 was taken by reference to the most recent purchases—

From 1956	10 at	$0.10	$1.00
July 1957	1 at	.13	.13
October 1957	2 at	.14	.28
Totals	13		1.41

or

(b) In case the increase for 1957 was taken in the order of acquisition—

From 1956	10 at	$0.10	$1.00
January 1957	51 at	.11	.11
April 1957	2 at	.12	.24
Totals	13		1.35

or

(c) In case the increase for 1957 was taken on the basis of an average—

From 1956	10 at	$0.10	$1.00
From 1957	3 at	.13	.39
Totals	13		1.39

(2) In the case of a taxpayer engaged in manufacturing, fabricating, processing, or otherwise producing merchandise, such costs shall be determined:

(i) In the case of raw materials purchased or initially produced by the taxpayer, in the manner elected by the taxpayer under subparagraph (1) of this paragraph to the same extent as if the taxpayer were engaged in purchase and sale transactions; and

(ii) In the case of goods in process, regardless of the stage to which the manufacture, fabricating, or processing may have advanced, and in the case of finished goods, pursuant to any proper method which, in the opinion of the Commissioner, clearly reflects income.

(e) *LIFO conformity requirement*—(1) *In general.* The taxpayer must establish to the satisfaction of the Commissioner that the taxpayer, in ascertaining the income, profit, or loss for the taxable year for which the LIFO inventory method is first used, or for any subsequent taxable year, for credit purposes or for purposes of reports to shareholders, partners, or other proprietors, or to beneficiaries, has not used any inventory method other than that referred to in §1.472–1 or at variance with the requirement referred to in §1.472–2(c). See paragraph (e)(2) of this section for rules relating to the meaning of the term ''taxable year'' as used in this paragraph. The following are not considered at variance with the requirement of this paragraph:

(i) The taxpayer's use of an inventory method other than LIFO for purposes of ascertaining information reported as a supplement to or explanation of the taxpayer's primary presentation of the taxpayer's income, profit, or loss for a taxable year in credit statements or financial reports (including preliminary and unaudited financial reports). See paragraph (e)(3) of this section for rules relating to the reporting of supplemental and explanatory information ascertained by the use of an inventory method other than LIFO.

(ii) The taxpayer's use of an inventory method other than LIFO to ascertain the value of the taxpayer's inventory of goods on hand for purposes of reporting the value of such inventories as assets. See paragraph (e)(4) of this section for rules relating to such disclosures.

(iii) The taxpayer's use of an inventory method other than LIFO for purposes of ascertaining information reported in internal management reports. See paragraph (e)(5) of this section for rules relating to such reports.

(iv) The taxpayer's use of an inventory method other than LIFO for purposes of issuing reports or credit statements covering a period of operations that is less than the whole of a taxable year for which the LIFO method is used for Federal income tax purposes. See paragraph (e)(6) of this section for rules relating to series of interim reports.

(v) The taxpayer's use of the lower of LIFO cost or market method to value LIFO inventories for purposes of financial reports and credit statements. However, except as provided in paragraph (e)(7) of this section, a taxpayer may not use market value in lieu of cost to value inventories for purposes of financial reports or credit statements.

(vi) The taxpayer's use of a costing method or accounting method to ascertain income, profit, or loss for credit purposes or for purposes of financial reports if such costing method or accounting method is neither inconsistent with the inventory method referred to in §1.472–1 nor at variance with the requirement referred to in §1.472–2(c), regardless of whether such costing method or accounting method is used by the taxpayer for Federal income tax purposes. See paragraph (e)(8) of this section for examples of such costing methods and accounting methods.

(vii) For credit purposes or for purposes of financial reports, the taxpayer's treatment of inventories, after such inventories have been acquired in a transaction to which section 351 applies from a transferor that used the LIFO method with respect to such inventories, as if such inventories had the same acquisition dates and costs as in the hands of the transferor.

(viii) For credit purposes or for purposes of financial reports relating to a taxable year, the taxpayer's determination of income, profit, or loss for the taxable year by valuing inventories in accordance with the procedures described in section 472(b) (1) and (3), notwithstanding that such valuation differs from the valuation of inventories for Federal income tax purposes because the taxpayer either—

(A) Adopted such procedures for credit or financial reporting purposes beginning with an accounting period other than the taxable year for which the LIFO method was first used by the taxpayer for Federal income tax purposes, or

(B) With respect to such inventories treated a business combination for credit or financial reporting purposes in a manner different from the treatment of the business combination for Federal income tax purposes.

(2) *One-year periods other than a taxable year.* The rules of this paragraph relating to the determination of income, profit, or loss for a taxable year and credit statements or financial reports that cover a taxable year also apply to the determination of income, profit, or loss for a one-year period other than a taxable year and credit statements or financial reports that cover a one-year period other than a taxable year, but only if the one-year period both begins and ends in a taxable year or years for which the taxpayer uses the LIFO method for Federal income tax purposes. For example, the requirements of paragraph (e)(1) of this section apply to a taxpayer's determination of income for purposes of a credit statement that covers a 52-week fiscal year beginning and ending in a taxable year for which the taxpayer uses the LIFO method for Federal income tax purposes. Similarly, in the case of a calendar year taxpayer, the requirements of paragraph (e)(1) of this section apply to the taxpayer's determination of income for purposes of a credit statement that covers the period October 1, 1981, through September 30, 1982, if the taxpayer uses the LIFO method for Federal income tax purposes in taxable years 1981 and 1982. However, the Commissioner will waive any violation of the requirements of this paragraph in the case of a credit statement or financial report that covers a one-year period other than a taxable year if the report was issued before January 22, 1981.

(3) *Supplemental and explanatory information*—(i) *Face of the income statement.* Information reported on the face of a taxpayer's financial income statement for a taxable year is not considered a supplement to or explanation of the taxpayer's primary presentation of the taxpayer's income, profit, or loss for the taxable year in credit statements or financial reports. For purposes of paragraph (e)(3) of this section, the face of an income statement does not include notes to the income statement presented on the same page as the income statement, but only if all notes to the financial income statement are presented together.

(ii) *Notes to the income statement.* Information reported in notes to a taxpayer's financial income statement is considered a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss for the period covered by the income statement if all notes to the financial income statement are presented together and if they accompany the income statement in a single report. If notes to an income statement are issued in a report that does not include the income statement, the question of whether the information reported therein is supplemental or explanatory is determined under the rules in paragraph (e)(3)(iv) of this section.

(iii) *Appendices and supplements to the income statement.* Information reported in an appendix or supplement to a taxpayer's financial income statement is considered a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss for the period covered by the income statement if the appendix or supplement accompanies the income statement in a single report and the information reported in the appendix or supplement is clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement. If an appendix or supplement to an income statement is issued in a report that does not include the income statement, the question of whether the information reported therein is supplemental or explanatory is determined under the rules in paragraph (e)(3)(iv) of this section. For purposes of paragraph (e)(3)(iii) of this section, an appendix or supplement to an income statement includes written statements, schedules, and reports that are labelled supplements or appendices to the income statement. However, sections of an annual report such as those labelled ''President's Letter'', ''Management's Analysis'', ''Statement of Changes in Financial Position'', ''Summary of Key

Figures'', and similar sections are reports described in paragraph (e)(3)(iv) of this section and are not considered ''supplements or appendices to an income statement'' within the meaning of paragraph (e)(3)(iii) of this section, regardless of whether such sections are also labelled as supplements or appendices. For purposes of paragraph (e)(3)(iii) of this section, information is considered to be clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement if the information either—

(A) Is reported in an appendix or supplement that contains a general statement identifying all such supplemental or explanatory information;

(B) Is identified specifically as supplemental or explanatory by a statement immediately preceding or following the disclosure of the information;

(C) Is disclosed in the context of making a comparison to corresponding information disclosed both on the face of the taxpayer's income statement and in the supplement or appendix; or

(D) Is a disclosure of the effect on an item reported on the face of the taxpayer's income statement of having used the LIFO method.

For example, a restatement of cost of goods sold based on an inventory method other than LIFO is considered to be clearly identified as supplemental or explanatory information if the supplement or appendix containing the restatement contains a general statement that all information based on such inventory method is reported in the appendix or supplement as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement.

(iv) *Other reports; in general.* The rules of paragraph (e)(3) (iv), (v), and (vi) of this section apply to the following types of reports: news releases; letters to shareholders, partners, or other proprietors or beneficiaries; oral statements at press conferences, shareholders' meetings or securities analysts' meetings; sections of an annual report such as those labelled ''President's Letter'', ''Management's Analysis'', ''Statement of Changes in Financial Position'', ''Summary of Key Figures'', and similar sections; and reports other than a taxpayer's income statement or accompanying notes, appendices, or supplements. Information disclosed in such a report is considered a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss for the period covered by an income statement if the supplemental or explanatory information is clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement and the specific item of information being explained or supplemented, such as the cost of goods sold, net income, or earnings per share ascertained using the LIFO method, is also reported in the other report.

(v) *Other reports; disclosure of non-LIFO income.* For purposes of paragraph (e)(3)(iv) of this section, supplemental or explanatory information is considered to have been clearly identified as such if it would be considered to have been clearly identified as such under the rules of paragraph (e)(3)(iii) of this section, relating to information reported in supplements or appendices to an income statement. For example, if at a securities analysts' meeting the following question is asked, ''What would the reported earnings per share for the year have been if the FIFO method had been used to value inventories?'', it would be permissible to respond ''Reported earnings per share for the year were $6.00. If the company had used the FIFO method to value inventories this year and had computed earnings based upon the following assumptions, earnings per share would have been $8.20. FIFO earnings are based on the following assumptions:

''(A) The use of the same effective tax rate as used in computing LIFO earnings, and

''(B) All other conditions and assumptions remain the same, including—

''(*1*) The use of the LIFO method for Federal income tax purposes and

''(*2*) The investment of the tax savings resulting from such use of the

LIFO method, the income from which is included in both LIFO and FIFO ‘‘earnings.’’ ’’

(vi) *Other reports; disclosure of effect on income.* For purposes of paragraph (e)(3)(iv) of this section, if the only supplement to or explanation of a specific item is the effect on the item of having used LIFO instead of a method other than LIFO to value inventories, it is not necessary to also report the specific item. For example, if at a shareholders’ meeting the question is asked, ‘‘What was the effect on reported earnings per share of not having used FIFO to value inventories?’’, it would be permissible to respond ‘‘If earnings would have been computed on the basis of the following assumptions, the use of LIFO instead of FIFO to value inventories would have decreased reported earnings per share by $2.20. FIFO earnings are based on the following assumptions:

‘‘(A) The use of the same effective tax rate as used in computing LIFO earnings, and

‘‘(B) All other conditions and assumptions remain the same, including—

‘‘(*1*) The use of the LIFO method for Federal income tax purposes and

‘‘(*2*) The investment of the tax savings resulting from such use of the LIFO method, the income from which is included in both LIFO and FIFO earnings.’’

(4) *Inventory asset value disclosures.* Under paragraph (e)(1)(ii) of this section, the use of an inventory method other than LIFO to ascertain the value of the taxpayer’s inventories for purposes of reporting the value of the inventories as assets is not considered the ascertainment of income, profit, or loss and therefore is not considered at variance with the requirement of paragraph (e)(1) of this section. Therefore, a taxpayer may disclose the value of inventories on a balance sheet using a method other than LIFO to identify the inventories, and such a disclosure will not be considered at variance with the requirement of paragraph (e)(1) of this section. However, the disclosure of income, profit, or loss for a taxable year on a balance sheet issued to creditors, shareholders, partners, other proprietors, or beneficiaries is considered at variance with the requirement of paragraph (e)(1) of this section if such income information is ascertained using an inventory method other than LIFO and such income information is for a taxable year for which the LIFO method is used for Federal income tax purposes. Therefore, a balance sheet that discloses the net worth of a taxpayer, determined as if income had been ascertained using an inventory method other than LIFO, may be at variance with the requirement of paragraph (e)(1) of this section if the disclosure of net worth is made in a manner that also discloses income, profit, or loss for a taxable year.

However, a disclosure of income, profit, or loss using an inventory method other than LIFO is not considered at variance with the requirement of paragraph (e)(1) of this section if the disclosure is made in the form of either a footnote to the balance sheet or a parenthetical disclosure on the face of the balance sheet. In addition, an income disclosure is not considered at variance with the requirement of paragraph (e)(1) of this section if the disclosure is made on the face of a supplemental balance sheet labelled as a supplement to the taxpayer’s primary presentation of financial position, but only if, consistent with the rules of paragraph (e)(3) of this section, such a disclosure is clearly identified as a supplement to or explanation of the taxpayer’s primary presentation of financial income as reported on the face of the taxpayer’s income statement.

(5) *Internal management reports.* [Reserved]

(6) *Series of interim reports.* For purposes of paragraph (e)(1)(iv) of this section, a series of credit statements or financial reports is considered a single statement or report covering a period of operations if the statements or reports in the series are prepared using a single inventory method and can be combined to disclose the income, profit, or loss for the period. However, the Commissioner will waive any violation of the requirement of this paragraph in the case of a series of interim reports issued before February 6, 1978, that cover a taxable year, or a series of interim reports issued before January 22,

1981 that cover a one-year period other than a taxable year.

(7) *Market value.* The Commissioner will waive any violation of the requirement of this paragraph in the case of a taxpayer's use of market value in lieu of cost for a credit statement or financial report issued before January 22, 1981. However, the special rule of this (7) applies only to a taxpayer's use of market value in lieu of cost and does not apply to the use of a method of valuation such as market value in lieu of cost but not more than FIFO cost.

(8) *Use of different methods.* The following are examples of costing methods and accounting methods that are neither inconsistent with the inventory method referred to in §1.472–1 nor at variance with the requirement of §1.472–2(c) and which, under paragraph (e)(1)(vi) of this section, may be used to ascertain income, profit, or loss for credit purposes or for purposes of financial reports regardless of whether such method is also used by the taxpayer for Federal income tax purposes:

(i) Any method relating to the determination of which costs are includible in the computation of the cost of inventory under the full absorption inventory method.

(ii) Any method of establishing pools for inventory under the dollar-value LIFO inventory method.

(iii) Any method of determining the LIFO value of a dollar-value inventory pool, such as the double-extension method, the index method, and the link chain method.

(iv) Any method of determining or selecting a price index to be used with the index or link chain method of valuing inventory pools under the dollar-value LIFO inventory method.

(v) Any method permitted under §1.472–8 for determining the current-year cost of closing inventory for purposes of using the dollar-value LIFO inventory method.

(vi) Any method permitted under §1.472–2(d) for determining the cost of goods in excess of goods on hand at the beginning of the year for purposes of using a LIFO method other than the dollar-value LIFO method.

(vii) Any method relating to the classification of an item as inventory or a capital asset.

(viii) The use of an accounting period other than the period used for Federal income tax purposes.

(ix) The use of cost estimates.

(x) The use of actual cost of cut timber or the cost determined under section 631(a).

(xi) The use of inventory costs unreduced by any adjustment required by the application of section 108 and section 1017, relating to discharge of indebtedness.

(xii) The determination of the time when sales or purchases are accrued.

(xiii) The use of a method to allocate basis in the case of a business combination other than the method used for Federal income tax purposes.

(xiv) The treatment of transfers of inventory between affiliated corporations in a manner different from that required by §1.1502–13.

(9) *Reconciliation of LIFO inventory values.* A taxpayer may be required to reconcile differences between the value of inventories maintained for credit or financial reporting purposes and for Federal income tax purposes in order to show that the taxpayer has satisfied the requirements of this paragraph.

(f) Goods of the specified type on hand as of the close of the taxable year preceding the taxable year for which this inventory method is first used shall be included in the taxpayer's closing inventory for such preceding taxable year at cost determined in the manner prescribed in paragraph (c) of this section.

(g) The LIFO inventory method, once adopted by the taxpayer with the approval of the Commissioner, shall be adhered to in all subsequent taxable years unless—

(1) A change to a different method is approved by the Commissioner; or

(2) The Commissioner determines that the taxpayer, in ascertaining income, profit, or loss for the whole of any taxable year subsequent to his adoption of the LIFO inventory method, for credit purposes or for the purpose of reports to shareholders, partners, or other proprietors, or to beneficiaries, has used any inventory method at variance with that referred to in §1.472–1 and requires of the taxpayer a change to a different method for such

subsequent taxable year or any taxable year thereafter.

(h) The records and accounts employed by the taxpayer in keeping his books shall be maintained in conformity with the inventory method referred to in § 1.472–1; and such supplemental and detailed inventory records shall be maintained as will enable the district director readily to verify the taxpayer's inventory computations as well as his compliance with the requirements of section 472 and §§ 1.472–1 through 1.472–7.

(i) Where the taxpayer is engaged in more than one trade or business, the Commissioner may require that if the LIFO method of valuing inventories is used with respect to goods in one trade or business the same method shall also be used with respect to similar goods in the other trades or businesses if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essential to a clear reflection of income.

[T.D. 6500, 25 FR 11728, Nov. 26, 1960, as amended by T.D. 6539, 26 FR 518, Jan. 20, 1961; T.D. 7756, 46 FR 6920, Jan. 22, 1981; T.D 7756, 46 FR 15685, Mar. 9, 1981]

§ 1.472–3 Time and manner of making election.

(a) The LIFO inventory method may be adopted and used only if the taxpayer files with his income tax return for the taxable year as of the close of which the method is first to be used a statement of his election to use such inventory method. The statement shall be made on Form 970 pursuant to the instructions printed with respect thereto and to the requirements of this section, or in such other manner as may be acceptable to the Commissioner. Such statement shall be accompanied by an analysis of all inventories of the taxpayer as of the beginning and as of the end of the taxable year for which the LIFO inventory method is proposed first to be used, and also as of the beginning of the prior taxable year. In the case of a manufacturer, this analysis shall show in detail the manner in which costs are computed with respect to raw materials, goods in process, and finished goods, segregating the products (whether in process or finished goods) into natural groups on the basis of either (1) similarity in factory processes through which they pass, or (2) similarity of raw materials used, or (3) similarity in style, shape, or use of finished products. Each group of products shall be clearly described.

(b) The taxpayer shall submit for the consideration of the Commissioner in connection with the taxpayer's adoption or use of the LIFO inventory method such other detailed information with respect to his business or accounting system as may be at any time requested by the Commissioner.

(c) As a condition to the taxpayer's use of the LIFO inventory method, the Commissioner may require that the method be used with respect to goods other than those specified in the taxpayer's statement of election if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essential to a clear reflection of income.

(d) Whether or not the taxpayer's application for the adoption and use of the LIFO inventory method should be approved, and whether or not such method, once adopted, may be continued, and the propriety of all computations incidental to the use of such method, will be determined by the Commissioner in connection with the examination of the taxpayer's income tax returns.

[T.D. 6500, 25 FR 11729, Nov. 26, 1960, as amended by T.D. 7295, 38 FR 34203, Dec. 12, 1973]

§ 1.472–4 Adjustments to be made by taxpayer.

A taxpayer may not change to the LIFO method of taking inventories unless, at the time he files his application for the adoption of such method, he agrees to such adjustments incident to the change to or from such method, or incident to the use of such method, in the inventories of prior taxable years or otherwise, as the district director upon the examination of the taxpayer's returns may deem necessary in order that the true income of the taxpayer will be clearly reflected for the years involved.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§1.472–5 Revocation of election.

An election made to adopt and use the LIFO inventory method is irrevocable, and the method once adopted shall be used in all subsequent taxable years, unless the use of another method is required by the Commissioner, or authorized by him pursuant to a written application therefor filed as provided in paragraph (e) of §1.446–1.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§1.472–6 Change from LIFO inventory method.

If the taxpayer is granted permission by the Commissioner to discontinue the use of LIFO method of taking inventories, and thereafter to use some other method, or if the taxpayer is required by the Commissioner to discontinue the use of the LIFO method by reason of the taxpayer's failure to conform to the requirements detailed in §1.472–2, the inventory of the specified goods for the first taxable year affected by the change and for each taxable year thereafter shall be taken—

(a) In conformity with the method used by the taxpayer under section 471 in inventorying goods not included in his LIFO inventory computations; or

(b) If the LIFO inventory method was used by the taxpayer with respect to all of his goods subject to inventory, then in conformity with the inventory method used by the taxpayer prior to his adoption of the LIFO inventory method; or

(c) If the taxpayer had not used inventories prior to his adoption of the LIFO inventory method and had no goods currently subject to inventory by a method other than the LIFO inventory method, then in conformity with such inventory method as may be selected by the taxpayer and approved by the Commissioner as resulting in a clear reflection of income; or

(d) In any event, in conformity with any inventory method to which the taxpayer may change pursuant to application approved by the Commissioner.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§1.472–7 Inventories of acquiring corporations.

For additional rules in the case of certain corporate acquisitions specified in section 381(a), see section 381(c)(5) and the regulations thereunder.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§1.472–8 Dollar-value method of pricing LIFO inventories.

(a) *Election to use dollar-value method.* Any taxpayer may elect to determine the cost of his LIFO inventories under the so-called ''dollar-value'' LIFO method, provided such method is used consistently and clearly reflects the income of the taxpayer in accordance with the rules of this section. The dollar-value method of valuing LIFO inventories is a method of determining cost by using ''base-year'' cost expressed in terms of total dollars rather than the quantity and price of specific goods as the unit of measurement. Under such method the goods contained in the inventory are grouped into a pool or pools as described in paragraphs (b) and (c) of this section. The term ''base-year cost'' is the aggregate of the cost (determined as of the beginning of the taxable year for which the LIFO method is first adopted, i.e., the base date) of all items in a pool. The taxable year for which the LIFO method is first adopted with respect to any item in the pool is the ''base year'' for that pool, except as provided in paragraph (g)(3) of this section. Liquidations and increments of items contained in the pool shall be reflected only in terms of a net liquidation or increment for the pool as a whole. Fluctuations may occur in quantities of various items within the pool, new items which properly fall within the pool may be added, and old items may disappear from the pool, all without necessarily effecting a change in the dollar value of the pool as a whole. An increment in the LIFO inventory occurs when the end of the year inventory for any pool expressed in terms of base-year cost is in excess of the beginning of the year inventory for that pool expressed in terms of base-year cost. In determining the inventory value for a pool, the increment, if any, is adjusted for changing unit costs or values by reference to a percentage, relative to base-year-cost, determined for the pool as a whole. See paragraph (e) of this section. See also paragraph (f) of this section for rules relating to the change to the dollar-value LIFO method from another LIFO method.

(b) *Principles for establishing pools of manufacturers and processors*—(1) *Natural business unit pools.* A pool shall consist of all items entering into the entire inventory investment for a natural business unit of a business enterprise, unless the taxpayer elects to use the multiple pooling method provided in subparagraph (3) of this paragraph. Thus, if a business enterprise is composed of only one natural business unit, one pool shall be used for all of its inventories, including raw materials, goods in process, and finished goods. If, however, a business enterprise is actually composed of more than one natural business unit, more than one pool is required. Where similar types of goods are inventoried in two or more natural business units of the taxpayer, the Commissioner may apportion or allocate such goods among the various natural business units, if he determines that such apportionment or allocation is necessary in order to clearly reflect the income of such taxpayer. Where a manufacturer or processor is also engaged in the wholesaling or retailing of goods purchased from others, any pooling of the LIFO inventory of such purchased goods for the wholesaling or retailing operations shall be determined in accordance with the rules of paragraph (c) of this section.

(2) *Definition of natural business unit.* (i) Whether an enterprise is composed of more than one natural business unit is a matter of fact to be determined from all the circumstances. The natural business divisions adopted by the taxpayer for internal management purposes, the existence of separate and distinct production facilities and processes, and the maintenance of separate profit and loss records with respect to separate operations are important considerations in determining what is a business unit, unless such divisions, facilities, or accounting records are set up merely because of differences in geographical location. In the case of a manufacturer or processor, a natural business unit ordinarily consists of the entire productive activity of the enterprise within one product line or within two or more related product lines including (to the extent engaged in by the enterprise) the obtaining of materials, the processing of materials, and the selling of manufactured or processed goods. Thus, in the case of a manufacturer or processor, the maintenance and operation of a raw material warehouse does not generally constitute, of itself, a natural business unit. If the taxpayer maintains and operates a supplier unit the production of which is both sold to others and transferred to a different unit of the taxpayer to be used as a component part of another product, the supplier unit will ordinarily constitute a separate and distinct natural business unit. Ordinarily, a processing plant would not in itself be considered a natural business unit if the production of the plant, although saleable at this stage, is not sold to others, but is transferred to another plant of the enterprise, not operated as a separate division, for further processing or incorporation into another product. On the other hand, if the production of a manufacturing or processing plant is transferred to a separate and distinct division of the taxpayer, which constitutes a natural business unit, the supplier unit itself will ordinarily be considered a natural business unit. However, the mere fact that a portion of the production of a manufacturing or processing plant may be sold to others at a certain stage of processing with the remainder of the production being further processed or incorporated into another product will not of itself be determinative that the activities devoted to the production of the portion sold constitute a separate business unit. Where a manufacturer or processor is also engaged in the wholesaling or retailing of goods purchased from others, the wholesaling or retailing operations with respect to such purchased goods shall not be considered a part of any manufacturing or processing unit.

(ii) The rules of this subparagraph may be illustrated by the following examples:

Example (1). A corporation manufactures, in one division, automatic clothes washers and driers of both commercial and domestic grade as well as electric ranges, mangles, and dishwashers. The corporation manufactures, in another division, radios and television sets. The manufacturing facilities and processes used in manufacturing the radios and television sets are distinct from those used in manufacturing the automatic clothes washers, etc. Under these circumstances, the enterprise would consist of two business units and two pools would be appropriate, one consisting of all of the LIFO inventories entering into the manufacture of clothes washers and driers, electric ranges, mangles, and dishwashers and the other consisting of all of the LIFO inventories entering into the production of radio and television sets.

Example (2). A taxpayer produces plastics in one of its plants. Substantial amounts of the production are sold as plastics. The remainder of the production is shipped to a second plant of the taxpayer for the production of plastic toys which are sold to customers. The taxpayer operates his plastics plant and toy plant as separate divisions. Because of the different product lines and the separate divisions the taxpayer has two natural business units.

Example (3). A taxpayer is engaged in the manufacture of paper. At one stage of processing, uncoated paper is produced. Substantial amounts of uncoated paper are sold at this stage of processing. The remainder of the uncoated paper is transferred to the taxpayer's finishing mill where coated paper is produced and sold. This taxpayer has only one natural business unit since coated and uncoated paper are within the same product line.

(3) *Multiple pools*—(i) *Principles for establishing multiple pools. (a)* A taxpayer may elect to establish multiple pools for inventory items which are not within a natural business unit as to which the taxpayer has adopted the natural business unit method of pooling as provided in subparagraph (1) of this paragraph. Each such pool shall ordinarily consist of a group of inventory items which are substantially similar. In determining whether such similarity exists, consideration shall be given to all the facts and circumstances. The formulation of detailed rules for selection of pools applicable to all taxpayers is not feasible. Important considerations to be taken into account include, for example, whether there is substantial similarity in the types of raw materials used or in the processing operations applied; whether the raw materials used are readily interchangeable; whether there is similarity in the use of the products; whether the groupings are consistently followed for purposes of internal accounting and management; and whether the groupings follow customary business practice in the taxpayer's industry. The selection of pools in each case must also take into consideration such factors as the nature of the inventory items subject to the dollar-value LIFO method and the significance of such items to the taxpayer's business operations. Where similar types of goods are inventoried in natural business units and multiple pools of the taxpayer, the Commissioner may apportion or allocate such goods among the natural business units and the multiple pools, if he determines that such apportionment or allocation is necessary in order to clearly reflect the income of the taxpayer.

(b) Raw materials which are substantially similar shall be pooled together in accordance with the principles of this subparagraph. However, inventories of raw or unprocessed materials of an unlike nature may not be placed into one pool, even though such materials become part of otherwise identical finished products.

(c) Finished goods and goods-in-process in the inventory shall be placed into pools classified by major classes or types of goods. The same class or type of finished goods and goods-in-process shall ordinarily be included in the same pool. Where the material content of a class of finished goods and goods-in-process included in a pool has been changed, for example, to conform with current trends in an industry, a separate pool of finished goods and goods-in-process will not ordinarily be required unless the change in material content results in a substantial change in the finished goods.

(d) The requirement that pools be established by major types of materials or major classes of goods is not to be construed so as to preclude the establishment of a miscellaneous pool. Since a taxpayer may elect the dollar-value LIFO method with respect to all or any designated goods in his inventory, there may be a number of such inventory items covered in the election. A

miscellaneous pool shall consist only of items which are relatively insignificant in dollar value by comparison with other inventory items in the particular trade or business and which are not properly includible as part of another pool.

(ii) *Raw materials content pools.* The dollar-value method of pricing LIFO inventories may be used in conjunction with the raw materials content method authorized in § 1.472–1. Raw materials (including the raw material content of finished goods and goods-in-process) which are substantially similar shall be pooled together in accordance with the principles of subdivision (i) of this subparagraph. However, inventories of materials of an unlike nature may not be placed into one pool, even though such materials become part of otherwise identical finished products.

(c) *Principles for establishing pools for wholesalers, retailers, etc.* Items of inventory in the hands of wholesalers, retailers, jobbers, and distributors shall be placed into pools by major lines, types, or classes of goods. In determining such groupings, customary business classifications of the particular trade in which the taxpayer is engaged is an important consideration. An example of such customary business classification is the department in the department store. In such case, practices are relatively uniform throughout the trade, and departmental grouping is peculiarly adapted to the customs and needs of the business. However, in appropriate cases, the principles set forth in paragraphs (b) (1) and (2) of this section, relating to pooling by natural business units, may be used, with permission of the Commissioner, by wholesalers, retailers, jobbers, or distributors. Where a wholesaler or retailer is also engaged in the manufacturing or processing of goods, the pooling of the LIFO inventory for the manufacturing or processing operations shall be determined in accordance with the rules of paragraph (b) of this section.

(d) *Determination of appropriateness of pools.* Whether the number and the composition of the pools used by the taxpayer is appropriate, as well as the propriety of all computations incidental to the use of such pools, will be determined in connection with the examination of the taxpayer's income tax returns. Adequate records must be maintained to support the base-year unit cost as well as the current-year unit cost for all items priced on the dollar-value LIFO inventory method, regardless of the method authorized by paragraph (e) of this section which is used in computing the LIFO value of the dollar-value pool. The pool or pools selected must be used for the year of adoption and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commissioner as provided in paragraph (e) of § 1.446–1. However, see paragraph (h) of this section for authorization to change the method of pooling in certain specified cases.

(e) *Methods of computation of the LIFO value of a dollar-value pool*—(1) *Methods authorized.* A taxpayer may ordinarily use only the so-called ''double-extension'' method for computing the base-year and current-year cost of a dollar-value inventory pool. Where the use of the double-extension method is impractical, because of technological changes, the extensive variety of items, or extreme fluctuations in the variety of the items, in a dollar-value pool, the taxpayer may use an index method for computing all or part of the LIFO value of the pool. An index may be computed by double-extending a representative portion of the inventory in a pool or by the use of other sound and consistent statistical methods. The index used must be appropriate to the inventory pool to which it is to be applied. The appropriateness of the method of computing the index and the accuracy, reliability, and suitability of the use of such index must be demonstrated to the satisfaction of the district director in connection with the examination of the taxpayer's income tax returns. The use of any so-called ''link-chain'' method will be approved for taxable years beginning after December 31, 1960, only in those cases where the taxpayer can demonstrate to the satisfaction of the district director that the use of either an index method or the double-extension method would be impractical or unsuitable in view of the nature of the pool. A taxpayer using either an index or link-chain method shall attach to his income tax return for the first taxable year beginning after December 31, 1960, for which the index or link-chain method is used, a statement describing the particular link-chain method or the method used in computing the index. The statement shall be in sufficient detail to facilitate the determination as to whether the method used meets the standards set forth in this subparagraph. In addition, a copy of the statement shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C. 20224. The taxpayer shall submit such other information as may be requested with respect to such index or link-chain method. Adequate records must be maintained by the taxpayer to support the appropriateness, accuracy, and reliability of an index or link-chain method. A taxpayer may request the Commissioner to approve the appropriateness of an index or link-chain method for the first taxable year beginning after December 31, 1960, for which it is used. Such request must be submitted within 90 days after the beginning of the first taxable year beginning after December 31, 1960, in which the taxpayer desires to use the index or link-chain method, or on or before May 1, 1961, whichever is later. A taxpayer entitled to use the retail method of pricing LIFO inventories authorized by paragraph (k) of §1.472–1 may use retail price indexes prepared by the United States Bureau of Labor Statistics. Any method of computing the LIFO value of a dollar-value pool must be used for the year of adoption and all subsequent taxable years, unless the taxpayer obtains the consent of the Commissioner in accordance with paragraph (e) of §1.446–1 to use a different method.

(2) *Double-extension method.* (i) Under the double-extension method the quantity of each item in the inventory pool at the close of the taxable year is extended at both base-year unit cost and current-year unit cost. The respective extensions at the two costs are then each totaled. The first total gives the amount of the current inventory in terms of base-year cost and the second total gives the amount of such inventory in terms of current-year cost.

(ii) The total current-year cost of items making up a pool may be determined—

(a) By reference to the actual cost of the goods most recently purchased or produced;

(b) By reference to the actual cost of the goods purchased or produced during the taxable year in the order of acquisition;

(c) By application of an average unit cost equal to the aggregate cost of all of the goods purchased or produced throughout the taxable year divided by the total number of units so purchased or produced; or

(d) Pursuant to any other proper method which, in the opinion of the Commissioner, clearly reflects income.

(iii) Under the double-extension method a base-year unit cost must be ascertained for each item entering a pool for the first time subsequent to the beginning of the base year. In such a case, the base-year unit cost of the entering item shall be the current-year cost of that item unless the taxpayer is able to reconstruct or otherwise establish a different cost. If the entering item is a product or raw material not in existence on the base date, its cost may be reconstructed, that is, the taxpayer using reasonable means may determine what the cost of the item would have been had it been in existence in the base year. If the item was in existence on the base date but not stocked by the taxpayer, he may establish, by using available data or records, what the cost of the item would have been to the taxpayer had he stocked the item. If the base-year unit cost of the entering item is either reconstructed or otherwise established to the satisfaction of the Commissioner, such cost may be used as the base-year unit cost in applying the double-extension method. If the taxpayer does not reconstruct or establish to the satisfaction of the Commissioner a base-year unit cost, but does reconstruct or establish to the satisfaction of the Commissioner the cost of the item at some year subsequent to the base year, he may use the earliest cost which he does reconstruct or establish as the base-year unit cost.

(iv) To determine whether there is an increment or liquidation in a pool for a particular taxable year, the end of the year inventory of the pool expressed in terms of base-year cost is compared with the beginning of the year inventory of the pool expressed in terms of base-year cost. When the end of the year inventory of the pool is in excess of the beginning of the year inventory of the pool an increment occurs in the pool for that year. If there is an increment for the taxable year, the ratio of the total current-year cost of the pool to the total base-year cost of the pool must be computed. This ratio when multiplied by the amount of the increment measured in terms of base-year cost gives the LIFO value of such increment. The LIFO value of each such increment is hereinafter referred to in this section as the ‘‘layer of increment’’ and must be separately accounted for and a record thereof maintained as a separate layer of the pool, and may not be combined with a layer of increment occurring in a different year. On the other hand, when the end of the year inventory of the pool is less than the beginning of the year inventory of the pool, a liquidation occurs in the pool for that year. Such liquidation is to be reflected by reducing the most recent layer of increment by the excess of the beginning of the year inventory over the end of the year inventory of the pool. However, if the amount of the liquidation exceeds the amount of the most recent layer of increment, the preceding layers of increment in reverse chronological order are to be successively reduced by the amount of such excess until all the excess is absorbed. The base-year inventory is to be reduced by liquidation only to the extent that the aggregate of all liquidation exceeds the aggregate of all layers of increment.

(v) The following examples illustrate inventories under the double-extension the computation of the LIFO value of method.

Example (1). (a) A taxpayer elects, beginning with the calendar year 1961, to compute his inventories by use of the LIFO inventory method under section 472 and further elects to use the dollar-value method in pricing such inventories as provided in paragraph (a) of this section. He creates Pool No. 1 for items A, B, and C. The composition of the inventory for Pool No. 1 at the base date, January 1, 1961, is as follows:

Items	Units	Unit cost	Total cost
A	1,000	$5	$5,000
B	2,000	4	8,000
C	500	2	1,000
Total base-year cost at Jan. 1, 1961	....	....	14,000

(b) The closing inventory of Pool No. 1 at December 31, 1961, contains 3,000 units of A, 1,000 units of B, and 500 units of C. The taxpayer computes the current-year cost of the items making up the pool by reference to the actual cost of goods most recently purchased. The most recent purchases of items A, B, and C are as follows:

Item	Purchase date	Quantity purchased	Unit cost
A	Dec. 15, 1961	3,500	$6.00
B	Dec. 10, 1961	2,000	5.00
C	Nov. 1, 1961	500	2.50

(c) The inventory of Pool No. 1 at December 31, 1961, shown at base-year and current-year cost is as follows:

Item	Quantity	Dec. 31, 1961, inventory at Jan. 1, 1961, base-year cost		Dec. 31, 1961, inventory at current-year cost	
		Unit cost	Amount	Unit cost	Amount
A	3,000	$5.00	$15,000	$6.00	$18,000
B	1,000	4.00	4,000	5.00	5,000
C	500	2.00	1,000	2.50	1,250
Total	....	....	20,000	....	24,250

(d) If the amount of the December 31, 1961, inventory at base-year cost were equal to, or less than, the base-year cost of $14,000 at January 1, 1961, such amount would be the closing LIFO inventory at December 31, 1961. However, since the base-year cost of the closing LIFO inventory at December 31, 1961, amounts to $20,000, and is in excess of the $14,000 base-year cost of the opening inventory for that year, there is a $6,000 increment in Pool No. 1 during the year. This increment must be valued at current-year cost, i.e., the ratio of 24,250/20,000, or 121.25 percent. The LIFO value of the inventory at December 31, 1961, is $21,275, computed as follows:

POOL NO. 1

	Dec. 31, 1961, inventory at Jan. 1, 1961, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
Jan. 1, 1961, base cost	14,000	100.00	$14,000

POOL NO. 1—Continued

	Dec. 31, 1961, inventory at Jan. 1, 1961, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
Dec. 31, 1961, increment	6,000	121.25	7,275
Total	20,000	....	21,275

Example (2). (a) Assume the taxpayer in example (1) during the year 1962 completely disposes of item C and purchases item D. Assume further that item D is properly includible in Pool No. 1 under the provisions of this section. The closing inventory on December 31, 1962, consists of quantities at current-year unit cost, as follows:

Items	Units	Current-year unit cost Dec. 31, 1962
A	2,000	$6.50
B	1,500	6.00
D	1,000	5.00

(b) The taxpayer establishes that the cost of item D, had he acquired it on January 1, 1961, would have been $2.00 per unit. Such cost shall be used as the base-year unit cost for item D, and the LIFO computations at December 31, 1962, are made as follows:

Item	Quantity	Dec. 31, 1962, inventory at Jan. 1, 1961, base-year cost		Dec. 31, 1962, inventory at current-year cost	
		Unit cost	Amount	Unit cost	Amount
A	2,000	$5.00	$10,000	$6.50	$13,000
B	1,500	4.00	6,000	6.00	9,000
D	1,000	2.00	2,000	5.00	5,000
Total	....	....	18,000	....	27,000

(c) Since the closing inventory at base-year cost, $18,000, is less than the 1962 opening inventory at base-year cost, $20,000, a liquidation of $2,000 has occurred during 1962. This liquidation is to be reflected by reducing the most recent layer of increment. The LIFO value of the inventory at December 31, 1962, is $18,850, and is summarized as follows:

POOL NO. 1

	Dec. 31, 1962, inventory at Jan. 1, 1961, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1962, inventory at LIFO value
Jan. 1, 1961, base cost	14,000	100.00	$14,000
Dec. 31, 1961, increment	4,000	121.25	4,850
Total	18,000	....	18,850

(3) *Use of inventory price index computed with reference to consumer or producer price indexes*—(i) *In general.* For purposes of paragraph (e)(1) of this section, for taxable years beginning after December 31, 1981, an inventory price index computed in the manner provided by paragraph (e)(3) will be accepted by the Commissioner as an appropriate method of computing an index, and the use of such inventory price index to compute the LIFO value of a dollar-value inventory pool will be accepted as accurate, reliable, and suitable. A taxpayer using the inventory price index computation method provided by paragraph (e)(3) must use such method in determing the value of all goods for which the taxpayer has elected to use the LIFO method. However, the inventory price index computation method provided by paragraph (e)(3) may not be used by a taxpayer eligible to use inventory price indexes prepared by the United States Bureau of Labor Statistics for the purpose of valuing the LIFO inventories of a specific industry. Thus, a taxpayer eligible to use the retail price indexes prepared by the Bureau of Labor Statistics and published in *Department Store Inventory Price Indexes* may not use the inventory price index computation method provided by paragraph (e)(3). An inventory price index computed as provided by paragraph (e)(3) is computed in the manner provided by paragraph (e)(3)(ii) with reference to consumer or producer price indexes selected in the manner provided by paragraph (e)(3)(iii). Special rules for establishing inventory

pools to be valued by an inventory price index computed in the manner provided by paragraph (e)(3) are in paragraph (e)(3)(iv). Rules relating to the adoption of, or change to, the method of computing an inventory price index in the manner provided by paragraph (e)(3) are in paragraph (e)(3) (v) and (vi).

(ii) *Computation of index.* An inventory price index computed in the manner provided by this (ii) shall be a stated percentage of the percent change in the selected consumer or producer price index or indexes for a specific category or categories of goods. The stated percentage for a taxpayer in a taxable year in which it is an eligible small business, as defined by section 474(b) of the Code, shall be 100 percent of the percent change in the selected price indexes. The stated percentage for all other taxpayers shall be 80 percent of the percent change in the selected price indexes.

See paragraph (e)(3)(iii) of this section for rules relating to the selection of appropriate consumer or producer price indexes. Thus, if the selected consumer or producer price index for a specific category of goods increased 10 percent for the period December 1981 to December 1982, an inventory price index computed in the manner provided by this (ii) with reference to such consumer or producer price index will reflect an increase of either 10 percent for an eligible small business or 8 percent (80 percent of 10 percent) for all other taxpayers. If the selected consumer or producer price index for a specific category of goods increased 10 percent per year for the period December 1981 to December 1983, an inventory price index computed in the manner provided by this (ii) with reference to such consumer or producer price index will reflect an increase of either 21 percent for an eligible small business or 16.8 percent (80 percent of 21 percent) for all other taxpayers. If under paragraph (e)(3)(iii) it is necessary to select more than one specific consumer or producer price index for an inventory pool, the stated percentage of the percent change in such indexes is the stated percentage of the weighted average percent change for such indexes. Such weighted average is computed with reference to the relative amounts of costs in the inventory pool for each index category of goods. The costs to be used in computing such weighted average must be the relative current-year costs in ending inventory.

(iii) *Selection of consumer or producer price indexes*—(A) *In general.* An inventory price index computed as provided by paragraph (e)(3) of this section is computed with reference to the consumer or producer price indexes for specific categories of inventory items in the *CPI Detailed Report* or *Producer Prices and Price Indexes* published by the United States Bureau of Labor Statistics.

(B) *Selection of indexes by category of inventory items.* The selection of consumer or producer price indexes for an inventory pool is accomplished via a two-step process. First, the inventory items in each pool should be classified according to the detailed listings in the appropriate tables of the *CPI Detailed Report* or in *Producer Prices and Price Indexes* and assigned an index category. Second, an appropriate consumer or producer price index must be determined for each index category to which inventory items have been assigned. The assignment of index categories to the taxpayer's inventory items is accomplished by a process of elimination as follows:

(*1*) Whenever a specific inventory item in the taxpayer's inventory comprises 10 percent or more of total inventory value, such an inventory item must be placed in it's own, separate index category. The index category selected must be the most detailed index category which includes that specific inventory item. In addition, any other inventory item that is included in such most detailed index category must also be included in such index category.

(*2*) If there are inventory items still remaining in the pool that have not been included in an index category, the taxpayer, beginning with the most detailed index categories for such remaining inventory items, must investigate successively less detailed index category levels and select the first index category that contains remaining inventory items which in the aggregate comprise 10 percent or more of total inventory value. The index category so selected must be the separate index category for the included inventory items. This procedure must be repeated either until all inventory items in the pool have been included in an index category, or until the remaining inventory items in the aggregate comprise less than 10 percent of total inventory value, or until it has been determined that no appropriate index category exists for the aggregate of such remaining inventory items.

(*3*) If there are inventory items remaining in the pool that comprise less than 10 percent of total inventory value, the index category to be selected for these inventory items must be the most detailed index category that includes such inventory items. If it has been determined that no appropriate index category exists for such remaining inventory items, such remaining inventory items must be combined in a miscellaneous index category created by the taxpayer.

In no event shall an index category be selected that is less detailed than either the 11 general categories of consumer goods described in Tables 3 and 5 of the *CPI Detailed Report* (see paragraph (e)(3)(iv) of this section), or the 15 general categories of producer goods described in Table 6 of the *Producer Prices and Price Indexes.* The determination of the appropriate index for an index category is accomplished as follows:

(*4*) Whenever an index category has been selected pursuant to paragraph (e)(3)(iii)(B)(*1*) of this section the appropriate index must be the published index for that index category.

(*5*) Whenever an index category has been selected pursuant to paragraph (e)(3)(iii)(B) (*2*) or (*3*) of this section, the appropriate index must be a weighted average of the published indexes of the index category items actually present in the taxpayer's inventory, excluding any index category items that have been placed in any other separate index category, weighted according to the weights used by BLS. Thus, if a taxpayer's inventory contains every inventory item that comprises the selected index category and none of these inventory items have been placed in any other separate index category, the appropriate index must be the published index for that index category. In the case of a miscellaneous index category created by the taxpayer, the appropriate index must be a weighted average of the published indexes for the index category items, weighted according to the weights used by BLS.

The use of BLS weights is limited only to the determination of the appropriate index for an index category. In computing the index for a pool, the taxpayer will weight the appropriate indexes for the separate index categories comprising the pool according to the taxpayer's actual inventory weights for such separate index categories. Whether the selection of the consumer or producer price indexes to be used to compute an inventory price index is appropriate, and the propriety of all computations incidental to the use of such consumer or producer price indexes, will be determined in connection with the examination of the taxpayer's income tax return. The selection of a consumer or producer price index for a specific good to compute an inventory price index under paragraph (e)(3) is a method of accounting. A taxpayer desiring to change the selection of such a consumer or producer price index must secure the consent of the Commissioner as provided in §1.446–1(e). In the case of such a change, any layers of inventory increments previously determined and the LIFO value of such increments shall be retained. Instead of using the earliest taxable year for which the taxpayer adopted the LIFO method for any items in the inventory pool, the year of such change shall be used as the base year in determining the LIFO value of the inventory pool for the year of change and later taxable years. The base year costs of layers of increments in the pool at the beginning of the year of change shall be restated in terms of new base year costs using the year of change as the new base year.

(C) *Other selection requirements.* Manufacturers, processors, wholesalers, jobbers, and distributors may select indexes from only *Producer Prices and*

Price Indexes. Retailers may select indexes from either the *CPI Detailed Report* or *Producer Prices and Price Indexes,* but if equally appropriate indexes could be selected from either publication, a retailer using the retail inventory method must select the index from the *CPI Detailed Report* and a retailer not using the retail inventory method must select the index from *Producer Prices and Price Indexes.* If a retailer using the retail inventory method selects a price index from *Producer Prices and Price Indexes,* the selected index must be converted into a retail price index. If a retailer not using the retail inventory method selects an index from the *CPI Detailed Report,* the selected index must be converted into a cost price index. Manufacturers, processors, wholesalers, jobbers, and distributors, must convert selected indexes into cost price indexes. In the case of the *CPI Detailed Report,* indexes may be selected only from Table 3 (Consumer Price Index for All Urban Consumers: Food expenditure categories, U.S. city average) and Table 5 (Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average). In the case of the *Producer Prices and Price Indexes,* indexes may be selected only from Table 6 (Producer prices and price indexes for commodity groupings and individual items), unless the taxpayer can demonstrate that the selection of an index from another *Producer Prices and Price Indexes* table would be more appropriate. In the case of a taxpayer using the retail inventory method, the selected index must be the index as of the last month of the taxpayer's taxable year. Taxpayers that do not use the retail inventory method must select indexes as of the month or months most appropriate to the taxpayer's method of determining the current-year cost of the inventory pool under paragraph (e)(2)(ii) of this section, or make a one-time binding election of an appropriate representative month during the taxable year. The election must be clearly set forth on Form 970 (see paragraph (e)(3)(v) of this section).

(iv) *Special rules for pools.* A retailer, wholesaler, jobber, or distributor computing an inventory price index in the manner provided by paragraph (e)(3) of this section may, at the option of the taxpayer, establish an inventory pool for any group of goods included within one of eleven general categories of consumer goods described in the *CPI Detailed Report.* The eleven categories are food and beverages, housing maintenance and repair commodities, fuels (other than gasoline), house furnishings and housekeeping supplies, apparel commodities, private transportation (including gasoline), medical care commodities, entertainment commodities, tobacco products, toilet goods and personal care appliances, and school books and supplies. Inventory pools that comprise less than 5 percent of inventory value may be combined to form a single miscellaneous inventory pool. If the resulting miscellaneous inventory pool itself comprises less than 5 percent of inventory value, such pool may be combined only with the largest inventory pool. See paragraphs (b), (c) and (d) of this section for additional rules relating to the establishment of pools. See also section 474 of the Code for rules relating to the use of a single pool by an eligible small business. Except as provided in paragraph (e)(3)(v) of this section, relating to the adoption or change of method of computing an inventory price index, the rules of paragraph (g)(1) and (2) of this section apply to a change in method of pooling.

(v) *Adoption or change of method.* The use of an inventory price index computed in the manner provided by paragraph (e)(3) of this section is considered a method of accounting. A taxpayer permitted to adopt or change to the dollar-value LIFO inventory method without first securing the consent of the Commissioner may also adopt the inventory price index computation method prescribed by paragraph (e)(3) incident to such adoption or change without first securing the consent of the Commissioner. In all other cases, a taxpayer may adopt or change to the inventory price index computation method prescribed by paragraph (e)(3) only after first securing the consent of the Commissioner as provided in § 1.446–1(e). However, in the case of a taxpayer not using the inventory price index computation method prescribed by paragraph (e)(3), the taxpayer may adopt or change to such method for the taxpayer's first or second taxable year beginning after December 31, 1981, without requesting the Commissioner's consent to such adoption or change. In addition, in such a case the taxpayer is not required to request the Commissioner's consent to a change in method of pooling incident to such adoption or change if the taxpayer is changing to a method of pooling authorized by paragraph (e)(3)(iv). In this case the rules of §1.472–8(g) will apply. The inventory price index computation method provided by paragraph (e)(3) may be adopted and used only if the taxpayer indicates on a Form 970, or in such other manner as may be acceptable to the Commissioner, a listing of each inventory pool, the type of goods included in each pool, and the consumer or producer price index or indexes selected for each inventory pool. In the case of a taxpayer permitted to adopt or change to the inventory price index computation method without requesting the Commissioner's consent, the Form 970 shall be attached to the taxpayer's income tax return for the taxable year of such adoption or change. In other cases, the Form 970 shall be attached to a Form 3115 filed in accordance with §1.446–1(e). Taxpayers must maintain adequate books and records of the use and computation of the inventory price index method in order to satisfy the requirements of §1.472–2(h). Notwithstanding the rules in paragraph (e)(1) of this section, a taxpayer adopting or changing to the use of an inventory price index computed in the manner provided by paragraph (e)(3) is not required to demonstrate that the use of the double-extension method is impractical.

(vi) *Requirement incident to change.* In the case of a taxpayer using a method other than an inventory price index computed as prescribed by paragraph (e)(3) of this section to determine the LIFO value of a dollar-value inventory pool, any layers of inventory increments previously determined by such method and the LIFO value of such layers shall be retained if the taxpayer changes to the use of a price index computed as prescribed by paragraph (e)(3). Instead of using the earliest taxable year for which the taxpayer adopted the LIFO method for any items in the pool, the year of such change shall be used as the base year in determining the LIFO value of the inventory pool for the year of change and later taxable years. The base year costs of layers of increments in the pool at the beginning of the year of change shall be restated in terms of new base year cost, using the year of change as the new base year. See paragraph (f)(2) of this section for rules relating to a change to the dollar-value method from another method of pricing LIFO inventories.

(f) *Change to dollar-value method from another method of pricing LIFO inventories*—(1) *Consent required.* Except as provided in §1.472–3 in the case of a taxpayer electing to use a LIFO inventory method for the first time, or in the case of a taxpayer changing to the dollar-value method and continuing to use the same pools as were used under another LIFO method, a taxpayer using another LIFO method of pricing inventories may not change to the dollar-value method of pricing such inventories unless he first secures the consent of the Commissioner in accordance with paragraph (e) of §1.446–1.

(2) *Method of converting inventory.* Where the taxpayer changes from one method of pricing LIFO inventories to the dollar-value method, the ending LIFO inventory for the taxable year immediately preceding the year of change shall be converted to the dollar-value LIFO method. This is done to establish the base-year cost for subsequent calculations. Thus, if the taxpayer was previously valuing LIFO inventories on the specific goods method, these separate values shall be combined into appropriate pools. For this purpose, the base year for the pool shall be the earliest taxable year for which the LIFO inventory method had been adopted for any item in that pool. No change will be made in the overall LIFO value of the opening inventory for the year of change as a result of the conversion, and that inventory will merely be restated in the manner used under the dollar-value method. All layers of increment for such inventory must be retained, except that all layers of increment which occurred in the same taxable year must be combined. The following examples illustrate the provisions of this subparagraph:

Example (1). (i) Assume that the taxpayer has used another LIFO method for finished goods since 1954 and has complied with all the requirements prerequisite for a change to the dollar-value method. Items A, B, and C, which have previously been inventoried under the specific goods LIFO method, may properly be included in a single dollar-value LIFO pool. The LIFO inventory value of items A, B, and C at December 31, 1960, is $12,200, computed as follows:

Year	Base quantity and yearly increments	Unit cost	Dec. 31, 1960, inventory at LIFO value
Item A			
1954 (base year)	100	$1	$100
1955	200	2	400
1956	100	4	400
1960	100	6	600
Total	500	....	1,500
Item B			
1954 (base year)	300	6	1,800
1955	100	8	800
1960	50	10	500
Total	450	....	3,100
Item C			
1954 (base year)	1,000	4	4,000
1955	200	6	1,200
1956	300	8	2,400
Total	1,500	....	7,600
LIFO value of items A, B, and C at Dec. 31, 1960	....	....	12,200

There were no increments in the years 1957, 1958, or 1959.

(ii) The computation of the ratio of the total current-year cost to the total base-year cost for the base year and each layer of increment in Pool No. 1 is shown as follows:

Item	1954 base-year unit cost	Year 1954	Increments		
			1955	1956	1960
A					
Base-year cost	$1.00	$100	$200	$100	$100
LIFO value	....	100	400	400	600
B					
Base-year cost	6.00	1,800	600	....	300
LIFO value	....	1,800	800	....	500
C					
Base-year cost	4.00	4,000	800	1,200	....
LIFO value	....	4,000	1,200	2,400	....
Total—Base-year cost	5,900	1,600	1,300	400	
Total—LIFO value	5,900	2,400	2,800	1,100	
Ratio of total current-year cost to total base-year cost (percent)	....	100.00	150.00	215.38	275.00

(iii) On the basis of the foregoing computations, the LIFO inventory of Pool No. 1, at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
1954 base cost	$5,900	100.00	$5,900
1955 increment	1,600	150.00	2,400
1956 increment	1,300	215.38	2,800
1960 increment	400	275.00	1,100
Total	9,200	....	12,200

Example (2). Assume the same facts as in example (1) and assume further that the base-year cost of Pool No. 1 at December 31, 1961, is $8,350. Since the closing inventory for the taxable year 1961 at base-year cost is less than the opening inventory for that year at base-year cost, a liquidation has occurred during 1961. This liquidation absorbs all of the 1960 layer of increment and part of the 1956 layer of increment. The December 31, 1961, inventory is $10,131, computed as follows:

	Dec. 31, 1961, inventory at base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
1954 base cost	$5,900	100.00	$5,900

	Dec. 31, 1961, inventory at base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
1955 increment	1,600	150.00	2,400
1956 increment	850	215.38	1,831
Total	8,350	....	10,131

(g) *Transitional rules*—(1) *Change in method of pooling.* Any method of pooling authorized by this section and used by the taxpayer in computing his LIFO inventories under the dollar-value method shall be treated as a method of accounting. Any method of pooling which is authorized by this section shall be used for the year of adoption and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commissioner as provided in paragraph (e) of §1.446–1. Where the taxpayer changes from one method of pooling to another method of pooling permitted by this section, the ending LIFO inventory for the taxable year preceding the year of change shall be restated under the new method of pooling.

(2) *Manner of combining or separating dollar-value pools.* (i) A taxpayer who has been using the dollar-value LIFO method and who is permitted or required to change his method of pooling, shall combine or separate the LIFO value of his inventory for the base year and each yearly layer of increment in order to conform to the new pool or pools. Each yearly layer of increment in the new pool or pools must be separately accounted for and a record thereof maintained, and any liquidation occurring in the new pool or pools subsequent to the formation thereof shall be treated in the same manner as if the new pool or pools had existed from the date the taxpayer first adopted the LIFO inventory method. The combination or separation of the LIFO value of his inventory for the base year and each yearly layer of increment shall be made in accordance with the appropriate method set forth in this subparagraph, unless the use of a different method is approved by the Commissioner.

(ii) Where the taxpayer is permitted or required to separate a pool into more than one pool, the separation shall be made in the following manner: First, each item in the former pool shall be placed in an appropriate new pool. Every item in each new pool is then extended at its base-year unit cost and the extensions are totaled. Each total is the amount of inventory for each new pool expressed in terms of base-year cost. Then a ratio of the total base-year cost of each new pool to the base-year cost of the former pool is computed. The resulting ratio is applied to the amount of inventory for the base year and each yearly layer of increment of the former pool to obtain an allocation to each new pool of the base-year inventory of the former pool and subsequent layers of increment thereof. The foregoing may be illustrated by the following example of a change for the taxable year 1961:

Example. (a) Assume that items A, B, C, and D are all grouped together in one pool prior to December 31, 1960. The LIFO inventory value at December 31, 1960, is computed as follows:

	Pool ABCD		
	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1956, base cost	$10,000	100	$10,000
Dec. 31, 1956, increment	1,000	110	1,100
Dec. 31, 1958, increment	5,000	120	6,000
Dec. 31, 1960, increment	4,000	125	5,000
Total	20,000	....	22,100

(b) The extension of the quantity of items A, B, C, and D at respective base-year unit costs is as follows:

Item	Quantity	Base-year unit cost	Amount
A	2,000	$2	$4,000
B	1,000	3	3,000
C	1,000	5	5,000
D	4,000	2	8,000
Total	....	....	20,000

(c) Under the provisions of this section the taxpayer separates former Pool ABCD into

two pools, Pool AB and Pool CD. The computation of the ratio of total base-year cost for each of the new pools to the base-year cost of the former pool is as follows:

Item	Total base-year cost	Ratio
Pool AB:		
A	$4,000	....
B	3,000	....
	7,000	7,000/20,000
Pool CD:		
C	5,000	....
D	8,000	....
	13,000	13,000/20,000
Total for pool ABCD	20,000	....

(d) The ratio of the base-year cost of new Pools AB and CD to the base-year cost of former Pool ABCD is 7,000/20,000 and 13,000/20,000, respectively. The allocation of the January 1, 1956 base cost and subsequent yearly layers of increment of former Pool ABCD to new Pools AB and CD is as follows:

	Base-year cost to be allocated	Pool	
		AB	CD
Jan. 1, 1956, base cost	$10,000	$3,500	$6,500
Dec. 31, 1956, increment	1,000	350	650
Dec. 31, 1958, increment	5,000	1,750	3,250
Dec. 31, 1960, increment ..	4,000	1,400	2,600
Total	20,000	7,000	13,000

(e) The LIFO value of new Pools AB and CD at December 31, 1960, as allocated, is as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool AB			
Jan. 1, 1956, base cost	$3,500	100	$3,500
Dec. 31, 1956, increment	350	110	385
Dec. 31, 1958, increment	1,750	20	2,100
Dec. 31, 1960, increment	1,400	125	1,750
Total	7,000	....	7,735
Pool CD			
Jan. 1, 1956, base cost	6,500	100	6,500
Dec. 31, 1956, increment	650	110	715
Dec. 31, 1958, increment	3,250	120	3,900
Dec. 31, 1960, increment	2,600	125	3,250
Total	13,000	....	14,365

(iii) Where the taxpayer is permitted or required to combine two or more pools having the same base year, they shall be combined into one pool in the following manner: The LIFO value of the base-year inventory of each of the former pools is combined to obtain a LIFO value of the base-year inventory for the new pool. Then, any layers of increment in the various pools which occurred in the same taxable year are combined into one total layer of increment for that taxable year. However, layers of increment which occurred in different taxable years may not be combined. In combining the layers of increment a new ratio of current-year cost to base-year cost is computed for each of the combined layers of increment. The foregoing may be illustrated by the following example:

Example. (a) Assume the taxpayer has two pools at December 31, 1960. Under the provisions of this section the taxpayer combines these pools into a single pool as of January 1, 1961. The LIFO inventory value of each pool at December 31, 1960, is shown as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1957, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool No. 1			
Jan. 1, 1956, base cost	$10,000	100	$10,000
Dec. 31, 1957, increment	2,000	110	2,200
Dec. 31, 1960, increment	1,000	120	1,200
Total	13,000	....	13,400
Pool No. 2			
Jan. 1, 1957, base cost	5,000	100	5,000
Dec. 31, 1960, increment	3,000	140	4,200
Total	8,000	....	9,200

(b) The computation of the ratio of the total current-year cost to the total base-year cost for the base year and each yearly layer of increment in the new pool is as follows:

Pool	Base year 1957	Increments	
		Dec. 31, 1957	Dec. 31, 1960
No. 1:			
Base-year cost	$10,000	$2,000	$1,000
LIFO value	10,000	2,200	1,200
No. 2:			
Base-year cost	5,000	....	3,000
LIFO value	5,000	....	4,200
Total, base-year cost	15,000	2,000	4,000
Total, LIFO value	15,000	2,200	5,400
Ratio of total current-year cost to total base-year cost (percent)	100	110	135

(c) On the basis of the foregoing computations, the LIFO inventory of the new pool at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1957, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1957, base cost	$15,000	100	$15,000
Dec. 31, 1957, increment	2,000	110	2,200
Dec. 31, 1960, increment	4,000	135	5,400
Total	21,000	....	22,600

(iv) In combining pools having different base years, the principles set forth in subdivision (iii) of this subparagraph are to be applied, except that all base years subsequent to the earliest base year shall be treated as increments, and the base-year costs for all pools having a base year subsequent to the earliest base year of any pool shall be redetermined in terms of the base cost for the earliest base year. The foregoing may be illustrated by the following example:

Example. (a) Assume that the taxpayer has two pools at December 31, 1960. Under the provisions of this section the taxpayer combines these pools into a single pool as of January 1, 1961. The LIFO inventory value of each pool at December 31, 1960, is shown as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current rent-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool No. 1			
Jan. 1, 1956, base cost	$7,000	100	$7,000
Dec. 31, 1956, increment	1,000	105	1,050
Dec. 31, 1957, increment	500	110	550
Dec. 31, 1958, increment	500	110	550
Dec. 31, 1960, increment	1,000	120	1,200
Total	10,000	....	10,350
Pool No. 2			
Jan. 1, 1958, base cost	3,500	100	3,500
Dec. 31, 1958, increment	1,000	110	1,100
Dec. 31, 1959, increment	500	115	575
Total	5,000	....	5,175

(b) The next step is to redetermine the 1958 base-year cost for Pool No. 2 in terms of 1956 base-year cost. January 1, 1956 base-year unit cost must be reconstructed or established in accordance with paragraph (e)(2) of this section for each item in Pool No. 2. Such costs are assumed to be $9.00 for item A, $20.00 for item B, and $1.80 for item C. A ratio of the 1958 total base-year cost to the 1956 total base-year cost for Pool No. 2 is computed as follows:

Item	Quantity	Jan. 1, 1956, base-year unit cost	Jan. 1, 1956, base-year cost
A	250	$9.00	$2,250
B	75	20.00	1,500
C	500	1.80	900
Total	....	....	4,650
A	250	10.00	2,500
B	75	20.00	1,500
C	500	2.00	1,000
Total	....	....	5,000

(c) The ratio of the 1956 total base-year cost to the 1958 total base-year cost for Pool No. 2 is 4,650/5,000 or 93 percent. The January 1, 1958 base cost and each yearly layer of increment at 1958 base-year cost is multiplied

by this ratio. Such computation is as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1958, base-year cost	Ratio (percent)	Dec. 31, 1960, inventory restated at Jan. 1, 1956, base-year cost
Jan. 1, 1958, base cost	$3,500	93	$3,255
Dec. 31, 1958, increment	1,000	93	930
Dec. 31, 1959, increment	500	93	465
Total			4,650

(d) The computation of the ratio of the total current-year cost to the total base-year cost for the base year (1956) and each yearly layer of increment in the new pool is as follows:

Pool	Base year 1956	Increments				
		Dec. 31, 1956	Dec. 31, 1957	Dec. 31, 1958	Dec. 31, 1959	Dec. 31, 1960
No. 1:						
Base-year cost	$7,000	$1,000	$500	$500		$1,000
LIFO value	7,000	1,050	550	550		1,200
No. 2:						
Base-year cost as restated			3,255	930	$465	
LIFO value			3,500	1,100	575	
Total, base-year cost	7,000	1,000	3,755	1,430	465	1,000
Total, LIFO value	7,000	1,050	4,050	1,650	575	1,200
Ratio of total current-year cost to total base-year cost (percent)	100.00	105.00	107.86	115.38	133.66	120.00

(e) On the basis of the foregoing computation, the LIFO inventory of the new pool at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1956, base cost	$7,000	100.00	$7,000
Dec. 31, 1956, increment	1,000	105.00	1,050
Dec. 31, 1957, increment	3,755	107.86	4,050
Dec. 31, 1958, increment	1,430	115.38	1,650
Dec. 31, 1959, increment	465	123.66	575
Dec. 31, 1960, increment	1,000	120.00	1,200
Total	14,650		15,525

(3) *Change in methods of computation at the LIFO value of a dollar-value pool.* For the first taxable year beginning after December 31, 1960, the taxpayer must use a method authorized by paragraph (e)(1) of this section in computing the base-year cost and current-year cost of a dollar-value inventory pool for the end of such year. If the taxpayer had previously used any methods other than one authorized by paragraph (e)(1) of this section, he shall not be required to recompute his LIFO inventories for taxable years beginning on or before December 31, 1960, under a method authorized by such paragraph. The base cost and layers of increment previously computed by such other method shall be retained and treated as if such base cost and layers of increment had been computed under a method authorized by paragraph (e)(1) of this section. The taxpayer shall use the year of change as the base year in applying the double-extension method or other method approved by the Commissioner, instead of the earliest year for which he adopted the LIFO method for any items in the pool.

(h) *Change without consent in method of pooling*—(1) *Authorization.* Notwithstanding the provisions of paragraph (g) of this section, a taxpayer, for his first taxable year ending after April 15, 1961, may change from one method of pooling authorized by this section to any other method of pooling authorized by this section provided the requirements of subparagraph (2) of this paragraph are met. Also, for such year, if a taxpayer is currently using only a method of pooling authorized by this section, or a method of pooling which would be authorized by this section if additional items were included in the pool, and could change to the natural business unit method, except for the fact he has not inventoried all items entering into the inventory investment for such natural business unit on the LIFO method, he may change to the natural business unit method if he elects under the provisions of §1.472–3 to extend the LIFO election to all items entering into the entire inventory investment for such natural business unit, provided the requirements of subparagraph (2) of this paragraph are met. The method of pooling adopted shall be used for the year of change and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commission as provided in paragraph (e) of §1.446–1.

(2) *Requirements.* A statement shall be attached to the income tax return for the year of change referred to in subparagraph (1) of this paragraph setting forth, in summary form, the following information:

(i) A description of the new pool or pools,

(ii) The basis for selection of the new pool or pools,

(iii) A schedule showing the computation of the LIFO value of the former pool or pools, and,

(iv) A schedule showing the transition from the former pool or pools to the new pool or pools.

In addition, a copy of the statement shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, DC 20024. The taxpayer shall submit such other information with respect to the change in method of pooling as may be requested.

(b) Rules.

§1.475(b)–1 Scope of exemptions from mark-to-market requirement.

(a) Securities held for investment or not held for sale.
(b) Securities deemed identified as held for investment.
(1) In general.
(2) Relationships.
(i) General rule.
(ii) Attribution.
(iii) Trusts treated as partnerships.
(3) Securities traded on certain established financial markets.
(4) Changes in status.
(i) Onset of prohibition against marking.
(ii) Termination of prohibition against marking.
(iii) Examples.
(c) Securities deemed not held for investment; dealers in notional principal contracts and derivatives.
(d) Special rule for hedges of another member's risk.
(e) Transitional rules.
(1) Stock, partnership, and beneficial ownership interests in certain controlled corporations, partnerships, and trusts before January 23, 1997.
(i) In general.
(ii) Control defined.
(iii) Applicability.
(2) Dealers in notional principal contracts and derivatives acquired before January 23, 1997.
(i) General rule.
(ii) Exception for securities not acquired in dealer capacity.
(iii) Applicability.

§1.475(b)–2 Exemptions—identification requirements.

(a) Identification of the basis for exemption.
(b) Time for identifying a security with a substituted basis.
(c) Integrated transactions under §1.1275–6.
(1) Definitions.
(2) Synthetic debt held by a taxpayer as a result of legging in.
(3) Securities held after legging out.

§1.475(b)–3 [Reserved]

§1.475(b)–4 Exemptions—transitional issues.

(a) Transitional identification.
(1) Certain securities previously identified under section 1236.

(2) Consistency requirement for other securities.

(b) Corrections on or before January 31, 1994.

(1) Purpose.

(2) To conform to § 1.475(b)–1(a).

(i) Added identifications.

(ii) Limitations.

(3) To conform to § 1.475(b)–1(c).

(c) Effect of corrections.

§ 1.475(c)–1 Definitions—dealer in securities.

(a) Dealer-customer relationship.

(1) [Reserved].

(2) Transactions described in section 475(c)(1)(B).

(i) In general.

(ii) Examples.

(3) Related parties.

(i) General rule.

(ii) Special rule for members of a consolidated group.

(iii) The intragroup-customer election.

(A) Effect of election.

(B) Making and revoking the election.

(iv) Examples.

(b) Sellers of nonfinancial goods and services.

(1) Purchases and sales of customer paper.

(2) Definition of customer paper.

(3) Exceptions.

(4) Election not to be governed by the exception for sellers of nonfinancial goods or services.

(i) Method of making the election.

(A) Taxable years ending after December 24, 1996.

(B) Taxable years ending on or before December 24, 1996.

(ii) Continued applicability of an election.

(c) Taxpayers that purchase securities from customers but engage in no more than negligible sales of the securities.

(1) Exemption from dealer status.

(i) General rule.

(ii) Election to be treated as a dealer.

(2) Negligible sales.

(3) Special rules for members of a consolidated group.

(i) Intragroup-customer election in effect.

(ii) Intragroup-customer election not in effect.

(4) Special rules.

(5) Example.

(d) Issuance of life insurance products.

§ 1.475(c)–2 Definitions—security.

(a) Items that are not securities.

(b) Synthetic debt that § 1.1275–6(b) treats the taxpayer as holding.

(c) Negative value REMIC residuals acquired before January 4, 1995.

(1) Description.

(2) Special rules applicable to negative value REMIC residuals acquired before January 4, 1995.

§ 1.475(d)–1 Character of gain or loss.

(a) Securities never held in connection with the taxpayer's activities as a dealer in securities.

(b) Ordinary treatment for notional principal contracts and derivatives held by dealers in notional principal contracts and derivatives.

§ 1.475(e)–1 Effective dates.

[T.D. 8700, 61 FR 67719, Dec. 24, 1996]

§ 1.475(a)–1—1.475(a)–2 [Reserved]

§ 1.475(a)–3 Acquisition by a dealer of a security with a substituted basis.

(a) *Scope.* This section applies if—

(1) A dealer in securities acquires a security that is subject to section 475(a) and the dealer's basis in the security is determined, in whole or in part, by reference to the basis of that security in the hands of the person from whom the security was acquired; or

(2) A dealer in securities acquires a security that is subject to section 475(a) and the dealer's basis in the security is determined, in whole or in part, by reference to other property held at any time by the dealer.

(b) *Rules.* If this section applies to a security—

(1) Section 475(a) applies only to changes in value of the security occurring after the acquisition; and

(2) Any built-in gain or loss with respect to the security (based on the difference between the fair market value of the security on the date the dealer acquired it and its basis to the dealer on that date) is taken into account at the time, and has the character, provided by the sections of the Internal Revenue Code that would apply to the built-in gain or loss if section 475(a) did not apply to the security.

[T.D. 8700, 61 FR 67720, Dec. 24, 1996]

§ 1.475(b)–1 Scope of exemptions from mark-to-market requirement.

(a) *Securities held for investment or not held for sale.* Except as otherwise provided by this section and subject to the identification requirements of section 475(b)(2), a security is held for investment (within the meaning of section 475(b)(1)(A)) or not held for sale (within the meaning of section 475(b)(1)(B)) if it is not held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(b) *Securities deemed identified as held for investment*—(1) *In general.* The following items held by a dealer in securities are per se held for investment within the meaning of section 475(b)(1)(A) and are deemed to be properly identified as such for purposes of section 475(b)(2)—

(i) Except as provided in paragraph (b)(3) of this section, stock in a corporation, or a partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust, to which the taxpayer has a relationship specified in paragraph (b)(2) of this section; or

(ii) A contract that is treated for federal income tax purposes as an annuity, endowment, or life insurance contract (see sections 72, 817, and 7702).

(2) *Relationships*—(i) *General rule.* The relationships specified in this paragraph (b)(2) are—

(A) Those described in section 267(b) (2), (3), (10), (11), or (12); or

(B) Those described in section 707(b)(1)(A) or (B).

(ii) *Attribution.* The relationships described in paragraph (b)(2)(i) of this section are determined taking into account sections 267(c) and 707(b)(3), as appropriate.

(iii) *Trusts treated as partnerships.* For purposes of this paragraph (b)(2), the phrase partnership or trust is substituted for the word *partnership* in sections 707(b) (1) and (3), and a reference to beneficial ownership interest is added to each reference to capital interest or profits interest in those sections.

(3) *Securities traded on certain established financial markets.* Paragraph (b)(1)(i) of this section does not apply to a security if—

(i) The security is actively traded within the meaning of §1.1092(d)–1(a) taking into account only established financial markets identified in §1.1092(d)–1(b)(1) (i) or (ii) (describing national securities exchanges and interdealer quotation systems);

(ii) Less than 15 percent of all of the outstanding shares or interests in the same class are held by the taxpayer and all persons having a relationship to the taxpayer that is specified in paragraph (b)(2) of this section; and

(iii) If the security was acquired (e.g., on original issue) from a person having a relationship to the taxpayer that is specified in paragraph (b)(2) of this section, then, after the time the security was acquired—

(A) At least one full business day has passed; and

(B) There has been significant trading involving persons not having a relationship to the taxpayer that is specified in paragraph (b)(2) of this section.

(4) *Changes in status*—(i) *Onset of prohibition against marking.* (A) Once paragraph (b)(1) of this section begins to apply to the security and for so long as it continues to apply, section 475(a) does not apply to the security in the hands of the taxpayer.

(B) If a security has not been timely identified under section 475(b)(2) and, after the last day on which such an identification would have been timely, paragraph (b)(1) of this section begins to apply to the security, then the dealer must recognize gain or loss on the security as if it were sold for its fair market value as of the close of business of the last day before paragraph (b)(1) of this section begins to apply to the security, and gain or loss is taken into account at that time.

(ii) *Termination of prohibition against marking.* If a taxpayer did not timely identify a security under section 475(b)(2), and paragraph (b)(1) of this section applies to the security on the last day on which such an identification would have been timely but thereafter ceases to apply—

(A) An identification of the security under section 475(b)(2) is timely if made on or before the close of the day paragraph (b)(1) of this section ceases to apply; and

(B) Unless the taxpayer timely identifies the security under section 475(b)(2) (taking into account the additional time for identification that is provided by paragraph (b)(4)(ii)(A) of this section), section 475(a) applies to changes in value of the security after the cessation in the same manner as under section 475(b)(3).

(iii) *Examples.* These examples illustrate this paragraph (b)(4):

Example 1. Onset of prohibition against marking—(A) *Facts.* Corporation *H* owns 75 percent of the stock of corporation *D,* a dealer in securities within the meaning of section 475(c)(1). On December 1, 1995, *D* acquired less than half of the stock in corporation *X*. *D* did not identify the stock for purposes of section 475(b)(2). On July 17, 1996, *H* acquired from other persons 70 percent of the stock of *X*. As a result, *D* and *X* became related within the meaning of paragraph (b)(2)(i) of this section. The stock of *X* is not described in paragraph (b)(3) of this section (concerning some securities traded on certain established financial markets).

(B) *Holding.* Under paragraph (b)(4)(i) of this section, *D* recognizes gain or loss on its *X* stock as if the stock were sold for its fair market value at the close of business on July 16, 1996, and the gain or loss is taken into account at that time. As with any application of section 475(a), proper adjustment is made in the amount of any gain or loss subsequently realized. After July 16, 1996, section 475(a) does not apply to D's *X* stock while paragraph (b)(1)(i) of this section (concerning the relationship between *X* and *D*) continues to apply.

Example 2. Termination of prohibition against marking; retained securities identified as held for investment—(A) *Facts.* On July 1, 1996, corporation *H* owned 60 percent of the stock of corporation *Y* and all of the stock of corporation *D*, a dealer in securities within the meaning of section 475(c)(1). Thus, *D* and *Y* are related within the meaning of paragraph (b)(2)(i) of this section. Also on July 1, 1996, *D* acquired, as an investment, 10 percent of the stock of *Y*. The stock of *Y* is not described in paragraph (b)(3) of this section (concerning some securities traded on certain established financial markets). When *D* acquired its shares of *Y* stock, it did not identify them for purposes of section 475(b)(2). On December 24, 1996, *D* identified its shares of *Y* stock as held for investment under section 475(b)(2). On December 30, 1996, *H* sold all of its shares of stock in *Y* to an unrelated party. As a result, *D* and *Y* ceased to be related within the meaning of paragraph (b)(2)(i) of this section.

(B) *Holding.* Under paragraph (b)(4)(ii)(A) of this section, identification of the *Y* shares is timely if done on or before the close of December 30, 1996. Because *D* timely identified its *Y* shares under section 475(b)(2), it continues after December 30, 1996, to refrain from marking to market its *Y* stock.

Example 3. Termination of prohibition against marking; retained securities not identified as held for investment— (A) *Facts.* The facts are the same as in *Example 2* above, except that *D* did not identify its stock in *Y* for purposes of section 475(b)(2) on or before December 30, 1996. Thus, *D* did not timely identify these securities under section 475(b)(2) (taking into account the additional time for identification provided in paragraph (b)(4)(ii)(A) of this section).

(B) *Holding.* Under paragraph (b)(4)(ii)(B) of this section, section 475(a) applies to changes in value of *D*'s *Y* stock after December 30, 1996, in the same manner as under section 475(b)(3).

Thus, any appreciation or depreciation that occurred while the securities were prohibited from being marked to market is suspended. Further, section 475(a) applies only to those changes occurring after December 30, 1996.

Example 4. Acquisition of actively traded stock from related party—(A) *Facts.* Corporation *P* is the parent of a consolidated group whose taxable year is the calendar year, and corporation *M*, a member of that group, is a dealer in securities within the meaning of section 475(c)(1). Corporation *M* regularly acts as a market maker with respect to common and preferred stock of corporation *P*. Corporation *P* has outstanding 2,000,000 shares of series *X* preferred stock, which are traded on a national securities exchange. During the business day on December 29, 1997, corporation *P* sold 100,000 shares of series *X* preferred stock to corporation *M* for $100 per share. Subsequently, also on December 29, 1997, persons not related to corporation *M* engaged in significant trading of the series *X* preferred stock. At the close of business on December 30, 1997, the fair market value of series *X* stock was $99 per share. At the close of business on December 31, 1997, the fair market value of series *X* stock was $98.50 per share. Corporation *M* sold the series *X* stock on the exchange on January 2, 1998. At all relevant times, corporation *M* and all persons related to *M* owned less than 15% of the outstanding series *X* preferred stock.

(B) *Holding.* The 100,000 shares of series *X* preferred stock held by corporation *M* are not subject to mark-to-market treatment under section 475(a) on December 29, 1997, because at that time the stock was held for less than one full business day and is therefore treated as properly identified as held for investment. At the close of business on December 30, 1997, that prohibition on marking ceases to apply, and section 475(b)(3) begins to apply. The built-in loss is suspended, and subsequent appreciation and depreciation are subject to section 475(a). Accordingly, when corporation *M* marks the series *X* stock to market at the close of business on December 31, 1997, under section 475(a) it recognizes and takes into account a loss of $.50 per share. Under section 475(b)(3), when corporation *M* sells the series *X* stock on January 2, 1998, it takes into account the suspended loss, that is, the difference between the $100 per share it paid corporation *P* for that stock and the $99-per-share fair market value when section 475(b)(1) ceased to be applied to the stock. No deduction, however, is allowed for that loss. (See §1.1502–13(f)(6), under which no deduction is allowed to a member of a consolidated group for a loss with respect to a share of stock of the parent of that consolidated group, if the member does not take the gain or loss into account pursuant to section 475(a).)

(c) *Securities deemed not held for investment; dealers in notional principal contracts and derivatives.* (1) Except as otherwise determined by the Commissioner in a revenue ruling, revenue procedure, or letter ruling, section 475(b)(1)(A) (exempting from mark-to-market accounting certain securities that are held for investment) does not apply to a security if—

(i) The security is described in section 475(c)(2) (D) or (E) (describing certain notional principal contracts and derivative securities); and

(ii) The taxpayer is a dealer in such securities.

(2) See §1.475(d)–1(b) for a rule concerning the character of gain or loss on securities described in this paragraph (c).

(d) *Special rule for hedges of another member's risk.* A taxpayer may identify under section 475(b)(1)(C) (exempting certain hedges from mark-to-market accounting) a security that hedges a position of another member of the taxpayer's consolidated group if the security meets the following requirements—

(1) The security is a hedging transaction within the meaning of §1.1221–2(b);

(2) The security is timely identified as a hedging transaction under §1.1221–2(e) (including identification of the hedged item); and

(3) The security hedges a position that is not marked to market under section 475(a).

(e) *Transitional rules*—(1) *Stock, partnership, and beneficial ownership interests in certain controlled corporations, partnerships, and trusts before January 23, 1997*—(i) *In general.* The following items held by a dealer in securities are per se held for investment within the meaning of section 475(b)(1)(A) and are deemed to be properly identified as such for purposes of section 475(b)(2)—

(A) Stock in a corporation that the taxpayer controls (within the meaning of paragraph (e)(1)(ii) of this section); or

(B) A partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust that the taxpayer controls (within the meaning of paragraph (e)(1)(ii) of this section).

(ii) *Control defined.* Control means the ownership, directly or indirectly through persons described in section 267(b) (taking into account section 267(c)), of—

(A) 50 percent or more of the total combined voting power of all classes of stock entitled to vote; or

(B) 50 percent or more of the capital interest, the profits interest, or the beneficial ownership interest in the widely held or publicly traded partnership or trust.

(iii) *Applicability.* The rules of this paragraph (e)(1) apply only before January 23, 1997.

(2) *Dealers in notional principal contracts and derivatives acquired before January 23, 1997*—(i) *General rule.* Section 475(b)(1)(A) (exempting certain securities from mark-to-market accounting) does not apply to a security if—

(A) The security is described in section 475(c)(2) (D) or (E) (describing certain notional principal contracts and derivative securities); and

(B) The taxpayer is a dealer in such securities.

(ii) *Exception for securities not acquired in dealer capacity.* This paragraph (e)(2) does not apply if the taxpayer establishes unambiguously that the security was not acquired in the taxpayer's capacity as a dealer in such securities.

(iii) *Applicability.* The rules of paragraph (e)(2) apply only to securities acquired before January 23, 1997.

[T.D. 8700, 61 FR 67720, Dec. 24, 1996]

§1.475(b)–2 Exemptions—identification requirements.

(a) *Identification of the basis for exemption.* An identification of a security as exempt from mark to market does not satisfy section 475(b)(2) if it fails to state whether the security is described in—

(1) Either of the first two subparagraphs of section 475(b)(1) (identifying a security as held for investment or not held for sale); or

(2) The third subparagraph thereof (identifying a security as a hedge).

(b) *Time for identifying a security with a substituted basis.* For purposes of determining the timeliness of an identification under section 475(b)(2), the date that a dealer acquires a security is not affected by whether the dealer's basis in the security is determined, in whole or in part, either by reference to the basis of the security in the hands of the person from whom the security was acquired or by reference to other property held at any time by the dealer. See § 1.475(a)–3 for rules governing how the dealer accounts for such a security if this identification is not made.

(c) *Integrated transactions under § 1.1275–6*—(1) *Definitions.* The following terms are used in this paragraph (c) with the meanings that are given to them by § 1.1275–6: integrated transaction, legging into, legging out, qualifying debt instrument, § 1.1275–6 hedge, and synthetic debt instrument.

(2) *Synthetic debt held by a taxpayer as a result of legging in.* If a taxpayer is treated as the holder of a synthetic debt instrument as the result of legging into an integrated transaction, then, for purposes of the timeliness of an identification under section 475(b)(2), the synthetic debt instrument is treated as having the same acquisition date as the qualifying debt instrument. A pre-leg-in identification of the qualifying debt instrument under section 475(b)(2) applies to the integrated transaction as well.

(3) *Securities held after legging out.* If a taxpayer legs out of an integrated transaction, then, for purposes of the timeliness of an identification under section 475(b)(2), the qualifying debt instrument, or the § 1.1275–6 hedge, that remains in the taxpayer's hands is generally treated as having been acquired, originated, or entered into, as the case may be, immediately after the leg-out. If any loss or deduction determined under § 1.1275–6(d)(2)(ii)(B) is disallowed by § 1.1275–6(d)(2)(ii)(D) (which disallows deductions when a taxpayer legs out of an integrated transaction within 30 days of legging in), then, for purposes of this section and section 475(b)(2), the qualifying debt instrument that remains in the taxpayer's hands is treated as having been acquired on the same date that the synthetic debt instrument was treated as having been acquired.

[T.D. 8700, 61 FR 67722, Dec. 24, 1996]

§ 1.475(b)–3 [Reserved]

§ 1.475(b)–4 Exemptions—transitional issues.

(a) *Transitional identification*—(1) *Certain securities previously identified under section 1236.* If, as of the close of the last taxable year ending before December 31, 1993, a security was identified under section 1236 as a security held for investment, the security is treated as being identified as held for investment for purposes of section 475(b).

(2) *Consistency requirement for other securities.* In the case of a security (including a security described in section 475(c)(2)(F)) that is not described in paragraph (a)(1) of this section and that was held by the taxpayer as of the close of the last taxable year ending before December 31, 1993, the security is treated as having been properly identified under section 475(b)(2) or 475(c)(2)(F)(iii) if the information contained in the dealer's books and records as of the close of that year supports the identification. If there is any ambiguity in those records, the taxpayer must, no later than January 31, 1994, place in its records a statement resolving this ambiguity and indicating unambiguously which securities are to be treated as properly identified. Any information that supports treating a security as having been properly identified under section 475(b)(2) or (c)(2)(F)(iii) must be applied consistently from one security to another.

(b) *Corrections on or before January 31, 1994*—(1) *Purpose.* This paragraph (b) allows a taxpayer to add or remove certain identifications covered by § 1.475(b)–1.

(2) *To conform to § 1.475(b)–1(a)*—(i) *Added identifications.* To the extent permitted by paragraph (b)(2)(ii) of this section, a taxpayer may identify as being described in section 475(b)(1) (A) or (B)—

(A) A security that was held for immediate sale but was not held primarily for sale to customers in the ordinary course of the taxpayer's trade or business (for example, a trading security); or

(B) An evidence of indebtedness that was not held for sale to customers in the ordinary course of the taxpayer's trade or business and that the taxpayer intended to hold for less than one year.

(ii) *Limitations.* An identification described in paragraph (b)(2)(i) of this section is permitted only if—

(A) Prior to December 28, 1993, the taxpayer did not identify as being described in section 475(b)(1) (A) or (B) any of the securities described in paragraph (b)(2)(i) of this section;

(B) The taxpayer identifies every security described in paragraph (b)(2)(i) of this section for which a timely identification of the security under section 475(b)(2) cannot be made after the date on which the taxpayer makes these added identifications; and

(C) The identification is made on or before January 31, 1994.

(3) *To conform to §1.475(b)–1(c).* On or before January 31, 1994, a taxpayer described in §1.475(b)–1(e)(2)(i)(B) may remove an identification under section 475(b)(1)(A) of a security described in §1.475(b)–1(e)(2)(i)(A).

(c) *Effect of corrections.* An identification added under paragraph (a)(2) or (b)(2) of this section is timely for purposes of section 475(b)(2) or (c)(2)(F)(iii). An identification removed under paragraph (a)(2) or (b)(3) of this section does not subject the taxpayer to the provisions of section 475(d)(2).

[T.D. 8700, 61 FR 67722, Dec. 24, 1996]

§1.475(c)–1 Definitions—dealer in securities.

(a) *Dealer-customer relationship.* Whether a taxpayer is transacting business with customers is determined on the basis of all of the facts and circumstances.

(1) [Reserved]

(2) *Transactions described in section 475(c)(1)(B)*—(i) *In general.* For purposes of section 475(c)(1)(B), the term *dealer in securities* includes, but is not limited to, a taxpayer that, in the ordinary course of the taxpayer's trade or business, regularly holds itself out as being willing and able to enter into either side of a transaction enumerated in section 475(c)(1)(B).

(ii) *Examples.* The following examples illustrate the rules of this paragraph (a)(2). In the following examples, B is a bank and is not a member of a consolidated group:

Example 1. B regularly offers to enter into interest rate swaps with other persons in the ordinary course of its trade or business. B is willing to enter into interest rate swaps under which it either pays a fixed interest rate and receives a floating rate or pays a floating rate and receives a fixed rate. B is a dealer in securities under section 475(c)(1)(B), and the counterparties are its customers.

Example 2. B, in the ordinary course of its trade or business, regularly holds itself out as being willing and able to enter into either side of positions in a foreign currency with other banks in the interbank market. B's activities in the foreign currency make it a dealer in securities under section 475(c)(1)(B), and the other banks in the interbank market are its customers.

Example 3. B engages in frequent transactions in a foreign currency in the interbank market. Unlike the facts in *Example 2,* however, B does not regularly hold itself out as being willing and able to enter into either side of positions in the foreign currency, and all of B's transactions are driven by its internal need to adjust its position in the currency. No other circumstances are present to suggest that B is a dealer in securities for purposes of section 475(c)(1)(B). B's activity in the foreign currency does not qualify it as a dealer in securities for purposes of section 475(c)(1)(B), and its transactions in the interbank market are not transactions with customers.

(3) *Related parties*—(i) *General rule.* Except as provided in paragraph (a)(3)(ii) of this section (concerning transactions between members of a consolidated group, as defined in §1.1502–1(h)), a taxpayer's transactions with related persons may be transactions with customers for purposes of section 475. For example, if a taxpayer, in the ordinary course of the taxpayer's trade or business, regularly holds itself out to its foreign subsidiaries or other related persons as being willing and able to enter into either side of transactions enumerated in section 475(c)(1)(B), the taxpayer is a dealer in securities within the meaning of section 475(c)(1), even if it engages in no other transactions with customers.

(ii) *Special rule for members of a consolidated group.* Solely for purposes of paragraph (c)(1) of section 475 (concerning the definition of dealer in securities) and except as provided in paragraph (a)(3)(iii) of this section, a taxpayer's transactions with other members of its consolidated group are not with customers. Accordingly, notwithstanding paragraph (a)(2) of this section, the fact that a taxpayer regularly holds itself out to other members of its consolidated group as being willing and able to enter into either side of a transaction enumerated in section 475(c)(1)(B) does not cause the taxpayer to be a dealer in securities within the meaning of section 475(c)(1)(B).

(iii) *The intragroup-customer election*—(A) *Effect of election.* If a consolidated group makes the intragroup-customer election, paragraph (a)(3)(ii) of this section (special rule for members of a consolidated group) does not apply to the members of the group. Thus, a member of a group that has made this election may be a dealer in securities within the meaning of section 475(c)(1) even if its only customer transactions are with other members of its consolidated group.

(B) *Making and revoking the election.* Unless the Commissioner otherwise prescribes, the intragroup-customer election is made by filing a statement that says, ''[Insert name and employer identification number of common parent] hereby makes the Intragroup-Customer Election (as described in § 1.475(c)–1(a)(3)(iii) of the income tax regulations) for the taxable year ending [describe the last day of the year] and for subsequent taxable years.'' The statement must be signed by the common parent and attached to the timely filed federal income tax return for the consolidated group for that taxable year. The election applies for that year and continues in effect for subsequent years until revoked. The election may be revoked only with the consent of the Commissioner.

(iv) *Examples.* The following examples illustrate this paragraph (a)(3):

General Facts. HC, a hedging center, provides interest rate hedges to all of the members of its affiliated group (as defined in section 1504(a)(1)). Because of the efficiencies created by having a centralized risk manager, group policy prohibits members other than *HC* from entering into derivative interest rate positions with outside parties. *HC* regularly holds itself out as being willing and able to, and in fact does, enter into either side of interest rate swaps with its fellow members. *HC* periodically computes its aggregate position and hedges the net risk with an unrelated party. *HC* does not otherwise enter into interest rate positions with persons that are not members of the affiliated group. *HC* attempts to operate at cost, and the terms of its swaps do not factor in any risk of default by the affiliate. Thus, *HC*'s affiliates receive somewhat more favorable terms then they would receive from an unrelated swaps dealer (a fact that may subject *HC* and its fellow members to reallocation of income under section 482). No other circumstances are present to suggest that *HC* is a dealer in securities for purposes of section 475(c)(1)(B).

Example 1. General rule for related persons. In addition to the *General Facts* stated above, assume that *HC*'s affiliated group has not elected under section 1501 to file a consolidated return. Under paragraph (a)(3)(i) of this section, *HC*'s transactions with its affiliates can be transactions with customers for purposes of section 475(c)(1). Thus, under paragraph (a)(2)(i) of this section, *HC* is a dealer in securities within the meaning of section 475(c)(1)(B), and the members of the group with which it does business are its customers.

Example 2. Special rule for members of a consolidated group. In addition to the *General Facts* stated above, assume that *HC*'s affiliated group has elected to file consolidated returns and has not made the intragroup-customer election. Under paragraph (a)(3)(ii) of this section, *HC*'s interest rate swap transactions with the members of its consolidated group are not transactions with customers for purposes of determining whether *HC* is a dealer in securities within the meaning of section 475(c)(1). Further, the fact that *HC* regularly holds itself out to members of its consolidated group as being willing and able to enter into either side of a transaction enumerated in section 475(c)(1)(B) does not cause *HC* to be a dealer in securities within the meaning of section 475(c)(1)(B). Because no other circumstances are present to suggest that *HC* is a dealer in securities for purposes of section 475(c)(1)(B), *HC* is not a dealer in securities.

Example 3. Intragroup-customer election. In addition to the *General Facts* stated above, assume that *HC*'s affiliated group has elected to file a consolidated return but has also made the intragroup-customer election under paragraph (a)(3)(iii) of this section. Thus, the analysis and result are the same as in *Example 1.*

(b) *Sellers of nonfinancial goods and services*—(1) *Purchases and sales of customer paper.* Except as provided in paragraph (b)(3) of this section, if a taxpayer would not be a dealer in securities within the meaning of section 475(c)(1) but for its purchases and sales of debt instruments that, at the time of purchase or sale, are customer paper with respect to either the taxpayer or a corporation that is a member of the same consolidated group (as defined in §1.1502–1(h)) as the taxpayer, then for purposes of section 475 the taxpayer is not a dealer in securities.

(2) *Definition of customer paper.* A debt instrument is customer paper with respect to a person at a point in time if—

(i) The person's principal activity is selling nonfinancial goods or providing nonfinancial services;

(ii) The debt instrument was issued by a purchaser of the goods or services at the time of the purchase of those goods or services in order to finance the purchase; and

(iii) At all times since the debt instrument was issued, it has been held either by the person selling those goods or services or by a corporation that is a member of the same consolidated group as that person.

(3) *Exceptions.* Paragraph (b)(1) of this section does not apply if—

(i) For purposes of section 471, the taxpayer accounts for any security (as defined in section 475(c)(2)) as inventory;

(ii) The taxpayer is subject to an election under paragraph (b)(4) of this section; or

(iii) The taxpayer is not described in paragraph (b)(2)(i) of this section and one or more debt instruments that are customer paper with respect to a corporation that is a member of the same consolidated group as the taxpayer are accounted for by the taxpayer, or by a corporation that is a member of the same consolidated group as the taxpayer, in a manner that allows recognition of unrealized gains or losses or deductions for additions to a reserve for bad debts.

(4) *Election not to be governed by the exception for sellers of nonfinancial goods or services*—(i) *Method of making the election.* Unless the Commissioner otherwise prescribes, an election under this paragraph (b)(4) must be made in the manner, and at the time, prescribed in this paragraph (b)(4)(i). The taxpayer must file with the Internal Revenue Service a statement that says, ‘‘[Insert name and taxpayer identification number of the taxpayer] hereby elects not to be governed by §1.475(c)–1(b)(1) of the income tax regulations for the taxable year ending [describe the last day of the year] and for subsequent taxable years.’’

(A) *Taxable years ending after December 24, 1996.* If the first taxable year subject to an election under this paragraph (b)(4) ends after December 24, 1996, the statement must be attached to a timely filed federal income tax return for that taxable year.

(B) *Taxable years ending on or before December 24, 1996.* If the first taxable year subject to an election under this paragraph (b)(4) ends on or before December 24, 1996 and the election changes the taxpayer's taxable income for any taxable year the federal income tax return for which was filed before February 24, 1997, the statement must be attached to an amended return for the earliest such year that is so affected, and that amended return (and an amended return for any other such year that is so affected) must be filed not later than June 23, 1997. If the first taxable year subject to an election under this paragraph (b)(4) ends on or before December 24, 1996 but the taxpayer is not described in the preceding sentence, the statement must be attached to the first federal income tax return that is for a taxable year subject to the election and that is filed on or after February 24, 1997.

(ii) *Continued applicability of an election.* An election under this paragraph (b)(4) continues in effect for subsequent taxable years until revoked. The election may be revoked only with the consent of the Commissioner.

(c) *Taxpayers that purchase securities from customers but engage in no more than negligible sales of the securities*—(1) *Exemption from dealer status*—(i) *General rule.* A taxpayer that regularly purchases securities from customers in the ordinary course of a trade or business (including regularly making loans to customers in the ordinary course of a trade or business of making loans) but engages in no more than negligible sales of the securities so acquired is not a dealer in securities within the meaning of section 475(c)(1) unless the taxpayer elects to be so treated or, for purposes of section 471, the taxpayer accounts for any security (as defined in section 475(c)(2)) as inventory.

(ii) *Election to be treated as a dealer.* A taxpayer described in paragraph (c)(1)(i) of this section elects to be treated as a dealer in securities by filing a federal income tax return reflecting the application of section 475(a) in computing its taxable income.

(2) *Negligible sales.* Solely for purposes of paragraph (c)(1) of this section, a taxpayer engages in negligible sales of debt instruments that it regularly purchases from customers in the ordinary course of its business if, and only if, during the taxable year, either—

(i) The taxpayer sells all or part of fewer than 60 debt instruments, regardless how acquired; or

(ii) The total adjusted basis of the debt instruments (or parts of debt instruments), regardless how acquired, that the taxpayer sells is less than 5 percent of the total basis, immediately after acquisition, of the debt instruments that it acquires in that year.

(3) *Special rules for members of a consolidated group*—(i) *Intragroup-customer election in effect.* If a taxpayer is a member of a consolidated group that has made the intragroup-customer election (described in paragraph (a)(3)(iii) of this section), the negligible sales test in paragraph (c)(2) of this section takes into account all of the taxpayer's sales of debt instruments to other group members.

(ii) *Intragroup-customer election not in effect.* If a taxpayer is a member of a consolidated group that has not made the intragroup-customer election (described in paragraph (a)(3)(iii) of this section), the taxpayer satisfies the negligible sales test in paragraph (c)(2) of this section if either—

(A) The test is satisfied by the taxpayer, taking into account sales of debt instruments to other group members (as in paragraph (c)(3)(i) of this section); or

(B) The test is satisfied by the group, treating the members of the group as if they were divisions of a single corporation.

(4) *Special rules.* Whether sales of securities are negligible is determined without regard to—

(i) Sales of securities that are necessitated by exceptional circumstances and that are not undertaken as recurring business activities;

(ii) Sales of debt instruments that decline in quality while in the taxpayer's hands and that are sold pursuant to an established policy of the taxpayer to dispose of debt instruments below a certain quality; or

(iii) Acquisitions and sales of debt instruments that are qualitatively different from all debt instruments that the taxpayer purchases from customers in the ordinary course of its business.

(5) *Example.* The following example illustrates paragraph (c)(4)(iii) of this section:

Example. I, an insurance company, regularly makes policy loans to its customers but does not sell them. *I*, however, actively trades Treasury securities. No other circumstances are present to suggest that *I* is a dealer in securities for purposes of section 475(c)(1). Since the Treasuries are qualitatively different from the policy loans that *I* originates, under paragraph (c)(4)(iii) of this section, *I* disregards the purchases and sales of Treasuries in applying the negligible sales test in paragraph (c)(2) of this section.

(d) *Issuance of life insurance products.* A life insurance company that is not otherwise a dealer in securities within the meaning of section 475(c)(1) does not become a dealer in securities solely because it regularly issues life insurance products to its customers in the ordinary course of a trade or business. For purposes of the preceding sentence, the term *life insurance product* means a contract that is treated for federal income tax purposes as an annuity, endowment, or life insurance contract. See sections 72, 817, and 7702.

[T.D. 8700, 61 FR 67723, Dec. 24, 1996]

§ 1.475(c)–2 Definitions—security.

(a) *Items that are not securities.* The following items are not securities within the meaning of section 475(c)(2) with respect to a taxpayer and, therefore, are not subject to section 475—

(1) A security (determined without regard to this paragraph (a)) if section

1032 prevents the taxpayer from recognizing gain or loss with respect to that security;

(2) A debt instrument issued by the taxpayer (including a synthetic debt instrument, within the meaning of §1.1275–6(b)(4), that §1.1275–6(b) treats the taxpayer as having issued); or

(3) A REMIC residual interest, or an interest or arrangement that is determined by the Commissioner to have substantially the same economic effect, if the residual interest or the interest or arrangement is acquired on or after January 4, 1995.

(b) *Synthetic debt that §1.1275–6(b) treats the taxpayer as holding.* If §1.1275–6 treats a taxpayer as the holder of a synthetic debt instrument (within the meaning of §1.1275–6(b)(4)), the synthetic debt instrument is a security held by the taxpayer within the meaning of section 475(c)(2)(C).

(c) *Negative value REMIC residuals acquired before January 4, 1995.* A REMIC residual interest that is described in paragraph (c)(1) of this section or an interest or arrangement that is determined by the Commissioner to have substantially the same economic effect is not a security within the meaning of section 475(c)(2).

(1) *Description.* A residual interest in a REMIC is described in this paragraph (c)(1) if, on the date the taxpayer acquires the residual interest, the present value of the anticipated tax liabilities associated with holding the interest exceeds the sum of—

(i) The present value of the expected future distributions on the interest; and

(ii) The present value of the anticipated tax savings associated with holding the interest as the REMIC generates losses.

(2) *Special rules applicable to negative value REMIC residuals acquired before January 4, 1995.* Solely for purposes of this paragraph (c)—

(i) If a transferee taxpayer acquires a residual interest with a basis determined by reference to the transferor's basis, then the transferee is deemed to acquire the interest on the date the transferor acquired it (or is deemed to acquire it under this paragraph (c)(2)(i)).

(ii) Anticipated tax liabilities, expected future distributions, and anticipated tax savings are determined under the rules in §1.860E–2(a)(3) and without regard to the operation of section 475.

(iii) Present values are determined under the rules in §1.860E–2(a)(4).

[T.D. 8700, 61 FR 67725, Dec. 24, 1996]

§1.475(d)–1 Character of gain or loss.

(a) *Securities never held in connection with the taxpayer's activities as a dealer in securities.* If a security is never held in connection with the taxpayer's activities as a dealer in securities, section 475(d)(3)(A) does not affect the character of gain or loss from the security, even if the taxpayer fails to identify the security under section 475(b)(2).

(b) *Ordinary treatment for notional principal contracts and derivatives held by dealers in notional principal contracts and derivatives.* Section 475(d)(3)(B)(ii) (concerning the character of gain or loss with respect to a security held by a person other than in connection with its activities as a dealer in securities) does not apply to a security if §1.475(b)–1(c) and the absence of a determination by the Commissioner prevent section 475(b)(1)(A) from applying to the security.

[T.D. 8700, 61 FR 67725, Dec. 24, 1996]

§1.475(e)–1 Effective dates.

(a)–(b) [Reserved]

(c) Section 1.475(a)–3 (concerning acquisition by a dealer of a security with a substituted basis) applies to securities acquired, originated, or entered into on or after January 4, 1995.

(d) Except as provided elsewhere in this paragraph (d), §1.475(b)–1 (concerning the scope of exemptions from the mark-to-market requirement) applies to taxable years ending on or after December 31, 1993.

(1) Section 1.475(b)–1(b) applies as follows:

(i) Section 1.475(b)–1(b)(1)(i) (concerning equity interests issued by a related person) applies beginning June 19, 1996. If, on June 18, 1996, a security is subject to mark-to-market accounting and, on June 19, 1996, §1.475(b)–1(b)(1) begins to apply to the security solely because of the effective dates in this paragraph (d) (rather than because of a change in facts), then the rules of § 1.475(b)–1(b)(4)(i)(A) (concerning the prohibition against marking) apply, but § 1.475(b)–1(b)(4)(i)(B) (imposing a mark-to-market on the day before the onset of the prohibition) does not apply.

(ii) Section 1.475(b)–1(b)(2) (concerning relevant relationships for purposes of determining whether equity interests in related persons are prohibited from being marked to market) applies beginning June 19, 1996.

(iii) Section 1.475(b)–1(b)(3) (concerning certain actively traded securities) applies beginning June 19, 1996, to securities held on or after that date, except for securities described in § 1.475(b)–1(e)(1)(i) (concerning equity interests issued by controlled entities). If a security is described in § 1.475(b)–1(e)(1)(i), § 1.475(b)–1(b)(3) applies only on or after January 23, 1997 if the security is held on or after that date. If § 1.475(b)–1(b)(1) ceases to apply to a security by virtue of the operation of this paragraph (d)(1)(iii), the rules of § 1.475(b)–1(b)(4)(ii) apply to the cessation.

(iv) Except to the extent provided in paragraph (d)(1) of this section, § 1.475(b)–1(b)(4) (concerning changes in status) applies beginning June 19, 1996.

(2) Section 1.475(b)–1(c) (concerning securities deemed not held for investment by dealers in notional principal contracts and derivatives) applies to securities acquired on or after January 23, 1997.

(3) Section 1.475(b)–1(d) (concerning the special rule for hedges of another member's risk) is effective for securities acquired, originated, or entered into on or after January 23, 1997.

(e) Section 1.475(b)–2 (concerning identification of securities that are exempt from mark-to-market treatment) applies as follows:

(1) Section 1.475(b)–2(a) (concerning the general rules for identification of basis for exemption from mark to market treatment) applies to identifications made on or after July 1, 1997.

(2) Section 1.475(b)–2(b) (concerning time for identifying a security with a substituted basis) applies to securities acquired, originated, or entered into on or after January 4, 1995.

(3) Section 1.475(b)–2(c) (concerning identification in the context of integrated transactions under § 1.1275–6) applies on and after August 13, 1996 (the effective date of § 1.1275–6).

(f) [Reserved]

(g) Section 1.475(b)–4 (concerning transitional issues relating to exemptions) applies to taxable years ending on or after December 31, 1993.

(h) Section 1.475(c)–1 applies as follows:

(1) Except as otherwise provided in this paragraph (h)(1), § 1.475(c)–1(a) (concerning the dealer-customer relationship) applies to taxable years beginning on or after January 1, 1995.

(i) [Reserved]

(ii) Section 1.475(c)–1(a)(2)(ii) (illustrating rules concerning the dealer-customer relationship) applies to taxable years beginning on or after June 20, 1996.

(iii)(A) Section 1.475(c)–1(a)(3) applies to taxable years beginning on or after June 20, 1996, except for transactions between members of the same consolidated group.

(B) For transactions between members of the same consolidated group, paragraph § 1.475(c)–1(a)(3) applies to taxable years beginning on or after December 24, 1996.

(2) Section 1.475(c)–1(b) (concerning sellers of nonfinancial goods and services) applies to taxable years ending on or after December 31, 1993.

(3) Except as otherwise provided in this paragraph (h)(3), section 1.475(c)–1(c) (concerning taxpayers that purchase securities but engage in no more than negligible sales of the securities) applies to taxable years ending on or after December 31, 1993.

(i) Section 1.475(c)–1(c)(3) (special rules for members of a consolidated group) is effective for taxable years beginning on or after December 24, 1996.

(ii) A taxpayer may rely on the rules set out in § 1.475(c)–1T(b) (as contained in 26 CFR part 1 revised April 1, 1996) for taxable years beginning before January 23, 1997, provided the taxpayer applies that paragraph reasonably and consistently.

(4) Section 1.475(c)–1(d) (concerning the issuance of life insurance products) applies to taxable years beginning on or after January 1, 1995.

(i) Section 1.475(c)–2 (concerning the definition of security) applies to taxable years ending on or after December 31, 1993. By its terms, however, §1.475(c)–2(a)(3) applies only to residual interests or to interests or arrangements that are acquired on or after January 4, 1995; and the integrated transactions that are referred to in §§1.475(c)–2(a)(2) and 1.475(c)–2(b) exist only after August 13, 1996 (the effective date of §1.1275–6).

(j) Section 1.475(d)–1 (concerning the character of gain or loss) applies to taxable years ending on or after December 31, 1993.

[T.D. 8700, 61 FR 67725, Dec. 24, 1996]

ADJUSTMENTS

§1.481–1 Adjustments in general.

(a)(1) Section 481 prescribes the rules to be followed in computing taxable income in cases where the taxable income of the taxpayer is computed under a method of accounting different from that under which the taxable income was previously computed. A change in method of accounting to which section 481 applies includes a change in the over-all method of accounting for gross income or deductions, or a change in the treatment of a material item. For rules relating to changes in methods of accounting, see section 446(e) and paragraph (e) of §1.446–1. In computing taxable income for the taxable year of the change, there shall be taken into account those adjustments which are determined to be necessary solely by reason of such change in order to prevent amounts from being duplicated or omitted. The ‘‘year of the change’’ is the taxable year for which the taxable income of the taxpayer is computed under a method of accounting different from that used for the preceding taxable year.

(2) Unless the adjustments are attributable to a change in method of accounting initiated by the taxpayer, no part of the adjustments required by subparagraph (1) of this paragraph shall be based on amounts which were taken into account in computing income (or which should have been taken into account had the new method of accounting been used) for taxable years beginning before January 1, 1954, or ending before August 17, 1954 (hereinafter referred to as pre-1954 years).

(b) The adjustments specified in section 481(a) and this section shall take into account inventories, accounts receivable, accounts payable, and any other item determined to be necessary in order to prevent amounts from being duplicated or omitted.

(c)(1) The term ‘‘adjustments’’, as used in section 481, has reference to the net amount of the adjustments required by section 481(a) and paragraph (b) of this section. In the case of a change in the over-all method of accounting, such as from the cash receipts and disbursements method to an accrual method, the term ‘‘net amount of the adjustments’’ means the consolidation of adjustments (whether the amounts thereof represent increases or decreases in items of income or deductions) arising with respect to balances in various accounts, such as inventory, accounts receivable, and accounts payable, at the beginning of the taxable year of the change in method of accounting. With respect to the portion of the adjustments attributable to pre-1954 years, it is immaterial that the same items or class of items with respect to which adjustments would have to be made (for the first taxable year to which section 481 applies) do not exist at the time the actual change in method of accounting occurs. For purposes of section 481, only the net dollar balance is to be taken into account. In the case of a change in the treatment of a single material item, the amount of the adjustment shall be determined with reference only to the net dollar balances in that particular account.

(2) If a change in method of accounting is voluntary (i.e., initiated by the taxpayer), the entire amount of the adjustments required by section 481(a) is generally taken into account in computing taxable income in the taxable year of the change, regardless of whether the adjustments increase or decrease taxable income. See, however, §§1.446–1(e)(3) and 1.481–4 which provide that the Commissioner may prescribe the taxable year or years in which the adjustments are taken into account.

(3) If the change in method of accounting is involuntary (i.e., not initiated by the taxpayer), then only the amount of the adjustments required by section 481(a) that is attributable to taxable years beginning after December 31, 1953, and ending after August 16, 1954, (hereinafter referred to as post-1953 years) is taken into account. This amount is generally taken into account in computing taxable income in the taxable year of the change, regardless of whether the adjustments increase or decrease taxable income. See, however, §§ 1.446–1(e)(3) and 1.481–4 which provide that the Commissioner may prescribe the taxable year or years in which the adjustments are taken into account. See also § 1.481–3 for rules relating to adjustments attributable to pre-1954 years.

(4) For any adjustments attributable to post-1953 years that are taken into account entirely in the year of change and that increase taxable income by more than $3,000, the limitations on tax provided in section 481(b) (1) or (2) apply. See § 1.481–2 for rules relating to the limitations on tax provided by sections 481(b) (1) and (2).

(5) A change in the method of accounting initiated by the taxpayer includes not only a change which he originates by securing the consent of the Commissioner, but also a change from one method of accounting to another made without the advance approval of the Commissioner. A change in the taxpayer's method of accounting required as a result of an examination of the taxpayer's income tax return will not be considered as initiated by the taxpayer. On the other hand, a taxpayer who, on his own initiative, changes his method of accounting in order to conform to the requirements of any Federal income tax regulation or ruling shall not, merely because of such fact, be considered to have made an involuntary change.

(d) Any adjustments required under section 481(a) that are taken into account during a taxable year must be properly taken into account for purposes of computing gross income, adjusted gross income, or taxable income in determining the amount of any item of gain, loss, deduction, or credit that depends on gross income, adjusted gross income, or taxable income.

[T.D. 6500, 25 FR 11731, Nov. 26, 1960, as amended by T.D. 8608, 60 FR 40078, Aug. 7, 1995]

§ 1.481–2 Limitation on tax.

(a) *Three-year allocation.* Section 481(b)(1) provides a limitation on the tax under chapter 1 of the Internal Revenue Code for the taxable year of change that is attributable to the adjustments required under section 481(a) and § 1.481–1 if the entire amount of the adjustments is taken into account in the year of change. If such adjustments increase the taxpayer's taxable income for the taxable year of the change by more than $3,000, then the tax for such taxable year that is attributable to the adjustments shall not exceed the lesser of the tax attributable to taking such adjustments into account in computing taxable income for the taxable year of the change under section 481(a) and § 1.481–1, or the aggregate of the increases in tax that would result if the adjustments were included ratably in the taxable year of the change and the two preceding taxable years. For the purpose of computing the limitation on tax under section 481(b)(1), the adjustments shall be allocated ratably to the taxable year of the change and the two preceding taxable years, whether or not the adjustments are in fact attributable in whole or in part to such years. The limitation on the tax provided in this paragraph shall be applicable only if the taxpayer used the method of accounting from which the change was made in computing taxable income for the two taxable years preceding the taxable year of the change.

(b) *Allocation under new method of accounting.* Section 481(b)(2) provides a second alternative limitation on the tax for the taxable year of change under chapter 1 of the Internal Revenue Code that is attributable to the adjustments required under section 481(a) and § 1.481–1 where such adjustments increase taxable income for the taxable year of change by more than $3,000. If the taxpayer establishes from his books of account and other records what his taxable income would have been under the new method of accounting for one or more consecutive taxable years immediately preceding the taxable year of the change, and if the taxpayer in computing taxable income for such years used the method of accounting from which the change was made, then the tax attributable to the adjustments shall not exceed the smallest of the following amounts:

(1) The tax attributable to taking the adjustments into account in computing taxable income for the taxable year of the change under section 481(a) and §1.481–1;

(2) The tax attributable to such adjustments computed under the 3-year allocation provided in section 481(b)(1), if applicable; or

(3) The net increase in the taxes under chapter 1 (or under corresponding provisions of prior revenue laws) which would result from allocating that portion of the adjustments to the one or more consecutive preceding taxable years to which properly allocable under the new method of accounting and from allocating the balance thereof to the taxable year of the change.

(c) *Rules for computation of tax.* (1) The first step in determining whether either of the limitations described in section 481(b) (1) or (2) applies is to compute the increase in tax for the taxable year of the change that is attributable to the increase in taxable income for such year resulting solely from the adjustments required under section 481(a) and §1.481–1. This increase in tax is the excess of the tax for the taxable year computed by taking into account such adjustments under section 481(a) over the tax computed for such year without taking the adjustments into account.

(2) The next step is to compute under section 481(b)(1) the tax attributable to the adjustments referred to in paragraph (c)(1) of this section for the taxable year of the change and the two preceding taxable years as if an amount equal to one-third of the net amount of such adjustments had been received or accrued in each of such taxable years. The increase in tax attributable to the adjustments for each such taxable year is the excess of the tax for such year computed with the allocation of one-third of the net adjustments to such taxable year over the tax computed without the allocation of any part of the adjustments to such year. For the purpose of computing the aggregate increase in taxes for such taxable years, there shall be taken into account the increase or decrease in tax for any taxable year preceding the taxable year of the change to which no adjustment is allocated under section 481(b)(1) but which is affected by a net operating loss under section 172 or by a capital loss carryback or carryover under section 1212, determined with reference to taxable years with respect to which adjustments under section 481(b)(1) are allocated.

(3) In the event that the taxpayer satisfies the conditions set forth in section 481(b)(2), the next step is to determine the amount of the net increase in tax attributable to the adjustments referred to in paragraph (c)(1) of this section for:

(i) The taxable year of the change,

(ii) The consecutive taxable year or years immediately preceding the taxable year of the change for which the taxpayer can establish his taxable income under the new method of accounting, and

(iii) Any taxable year preceding the taxable year of the change to which no adjustment is allocated under section 481(b)(2), but which is affected by a net operating loss or by a capital loss carryback or carryover determined with reference to taxable years with respect to which such adjustments are allocated.

The net increase in tax for the taxable years specified in subdivisions (i), (ii), and (iii) of this subparagraph shall be computed as if the amount of the adjustments for the prior taxable years to which properly allocable in accordance with section 481(b)(2) had been received or accrued, or paid or incurred, as the case may be, in such prior years and the balance of the adjustments in the taxable year of the change. The amount of tax attributable to such adjustments for the taxable years specified in subdivisions (i), (ii), and (iii) of this subparagraph is the aggregate of the differences (increases and decreases) between the tax for each such year computed by taking into account the allocable portion of the adjustments in computing taxable income and the tax computed without taking into account any portion of the adjustments in computing taxable income. Generally, where there is an increase in taxable income for a preceding consecutive taxable year established under the new method of accounting, computed without regard to adjustments attributable to any preceding taxable year, the amount of the adjustments to be allocated to each such year shall be an amount equal to such increase. However, where the amount of the adjustments to be allocated to a prior taxable year is less than the increase in taxable income for such year established under the new method of accounting, the amount of the increase in such taxable income for purposes of determining the increase in tax under section 481(b)(2) for such year shall be considered to be the amount so allocated. For example, if the amount of the adjustments required by section 481(a) for 1958 (the taxable year of the change) is $60,000, and the increase in taxable income is determined by the taxpayer to be $40,000, $5,000, and $35,000, computed under the new method of accounting, for the taxable years 1957, 1956, and 1955, respectively, then the amount of the adjustments to be allocated to 1955 will be the balance of the adjustments, or $15,000.

(4) The tax for the taxable year of the change shall be the tax for such year, computed without taking any of the adjustments referred to in paragraph (c)(1) of this section into account, increased by the smallest of the following amounts—

(i) The amount of tax for the taxable year of the change attributable solely to taking into account the entire amount of the adjustments required by section 481(a) and § 1.481–1;

(ii) The sum of the increases in tax liability for the taxable year of the change and the two immediately preceding taxable years that would have resulted solely from taking into account one-third of the amount of such adjustments required for each of such years as though such amounts had been properly attributable to such years (computed in accordance with paragraph (c)(2) of this section); or

(iii) The net increase in tax attributable to allocating such adjustments under the new method of accounting (computed in accordance with paragraph (c)(3) of this section).

(5)(i) In the case of a change in method of accounting by a partnership, the adjustments required by section 481 shall be made with respect to the taxable income of the partnership but the limitations on tax under section 481(b) shall apply to the individual partners. Each partner shall take into account his distributive share of the partnership items, as so adjusted, for the taxable year of the change. Section 481(b) applies to a partner whose taxable income is so increased by more than $3,000 as a result of such adjustments to the partnership taxable income. It is not necessary for the partner to have been a member of the partnership for the two taxable years immediately preceding the taxable year of the change of the partnership's accounting method in order to have the limitation provided by section 481(b)(1) apply. Further, a partner may apply section 481(b)(2) even though he was not a member of the partnership for all the taxable years affected by the computation thereunder.

(ii) In the case of a change in method of accounting by an electing small business corporation under subchapter S, chapter 1 of the Code, the adjustments required by section 481 shall be made with respect to the taxable income of such electing corporation in the year of the change, but the limitations on tax under section 481(b) shall apply to the individual shareholders. Section 481(b) applies to a shareholder of an electing small business corporation whose taxable income is so increased by more than $3,000 as a result of such adjustments to such corporation's taxable income. It is not necessary for the shareholder to have been a member of the electing small business corporation, or for such corporation to have been an electing small business corporation, for the two taxable years immediately preceding the taxable year of the change of the corporation's accounting method in order to have the limitation provided by section 481(b)(1) apply. Further, a shareholder may apply section 481(b)(2), even though he was not a shareholder, or the corporation was not an electing small business corporation, for all the taxable years affected by the computation thereunder.

(6) For the purpose of the successive computations of the limitations on tax under section 481(b) (1) or (2), if the treatment of any item under the provisions of the Internal Revenue Code of 1986 (or corresponding provisions of prior internal revenue laws) depends upon the amount of gross income, adjusted gross income, or taxable income (for example, medical expenses, charitable contributions, or credits against the tax), such item shall be determined for the purpose of each such computation by taking into account the proper portion of the amount of any adjustments required to be taken into account under section 481 in each such computation.

(7) The increase or decrease in the tax for any taxable year for which an assessment of any deficiency, or a credit or refund of any overpayment, is prevented by any law or rule of law, shall be determined by reference to the tax previously determined (within the meaning section 1314(a) for such year.

(8) In applying section 7807(b)(1), the provisions of chapter 1 (other than subchapter E, relating to tax on self-employment income) and chapter 2 of the Internal Revenue Code of 1939 shall be treated as the corresponding provisions of the Internal Revenue Code of 1939.

(d) *Examples.* The application of section 481(b) (1) and (2) may be illustrated by the following examples. Although the examples in this paragraph are based upon adjustments required in the case of a change in the over-all method of accounting, the principles illustrated would be equally applicable to adjustments required in the case of a change in method of accounting for a particular material item, provided the treatment of such adjustments is not specifically subject to some other provision of the Internal Revenue Code of 1986.

Example (1). An unmarried individual taxpayer using the cash receipts and disbursements method of accounting for the calendar year is required by the Commissioner to change to an accrual method effective with the year 1958. As of January 1, 1958, he had an opening inventory of $11,000. On December 31, 1958, he had a closing inventory of $12,500. Merchandise purchases during the year amounted to $22,500, and net sales were $32,000. Total deductible business expenses were $5,000. There were no receivables or payables at January 1, 1958. The computation of taxable income for 1958, assuming no other adjustments, using the new method of accounting follows:

Net sales		$32,000
Opening inventory	$11,000	
Purchases	22,500	
Total	33,500	
Less closing inventory	12,500	
Cost of goods sold		21,000
Gross profit		11,000
Business expenses		5,000
Business income		6,000
Personal exemption and itemized deductions		1,600
Taxable income		4,400

Under the cash receipts and disbursements method of accounting, only $9,000 of the $11,000 opening inventory had been included in the cost of goods sold and claimed as a deduction for the taxable years 1954 through 1957; the remaining $2,000 had been so accounted for in pre-1954 years. In order to prevent the same item from reducing taxable income twice, an adjustment of $9,000 must be made to the taxable income of 1958 under the provisions of section 481(a) and §1.481–1. Since the change in method of accounting was not initiated by the taxpayer, the $2,000 of opening inventory which had been included in cost of goods sold in pre-1954 years is not taken into account. Taxable income for 1958 is accordingly increased by $9,000 under section 481(a) to $13,400. Assuming that the tax on $13,400 is $4,002 and that the tax on $4,400 (income without the adjustment) is $944, the increase in tax attributable to the adjustment, if taken into account for the taxable year of the change, would be the difference between the two, or $3,058. Since the adjustment required by section 481(a) and §1.481–1 ($9,000) increases taxable income by more than $3,000, the increase in tax for the taxable year 1958 attributable to the adjustment of $9,000 (i.e., $3,058) may be limited under the provisions of section 481(b) (1) or (2). See examples (2) and (3).

Example (2). Assume that the taxpayer in example (1) used the cash receipts and disbursements method of accounting in computing taxable income for the years 1956 and 1957 and that the taxable income for these years determined under such method was $4,000 and $6,000, respectively. The section 481(b)(1) limitation on tax with a pro rata three-year allocation of the $9,000 adjustment is computed as follows:

Taxable year	Taxable income before adjustment	Taxable income with adjustment	Assume total tax	Assumed tax before adjustment	Increase in tax attributable to adjustment
1956	$4,000	$7,000	$1,660	$840	$820
1957	6,000	9,000	2,300	1,360	940
1958	4,400	7,400	1,780	944	836
Total	....	....	....	....	2,596

Since this increase in tax of $2,596 is less than the increase in tax attributable to the inclusion of the entire adjustment in the income for the taxable year of the change ($3,058), the limitation provided by section 481(b)(1) applies, and the total tax for 1958, the taxable year of the change, if section 481(b)(2) does not apply, is determined as follows:

Tax without any portion of adjustment	$944
Increase in tax attributable to adjustment computed under section 481(b)(1)	2,596
Total tax for taxable year of the change	3,540

Example (3). (i) Assume the same facts as in example (1) and, in addition, assume that the taxpayer used the cash receipts and disbursements method of accounting in computing taxable income for the years 1953 through 1957; that he established his taxable income under the new method for the taxable years 1953, 1954, and 1957, but did not have sufficient records to establish his taxable income under such method for the taxable years 1955 and 1956. The original taxable income and taxable income as redetermined are as follows:

Taxable year	Taxable income		Increase or (decrease) in taxable income
	Determined under cash receipts and disbursements method	Established under new method	
1953	$5,000	$7,000	$2,000
1954	6,000	7,000	1,000
1955	5,500	[1]	....
1956	4,000	[1]	....
1957	6,000	10,000	4,000

[1] Undetermined.

As in examples (1) and (2), the total adjustment under section 481(a) is $9,000. Of the $9,000 adjustment, $4,000 may be allocated to 1957, which is the only year consecutively preceding the taxable year of the change for which the taxpayer was able to establish his income under the new method. Since the income cannot be established under the new method for 1956 and 1955, no allocation may be made to 1954 or 1953, even though the taxpayer has established his income for those years under the new method of accounting. The balance of $5,000 ($9,000 minus $4,000) must be allocated to 1958.

(ii) The limitation provided by section 481(b)(2) is computed as follows: The tax for 1957, based on taxable income of $6,000, is assumed to be $1,360. Under the new method, based on taxable income of $10,000, the tax for 1957 is assumed to be $2,640, the increase attributable to $4,000 of the $9,000 section 481(a) adjustment being $1,280, ($2,640 minus $1,360). The tax for 1958, computed on the basis of taxable income of $4,400 (determined under the new method), is assumed to be $944. The tax computed for 1958 on taxable income of $9,400 ($4,400 plus the $5,000 adjustment allocated to 1958) is assumed to be $2,436, leaving a difference of $1,492 ($2,436 minus $944) attributable to the inclusion in 1958 of the portion of the total adjustment to be taken into account which could not be properly allocated to the taxable year or years consecutively preceding 1958.

(iii) The tax attributable to the adjustment is determined by selecting the smallest of the three following amounts:

Increase in tax attributable to adjustment computed under section 481(b)(2) ($1,280+$1,492)	$2,772
Increase in tax attributable to adjustment computed under section 481(b)(1) (example (2))	2,596
Increase in tax if the entire adjustment is taken into account in the taxable year of the change (example (1))	3,058

The final tax for 1958 is then $3,540 computed as follows:

Tax before inclusion of any adjustment	$944
Increase in tax attributable to adjustments (smallest of $2,772, $2,596 or $3,058)	2,596
Total tax for 1958 (limited in accordance with section 481(b)(1))	3,540

Example (4). Assume that X Corporation has maintained its books of account and filed its income tax returns using the cash receipts and disbursements method of accounting for the years 1953 through 1957. The corporation secures permission to change to an accrual method of accounting for the calendar year 1958. The following tabulation presents the data with respect to the taxpayer's income for the years involved:

Year	Taxable income under the cash receipts and disbursements method		Taxable income established under accrual method	Increase or (decrease) attributable to change	Changes in taxable income due to changes in net loss carryback
	Before application of net operating loss carryback	After application of net operating loss carryback			
1953	$2,000	0	[1]		$2,000
1954	4,000	$1,000	[1]		3,000
1955	(5,000)		$1,000	$6,000	
1956	80,000	80,000	77,000	(3,000)	
1957	90,000	90,000	96,000	6,000	
1958			100,000		

[1] Not established.

As indicated above, taxable income for 1953 and 1954, as determined under the cash receipts and disbursements method of accounting, was $2,000 and $4,000, respectively, and after application of the net operating loss carryback from 1955, the taxable income was reduced to zero in 1953 and to $1,000 in 1954. The taxpayer was unable to establish taxable income for these years under an accrual method of accounting; however, under section 481(b)(3)(A), increases or decreases in the tax for taxable years to which no adjustment is allocated must, nevertheless, be taken into account to the extent the tax for such years would be affected by a net operating loss determined with reference to taxable years to which adjustments are allocated. The total amount of the adjustments required under section 481(a) and attributable to the taxable years 1953 through 1957 in this example is assumed to be $10,000. The redetermination of taxable income established by the taxpayer for the taxable years 1955, 1956, and 1957 appears under the heading ''Taxable income established under accrual method'' in the above tabulation. The tabulation assumes that the taxpayer has been able to recompute the income for those years so as to establish a net adjustment of $9,000, which leaves a balance of $1,000 unaccounted for. In accordance with the requirements of section 481(b)(2), the $1,000 amount is allocated to 1958, the taxable year of the change. The following computations are necessary in order to determine the tax attributable to the adjustments under section 481(a):

Increase in tax attributable to inclusion in 1958 of the entire $10,000 adjustment

Tax on income of 1958 increased by entire amount of adjustment ($100,000+$10,000)	$51,700
Tax on income of 1958 without adjustment ($100,000)	46,500
Increase in tax attributable to inclusion of entire adjustment in year of the change	5,200

Increase in tax attributed to adjustment computed under section 481(b)(1)

Year	Amount of adjustment	Tax before adjustment	Tax after adjustment	Increase in tax liability attributable to adjustment
1958	$3,334	$46,500	$48,234	$1,734
1957	3,333	41,300	43,033	1,733
1956	3,333	36,100	37,833	1,733
Increase in tax attributable to adjustment computed under section 481(b)(1)				5,200

Increase in tax attributed to adjustment computed under section 481(b)(2)

Year	Amount of adjustment	Tax before adjustment	Tax after adjustment	Increase in tax liability attributable to adjustment
1953	[1] $2,000	0	[1] $600	$600
1954	[1] 3,000	$300	[1] 1,200	900
1955	6,000	0	300	300
1956	(3,000)	36,100	34,540	(1,560)
1957	96,000	41,300	44,420	3,120
1958	[2] 1,000	46,500	[2] 47,020	520
Increase in tax attributable to the adjustment computed under section 481(b)(2)				3,880

[1] Attributable to recomputations of net operating loss carrybacks determined with reference to net operating loss in 1955.

[2] Attributable to the inclusion of $1,000 in the year of the change which represents the portion of the $10,000 adjustment not allocated to taxable years prior to the year of the change for which taxable income is established under the new method.

Since the limitation under section 481(b)(2) ($3,880) on the amount of tax attributable to the adjustments is applicable, the final tax for the taxable year of the change is computed by adding such amount to the tax for that year computed without the inclusion of any amount attributable to the adjustments, that is, $46,500 plus $3,880, or $50,380.

[T.D. 6500, 25 FR 11732, Nov. 26, 1960, as amended by T.D. 6490, 25 FR 8374, Sept. 1, 1960; T.D. 7301, 39 FR 963, Jan. 4, 1974; T.D. 8608, 60 FR 40078, Aug. 7, 1995]

§ 1.481–3 Adjustments attributable to pre-1954 years where change was not initiated by taxpayer.

If the adjustments required by section 481(a) and § 1.481–1 are attributable to a change in method of accounting which was not initiated by the taxpayer, no portion of any adjustments which is attributable to pre-1954 years shall be taken into account in computing taxable income. For example, if the total adjustments in the case of a change in method of accounting which is not initiated by the taxpayer amount to $10,000, of which $4,000 is attributable to pre-1954 years, only $6,000 of the $10,000 total adjustments is required to be taken into account under section 481 in computing taxable income. The portion of the adjustments which is attributable to pre-1954 years is the net amount of the adjustments which would have been required if the taxpayer had changed his method of accounting in his first taxable year which began after December 31, 1953, and ended after August 16, 1954.

[T.D. 6500, 25 FR 11735, Nov. 26, 1960, as amended by T.D. 8608, 60 FR 40079, Aug. 7, 1995]

§ 1.481–4 Adjustments taken into account with consent.

(a) In addition to the terms and conditions prescribed by the Commissioner under § 1.446–1(e)(3) for effecting a change in method of accounting, including the taxable year or years in which the amount of the adjustments required by section 481(a) is to be taken into account, or the methods of allocation described in section 481(b), a taxpayer may request approval of an alternative method of allocating the amount of the adjustments under section 481. See section 481(c). Requests for approval of an alternative method of allocation shall set forth in detail the facts and circumstances upon which the taxpayer bases its request. Permission will be granted only if the taxpayer and the Commissioner agree to the terms and conditions under which the allocation is to be effected. See § 1.446–1(e) for the rules regarding how to secure the Commissioner's consent to a change in method of accounting.

(b) An agreement to the terms and conditions of a change in method of accounting under § 1.446–1(e)(3), including the taxable year or years prescribed by the Commissioner under that section (or an alternative method described in paragraph (a) of this section) for taking the amount of the adjustments under section 481(a) into account, shall be in writing and shall be signed by the Commissioner and the taxpayer. It shall set forth the items to be adjusted, the amount of the adjustments, the taxable year or years for which the adjustments are to be taken into account, and the amount of the adjustments allocable to each year. The agreement shall be binding on the parties except upon a showing of fraud, malfeasance, or misrepresentation of material fact.

[T.D. 8608, 60 FR 40079, Aug. 7, 1995]

§ 1.481–5 Effective dates.

Sections 1.481–1, 1.481–2, 1.481–3, and 1.481–4 are effective for Consent Agreements signed on or after December 27, 1994. For Consent Agreements signed before December 27, 1994, see §§ 1.481–1, 1.481–2, 1.481–3, 1.481–4, and 1.481–5 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

§ 1.482–8 Examples of the best method rule.

(a) In general.
(b) Examples.

[T.D. 8552, 59 FR 34988, July 8, 1994, as amended by T.D. 8632, 60 FR 65557, Dec. 20, 1995; 61 FR 7157, Feb. 26, 1996; T.D. 8670, 61 FR 21956, May 13, 1996]

§ 1.482–1 Allocation of income and deductions among taxpayers.

(a) *In general*—(1) *Purpose and scope.* The purpose of section 482 is to ensure that taxpayers clearly reflect income attributable to controlled transactions, and to prevent the avoidance of taxes with respect to such transactions. Section 482 places a controlled taxpayer on a tax parity with an uncontrolled taxpayer by determining the true taxable income of the controlled taxpayer. This § 1.482–1 sets forth general principles and guidelines to be followed under section 482. Section 1.482–2 provides rules for the determination of the true taxable income of controlled taxpayers in specific situations, including controlled transactions involving loans or advances, services, and property. Sections 1.482–3 through 1.482–6 elaborate on the rules that apply to controlled transactions involving property. Section 1.482–7T sets forth the cost sharing provisions. Finally, § 1.482–8 provides examples illustrating the application of the best method rule.

(2) *Authority to make allocations.* The district director may make allocations between or among the members of a controlled group if a controlled taxpayer has not reported its true taxable income. In such case, the district director may allocate income, deductions, credits, allowances, basis, or any other item or element affecting taxable income (referred to as allocations). The appropriate allocation may take the form of an increase or decrease in any relevant amount.

(3) *Taxpayer's use of section 482.* If necessary to reflect an arm's length result, a controlled taxpayer may report on a timely filed U.S. income tax return (including extensions) the results of its controlled transactions based upon prices different from those actually charged. Except as provided in this paragraph, section 482 grants no other right to a controlled taxpayer to apply the provisions of section 482 at will or to compel the district director to apply such provisions. Therefore, no untimely or amended returns will be permitted to decrease taxable income based on allocations or other adjustments with respect to controlled transactions. See § 1.6662–6T(a)(2) or successor regulations.

(b) *Arm's length standard*—(1) *In general.* In determining the true taxable income of a controlled taxpayer, the standard to be applied in every case is that of a taxpayer dealing at arm's length with an uncontrolled taxpayer.

A controlled transaction meets the arm's length standard if the results of the transaction are consistent with the results that would have been realized if uncontrolled taxpayers had engaged in the same transaction under the same circumstances (arm's length result). However, because identical transactions can rarely be located, whether a transaction produces an arm's length result generally will be determined by reference to the results of comparable transactions under comparable circumstances. See §1.482–1(d)(2) (Standard of comparability). Evaluation of whether a controlled transaction produces an arm's length result is made pursuant to a method selected under the best method rule described in §1.482–1(c).

(2) *Arm's length methods*—(i) *Methods.* Sections 1.482–2 through 1.482–6 provide specific methods to be used to evaluate whether transactions between or among members of the controlled group satisfy the arm's length standard, and if they do not, to determine the arm's length result.

(ii) *Selection of category of method applicable to transaction.* The methods listed in §1.482–2 apply to different types of transactions, such as transfers of property, services, loans or advances, and rentals. Accordingly, the method or methods most appropriate to the calculation of arm's length results for controlled transactions must be selected, and different methods may be applied to interrelated transactions if such transactions are most reliably evaluated on a separate basis. For example, if services are provided in connection with the transfer of property, it may be appropriate to separately apply the methods applicable to services and property in order to determine an arm's length result. But see §1.482–1(f)(2)(i) (Aggregation of transactions). In addition, other applicable provisions of the Code may affect the characterization of a transaction, and therefore affect the methods applicable under section 482. See for example section 467.

(c) *Best method rule*—(1) *In general.* The arm's length result of a controlled transaction must be determined under the method that, under the facts and circumstances, provides the most reliable measure of an arm's length result. Thus, there is no strict priority of methods, and no method will invariably be considered to be more reliable than others. An arm's length result may be determined under any method without establishing the inapplicability of another method, but if another method subsequently is shown to produce a more reliable measure of an arm's length result, such other method must be used. Similarly, if two or more applications of a single method provide inconsistent results, the arm's length result must be determined under the application that, under the facts and circumstances, provides the most reliable measure of an arm's length result. See §1.482–8 for examples of the application of the best method rule.

(2) *Determining the best method.* Data based on the results of transactions between unrelated parties provides the most objective basis for determining whether the results of a controlled transaction are arm's length. Thus, in determining which of two or more available methods (or applications of a single method) provides the most reliable measure of an arm's length result, the two primary factors to take into account are the degree of comparability between the controlled transaction (or taxpayer) and any uncontrolled comparables, and the quality of the data and assumptions used in the analysis. In addition, in certain circumstances, it also may be relevant to consider whether the results of an analysis are consistent with the results of an analysis under another method. These factors are explained in paragraphs (c)(2)(i), (ii), and (iii) of this section.

(i) *Comparability.* The relative reliability of a method based on the results of transactions between unrelated parties depends on the degree of comparability between the controlled transaction or taxpayers and the uncontrolled comparables, taking into account the factors described in §1.482–1(d)(3) (Factors for determining comparability), and after making adjustments for differences, as described in §1.482–1(d)(2) (Standard of comparability). As the degree of comparability increases, the number and extent of potential differences that could render the analysis inaccurate is reduced. In addition, if adjustments are made to increase the degree of comparability, the number, magnitude, and reliability of those adjustments will affect the reliability of the results of the analysis. Thus, an analysis under the comparable uncontrolled price method will generally be more reliable than analyses obtained under other methods if the analysis is based on closely comparable uncontrolled transactions, because such an analysis can be expected to achieve a higher degree of comparability and be susceptible to fewer differences than analyses under other methods. See § 1.482–3(b)(2)(ii)(A). An analysis will be relatively less reliable, however, as the uncontrolled transactions become less comparable to the controlled transaction.

(ii) *Data and assumptions.* Whether a method provides the most reliable measure of an arm's length result also depends upon the completeness and accuracy of the underlying data, the reliability of the assumptions, and the sensitivity of the results to possible deficiencies in the data and assumptions. Such factors are particularly relevant in evaluating the degree of comparability between the controlled and uncontrolled transactions. These factors are discussed in paragraphs (c)(2)(ii) (A), (B), and (C) of this section.

(A) *Completeness and accuracy of data.* The completeness and accuracy of the data affects the ability to identify and quantify those factors that would affect the result under any particular method. For example, the completeness and accuracy of data will determine the extent to which it is possible to identify differences between the controlled and uncontrolled transactions, and the reliability of adjustments that are made to account for such differences. An analysis will be relatively more reliable as the completeness and accuracy of the data increases.

(B) *Reliability of assumptions.* All methods rely on certain assumptions. The reliability of the results derived from a method depends on the soundness of such assumptions. Some assumptions are relatively reliable. For example, adjustments for differences in payment terms between controlled and uncontrolled transactions may be based on the assumption that at arm's length such differences would lead to price differences that reflect the time value of money. Although selection of the appropriate interest rate to use in making such adjustments involves some judgement, the economic analysis on which the assumption is based is relatively sound. Other assumptions may be less reliable. For example, the residual profit split method may be based on the assumption that capitalized intangible development expenses reflect the relative value of the intangible property contributed by each party. Because the costs of developing an intangible may not be related to its market value, the soundness of this assumption will affect the reliability of the results derived from this method.

(C) *Sensitivity of results to deficiencies in data and assumptions.* Deficiencies in the data used or assumptions made may have a greater effect on some methods than others. In particular, the reliability of some methods is heavily dependent on the similarity of property or services involved in the controlled and uncontrolled transaction. For certain other methods, such as the resale price method, the analysis of the extent to which controlled and uncontrolled taxpayers undertake the same or similar functions, employ similar resources, and bear similar risks is particularly important. Finally, under other methods, such as the profit split method, defining the relevant business activity and appropriate allocation of costs, income, and assets may be of particular importance. Therefore, a difference between the controlled and uncontrolled transactions for which an accurate adjustment cannot be made may have a greater effect on the reliability of the results derived under one method than the results derived under another method. For example, differences in management efficiency may have a greater effect on a comparable profits method analysis than on a comparable uncontrolled price method analysis, while differences in product characteristics will ordinarily have a greater effect on a comparable uncontrolled price method analysis than on a comparable profits method analysis.

(iii) *Confirmation of results by another method.* If two or more methods produce inconsistent results, the best method rule will be applied to select the method that provides the most reliable measure of an arm's length result. If the best method rule does not clearly indicate which method should be selected, an additional factor that may be taken into account in selecting a method is whether any of the competing methods produce results that are consistent with the results obtained from the appropriate application of another method. Further, in evaluating different applications of the same method, the fact that a second method (or another application of the first method) produces results that are consistent with one of the competing applications may be taken into account.

(d) *Comparability*—(1) *In general.* Whether a controlled transaction produces an arm's length result is generally evaluated by comparing the results of that transaction to results realized by uncontrolled taxpayers engaged in comparable transactions under comparable circumstances. For this purpose, the comparability of transactions and circumstances must be evaluated considering all factors that could affect prices or profits in arm's length dealings (comparability factors). While a specific comparability factor may be of particular importance in applying a method, each method requires analysis of all of the factors that affect comparability under that method. Such factors include the following—

(i) Functions;

(ii) Contractual terms;

(iii) Risks;

(iv) Economic conditions; and

(v) Property or services.

(2) *Standard of comparability.* In order to be considered comparable to a controlled transaction, an uncontrolled transaction need not be identical to the controlled transaction, but must be sufficiently similar that it provides a reliable measure of an arm's length result. If there are material differences between the controlled and uncontrolled transactions, adjustments must be made if the effect of such differences on prices or profits can be ascertained with sufficient accuracy to improve the reliability of the results. For purposes of this section, a material difference is one that would materially affect the measure of an arm's length result under the method being applied. If adjustments for material differences cannot be made, the uncontrolled transaction may be used as a measure of an arm's length result, but the reliability of the analysis will be reduced. Generally, such adjustments must be made to the results of the uncontrolled comparable and must be based on commercial practices, economic principles, or statistical analyses. The extent and reliability of any adjustments will affect the relative reliability of the analysis. See §1.482–1(c)(1) (Best method rule). In any event, unadjusted industry average returns themselves cannot establish arm's length results.

(3) *Factors for determining comparability.* The comparability factors listed in §1.482–1(d)(1) are discussed in this section. Each of these factors must be considered in determining the degree of comparability between transactions or taxpayers and the extent to which comparability adjustments may be necessary. In addition, in certain cases involving special circumstances, the rules under paragraph (d)(4) of this section must be considered.

(i) *Functional analysis.* Determining the degree of comparability between controlled and uncontrolled transactions requires a comparison of the functions performed, and associated resources employed, by the taxpayers in each transaction. This comparison is based on a functional analysis that identifies and compares the economically significant activities undertaken, or to be undertaken, by the taxpayers in both controlled and uncontrolled transactions. A functional analysis should also include consideration of the resources that are employed, or to be employed, in conjunction with the activities undertaken, including consideration of the type of assets used, such as plant and equipment, or the use of valuable intangibles. A functional analysis is not a pricing method and does not itself determine the arm's length result for the controlled transaction under review. Functions that may need to be accounted for in determining the comparability of two transactions include—

(A) Research and development;

(B) Product design and engineering;

(C) Manufacturing, production and process engineering;

(D) Product fabrication, extraction, and assembly;

(E) Purchasing and materials management;

(F) Marketing and distribution functions, including inventory management, warranty administration, and advertising activities;

(G) Transportation and warehousing; and

(H) Managerial, legal, accounting and finance, credit and collection, training, and personnel management services.

(ii) *Contractual terms*—(A) *In general.* Determining the degree of comparability between the controlled and uncontrolled transactions requires a comparison of the significant contractual terms that could affect the results of the two transactions. These terms include—

(*1*) The form of consideration charged or paid;

(*2*) Sales or purchase volume;

(*3*) The scope and terms of warranties provided;

(*4*) Rights to updates, revisions or modifications;

(*5*) The duration of relevant license, contract or other agreements, and termination or renegotiation rights;

(*6*) Collateral transactions or ongoing business relationships between the buyer and the seller, including arrangements for the provision of ancillary or subsidiary services; and

(*7*) Extension of credit and payment terms. Thus, for example, if the time for payment of the amount charged in a controlled transaction differs from the time for payment of the amount charged in an uncontrolled transaction, an adjustment to reflect the difference in payment terms should be made if such difference would have a material effect on price. Such comparability adjustment is required even if no interest would be allocated or imputed under § 1.482–2(a) or other applicable provisions of the Internal Revenue Code or regulations.

(B) *Identifying contractual terms*—(*1*) *Written agreement.* The contractual terms, including the consequent allocation of risks, that are agreed to in writing before the transactions are entered into will be respected if such terms are consistent with the economic substance of the underlying transactions. In evaluating economic substance, greatest weight will be given to the actual conduct of the parties, and the respective legal rights of the parties (see, for example, § 1.482–4(f)(3) (Ownership of intangible property)). If the contractual terms are inconsistent with the economic substance of the underlying transaction, the district director may disregard such terms and impute terms that are consistent with the economic substance of the transaction.

(*2*) *No written agreement.* In the absence of a written agreement, the district director may impute a contractual agreement between the controlled taxpayers consistent with the economic substance of the transaction. In determining the economic substance of the transaction, greatest weight will be given to the actual conduct of the parties and their respective legal rights (see, for example, § 1.482–4(f)(3) (Ownership of intangible property)). For example, if, without a written agreement, a controlled taxpayer operates at full capacity and regularly sells all of its output to another member of its controlled group, the district director may impute a purchasing contract from the course of conduct of the controlled taxpayers, and determine that the producer bears little risk that the buyer will fail to purchase its full output. Further, if an established industry convention or usage of trade assigns a risk or resolves an issue, that convention or usage will be followed if the conduct of the taxpayers is consistent with it. See UCC 1–205. For example, unless otherwise agreed, payment generally is due at the time and place at which the buyer is to receive goods. See UCC 2–310.

(C) *Examples.* The following examples illustrate this paragraph (d)(3)(ii).

Example 1—Differences in volume. USP, a United States agricultural exporter, regularly buys transportation services from FSub, its foreign subsidiary, to ship its products from the United States to overseas markets. Although FSub occasionally provides transportation services to URA, an unrelated domestic corporation, URA accounts for only 10% of the gross revenues of FSub, and the remaining 90% of FSub's gross revenues are attributable to FSub's transactions with USP. In determining the degree of comparability between FSub's uncontrolled transaction with URA and its controlled transaction with USP, the difference in volumes involved in the two transactions and the regularity with which these services are provided must be taken into account if such difference would have a material effect on the price charged. Inability to make reliable adjustments for these differences would affect the reliability of the results derived from the uncontrolled transaction as a measure of the arm's length result.

Example 2— Reliability of adjustment for differences in volume. (i) FS manufactures product XX and sells that product to its parent corporation, P. FS also sells product XX to uncontrolled taxpayers at a price of $100 per unit. Except for the volume of each transaction, the sales to P and to uncontrolled taxpayers take place under substantially the same economic conditions and contractual terms. In uncontrolled transactions, FS offers a 2% discount for quantities of 20 per order, and a 5% discount for quantities of 100 per order. If P purchases product XX in quantities of 60 per order, in the absence of other reliable information, it may reasonably be concluded that the arm's length price to P would be $100, less a discount of 3.5%.

(ii) If P purchases product XX in quantities of 1,000 per order, a reliable estimate of the appropriate volume discount must be based on proper economic or statistical analysis, not necessarily a linear extrapolation from the 2% and 5% catalog discounts applicable to sales of 20 and 100 units, respectively.

Example 3— Contractual term imputed from economic substance. (i) USD, a United States corporation, is the exclusive distributor of products manufactured by FP, its foreign parent. The FP products are sold under a tradename that is not known in the United States. USD does not have an agreement with FP for the use of FP's tradename. For Years 1 through 6, USD bears marketing expenses promoting FP's tradename in the United States that are substantially above the level of such expenses incurred by comparable distributors in uncontrolled transactions. FP does not directly or indirectly reimburse USD for its marketing expenses. By Year 7, the FP tradename has become very well known in the market and commands a price premium. At this time, USD becomes a commission agent for FP.

(ii) In determining USD's arm's length result for Year 7, the district director considers the economic substance of the arrangements between USD and FP throughout the course of their relationship. It is unlikely that at arm's length, USD would incur these above-normal expenses without some assurance it could derive a benefit from these expenses. In this case, these expenditures indicate a course of conduct that is consistent with an agreement under which USD received a long-term right to use the FP tradename in the United States. Such conduct is inconsistent with the contractual arrangements between FP and USD under which USD was merely a distributor, and later a commission agent, for FP. Therefore, the district director may impute an agreement between USD and FP under which USD will retain an appropriate portion of the price premium attributable to the FP tradename.

(iii) *Risk*—(A) *Comparability*. Determining the degree of comparability between controlled and uncontrolled transactions requires a comparison of the significant risks that could affect the prices that would be charged or paid, or the profit that would be earned, in the two transactions. Relevant risks to consider include—

(*1*) Market risks, including fluctuations in cost, demand, pricing, and inventory levels;

(*2*) Risks associated with the success or failure of research and development activities;

(*3*) Financial risks, including fluctuations in foreign currency rates of exchange and interest rates;

(*4*) Credit and collection risks;

(*5*) Product liability risks; and

(*6*) General business risks related to the ownership of property, plant, and equipment.

(B) *Identification of taxpayer that bears risk*. In general, the determination of which controlled taxpayer bears a particular risk will be made in accordance with the provisions of §1.482–1(d)(3)(ii)(B) (Identifying contractual terms). Thus, the allocation of risks specified or implied by the taxpayer's contractual terms will generally be respected if it is consistent with the economic substance of the transaction. An allocation of risk between controlled taxpayers after the outcome of such risk is known or reasonably knowable lacks economic substance. In considering the economic substance of the transaction, the following facts are relevant—

(*1*) Whether the pattern of the controlled taxpayer's conduct over time is consistent with the purported allocation of risk between the controlled taxpayers; or where the pattern is changed, whether the relevant contractual arrangements have been modified accordingly;

(*2*) Whether a controlled taxpayer has the financial capacity to fund losses that might be expected to occur as the result of the assumption of a risk, or whether, at arm's length, another party to the controlled transaction would ultimately suffer the consequences of such losses; and

(*3*) The extent to which each controlled taxpayer exercises managerial or operational control over the business activities that directly influence the amount of income or loss realized. In arm's length dealings, parties ordinarily bear a greater share of those risks over which they have relatively more control.

(C) *Examples.* The following examples illustrate this paragraph (d)(3)(iii).

Example 1. FD, the wholly-owned foreign distributor of USM, a U.S. manufacturer, buys widgets from USM under a written contract. Widgets are a generic electronic appliance. Under the terms of the contract, FD must buy and take title to 20,000 widgets for each of the five years of the contract at a price of $10 per widget. The widgets will be sold under FD's label, and FD must finance any marketing strategies to promote sales in the foreign market. There are no rebate or buy back provisions. FD has adequate financial capacity to fund its obligations under the contract under any circumstances that could reasonably be expected to arise. In Years 1, 2 and 3, FD sold only 10,000 widgets at a price of $11 per unit. In Year 4, FD sold its entire inventory of widgets at a price of $25 per unit. Since the contractual terms allocating market risk were agreed to before the outcome of such risk was known or reasonably knowable, FD had the financial capacity to bear the market risk that it would be unable to sell all of the widgets it purchased currently, and its conduct was consistent over time, FD will be deemed to bear the risk.

Example 2. The facts are the same as in *Example 1,* except that in Year 1 FD had only $100,000 in total capital, including loans. In subsequent years USM makes no additional contributions to the capital of FD, and FD is unable to obtain any capital through loans from an unrelated party. Nonetheless, USM continues to sell 20,000 widgets annually to FD under the terms of the contract, and USM extends credit to FD to enable it to finance the purchase. FD does not have the financial capacity in Years 1, 2 and 3 to finance the purchase of the widgets given that it could not sell most of the widgets it purchased during those years. Thus, notwithstanding the terms of the contract, USM and not FD assumed the market risk that a substantial portion of the widgets could not be sold, since in that event FD would not be able to pay USM for all of the widgets it purchased.

Example 3. S, a Country X corporation, manufactures small motors that it sells to P, its U.S. parent. P incorporates the motors into various products and sells those products to uncontrolled customers in the United States. The contract price for the motors is expressed in U.S. dollars, effectively allocating the currency risk for these transactions to S for any currency fluctuations between the time the contract is signed and payment is made. As long as S has adequate financial capacity to bear this currency risk (including by hedging all or part of the risk) and the conduct of S and P is consistent with the terms of the contract (i.e., the contract price is not adjusted to reflect exchange rate movements), the agreement of the parties to allocate the exchange risk to S will be respected.

Example 4. USSub is the wholly-owned U.S. subsidiary of FP, a foreign manufacturer. USSub acts as a distributor of goods manufactured by FP. FP and USSub execute an agreement providing that FP will bear any ordinary product liability costs arising from defects in the goods manufactured by FP. In practice, however, when ordinary product liability claims are sustained against USSub and FP, USSub pays the resulting damages. Therefore, the district director disregards the contractual arrangement regarding product liability costs between FP and USSub, and treats the risk as having been assumed by USSub.

(iv) *Economic conditions.* Determining the degree of comparability between controlled and uncontrolled transactions requires a comparison of the significant economic conditions that could affect the prices that would be charged or paid, or the profit that would be earned in each of the transactions. These factors include—

(A) The similarity of geographic markets;

(B) The relative size of each market, and the extent of the overall economic development in each market;

(C) The level of the market (e.g., wholesale, retail, etc.);

(D) The relevant market shares for the products, properties, or services transferred or provided;

(E) The location-specific costs of the factors of production and distribution;

(F) The extent of competition in each market with regard to the property or services under review;

(G) The economic condition of the particular industry, including whether the market is in contraction or expansion; and

(H) The alternatives realistically available to the buyer and seller.

(v) *Property or services.* Evaluating the degree of comparability between controlled and uncontrolled transactions requires a comparison of the property or services transferred in the transactions. This comparison may include any intangibles that are embedded in tangible property or services being transferred. The comparability of the embedded intangibles will be analyzed using the factors listed in §1.482–4(c)(2)(iii)(B)(*1*) (Comparable intangible property). The relevance of product comparability in evaluating the relative reliability of the results will depend on the method applied. For guidance concerning the specific comparability considerations applicable to transfers of tangible and intangible property, see §§1.482–3 through 1.482–6; see also §1.482–3(f), dealing with the coordination of the intangible and tangible property rules.

(4) *Special circumstances*—(i) *Market share strategy.* In certain circumstances, taxpayers may adopt strategies to enter new markets or to increase a product's share of an existing market (market share strategy). Such a strategy would be reflected by temporarily increased market development expenses or resale prices that are temporarily lower than the prices charged for comparable products in the same market. Whether or not the strategy is reflected in the transfer price depends on which party to the controlled transaction bears the costs of the pricing strategy. In any case, the effect of a market share strategy on a controlled transaction will be taken into account only if it can be shown that an uncontrolled taxpayer engaged in a comparable strategy under comparable circumstances for a comparable period of time, and the taxpayer provides documentation that substantiates the following—

(A) The costs incurred to implement the market share strategy are borne by the controlled taxpayer that would obtain the future profits that result from the strategy, and there is a reasonable likelihood that the strategy will result in future profits that reflect an appropriate return in relation to the costs incurred to implement it;

(B) The market share strategy is pursued only for a period of time that is reasonable, taking into consideration the industry and product in question; and

(C) The market share strategy, the related costs and expected returns, and any agreement between the controlled taxpayers to share the related costs, were established before the strategy was implemented.

(ii) *Different geographic markets*—(A) *In general.* Uncontrolled comparables ordinarily should be derived from the geographic market in which the controlled taxpayer operates, because there may be significant differences in economic conditions in different markets. If information from the same market is not available, an uncontrolled comparable derived from a different geographic market may be considered if adjustments are made to account for differences between the two markets. If information permitting adjustments for such differences is not available, then information derived from uncontrolled comparables in the most similar market for which reliable data is available may be used, but the extent of such differences may affect the reliability of the method for purposes of the best method rule. For this purpose, a geographic market is any geographic area in which the economic conditions for the relevant product or service are substantially the same, and may include multiple countries, depending on the economic conditions.

(B) *Example.* The following example illustrates this paragraph (d)(4)(ii).

Example. Manuco, a wholly-owned foreign subsidiary of P, a U.S. corporation, manufactures products in Country Z for sale to P. No uncontrolled transactions are located that would provide a reliable measure of the arm's length result under the comparable uncontrolled price method. The district director considers applying the cost plus method or the comparable profits method. Information on uncontrolled taxpayers performing comparable functions under comparable circumstances in the same geographic market is not available. Therefore, adjusted data from uncontrolled manufacturers in other markets may be considered in order to apply the cost plus method. In this case, comparable uncontrolled manufacturers are found in the United States. Accordingly, data from the comparable U.S. uncontrolled manufacturers, as adjusted to account for differences between the United States and Country Z's geographic market, is used to test the arm's length price paid by P to Manuco. However, the use of such data may affect the reliability of the results for purposes of the best method rule. See § 1.482–1(c).

(C) *Location savings.* If an uncontrolled taxpayer operates in a different geographic market than the controlled taxpayer, adjustments may be necessary to account for significant differences in costs attributable to the geographic markets. These adjustments must be based on the effect such differences would have on the consideration charged or paid in the controlled transaction given the relative competitive positions of buyers and sellers in each market. Thus, for example, the fact that the total costs of operating in a controlled manufacturer's geographic market are less than the total costs of operating in other markets ordinarily justifies higher profits to the manufacturer only if the cost differences would increase the profits of comparable uncontrolled manufacturers operating at arm's length, given the competitive positions of buyers and sellers in that market.

(D) *Example.* The following example illustrates the principles of this paragraph (d)(4)(ii)(C).

Example. Couture, a U.S. apparel design corporation, contracts with Sewco, its wholly owned Country Y subsidiary, to manufacture its clothes. Costs of operating in Country Y are significantly lower than the operating costs in the United States. Although clothes with the Couture label sell for a premium price, the actual production of the clothes does not require significant specialized knowledge that could not be acquired by actual or potential competitors to Sewco at reasonable cost. Thus, Sewco's functions could be performed by several actual or potential competitors to Sewco in geographic markets that are similar to Country Y. Thus, the fact that production is less costly in Country Y will not, in and of itself, justify additional profits derived from lower operating costs in Country Y inuring to Sewco, because the competitive positions of the other actual or potential producers in similar geographic markets capable of performing the same functions at the same low costs indicate that at arm's length such profits would not be retained by Sewco.

(iii) *Transactions ordinarily not accepted as comparables*— (A) *In general.* Transactions ordinarily will not constitute reliable measures of an arm's length result for purposes of this section if—

(*1*) They are not made in the ordinary course of business; or

(*2*) One of the principal purposes of the uncontrolled transaction was to establish an arm's length result with respect to the controlled transaction.

(B) *Examples.* The following examples illustrate the principle of this paragraph (d)(4)(iii).

Example 1 Not in the ordinary course of business. USP, a United States manufacturer of computer software, sells its products to FSub, its foreign distributor in country X. Compco, a United States competitor of USP, also sells its products in X through unrelated distributors. However, in the year under review, Compco is forced into bankruptcy, and Compco liquidates its inventory by selling all of its products to unrelated distributors in X for a liquidation price. Because the sale of its entire inventory was not a sale in the ordinary course of business, Compco's sale cannot be used as an uncontrolled comparable to determine USP's arm's length result from its controlled transaction.

Example 2 Principal purpose of establishing an arm's length result. USP, a United States manufacturer of farm machinery, sells its products to FSub, its wholly-owned distributor in Country Y. USP, operating at nearly full capacity, sells 95% of its inventory to FSub. To make use of its excess capacity, and also to establish a comparable uncontrolled price for its transfer price to FSub, USP increases its production to full capacity. USP sells its excess inventory to Compco, an unrelated foreign distributor in Country X. Country X has approximately the same economic conditions as that of Country Y. Because one of the principal purposes of selling to Compco was to establish an arm's length price for its controlled transactions with FSub, USP's sale to Compco cannot be used as an uncontrolled comparable to determine USP's arm's length result from its controlled transaction.

(e) *Arm's length range*—(1) *In general.* In some cases, application of a pricing method will produce a single result that is the most reliable measure of an arm's length result. In other cases, application of a method may produce a number of results from which a range of reliable results may be derived. A taxpayer will not be subject to adjustment if its results fall within such range (arm's length range).

(2) *Determination of arm's length range*—(i) *Single method.* The arm's length range is ordinarily determined by applying a single pricing method selected under the best method rule to two or more uncontrolled transactions of similar comparability and reliability. Use of more than one method may be appropriate for the purposes described in paragraph (c)(2)(iii) of this section (Best method rule).

(ii) *Selection of comparables.* Uncontrolled comparables must be selected based upon the comparability criteria relevant to the method applied and must be sufficiently similar to the controlled transaction that they provide a reliable measure of an arm's length result. If material differences exist between the controlled and uncontrolled transactions, adjustments must be made to the results of the uncontrolled transaction if the effect of such differences on price or profits can be ascertained with sufficient accuracy to improve the reliability of the results. See §1.482–1(d)(2) (Standard of comparability). The arm's length range will be derived only from those uncontrolled comparables that have, or through adjustments can be brought to, a similar level of comparability and reliability, and uncontrolled comparables that have a significantly lower level of comparability and reliability will not be used in establishing the arm's length range.

(iii) *Comparables included in arm's length range*—(A) *In general.* The arm's length range will consist of the results of all of the uncontrolled comparables that meet the following conditions: the information on the controlled transaction and the uncontrolled comparables is sufficiently complete that it is likely that all material differences have been identified, each such difference has a definite and reasonably ascertainable effect on price or profit, and an adjustment is made to eliminate the effect of each such difference.

(B) *Adjustment of range to increase reliability.* If there are no uncontrolled comparables described in paragraph (e)(2)(iii)(A) of this section, the arm's length range is derived from the results of all the uncontrolled comparables, selected pursuant to paragraph (e)(2)(ii) of this section, that achieve a similar level of comparability and reliability. In such cases the reliability of the analysis must be increased, where it is possible to do so, by adjusting the range through application of a valid statistical method to the results of all of the uncontrolled comparables so selected. The reliability of the analysis is increased when statistical methods are used to establish a range of results in which the limits of the range will be determined such that there is a 75 percent probability of a result falling above the lower end of the range and a 75 percent probability of a result falling below the upper end of the range. The interquartile range ordinarily provides an acceptable measure of this range; however a different statistical method may be applied if it provides a more reliable measure.

(C) *Interquartile range.* For purposes of this section, the interquartile range is the range from the 25th to the 75th percentile of the results derived from the uncontrolled comparables. For this purpose, the 25th percentile is the lowest result derived from an uncontrolled comparable such that at least 25 percent of the results are at or below the value of that result. However, if exactly 25 percent of the results are at or below a result, then the 25th percentile is equal to the average of that result and the next higher result derived from the uncontrolled comparables. The 75th percentile is determined analogously.

(3) *Adjustment if taxpayer's results are outside arm's length range.* If the results of a controlled transaction fall outside the arm's length range, the district director may make allocations that adjust the controlled taxpayer's result to any point within the arm's length range. If the interquartile range is used to determine the arm's length range, such adjustment will ordinarily be to

the median of all the results. The median is the 50th percentile of the results, which is determined in a manner analogous to that described in paragraph (e)(2)(iii)(C) of this section (Interquartile range). In other cases, an adjustment normally will be made to the arithmetic mean of all the results. See §1.482–1(f)(2)(iii)(D) for determination of an adjustment when a controlled taxpayer's result for a multiple year period falls outside an arm's length range consisting of the average results of uncontrolled comparables over the same period.

(4) *Arm's length range not prerequisite to allocation.* The rules of this paragraph (e) do not require that the district director establish an arm's length range prior to making an allocation under section 482. Thus, for example, the district director may properly propose an allocation on the basis of a single comparable uncontrolled price if the comparable uncontrolled price method, as described in §1.482–3(b), has been properly applied. However, if the taxpayer subsequently demonstrates that the results claimed on its income tax return are within the range established by additional equally reliable comparable uncontrolled prices in a manner consistent with the requirements set forth in §1.482–1(e)(2)(iii), then no allocation will be made.

(5) *Examples.* The following examples illustrate the principles of this paragraph (e).

Example 1 Selection of comparables. (i) To evaluate the arm's length result of a controlled transaction between USSub, the United States taxpayer under review, and FP, its foreign parent, the district director considers applying the resale price method. The district director identifies ten potential uncontrolled transactions. The distributors in all ten uncontrolled transactions purchase and resell similar products and perform similar functions to those of USSub.

(ii) Data with respect to three of the uncontrolled transactions is very limited, and although some material differences can be identified and adjusted for, the level of comparability of these three uncontrolled comparables is significantly lower than that of the other seven. Further, of those seven, adjustments for the identified material differences can be reliably made for only four of the uncontrolled transactions. Therefore, pursuant to §1.482–1(e)(2)(ii) only these four uncontrolled comparables may be used to establish an arm's length range.

Example 2 Arm's length range consists of all the results. (i) The facts are the same as in *Example 1.* Applying the resale price method to the four uncontrolled comparables, and making adjustments to the uncontrolled comparables pursuant to §1.482- 1(d)(2), the district director derives the following results:

Comparable	Result (price)
1	$44.00
2	45.00
3	45.00
4	45.50

(ii) The district director determines that data regarding the four uncontrolled transactions is sufficiently complete and accurate so that it is likely that all material differences between the controlled and uncontrolled transactions have been identified, such differences have a definite and reasonably ascertainable effect, and appropriate adjustments were made for such differences. Accordingly, if the resale price method is determined to be the best method pursuant to §1.482–1(c), the arm's length range for the controlled transaction will consist of the results of all of the uncontrolled comparables, pursuant to paragraph (e)(2)(iii)(A) of this section. Thus, the arm's length range in this case would be the range from $44 to $45.50.

Example 3 Arm's length range limited to interquartile range. (i) The facts are the same as in *Example 2,* except in this case there are some product and functional differences between the four uncontrolled comparables and USSub. However, the data is insufficiently complete to determine the effect of the differences. Applying the resale price method to the four uncontrolled comparables, and making adjustments to the uncontrolled comparables pursuant to §1.482–1(d)(2), the district director derives the following results:

Uncontrolled comparable	Result (price)
1	$42.00
2	44.00
3	45.00
4	47.50

(ii) It cannot be established in this case that all material differences are likely to have been identified and reliable adjustments made for those differences. Accordingly, if the resale price method is determined to be the best method pursuant to §1.482–1(c), the arm's length range for the controlled transaction must be established pursuant to paragraph (e)(2)(iii)(B) of this section. In this case, the district director uses the interquartile range to determine the arm's length range, which is the range from $43 to $46.25. If USSub's price falls outside this range, the district director may make an allocation. In this case that allocation would be to the median of the results, or $44.50.

Example 4 Arm's length range limited to interquartile range. (i) To evaluate the arm's length result of controlled transactions between USP, a United States manufacturing company, and FSub, its foreign subsidiary, the district director considers applying the comparable profits method. The district director identifies 50 uncontrolled taxpayers within the same industry that potentially could be used to apply the method.

(ii) Further review indicates that only 20 of the uncontrolled manufacturers engage in activities requiring similar capital investments and technical know-how. Data with respect to five of the uncontrolled manufacturers is very limited, and although some material differences can be identified and adjusted for, the level of comparability of these five uncontrolled comparables is significantly lower than that of the other 15. In addition, for those five uncontrolled comparables it is not possible to accurately allocate costs between the business activity associated with the relevant transactions and other business activities. Therefore, pursuant to §1.482–1(e)(2)(ii) only the other fifteen uncontrolled comparables may be used to establish an arm's length range.

(iii) Although the data for the fifteen remaining uncontrolled comparables is relatively complete and accurate, there is a significant possibility that some material differences may remain. The district director has determined, for example, that it is likely that there are material differences in the level of technical expertise or in management efficiency. Accordingly, if the comparable profits method is determined to be the best method pursuant to §1.482–1(c), the arm's length range for the controlled transaction may be established only pursuant to paragraph (e)(2)(iii)(B) of this section.

(f) *Scope of review*—(1) *In general.* The authority to determine true taxable income extends to any case in which either by inadvertence or design the taxable income, in whole or in part, of a controlled taxpayer is other than it would have been had the taxpayer, in the conduct of its affairs, been dealing at arm's length with an uncontrolled taxpayer.

(i) *Intent to evade or avoid tax not a prerequisite.* In making allocations under section 482, the district director is not restricted to the case of improper accounting, to the case of a fraudulent, colorable, or sham transaction, or to the case of a device designed to reduce or avoid tax by shifting or distorting income, deductions, credits, or allowances.

(ii) *Realization of income not a prerequisite*—(A) *In general.* The district director may make an allocation under section 482 even if the income ultimately anticipated from a series of transactions has not been or is never realized. For example, if a controlled taxpayer sells a product at less than an arm's length price to a related taxpayer in one taxable year and the second controlled taxpayer resells the product to an unrelated party in the next taxable year, the district director may make an appropriate allocation to reflect an arm's length price for the sale of the product in the first taxable year, even though the second controlled taxpayer had not realized any gross income from the resale of the product in the first year. Similarly, if a controlled taxpayer lends money to a related taxpayer in a taxable year, the district director may make an appropriate allocation to reflect an arm's length charge for interest during such taxable year even if the second controlled taxpayer does not realize income during such year. Finally, even if two controlled taxpayers realize an overall loss that is attributable to a particular controlled transaction, an allocation under section 482 is not precluded.

(B) *Example.* The following example illustrates this paragraph (f)(1)(ii).

Example. USSub is a U.S. subsidiary of FP, a foreign corporation. Parent manufactures product X and sells it to USSub. USSub functions as a distributor of product X to unrelated customers in the United States. The fact that FP may incur a loss on the manufacture and sale of product X does not by itself establish that USSub, dealing with FP at arm's length, also would incur a loss. An independent distributor acting at arm's length with its supplier would in many circumstances be expected to earn a profit without regard to the level of profit earned by the supplier.

(iii) *Nonrecognition provisions may not bar allocation*—(A) *In general.* If necessary to prevent the avoidance of taxes or to clearly reflect income, the district director may make an allocation under section 482 with respect to transactions that otherwise qualify for nonrecognition of gain or loss under applicable provisions of the Internal Revenue Code (such as section 351 or 1031).

(B) *Example.* The following example illustrates this paragraph (f)(1)(iii).

Example. (i) In Year 1 USP, a United States corporation, bought 100 shares of UR, an unrelated corporation, for $100,000. In Year 2, when the value of the UR stock had decreased to $40,000, USP contributed all 100 shares of UR stock to its wholly-owned subsidiary in exchange for subsidiary's capital stock. In Year 3, the subsidiary sold all of the UR stock for $40,000 to an unrelated buyer, and on its U.S. income tax return, claimed a loss of $60,000 attributable to the sale of the UR stock. USP and its subsidiary do not file a consolidated return.

(ii) In determining the true taxable income of the subsidiary, the district director may disallow the loss of $60,000 on the ground that the loss was incurred by USP. *National Securities Corp. v Commissioner,* 137 F.2d 600 (3rd Cir. 1943), cert. denied, 320 U.S. 794 (1943).

(iv) *Consolidated returns.* Section 482 and the regulations thereunder apply to all controlled taxpayers, whether the controlled taxpayer files a separate or consolidated U.S. income tax return. If a controlled taxpayer files a separate return, its true separate taxable income will be determined. If a controlled taxpayer is a party to a consolidated return, the true consolidated taxable income of the affiliated group and the true separate taxable income of the controlled taxpayer must be determined consistently with the principles of a consolidated return.

(2) *Rules relating to determination of true taxable income.* The following rules must be taken into account in determining the true taxable income of a controlled taxpayer.

(i) *Aggregation of transactions*—(A) *In general.* The combined effect of two or more separate transactions (whether before, during, or after the taxable year under review) may be considered, if such transactions, taken as a whole, are so interrelated that consideration of multiple transactions is the most reliable means of determining the arm's length consideration for the controlled transactions. Generally, transactions will be aggregated only when they involve related products or services, as defined in § 1.6038A–3(c)(7)(vii).

(B) *Examples.* The following examples illustrate this paragraph (f)(2)(i).

Example 1. P enters into a license agreement with S1, its subsidiary, that permits S1 to use a proprietary manufacturing process and to sell the output from this process throughout a specified region. S1 uses the manufacturing process and sells its output to S2, another subsidiary of P, which in turn resells the output to uncontrolled parties in the specified region. In evaluating the arm's length character of the royalty paid by S1 to P, it may be appropriate to consider the arm's length character of the transfer prices charged by S1 to S2 and the aggregate profits earned by S1 and S2 from the use of the manufacturing process and the sale to uncontrolled parties of the products produced by S1.

Example 2. S1, S2, and S3 are Country Z subsidiaries of U.S. manufacturer P. S1 is the exclusive Country Z distributor of computers manufactured by P. S2 provides marketing services in connection with sales of P computers in Country Z, and in this regard uses significant marketing intangibles provided by P. S3 administers the warranty program with respect to P computers in Country Z, including maintenance and repair services. In evaluating the arm's length character of the transfer price paid by S1 to P, of the fees paid by S2 to P for the use of P marketing intangibles, and of the service fees earned by S2 and S3, it may be appropriate to consider the combined effects of these separate transactions because they are so interrelated that they are most reliably analyzed on an aggregated basis.

Example 3. The facts are the same as in *Example 2.* In addition, U1, U2, and U3 are uncontrolled taxpayers that carry out functions comparable to those of S1, S2, and S3, respectively, with respect to computers produced by unrelated manufacturers. R1, R2, and R3 are a controlled group of taxpayers (unrelated to the P controlled group) that also carry out functions comparable to those of S1, S2, and S3 with respect to computers produced by their common parent. Prices charged to uncontrolled customers of the R group differ from the prices charged to customers of U1, U2, and U3. In determining whether the transactions of U1, U2, and U3, or the transactions of R1, R2, and R3 would provide a more reliable measure of the arm's length result, it is determined that the interrelated R group transactions are more reliable than the wholly independent transactions of U1, U2, and U3, given the interrelationship of the P group transactions.

Example 4. P enters into a license agreement with S1 that permits S1 to use a propriety process for manufacturing product X and to sell product X to uncontrolled parties throughout a specified region. P also sells to S1 product Y which is manufactured by P in the United States, and which is unrelated to product X. Product Y is resold by S1 to uncontrolled parties in the specified region. In evaluating the arm's length character of the royalty paid by S1 to P for the use of the manufacturing process for product X, and the transfer prices charged for unrelated product Y, it would not be appropriate to consider the combined effects of these separate and unrelated transactions.

(ii) *Allocation based on taxpayer's actual transactions*—(A) *In general.* The district director will evaluate the results of a transaction as actually structured by the taxpayer unless its structure lacks economic substance. However, the district director may consider the alternatives available to the taxpayer in determining whether the terms of the controlled transaction would be acceptable to an uncontrolled taxpayer faced with the same alternatives and operating under comparable circumstances. In such cases the district director may adjust the consideration charged in the controlled transaction based on the cost or profit of an alternative as adjusted to account for material differences between the alternative and the controlled transaction, but will not restructure the transaction as if the alternative had been adopted by the taxpayer. See §1.482–1(d)(3) (Factors for determining comparability, Contractual terms and Risk); §§1.482–3(e) and 1.482–4(d) (Unspecified methods).

(B) *Example.* The following example illustrates this paragraph (f)(2)(ii).

Example. P and S are controlled taxpayers. P enters into a license agreement with S that permits S to use a proprietary process for manufacturing product X. Using its sales and marketing employees, S sells product X to related and unrelated customers outside the United States. If the license agreement between P and S has economic substance, the district director ordinarily will not restructure the taxpayer's transaction to treat P as if it had elected to exploit directly the manufacturing process. However, the fact that P could have manufactured product X may be taken into account under §1.482–4(d) in determining the arm's length consideration for the controlled transaction. For an example of such an analysis, see *Example* in §1.482–4(d)(2).

(iii) *Multiple year data*—(A) *In general.* The results of a controlled transaction ordinarily will be compared with the results of uncontrolled comparables occurring in the taxable year under review. It may be appropriate, however, to consider data relating to the uncontrolled comparables or the controlled taxpayer for one or more years before or after the year under review. If data relating to uncontrolled comparables from multiple years is used, data relating to the controlled taxpayer for the same years ordinarily must be considered. However, if such data is not available, reliable data from other years, as adjusted under paragraph (d)(2) (Standard of comparability) of this section may be used.

(B) *Circumstances warranting consideration of multiple year data.* The extent to which it is appropriate to consider multiple-year data depends on the method being applied and the issue being addressed. Circumstances that may warrant consideration of data from multiple years include the extent to which complete and accurate data is available for the taxable year under review, the effect of business cycles in the controlled taxpayer's industry, or the effects of life cycles of the product or intangible being examined. Data from one or more years before or after the taxable year under review must ordinarily be considered for purposes of applying the provisions of §1.482–1(d)(3)(iii) (Risk), §1.482–1(d)(4)(i) (Market share strategy), §1.482–4(f)(2) (Periodic adjustments), and §1.482–5 (Comparable profits method). On the other hand, multiple-year data ordinarily will not be considered for purposes of applying the comparable uncontrolled price method (except to the extent that risk or market share strategy issues are present).

(C) *Comparable effect over comparable period.* Data from multiple years may be considered to determine whether the same economic conditions that caused the controlled taxpayer's results had a comparable effect over a comparable period of time on the uncontrolled comparables that establish the arm's length range. For example, given that uncontrolled taxpayers enter into transactions with the ultimate expectation of earning a profit, persistent losses among controlled taxpayers may be an indication of non-arm's length dealings. Thus, if a controlled taxpayer that realizes a loss with respect to a controlled transaction seeks to demonstrate that the loss is within the arm's length range, the district director may take into account data from taxable years other than the taxable year of the transaction to determine whether the loss was attributable to arm's length dealings. The rule of this paragraph (f)(2)(iii)(C) is illustrated by *Example 3* of paragraph (f)(2)(iii)(E) of this section.

(D) *Applications of methods using multiple year averages.* If a comparison of a controlled taxpayer's average result over a multiple year period with the average results of uncontrolled comparables over the same period would reduce the effect of short-term variations that may be unrelated to transfer pricing, it may be appropriate to establish a range derived from the average results of uncontrolled comparables over a multiple year period to determine if an adjustment should be made. In such a case the district director may make an adjustment if the controlled taxpayer's average result for the multiple year period is not within such range. Such a range must be determined in accordance with §1.482–1(e) (Arm's length range). An adjustment in such a case ordinarily will be equal to the difference, if any, between the controlled taxpayer's result for the taxable year and the mid-point of the uncontrolled comparables' results for that year. If the interquartile range is used to determine the range of average results for the multiple year period, such adjustment will ordinarily be made to the median of all the results of the uncontrolled comparables for the taxable year. See *Example 2* of §1.482–5(e). In other cases, the adjustment normally will be made to the arithmetic mean of all the results of the uncontrolled comparables for the taxable year. However, an adjustment will be made only to the extent that it would move the controlled taxpayer's multiple year average closer to the arm's length range for the multiple year period or to any point within such range. In determining a controlled taxpayer's average result for a multiple year period, adjustments made under this section for prior years will be taken into account only if such adjustments have been finally determined, as described in §1.482–1(g)(2)(iii). See *Example 3* of §1.482–5(e).

(E) *Examples.* The following examples, in which S and P are controlled taxpayers, illustrate this paragraph (f)(2)(iii). *Examples 1* and *4* also illustrate the principle of the arm's length range of paragraph (e) of this section.

Example 1. P sold product Z to S for $60 per unit in 1995. Applying the resale price method to data from uncontrolled comparables for the same year establishes an arm's length range of prices for the controlled transaction from $52 to $59 per unit. Since the price charged in the controlled transaction falls outside the range, the district director would ordinarily make an allocation under section 482. However, in this case there are cyclical factors that affect the results of the uncontrolled comparables (and that of the controlled transaction) that cannot be adequately accounted for by specific adjustments to the data for 1995. Therefore, the district director considers results over multiple years to account for these factors. Under these circumstances, it is appropriate to average the results of the uncontrolled comparables over the years 1993, 1994, and 1995 to determine an arm's length range. The averaged results establish an arm's length range of $56 to $58 per unit. For consistency, the results of the controlled taxpayers must also be averaged over the same years. The average price in the controlled transaction over the three years is $57. Because the controlled transfer price of product Z falls within the arm's length range, the district director makes no allocation.

Example 2. (i) FP, a Country X corporation, designs and manufactures machinery in Country X. FP's costs are incurred in Country X currency. USSub is the exclusive distributor of FP's machinery in the United States. The price of the machinery sold by FP to USSub is expressed in Country X currency. Thus, USSub bears all of the currency risk associated with fluctuations in the exchange rate between the time the contract is signed and the payment is made. The prices charged by FP to USSub for 1995 are under examination. In that year, the value of the dollar depreciated against the currency of Country X, and as a result, USSub's gross margin was only 8%.

(ii) UD is an uncontrolled distributor of similar machinery that performs distribution functions substantially the same as those performed by USSub, except that UD purchases and resells machinery in transactions where both the purchase and resale prices are denominated in U.S. dollars. Thus, UD had no currency exchange risk. UD's gross margin in 1995 was 10%. UD's average gross margin for the period 1990 to 1998 has been 12%.

(iii) In determining whether the price charged by FP to USSub in 1995 was arm's length, the district director may consider USSub's average gross margin for an appropriate period before and after 1995 to determine whether USSub's average gross margin during the period was sufficiently greater than UD's average gross margin during the same period such that USSub was sufficiently compensated for the currency risk it bore throughout the period. See §1.482-1(d)(3)(iii) (Risk).

Example 3. FP manufactures product X in Country M and sells it to USSub, which distributes X in the United States. USSub realizes losses with respect to the controlled transactions in each of five consecutive taxable years. In each of the five consecutive years a different uncontrolled comparable realized a loss with respect to comparable transactions equal to or greater than USSub's loss. Pursuant to paragraph (f)(3)(iii)(C) of this section, the district director examines whether the uncontrolled comparables realized similar losses over a comparable period of time, and finds that each of the five comparables realized losses in only one of the five years, and their average result over the five-year period was a profit. Based on this data, the district director may conclude that the controlled taxpayer's results are not within the arm's length range over the five year period, since the economic conditions that resulted in the controlled taxpayer's loss did not have a comparable effect over a comparable period of time on the uncontrolled comparables.

Example 4. (i) USP, a U.S. corporation, manufactures product Y in the United States and sells it to FSub, which acts as USP's exclusive distributor of product Y in Country N. The resale price method described in §1.482–3(c) is used to evaluate whether the transfer price charged by USP to FSub for the 1994 taxable year for product Y was arm's length. For the period 1992 through 1994, FSub had a gross profit margin for each year of 13%. A, B, C and D are uncontrolled distributors of products that compete directly with product Y in country N. After making appropriate adjustments in accordance with §§1.482–1(d)(2) and 1.482–3(c), the gross profit margins for A, B, C, and D are as follows:

	1992	1993	1994	Average
A	13	3	8	8.00
B	11	13	2	8.67
7C	4	7	13	8.00
7D	7	9	6	7.33

(ii) Applying the provisions of §1.482–1(e), the district director determines that the arm's length range of the average gross profit margins is between 7.33 and 8.67. The district director concludes that FSub's average gross margin of 13% is not within the arm's length range, despite the fact that C's gross profit margin for 1994 was also 13%, since the economic conditions that caused S's result did not have a comparable effect over a comparable period of time on the results of C or the other uncontrolled comparables. In this case, the district director makes an allocation equivalent to adjusting FSub's gross profit margin for 1994 from 13% to the mean of the uncontrolled comparables' results for 1994 (7.25%).

(iv) *Product lines and statistical techniques.* The methods described in §§1.482–2 through 1.482–6 are generally stated in terms of individual transactions. However, because a taxpayer may have controlled transactions involving many different products, or many separate transactions involving the same product, it may be impractical to analyze every individual transaction to determine its arm's length price. In such cases, it is permissible to evaluate the arm's length results by applying the appropriate methods to the overall results for product lines or other groupings. In addition, the arm's length results of all related party transactions entered into by a controlled taxpayer may be evaluated by employing sampling and other valid statistical techniques.

(v) *Allocations apply to results, not methods*—(A) *In general.* In evaluating whether the result of a controlled transaction is arm's length, it is not necessary for the district director to determine whether the method or procedure that a controlled taxpayer employs to set the terms for its controlled transactions corresponds to the method or procedure that might have been used by a taxpayer dealing at arm's length with an uncontrolled taxpayer. Rather, the district director will evaluate the result achieved rather than the method the taxpayer used to determine its prices.

(B) *Example.* The following example illustrates this paragraph (f)(2)(v).

Example. (i) FS is a foreign subsidiary of P, a U.S. corporation. P manufactures and sells household appliances. FS operates as P's exclusive distributor in Europe. P annually establishes the price for each of its appliances sold to FS as part of its annual budgeting, production allocation and scheduling, and performance evaluation processes. FS's aggregate gross margin earned in its distribution business is 18%.

(ii) ED is an uncontrolled European distributor of competing household appliances. After adjusting for minor differences in the level of inventory, volume of sales, and warranty programs conducted by FS and ED, ED's aggregate gross margin is also 18%. Thus, the district director may conclude that the aggregate prices charged by P for its appliances sold to FS are arm's length, without determining whether the budgeting, production, and performance evaluation processes of P are similar to such processes used by ED.

(g) *Collateral adjustments with respect to allocations under section 482*—(1) *In general.* The district director will take into account appropriate collateral adjustments with respect to allocations under section 482. Appropriate collateral adjustments may include correlative allocations, conforming adjustments, and setoffs, as described in this paragraph (g).

(2) *Correlative allocations*—(i) *In general.* When the district director makes an allocation under section 482 (referred to in this paragraph (g)(2) as the primary allocation), appropriate correlative allocations will also be made with respect to any other member of the group affected by the allocation. Thus, if the district director makes an allocation of income, the district director will not only increase the income of one member of the group, but correspondingly decrease the income of the other member. In addition, where appropriate, the district director may make such further correlative allocations as may be required by the initial correlative allocation.

(ii) *Manner of carrying out correlative allocation.* The district director will furnish to the taxpayer with respect to which the primary allocation is made a written statement of the amount and nature of the correlative allocation. The correlative allocation must be reflected in the documentation of the other member of the group that is maintained for U.S. tax purposes, without regard to whether it affects the U.S. income tax liability of the other member for any open year. In some circumstances the allocation will have an immediate U.S. tax effect, by changing the taxable income computation of the other member (or the taxable income computation of a shareholder of the other member, for example, under the provisions of subpart F of the Internal Revenue Code). Alternatively, the correlative allocation may not be reflected on any U.S. tax return until a later year, for example when a dividend is paid.

(iii) *Events triggering correlative allocation.* For purposes of this paragraph (g)(2), a primary allocation will not be considered to have been made (and therefore, correlative allocations are not required to be made) until the date of a final determination with respect to the allocation under section 482. For this purpose, a final determination includes—

(A) Assessment of tax following execution by the taxpayer of a Form 870 (Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment) with respect to such allocation;

(B) Acceptance of a Form 870–AD (Offer of Waiver of Restriction on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment);

(C) Payment of the deficiency;

(D) Stipulation in the Tax Court of the United States; or

(E) Final determination of tax liability by offer-in-compromise, closing agreement, or final resolution (determined under the principles of section 7481) of a judicial proceeding.

(iv) *Examples.* The following examples illustrate this paragraph (g)(2). In each example, X and Y are members of the same group of controlled taxpayers and each regularly computes its income on a calendar year basis.

Example 1. (i) In 1996, Y, a U.S. corporation, rents a building owned by X, also a U.S. corporation. In 1998 the district director determines that Y did not pay an arm's length rental charge. The district director proposes to increase X's income to reflect an arm's length rental charge. X consents to the assessment reflecting such adjustment by executing Form 870, a Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment. The assessment of the tax with respect to the adjustment is made in 1998. Thus, the primary allocation, as defined in paragraph (g)(2)(i) of this section, is considered to have been made in 1998.

(ii) The adjustment made to X's income under section 482 requires a correlative allocation with respect to Y's income. The district director notifies X in writing of the amount and nature of the adjustment made with respect to Y. Y had net operating losses in 1993, 1994, 1995, 1996, and 1997. Although a correlative adjustment will not have an effect on Y's U.S. income tax liability for 1996, an adjustment increasing Y's net operating loss for 1996 will be made for purposes of determining Y's U.S. income tax liability for 1998 or a later taxable year to which the increased net operating loss may be carried.

Example 2. (i) In 1995, X, a U.S. construction company, provided engineering services to Y, a U.S. corporation, in the construction of Y's factory. In 1997, the district director determines that the fees paid by Y to X for its services were not arm's length and proposes to make an adjustment to the income of X. X consents to an assessment reflecting such adjustment by executing Form 870. An assessment of the tax with respect to such adjustment is made in 1997. The district director notifies X in writing of the amount and nature of the adjustment to be made with respect to Y.

(ii) The fees paid by Y for X's engineering services properly constitute a capital expenditure. Y does not place the factory into service until 1998. Therefore, a correlative adjustment increasing Y's basis in the factory does not affect Y's U.S. income tax liability for 1997. However, the correlative adjustment must be made in the books and records maintained by Y for its U.S. income tax purposes and such adjustment will be taken into account in computing Y's allowable depreciation or gain or loss on a subsequent disposition of the factory.

Example 3. In 1995, X, a U.S. corporation, makes a loan to Y, its foreign subsidiary not engaged in a U.S. trade or business. In 1997, the district director, upon determining that the interest charged on the loan was not arm's length, proposes to adjust X's income to reflect an arm's length interest rate. X consents to an assessment reflecting such allocation by executing Form 870, and an assessment of the tax with respect to the section 482 allocation is made in 1997. The district director notifies X in writing of the amount and nature of the correlative allocation to be made with respect to Y. Although the correlative adjustment does not have an effect on Y's U.S. income tax liability, the adjustment must be reflected in the documentation of Y that is maintained for U.S. tax purposes. Thus, the adjustment must be reflected in the determination of the amount of Y's earnings and profits for 1995 and subsequent years, and the adjustment must be made to the extent it has an effect on any person's U.S. income tax liability for any taxable year.

(3) *Adjustments to conform accounts to reflect section 482 allocations*—(i) *In general.* Appropriate adjustments must be made to conform a taxpayer's accounts to reflect allocations made under section 482. Such adjustments may include the treatment of an allocated amount as a dividend or a capital contribution (as appropriate), or, in appropriate cases, pursuant to such applicable revenue procedures as may be provided by the Commissioner (see §601.601(d)(2) of this chapter), repayment of the allocated amount without further income tax consequences.

(ii) *Example.* The following example illustrates the principles of this paragraph (g)(3).

Example Conforming cash accounts. (i) USD, a United States corporation, buys Product from its foreign parent, FP. In reviewing USD's income tax return, the district director determines that the arm's length price would have increased USD's taxable income by $5 million. The district director accordingly adjusts USD's income to reflect its true taxable income.

(ii) To conform its cash accounts to reflect the section 482 allocation made by the district director, USD applies for relief under Rev. Proc. 65–17, 1965–1 C.B. 833 (see §601.601(d)(2)(ii)(*b*) of this chapter), to treat the $5 million adjustment as an account receivable from FP, due as of the last day of the year of the transaction, with interest accruing therefrom.

(4) *Setoffs*—(i) *In general.* If an allocation is made under section 482 with respect to a transaction between controlled taxpayers, the district director will also take into account the effect of any other non-arm's length transaction between the same controlled taxpayers in the same taxable year which will result in a setoff against the original section 482 allocation. Such setoff, however, will be taken into account only if the requirements of §1.482–1(g)(4)(ii) are satisfied. If the effect of the setoff is to change the characterization or source of the income or deductions, or otherwise distort taxable income, in such a manner as to affect the U.S. tax liability of any member, adjustments will be made to reflect the correct amount of each category of income or deductions. For purposes of this setoff provision, the term arm's length refers to the amount defined in paragraph (b) (Arm's length standard) of this section, without regard to the rules in §1.482–2 under which certain charges are deemed to be equal to arm's length.

(ii) *Requirements.* The district director will take a setoff into account only if the taxpayer—

(A) Establishes that the transaction that is the basis of the setoff was not at arm's length and the amount of the appropriate arm's length charge;

(B) Documents, pursuant to paragraph (g)(2) of this section, all correlative adjustments resulting from the proposed setoff; and

(C) Notifies the district director of the basis of any claimed setoff within 30 days after the earlier of the date of a letter by which the district director transmits an examination report notifying the taxpayer of proposed adjustments or the date of the issuance of the notice of deficiency.

(iii) *Examples.* The following examples illustrate this paragraph (g)(4).

Example 1. P, a U.S. corporation, renders services to S, its foreign subsidiary in Country Y, in connection with the construction of S's factory. An arm's length charge for such services determined under § 1.482–2(b) would be $100,000. During the same taxable year P makes available to S the use of a machine to be used in the construction of the factory, and the arm's length rental value of the machine is $25,000. P bills S $125,000 for the services, but does not charge S for the use of the machine. No allocation will be made with respect to the undercharge for the machine if P notifies the district director of the basis of the claimed setoff within 30 days after the date of the letter from the district director transmitting the examination report notifying P of the proposed adjustment, establishes that the excess amount charged for services was equal to an arm's length charge for the use of the machine and that the taxable income and income tax liabilities of P are not distorted, and documents the correlative allocations resulting from the proposed setoff.

Example 2. The facts are the same as in *Example 1,* except that, if P had reported $25,000 as rental income and $25,000 less as service income, it would have been subject to the tax on personal holding companies. Allocations will be made to reflect the correct amounts of rental income and service income.

(h) *Special rules*—(1) *Small taxpayer safe harbor.* [Reserved]

(2) *Effect of foreign legal restrictions*—(i) *In general.* The district director will take into account the effect of a foreign legal restriction to the extent that such restriction affects the results of transactions at arm's length. Thus, a foreign legal restriction will be taken into account only to the extent that it is shown that the restriction affected an uncontrolled taxpayer under comparable circumstances for a comparable period of time. In the absence of evidence indicating the effect of the foreign legal restriction on uncontrolled taxpayers, the restriction will be taken into account only to the extent provided in paragraphs (h)(2) (iii) and (iv) of this section (Deferred income method of accounting).

(ii) *Applicable legal restrictions.* Foreign legal restrictions (whether temporary or permanent) will be taken into account for purposes of this paragraph (h)(2) only if, and so long as, the conditions set forth in paragraphs (h)(2)(ii) (A) through (D) of this section are met.

(A) The restrictions are publicly promulgated, generally applicable to all similarly situated persons (both controlled and uncontrolled), and not imposed as part of a commercial transaction between the taxpayer and the foreign sovereign;

(B) The taxpayer (or other member of the controlled group with respect to which the restrictions apply) has exhausted all remedies prescribed by foreign law or practice for obtaining a waiver of such restrictions (other than remedies that would have a negligible prospect of success if pursued);

(C) The restrictions expressly prevented the payment or receipt, in any form, of part or all of the arm's length amount that would otherwise be required under section 482 (for example, a restriction that applies only to the deductibility of an expense for tax purposes is not a restriction on payment or receipt for this purpose); and

(D) The related parties subject to the restriction did not engage in any arrangement with controlled or uncontrolled parties that had the effect of circumventing the restriction, and have not otherwise violated the restriction in any material respect.

(iii) *Requirement for electing the deferred income method of accounting.* If a foreign legal restriction prevents the payment or receipt of part or all of the arm's length amount that is due with respect to a controlled transaction, the restricted amount may be treated as deferrable if the following requirements are met—

(A) The controlled taxpayer establishes to the satisfaction of the district director that the payment or receipt of the arm's length amount was prevented because of a foreign legal restriction and circumstances described in paragraph (h)(2)(ii) of this section; and

(B) The controlled taxpayer whose U.S. tax liability may be affected by the foreign legal restriction elects the deferred income method of accounting, as described in paragraph (h)(2)(iv) of this section, on a written statement attached to a timely U.S. income tax return (or an amended return) filed before the IRS first contacts any member of the controlled group concerning an examination of the return for the taxable year to which the foreign legal restriction applies. A written statement furnished by a taxpayer subject to the Coordinated Examination Program will be considered an amended return for purposes of this paragraph (h)(2)(iii)(B) if it satisfies the requirements of a qualified amended return for purposes of §1.6664–2(c)(3) as set forth in those regulations or as the Commissioner may prescribe by applicable revenue procedures. The election statement must identify the affected transactions, the parties to the transactions, and the applicable foreign legal restrictions.

(iv) *Deferred income method of accounting.* If the requirements of paragraph (h)(2)(ii) of this section are satisfied, any portion of the arm's length amount, the payment or receipt of which is prevented because of applicable foreign legal restrictions, will be treated as deferrable until payment or receipt of the relevant item ceases to be prevented by the foreign legal restriction. For purposes of the deferred income method of accounting under this paragraph (h)(2)(iv), deductions (including the cost or other basis of inventory and other assets sold or exchanged) and credits properly chargeable against any amount so deferred, are subject to deferral under the provisions of §1.461- 1(a)(4). In addition, income is deferrable under this deferred income method of accounting only to the extent that it exceeds the related deductions already claimed in open taxable years to which the foreign legal restriction applied.

(v) *Examples.* The following examples, in which Sub is a Country FC subsidiary of U.S. corporation, Parent, illustrate this paragraph (h)(2).

Example 1. Parent licenses an intangible to Sub. FC law generally prohibits payments by any person within FC to recipients outside the country. The FC law meets the requirements of paragraph (h)(2)(ii) of this section. There is no evidence of unrelated parties entering into transactions under comparable circumstances for a comparable period of time, and the foreign legal restrictions will not be taken into account in determining the arm's length amount. The arm's length royalty rate for the use of the intangible property in the absence of the foreign restriction is 10% of Sub's sales in country FC. However, because the requirements of paragraph (h)(2)(ii) of this section are satisfied, Parent can elect the deferred income method of accounting by attaching to its timely filed U.S. income tax return a written statement that satisfies the requirements of paragraph (h)(2)(iii)(B) of this section.

Example 2. (i) The facts are the same as in *Example 1,* except that Sub, although it makes no royalty payment to Parent, arranges with an unrelated intermediary to make payments equal to an arm's length amount on its behalf to Parent.

(ii) The district director makes an allocation of royalty income to Parent, based on the arm's length royalty rate of 10%. Further, the district director determines that because the arrangement with the third party had the effect of circumventing the FC law, the requirements of paragraph (h)(2)(ii)(D) of this section are not satisfied. Thus, Parent could not validly elect the deferred income method of accounting, and the allocation of royalty income cannot be treated as deferrable. In appropriate circumstances, the district director may permit the amount of the distribution to be treated as payment by Sub of the royalty allocated to Parent, under the provisions of §1.482–1(g) (Collateral adjustments).

Example 3. The facts are the same as in *Example 1,* except that the laws of FC do not prevent distributions from corporations to their shareholders. Sub distributes an amount equal to 8% of its sales in country FC. Because the laws of FC did not expressly prevent all forms of payment from Sub to Parent, Parent cannot validly elect the deferred income method of accounting with respect to any of the arm's length royalty amount. In appropriate circumstances, the district director may permit the 8% that was distributed to be treated as payment by Sub of the royalty allocated to Parent, under the provisions of § 1.482–1(g) (Collateral adjustments).

Example 4. The facts are the same as in *Example 1,* except that Country FC law permits the payment of a royalty, but limits the amount to 5% of sales, and Sub pays the 5% royalty to Parent. Parent demonstrates the existence of a comparable uncontrolled transaction for purposes of the comparable uncontrolled transaction method in which an uncontrolled party accepted a royalty rate of 5%. Given the evidence of the comparable uncontrolled transaction, the 5% royalty rate is determined to be the arm's length royalty rate.

(3) *Coordination with section 936*—(i) *Cost sharing under section 936.* If a possessions corporation makes an election under section 936(h)(5)(C)(i)(I), the corporation must make a section 936 cost sharing payment that is at least equal to the payment that would be required under section 482 if the electing corporation were a foreign corporation. In determining the payment that would be required under section 482 for this purpose, the provisions of §§ 1.482–1 and 1.482–4 will be applied, and to the extent relevant to the valuation of intangibles, §§ 1.482–5 and 1.482–6 will be applied. The provisions of section 936(h)(5)(C)(i)(II) (Effect of Election—electing corporation treated as owner of intangible property) do not apply until the payment that would be required under section 482 has been determined.

(ii) *Use of terms.* A cost sharing payment, for the purposes of section 936(h)(5)(C)(i)(I), is calculated using the provisions of section 936 and the regulations thereunder and the provisions of this paragraph (h)(3). The provisions relating to cost sharing under section 482 do not apply to payments made pursuant to an election under section 936(h)(5)(C)(i)(I). Similarly, a profit split payment, for the purposes of section 936(h)(5)(C)(ii)(I), is calculated using the provisions of section 936 and the regulations thereunder, not section 482 and the regulations thereunder.

(i) *Definitions.* The definitions set forth in paragraphs (i) (1) through (10) of this section apply to §§ 1.482–1 through 1.482–8.

(1) *Organization* includes an organization of any kind, whether a sole proprietorship, a partnership, a trust, an estate, an association, or a corporation (as each is defined or understood in the Internal Revenue Code or the regulations thereunder), irrespective of the place of organization, operation, or conduct of the trade or business, and regardless of whether it is a domestic or foreign organization, whether it is an exempt organization, or whether it is a member of an affiliated group that files a consolidated U.S. income tax return, or a member of an affiliated group that does not file a consolidated U.S. income tax return.

(2) *Trade* or *business* includes a trade or business activity of any kind, regardless of whether or where organized, whether owned individually or otherwise, and regardless of the place of operation. Employment for compensation will constitute a separate trade or business from the employing trade or business.

(3) *Taxpayer* means any person, organization, trade or business, whether or not subject to any internal revenue tax.

(4) *Controlled* includes any kind of control, direct or indirect, whether legally enforceable or not, and however exercisable or exercised, including control resulting from the actions of two or more taxpayers acting in concert or with a common goal or purpose. It is the reality of the control that is decisive, not its form or the mode of its exercise. A presumption of control arises if income or deductions have been arbitrarily shifted.

(5) *Controlled taxpayer* means any one of two or more taxpayers owned or controlled directly or indirectly by the same interests, and includes the taxpayer that owns or controls the other taxpayers. *Uncontrolled taxpayer* means any one of two or more taxpayers not owned or controlled directly or indirectly by the same interests.

(6) *Group, controlled group,* and *group of controlled taxpayers* mean the taxpayers owned or controlled directly or indirectly by the same interests.

(7) *Transaction* means any sale, assignment, lease, license, loan, advance, contribution, or any other transfer of any interest in or a right to use any property (whether tangible or intangible, real or personal) or money, however such transaction is effected, and

whether or not the terms of such transaction are formally documented. A transaction also includes the performance of any services for the benefit of, or on behalf of, another taxpayer.

(8) *Controlled transaction* or *controlled transfer* means any transaction or transfer between two or more members of the same group of controlled taxpayers. The term *uncontrolled transaction* means any transaction between two or more taxpayers that are not members of the same group of controlled taxpayers.

(9) *True taxable income* means, in the case of a controlled taxpayer, the taxable income that would have resulted had it dealt with the other member or members of the group at arm's length. It does not mean the taxable income resulting to the controlled taxpayer by reason of the particular contract, transaction, or arrangement the controlled taxpayer chose to make (even though such contract, transaction, or arrangement is legally binding upon the parties thereto).

(10) *Uncontrolled comparable* means the uncontrolled transaction or uncontrolled taxpayer that is compared with a controlled transaction or taxpayer under any applicable pricing methodology. Thus, for example, under the comparable profits method, an uncontrolled comparable is any uncontrolled taxpayer from which data is used to establish a comparable operating profit.

(j) *Effective dates*—(1) The regulations in this are generally effective for taxable years beginning after October 6, 1994.

(2) Taxpayers may elect to apply retroactively all of the provisions of these regulations for any open taxable year. Such election will be effective for the year of the election and all subsequent taxable years.

(3) Although these regulations are generally effective for taxable years as stated, the final sentence of section 482 (requiring that the income with respect to transfers or licenses of intangible property be commensurate with the income attributable to the intangible) is generally effective for taxable years beginning after December 31, 1986. For the period prior to the effective date of these regulations, the final sentence of section 482 must be applied using any reasonable method not inconsistent with the statute. The IRS considers a method that applies these regulations or their general principles to be a reasonable method.

(4) These regulations will not apply with respect to transfers made or licenses granted to foreign persons before November 17, 1985, or before August 17, 1986, for transfers or licenses to others. Nevertheless, they will apply with respect to transfers or licenses before such dates if, with respect to property transferred pursuant to an earlier and continuing transfer agreement, such property was not in existence or owned by the taxpayer on such date.

[T.D. 8552, 59 FR 34990, July 8, 1994]

§1.482–2 Determination of taxable income in specific situations.

(a) *Loans or advances*—(1) *Interest on bona fide indebtedness*—(i) *In general.* Where one member of a group of controlled entities makes a loan or advance directly or indirectly to, or otherwise becomes a creditor of, another member of such group and either charges no interest, or charges interest at a rate which is not equal to an arm's length rate of interest (as defined in paragraph (a)(2) of this section) with respect to such loan or advance, the district director may make appropriate allocations to reflect an arm's length rate of interest for the use of such loan or advance.

(ii) *Application of paragraph (a) of this section*—(A) *Interest on bona fide indebtedness.* Paragraph (a) of this section applies only to determine the appropriateness of the rate of interest charged on the principal amount of a bona fide indebtedness between members of a group of controlled entities, including—

(*1*) Loans or advances of money or other consideration (whether or not evidenced by a written instrument); and

(*2*) Indebtedness arising in the ordinary course of business from sales, leases, or the rendition of services by or between members of the group, or any other similar extension of credit.

(B) *Alleged indebtedness.* This paragraph (a) does not apply to so much of an alleged indebtedness which is not in fact a bona fide indebtedness, even if the stated rate of interest thereon would be within the safe haven rates prescribed in paragraph (a)(2)(iii) of this section. For example, paragraph (a) of this section does not apply to payments with respect to all or a portion of such alleged indebtedness where in fact all or a portion of an alleged indebtedness is a contribution to the capital of a corporation or a distribution by a corporation with respect to its shares. Similarly, this paragraph (a) does not apply to payments with respect to an alleged purchase-money debt instrument given in consideration for an alleged sale of property between two controlled entities where in fact the transaction constitutes a lease of the property. Payments made with respect to alleged indebtedness (including alleged stated interest thereon) shall be treated according to their substance. See § 1.482–2(a)(3)(i).

(iii) *Period for which interest shall be charged*—(A) *General rule.* This paragraph (a)(1)(iii) is effective for indebtedness arising after June 30, 1988. See § 1.482–2(a)(3) (26 CFR Part 1 edition revised as of April 1, 1988) for indebtedness arising before July 1, 1988. Except as otherwise provided in paragraphs (a)(1)(iii)(B) through (E) of this section, the period for which interest shall be charged with respect to a bona fide indebtedness between controlled entities begins on the day after the day the indebtedness arises and ends on the day the indebtedness is satisfied (whether by payment, offset, cancellation, or otherwise). Paragraphs (a)(1)(iii)(B) through (E) of this section provide certain alternative periods during which interest is not required to be charged on certain indebtedness. These exceptions apply only to indebtedness described in paragraph (a)(1)(ii)(A)(2) of this section (relating to indebtedness incurred in the ordinary course of business from sales, services, etc., between members of the group) and not evidenced by a written instrument requiring the payment of interest. Such amounts are hereinafter referred to as intercompany trade receivables. The period for which interest is not required to be charged on intercompany trade receivables under this paragraph (a)(1)(iii) is called the interest-free period. In general, an intercompany trade receivable arises at the time economic performance occurs (within the meaning of section 461(h) and the regulations thereunder) with respect to the underlying transaction between controlled entities. For purposes of this paragraph (a)(1)(iii), the term United States includes any possession of the United States, and the term foreign country excludes any possession of the United States.

(B) *Exception for certain intercompany transactions in the ordinary course of business.* Interest is not required to be charged on an intercompany trade receivable until the first day of the third calendar month following the month in which the intercompany trade receivable arises.

(C) *Exception for trade or business of debtor member located outside the United States.* In the case of an intercompany trade receivable arising from a transaction in the ordinary course of a trade or business which is actively conducted outside the United States by the debtor member, interest is not required to be charged until the first day of the fourth calendar month following the month in which such intercompany trade receivable arises.

(D) *Exception for regular trade practice of creditor member or others in creditor's industry*. If the creditor member or unrelated persons in the creditor member's industry, as a regular trade practice, allow unrelated parties a longer period without charging interest than that described in paragraph (a)(1)(iii)(B) or (C) of this section (whichever is applicable) with respect to transactions which are similar to transactions that give rise to intercompany trade receivables, such longer interest-free period shall be allowed with respect to a comparable amount of intercompany trade receivables.

(E) *Exception for property purchased for resale in a foreign country—(1) General rule.* If in the ordinary course of business one member of the group (related purchaser) purchases property from another member of the group (related seller) for resale to unrelated persons located in a particular foreign country, the related purchaser and the related seller may use as the interest-free period for the intercompany trade receivables arising during the related seller's taxable year from the purchase of such property within the same product group an interest-free period equal the sum of—

(*i*) The number of days in the related purchaser's average collection period (as determined under paragraph (a)(1)(iii)(E)(*2*) of this section) for sales of property within the same product group sold in the ordinary course of business to unrelated persons located in the same foreign country; plus

(*ii*) Ten (10) calendar days.

(*2*) *Interest-free period.* The interest-free period under this paragraph (a)(1)(iii)(E), however, shall in no event exceed 183 days. The related purchaser does not have to conduct business outside the United States in order to be eligible to use the interest-free period of this paragraph (a)(1)(iii)(E). The interest-free period under this paragraph (a)(1)(iii)(E) shall not apply to intercompany trade receivables attributable to property which is manufactured, produced, or constructed (within the meaning of §1.954–3(a)(4)) by the related purchaser. For purposes of this paragraph (a)(1)(iii)(E) a product group includes all products within the same three-digit Standard Industrial Classification (SIC) Code (as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President.)

(*3*) *Average collection period.* An average collection period for purposes of this paragraph (a)(1)(iii)(E) is determined as follows—

(*i*) *Step 1.* Determine total sales (less returns and allowances) by the related purchaser in the product group to unrelated persons located in the same foreign country during the related purchaser's last taxable year ending on or before the first day of the related seller's taxable year in which the intercompany trade receivable arises.

(*ii*) *Step 2.* Determine the related purchaser's average month-end accounts receivable balance with respect to sales described in paragraph (a)(1)(iii)(E)(*2*)(*i*) of this section for the related purchaser's last taxable year ending on or before the first day of the related seller's taxable year in which the intercompany trade receivable arises.

(*iii*) *Step 3.* Compute a receivables turnover rate by dividing the total sales amount described in paragraph (a)(1)(iii)(E)(*2*)(*i*) of this section by the average receivables balance described in paragraph (a)(1)(iii)(E)(*2*)(*ii*) of this section.

(*iv*) *Step 4.* Divide the receivables turnover rate determined under paragraph (a)(1)(iii)(E)(*2*)(*iii*) of this section into 365, and round the result to the nearest whole number to determine the number of days in the average collection period.

(*v*) *Other considerations.* If the related purchaser makes sales in more than one foreign country, or sells property in more than one product group in any foreign country, separate computations of an average collection period, by product group within each country, are required. If the related purchaser resells fungible property in more than one foreign country and the intercompany trade receivables arising from the related party purchase of such fungible property cannot reasonably be identified with resales in particular foreign countries, then solely for the purpose of assigning an interest-free period to such intercompany trade receivables under this paragraph (a)(1)(iii)(E), an amount of each such intercompany trade receivable shall be treated as allocable to a particular foreign country in the same proportion that the related purchaser's sales of such fungible property in such foreign country during the period described in paragraph (a)(1)(iii)(E)(2)(i) of this section bears to the related purchaser's sales of all such fungible property in all such foreign countries during such period. An interest-free period under this paragraph (a)(1)(iii)(E) shall not apply to any intercompany trade receivables arising in a taxable year of the related seller if the related purchaser made no sales described in paragraph (a)(1)(iii)(E)(2)(i) of this section from which the appropriate interest-free period may be determined.

(*4*) *Illustration*. The interest-free period provided under paragraph (a)(1)(iii)(E) of this section may be illustrated by the following example:

Example—(i) Facts. X and Y use the calendar year as the taxable year and are members of the same group of controlled entities within the meaning of section 482. For Y's 1988 calendar taxable year X and Y intend to use the interest-free period determined under this paragraph (a)(1)(iii)(E) for intercompany trade receivables attributable to X's purchases of certain products from Y for resale by X in the ordinary course of business to unrelated persons in country Z. For its 1987 calendar taxable year all of X's sales in country Z were of products within a single product group based upon a three-digit SIC code, were not manufactured, produced, or constructed (within the meaning of § 1.954–3(a)(4)) by X, and were sold in the ordinary course of X's trade or business to unrelated persons located only in country Z. These sales and the month-end accounts receivable balances (for such sales and for such sales uncollected from prior months) are as follows:

Month	Sales	Accounts receivable
Jan. 1987	$500,000	$2,835,850
Feb.	600,000	2,840,300
Mar.	450,000	2,850,670
Apr.	550,000	2,825,700
May.	650,000	2,809,360
June	525,000	2,803,200
July	400,000	2,825,850
Aug.	425,000	2,796,240
Sept.	475,000	2,839,390
Oct.	525,000	2,650,550
Nov.	450,000	2,775,450
Dec. 1987	650,000	2,812,600
Totals	6,200,000	33,665,160

(ii) *Average collection period.* X's total sales within the same product group to unrelated persons within country Z for the period are $6,200,000. The average receivables balance for the period is $2,805,430 ($33,665,160/12). The average collection period in whole days is determined as follows:

$$\text{Receivables Turnover Rate} = \frac{\$6{,}200{,}000}{\$2{,}805{,}430} = 2.21$$

$$\begin{array}{c}\text{Average Collection}\\ \text{Period}\end{array} = \frac{365}{2.21} = \begin{array}{c}\text{165.16 days, rounded to the}\\ \text{nearest whole day} = 165\text{ days.}\end{array}$$

(iii) *Interest-free period.* Accordingly, for intercompany trade receivables incurred by X during Y's 1988 calendar taxable year attributable to the purchase of property from Y for resale to unrelated persons located in country Z and included in the product group, X may use an interest-free period of 175 days (165 days in the average collection period plus 10 days, but not in excess of a maximum of 183 days). All other intercompany trade receivables incurred by X are subject to the interest-free periods described in paragraphs (a)(1)(iii) (B), (C), or (D), whichever are applicable. If X makes sales in other foreign countries in addition to country Z or makes sales of property in more than one product group in any foreign country, separate computations of X's average collection period, by product group within each country, are required in order for X and Y to determine an interest-free period for such product groups in such foreign countries under this paragraph (a)(1)(iii)(E).

(iv) *Payment; book entries*—(A) Except as otherwise provided in this paragraph (a)(1)(iv), in determining the period of time for which an amount owed by one member of the group to another member is outstanding, payments or other credits to an account are considered to be applied against the earliest amount outstanding, that is, payments or credits are applied against amounts in a first-in, first-out (FIFO) order. Thus, tracing payments to individual intercompany trade receivables is generally not required in order to determine whether a particular intercompany trade receivable has been paid within the applicable interest-free period determined under paragraph (a)(1)(iii) of this section. The application of this paragraph (a)(1)(iv)(A) may be illustrated by the following example:

Example—(i) Facts. X and Y are members of a group of controlled entities within the meaning of section 482. Assume that the balance of intercompany trade receivables owed by X to Y on June 1 is $100, and that all of the $100 balance represents amounts incurred by X to Y during the month of May. During the month of June X incurs an additional $200 of intercompany trade receivables to Y. Assume that on July 15, $60 is properly credited against X's intercompany account to Y, and that $240 is properly credited against the intercompany account on August 31. Assume that under paragraph (a)(1)(iii)(B) of this section interest must be charged on X's intercompany trade receivables to Y beginning with the first day of the third calendar month following the month the intercompany trade receivables arise, and that no alternative interest-free period applies. Thus, the interest-free period for intercompany trade receivables incurred during the month of May ends on July 31, and the interest-free period for intercompany trade receivables incurred during the month of June ends on August 31.

(ii) *Application of payments.* Using a FIFO payment order, the aggregate payments of $300 are applied first to the opening June balance, and then to the additional amounts incurred during the month of June. With respect to X's June opening balance of $100, no interest is required to be accrued on $60 of such balance paid by X on July 15, because such portion was paid within its interest-free period. Interest for 31 days, from August 1 to August 31 inclusive, is required to be accrued on the $40 portion of the opening balance not paid until August 31. No interest is required to be accrued on the $200 of intercompany trade receivables X incurred to Y during June because the $240 credited on August 31, after eliminating the $40 of indebtedness remaining from periods before June, also eliminated the $200 incurred by X during June prior to the end of the interest-free period for that amount. The amount of interest incurred by X to Y on the $40 amount during August creates bona fide indebtedness between controlled entities and is subject to the provisions of paragraph (a)(1)(iii)(A) of this section without regard to any of the exceptions contained in paragraphs (a)(1)(iii)(B) through (E).

(B) Notwithstanding the first-in, first-out payment application rule described in paragraph (a)(1)(iv)(A) of this section, the taxpayer may apply payments or credits against amounts owed in some other order on its books in accordance with an agreement or understanding of the related parties if the taxpayer can demonstrate that either it or others in its industry, as a regular trade practice, enter into such agreements or understandings in the case of similar balances with unrelated parties.

(2) *Arm's length interest rate*—(i) *In general.* For purposes of section 482 and paragraph (a) of this section, an arm's length rate of interest shall be a rate of interest which was charged, or would have been charged, at the time the indebtedness arose, in independent transactions with or between unrelated parties under similar circumstances. All relevant factors shall be considered, including the principal amount and duration of the loan, the security involved, the credit standing of the borrower, and the interest rate prevailing at the situs of the lender or creditor for comparable loans between unrelated parties.

(ii) *Funds obtained at situs of borrower.* Notwithstanding the other provisions of paragraph (a)(2) of this section, if the loan or advance represents the proceeds of a loan obtained by the lender at the situs of the borrower, the arm's length rate for any taxable year shall be equal to the rate actually paid by the lender increased by an amount which reflects the costs or deductions incurred by the lender in borrowing such amounts and making such loans, unless the taxpayer establishes a more appropriate rate under the standards set forth in paragraph (a)(2)(i) of this section.

(iii) *Safe haven interest rates for certain loans and advances made after May 8, 1986*—(A) *Applicability*—(*1*) *General rule.* Except as otherwise provided in paragraph (a)(2) of this section, paragraph (a)(2)(iii)(B) applies with respect to the rate of interest charged and to the amount of interest paid or accrued in any taxable year—

(*i*) Under a term loan or advance between members of a group of controlled entities where (except as provided in paragraph (a)(2)(iii)(A)(*2*)(*ii*) of this section) the loan or advance is entered into after May 8, 1986; and

(*ii*) After May 8, 1986 under a demand loan or advance between such controlled entities.

(*2*) *Grandfather rule for existing loans.* The safe haven rates prescribed in paragraph (a)(2)(iii)(B) of this section shall not apply, and the safe haven rates prescribed in §1.482–2(a)(2)(iii) (26 CFR part 1 edition revised as of April 1, 1985), shall apply to—

(*i*) Term loans or advances made before May 9, 1986; and

(*ii*) Term loans or advances made before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(B) *Safe haven interest rate based on applicable Federal rate.* Except as otherwise provided in this paragraph (a)(2), in the case of a loan or advance between members of a group of controlled entities, an arm's length rate of interest referred to in paragraph (a)(2)(i) of this section shall be for purposes of chapter 1 of the Internal Revenue Code—

(*1*) The rate of interest actually charged if that rate is—

(*i*) Not less than 100 percent of the applicable Federal rate (lower limit); and

(*ii*) Not greater than 130 percent of the applicable Federal rate (upper limit); or

(*2*) If either no interest is charged or if the rate of interest charged is less than the lower limit, then an arm's length rate of interest shall be equal to the lower limit, compounded semiannually; or

(*3*) If the rate of interest charged is greater than the upper limit, then an arm's length rate of interest shall be equal to the upper limit, compounded semiannually, unless the taxpayer establishes a more appropriate compound rate of interest under paragraph (a)(2)(i) of this section. However, if the compound rate of interest actually charged is greater than the upper limit and less than the rate determined under paragraph (a)(2)(i) of this section, or if the compound rate actually charged is less than the lower limit and greater than the rate determined under paragraph (a)(2)(i) of this section, then the compound rate actually charged shall be deemed to be an arm's length rate under paragraph (a)(2)(i). In the case of any sale-leaseback described in section 1274(e), the lower limit shall be 110 percent of the applicable Federal rate, compounded semiannually.

(C) *Applicable Federal rate.* For purposes of paragraph (a)(2)(iii)(B) of this section, the term applicable Federal rate means, in the case of a loan or advance to which this section applies and having a term of—

(*1*) Not over 3 years, the Federal short-term rate;

(*2*) Over 3 years but not over 9 years, the Federal mid-term rate; or

(*3*) Over 9 years, the Federal long-term rate, as determined under section 1274(d) in effect on the date such loan or advance is made. In the case of any sale or exchange between controlled entities, the lower limit shall be the lowest of the applicable Federal rates in effect for any month in the 3-calendar- month period ending with the first calendar month in which there is a binding written contract in effect for such sale or exchange (lowest 3-month rate, as defined in section 1274(d)(2)). In the case of a demand loan or advance to which this section applies, the applicable Federal rate means the Federal short-term rate determined under section 1274(d) (determined without regard to the lowest 3-month short term rate determined under section 1274(d)(2)) in effect for each day on which any amount of such loan or advance (including unpaid accrued interest determined under paragraph (a)(2) of this section) is outstanding.

(D) *Lender in business of making loans.* If the lender in a loan or advance transaction to which paragraph (a)(2) of this section applies is regularly engaged in the trade or business of making loans or advances to unrelated parties, the safe haven rates prescribed in paragraph (a)(2)(iii)(B) of this section shall not apply, and the arm's length interest rate to be used shall be determined under the standards described in paragraph (a)(2)(i) of this section, including reference to the interest rates charged in such trade or business by the lender on loans or advances of a similar type made to unrelated parties at and about the time the loan or advance to which paragraph (a)(2) of this section applies was made.

(E) *Foreign currency loans.* The safe haven interest rates prescribed in paragraph (a)(2)(iii)(B) of this section do not apply to any loan or advance the principal or interest of which is expressed in a currency other than U.S. dollars.

(3) *Coordination with interest adjustments required under certain other Code sections.* If the stated rate of interest on the stated principal amount of a loan or advance between controlled entities is subject to adjustment under section 482 and is also subject to adjustment under any other section of

the Internal Revenue Code (for example, section 467, 483, 1274 or 7872), section 482 and paragraph (a) of this section may be applied to such loan or advance in addition to such other Internal Revenue Code section. After the enactment of the Tax Reform Act of 1964, Pub. L. 98–369, and the enactment of Pub. L. 99–121, such other Internal Revenue Code sections include sections 467, 483, 1274 and 7872. The order in which the different provisions shall be applied is as follows—

(i) First, the substance of the transaction shall be determined; for this purpose, all the relevant facts and circumstances shall be considered and any law or rule of law (assignment of income, step transaction, etc.) may apply. Only the rate of interest with respect to the stated principal amount of the bona fide indebtedness (within the meaning of paragraph (a)(1) of this section), if any, shall be subject to adjustment under section 482, paragraph (a) of this section, and any other Internal Revenue Code section.

(ii) Second, the other Internal Revenue Code section shall be applied to the loan or advance to determine whether any amount other than stated interest is to be treated as interest, and if so, to determine such amount according to the provisions of such other Internal Revenue Code section.

(iii) Third, whether or not the other Internal Revenue Code section applies to adjust the amounts treated as interest under such loan or advance, section 482 and paragraph (a) of this section may then be applied by the district director to determine whether the rate of interest charged on the loan or advance, as adjusted by any other Code section, is greater or less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

(iv) Fourth, section 482 and paragraphs (b) through (d) of this section and §§1.482–3 through 1.482–7, if applicable, may be applied by the district director to make any appropriate allocations, other than an interest rate adjustment, to reflect an arm's length transaction based upon the principal amount of the loan or advance and the interest rate as adjusted under paragraph (a)(3) (i), (ii) or (iii) of this section. For example, assume that two commonly controlled taxpayers enter into a deferred payment sale of tangible property and no interest is provided, and assume also that section 483 is applied to treat a portion of the stated sales price as interest, thereby reducing the stated sales price. If after this recharacterization of a portion of the stated sales price as interest, the recomputed sales price does not reflect an arm's length sales price under the principles of §1.482–3, the district director may make other appropriate allocations (other than an interest rate adjustment) to reflect an arm's length sales price.

(4) *Examples.* The principles of paragraph (a)(3) of this section may be illustrated by the following examples:

Example 1. An individual, A, transfers $20,000 to a corporation controlled by A in exchange for the corporation's note which bears adequate stated interest. The district director recharacterizes the transaction as a contribution to the capital of the corporation in exchange for preferred stock. Under paragraph (a)(3)(i) of this section, section 1.482–2(a) does not apply to the transaction because there is no bona fide indebtedness.

Example 2. B, an individual, is an employee of Z corporation, and is also the controlling shareholder of Z. Z makes a term loan of $15,000 to B at a rate of interest that is less than the applicable Federal rate. In this instance the other operative Code section is section 7872. Under section 7872(b), the difference between the amount loaned and the present value of all payments due under the loan using a discount rate equal to 100 percent of the applicable Federal rate is treated as an amount of cash transferred from the corporation to B and the loan is treated as having original issue discount equal to such amount. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may also be applied by the district director to determine if the rate of interest charged on this $15,000 loan (100 percent of the AFR, compounded semiannually, as adjusted by section 7872) is an arm's length rate of interest. Because the rate of interest on the loan, as adjusted by section 7872, is within the safe haven range of 100–130 percent of the AFR, compounded semiannually, no further interest rate adjustments under section 482 and paragraph (a) of this section will be made to this loan.

Example 3. The facts are the same as in Example 2 except that the amount lent by Z to B is $9,000, and that amount is the aggregate outstanding amount of loans between Z and B. Under the $10,000 de minimis exception of section 7872(c)(3), no adjustment for interest will be made to this $9,000 loan under section 7872. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $9,000 loan to determine whether the rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

Example 4. X and Y are commonly controlled taxpayers. At a time when the applicable Federal rate is 12 percent, compounded semiannually, X sells property to Y in exchange for a note with a stated rate of interest of 18 percent, compounded semiannually. Assume that the other applicable Code section to the transaction is section 483. Section 483 does not apply to this transaction because, under section 483(d), there is no total unstated interest under the contract using the test rate of interest equal to 100 percent of the applicable Federal rate. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may be applied by the district director to determine whether the rate of interest under the note is excessive, that is, to determine whether the 18 percent stated interest rate under the note exceeds an arm's length rate of interest.

Example 5. Assume that A and B are commonly controlled taxpayers and that the applicable Federal rate is 10 percent, compounded semiannually. On June 30, 1986, A sells property to B and receives in exchange B's purchase-money note in the amount of $2,000,000. The stated interest rate on the note is 9%, compounded semiannually, and the stated redemption price at maturity on the note is $2,000,000. Assume that the other applicable Code section to this transaction is section 1274. As provided in section 1274A(a) and (b), the discount rate for purposes of section 1274 will be nine percent, compounded semiannually, because the stated principal amount of B's note does not exceed $2,800,000. Section 1274 does not apply to this transaction because there is adequate stated interest on the debt instrument using a discount rate equal to 9%, compounded semiannually, and the stated redemption price at maturity does not exceed the stated principal amount. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $2,000,000 note to determine whether the 9% rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

(b) *Performance of services for another*—(1) *General rule.* Where one member of a group of controlled entities performs marketing, managerial, administrative, technical, or other services for the benefit of, or on behalf of another member of the group without charge, or at a charge which is not equal to an arm's length charge as defined in paragraph (b)(3) of this section, the district director may make appropriate allocations to reflect an arm's length charge for such services.

(2) *Benefit test*—(i) Allocations may be made to reflect arm's length charges with respect to services undertaken for the joint benefit of the members of a group of controlled entities, as well as with respect to services performed by one member of the group exclusively for the benefit of another member of the group. Any allocations made shall be consistent with the relative benefits intended from the services, based upon the facts known at the time the services were rendered, and shall be made even if the potential benefits anticipated are not realized. No allocations shall be made if the probable benefits to the other members were so indirect or remote that unrelated parties would not have charged for such services. In general, allocations may be made if the service, at the time it was performed, related to the carrying on of an activity by another member or was intended to benefit another member, either in the member's overall operations or in its day-to-day activities. The principles of this paragraph (b)(2)(i) may be illustrated by the following examples in each of which it is assumed that X and Y are corporate members of the same group of controlled entities:

Example 1. X's International Division engages in a wide range of sales promotion activities. Although most of these activities are undertaken exclusively for the benefit of X's international operations, some are intended to jointly benefit both X and Y and others are undertaken exclusively for the benefit of Y. The district director may make an allocation to reflect an arm's length charge with respect to the activities undertaken for the joint benefit of X and Y consistent with the relative benefits intended as well as with respect to the services performed exclusively for the benefit of Y.

Example 2. X operates an international airline, and Y owns and operates hotels in several cities which are serviced by X. X, in conjunction with its advertising of the airline, often pictures Y's hotels and mentions Y's name. Although such advertising was primarily intended to benefit X's airline operations, it was reasonable to anticipate that there would be substantial benefits to Y resulting from patronage by travelers who responded to X's advertising. Since an unrelated hotel operator would have been charged for such advertising, the district director may make an appropriate allocation to reflect an arm's length charge consistent with the relative benefits intended.

Example 3. Assume the same facts as in Example 2 except that X's advertising neither mentions nor pictures Y's hotels. Although it is reasonable to anticipate that increased air travel attributable to X's advertising will result in some benefit to Y due to increased patronage by air travelers, the district director will not make an allocation with respect to such advertising since the probable benefit to Y was so indirect and remote that an unrelated hotel operator would not have been charged for such advertising.

(ii) Allocations will generally not be made if the service is merely a duplication of a service which the related party has independently performed or is performing for itself. In this connection, the ability to independently perform the service (in terms of qualification and availability of personnel) shall be taken into account. The principles of this paragraph (b)(2)(ii) may be illustrated by the following examples, in each of which it is assumed that X and Y are corporate members of the same group of controlled entities:

Example 1. At the request of Y, the financial staff of X makes an analysis to determine the amount and source of the borrowing needs of Y. Y does not have personnel qualified to make the analysis, and it does not undertake the same analysis. The district director may make an appropriate allocation to reflect an arm's length charge for such analysis.

Example 2. Y, which has a qualified financial staff, makes an analysis to determine the amount and source of its borrowing needs. Its report, recommending a loan from a bank, is submitted to X. X's financial staff reviews the analysis to determine whether X should advise Y to reconsider its plan. No allocation should be made with respect to X's review.

(3) *Arm's length charge.* For the purpose of this paragraph an arm's length charge for services rendered shall be the amount which was charged or would have been charged for the same or similar services in independent transactions with or between unrelated parties under similar circumstances considering all relevant facts. However, except in the case of services which are an integral part of the business activity of either the member rendering the services or the member receiving the benefit of the services (as described in paragraph (b)(7) of this section) the arm's length charge shall be deemed equal to the costs or deductions incurred with respect to such services by the member or members rendering such services unless the taxpayer establishes a more appropriate charge under the standards set forth in the first sentence of this subparagraph. Where costs or deductions are a factor in applying the provisions of this paragraph adequate books and records must be maintained by taxpayers to permit verification of such costs or deductions by the Internal Revenue Service.

(4) *Costs or deductions to be taken into account*—(i) Where the amount of an arm's length charge for services is determined with reference to the costs or deductions incurred with respect to such services, it is necessary to take into account on some reasonable basis all the costs or deductions which are directly or indirectly related to the service performed.

(ii) Direct costs or deductions are those identified specifically with a particular service. These include, but are not limited to, costs or deductions for compensation, bonuses, and travel expenses attributable to employees directly engaged in performing such services, for material and supplies directly consumed in rendering such services, and for other costs such as the cost of overseas cables in connection with such services.

(iii) Indirect costs or deductions are those which are not specifically identified with a particular activity or service but which relate to the direct costs referred to in paragraph (b)(4)(ii) of this section. Indirect costs or deductions generally include costs or deductions with respect to utilities, occupancy, supervisory and clerical compensation, and other overhead burden of the department incurring the direct costs or deductions referred to in paragraph (b)(4)(ii) of this section. Indirect costs or deductions also generally include an appropriate share of the costs or deductions relating to supporting departments and other applicable general and administrative expenses to the extent reasonably allocable to a particular service or activity. Thus, for example, if a domestic corporation's advertising department performs services for the direct benefit of a foreign subsidiary, in addition to direct costs of such department, such as salaries of employees and fees paid to advertising agencies or consultants, which are attributable to such foreign advertising, indirect costs must be taken into account on some reasonable basis in determining the amount of costs or deductions with respect to which the arm's length charge to the foreign subsidiary is to be determined. These generally include depreciation, rent, property taxes, other costs of occupancy, and other overhead costs of the advertising department itself, and allocations of costs from other departments which service the advertising department, such as the personnel, accounting, payroll, and maintenance departments, and other applicable general and administrative expenses including compensation of top management.

(5) *Costs and deductions not to be taken into account.* Costs or deductions of the member rendering the services which are not to be taken into account in determining the amount of an arm's length charge for services include—

(i) Interest expense on indebtedness not incurred specifically for the benefit of another member of the group;

(ii) Expenses associated with the issuance of stock and maintenance of shareholder relations; and

(iii) Expenses of compliance with regulations or policies imposed upon the member rendering the services by its government which are not directly related to the service in question.

(6) *Methods*—(i) Where an arm's length charge for services rendered is determined with reference to costs or deductions, and a member has allocated and apportioned costs or deductions to reflect arm's length charges by employing in a consistent manner a method of allocation and apportionment which is reasonable and in keeping with sound accounting practice, such method will not be disturbed. If the member has not employed a method of allocation and apportionment which is reasonable and in keeping with sound accounting practice, the method of allocating and apportioning costs or deductions for the purpose of determining the amount of arm's length charges shall be based on the particular circumstances involved.

(ii) The methods of allocation and apportionment referred to in this paragraph (b)(6) are applicable both in allocating and apportioning indirect costs to a particular activity or service (see paragraph (b)(4)(iii) of this section) and in allocating and apportioning the total costs (direct and indirect) of a particular activity or service where such activity or service is undertaken for the joint benefit of two or more members of a group (see paragraph (b)(2)(i) of this section). While the use of one or more bases may be appropriate under the circumstances, in establishing the method of allocation and apportionment, appropriate consideration should be given to all bases and factors, including, for example, total expenses, asset size, sales, manufacturing expenses, payroll, space utilized, and time spent. The costs incurred by supporting departments may be apportioned to other departments on the basis of reasonable overall estimates, or such costs may be reflected in the other departments' costs by means of application of reasonable departmental overhead rates Allocations and apportionments of costs or deductions must be made on the basis of the full cost as opposed to the incremental cost. Thus, if an electronic data processing machine, which is rented by the taxpayer, is used for the joint benefit of itself and other members of a controlled group, the determination of the arm's length charge to each member must be made with reference to the full rent and cost of operating the machine by each member, even if the additional use of the machine for the benefit of the other members did not increase the cost to the taxpayer.

(iii) Practices actually employed to apportion costs or expenses in connection with the preparation of statements and analyses for the use of management, creditors, minority shareholders, joint venturers, clients, customers, potential investors, or other parties or agencies in interest shall be considered by the district director. Similarly, in determining the extent to which allocations are to be made to or from foreign members of a controlled group, practices employed by the domestic members of a controlled group in apportioning costs between themselves shall also be considered if the relationships with the foreign members of the group are comparable to the relationships between the domestic members of the group. For example, if, for purposes of reporting to public stockholders or to a governmental agency, a corporation apportions the costs attributable to its executive officers among the domestic members of a controlled group on a reasonable and consistent basis, and such officers exercise comparable control over foreign members of such group, such domestic apportionment practice will be taken into consideration in determining the amount of allocations to be made to the foreign members.

(7) *Certain services.* An arm's length charge shall not be deemed equal to costs or deductions with respect to services which are an integral part of the business activity of either the member rendering the services (referred to in this paragraph (b) as the renderer) or the member receiving the benefit of the services (referred to in this paragraph (b) as the recipient). Paragraphs (b)(7)(i) through (b)(7)(iv) of this section describe those situations in which services shall be considered an integral part of the business activity of a member of a group of controlled entities.

(i) Services are an integral part of the business activity of a member of a controlled group where either the renderer or the recipient is engaged in the trade or business of rendering similar services to one or more unrelated parties.

(ii) (A) Services are an integral part of the business activity of a member of a controlled group where the renderer renders services to one or more related parties as one of its principal activities. Except in the case of services which constitute a manufacturing, production, extraction, or construction activity, it will be presumed that the renderer does not render services to related parties as one of its principal activities if the cost of services of the renderer attributable to the rendition of services for the taxable year to related parties does not exceed 25 percent of the total costs or deductions of the renderer for the taxable year. Where the cost of services rendered to related parties is in excess of 25 percent of the total costs or deductions of the renderer for the taxable year or where the 25-percent test does not apply, the determination of whether the rendition of such services is one of the principal activities of the renderer will be based on the facts and circumstances of each particular case. Such facts and circumstances may include the time devoted to the rendition of the services, the relative cost of the services, the regularity with which the services are rendered, the amount of capital investment, the risk of loss involved, and whether the services are in the nature of supporting services or independent of the other activities of the renderer.

(B) For purposes of the 25-percent test provided in this paragraph (b)(7)(ii), the cost of services rendered to related parties shall include all costs or deductions directly or indirectly related to the rendition of such services including the cost of services which constitute a manufacturing, production, extraction, or construction activity; and the total costs or deductions of the renderer for the taxable year shall exclude amounts properly reflected in the cost of goods sold of the renderer. Where any of the costs or deductions of the renderer do not reflect arm's length consideration and no adjustment is made under any provision of the Internal Revenue Code to reflect arm's length consideration, the 25-percent test will not apply if, had an arm's length charge been made, the costs or deductions attributable to the renderer's rendition of services to related entities would exceed 25 percent of the total costs or deductions of the renderer for the taxable year.

(C) For purposes of the 25-percent test in this paragraph (b)(7)(ii), a consolidated group (as defined in this paragraph (b)(7)(ii)(C)) may, at the option of the taxpayer, be considered as the renderer where one or more members of the consolidated group render services for the benefit of or on behalf of a related party which is not a member of the consolidated group. In such case, the cost of services rendered by members of the consolidated group to any related parties not members of the consolidated group, as well as the total costs or deductions of the members of the consolidated group, shall be considered in the aggregate to determine if such services constitute a principal activity of the renderer. Where a consolidated group is considered the renderer in accordance with this paragraph (b)(7)(ii)(C), the costs or deductions referred to in this paragraph (b)(7)(ii) shall not include costs or deductions paid or accrued to any member of the consolidated group. In addition to the preceding provisions of this paragraph (b)(7)(ii)(C), if part or all of the services rendered by a member of a consolidated group to any related party not a member of the consolidated group are similar to services rendered by any other member of the consolidated group to unrelated parties as part of a trade or business, the 25-percent test in this paragraph (b)(7)(ii) shall be applied with respect to such similar services without regard to this paragraph (b)(7)(ii)(C). For purposes of this paragraph (b)(7)(ii)(C), the term consolidated group means all members of a group of controlled entities created or organized within a single country and subjected to an income tax by such country on the basis of their combined income.

(iii) Services are an integral part of the business activity of a member of a controlled group where the renderer is peculiarly capable of rendering the services and such services are a principal element in the operations of the recipient. The renderer is peculiarly capable of rendering the services where the renderer, in connection with the rendition of such services, makes use of a particularly advantageous situation or circumstance such as by utilization of special skills and reputation, utilization of an influential relationship with customers, or utilization of its intangible property (as defined in § 1.482–4(b)). However, the renderer will not be considered peculiarly capable of rendering services unless the value of the services is substantially in excess of the costs or deductions of the renderer attributable to such services.

(iv) Services are an integral part of the business activity of a member of a controlled group where the recipient has received the benefit of a substantial amount of services from one or more related parties during its taxable year. For purposes of this paragraph (b)(7)(iv), services rendered by one or more related parties shall be considered substantial in amount if the total costs or deductions of the related party or parties rendering services to the recipient during its taxable year which are directly or indirectly related to such services exceed an amount equal to 25 percent of the total costs or deductions of the recipient during its taxable year. For purposes of the preceding sentence, the total costs or deductions of the recipient shall include the renderers' costs or deductions directly or indirectly related to the rendition of such services and shall exclude any amounts paid or accrued to the renderers by the recipient for such services and shall also exclude any amounts paid or accrued for materials the cost of which is properly reflected in the cost of goods sold of the recipient. At the option of the taxpayer, where the taxpayer establishes that the amount of the total costs or deductions of a recipient for the recipient's taxable year are abnormally low due to the commencement or cessation of an operation by the recipient, or other unusual circumstances of a nonrecurring nature, the costs or deductions referred to in the preceding two sentences shall be the total of such amount for the 3-year period immediately preceding the close of the taxable year of the recipient (or for the first 3 years of operation of the recipient if the recipient had been in operation for less than 3 years as of the close of the taxable year in which the services in issue were rendered).

(v) The principles of paragraphs (b)(7)(i) through (iv) of this section may be illustrated by the following examples:

Example 1. Y is engaged in the business of selling merchandise and X, an entity related to Y, is a printing company regularly engaged in printing and mailing advertising literature for unrelated parties. X also prints circulars advertising Y's products, mails the circulars to potential customers of Y, and in addition, performs the art work involved in the preparation of the circulars. Since the printing, mailing, and art work services rendered by X to Y are similar to the printing and mailing services rendered by X as X's trade or business, the services rendered to Y are an integral part of the business activity of X as described in paragraph (b)(7)(i) of this section.

Example 2. V, W, X, and Y are members of the same group of controlled entities. Each member of the group files a separate income tax return. X renders wrecking services to V, W, and Y, and, in addition, sells building materials to unrelated parties. The total costs or deductions incurred by X for the taxable year (exclusive of amounts properly reflected in the cost of goods sold of X) are $4 million. The total costs or deductions of X for the taxable year which are directly or indirectly related to the services rendered to V, W, and Y are $650,000. Since $650,000 is less than 25 percent of the total costs or deductions of X (exclusive of amounts properly reflected in the cost of goods sold of X) for the taxable year ($4,000,000 * 25% = $1,000,000), the services rendered by X to V, W, and Y will not be considered one of X's principal activities within the meaning of paragraph (b)(7)(ii) of this section.

Example 3. Assume the same facts as in *Example 2,* except that the total costs or deductions of X for the taxable year which are directly or indirectly related to the services rendered to V, W, and Y are $1,800,000. Assume in addition, that there is a high risk of loss involved in the rendition of the wrecking services by X, that X has a large investment in the wrecking equipment, and that a substantial amount of X's time is devoted to the rendition of wrecking services to V, W, and Y. Since $1,800,000 is greater than 25 percent of the total costs or deductions of X for the taxable year (exclusive of amounts properly reflected in the cost of goods sold of X), i.e., $1 million, the services rendered by X to V, W, and Y will not be automatically excluded from classification as one of the principal activities of X as in *Example 2,* and consideration must be given to the facts and circumstances of the particular case. Based on the facts and circumstances in this case, X would be considered to render wrecking services to related parties as one of its principal activities. Thus, the wrecking services are an integral part of the business activity of X as described in paragraph (b)(7)(ii) of this section.

Example 4. Z is a domestic corporation and has several foreign subsidiaries. Z and X, a domestic subsidiary of Z, have exercised the privilege granted under section 1501 to file a consolidated return and, therefore, constitute a *consolidated group* within the meaning of paragraph (b)(7)(ii)(C) of this section. Pursuant to paragraph (b)(7)(ii)(C) of this section, the taxpayer treats X and Z as the renderer. The sole function of X is to provide accounting, billing, communication, and travel services to the foreign subsidiaries of Z. Z also provides some other services for the benefit of its foreign subsidiaries. The total costs or deductions of X and Z related to the services rendered for the benefit of the foreign subsidiaries is $750,000. Of that amount, $710,000 represents the costs of X, which are X's total operating costs. The total costs or deductions of X and Z for the taxable year with respect to their operations (exclusive of amounts properly reflected in the cost of goods sold of X and Z) is $6,500,000. Since the total costs or deductions related to the services rendered to the foreign subsidiaries ($750,000) is less than 25 percent of the total costs or deductions of X and Z (exclusive of amounts properly reflected in the costs of goods sold of X or Z) in the aggregate ($6,500,000 * 25% = $1,625,000), the services rendered by X and Z to the foreign subsidiaries will not be considered one of the principal activities of X and Z within the meaning of paragraph (b)(7)(ii) of this section.

Example 5. Assume the same facts as in *Example 4,* except that all the communication services rendered for the benefit of the foreign subsidiaries are rendered by X and that Z renders communication services to unrelated parties as part of its trade or business. X is regularly engaged in rendering communication services to foreign subsidiaries and devotes a substantial amount of its time to this activity. The costs or deductions of X related to the rendition of the communication services to the foreign subsidiaries are $355,000. By application of the paragraph (b)(7)(ii)(C) of this section, the services provided by X and Z to related entities other than the communication services will not be considered one of the principal activities of X and Z. However, since Z renders communication services to unrelated parties as a part of its trade or business, the communication services rendered by X to the foreign subsidiaries will be subject to the provisions of paragraph (b)(7)(ii) of this section without regard to paragraph (b)(7)(ii)(C) of this section. Since the costs or deductions of X related to the rendition of the communication services ($355,000) are in excess of 25 percent of the total costs or deductions of X (exclusive of amounts properly reflected in the cost of goods sold of X) for the taxable year ($710,000 * 25% = $177,500), the determination of whether X renders the communication services as one of its principal activities will depend on the particular facts and circumstances. The given facts and circumstances indicate that X renders the communication services as one of its principal activities.

Example 6. X and Y are members of the same group of controlled entities. Y produces and sells product D. As a part of the production process, Y sends materials to X who converts the materials into component parts. This conversion activity constitutes only a portion of X's operations. X then ships the component parts back to Y who assembles them (along with other components) into the finished product for sale to unrelated parties. Since the services rendered by X to Y constitute a manufacturing activity, the 25-percent test in paragraph (b)(7)(ii) of this section does not apply.

Example 7. X and Y are members of the same group of controlled entities. X manufactures product D for distribution and sale in the United States, Canada, and Mexico. Y manufactures product D for distribution and sale in South and Central America. Due to a breakdown of machinery, Y is forced to cease its manufacturing operations for a 1-month period. In order to meet demand for product D during the shutdown period, Y sends partially finished goods to X. X, for that period, completes the manufacture of product D for Y and ships the finished product back to Y. The costs or deductions of X related to the manufacturing services rendered to Y are $750,000. The total costs or deductions of X are $24,000,000. Since the services in issue constitute a manufacturing activity, the 25-percent test in paragraph (b)(7)(ii) of this section does not apply. However, under these facts and circumstances, i.e., the insubstantiality of the services rendered to Y in relation to X's total operations, the lack of regularity with which the services are rendered, and the short duration for which the services are rendered, X's rendition of manufacturing services to Y is not considered one of X's principal activities within the meaning of paragraph (b)(7)(ii) of this section.

Example 8. Assume the same facts as in *Example 7,* except that, instead of temporarily ceasing operations, Y requests assistance from X in correcting the defects in the manufacturing equipment. In response, X sends a team of engineers to discover and correct the defects without the necessity of a shutdown. Although the services performed by the engineers were related to a manufacturing activity, the services are essentially supporting in nature and, therefore, do not constitute a manufacturing, production, extraction, or construction activity. Thus, the 25-percent test in paragraph (b)(7)(ii) of this section applies.

Example 9. X is a domestic manufacturing corporation. Y, a foreign subsidiary of X, has decided to construct a plant in Country A. In connection with the construction of Y's plant, X draws up the architectural plans for the plant, arranges the financing of the construction, negotiates with various Government authorities in Country A, invites bids from unrelated parties for several phases of construction, and negotiates, on Y's behalf, the contracts with unrelated parties who are retained to carry out certain phases of the construction. Although the unrelated parties retained by X for Y perform the physical construction, the aggregate services performed by X for Y are such that they, in themselves, constitute a construction activity. Thus, the 25-percent test in paragraph (b)(7)(ii) of this section does not apply with respect to such services.

Example 10. X and Y are members of the same group of controlled entities. X is a finance company engaged in financing automobile loans. In connection with such loans it requires the borrower to have life insurance in the amount of the loan. Although X's borrowers are not required to take out life insurance from any particular insurance company, at the same time that the loan agreement is being finalized, X's employees suggest that the borrower take out life insurance from Y, which is an agency for life insurance companies. Since there would be a delay in the processing of the loan if some other company were selected by the borrower, almost all of X's borrowers take out life insurance through Y. Because of this utilization of its influential relationship with its borrowers, X is peculiarly capable of rendering selling services to Y and, since a substantial amount of Y's business is derived from X's borrowers, such selling services are a principal element in the operation of Y's insurance business. In addition, the value of the services is substantially in excess of the costs incurred by X. Thus, the selling services rendered by X to Y are an integral part of the business activity of a member of the controlled group as described in paragraph (b)(7)(iii) of this section.

Example 11. X and Y are members of the same group of controlled entities. Y is a manufacturer of product E. In past years product E has not always operated properly because of imperfections present in the finished product. X owns an exclusive patented process by which such imperfections can be detected and removed prior to sale of the product, thereby greatly increasing the marketability of the product. In connection with its manufacturing operations Y sends its products to X for inspection which involves utilization of the patented process. The inspection of Y's products by X is not one of the principal activities of X. However, X is peculiarly capable of rendering the inspection services to Y because of its utilization of the patented process. Since this inspection greatly increases the marketability of product E it is extremely valuable. Such value is substantially in excess of the cost incurred by X in rendition of such services. Because of the impact of the inspection on sales, such services are a principal element in the operations of Y. Thus, the inspection services rendered by X to Y are an integral part of the business activity of a member of the controlled group as described in paragraph (b)(7)(iii) of this section.

Example 12. Assume the same facts as in *Example 11* except that Y owns the patented process for detecting the imperfections. Y, however, does not have the facilities to implement the inspection process. Therefore, Y sends its products to X for inspection which involves utilization of the patented process owned by Y. Since Y owns the patent, X is not peculiarly capable of rendering the inspection services to Y within the meaning of paragraph (b)(7)(iii) of this section.

Example 13. Assume the same facts as in *Example 12* except that X and Y both own interests in the patented process as a result of having developed the process pursuant to a bona fide cost sharing plan (within the meaning of §1.482–7T). Since Y owns the requisite interest in the patent, X is not peculiarly capable of rendering the inspection services to Y within the meaning of paragraph (b)(7)(iii) of this section.

Example 14. X and Y are members of the same group of controlled entities. X is a large manufacturing concern. X's accounting department has, for many years, maintained the financial records of Y, a distributor of X's products. Although X is able to render these accounting services more efficiently than others due to its thorough familiarity with the operations of Y, X is not peculiarly capable of rendering the accounting services to Y because such familiarity does not, in and of itself, constitute a particularly advantageous situation or circumstance within the meaning of paragraph (b)(7)(iii) of this section. Furthermore, under these circumstances, the accounting services are supporting in nature and, therefore, do not constitute a principal element in the operations of Y. Thus, the accounting services rendered by X to Y are not an integral part of the business activity of either X or Y within the meaning of paragraph (b)(7)(iii) of this section.

Example 15. (i) Corporations X, Y, and Z are members of the same group of controlled entities. X is a manufacturer, and Y and Z are distributors of X's products. X provides a variety of services to Y including billing, shipping, accounting, and other general and administrative services. During Y's taxable year, on several occasions, Z renders selling and other promotional services to Y. None of the services rendered to Y constitute one of the principal activities of any of the renderers within the meaning of paragraph (b)(7)(ii) of this section. Y's total costs and deductions for Y's taxable year (exclusive of amounts paid to X and Z for services rendered and amounts paid for goods purchased for resale) are $1,600,000. The total direct and indirect costs of X and Z for services rendered to Y during Y's taxable year are as follows:

Services provided by X:	
Billing	$50,000
Shipping	250,000
Accounting	150,000
Other	200,000
Services provided by Z:	
Selling	500,000
Total Costs	1,150,000

(ii) Since the total costs or deductions of X and Z related to the rendition of services to Y exceed the amount equal to 25 percent of the total costs or deductions of Y (exclusive of amounts paid to X and Z for the services rendered and amounts paid for goods purchased for resale) plus the total costs or deductions of X and Z related to the rendition of services to Y ($1,150,000 ÷ [$1,600,000 + $1,150,000] = 41.8%), the services rendered by X and Z to Y are substantial within the meaning of paragraph (b)(7)(iv) of this section. Thus, the services rendered by X and Z to Y are an integral part of the business activity of Y as described in paragraph (b)(7)(iv) of this section.

Example 16. Assume the same facts as in *Example 15*, except that the taxpayer establishes that, due to a major change in the operations of Y, Y's total costs or deductions for Y's taxable year were abnormally low. Y has always used the calendar year as its taxable year. Y's total costs and deductions for the 2 years immediately preceding the taxable year in issue (exclusive of amounts paid to X and Z for services rendered and amounts paid for goods purchased for resale) were $6 million and $6,200,000 respectively. The total direct and indirect costs of X and Z for services rendered to Y were $1,150,000 for each of the 3 years. Applying the same formula to the costs or deductions for the 3 years immediately preceding the close of the taxable year in issue, the costs or deductions of X and Z related to the rendition of services to Y (3 * $1,150,000=$3,450,000) amount to 20 percent of the sum of the total costs or deductions of Y (exclusive of amounts paid to X and Z for the services rendered and amounts paid for goods purchased for resale) plus the total costs or deductions of X and Z related to the rendition of services to Y ($3,450,000 $1,600,000 + $6,000,000 + $6,200,000 + $3,450,000=20%). If the taxpayer chooses to use the 3-year period, the services rendered by X and Z to Y are not substantial within the meaning of paragraph (b)(7)(iv) of this section. Thus, the services will not be an integral part of the business activity of a member of the controlled group as described in paragraph (b)(7)(iv) of this section.

(8) *Services rendered in connection with the transfer of property.* Where tangible or intangible property is transferred, sold, assigned, loaned, leased, or otherwise made available in any manner by one member of a group to another member of the group and services are rendered by the transferor to the transferee in connection with the transfer, the amount of any allocation that may

be appropriate with respect to such transfer shall be determined in accordance with the rules of paragraph (c) of this section, or §§ 1.482–3 or 1.482–4, whichever is appropriate and a separate allocation with respect to such services under this paragraph shall not be made. Services are rendered in connection with the transfer of property where such services are merely ancillary and subsidiary to the transfer of the property or to the commencement of effective use of the property by the transferee. Whether or not services are merely ancillary and subsidiary to a property transfer is a question of fact. Ancillary and subsidiary services could be performed, for example, in promoting the transaction by demonstrating and explaining the use of the property, or by assisting in the effective starting-up of the property transferred, or by performing under a guarantee relating to such effective starting-up. Thus, where an employee of one member of a group, acting under the instructions of his employer, reveals a valuable secret process owned by his employer to a related entity, and at the same time supervises the integration of such process into the manufacturing operation of the related entity, such services could be considered to be rendered in connection with the transfer, and, if so considered, shall not be the basis for a separate allocation. However, if the employee continues to render services to the related entity by supervising the manufacturing operation after the secret process has been effectively integrated into such operation, a separate allocation with respect to such additional services may be made in accordance with the rules of this paragraph.

(c) *Use of tangible property*—(1) *General rule.* Where possession, use, or occupancy of tangible property owned or leased by one member of a group of controlled entities (referred to in this paragraph as the owner) is transferred by lease or other arrangement to another member of such group (referred to in this paragraph as the user) without charge or at a charge which is not equal to an arm's length rental charge (as defined in paragraph (c)(2)(i) of this section) the district director may make appropriate allocations to properly reflect such arm's length charge. Where possession, use, or occupancy of only a portion of such property is transferred, the determination of the arm's length charge and the allocation shall be made with reference to the portion transferred.

(2) *Arm's length charge*—(i) *In general.* For purposes of paragraph (c) of this section, an arm's length rental charge shall be the amount of rent which was charged, or would have been charged for the use of the same or similar property, during the time it was in use, in independent transactions with or between unrelated parties under similar circumstances considering the period and location of the use, the owner's investment in the property or rent paid for the property, expenses of maintaining the property, the type of property involved, its condition, and all other relevant facts.

(ii) *Safe haven rental charge.* See § 1.482–2(c)(2)(ii) (26 CFR Part 1 revised as of April 1, 1985), for the determination of safe haven rental charges in the case of certain leases entered into before May 9, 1986, and for leases entered into before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(iii) *Subleases*—(A) Except as provided in paragraph (c)(2)(iii)(B) of this section, where possession, use, or occupancy of tangible property, which is leased by the owner (lessee) from an unrelated party is transferred by sublease or other arrangement to the user, an arm's length rental charge shall be considered to be equal to all the deductions claimed by the owner (lessee) which are attributable to the property for the period such property is used by the user. Where only a portion of such property was transferred, any allocations shall be made with reference to the portion transferred. The deductions to be considered include the rent paid or accrued by the owner (lessee) during the period of use and all other deductions directly and indirectly connected with the property paid or accrued by the owner (lessee) during such period. Such deductions include deductions for maintenance and repair, utilities, management and other similar deductions.

(B) The provisions of paragraph (c)(2)(iii)(A) of this section shall not apply if either—

(*1*) The taxpayer establishes a more appropriate rental charge under the general rule set forth in paragraph (c)(2)(i) of this section; or

(*2*) During the taxable year, the owner (lessee) or the user was regularly engaged in the trade or business of renting property of the same general type as the property in question to unrelated persons.

(d) *Transfer of property.* For rules governing allocations under section 482 to reflect an arm's length consideration for controlled transactions involving the transfer of property, see §§1.482–3 through 1.482–6.

[T.D. 8552, 59 FR 35002, July 8, 1994; 60 FR 16381, 16382, Mar. 30, 1995]

§1.482–3 Methods to determine taxable income in connection with a transfer of tangible property.

(a) *In general.* The arm's length amount charged in a controlled transfer of tangible property must be determined under one of the six methods listed in this paragraph (a). Each of the methods must be applied in accordance with all of the provisions of §1.482–1, including the best method rule of §1.482–1(c), the comparability analysis of §1.482–1(d), and the arm's length range of §1.482–1(e). The methods are—

(1) The comparable uncontrolled price method, described in paragraph (b) of this section;

(2) The resale price method, described in paragraph (c) of this section;

(3) The cost plus method, described in paragraph (d) of this section;

(4) The comparable profits method, described in §1.482–5;

(5) The profit split method, described in §1.482–6; and

(6) Unspecified methods, described in paragraph (e) of this section.

(b) *Comparable uncontrolled price method*—(1) *In general.* The comparable uncontrolled price method evaluates whether the amount charged in a controlled transaction is arm's length by reference to the amount charged in a comparable uncontrolled transaction.

(2) *Comparability and reliability considerations*—(i) *In general.* Whether results derived from applications of this method are the most reliable measure of the arm's length result must be determined using the factors described under the best method rule in §1.482–1(c). The application of these factors under the comparable uncontrolled price method is discussed in paragraph (b)(2)(ii) and (iii) of this section.

(ii) *Comparability*—(A) *In general.* The degree of comparability between controlled and uncontrolled transactions is determined by applying the provisions of §1.482–1(d). Although all of the factors described in §1.482–1(d)(3) must be considered, similarity of products generally will have the greatest effect on comparability under this method. In addition, because even minor differences in contractual terms or economic conditions could materially affect the amount charged in an uncontrolled transaction, comparability under this method depends on close similarity with respect to these factors, or adjustments to account for any differences. The results derived from applying the comparable uncontrolled price method generally will be the most direct and reliable measure of an arm's length price for the controlled transaction if an uncontrolled transaction has no differences with the controlled transaction that would affect the price, or if there are only minor differences that have a definite and reasonably ascertainable effect on price and for which appropriate adjustments are made. If such adjustments cannot be made, or if there are more than minor differences between the controlled and uncontrolled transactions, the comparable uncontrolled price method may be used, but the reliability of the results as a measure of the arm's length price will be reduced. Further, if there are material product differences for which reliable adjustments cannot be made, this method ordinarily will not provide a reliable measure of an arm's length result.

(B) *Adjustments for differences between controlled and uncontrolled transactions.* If there are differences between the controlled and uncontrolled transactions that would affect price, adjustments should be made to the price of the uncontrolled transaction according to the comparability provisions of §1.482–1(d)(2). Specific examples of the factors that may be particularly relevant to this method include—

(*1*) Quality of the product;

(*2*) Contractual terms (e.g., scope and terms of warranties provided, sales or purchase volume, credit terms, transport terms);

(*3*) Level of the market (i.e., wholesale, retail, etc.);

(*4*) Geographic market in which the transaction takes place;

(*5*) Date of the transaction;

(*6*) Intangible property associated with the sale;

(*7*) Foreign currency risks; and

(*8*) Alternatives realistically available to the buyer and seller.

(iii) *Data and assumptions.* The reliability of the results derived from the comparable uncontrolled price method is affected by the completeness and accuracy of the data used and the reliability of the assumptions made to apply the method. See § 1.482–1(c) (Best method rule).

(3) *Arm's length range.* See § 1.482–1(e)(2) for the determination of an arm's length range.

(4) *Examples.* The principles of this paragraph (b) are illustrated by the following examples.

Example 1 Comparable Sales of Same Product. USM, a U.S. manufacturer, sells the same product to both controlled and uncontrolled distributors. The circumstances surrounding the controlled and uncontrolled transactions are substantially the same, except that the controlled sales price is a delivered price and the uncontrolled sales are made f.o.b. USM's factory. Differences in the contractual terms of transportation and insurance generally have a definite and reasonably ascertainable effect on price, and adjustments are made to the results of the uncontrolled transaction to account for such differences. No other material difference has been identified between the controlled and uncontrolled transactions. Because USM sells in both the controlled and uncontrolled transactions, it is likely that all material differences between the two transactions have been identified. In addition, because the comparable uncontrolled price method is applied to an uncontrolled comparable with no product differences, and there are only minor contractual differences that have a definite and reasonably ascertainable effect on price, the results of this application of the comparable uncontrolled price method will provide the most direct and reliable measure of an arm's length result. See § 1.482–3(b)(2)(ii)(A).

Example 2 Effect of Trademark. The facts are the same as in *Example 1,* except that USM affixes its valuable trademark to the property sold in the controlled transactions, but does not affix its trademark to the property sold in the uncontrolled transactions. Under the facts of this case, the effect on price of the trademark is material and cannot be reliably estimated. Because there are material product differences for which reliable adjustments cannot be made, the comparable uncontrolled price method is unlikely to provide a reliable measure of the arm's length result. See § 1.482–3(b)(2)(ii)(A).

Example 3 Minor Product Differences. The facts are the same as in *Example 1,* except that USM, which manufactures business machines, makes minor modifications to the physical properties of the machines to satisfy specific requirements of a customer in controlled sales, but does not make these modifications in uncontrolled sales. If the minor physical differences in the product have a material effect on prices, adjustments to account for these differences must be made to the results of the uncontrolled transactions according to the provisions of § 1.482- 1(d)(2), and such adjusted results may be used as a measure of the arm's length result.

Example 4 Effect of Geographic Differences. FM, a foreign specialty radio manufacturer, sells its radios to a controlled U.S. distributor, AM, that serves the West Coast of the United States. FM sells its radios to uncontrolled distributors to serve other regions in the United States. The product in the controlled and uncontrolled transactions is the same, and all other circumstances surrounding the controlled and uncontrolled transactions are substantially the same, other than the geographic differences. If the geographic differences are unlikely to have a material effect on price, or they have definite and reasonably ascertainable effects for which adjustments are made, then the adjusted results of the uncontrolled sales may be used under the comparable uncontrolled price method to establish an arm's length range pursuant to § 1.482–1(e)(2)(iii)(A). If the effects of the geographic differences would be material but cannot be reliably ascertained, then the reliability of the results will be diminished. However, the comparable uncontrolled price method may still provide the most reliable measure of an arm's length result, pursuant to the best method rule of § 1.482–1(c), and, if so, an arm's length range may be established pursuant to § 1.482–1(e)(2)(iii)(B).

(5) *Indirect evidence of comparable uncontrolled transactions*—(i) *In general.* A comparable uncontrolled price may be

derived from data from public exchanges or quotation media, but only if the following requirements are met—

(A) The data is widely and routinely used in the ordinary course of business in the industry to negotiate prices for uncontrolled sales;

(B) The data derived from public exchanges or quotation media is used to set prices in the controlled transaction in the same way it is used by uncontrolled taxpayers in the industry; and

(C) The amount charged in the controlled transaction is adjusted to reflect differences in product quality and quantity, contractual terms, transportation costs, market conditions, risks borne, and other factors that affect the price that would be agreed to by uncontrolled taxpayers.

(ii) *Limitation.* Use of data from public exchanges or quotation media may not be appropriate under extraordinary market conditions.

(iii) *Examples.* The following examples illustrate this paragraph (b)(5).

Example 1 Use of Quotation Medium. (i) On June 1, USOil, a United States corporation, enters into a contract to purchase crude oil from its foreign subsidiary, FS, in Country Z. USOil and FS agree to base their sales price on the average of the prices published for that crude in a quotation medium in the five days before August 1, the date set for delivery. USOil and FS agree to adjust the price for the particular circumstances of their transactions, including the quantity of the crude sold, contractual terms, transportation costs, risks borne, and other factors that affect the price.

(ii) The quotation medium used by USOil and FS is widely and routinely used in the ordinary course of business in the industry to establish prices for uncontrolled sales. Because USOil and FS use the data to set their sales price in the same way that unrelated parties use the data from the quotation medium to set their sales prices, and appropriate adjustments were made to account for differences, the price derived from the quotation medium used by USOil and FS to set their transfer prices will be considered evidence of a comparable uncontrolled price.

Example 2 Extraordinary Market Conditions. The facts are the same as in *Example 1,* except that before USOil and FS enter into their contract, war breaks out in Countries X and Y, major oil producing countries, causing significant instability in world petroleum markets. As a result, given the significant instability in the price of oil, the prices listed on the quotation medium may not reflect a reliable measure of an arm's length result. See §1.482–3(b)(5)(ii).

(c) *Resale price method*—(1) *In general.* The resale price method evaluates whether the amount charged in a controlled transaction is arm's length by reference to the gross profit margin realized in comparable uncontrolled transactions. The resale price method measures the value of functions performed, and is ordinarily used in cases involving the purchase and resale of tangible property in which the reseller has not added substantial value to the tangible goods by physically altering the goods before resale. For this purpose, packaging, repackaging, labelling, or minor assembly do not ordinarily constitute physical alteration. Further the resale price method is not ordinarily used in cases where the controlled taxpayer uses its intangible property to add substantial value to the tangible goods.

(2) *Determination of arm's length price*—(i) *In general.* The resale price method measures an arm's length price by subtracting the appropriate gross profit from the applicable resale price for the property involved in the controlled transaction under review.

(ii) *Applicable resale price.* The applicable resale price is equal to either the resale price of the particular item of property involved or the price at which contemporaneous resales of the same property are made. If the property purchased in the controlled sale is resold to one or more related parties in a series of controlled sales before being resold in an uncontrolled sale, the applicable resale price is the price at which the property is resold to an uncontrolled party, or the price at which contemporaneous resales of the same property are made. In such case, the determination of the appropriate gross profit will take into account the functions of all members of the group participating in the series of controlled sales and final uncontrolled resales, as well as any other relevant factors described in §1.482–1(d)(3).

(iii) *Appropriate gross profit.* The appropriate gross profit is computed by multiplying the applicable resale price by the gross profit margin (expressed as a percentage of total revenue derived from sales) earned in comparable uncontrolled transactions.

(iv) *Arm's length range.* See § 1.482–1(e)(2) for determination of the arm's length range.

(3) *Comparability and reliability considerations*—(i) *In general.* Whether results derived from applications of this method are the most reliable measure of the arm's length result must be determined using the factors described under the best method rule in § 1.482–1(c). The application of these factors under the resale price method is discussed in paragraphs (c)(3) (ii) and (iii) of this section.

(ii) *Comparability*—(A) *Functional comparability.* The degree of comparability between an uncontrolled transaction and a controlled transaction is determined by applying the comparability provisions of § 1.482–1(d). A reseller's gross profit provides compensation for the performance of resale functions related to the product or products under review, including an operating profit in return for the reseller's investment of capital and the assumption of risks. Therefore, although all of the factors described in § 1.482–1(d)(3) must be considered, comparability under this method is particularly dependent on similarity of functions performed, risks borne, and contractual terms, or adjustments to account for the effects of any such differences. If possible, appropriate gross profit margins should be derived from comparable uncontrolled purchases and resales of the reseller involved in the controlled sale, because similar characteristics are more likely to be found among different resales of property made by the same reseller than among sales made by other resellers. In the absence of comparable uncontrolled transactions involving the same reseller, an appropriate gross profit margin may be derived from comparable uncontrolled transactions of other resellers.

(B) *Other comparability factors.* Comparability under this method is less dependent on close physical similarity between the products transferred than under the comparable uncontrolled price method. For example, distributors of a wide variety of consumer durables might perform comparable distribution functions without regard to the specific durable goods distributed. Substantial differences in the products may, however, indicate significant functional differences between the controlled and uncontrolled taxpayers. Thus, it ordinarily would be expected that the controlled and uncontrolled transactions would involve the distribution of products of the same general type (e.g., consumer electronics). Furthermore, significant differences in the value of the distributed goods due, for example, to the value of a trademark, may also affect the reliability of the comparison. Finally, the reliability of profit measures based on gross profit may be adversely affected by factors that have less effect on prices. For example, gross profit may be affected by a variety of other factors, including cost structures (as reflected, for example, in the age of plant and equipment), business experience (such as whether the business is in a start-up phase or is mature), or management efficiency (as indicated, for example, by expanding or contracting sales or executive compensation over time). Accordingly, if material differences in these factors are identified based on objective evidence, the reliability of the analysis may be affected.

(C) *Adjustments for differences between controlled and uncontrolled transactions.* If there are material differences between the controlled and uncontrolled transactions that would affect the gross profit margin, adjustments should be made to the gross profit margin earned with respect to the uncontrolled transaction according to the comparability provisions of § 1.482–1(d)(2). For this purpose, consideration of operating expenses associated with functions performed and risks assumed may be necessary, because differences in functions performed are often reflected in operating expenses. If there are differences in functions performed, however, the effect on gross profit of such differences is not necessarily equal to the differences in the amount of related operating expenses. Specific examples of the factors that may be particularly relevant to this method include—

(*1*) Inventory levels and turnover rates, and corresponding risks, including any price protection programs offered by the manufacturer;

(*2*) Contractual terms (e.g., scope and terms of warranties provided, sales or purchase volume, credit terms, transport terms);

(*3*) Sales, marketing, advertising programs and services, (including promotional programs, rebates, and co-op advertising);

(*4*) The level of the market (e.g., wholesale, retail, etc.); and

(*5*) Foreign currency risks.

(D) *Sales agent.* If the controlled taxpayer is comparable to a sales agent that does not take title to goods or otherwise assume risks with respect to ownership of such goods, the commission earned by such sales agent, expressed as a percentage of the uncontrolled sales price of the goods involved, may be used as the comparable gross profit margin.

(iii) *Data and assumptions*—(A) *In general.* The reliability of the results derived from the resale price method is affected by the completeness and accuracy of the data used and the reliability of the assumptions made to apply this method. See §1.482–1(c) (Best method rule).

(B) *Consistency in accounting.* The degree of consistency in accounting practices between the controlled transaction and the uncontrolled comparables that materially affect the gross profit margin affects the reliability of the result. Thus, for example, if differences in inventory and other cost accounting practices would materially affect the gross profit margin, the ability to make reliable adjustments for such differences would affect the reliability of the results. Further, the controlled transaction and the uncontrolled comparable should be consistent in the reporting of items (such as discounts, returns and allowances, rebates, transportation costs, insurance, and packaging) between cost of goods sold and operating expenses.

(4) *Examples.* The following examples illustrate the principles of this paragraph (c).

Example 1. A controlled taxpayer sells property to another member of its controlled group that resells the property in uncontrolled sales. There are no changes in the beginning and ending inventory for the year under review. Information regarding an uncontrolled comparable is sufficiently complete to conclude that it is likely that all material differences between the controlled and uncontrolled transactions have been identified and adjusted for. If the applicable resale price of the property involved in the controlled sale is $100 and the appropriate gross profit margin is 20%, then an arm's length result of the controlled sale is a price of $80 ($100 minus (20%×$100)).

Example 2. (i) S, a U.S. corporation, is the exclusive distributor for FP, its foreign parent. There are no changes in the beginning and ending inventory for the year under review. S's total reported cost of goods sold is $800, consisting of $600 for property purchased from FP and $200 of other costs of goods sold incurred to unrelated parties. S's applicable resale price and reported gross profit are as follows:

Applicable resale price	$1000
Cost of goods sold:	
Cost of purchases from FP ...	600
Costs incurred to unrelated parties	200
Reported gross profit	200

(ii) The district director determines that the appropriate gross profit margin is 25%. Therefore, S's appropriate gross profit is $250 (i.e., 25% of the applicable resale price of $1000). Because S is incurring costs of sales to unrelated parties, an arm's length price for property purchased from FP must be determined under a two-step process. First, the appropriate gross profit ($250) is subtracted from the applicable resale price ($1000). The resulting amount ($750) is then reduced by the costs of sales incurred to unrelated parties ($200). Therefore, an arm's length price for S's cost of sales of FP's product in this case equals $550 (i.e., $750 minus $200).

Example 3. FP, a foreign manufacturer, sells Product to USSub, its U.S. subsidiary, which in turn sells Product to its domestic affiliate Sister. Sister sells Product to unrelated buyers. In this case, the applicable resale price is the price at which Sister sells Product in uncontrolled transactions. The determination of the appropriate gross profit margin for the sale from FP to USSub will take into account the functions performed by USSub and Sister, as well as other relevant factors described in §1.482–1(d)(3).

Example 4. USSub, a U.S. corporation, is the exclusive distributor of widgets for its foreign parent. To determine whether the gross profit margin of 25% earned by USSub is an arm's length result, the district director considers applying the resale price method. There are several uncontrolled distributors that perform similar functions under similar circumstances in uncontrolled transactions. However, the uncontrolled distributors treat certain costs such as discounts and insurance as cost of goods sold, while USSub treats such costs as operating expenses. In such cases, accounting reclassifications, pursuant to § 1.482–3(c)(3)(iii)(B), must be made to ensure consistent treatment of such material items. Inability to make such accounting reclassifications will decrease the reliability of the results of the uncontrolled transactions.

Example 5. (i) USP, a U.S. corporation, manufactures Product X, an unbranded widget, and sells it to FSub, its wholly owned foreign subsidiary. FSub acts as a distributor of Product X in country M, and sells it to uncontrolled parties in that country. Uncontrolled distributors A, B, C, D, and E distribute competing products of approximately similar value in country M. All such products are unbranded.

(ii) Relatively complete data is available regarding the functions performed and risks borne by the uncontrolled distributors and the contractual terms under which they operate in the uncontrolled transactions. In addition, data is available to ensure accounting consistency between all of the uncontrolled distributors and FSub. Because the available data is sufficiently complete and accurate to conclude that it is likely that all material differences between the controlled and uncontrolled transactions have been identified, such differences have a definite and reasonably ascertainable effect, and reliable adjustments are made to account for such differences, the results of each of the uncontrolled distributors may be used to establish an arm's length range pursuant to § 1.482–1(e)(2)(iii)(A).

Example 6. The facts are the same as *Example 5,* except that sufficient data is not available to determine whether any of the uncontrolled distributors provide warranties or to determine the payment terms of the contracts. Because differences in these contractual terms could materially affect price or profits, the inability to determine whether these differences exist between the controlled and uncontrolled transactions diminishes the reliability of the results of the uncontrolled comparables. However, the reliability of the results may be enhanced by the application of a statistical method when establishing an arm's length range pursuant to § 1.482–1(e)(2)(iii)(B).

Example 7. The facts are the same as in *Example 5,* except that Product X is branded with a valuable trademark that is owned by P. A, B, and C distribute unbranded competing products, while D and E distribute products branded with other trademarks. D and E do not own any rights in the trademarks under which their products are sold. The value of the products that A, B, and C sold are not similar to the value of the products sold by S. The value of products sold by D and E, however, is similar to that of Product X. Although close product similarity is not as important for a reliable application of the resale price method as for the comparable uncontrolled price method, significant differences in the value of the products involved in the controlled and uncontrolled transactions may affect the reliability of the results. In addition, because in this case it is difficult to determine the effect the trademark will have on price or profits, reliable adjustments for the differences cannot be made. Because D and E have a higher level of comparability than A, B, and C with respect to S, pursuant to § 1.482–1(e)(2)(ii), only D and E may be included in an arm's length range.

(d) *Cost plus method*—(1) *In general.* The cost plus method evaluates whether the amount charged in a controlled transaction is arm's length by reference to the gross profit markup realized in comparable uncontrolled transactions. The cost plus method is ordinarily used in cases involving the manufacture, assembly, or other production of goods that are sold to related parties.

(2) *Determination of arm's length price*—(i) *In general.* The cost plus method measures an arm's length price by adding the appropriate gross profit to the controlled taxpayer's costs of producing the property involved in the controlled transaction.

(ii) *Appropriate gross profit.* The appropriate gross profit is computed by multiplying the controlled taxpayer's cost of producing the transferred property by the gross profit markup, expressed as a percentage of cost, earned in comparable uncontrolled transactions.

(iii) *Arm's length range.* See § 1.482–1(e)(2) for determination of an arm's length range.

(3) *Comparability and reliability considerations*—(i) *In general.* Whether results derived from the application of this method are the most reliable measure of the arm's length result must be determined using the factors described under the best method rule in § 1.482–1(c).

(ii) *Comparability*—(A) *Functional comparability.* The degree of comparability between controlled and uncontrolled transactions is determined by applying the comparability provisions of § 1.482–1(d). A producer's gross profit provides compensation for the performance of the production functions related to the product or products under review, including an operating profit for the producer's investment of capital and assumption of risks. Therefore, although all of the factors described in §1.482–1(d)(3) must be considered, comparability under this method is particularly dependent on similarity of functions performed, risks borne, and contractual terms, or adjustments to account for the effects of any such differences. If possible, the appropriate gross profit markup should be derived from comparable uncontrolled transactions of the taxpayer involved in the controlled sale, because similar characteristics are more likely to be found among sales of property by the same producer than among sales by other producers. In the absence of such sales, an appropriate gross profit markup may be derived from comparable uncontrolled sales of other producers whether or not such producers are members of the same controlled group.

(B) *Other comparability factors.* Comparability under this method is less dependent on close physical similarity between the products transferred than under the comparable uncontrolled price method. Substantial differences in the products may, however, indicate significant functional differences between the controlled and uncontrolled taxpayers. Thus, it ordinarily would be expected that the controlled and uncontrolled transactions involve the production of goods within the same product categories. Furthermore, significant differences in the value of the products due, for example, to the value of a trademark, may also affect the reliability of the comparison. Finally, the reliability of profit measures based on gross profit may be adversely affected by factors that have less effect on prices. For example, gross profit may be affected by a variety of other factors, including cost structures (as reflected, for example, in the age of plant and equipment), business experience (such as whether the business is in a start-up phase or is mature), or management efficiency (as indicated, for example, by expanding or contracting sales or executive compensation over time). Accordingly, if material differences in these factors are identified based on objective evidence, the reliability of the analysis may be affected.

(C) *Adjustments for differences between controlled and uncontrolled transactions.* If there are material differences between the controlled and uncontrolled transactions that would affect the gross profit markup, adjustments should be made to the gross profit markup earned in the comparable uncontrolled transaction according to the provisions of §1.482–1(d)(2). For this purpose, consideration of the operating expenses associated with the functions performed and risks assumed may be necessary, because differences in functions performed are often reflected in operating expenses. If there are differences in functions performed, however, the effect on gross profit of such differences is not necessarily equal to the differences in the amount of related operating expenses. Specific examples of the factors that may be particularly relevant to this method include—

(*1*) The complexity of manufacturing or assembly;

(*2*) Manufacturing, production, and process engineering;

(*3*) Procurement, purchasing, and inventory control activities;

(*4*) Testing functions;

(*5*) Selling, general, and administrative expenses;

(*6*) Foreign currency risks; and

(*7*) Contractual terms (e.g., scope and terms of warranties provided, sales or purchase volume, credit terms, transport terms).

(D) *Purchasing agent.* If a controlled taxpayer is comparable to a purchasing agent that does not take title to property or otherwise assume risks with respect to ownership of such goods, the commission earned by such purchasing agent, expressed as a percentage of the purchase price of the goods, may be used as the appropriate gross profit markup.

(iii) *Data and assumptions*—(A) *In general.* The reliability of the results derived from the cost plus method is affected by the completeness and accuracy of the data used and the reliability of the assumptions made to apply this method. See §1.482–1(c) (Best method rule).

(B) *Consistency in accounting.* The degree of consistency in accounting practices between the controlled transaction and the uncontrolled comparables that materially affect the gross profit markup affects the reliability of the result. Thus, for example, if differences in inventory and other cost accounting practices would materially affect the gross profit markup, the ability to make reliable adjustments for such differences would affect the reliability of the results. Further, the controlled transaction and the comparable uncontrolled transaction should be consistent in the reporting of costs between cost of goods sold and operating expenses. The term *cost of producing* includes the cost of acquiring property that is held for resale.

(4) *Examples.* The following examples illustrate the principles of this paragraph (d).

Example 1. (i) USP, a domestic manufacturer of computer components, sells its products to FS, its foreign distributor. UT1, UT2, and UT3 are domestic computer component manufacturers that sell to uncontrolled foreign purchasers.

(ii) Relatively complete data is available regarding the functions performed and risks borne by UT1, UT2, and UT3, and the contractual terms in the uncontrolled transactions. In addition, data is available to ensure accounting consistency between all of the uncontrolled manufacturers and USP. Because the available data is sufficiently complete to conclude that it is likely that all material differences between the controlled and uncontrolled transactions have been identified, the effect of the differences are definite and reasonably ascertainable, and reliable adjustments are made to account for the differences, an arm's length range can be established pursuant to § 1.482–1(e)(2)(iii)(A).

Example 2. The facts are the same as in *Example 1,* except that USP accounts for supervisory, general, and administrative costs as operating expenses, which are not allocated to its sales to FS. The gross profit markups of UT1, UT2, and UT3, however, reflect supervisory, general, and administrative expenses because they are accounted for as costs of goods sold. Accordingly, the gross profit markups of UT1, UT2, and UT3 must be adjusted as provided in paragraph (d)(3)(iii)(B) of this section to provide accounting consistency. If data is not sufficient to determine whether such accounting differences exist between the controlled and uncontrolled transactions, the reliability of the results will be decreased.

Example 3. The facts are the same as in *Example 1,* except that under its contract with FS, USP uses materials consigned by FS. UT1, UT2, and UT3, on the other hand, purchase their own materials, and their gross profit markups are determined by including the costs of materials. The fact that USP does not carry an inventory risk by purchasing its own materials while the uncontrolled producers carry inventory is a significant difference that may require an adjustment if the difference has a material effect on the gross profit markups of the uncontrolled producers. Inability to reasonably ascertain the effect of the difference on the gross profit markups will affect the reliability of the results of UT1, UT2, and UT3.

Example 4. (i) FS, a foreign corporation, produces apparel for USP, its U.S. parent corporation. FS purchases its materials from unrelated suppliers and produces the apparel according to designs provided by USP. The district director identifies 10 uncontrolled foreign apparel producers that operate in the same geographic market and are similar in many respect to FS.

(ii) Relatively complete data is available regarding the functions performed and risks borne by the uncontrolled producers. In addition, data is sufficiently detailed to permit adjustments for differences in accounting practices. However, sufficient data is not available to determine whether it is likely that all material differences in contractual terms have been identified. For example, it is not possible to determine which parties in the uncontrolled transactions bear currency risks. Because differences in these contractual terms could materially affect price or profits, the inability to determine whether differences exist between the controlled and uncontrolled transactions will diminish the reliability of these results. Therefore, the reliability of the results of the uncontrolled transactions must be enhanced by the application of a statistical method in establishing an arm's length range pursuant to § 1.482–1(e)(2)(iii)(B).

(e) *Unspecified methods*—(1) *In general.* Methods not specified in paragraphs (a)(1), (2), (3), (4), and (5) of this section may be used to evaluate whether the amount charged in a controlled transaction is arm's length. Any method used under this paragraph (e) must be applied in accordance with the provisions of § 1.482–1. Consistent with the specified methods, an unspecified method should take into account the general principle that uncontrolled taxpayers evaluate the terms of a transaction by considering the realistic alternatives to that transaction, and only enter into a particular transaction if none of the alternatives is preferable to it. For example, the comparable uncontrolled price method compares a controlled transaction to similar uncontrolled transactions to provide a direct estimate of the price to which the parties would have agreed had they resorted directly to a market alternative to the controlled transaction. Therefore, in establishing whether a controlled transaction achieved an arm's length result, an unspecified method should provide information on the prices or profits that the controlled taxpayer could have realized by choosing a realistic alternative to the controlled transaction. As with any method, an unspecified method will not be applied unless it provides the most reliable measure of an arm's length result under the principles of the best method rule. See §1.482–1(c). Therefore, in accordance with §1.482–1(d) (Comparability), to the extent that a method relies on internal data rather than uncontrolled comparables, its reliability will be reduced. Similarly, the reliability of a method will be affected by the reliability of the data and assumptions used to apply the method, including any projections used.

(2) *Example.* The following example illustrates an application of the principle of this paragraph (e).

Example. Amcan, a U.S. company, produces unique vessels for storing and transporting toxic waste, toxicans, at its U.S. production facility. Amcan agrees by contract to supply its Canadian subsidiary, Cancan, with 4000 toxicans per year to serve the Canadian market for toxicans. Prior to entering into the contract with Cancan, Amcan had received a bona fide offer from an independent Canadian waste disposal company, Cando, to serve as the Canadian distributor for toxicans and to purchase a similar number of toxicans at a price of $5,000 each. If the circumstances and terms of the Cancan supply contract are sufficiently similar to those of the Cando offer, or sufficiently reliable adjustments can be made for differences between them, then the Cando offer price of $5,000 may provide reliable information indicating that an arm's length consideration under the Cancan contract will not be less than $5,000 per toxican.

(f) *Coordination with intangible property rules.* The value of an item of tangible property may be affected by the value of intangible property, such as a trademark affixed to the tangible property (embedded intangible). Ordinarily, the transfer of tangible property with an embedded intangible will not be considered a transfer of such intangible if the controlled purchaser does not acquire any rights to exploit the intangible property other than rights relating to the resale of the tangible property under normal commercial practices. Pursuant to §1.482–1(d)(3)(v), however, the embedded intangible must be accounted for in evaluating the comparability of the controlled transaction and uncontrolled comparables. For example, because product comparability has the greatest effect on an application of the comparable uncontrolled price method, trademarked tangible property may be insufficiently comparable to unbranded tangible property to permit a reliable application of the comparable uncontrolled price method. The effect of embedded intangibles on comparability will be determined under the principles of §1.482–4. If the transfer of tangible property conveys to the recipient a right to exploit an embedded intangible (other than in connection with the resale of that item of tangible property), it may be necessary to determine the arm's length consideration for such intangible separately from the tangible property, applying methods appropriate to determining the arm's length result for a transfer of intangible property under §1.482–4. For example, if the transfer of a machine conveys the right to exploit a manufacturing process incorporated in the machine, then the arm's length consideration for the transfer of that right must be determined separately under §1.482–4.

[T.D. 8552, 59 FR 35011, July 8, 1994; 60 FR 16382, Mar. 30, 1995]

§1.482–4 Methods to determine taxable income in connection with a transfer of intangible property.

(a) *In general.* The arm's length amount charged in a controlled transfer of intangible property must be determined under one of the four methods listed in this paragraph (a). Each of the methods must be applied in accordance with all of the provisions of §1.482–1, including the best method rule of § 1.482–1(c), the comparability analysis of § 1.482–1(d), and the arm's length range of § 1.482–1(e). The arm's length consideration for the transfer of an intangible determined under this section must be commensurate with the income attributable to the intangible. See § 1.482–4(f)(2) (Periodic adjustments). The available methods are—

(1) The comparable uncontrolled transaction method, described in paragraph (c) of this section;

(2) The comparable profits method, described in § 1.482–5;

(3) The profit split method, described in § 1.482–6; and

(4) Unspecified methods described in paragraph (d) of this section.

(b) *Definition of intangible.* For purposes of section 482, an intangible is an asset that comprises any of the following items and has substantial value independent of the services of any individual—

(1) Patents, inventions, formulae, processes, designs, patterns, or know-how;

(2) Copyrights and literary, musical, or artistic compositions;

(3) Trademarks, trade names, or brand names;

(4) Franchises, licenses, or contracts;

(5) Methods, programs, systems, procedures, campaigns, surveys, studies, forecasts, estimates, customer lists, or technical data; and

(6) Other similar items. For purposes of section 482, an item is considered similar to those listed in paragraph (b)(1) through (5) of this section if it derives its value not from its physical attributes but from its intellectual content or other intangible properties.

(c) *Comparable uncontrolled transaction method*—(1) *In general.* The comparable uncontrolled transaction method evaluates whether the amount charged for a controlled transfer of intangible property was arm's length by reference to the amount charged in a comparable uncontrolled transaction. The amount determined under this method may be adjusted as required by paragraph (f)(2) of this section (Periodic adjustments).

(2) *Comparability and reliability considerations*—(i) *In general.* Whether results derived from applications of this method are the most reliable measure of an arm's length result is determined using the factors described under the best method rule in § 1.482–1(c). The application of these factors under the comparable uncontrolled transaction method is discussed in paragraphs (c)(2)(ii), (iii), and (iv) of this section.

(ii) *Reliability.* If an uncontrolled transaction involves the transfer of the same intangible under the same, or substantially the same, circumstances as the controlled transaction, the results derived from applying the comparable uncontrolled transaction method will generally be the most direct and reliable measure of the arm's length result for the controlled transfer of an intangible. Circumstances between the controlled and uncontrolled transactions will be considered substantially the same if there are at most only minor differences that have a definite and reasonably ascertainable effect on the amount charged and for which appropriate adjustments are made. If such uncontrolled transactions cannot be identified, uncontrolled transactions that involve the transfer of comparable intangibles under comparable circumstances may be used to apply this method, but the reliability of the analysis will be reduced.

(iii) *Comparability*—(A) *In general.* The degree of comparability between controlled and uncontrolled transactions is determined by applying the comparability provisions of § 1.482–1(d). Although all of the factors described in § 1.482–1(d)(3) must be considered, specific factors may be particularly relevant to this method. In particular, the application of this method requires that the controlled and uncontrolled transactions involve either the same intangible property or comparable intangible property, as defined in paragraph (c)(2)(iii)(B)(*1*) of this section. In addition, because differences in contractual terms, or the economic conditions in which transactions take place, could materially affect the amount charged, comparability under this method also depends on similarity with respect to these factors, or adjustments to account for material differences in such circumstances.

(B) *Factors to be considered in determining comparability*—(*1*) *Comparable intangible property*. In order for the intangible property involved in an uncontrolled transaction to be considered comparable to the intangible property involved in the controlled transaction, both intangibles must—

(*i*) Be used in connection with similar products or processes within the same general industry or market; and

(*ii*) Have similar profit potential. The profit potential of an intangible is most reliably measured by directly calculating the net present value of the benefits to be realized (based on prospective profits to be realized or costs to be saved) through the use or subsequent transfer of the intangible, considering the capital investment and start-up expenses required, the risks to be assumed, and other relevant considerations. The need to reliably measure profit potential increases in relation to both the total amount of potential profits and the potential rate of return on investment necessary to exploit the intangible. If the information necessary to directly calculate net present value of the benefits to be realized is unavailable, and the need to reliably measure profit potential is reduced because the potential profits are relatively small in terms of total amount and rate of return, comparison of profit potential may be based upon the factors referred to in paragraph (c)(2)(iii)(B)(*2*) of this section. See *Example 3* of §1.482–4(c)(4). Finally, the reliability of a measure of profit potential is affected by the extent to which the profit attributable to the intangible can be isolated from the profit attributable to other factors, such as functions performed and other resources employed.

(*2*) *Comparable circumstances*. In evaluating the comparability of the circumstances of the controlled and uncontrolled transactions, although all of the factors described in §1.482–1(d)(3) must be considered, specific factors that may be particularly relevant to this method include the following—

(*i*) The terms of the transfer, including the exploitation rights granted in the intangible, the exclusive or nonexclusive character of any rights granted, any restrictions on use, or any limitations on the geographic area in which the rights may be exploited;

(*ii*) The stage of development of the intangible (including, where appropriate, necessary governmental approvals, authorizations, or licenses) in the market in which the intangible is to be used;

(*iii*) Rights to receive updates, revisions, or modifications of the intangible;

(*iv*) The uniqueness of the property and the period for which it remains unique, including the degree and duration of protection afforded to the property under the laws of the relevant countries;

(*v*) The duration of the license, contract, or other agreement, and any termination or renegotiation rights;

(*vi*) Any economic and product liability risks to be assumed by the transferee;

(*vii*) The existence and extent of any collateral transactions or ongoing business relationships between the transferee and transferor; and

(*viii*) The functions to be performed by the transferor and transferee, including any ancillary or subsidiary services.

(iv) *Data and assumptions*. The reliability of the results derived from the comparable uncontrolled transaction method is affected by the completeness and accuracy of the data used and the reliability of the assumptions made to apply this method. See §1.482–1(c) (Best method rule).

(3) *Arm's length range*. See §1.482–1(e)(2) for the determination of an arm's length range.

(4) *Examples*. The following examples illustrate the principles of this paragraph (c).

Example 1. (i) USpharm, a U.S. pharmaceutical company, develops a new drug Z that is a safe and effective treatment for the disease zeezee. USpharm has obtained patents covering drug Z in the United States and in various foreign countries. USpharm has also obtained the regulatory authorizations necessary to market drug Z in the United States and in foreign countries.

(ii) USpharm licenses its subsidiary in country X, Xpharm, to produce and sell drug Z in country X. At the same time, it licenses an unrelated company, Ydrug, to produce and sell drug Z in country Y, a neighboring country. Prior to licensing the drug, USpharm had obtained patent protection and regulatory approvals in both countries and both countries provide similar protection for intellectual property rights. Country X and country Y are similar countries in terms of population, per capita income and the incidence of disease zeezee. Consequently, drug Z is expected to sell in similar quantities and at similar prices in both countries. In addition, costs of producing and marketing drug Z in each country are expected to be approximately the same.

(iii) USpharm and Xpharm establish terms for the license of drug Z that are identical in every material respect, including royalty rate, to the terms established between USpharm and Ydrug. In this case the district director determines that the royalty rate established in the Ydrug license agreement is a reliable measure of the arm's length royalty rate for the Xpharm license agreement.

Example 2. The facts are the same as in *Example 1,* except that the incidence of the disease zeezee in Country Y is much higher than in Country X. In this case, the profit potential from exploitation of the right to make and sell drug Z is likely to be much higher in country Y than it is in Country X. Consequently, the Ydrug license agreement is unlikely to provide a reliable measure of the arm's length royalty rate for the Xpharm license.

Example 3. (i) FP, is a foreign company that designs, manufactures and sells industrial equipment. FP has developed proprietary components that are incorporated in its products. These components are important in the operation of FP's equipment and some of them have distinctive features, but other companies produce similar components and none of these components by itself accounts for a substantial part of the value of FP's products.

(ii) FP licenses its U.S. subsidiary, USSub, exclusive North American rights to use the patented technology for producing component X, a heat exchanger used for cooling operating mechanisms in industrial equipment. Component X incorporates proven technology that makes it somewhat more efficient than the heat exchangers commonly used in industrial equipment. FP also agrees to provide technical support to help adapt component X to USSub's products and to assist with initial production. Under the terms of the license agreement USSub pays FP a royalty equal to 3 percent of sales of USSub equipment incorporating component X.

(iii) FP does not license unrelated parties to use component X, but many similar components are transferred between uncontrolled taxpayers. Consequently, the district director decides to apply the comparable uncontrolled transaction method to evaluate whether the 3 percent royalty for component X is an arm's length royalty.

(iv) The district director uses a database of company documents filed with the Securities and Exchange Commission (SEC) to identify potentially comparable license agreements between uncontrolled taxpayers that are on file with the SEC. The district director identifies 40 license agreements that were entered into in the same year as the controlled transfer or in the prior or following year, and that relate to transfers of technology associated with industrial equipment that has similar applications to USSub's products. Further review of these uncontrolled agreements indicates that 25 of them involved components that have a similar level of technical sophistication as component X and could be expected to play a similar role in contributing to the total value of the final product.

(v) The district director makes a detailed review of the terms of each of the 25 uncontrolled agreements and finds that 15 of them are similar to the controlled agreement in that they all involve—

(A) The transfer of exclusive rights for the North American market;

(B) Products for which the market could be expected to be of a similar size to the market for the products into which USSub incorporates component X;

(C) The transfer of patented technology;

(D) Continuing technical support;

(E) Access to technical improvements;

(F) Technology of a similar age; and

(G) A similar duration of the agreement.

(vi) Based on these factors and the fact that none of the components to which these license agreements relate accounts for a substantial part of the value of the final products, the district director concludes that these fifteen intangibles have similar profit potential to the component X technology.

(vii) The 15 uncontrolled comparables produce the following royalty rates:

License	Royalty rate (percent)
1	1.0
2	1.0
3	1.25
4	1.25
5	1.5
6	1.5
7	1.75
8	2.0
9	2.0
10	2.0
11	2.25
12	2.5
13	2.5
14	2.75
15	3.0

(viii) Although the uncontrolled comparables are clearly similar to the controlled transaction, it is likely that unidentified material differences exist between the uncontrolled comparables and the controlled transaction. Therefore, an appropriate statistical technique must be used to establish the arm's length range. In this case the district director uses the interquartile range to determine the arm's length range. Therefore, the arm's length range covers royalty rates from 1.25 to 2.5 percent, and an adjustment is warranted to the 3 percent royalty charged in the controlled transfer. The district director determines that the appropriate adjustment corresponds to a reduction in the royalty rate to 2.0 percent, which is the median of the uncontrolled comparables.

Example 4. (i) USdrug, a U.S. pharmaceutical company, has developed a new drug, Nosplit, that is useful in treating migraine headaches and produces no significant side effects. Nosplit replaces another drug, Lessplit, that USdrug had previously produced and marketed as a treatment for migraine headaches. A number of other drugs for treating migraine headaches are already on the market, but Nosplit can be expected rapidly to dominate the worldwide market for such treatments and to command a premium price since all other treatments produce side effects. Thus, USdrug projects that extraordinary profits will be derived from Nosplit in the U.S. market and other markets.

(ii) USdrug licenses its newly established European subsidiary, Eurodrug, the rights to produce and market Nosplit in the European market. In setting the royalty rate for this license, USdrug considers the royalty that it established previously when it licensed the right to produce and market Lessplit in the European market to an unrelated European pharmaceutical company. In many respects the two license agreements are closely comparable. The drugs were licensed at the same stage in their development and the agreements conveyed identical rights to the licensees. Moreover, there appear to have been no significant changes in the European market for migraine headache treatments since Lessplit was licensed. However, at the time that Lessplit was licensed there were several other similar drugs already on the market to which Lessplit was not in all cases superior. Consequently, the projected and actual Lessplit profits were substantially less than the projected Nosplit profits. Thus, USdrug concludes that the profit potential of Lessplit is not similar to the profit potential of Nosplit, and the Lessplit license agreement consequently is not a comparable uncontrolled transaction for purposes of this paragraph (c) in spite of the other indicia of comparability between the two intangibles.

(d) *Unspecified methods*—(1) *In general.* Methods not specified in paragraphs (a)(1), (2), and (3) of this section may be used to evaluate whether the amount charged in a controlled transaction is arm's length. Any method used under this paragraph (d) must be applied in accordance with the provisions of §1.482–1. Consistent with the specified methods, an unspecified method should take into account the general principle that uncontrolled taxpayers evaluate the terms of a transaction by considering the realistic alternatives to that transaction, and only enter into a particular transaction if none of the alternatives is preferable to it. For example, the comparable uncontrolled transaction method compares a controlled transaction to similar uncontrolled transactions to provide a direct estimate of the price the parties would have agreed to had they resorted directly to a market alternative to the controlled transaction. Therefore, in establishing whether a controlled transaction achieved an arm's length result, an unspecified method should provide information on the prices or profits that the controlled taxpayer could have realized by choosing a realistic alternative to the controlled transaction. As with any method, an unspecified method will not be applied unless it provides the most reliable measure of an arm's length result under the principles of the best method rule. See §1.482–1(c). Therefore, in accordance with §1.482–1(d) (Comparability), to the extent that a method relies on internal data rather than uncontrolled comparables, its reliability will be reduced. Similarly, the reliability of a method will be affected by the reliability of the data and assumptions used to apply the method, including any projections used.

(2) *Example.* The following example illustrates an application of the principle of this paragraph (d).

Example (i) USbond is a U.S. company that licenses to its foreign subsidiary, Eurobond, a proprietary process that permits the manufacture of Longbond, a long-lasting industrial adhesive, at a substantially lower cost than otherwise would be possible. Using the proprietary process, Eurobond manufactures Longbond and sells it to related and unrelated parties for the market price of $550 per ton. Under the terms of the license agreement, Eurobond pays USbond a royalty of $100 per ton of Longbond sold. USbond also manufactures and markets Longbond in the United States.

(ii) In evaluating whether the consideration paid for the transfer of the proprietary process to Eurobond was arm's length, the district director may consider, subject to the best method rule of § 1.482–1(c), USbond's alternative of producing and selling Longbond itself. Reasonably reliable estimates indicate that if USbond directly supplied Longbond to the European market, a selling price of $300 per ton would cover its costs and provide a reasonable profit for its functions, risks and investment of capital associated with the production of Longbond for the European market. Given that the market price of Longbond was $550 per ton, by licensing the proprietary process to Eurobond, USbond forgoes $250 per ton of profit over the profit that would be necessary to compensate it for the functions, risks and investment involved in supplying Longbond to the European market itself. Based on these facts, the district director concludes that a royalty of $100 for the proprietary process is not arm's length.

(e) *Coordination with tangible property rules.* See § 1.482–3(f) for the provisions regarding the coordination between the tangible property and intangible property rules.

(f) *Special rules for transfers of intangible property*—(1) *Form of consideration.* If a transferee of an intangible pays nominal or no consideration and the transferor has retained a substantial interest in the property, the arm's length consideration shall be in the form of a royalty, unless a different form is demonstrably more appropriate.

(2) *Periodic adjustments*—(i) General rule. If an intangible is transferred under an arrangement that covers more than one year, the consideration charged in each taxable year may be adjusted to ensure that it is commensurate with the income attributable to the intangible. Adjustments made pursuant to this paragraph (f)(2) shall be consistent with the arm's length standard and the provisions of § 1.482–1. In determining whether to make such adjustments in the taxable year under examination, the district director may consider all relevant facts and circumstances throughout the period the intangible is used. The determination in an earlier year that the amount charged for an intangible was an arm's length amount will not preclude the district director in a subsequent taxable year from making an adjustment to the amount charged for the intangible in the subsequent year. A periodic adjustment under the commensurate with income requirement of section 482 may be made in a subsequent taxable year without regard to whether the taxable year of the original transfer remains open for statute of limitation purposes. For exceptions to this rule see paragraph (f)(2)(ii) of this section.

(ii) *Exceptions*—(A) *Transactions involving the same intangible.* If the same intangible was transferred to an uncontrolled taxpayer under substantially the same circumstances as those of the controlled transaction; this transaction serves as the basis for the application of the comparable uncontrolled transaction method in the first taxable year in which substantial periodic consideration was required to be paid; and the amount paid in that year was an arm's length amount, then no allocation in a subsequent year will be made under paragraph (f)(2)(i) of this paragraph for a controlled transfer of intangible property.

(B) *Transactions involving comparable intangible.* If the arm's length result is derived from the application of the comparable uncontrolled transaction method based on the transfer of a comparable intangible under comparable circumstances to those of the controlled transaction, no allocation will be made under paragraph (f)(2)(i) of this section if each of the following facts is established—

(*1*) The controlled taxpayers entered into a written agreement (controlled agreement) that provided for an amount of consideration with respect to each taxable year subject to such agreement, such consideration was an arm's length amount for the first taxable year in which substantial periodic consideration was required to be paid under the agreement, and such agreement remained in effect for the taxable year under review;

(*2*) There is a written agreement setting forth the terms of the comparable uncontrolled transaction relied upon to establish the arm's length consideration (uncontrolled agreement), which contains no provisions that would permit any change to the amount of consideration, a renegotiation, or a termination of the agreement, in circumstances comparable to those of the controlled transaction in the taxable year under review (or that contains provisions permitting only specified, non-contingent, periodic changes to the amount of consideration);

(*3*) The controlled agreement is substantially similar to the uncontrolled agreement, with respect to the time period for which it is effective and the provisions described in paragraph (f)(2)(ii)(B)(*2*) of this section;

(*4*) The controlled agreement limits use of the intangible to a specified field or purpose in a manner that is consistent with industry practice and any such limitation in the uncontrolled agreement;

(*5*) There were no substantial changes in the functions performed by the controlled transferee after the controlled agreement was executed, except changes required by events that were not foreseeable; and

(*6*) The aggregate profits actually earned or the aggregate cost savings actually realized by the controlled taxpayer from the exploitation of the intangible in the year under examination, and all past years, are not less than 80% nor more than 120% of the prospective profits or cost savings that were foreseeable when the comparability of the uncontrolled agreement was established under paragraph (c)(2) of this section.

(C) *Methods other than comparable uncontrolled transaction.* If the arm's length amount was determined under any method other than the comparable uncontrolled transaction method, no allocation will be made under paragraph (f)(2)(i) of this section if each of the following facts is established—

(*1*) The controlled taxpayers entered into a written agreement (controlled agreement) that provided for an amount of consideration with respect to each taxable year subject to such agreement, and such agreement remained in effect for the taxable year under review;

(*2*) The consideration called for in the controlled agreement was an arm's length amount for the first taxable year in which substantial periodic consideration was required to be paid, and relevant supporting documentation was prepared contemporaneously with the execution of the controlled agreement;

(*3*) There have been no substantial changes in the functions performed by the transferee since the controlled agreement was executed, except changes required by events that were not foreseeable; and

(*4*) The total profits actually earned or the total cost savings realized by the controlled transferee from the exploitation of the intangible in the year under examination, and all past years, are not less than 80% nor more than 120% of the prospective profits or cost savings that were foreseeable when the controlled agreement was entered into.

(D) *Extraordinary events.* No allocation will be made under paragraph (f)(2)(i) of this section if the following requirements are met—

(*1*) Due to extraordinary events that were beyond the control of the controlled taxpayers and that could not reasonably have been anticipated at the time the controlled agreement was entered into, the aggregate actual profits or aggregate cost savings realized by the taxpayer are less than 80% or more than 120% of the prospective profits or cost savings; and

(*2*) All of the requirements of paragraph (f)(2)(ii) (B) or (C) of this section are otherwise satisfied.

(E) *Five-year period.* If the requirements of §1.482–4 (f)(2)(ii)(B) or (f)(2)(ii)(C) are met for each year of the five-year period beginning with the first year in which substantial periodic consideration was required to be paid, then no periodic adjustment will be made under paragraph (f)(2)(i) of this section in any subsequent year.

(iii) *Examples.* The following examples illustrate this paragraph (f)(2).

Example 1. (i) USdrug, a U.S. pharmaceutical company, has developed a new drug, Nosplit, that is useful in treating migraine headaches and produces no significant side effects. A number of other drugs for treating migraine headaches are already on the market, but Nosplit can be expected rapidly to dominate the worldwide market for such treatments and to command a premium price since all other treatments produce side effects. Thus, USdrug projects that extraordinary profits will be derived from Nosplit in the U.S. and European markets.

(ii) USdrug licenses its newly established European subsidiary, Eurodrug, the rights to produce and market Nosplit for the European market for 5 years. In setting the royalty rate for this license, USdrug makes projections of the annual sales revenue and the annual profits to be derived from the exploitation of Nosplit by Eurodrug. Based on the projections, a royalty rate of 3.9% is established for the term of the license.

(iii) In Year 1, USdrug evaluates the royalty rate it received from Eurodrug. Given the high profit potential of Nosplit, USdrug is unable to locate any uncontrolled transactions dealing with licenses of comparable intangible property. USdrug therefore determines that the comparable uncontrolled transaction method will not provide a reliable measure of an arm's length royalty. However, applying the comparable profits method to Eurodrug, USdrug determines that a royalty rate of 3.9% will result in Eurodrug earning an arm's length return for its manufacturing and marketing functions.

(iv) In Year 5, the U.S. income tax return for USdrug is examined, and the district director must determine whether the royalty rate between USdrug and Eurodrug is commensurate with the income attributable to Nosplit. In making this determination, the district director considers whether any of the exceptions in § 1.482–4(f)(2)(ii) are applicable. In particular, the district director compares the profit projections attributable to Nosplit made by USdrug against the actual profits realized by Eurodrug. The projected and actual profits are as follows:

	Profit projections	Actual profits
Year 1	200	250
Year 2	250	300
Year 3	500	600
Year 4	350	200
Year 5	100	100
Total	1400	1450

(v) The total profits earned through Year 5 were not less than 80% nor more than 120% of the profits that were projected when the license was entered into. If the district director determines that the other requirements of § 1.482–4(f)(2)(ii)(C) were met, no adjustment will be made to the royalty rate between USdrug and Eurodrug for the license of Nosplit.

Example 2. (i) The facts are the same as in *Example 1,* except that Eurodrug's actual profits earned were much higher than the projected profits, as follows:

	Profit projections	Actual profits
Year 1	200	250
Year 2	250	500
Year 3	500	800
Year 4	350	700
Year 5	100	600
Total	1400	2850

(ii) In examining USdrug's tax return for Year 5, the district director considers the actual profits realized by Eurodrug in Year 5, and all past years. Accordingly, although Years 1 through 4 may be closed under the statute of limitations, for purposes of determining whether an adjustment should be made with respect to the royalty rate in Year 5 with respect to Nosplit, the district director aggregates the actual profits from those years with the profits of Year 5. However, the district director will make an adjustment, if any, only with respect to Year 5.

Example 3. (i) FP, a foreign corporation, licenses to USS, its U.S. subsidiary, a new air-filtering process that permits manufacturing plants to meet new environmental standards. The license runs for a 10-year period, and the profit derived from the new process is projected to be $15 million per year, for an aggregate profit of $150 million.

(ii) The royalty rate for the license is based on a comparable uncontrolled transaction involving a comparable intangible under comparable circumstances. The requirements of paragraphs (f)(2)(ii)(B)(*1*) through (*5*) of this section have been met. Specifically, FP and USS have entered into a written agreement that provides for a royalty in each year of the license, the royalty rate is considered arm's length for the first taxable year in which a substantial royalty was required to be paid, the license limited the use of the process to a specified field, consistent with industry practice, and there are no substantial changes in the functions performed by USS after the license was entered into.

(iii) In examining Year 4 of the license, the district director determines that the aggregate actual profits earned by USS through Year 4 are $30 million, less than 80% of the projected profits of $60 million. However, USS establishes to the satisfaction of the district director that the aggregate actual profits from the process are less than 80% of the projected profits in Year 3 because an earthquake severely damaged USS's manufacturing plant. Because the difference between the projected profits and actual profits was due to an extraordinary event that was beyond the control of USS, and could not reasonably have been anticipated at the time the license was entered into, the requirement under § 1.482–4(f)(2)(ii)(D) has been met, and no adjustment under this section is made.

(3) *Ownership of intangible property*—(i) *In general.* If the owner of the rights to exploit an intangible transfers such rights to a controlled taxpayer, the owner must receive an amount of consideration with respect to such transfer that is determined in accordance with the provisions of this section. If another controlled taxpayer provides assistance to the owner in connection

with the development or enhancement of an intangible, such person may be entitled to receive consideration with respect to such assistance. See §1.482–4(f)(3)(iii) (Allocations with respect to assistance provided to the owner). Because the right to exploit an intangible can be subdivided in various ways, a single intangible may have multiple owners for purposes of this paragraph (3)(i). Thus, for example, the owner of a trademark may license to another person the exclusive right to use that trademark in a specified geographic area for a specified period of time (while otherwise retaining the right to use the intangible). In such a case, both the licensee and the licensor will be considered owners for purposes of this paragraph (f)(3)(i), with respect to their respective exploitation rights.

(ii) *Identification of owner*—(A) *Legally protected intangible property.* The legal owner of a right to exploit an intangible ordinarily will be considered the owner for purposes of this section. Legal ownership may be acquired by operation of law or by contract under which the legal owner transfers all or part of its rights to another. Further, the district director may impute an agreement to convey legal ownership if the conduct of the controlled taxpayers indicates the existence in substance of such an agreement. See §1.482–1(d)(3)(ii)(B) (Identifying contractual terms).

(B) *Intangible property that is not legally protected.* In the case of intangible property that is not legally protected, the developer of the intangible will be considered the owner. Except as provided in §1.482–7T, if two or more controlled taxpayers jointly develop an intangible, for purposes of section 482, only one of the controlled taxpayers will be regarded as the developer and owner of the intangible, and the other participating members will be regarded as assisters. Ordinarily, the developer is the controlled taxpayer that bore the largest portion of the direct and indirect costs of developing the intangible, including the provision, without adequate compensation, of property or services likely to contribute substantially to developing the intangible. A controlled taxpayer will be presumed not to have borne the costs of development if, pursuant to an agreement entered into before the success of the project is known, another person is obligated to reimburse the controlled taxpayer for its costs. If it cannot be determined which controlled taxpayer bore the largest portion of the costs of development, all other facts and circumstances will be taken into consideration, including the location of the development activities, the capability of each controlled taxpayer to carry on the project independently, the extent to which each controlled taxpayer controls the project, and the conduct of the controlled taxpayers.

(iii) *Allocations with respect to assistance provided to the owner.* Allocations may be made to reflect an arm's length consideration for assistance provided to the owner of an intangible in connection with the development or enhancement of the intangible. Such assistance may include loans, services, or the use of tangible or intangible property. Assistance does not, however, include expenditures of a routine nature that an unrelated party dealing at arm's length would be expected to incur under circumstances similar to those of the controlled taxpayer. The amount of any allocation required with respect to that assistance must be determined in accordance with the applicable rules under section 482.

(iv) *Examples.* The principles of this paragraph are illustrated by the following examples.

Example 1. A, a member of a controlled group, allows B, another member of the controlled group and the owner of an intangible, to use tangible property, such as laboratory equipment, in connection with the development of the intangible. Any allocations with respect to the owner's use of the property will be determined under §1.482–2(c).

Example 2. FP, a foreign producer of cheese, markets the cheese in countries other than the United States under the tradename Fromage Frere. FP owns all the worldwide rights to this name. The name is widely known and is valuable outside the United States but is not known within the United States. In 1995, FP decides to enter the United States market and incorporates U.S. subsidiary, USSub, to be its U.S. distributor and to supervise the advertising and other marketing efforts that will be required to develop the name Fromage Frere in the United States. USSub incurs expenses that are not reimbursed by FP for developing the U.S.

market for Fromage Frere. These expenses are comparable to the levels of expense incurred by independent distributors in the U.S. cheese industry when introducing a product in the U.S. market under a brand name owned by a foreign manufacturer. Since USSub would have been expected to incur these expenses if it were unrelated to FP, no allocation to USSub is made with respect to the market development activities performed by USSub.

Example 3. The facts are the same as in *Example 2,* except that the expenses incurred by USSub are significantly larger than the expenses incurred by independent distributors under similar circumstances. FP does not reimburse USSub for its expenses. The district director concludes based on this evidence that an unrelated party dealing at arm's length under similar circumstances would not have engaged in the same level of activity relating to the development of FP's marketing intangibles. The expenditures in excess of the level incurred by the independent distributors therefore are considered to be a service provided to FP that adds to the value of FP's trademark for Fromage Frere. Accordingly, the district director makes an allocation under section 482 for the fair market value of the services that USSub is considered to have performed for FP.

Example 4. The facts are the same as in *Example 3,* except that FP and USSub conclude a long term agreement under which USSub receives the exclusive right to distribute cheese in the United States under FP's trademark. USSub purchases cheese from FP at an arm's length price. Since USSub is the owner of the trademark under paragraph (f)(3)(ii)(A) of this section, and its conduct is consistent with that status, its activities related to the development of the trademark are not considered to be a service performed for the benefit of FP, and no allocation is made with respect to such activities.

(4) *Consideration not artificially limited.* The arm's length consideration for the controlled transfer of an intangible is not limited by the consideration paid in any uncontrolled transactions that do not meet the requirements of the comparable uncontrolled transaction method described in paragraph (c) of this section. Similarly, the arm's length consideration for an intangible is not limited by the prevailing rates of consideration paid for the use or transfer of intangibles within the same or similar industry.

(5) *Lump sum payments*—(i) *In general.* If an intangible is transferred in a controlled transaction for a lump sum, that amount must be commensurate with the income attributable to the intangible. A lump sum is commensurate with income in a taxable year if the equivalent royalty amount for that taxable year is equal to an arm's length royalty. The equivalent royalty amount for a taxable year is the amount determined by treating the lump sum as an advance payment of a stream of royalties over the useful life of the intangible (or the period covered by an agreement, if shorter), taking into account the projected sales of the licensee as of the date of the transfer. Thus, determining the equivalent royalty amount requires a present value calculation based on the lump sum, an appropriate discount rate, and the projected sales over the relevant period. The equivalent royalty amount is subject to periodic adjustments under § 1.482–4(f)(2)(i) to the same extent as an actual royalty payment pursuant to a license agreement.

(ii) *Exceptions.* No periodic adjustment will be made under paragraph (f)(2)(i) of this section if any of the exceptions to periodic adjustments provided in paragraph (f)(2)(ii) of this section apply.

(iii) *Example.* The following example illustrates the principle of this paragraph (f)(5).

Example. Calculation of the equivalent royalty amount. (i) FSub is the foreign subsidiary of USP, a U.S. company. USP licenses FSub the right to produce and sell the whopperchopper, a patented new kitchen appliance, for the foreign market. The license is for a period of five years, and payment takes the form of a single lump-sum charge of $500,000 that is paid at the beginning of the period.

(ii) The equivalent royalty amount for this license is determined by deriving an equivalent royalty rate equal to the lump-sum payment divided by the present discounted value of FSub's projected sales of whopperchoppers over the life of the license. Based on the riskiness of the whopperchopper business, an appropriate discount rate is determined to be 10 percent. Projected sales of whopperchoppers for each year of the license are as follows:

Year	Projected sales
1	$2,500,000
2	2,600,000
3	2,700,000
4	2,700,000
5	2,750,000

(iii) Based on this information, the present discounted value of the projected whopperchopper sales is approximately $10 million, yielding an equivalent royalty rate of approximately 5%. Thus, the equivalent royalty amounts for each year are as follows:

Year	Projected sales	Equivalent royalty amount
1	$2,500,000	$125,000
2	2,600,000	130,000
3	2,700,000	135,000
4	2,700,000	135,000
5	2,750,000	137,500

(iv) If in any of the five taxable years the equivalent royalty amount is determined not to be an arm's length amount, a periodic adjustment may be made pursuant to §1.482–4(f)(2)(i). The adjustment in such case would be equal to the difference between the equivalent royalty amount and the arm's length royalty in that taxable year.

[T.D. 8552, 59 FR 35016, July 8, 1994]

§1.482–5 Comparable profits method.

(a) *In general.* The comparable profits method evaluates whether the amount charged in a controlled transaction is arm's length based on objective measures of profitability (profit level indicators) derived from uncontrolled taxpayers that engage in similar business activities under similar circumstances.

(b) *Determination of arm's length result*—(1) *In general.* Under the comparable profits method, the determination of an arm's length result is based on the amount of operating profit that the tested party would have earned on related party transactions if its profit level indicator were equal to that of an uncontrolled comparable (comparable operating profit). Comparable operating profit is calculated by determining a profit level indicator for an uncontrolled comparable, and applying the profit level indicator to the financial data related to the tested party's most narrowly identifiable business activity for which data incorporating the controlled transaction is available (relevant business activity). To the extent possible, profit level indicators should be applied solely to the tested party's financial data that is related to controlled transactions. The tested party's reported operating profit is compared to the comparable operating profits derived from the profit level indicators of uncontrolled comparables to determine whether the reported operating profit represents an arm's length result.

(2) *Tested party*—(i) *In general.* For purposes of this section, the tested party will be the participant in the controlled transaction whose operating profit attributable to the controlled transactions can be verified using the most reliable data and requiring the fewest and most reliable adjustments, and for which reliable data regarding uncontrolled comparables can be located. Consequently, in most cases the tested party will be the least complex of the controlled taxpayers and will not own valuable intangible property or unique assets that distinguish it from potential uncontrolled comparables.

(ii) *Adjustments for tested party.* The tested party's operating profit must first be adjusted to reflect all other allocations under section 482, other than adjustments pursuant to this section.

(3) *Arm's length range.* See §1.482–1(e)(2) for the determination of the arm's length range. For purposes of the comparable profits method, the arm's length range will be established using comparable operating profits derived from a single profit level indicator.

(4) *Profit level indicators.* Profit level indicators are ratios that measure relationships between profits and costs incurred or resources employed. A variety of profit level indicators can be calculated in any given case. Whether use of a particular profit level indicator is appropriate depends upon a number of factors, including the nature of the activities of the tested party, the reliability of the available data with respect to uncontrolled comparables, and the extent to which the profit level indicator is likely to produce a reliable measure of the income that the tested party would have earned had it dealt with controlled taxpayers at arm's length, taking into account all of the facts and circumstances. The profit level indicators should be derived from a sufficient number of years of data to reasonably measure returns that accrue to uncontrolled comparables. Generally, such a period should encompass at least the taxable year under review and the preceding two taxable years. This analysis must be applied in accordance with §1.482–1(f)(2)(iii)(D).

Profit level indicators that may provide a reliable basis for comparing operating profits of the tested party and uncontrolled comparables include the following—

(i) *Rate of return on capital employed.* The rate of return on capital employed is the ratio of operating profit to operating assets. The reliability of this profit level indicator increases as operating assets play a greater role in generating operating profits for both the tested party and the uncontrolled comparable. In addition, reliability under this profit level indicator depends on the extent to which the composition of the tested party's assets is similar to that of the uncontrolled comparable. Finally, difficulties in properly valuing operating assets will diminish the reliability of this profit level indicator.

(ii) *Financial ratios.* Financial ratios measure relationships between profit and costs or sales revenue. Since functional differences generally have a greater effect on the relationship between profit and costs or sales revenue than the relationship between profit and operating assets, financial ratios are more sensitive to functional differences than the rate of return on capital employed. Therefore, closer functional comparability normally is required under a financial ratio than under the rate of return on capital employed to achieve a similarly reliable measure of an arm's length result. Financial ratios that may be appropriate include the following—

(A) Ratio of operating profit to sales; and

(B) Ratio of gross profit to operating expenses. Reliability under this profit level indicator also depends on the extent to which the composition of the tested party's operating expenses is similar to that of the uncontrolled comparables.

(iii) *Other profit level indicators.* Other profit level indicators not described in this paragraph (b)(4) may be used if they provide reliable measures of the income that the tested party would have earned had it dealt with controlled taxpayers at arm's length. However, profit level indicators based solely on internal data may not be used under this paragraph (b)(4) because they are not objective measures of profitability derived from operations of uncontrolled taxpayers engaged in similar business activities under similar circumstances.

(c) *Comparability and reliability considerations*—(1) *In general.* Whether results derived from application of this method are the most reliable measure of the arm's length result must be determined using the factors described under the best method rule in § 1.482–1(c).

(2) *Comparability*—(i) *In general.* The degree of comparability between an uncontrolled taxpayer and the tested party is determined by applying the provisions of § 1.482–1(d)(2). The comparable profits method compares the profitability of the tested party, measured by a profit level indicator (generally based on operating profit), to the profitability of uncontrolled taxpayers in similar circumstances. As with all methods that rely on external market benchmarks, the greater the degree of comparability between the tested party and the uncontrolled taxpayer, the more reliable will be the results derived from the application of this method. The determination of the degree of comparability between the tested party and the uncontrolled taxpayer depends upon all the relevant facts and circumstances, including the relevant lines of business, the product or service markets involved, the asset composition employed (including the nature and quantity of tangible assets, intangible assets and working capital), the size and scope of operations, and the stage in a business or product cycle.

(ii) *Functional, risk and resource comparability.* An operating profit represents a return for the investment of resources and assumption of risks. Therefore, although all of the factors described in § 1.482–1(d)(3) must be considered, comparability under this method is particularly dependent on resources employed and risks assumed. Moreover, because resources and risks usually are directly related to functions performed, it is also important to consider functions performed in determining the degree of comparability between the tested party and an uncontrolled taxpayer. The degree of functional comparability required to obtain a reliable result under the comparable profits method, however, is generally less than that required under the resale price or cost plus methods. For example, because differences in functions performed often are reflected in operating expenses, taxpayers performing different functions may have very different gross profit margins but earn similar levels of operating profit.

(iii) *Other comparability factors.* Other factors listed in §1.482–1(d)(3) also may be particularly relevant under the comparable profits method. Because operating profit usually is less sensitive than gross profit to product differences, reliability under the comparable profits method is not as dependent on product similarity as the resale price or cost plus method. However, the reliability of profitability measures based on operating profit may be adversely affected by factors that have less effect on results under the comparable uncontrolled price, resale price, and cost plus methods. For example, operating profit may be affected by varying cost structures (as reflected, for example, in the age of plant and equipment), differences in business experience (such as whether the business is in a start-up phase or is mature), or differences in management efficiency (as indicated, for example, by objective evidence such as expanding or contracting sales or executive compensation over time). Accordingly, if material differences in these factors are identified based on objective evidence, the reliability of the analysis may be affected.

(iv) *Adjustments for the differences between the tested party and the uncontrolled taxpayers.* If there are differences between the tested party and an uncontrolled comparable that would materially affect the profits determined under the relevant profit level indicator, adjustments should be made according to the comparability provisions of §1.482–1(d)(2). In some cases, the assets of an uncontrolled comparable may need to be adjusted to achieve greater comparability between the tested party and the uncontrolled comparable. In such cases, the uncontrolled comparable's operating income attributable to those assets must also be adjusted before computing a profit level indicator in order to reflect the income and expense attributable to the adjusted assets. In certain cases it may also be appropriate to adjust the operating profit of the tested party and comparable parties. For example, where there are material differences in accounts payable among the comparable parties and the tested party, it will generally be appropriate to adjust the operating profit of each party by increasing it to reflect an imputed interest charge on each party's accounts payable.

(3) *Data and assumptions*—(i) *In general.* The reliability of the results derived from the comparable profits method is affected by the quality of the data and assumptions used to apply this method.

(ii) *Consistency in accounting.* The degree of consistency in accounting practices between the controlled transaction and the uncontrolled comparables that materially affect operating profit affects the reliability of the result. Thus, for example, if differences in inventory and other cost accounting practices would materially affect operating profit, the ability to make reliable adjustments for such differences would affect the reliability of the results.

(iii) *Allocations between the relevant business activity and other activities.* The reliability of the allocation of costs, income, and assets between the relevant business activity and other activities of the tested party or an uncontrolled comparable will affect the reliability of the determination of operating profit and profit level indicators. If it is not possible to allocate costs, income, and assets directly based on factual relationships, a reasonable allocation formula may be used. To the extent direct allocations are not made, the reliability of the results derived from the application of this method is reduced relative to the results of a method that requires fewer allocations of costs, income, and assets. Similarly, the reliability of the results derived from the application of this method is affected by the extent to which it is possible to apply the profit level indicator to the tested party's financial data that is related solely to the controlled transactions. For example, if the relevant business activity is the assembly of components purchased from both controlled and uncontrolled suppliers, it may not be possible to apply the profit level indicator solely to financial data related to the controlled transactions. In such a case, the reliability of the results derived from the application of this method will be reduced.

(d) *Definitions.* The definitions set forth in paragraphs (d)(1) through (6) of this section apply for purposes of this section.

(1) *Sales revenue* means the amount of the total receipts from sale of goods and provision of services, less returns and allowances. Accounting principles and conventions that are generally accepted in the trade or industry of the controlled taxpayer under review must be used.

(2) *Gross profit* means sales revenue less cost of goods sold.

(3) *Operating expenses* includes all expenses not included in cost of goods sold except for interest expense, foreign income taxes (as defined in § 1.901–2(a)), domestic income taxes, and any other expenses not related to the operation of the relevant business activity. Operating expenses ordinarily include expenses associated with advertising, promotion, sales, marketing, warehousing and distribution, administration, and a reasonable allowance for depreciation and amortization.

(4) *Operating profit* means gross profit less operating expenses. Operating profit includes all income derived from the business activity being evaluated by the comparable profits method, but does not include interest and dividends, income derived from activities not being tested by this method, or extraordinary gains and losses that do not relate to the continuing operations of the tested party.

(5) *Reported operating profit* means the operating profit of the tested party reflected on a timely filed U.S. income tax return. If the tested party files a U.S. income tax return, its operating profit is considered reflected on a U.S. income tax return if the calculation of taxable income on its return for the taxable year takes into account the income attributable to the controlled transaction under review. If the tested party does not file a U.S. income tax return, its operating profit is considered reflected on a U.S. income tax return in any taxable year for which income attributable to the controlled transaction under review affects the calculation of the U.S. taxable income of any other member of the same controlled group. If the comparable operating profit of the tested party is determined from profit level indicators derived from financial statements or other accounting records and reports of comparable parties, adjustments may be made to the reported operating profit of the tested party in order to account for material differences between the tested party's operating profit reported for U.S income tax purposes and the tested party's operating profit for financial statement purposes. In addition, in accordance with § 1.482–1(f)(2)(iii)(D), adjustments under section 482 that are finally determined may be taken into account in determining reported operating profit.

(6) *Operating assets.* The term operating assets means the value of all assets used in the relevant business activity of the tested party, including fixed assets and current assets (such as cash, cash equivalents, accounts receivable, and inventories).

The term does not include investments in subsidiaries, excess cash, and portfolio investments. Operating assets may be measured by their net book value or by their fair market value, provided that the same method is consistently applied to the tested party and the comparable parties, and consistently applied from year to year. In addition, it may be necessary to take into account recent acquisitions, leased assets, intangibles, currency fluctuations, and other items that may not be explicitly recorded in the financial statements of the tested party or uncontrolled comparable. Finally, operating assets must be measured by the average of the values for the beginning of the year and the end of the year, unless substantial fluctuations in the value of operating assets during the year make this an inaccurate measure of the average value over the year. In such a case, a more accurate measure of the average value of operating assets must be applied.

(e) *Examples.* The following examples illustrate the application of this section.

Example 1 Transfer of tangible property resulting in no adjustment. (i) FP is a publicly traded foreign corporation with a U.S. subsidiary, USSub, that is under audit for its 1996 taxable year. FP manufactures a consumer product for worldwide distribution. USSub imports the assembled product and distributes it within the United States at the wholesale level under the FP name.

(ii) FP does not allow uncontrolled taxpayers to distribute the product. Similar products are produced by other companies but none of them is sold to uncontrolled taxpayers or to uncontrolled distributors.

(iii) Based on all the facts and circumstances, the district director determines that the comparable profits method will provide the most reliable measure of an arm's length result. USSub is selected as the tested party because it engages in activities that are less complex than those undertaken by FP.

There is data from a number of independent operators of wholesale distribution businesses. These potential comparables are further narrowed to select companies in the same industry segment that perform similar functions and bear similar risks to USSub. An analysis of the information available on these taxpayers shows that the ratio of operating profit to sales is the most appropriate profit level indicator, and this ratio is relatively stable where at least three years are included in the average. For the taxable years 1994 through 1996, USSub shows the following results:

	1994	1995	1996	Average
Sales	$500,000	$560,000	$500,000	$520,000
Cost of Goods Sold	393,000	412,400	400,000	401,800
Operating Expenses	80,000	110,000	104,600	98,200
Operating Profit	27,000	37,600	(4,600)	20,000

(iv) After adjustments have been made to account for identified material differences between USSub and the uncontrolled distributors, the average ratio of operating profit to sales is calculated for each of the uncontrolled distributors. Applying each ratio to USSub would lead to the following comparable operating profit (COP) for USSub:

Uncontrolled distributor	OP/S (percent)	USSub COP
A	1.7	$8,840
B	3.1	16,120
C	3.8	19,760
D	4.5	23,400
E	4.7	24,440
F	4.8	24,960
G	4.9	25,480
H	6.7	34,840
I	9.9	51,480
J	10.5	54,600

(v) The data is not sufficiently complete to conclude that it is likely that all material differences between USSub and the uncontrolled distributors have been identified. Therefore, an arm's length range can be established only pursuant to §1.482-1(e)(2)(iii)(B). The district director measures the arm's length range by the interquartile range of results, which consists of the results ranging from $19,760 to $34,840. Although USSub's operating income for 1996 shows a loss of $4,600, the district director determines that no allocation should be made, because USSub's average reported operating profit of $20,000 is within this range.

Example 2 —Transfer of tangible property resulting in adjustment. (i) The facts are the same as in *Example 1* except that USSub reported the following income and expenses:

	1994	1995	1996	Average
Sales	$500,000	$560,000	$500,000	$520,000
Cost of Good Sold	370,000	460,000	400,000	410,000
Operating Expenses	110,000	110,000	110,000	110,000
Operating Profit	20,000	(10,000)	(10,000)	0

(ii) The interquartile range of comparable operating profits remains the same as derived in *Example 1:* $19,760 to $34,840. USSub's average operating profit for the years 1994 through 1996 ($0) falls outside this range. Therefore, the district director determines that an allocation may be appropriate.

(iii) To determine the amount, if any, of the allocation, the district director compares USSub's reported operating profit for 1996 to comparable operating profits derived from the uncontrolled distributors' results for 1996. The ratio of operating profit to sales in 1996 is calculated for each of the uncontrolled comparables and applied to USSub's 1996 sales to derive the following results:

Uncontrolled distributor	OP/S (percent)	USSub COP
C	0.5	$2,500
D	1.5	7,500
E	2.0	10,000
A	1.6	13,000
F	2.8	14,000
B	2.9	14,500
J	3.0	15,000
I	4.4	22,000
H	6.9	34,500
G	7.4	37,000

(iv) Based on these results, the median of the comparable operating profits for 1996 is $14,250. Therefore, USSub's income for 1996 is increased by $24,250, the difference between USSub's reported operating profit for 1996 and the median of the comparable operating profits for 1996.

Example 3 —Multiple year analysis. (i) The facts are the same as in *Example 2.* In addition, the district director examines the taxpayer's results for the 1997 taxable year. As in *Example 2*, the district director increases USSub's income for the 1996 taxable year by $24,250. The results for the 1997 taxable year, together with the 1995 and 1996 taxable years, are as follows:

	1995	1996	1997	Average
Sales	$560,000	$500,000	$530,000	$530,000
Cost of Good Sold	460,000	400,000	430,000	430,000
Operating Expenses	110,000	110,000	110,000	110,000
Operating Profit	(10,000)	(10,000)	(10,000)	(10,000)

(ii) The interquartile range of comparable operating profits, based on average results from the uncontrolled comparables and average sales for USSub for the years 1995 through 1997, ranges from $15,500 to $30,000. In determining whether an allocation for the 1997 taxable year may be made, the district director compares USSub's average reported operating profit for the years 1995 through 1997 to the interquartile range of average comparable operating profits over this period. USSub's average reported operating profit is determined without regard to the adjustment made with respect to the 1996 taxable year. See § 1.482–1(f)(2)(iii)(D). Therefore, USSub's average reported operating profit for the years 1995 through 1997 is ($10,000). Because this amount of income falls outside the interquartile range, the district director determines that an allocation may be appropriate.

(iii) To determine the amount, if any, of the allocation for the 1997 taxable year, the district director compares USSub's reported operating profit for 1997 to the median of the comparable operating profits derived from the uncontrolled distributors' results for 1997. The median of the comparable operating profits derived from the uncontrolled comparables results for the 1997 taxable year is $12,000. Based on this comparison, the district director increases USSub's 1997 taxable income by $22,000, the difference between the median of the comparable operating profits for the 1997 taxable year and USSub's reported operating profit of ($10,000) for the 1997 taxable year.

Example 4—Transfer of intangible to offshore manufacturer. (i) DevCo is a U.S. developer, producer and marketer of widgets. DevCo develops a new ‘‘high tech widget'' (htw) that is manufactured by its foreign subsidiary ManuCo located in Country H. ManuCo sells the htw to MarkCo (a U.S. subsidiary of DevCo) for distribution and marketing in the United States. The taxable year 1996 is under audit, and the district director examines whether the royalty rate of 5 percent paid by ManuCo to DevCo is an arm's length consideration for the htw technology.

(ii) Based on all the facts and circumstances, the district director determines that the comparable profits method will provide the most reliable measure of an arm's length result. ManuCo is selected as the tested party because it engages in relatively routine manufacturing activities, while DevCo engages in a variety of complex activities using unique and valuable intangibles. Finally, because ManuCo engages in manufacturing activities, it is determined that the ratio of operating profit to operating assets is an appropriate profit level indicator.

(iii) Uncontrolled taxpayers performing similar functions cannot be found in country H. It is determined that data available in countries M and N provides the best match of companies in a similar market performing similar functions and bearing similar risks. Such data is sufficiently complete to identify many of the material differences between ManuCo and the uncontrolled comparables, and to make adjustments to account for such differences. However, data is not sufficiently complete so that it is likely that no material differences remain. In particular, the differences in geographic markets might have materially affected the results of the various companies.

(iv) In a separate analysis, it is determined that the price that ManuCo charged to MarkCo for the htw's is an arm's length price under §1.482–3(b). Therefore, ManuCo's financial data derived from its sales to MarkCo are reliable. ManuCo's financial data from 1994–1996 is as follows:

	1994	1995	1996	Average
Assets	$24,000	$25,000	$26,000	$25,000
Sales to MarkCo	25,000	30,000	35,000	30,000
Cost of Goods Sold	6,250	7,500	8,750	7,500
Royalty to DevCo (5%)	1,250	1,500	1,750	1,500
Other	5,000	6,000	7,000	6,000
Operating Expenses	1,000	1,000	1,000	1,000
Operating Profit	17,750	21,500	25,250	21,500

(v) Applying the ratios of average operating profit to operating assets for the 1994 through 1996 taxable years derived from a group of similar uncontrolled comparables located in country M and N to ManuCo's average operating assets for the same period provides a set of comparable operating profits. The interquartile range for these average comparable operating profits is $3,000 to $4,500. ManuCo's average reported operating profit for the years 1994 through 1996 ($21,500) falls outside this range. Therefore, the district director determines that an allocation may be appropriate for the 1996 taxable year.

(vi) To determine the amount, if any, of the allocation for the 1996 taxable year, the district director compares ManuCo's reported operating profit for 1996 to the median of the comparable operating profits derived from the uncontrolled distributors' results for 1996. The median result for the uncontrolled comparables for 1996 is $3,750. Based on this comparison, the district director increases royalties that ManuCo paid by $21,500 (the difference between $25,250 and the median of the comparable operating profits, $3,750).

Example 5 Adjusting operating assets and operating profit for differences in accounts receivable. (i) USM is a U.S. company that manufactures parts for industrial equipment and sells them to its foreign parent corporation. For purposes of applying the comparable profits method, 15 uncontrolled manufacturers that are similar to USM have been identified.

(ii) USM has a significantly lower level of accounts receivable than the uncontrolled manufacturers. Since the rate of return on capital employed is to be used as the profit level indicator, both operating assets and operating profits must be adjusted to account for this difference. Each uncontrolled comparable's operating assets is reduced by the amount (relative to sales) by which they exceed USM's accounts receivable. Each uncontrolled comparable's operating profit is adjusted by deducting imputed interest income on the excess accounts receivable. This imputed interest income is calculated by multiplying the uncontrolled comparable's excess accounts receivable by an interest rate appropriate for short-term debt.

Example 6 Adjusting operating profit for differences in accounts payable. (i) USD is the U.S. subsidiary of a foreign corporation. USD purchases goods from its foreign parent and sells them in the U.S. market. For purposes of applying the comparable profits method, 10 uncontrolled distributors that are similar to USD have been identified.

(ii) There are significant differences in the level of accounts payable among the uncontrolled distributors and USD. To adjust for these differences, the district director increases the operating profit of the uncontrolled distributors and USD to reflect interest expense imputed to the accounts payable. The imputed interest expense for each company is calculated by multiplying the company's accounts payable by an interest rate appropriate for its short-term debt.

[T.D. 8552, 59 FR 35021, July 8, 1994; 60 FR 16703, Mar. 31, 1995]

§1.482–6 Profit split method.

(a) *In general.* The profit split method evaluates whether the allocation of the combined operating profit or loss attributable to one or more controlled transactions is arm's length by reference to the relative value of each controlled taxpayer's contribution to that combined operating profit or loss. The combined operating profit or loss must be derived from the most narrowly identifiable business activity of the controlled taxpayers for which data is available that includes the controlled transactions (relevant business activity).

(b) *Appropriate share of profits and losses.* The relative value of each controlled taxpayer's contribution to the success of the relevant business activity must be determined in a manner that reflects the functions performed, risks assumed, and resources employed by each participant in the relevant business activity, consistent with the comparability provisions of § 1.482–1(d)(3). Such an allocation is intended to correspond to the division of profit or loss that would result from an arrangement between uncontrolled taxpayers, each performing functions similar to those of the various controlled taxpayers engaged in the relevant business activity. The profit allocated to any particular member of a controlled group is not necessarily limited to the total operating profit of the group from the relevant business activity. For example, in a given year, one member of the group may earn a profit while another member incurs a loss. In addition, it may not be assumed that the combined operating profit or loss from the relevant business activity should be shared equally, or in any other arbitrary proportion. The specific method of allocation must be determined under paragraph (c) of this section.

(c) *Application*—(1) *In general.* The allocation of profit or loss under the profit split method must be made in accordance with one of the following allocation methods—(i) The comparable profit split, described in paragraph (c)(2) of this section; or

(ii) The residual profit split, described in paragraph (c)(3) of this section.

(2) *Comparable profit split*—(i) *In general.* A comparable profit split is derived from the combined operating profit of uncontrolled taxpayers whose transactions and activities are similar to those of the controlled taxpayers in the relevant business activity. Under this method, each uncontrolled taxpayer's percentage of the combined operating profit or loss is used to allocate the combined operating profit or loss of the relevant business activity.

(ii) *Comparability and reliability considerations—(A) In general.* Whether results derived from application of this method are the most reliable measure of the arm's length result is determined using the factors described under the best method rule in § 1.482–1(c).

(B) *Comparability*—(*1*) *In general.* The degree of comparability between the controlled and uncontrolled taxpayers is determined by applying the comparability provisions of § 1.482–1(d). The comparable profit split compares the division of operating profits among the controlled taxpayers to the division of operating profits among uncontrolled taxpayers engaged in similar activities under similar circumstances. Although all of the factors described in § 1.482–1(d)(3) must be considered, comparability under this method is particularly dependent on the considerations described under the comparable profits method in § 1.482–5(c)(2), because this method is based on a comparison of the operating profit of the controlled and uncontrolled taxpayers. In addition, because the contractual terms of the relationship among the participants in the relevant business activity will be a principal determinant of the allocation of functions and risks among them, comparability under this method also depends particularly on the degree of similarity of the contractual terms of the controlled and uncontrolled taxpayers. Finally, the comparable profit split may not be used if the combined operating profit (as a percentage of the combined assets) of the uncontrolled comparables varies significantly from that earned by the controlled taxpayers.

(*2*) *Adjustments for differences between the controlled and uncontrolled taxpayers.* If there are differences between the controlled and uncontrolled taxpayers that would materially affect the division of operating profit, adjustments must be made according to the provisions of § 1.482–1(d)(2).

(C) *Data and assumptions.* The reliability of the results derived from the comparable profit split is affected by the quality of the data and assumptions used to apply this method. In particular, the following factors must be considered—

(*1*) The reliability of the allocation of costs, income, and assets between the relevant business activity and the participants' other activities will affect the accuracy of the determination of combined operating profit and its allocation among the participants. If it is not possible to allocate costs, income, and assets directly based on factual relationships, a reasonable allocation formula may be used. To the extent direct allocations are not made, the reliability of the results derived from the application of this method is reduced relative to the results of a method that requires fewer allocations of costs, income, and assets. Similarly, the reliability of the results derived from the application of this method is affected by the extent to which it is possible to apply the method to the parties' financial data that is related solely to the controlled transactions. For example, if the relevant business activity is the assembly of components purchased from both controlled and uncontrolled suppliers, it may not be possible to apply the method solely to financial data related to the controlled transactions. In such a case, the reliability of the results derived from the application of this method will be reduced.

(*2*) The degree of consistency between the controlled and uncontrolled taxpayers in accounting practices that materially affect the items that determine the amount and allocation of operating profit affects the reliability of the result. Thus, for example, if differences in inventory and other cost accounting practices would materially affect operating profit, the ability to make reliable adjustments for such differences would affect the reliability of the results. Further, accounting consistency among the participants in the controlled transaction is required to ensure that the items determining the amount and allocation of operating profit are measured on a consistent basis.

(D) *Other factors affecting reliability.* Like the methods described in §§1.482–3, 1.482–4, and 1.482–5, the comparable profit split relies exclusively on external market benchmarks. As indicated in §1.482–1(c)(2)(i), as the degree of comparability between the controlled and uncontrolled transactions increases, the relative weight accorded the analysis under this method will increase. In addition, the reliability of the analysis under this method may be enhanced by the fact that all parties to the controlled transaction are evaluated under the comparable profit split. However, the reliability of the results of an analysis based on information from all parties to a transaction is affected by the reliability of the data and the assumptions pertaining to each party to the controlled transaction. Thus, if the data and assumptions are significantly more reliable with respect to one of the parties than with respect to the others, a different method, focusing solely on the results of that party, may yield more reliable results.

(3) *Residual profit split*—(i) *In general.* Under this method, the combined operating profit or loss from the relevant business activity is allocated between the controlled taxpayers following the two-step process set forth in paragraphs (c)(3)(i)(A) and (B) of this section.

(A) *Allocate income to routine contributions.* The first step allocates operating income to each party to the controlled transactions to provide a market return for its routine contributions to the relevant business activity. Routine contributions are contributions of the same or a similar kind to those made by uncontrolled taxpayers involved in similar business activities for which it is possible to identify market returns. Routine contributions ordinarily include contributions of tangible property, services and intangibles that are generally owned by uncontrolled taxpayers engaged in similar activities. A functional analysis is required to identify these contributions according to the functions performed, risks assumed, and resources employed by each of the controlled taxpayers. Market returns for the routine contributions should be determined by reference to the returns achieved by uncontrolled taxpayers engaged in similar activities, consistent with the methods described in §§1.482–3, 1.482–4 and 1.482–5.

(B) *Allocate residual profit.* The allocation of income to the controlled taxpayers' routine contributions will not reflect profits attributable to the controlled group's valuable intangible property where similar property is not owned by the uncontrolled taxpayers from which the market returns are derived. Thus, in cases where such intangibles are present there normally will be an unallocated residual profit after the allocation of income described in paragraph (c)(3)(i)(A) of this section. Under this second step, the residual profit generally should be divided among the controlled taxpayers based upon the relative value of their contributions of intangible property to the relevant business activity that was not accounted for as a routine contribution. The relative value of the intangible property contributed by each taxpayer may be measured by external market benchmarks that reflect the fair market value of such intangible property. Alternatively, the relative value of intangible contributions may be estimated by the capitalized cost of developing the intangibles and all related improvements and updates, less an appropriate amount of amortization based on the useful life of each intangible. Finally, if the intangible development expenditures of the parties are relatively constant over time and the useful life of the intangible property of all parties is approximately the same, the amount of actual expenditures in recent years may be used to estimate the relative value of intangible contributions. If the intangible property contributed by one of the controlled taxpayers is also used in other business activities (such as transactions with other controlled taxpayers), an appropriate allocation of the value of the intangibles must be made among all the business activities in which it is used.

(ii) *Comparability and reliability considerations*—(A) *In general.* Whether results derived from this method are the most reliable measure of the arm's length result is determined using the factors described under the best method rule in § 1.482–1(c). Thus, comparability and the quality of data and assumptions must be considered in determining whether this method provides the most reliable measure of an arm's length result. The application of these factors to the residual profit split is discussed in paragraph (c)(3)(ii)(B), (C), and (D) of this section.

(B) *Comparability.* The first step of the residual profit split relies on market benchmarks of profitability. Thus, the comparability considerations that are relevant for the first step of the residual profit split are those that are relevant for the methods that are used to determine market returns for the routine contributions. The second step of the residual profit split, however, may not rely so directly on market benchmarks. Thus, the reliability of the results under this method is reduced to the extent that the allocation of profits in the second step does not rely on market benchmarks.

(C) *Data and assumptions.* The reliability of the results derived from the residual profit split is affected by the quality of the data and assumptions used to apply this method. In particular, the following factors must be considered—

(*1*) The reliability of the allocation of costs, income, and assets as described in paragraph (c)(2)(ii)(C)(*1*) of this section;

(*2*) Accounting consistency as described in paragraph (c)(2)(ii)(C)(*2*) of this section;

(*3*) The reliability of the data used and the assumptions made in valuing the intangible property contributed by the participants. In particular, if capitalized costs of development are used to estimate the value of intangible property, the reliability of the results is reduced relative to the reliability of other methods that do not require such an estimate, for the following reasons. First, in any given case, the costs of developing the intangible may not be related to its market value. Second, the calculation of the capitalized costs of development may require the allocation of indirect costs between the relevant business activity and the controlled taxpayer's other activities, which may affect the reliability of the analysis. Finally, the calculation of costs may require assumptions regarding the useful life of the intangible property.

(D) *Other factors affecting reliability.* Like the methods described in §§ 1.482–3, 1.482–4, and 1.482–5, the first step of the residual profit split relies exclusively on external market benchmarks. As indicated in § 1.482–1(c)(2)(i), as the degree of comparability between the controlled and uncontrolled transactions increases, the relative weight accorded the analysis under this method will increase. In addition, to the extent the allocation of profits in the second step is not based on external market benchmarks, the reliability of the analysis will be decreased in relation to an analysis under a method that relies on market benchmarks. Finally, the reliability of the analysis under this method may be enhanced by the fact that all parties to the controlled transaction are evaluated under the residual profit split. However, the reliability of the results of an analysis based on information from all parties to a transaction is affected by the reliability of the data and the assumptions pertaining to each party to the controlled transaction. Thus, if the data and assumptions are significantly more reliable with respect to one of the parties than with respect to the others, a different method, focusing solely on the results of that party, may yield more reliable results.

(iii) *Example.* The provisions of this paragraph (c)(3) are illustrated by the following example.

Example—Application of Residual Profit Split. (i) XYZ is a U.S. corporation that develops, manufactures and markets a line of products for police use in the United States. XYZ's research unit developed a bulletproof material for use in protective clothing and headgear (Nulon). XYZ obtains patent protection for the chemical formula for Nulon. Since its introduction in the U.S., Nulon has captured a substantial share of the U.S. market for bulletproof material.

(ii) XYZ licensed its European subsidiary, XYZ-Europe, to manufacture and market Nulon in Europe. XYZ-Europe is a well- established company that manufactures and markets XYZ products in Europe. XYZ-Europe has a research unit that adapts XYZ products for the defense market, as well as a well-developed marketing network that employs brand names that it developed.

(iii) XYZ-Europe's research unit alters Nulon to adapt it to military specifications and develops a high-intensity marketing campaign directed at the defense industry in several European countries. Beginning with the 1995 taxable year, XYZ-Europe manufactures and sells Nulon in Europe through its marketing network under one of its brand names.

(iv) For the 1995 taxable year, XYZ has no direct expenses associated with the license of Nulon to XYZ-Europe and incurs no expenses related to the marketing of Nulon in Europe. For the 1995 taxable year, XYZ-Europe's Nulon sales and pre-royalty expenses are $500 million and $300 million, respectively, resulting in net pre-royalty profit of $200 million related to the Nulon business. The operating assets employed in XYZ-Europe's Nulon business are $200 million. Given the facts and circumstances, the district director determines under the best method rule that a residual profit split will provide the most reliable measure of an arm's length result. Based on an examination of a sample of European companies performing functions similar to those of XYZ-Europe, the district director determines that an average market return on XYZ-Europe's operating assets in the Nulon business is 10 percent, resulting in a market return of $20 million (10% X $200 million) for XYZ- Europe's Nulon business, and a residual profit of $180 million.

(v) Since the first stage of the residual profit split allocated profits to XYZ-Europe's contributions other than those attributable to highly valuable intangible property, it is assumed that the residual profit of $180 million is attributable to the valuable intangibles related to Nulon, i.e., the European brand name for Nulon and the Nulon formula (including XYZ-Europe's modifications). To estimate the relative values of these intangibles, the district director compares the ratios of the capitalized value of expenditures as of 1995 on Nulon-related research and development and marketing over the 1995 sales related to such expenditures.

(vi) Because XYZ's protective product research and development expenses support the worldwide protective product sales of the XYZ group, it is necessary to allocate such expenses among the worldwide business activities to which they relate. The district director determines that it is reasonable to allocate the value of these expenses based on worldwide protective product sales. Using information on the average useful life of its investments in protective product research and development, the district director capitalizes and amortizes XYZ's protective product research and development expenses. This analysis indicates that the capitalized research and development expenditures have a value of $0.20 per dollar of global protective product sales in 1995.

(vii) XYZ-Europe's expenditures on Nulon research and development and marketing support only its sales in Europe. Using information on the average useful life of XYZ-Europe's investments in marketing and research and development, the district director capitalizes and amortizes XYZ-Europe's expenditures and determines that they have a value in 1995 of $0.40 per dollar of XYZ-Europe's Nulon sales.

(viii) Thus, XYZ and XYZ-Europe together contributed $0.60 in capitalized intangible development expenses for each dollar of XYZ-Europe's protective product sales for 1995, of which XYZ contributed one-third (or $0.20 per dollar of sales). Accordingly, the district director determines that an arm's length royalty for the Nulon license for the 1995 taxable year is $60 million, i.e., one-third of XYZ-Europe's $180 million in residual Nulon profit.

[T.D. 8552, 59 FR 35025, July 8, 1994; 60 FR 16382, Mar. 30, 1995]

§ 1.482–7 Sharing of costs.

(a) *In general*—(1) *Scope and application of the rules in this section.* A cost sharing arrangement is an agreement under which the parties agree to share the costs of development of one or more intangibles in proportion to their shares of reasonably anticipated benefits from their individual exploitation of the interests in the intangibles assigned to them under the arrangement. A taxpayer may claim that a cost sharing arrangement is a qualified cost sharing arrangement only if the agreement meets the requirements of paragraph (b) of this section. Consistent with the rules of § 1.482–1(d)(3)(ii)(B) (Identifying contractual terms), the district director may apply the rules of this section to any arrangement that in substance constitutes a cost sharing arrangement, notwithstanding a failure to comply with any requirement of this section. A qualified cost sharing arrangement, or an arrangement to which the district director applies the rules of this section, will not be treated as a partnership to which the rules of subchapter K apply. See § 301.7701–3(e) of this chapter. Furthermore, a participant that is a foreign corporation or nonresident alien individual will not be treated as engaged in trade or business within the United States solely by reason of its participation in such an arrangement. See generally § 1.864–2(a).

(2) *Limitation on allocations.* The district director shall not make allocations with respect to a qualified cost sharing arrangement except to the extent necessary to make each controlled participant's share of the costs (as determined under paragraph (d) of this section) of intangible development under the qualified cost sharing arrangement equal to its share of reasonably anticipated benefits attributable to such development, under the rules of this section. If a controlled taxpayer acquires an interest in intangible property from another controlled taxpayer (other than in consideration for bearing a share of the costs of the intangible's development), then the district director may make appropriate allocations to reflect an arm's length consideration for the acquisition of the interest in such intangible under the rules of §§ 1.482–1 and 1.482–4 through 1.482–6. See paragraph (g) of this section. An interest in an intangible includes any commercially transferable interest, the benefits of which are susceptible of valuation. See § 1.482–4(b) for the definition of an intangible.

(3) *Cross references.* Paragraph (c) of this section defines participant. Paragraph (d) of this section defines the costs of intangible development. Paragraph (e) of this section defines the anticipated benefits of intangible development. Paragraph (f) of this section provides rules governing cost allocations. Paragraph (g) of this section provides rules governing transfers of intangibles other than in consideration for bearing a share of the costs of the intangible's development. Rules governing the character of payments made pursuant to a qualified cost sharing arrangement are provided in paragraph (h) of this section. Paragraph (i) of this section provides accounting requirements. Paragraph (j) of this section provides administrative requirements. Paragraph (k) of this section provides an effective date. Paragraph (l) provides a transition rule.

(b) *Qualified cost sharing arrangement.* A qualified cost sharing arrangement must—

(1) Include two or more participants;

(2) Provide a method to calculate each controlled participant's share of intangible development costs, based on factors that can reasonably be expected to reflect that participant's share of anticipated benefits;

(3) Provide for adjustment to the controlled participants' shares of intangible development costs to account for changes in economic conditions, the business operations and practices of the participants, and the ongoing development of intangibles under the arrangement; and

(4) Be recorded in a document that is contemporaneous with the formation (and any revision) of the cost sharing arrangement and that includes—

(i) A list of the arrangement's participants, and any other member of the controlled group that will benefit from the use of intangibles developed under the cost sharing arrangement;

(ii) The information described in paragraphs (b)(2) and (b)(3) of this section;

(iii) A description of the scope of the research and development to be undertaken, including the intangible or class of intangibles intended to be developed;

(iv) A description of each participant's interest in any covered intangibles. A covered intangible is any intangible property that is developed as a result of the research and development undertaken under the cost sharing arrangement (intangible development area);

(v) The duration of the arrangement; and

(vi) The conditions under which the arrangement may be modified or terminated and the consequences of such modification or termination, such as the interest that each participant will receive in any covered intangibles.

(c) *Participant*—(1) *In general.* For purposes of this section, a participant is a controlled taxpayer that meets the requirements of this paragraph (c)(1) (controlled participant) or an uncontrolled taxpayer that is a party to the cost sharing arrangement (uncontrolled participant). See §1.482–1(i)(5) for the definitions of controlled and uncontrolled taxpayers. A controlled taxpayer may be a controlled participant only if it—

(i) Reasonably anticipates that it will derive benefits from the use of covered intangibles;

(ii) Substantially complies with the accounting requirements described in paragraph (i) of this section; and

(iii) Substantially complies with the administrative requirements described in paragraph (j) of this section.

(iv) The following example illustrates paragraph (c)(1)(i) of this section:

Example. Foreign Parent (FP) is a foreign corporation engaged in the extraction of a natural resource. FP has a U.S. subsidiary (USS) to which FP sells supplies of this resource for sale in the United States. FP enters into a cost sharing arrangement with USS to develop a new machine to extract the natural resource. The machine uses a new extraction process that will be patented in the United States and in other countries. The cost sharing arrangement provides that USS will receive the rights to use the machine in the extraction of the natural resource in the United States, and FP will receive the rights in the rest of the world. This resource does not, however, exist in the United States. Despite the fact that USS has received the right to use this process in the United States, USS is not a qualified participant because it will not derive a benefit from the use of the intangible developed under the cost sharing arrangement.

(2) *Treatment of a controlled taxpayer that is not a controlled participant*—(i) *In general.* If a controlled taxpayer that is not a controlled participant (within the meaning of this paragraph (c)) provides assistance in relation to the research and development undertaken in the intangible development area, it must receive consideration from the controlled participants under the rules of §1.482–4(f)(3)(iii) (Allocations with respect to assistance provided to the owner). For purposes of paragraph (d) of this section, such consideration is treated as an operating expense and each controlled participant must be treated as incurring a share of such consideration equal to its share of reasonably anticipated benefits (as defined in paragraph (f)(3) of this section).

(ii) *Example.* The following example illustrates this paragraph (c)(2):

Example. (i) U.S. Parent (USP), one foreign subsidiary (FS), and a second foreign subsidiary constituting the group's research arm (R+D) enter into a cost sharing agreement to develop manufacturing intangibles for a new product line A. USP and FS are assigned the exclusive rights to exploit the intangibles respectively in the United States and the rest of the world, where each presently manufactures and sells various existing product lines. R+D is not assigned any rights to exploit the intangibles. R+D's activity consists solely in carrying out research for the group. It is reliably projected that the shares of reasonably anticipated benefits of USP and FS will be 66⅔% and 33⅓, respectively, and the parties' agreement provides that USP and FS will reimburse 66⅔% and 33⅓%, respectively, of the intangible development costs incurred by R+D with respect to the new intangible.

(ii) R+D does not qualify as a controlled participant within the meaning of paragraph (c) of this section, because it will not derive any benefits from the use of covered intangibles. Therefore, R+D is treated as a service provider for purposes of this section and must receive arm's length consideration for the assistance it is deemed to provide to USP and FS, under the rules of §1.482–4(f)(3)(iii). Such consideration must be treated as intangible development costs incurred by USP and

FS in proportion to their shares of reasonably anticipated benefits (i.e., 66⅔% and 33⅓%, respectively). R+D will not be considered to bear any share of the intangible development costs under the arrangement.

(3) *Treatment of consolidated group.* For purposes of this section, all members of the same affiliated group (within the meaning of section 1504(a)) that join in the filing of a consolidated return for the taxable year under section 1501 shall be treated as one taxpayer.

(d) *Costs*—(1) *Intangible development costs.* For purposes of this section, a controlled participant's costs of developing intangibles for a taxable year mean all of the costs incurred by that participant related to the intangible development area, plus all of the cost sharing payments it makes to other controlled and uncontrolled participants, minus all of the cost sharing payments it receives from other controlled and uncontrolled participants. Costs incurred related to the intangible development area consist of the following items: operating expenses as defined in § 1.482–5(d)(3), other than depreciation or amortization expense, plus (to the extent not included in such operating expenses, as defined in § 1.482–5(d)(3)) the charge for the use of any tangible property made available to the qualified cost sharing arrangement. If tangible property is made available to the qualified cost sharing arrangement by a controlled participant, the determination of the appropriate charge will be governed by the rules of § 1.482–2(c) (Use of tangible property). Intangible development costs do not include the consideration for the use of any intangible property made available to the qualified cost sharing arrangement. See paragraph (g)(2) of this section. If a particular cost contributes to the intangible development area and other areas or other business activities, the cost must be allocated between the intangible development area and the other areas or business activities on a reasonable basis. In such a case, it is necessary to estimate the total benefits attributable to the cost incurred. The share of such cost allocated to the intangible development area must correspond to covered intangibles' share of the total benefits. Costs that do not contribute to the intangible development area are not taken into account.

(2) *Examples.* The following examples illustrate this paragraph (d):

Example 1. Foreign Parent (FP) and U.S. Subsidiary (USS) enter into a qualified cost sharing arrangement to develop a better mousetrap. USS and FP share the costs of FP's research and development facility that will be exclusively dedicated to this research, the salaries of the researchers, and reasonable overhead costs attributable to the project. They also share the cost of a conference facility that is at the disposal of the senior executive management of each company but does not contribute to the research and development activities in any measurable way. In this case, the cost of the conference facility must be excluded from the amount of intangible development costs.

Example 2. U.S. Parent (USP) and Foreign Subsidiary (FS) enter into a qualified cost sharing arrangement to develop a new device. USP and FS share the costs of a research and development facility, the salaries of researchers, and reasonable overhead costs attributable to the project. USP also incurs costs related to field testing of the device, but does not include them in the amount of intangible development costs of the cost sharing arrangement. The district director may determine that the field testing costs are intangible development costs that must be shared.

(e) *Anticipated benefits*—(1) *Benefits.* Benefits are additional income generated or costs saved by the use of covered intangibles.

(2) *Reasonably anticipated benefits.* For purposes of this section, a controlled participant's reasonably anticipated benefits are the aggregate benefits that it reasonably anticipates that it will derive from covered intangibles.

(f) *Cost allocations*—(1) *In general.* For purposes of determining whether a cost allocation authorized by paragraph (a)(2) of this section is appropriate for a taxable year, a controlled participant's share of intangible development costs for the taxable year under a qualified cost sharing arrangement must be compared to its share of reasonably anticipated benefits under the arrangement. A controlled participant's share of intangible development costs is determined under paragraph (f)(2) of this section. A controlled participant's share of reasonably anticipated benefits under the arrangement is determined under paragraph (f)(3) of this section. In determining whether benefits were reasonably anticipated, it may be appropriate to compare actual benefits to anticipated benefits, as described in paragraph (f)(3)(iv) of this section.

(2) *Share of intangible development costs*—(i) *In general.* A controlled participant's share of intangible development costs for a taxable year is equal to its intangible development costs for the taxable year (as defined in paragraph (d) of this section), divided by the sum of the intangible development costs for the taxable year (as defined in paragraph (d) of this section) of all the controlled participants.

(ii) *Example.* The following example illustrates this paragraph (f)(2):

Example (i) U.S. Parent (USP), Foreign Subsidiary (FS), and Unrelated Third Party (UTP) enter into a cost sharing arrangement to develop new audio technology. In the first year of the arrangement, the controlled participants incur $2,250,000 in the intangible development area, all of which is incurred directly by USP. In the first year, UTP makes a $250,000 cost sharing payment to USP, and FS makes a $800,000 cost sharing payment to USP, under the terms of the arrangement. For that year, the intangible development costs borne by USP are $1,200,000 (its $2,250,000 intangible development costs directly incurred, minus the cost sharing payments it receives of $250,000 from UTP and $800,000 from FS); the intangible development costs borne by FS are $800,000 (its cost sharing payment); and the intangible development costs borne by all of the controlled participants are $2,000,000 (the sum of the intangible development costs borne by USP and FS of $1,200,000 and $800,000, respectively). Thus, for the first year, USP's share of intangible development costs is 60% ($1,200,000 divided by $2,000,000), and FS's share of intangible development costs is 40% ($800,000 divided by $2,000,000).

(ii) For purposes of determining whether a cost allocation authorized by paragraph §1.482–7(a)(2) is appropriate for the first year, the district director must compare USP's and FS's shares of intangible development costs for that year to their shares of reasonably anticipated benefits. See paragraph (f)(3) of this section.

(3) *Share of reasonably anticipated benefits*—(i) *In general.* A controlled participant's share of reasonably anticipated benefits under a qualified cost sharing arrangement is equal to its reasonably anticipated benefits (as defined in paragraph (e)(2) of this section), divided by the sum of the reasonably anticipated benefits (as defined in paragraph (e)(2) of this section) of all the controlled participants. The anticipated benefits of an uncontrolled participant will not be included for purposes of determining each controlled participant's share of anticipated benefits. A controlled participant's share of reasonably anticipated benefits will be determined using the most reliable estimate of reasonably anticipated benefits. In determining which of two or more available estimates is most reliable, the quality of the data and assumptions used in the analysis must be taken into account, consistent with §1.482–1(c)(2)(ii) (Data and assumptions). Thus, the reliability of an estimate will depend largely on the completeness and accuracy of the data, the soundness of the assumptions, and the relative effects of particular deficiencies in data or assumptions on different estimates. If two estimates are equally reliable, no adjustment should be made based on differences in the results. The following factors will be particularly relevant in determining the reliability of an estimate of anticipated benefits—

(A) The reliability of the basis used for measuring benefits, as described in paragraph (f)(3)(ii) of this section; and

(B) The reliability of the projections used to estimate benefits, as described in paragraph (f)(3)(iv) of this section.

(ii) *Measure of benefits.* In order to estimate a controlled participant's share of anticipated benefits from covered intangibles, the amount of benefits that each of the controlled participants is reasonably anticipated to derive from covered intangibles must be measured on a basis that is consistent for all such participants. See paragraph (f)(3)(iii)(E), *Example 8,* of this section. If a controlled participant transfers covered intangibles to another controlled taxpayer, such participant's benefits from the transferred intangibles must be measured by reference to the transferee's benefits, disregarding any consideration paid by the transferee to the controlled participant (such as a royalty pursuant to a license agreement). Anticipated benefits are measured either on a direct basis, by reference to estimated additional income to be generated or costs to be saved by the use of covered intangibles, or on an indirect basis, by reference to certain measurements that reasonably can be assumed to be related to income generated or costs saved. Such indirect bases of measurement of anticipated benefits are described in paragraph (f)(3)(iii) of this section. A controlled participant's anticipated benefits must be measured on the most reliable basis, whether direct or indirect. In determining which of two bases of measurement of reasonably anticipated benefits is most reliable, the factors set forth in § 1.482–1(c)(2)(ii) (Data and assumptions) must be taken into account. It normally will be expected that the basis that provided the most reliable estimate for a particular year will continue to provide the most reliable estimate in subsequent years, absent a material change in the factors that affect the reliability of the estimate. Regardless of whether a direct or indirect basis of measurement is used, adjustments may be required to account for material differences in the activities that controlled participants undertake to exploit their interests in covered intangibles. See *Example 6* of paragraph (f)(3)(iii)(E) of this section.

(iii) *Indirect bases for measuring anticipated benefits.* Indirect bases for measuring anticipated benefits from participation in a qualified cost sharing arrangement include the following:

(A) *Units used, produced or sold.* Units of items used, produced or sold by each controlled participant in the business activities in which covered intangibles are exploited may be used as an indirect basis for measuring its anticipated benefits. This basis of measurement will be more reliable to the extent that each controlled participant is expected to have a similar increase in net profit or decrease in net loss attributable to the covered intangibles per unit of the item or items used, produced or sold. This circumstance is most likely to arise when the covered intangibles are exploited by the controlled participants in the use, production or sale of substantially uniform items under similar economic conditions.

(B) *Sales.* Sales by each controlled participant in the business activities in which covered intangibles are exploited may be used as an indirect basis for measuring its anticipated benefits. This basis of measurement will be more reliable to the extent that each controlled participant is expected to have a similar increase in net profit or decrease in net loss attributable to covered intangibles per dollar of sales. This circumstance is most likely to arise if the costs of exploiting covered intangibles are not substantial relative to the revenues generated, or if the principal effect of using covered intangibles is to increase the controlled participants' revenues (e.g., through a price premium on the products they sell) without affecting their costs substantially. Sales by each controlled participant are unlikely to provide a reliable basis for measuring benefits unless each controlled participant operates at the same market level (e.g., manufacturing, distribution, etc.).

(C) *Operating profit.* Operating profit of each controlled participant from the activities in which covered intangibles are exploited may be used as an indirect basis for measuring its anticipated benefits. This basis of measurement will be more reliable to the extent that such profit is largely attributable to the use of covered intangibles, or if the share of profits attributable to the use of covered intangibles is expected to be similar for each controlled participant. This circumstance is most likely to arise when covered intangibles are integral to the activity that generates the profit and the activity could not be carried on or would generate little profit without use of those intangibles.

(D) *Other bases for measuring anticipated benefits.* Other bases for measuring anticipated benefits may, in some circumstances, be appropriate, but only to the extent that there is expected to be a reasonably identifiable relationship between the basis of measurement used and additional income generated or costs saved by the use of covered intangibles. For example, a division of costs based on employee compensation would be considered unreliable unless there were a relationship between the amount of compensation and the expected income of the controlled participants from the use of covered intangibles.

(E) *Examples.* The following examples illustrate this paragraph (f)(3)(iii):

Example 1. Foreign Parent (FP) and U.S. Subsidiary (USS) both produce a feedstock for the manufacture of various high-performance plastic products. Producing the feedstock requires large amounts of electricity, which accounts for a significant portion of its production cost. FP and USS enter into a cost sharing arrangement to develop a new process that will reduce the amount of electricity required to produce a unit of the feedstock. FP and USS currently both incur an electricity cost of X% of its other production costs and rates for each are expected to remain similar in the future. How much the new process, if it is successful, will reduce the amount of electricity required to produce a unit of the feedstock is uncertain, but it will be about the same amount for both companies. Therefore, the cost savings each company is expected to achieve after implementing the new process are similar relative to the total amount of the feedstock produced. Under the cost sharing arrangement FP and USS divide the costs of developing the new process based on the units of the feedstock each is anticipated to produce in the future. In this case, units produced is the most reliable basis for measuring benefits and dividing the intangible development costs because each participant is expected to have a similar decrease in costs per unit of the feedstock produced.

Example 2. The facts are the same as in *Example 1,* except that USS pays X% of its other production costs for electricity while FP pays 2X% of its other production costs. In this case, units produced is not the most reliable basis for measuring benefits and dividing the intangible development costs because the participants do not expect to have a similar decrease in costs per unit of the feedstock produced. The district director determines that the most reliable measure of benefit shares may be based on units of the feedstock produced if FP's units are weighted relative to USS' units by a factor of 2. This reflects the fact that FP pays twice as much as USS as a percentage of its other production costs for electricity and, therefore, FP's savings per unit of the feedstock would be twice USS's savings from any new process eventually developed.

Example 3. The facts are the same as in *Example 2,* except that to supply the particular needs of the U.S. market USS manufactures the feedstock with somewhat different properties than FP's feedstock. This requires USS to employ a somewhat different production process than does FP. Because of this difference, it will be more costly for USS to adopt any new process that may be developed under the cost sharing agreement. In this case, units produced is not the most reliable basis for measuring benefit shares. In order to reliably determine benefit shares, the district director offsets the reasonably anticipated costs of adopting the new process against the reasonably anticipated total savings in electricity costs.

Example 4. U.S. Parent (USP) and Foreign Subsidiary (FS) enter into a cost sharing arrangement to develop new anesthetic drugs. USP obtains the right to use any resulting patent in the U.S. market, and FS obtains the right to use the patent in the European market. USP and FS divide costs on the basis of anticipated operating profit from each patent under development. USP anticipates that it will receive a much higher profit than FS per unit sold because drug prices are uncontrolled in the U.S., whereas drug prices are regulated in many European countries. In this case, the controlled taxpayers' basis for measuring benefits is the most reliable.

Example 5. (i) Foreign Parent (FP) and U.S. Subsidiary (USS) both manufacture and sell fertilizers. They enter into a cost sharing arrangement to develop a new pellet form of a common agricultural fertilizer that is currently available only in powder form. Under the cost sharing arrangement, USS obtains the rights to produce and sell the new form of fertilizer for the U.S. market while FP obtains the rights to produce and sell the fertilizer for the rest of the world. The costs of developing the new form of fertilizer are divided on the basis of the anticipated sales of fertilizer in the participants' respective markets.

(ii) If the research and development is successful the pellet form will deliver the fertilizer more efficiently to crops and less fertilizer will be required to achieve the same effect on crop growth. The pellet form of fertilizer can be expected to sell at a price premium over the powder form of fertilizer based on the savings in the amount of fertilizer that needs to be used. If the research and development is successful, the costs of producing pellet fertilizer are expected to be approximately the same as the costs of producing powder fertilizer and the same for both FP and USS. Both FP and USS operate at approximately the same market levels, selling their fertilizers largely to independent distributors.

(iii) In this case, the controlled taxpayers' basis for measuring benefits is the most reliable.

Example 6. The facts are the same as in *Example 5,* except that FP distributes its fertilizers directly while USS sells to independent distributors. In this case, sales of USS and FP are not the most reliable basis for measuring benefits unless adjustments are made to account for the difference in market levels at which the sales occur.

Example 7. Foreign Parent (FP) and U.S. Subsidiary (USS) enter into a cost sharing arrangement to develop materials that will be used to train all new entry-level employees. FP and USS determine that the new materials will save approximately ten hours of training time per employee. Because their entry-level employees are paid on differing wage scales, FP and USS decide that they should not divide costs based on the number of entry-level employees hired by each. Rather, they divide costs based on compensation paid to the entry-level employees hired by each. In this case, the basis used for measuring benefits is the most reliable because there is a direct relationship between compensation paid to new entry-level employees and costs saved by FP and USS from the use of the new training materials.

Example 8. U.S. Parent (USP), Foreign Subsidiary 1 (FS1) and Foreign Subsidiary 2 (FS2) enter into a cost sharing arrangement to develop computer software that each will market and install on customers' computer systems. The participants divide costs on the basis of projected sales by USP, FS1, and FS2 of the software in their respective geographic areas. However, FS1 plans not only to sell but also to license the software to unrelated customers, and FS1's licensing income (which is a percentage of the licensees' sales) is not counted in the projected benefits. In this case, the basis used for measuring the benefits of each participant is not the most reliable because all of the benefits received by participants are not taken into account. In order to reliably determine benefit shares, FS1's projected benefits from licensing must be included in the measurement on a basis that is the same as that used to measure its own and the other participants' projected benefits from sales (e.g., all participants might measure their benefits on the basis of operating profit).

(iv) *Projections used to estimate anticipated benefits*—(A) *In general.* The reliability of an estimate of anticipated benefits also depends upon the reliability of projections used in making the estimate. Projections required for this purpose generally include a determination of the time period between the inception of the research and development and the receipt of benefits, a projection of the time over which benefits will be received, and a projection of the benefits anticipated for each year in which it is anticipated that the intangible will generate benefits. A projection of the relevant basis for measuring anticipated benefits may require a projection of the factors that underlie it. For example, a projection of operating profits may require a projection of sales, cost of sales, operating expenses, and other factors that affect operating profits. If it is anticipated that there will be significant variation among controlled participants in the timing of their receipt of benefits, and consequently benefit shares are expected to vary significantly over the years in which benefits will be received, it may be necessary to use the present discounted value of the projected benefits to reliably determine each controlled participant's share of those benefits. If it is not anticipated that benefit shares will significantly change over time, current annual benefit shares may provide a reliable projection of anticipated benefit shares. This circumstance is most likely to occur when the cost sharing arrangement is a long-term arrangement, the arrangement covers a wide variety of intangibles, the composition of the covered intangibles is unlikely to change, the covered intangibles are unlikely to generate unusual profits, and each controlled participant's share of the market is stable.

(B) *Unreliable projections.* A significant divergence between projected benefit shares and actual benefit shares may indicate that the projections were not reliable. In such a case, the district director may use actual benefits as the most reliable measure of anticipated benefits. If benefits are projected over a period of years, and the projections for initial years of the period prove to be unreliable, this may indicate that the projections for the remaining years of the period are also unreliable and thus should be adjusted. Projections will not be considered unreliable based on a divergence between a controlled participant's projected benefit share and actual benefit share if the amount of such divergence for every controlled participant is less than or equal to 20% of the participant's projected benefit share. Further, the district director will not make an allocation based on such divergence if the difference is due to an extraordinary event, beyond the control of the participants, that could not reasonably have been anticipated at the time that costs were shared. For purposes of this paragraph, all controlled participants that are not U.S. persons will be treated as a single controlled participant. Therefore, an adjustment based on an unreliable projection will be made to the cost shares of foreign controlled participants only if there is a matching adjustment to the cost shares of controlled participants that are U.S. persons. Nothing in this paragraph (f)(3)(iv)(B) will prevent the district director from making an allocation if the taxpayer did not use the most reliable basis for measuring anticipated benefits. For example, if the taxpayer measures anticipated benefits based on units sold, and the district director determines that another basis is more reliable for measuring anticipated benefits, then the fact that actual units sold were within 20% of the projected unit sales will not preclude an allocation under this section.

(C) *Foreign-to-foreign adjustments.* Notwithstanding the limitations on adjustments provided in paragraph (f)(3)(iv)(B) of this section, adjustments to cost shares based on an unreliable projection also may be made solely among foreign controlled participants if the variation between actual and projected benefits has the effect of substantially reducing U.S. tax.

(D) *Examples.* The following examples illustrate this paragraph (f)(3)(iv):

Example 1. (i) Foreign Parent (FP) and U.S. Subsidiary (USS) enter into a cost sharing arrangement to develop a new car model. The participants plan to spend four years developing the new model and four years producing and selling the new model. USS and FP project total sales of $4 billion and $2 billion, respectively, over the planned four years of exploitation of the new model. Cost shares are divided for each year based on projected total sales. Therefore, USS bears 66⅔% of each year's intangible development costs and FP bears 33⅓% of such costs.

(ii) USS typically begins producing and selling new car models a year after FP begins producing and selling new car models. The district director determines that in order to reflect USS' one-year lag in introducing new car models, a more reliable projection of each participant's share of benefits would be based on a projection of all four years of sales for each participant, discounted to present value.

Example 2. U.S. Parent (USP) and Foreign Subsidiary (FS) enter into a cost sharing arrangement to develop new and improved household cleaning products. Both participants have sold household cleaning products for many years and have stable market shares. The products under development are unlikely to produce unusual profits for either participant. The participants divide costs on the basis of each participant's current sales of household cleaning products. In this case, the participants' future benefit shares are reliably projected by current sales of cleaning products.

Example 3. The facts are the same as in *Example 2,* except that FS's market share is rapidly expanding because of the business failure of a competitor in its geographic area. The district director determines that the participants' future benefit shares are not reliably projected by current sales of cleaning products and that FS's benefit projections should take into account its growth in sales.

Example 4. Foreign Parent (FP) and U.S. Subsidiary (USS) enter into a cost sharing arrangement to develop synthetic fertilizers and insecticides. FP and USS share costs on the basis of each participant's current sales of fertilizers and insecticides. The market shares of the participants have been stable for fertilizers, but FP's market share for insecticides has been expanding. The district director determines that the participants' projections of benefit shares are reliable with regard to fertilizers, but not reliable with regard to insecticides; a more reliable projection of benefit shares would take into account the expanding market share for insecticides.

Example 5. U.S. Parent (USP) and Foreign Subsidiary (FS) enter into a cost sharing arrangement to develop new food products, dividing costs on the basis of projected sales two years in the future. In year 1, USP and FS project that their sales in year 3 will be equal, and they divide costs accordingly. In year 3, the district director examines the participants' method for dividing costs. USP and FS actually accounted for 42% and 58% of total sales, respectively. The district director agrees that sales two years in the future provide a reliable basis for estimating benefit shares. Because the differences between USP's and FS's actual and projected benefit shares are less than 20% of their projected benefit shares, the projection of future benefits for year 3 is reliable.

Example 6. The facts are the same as in *Example 5,* except that the in year 3 USP and FS actually accounted for 35% and 65% of total sales, respectively. The divergence between USP's projected and actual benefit shares is greater than 20% of USP's projected benefit share and is not due to an extraordinary event beyond the control of the participants. The district director concludes that the projection of anticipated benefit shares was unreliable, and uses actual benefits as the basis for an adjustment to the cost shares borne by USP and FS.

Example 7. U.S. Parent (USP), a U.S. corporation, and its foreign subsidiary (FS) enter a cost sharing arrangement in year 1. They project that they will begin to receive benefits from covered intangibles in years 4 through 6, and that USP will receive 60% of total benefits and FS 40% of total benefits. In years 4 through 6, USP and FS actually receive 50% each of the total benefits. In evaluating the reliability of the participants' projections, the district director compares these actual benefit shares to the projected benefit shares. Although USP's actual benefit share (50%) is within 20% of its projected benefit share (60%), FS's actual benefit share (50%) is not within 20% of its projected benefit share (40%). Based on this discrepancy, the district director may conclude that the participants' projections were not reliable and may use actual benefit shares as the basis for an adjustment to the cost shares borne by USP and FS.

Example 8. Three controlled taxpayers, USP, FS1 and FS2 enter into a cost sharing arrangement. FS1 and FS2 are foreign. USP is a United States corporation that controls all the stock of FS1 and FS2. The participants project that they will share the total benefits of the covered intangibles in the following percentages: USP 50%; FS1 30%; and FS2 20%. Actual benefit shares are as follows: USP 45%; FS1 25%; and FS2 30%. In evaluating the reliability of the participants' projections, the district director compares these actual benefit shares to the projected benefit shares. For this purpose, FS1 and FS2 are treated as a single participant. The actual benefit share received by USP (45%) is within 20% of its projected benefit share (50%). In addition, the non-US participants' actual benefit share (55%) is also within 20% of their projected benefit share (50%). Therefore, the district director concludes that the participants' projections of future benefits were reliable, despite the fact that FS2's actual benefit share (30%) is not within 20% of its projected benefit share (20%).

Example 9. The facts are the same as in *Example 8.* In addition, the district director determines that FS2 has significant operating losses and has no earnings and profits, and that FS1 is profitable and has earnings and profits. Based on all the evidence, the district director concludes that the participants arranged that FS1 would bear a larger cost share than appropriate in order to reduce FS1's earnings and profits and thereby reduce inclusions USP otherwise would be deemed to have on account of FS1 under subpart F. Pursuant to §1.482–7 (f)(3)(iv)(C), the district director may make an adjustment solely to the cost shares borne by FS1 and FS2 because FS2's projection of future benefits was unreliable and the variation between actual and projected benefits had the effect of substantially reducing USP's U.S. income tax liability (on account of FS1 subpart F income).

Example 10. (i)(A) Foreign Parent (FP) and U.S. Subsidiary (USS) enter into a cost sharing arrangement in 1996 to develop a new treatment for baldness. USS's interest in any treatment developed is the right to produce and sell the treatment in the U.S. market while FP retains rights to produce and sell the treatment in the rest of the world. USS and FP measure their anticipated benefits from the cost sharing arrangement based on their respective projected future sales of the baldness treatment. The following sales projections are used:

SALES

[In millions of dollars]

Year	USS	FP
1997	5	10
1998	20	20
1999	30	30
2000	40	40
2001	40	40
2002	40	40
2003	40	40
2004	20	20
2005	10	10
2006	5	5

(B) In 1997, the first year of sales, USS is projected to have lower sales than FP due to lags in U.S. regulatory approval for the baldness treatment. In each subsequent year USS and FP are projected to have equal sales. Sales are projected to build over the first three years of the period, level off for several years, and then decline over the final years of the period as new and improved baldness treatments reach the market.

(ii) To account for USS's lag in sales in the first year, the present discounted value of sales over the period is used as the basis for measuring benefits. Based on the risk associated with this venture, a discount rate of 10 percent is selected. The present discounted value of projected sales is determined to be approximately $154.4 million for USS and $158.9 million for FP. On this basis USS and FP are projected to obtain approximately 49.3% and 50.7% of the benefit, respectively, and the costs of developing the baldness treatment are shared accordingly.

(iii) (A) In the year 2002 the district director examines the cost sharing arrangement. USS and FP have obtained the following sales results through the year 2001:

SALES

[In millions of dollars]

Year	USS	FP
1997	0	17
1998	17	35
1999	25	41
2000	38	41
2001	39	41

(B) USS's sales initially grew more slowly than projected while FP's sales grew more quickly. In each of the first three years of the period the share of total sales of at least one of the parties diverged by over 20% from its projected share of sales. However, by the year 2001 both parties' sales had leveled off at approximately their projected values. Taking into account this leveling off of sales and all the facts and circumstances, the district director determines that it is appropriate to use the original projections for the remaining years of sales. Combining the actual results through the year 2001 with the projections for subsequent years, and using a discount rate of 10%, the present discounted value of sales is approximately $141.6 million for USS and $187.3 million for FP. This result implies that USS and FP obtain approximately 43.1% and 56.9%, respectively, of the anticipated benefits from the baldness treatment. Because these benefit shares are within 20% of the benefit shares calculated based on the original sales projections, the district director determines that, based on the difference between actual and projected benefit shares, the original projections were not unreliable. No adjustment is made based on the difference between actual and projected benefit shares.

Example 11. (i) The facts are the same as in *Example 10,* except that the actual sales results through the year 2001 are as follows:

SALES

[In millions of dollars]

Year	USS	FP
1997	0	17
1998	17	35
1999	25	44
2000	34	54
2001	36	55

(ii) Based on the discrepancy between the projections and the actual results and on consideration of all the facts, the district director determines that for the remaining years the following sales projections are more reliable than the original projections:

SALES

[In millions of dollars]

Year	USS	FP
2002	36	55
2003	36	55
2004	18	28
2005	9	14
2006	4.5	7

(iii) Combining the actual results through the year 2001 with the projections for subsequent years, and using a discount rate of 10%, the present discounted value of sales is approximately $131.2 million for USS and $229.4 million for FP. This result implies that USS and FP obtain approximately 35.4% and 63.6%, respectively, of the anticipated benefits from the baldness treatment. These benefit shares diverge by greater than 20% from the benefit shares calculated based on the original sales projections, and the district director determines that, based on the difference between actual and projected benefit shares, the original projections were unreliable. The district director adjusts costs shares for each of the taxable years under examination to conform them to the recalculated shares of anticipated benefits.

(4) *Timing of allocations.* If the district director reallocates costs under the provisions of this paragraph (f), the allocation must be reflected for tax purposes in the year in which the costs were incurred. When a cost sharing payment is owed by one member of a qualified cost sharing arrangement to another member, the district director may make appropriate allocations to reflect an arm's length rate of interest for the time value of money, consistent with the provisions of § 1.482–2(a) (Loans or advances).

(g) *Allocations of income, deductions or other tax items to reflect transfers of intangibles (buy-in)*—(1) *In general.* A controlled participant that makes intangible property available to a qualified cost sharing arrangement will be treated as having transferred interests in such property to the other controlled participants, and such other controlled participants must make buy-in payments to it, as provided in paragraph (g)(2) of this section. If the other controlled participants fail to make such payments, the district director may make appropriate allocations, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6, to reflect an arm's length consideration for the transferred intangible property. Further, if a group of controlled taxpayers participates in a qualified cost sharing arrangement, any change in the controlled participants' interests in covered intangibles, whether by reason of entry of a new participant or otherwise by reason of transfers (including deemed transfers) of interests among existing participants, is a transfer of intangible property, and the district director may make appropriate allocations, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6, to reflect an arm's length consideration for the transfer. See paragraphs (g) (3), (4), and (5) of this section. Paragraph (g)(6) of this section provides rules for assigning unassigned interests under a qualified cost sharing arrangement.

(2) *Pre-existing intangibles.* If a controlled participant makes pre-existing intangible property in which it owns an interest available to other controlled participants for purposes of research in the intangible development area under a qualified cost sharing arrangement, then each such other controlled participant must make a buy-in payment to the owner. The buy-in payment by each such other controlled participant is the arm's length charge for the use of the intangible under the rules of §§ 1.482–1 and 1.482–4 through 1.482–6, multiplied by the controlled participant's share of reasonably anticipated benefits (as defined in paragraph (f)(3) of this section). A controlled participant's payment required under this paragraph (g)(2) is deemed to be reduced to the extent of any payments owed to it under this paragraph (g)(2) from other controlled participants. Each payment received by a payee will be treated as coming pro rata out of payments made by all payors. See paragraph (g)(8), *Example 4,* of this section. Such payments will be treated as consideration for a transfer of an interest in the intangible property made available to the qualified cost sharing arrangement by the payee. Any payment to or from an uncontrolled participant in consideration for intangible property made available to the qualified cost sharing arrangement will be shared by the controlled participants in accordance with their shares of reasonably anticipated benefits (as defined in paragraph (f)(3) of this section). A controlled participant's payment required under this paragraph (g)(2) is deemed to be reduced by such a share of payments owed from an uncontrolled participant to the same extent as by any payments owed from other controlled participants under this paragraph (g)(2). See paragraph (g)(8), *Example 5,* of this section.

(3) *New controlled participant.* If a new controlled participant enters a qualified cost sharing arrangement and acquires any interest in the covered intangibles, then the new participant must pay an arm's length consideration, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6, for such interest to each controlled participant from whom such interest was acquired.

(4) *Controlled participant relinquishes interests.* A controlled participant in a qualified cost sharing arrangement may be deemed to have acquired an interest in one or more covered intangibles if another controlled participant transfers, abandons, or otherwise relinquishes an interest under the arrangement, to the benefit of the first participant. If such a relinquishment occurs, the participant relinquishing the interest must receive an arm's length consideration, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6, for its interest. If the controlled participant that has relinquished its interest subsequently uses that interest, then that participant must pay an arm's length consideration, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6, to the controlled participant that acquired the interest.

(5) *Conduct inconsistent with the terms of a cost sharing arrangement.* If, after any cost allocations authorized by paragraph (a)(2) of this section, a controlled participant bears costs of intangible development that over a period of years are consistently and materially greater or lesser than its share of reasonably anticipated benefits, then the district director may conclude that the economic substance of the arrangement between the controlled participants is inconsistent with the terms of the cost sharing arrangement. In such a case, the district director may disregard such terms and impute an agreement consistent with the controlled participants' course of conduct, under which a controlled participant that bore a disproportionately greater share of costs received additional interests in covered intangibles. See § 1.482–1(d)(3)(ii)(B) (Identifying contractual terms) and § 1.482- 4(f)(3)(ii) (Identification of owner). Accordingly, that participant must receive an arm's length payment from any controlled participant whose share of the intangible development costs is less than its share of reasonably anticipated benefits over time, under the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6.

(6) *Failure to assign interests under a qualified cost sharing arrangement.* If a qualified cost sharing arrangement fails to assign an interest in a covered

intangible, then each controlled participant will be deemed to hold a share in such interest equal to its share of the costs of developing such intangible. For this purpose, if cost shares have varied materially over the period during which such intangible was developed, then the costs of developing the intangible must be measured by their present discounted value as of the date when the first such costs were incurred.

(7) *Form of consideration.* The consideration for an acquisition described in this paragraph (g) may take any of the following forms:

(i) *Lump sum payments.* For the treatment of lump sum payments, see § 1.482–4(f)(5) (Lump sum payments);

(ii) *Installment payments.* Installment payments spread over the period of use of the intangible by the transferee, with interest calculated in accordance with § 1.482–2(a) (Loans or advances); and

(iii) *Royalties.* Royalties or other payments contingent on the use of the intangible by the transferee.

(8) *Examples.* The following examples illustrate allocations described in this paragraph (g):

Example 1. In year one, four members of a controlled group enter into a cost sharing arrangement to develop a commercially feasible process for capturing energy from nuclear fusion. Based on a reliable projection of their future benefits, each cost sharing participant bears an equal share of the costs. The cost of developing intangibles for each participant with respect to the project is approximately $1 million per year. In year ten, a fifth member of the controlled group joins the cost sharing group and agrees to bear one-fifth of the future costs in exchange for part of the fourth member's territory reasonably anticipated to yield benefits amounting to one-fifth of the total benefits. The fair market value of intangible property within the arrangement at the time the fifth company joins the arrangement is $45 million. The new member must pay one-fifth of that amount (that is, $9 million total) to the fourth member from whom it acquired its interest in covered intangibles.

Example 2. U.S. Subsidiary (USS), Foreign Subsidiary (FS) and Foreign Parent (FP) enter into a cost sharing arrangement to develop new products within the Group X product line. USS manufactures and sells Group X products in North America, FS manufactures and sells Group X products in South America, and FP manufactures and sells Group X products in the rest of the world. USS, FS and FP project that each will manufacture and sell a third of the Group X products under development, and they share costs on the basis of projected sales of manufactured products. When the new Group X products are developed, however, USS ceases to manufacture Group X products, and FP sells its Group X products to USS for resale in the North American market. USS earns a return on its resale activity that is appropriate given its function as a distributor, but does not earn a return attributable to exploiting covered intangibles. The district director determines that USS' share of the costs (one-third) was greater than its share of reasonably anticipated benefits (zero) and that it has transferred an interest in the intangibles for which it should receive a payment from FP, whose share of the intangible development costs (one-third) was less than its share of reasonably anticipated benefits over time (two-thirds). An allocation is made under §§ 1.482–1 and 1.482–4 through 1.482–6 from FP to USS to recognize USS' one-third interest in the intangibles. No allocation is made from FS to USS because FS did not exploit USS' interest in covered intangibles.

Example 3. U.S. Parent (USP), Foreign Subsidiary 1 (FS1), and Foreign Subsidiary 2 (FS2) enter into a cost sharing arrangement to develop a cure for the common cold. Costs are shared USP–50%, FS1–40% and FS2–10% on the basis of projected units of cold medicine to be produced by each. After ten years of research and development, FS1 withdraws from the arrangement, transferring its interests in the intangibles under development to USP in exchange for a lump sum payment of $10 million. The district director may review this lump sum payment, under the provisions of § 1.482–4(f)(5), to ensure that the amount is commensurate with the income attributable to the intangibles.

Example 4. (i) Four members A, B, C, and D of a controlled group form a cost sharing arrangement to develop the next generation technology for their business. Based on a reliable projection of their future benefits, the participants agree to bear shares of the costs incurred during the term of the agreement in the following percentages: A 40%; B 15%; C 25%; and D 20%. The arm's length charges, under the rules of §§ 1.482–1 and 1.482–4 through 1.482–6, for the use of the existing intangible property they respectively make available to the cost sharing arrangement are in the following amounts for the taxable year: A 80X; B 40X; C 30X; and D 30X. The provisional (before offsets) and final buy-in payments/receipts among A, B, C, and D are shown in the table as follows:

[All amounts stated in X's]

	A	B	C	D
Payments	<40>	<21>	<37.5>	<30>
Receipts	48	34	22.5	24
Final	8	13	<15>	<6>

(ii) The first row/first column shows A's provisional buy-in payment equal to the product of 100X (sum of 40X, 30X, and 30X) and A's share of anticipated benefits of 40%. The second row/first column shows A's provisional buy-in receipts equal to the sum of the products of 80X and B's, C's, and D's anticipated benefits shares (15%, 25%, and 20%, respectively). The other entries in the first two rows of the table are similarly computed. The last row shows the final buy-in receipts/payments after offsets. Thus, for the taxable year, A and B are treated as receiving the 8X and 13X, respectively, pro rata out of payments by C and D of 15X and 6X, respectively.

Example 5. A and B, two members of a controlled group form a cost sharing arrangement with an unrelated third party C to develop a new technology useable in their respective businesses. Based on a reliable projection of their future benefits, A and B agree to bear shares of 60% and 40%, respectively, of the costs incurred during the term of the agreement. A also makes available its existing technology for purposes of the research to be undertaken. The arm's length charge, under the rules of §§ 1.482–1 and 1.482–4 through 1.482–6, for the use of the existing technology is 100X for the taxable year. Under its agreement with A and B, C must make a specified cost sharing payment as well as a payment of 50X for the taxable year on account of the pre- existing intangible property made available to the cost sharing arrangement. B's provisional buy-in payment (before offsets) to A for the taxable year is 40X (the product of 100X and B's anticipated benefits share of 40%). C's payment of 50X is shared provisionally between A and B in accordance with their shares of reasonably anticipated benefits, 30X (50X times 60%) to A and 20X (50X times 40%) to B. B's final buy-in payment (after offsets) is 20X (40X less 20X). A is treated as receiving the 70X total provisional payments (40X plus 30X) pro rata out of the final payments by B and C of 20X and 50X, respectively.

(h) *Character of payments made pursuant to a qualified cost sharing arrangement*—(1) *In general.* Payments made pursuant to a qualified cost sharing arrangement (other than payments described in paragraph (g) of this section) generally will be considered costs of developing intangibles of the payor and reimbursements of the same kind of costs of developing intangibles of the payee. For purposes of this paragraph (h), a controlled participant's payment required under a qualified cost sharing arrangement is deemed to be reduced to the extent of any payments owed to it under the arrangement from other controlled or uncontrolled participants. Each payment received by a payee will be treated as coming pro rata out of payments made by all payors. Such payments will be applied pro rata against deductions for the taxable year that the payee is allowed in connection with the qualified cost sharing arrangement. Payments received in excess of such deductions will be treated as in consideration for use of the tangible property made available to the qualified cost sharing arrangement by the payee. For purposes of the research credit determined under section 41, cost sharing payments among controlled participants will be treated as provided for intra-group transactions in § 1.41–8(e). Any payment made or received by a taxpayer pursuant to an arrangement that the district director determines not to be a qualified cost sharing arrangement, or a payment made or received pursuant to paragraph (g) of this section, will be subject to the provisions of §§ 1.482–1 and 1.482–4 through 1.482–6. Any payment that in substance constitutes a cost sharing payment will be treated as such for purposes of this section, regardless of its characterization under foreign law.

(2) *Examples.* The following examples illustrate this paragraph (h):

Example 1. U.S. Parent (USP) and its wholly owned Foreign Subsidiary (FS) form a cost sharing arrangement to develop a miniature widget, the Small R. Based on a reliable projection of their future benefits, USP agrees to bear 40% and FS to bear 60% of the costs incurred during the term of the agreement. The principal costs in the intangible development area are operating expenses incurred by FS in Country Z of 100X annually, and operating expenses incurred by USP in the United States also of 100X annually. Of the total costs of 200X, USP's share is 80X and FS's share is 120X, so that FS must make a payment to USP of 20X. This payment will be treated as a reimbursement of 20X of USP's operating expenses in the United States. Accordingly, USP's Form 1120 will reflect an 80X deduction on account of activities performed in the United States for purposes of allocation and apportionment of the deduction to source. The Form 5471 for FS will reflect a 100X deduction on account of activities performed in Country Z, and a 20X deduction on account of activities performed in the United States.

Example 2. The facts are the same as in *Example 1,* except that the 100X of costs borne by USP consist of 5X of operating expenses incurred by USP in the United States and 95X of fair market value rental cost for a facility in the United States. The depreciation deduction attributable to the U.S. facility is 7X. The 20X net payment by FS to USP will first be applied in reduction pro rata of the 5X deduction for operating expenses and the 7X depreciation deduction attributable to the U.S. facility. The 8X remainder will be treated as rent for the U.S. facility.

(i) *Accounting requirements.* The accounting requirements of this paragraph are that the controlled participants in a qualified cost sharing arrangement must use a consistent method of accounting to measure costs and benefits, and must translate foreign currencies on a consistent basis.

(j) *Administrative requirements*—(1) *In general.* The administrative requirements of this paragraph consist of the documentation requirements of paragraph (j)(2) of this section and the reporting requirements of paragraph (j)(3) of this section.

(2) *Documentation*—(i) *Requirements.* A controlled participant must maintain sufficient documentation to establish that the requirements of paragraphs (b)(4) and (c)(1) of this section have been met, as well as the additional documentation specified in this paragraph (j)(2)(i), and must provide any such documentation to the Internal Revenue Service within 30 days of a request (unless an extension is granted by the district director). Documents necessary to establish the following must also be maintained—

(A) The total amount of costs incurred pursuant to the arrangement;

(B) The costs borne by each controlled participant;

(C) A description of the method used to determine each controlled participant's share of the intangible development costs, including the projections used to estimate benefits, and an explanation of why that method was selected;

(D) The accounting method used to determine the costs and benefits of the intangible development (including the method used to translate foreign currencies), and, to the extent that the method materially differs from U.S. generally accepted accounting principles, an explanation of such material differences; and

(E) Prior research, if any, undertaken in the intangible development area, any tangible or intangible property made available for use in the arrangement, by each controlled participant, and any information used to establish the value of pre-existing and covered intangibles.

(ii) *Coordination with penalty regulation.* The documents described in paragraph (j)(2)(i) of this section will satisfy the principal documents requirement under §1.6662–6(d)(2)(iii)(B) with respect to a qualified cost sharing arrangement.

(3) *Reporting requirements.* A controlled participant must attach to its U.S. income tax return a statement indicating that it is a participant in a qualified cost sharing arrangement, and listing the other controlled participants in the arrangement. A controlled participant that is not required to file a U.S. income tax return must ensure that such a statement is attached to Schedule M of any Form 5471 or to any Form 5472 filed with respect to that participant.

(k) *Effective date.* This section is effective for taxable years beginning on or after January 1, 1996.

(l) *Transition rule.* A cost sharing arrangement will be considered a qualified cost sharing arrangement, within the meaning of this section, if, prior to January 1, 1996, the arrangement was a bona fide cost sharing arrangement under the provisions of §1.482–7T (as contained in the 26 CFR part 1 edition revised as of April 1, 1995), but only if the arrangement is amended, if necessary, to conform with the provisions of this section by December 31, 1996.

[T.D. 8632, 60 FR 65557, Dec. 20, 1995, as amended by T.D. 8670, 61 FR 21956, May 13, 1996; 61 FR 33656, June 28, 1996]

§ 1.482–8 Examples of the best method rule.

In accordance with the best method rule of § 1.482–1(c), a method may be applied in a particular case only if the comparability, quality of data, and reliability of assumptions under that method make it more reliable than any other available measure of the arm's length result. The following examples illustrate the comparative analysis required to apply this rule. As with all of the examples in these regulations, these examples are based on simplified facts, are provided solely for purposes of illustrating the type of analysis required under the relevant rule, and do not provide rules of general application. Thus, conclusions reached in these examples as to the relative reliability of methods are based on the assumed facts of the examples, and are not general conclusions concerning the relative reliability of any method.

Example 1 Preference for comparable uncontrolled price method. Company A is the U.S. distribution subsidiary of Company B, a foreign manufacturer of consumer electrical appliances. Company A purchases toaster ovens from Company B for resale in the U.S. market. To exploit other outlets for its toaster ovens, Company B also sells its toaster ovens to Company C, an unrelated U.S. distributor of toaster ovens. The products sold to Company A and Company C are identical in every respect and there are no material differences between the transactions. In this case application of the CUP method, using the sales of toaster ovens to Company C, generally will provide a more reliable measure of an arm's length result for the controlled sale of toaster ovens to Company A than the application of any other method. See §§ 1.482–1(c)(2)(i) and –3(b)(2)(ii)(A).

Example 2 Resale price method preferred to comparable uncontrolled price method. The facts are the same as in Example 1, except that the toaster ovens sold to Company A are of substantially higher quality than those sold to Company C and the effect on price of such quality differences cannot be accurately determined. In addition, in order to round out its line of consumer appliances Company A purchases blenders from unrelated parties for resale in the United States. The blenders are resold to substantially the same customers as the toaster ovens, have a similar resale value to the toaster ovens, and are purchased under similar terms and in similar volumes. The distribution functions performed by Company A appear to be similar for toaster ovens and blenders. Given the product differences between the toaster ovens, application of the resale price method using the purchases and resales of blenders as the uncontrolled comparables is likely to provide a more reliable measure of an arm's length result than application of the comparable uncontrolled price method using Company B's sales of toaster ovens to Company C.

Example 3 Resale price method preferred to comparable profits method. (i) The facts are the same as in *Example 2* except that Company A purchases all its products from Company B and Company B makes no uncontrolled sales into the United States. However, six uncontrolled U.S. distributors are identified that purchase a similar line of products from unrelated parties. The uncontrolled distributors purchase toaster ovens from unrelated parties, but there are significant differences in the characteristics of the toaster ovens, including the brandnames under which they are sold.

(ii) Under the facts of this case, reliable adjustments for the effect of the different brandnames cannot be made. Except for some differences in payment terms and inventory levels, the purchases and resales of toaster ovens by the three uncontrolled distributors are closely similar to the controlled purchases in terms of the markets in which they occur, the volume of the transactions, the marketing activities undertaken by the distributor, inventory levels, warranties, allocation of currency risk, and other relevant functions and risks. Reliable adjustments can be made for the differences in payment terms and inventory levels. In addition, sufficiently detailed accounting information is available to permit adjustments to be made for differences in accounting methods or in reporting of costs between cost of goods sold and operating expenses. There are no other material differences between the controlled and uncontrolled transactions.

(iii) Because reliable adjustments for the differences between the toaster ovens, including the trademarks under which they are sold, cannot be made, these uncontrolled transactions will not serve as reliable measures of an arm's length result under the comparable uncontrolled price method. There is, however, close functional similarity between the controlled and uncontrolled transactions and reliable adjustments have been made for material differences that would be likely to affect gross profit. Under these circumstances, the gross profit margins derived under the resale price method are less likely to be susceptible to any unidentified differences than the operating profit measures used under the comparable profits method. Therefore, given the close functional comparability between the controlled and uncontrolled transactions, and the high quality of the data, the resale price method achieves a higher degree of comparability and will provide a more reliable measure of an arm's length result. See §1.482–1(c) (Best method rule).

Example 4 Comparable profits method preferred to resale price method. The facts are the same as in *Example 3,* except that the accounting information available for the uncontrolled comparables is not sufficiently detailed to ensure consistent reporting between cost of goods sold and operating expenses of material items such as discounts, insurance, warranty costs, and supervisory, general and administrative expenses. These expenses are significant in amount. Therefore, whether these expenses are treated as costs of goods sold or operating expenses would have a significant effect on gross margins. Because in this case reliable adjustments can not be made for such accounting differences, the reliability of the resale price method is significantly reduced. There is, however, close functional similarity between the controlled and uncontrolled transactions and reliable adjustments have been made for all material differences other than the potential accounting differences. Because the comparable profits method is not adversely affected by the potential accounting differences, under these circumstances the comparable profits method is likely to produce a more reliable measure of an arm's length result than the resale price method. See §1.482–1(c) (Best method rule).

Example 5 Cost plus method preferred to comparable profits method. (i) USS is a U.S. company that manufactures machine tool parts and sells them to its foreign parent corporation, FP. Four U.S. companies are identified that also manufacture various types of machine tool parts but sell them to uncontrolled purchasers.

(ii) Except for some differences in payment terms, the manufacture and sales of machine tool parts by the four uncontrolled companies are closely similar to the controlled transactions in terms of the functions performed and risks assumed. Reliable adjustments can be made for the differences in payment terms. In addition, sufficiently detailed accounting information is available to permit adjustments to be made for differences between the controlled transaction and the uncontrolled comparables in accounting methods and in the reporting of costs between cost of goods sold and operating expenses.

(iii) There is close functional similarity between the controlled and uncontrolled transactions and reliable adjustments can be made for material differences that would be likely to affect gross profit. Under these circumstances, the gross profit markups derived under the cost plus method are less likely to be susceptible to any unidentified differences than the operating profit measures used under the comparable profits method. Therefore, given the close functional comparability between the controlled and uncontrolled transactions, and the high quality of the data, the cost plus method achieves a higher degree of comparability and will provide a more reliable measure of an arm's length result. See §1.482–1(c) (Best method rule).

Example 6 Comparable profits method preferred to cost plus method. The facts are the same as in *Example 5,* except that there are significant differences between the controlled and uncontrolled transactions in terms of the types of parts and components manufactured and the complexity of the manufacturing process. The resulting functional differences are likely to materially affect gross profit margins, but it is not possible to identify the specific differences and reliably adjust for their effect on gross profit. Because these functional differences would be reflected in differences in operating expenses, the operating profit measures used under the comparable profits method implicitly reflect to some extent these functional differences. Therefore, because in this case the comparable profits method is less sensitive than the cost plus method to the potentially significant functional differences between the controlled and uncontrolled transactions, the comparable profits method is likely to produce a more reliable measure of an arm's length result than the cost plus method. See §1.482–1(c) (Best method rule).

Example 7 Preference for comparable uncontrolled transaction method. (i) USpharm, a U.S. pharmaceutical company, develops a new drug Z that is a safe and effective treatment for the disease zeezee. USpharm has obtained patents covering drug Z in the United States and in various foreign countries. USpharm has also obtained the regulatory authorizations necessary to market drug Z in the United States and in foreign countries.

(ii) USpharm licenses its subsidiary in country X, Xpharm, to produce and sell drug Z in country X. At the same time, it licenses an unrelated company, Ydrug, to produce and sell drug Z in country Y, a neighboring country. Prior to licensing the drug, USpharm had obtained patent protection and regulatory approvals in both countries and both countries provide similar protection for intellectual property rights. Country X and country Y are similar countries in terms of population, per capita income and the incidence of disease zeezee. Consequently, drug Z is expected to sell in similar quantities and at similar prices in both countries. In addition, costs of producing drug Z in each country are expected to be approximately the same.

(iii) USpharm and Xpharm establish terms for the license of drug Z that are identical in every material respect, including royalty rate, to the terms established between USpharm and Ydrug. In this case the district director determines that the royalty rate established in the Ydrug license agreement is a reliable measure of the arm's length royalty rate for the Xpharm license agreement. Given that the same property is transferred in the controlled and uncontrolled transactions, and that the circumstances under which the transactions occurred are substantially the same, in this case the comparable uncontrolled transaction method is likely to provide a more reliable measure of an arm's length result than any other method. See § 1.482–4(c)(2)(ii).

Example 8 Residual profit split method preferred to other methods. (i) USC is a U.S. company that develops, manufactures and sells communications equipment. EC is the European subsidiary of USC. EC is an established company that carries out extensive research and development activities and develops, manufactures and sells communications equipment in Europe. There are extensive transactions between USC and EC. USC licenses valuable technology it has developed to EC for use in the European market but EC also licenses valuable technology it has developed to USC. Each company uses components manufactured by the other in some of its products and purchases products from the other for resale in its own market.

(ii) Detailed accounting information is available for both USC and EC and adjustments can be made to achieve a high degree of consistency in accounting practices between them. Relatively reliable allocations of costs, income and assets can be made between the business activities that are related to the controlled transactions and those that are not. Relevant marketing and research and development expenditures can be identified and reasonable estimates of the useful life of the related intangibles are available so that the capitalized value of the intangible development expenses of USC and EC can be calculated. In this case there is no reason to believe that the relative value of these capitalized expenses is substantially different from the relative value of the intangible property of USC and EC. Furthermore, comparables are identified that could be used to estimate a market return for the routine contributions of USC and EC. Based on these facts, the residual profit split could provide a reliable measure of an arm's length result.

(iii) There are no uncontrolled transactions involving property that is sufficiently comparable to much of the tangible and intangible property transferred between USC and EC to permit use of the comparable uncontrolled price method or the comparable uncontrolled transaction method. Uncontrolled companies are identified in Europe and the United States that perform somewhat similar activities to USC and EC; however, the activities of none of these companies are as complex as those of USC and EC and they do not use similar levels of highly valuable intangible property that they have developed themselves. Under these circumstances, the uncontrolled companies may be useful in determining a market return for the routine contributions of USC and EC, but that return would not reflect the value of the intangible property employed by USC and EC. Thus, none of the uncontrolled companies is sufficiently similar so that reliable results would be obtained using the resale price, cost plus, or comparable profits methods. Moreover, no uncontrolled companies can be identified that engaged in sufficiently similar activities and transactions with each other to employ the comparable profit split method.

(iv) Given the difficulties in applying the other methods, the reliability of the internal data on USC and EC, and the fact that acceptable comparables are available for deriving a market return for the routine contributions of USC and EC, the residual profit split method is likely to provide the most reliable measure of an arm's length result in this case.

Example 9 Comparable profits method preferred to profit split. (i) Company X is a large, complex U.S. company that carries out extensive research and development activities and manufactures and markets a variety of products. Company X has developed a new process by which compact disks can be fabricated at a fraction of the cost previously required. The process is expected to prove highly profitable, since there is a large market for compact disks. Company X establishes a new foreign subsidiary, Company Y, and licenses it the rights to use the process to fabricate compact disks for the foreign market as well as continuing technical support and improvements to the process. Company Y uses the process to fabricate compact disks which it supplies to related and unrelated parties.

(ii) The process licensed to Company Y is unique and highly valuable and no uncontrolled transfers of intangible property can be found that are sufficiently comparable to permit reliable application of the comparable uncontrolled transaction method. Company X is a large, complex company engaged in a variety of activities that owns unique and highly valuable intangible property. Consequently, no uncontrolled companies can be found that are similar to Company X. Furthermore, application of the profit split method in this case would involve the difficult and problematic tasks of allocating Company X's costs and assets between the relevant business activity and other activities and assigning a value to Company X's intangible contributions. On the other hand, Company Y performs relatively routine manufacturing and marketing activities and there are a number of similar uncontrolled companies. Thus, application of the comparable profits method using Company Y as the tested party is likely to produce a more reliable measure of an arm's length result than a profit split in this case.

[T.D. 8552, 59 FR 35028, July 8, 1994]

§1.483–1 Interest on certain deferred payments.

(a) *Amount constituting interest in certain deferred payment transactions*—(1) *In general.* Except as provided in paragraph (c) of this section, section 483 applies to a contract for the sale or exchange of property if the contract provides for one or more payments due more than 1 year after the date of the sale or exchange, and the contract does not provide for adequate stated interest. In general, a contract has adequate stated interest if the contract provides for a stated rate of interest that is at least equal to the test rate (determined under §1.483–3) and the interest is paid or compounded at least annually. Section 483 may apply to a contract whether the contract is express (written or oral) or implied. For purposes of section 483, a sale or exchange is any transaction treated as a sale or exchange for tax purposes. In addition, for purposes of section 483, property includes debt instruments and investment units, but does not include money, services, or the right to use property. For the treatment of certain obligations given in exchange for services or the use of property, see sections 404 and 467. For purposes of this paragraph (a), money includes functional currency and, in certain circumstances, nonfunctional currency. See §1.988–2(b)(2) for circumstances when nonfunctional currency is treated as money rather than as property.

(2) *Treatment of contracts to which section 483 applies*—(i) *Treatment of unstated interest.* If section 483 applies to a contract, unstated interest under the contract is treated as interest for tax purposes. Thus, for example, unstated interest is not treated as part of the amount realized from the sale or exchange of property (in the case of the seller), and is not included in the purchaser's basis in the property acquired in the sale or exchange.

(ii) *Method of accounting for interest on contracts subject to section 483.* Any stated or unstated interest on a contract subject to section 483 is taken into account by a taxpayer under the taxpayer's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method). See §§1.446–1, 1.451–1, and 1.461–1. For purposes of the preceding sentence, the amount of interest (including unstated interest) allocable to a payment under a contract to which section 483 applies is determined under §1.446–2(e).

(b) *Definitions*—(1) *Deferred payments.* For purposes of the regulations under section 483, a deferred payment means any payment that constitutes all or a part of the sales price (as defined in paragraph (b)(2) of this section), and that is due more than 6 months after the date of the sale or exchange. Except as provided in section 483(c)(2) (relating to the treatment of a debt instrument of the purchaser), a payment may be made in the form of cash, stock or securities, or other property.

(2) *Sales price.* For purposes of section 483, the sales price for any sale or exchange is the sum of the amount due under the contract (other than stated interest) and the amount of any liability included in the amount realized from the sale or exchange. See §1.1001–2. Thus, the sales price for any sale or exchange includes any amount of unstated interest under the contract.

(c) *Exceptions to and limitations on the application of section 483*—(1) *In general.* Sections 483(d), 1274(c)(4), and 1275(b) contain exceptions to and limitations on the application of section 483.

(2) *Sales price of $3,000 or less.* Section 483(d)(2) applies only if it can be determined at the time of the sale or exchange that the sales price cannot exceed $3,000, regardless of whether the sales price eventually paid for the property is less than $3,000.

(3) *Other exceptions and limitations*—(i) *Certain transfers subject to section 1041.* Section 483 does not apply to any transfer of property subject to section

1041 (relating to transfers of property between spouses or incident to divorce).

(ii) *Treatment of certain obligees.* Section 483 does not apply to an obligee under a contract for the sale or exchange of personal use property (within the meaning of section 1275(b)(3)) in the hands of the obligor and that evidences a below-market loan described in section 7872(c)(1).

(iii) *Transactions involving certain demand loans.* Section 483 does not apply to any payment under a contract that evidences a demand loan that is a below-market loan described in section 7872(c)(1).

(iv) *Transactions involving certain annuity contracts.* Section 483 does not apply to any payment under an annuity contract described in section 1275(a)(1)(B) (relating to annuity contracts excluded from the definition of debt instrument).

(v) *Options.* Section 483 does not apply to any payment under an option to buy or sell property.

(d) *Assumptions.* If a debt instrument is assumed, or property is taken subject to a debt instrument, in connection with a sale or exchange of property, the debt instrument is treated for purposes of section 483 in a manner consistent with the rules of § 1.1274–5.

(e) *Aggregation rule.* For purposes of section 483, all sales or exchanges that are part of the same transaction (or a series of related transactions) are treated as a single sale or exchange, and all contracts calling for deferred payments arising from the same transaction (or a series of related transactions) are treated as a single contract. This rule, however, generally only applies to contracts and to sales or exchanges involving a single buyer and a single seller.

(f) *Effective date.* This section applies to sales and exchanges that occur on or after April 4, 1994. Taxpayers, however, may rely on this section for sales and exchanges that occur after December 21, 1992, and before April 4, 1994.

[T.D. 8517, 59 FR 4805, Feb. 2, 1994]

§ 1.483–2 Unstated interest.

(a) *In general*—(1) *Adequate stated interest.* For purposes of section 483, a contract has unstated interest if the contract does not provide for adequate stated interest. A contract does not provide for adequate stated interest if the sum of the deferred payments exceeds—

(i) The sum of the present values of the deferred payments and the present values of any stated interest payments due under the contract; or

(ii) In the case of a cash method debt instrument (within the meaning of section 1274A(c)(2)) received in exchange for property in a potentially abusive situation (as defined in § 1.1274–3), the fair market value of the property reduced by the fair market value of any consideration other than the debt instrument, and reduced by the sum of all principal payments that are not deferred payments.

(2) *Amount of unstated interest.* For purposes of section 483, unstated interest means an amount equal to the excess of the sum of the deferred payments over the amount described in paragraph (a)(1)(i) or (a)(1)(ii) of this section, whichever is applicable.

(b) *Operational rules*—(1) *In general.* For purposes of paragraph (a) of this section, rules similar to those in § 1.1274–2 apply to determine whether a contract has adequate stated interest and the amount of unstated interest, if any, on the contract.

(2) *Present value.* For purposes of paragraph (a) of this section, the present value of any deferred payment or interest payment is determined by discounting the payment from the date it becomes due to the date of the sale or exchange at the test rate of interest applicable to the contract in accordance with § 1.483–3.

(c) *Examples.* The following examples illustrate the rules of this section.

Example 1. Contract that does not have adequate stated interest. On January 1, 1995, A sells B nonpublicly traded property under a contract that calls for a $100,000 payment of principal on January 1, 2005, and 10 annual interest payments of $9,000 on January 1 of each year, beginning on January 1, 1996. Assume that the test rate of interest is 9.2 percent, compounded annually. The contract does not provide for adequate stated interest because it does not provide for interest equal to 9.2 percent, compounded annually. The present value of the deferred payments is $98,727.69. As a result, the contract has unstated interest of $1,272.31 ($100,000 − $98,727.69).

Example 2. Contract that does not have adequate stated interest; no interest for initial short period. On May 1, 1996, A sells B nonpublicly traded property under a contract that calls for B to make a principal payment of $200,000 on December 31, 1998, and semiannual interest payments of $9,000, payable on June 30 and December 31 of each year, beginning on December 31, 1996. Assume that the test rate of interest is 9 percent, compounded semiannually. Even though the contract calls for a stated rate of interest no lower than the test rate of interest, the contract does not provide for adequate stated interest because the stated rate of interest does not apply for the short period from May 1, 1996, through June 30, 1996.

Example 3. Potentially abusive situation—(i) *Facts.* In a potentially abusive situation, a contract for the sale of nonpublicly traded personal property calls for the issuance of a cash method debt instrument (as defined in section 1274A(c)(2)) with a stated principal amount of $700,000, payable in 5 years. No other consideration is given. The debt instrument calls for annual payments of interest over its entire term at a rate of 9.2 percent, compounded annually (the test rate of interest applicable to the debt instrument). Thus, the present value of the deferred payment and the interest payments is $700,000. Assume that the fair market value of the property is $500,000.

(ii) *Amount of unstated interest.* A cash method debt instrument received in exchange for property in a potentially abusive situation provides for adequate stated interest only if the sum of the deferred payments under the instrument does not exceed the fair market value of the property. Because the deferred payment ($700,000) exceeds the fair market value of the property ($500,000), the debt instrument does not provide for adequate stated interest. Therefore, the debt instrument has unstated interest of $200,000.

Example 4. Variable rate debt instrument with adequate stated interest; variable rate as of the issue date greater than the test rate—(i) *Facts.* A contract for the sale of nonpublicly traded property calls for the issuance of a debt instrument in the principal amount of $75,000 due in 10 years. The debt instrument calls for interest payable semiannually at a rate of 3 percentage points above the yield on 6-month Treasury bills at the mid-point of the semiannual period immediately preceding each interest payment date. Assume that the interest rate is a qualified floating rate and that the debt instrument is a variable rate debt instrument within the meaning of § 1.1275–5.

(ii) *Adequate stated interest.* Under paragraph (b)(1) of this section, rules similar to those in § 1.1274–2(f) apply to determine whether the debt instrument has adequate stated interest. Assume that the test rate of interest applicable to the debt instrument is 9 percent, compounded semiannually. Assume also that the yield on 6-month Treasury bills on the date of the sale is 8.89 percent, which is greater than the yield on 6-month Treasury bills on the first date on which there is a binding written contract that substantially sets forth the terms under which the sale is consummated. Under § 1.1274–2(f), the debt instrument is tested for adequate stated interest as if it provided for a stated rate of interest of 11.89 percent (3 percent plus 8.89 percent), compounded semiannually, payable over its entire term. Because the test rate of interest is 9 percent, compounded semiannually, and the debt instrument is treated as providing for stated interest of 11.89 percent, compounded semiannually, the debt instrument provides for adequate stated interest.

(d) *Effective date.* This section applies to sales and exchanges that occur on or after April 4, 1994. Taxpayers, however, may rely on this section for sales and exchanges that occur after December 21, 1992, and before April 4, 1994.

[T.D. 8517, 59 FR 4806, Feb. 2, 1994]

§ 1.483–3 Test rate of interest applicable to a contract.

(a) *General rule.* For purposes of section 483, the test rate of interest for a contract is the same as the test rate that would apply under § 1.1274–4 if the contract were a debt instrument. Paragraph (b) of this section, however, provides for a lower test rate in the case of certain sales or exchanges of land between related individuals.

(b) *Lower rate for certain sales or exchanges of land between related individuals*—(1) *Test rate.* In the case of a qualified sale or exchange of land between related individuals (described in section 483(e)), the test rate is not greater than 6 percent, compounded semiannually, or an equivalent rate based on an appropriate compounding period.

(2) *Special rules.* The following rules and definitions apply in determining whether a sale or exchange is a qualified sale under section 483(e):

(i) *Definition of family members.* The members of an individual's family are determined as of the date of the sale or exchange. The members of an individual's family include those individuals described in section 267(c)(4) and the spouses of those individuals. In addition, for purposes of section 267(c)(4), full effect is given to a legal adoption, ancestor means parents and grandparents, and lineal descendants means children and grandchildren.

(ii) *$500,000 limitation.* Section 483(e) does not apply to the extent that the stated principal amount of the debt instrument issued in the sale or exchange, when added to the aggregate stated principal amount of any other debt instruments to which section 483(e) applies that were issued in prior qualified sales between the same two individuals during the same calendar year, exceeds $500,000. See *Example 3* of paragraph (b)(3) of this section.

(iii) *Other limitations.* Section 483(e) does not apply if the parties to a contract include persons other than the related individuals and the parties enter into the contract with an intent to circumvent the purposes of section 483(e). In addition, if the property sold or exchanged includes any property other than land, section 483(e) applies only to the extent that the stated principal amount of the debt instrument issued in the sale or exchange is attributable to the land (based on the relative fair market values of the land and the other property).

(3) *Examples.* The following examples illustrate the rules of this paragraph (b).

Example 1. On January 1, 1995, A sells land to B, A's child, for $650,000. The contract for sale calls for B to make a $250,000 down payment and issue a debt instrument with a stated principal amount of $400,000. Because the stated principal amount of the debt instrument is less than $500,000, the sale is a qualified sale and section 483(e) applies to the debt instrument.

Example 2. The facts are the same as in *Example 1* of paragraph (b)(3) of this section, except that on June 1, 1995, A sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $100,000. The stated principal amount of this debt instrument ($100,000) when added to the stated principal amount of the prior debt instrument ($400,000) does not exceed $500,000. Thus, section 483(e) applies to both debt instruments.

Example 3. The facts are the same as in *Example 1* of paragraph (b)(3) of this section, except that on June 1, 1995, A sells additional land to B under a contract that calls for B to issue a debt instrument with a stated principal amount of $150,000. The stated principal amount of this debt instrument when added to the stated principal amount of the prior debt instrument ($400,000) exceeds $500,000. Thus, for purposes of section 483(e), the debt instrument issued in the sale of June 1, 1995, is treated as two separate debt instruments: a $100,000 debt instrument (to which section 483(e) applies) and a $50,000 debt instrument (to which section 1274, if otherwise applicable, applies).

(c) *Effective date.* This section applies to sales and exchanges that occur on or after April 4, 1994. Taxpayers, however, may rely on this section for sales and exchanges that occur after December 21, 1992, and before April 4, 1994.

[T.D. 8517, 59 FR 4807, Feb. 2, 1994]

§ 1.483–4 Contingent payments.

(a) *In general.* This section applies to a contract for the sale or exchange of property (the overall contract) if the contract provides for one or more contingent payments and the contract is subject to section 483. This section applies even if the contract provides for adequate stated interest under § 1.483–2. If this section applies to a contract, interest under the contract is generally computed and accounted for using rules similar to those that would apply if the contract were a debt instrument subject to § 1.1275–4(c). Consequently, all noncontingent payments under the overall contract are treated as if made under a separate contract, and interest accruals on this separate contract are computed under rules similar to those contained in § 1.1275–4(c)(3). Each contingent payment under the overall contract is characterized as principal and interest under rules similar to those contained in § 1.1275–4(c)(4). However, any interest, or amount treated as interest, on a contract subject to this section is taken into account by a taxpayer under the taxpayer's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method).

(b) *Examples.* The following examples illustrate the provisions of paragraph (a) of this section:

Example 1. Deferred payment sale with contingent interest—(i) *Facts.* On December 31, 1996, A sells depreciable personal property to B. As consideration for the sale, B issues to A a debt instrument with a maturity date of December 31, 2001. The debt instrument provides for a principal payment of $200,000 on the maturity date, and a payment of interest on December 31 of each year, beginning in 1997, equal to a percentage of the total gross income derived from the property in that year. However, the total interest payable on the debt instrument over its entire term is limited to a maximum of $50,000. Assume that on December 31, 1996, the short-term applicable Federal rate is 4 percent, compounded annually, and the mid-term applicable Federal rate is 5 percent, compounded annually.

(ii) *Treatment of noncontingent payment as separate contract.* Each payment of interest is a contingent payment. Accordingly, under paragraph (a) of this section, for purposes of applying section 483 to the debt instrument, the right to the noncontingent payment of $200,000 is treated as a separate contract. The amount of unstated interest on this separate contract is equal to $43,295, which is the amount by which the payment ($200,000) exceeds the present value of the payment ($156,705), calculated using the test rate of 5 percent, compounded annually. The $200,000 payment is thus treated as consisting of a payment of interest of $43,295 and a payment of principal of $156,705. The interest is includible in A's gross income, and deductible by B, under their respective methods of accounting.

(iii) *Treatment of contingent payments.* Assume that the amount of the contingent payment that is paid on December 31, 1997, is $20,000. Under paragraph (a) of this section, the $20,000 payment is treated as a payment of principal of $19,231 (the present value, as of the date of sale, of the $20,000 payment, calculated using a test rate equal to 4 percent, compounded annually) and a payment of interest of $769. The $769 interest payment is includible in A's gross income, and deductible by B, in their respective taxable years in which the payment occurs. The amount treated as principal gives B additional basis in the property on December 31, 1997. The remaining contingent payments on the debt instrument are accounted for similarly, using a test rate of 4 percent, compounded annually, for the payments made on December 31, 1998, and December 31, 1999, and a test rate of 5 percent, compounded annually, for the payments made on December 31, 2000, and December 31, 2001.

Example 2. Contingent stock payout—(i) *Facts.* M Corporation and N Corporation each owns one-half of the stock of O Corporation. On December 31, 1996, pursuant to a reorganization qualifying under section 368(a)(1)(B), M acquires the one-half interest of O held by N in exchange for 30,000 shares of M voting stock and a non-assignable right to receive up to 10,000 additional shares of M's voting stock during the next 3 years, provided the net profits of O exceed certain amounts specified in the contract. No interest is provided for in the contract. No additional shares are received in 1997 or in 1998. In 1999, the annual earnings of O exceed the specified amount, and, on December 31, 1999, an additional 3,000 M voting shares are transferred to N. The fair market value of the 3,000 shares on December 31, 1999, is $300,000. Assume that on December 31, 1996, the short-term applicable Federal rate is 4 percent, compounded annually. M and N are calendar year taxpayers.

(ii) *Allocation of interest.* Section 1274 does not apply to the right to receive the additional shares because the right is not a debt instrument for federal income tax purposes. As a result, the transfer of the 3,000 M voting shares to N is a deferred payment subject to section 483 and a portion of the shares is treated as unstated interest under that section. The amount of interest allocable to the shares is equal to the excess of $300,000 (the fair market value of the shares on December 31, 1999) over $266,699 (the present value of $300,000, determined by discounting the payment at the test rate of 4 percent, compounded annually, from December 31, 1999, to December 31, 1996). As a result, the amount of interest allocable to the payment of the shares is $33,301 ($300,000–$266,699). Both M and N take the interest into account in 1999.

(c) *Effective date.* This section applies to sales and exchanges that occur on or after August 13, 1996.

[T.D. 8674, 61 FR 30138, June 14, 1996]

REGULATIONS APPLICABLE FOR TAXABLE YEARS BEGINNING ON OR BEFORE APRIL 21, 1993

§1.482–1A Allocation of income and deductions among taxpayers.

(a) *Definitions.* When used in this section and in §1.482–2—

(1) The term "organization" includes any organization of any kind, whether it be a sole proprietorship, a partnership, a trust, an estate, an association, or a corporation (as each is defined or understood in the Internal Revenue Code or the regulations thereunder), irrespective of the place where organized, where operated, or where its trade or business is conducted, and regardless of whether domestic or foreign, whether exempt, whether affiliated, or whether a party to a consolidated return.

(2) The term "trade" or "business" includes any trade or business activity of any kind, regardless of whether or where organized, whether owned individually or otherwise, and regardless of the place where carried on.

(3) The term ‘‘controlled’’ includes any kind of control, direct or indirect, whether legally enforceable, and however exercisable or exercised. It is the reality of the control which is decisive, not its form or the mode of its exercise. A presumption of control arises if income or deductions have been arbitrarily shifted.

(4) The term ‘‘controlled taxpayer’’ means any one of two or more organizations, trades, or businesses owned or controlled directly or indirectly by the same interests.

(5) The terms ‘‘group’’ and ‘‘group of controlled taxpayers’’ mean the organizations, trades, or businesses owned or controlled by the same interests.

(6) The term ‘‘true taxable income’’ means, in the case of a controlled taxpayer, the taxable income (or, as the case may be, any item or element affecting taxable income) which would have resulted to the controlled taxpayer, had it in the conduct of its affairs (or, as the case may be, in the particular contract, transaction, arrangement, or other act) dealt with the other member or members of the group at arm’s length. It does not mean the income, the deductions, the credits, the allowances, or the item or element of income, deductions, credits, or allowances, resulting to the controlled taxpayer by reason of the particular contract, transaction, or arrangement, the controlled taxpayer, or the interests controlling it, chose to make (even though such contract, transaction, or arrangement be legally binding upon the parties thereto).

(b) *Scope and purpose.* (1) The purpose of section 482 is to place a controlled taxpayer on a tax parity with an uncontrolled taxpayer, by determining, according to the standard of an uncontrolled taxpayer, the true taxable income from the property and business of a controlled taxpayer. The interests controlling a group of controlled taxpayers are assumed to have complete power to cause each controlled taxpayer so to conduct its affairs that its transactions and accounting records truly reflect the taxable income from the property and business of each of the controlled taxpayers. If, however, this has not been done, and the taxable incomes are thereby understated, the district director shall intervene, and, by making such distributions, apportionments, or allocations as he may deem necessary of gross income, deductions, credits, or allowances, or of any item or element affecting taxable income, between or among the controlled taxpayers constituting the group, shall determine the true taxable income of each controlled taxpayer. The standard to be applied in every case is that of an uncontrolled taxpayer dealing at arm’s length with another uncontrolled taxpayer.

(2) Section 482 and this section apply to the case of any controlled taxpayer, whether such taxpayer makes a separate or a consolidated return. If a controlled taxpayer makes a separate return, the determination is of its true separate taxable income. If a controlled taxpayer is a party to a consolidated return, the true consolidated taxable income of the affiliated group and the true separate taxable income of the controlled taxpayer are determined consistently with the principles of a consolidated return.

(3) Section 482 grants no right to a controlled taxpayer to apply its provisions at will, nor does it grant any right to compel the district director to apply such provisions. It is not intended (except in the case of the computation of consolidated taxable income under a consolidated return) to effect in any case such a distribution, apportionment, or allocation of gross income, deductions, credits, or allowances, or any item of gross income, deductions, credits, or allowances, as would produce a result equivalent to a computation of consolidated taxable income under subchapter A, chapter 6 of the Code.

(c) *Application.* Transactions between one controlled taxpayer and another will be subjected to special scrutiny to ascertain whether the common control is being used to reduce, avoid, or escape taxes. In determining the true taxable income of a controlled taxpayer, the district director is not restricted to the case of improper accounting, to the case of a fraudulent, colorable, or sham transaction, or to the case of a device designed to reduce or avoid tax by shifting or distorting income, deductions, credits, or allowances. The authority to determine true taxable income extends to any case in which either by inadvertence or design the taxable income, in whole or in part, of a controlled taxpayer, is other than it would have been had the taxpayer in the conduct of his affairs been an uncontrolled taxpayer dealing at arm's length with another uncontrolled taxpayer.

(d) *Method of allocation.* (1) The method of allocating, apportioning, or distributing income, deductions, credits, and allowances to be used by the district director in any case, including the form of the adjustments and the character and source of amounts allocated, shall be determined with reference to the substance of the particular transactions or arrangements which result in the avoidance of taxes or the failure to clearly reflect income. The appropriate adjustments may take the form of an increase or decrease in gross income, increase or decrease in deductions (including depreciation), increase or decrease in basis of assets (including inventory), or any other adjustment which may be appropriate under the circumstances. See §1.482–2 for specific rules relating to methods of allocation in the case of several types of business transactions.

(2) Whenever the district director makes adjustments to the income of one member of a group of controlled taxpayers (such adjustments being referred to in this paragraph as ''primary'' adjustments) he shall also make appropriate correlative adjustments to the income of any other member of the group involved in the allocation. The correlative adjustment shall actually be made if the U.S. income tax liability of the other member would be affected for any pending taxable year. Thus, if the district director makes an allocation of income, he shall not only increase the income of one member of the group, but shall decrease the income of the other member if such adjustment would have an effect on the U.S. income tax liability of the other member for any pending taxable year. For the purposes of this subparagraph, a ''pending taxable year'' is any taxable year with respect to which the U.S. income tax return of the other member has been filed by the time the allocation is made, and with respect to which a credit or refund is not barred by the operation of any law or rule of law. If a correlative adjustment is not actually made because it would have no effect on the U.S. income tax liability of the other member involved in the allocation for any pending taxable year, such adjustment shall nevertheless be deemed to have been made for the purpose of determining the U.S. income tax liability of such member for a later taxable year, or for the purposes of determining the U.S. income tax liability of any person for any taxable year. The district director shall furnish to the taxpayer with respect to which the primary adjustment is made a written statement of the amount and nature of the correlative adjustment which is deemed to have been made. For purposes of this subparagraph, a primary adjustment shall not be considered to have been made (and therefore a correlative adjustment is not required to be made) until the first occurring of the following events with respect to the primary adjustment:

(i) The date of assessment of the tax following execution by the taxpayer of a Form 870 (Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment) with respect to such adjustment,

(ii) Acceptance of a Form 870–AD (Offer of Waiver of Restriction on Assessment and Collection Deficiency in Tax and Acceptance of Overassessment),

(iii) Payment of the deficiency,

(iv) Stipulation in the Tax Court of the United States, or

(v) Final determination of tax liability by offer-in-compromise, closing agreement, or court action.

The principles of this subparagraph may be illustrated by the following examples in each of which it is assumed that X and Y are members of the same group of controlled entities and that they regularly compute their incomes on the basis of a calendar year:

Example (1). Assume that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length rental charge for Y's use of X's tangible property in

1966; that X consents to an assessment reflecting such adjustment by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. The primary adjustment is therefore considered to have been made in 1968. Assume further that both X and Y are United States corporations and that Y had net operating losses in 1963, 1964, 1965, 1966, and 1967. Although a correlative adjustment would not have an effect on Y's U.S. income tax liability for any pending taxable year, an adjustment increasing Y's net operating loss for 1966 shall be deemed to have been made for the purposes of determining Y's U.S. income tax liability for 1968 or a later taxable year to which the increased operating loss may be carried. The district director shall notify X in writing of the amount and nature of the adjustment which is deemed to have been made to Y.

Example (2). Assume that X and Y are United States corporations; that X is in the business of rendering engineering services; that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length fee for the rendition of engineering services by X in 1966 relating to the construction of Y's factory; that X consents to an assessment reflecting such adjustment by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. Assume further that fees for such services would properly constitute a capital expenditure by Y, and that Y does not place the factory in service until 1969. Although a correlative adjustment (increase in basis) would not have an effect on Y's U.S. income tax liability for a pending taxable year, an adjustment increasing the basis of Y's assets for 1966 shall be deemed to have been made in 1968 for the purpose of computing allowable depreciation or gain or loss on disposition for 1969 and any future taxable year. The district director shall notify X in writing of the amount and nature of the adjustment which is deemed to have been made to Y.

Example (3). Assume that X is a U.S. taxpayer and Y is a foreign taxpayer not engaged in a trade or business in the United States; that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length interest charge on a loan made to Y; that X consents to an assessment reflecting such allocation by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. Although a correlative adjustment would not have an effect on Y's U.S. income tax liability, an adjustment in Y's income for 1966 shall be deemed to have been made in 1968 for the purposes of determining the amount of Y's earnings and profits for 1966 and subsequent years, and of any other effect it may have on any person's U.S. income tax liability for any taxable year. The district director shall notify X in writing of the amount and nature of the allocation which is deemed to have been made to Y.

(3) In making distributions, apportionments, or allocations between two members of a group of controlled entities with respect to particular transactions, the district director shall consider the effect upon such members of an arrangement between them for reimbursement within a reasonable period before or after the taxable year if the taxpayer can establish that such an arrangement in fact existed during the taxable year under consideration. The district director shall also consider the effect of any other nonarm's length transaction between them in the taxable year which, if taken into account, would result in a setoff against any allocation which would otherwise be made, provided the taxpayer is able to establish with reasonable specificity that the transaction was not at arm's length and the amount of the appropriate arm's length charge. For purposes of the preceding sentence, the term arm's length refers to the amount which was charged or would have been charged in independent transactions with unrelated parties under the same or similar circumstances considering all the relevant facts and without regard to the rules found in § 1.482–2 by which certain charges are deemed to be equal to arm's length. For example, assume that one member of a group performs services which benefit a second member, which would in itself require an allocation to reflect an arm's length charge for the performance of such services. Assume further that the first member can establish that during the same taxable year the second member engages in other nonarm's length transactions which benefit the first member, such as by selling products to the first member at a discount, or purchasing products from the first member at a premium, or paying royalties to the first member in an excessive amount. In such case, the value of the benefits received by the first member as a result of the other activities will be set-off against the allocation which would otherwise be made. If the effect of the set-off is to change the characterization or source of the income or

deductions, or otherwise distort taxable income, in such a manner as to affect the United States tax liability of any member, allocations will be made to reflect the correct amount of each category of income or deductions. In order to establish that a set-off to the adjustments proposed by the district director is appropriate, the taxpayer must notify the district director of the basis of any claimed set-off at any time before the expiration of the period ending 30 days after the date of a letter by which the district director transmits an examination report notifying the taxpayer of proposed adjustments or before July 16, 1968, whichever is later. The principles of this subparagraph may be illustrated by the following examples, in each of which it is assumed that P and S are calendar year corporations and are both members of the same group of controlled entities:

Example (1). P performs services in 1966 for the benefit of S in connection with S's manufacture and sale of a product. S does not pay P for such services in 1966, but in consideration for such services, agrees in 1966 to pay P a percentage of the amount of sales of the product in 1966 through 1970. In 1966 it appeared this agreement would provide adequate consideration for the services. No allocation will be made with respect to the services performed by P.

Example (2). P renders services to S in connection with the construction of S's factory. An arm's length charge for such services, determined under paragraph (b) of §1.482–2, would be $100,000. During the same taxable year P makes available to S a machine to be used in such construction. P bills S $125,000 for the services, but does not bill for the use of the machine. No allocation will be made with respect to the excessive charge for services or the undercharge for the machine if P can establish that the excessive charge for services was equal to an arm's length charge for the use of the machine, and if the taxable income and income tax liabilities of P and S are not distorted.

Example (3). Assume the same facts as in example (2), except that, if P had reported $25,000 as rental income and $25,000 less service income, it would have been subject to the tax on personal holding companies. Allocations will be made to reflect the correct amounts of rental income and service income.

(4) If the members of a group of controlled taxpayers engage in transactions with one another, the district director may distribute, apportion, or allocate income, deductions, credits, or allowances to reflect the true taxable income of the individual members under the standards set forth in this section and in §1.482–2 notwithstanding the fact that the ultimate income anticipated from a series of transactions may not be realized or is realized during a later period. For example, if one member of a controlled group sells a product at less than an arm's length price to a second member of the group in one taxable year and the second member resells the product to an unrelated party in the next taxable year, the district director may make an appropriate allocation to reflect an arm's length price for the sale of the product in the first taxable year, notwithstanding that the second member of the group had not realized any gross income from the resale of the product in the first year. Similarly, if one member of a group lends money to a second member of the group in a taxable year, the district director may make an appropriate allocation to reflect an arm's length charge for interest during such taxable year even if the second member does not realize income during such year. The provisions of this subparagraph apply even if the gross income contemplated from a series of transactions is never, in fact, realized by the other members.

(5) Section 482 may, when necessary to prevent the avoidance of taxes or to clearly reflect income, be applied in circumstances described in sections of the Code (such as section 351) providing for nonrecognition of gain or loss. See, for example, ''National Securities Corporation v. Commissioner of Internal Revenue'', 137 F. 2d 600 (3d Cir. 1943), cert. denied 320 U.S. 794 (1943).

(6) If payment or reimbursement for the sale, exchange, or use of property, the rendition of services, or the advance of other consideration among members of a group of controlled entities was prevented, or would have been prevented, at the time of the transaction because of currency or other restrictions imposed under the laws of any foreign country, any distributions, apportionments, or allocations which may be made under section 482 with respect to such transactions may be

treated as deferrable income or deductions, providing the taxpayer has, for the year to which the distributions, apportionments, or allocations relate, elected to use a method of accounting in which the reporting of deferrable income is deferred until the income ceases to be deferrable income. Under such method of accounting, referred to in this section as the deferred income method of accounting, any payments or reimbursements which were prevented or would have been prevented, and any deductions attributable directly or indirectly to such payments or reimbursements, shall be deferred until they cease to be deferrable under such method of accounting. If such method of accounting has not been elected with respect to the taxable year to which the allocations under section 482 relate, the taxpayer may elect such method with respect to such allocations (but not with respect to other deferrable income) at any time before the first occurring of the following events with respect to the allocations:

(i) Execution by the taxpayer of Form 870 (Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment);

(ii) Expiration of the period ending 30 days after the date of a letter by which the district director transmits an examination report notifying the taxpayer of proposed adjustments reflecting such allocations or before July 16, 1968, whichever is later; or

(iii) Execution of a closing agreement or offer-in-compromise.

The principles of this subparagraph may be illustrated by the following example in which it is assumed that X, a domestic corporation, and Y, a foreign corporation, are members of the same group of controlled entities:

Example. X, which is in the business of rendering a certain type of service to unrelated parties, renders such services for the benefit of Y in 1965. The direct and indirect costs allocable to such services are $60,000, and an arm's length charge for such services is $100,000. Assume that the district director proposes to increase X's income by $100,000, but that the country in which Y is located would have blocked payment in 1965 for such services. If, prior to the first occurring of the events described in subdivisions (i), (ii), or (iii) of this subparagraph, X elects to use the deferred income method of accounting with respect to such allocation, the $100,000 allocation and the $60,000 of costs are deferrable until such amounts cease to be deferrable under X's method of accounting.

[T.D. 6595, 27 FR 3598, Apr. 14, 1962, as amended by T.D. 6952, 33 FR 5848, Apr. 16, 1968. Redesignated by T.D. 8470, 58 FR 5271, Jan. 21, 1993]

§ 1.482–2A Determination of taxable income in specific situations.

(a)–(c) For applicable rules, see § 1.482–2T (a) through (c).

(d) *Transfer or use of intangible property*—(1) *In general.* (i) Except as otherwise provided in subparagraph (4) of this paragraph, where intangible property or an interest therein is transferred, sold, assigned, loaned, or otherwise made available in any manner by one member of a group of controlled entities (referred to in this paragraph as the transferor) to another member of the group (referred to in this paragraph as the transferee) for other than an arm's length consideration, the district director may make appropriate allocations to reflect an arm's length consideration for such property or its use. Subparagraph (2) of this paragraph provides rules for determining the form an amount of an appropriate allocation, subparagraph (3) of this paragraph provides a definition of ''intangible property'', and subparagraph (4) of this paragraph provides rules with respect to certain cost-sharing arrangements in connection with the development of intangible property. For purposes of this paragraph, an interest in intangible property may take the form of the right to use such property.

(ii)*(a)* In the absence of a bona fide cost-sharing arrangement (as defined in subparagraph (4) of this paragraph), where one member of a group of related entities undertakes the development of intangible property as a developer within the meaning of *(c)* of this subdivision, no allocation with respect to such development activity shall be made under the rules of this paragraph or any other paragraph of this section (except as provided in *(b)* of this subdivision) until such time as any property developed, or any interest therein, is or is deemed to be transferred, sold, assigned, loaned, or otherwise made available in any manner by the developer to a related entity in a transfer subject to the rules of this paragraph. Where a member of the group other than the developer acquires an interest in the property developed by virtue of obtaining a patent or copyright, or by any other means, the developer shall be deemed to have transferred such interest in such property to the acquiring member in a transaction subject to the rules of this paragraph. For example, if one member of a group (the developer) undertakes to develop a new patentable product and the costs of development are incurred by that entity over a period of 3 years, no allocation with respect to that entity's activity shall be made during such period. The amount of any allocation that may be appropriate at the expiration of such development period when, for example, the patent on the product is transferred, or deemed transferred, to a related entity for other than an arm's length consideration, shall be determined in accordance with the rules of this paragraph.

(b) Where one member of a group renders assistance in the form of loans, services, or the use of tangible or intangible property to a developer in connection with an attempt to develop intangible property, the amount of any allocation that may be appropriate with respect to such assistance shall be determined in accordance with the rules of the appropriate paragraph or paragraphs of this section. Thus, where one entity allows a related entity, which is the developer, to use tangible property, such as laboratory equipment, in connection with the development of intangible property, the amount of any allocation that may be appropriate with respect to such use shall be determined in accordance with the rules of paragraph *(c)* of this section. In the event that the district director does not exercise his discretion to make allocations with respect to the assistance rendered to the developer, the value of the assistance shall be allowed as a set-off against any allocation that the district director may make under this paragraph as a result of the transfer of the intangible property to the entity rendering the assistance.

(c) The determination as to which member of a group of related entities is a developer and which members of the group are rendering assistance to the developer in connection with its development activities shall be based upon all the facts and circumstances of the individual case. Of all the facts and circumstances to be taken into account in making this determination, greatest weight shall be given to the relative amounts of all the direct and indirect costs of development and the corresponding risks of development borne by the various members of the group, and the relative values of the use of any intangible property of members of the group which is made available without adequate consideration for use in connection with the development activity, which property is likely to contribute to a substantial extent in the production of intangible property. For this purpose, the risk to be borne with respect to development activity is the possibility that such activity will not result in the production of intangible property or that the intangible property produced will not be of sufficient value to allow for the recovery of the costs of developing it. A member will not be considered to have borne the costs and corresponding risks of development unless such member is committed to bearing such costs in advance of, or contemporaneously with, their incurrence and without regard to the success of the project. Other factors that may be relevant in determining which member of the group is the developer include the location of the development activity, the capabilities of the various members to carry on the project independently, and the degree of control over the project exercised by the various members.

(d) The principles of this subdivision (ii) may be illustrated by the following examples in which it is assumed that X and Y are corporate members of the same group:

Example (1). X, at the request of Y, undertakes to develop a new machine which will function effectively in the climate in which Y's factory is located. Y agrees to bear all the direct and indirect costs of the project whether or not X successfully develops the machine. Assume that X does not make any of its own intangible property available for use in connection with the project. The machine is successfully developed and Y obtains possession of the intangible property necessary to produce such machine. Based on the facts and circumstances as stated, Y shall be considered to be the developer of the intangible property and, therefore, Y shall not be treated as having obtained the property in a transfer subject to the rules of this paragraph. Any amount which may be allocable with respect to the assistance rendered by X shall be determined in accordance with the rules of *(b)* of this subdivision.

Example (2). Assume the same facts as in example (1) except that Y agrees to reimburse X for its costs only in the event that the property is successfully developed. In such case X is the developer and Y is deemed to have received the property in a transfer subject to the rules of this paragraph. Therefore, the district director may make an allocation to reflect an arm's length consideration for such property.

Example (3). In 1967 X undertakes to develop product M in its research and development department. X incurs direct and indirect costs of $1 million per year in connection with the project in 1967, 1968, and 1969. In connection with the project, X employs the formula for compound N, which it owns, and which is likely to contribute substantially to the success of the project. The value of the use of the formula for compound N in connection with this project is $750,000. In 1968, 4 chemists employed by Y spend 6 months working on the project in X's laboratory. The salary and other expenses connected with the chemists' employment for that period ($100,000) are paid by Y, for which no charge is made to X. In 1969, product M is perfected and Y obtains patents thereon. X is considered to be the developer of product M since, among other things, it bore the greatest relative share of the costs and risks incurred in connection with this project and made available intangible property (formula for compound N) which was likely to contribute substantially in the development of product M. Accordingly, no allocation with respect to X's development activity should be made before 1969. The property is deemed to have been transferred to Y at that time by virtue of the fact that Y obtained the patent rights to product M. In such case the district director may make an allocation to reflect an arm's length consideration for such transfer. In the event that the district director makes such an allocation and he has not made or does not make an allocation for 1968 with respect to the services of the chemists in accordance with the principles of paragraph (b) of this section, the value of the assistance shall be allowed as a set-off against the amount of the allocation reflecting an arm's length consideration for the transfer of the intangible property.

(2) *Arm's length consideration.* (i) An arm's length consideration shall be in a form which is consistent with the form which would be adopted in transactions between unrelated parties under the same circumstances. To the extent appropriate, an arm's length consideration may take any one or more of the following forms:

(a) Royalties based on the transferee's output, sales, profits, or any other measure;

(b) Lump-sum payments; or

(c) Any other form, including reciprocal licensing rights, which might reasonably have been adopted by unrelated parties under the circumstances, provided that the parties can establish that such form was adopted pursuant to an arrangement which in fact existed between them.

However, where the transferee pays nominal or no consideration for the property or interest therein and where the transferor has retained a substantial interest in the property, an allocation shall be presumed not to take the form of a lump-sum payment.

(ii) In determining the amount of an arm's length consideration, the standard to be applied is the amount that would have been paid by an unrelated party for the same intangible property under the same circumstances. Where there have been transfers by the transferor to unrelated parties involving the same or similar intangible property under the same or similar circumstances the amount of the consideration for such transfers shall generally be the best indication of an arm's length consideration.

(iii) Where a sufficiently similar transaction involving an unrelated party cannot be found, the following factors, to the extent appropriate (depending upon the type of intangible property and the form of the transfer), may be considered in arriving at the amount of the arm's length consideration:

(a) The prevailing rates in the same industry or for similar property,

(b) The offers of competing transferors or the bids of competing transferees,

(c) The terms of the transfer, including limitations on the geographic area

covered and the exclusive or nonexclusive character of any rights granted,

(d) The uniqueness of the property and the period for which it is likely to remain unique,

(e) The degree and duration of protection afforded to the property under the laws of the relevant countries.

(f) Value of services rendered by the transferor to the transferee in connection with the transfer within the meaning of paragraph (b)(8) of this section,

(g) Prospective profits to be realized or costs to be saved by the transferee through its use or subsequent transfer of the property,

(h) The capital investment and starting up expenses required of the transferee,

(i) The next subdivision is *(j),*

(j) The availability of substitutes for the property transferred,

(k) The arm's length rates and prices paid by unrelated parties where the property is resold or sublicensed to such parties,

(l) The costs incurred by the transferor in developing the property, and

(m) Any other fact or circumstance which unrelated parties would have been likely to consider in determining the amount of an arm's length consideration for the property.

(3) *Definition of intangible property.* (i) Solely for the purposes of this section, intangible property shall consist of the items described in subdivision (ii) of this subparagraph, provided that such items have substantial value independent of the services of individual persons.

(ii) The items referred to in subdivision (i) of this subparagraph are as follows:

(a) Patents, inventions, formulas, processes, designs, patterns, and other similar items;

(b) Copyrights, literary, musical, or artistic compositions, and other similar items;

(c) Trademarks, trade names, brand names, and other similar items;

(d) Franchises, licenses, contracts, and other similar items;

(e) Methods, programs, systems, procedures, campaigns, surveys, studies, forecasts, estimates, customer lists, technical data, and other similar items.

(4) *Sharing of costs and risks.* Where a member of a group of controlled entities acquires an interest in intangible property as a participating party in a bona fide cost sharing arrangement with respect to the development of such intangible property, the district director shall not make allocations with respect to such acquisition except as may be appropriate to reflect each participant's arm's length share of the costs and risks of developing the property. A bona fide cost sharing arrangement is an agreement, in writing, between two or more members of a group of controlled entities providing for the sharing of the costs and risks of developing intangible property in return for a specified interest in the intangible property that may be produced. In order for the arrangement to qualify as a bona fide arrangement, it must reflect an effort in good faith by the participating members to bear their respective shares of all the costs and risks of development on an arm's length basis. In order for the sharing of costs and risk to be considered on an arm's length basis, the terms and conditions must be comparable to those which would have been adopted by unrelated parties similarly situated had they entered into such an arrangement. If an oral cost sharing arrangement, entered into prior to April 16, 1968, and continued in effect after that date, is otherwise in compliance with the standards prescribed in this subparagraph, it shall constitute a bona fide cost sharing arrangement if it is reduced to writing prior to January 1, 1969.

(e) *Sales of tangible property*—(1) *In general.* (i) Where one member of a group of controlled entities (referred to in this paragraph as the ''seller'') sells or otherwise disposes of tangible property to another member of such group (referred to in this paragraph as the ''buyer'') at other than an arm's length price (such a sale being referred to in this paragraph as a ''controlled sale''), the district director may make appropriate allocations between the seller and the buyer to reflect an arm's length price for such sale or disposition. An arm's length price is the price that an unrelated party would have paid under the same circumstances for the property involved in the controlled sale. Since unrelated parties normally sell products at a profit, an arm's length price normally involves a profit to the seller.

(ii) Subparagraphs (2), (3), and (4) of this paragraph describe three methods of determining an arm's-length price and the standards for applying each method. They are, respectively, the comparable uncontrolled price method, the resale price method, and the cost-plus method. In addition, a special rule is provided in subdivision (v) of this subparagraph for use (notwithstanding any other provision of this subdivision) in determining an arm's-length price for an ore or mineral. If there are comparable uncontrolled sales as defined in subparagraph (2) of this paragraph, the comparable uncontrolled price method must be utilized because it is the method likely to result in the most accurate estimate of an arm's-length price (for the reason that it is based upon the price actually paid by unrelated parties for the same or similar products). If there are no comparable uncontrolled sales, then the resale price method must be utilized if the standards for its application are met because it is the method likely to result in the next most accurate estimate in such instances (for the reason that, in such instances, the arm's-length price determined under such method is based more directly upon actual arm's-length transactions than is the cost-plus method). A typical situation where the resale price method may be required is where a manufacturer sells products to a related distributor which, without further processing, resells the products in uncontrolled transactions. If all the standards for the mandatory application of the resale price method are not satisfied, then, as provided in subparagraph (3)(iii) of this paragraph, either that method or the cost-plus method may be used, depending upon which method is more feasible and is likely to result in a more accurate estimate of an arm's-length price. A typical situation where the cost-plus method may be appropriate is where a manufacturer sells products to a related entity which performs substantial manufacturing, assembly, or other processing of the product or adds significant value by reason of its utilization of its intangible property prior to resale in uncontrolled transactions.

(iii) Where the standards for applying one of the three methods of pricing described in subdivision (ii) of this subparagraph are met, such method must, for the purposes of this paragraph, be utilized unless the taxpayer can establish that, considering all the facts and circumstances, some method of pricing other than those described in subdivision (ii) of this subparagraph is clearly more appropriate. Where none of the three methods of pricing described in subdivision (ii) of this subparagraph can reasonably be applied under the facts and circumstances as they exist in a particular case, some appropriate method of pricing other than those described in subdivision (ii) of this subparagraph, or variations on such methods, can be used.

(iv) The methods of determining arm's length prices described in this section are stated in terms of their application to individual sales of property. However, because of the possibility that a taxpayer may make controlled sales of many different products, or many separate sales of the same product, it may be impractical to analyze every sale for the purposes of determining the arm's length price. It is therefore permissible to determine or verify arm's length prices by applying the appropriate methods of pricing to product lines or other groupings where it is impractical to ascertain an arm's length price for each product or sale. In addition, the district director may determine or verify the arm's length price of all sales to a related entity by employing reasonable statistical sampling techniques.

(v) The price for a mineral product which is sold at the stage at which mining or extraction ends shall be determined under the provisions of §§ 1.613–3 and 1.613–4.

(2) *Comparable uncontrolled price method.* (i) Under the method of pricing described as the ''comparable uncontrolled price method'', the arm's length price of a controlled sale is equal to the price paid in comparable uncontrolled sales, adjusted as provided in subdivision (ii) of this subparagraph.

(ii) ''Uncontrolled sales'' are sales in which the seller and the buyer are not members of the same controlled group. These include *(a)* sales made by a member of the controlled group to an unrelated party, *(b)* sales made to a member of the controlled group by an unrelated party, and *(c)* sales made in which the parties are not members of the controlled group and are not related to each other. However, uncontrolled sales do not include sales at unrealistic prices, as for example where a member makes uncontrolled sales in small quantities at a price designed to justify a nonarm's length price on a large volume of controlled sales. Uncontrolled sales are considered comparable to controlled sales if the physical property and circumstances involved in the uncontrolled sales are identical to the physical property and circumstances involved in the controlled sales, or if such properties and circumstances are so nearly identical that any differences either have no effect on price, or such differences can be reflected by a reasonable number of adjustments to the price of uncontrolled sales. For this purpose, differences can be reflected by adjusting prices only where such differences have a definite and reasonably ascertainable effect on price. If the differences can be reflected by such adjustment, then the price of the uncontrolled sale as adjusted constitutes the comparable uncontrolled sale price. Some of the differences which may affect the price of property are differences in the quality of the product, terms of sale, intangible property associated with the sale, time of sale, and the level of the market and the geographic market in which the sale takes place. Whether and to what extent differences in the various properties and circumstances affect price, and whether differences render sales noncomparable, depends upon the particular circumstances and property involved. The principles of this subdivision may be illustrated by the following examples, in each of which it is assumed that X makes both controlled and uncontrolled sales of the identical property:

Example (1). Assume that the circumstances surrounding the controlled and the uncontrolled sales are identical, except for the fact that the controlled sales price is a delivered price and the uncontrolled sales are made f.o.b. X's factory. Since differences in terms of transportation and insurance generally have a definite and reasonably ascertainable effect on price, such differences do not normally render the uncontrolled sales noncomparable to the controlled sales.

Example (2). Assume that the circumstances surrounding the controlled and uncontrolled sales are identical, except for the fact that X affixes its valuable trademark in the controlled sales, and does not affix its trademark in uncontrolled sales. Since the effects on price of differences in intangible property associated with the sale of tangible property, such as trademarks, are normally not reasonably ascertainable, such differences would normally render the uncontrolled sales noncomparable.

Example (3). Assume that the circumstances surrounding the controlled and uncontrolled sales are identical, except for the fact that X, a manufacturer of business machines, makes certain minor modifications in the physical properties of the machines to satisfy safety specifications or other specific requirements of a customer in controlled sales, and does not make these modifications in uncontrolled sales. Since minor physical differences in the product generally have a definite and reasonably ascertainable effect on prices, such differences do not normally render the uncontrolled sales noncomparable to the controlled sales.

(iii) Where there are two or more comparable uncontrolled sales susceptible of adjustment as defined in subdivision (ii) of this subparagraph, the comparable uncontrolled sale or sales requiring the fewest and simplest adjustments provided in subdivision (ii) of this subparagraph should generally be selected. Thus, for example, if a taxpayer makes comparable uncontrolled sales of a particular product which differ from the controlled sale only with respect to the terms of delivery, and makes other comparable uncontrolled sales of the product which differ from the controlled sale with respect to both terms of delivery and terms of payment, the comparable uncontrolled sales differing only with respect to terms of delivery should be selected as the comparable uncontrolled sale.

(iv) One of the circumstances which may affect the price of property is the fact that the seller may desire to make sales at less than a normal profit for the primary purpose of establishing or maintaining a market for his products. Thus, a seller may be willing to reduce the price of a product, for a time, in order to introduce his product into an area or in order to meet competition. However, controlled sales may be priced in such a manner only if such price would have been charged in an uncontrolled sale under comparable circumstances. Such fact may be demonstrated by showing that the buyer in the controlled sale made corresponding reductions in the resale price to uncontrolled purchasers, or that such buyer engaged in substantially greater sales promotion activities with respect to the product involved in the controlled sale than with respect to other products. For example, assume X, a manufacturer of batteries, commences to sell car batteries to Y, a subsidiary of X, for resale in a new market. In its existing markets X's batteries sell to independent retailers at $20 per unit, and X sells them to wholesalers at $17 per unit. Y also sells X's batteries to independent retailers at $20 per unit. X's batteries are not known in the new market in which Y is operating. In order to engage competitively in the new market Y incurs selling and advertising costs substantially higher than those incurred for its sales of other products. Under these circumstances X may sell to Y, for a time, at less than $17 to take into account the increased selling and advertising activities of Y in penetrating and establishing the new market. This may be done even though it may result in a transfer price from X to Y which is below X's full costs of manufacturing the product.

(3) *Resale price method.* (i) Under the pricing method described as the ''resale price method'', the arm's length price of a controlled sale is equal to the applicable resale price (as defined in subdivision (iv) or (v) of this subparagraph), reduced by an appropriate markup, and adjusted as provided in subdivision (ix) of this subparagraph. An appropriate markup is computed by multiplying the applicable resale price by the appropriate markup percentage as defined in subdivision (vi) of this subparagraph. Thus, where one member of a group of controlled entities sells property to another member which resells the property in uncontrolled sales, if the applicable resale price of the property involved in the uncontrolled sale is $100 and the appropriate markup percentage for resales by the buyer is 20 percent, the arm's length price of the controlled sale is $80 ($100 minus 20 percent × $100), adjusted as provided in subdivision (ix) of this subparagraph.

(ii) The resale price method must be used to compute an arm's length price of a controlled sale if all the following circumstances exist:

(a) There are no comparable uncontrolled sales as defined in subparagraph (2) of this paragraph.

(b) An applicable resale price, as defined in subdivision (iv) or (v) of this subparagraph, is available with respect to resales made within a reasonable time before or after the time of the controlled sale.

(c) The buyer (reseller) has not added more than an insubstantial amount to the value of the property by physically altering the product before resale. For this purpose packaging, repacking, labeling, or minor assembly of property does not constitute physical alteration.

(d) The buyer (reseller) has not added more than an insubstantial amount to the value of the property by the use of intangible property. See § 1.482–2(d)(3) for the definition of intangible property.

(iii) Notwithstanding the fact that one or both of the requirements of subdivision (ii) *(c)* or *(d)* of this subparagraph may not be met, the resale price method may be used if such method is more feasible and is likely to result in a more accurate determination of an arm's length price than the use of the cost plus method. Thus, even though one of the requirements of such subdivision is not satisfied, the resale price method may nevertheless be more appropriate than the cost plus method because the computations and evaluations required under the former method may be fewer and easier to make than under the latter method. In general, the resale price method is more appropriate when the functions performed by the seller are more extensive and more difficult to evaluate than the functions performed by the buyer (reseller). The principle of this subdivision may be illustrated by the following examples in each of which it is assumed that corporation X developed a valuable patent covering product M which it manufactures and sells to corporation Y in a controlled sale, and for which there is no comparable uncontrolled sale:

Example (1). Corporation Y adds a component to product M and resells the assembled product in an uncontrolled sale within a reasonable time after the controlled sale of product M. Assume further that the addition of the component added more than an insubstantial amount to the value of product M, but that Y's function in purchasing the component and assembling the product prior to sale was subject to reasonably precise valuation. Although the controlled sale and resale does not meet the requirements of subdivision (ii)*(c)* of this subparagraph, the resale price method may be used under the circumstances because that method involves computations and evaluations which are fewer and easier to make than under the cost plus method. This is because X's use of a patent may be more difficult to evaluate in determining an appropriate gross profit percentage under the cost plus method, than is evaluation of Y's assembling function in determining the appropriate markup percentage under the resale price method.

Example (2). Corporation Y resells product M in an uncontrolled sale within a reasonable time after the controlled sale after attaching its valuable trademark to it. Assume further that it can be demonstrated through comparison with other uncontrolled sales of Y that the addition of Y's trademark to a product usually adds 25 percent to the markup on its sales. On the other hand, the effect of X's use of its patent is difficult to evaluate in applying the cost plus method because no reasonable standard of comparison is available. Although the controlled sale and resale does not meet the requirements of subdivision (ii)*(d)* of this subparagraph, the resale price method may be used because that method involves computations and evaluation which are fewer and easier to make than under the cost plus method. That is because, under the circumstances, X's use of a patent is more difficult to evaluate in determining an appropriate gross profit percentage under the cost plus method, than is evaluation of the use of Y's trademark in determining the appropriate markup percentage under the resale price method.

(iv) For the purposes of this subparagraph the ‘‘applicable resale price’’ is the price at which it is anticipated that property purchased in the controlled sale will be resold by the buyer in an uncontrolled sale. The ‘‘applicable resale price’’ will generally be equal to either the price at which current resales of the same property are being made or the resale price of the particular item of property involved.

(v) Where the property purchased in the controlled sale is resold in another controlled sale, the ‘‘applicable resale price’’ is the price at which such property is finally resold in an uncontrolled sale, providing that the series of sales as a whole meets all the requirements of subdivision (ii) of this subparagraph or that the resale price method is used pursuant to subdivision (iii) of this subparagraph. In such case, the determination of the appropriate markup percentage shall take into account the function or functions performed by all members of the group participating in the series of sales and resales. Thus, if X sells a product to Y in a controlled sale, Y sells the product to Z in a controlled sale, and Z sells the product in an uncontrolled sale, the resale price method must be used if Y and Z together have not added more than an insubstantial amount to the value of the product through physical alteration or the application of intangible property, and the final resale occurs within a reasonable time of the sale from X to Y. In such case, the applicable resale price is the price at which Z sells the product in the uncontrolled sale, and the appropriate markup percentage shall take into account the functions performed by both Y and Z.

(vi) For the purposes of this subparagraph, the appropriate markup percentage is equal to the percentage of gross profit (expressed as a percentage of sales) earned by the buyer (reseller) or another party on the resale of property which is both purchased and resold in an uncontrolled transaction, which resale is most similar to the applicable resale of the property involved in the controlled sale. The following are the most important characteristics to be considered in determining the similarity of resales:

(a) The type of property involved in the sales. For example: machine tools, men's furnishings, small household appliances.

(b) The functions performed by the reseller with respect to the property. For example: packaging, labeling, delivering, maintenance of inventory, minor assembly, advertising, selling at

wholesale, selling at retail, billing, maintenance of accounts receivable, and servicing.

(c) The effect on price of any intangible property utilized by the reseller in connection with the property resold. For example: patents, trademarks, trade names.

(d) The geographic market in which the functions are performed by the reseller.

In general, the similarity to be sought relates to the probable effect upon the markup percentage of any differences in such characteristics between the uncontrolled purchases and resales on the one hand and the controlled purchases and resales on the other hand. Thus, close physical similarity of the property involved in the sales compared is not required under the resale price method since a lack of close physical similarity is not necessarily indicative of dissimilar markup percentages.

(vii) Whenever possible, markup percentages should be derived from uncontrolled purchases and resales of the buyer (reseller) involved in the controlled sale, because similar characteristics are more likely to be found among different resales of property made by the same reseller than among sales made by other resellers. In the absence of resales by the same buyer (reseller) which meet the standards of subdivision (vi) of this subparagraph, evidence of an appropriate markup percentage may be derived from resales by other resellers selling in the same or a similar market in which the controlled buyer (reseller) is selling providing such resellers perform comparable functions. Where the function performed by the reseller is similar to the function performed by a sales agent which does not take title, such sales agent will be considered a reseller for the purpose of determining an appropriate markup percentage under this subparagraph and the commission earned by such sales agent, expressed as a percentage of the sales price of the goods, may constitute the appropriate markup percentage. If the controlled buyer (reseller) is located in a foreign country and information on resales by other resellers in the same foreign market is not available, then markup percentages earned by United States resellers performing comparable functions may be used. In the absence of data on markup percentages of particular sales or groups of sales, the prevailing markup percentage in the particular industry involved may be appropriate.

(viii) In calculating the markup percentage earned on uncontrolled purchases and resales, and in applying such percentage to the applicable resale price to determine the appropriate markup, the same elements which enter into the computation of the sales price and the costs of goods sold of the property involved in the comparable uncontrolled purchases and resales should enter into such computation in the case of the property involved in the controlled purchases and resales. Thus, if freight-in and packaging expense are elements of the cost of goods sold in comparable uncontrolled purchases, then such elements should also be taken into account in computing the cost of goods sold of the controlled purchase. Similarly, if the comparable markup percentage is based upon net sales (after reduction for returns and allowances) of uncontrolled resellers, such percentage must be applied to net sales of the buyer (reseller).

(ix) In determining an arm's length price appropriate adjustment must be made to reflect any material differences between the uncontrolled purchases and resales used as the basis for the calculation of the appropriate markup percentage and the resales of property involved in the controlled sale. The differences referred to in this subdivision are those differences in functions or circumstances which have a definite and reasonably ascertainable effect on price. The principles of this subdivision may be illustrated by the following example:

Example. Assume that X and Y are members of the same group of controlled entities and that Y purchases electric mixers from X and electric toasters from uncontrolled entities. Y performs substantially similar functions with respect to resales of both the mixers and the toasters, except that it does not warrant the toasters, but does provide a 90-day warranty for the mixers. Y normally earns a gross profit on toasters of 20 percent of gross selling price. The 20-percent gross profit on the resale of toasters is an appropriate markup percentage, but the price of the controlled sale computed with reference to such rate must be adjusted to reflect the difference in terms (the warranty).

(4) *Cost plus method.* (i) Under the pricing method described as the ‘‘cost plus method’’, the arm’s length price of a controlled sale of property shall be computed by adding to the cost of producing such property (as computed in subdivision (ii) of this subparagraph), an amount which is equal to such cost multiplied by the appropriate gross profit percentage (as computed in subdivision (iii) of this subparagraph), plus or minus any adjustments as provided in subdivision (v) of this subparagraph.

(ii) For the purposes of this subparagraph, the cost of producing the property involved in the controlled sale, and the costs which enter into the computation of the appropriate gross profit percentage shall be computed in a consistent manner in accordance with sound accounting practices for allocating or apportioning costs, which neither favors nor burdens controlled sales in comparison with uncontrolled sales. Thus, if the costs used in computing the appropriate gross profit percentage are comprised of the full cost of goods sold, including direct and indirect costs, then the cost of producing the property involved in the controlled sales must be comprised of the full cost of goods sold, including direct and indirect costs. On the other hand, if the costs used in computing the appropriate gross profit percentage are comprised only of direct costs, the cost of producing the property involved in the controlled sale must be comprised only of direct costs. The term ‘‘cost of producing’’, as used in this subparagraph, includes the cost of acquiring property which is held for resale.

(iii) For the purposes of this subparagraph, the appropriate gross profit percentage is equal to the gross profit percentage (expressed as a percentage of cost) earned by the seller or another party on the uncontrolled sale or sales of property which are most similar to the controlled sale in question. The following are the most important characteristics to be considered in determining the similarity of the uncontrolled sale or sales:

(a) The type of property involved in the sales. For example: machine tools, men’s furnishings, small household appliances.

(b) The functions performed by the seller with respect to the property sold. For example: contract manufacturing, product assembly, selling activity, processing, servicing, delivering.

(c) The effect of any intangible property used by the seller in connection with the property sold. For example: patents, trademarks, trade names.

(d) The geographic market in which the functions are performed by the seller. In general, the similarity to be sought relates to the probable effect upon the margin of gross profit of any differences in such characteristics between the uncontrolled sales and the controlled sale. Thus, close physical similarity of the property involved in the sales compared is not required under the cost plus method since a lack of close physical similarity is not necessarily indicative of dissimilar profit margins. See subparagraph (2)(iv) of this paragraph, relating to sales made at less than a normal profit for the primary purpose of establishing or maintaining a market.

(iv) Whenever possible, gross profit percentages should be derived from uncontrolled sales made by the seller involved in the controlled sale, because similar characteristics are more likely to be found among sales of property made by the same seller than among sales made by other sellers. In the absence of such sales, evidence of an appropriate gross profit percentage may be derived from similar uncontrolled sales by other sellers whether or not such sellers are members of the controlled group. Where the function performed by the seller is similar to the function performed by a purchasing agent which does not take title, such purchasing agent will be considered a seller for the purpose of determining an appropriate gross profit percentage under this subparagraph and the commission earned by such purchasing agent, expressed as a percentage of the purchase price of the goods, may constitute the appropriate gross profit percentage. In the absence of data on gross profit percentages of particular sales or groups of sales which are similar to the controlled sale, the prevailing gross profit percentages in the particular industry involved may be appropriate.

(v) Where the most similar sale or sales from which the appropriate gross profit percentage is derived differ in any material respect from the controlled sale, the arm's length price which is computed by applying such percentage must be adjusted to reflect such differences to the extent such differences would warrant an adjustment of price in uncontrolled transactions. The differences referred to in this subdivision are those differences which have a definite and reasonably ascertainable effect on price.

(Sec. 385 and 7805 of the Internal Revenue Code of 1954 (83 Stat. 613 and 68A Stat. 917; 26 U.S.C. 385 and 7805))

[T.D. 6952, 33 FR 5849, Apr. 16, 1968]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.482–2A, see the List of CFR Sections Affected in the Finding Aids section of this volume.

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES (Continued)

Normal Taxes and Surtaxes (Continued)

EXEMPT ORGANIZATIONS

GENERAL RULE

Sec.
1.501(a)–1 Exemption from taxation.
1.501(c)(2)–1 Corporations organized to hold title to property for exempt organizations.
1.501(c)(3)–1 Organizations organized and operated for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals.
1.501(c)(4)–1 Civic organizations and local associations of employees.
1.501(c)(5)–1 Labor, agricultural, and horticultural organizations.
1.501(c)(6)–1 Business leagues, chambers of commerce, real estate boards, and boards of trade.
1.501(c)(7)–1 Social clubs.
1.501(c)(8)–1 Fraternal beneficiary societies.
1.501(c)(9)–1 Voluntary employees' beneficiary associations, in general.
1.501(c)(9)–2 Membership in a voluntary employees' beneficiary association; employees; voluntary association of employees.
1.501(c)(9)–3 Voluntary employees' beneficiary associations; life, sick, accident, or other benefits.
1.501(c)(9)–4 Voluntary employees' beneficiary associations; inurement.
1.501(c)(9)–5 Voluntary employees' beneficiary associations; recordkeeping requirements.
1.501(c)(9)–6 Voluntary employees' beneficiary associations; benefits includible in gross income.
1.501(c)(9)–7 Voluntary employees' beneficiary associations; section 3(4) of ERISA.
1.501(c)(9)–8 Voluntary employees' beneficiary associations; effective date.
1.501(c)(10)–1 Certain fraternal beneficiary societies.
1.501(c)(12)–1 Local benevolent life insurance associations, mutual irrigation and telephone companies, and like organizations.
1.501(c)(13)–1 Cemetery companies and crematoria.
1.501(c)(14)–1 Credit unions and mutual insurance funds.
1.501(c)(15)–1 Mutual insurance companies or associations.
1.501(c)(16)–1 Corporations organized to finance crop operations.
1.501(c)(17)–1 Supplemental unemployment benefit trusts.
1.501(c)(17)–2 General rules.
1.501(c)(17)–3 Relation to other sections of the Code.
1.501(c)(18)–1 Certain funded pension trusts.
1.501(c)(19)–1 War veterans organizations.
1.501(c)(21)–1 Black lung trusts—certain terms.
1.501(c)(21)–2 Same—trust instrument.
1.501(d)–1 Religious and apostolic associations or corporations.
1.501(e)–1 Cooperative hospital service organizations.
1.501(h)–1 Application of the *expenditure test* to expenditures to influence legislation; introduction.
1.501(h)–2 Electing the expenditure test.
1.501(h)–3 Lobbying or grass roots expenditures normally in excess of ceiling amount.
1.501(k)–1 Communist-controlled organizations.
1.502–1 Feeder organizations.
1.503(a)–1 Denial of exemption to certain organizations engaged in prohibited transactions.
1.503(b)–1 Prohibited transactions.
1.503(c)–1 Future status of organizations denied exemption.
1.503(d)–1 Cross references.
1.503(e)–1 Special rules.
1.503(e)–2 Requirements.
1.503(e)–3 Effective dates.
1.503(e)–4 Disallowance of charitable deductions for certain gifts made before January 1, 1970.
1.503(f)–1 Loans by employers who are prohibited from pledging assets.
1.504–1 Attempts to influence legislation; certain organizations formerly described in section 501(c)(3) denied exemption.
1.504–2 Certain transfers made to avoid section 504(a).
1.505(c)–1T Questions and answers relating to the notification requirement for recognition of exemption under paragraphs (9), (17) and (20) of Section 501(c) (temporary).

EXEMPT ORGANIZATIONS

PRIVATE FOUNDATIONS

1.507–1 General rule.
1.507–2 Special rules; transfer to, or operation as, public charity.
1.507–3 Special rules; transferee foundations.
1.507–4 Imposition of tax.
1.507–5 Aggregate tax benefit; in general.
1.507–6 Substantial contributor defined.
1.507–7 Value of assets.
1.507–8 Liability in case of transfers.

1.507–9 Abatement of taxes.
1.508–1 Notices.
1.508–2 Disallowance of certain charitable, etc., deductions.
1.508–3 Governing instruments.
1.508–4 Effective date.
1.509(a)–1 Definition of private foundation.
1.509(a)–2 Exclusion for certain organizations described in section 170(b)(1)(A).
1.509(a)–3 Broadly, publicly supported organizations.
1.509(a)–4 Supporting organizations.
1.509(a)–5 Special rules of attribution.
1.509(a)–6 Classification under section 509(a).
1.509(a)–7 Reliance by grantors and contributors to section 509(a) (1), (2), and (3) organizations.
1.509(b)–1 Continuation of private foundation status.
1.509(c)–1 Status of organization after termination of private foundation status.
1.509(d)–1 Definition of support.
1.509(e)–1 Definition of gross investment income.

TAXATION OF BUSINESS INCOME OF CERTAIN EXEMPT ORGANIZATIONS

1.511–1 Imposition and rates of tax.
1.511–2 Organizations subject to tax.
1.511–3 Provisions generally applicable to the tax on unrelated business income.
1.511–4 Minimum tax for tax preferences.
1.512(a)–1 Definition.
1.512(a)–2 Definition applicable to taxable years beginning before December 13, 1967.
1.512(a)–3 [Reserved]
1.512(a)–4 Special rules applicable to war veterans organizations.
1.512(a)–5T Questions and answers relating to the unrelated business taxable income of organizations described in paragraphs (9), (17) or (20) of Section 501(c) (temporary).
1.512(b)–1 Modifications.
1.512(c)–1 Special rules applicable to partnerships; in general.
1.513–1 Definition of unrelated trade or business.
1.513–2 Definition of unrelated trade or business applicable to taxable years beginning before December 13, 1967.
1.513–3 Qualified convention and trade show activity.
1.513–5 Certain bingo games not unrelated trade or business.
1.513–6 Certain hospital services not unrelated trade or business.
1.514(a)–1 Unrelated debt-financed income and deductions.
1.514(a)–2 Business lease rents and deductions for taxable years beginning before January 1, 1970.
1.514(b)–1 Definition of debt-financed property.
1.514(c)–1 Acquisition indebtedness.
1.514(c)–2 Permitted allocations under section 514(c)(9)(E).
1.514(d)–1 Basis of debt-financed property acquired in corporate liquidation.
1.514(e)–1 Allocation rules.
1.514(f)–1 Definition of business lease.
1.514(g)–1 Business lease indebtedness.

FARMERS' COOPERATIVES

1.521–1 Farmers' cooperative marketing and purchasing associations; requirements for exemption under section 521.
1.522–1 Tax treatment of farmers' cooperative marketing and purchasing associations exempt under section 521.
1.522–2 Manner of taxation of cooperative associations subject to section 522.
1.522–3 Patronage dividends, rebates, or refunds; treatment as to cooperative associations entitled to tax treatment under section 522.
1.522–4 Taxable years affected.
1.527–1 Political organizations; generally.
1.527–2 Definitions.
1.527–3 Exempt function income.
1.527–4 Special rules for computation of political organization taxable income.
1.527–5 Activities resulting in gross income to an individual or political organization.
1.527–6 Inclusion of certain amounts in the gross income of an exempt organization which is not a political organization.
1.527–7 Newsletter funds.
1.527–8 Effective date; filing requirements; and miscellaneous provisions.
1.527–9 Special rule for principal campaign committees.

HOMEOWNERS ASSOCIATIONS

1.528–1 Homeowners associations.
1.528–2 Organized and operated to provide for the acquisition, construction, management, maintenance and care of association property.
1.528–3 Association property.
1.528–4 Substantiality test.
1.528–5 Source of income test.
1.528–6 Expenditure test.
1.528–7 Inurement.
1.528–8 Election to be treated as a homeowners association.
1.528–9 Exempt function income.
1.528–10 Special rules for computation of homeowners association taxable income and tax.

CORPORATIONS USED TO AVOID INCOME TAX ON SHAREHOLDERS

CORPORATIONS IMPROPERLY ACCUMULATING SURPLUS

1.531–1 Imposition of tax.
1.532–1 Corporations subject to accumulated earnings tax.

1.533–1 Evidence of purpose to avoid income tax.
1.533–2 Statement required.
1.534–1 Burden of proof as to unreasonable accumulations generally.
1.534–2 Burden of proof as to unreasonable accumulations in cases before the Tax Court.
1.534–3 Jeopardy assessments in Tax Court cases.
1.535–1 Definition.
1.535–2 Adjustments to taxable income.
1.535–3 Accumulated earnings credit.
1.536–1 Short taxable years.
1.537–1 Reasonable needs of the business.
1.537–2 Grounds for accumulation of earnings and profits.
1.537–3 Business of the corporation.

PERSONAL HOLDING COMPANIES

1.541–1 Imposition of tax.
1.542–1 General rule.
1.542–2 Gross income requirement.
1.542–3 Stock ownership requirement.
1.542–4 Corporations filing consolidated returns.
1.543–1 Personal holding company income.
1.543–2 Limitation on gross income and personal holding company income in transactions involving stocks, securities, and commodities.
1.544–1 Constructive ownership.
1.544–2 Constructive ownership by reason of indirect ownership.
1.544–3 Constructive ownership by reason of family and partnership ownership.
1.544–4 Options.
1.544–5 Convertible securities.
1.544–6 Constructive ownership as actual ownership.
1.544–7 Option rule in lieu of family and partnership rule.
1.545–1 Definition.
1.545–2 Adjustments to taxable income.
1.545–3 Special adjustment to taxable income.
1.547–1 General rule.
1.547–2 Requirements for deficiency dividends.
1.547–3 Claim for credit or refund.
1.547–4 Effect on dividends paid deduction.
1.547–5 Deduction denied in case of fraud or wilful failure to file timely return.
1.547–6 Suspension of statute of limitations and stay of collection.
1.547–7 Effective date.

FOREIGN PERSONAL HOLDING COMPANIES

1.551–1 General rule.
1.551–2 Amount included in gross income.
1.551–3 Deduction for obligations of the United States and its instrumentalities.
1.551–4 Information in return.
1.551–5 Effect on capital account of foreign personal holding company and basis of stock in hands of shareholders.
1.552–1 Definition of foreign personal holding company.
1.552–2 Gross income requirement.
1.552–3 Stock ownership requirement.
1.552–4 Certain excluded banks.
1.552–5 United States shareholder of excluded bank.
1.553–1 Foreign personal holding company income.
1.554–1 Stock ownership.
1.555–1 General rule.
1.555–2 Additions to gross income.
1.556–1 Definition.
1.556–2 Adjustments to taxable income.
1.556–3 Illustration of computation of undistributed foreign personal holding company income.

DEDUCTION FOR DIVIDENDS PAID

1.561–1 Deduction for dividends paid.
1.561–2 When dividends are considered paid.
1.562–1 Dividends for which the dividends paid deduction is allowable.
1.562–2 Preferential dividends.
1.562–3 Distributions by a member of an affiliated group.
1.563–1 Accumulated earnings tax.
1.563–2 Personal holding company tax.
1.563–3 Dividends considered as paid on last day of taxable year.
1.564–1 Dividend carryover.
1.565–1 General rule.
1.565–2 Limitations.
1.565–3 Effect of consent.
1.565–4 Consent dividends and other distributions.
1.565–5 Nonresident aliens and foreign corporations.
1.565–6 Definitions.

BANKING INSTITUTIONS

RULES OF GENERAL APPLICATION TO BANKING INSTITUTIONS

1.581–1 Banks.
1.581–2 Mutual savings banks, building and loan associations, and cooperative banks.
1.581–3 Definition of bank prior to September 28, 1962.
1.582–1 Bad debts, losses, and gains with respect to securities held by financial institutions.
1.584–1 Common trust funds.
1.584–2 Income of participants in common trust fund.
1.584–3 Computation of common trust fund income.
1.584–4 Admission and withdrawal of participants in the common trust fund.
1.584–5 Returns of banks with respect to common trust funds.
1.584–6 Net operating loss deduction.
1.585–1 Reserve for losses on loans of banks.
1.585–2 Addition to reserve.
1.585–3 Special rules.
1.585–4 Reorganizations and asset acquisitions.

1.585–5 Denial of bad debt reserves for large banks.
1.585–6 Recapture method of changing from the reserve method of section 585.
1.585–7 Elective cut–off method of changing from the reserve method of section 585.
1.585–8 Rules for making and revoking elections under §§1.585–6 and 1.585–7.
1.586–1 Reserve for losses on loans of small business investment companies, etc.
1.586–2 Addition to reserve.

MUTUAL SAVINGS BANKS, ETC.

1.591–1 Deduction for dividends paid on deposits.
1.592–1 Repayment of certain loans by mutual savings banks, building and loan associations, and cooperative banks.
1.593–1 Additions to reserve for bad debts.
1.593–2 Additions to reserve for bad debts where surplus, reserves, and undivided profits equal or exceed 12 percent of deposits or withdrawable accounts.
1.593–3 Taxable years affected.
1.593–4 Organizations to which section 593 applies.
1.593–5 Addition to reserves for bad debts.
1.593–6 Pre-1970 addition to reserve for losses on qualifying real property loans.
1.593–6A Post-1969 addition to reserve for losses on qualifying real property loans.
1.593–7 Establishment and treatment of reserves for bad debts.
1.593–8 Allocation of pre-1952 surplus to opening balance of reserve for losses on qualifying real property loans.
1.593–10 Certain distributions to shareholders by a domestic building and loan association.
1.593–11 Qualifying real property loan and nonqualifying loan defined.
1.594–1 Mutual savings banks conducting life insurance business.
1.595–1 Treatment of foreclosed property by certain creditors.
1.596–1 Limitation on dividends received deduction.
1.597–1 Definitions.
1.597–2 Taxation of Federal financial assistance.
1.597–3 Other rules.
1.597–4 Bridge Banks and Agency Control.
1.597–5 Taxable Transfers.
1.597–6 Limitation on collection of income tax.
1.597–7 Effective date.
1.597–8 Transitional rules for Federal financial assistance.

BANK AFFILIATES

1.601–1 Special deduction for bank affiliates.

NATURAL RESOURCES

DEDUCTIONS

1.611–0 Regulatory authority.
1.611–1 Allowance of deduction for depletion.
1.611–2 Rules applicable to mines, oil and gas wells, and other natural deposits.
1.611–3 Rules applicable to timber.
1.611–4 Depletion as a factor in computing earnings and profits for dividend purposes.
1.611–5 Depreciation of improvements.
1.612–1 Basis for allowance of cost depletion.
1.612–2 Allowable capital additions in case of mines.
1.612–3 Depletion; treatment of bonus and advanced royalty.
1.612–4 Charges to capital and to expense in case of oil and gas wells.
1.612–5 Charges to capital and to expense in case of geothermal wells.
1.613–1 Percentage depletion; general rule.
1.613–2 Percentage depletion rates.
1.613–3 Gross income from the property.
1.613–4 Gross income from the property in the case of minerals other than oil and gas.
1.613–5 Taxable income from the property.
1.613–6 Statement to be attached to return when depletion is claimed on percentage basis.
1.613–7 Application of percentage depletion rates provided in section 613(b) to certain taxable years ending in 1954.
1.613A–0 Limitations on percentage depletion in the case of oil and gas wells; table of contents.
1.613A–1 Post-1974 limitations on percentage depletion in case of oil and gas wells; general rule.
1.613A–2 Exemption for certain domestic gas wells.
1.613A–3 Exemption for independent producers and royalty owners.
1.613A–4 Limitations on application of §1.613A–3 exemption.
1.613A–5 Election under section 613A(c)(4).
1.613A–6 Recordkeeping requirements.
1.613A–7 Definitions.
1.614–0 Introduction.
1.614–1 Definition of property.
1.614–2 Election to aggregate separate operating mineral interests under section 614(b) prior to its amendment by Revenue Act of 1964.
1.614–3 Rules relating to separate operating mineral interests in the case of mines.
1.614–4 Treatment under the Internal Revenue Code of 1939 with respect to separate operating mineral interests for taxable years beginning before January 1, 1964, in the case of oil and gas wells.
1.614–5 Special rules as to aggregating nonoperating mineral interests.
1.614–6 Rules applicable to basis, holding period, and abandonment losses where mineral interests have been aggregated or combined.
1.614–7 Extension of time for performing certain acts.

1.614–8 Elections with respect to separate operating mineral interests for taxable years beginning after December 31, 1963, in the case of oil and gas wells.
1.615–1 Pre-1970 exploration expenditures.
1.615–2 Deduction of pre-1970 exploration expenditures in the year paid or incurred.
1.615–3 Election to defer pre-1970 exploration expenditures.
1.615–4 Limitation of amount deductible.
1.615–5 Time for making election with respect to returns due on or before May 2, 1960.
1.615–6 Election to deduct under section 615.
1.615–7 Effect of transfer of mineral property.
1.615–8 Termination of section 615.
1.615–9 Notification under Tax Reform Act of 1969.
1.616–1 Development expenditures.
1.616–2 Election to defer.
1.616–3 Time for making election with respect to returns due on or before May 2, 1960.
1.617–1 Exploration expenditures.
1.617–2 Limitation on amount deductible.
1.617–3 Recapture of exploration expenditures.
1.617–4 Treatment of gain from disposition of certain mining property.

EXCLUSIONS FROM GROSS INCOME

1.621–1 Payments to encourage exploration, development, and mining for defense purposes.

SALES AND EXCHANGES

1.631–1 Election to consider cutting as sale or exchange.
1.631–2 Gain or loss upon the disposal of timber under cutting contract.
1.631–3 Gain or loss upon the disposal of coal or domestic iron ore with a retained economic interest.
1.632–1 Tax on sale of oil or gas properties.

MINERAL PRODUCTION PAYMENTS

1.636–1 Treatment of production payments as loans.
1.636–2 Production payments retained in leasing transactions.
1.636–3 Definitions.
1.636–4 Effective dates of section 636.

CONTINENTAL SHELF AREAS

1.638–1 Continental Shelf areas.
1.638–2 Effective date.

AUTHORITY: 26 U.S.C. 7805, unless otherwise noted.

Sections 1.504–1 and 1.504–2 also issued under 26 U.S.C. 504(b).
Sec. 1.514(c)–2 also issued under 26 U.S.C. 514(c)(9)(E)(iii).
Sec. 1.527–9 also issued under 26 U.S.C. 527(h)(2)(B)(i).
Sec. 1.585–5 through 1.585–8 also issued under 26 U.S.C. 585(b)(3).
Sec. 1.597–1 through 1.597–7 also issued under 26 U.S.C. 597 and 1502.
Sec. 1.597–8 also issued under 26 U.S.C. 597.

EXEMPT ORGANIZATIONS

GENERAL RULE

§1.501(a)–1 Exemption from taxation.

(a) *In general; proof of exemption.* (1) Section 501(a) provides an exemption from income taxes for organizations which are described in section 501 (c) or (d) and section 401(a), unless such organization is a *feeder organization* (see section 502), or unless it engages in a transaction described in section 503. However, the exemption does not extend to *unrelated business taxable income* of such an organization (see part III (Section 511 and following), subchapter F, chapter 1 of the Code).

(2) An organization, other than an employees' trust described in section 401(a), is not exempt from tax merely because it is not organized and operated for profit. In order to establish its exemption, it is necessary that every such organization claiming exemption file an application form as set forth below with the district director for the internal revenue district in which is located the principal place of business or principal office of the organization. Subject only to the Commissioner's inherent power to revoke rulings because of a change in the law or regulations or for other good cause, an organization that has been determined by the Commissioner or the district director to be exempt under section 501(a) or the corresponding provision of prior law may rely upon such determination so long as there are no substantial changes in the organization's character, purposes, or methods of operation. An organization which has been determined to be exempt under the provisions of the Internal Revenue Code of 1939 or prior law is not required to secure a new determination of exemption merely because of the enactment of the Internal Revenue Code of 1954 unless affected by

substantive changes in law made by such Code.

(3) An organization claiming exemption under section 501(a) and described in any paragraph of section 501(c) (other than section 501(c)(1) shall file the form of application prescribed by the Commissioner and shall include thereon such information as required by such form and the instructions issued with respect thereto. For rules relating to the obtaining of a determination of exempt status by an employees' trust described in section 401(a), see the regulations under section 401.

(b) *Additional proof by particular classes of organizations.* (1) Organizations mentioned below shall submit with and as a part of their applications the following information:

(i) Mutual insurance companies shall submit copies of the policies or certificates of membership issued by them.

(ii) In the case of title holding companies described in section 501(c)(2), if the organization for which title is held has not been specifically notified in writing by the Internal Revenue Service that it is held to be exempt under section 501(a), the title holding company shall submit the information indicated herein as necessary for a determination of the status of the organization for which title is held.

(iii) An organization described in section 501(c)(3) shall submit with, and as a part of, an application filed after July 26, 1959, a detailed statement of its proposed activities.

(2) In addition to the information specifically called for by this section, the Commissioner may require any additional information deemed necessary for a proper determination of whether a particular organization is exempt under section 501(a), and when deemed advisable in the interest of an efficient administration of the internal revenue laws, he may in the cases of particular types of organizations prescribe the form in which the proof of exemption shall be furnished.

(3) An organization claiming to be specifically exempted by section 6033(a) from filing annual returns shall submit with and as a part of its application a statement of all the facts on which it bases its claim.

(c) *Private shareholder or individual defined.* The words *private shareholder or individual* in section 501 refer to persons having a personal and private interest in the activities of the organization.

(d) *Requirement of annual returns.* For the annual return requirements of organizations exempt under section 501(a), see section 6033 and §1.6033–1.

(e) *Certain Puerto Rican pension, etc., trusts.* Effective for taxable years beginning after December 31, 1973, section 1022(i)(1) of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 942) provides that trusts under certain Puerto Rican pension, etc., plans (as defined under P.R. Laws Ann. tit. 13, section 3165, and the articles thereunder), all of the participants of which are residents of the Commonwealth of Puerto Rico, are to be treated only for purposes of section 501(a) as trusts described in section 401(a). The practical effect of section 1022(i)(1) is to exempt these trusts from U.S. income tax on income from their U.S. investments. For purposes of section 1022(i)(1), the term *residents of the Commonwealth of Puerto Rico* means bona fide residents of Puerto Rico, and persons who perform labor or services primarily within the Commonwealth of Puerto Rico, regardless of residence for other purposes, and the term *participants* is restricted to current employees who are not excluded under the eligibility provisions of the plan.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7428, 41 FR 34619, Aug. 16, 1976; T.D. 7859, 47 FR 54298, Dec. 2, 1982]

§1.501(c)(2)–1 Corporations organized to hold title to property for exempt organizations.

(a) A corporation described in section 501(c)(2) and otherwise exempt from tax under section 501(a) is taxable upon its unrelated business taxable income. For taxable years beginning before January 1, 1970, see §1.511–2(c)(4). Since a corporation described in section 501(c)(2) cannot be exempt under section 501(a) if it engages in any business other than that of holding title to property and collecting income therefrom, it cannot have unrelated business taxable income as defined in section 512 other than income which is treated as unrelated business taxable income solely because of the applicability of section 512(a)(3)(C); or debt financed income which is treated as unrelated business taxable income solely because of section 514; or certain interest, annuities, royalties, or rents which are treated as unrelated business taxable income solely because of section 512(b)(3)(B)(ii) or (13). Similarly, exempt status under section 501(c)(2) shall not be affected where certain rents from personal property leased with real property are treated as unrelated business taxable income under section 512(b)(3)(A)(ii) solely because such rents attributable to such personal property are more than incidental when compared to the total rents received or accrued under the lease, or under section 512(b)(3)(B)(i) solely because such rents attributable to such personal property exceed 50 percent of the total rents received or accrued under the lease.

(b) A corporation described in section 501(c)(2) cannot accumulate income and retain its exemption, but it must turn over the entire amount of such income, less expenses, to an organization which is itself exempt from tax under section 501(a).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7658, 45 FR 33972, May 21, 1980]

§1.501(c)(3)–1 Organizations organized and operated for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals.

(a) *Organizational and operational tests.* (1) In order to be exempt as an organization described in section 501(c)(3), an organization must be both organized and operated exclusively for one or more of the purposes specified in such section. If an organization fails to meet either the organizational test or the operational test, it is not exempt.

(2) The term *exempt purpose or purposes*, as used in this section, means any purpose or purposes specified in section 501(c)(3), as defined and elaborated in paragraph (d) of this section.

(b) *Organizational test*—(1) *In general.* (i) An organization is organized exclusively for one or more exempt purposes only if its articles of organization (referred to in this section as its *articles*) as defined in subparagraph (2) of this paragraph:

(a) Limit the purposes of such organization to one or more exempt purposes; and

(b) Do not expressly empower the organization to engage, otherwise than as an insubstantial part of its activities, in activities which in themselves are not in furtherance of one or more exempt purposes.

(ii) In meeting the organizational test, the organization’s purposes, as stated in its articles, may be as broad as, or more specific than, the purposes stated in section 501(c)(3). Therefore, an organization which, by the terms of its articles, is formed *for literary and scientific purposes within the meaning of section 501(c)(3) of the Code* shall, if it otherwise meets the requirements in this paragraph, be considered to have met the organizational test. Similarly, articles stating that the organization is created solely *to receive contributions and pay them over to organizations which are described in section 501(c)(3) and exempt from taxation under section 501(a)* are sufficient for purposes of the organizational test. Moreover, it is sufficient if the articles set for the purpose of the organization to be the operation of a school for adult education and describe in detail the manner of the operation of such school. In addition, if the articles state that the organization is formed for *charitable purposes*, such articles ordinarily shall be sufficient for purposes of the organizational test (see subparagraph (5) of this paragraph for rules relating to construction of terms).

(iii) An organization is not organized exclusively for one or more exempt purposes if its articles expressly empower it to carry on, otherwise than as an insubstantial part of its activities, activities which are not in furtherance of one or more exempt purposes, even though such organization is, by the terms of such articles, created for a purpose that is no broader than the purposes specified in section 501(c)(3).

Thus, an organization that is empowered by its articles *to engage in a manufacturing business,* or *to engage in the operation of a social club* does not meet the organizational test regardless of the fact that its articles may state that such organization is created *for charitable purposes within the meaning of section 501(c)(3) of the Code.*

(iv) In no case shall an organization be considered to be organized exclusively for one or more exempt purposes, if, by the terms of its articles, the purposes for which such organization is created are broader than the purposes specified in section 501(c)(3). The fact that the actual operations of such an organization have been exclusively in furtherance of one or more exempt purposes shall not be sufficient to permit the organization to meet the organizational test. Similarly, such an organization will not meet the organizational test as a result of statements or other evidence that the members thereof intend to operate only in furtherance of one or more exempt purposes.

(v) An organization must, in order to establish its exemption, submit a detailed statement of its proposed activities with and as a part of its application for exemption (see paragraph (b) of § 1.501(a)–1).

(2) *Articles of organization.* For purposes of this section, the term *articles of organization* or *articles* includes the trust instrument, the corporate charter, the articles of association, or any other written instrument by which an organization is created.

(3) *Authorization of legislative or political activities.* An organization is not organized exclusively for one or more exempt purposes if its articles expressly empower it:

(i) To devote more than an insubstantial part of its activities to attempting to influence legislation by propaganda or otherwise; or

(ii) Directly or indirectly to participate in, or intervene in (including the publishing or distributing of statements), any political campaign on behalf of or in opposition to any candidate for public office; or

(iii) To have objectives and to engage in activities which characterize it as an *action* organization as defined in paragraph (c)(3) of this section.

The terms used in subdivisions (i), (ii), and (iii) of this subparagraph shall have the meanings provided in paragraph (c)(3) of this section. An organization's articles will not violate the provisions of paragraph (b)(3)(i) of this section even though the organization's articles expressly empower it to make the election provided for in section 501(h) with respect to influencing legislation and, only if it so elects, to make lobbying or grass roots expenditures that do not normally exceed the ceiling amounts prescribed by section 501(h)(2)(B) and (D).

(4) *Distribution of assets on dissolution.* An organization is not organized exclusively for one or more exempt purposes unless its assets are dedicated to an exempt purpose. An organization's assets will be considered dedicated to an exempt purpose, for example, if, upon dissolution, such assets would, by reason of a provision in the organization's articles or by operation of law, be distributed for one or more exempt purposes, or to the Federal Government, or to a State or local government, for a public purpose, or would be distributed by a court to another organization to be used in such manner as in the judgment of the court will best accomplish the general purposes for which the dissolved organization was organized. However, an organization does not meet the organizational test if its articles or the law of the State in which it was created provide that its assets would, upon dissolution, be distributed to its members or shareholders.

(5) *Construction of terms.* The law of the State in which an organization is created shall be controlling in construing the terms of its articles. However, any organization which contends that such terms have under State law a different meaning from their generally accepted meaning must establish such special meaning by clear and convincing reference to relevant court decisions, opinions of the State attorney-general, or other evidence of applicable State law.

(6) *Applicability of the organizational test.* A determination by the Commissioner or a district director that an organization is described in section

501(c)(3) and exempt under section 501(a) will not be granted after July 26, 1959 (regardless of when the application is filed), unless such organization meets the organizational test prescribed by this paragraph. If, before July 27, 1959, an organization has been determined by the Commissioner or district director to be exempt as an organization described in section 501(c)(3) or in a corresponding provision of prior law and such determination has not been revoked before such date, the fact that such organization does not meet the organizational test prescribed by this paragraph shall not be a basis for revoking such determination. Accordingly, an organization which has been determined to be exempt before July 27, 1959, and which does not seek a new determination of exemption is not required to amend its articles of organization to conform to the rules of this paragraph, but any organization which seeks a determination of exemption after July 26, 1959, must have articles of organization which meet the rules of this paragraph. For the rules relating to whether an organization determined to be exempt before July 27, 1959, is organized exclusively for one or more exempt purposes, see 26 CFR (1939) 39.101(6)–1 (Regulations 118) as made applicable to the Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167; C.B. 1954–2, 47).

(c) *Operational test*—(1) *Primary activities.* An organization will be regarded as *operated exclusively* for one or more exempt purposes only if it engages primarily in activities which accomplish one or more of such exempt purposes specified in section 501(c)(3). An organization will not be so regarded if more than an insubstantial part of its activities is not in furtherance of an exempt purpose.

(2) *Distribution of earnings.* An organization is not operated exclusively for one or more exempt purposes if its net earnings inure in whole or in part to the benefit of private shareholders or individuals. For the definition of the words *private shareholder or individual,* see paragraph (c) of §1.501(a)–1.

(3) *Action organizations.* (i) An organization is not operated exclusively for one or more exempt purposes if it is an *action* organization as defined in subdivisions (ii), (iii), or (iv) of this subparagraph.

(ii) An organization is an *action* organization if a substantial part of its activities is attempting to influence legislation by propaganda or otherwise. For this purpose, an organization will be regarded as attempting to influence legislation if the organization:

(a) Contacts, or urges the public to contact, members of a legislative body for the purpose of proposing, supporting, or opposing legislation; or

(b) Advocates the adoption or rejection of legislation.

The term *legislation,* as used in this subdivision, includes action by the Congress, by any State legislature, by any local council or similar governing body, or by the public in a referendum, initiative, constitutional amendment, or similar procedure. An organization will not fail to meet the operational test merely because it advocates, as an insubstantial part of its activities, the adoption or rejection of legislation. An organization for which the expenditure test election of section 501(h) is in effect for a taxable year will not be considered an *action* organization by reason of this paragraph (c)(3)(ii) for that year if it is not denied exemption from taxation under section 501(a) by reason of section 501(h).

(iii) An organization is an *action* organization if it participates or intervenes, directly or indirectly, in any political campaign on behalf of or in opposition to any candidate for public office.

The term *candidate for public office* means an individual who offers himself, or is proposed by others, as a contestant for an elective public office, whether such office be national, State, or local. Activities which constitute participation or intervention in a political campaign on behalf of or in opposition to a candidate include, but are not limited to, the publication or distribution of written or printed statements or the making of oral statements on behalf of or in opposition to such a candidate.

(iv) An organization is an *action* organization if it has the following two characteristics: *(a)* Its main or primary objective or objectives (as distinguished from its incidental or secondary objectives) may be attained only by legislation or a defeat of proposed legislation; and *(b)* it advocates, or campaigns for, the attainment of such main or primary objective or objectives as distinguished from engaging in nonpartisan analysis, study, or research and making the results thereof available to the public. In determining whether an organization has such characteristics, all the surrounding facts and circumstances, including the articles and all activities of the organization, are to be considered.

(v) An *action* organization, described in subdivisions (ii) or (iv) of this subparagraph, though it cannot qualify under section 501(c)(3), may nevertheless qualify as a social welfare organization under section 501(c)(4) if it meets the requirements set out in paragraph (a) of § 1.501(c)(4)–1.

(d) *Exempt purposes*—(1) *In general.* (i) An organization may be exempt as an organization described in section 501(c)(3) if it is organized and operated exclusively for one or more of the following purposes:

(a) Religious,

(b) Charitable,

(c) Scientific,

(d) Testing for public safety,

(e) Literary,

(f) Educational, or

(g) Prevention of cruelty to children or animals.

(ii) An organization is not organized or operated exclusively for one or more of the purposes specified in subdivision (i) of this subparagraph unless it serves a public rather than a private interest. Thus, to meet the requirement of this subdivision, it is necessary for an organization to establish that it is not organized or operated for the benefit of private interests such as designated individuals, the creator or his family, shareholders of the organization, or persons controlled, directly or indirectly, by such private interests.

(iii) Since each of the purposes specified in subdivision (i) of this subparagraph is an exempt purpose in itself, an organization may be exempt if it is organized and operated exclusively for any one or more of such purposes. If, in fact, an organization is organized and operated exclusively for an exempt purpose or purposes, exemption will be granted to such an organization regardless of the purpose or purposes specified in its application for exemption. For example, if an organization claims exemption on the ground that it is *educational*, exemption will not be denied if, in fact, it is *charitable.*

(2) *Charitable defined.* The term *charitable* is used in section 501(c)(3) in its generally accepted legal sense and is, therefore, not to be construed as limited by the separate enumeration in section 501(c)(3) of other tax-exempt purposes which may fall within the broad outlines of *charity* as developed by judicial decisions. Such term includes: Relief of the poor and distressed or of the underprivileged; advancement of religion; advancement of education or science; erection or maintenance of public buildings, monuments, or works; lessening of the burdens of Government; and promotion of social welfare by organizations designed to accomplish any of the above purposes, or (i) to lessen neighborhood tensions; (ii) to eliminate prejudice and discrimination; (iii) to defend human and civil rights secured by law; or (iv) to combat community deterioration and juvenile delinquency. The fact that an organization which is organized and operated for the relief of indigent persons may receive voluntary contributions from the persons intended to be relieved will not necessarily prevent such organization from being exempt as an organization organized and operated exclusively for charitable purposes. The fact that an organization, in carrying out its primary purpose, advocates social or civic changes or presents opinion on controversial issues with the intention of molding public opinion or creating public sentiment to an acceptance of its views does not preclude such organization from qualifying under section 501(c)(3) so long as it is not an *action* organization of any one of the types described in paragraph (c)(3) of this section.

(3) *Educational defined*—(i) *In general.* The term *educational*, as used in section 501(c)(3), relates to:

(a) The instruction or training of the individual for the purpose of improving or developing his capabilities; or

(b) The instruction of the public on subjects useful to the individual and beneficial to the community.

An organization may be educational even though it advocates a particular position or viewpoint so long as it presents a sufficiently full and fair exposition of the pertinent facts as to permit an individual or the public to form an independent opinion or conclusion. On the other hand, an organization is not educational if its principal function is the mere presentation of unsupported opinion.

(ii) *Examples of educational organizations.* The following are examples of organizations which, if they otherwise meet the requirements of this section, are educational:

Example 1. An organization, such as a primary or secondary school, a college, or a professional or trade school, which has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where the educational activities are regularly carried on.

Example 2. An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or other similar programs. Such programs may be on radio or television.

Example 3. An organization which presents a course of instruction by means of correspondence or through the utilization of television or radio.

Example 4. Museums, zoos, planetariums, symphony orchestras, and other similar organizations.

(4) *Testing for public safety defined.* The term *testing for public safety*, as used in section 501(c)(3), includes the testing of consumer products, such as electrical products, to determine whether they are safe for use by the general public.

(5) *Scientific defined.* (i) Since an organization may meet the requirements of section 501(c)(3) only if it serves a public rather than a private interest, a *scientific* organization must be organized and operated in the public interest (see subparagraph (1)(ii) of this paragraph). Therefore, the term *scientific*, as used in section 501(c)(3), includes the carrying on of scientific research in the public interest. Research when taken alone is a word with various meanings; it is not synonymous with *scientific*; and the nature of particular research depends upon the purpose which it serves. For research to be *scientific*, within the meaning of section 501(c)(3), it must be carried on in furtherance of a *scientific* purpose. The determination as to whether research is *scientific* does not depend on whether such research is classified as *fundamental* or *basic* as contrasted with *applied* or *practical*. On the other hand, for purposes of the exclusion from unrelated business taxable income provided by section 512(b)(9), it is necessary to determine whether the organization is operated primarily for purposes of carrying on *fundamental*, as contrasted with *applied*, research.

(ii) Scientific research does not include activities of a type ordinarily carried on as an incident to commercial or industrial operations, as, for example, the ordinary testing or inspection of materials or products or the designing or construction of equipment, buildings, etc.

(iii) Scientific research will be regarded as carried on in the public interest:

(a) If the results of such research (including any patents, copyrights, processes, or formulae resulting from such research) are made available to the public on a nondiscriminatory basis;

(b) If such research is performed for the United States, or any of its agencies or instrumentalities, or for a State or political subdivision thereof; or

(c) If such research is directed toward benefiting the public. The following are examples of scientific research which will be considered as directed toward benefiting the public, and, therefore, which will be regarded as carried on in the public interest: *(1)* Scientific research carried on for the purpose of aiding in the scientific education of college or university students; *(2)* scientific research carried on for the purpose of obtaining scientific information, which is published in a treatise, thesis, trade publication, or in any other form that is available to the interested public; *(3)* scientific research carried on for the purpose of discovering a cure for a disease; or *(4)* scientific research carried on for the purpose of aiding a community or geographical area by attracting new industry to the community or area or by encouraging the development of, or retention of, an

industry in the community or area. Scientific research described in this subdivision will be regarded as carried on in the public interest even though such research is performed pursuant to a contract or agreement under which the sponsor or sponsors of the research have the right to obtain ownership or control of any patents, copyrights, processes, or formulae resulting from such research.

(iv) An organization will not be regarded as organized and operated for the purpose of carrying on scientific research in the public interest and, consequently, will not qualify under section 501(c)(3) as a *scientific* organization, if:

(a) Such organization will perform research only for persons which are (directly or indirectly) its creators and which are not described in section 501(c)(3), or

(b) Such organization retains (directly or indirectly) the ownership or control of more than an insubstantial portion of the patents, copyrights, processes, or formulae resulting from its research and does not make such patents, copyrights, processes, or formulae available to the public. For purposes of this subdivision, a patent, copyright, process, or formula shall be considered as made available to the public if such patent, copyright, process, or formula is made available to the public on a nondiscriminatory basis. In addition, although one person is granted the exclusive right to the use of a patent, copyright, process, or formula, such patent, copyright, process, or formula shall be considered as made available to the public if the granting of such exclusive right is the only practicable manner in which the patent, copyright, process, or formula can be utilized to benefit the public. In such a case, however, the research from which the patent, copyright, process, or formula resulted will be regarded as carried on in the public interest (within the meaning of subdivision (iii) of this subparagraph) only if it is carried on for a person described in subdivision (iii)*(b)* of this subparagraph or if it is scientific research described in subdivision (iii)*(c)* of this subparagraph.

(v) The fact that any organization (including a college, university, or hospital) carries on research which is not in furtherance of an exempt purpose described in section 501(c)(3) will not preclude such organization from meeting the requirements of section 501(c)(3) so long as the organization meets the organizational test and is not operated for the primary purpose of carrying on such research (see paragraph (e) of this section, relating to organizations carrying on a trade or business). See paragraph (a)(5) of §1.513–2, with respect to research which constitutes an unrelated trade or business, and section 512(b) (7), (8), and (9), with respect to income derived from research which is excludable from the tax on unrelated business income.

(vi) The regulations in this subparagraph are applicable with respect to taxable years beginning after December 31, 1960.

(e) *Organizations carrying on trade or business*—(1) *In general.* An organization may meet the requirements of section 501(c)(3) although it operates a trade or business as a substantial part of its activities, if the operation of such trade or business is in furtherance of the organization's exempt purpose or purposes and if the organization is not organized or operated for the primary purpose of carrying on an unrelated trade or business, as defined in section 513. In determining the existence or nonexistence of such primary purpose, all the circumstances must be considered, including the size and extent of the trade or business and the size and extent of the activities which are in furtherance of one or more exempt purposes. An organization which is organized and operated for the primary purpose of carrying on an unrelated trade or business is not exempt under section 501(c)(3) even though it has certain religious purposes, its property is held in common, and its profits do not inure to the benefit of individual members of the organization. See, however, section 501(d) and §1.501(d)–1, relating to religious and apostolic organizations.

(2) *Taxation of unrelated business income.* For provisions relating to the taxation of unrelated business income of certain organizations described in section 501(c)(3), see sections 511 to 515, inclusive, and the regulations thereunder.

(f) *Applicability of regulations in this section.* The regulations in this section are, except as otherwise expressly provided, applicable with respect to taxable years beginning after July 26, 1959. For the rules applicable with respect to taxable years beginning before July 27, 1959, see 26 CFR (1939) 39.101(6)–1 (Regulations 118) as made applicable to the Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167; C.B. 1954–2, 47).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6525, 26 FR 189, Jan. 11, 1961; T.D. 6939, 32 FR 17661, Dec. 12, 1967; T.D. 7428, 41 FR 34620, Aug. 16, 1976; T.D. 8308, 55 FR 35587, Aug. 31, 1990]

§1.501(c)(4)–1 Civic organizations and local associations of employees.

(a) *Civic organizations*—(1) *In general.* A civic league or organization may be exempt as an organization described in section 501(c)(4) if—

(i) It is not organized or operated for profit; and

(ii) It is operated exclusively for the promotion of social welfare.

(2) *Promotion of social welfare*—(i) *In general.* An organization is operated exclusively for the promotion of social welfare if it is primarily engaged in promoting in some way the common good and general welfare of the people of the community. An organization embraced within this section is one which is operated primarily for the purpose of bringing about civic betterments and social improvements. A *social welfare* organization will qualify for exemption as a charitable organization if it falls within the definition of *charitable* set forth in paragraph (d)(2) of §1.501(c)(3)–1 and is not an *action* organization as set forth in paragraph (c)(3) of §1.501(c)(3)–1.

(ii) *Political or social activities.* The promotion of social welfare does not include direct or indirect participation or intervention in political campaigns on behalf of or in opposition to any candidate for public office. Nor is an organization operated primarily for the promotion of social welfare if its primary activity is operating a social club for the benefit, pleasure, or recreation of its members, or is carrying on a business with the general public in a manner similar to organizations which are operated for profit. See, however, section 501(c)(6) and §1.501(c)(6)–1, relating to business leagues and similar organizations. A social welfare organization that is not, at any time after October 4, 1976, exempt from taxation as an organization described in section 501(c)(3) may qualify under section 501(c)(4) even though it is an *action* organization described in §1.501(c)(3)–1(c)(3)(ii) or (iv), if it otherwise qualifies under this section. For rules relating to an organization that is, after October 4, 1976, exempt from taxation as an organization described in section 501(c)(3), see section 504 and §1.504–1.

(b) *Local associations of employees.* Local associations of employees described in section 501(c)(4) are expressly entitled to exemption under section 501(a). As conditions to exemption, it is required (1) that the membership of such an association be limited to the employees of a designated person or persons in a particular municipality, and (2) that the net earnings of the association be devoted exclusively to charitable, educational, or recreational purposes. The word *local* is defined in paragraph (b) of §1.501(c)(12)–1. See paragraph (d) (2) and (3) of §1.501(c)(3)–1 with reference to the meaning of *charitable* and *educational* as used in this section.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8308, 55 FR 35588, Aug. 31, 1990]

§1.501(c)(5)–1 Labor, agricultural, and horticultural organizations.

(a) The organizations contemplated by section 501(c)(5) as entitled to exemption from income taxation are those which:

(1) Have no net earnings inuring to the benefit of any member, and

(2) Have as their objects the betterment of the conditions of those engaged in such pursuits, the improvement of the grade of their products, and the development of a higher degree of efficiency in their respective occupations.

(b)(1) *General rule.* An organization is not an organization described in section 501(c)(5) if the principal activity of the organization is to receive, hold, invest, disburse or otherwise manage funds associated with savings or investment plans or programs, including pension or other retirement savings plans or programs.

(2) *Exception*. Paragraph (b)(1) of this section shall not apply to an organization which—

(i) Is established and maintained by another labor organization described in section 501(c)(5) (determined without regard to this paragraph (b)(2));

(ii) Is not directly or indirectly established or maintained in whole or in part by one or more—

(A) Employers;

(B) Governments or agencies or instrumentalities thereof; or

(C) Government controlled entities;

(iii) Is funded by membership dues from members of the labor organization described in this paragraph (b)(2) and earnings thereon; and

(iv) Has not at any time after September 2, 1974 (the date of enactment of the Employee Retirement Income Security Act of 1974, Pub. L. 93–406, 88 Stat. 829) provided for, permitted or accepted employer contributions.

(3) *Example*. The principles of this paragraph (b) are illustrated by the following example:

Example. Trust A is organized in accordance with a collective bargaining agreement between labor union K and multiple employers. Trust A forms part of a plan that is established and maintained pursuant to the agreement and which covers employees of the signatory employers who are members of K. Representatives of both the employers and K serve as trustees. A receives contributions from the employers who are subject to the agreement. Retirement benefits paid to K's members as specified in the agreement are funded exclusively by the employers' contributions and accumulated earnings. A also provides information to union members about their retirement benefits and assists them with administrative tasks associated with the benefits. Most of A's activities are devoted to these functions. From time to time, A also participates in the renegotiation of the collective bargaining agreement. A's principal activity is to receive, hold, invest, disburse, or otherwise manage funds associated with a retirement savings plan. In addition, A does not satisfy all the requirements of the exception described in paragraph (b)(2) of this section. (For example, A accepts contributions from employers.) Therefore, A is not a labor organization described in section 501(c)(5).

(c) Organizations described in section 501(c)(5) and otherwise exempt from tax under section 501(a) are taxable upon their unrelated business taxable income. See part II (section 511 and following), subchapter F, chapter 1 of the Code, and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8726, 62 FR 40449, July 29, 1997]

§ 1.501(c)(6)–1 Business leagues, chambers of commerce, real estate boards, and boards of trade.

A business league is an association of persons having some common business interest, the purpose of which is to promote such common interest and not to engage in a regular business of a kind ordinarily carried on for profit. It is an organization of the same general class as a chamber of commerce or board of trade. Thus, its activities should be directed to the improvement of business conditions of one or more lines of business as distinguished from the performance of particular services for individual persons. An organization whose purpose is to engage in a regular business of a kind ordinarily carried on for profit, even though the business is conducted on a cooperative basis or produces only sufficient income to be self-sustaining, is not a business league. An association engaged in furnishing information to prospective investors, to enable them to make sound investments, is not a business league, since its activities do not further any common business interest, even though all of its income is devoted to the purpose stated. A stock or commodity exchange is not a business league, a chamber of commerce, or a board of trade within the meaning of section 501(c)(6) and is not exempt from tax. Organizations otherwise exempt from tax under this section are taxable upon their unrelated business taxable income. See part II (section 511 and following), subchapter F, chapter 1 of the Code, and the regulations thereunder.

§ 1.501(c)(7)–1 Social clubs.

(a) The exemption provided by section 501(a) for organizations described in section 501(c)(7) applies only to clubs which are organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, but does not apply to any club if any part of its net earnings inures to the benefit of any private shareholder. In general, this exemption extends to social and recreation clubs which are supported solely by membership fees, dues, and assessments. However, a club otherwise entitled to exemption will not be disqualified because it raises revenue from members through the use of club facilities or in connection with club activities.

(b) A club which engages in business, such as making its social and recreational facilities available to the general public or by selling real estate, timber, or other products, is not organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, and is not exempt under section 501(a). Solicitation by advertisement or otherwise for public patronage of its facilities is prima facie evidence that the club is engaging in business and is not being operated exclusively for pleasure, recreation, or social purposes. However, an incidental sale of property will not deprive a club of its exemption.

§1.501(c)(8)–1 Fraternal beneficiary societies.

(a) A fraternal beneficiary society is exempt from tax only if operated under the *lodge system* or for the exclusive benefit of the members so operating. *Operating under the lodge system* means carrying on its activities under a form of organization that comprises local branches, chartered by a parent organization and largely self-governing, called lodges, chapters, or the like. In order to be exempt it is also necessary that the society have an established system for the payment to its members or their dependents of life, sick, accident, or other benefits.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7061, 35 FR 14770, Sept. 23, 1970]

§1.501(c)(9)–1 Voluntary employees' beneficiary associations, in general.

To be described in section 501(c)(9) an organization must meet all of the following requirements:

(a) The organization is an employees' association,

(b) Membership in the association is voluntary,

(c) The organization provides for the payment of life, sick, accident, or other benefits to its members or their dependents or designated beneficiaries, and substantially all of its operations are in furtherance of providing such benefits, and

(d) No part of the net earnings of the organization inures, other than by payment of the benefits referred to in paragraph (c) of this section, to the benefit of any private shareholder or individual.

[T.D. 7750, 45 FR 1721, Jan. 7, 1981]

§1.501(c)(9)–2 Membership in a voluntary employees' beneficiary association; employees; voluntary association of employees.

(a) *Membership*—(1) *In general.* The membership of an organization described in section 501(c)(9) must consist of individuals who become entitled to participate by reason of their being employees and whose eligibility for membership is defined by reference to objective standards that constitute an employment-related common bond among such individuals. Typically, those eligible for membership in an organization described in section 501(c)(9) are defined by reference to a common employer (or affiliated employers), to coverage under one or more collective bargaining agreements (with respect to benefits provided by reason of such agreement(s)), to membership in a labor union, or to membership in one or more locals of a national or international labor union. For example, membership in an association might be open to all employees of a particular employer, or to employees in specified job classifications working for certain employers at specified locations and who are entitled to benefits by reason of one or more collective bargaining agreements. In addition, employees of one or more employers engaged in the same line of business in the same geographic locale will be considered to share an employment-related bond for purposes of an organization through which their employers provide benefits. Employees of a labor union also will be considered to share an employment-related common bond with members of the union, and employees of an association will be considered to share an employment-related common bond with members of the association. Whether a group of individuals is defined by reference to a permissible standard or standards is a question to be determined with regard to all the facts and circumstances, taking into account the guidelines set forth in this paragraph. Exemption will not be denied merely because the membership of an association includes some individuals who are not employees (within the meaning of paragraph (b) of this section), provided that such individuals share an employment-related bond with the employee-members. Such individuals may include, for example, the proprietor of a business whose employees are members of the association. For purposes of the preceding two sentences, an association will be considered to be composed of employees if 90 percent of the total membership of the association on one day of each quarter of the association's taxable year consists of employees (within the meaning of paragraph (b) of this section).

(2) *Restrictions*—(i) *In general.* Eligibility for membership may be restricted by geographic proximity, or by objective conditions or limitations reasonably related to employment, such as a limitation to a reasonable classification of workers, a limitation based on a reasonable minimum period of service, a limitation based on maximum compensation, or a requirement that a member be employed on a full-time basis. Similarly, eligibility for benefits may be restricted by objective conditions relating to the type or amount of benefits offered. Any objective criteria used to restrict eligibility for membership or benefits may not, however, be selected or administered in a manner that limits membership or benefits to officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association. Similarly, eligibility for benefits may not be subject to conditions or limitations that have the effect of entitling officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association to benefits that are disproportionate in relation to benefits to which other members of the association are entitled. See § 1.501(c)(9)–4(b). Whether the selection or administration of objective conditions has the effect of providing disproportionate benefits to officers, shareholders, or highly compensated employees generally is to be determined on the basis of all the facts and circumstances.

(ii) *Generally permissible restrictions or conditions.* In general the following restrictions will not be considered to be inconsistent with § 1.501(c)(9)–2(a)(2)(i) or § 1.501(c)(9)–4(b):

(A) In the case of an employer-funded organization, a provision that excludes or has the effect of excluding from membership in the organization or participation in a particular benefit plan employees who are members of another organization or covered by a different plan, funded or contributed to by the employer, to the extent that such other organization or plan offers similar benefits on comparable terms to the excluded employees.

(B) In the case of an employer funded-organization, a provision that excludes from membership, or limits the type or amount of benefits provided to, individuals who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that the benefit or benefits provided by the organization were the subject of good faith bargaining between such employee representatives and such employer or employers.

(C) Restrictions or conditions on eligibility for membership or benefits that are determined through collective bargaining, by trustees designated pursuant to a collective bargaining agreement, or by the collective bargaining agents of the members of an association or trustees named by such agent or agents.

(D) The allowance of benefits only on condition that a member or recipient contribute to the cost of such benefits, or the allowance of different benefits based solely on differences in contributions, provided that those making equal contributions are entitled to comparable benefits.

(E) A requirement that a member (or a member's dependents) meet a reasonable health standard related to eligibility for a particular benefit.

(F) The provision of life benefits in amounts that are a uniform percentage of the compensation received by the individual whose life is covered.

(G) The provision of benefits in the nature of wage replacement in the event of disability in amounts that are a uniform percentage of the compensation of the covered individuals (either before or after taking into account any disability benefits provided through social security or any similar plan providing for wage replacement in the event of disability).

(3) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Pursuant to a collective bargaining agreement entered into by X Corporation and W, a labor union which represents all of X Corporation's hourly-paid employees, the X Corporation Union Benefit Plan is established to provide life insurance benefits to employees of X represented by W. The Plan is funded by contributions from X, and is jointly administered by X and W. In order to provide its non-unionized employees with comparable life insurance benefits, X also establishes and funds the X Corporation Life Insurance Trust. The Trust will not be ineligible for exemption as an organization described in section 501(c)(9) solely because membership is restricted to those employees of X who are not members of W.

Example 2. The facts are the same as in Example 1 except that the life insurance benefit provided to the non-unionized employees of X differs from the life insurance benefit provided to the unionized employees of X pursuant to the collective bargaining agreement. The trust will not be ineligible for exemption as an organization described in section 501(c)(9) solely because the life insurance benefit provided to X's nonunionized employees is not same as the life insurance benefit provided to X's unionized employees.

Example 3. S corporation established a plan to provide health benefits to all its employees. In accordance with the provisions of the plan each employee may secure insurance coverage by making an election under which the employee agrees to contribute periodically to the plan an amount which is determined solely by whether the employee elects a high option coverage or a low option coverage and on whether the employee is unmarried or has a family. As an alternative, the employee may elect high or low options, self only or self and family, coverage through a local prepaid group medical plan. The contributions required of those electing the prepaid group medical plan also vary with the type of coverage selected, and differ from those required of employees electing insurance. The difference between the amount contributed by employees electing the various coverages and the actual cost of purchasing the coverage is made up through contributions by S to the plan, and under the plan, S provides approximately the same proportion of the cost for each coverage. To fund the plan, S established an arrangement in the nature of a trust under applicable local law and contributes all employee contributions, and all amounts which by the terms of the plan it is required to contribute, to the trust. The terms of the plan do not provide for disproportionate benefits to the employees of S and will not be considered inconsistent with §1.501(c)(9)–2(a)(2)(i).

Example 4. The facts are the same as in Example 3 except that, for those employees or former employees covered by Medicare, the plan provides a distinct coverage which supplements Medicare benefits. Eligibility for Medicare is an objective condition relating to a type of benefit offered, and the provision of separate coverage for those eligible for Medicare will not be considered inconsistent with §1.501(c)(9)–2(a)(2)(i).

(b) *Meaning of employee.* Whether an individual is an *employee* is determined by reference to the legal and bona fide relationship of employer and employee. The term *employee* includes the following:

(1) An individual who is considered an employee:

(i) For employment tax purposes under subtitle C of the Internal Revenue Code and the regulations thereunder, or

(ii) For purposes of a collective bargaining agreement,

whether or not the individual could qualify as an employee under applicable common law rules. This would include any person who is considered an employee for purposes of the Labor Management Relations Act of 1947, 61 Stat. 136, *as amended,* 29 U.S.C. 141 (1979).

(2) An individual who became entitled to membership in the association by reason of being or having been an employee. Thus, an individual who would otherwise qualify under this paragraph will continue to qualify as

an employee even though such individual is on leave of absence, works temporarily for another employer or as an independent contractor, or has been terminated by reason of retirement, disability or layoff. For example, an individual who in the normal course of employment is employed intermittently by more than one employer in an industry characterized by short-term employment by several different employers will not, by reason of temporary unemployment, cease to be an employee within the meaning of this paragraph.

(3) The surviving spouse and dependents of an employee (if, for purposes of the 90-percent test of § 1.501(c)(9)–2(a)(1) they are considered to be members of the association).

(c) *Description of voluntary association of employees*—(1) *Association.* To be described in section 501(c)(9) and this section there must be an entity, such as a corporation or trust established under applicable local law, having an existence independent of the member-employees or their employer.

(2) *Voluntary.* Generally, membership in an association is voluntary if an affirmative act is required on the part of an employee to become a member rather than the designation as a member due to employee status. However, an association shall be considered voluntary although membership is required of all employees, provided that the employees do not incur a detriment (for example, in the form of deductions from pay) as the result of membership in the association. An employer is not deemed to have imposed involuntary membership on the employee if membership is required as the result of a collective bargaining agreement or as an incident of membership in a labor organization.

(3) *Of employees.* To be described in this section, an organization must be controlled—

(i) By its membership,

(ii) By independent trustee(s) (such as a bank), or

(iii) By trustees or other fiduciaries at least some of whom are designated by, or on behalf of, the membership. Whether control by or on behalf of the membership exists is a question to be determined with regard to all of the facts and circumstances, but generally such control will be deemed to be present when the membership (either directly or through its representative) elects, appoints or otherwise designates a person or persons to serve as chief operating officer(s), administrator(s), or trustee(s) of the organization. For purposes of this paragraph an organization will be considered to be controlled by independent trustees if it is an *employee welfare benefit plan,* as defined in section 3(1) of the Employee Retirement Income Security Act of 1974 (ERISA), and, as such, is subject to the requirements of parts 1 and 4 of subtitle B, title I of ERISA. Similarly, a plan will be considered to be controlled by its membership if it is controlled by one or more trustees designated pursuant to a collective bargaining agreement (whether or not the bargaining agent of the represented employees bargained for and obtained the right to participate in selecting the trustees).

(4) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X, a labor union, represents all the hourly-paid employees of Y Corporation. A health insurance benefit plan was established by X and Y as the result of a collective bargaining agreement entered into by them. The plan established the terms and conditions of membership in, and the benefits to be provided by, the plan. In accordance with the terms of the agreement, Y Corporation is obligated to establish a trust fund and make contributions thereto at specified rates. The trustees, some of whom are designated by X and some by Y, are authorized to hold and invest the assets of the trust and to make payments on instructions issued by Y Corporation in accordance with the conditions contained in the plan. The interdependent benefit plan agreement and trust indenture together create a voluntary employees' beneficiary association over which the employees posses the requisite control through the trustees designated by their representative, X.

Example 2. Z Corporation unilaterally established an educational benefit plan for its employees. The purpose of the plan is to provide payments for job-related educational or training courses, such as apprenticeship training programs, for Z Corporation employees, according to objective criteria set forth in the plan. Z establishes a separate bank account which it uses to fund payments to the plan. Contributions to the account are to be made at the discretion of and solely by Z Corporation, which also administers the plan and retains control over the assets in the fund. Z Corporation's educational benefit plan and the related account do not constitute an association having an existence independent of Z Corporation and therefore do not constitute a voluntary employees' beneficiary association.

Example 3. A, an individual, is the incorporator and chief operating officer of Lawyers' Beneficiary Association (LBA). LBA is engaged in the business of providing medical benefits to members of the Association and their families. Membership is open only to practicing lawyers located in a particular metropolitan area who are neither self-employed nor partners in a law firm. Membership in LBA is solicited by insurance agents under the control of X Corporation (owned by A) which, by contract with LBA, is the exclusive sales agent. Medical benefits are paid from a trust account containing periodic *contributions* paid by the members, together with proceeds from the investment of those contributions. Contribution and benefit levels are set by LBA. The *members* of LBA do not hold meetings, have no right to elect officers or directors of the Association, and no right to replace trustees. Collectively, the subscribers for medical benefits from LBA cannot be said to control the association and membership is neither more than nor different from the purchase of an insurance policy from a stock insurance company. LBA is not a voluntary employees' beneficiary association.

Example 4. U corporation unilaterally established a plan to provide benefits to its employees. In accordance with the provisions of the plan, each employee may secure insurance or benefit coverage by making an election under which the employee agrees to contribute to the plan an amount which is determined solely by whether the employee elects a high option coverage or a low option coverage and on whether the employee elects self only or self and family coverage. The difference between the amount contributed by employees electing the various coverages and the actual cost of the coverage is made up through contributions by U to the plan. To fund the plan, U established an arrangement in the nature of a trust under applicable local law and contributed all employee contributions, and all amounts which by the term of the plan it was required to provide to the plan, to the trust. The trust constitutes an *employee welfare benefit plan* within the meaning of, and subject to relevant requirements of, ERISA. It will be considered to meet the requirements of §1.501(c)(9)–2(c)(3).

[T.D. 7750, 46 FR 1723, Jan. 7, 1981]

§1.501(c)(9)–3 Voluntary employees' beneficiary associations; life, sick, accident, or other benefits.

(a) *In general.* The life, sick, accident, or other benefits provided by a voluntary employees' beneficiary association must be payable to its members, their dependents, or their designated beneficiaries. For purposes of section 501(c)(9), *dependent* means the member's spouse; any child of the member or the member's spouse who is a minor or a student (within the meaning of section 151(e)(4)); any other minor child residing with the member; and any other individual who an association, relying on information furnished to it by a member, in good faith believes is a person described in section 152(a). Life, sick, accident, or other benefits may take the form of cash or noncash benefits. A voluntary employees' beneficiary association is not operated for the purpose of providing life, sick, accident, or other benefits unless substantially all of its operations are in furtherance of the provision of such benefits. Further, an organization is not described in this section if it systematically and knowingly provides benefits (of more than a *de minimis* amount) that are not permitted by paragraphs (b), (c), (d), or (e) of this section.

(b) *Life benefits.* The term *life benefits* means a benefit (including a burial benefit or a wreath) payable by reason of the death of a member or dependent. A *life benefit* may be provided directly or through insurance. It generally must consist of current protection, but also may include a right to convert to individual coverage on termination of eligibility for coverage through the association, or a permanent benefit as defined in, and subject to the conditions in, the regulations under section 79. A *life benefit* also includes the benefit provided under any life insurance contract purchased directly from an employee-funded association by a member or provided by such an association to a member. The term *life benefit* does not include a pension, annuity or similar benefit, except that a benefit payable by reason of the death of an insured may be settled in the form of an annuity to the beneficiary in lieu of a lump-sum death benefit (whether or not the contract provides for settlement in a lump sum).

(c) *Sick and accident benefits.* The term *sick and accident benefits* means amounts furnished to or on behalf of a member or a member's dependents in the event of illness or personal injury to a member or dependent. Such benefits may be provided through reimbursement to a member or a member's dependents for amounts expended because of illness or personal injury, or through the payment of premiums to a medical benefit or health insurance program. Similarly, a sick and accident benefit includes an amount paid to a member in lieu of income during a period in which the member is unable to work due to sickness or injury. Sick benefits also include benefits designed to safeguard or improve the health of members and their dependents. Sick and accident benefits may be provided directly by an association to or on behalf of members and their dependents, or may be provided indirectly by an association through the payment of premiums or fees to an insurance company, medical clinic, or other program under which members and their dependents are entitled to medical services or to other sick and accident benefits. Sick and accident benefits may also be furnished in noncash form, such as, for example, benefits in the nature of clinical care services by visiting nurses, and transportation furnished for medical care.

(d) *Other benefits.* The term *other benefits* includes only benefits that are similar to life, sick, or accident benefits. A benefit is similar to a life, sick, or accident benefit if:

(1) It is intended to safeguard or improve the health of a member or a member's dependents, or

(2) It protects against a contingency that interrupts or impairs a member's earning power.

(e) *Examples of other benefits.* Paying vacation benefits, providing vacation facilities, reimbursing vacation expenses, and subsidizing recreational activities such as athletic leagues are considered *other benefits.* The provision of child-care facilities for preschool and school-age dependents are also considered *other benefits.* The provision of job readjustment allowances, income maintenance payments in the event of economic dislocation, temporary living expense loans and grants at times of disaster (such as fire or flood), supplemental unemployment compensation benefits (as defined in section 501(c)(17)(D)(i) of the Code), severance benefits (under a severance pay plan within the meaning of 29 CFR 2510.3–2(b)) and education or training benefits or courses (such as apprentice training programs) for members, are considered *other benefits* because they protect against a contingency that interrupts earning power. Personal legal service benefits which consist of payments or credits to one or more organizations or trusts described in section 501(c)(20) are considered *other benefits.* Except to the extent otherwise provided in these regulations, as amended from time to time, *other benefits* also include any benefit provided in the manner permitted by paragraphs (5) *et seq.* of section 302(c) of the Labor Management Relations Act of 1947, 61 Stat. 136, *as amended,* 29 U.S.C. 186(c) (1979).

(f) *Examples of nonqualifying benefits.* Benefits that are not described in paragraphs (d) or (e) of this section are not *other benefits.* Thus, *other benefits* do not include the payment of commuting expenses, such as bridge tolls or train fares, the provision of accident or homeowner's insurance benefits for damage to property, the provision of malpractice insurance, or the provision of loans to members except in times of distress (as permitted by § 1.501(c)(9)–3(e)). *Other benefits* also do not include the provision of savings facilities for members. The term *other benefits* does not include any benefit that is similar to a pension or annuity payable at the time of mandatory or voluntary retirement, or a benefit that is similar to the benefit provided under a stock bonus or profit-sharing plan. For purposes of section 501(c)(9) and these regulations, a benefit will be considered similar to that provided under a pension, annuity, stock bonus or profit-sharing plan if it provides for deferred compensation that becomes payable by reason of the passage of time, rather than as the result of an unanticipated event. Thus, for example, supplemental unemployment benefits, which generally become payable by reason of unanticipated layoff, are not, for purposes of these regulations, considered similar to the benefit provided under a pension, annuity, stock bonus or profit-sharing plan.

(g) *Examples.* The provisions of this section may be further illustrated by the following examples:

Example 1. V was organized in connection with a vacation plan created pursuant to a collective bargaining agreement between M, a labor union, which represents certain hourly paid employees of T corporation, and T. The agreement calls for the payment by T to V of a specified sum per hour worked by T employees who are covered by the collective bargaining agreement. T includes the amounts in the covered employees' wages and withholds income and FICA taxes. The amounts are paid by T to V to provide vacation benefits provided under the collective bargaining agreement. Generally, each covered employee receives a check in payment of his or her vacation benefit during the year following the year in which contributions were made by T to V. The amount of the vacation benefit is determined by reference to the contributions during the prior year to V by T on behalf of each employee, and is distributed in cash to each such employee. If the earnings on investments by V during the year preceding distribution are sufficient after deducting the expenses of administering the plan, each recipient of a vacation benefit is paid an amount, in addition to the contributions on his or her behalf, equal to his/her ratable share of the net earnings of V during such year. The plan provides a vacation benefit that constitutes an eligible *other benefit* described in section 501(c)(9) and §1.501(c)(9)–3(e).

Example 2. The facts are the same as in Example 1, except that each covered employee of T is entitled, at his or her discretion, to contribute up to an additional $1,000 each year to V, which agrees in respect of such sum to pay interest at a stated rate from the time of contribution until the time at which the contributing employee's vacation benefit is distributed. In addition, each employee may elect to leave all or a portion of his/her distributable benefit on deposit past the time of distribution, in which case interest will continue to accrue. Because the plan more closely resembles a savings arrangement than a vacation plan, the benefit payable to the covered employees of T is not a *vacation benefit* and is not an eligible *other benefit* described in section 501(c)(9) and §1.501(c)(9)–3 (d) or (e).

[T.D. 7750, 46 FR 1724, Jan. 7, 1981]

§1.501(c)(9)–4 Voluntary employees' beneficiary associations; inurement.

(a) *General rule.* No part of the net earnings of an employees' association may inure to the benefit of any private shareholder or individual other than through the payment of benefits permitted by §1.501(c)(9)–3. The disposition of property to, or the performance of services for, a person for less than the greater of fair market value or cost (including indirect costs) to the association, other than as a life, sick, accident or other permissible benefit, constitutes prohibited inurement. Generally, the payment of unreasonable compensation to the trustees or employees of the association, or the purchase of insurance or services for amounts in excess of their fair market value from a company in which one or more of the association's trustees, officers or fiduciaries has an interest, will constitute prohibited inurement. Whether prohibited inurement has occurred is a question to be determined with regard to all of the facts and circumstances, taking into account the guidelines set forth in this section. The guidelines and examples contained in this section are not an exhaustive list of the activities that may constitute prohibited inurement, or the persons to whom the association's earnings could impermissibly inure. See §1.501(a)–1(c).

(b) *Disproportionate benefits.* For purposes of subsection (a), the payment to any member of disproportionate benefits, where such payment is not pursuant to objective and nondiscriminatory standards, will not be considered a benefit within the meaning of §1.501(c)(9)–3 even though the benefit otherwise is one of the type permitted by that section. For example, the payment to highly compensated personnel of benefits that are disproportionate in relation to benefits received by other members of the association will constitute prohibited inurement. Also, the payment to similarly situated employees of benefits that differ in kind or amount will constitute prohibited inurement unless the difference can be justified on the basis of objective and reasonable standards adopted by the association or on the basis of standards adopted pursuant to the terms of a collective bargaining agreement. In general, benefits paid pursuant to standards or subject to conditions that do not provide for disproportionate benefits to officers, shareholders, or highly compensated employees will not be considered disproportionate. See §1.501(c)(9)–2(a) (2) and (3).

(c) *Rebates.* The rebate of excess insurance premiums, based on the mortality or morbidity experience of the insurer to which the premiums were paid, to the person or persons whose contributions were applied to such premiums, does not constitute prohibited inurement. A voluntary employees' beneficiary association may also make administrative adjustments strictly incidental to the provision of benefits to its members.

(d) *Termination of plan or dissolution of association.* It will not constitute prohibited inurement if, on termination of a plan established by an employer and funded through an association described in section 501(c)(9), any assets remaining in the association, after satisfaction of all liabilities to existing beneficiaries of the plan, are applied to provide, either directly or through the purchase of insurance, life, sick, accident or other benefits within the meaning of §1.501(c)(9)–3 pursuant to criteria that do not provide for disproportionate benefits to officers, shareholders, or highly compensated employees of the employer. See §1.501(c)(9)–2(a)(2). Similarly, a distribution to members upon the dissolution of the association will not constitute prohibited inurement if the amount distributed to members are determined pursuant to to the terms of a collective bargaining agreement or on the basis of objective and reasonable standards which do not result in either unequal payments to similarly situated members or in disproportionate payments to officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association. Except as otherwise provided in the first sentence of this paragraph, if the association's corporate charter, articles of association, trust instrument, or other written instrument by which the association was created, as amended from time to time, provides that on dissolution its assets will be distributed to its members' contributing employers, or if in the absence of such provision the law of the state in which the association was created provides for such distribution to the contributing employers, the association is not described in section 501(c)(9).

(e) *Example.* The provisions of this section may be illustrated by the following example:

Example. Employees A, B and C, members of the X voluntary employees' beneficiary association, are unemployed. They receive unemployment benefits from X. Those to A include an amount in addition to those provided to B and C, to provide for A's retraining. B has been found pursuant to objective and reasonable standards not to qualify for the retraining program. C, although eligible for retraining benefits has declined. X's additional payment to A for retraining does not constitute prohibited inurement.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§1.501(c)(9)–5 Voluntary employees' beneficiary associations; recordkeeping requirements.

(a) *Records.* In addition to such other records which may be required (for example, by section 512(a)(3) and the regulations thereunder), every organization described in section 501(c)(9) must maintain records indicating the amount contributed by each member and contributing employer, and the amount and type of benefits paid by the organization to or on behalf of each member.

(b) *Cross reference.* For provisions relating to annual information returns with respect to payments, see section 6041 and the regulations thereunder.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§1.501(c)(9)–6 Voluntary employees' beneficiary associations; benefits includible in gross income.

(a) *In general.* Cash and noncash benefits realized by a person on account of the activities of an organization described in section 501(c)(9) shall be included in gross income to the extent provided in the Internal Revenue Code of 1954, including, but not limited to, sections 61, 72, 101, 104 and 105 of the Code and regulations thereunder.

(b) *Availability of statutory exclusions from gross income.* The availability of any statutory exclusion from gross income with respect to contributions to, or the payment of benefits from, an organization described in section 501(c)(9) is determined by the statutory provision conferring the exclusion, and the regulations and rulings thereunder, not by whether an individual is eligible for membership in the organization or by the permissibility of the benefit paid. Thus, for example, if a benefit is paid by an employer-funded organization described in section 501(c)(9) to a member who is not an *employee*, a statutory exclusion from gross income that is available only for *employees* would be unavailable in the case of a benefit paid to such individual. Similarly, the fact that, for example, under some circumstances educational benefits constitute *other benefits* does not of itself mean that such benefits are eligible for the exclusion of either section 117 or section 127 of the Code.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§1.501(c)(9)–7 Voluntary employees' beneficiary associations; section 3(4) of ERISA.

The term *voluntary employees' beneficiary association* in section 501(c)(9) of the Internal Revenue Code is not necessarily coextensive with the term *employees' beneficiary association* as used in section 3(4) of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1002(4), and the requirements which an organization must meet to be an *employees' beneficiary association* within the meaning of section 3(4) of ERISA are not necessarily identical to the requirements that an organization must meet in order to be a *voluntary employees' beneficiary association* within the meaning of section 501(c)(9) of the Code.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§1.501(c)(9)–8 Voluntary employees' beneficiary associations; effective date.

(a) *General rule.* Except as otherwise provided in this section, the provisions of §§1.501(c)(9)–1 through 1.501(c)(9)–7 shall apply with respect to taxable years beginning after December 31, 1954.

(b) *Pre-1970 taxable years.* For taxable years beginning before January 1, 1970, section 501(c)(9)(B) (relating to the requirement that 85 percent or more of the association's income consist of amounts collected from members and contributed by employers), as in effect for such years, shall apply.

(c) *Existing associations.* Except as otherwise provided in paragraph (d), the provisions of §1.501(c)(9)–2(a)(1) and (c)(3) shall apply with respect to taxable years beginning after December 31, 1980.

(d) *Collectively-bargained plans.* In the case of a voluntary employees' beneficiary association which receives contributions from one or more employers pursuant to one or more collective bargaining agreements in effect on December 31, 1980, the provisions of §§1.501(c)(9)–1 through 1.501(c)(9)–5 shall apply with respect to taxable years beginning after the date on which the agreement terminates (determined without regard to any extension thereof agreed to after December 31, 1980).

(e) *Election.* Notwithstanding paragraphs (c) and (d) of this section, an organization may choose to be subject to all or a portion of one or more of the provisions of these regulations for any taxable year beginning after December 31, 1954.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981; 46 FR 11971, Feb. 12, 1981]

§1.501(c)(10)–1 Certain fraternal beneficiary societies.

(a) For taxable years beginning after December 31, 1969, an organization will qualify for exemption under section 501(c)(10) if it:

(1) Is a domestic fraternal beneficiary society order, or association, described in section 501(c)(8) and the regulations thereunder except that it does not provide for the payment of life, sick, accident, or other benefits to its members, and

(2) Devotes its net earnings exclusively to religious, charitable, scientific, literary, educational, and fraternal purposes.

Any organization described in section 501(c)(7), such as, for example, a national college fraternity, is not described in section 501(c)(10) and this section.

[T.D. 7172, 37 FR 5618, Mar. 17, 1972]

§ 1.501(c)(12)–1 Local benevolent life insurance associations, mutual irrigation and telephone companies, and like organizations.

(a) An organization described in section 501(c)(12) must receive at least 85 percent of its income from amounts collected from members for the sole purpose of meeting losses and expenses. If an organization issues policies for stipulated cash premiums, or if it requires advance deposits to cover the cost of the insurance and maintains investments from which more than 15 percent of its income is derived, it is not entitled to exemption. On the other hand, an organization may be entitled to exemption, although it makes advance assessments for the sole purpose of meeting future losses and expenses, provided that the balance of such assessments remaining on hand at the end of the year is retained to meet losses and expenses or is returned to members.

(b) The phrase *of a purely local character* applies to benevolent life insurance associations, and not to the other organizations specified in section 501(c)(12). It also applies to any organization seeking exemption on the ground that it is an organization similar to a benevolent life insurance association. An organization of a purely local character is one whose business activities are confined to a particular community, place, or district, irrespective, however, of political subdivisions. If the activities of an organization are limited only by the borders of a State it cannot be considered to be purely local in character.

(c) For taxable years of a mutual or cooperative telephone company beginning after December 31, 1974, the 85 percent member-income test described in paragraph (a) of this section is applied without taking into account income received or accrued from another telephone company for the performance of communication services involving the completion of long distance calls to, from, or between members of the mutual or cooperative telephone company. For example, if, in one year, a cooperative telephone company receives $85x from its members for telephone calls, $15x as interest income, and $20x as credits under long distance interconnection agreements with other telephone companies for the performance of communication services involving the completion of long distance calls to, from, or between the cooperative's members (whether or not the credits may be offset, in whole or in part, by amounts due the other companies under the interconnection agreements), the member-income fraction is calculated without taking into account, either in the numerator or denominator, the $20x credits received from the other telephone companies. In this example, the 85 percent member-income test is satisfied because at least 85 percent

$$\frac{\text{member income}}{\text{total income}} = \frac{85x}{85x+15x} = \frac{85}{100} = 85\%$$

of the cooperative's total income is derived from member income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended at 44 FR 59523, Oct. 16, 1979]

§ 1.501(c)(13)–1 Cemetery companies and crematoria.

(a) *Nonprofit mutual cemetery companies.* A nonprofit cemetery company may be entitled to exemption if it is owned by and operated exclusively for the benefit of its lot owners who hold such lots for bona fide burial purposes and not for the purpose of fesale. A mutual cemetery company which also engages in charitable activities, such as burial of paupers, will be regarded as operating in conformity with this standard. Further, the fact that a mutual cemetery company limits its membership to a particular class of individuals, such as members of a family, will not affect its status as mutual so long as all the other requirements of section 501(c)(13) are met.

(b) *Nonprofit cemetery companies and crematoria.* Any nonprofit corporation, chartered solely for the purpose of the burial, or (for taxable years beginning after December 31, 1970) the cremation of bodies, and not permitted by its charter to engage in any business not necessarily incident to that purpose, is exempt from income tax, provided that no part of its net earnings inures to the benefit of any private shareholder or individual.

(c) *Preferred stock*—(1) *In general.* Except as provided in subparagraph (3) of this paragraph, a cemetery company or crematorium is not described in section 501(c)(13) if it issues preferred stock on or after November 28, 1978.

(2) *Transitional rule for preferred stock issued prior to November 28, 1978.* In the case of preferred stock issued prior to November 28, 1978, a cemetery company or crematorium which issued such stock shall not fail to be exempt from income tax solely because it issued preferred stock which entitled the holders to dividends at a fixed rate, not exceeding the legal rage of interest in the State of incorporation or 8 percent per annum, whichever is greater, on the value of the consideration for which the stock was issued, if its articles of incorporation require:

(i) That the preferred stock be retired at par as rapidly as funds therefor become available from operations, and

(ii) That all funds not required for the payment of dividends upon or for the retirement of preferred stock be used by the company for the care and inprovement of the cemetery property. The term *legal rate of interest* shall mean the rate of interest prescribed by law in the State of incorporation which prevails in the absence of an agreement between contracting parties fixing a rate.

(3) *Transitional rule for preferred stock issued on or after November 28, 1978.* In the case of preferred stok issued on or after November 28, 1978, a cemetery company or crematorium shall not fail to be exempt from income tax if its articles of incorporation and the preferred stock meet the requirements of paragraph (c)(2) and if such stock is issued pursuant to a plan which has been reduced to writing and adopted prior to November 28, 1978. The adoption of the plan must be shown by the acts of the duly constituted responsible officers and appear upon the official records of the cemetery company or crematorium.

(d) *Sales to exempt cemetery companies and crematoria.* Except as provided in paragraph (c)(2) or (c)(3) of this section (relating to transitional rules for preferred stock), no person may have any interest in the net earnings of a tax-exempt cemetery company or crematorium. Thus, a cemetery company or crematorium is not exempt from tax if property is transferred to such organization in exchange for an interest in the net earnings of the organization so long as such interest remains outstanding. An interest in a cemetery company or crematorium that constitutes an equity interest within the meaning of section 385 will be considered an interest in the net earnings of the cemetery. However, an interest in a cemetery company or crematorium that does not constitute an equity interest within the meaning of section 385 may nevertheless constitute an interest in the net earning of the organization. Thus, for example, a bond or other evidence of indebtedness issued by a cemetery company or crematorium which provides for a fixed rate of interest but which, in addition, provides for additional interest payments contingent upon the revenues or income of the organization is considered an interest in the net earnings of the organization. Similarly, a convertible debt obligation issued by a cemetery company or crematorium after July 7, 1975, is considered an interest in the net earnings of the organization.

[T.D. 7698, 45 FR 33972, May 21, 1980]

§1.501(c)(14)–1 Credit unions and mutual insurance funds.

Credit unions (other than Federal credit unions described in section 501(c)(1)) without capital stock, organized and operated for mutual purposes and without profit, are exempt from tax under section 501(a). Corporations or associations without capital stock organized before September 1, 1951 and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of, shares or deposits in:

(a) Domestic building and loan associations as defined in section 7701(a)(19),

(b) Cooperative banks without capital stock organized and operated for mutual purposes and without profit, or

(c) Mutual savings banks not having capital stock represented by shares,

are also exempt from tax under section 501(a). In addition, corporations or associations of the type described in the preceding sentence which were organized on or after September 1, 1951, but before September 1, 1957, are exempt from tax under section 501(a) for taxable years beginning after December 31, 1959.

[T.D. 6493, 25 FR 9219, Sept. 27, 1960]

§ 1.501(c)(15)–1 Mutual insurance companies or associations.

(a) *Taxable years beginning after December 31, 1962.* An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed $150,000:

(1) The gross amount of income during the taxable year from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and the regulations thereunder.

(ii) Dividends, as described in § 1.61–9.

(iii) Rents and royalties, as described in § 1.61–8.

(iv) The entering into of any lease, mortgage, or other instrument or agreement from which the company may derive interest, rents, or royalties.

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph.

(2) The gross income from any trade or business (other than an insurance business) carried on by the company or association, or by a partnership of which the company or association is a partner.

(3) Premiums (including deposits and assessments).

(b) *Taxable years beginning after December 31, 1954, and before January 1, 1963.* An insurance company or association described in section 501(c)(15) and paragraph (a) of this section is exempt under section 501(a) if the gross amount received during the taxable year from the sum of the items described in paragraph (a) (1), (2), and (3) of this section does not exceed $75,000.

(c) *No double inclusion of income.* In computing the gross income from any trade or business (other than an insurance business) carried on by the company or association, or by a partnership of which the company or association is a partner, any item described in section 822(b)(1) (A), (B), or (C) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) (A), (B), or (C) and paragraph (a)(1) of this section.

(d) *Taxable years beginning after December 31, 1953, and before January 1, 1955.* An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed $75,000:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822–3.

(ii) Dividends, as described in § 1.61–9.

(iii) Rents (but excluding royalties), as described in § 1.61–8.

(2) Premiums (including deposits and assessments).

(e) *Exclusion of capital gains.* Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses), chapter 1 of the Code, shall be excluded from the amounts described in this section.

[T.D. 6662, 28 FR 6972, July 29, 1963]

§1.501(c)(16)–1 Corporations organized to finance crop operations.

A corporation organized by a farmers' cooperative marketing or purchasing association, or the members thereof, for the purpose of financing the ordinary crop operations of such members or other producers is exempt, provided the marketing or purchasing association is exempt under section 521 and the financing corporation is operated in conjunction with the marketing or purchasing association. The provisions of §1.521–1 relating to a reserve or surplus and to capital stock shall also apply to corporations coming under this section.

§1.501(c)(17)–1 Supplemental unemployment benefit trusts.

(a) *Requirements for qualification.* (1) A supplemental unemployment benefit trust may be exempt as an organization described in section 501(c)(17) if the requirements of subparagraphs (2) through (6) of this paragraph are satisfied.

(2) The trust is a valid, existing trust under local law and is evidenced by an executed written document.

(3) The trust is part of a written plan established and maintained by an employer, his employees, or both the employer and his employees, solely for the purpose of providing supplemental unemployment compensation benefits (as defined in section 501(c)(17)(D) and paragraph (b)(1) of §1.501(c)(17)–1).

(4) The trust is part of a plan which provides that the corpus and income of the trust cannot (in the taxable year, and at any time thereafter, before the satisfaction of all liabilities to employees covered by the plan) be used for, or diverted to, any purpose other than the providing of supplemental unemployment compensation benefits. Thus, if the plan provides for the payment of any benefits other than supplemental unemployment compensation benefits as defined in paragraph (b) of this section, the trust will not be entitled to exemption as an organization described in section 501(c)(17). However, the payment of any necessary or appropriate expenses in connection with the administration of a plan providing supplemental unemployment compensation benefits shall be considered a payment to provide such benefits and shall not affect the qualification of the trust.

(5) The trust is part of a plan whose eligibility conditions and benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. See sections 401(a)(3)(B) and 401(a)(4) and §§1.401–3 and 1.401–4. However, a plan is not discriminatory within the meaning of section 501(c)(17)(A)(iii), relating to the requirement that the benefits paid under the plan be nondiscriminatory, merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan. Accordingly, the benefits provided for highly paid employees may be greater than the benefits provided for lower paid employees if the benefits are determined by reference to their compensation; but, in such a case, the plan will not qualify if the benefits paid to the higher paid employees bear a larger ratio to their compensation than the benefits paid to the lower paid employees bear to their compensation. In addition, section 501(c)(17)(B) sets forth certain other instances in which a plan will not be considered discriminatory (see paragraph (c) of §1.501(c)(17)–2).

(6) The trust is part of a plan which requires that benefits are to be determined according to objective standards. Thus, a plan may provide similarly situated employees with benefits which differ in kind and amount, but may not permit such benefits to be determined solely in the discretion of the trustees.

(b) *Meaning of terms.* The following terms are defined for purposes of section 501(c)(17):

(1) *Supplemental unemployment compensation benefits.* The term *supplemental unemployment compensation benefits* means only:

(i) Benefits paid to an employee because of his involuntary separation from the employment of the employer, whether or not such separation is temporary, but only when such separation is one resulting directly from a reduction in force, the discontinuance of a plant or operation, or other similar conditions; and

(ii) Sick and accident benefits subordinate to the benefits described in subdivision (i) of this subparagraph.

(2) *Employee.* The term *employee* means an individual whose status is that of an employee under the usual common-law rules applicable in determining the employer-employee relationship. The term *employee* also includes an individual who qualifies as an *employee* under the State or Federal unemployment compensation law covering his employment, whether or not such an individual could qualify as an employee under such common-law rules.

(3) *Involuntary separation from the employment of the employer.* Whether a *separation from the employment of the employer* occurs is a question to be decided with regard to all the facts and circumstances. However, for purposes of section 501(c)(17), the term *separation* includes both a temporary separation and a permanent severance of the employment relationship. Thus, for example, an employee may be separated from the employment of his employer even though at the time of separation it is believed that he will be reemployed by the same employer. Whether or not an employee is *involuntarily* separated from the employment of the employer is a question of fact. However, normally, an employee will not be deemed to have separated himself voluntarily from the employment of his employer merely because his collective bargaining agreement provides for the termination of his services upon the happening of a condition subsequent and that condition does in fact occur. For example, if the collective bargaining agreement provides that the employer may automate a given department and thereby dislocate several employees, the fact that the employees' collective bargaining agent has consented to such a condition will not render any employee's subsequent unemployment for such cause voluntary.

(4) *Other similar conditions.* Involuntary separation directly resulting from *other similar conditions* includes, for example, involuntary separation from the employment of the employer resulting from cyclical, seasonal, or technological causes. Some causes of involuntary separation from the employment of the employer which are not similar to those enumerated in section 501(c)(17)(D)(i) are separation for disciplinary reasons or separation because of age.

(5) *Subordinate sick and accident benefits.* In general, a sick and accident benefit payment is an amount paid to an employee in the event of his illness or personal injury (whether or not such illness or injury results in the employee's separation from the service of his employer). In addition, the phrase *sick and accident benefits* includes amounts provided under the plan to reimburse an employee for amounts he expends because of the illness or injury of his spouse or a dependent (as defined in section 152). Sick and accident benefits may be paid by a trust described in section 501(c)(17) only if such benefits are subordinate to the separation payments provided under the plan of which the trust forms a part. Whether the sick and accident benefits provided under a supplemental unemployment compensation benefit plan are subordinate to the separation benefits provided under such plan is a question to be decided with regard to all the facts and circumstances.

[T.D. 6972, 33 FR 12900, Sept. 12, 1968]

§ 1.501(c)(17)–2 General rules.

(a) *Supplemental unemployment compensation benefits.* Supplemental unemployment compensation benefits as defined in section 501(c)(17)(D) and paragraph (b)(1) of § 1.501(c)(17)–1 may be paid in a lump sum or installments. Such benefits may be paid to an employee who has, subsequent to his separation from the employment of the employer, obtained other part-time, temporary, or permanent employment. Furthermore, such payments may be made in cash, services, or property. Thus, supplemental unemployment compensation benefits provided to involuntarily separated employees may include, for example, the following: Furnishing of medical care at an established clinic, furnishing of food, job training and schooling, and job counseling. If such benefits are furnished in services or property, the fair market value of the benefits must satisfy the requirements of section 501(c)(17)(A)(iii), relating to nondiscrimination as to benefits. However, supplemental unemployment compensation benefits may be provided only to an employee and only under circumstances described in paragraph (b)(1) of §1.501(c)(17)–1. Thus, a trust described in section 501(c)(17) may not provide, for example, for the payment of a death, vacation, or retirement benefit.

(b) *Sick and accident benefits.* If a trust described in section 501(c)(17) provides for the payment of sick and accident benefits, such benefits may only be provided for employees who are eligible for receipt of separation benefits under the plan of which the trust is a part. However, the sick and accident benefits need not be provided for all the employees who are eligible for receipt of separation benefits, so long as the plan does not discriminate in favor of persons with respect to whom discrimination is proscribed in section 501(c)(17)(A) (ii) and (iii). Furthermore, the portion of the plan which provides for the payment of sick and accident benefits must satisfy the nondiscrimination requirements of section 501(c)(17)(A) (ii) and (iii) without regard to the portion of the plan which provides for the payment of benefits because of involuntary separation.

(c) *Correlation with other plans.* (1) In determining whether a plan meets the requirements of section 501(c)(17)(A) (ii) and (iii), any benefits provided under any other plan shall not be taken into consideration except in the particular instances enumerated in section 501(c)(17)(B) (i), (ii), and (iii). In general, these three exceptions permit a plan providing for the payment of supplemental unemployment compensation benefits to satisfy the nondiscrimination requirements in section 501(c)(17)(A) (ii) and (iii) if the plan is able to satisfy such requirements when it is correlated with one or more of the plans described in section 501(c)(17)(B).

(2) Under section 501(c)(17)(B)(i), a plan will not be considered discriminatory merely because the benefits under the plan which are first determined in a nondiscriminatory manner (within the meaning of section 501(c)(17)(A)) are then reduced by any sick, accident, or unemployment compensation benefits received under State or Federal law, or are reduced by a portion of these benefits if determined in a nondiscriminatory manner. Under this exception, a plan may, for example, satisfy the requirements of section 501(c)(17)(A)(iii) if it provides for the payment of an unemployment benefit and the amount of such benefit is determined as a percentage of the employee’s compensation which is then reduced by any unemployment benefit which the employee receives under a State plan. In addition, a plan could provide for the reduction of such a plan benefit by a percentage of the State benefit. Furthermore, a plan may also satisfy the requirements of section 501(c)(17)(A) if it provides for the payment to an employee of an amount which when added to any State unemployment benefit equals a percentage of the employee’s compensation.

(3) Under section 501(c)(17)(B)(ii), a plan will not be considered discriminatory merely because the plan provides benefits only for employees who are not eligible to receive sick, accident, or unemployment compensation benefits under State or Federal law. In such a case, however, the benefits provided under the plan seeking to satisfy the requirements of section 501(c)(17) must be the same benefits, or a portion of the same benefits if determined in a nondiscriminatory manner, which such ineligible employees would receive under State or Federal law if they were eligible for such benefits. Under this exception, for example, an employer may establish a plan only for employees who have exhausted their benefits under the State law, and, if the plan provides for such employees the same benefits which they would receive under the State plan, the State plan and the plan of the employer will be considered as one plan in determining whether the requirements relating to nondiscrimination in section 501(c)(17)(A) are satisfied. Furthermore, such a plan could also qualify even though it does not provide all of the benefits provided under the State plan. Thus, a plan could provide for the payment of a reduced amount of the benefits, or for the payment of only certain of the types of benefits, provided by the

State plan. For example, if the State plan provides for the payment of sick, accident, and separation benefits, the plan of the employer may provide for the payment of only separation benefits, or for the payment of an amount equal to only one-half of the State provided benefit. However, if a plan provides benefits for employees who are not eligible to receive the benefits provided under a State plan and such benefits are greater or of a different type than those under the State plan, the plan of the employer must satisfy the requirements of section 501(c)(17)(A) without regard to the benefits and coverage provided by the State plan.

(4) Under section 501(c)(17)(B)(iii), a plan is not considered discriminatory merely because the plan provides benefits only for employees who are not eligible to receive benefits under another plan which satisfies the requirements of section 501(c)(17)(A) and which is funded solely by contributions of the employer. In such a case, the plan seeking to qualify under section 501(c)(17) must provide the same benefits, or a portion of such benefits if determined in a nondiscriminatory manner, as are provided for the employees under the plan funded solely by employer contributions. Furthermore, this exception only applies if the employees eligible to receive benefits under both plans would satisfy the requirements in section 501(c)(17)(A)(ii), relating to nondiscrimination as to coverage. The plan of the employer which is being correlated with the plan seeking to satisfy the requirements of section 501(c)(17) may be a plan which forms part of a voluntary employees' beneficiary association described in section 501(c)(9), if such plan satisfies all the requirements of section 501(c)(17)(A). Under this exception, for example, if an employer has established a plan providing for the payment of supplemental unemployment compensation benefits for his hourly wage employees and such plan satisfies the requirements of section 501(c)(17)(A) (even though the plan forms part of a voluntary employees' beneficiary association described in section 501(c)(9)), the salaried employees of such employee may establish a plan for themselves, and, if such plan provides for the same benefits as the plan covering hourly-wage employees, both plans may be considered as one plan in determining whether the plan covering the salaried employees satisfies the requirement that is be nondiscriminatory as to coverage. The foregoing example would also be applicable if the benefits provided for the salaried employees were funded solely or in part by employer contributions.

(d) *Permanency of the plan.* A plan providing for the payment of supplemental unemployment compensation benefits contemplates a permanent as distinguished from a temporary program. Thus, although there may be reserved the right to change or terminate the plan, and to discontinue contributions thereunder, the abandonment of the plan for any reason other than business necessity within a few years after it has taken effect will be evidence that the plan from its inception was not a bona fide program for the purpose of providing supplemental unemployment compensation benefits to employees. Whether or not a particular plan constitutes a permanent arrangement will be determined by all of the surrounding facts and circumstances. However, merely because a collective bargaining agreement provides that a plan may be modified at the termination of such agreement, or that particular provisions of the plan are subject to renegotiation during the duration of such agreement, does not necessarily imply that the plan is not a permanent arrangement. Moreover, the fact that the plan provides that the assets remaining in the trust after the satisfaction of all liabilities (including contingent liabilities) under the plan may be returned to the employer does not imply that the plan is not a permanent arrangement nor preclude the trust from qualifying under section 501(c)(17).

(e) *Portions of years.* A plan must satisfy the requirements of section 501(c)(17) throughout the entire taxable year of the trust in order for the trust to be exempt for such year. However, section 501(c)(17)(C) provides that a plan will satisfy the nondiscrimination as to classification requirements of section 501(c)(17)(A) if on at least one day in each quarter of the taxable year of the trust it satisfies such requirements.

(f) *Several trusts constituting one plan.* Several trusts may be designated as constituting part of one plan which is intended to satisfy the requirements of section 501(c)(17), in which case all of such trusts taken as a whole must meet the requirements of such section. The fact that a combination of trusts fails to satisfy the requirements of section 501(c)(17) as one plan does not prevent such of the trusts as satisfy the requirements of section 501(c)(17) from qualifying for exemption under that section.

(g) *Plan of several employers.* A trust forming part of a plan of several employers, or the employees of several employers, will be a supplemental unemployment benefit trust described in section 501(c)(17) if all the requirements of that section are otherwise satisfied.

(h) *Investment of trust funds.* No specific limitations are provided in section 501(c)(17) with respect to investments which may be made by the trustees of a trust qualifying under that section. Generally, the contributions may be used by the trustees to purchase any investments permitted by the trust agreement to the extent allowed by local law. However, the tax-exempt status of the trust will be forfeited if the investments made by the trustees constitute *prohibited transactions* within the meaning of section 503. See section 503 and the regulations thereunder. In addition, such a trust will be subject to tax under section 511 with respect to any *unrelated business taxable income* (as defined in section 512) realized by it from its investments. See sections 511 to 515, inclusive, and the regulations thereunder.

(i) *Allocations.* If a plan which provides sick and accident benefits is financed solely by employer contributions to the trust, and such sick and accident benefits are funded by payment of premiums on an accident or health insurance policy (whether on a group or individual basis) or by contributions to a separate fund which pays such sick and accident benefits, the plan must specify that portion of the contributions to be used to fund such benefits. If a plan which is financed in whole or in part by employee contributions provides sick and accident benefits, the plan must specify the portion, if any, of employee contributions allocated to the cost of funding such benefits, and must allocate the cost of funding such benefits between employer contributions and employee contributions.

(j) *Required records and returns.* Every trust described in section 501(c)(17) must maintain records indicating the amount of separation benefits and sick and accident benefits which have been provided to each employee. If a plan is financed, in whole or in part, by employee contributions to the trust, the trust must maintain records indicating the amount of each employee's total contributions allocable to separation benefits. In addition, every trust described in section 501(c)(17) which makes one or more payments totaling $600 or more in 1 year to an individual must file an annual information return in the manner described in paragraph (b)(1) of §1.6041–2. However, if the payments from such trust are subject to income tax withholding under section 3402(o) and the regulations thereunder, the trust must file, in lieu of such annual information return, the returns of income tax withheld from wages required by section 6011 and the regulations thereunder. In such circumstances, the trust must also furnish the statements to the recipients of trust distributions required by section 6051 and the regulations thereunder.

[T.D. 6972, 33 FR 12901, Sept. 12, 1968, as amended by T.D. 7068, 35 FR 17328, Nov. 11, 1970]

§1.501(c)(17)–3 Relation to other sections of the Code.

(a) *Taxability of benefit distributions*—(1) *Separation benefits.* If the separation benefits described in section 501(c)(17)(D)(i) are funded entirely by employer contributions, then the full amount of any separation benefit payment received by an employee is includible in his gross income under section 61(a). If any such separation benefit is funded by both employer and employee contributions, or solely by employee contributions, the amount of any separation benefit payment which is includible in the gross income of the employee is the amount by which such distribution and any prior distributions of such separation payments exceeds the employee's total contributions to fund such separation benefits.

(2) *Sick and accident benefits.* Any benefit payment received from the trust under the part of the plan, if any, which provides for the payment of sick and accident benefits must be included in gross income under section 61(a), unless specifically excluded under section 104 or 105 and the regulations thereunder. See section 105(b) and § 1.105–2 for benefit payments expended for medical care, benefit payments in excess of actual medical expenses, and benefit payments which an employee is entitled to receive irrespective of whether or not he incurs expenses for medical care. See section 213 and § 1.213–1(g) for benefit payments representing reimbursement for medical expenses paid in prior years. See § 1.501(c)(17)–2(i) for the requirement that a trust described in section 501(c)(17) which receives employee contributions must be part of a written plan which provides for the allocation of the cost of funding sick and accident benefits.

(b) *Exemption as a voluntary employees' beneficiary association.* Section 501(c)(17)(E) contemplates that a trust forming part of a plan providing for the payment of supplemental unemployment compensation benefits may, if it qualifies, apply for exemption from income tax under section 501(a) either as a voluntary employees' beneficiary association described in section 501(c)(9) or as a trust described in section 501(c)(17).

(c) *Returns.* A trust which is described in section 501(c)(17) and which is exempt from tax under section 501(a) must file a return in accordance with section 6033 and the regulations thereunder. If such a trust realizes any unrelated business taxable income, as defined in section 512, the trust is also required to file a return with respect to such income.

(d) *Effective date.* Section 501(c)(17) shall apply to taxable years beginning after December 31, 1959, and shall apply to supplemental unemployment benefit trusts regardless of when created or organized.

[T.D. 6972, 33 FR 12902, Sept. 12, 1968]

§ 1.501(c)(18)–1 Certain funded pension trusts.

(a) *In general.* Organizations described in section 501(c)(18) are trusts created before June 25, 1959, forming part of a plan for the payment of benefits under a pension plan funded only by contributions of employees. In order to be exempt, such trusts must also meet the requirements set forth in section 501(c)(18) (A), (B), and (C), and in paragraph (b) of this section.

(b) *Requirements for qualification.* A trust described in section 501(c)(18) must meet the following requirements:

(1) *Local law.* The trust must be a valid, existing trust under local law, and must be evidenced by an executed written document.

(2) *Funding.* The trust must be funded solely from contributions of employees who are members of the plan. For purposes of this section, the term *contributions of employees* shall include earnings on, and gains derived from, the assets of the trust which were contributed by employees.

(3) *Creation before June 25, 1959*—(i) *In general.* The trust must have been created before June 25, 1959. A trust created before June 25, 1959 is described in section 501(c)(18) and this section even though changes in the makeup of the trust have occurred since that time so long as these are not fundamental changes in the character of the trust or in the character of the beneficiaries of the trust. Increases in the beneficiaries of the trust by the addition of employees in the same or related industries, whether such additions are of individuals or of units (such as local units of a union) will generally not be considered a fundamental change in the character of the trust. A merger of a trust created after June 25, 1959 into a trust created before such date is not in itself a fundamental change in the character of the latter trust if the two trusts are for the benefit of employees of the same or related industries.

(ii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Assume that trust C, for the benefit of members of participating locals of National Union X, was established in 1950 and adopted by 29 locals before June 25, 1959.

The subsequent adoption of trust C by additional locals of National Union X in 1962 will not constitute a fundamental change in the character of trust C, since such subsequent adoption is by employees in a related industry.

Example 2. Assume the facts as stated in example 1, except that in 1965 National Union X merged with National Union Y, whose members are engaged in trades related to those engaged in by X's members. Assume further that trust D, the employee funded pension plan and fund for employees of Y, was subsequently merged into trust C. The merger of trust D into trust C would not in itself constitute a fundamental change in the character of trust C, since both C and D are for the benefit of employees of related industries.

(4) *Payment of benefits.* The trust must provide solely for the payment of pension or retirement benefits to its beneficiaries. For purposes of this section, the term *retirement benefits* is intended to include customary and incidental benefits, such as death benefits within the limits permissible under section 401.

(5) *Diversion.* The trust must be part of a plan which provides that, before the satisfaction of all liabilities to employees covered by the plan, the corpus and income of the trust cannot (within the taxable year and at any time thereafter) be used for, or diverted to, any purpose other than the providing of pension or retirement benefits. Payment of expenses in connection with the administration of a plan providing pension or retirement benefits shall be considered a payment to provide such benefits and shall not affect the qualification of the trust.

(6) *Discrimination.* The trust must be part of a plan whose eligibility conditions and benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. See sections 401(a)(3)(B) and 401(a)(4) and §§1.401–3 and 1.401–4. However, a plan is not discriminatory within the meaning of section 501(c)(18) merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan. Accordingly, the benefits provided for highly paid employees may be greater than the benefits provided for lower paid employees if the benefits are determined by reference to their compensation; but, in such a case, the plan will not qualify if the benefits paid to the higher paid employees are a larger portion of compensation than the benefits paid to lower paid employees.

(7) *Objective standards.* The trust must be part of a plan which requires that benefits be determined according to objective standards. Thus, while a plan may provide similarly situated employees with benefits which differ in kind and amount, these benefits may not be determined solely in the discretion of the trustees.

(c) *Effective date.* The provisions of section 501(c)(18) and this section shall apply with respect to taxable years beginning after December 31, 1969.

[T.D. 7172, 37 FR 5618, Mar. 17, 1972]

§1.501(c)(19)–1 War veterans organizations.

(a) *In general.* (1) For taxable years beginning after December 31, 1969, a veterans post or organization which is organized in the United States or any of its possessions may be exempt as an organization described in section 501(c)(19) if the requirements of paragraphs (b) and (c) of this section are met and if no part of its net earnings inures to the benefit of any private shareholder or individual. Paragraph (b) of this section contains the membership requirements such a post or organization must meet in order to qualify under section 501(c)(19). Paragraph (c) of this section outlines the purposes, at least one of which such a post or organization must have in order to so qualify.

(2) In addition, an auxiliary unit or society described in paragraph (d) of this section of such a veterans post or organization and a trust or foundation described in paragraph (e) of this section for such post or organization may be exempt as an organization described in section 501(c)(19).

(b) *Membership requirements.* (1) In order to be described in section 501(c)(19) under paragraph (a)(1) of this section, an organization must meet the membership requirements of section 501(c)(19)(B) and this paragraph. There are two requirements that must be met under this paragraph. The first requirement is that at least 75 percent of the members of the organization must be war veterans. For purposes of this section the term *war veterans* means persons, whether or not present members of the United States Armed Forces, who have served in the Armed Forces of the United States during a period of war (including the Korean and Vietnam conflicts).

(2) The second requirement of this paragraph is that at least 97.5 percent of all members of the organization must be described in one or more of the following categories:

(i) War veterans,

(ii) Present or former members of the United States Armed Forces,

(iii) Cadets (including only students in college or university ROTC programs or at Armed Services academies), or

(iv) Spouses, widows, or widowers of individuals referred to in paragraph (b)(2) (i), (ii) or (iii) of this section.

(c) *Exempt purposes.* In addition to the requirements of paragraphs (a)(1) and (b) of this section, in order to be described in section 501(c)(19) under paragraph (a)(1) of this section an organization must be operated exclusively for one or more of the following purposes:

(1) To promote the social welfare of the community as defined in § 1.501(c)(4)–1(a)(2).

(2) To assist disabled and needy war veterans and members of the United States Armed Forces and their dependents, and the widows and orphans of deceased veterans,

(3) To provide entertainment, care, and assistance to hospitalized veterans or members of the Armed Forces of the United States,

(4) To carry on programs to perpetuate the memory of deceased veterans and members of the Armed Forces and to comfort their survivors,

(5) To conduct programs for religious, charitable, scientific, literary, or educational purposes,

(6) To sponsor or participate in activities of a patriotic nature,

(7) To provide insurance benefits for their members or dependents of their members or both, or

(8) To provide social and recreational activities for their members.

(d) *Auxiliary units or societies for war veterans organizations.* A unit or society may be exempt as an organization described in section 501(c)(19) and paragraph (a)(2) of this section if it is an auxiliary unit or society of a post or organization of war veterans described in paragraph (a)(1) of this section. A unit or society is an auxiliary unit or society or such a post or organization if it meets the following requirements:

(1) It is affiliated with, and organized in accordance with, the bylaws and regulations formulated by an organization described in paragraph (a)(1) of this section,

(2) At least 75 percent of its members are either war veterans, or spouses of war veterans, or are related to a war veteran within two degrees of consanguinity (i.e., grandparent, brother, sister, grandchild, represent the most distant allowable relationships),

(3) All of its members are either members of an organization described in paragraph (a)(1) of this section, or spouses of a member of such an organization or are related to a member of such an organization, within two degrees of consanguinity, and

(4) No part of its net earnings inures to the benefit of any private shareholder or individual.

(e) *Trusts or foundations.* A trust or foundation may be exempt as an organization described in section 501(c)(19) and paragraph (a)(2) of this section if it is a trust or foundation for a post or organization of war veterans described in paragraph (a)(1) of this section. A trust or foundation is a trust or foundation for such a post or organization if it meets the following requirements:

(1) The trust or foundation is in existence under local law and, if organized for charitable purposes, has a dissolution provision described in § 1.501(c)(3)–1(b)(4).

(2) The corpus or income cannot be diverted or used other than for the funding of a post or organization of war veterans described in paragraph (a)(1) of this section, for section 170(c)(4) purposes, or as an insurance set aside (as defined in § 1.512(a)–4(b)).

(3) The trust income is not unreasonably accumulated and, if the trust or

foundation is not an insurance set aside, a substantial portion of the income is in fact distributed to such post or organization or for section 170(c)(4) charitable purposes, and

(4) It is organized exclusively for one or more of those purposes enumerated in paragraph (c) of this section.

[T.D. 7438, 41 FR 44392, Oct. 8, 1976]

§1.501(c)(21)–1 Black lung trusts—certain terms.

(a) *Created or organized in the United States.* A trust is not *created or organized in the United States* unless it is maintained at all times as a domestic trust in the United States. For this purpose, section 7701(a)(9) limits the term *United States* to the District of Columbia and States of the United States.

(b) *Insurance company.* The term *insurance company* means an insurance, surety, bonding or other company whose liability for the kinds of claims to which section 501(c)(21)(A)(i) applies is as an insurer or guarantor of the liabilities of another.

(c) *Black Lung Acts.* The term *Black Lung Acts* includes any State law providing compensation for disability or death due to pneumoconiosis even though the State law compensates for other kinds of injuries. In such a case, section 501(c)(21) applies only to the extent that the liability is attributable to disability or death due to pneumoconiosis. For this purpose, the term *pneumoconiosis* has the same meaning as it has under federal law. See 30 U.S.C. 902.

(d) *Insurance exclusively covering such liability.* The term *insurance exclusively covering such liability* includes insurance that covers risk for liabilities in addition to the liabilities to which section 501(c)(21)(A)(i) applies. In such a case, payment for premiums may be made from the trust only to the extent of that portion of the premiums that has been separately allocated and stated by the insurer as attributable solely to coverage of the liabilities to which section 501(c)(21)(A)(i) applies.

(e) *Administrative and other incidental expenses.* The term *administrative and other incidental expenses* means expenditures that are appropriate and helpful to the trust making them in carrying out the purposes for which its assets may be used under section 501(c)(21)(B). The term includes any exicse tax imposed on the trust under section 4952 (relating to taxes on taxable expenditures) and reasonable expenses, such as legal expenses, incurred by the trust in connection with an assertion against the trust of liability for a taxable expenditure. The term does not include an excise tax imposed on the trustee or on other disqualified persons under section 4951 (relating to taxes on self-dealing) or under section 4953 (relating to tax on excess contributions to black lung benefit trusts) or any expenses incurred in connection with the assertion of these taxes other than expenses that are treated as part of reasonable compensation under section 4951(d)(2)(C). See §§53.4941 (d)–2(f)(3) and (d)–3(c) for interpretations of similar provisions under section 4941(d)(2)(E), relating to reasonable compensation for private foundation disqualified persons.

(f) *Public debt securities of the United States.* The term *public debt securities of the United States* means obligations that are taken into consideration for purposes of the public debt limit. See, for example 31 U.S.C. 757b.

(g) *Obligations of a State or local government.* The term *obligations of a State or local government* means the obligations of a State or local governmental unit the interest on which is exempt from tax under section 103(a). See §1.103–1(a).

(h) *Time or demand deposits.* The term *time or demand deposits* includes checking accounts, savings accounts, certificates of deposit or other time or demand deposits. The term does not include common or collective trust funds such as a common trust fund as defined in section 584.

[44 FR 52197, Sept. 7, 1979]

§1.501(c)(21)–2 Same—trust instrument.

As trust does not meet the requirements of section 501(c)(21) if it is not established and maintained pursuant to a written instrument. The trust instrument must definitely and affirmatively prohibit a diversion or use of trust assets that is not permitted under section 501(c)(21)(B) or section

4953(c), whether by operation or natural termination of the trust, by power of revocation or amendment by the happening of a contingency by collateral arrangement, or by any other means. No particular form for the trust instrument is required. A trust may meet the requirements of section 501(c)921) although the trust instrument fails to contain provisions the effects of which are to prohibit acts that are subject to section 4951 (relating to taxes on self-dealing), section 4952 (relating to taxes on taxable expenditures) or the retention of contributions subject to section 4953 (relating to tax on excess contributions to black lung benefit trusts).

[44 FR 52197, Sept. 7, 1979]

§ 1.501(d)–1 Religious and apostolic associations or corporations.

(a) Religious or apostolic associations or corporations are described in section 501(d) and are exempt from taxation under section 501(a) if they have a common treasury or community treasury, even though they engage in business for the common benefit of the members, provided each of the members includes (at the time of filing his return) in his gross income his entire pro rata share, whether distributed or not, of the net income of the association or corporation for the taxable year of the association or corporation ending with or during his taxable year. Any amount so included in the gross income of a member shall be treated as a dividend received.

(b) For annual return requirements of organizations described in section 501(d), see section 6033 and paragraph (a)(5) of § 1.6033–1.

§ 1.501(e)–1 Cooperative hospital service organizations.

(a) *General rule.* Section 501(e) is the exclusive and controlling section under which a cooperative hospital service organization can qualify as a charitable organization. A cooperative hospital service organization which meets the requirements of section 501(e) and this section shall be treated as an organization described in section 501(c)(3), exempt from taxation under section 501(a), and referred to in section 170(b)(1)(A) (iii) (relating to percentage limitations on charitable contributions). In order to qualify for tax exempt status, a cooperative hospital service organization must—

(1) Be organized and operated on a cooperative basis,

(2) Perform, on a centralized basis, only one or more specifically enumerated services which, if performed directly by a tax exempt hospital, would constitute activities in the exercise or performance of the purpose or function constituting the basis for its exemption, and

(3) Perform such service or services solely for two or more patron-hospitals as described in paragraph (d) of this section.

(b) *Organized and operated on a cooperative basis*—(1) *In general.* In order to meet the requirements of section 501(e), the organization must be organized and operated on a cooperative basis (whether or not under a specific statute on cooperatives) and must allocate or pay all of its net earnings within 8½ months after the close of the taxable year to its patron-hospitals on the basis of the percentage of its services performed for each patron. To *allocate* its net earnings to its patron-hospitals, the organization must make appropriate bookkeeping entries and provide timely written notice to each patron-hospital disclosing to the patron-hospital the amount allocated to it on the books of the organization. For the recordkeeping requirements of a section 501(e) organization, see § 1.521–1(a)(1).

(2) *Percentage of services defined.* The percentage of services performed for each patron-hospital may be determined on the basis of either the value or the quantity of the services provided by the organization to the patron-hospital, provided such basis is realistic in terms of the actual cost of the services to the organization.

(3) *Retention of net earnings.* Exemption will not be denied a cooperative hospital service organization solely because the organization, instead of paying all net earnings to its patron-hospitals, retains an amount for such purposes as retiring indebtedness, expanding the services of the organization, or for any other necessary purpose and allocates such amounts to its patrons.

However, such funds may not be accumulated beyond the reasonably anticipated needs of the organization. See, §1.537–1(b). Whether there is an improper accumulation of funds depends upon the particular circumstances of each case. Moreover, where an organization retains net earnings for necessary purposes, the organization's records must show each patron's rights and interests in the funds retained. For purposes of this paragraph, the term *net earnings* does not include capital contributions to the organization and such contributions need not satisfy the allocation or payment requirements.

(4) *Nonpatronage and other income.* An organization described in section 501(e) may, in addition to net earnings, receive membership dues and related membership assessment fees, gifts, grants and income from nonpatronage sources such as investment of retained earnings. However, such an organization cannot be exempt if it engages in any business other than that of providing the specified services, described in paragraph (c), for the specified patron-hospitals, described in paragraph (d). Thus, an organization described in section 501(e) generally cannot have unrelated business taxable income as defined in section 512, although it may earn certain interest, annuities, royalties, and rents which are excluded from unrelated business taxable income because of the modifications contained in sections 512(b) (1), (2) or (3). An organization described in section 501(e) may, however, have debt-financed income which is treated as unrelated business taxable income solely because of the applicability of section 514. In addition, exempt status under section 501(e) will not be affected where rent from personal property leased with real property is treated as unrelated business taxable income under section 512(b)(3)(A)(ii) solely because the rent attributable to the personal property is more than incidental or under section 512(b)(3)(B)(i) solely because the rent attributable to the personal property exceeds 50 percent of the total rent received or accrued under the lease. Exemption will not be affected solely because the determination of the amount of rent depends in whole or in part on the income or profits derived from the property leased. See, section 512(b)(3)(B)(ii). An organization described in section 501(e) may also derive nonpatronage income from sources that are incidental to the conduct of its exempt purposes or functions. For example, income derived from the operation of a cafeteria or vending machines primarily for the convenience of its employees or the disposition of by-products in substantially the same state they were in on completion of the exempt function (e.g., the sale of silver waste produced in the processing of x-ray film) will not be considered unrelated business taxable income. See, section 513(a)(2) and §1.513–1(d)(4)(ii). The nonpatronage and other income permitted under this subparagraph (4) must be allocated or paid as provided in subparagraph (1) or retained as provided in subparagraph (3).

(5) *Stock ownership*—(i) *Capital stock of organization.* An organization does not meet the requirements of section 501(e) unless all of the organization's outstanding capital stock, if there is such stock, is held solely by its patron-hospitals. However, no amount may be paid as dividends on the capital stock of the organization. For purposes of the preceding sentence, the term *capital stock* includes common stock (whether voting or nonvoting), preferred stock, or any other form evidencing a proprietary interest in the organization.

(ii) *Stock ownership as a condition for obtaining credit.* If by statutory requirement a cooperative hospital service organization must be a shareholder in a United States or state chartered corporation as a condition for obtaining credit from that corporate-lender, the ownership of shares and the payment of dividends thereon will not for such reason be a basis for the denial of exemption to the organization. See, e.g., National Consumer Cooperative Bank, 12 U.S.C. 3001 *et seq.*

(c) *Scope of services*—(1) *Permissible services.* An organization meets the requirements of section 501(e) only if the organization performs, on a centralized basis, one or more of the following services and only such services: data processing, purchasing (including the purchasing and dispensing of drugs and pharmaceuticals to patron-hospitals), warehousing, billing and collection, food, clinical (including radiology), industrial engineering (including the installation, maintenance and repair of biomedical and similar equipment), laboratory, printing, communications, record center, and personnel (including recruitment, selection, testing, training, education and placement of personnel) services. An organization is not described in section 501(e) if, in addition to or instead of one or more of these specified services, the organization performs any other service (other than services referred to under paragraph (b)(4) that are incidental to the conduct of exempt purposes or functions).

(2) *Illustration.* The provisions of this subparagraph may be illustrated by the following example.

Example. An organization performs industrial engineering services on a cooperative basis solely for patron-hospitals each of which is an organization described in section 501(c)(3) and exempt from taxation under section 501(a). However, in addition to this service, the organization operates laundry services for its patron-hospitals. This cooperative organization does not meet the requirements of this paragraph because it performs laundry services not specified in this paragraph.

(d) *Patron-hospitals*—(1) *Defined.* Section 501(e) only applies if the organization performs its services solely for two or more patron-hospitals each of which is—

(i) An organization described in section 501(c)(3) which is exempt from taxation under section 501(a),

(ii) A constituent part of an organization described in section 501(c)(3) which is exempt from taxation under section 501(a) and which, if organized and operated as a separate entity, would constitute an organization described in section 501(c)(3), or

(iii) Owned and operated by the United States, a State, the District of Columbia, or a possession of the United States, or a political subdivision or an agency or instrumentality of any of the foregoing.

(2) *Business with nonvoting patron-hospitals.* Exemption will not be denied a cooperative hospital service organization solely because the organization (whether organized on a stock or membership basis) transacts business with patron-hospitals which do not have voting rights in the organization and therefore do not participate in the decisions affecting the operation of the organization. Where the organization has both patron-hospitals with voting rights and patron-hospitals without such rights, the organization must provide at least 50 percent of its services to patron-hospitals with voting rights in the organization. Thus, the percentage of services provided to nonvoting patrons may not exceed the percentage of such services provided to voting patrons. A patron-hospital will be deemed to have voting rights in the cooperative hospital service organization if the patron-hospital may vote directly on matters affecting the operation of the organization or if the patron-hospital may vote in the election of cooperative board members. Notwithstanding that an organization may have both voting and nonvoting patron-hospitals, patronage refunds must nevertheless be allocated or paid to all patron-hospitals solely on the basis specified in paragraph (b) of this section.

(3) *Services to other organizations.* An organization does not meet the requirements of section 501(e) if, in addition to performing services for patron-hospitals (entities described in subdivisions (i), (ii) or (iii) of subparagraph (1)), the organization performs any service for any other organization. For example, a cooperative hospital service organization is not exempt if it performs services for convalescent homes for children or the aged, vocational training facilities for the handicapped, educational institutions which do not provide hospital care in their facilities, and proprietary hospitals. However, the provision of the specified services between or among cooperative hospital service organizations meeting the requirements of section 501(e) and this section is permissible. Also permissible is the provision of the specified services to entities which are not patron-hospitals, but only if such services are de minimis and are mandated by a governmental unit as, for example, a condition for licensing.

(e) *Effective dates.* An organization, other than an organization performing clinical services, may meet the requirements of section 501(e) and be a tax exempt organization for taxable years ending after June 28, 1968. An organization performing clinical services may meet the requirements of section 501(e) and be a tax exempt organization for taxable years ending after December 31, 1976. However, pursuant to the authority contained in section 7805(b) of the Internal Revenue Code, these regulations shall not become effective with respect to an organization which has received a ruling or determination letter from the Internal Revenue Service recognizing its exemption under section 501(e) until January 2, 1987.

[T.D. 8100, 51 FR 31615, Sept. 4, 1986; 51 FR 33593, Sept. 22, 1986]

§1.501(h)–1 Application of the expenditure test to expenditures to influence legislation; introduction.

(a) *Scope.* (1) There are certain requirements an organization must meet in order to be a *charity* described in section 501(c)(3). Among other things, section 501(c)(3) states that ‘‘no substantial part of the activities of [a charity may consist of] carrying on propaganda, or otherwise attempting to influence legislation, (except as otherwise provided in subsection (h)).’’ This requirement is called the *substantial part test.*

(2) Under section 501(h), many public charities may elect the *expenditure test* as a substitute for the substantial part test. The expenditure test is described in section 501(h) and this §1.501(h). A public charity is any charity that is not a private foundation under section 509(a). (Unlike a public charity, a private foundation may not make any lobbying expenditures: If a private foundation does make a lobbying expenditure, it is subject to an excise tax under section 4945). Section 1.501(h)–2 lists which public charities are eligible to make the expenditure test election. Section 1.501(h)–2 also provides information about how a public charity makes and revokes the election to be covered by the expenditure test.

(3) A public charity that makes the election may make lobbying expenditures within specified dollar limits. If an electing public charity’s lobbying expenditures are within the dollar limits determined under section 4911(c), the electing public charity will not owe tax under section 4911 nor will it lose its tax exempt status as a charity by virtue of section 501(h). If, however, that electing public charity’s lobbying expenditures exceed its section 4911 lobbying limit, the organization is subject to an excise tax on the excess lobbying expenditures. Further, under section 501(h), if an electing public charity’s lobbying expenditures normally are more than 150 percent of its section 4911 lobbying limit, the organization will cease to be a charity described in section 501(c)(3).

(4) A public charity that elects the expenditure test may nevertheless lose its tax exempt status if it is an action organization under §1.501(c)(3)–1(c)(3)(iii) or (iv). A public charity that does not elect the expenditure test remains subject to the substantial part test. The substantial part test is applied without regard to the provisions of section 501(h) and 4911 and the related regulations.

(b) *Effective date.* The provisions of §1.501(h)–1 through §1.501(h)–3, are effective for taxable years beginning after August 31, 1990. An election made before August 31, 1990, under the provisions of §7.0(c)(4) or the instructions to Form 5768, will be effective under these regulations without again filing Form 5768.

[T.D. 8308, 55 FR 35588, Aug. 31, 1990]

§1.501(h)–2 Electing the expenditure test.

(a) *In general.* The election to be governed by section 501(h) may be made by an eligible organization (as described in paragraph (b) of this section) for any taxable year of the organization beginning after December 31, 1976, other than the first taxable year for which a voluntary revocation of the election is effective (see paragraph (d) of this section). The election is made by filing a completed Form 5768, Election/Revocation of Election by an Eligible Section 501(c)(3) Organization to Make Expenditures to Influence Legislation, with the appropriate Internal Revenue Service Center listed on that form. Under section 501(h)(6), the election is effective with the beginning of the taxable year in which the form is filed. For example, if an eligible organization whose taxable year is the calendar year files Form 5768 on December 31, 1979, the organization is governed by section 501(h) for its taxable year beginning January 1, 1979. Once made, the expenditure test election is effective (without again filing Form 5768) for each succeeding taxable year for which the organization is an eligible organization and which begins before a notice of revocation is filed under paragraph (d) of this section.

(b) *Organizations eligible to elect the expenditure test*—(1) *In general.* For purposes of section 501(h) and the regulations thereunder, an organization is an eligible organization for a taxable year if, for that taxable year, it is—

(i) Described in section 501(c)(3) (determined, in any year for which an election is in effect, without regard to the substantial part test of section 501(c)(3)),

(ii) Described in section 501(h)(4) and paragraph (b)(2) of this section, and

(iii) Not a disqualified organization described in section 501(h)(5) and paragraph (b)(3) of this section.

(2) *Certain organizations listed.* An organization is described in section 501(h)(4) and this paragraph (b)(2) if it is an organization described in—

(i) Section 170(b)(1)(A)(ii) (relating to educational institutions),

(ii) Section 170(b)(1)(A)(iii) (relating to hospitals and medical research organizations),

(iii) Section 170(b)(1)(A)(iv) (relating to organizations supporting government schools),

(iv) Section 170(b)(1)(A)(vi) (relating to organizations publicly supported by charitable contributions),

(v) Section 509(a)(2) (relating to organizations publicly supported by admissions, sales, etc.), or

(vi) Section 509(a)(3) (relating to organizations supporting public charities), except that for purposes of this paragraph (b)(2), section 509(a)(3) shall be applied without regard to the last sentence of section 509(a).

(3) *Disqualified organizations.* An organization is a disqualified organization described in section 501(h)(5) and this paragraph (b)(3) if the organization is—

(i) Described in section 170(b)(1)(A)(i) (relating to churches),

(ii) An integrated auxiliary of a church or of a convention or association of churches see (§ 1.6033–2(g)(5)), or

(iii) Described in section 501(c)(3) and affiliated (within the meaning of § 56.4911–7) with one or more organizations described in paragraph (b)(3) (i) or (ii) of this section.

(4) *Other organizations ineligible to elect.* Under section 501(h)(4), certain organizations, although not disqualified organizations, are not eligible to elect the expenditure test. For example, organizations described in section 509(a)(4) are not listed in section 501(h)(4) and therefore are not eligible to elect. Similarly, private foundations (within the meaning of section 509(a)) are not eligible to elect. For the treatment of expenditures by a private foundation for the purpose of carrying on propaganda, or otherwise attempting, to influence legislation, see § 53.4945–2.

(c) *New organizations.* A newly created organization may submit Form 5768 to elect the expenditure test under section 501(h) before it is determined to be an eligible organization and may submit Form 5768 at the time it submits its application for recognition of exemption (Form 1023). If the newly created organization is determined to be an eligible organization, the election will be effective under the provisions of paragraph (a) of this section, that is, with the beginning of the taxable year in which the Form 5768 is filed by the eligible organization. However, if a newly created organization is determined by the Service not to be an eligible organization, the organization's election will not be effective and the substantial part test will apply from the effective date of its section 501(c)(3) classification.

(d) *Voluntary revocation of expenditure test election*—(1) *Revocation effective.* An organization may voluntarily revoke an expenditure test election by filing a notice of voluntary revocation with the appropriate Internal Revenue Service Center listed on Form 5768. Under section 501(h)(6)(B), a voluntary revocation is effective with the beginning of the first taxable year after the taxable year in which the notice is filed. If an organization voluntarily revokes its election, the substantial part test of section 501(c)(3) will apply with respect to the organization's activities in attempting to influence legislation beginning with the taxable year for which the voluntary revocation is effective.

(2) *Re-election of expenditure test.* If an organization's expenditure test election is voluntarily revoked, the organization may again make the expenditure test election, effective no earlier than for the taxable year following the first taxable year for which the revocation is effective.

(3) *Example.* X, an organization whose taxable year is the calendar year, plans to voluntarily revoke its expenditure test election effective beginning with its taxable year 1985. X must file its notice of voluntary revocation on Form 5768 after December 31, 1983, and before January 1, 1985. If X files a notice of voluntary revocation on December 31, 1984, the revocation is effective beginning with its taxable year 1985. The organization may again elect the expenditure test by filing Form 5768. Under paragraph (d)(2) of this section, the election may not be made for taxable year 1985. Under paragraph (a) of this section, a new expenditure test election will be effective for taxable years beginning with taxable year 1986, if the Form 5768 is filed after December 31, 1985, and before January 1, 1987.

(e) *Involuntary revocation of expenditure test election.* If, while an election by an eligible organization is in effect, the organization ceases to be an eligible organization, its election is automatically revoked. The revocation is effective with the beginning of the first full taxable year for which it is determined that the organization is not an eligible organization. If an organization's expenditure test election is involuntarily revoked under this paragraph (e) but the organization continues to be described in section 501(c)(3), the substantial part test of section 501(c)(3) will apply with respect to the organization's activities in attempting to influence legislation beginning with the first taxable year for which the involuntary revocation is effective.

(f) *Supersession.* This section supersedes §7.0(c)(4) of the Temporary Income Tax Regulations under the Tax Reform Act of 1976, effective August 31, 1990.

[T.D. 8308, 55 FR 35588, Aug. 31, 1990]

§1.501(h)–3 Lobbying or grass roots expenditures normally in excess of ceiling amount.

(a) *Scope.* This section provides rules under section 501(h) for determining whether an organization that has elected the expenditure test and that is not a member of an affiliated group of organizations (as defined in §56.4911–7(e)) either normally makes lobbying expenditures in excess of its lobbying ceiling amount or normally makes grass roots expenditures in excess of its grass roots ceiling amount. Under section 501(h) and this section, an organization that has elected the expenditure test and that normally makes expenditures in excess of the corresponding ceiling amount will cease to be exempt from tax under section 501(a) as an organization described in section 501(c)(3). For similar rules relating to members of an affiliated group of organizations, see §56.4911–9.

(b) *Loss of exemption*—(1) *In general.* Under section 501(h)(1), an organization that has elected the expenditure test shall be denied exemption from taxation under section 501(a) as an organization described in section 501(c)(3) for the taxable year following a determination year if—

(i) The sum of the organization's lobbying expenditures for the base years exceeds 150 percent of the sum of its lobbying nontaxable amounts for the base years, or (ii) The sum of the organization's grass roots expenditures for its base years exceeds 150 percent of the sum of its grass roots nontaxable amounts for the base years.

The organization thereafter shall not be exempt from tax under section 501(a) as an organization described in section 501(c)(3) unless, pursuant to paragraph (d) of this section, the organization reapplies for recognition of exemption and is recognized as exempt.

(2) *Special exception for organization's first election.* For the first, second, or third consecutive determination year for which an organization's first expenditure test election is in effect, no determination is required under paragraph (b)(1) of this section, and the organization will not be denied exemption from tax by reason of section 501(h) and this section if, taking into account as base years only those years

for which the expenditure test election is in effect—

(i) The sum of the organization's lobbying expenditures for such base years does not exceed 150 percent of the sum of its lobbying nontaxable amounts for the same base years, and

(ii) The sum of the organization's grass roots expenditure for those base years does not exceed 150 percent of the sum of its grass roots nontaxable amounts for such base years. If an organization does not satisfy the requirements of this paragraph (b)(2), paragraph (b)(1) of this section will apply.

(c) *Definitions.* For purposes of this section—

(1) The term *lobbying expenditures* means lobbying expenditures as defined in section 4911(c)(1) or section 4911(f)(4)(A) and § 56.4911–2(a).

(2) The term *lobbying nontaxable amount* is defined in § 56.4911–1(c)(1).

(3) An organization's *lobbying ceiling amount* is 150 percent of the organization's lobbying nontaxable amount for a taxable year.

(4) The term *grass roots expenditures* means expenditures for grass roots lobbying communications as defined in section 4911(c)(3) or section 4911(f)(4)(A) and §§ 56.4911–2 and 56.4911–3.

(5) The term *grass roots nontaxable amount* is defined in § 56.4911–1(c)(2).

(6) An organization's *grass roots ceiling amount* is 150 percent of the organization's grass roots nontaxable amount for a taxable year.

(7) In general, the term *base years* means the determination year and the three taxable years immediately preceding the determination year. The base years, however, do not include any taxable year preceding the taxable year for which the organization is first treated as described in section 501(c)(3).

(8) A taxable year is a *determination year* if it is a year for which the expenditure test election is in effect, other than the taxable year for which the organization is first treated as described in section 501(c)(3).

(d) *Reapplication for recognition of exemption*—(1) *Time of application.* An organization that is denied exemption from taxation under section 501(a) by reason of section 501(h) and this section may apply on Form 1023 for recognition of exemption as an organization described in section 501(c)(3) for any taxable year following the first taxable year for which exemption is so denied. See paragraphs (d)(2) and (d)(3) of this section for material to be included with an application described in the preceding sentence.

(2) *Section 501(h) calculation.* An application described in paragraph (d)(1) of this section must demonstrate that the organization would not be denied exemption from taxation under section 501(a) by reason of section 501(h) if the expenditure test election has been in effect for all of its last taxable year ending before the application is made by providing the calculations, described either in paragraphs (b)(1) (i) and (ii) of this section or in § 56.4911–9(b), that would have applied to the organization for that year.

(3) *Operations not disqualifying.* An application described in paragraph (d)(1) of this section must include information that demonstrates to the satisfaction of the Commissioner that the organization will not knowingly operate in a manner that would disqualify the organization for tax exemption under section 501(c)(3) by reason of attempting to influence legislation.

(4) *Reelection of expenditure test.* If an organization is denied exemption from tax for a taxable year by reason of section 501(h) and this section, and thereafter is again recognized as an organization described in section 501(c)(3) pursuant to this paragraph (d), it may again elect the expenditure test under section 501(h) in accordance with § 1.501(h)–2(a).

(e) *Examples.* The provisions of this section are illustrated by the following examples, which also illustrate the operation of the tax imposed by section 4911.

Example 1. (1) The following table contains information used in this example concerning organization X.

Year	Exempt purpose expenditures (EPE)	Calculation	Lobbying	
			Nontaxable amount (LNTA)	Lobbying expenditures (LE)
1979	$400,000	(20% of $400,000=)	$80,000	$100,000
1980	300,000	(20% of $300,000=)	60,000	100,000
1981	600,000	(20% of $500,000+15% of $100,000=)	115,000	120,000
1982	500,000	(20% of $500,000=)	100,000	100,000
Totals	1,800,000		355,000	420,000

(2) Organization X, whose taxable year is the calendar year, was organized in 1971. X first made the expenditure test election under section 501(h) effective for taxable years beginning with 1979 and has not revoked the election. None of X's lobbying expenditures for its taxable years 1979 through 1982 are grass roots expenditures. Under section 4911(a) and § 56.4911–1(a), X must determine for each year for which the expenditure test election is effective whether it is liable for the 25 percent excise tax imposed by section 4911(a) on excess lobbying expenditures. X is liable for this tax for each of its taxable years 1979, 1980, and 1981, because in each year its lobbying expenditures exceeded its lobbying nontaxable amount for the year. For 1979, the tax imposed by section 4911(a) is $5,000 {25%×($100,000−$80,000)=$5,000}. For 1980, the tax is $10,000. For 1981, the tax is $1,250.

(3) The taxable years 1979 through 1981 are all determination years under paragraph (c)(8) of this section. On its annual return for determination year 1979, the first year of its first election, X can demonstrate, under paragraph (b)(2) of this section, that its lobbying expenditures during 1979 ($100,000) do not exceed 150 percent of its lobbying nontaxable amount for 1979 ($120,000). For determination year 1980, under paragraph (b)(2), X can demonstrate that the sum of its lobbying expenditures for 1979 and 1980 ($200,000) does not exceed 150 percent of the sum of its lobbying nontaxable amounts for 1979 and 1980 ($210,000). For 1981, under paragraph (b)(2), X can demonstrate that the sum of its lobbying expenditures for 1979, 1980, and 1981 ($320,000) does not exceed 150 percent of the sum of its lobbying nontaxable amounts for 1979, 1980, and 1981 ($382,500). For each of the determination years 1979, 1980, and 1981, the first three years of its first election, X satisfies the requirements of paragraph (b)(2). Accordingly, no determination under paragraph (b)(1) of this section is required for those years, and X is not denied tax exemption by reason of section 501(h).

(4) Under paragraph (b)(1) of this section, X must determine for its determination year 1982 whether it has normally made lobbying expenditures in excess of the lobbying ceiling amount. This determination takes into account expenditures in base years 1979 through 1982. The sum of X's lobbying expenditures for the base years ($420,000) does not exceed 150 percent of the sum of the lobbying nontaxable amounts for the base years (150%×$355,000=$532,500). Accordingly, X is not denied tax exemption by reason of section 501(h).

Example 2. (1) The following table contains information used in this example concerning W.

Year	Exempt purpose expenditures (EPE) (dollars)	Calculation	Lobbying nontaxable amount (LNTA) (dollars)	Lobbying expenditures (LE) (dollars)	Grass roots nontaxable amount (25 percent of LNTA) (dollars)	Grass roots expenditures (dollars)
1979	700,000	(20% of $500,000+15% of $200,000=).	130,000	120,000	32,500	30,000
1980	800,000	(20% of $500,000+15% of $300,000=).	145,000	100,000	36,250	60,000
1981	800,000	(20% of $500,000+15% of $300,000=).	145,000	100,000	36,250	65,000
1982	900,000	(20% of $500,000+15% of $400,000=).	160,000	150,000	40,000	65,000
Total	3,200,000		580,000	470,000	145,000	220,000

(2) Organization W, whose taxable year is the calendar year, made the expenditure test election under section 501(h) effective for taxable years beginning with 1979 and has not revoked the election. W has been treated as an organization described in section 501(c)(3) for each of its taxable years beginning within its taxable year 1974.

(3) Under section 4911(a) and § 56.4911–1(a), W must determine for each year for which the expenditure test election is effective whether it is liable for the 25 percent excise tax imposed by section 4911(a) on excess lobbying expenditures. In 1980, 1981, and 1982, W has excess lobbying expenditures because its grass roots expenditures in each of those years exceeded its grass roots nontaxable amount for the year. Therefore, W is liable for the excise tax under section 4911(a) for those years. The tax imposed by section 4911(a) for 1980 is $5,937.50 {25%×($60,000−$36,250)= $5,937.50}. For 1981, the tax is $7,187.50. For 1982, the tax is $6,250.

(4) On its annual return for its determination years 1979, 1980, and 1981, the first three years of its first election, W demonstrates that it satisfies the requirements of paragraph (b)(2) of this section. Accordingly, no determination under paragraph (b)(1) of this section is required for those years, and W is not denied tax exemption by reason of section 501(h).

(5) On its annual return for its determination year 1982, W must determine under paragraph (b)(1) whether it has normally made lobbying expenditures or grass roots expenditures in excess of the corresponding ceiling amount. This determination takes into account expenditures in base years 1979 through 1982. The sum of W's lobbying expenditures for the base years ($470,000) does not exceed 150% of the sum of W's lobbying nontaxable amounts for those years (150%×$580,000=$870,000). However, the sum of W's grass roots expenditures for the base years ($220,000) does exceed 150% of the sum of W's grass roots nontaxable amonts for those years (150%×$145,000=$217,500). Under section 501(h), W is denied tax exemption under section 501(a) as an organization described in section 501(c)(3) for its taxable year 1983. For its taxable year 1984 and any taxable year thereafter, W is exempt from tax as an organization described in section 501(c)(3) only if W applies for recognition of its exempt status under paragraph (d) of this section and is recognized as exempt from tax.

Example 3. (1) The following table contains information used in this example concerning organization Y.

Taxable Year	Exempt purpose expenditures (EPE) (dollars)	Calculation	Lobbying nontaxable amount (LNTA) (dollars)	Lobbying expenditures (LE)(dollars)	Grass roots nontaxable amount (25 percent of LNTA)(dollars)	Grass roots expenditures (dollars)
1977	700,000	(20% of $500,000+15% of $200,000=).	130,000	182,000	32,500	30,000
1978	800,000	(20% of $500,000+15% of $300,000=).	145,000	224,750	36,250	35,000
Subtotal	1,500,000		275,000	406,750	68,750	65,000
1979	900,000	(20% of $500,000+15% of $400,000=).	160,000	264,000	40,000	50,000
Totals:	2,400,000		435,000	670,750	108,750	115,000

(2) Organization Y, whose taxable year is the calendar year, was first treated as an organization described in section 501(c)(3) on February 1, 1977. Y made the expenditure test election under section 501(h) effective for taxable years beginning with 1977 and has not revoked the election.

(3) For 1977, Y has excess lobbying expenditures of $52,000 because its lobbying expenditures ($182,000) exceed its lobbying nontaxable amount ($130,000) for the taxable year. Accordingly, Y is liable for the 25 percent excise tax imposed by section 4911(a). The amount of the tax is $13,000 [25%×($182,000−$130,000)=$13,000].

(4) For 1978, Y again has excess lobbying expenditures and is again liable for the 25 percent excise tax imposed by section 4911(a). The amount of the tax is $19,937.50 [25%×($224,750−$145,000)=$19,937.50].

(5) For 1979, Y's lobbying expenditures ($264,000) exceed its lobbying nontaxable amount ($160,000) by $104,000, and its grass roots expenditures ($50,000) exceed its grass roots nontaxable amount ($40,000) by $10,000. Under § 56.4911–1(b), Y's excess lobbying expenditures are the greater of $104,000 or $10,000. The amount of the tax, therefore, is $26,000 [25%×$104,000=$26,000].

(6) Under paragraph (c)(8) of this section, 1977 is not a determination year because it is

the first year for which the organization is treated as described in section 501(c)(3). For 1977, Y need not determine whether it has normally made lobbying expenditures or grass roots expenditures in excess of the corresponding ceiling amount for purposes of determining whether it is denied exemption under section 501(h) for its taxable year 1978.

(7) For determination year 1978, Y must determine whether it has normally made lobbying or grass roots expenditures in excess of the corresponding ceiling amount, taking into account expenditures for the base years 1977 and 1978. For Y, the determination under paragraph (b)(2) of this section considers the same base years as the determination under paragraph (b)(1) of this section and is, therefore, redundant. Accordingly, Y proceeds to determine, under (b)(1), whether it is denied exemption. Y's grass roots expenditures for 1977 and 1978 ($65,000) did not exceed 150 percent of the sum of its grass roots nontaxable amounts for those years ($103,125). Y's lobbying expenditures for 1977 and 1978 ($406,750) did not exceed 150% of its lobbying nontaxable amount for those years (150%×$275,000=$412,500). Therefore, Y is not denied tax exemption under section 501(h) for its taxable year 1979.

(8) For determination year 1979, the sum of Y's grass roots expenditures in base years 1977, 1978, and 1979 does not exceed 150 percent of its grass roots nontaxable amount (calculation omitted). However, the sum of Y's lobbying expenditures for the base years ($670,750) does exceed 150% of the sum of the lobbying nontaxable amounts for those years (150%×$435,000=$652,500). Since Y was not described in section 501(c)(3) prior to 1977, only the years 1977, 1978, and 1979 may be considered in determining whether Y has normally made lobbying expenditures in excess of its lobbying ceiling. Therefore, Y determines that it has normally made lobbying expenditures in excess of its lobbying ceiling. Under section 501(h), Y is denied tax exemption under section 501(a) as an organization described in section 501(c)(3) for its taxable year 1980. For its taxable year 1981, and any taxable year thereafter, Y is exempt from tax as an organization described in section 501(c)(3) only if Y applies for recognition of its exempt status under paragraph (d) of this section and is recognized as exempt from tax.

Example 4. Organization M made the expenditure test election under section 501(h) effective for taxable years beginning with 1977 and has not revoked the election. M has $500,000 of exempt purpose expenditures during each of the years 1981 through 1984. In addition, during each of those years, M spends $75,000 for direct lobbying and $25,000 for grass roots lobbying. Since the amount expended for M's lobbying (both total lobbying and grass roots lobbying) is within the respective nontaxable expenditure limitations, M is not liable for the 25 percent excise tax imposed under section 4911(a) upon excess lobbying expenditures, nor is M denied tax-exempt status by reason of section 501 (h).

Example 5. Assume the same facts as in Example 4, except that, on behalf of M, numerous unpaid volunteers conduct substantial lobbying activities with no reimbursement. Since the substantial lobbying activities of the unpaid volunteers are not counted towards the expenditure limitations and the amount expended for M's lobbying is within the respective nontaxable expenditure limitations, M is not liable for the 25 percent excise tax under section 4911, nor is M denied tax-exempt status by reason of section 501(h).

[T.D. 8308, 55 FR 35589, Aug. 31, 1990]

§1.501(k)–1 Communist-controlled organizations.

Under section 11(b) of the Internal Security Act of 1950 (50 U.S.C. 790(b)), as amended, which is made applicable to the Code by section 7852(b) of that Code, no organization is entitled to exemption under sections 501(a) or 521(a) for any taxable year if at any time during such year such organization is registered under section 7 of such Act or if there is in effect a final order of the Subversive Activities Control Board established by section 12 of such Act requiring such organization to register under section 7 of such Act, or determining that it is a Communist-infiltrated organization.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; redesignated by T.D. 8100, 51 FR 31615, Sept. 4, 1986]

§1.502–1 Feeder organizations.

(a) In the case of an organization operated for the primary purpose of carrying on a trade or business for profit, exemption is not allowed under section 501 on the ground that all the profits of such organization are payable to one or more organizations exempt from taxation under section 501. In determining the primary purpose of an organization, all the circumstances must be considered, including the size and extent of the trade or business and the size and extent of those activities of such organization which are specified in the applicable paragraph of section 501.

(b) If a subsidiary organization of a tax-exempt organization would itself be exempt on the ground that its activities are an integral part of the exempt activities of the parent organization, its exemption will not be lost because, as a matter of accounting between the two organizations, the subsidiary derives a profit from its dealings with its parent organization, for example, a subsidiary organization which is operated for the sole purpose of furnishing electric power used by its parent organization, a tax-exempt educational organization, in carrying on its educational activities. However, the subsidiary organization is not exempt from tax if it is operated for the primary purpose of carrying on a trade or business which would be an unrelated trade or business (that is, unrelated to exempt activities) if regularly carried on by the parent organization. For example, if a subsidiary organization is operated primarily for the purpose of furnishing electric power to consumers other than its parent organization (and the parent's tax-exempt subsidiary organizations), it is not exempt since such business would be an unrelated trade or business if regularly carried on by the parent organization. Similarly, if the organization is owned by several unrelated exempt organizations, and is operated for the purpose of furnishing electric power to each of them, it is not exempt since such business would be an unrelated trade or business if regularly carried on by any one of the tax-exempt organizations. For purposes of this paragraph, organizations are related only if they consist of:

(1) A parent organization and one or more of its subsidiary organizations; or

(2) Subsidiary organizations having a common parent organization.

An exempt organization is not related to another exempt organization merely because they both engage in the same type of exempt activities.

(c) In certain cases an organization which carries on a trade or business for profit but is not operated for the primary purpose of carrying on such trade or business is subject to the tax imposed under section 511 on its unrelated business taxable income.

(d) *Exception*—(1) *Taxable years beginning before January 1, 1970.* For purposes of section 502 and this section, for taxable years beginning before January 1, 1970, the term *trade or business* does not include the rental by an organization of its real property (including personal property leased with the real property).

(2) *Taxable years beginning after December 31, 1969.* For purposes of section 502 and this section, for taxable years beginning after December 31, 1969, the term *trade or business* does not include:

(i) The deriving of rents described in section 512(b)(3)(A),

(ii) Any trade or business in which substantially all the work in carrying on such trade or business is performed for the organization without compensation, or

(iii) Any trade or business (such as a *thrift shop*) which consists of the selling of merchandise, substantially all of which has been received by the organization as gifts or contributions.

For purposes of the exception described in subdivision (i) of this subparagraph, if the rents derived by an organization would not be excluded from unrelated business income pursuant to section 512(b)(3) and the regulations thereunder, the deriving of such rents shall be considered a *trade or business.*

(3) *Cross references and special rules.* (i) For determination of when rents are excluded from the tax on unrelated business income see section 512(b)(3) and the regulations thereunder.

(ii) The rules contained in § 1.513–1(e)(1) shall apply in determining whether a trade or business is described in section 502(b)(2) and subparagraph (2)(ii) of this paragraph.

(iii) The rules contained in § 1.513–1(e)(3) shall apply in determining whether a trade or business is described in section 502(b)(3) and subparagraph (2)(iii) of this paragraph.

[T.D. 6500, 25 FR 11737, No. 26, 1960, as amended by T.D. 6662, 28 FR 6973, July 29, 1963; T.D. 7033, 35 FR 19997, Dec. 31, 1970]

§ 1.503(a)–1 Denial of exemption to certain organizations engaged in prohibited transactions.

(a)(1) Prior to January 1, 1970, section 503 applies to those organizations described in sections 501(c)(3), 501(c)(17), and section 401(a) except:(i) A religious organization (other than a trust);

(ii) An educational organization which normally maintains a regular faculty and curriculum and normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on;

(iii) An organization which normally receives a substantial part of its support (exclusive or income received in the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501(a)) from the United States or any State or political subdivision thereof or from direct of indirect contributions from the general public,

(iv) An organization which is operated, supervised, controlled or principally supported by a religious organization (other than a trust) which is itself not subject to the provisions of this section; and

(v) An organization the principal purposes or functions of which are the providing of medical or hospital care or medical education or medical research or agricultural research.

(2) Effective January 1, 1907, and prior to January 1, 1975, section 503 shall apply only to organizations described in section 501(c) (17) or (18) or section 401(a).

(3) Effective January 1, 1975, section 503 shall apply only to organization described in section 501(c) (17) or (18) or described in section 401(a) and referred to in section 4975(g) (2) or (3).

(b) The prohibited transactions enumerated in section 503(b) are in addition to and not in limitation of the restrictions contained in section 501(c) (3), (17), or (18) or section 401(a). Even though an organization has not engaged in any of the prohibited transactions referred to in section 503(b), it still may not qualify for tax exemptions in view of the general provisions of section 501(c) (3), (17), or (18) or section 401(a). Thus, if a trustee or other fiduciary of the organization (whether or not he is also a creater or such organization) enters into a transaction with the organization, such transaction will be closely scrutinized in the light of the fiduciary principle requiring undivided loyalty to ascertain whether the organization is in fact being operated for the stated exempt purpose.

(c) An organization—(1) Described in section 501(c)(3) which after July 1, 1950, but before January 1, 1970, has engaged in any prohibited transaction as defined in section 503(b), unless it is excepted by the provisions of paragraph (a)(1) of this section;

(2) Described in section 401(a) and referred to in section 4975(g) (2) or (3) which after March 1, 1954, has engaged in any prohibited transaction as defined in section 503(b);

(3) Described in section 401(a) and not referred to in section 4975(g) (2) or (3) which after March 1, 1954, but before January 1, 1975, has engaged in any prohibited transaction as defined in section 503(b) or which after December 31, 1962, but before January 1, 1975, has engaged in any prohibited transaction as defined in section 503(g) prior to its repeal by section 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978);

(4) Described in section 501(c)(17) which after December 31, 1959, has engaged in any prohibited transaction as defined in section 503(b); or

(5) Described in section 501(c)(18) which after December 31, 1969, has engaged in any prohibited transaction described in section 503(b);

Shall not be exempt from taxation under section 501(a) for any taxable year subsequent to the taxable year in which there is mailed to it a notice in writing by the Commissioner that it has engaged in such prohibited transactions. Such notification by the Commissioner shall be by registered or certified mail to the last known name and address of the organization. However, notwithstanding the requirement of notification by the Commissioner, the exemption shall be denied with respect to any taxable year if such organization during or prior to such taxable year commenced the prohibited transaction with the purpose of diverting income or corpus from its exempt purposes and such transaction involved a substantial party of the income or corpus of such organization. For the purpose of this section, the term *taxable year* means the established annual accounting period of the organization; or, if the organization has no such established annual accounting period, the *taxable year* of the organizations means a calendar year. See 26 CFR §1.503(j)–1 (rev. as of Apr. 1, 1974) for provisions relating to the definition of prohibited transactions in the case of trusts benefitting certain owner-employees after December 31, 1962, but prior to January 1, 1975. See also section 2003 (c)(1)(B) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978) in the case of an organization described in section 401(a) with respect to which a disqualified person elects to pay a tax in the amount and manner provided with respect to the tax imposed by section 4975 of the Code so that the organization may avoid denial of exemption under section 503.

(d) The application of section 503(b) may be illustrated by the following examples:

Example 1. A creates a foundation in 1954 ostensibly for educational purposes. B, a trustee, accumulates the foundation's income from 1957 until 1959 and then uses a substantial part of this accumulated income to send A's children to college. The foundation would lose its exemption for the taxable years 1957 through 1959 and for subsequent taxable years until it regains its exempt status.

Example 2. If under the facts in Example 1 such private benefit was the purpose of the foundation from its inception, such foundation is not exempt by reason of the general provisions of section 501(c)(3), without regard to the provisions of section 503, for all years since its inception, that is, for the taxable years 1954 through 1959 and subsequent taxable years, since under section 501(c)(3) the organization must be organized and operated exclusively for exempt purposes. See §1.501(c)(3)–1.

[T.D. 7428, 41 FR 34621, Aug. 16, 1976]

§1.503(b)–1 Prohibited transactions.

(a) *In general.* The term *prohibited transaction* means any transaction set forth in section 503(b) engaged in by any organization described in paragraph (a) of §1.503(a)–1. Whether a transaction is a prohibited transaction depends on the facts and circumstances of the particular case. This section is intended to deny tax-exempt status to such organizations which engage in certain transactions which inure to the private advantage of (1) the creator of such organization (if it is a trust); (2) any substantial contributor to such organization; (3) a member of the family (as defined in section 267(c)(4) of an individual who is such creator of or such substantial contributor to such organization; or (4) a corporation controlled, as set forth in section 503(b), by such creator or substantial contributor.

(b) *Loans as prohibited transactions under section 503(b)(1)*—(1) *Adequate security.* For the purposes of section 503(b)(1), which treats as prohibited transactions certain loans by an organization without receipt of adequate security and a reasonable rate of interest, the term *adequate security* means something in addition to and supporting a promise to pay, which is so pledged to the organization that it may be sold, foreclosed upon, or otherwise disposed of in default of repayment of the loan, the value and liquidity of which security is such that it may reasonably be anticipated that loss of principal or interest will not result from the loan. Mortgages or liens on property, accommodation endorsements of those financially capable of meeting the indebtedness, and stock or securities issued by corporations other than the borrower may constitute security for a loan to the persons or organizations described in section 503(b). Stock of a borrowing corporation does not constitute adequate security. A borrower's evidence of indebtedness, irrespective of its name, is not security for a loan, whether or not it was issued directly to the exempt organization. However, if any such evidence of indebtedness provides for security that may be sold, foreclosed upon, or otherwise disposed of in default of repayment of the loan, there may be adequate security for such loan. If an organization subject to section 503(b) purchases debentures issued by a person specified in section 503(b), the purchase is considered, for purposes of section 503(b)(1), as a loan made by the purchaser to the issuer on the date of such purchase. For example, if an exempt organization subject to section 503(b) makes a purchase through a registered security exchange of debentures issued by a person described in section 503(b), and owned by an unknown third party, the purchase will be considered as a loan to the issuer by the purchaser. For rules relating to loan of funds to, or investment of funds in stock or securities of, persons described in section 503(b) by an organization described in section 401(a), see paragraph (b)(5) of §1.401–1.

(2) *Effective dates.* The effective dates for the application of the definition of adequate security in paragraph (b)(1) of this paragraph are:

(i) March 15, 1956, for loans (other than debentures) made after March 15, 1956;

(ii) January 31, 1957, for loans (other than debentures) made before March 16, 1956, and continued after January 31, 1957;

(iii) November 8, 1956, for debentures which were purchased after November 8, 1956;

(iv) December 1, 1958, for debentures which were purchased before November 9, 1956, and held after December 1, 1958;

(v) If an employees' pension, stock bonus, or profit-sharing trust described in section 401(a) made a loan before March 1, 1954, repayable by its terms after December 31, 1955, and which would constitute a prohibited transaction if made on or after March 1, 1954, the loan shall not constitute a prohibited transaction if held until maturity (determined without regard to any extension or renewal thereof);

(vi) January 1, 1960, for loans (including the purchase of debentures) made by supplemental unemployment benefit trusts, described in section 501 (c)(17);

(vii) January 1, 1970, for loans (including the purchase of debentures) made by employees' contribution pension plan trusts described in section 501(c)(18).

(3) *Certain exceptions to section 503(b)(1).* See section 503(e) and §1.503(e)–1, 1.503(e)–2, and 1.503(e)–3 for special rules providing that certain obligations acquired by trusts described in section 401(a) or section 501(c) (17) or (18) shall not be treated as loans made without the receipt of adequate security for purposes of section 503(b)(1). See section 503(f) and §1.503(f)–1 for an exception to the application of sections 503(b)(1) for certain loans made by employees' trusts described in section 401(a).

(c) *Examples.* The principles of this section are illustrated by the following examples: (Assume that section 503 (e) and (f) are not applicable.)

Example 1. A, creator of an exempt trust subject to section 503, borrows $100,000 from such trust in 1960, giving his unsecured promissory note. The net worth of A is $1,000,000. The net worth of A is not *security* for such loan and the transaction is a prohibited transaction. If, however, the note is secured by a mortgage on property of sufficient value, or is accompanied by acceptable collateral of sufficient value, or carries with it the secondary promise of repayment by an accommodation endorser financially capable of meeting the indebtedness, it may be adequately secured. However, subordinated debentures bonds of a partnership which are guaranteed by the general partners are not adequately secured since the general partners are liable for the firm's debt and their guaranty adds no additional security.

Example 2. Assume the same facts as in example 1 except that A's promissory note in the amount of $100,000 to the trust is secured by property which has a fair market value of $75,000. A's promissory note secured to the extent of $75,000 is not adequately secured within the meaning of section 503(b)(1) since the security at the time of the transaction must be sufficient to repay the indebtedness, interest, and charges which may pertain thereto.

Example 3. Corporation M, a substantial contributor to an exempt organization subject to section 503, borrows $150,000 from such organization in 1960, giving its promissory note accompanied by stock of the borrowing corporation with a fair market value of $200,000. Since promissory notes and debentures have priority over stock in the event of liquidation of the corporation, stock of a borrowing corporation is not adequate security. Likewise, debenture bonds which are convertible on default into voting stock of the issuing corporation do not constitute *adequate security* under section 503(b)(1).

Example 4. B, creator of an exempt trust subject to section 503, borrows $100,000 from such trust in 1960, giving his secured promissory note at the rate of 3 percent interest. The prevailing rate of interest charged by financial institutions in the community where the transaction takes place is 5 percent for a loan of the same duration and similarly secured. The loan by the trust to the grantor is a prohibited transaction since section 503(b)(1) requires both adequate security and a reasonable rate of interest. Further, a promise to repay the loan plus a percentage of future profits which may be greater than the prevailing rate of interest does not meet the reasonable rate of interest requirement.

Example 5. N Corporation, a substantial contributor to an exempt organization subject to section 503 borrows $50,000 on or after March 16, 1956, from the organization. If the loan is not adequately secured, the organization has committed a prohibited transaction at the time the loan was made. If the loan had been made on or before March 15, 1956, and is continued after January 31, 1957, it must be adequately secured on February 1, 1957, or it will be considered a prohibited transaction on that date. However, if the exempt organization were an employees' trust, described in section 401(a), and the loan were made before March 1, 1954, repayable by its terms after December 31, 1955, it would not have to be adequately secured on February 1, 1957. Moreover, if the exempt organization were a supplemental unemployment benefit trust, described in section 501(c)(17), and the loan were made before January 1, 1960, repayable by its terms after December 31, 1959, it would not have to be adequately secured on January 1, 1960.

Example 6. An exempt organization subject to section 503 purchases a debenture issued by O Corporation, which is a substantial contributor to the organization. The organization purchases the debenture in an arm's length transaction from a third person on or after November 9, 1956. The purchase is considered as a loan by the organization to O Corporation. The loan must be adequately secured when it is made, or it is considered as a prohibited transaction at that time. If the organization purchased the debenture before November 9, 1956, and holds it after December 1, 1958, the debenture must be adequately secured on December 2, 1958, or it will then be considered as a prohibited transaction. However, if the organization were an employees' trust described in section 401(a), and if the debenture were purchased before March 1, 1954, and its maturity date is after December 31, 1955, the debenture does not have to be adequately secured. Moreover, if the organization were an employees' contribution pension plan trust described in section 501(c)(18), and if the debenture were purchased before January 1, 1970, and its maturity date is after December 31, 1969, the debenture does not have to be adequately secured.

[T.D. 7428, 41 FR 34621, Aug. 16, 1976]

§ 1.503(c)–1 Future status of organizations denied exemption.

(a) Any organization described in section 501(c) (3), (17), or (18), or an employees' trust described in section 401(a), which is denied exemption under section 501(a) by reason of the provisions of section 503(a), may file, in any taxable year following the taxable year in which notice of denial was issued, a claim for exemption. In the case of organizations described in section 501(c) (3), (17), or (18), the appropriate exemption application shall be used for this purpose, and shall be filed with the district director. In the case of an enmployees' trust described in section 401(a), the information described in § 1.404(a)–2 shall be submitted with a letter claiming exemption. All employees' trust described in section 401(a) shall submit this information to the district director with whom a request for a determination as to its qualification under section 401 and exemption under section 501 may be submitted under paragraph (s) of § 601.201 of this chapter (Statement of Procedural Rules). A claim for exemption must contain or have attached to it, in addition to the information generally required of such an organization claiming exemption as an organization described in section 501(c) (17), or (18), or section 401(a) (or section 501(c)(3) prior to January 1, 1970), a written declaration made under the penalities of perjury by principal officer of such organization authorized to make such declaration that the organization will not knowingly again engage in a prohibited transaction, (as defined in section 503(b) (or 4975(c) if such section applies to such organization)). In the case of section 501(c)(3) organizations which have lost their exemption after December 31, 1969, pursuant to section 503, a claim for exemption must contain or have attached to it a written agreement made under penalities of perjury by a principal officer of such organization authorized to make such agreement that the organization will not violate the provisions of chapter 42. In addition, such organization must comply with the rules for governing instruments as prescribed in § 1.508–3. See § 1.501(a)–1 for proof of exemption requirements in general.

(b) If the Commissioner is satisfied that such organization will not knowingly again engage in a prohibited transaction (as defined under section 503(b) or 4975(c), as applicable to such organization) or in the case of a section 501(c)(3) organization, will not violate the provisions of chapter 42, and the organization also satisfied all the other requirements under section 501(c) (3), (17), or (18), or section 401(a), the organization will be so notified in writing. In such case the organization will be exempt (subject to the provisions of section 501(c)(3), or sections 501(c) (17), (18) or 401(a), and 503, and 504 when applicable) with respect to the taxable years subsequent to the taxable year in which the claim described in section 503(c) is filed. Section 503 contemplates that an organization denied exemption because of the terms of such section will be subject to taxation for at least one full taxable year. For the purpose of this section, the term *taxable year* means the established annual accounting period of the organization; or, if the organization has no such established annual accounting period, the *taxable year* of the organization means the calendar year.

(c) For taxable years beginning after December 31, 1969, the denial of an exemption pursuant to this section, for a taxable year prior to January 1, 1970, of an organization described in section 501(c)(3) shall not cause such organization to cease to be described in section 501(c)(3) for purposes of part II of subchapter F, chapter 1 and for purposes of the application of chapter 42 taxes.

(d) In the case of an organization described in section 501(c)(3), which has lost its exemption pursuant to section 503, and which has not notified the Commissioner that it is applying for recognition of its exempt status under section 508(a) and this section, no gift or contribution made after December 31, 1969, which would otherwise be deductible under section 170, 642(c), or 545(b)(2) shall be allowed as a deduction. For rules relating to the denial of deductions with respect to gifts or contributions made before January 1, 1970, see, §1.503(e)–4.

[T.D. 7428, 41 FR 34622, Aug. 16, 1976, as amended by T.D. 7896, 48 FR 23817, May 27, 1983]

§1.503(d)–1 Cross references.

For provisions relating to loans described in section 503(b)(1) by a trust described in section 401(a), see §1.503(b)–1 and section 503 (e) and (f) and the regulations thereunder.

[T.D. 7428, 41 FR 34623, Aug. 16, 1976]

§1.503(e)–1 Special rules.

(a) *In general.* (1) Section 503(e) provides that for purposes of section 503(b)(1) (relating to loans made without the receipt of adequate security and a reasonable rate of interest) the acquisition of a bond, debenture, note, or certificate or other evidence of indebtedness shall not be treated as a loan made without the receipt of adequate security if certain requirements are met. Those requirements are described in §1.503(e)–2.

(2) Section 503(e) does not affect the requirement in section 503(b)(1) of a reasonable rate of interest. Thus, although the acquistion of a certificate of indebtedness which meets all of the requirements of section 503(e) and of §1.503(e)–2 will not be considered as a loan made without the receipt of adequate security, the acquisition of such an indebtedness does consitute a prohibited transaction if the indebtedness does not bear a reasonable rate of interest.

(3) The provisions of section 503(e) do not limit the effect of section 401(a) and §1.401–2, section 501(c)(17)(A)(i), or section 501(c)(18)(A), all relating to the use of diversion of corpus or incopme of the respective employee trusts. Furthermore, the provisions of section 503(e) do not limit the effect of any of the provisions of section 503 other than section 503(b)(1). Thus, for example, although a loan made by employees' trust described in section 503(a)(1)(B) meets all the requirements of section 503(e) and therefore is not treated as a loan made without the receipt of adequate security, such an employees' trust making such a loan will lose its exempt status if the loan is not considered as made for the exclusive benefit of the employees or their beneficiaries. Similarly, a loan which meets the requirements of section 503(e) will constitute a prohibited transaction within the meaning of section 503(b)(6) if it results in a substantial diversion of the trust's income or corpus to a person described in section 503(b).

(b) *Definitions.* For purposes of section 503(e):

(1) The term *obligation* means bond, debenture, note, or certificate or other evidence of indebtedness.

(2) The term *issuer* includes any person described in section 503(b) who issues an obligation.

(3)(i) The term *person independent of the issuer* means a person who is not related to the issuer by blood, by marriage, or by reason of any substantial business interests. Persons who will be considered not to be independent of the issuer include but are not limited to:

(a) The spouse, ancestor, lineal descendant, or brother or sister (whether by whole or half blood) of an individual who is the issuer of an obligation;

(b) A corporation controlled directly or indirectly by an individual who is the issuer, or directly or indirectly by the spouse, ancestor, lineal descendant, or brother or sister (whether by whole or half blood) of an individual who is the issuer;

(c) A corporation which directly or indirectly controls, or is controlled by, a corporate issuer;

(d) A controlling shareholder of a corporation which is the issuer, or which controls the issuer;

(e) An officer, director, or other employee of the issuer, of a corporation controlled by the issuer, or of a corporation which controls the issuer;

(f) A fiduciary of any trust created by the issuer, by a corporation which controls the issuer, or by a corporation which is controlled by the issuer; or

(g) A corporation controlled by a person who controls a corporate issuer.

(ii) For purposes of paragraph (b)(3)(i) of this section, the term *control* means, with respect to a corporation, direct or indirect ownership of 50 percent or more of the total combined voting power of all voting stock or 50 percent or more of the total value of shares of all classes of stock. If the aggregate amount of stock in a corporation owned by an individual and by the spouse, ancestors, lineal descendants, brothers and sisters (whether by whole of half blood) of the individual is 50 percent or more of the total combined voting power of all voting stock or is 50 percent or more of the total value of all classes of stock, then each of these persons shall be considered as the controlling shareholder of the corporation.

(iii) In determining family relationships for purposes of paragraph (b)(3)(i) of this section, a legally adopted child of an individual shall be treated as a child of such individual by blood.

(4) The term *issue* means all the obligations of a issuer which are offered for sale on substantially the same terms. Obligations shall be considered offered for sale on substantially the same terms if such obligation would, at the same time and under the same circumstances, be traded on the market at the same price. On the other hand, if the terms on which obligations are offered for sale differ in such manner as would cause such obligations to be traded on the market at different prices, then such obligations are not part of the same issue. The following are examples of terms which, if different, would cause obligations to be traded on the market at different prices: (i) Interest rate; (ii) Maturity date; (iii) Collateral; and (iv) Conversion provisions.

The fact that obligations are offered for sale on different dates will not preclude such obligations from being part of the same issue if they all mature on the same date and if the terms on which they are offered for sale are otherwise the same, since such obligations would, at the same time and under the same conditions, be traded on the market at the same price. Obligations shall not be considered part of the same issue merely because they are part of the same authorization or because they are registered as part of the same issue with the Securities and Exchange Commission.

[T.D. 7428, 41 FR 34623, Aug. 16, 1976]

§ 1.503(e)–2 Requirements.

(a) *In general.* The requirements which must be met under section 503(e) for an obligation not to be treated as a loan made without the receipt of adequate security for purposes of section 503(b)(1) are described in paragraphs (b), (c), and (d) of this section. For purposes of this section, the term *employee trust* shall mean any of the three kinds of organizations described in section 503(a)(1).

(b) *Methods of acquisition*—(1) *In general.* The employee trust must acquire the obligation of the market, by purchase from an underwriter, or by purchase from the issuer, in the manner described in subparagraph (2), (3), or (4) of this paragraph.

(2) *On the market.* (i) An obligation is acquired on the market when it is purchased through a national securities exchange which is registered with the Securities and Exchange Commission, or when it is purchased in an over-the-counter transaction. For purposes of the preceding sentence, securities purchased through an exchange which is not a national securities exchange registered with the Securities and Exchange Commission shall be treated as securities purchased in an over-the-counter transaction.

(ii)*(a)* If the obligation is listed on a national securities exchange registered with the Securities and Exchange Commission, it must be purchased through such an exchange or in an over-the-counter transaction at a price not greater than the price of the obligation prevailing on such an exchange at the time of the purchase by the employee trust.

(b) For purposes of section 503(e), the price of the obligation prevailing at the time of the purchase means the price which accurately reflects the market value of the obligation. In the case of an obligation purchased through a national securities exchange which is registered with the Securities and Exchange Commission, the price paid for the obligation will be considered the prevailing price of the obligation. In the case of an obligation purchased in an over-the-counter transaction, the prevailing price may be the price at which the last sale of the obligation was affected on such national securities exchange immediately before the employee trust's purchase of such obligation on the same day or may be the mean between the highest and lowest prices at which sales were effected on such exchange on the same day or on the immediately preceding day or on the last day during which there were sales of such obligation or may be a price determined by any other method which accurately reflects the market value of the obligation.

(iii)*(a)* If the obligation is not listed on a national securities exchange which is registered with the Securities and Exchange Commission, it must be purchased in an over-the-counter transaction at a price not greater than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer.

(b) For purposes of section 503(e) the offering price for the obligation at the time of the purchase means the price which accurately reflects the market value of the obligation. The offering price may be the price at which the last sale of the obligation to a person independent of the issuer was effected immediately before the employee trust's purchase of such obligation on the same day or may be the mean between the highest and lowest prices at which sales to persons independent of the issuer were effected on the same day or on the last day during which they were sales of such obligation or may be a price determinated by any other method which accurately reflects the market value of the obligation. The offering price for an obligation must be a valid price for the amount of the obligations which the trust is purchasing. For example, if an employees' trust described in section 503(a)(1)(B) purchases 1,000 bonds of the employer corporation at the offering price established by current prices for a lot of 10 such bonds, such offering price may not be a valid price for 1,000 bonds and the purchase may therefore not meet the requirements of this subdivision. For a purchase of an obligation to qualify under this subdivision, there must be sufficient current prices quoted by persons independent of the issuer to establish accurately the current value of the obligation. Thus, if there are no current prices quoted by persons independent of the issuer, an over-the-counter transaction will not qualify under this subparagraph even though the obligation was purchased in an arms's length transaction from a person independent of the issuer.

(iv) For purposes of this section, an over-the-counter transaction is one not executed on a national securities exchange which is registered with the Securities and Exchange Commission. An over-the-counter transaction may be made through a dealer or an exchange which is not such a national securities exchange or may be made directly from the seller to the purchaser.

(3) *From an underwriter.* An obligation may be purchased from an underwriter if it is purchased at a price not greater than:

(i) The public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, or

(ii) The price at which a substantial portion of the issue including such obligation is acquired by persons independent of the issuer,

whichever is the lesser price. For purposes of this subparagraph, a portion of the issue will be considered substantial if the purchasers of such portion by persons independent of the issuer are sufficient to establish that fair market value of the obligations included in such issue. In determining whether the purchases are sufficient to establish the fair market value, all the surrounding facts and circumstances will be considered, including the number of independent purchasers, the aggregate amount purchased by each such independent purchaser, and the number of transactions. In the case of a large issue, purchases of a small percentage of the outstanding obligations may be considered purchases of a substantial portion of the issue; whereas, in the case of a small issue, purchases of a larger percentage of the outstanding obligations will ordinarily be required. The requirement in paragraph (b)(3)(ii) of this section contemplates purchase of the obligations by persons independent of the issuer contemporaneously with the purchase by the employee trust. If a substantial portion has been purchased at different prices, the price of the portion may be based on the average of such prices, and if several substantial portions have been sold to persons independent of the issuer, the price of any of the substantial portions may be used for pusposes of this subparagraph.

(4) *From the issuer.* An obligation may be purchased directly from the issuer at a price not greater than the price paid currently for a substantial portion of the same issue by persons independent of the issuer. This requirement contemplates purchase of a substantial portion of the same issue by persons independent of the issuer contemporaneously with the purchase by the employee trust. For purposes of this subparagraph, a portion of the issue will be considered substantial if the purchases of such portion by persons independent of the issuer are sufficient to establish the fair market value of the obligations included in such issue. In determining whether the purchases are sufficient to establish the fair market value, all the surrounding facts and circumstances will be considered, including the number of independent purchasers, the aggregage amount purchased by each such independent purchaser, and the number of transactions. In the case of a large issue, purchases of a small percentage of the outstanding obligations may be considered purchases of a substantial portion of the issue; whereas, in the case of a small issue, purchases of a larger percentage of the outstanding obligations will ordinarily be required. The price paid for a substantial portion of the issue may be determined in the manner privided in paragraph (b)(3) of this section.

(c) *Limitations on holdings of obligations.* (1) Immediately following acquisition of the obligation by the employee trust:

(i) Not more than 25 percent of the aggregate amount of the obligations issued in such issue and outstanding immediately after acquisition by the trust may be held by the trust, and

(ii) At least 50 percent of such aggregate amount must be held by persons independent of the issuer.

(2)(i) For purposes of paragraph (c)(1) of this section, an obligation is not considered as outstanding if it is held by the issuer. For example, if an obligation which has been issued and outstanding is repurchased and held by the issuer, without cancellation or retirement, such an obligation is not considered outstanding.

(ii) For purposes of paragraph (c)(1) of this section, the amounts of the obligations held by the trust and by persons independent of the issuer shall be computed on the basis of the face amount of the obligations.

(d) *Limitation on amount invested in obligations.* (1)(i) Immediately following acquisition of the obligation, not more 25 percent of the assets of the employee trust may be invested in all obligations of all persons described in section 503(b). For purposes of determining the amount of the trust's assets which are invested in obligations of persons described in section 503(b) immediately following acquisition of the obligation, those obligations shall be valued as follows:

(a) Those obligations included in the acquisition in respect of which the percentage test in the first sentence of this subdivision is being applied shall be valued at their adjusted basis, as provided in section 1011, relating to adjusted basis for determining gain or loss; and

(b) All other obligations of persons described in section 503(b) which were part of the trust's assets immediately before the acquisition of the obligations described in (d)(1)(i)*(a)* of this section shall be valued at their fair market value on the day that the obligations described in (d)(1)(i)*(a)* of this section were acquired. For purposes of determining the total amount of the assets of the trust (including obligations of persons described in section 503(b)), there shall be used the fair market value of those assets on the day the obligation is acquired.

(ii) The application of the rules in paragraph (d)(1)(i) of this section may be illustrated by the following example:

Example. On February 1, 1960, an exempt employees' trust described in section 401(a) purchases unsecured debentures issued by the employer corporation for $1,000. At the time of this purchase, such debentures have a fair market value of $1,200. Immediately after the purchase of such unsecured debentures, the assets of the trust consist of the following:

	Cost	Fair market value on Feb. 1, 1960
(a) Assets other than obligations of persons described in sec. 503(b)	$5,000	$7,800
(b) Obligations of persons described in sec. 503(b) acquired before Feb. 1, 1960	500	1,000
(c) Unsecured debentures of employer purchased on Feb. 1, 1960	1,000	1,200

Immediately following acquisition of the unsecured debentures by the trust, the percent of the assets of the trust that are invested in all obligations of all persons described in section 503(b) is computed as follows:

(1) Obligations of persons described in section 503(b) acquired before Feb. 1, 1960 (valued at fair market value)	$1,000
(2) Unsecured debentures of employer purchased on Feb. 1, 1960 (valued at cost)	1,000
(3) Total amount of trust's assets invested in obligations of persons described in section 503(b) ((1) plus (2))	2,000
(4) Assets of the trust other than obligations of persons described in section 503(b) (valued at fair market value on Feb. 1, 1960)	7,800
(5) Obligations of persons described in section 503(b) acquired before Feb. 1, 1960 (valued at fair market value on Feb. 1, 1960)	1,000
(6) Unsecured debentures of employer purchased on Feb. 1, 1960 (valued at fair market value on Feb. 1, 1960)	$1,200
(7) Total assets of the trust valued at fair market value on Feb. 1, 1960 (sum of (4), (5), and (6))	10,000
(8) Percent of assets of the trust invested in all obligations of all persons described in section 503(b) immediately following purchase of unsecured debentures on Feb. 1, 1960 ((3)÷(7), that is, $2,000÷$10,000)	20%

(2) In determining for purposes of subparagraph (1) of this paragraph the amount invested in obligations of persons described in section 503(b), there shall be included amounts invested in any obligations issued by any such person, irrespective of whether the obligation is secured, and irrespective of whether the obligation meets the conditions of section 503(e) or section 503(f). Obligations of persons described in section 503(b) other than the issuer of the obligation to which section 503(e) applies are also included within the 25 percent limitation. For example, if on February 19, 1959, an exempt employees' trust described in section 401(a) purchases unsecured debentures issued by the employer corporation in a transaction effected on the New York Stock Exchange, and if immediately after the purchase 10 percent of the trust's assets is invested in such debentures and 20 percent of its assets is invested in a loan made with adequate security on January 12, 1959, to the wholly-owned subsidiary of the employer corporation, then the purchase of the employer's debentures will not qualify under section 503(e), since 30 percent of the trust's assets are then invested in obligations of persons described in section 503(b).

(e) *Change of terms of an obligation.* A change in terms of an obligation is considered as the acquisition of a new obligation. If such new obligation is not adequately secured, the requirements of section 503(e) must be met at the time the terms of the obligation are changed for such section to be applicable to such new loan.

[T.D. 7428, 41 FR 34624, Aug 16, 1976]

§ 1.503(e)–3 Effective dates.

(a) Section 503(e) and §§ 1.503(e)–1 and 1.503(e)–3 are effective in the case of an employees' trust described in section 401(a) for taxable years ending after March 15, 1956. Thus, if during a taxable year ending before March 16, 1956, an employees' trust made a loan which meets the requirements of section 503(e), such loan will not be treated as made without the receipt of adequate security and will not cause the loss of exemption for taxable years ending after March 15, 1956, although such loan was not considered adequately secured when made. (However, section 503 does not apply to organizations described in section 401(a) not referred to in section 4975(g) (2) or (3) for transactions occurring after December 31, 1974.)

(b)(1) In the case of obligations acquired by an employees' trust described in section 401(a) before September 2, 1958, which were held on that date, the requirements described in paragraphs (c) and (d) of § 1.503(e)–2 which were not satisfied immediately following the acquisition shall be treated as satisfied at that time if those requirements would have been satisfied had the obligations been acquired on September 2, 1958. For example, on January 3, 1955, an employees' trust described in section 401(a) purchased through the New York Stock Exchange unsecured debentures issued by the employer corporation. Under section 503(e) the acquisition of such debentures by the trust will not be treated for taxable years ending after March 15, 1956, as a loan made without the receipt of adequate security if the debentures were held by the employees' trust on September 2, 1958, and if the requirements of paragraphs (c) and (d) of § 1.503(e)–2 which were not met on January 3, 1955, were met on September 2, 1958, as if that date were the date of acquisition.

(2) In the case of obligations acquired before September 2, 1958, which were not held by the employees' trust described in section 401(a) on that date, only the requirements described in paragraph (b) of § 1.503(e)–2 must be satisfied for section 503(e) to be applicable to such acquisition. For example, if on December 5, 1956, an employees' trust lent money to the employer corporation by purchasing a debenture issued by the employer and if the trust sold the debenture on August 1, 1958, such loan would not be treated as made without the receipt of adequate security if the requirement described in paragraph (b) of § 1.503(e)–2 was met on December 5, 1956.

(c) Section 503(e) and §§ 1.503(e)–1 and 1.503(e)–2 are effective in the case of trusts described in section 501(c)(17) with respect to loans made, renewed, or, in the case of demand loans, continued after December 31, 1959, and in the case of trusts described in section 501(c)(18) with respect to loans made, renewed or, in the case of demand loans, continued after December 31, 1969.

(d) See paragraph (b)(2) of § 1.503(b)–1 for the effective dates for the application of the definition of adequate security.

[T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§ 1.503(e)–4 Disallowance of charitable deductions for certain gifts made before January 1, 1970.

Paragraphs (a), (b), and (c) of this section shall apply only to gifts or contributions made before January 1, 1970, to an organization described in section 501(c)(3). For rules relating to the denial of deductions with respect to gifts or contributions made after December 31, 1969, see § 1.503(c)–1(d).

(a) No gift or contribution which would otherwise be allowable as a charitable or other deductions under section 170, 642(c), or 545(b)(2) shall be allowed as a deduction if made to an organization described in section 501(c)(3) which at the time the gift or contribution is made is not exempt under section 501(a) by reason of the provisions of section 503.

(b) If an organization which is described in section 501(c)(3) is not exempt because it engaged in a prohibited transaction involving a substantial part of its income of corpus with the purpose of diverting its income or corpus from its exempt purposes, and if the organization receives a gift or contribution during, or prior to, its taxable year in which such prohibited transaction occurred, then a deduction by the donor with respect to the gift or contribution shall not be disallowed under section 503(b) unless the donor (or any member of his family if the donor is an individual) is a party to such prohibited transaction. For the purpose of the preceding sentence *family* is defined in section 267(c)(4) and includes brothers and sisters, whether by whole or half blood, spouse, ancestors, and lineal descendants. See the regulations under section 267(c).

(c) The application of §1.503(e)–4 may be illustrated by the following example:

Example. In 1954, Corporation M, which files its income tax returns on the calendar year basis, creates a foundation purportedly for charitable purposes and deducts from its gross income for that year the amount of the gift to the foundation. Corporation M makes additional gifts to this foundation in 1955, 1956, and 1957, and takes charitable deductions for such years. B, an individual, also contributes to the foundation in 1955, 1956, and 1957, and takes charitable deductions for such years. In 1955, the foundation commences purposely to divert its corpus to the benefit of Corporation M, and a substantial amount of such corpus is so diverted by the close of the taxable year 1956. For 1955 and subsequent taxable years, the exemption allowed the foundation as an organization described in section 501(c)(3) is denied by reason of the provisions of section 503(a). Both Corporation M and individual B would be disallowed any deduction for the contributions made during 1957 to the foundation. Moreover, the charitable deductions taken by Corporation M for contributions to the foundation in the years 1955 and 1956 would also be disallowed since Corporation M was a party to the prohibited transactions. If the facts and surrounding cuircumstances indicate that the contribution in 1954 by Corporation M was for the purpose of the prohibited transaction, then the charitable deduction for the year 1954 shall also be disallowed with respect to Corporation M, since the prohibited transaction would then have commenced with the making of such contribution and the exemption allowed the foundation would then be denied for 1954 by reason of the provisions of §1.503(e)–4. B's deductions for his contributions for the years 1955 and 1956 will not be disallowed since he was not a party to the prohibited transaction.

[T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§1.503(f)–1 Loans by employers who are prohibited from pledging assets.

(a) *In general.* (1) Section 503(f) provides that section 503(b)(1) shall not apply to a loan made to the employer by an employees' trust described in section 401(a) if the loan bears a reasonable rate of interest and certain conditions are met. Section 503(f) also applies to the renewal of loans to the employer and, in the case of demand loans, to the continuation of such loans.

(2) The provisions of section 503(f) do not limit the effect of section 401(a) and §1.401–2, relating to use or diversion of corpus or income of an employees' trust, or the effect of any of the provisions of section 503 other than section 503(b)(1). Consequently, although a loan made by an employees' trust described in section 503(a)(1)(B) meets all the requirements of section 503(f) and therefore is not treated as a loan made without the receipt of adequate security, an employees' trust making such a loan will lose its exempt status if the loan is not considered as made for the exclusive benefit of the employees or their beneficiaries. Similarly, a loan which meets the requirements of section 503(f) will constitute a prohibited transaction within the meaning of section 503(b)(6) if it results in a substantial diversion of the trust's income or corpus to a person described in section 503(b).

(b) *Conditions.* (1) Section 503(f) applies to a loan only if, with respect to the making or renewal of the loan, the conditions described in paragraphs (b)(2), (3), and (4) of this section are met. For purpose of this paragraph, the mere continuance of a demand loan is not considered as the making or renewal of such a loan.

(2) The employer must be prohibited (at the time of the making or renewal of the loan) by any law of the United States or regulations thereunder from directly or indirectly pledging, as security for such a loan, a particular class

or classes of his assets the value of which (at such time) represents more than one-half of the value of all his assets. If a loan is made or renewed when the employer is prohibited by a law of the United States (or the regulations thereunder) from pledging a class of his assets, the qualification of such a loan under section 503(f) will not be affected by a subsequent change in such law or regulations permitting the employer to pledge such assets, unless such loan is renewed after such change. See section 8(a) of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78h(a)), which prohibits certain persons from pledging a class of assets as security for loans, and 12 CFR 220.5(a) (credit by brokers, dealers, and members of national securities exchanges).

(3) The making or renewal, as the case may be, must be approved in writing as an investment which is consistent with the exempt purposes of the trust by a trustee who is independent of the employer, and such written approval must not have been previously refused by any other such trustee. A trustee is independent of the employer, for purposes of this subparagraph, if he is entirely free of influence or controlled by the employer. For example, if the employer is a partnership, then a partner in such partnership, or a member of a partner's family would not be considered independent of the employer. Similarly, an employee of the employer would not be considered independent of the employer. For purposes of this subparagraph, the term *trustee* means, with respect to any trust for which there are two trustees who are independent of the employer, both of such trustees and, with respect to any trust for which there are more than two such independent trustees, a majority of the trustees independent of the employer.

(4)(i) Immediately following the making or renewal, as the case may be, the aggregate amount lent by the trust to the employer, without the receipt of adequate security must not exceed 25 percent of the value of all the assets of the trust.

(ii) For purposes of paragraph (b)(4)(i) of this section, the determination as to whether any amount lent by the trust to the employer is a loan made without the receipt of adequate security shall be made without regard to section 503(e). Thus, if an employees' trust makes a loan on January 2, 1959, to the employer without adequate security (but which loan is not considered as made without adquate security under section 503(e)), and if immediately after making such loan 10 percent of the value of all its assets is invested in such loan, then the trust may on that day invest not more than an additional 15 percent of its assets in a loan which would be considered made without adequate security if it were not for the provisions of section 503(f).

(iii) For purposes of paragraph (b)(4)(i) of this section, in determining the value of all the assets of the trust, there shall be used the fair market value of those assets on the day of the making or renewal.

(c) *Reasonable rate of interest.* Section 503(f) only applies if, in addition to meeting the conditions described in paragraph (b) of this section, the loan bears a reasonable rate of interest when it is made, renewed, or, in the case of demand loans, during the period of its existence.

(d) *Change of terms of loan.* A change in the terms of a loan (including a reduction in the security for a loan) is considered as the making of a new loan. If such a new loan is not adequately secured, the requirements of section 503(f) must be met at the time the terms of the loan are changed for such section to be applicable to such new loan.

(e) *Effective date.* (1) This section and section 503(f) are effective for taxable years ending after September 2, 1958, but only with respect to periods after such date. Thus, if a loan was made on or before September 2, 1958, without the receipt of adequate security and if, when such loan was made, it met all of the requirements of section 503(f) and this section, then the loan is not subject to section 503(b)(1) after September 2, 1958, and would not consitite a prohibited transaction after that date because of a lack of adequate security.

(2) See paragraph (b)(2) of § 1.503(b)–1 for the effective dates for application of the definition of adequate security.

[T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§1.504–1 Attempts to influence legislation; certain organizations formerly described in section 501(c)(3) denied exemption.

Section 504(a) and this section apply to an organization that is exempt from taxation at any time after October 4, 1976, as an organization described in section 501(c)(3), and that ceases to be described in that section because it—

(a) Is an *action* organization within the meaning of §1.501(c)(3)–1(c)(3)(ii) or (iv), on account of activities occurring after October 4, 1976, or

(b) Is denied exemption under the provisions of section 501(h) (see §1.501(h)–3 or §56.4911–9).

This section does not apply, however, to an organization that was described in section 501(h)(5) and §1.501(h)–2(b)(3) (relating generally to churches) for its taxable year immediately preceding the first taxable year for which it is no longer an organization described in section 501(c)(3). An organization to which section 504(a) and this section apply shall not be treated as described in section 501(c)(4) at any time after the organization ceases to be described in section 501(c)(3). Further, an organization denied treatment as an organization described in section 501(c)(4) under this section may not be treated as an organization described in section 501(c) other than as an organization described in section 501(c)(3). For rules relating to recognition of exemption after exemption is denied under section 501(h), §1.501(h)–3(d).

[T.D. 8308, 55 FR 35592, Aug. 31, 1990]

§1.504–2 Certain transfers made to avoid section 504(a).

(a) *Scope.* Under section 504(b), a transfer described in paragraph (b) or (c) of this section to an organization exempt from tax under section 501(a) may result in loss of exemption by the transferee unless the Commissioner determines, under paragraph (e) of this section, that the original transfer did not effect an avoidance of section 504(a). For purposes of this section, the term *transfer* includes any use by, or for the benefit of, the recipient of the transfer, but does not include any transfer made for adequate and full consideration.

(b) *Transferor and transferee commonly controlled*—(1) *Loss of exemption.* A transfer is described in this paragraph (b) if it is described in paragraphs (b)(2) through (b)(6). The transferee of a transfer described in this paragraph will cease to be exempt from tax under section 501(a), unless the provisions of paragraph (e) of this section apply.

(2) *Transferor organization.* A transfer is described in this paragraph (b)(2) only if it is from an organization that—

(i) Is or was described in section 501(c)(3), but not in section 501(h)(5), and

(ii) Is determined to be an ‘‘action’’ organization (as defined in §1.501(c)(3)–1(c)(3)(ii) or (iv)), or is denied exemption from tax by reason of section 501(h) and either §1.501(h)–3 or §56.4911–9.

(3) *Transferor and transferee commonly controlled.* A transfer is described in this paragraph (b)(3) only if, at the time of the transfer or at any time during the transferee's ten taxable years following the year in which the transfer was made, the transferee is controlled (directly or indirectly), as defined in paragraph (f) of this section, by the same person or persons who control the transferor.

(4) *Time of transfer.* A transfer is described in this paragraph (b)(4) only if the transfer is made—

(i) After the date that is 24 months before the earliest of the effective date of the determination under section 501(h) that the transferor is not exempt, the effective date of the Commissioner's determination that the transferor is an ‘‘action’’ organization (as defined in §1.501(c)(3)(ii) or (iv)), or the date on which the Commissioner proposes to treat it as no longer described in section 501(c)(3), and

(ii) Before the transferor again is recognized as an organization described in section 501(c)(3).

(5) *Transferee.* A transfer is described in this paragraph (b)(5) only if the transferee is exempt from tax under section 501(a) but the transferee is neither—

(i) An organization described in section 501(c)(3), nor

(ii) An organization described in section 401(a) to which the transferor contributes as an employer.

(6) *Amount of transfer.* A transfer is described in this paragraph (b)(6) only if the amount of the transfer exceeds the lesser of 30 percent of the net fair market value of the transferor's assets or 50 percent of the net fair market value of the transferee's assets, computed immediately before the transfer. For purposes of this paragraph (b)(6)—

(i) The amount of a transfer by a transferor is the sum of the amounts transferred to any number of transferees in any number of transfers, all of which are described in paragraphs (b)(2) through (b)(5) of this section, and the time of the transfer is the time of the first transfer so taken into account; and

(ii) The amount of a transfer to a transferee is the sum of the amounts transferred by a transferor to the transferee in any number of transfers, all of which are described in paragraphs (b)(2) through (b)(5) of this section, and the time of the transfer is the time of the first transfer so taken into account.

(c) *Other transfers*—(1) *Transfers included.* A transfer is described in this paragraph (c) if it would be described in paragraph (b) of this section except that either—

(i) The amount of the transfer is less than the amount determined in paragraph (b)(6) of this section, or

(ii) The transferor and transferee are not commonly controlled as described in paragraph (b)(3) of this section, or

(iii) The transferee is an organization described in sections 501(c)(3) and 501(h)(4).

(2) *Loss of exemption.* The transferee of a transfer described in this paragraph (c) will cease to be exempt under section 501(a) if the Commissioner determines on all the facts and circumstances that the transfer effected an avoidance of section 504(a). In determining whether a transfer effected an avoidance of section 504(a), the Commissioner may consider whether the transferee engages, or has engaged, in attempts to influence legislation and may also consider any factors enumerated in paragraph (e) of this section.

(d) *Date of loss of exempt status.* A transferee of a transfer described in paragraph (b), (c)(1)(ii), or (c)(1)(iii) of this section will cease to be exempt from tax under section 501(a) on the date that all requirements of paragraph (b), (c)(1)(ii), or (c)(1)(iii) (other than the determination by the Commissioner) are satisfied. A transferee of a transfer described in paragraph (c)(1)(i) of this section will cease to be exempt from tax under section 501(a) on the date of the last transfer preceding notification of the transferee that the Commissioner proposes to treat the transferee as other than an exempt organization.

(e) *Transfers not in avoidance of section 504(a).* Notwithstanding paragraph (b) of this section, if, based on all the facts and circumstances, the Commissioner determines that a transfer described in paragraph (b) did not effect an avoidance of section 504(a), the transferee will not be denied exemption from tax by reason of section 504(b) and this section. In making the determination called for in the preceding sentence, the Commissioner may consider all relevant factors including:

(1) Whether enforceable and effective conditions on the transfer preclude use of any of the transferred assets for any purpose that, if it were a substantial part of an organization's activities, would be inconsistent with exemption as an organization described in section 501(c)(3);

(2) In the absence of conditions described in paragraph (e)(1) of this section, whether the transferred assets are used exclusively for purposes that are consistent with the transferor's exemption as an organization described in section 501(c)(3);

(3) Whether the assets transferred would be describe in § 53.4942(a)(–2(c)(3) before, as well as after, the transfer if both the transferor and transferee were private foundations;

(4) Whether and to what extent the transfer would satisfy the provisions of § 1.507–2(a) (7) and (8) if the transferor were a private foundation;

(5) Whether all of the transferred assets have been expended during a period when the transferee was not controlled (directly or indirectly) by the

same person or persons who controlled the transferor; and

(6) Whether the entire amount of the transferred assets were in turn transferred, before the close of the transferee's taxable year following the taxable year in which the transferred assets were received, to one or more organizations described in section 507(b)(1)(A) none of which are controlled (directly or indirectly) by the same persons who control either the original transferor or transferee.

(f) *Control.* For purposes of section 504 and the regulations thereunder—

(1) The transferor will be presumed to control any organization with which it is affiliated within the meaning of §56.4911–7(a), or would be if both organizations were described in section 501(c)(3), and

(2) The transferee will be treated as controlled (directly of indirectly) by the same person or persons who control the transferor if the transferee would be treated as controlled under §53.4942(a)–3(a)(3), for which purpose the transferor shall be treated as a private foundation.

[T.D. 8308, 55 FR 35592, Aug. 31, 1990]

§1.505(c)–1T Questions and answers relating to the notification requirement for recognition of exemption under paragraphs (9), (17) and (20) of Section 501(c) (temporary).

Q–1: What does section 505(c) of the Internal Revenue Code provide?

A–1: Section 505(c) provides that an organization will not be recognized as exempt under section 501(c)(9) as a voluntary employees' beneficiary association, under section 501(c)(17) as a trust forming part of a plan providing for the payment of supplemental unemployment compensation benefits, or under section 501(c)(20) as a trust forming part of a qualified group legal services plan unless notification is given to the Internal Revenue Service. The notification required of a trust created pursuant to section 501(c)(20) and forming part of a qualified group legal services plan is set forth in Q&A–2. The notification required of an organization organized after July 18, 1984, and applying for exempt status as an organization described in section 501(c) (9) or (17) is set forth in Q&A–3 through Q&A–8. The notification required of an organization organized on or before July 18, 1984, and claiming exemption as an organization described in section 501(c) (9) or (17) is set forth in Q&A–9 through Q&A–11. However, an organization that has previously notified the Internal Revenue Service of its claim to exemption under section 501(c) (9), (17), or (20) or its claim to exemption under those sections pursuant to another provision of the Code, is not required, under section 505(c), to submit a renotification (See Q&A–2 and Q&A–12).

Section 501(c)(20) Trusts

Q–2: What is the notice required of a trust created pursuant to section 501(c)(20) and forming part of a qualified group legal services plan under section 120?

A–2: (a) A trust claiming exemption as an organization described in section 501(c)(20) will be recognized as exempt if the exclusive function of the trust is to form part of a qualified group legal services plan or plans. Exemption of the trust under section 501(c)(20) will generally be dependent upon and coextensive with recognition of the plan as a qualified group legal services plan. Therefore, a trust organized pursuant to section 501(c)(20) after July 18, 1984, need not file a separate notice with the Internal Revenue Service of its claim to exemption because the notice required by section 120(c)(4) will suffice for purposes of section 505(c), provided a copy of the trust instrument is filed with the Form 1024 submitted by the group legal services plan. If the trust instrument has not been filed with the Form 1024 submitted by the group legal services plan, the trust must comply with (and exemption will be dependent upon) the filing applicable to a trust organized on or before July 18, 1984. For the notice required and effective dates of exemption of a qualified group legal services plan under section 120, see §1.120–3.

(b) A trust organized on or before July 18, 1984, that claims exempt status as a trust described in section 501(c)(20) and that forms part of a qualified group legal services plan which has been recognized as exempt under section 120, must file a copy of its trust instrument with the Internal Revenue Service before February 4, 1987. If a copy of the trust instrument is filed within the time provided, the trust's exemption will be recognized retroactively to the date the qualified group legal services plan was recognized as exempt under section 120. However, if a copy of the trust instrument is filed after the time provided, exemption will be recognized only for the period after the copy of the trust instrument is filed with the Internal Revenue Service. See Q&A–7 for a further discussion of *date of filing.* A trust that has previously filed a copy of its trust instrument with the Service need not refile that document.

Section 501(c) (9) and (17) Organizations Organized After July 18, 1984

Q–3: What is the notice required of an organization or trust, organized after July 18, 1984, that is applying for recognition of tax exempt status under section 501(c) (9) or (17)?

A–3: An organization or trust that is organized after July 18, 1984, will not be treated as described in paragraphs (9) or (17) of section 501(c), unless the organization notifies the Internal Revenue Service that it is applying for recognition of exemption. In addition, unless the required notice is given in the manner and within the time prescribed by these regulations, an organization will not be treated as exempt for any period before the giving of the required notice. The notice is filed by submitting a properly completed and executed Form 1024, ''Application for Recognition of Exemption Under Section 501(a) or for Determination Under Section 120'' together with the additional information required under Q&A–4 and Q&A–5. The notice is filed with the district director for the key district in which the organization's principal place of business or principal office is located.

The notice may be filed by either the plan administrator (as defined in section 414(g)) or the trustee. The Internal Revenue Service will not accept a Form 1024 for any organization or trust before such entity has been organized.

Q–4: What information, in addition to the information required by Form 1024, must be submitted by an organization or trust seeking recognition of exemption under section 501(c) (9) or (17)?

A–4: A notice will not be considered complete unless, in addition to a properly completed and executed Form 1024, the organization or trust submits a full description of the benefits available to participants under section 501(c) (9) or (17). Moreover, both the terms and conditions of eligibility for membership and the terms and conditions of eligibility for benefits must be set forth. This information may be contained in a separate document, such as a *plan document,* or it may be contained in the creating document of the entity (e.g., the articles of incorporation or association, or a trust indenture). For benefits provided through a policy or policies of insurance, all such policies must be included with the notice. Where individual policies of insurance are provided to the participants, single exemplar copies, typical of policies generally issued to participants, are acceptable, provided they adequately describe all forms of insurance available to participants. In providing a full description of the benefits available, the benefits provided must be sufficiently described so that each benefit is definitely determinable. A benefit is definitely determinable if the amount of the benefit, its duration, and the persons eligible to receive it are ascertainable from the plan document or other instrument. Thus, a benefit is not definitely determinable if the rules governing either its amount, its duration, or its recipients are not ascertainable from the plan document or other instrument but are instead subject to the discretion of a person or committee. Likewise, a benefit is not definitely determinable if the amount for any individual is based upon a percentage share of any item that is within the discretion of the employer. However, a disability benefit will not fail to be considered definitely determinable merely because the determination of whether an individual is disabled is made under established guidelines by an authorized person or committee.

Q–5: What is the notice required of collectively bargained plans?

A–5: If an organization or trust claiming exemption under section 501(c) (9) or (17) is organized and maintained pursuant to a collective bargaining agreement between employee representatives and one or more employer, only one Form 1024 is required to be filed for the organization or trust, regardless of the number of employers originally participating in the agreement. Moreover, once a Form 1024 is filed pursuant to a collective bargaining areement, an additional Form 1024 is not required to be filed by an employer who thereafter participates in that agreement. When benefits are provided pursuant to a collective bargaining agreement, the notice will not be considered complete unless, in addition to a properly completed and executed Form 1024, a copy of the collective bargaining agreement is also submitted together with the additional information delineated in Q&A–4.

Q–6: When must the required notice be filed by an organization or trust, organized after July 18, 1984, that seeks recognition of exemption under section 501(c) (9) or (17)?

A–6: An organization or trust applying for exemption must file the required notice by the later of February 4, 1987 or 15 months from the end of the month in which the organization or trust was organized. An extension of time for filing the required notice may be granted by the district director if the request is submitted before the end of the applicable period and it is demonstrated that additional time is needed.

Q–7: What is the effective date of exemption for a new organization or trust, organized after July 18, 1984, that has submitted the required notice?

A–7: If the required notice is filed within the time provided by these regulations, the organization's exemption will be recognized retroactively to the date the organization was organized, provided its purpose, organization and operation (including compliance with the applicable nondiscrimination requirements) during the period prior to the date of the determination letter are in accordance with the applicable law. However, if the required notice is filed after the time provided by these regulations, exemption will be recognized only for the period after the application is filed with the Internal

Revenue Service. The date of filing is the date of the United States postmark on the cover in which an exemption application is mailed or, if no postmark appears on the cover, the date the application is stamped as received by the Service. If an extension for filing the required notice has been granted to the organization, a notice filed on or before the last day specified in the extension will be considered timely and not the otherwise applicable date under Q&A–6.

Q–8: What is the effect on exemption of the filing of an incomplete notice?

A–8: Although a properly completed and executed Form 1024 together with the required additional information (See Q&A–4 and Q&A–5) must be submitted to satisfy the notice required by section 505(c), the failure to file, within the time specified, all of the information necessary to complete such notice will not alone be sufficient to deny recognition of exemption from the date of organization to the date the completed information is submitted to the Service. If the notice which is filed with the Service within the required time is substantially complete, and the organization supplies the necessary additional information requested by the Service within the additional time allowed, the original notice will be considered timely. However, if the notice is not substantially complete or the additional information is not provided within the additional time allowed, exemption will be recognized only from the date of filing of the additional information.

SECTION 501(C) (9) AND (17) ORGANIZATIONS ORGANIZED ON OR BEFORE JULY 18, 1984

Q–9: What is the notice required of an organization or trust organized on or before July 18, 1984, that claims exempt status as an organization described in section 501(c) (9) or (17)?

A–9: Section 505(c) provides a special rule for existing organizations and trusts organized on or before July 18, 1984. Such an organization or trust will not be treated as described in paragraphs (9) or (17) of section 501(c) unless the organization or trust notifies the Internal Revenue Service in the manner and within the time prescribed in these regulations that it is claiming exemption under the particular section. The type of notice, the manner for filing that notice, and the additional information required is the same as that set forth in Q&A–3 through Q&A–5 for new organizations.

Q–10: When must the required notice be filed by an organization or trust organized on or before July 18, 1984?

A–10: An organization or trust organized on or before July 18, 1984, that claims exempt status as an organization described in section 501(c) (9) or (17), must file the required notice before February 4, 1987. An extension of time for filing the required notice may be granted by the district director if the request is submitted before the due date of the notice and it is demonstrated that additional time is needed.

Q–11: What is the effective date of exemption for an organization or trust organized on or before July 18, 1984, that has submitted the required notice?

A–11: If the required notice is filed within the time provided by these regulations, the organization's exemption will be recognized retroactively to the date the organization was organized, provided its purpose, organization and operation (including compliance with the applicable nondiscrimination requirements) during the period prior to the date of the determination letter are in accordance with the applicable law. If, on the other hand, the required notice is filed after the time provided by these regulations, exemption will be recognized only for the period after the notice is received by the Internal Revenue Service. See Q&A–7 for a further discussion of *date of filing.* See also Q&A–8 for the effect on exemption of a notice that has been timely filed but is incomplete.

EXCEPTIONS TO NOTICE REQUIREMENT

Q–12: Are any organizations or trusts claiming recognition of exemption as an organization described in section 501(c) (9) or (17) excepted from the notice requirement of section 505(c)?

A–12: An organization or trust that has previously notified the Internal Revenue Service of its claim to exemption by filing Form 1024 is not required, under section 505(c), to renotify the Service. Thus, an organization that has filed a Form 1024 that is pending with the Service need not refile that form. Also, an organization that has received a ruling or determination letter from the Service recognizing its exemption from taxation need not submit the notification required by section 505(c).

[T.D. 8073, 51 FR 4330, Feb. 4, 1986]

EXEMPT ORGANIZATIONS

PRIVATE FOUNDATIONS

§1.507–1 General rule.

(a) *In general.* Except as provided in §1.507–2, the status of any organization as a private foundation shall be terminated only if:

(1) Such organization notifies the district director of its intent to accomplish such termination, or

(2)(i) With respect to such organization, there have been either willful repeated acts (or failures to act), or a willful and flagrant act (or failure to act), giving rise to liability for tax under chapter 42, and

(ii) The Commissioner notifies such organization that, by reason of subdivision (i) of this subparagraph, such organization is liable for the tax imposed by section 507(c),

and either such organization pays the tax imposed by section 507(c) (or any portion not abated under section 507(g)) or the entire amount of such tax is abated under section 507(g).

(b) *Termination under section 507(a)(1).* (1) In order to terminate its private foundation status under paragraph (a)(1) of this section, an organization must submit a statement to the district director of its intent to terminate its private foundation status under section 507(a)(1). Such statement must set forth in detail the computation and amount of tax imposed under section 507(c). Unless the organization requests abatement of such tax pursuant to section 507(g), full payment of such tax must be made at the time the statement is filed under section 507(a)(1). An organization may request the abatement of all of the tax imposed under section 507(c), or may pay any part thereof and request abatement of the unpaid portion of the amount of tax assessed. If the organization requests abatement of the tax imposed under section 507(c) and such request is denied, the organization must pay such tax in full upon notification by the Internal Revenue Service that such tax will not be abated. For purposes of subtitle F of the Code, the statement described in this subparagraph, once filed, shall be treated as a return.

(2) Termination of private foundation status under section 507(a)(1) does not relieve a private foundation, or any disqualified person with respect thereto, of liability for tax under chapter 42 with respect to acts or failures to act prior to termination or for any additional taxes imposed for failure to correct such acts or failures to act. See subparagraph (8) of this paragraph as to the possible imposition of transferee liability in cases not involving termination of private foundation status.

(3) In the case of an organization which has terminated its private foundation status under section 507(a) and continues in operation thereafter, if such organization wishes to be treated as described in section 501(c)(3), then pursuant to section 509(c) and § 1.509(c)–1 such organization must apply for recognition of exemption as an organization described in section 501(c)(3) in accordance with the provisions of section 508(a).

(4) See § 53.4947–1(c)(7) of this chapter as to the application of section 507(a) to certain split-interest trusts.

(5) For purposes of section 508(d)(1), the Internal Revenue Service shall make notice to the public (such as by publication in the Internal Revenue Bulletin) of any notice received from a private foundation pursuant to section 507(a)(1) or of any notice given to a private foundation pursuant to section 507(a)(2).

(6) If a private foundation transfers all or part of its assets to one or more other private foundations (or one or more private foundations and one or more section 509(a) (1), (2), (3), or (4) organizations) pursuant to a transfer described in section 507(b)(2) and § 1.507–3(c), such transferor foundation will not have terminated its private foundation status under section 507(a)(1). See § 1.507–3, however, for the special rules applicable to private foundations participating in section 507(b)(2) transfers.

(7) Neither a transfer of all of the assets of a private foundation nor a significant disposition of assets (as defined in § 1.507–3(c)(2)) by a private foundation (whether or not any portion of such significant disposition of assets is made to another private foundation) shall be deemed to result in a termination of the transferor private foundation under section 507(a) unless the transferor private foundation elects to terminate pursuant to section 507(a)(1) or section 507(a)(2) is applicable. Thus, if a private foundation transfers all of its assets to one or more persons, but less than all of its net assets to one or more organizations described in section 509(a)(1) which have been in existence and so described for a continuous period of 60 calendar months, for purposes of this paragraph such transferor foundation will not be deemed by reason of such transfer to have terminated its private foundation status under section 507 (a) or (b) unless section 507(a)(2) is applicable. Such foundation

will continue to be treated as a private foundation for all purposes. For example, if a private foundation transfers all of its net assets to a section 509(a)(2) organization in 1971 and receives a bequest in 1973, the bequest will be regarded as having been made to a private foundation and the foundation will be subject to the provisions of chapter 42 with respect to such funds. If a private foundation makes a transfer of all of its net assets to a section 509(a) (2) or (3) organization, for example, it must retain sufficient income or assets to pay the tax imposed under section 4940 for that portion of its taxable year prior to such transfer. For additional rules applicable to a transfer by a private foundation of all of its net assets to a section 509(a)(1) organization which has not been in existence and so described for a continuous period of 60 calendar months, see §1.507–3(e).

(8) If a private foundation makes a transfer described in subparagraph (7) of this paragraph and prior to, or in connection with, such transfer, liability for any tax under chapter 42 is incurred by the transferor foundation, transferee liability may be applied against the transferee organization for payment of such taxes. For purposes of this subparagraph, liability for any tax imposed under chapter 42 for failure to correct any act or failure to act shall be deemed incurred on the date on which the act or failure to act giving rise to the initial tax liability occurred.

(9) A private foundation which transfers all of its net assets is required to file the annual information return required by section 6033, and the foundation managers are required to file the annual report of a private foundation required by section 6056, for the taxable year in which such transfer occurs. However, neither such foundation nor its foundation managers will be required to file such returns for any taxable year following the taxable year in which the last of any such transfers occurred, if at no time during the subsequent taxable years in question the foundation has either legal or equitable title to any assets or engages in any activity.

(c) *Involuntary termination under section 507(a)(2).* (1) For purposes of section 507(a)(2)(A), the term *willful repeated acts (or failures to act)* means at least two acts or failures to act both of which are voluntary, conscious, and intentional.

(2) For purposes of section 507(a)(2)(A), a *willful and flagrant act (or failure to act)* is one which is voluntarily, consciously, and knowingly committed in violation of any provision of chapter 42 (other than section 4940 or 4948(a)) and which appears to a reasonable man to be a gross violation of any such provision.

(3) An act (or failure to act) may be treated as an act (or failure to act) by the private foundation for purposes of section 507(a)(2) even though tax is imposed upon one or more foundation managers rather than upon the foundation itself.

(4) For purposes of section 507(a)(2), the failure to correct the act or acts (or failure or failures to act) which gave rise to liability for tax under any section of chapter 42 by the close of the correction period for such section may be a willful and flagrant act (or failure to act).

(5) No motive to avoid the restrictions of the law or the incurrence of any tax is necessary to make an act (or failure to act) willful. However, a foundation's act (or failure to act) is not willful if the foundation (or a foundation manager, if applicable) does not know that it is an act of self-dealing, a taxable expenditure, or other act (or failure to act) to which chapter 42 applies. Rules similar to the regulations under chapter 42 (see, for example, §53.4945–1(a)(2)(iii) of this chapter) shall apply in determining whether a foundation or a foundation manager *knows* that an act (or failure to act) is an act of self-dealing a taxable expenditure or other such act (or failure to act).

[T.D. 7233, 37 FR 28157, Dec. 21, 1972, as amended by T.D. 7290, 38 FR 31833, Nov. 19, 1973]

§1.507–2 Special rules; transfer to, or operation as, public charity.

(a) *Transfer to public charities*—(1) *General rule.* Under section 507(b)(1)(A) a private foundation, with respect to which there have not been either willful repeated acts (or failures to act) or a willful and flagrant act (or failure to act) giving rise to liability for tax under chapter 42, may terminate its private foundation status by distributing all of its net assets to one or more organizations described in section 170(b)(1)(A) (other than in clauses (vii) and (viii)) each of which has been in existence and so described for a continuous period of at least 60 calendar months immediately preceding such distribution. Since section 507(a) does not apply to such a termination, a private foundation which makes such a termination is not required to give the notification described in section 507(a)(1). A private foundation which terminates its private foundation status under section 507(b)(1)(A) does not incur tax under section 507(c) and, therefore, no abatement of such tax under section 507(g) is required.

(2) *Effect of current ruling*—(i) *Distributions before final regulations.* With respect to distributions made before (insert day after the date these regulations are filed by the Office of the Federal Register), an organization to which a distribution of net assets is made will qualify as an organization *described in section 170(b)(1)(A) (other than clauses (vii) and (viii))* for purposes of meeting the requirements of section 507(b)(1)(A) without a further showing if such distributee organization:

(A) Has been in existence for a continuous period of at least 60 calendar months preceding the distribution described in subparagraph (1) of this paragraph;

(B) Has received a ruling or determination letter that it is an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1) (A);

(C) The facts and circumstances forming the basis for the issuance of the ruling have not substantially changed during the 60-month period referred to in (A) of this subdivision; and

(D) The ruling or determination letter referred to in (B) of this subdivision has not been revoked expressly or by a subsequent change of the law or regulations under which the ruling was issued.

(ii) *Distributions after final regulations.* With respect to distributions made after December 29, 1972, a private foundation seeking to terminate its private foundation status pursuant to section 507(b)(1)(A) may rely on a ruling or determination letter issued to a potential distributee organization that such distributee organization is an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1)(A) in accordance with the provisions of § 1.509(a)–7.

(3) *Organizations described in more than one clause of section 170(b)(1)(A).* For purposes of this paragraph and section 507(b)(1)(A), the parenthetical term *other than in clauses (vii) and (viii)* shall refer only to an organization which is described only in section 170(b)(1)(A) (vii) or (viii). Thus, an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1)(A) will not be precluded from being a distributee described in section 507(b)(1)(A) merely because it also appears to meet the description of an organization described in section 170(b)(1)(A) (vii) or (viii).

(4) *Applicability of chapter 42 to foundations terminating under section 507(b)(1)(A).* Except as provided in subparagraph (5) of this paragraph, an organization which terminates its private foundation status pursuant to section 507(b)(1)(A) will remain subject to the provisions of chapter 42 until the distribution of all of its net assets to distributee organizations described in section 507(b)(1)(A) has been completed.

(5) *Special transitional rule.* (i) Section 4940(a) imposes a tax upon private foundations with respect to the carrying on of activities for each taxable year. For purposes of section 4940, an organization which terminates its private foundation status under section 507(b)(1)(A) by the end of the period described in subdivision (ii) of this subparagraph will not be considered as carrying on activities within the meaning of section 4940 during such period. Such organization will therefore not be subject to the tax imposed under section 4940(a) for such period.

(ii) The period referred to in subdivision (i) of this subparagraph is the 12-month period beginning with the first day of the organization's first taxable year which begins after December 31, 1969, but such period shall not be treated as ending before February 20, 1973. In the case of a private foundation distributing assets pursuant to section 507(b)(1)(A) to a medical research organization or a community trust (or in the case of a private foundation seeking to terminate into such an organization or trust pursuant to section 507(b)(1)(B)), the period described in this subdivision shall not be treated as ending before:

(A) In the case of a distribution to a medical research organization, March 29, 1976; or

(B) In the case of a community trust, May 11, 1977.

(iii) If the period described in subdivision (ii) of this subparagraph has not expired prior to the due date for the organization's annual return required to be filed by section 6033 or 6012 (determined with regard to any extension of time for filing the return) for its first taxable year which begins after December 31, 1969 (or for any other taxable year ending before the expiration of the period referred to in subdivision (ii) of this subparagraph), and if the organization has not terminated its private foundation status under section 507(b)(1)(A) by such date, then notwithstanding the provisions of subdivision (ii) of this subparagraph, the organization must take either of the following courses of action:

(A) Complete and file its annual return, including the line relating to excise taxes on investment income, by such date, and pay the tax on investment income imposed under section 4940 at the time it files its annual return. If such organization subsequently terminates its private foundation status under section 507(b)(1)(A) within the period specified in subdivision (ii) of this subparagraph, it may file a claim for refund of the tax paid under section 4940; or

(B) Complete and file its annual return, except for the line relating to excise taxes on investment income, by such date, and, in lieu of paying the tax on investment income imposed under section 4940, file a statement with its annual return which establishes that the organization has taken affirmative action by such date to terminate its private foundation status under section 507(b)(1)(A). Such statement must indicate the type of affirmative action taken and explain how such action will result in the termination of its private foundation status under section 507(b)(1)(A). Such affirmative action may include making application to the appropriate State court for approval of the distribution of all net assets pursuant to section 507(b)(1)(A) in the case of a charitable trust, or the passage of a resolution by the organization's governing body directing the distribution of all net assets pursuant to section 507(b)(1)(A) in the case of a not-for-profit corporation. A written commitment or letter of agreement by the trustee or governing body to one or more section 509(a)(1) distributees indicating an intent to distribute all of the organization's net assets to such distributees will also constitute appropriate affirmative action for purposes of this subdivision. An organization may take such affirmative action and may terminate its private foundation status under section 507(b)(1)(A) in reliance upon 26 CFR 13.12 (rev. as of Jan. 1, 1972) and upon the provisions of the notices of proposed rule making under sections 170(b)(1)(A), 507(b)(1), and 509. Thus, if a distributee organization meets the requirements of the provisions of the notices of proposed rule- making under sections 170(b)(1)(A), 507, or 509 as a distributee under section 507(b)(1)(A), the distributor organization may terminate its private foundation status under section 507(b)(1)(A) in reliance upon such provisions prior to the expiration of the period described in subdivision (ii) of this subparagraph. If such organization, however, fails to terminate its private foundation status under section 507(b)(1)(A) within the period specified in subdivision (ii) of this subparagraph by failing to meet the requirements of either the notices of proposed rulemaking under section 170(b)(1)(A), 507(b)(1), or 509 or the final regulations published under these Code sections, the tax imposed under section 4940 shall be treated as if due from the due date for its annual return (determined without regard to any extension of time for filing its return).

(6) *Return required from organizations terminating private foundation status*

under section 507(b)(1)(A). (i) An organization which terminates its private foundation status under section 507(b)(1)(A) is required to file a return under the provisions of section 6043(b), rather than under the provisions of section 6050.

(ii) An organization which terminates its private foundation status under section 507(b)(1)(A) is not required to comply with section 6104(d) for the taxable year in which such termination occurs. For purposes of this subdivision, the term *taxable year* shall include the period described in subparagraph (5)(ii) of this paragraph.

(7) *Distribution of net assets.* A private foundation will meet the requirement that it *distribute all of its net assets* within the meaning of section 507(b)(1)(A) only if it transfers all of its right, title, and interest in and to all of its net assets to one or more organizations referred to in section 507(b)(1)(A).

(8) *Effect of restrictions and conditions upon distributions of net assets*— (i) *In general.* In order to effectuate a transfer of *all of its right title and interest in and to all of its net assets* within the meaning of paragraph (a)(7) of this section, a transferor private foundation may not impose any material restriction or condition that prevents the transferee organization referred to in section 507(b)(1)(A) (herein sometimes referred to as the *public charity*) from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes. Whether or not a particular condition or restriction imposed upon a transfer of assets is *material* (within the meaning of paragraph (a)(8) of this section) must be determined from all of the facts and circumstances of the transfer. Some of the more significant facts and circumstances to be considered in making such a determination are:

(A) Whether the public charity (including a participating trustee, custodian, or agent in the case of a community trust) is the owner in fee of the assets it receives from the private foundation;

(B) Whether such assets are to be held and administered by the public charity in a manner consistent with one or more of its exempt purposes;

(C) Whether the governing body of the public charity has the ultimate authority and control over such assets, and the income derived therefrom; and

(D) Whether, and to what extent, the governing body of the public charity is organized and operated so as to be independent from the transferor.

(ii) *Independent governing body.* As provided in paragraph (a)(8)(i)(D) of this section, one of the more significant facts and circumstances to be considered in making the determination whether a particular condition or restriction imposed upon a transfer of assets is *material* within the meaning of paragraph (a)(8) of this section is whether, and the extent to which, the governing body is organized and operated so as to be independent from the transferor. In turn, the determination as to such factor must be determined from all of the facts and circumstances. Some of the more significant facts and circumstances to be considered in making such a determination are:

(A) Whether, and to what extent, members of the governing body are comprised of persons selected by the transferor private foundation or disqualified persons with respect thereto, or are themselves such disqualified persons;

(B) Whether, and to what extent, members of the governing body are selected by public officials acting in their capacities as such; and

(C) How long a period of time each member of the governing body may serve as such. In the case of a transfer that is a community trust, the community trust shall meet paragraph (a)(8)(ii)(C) of this section if it meets the requirements of § 1.170A–9(e)(13)(iv) (other than § 1.170A–9(e)(13)(iv) (C) or (D)), relating to rules for governing body.

(iii) *Factors not adversely affecting determination.* The presence of some or all of the following factors will not be considered as preventing the transferee *from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes* (within the meaning of paragraph (a)(8)(i) of this section):

(A) *Name.* The fund is given a name or other designation which is the same as or similar to that of the transferor private foundation or otherwise memorializes the creator of the foundation or his family.

(B) *Purpose.* The income and assets of the fund are to be used for a designated purpose or for one or more particular section 509(a) (1), (2), or (3) organizations, and such use is consistent with the charitable, educational, or other basis for the exempt status of the public charity under section 501(c)(3).

(C) *Administration.* The transferred assets are administered in an identifiable or separate fund, some or all of the principal of which is not to be distributed for a specified period, if the public charity (including a participating trustee, custodian, or agent in the case of a community trust) is the legal and equitable owner of the fund and the governing body exercises ultimate and direct authority and control over such fund, as, for example, a fund to endow a chair at a university or a medical research fund at a hospital. In the case of a community trust, the transferred assets must be administered in or as a component part of the community trust within the meaning of §1.170A–9(e)(11).

(D) *Restrictions on disposition.* The transferor private foundation transfers property the continued retention of which by the transferee is required by the transferor if such retention is important to the achievement of charitable or other similar purposes in the community because of the peculiar features of such property, as, for example, where a private foundation transfers a woodland preserve which is to be maintained by the public charity as an arboretum for the benefit of the community. Such a restriction does not include a restriction on the disposition of an investment asset or the distribution of income.

(iv) *Adverse factors.* The presence of any of the following factors will be considered as preventing the transferee *from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes* (within the meaning of paragraph (a)(8)(i) of this section):

(A) *Distributions. (1)* With respect to distributions made after April 19, 1977, the transferor private foundation, a disqualified person with respect thereto, or any person or committee designated by, or pursuant to the terms of an agreement with, such a person (hereinafter referred to as *donor*), reserves the right, directly or indirectly, to name (other than by designation in the instrument of transfer of particular section 509(a) (1), (2), or (3) organizations) the persons to which the transferee public charity must distribute, or to direct the timing of such distributions (other than by direction in the instrument of transfer that some or all of the principal, as opposed to specific assets, not be distributed for a specified period) as, for example, by a power of appointment. The Internal Revenue Service will examine carefully whether the seeking of advice by the transferee from, or the giving of advice by, any donor after the assets have been transferred to the transferee constitutes an indirect reservation of a right to direct such distributions. In any such case, the reservation of such a right will be considered to exist where the only criterion considered by the public charity in making a distribution of income or principal from a donor's fund is advice offered by the donor. Whether there is a reservation of such a right will be determined from all of the facts and circumstances, including, but not limited to, the facts contained in paragraph (a)(8)(iv)(A) (*2*) and (*3*) of this section.

(*2*) The presence of some or all of the following factors will indicate that the reservation of such a right does not exist:

(*i*) There has been an independent investigation by the staff of the public charity evaluating whether the donor's advice is consistent with specific charitable needs most deserving of support by the public charity (as determined by the public charity);

(*ii*) The public charity has promulgated guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity and the donor's advice is consistent with such guidelines;

(*iii*) The public charity has instituted an educational program publicizing to donors and other persons the guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity;

(*iv*) The public charity distributes funds in excess of amounts distributed from the donor's fund to the same or similar types of organizations or charitable needs as those recommended by the donor; and

(*v*) The public charity's solicitations (written or oral) for funds specifically state that such public charity will not be bound by advice offered by the donor.

(*3*) The presence of some or all of the following factors will indicate the reservation of such a right does exist:

(*i*) The solicitations (written or oral) of funds by the public charity state or imply, or a pattern of conduct on the part of the public charity creates an expectation, that the donor's advice will be followed;

(*ii*) The advice of a donor (whether or not restricted to a distribution of income or principal from the donor's trust or fund) is limited to distributions of amounts from the donor's fund, and the factors described in paragraph (a)(8)(iv)(A)(2) or (*i*) or (*ii*) of this section are not present;

(*iii*) Only the advice of the donor as to distributions of such donor's fund is solicited by the public charity and no procedure is provided for considering advice from persons other than the donor with respect to such fund; and

(*iv*) For the taxable year and all prior taxable years the public charity follows the advice of all donors with respect to their funds substantially all of the time.

(B) *Other action or withholding of action.* The terms of the transfer agreement, or any expressed or implied understanding, required the public charity to take or withhold action with respect to the transferred assets which is not designed to further one or more of the exempt purposes of the public charity, and such action or withholding of action would, if performed by the transferor private foundation with respect to such assets, have subjected the transferor to tax under chapter 42 (other than with respect to the minimum investment return requirement of section 4942(e)).

(C) *Assumption of leases, etc.* The public charity assumes leases, contractural obligations, or liabilities of the transferor private foundation, or takes the assets thereof subject to such liabilities (including obligations under commitments or pledges to donees of the transferor private foundation), for purposes inconsistent with the purposes or best interests of the public charity, other than the payment of the transferor's chapter 42 taxes incurred prior to the transfer to the public charity to the extent of the value of the assets transferred.

(D) *Retention of investment assets.* The transferee public charity is required by any restriction or agreement (other than a restriction or agreement imposed or required by law or regulatory authority), express or implied, to retain any securities or other investment assets transferred to it by the private foundation. In a case where such transferred assets consistently produce a low annual return of income, the Internal Revenue Service will examine carefully whether the transferee is required by any such restriction or agreement to retain such assets.

(E) *Right of first refusal.* An agreement is entered into in connection with the transfer of securities or other property which grants directly or indirectly to the transferor private foundation or any disqualified person with respect thereto a right of first refusal with respect to the transferred securities or other property when and if disposed of by the public charity, unless such securities or other property was acquired by the transferor private foundation subject to such right of first refusal prior to October 9, 1969.

(F) *Relationships.* An agreement is entered into between the transferor private foundation and the transferee public charity which establishes irrevocable relationships with respect to the maintenance or management of assets transferred to the public charity, such as continuing relationships with banks, brokerage firms, investment counselors, or other advisors with regard to the investments or other property transferred to the public charity (other than a relationship with a trustee, custodian, or agent for a community trust acting as such). The transfer of property to a public charity subject to contractual obligations which were established prior to November 11, 1976 between the transferor private foundation and persons other than disqualified persons with respect to such foundation will not be treated as prohibited under the preceding sentence, but only if such contractual obligations were not entered into pursuant to a plan to terminate the private foundation status of the transferor under section 507(b)(1)(A) and if the continuation of such contractual obligations is in the best interests of the public charity.

(G) *Other conditions.* Any other condition is imposed on action by the public charity which prevents it from exercising ultimate control over the assets received from the transferor private foundation for purposes consistent with its exempt purposes.

(v) *Examples.* The provisions of paragraph (a)(8) of this sectiom may be illustrated by the following examples:

Example 1. The M Private Foundation transferred all of its net assets to the V Cancer Institute, a public charity described in section 170(b)(1)(A)(iii). Prior to the transfer, M's activities consisted of making grants to hospitals and universities to further research into the causes of cancer. Under the terms of the transfer, V is required to keep M's assets in a separate fund and use the income and principal to further cancer research. Although the assets may be used only for a limited purpose, this purpose is consistent with and in furtherance of V's exempt purposes, and does not prevent the transfer from being a distribution for purposes of section 507(b)(1)(A).

Example 2. The N Private Foundation transferred all of its net assets to W University, a public charity described in section 170(b)(1)(A)(ii). Under the terms of the transfer, W is required to use the income and principal to endow a chair at the university to be known as the ''John J. Doe Memorial Professorship'', named after N's creator. Although the transferred assets are to be used for a specified purpose by W, this purpose is in furtherance of W's exempt educational purposes, and there are no conditions on investment or reinvestment of the principal or income. The use of the name of the foundation's creator for the chair is not a restriction which would prevent the transfer from being a distribution for purposes of section 507(b)(1)(A).

Example 3. The O Private Foundation transferred all of its net assets to X Bank as trustee for the P Community Trust, a community trust which is a public charity described in section 170(b)(1)(A)(vi). Under the terms of the transfer, X is to hold the assets in trust for P and is directed to distribute the income annually to the Y Church, a public charity described in Section 170(b)(1)(A)(i). The distribution of income to Y Church is consistent with P's exempt purposes. If the trust created by this transfer otherwise meets the requirements of §1.170A–9(e)(11) as a component part of P Community Trust, and assets transferred by O to X will be treated as distributed to one or more public charities within the meaning of section 507(b)(1)(A). The direction to distribute the income to Y Church meets the conditions of paragraph (a)(8)(iii)(B) of this section and will therefore not disqualify the transfer under section 507(b)(1)(A).

Example 4. The U Private Foundation transferred all of its net assets to Z Bank as trustee for the R Community Trust, a community trust which is a public charity described in section 170(b)(1)(A)(vi). Under the terms of the transfer, Z is to hold the assets in trust for R and distribute the income to those public charities described in section 170(b)(1)(A) (i) through (vi) that are designated by B, the creator of U. R's governing body has no authority during B's lifetime to vary B's direction. Under the terms of the transfer, it is intended that Z retain the transferred assets in their present form for a period of 20 years, or until the date of B's death if it occurs before the expiration of such period. Upon the death of B, R will have the power to distribute the income to such public charities as it selects and may dispose of the corpus as it sees fit.

Under paragraph (a)(8)(iv) (A) or (D) of this section, as a result of the restrictions imposed with respect to the transferred assets, there has been no distribution of all U's net assets within the meaning of section 507(b)(1)(A) at the time of the transfer. In addition, U has not transferred its net assets to a component part of R Community Trust, but rather to a separate trust described in §1.170A–9(e)(14).

(vi) *Transitional rule.* If the governing instrument of the public charity (or an instrument of transfer) lacks the factors described in paragraph (a)(8)(i)(D) or (ii) of this section, but with respect to gifts or bequests acquired before January 1, 1982, the public charity changes its governing instrument (or instrument of transfer) by the later of November 11, 1977, or one year after the gift or bequest is acquired, in order to conform such instrument to such provisions, then such an instrument shall be treated as consistent with such provisions for taxable years beginning prior to the date of change. In addition, if prior to the later of such dates, the organization has instituted court proceedings in order to conform such an instrument, then it may apply (prior to the later of such dates) for an extension of the period to conform such instrument to such provisions. Such application shall be made to the Commissioner of Internal Revenue, Attention E:EO, Washington, DC 20224. The Commissioner, at the Commissioner's discretion, may grant such an extension, if in the Commissioner's opinion such a change will conform the instrument to such provisions, and the change will be made within a reasonable time.

(b) *Operation as a public charity*— (1) *In general.* Under section 507(b)(1)(B) an organization can terminate its private foundation status if the organization:

(i) Meets the requirements of section 509(a) (1), (2), or (3) by the end of the 12-month period (as extended by paragraph (c)(3)(i) of this section) beginning with its first taxable year which begins after December 31, 1969, or for a continuous period of 60 calendar months beginning with the first day of any taxable year which begins after December 31, 1969;

(ii) In compliance with section 507(b)(1)(B)(ii) and subparagraph (3) of this paragraph, properly notifies the district director before the commencement of such 12-month or 60-month period or before March 29, 1973 that it is terminating its private foundation status; and

(iii) Properly establishes immediately after the expiration of such 12-month or 60-month period that such organization has complied with the requirements of section 509(a) (1), (2), or (3) by the end of the 12-month period or during the 60-month period, as the case may be, in the manner described in subparagraph (4) of this paragraph.

(2) *Relationship of section 507(b)(1)(B) to section 507 (a), (c), and (g).* Since section 507(a) does not apply to a termination described in section 507(b)(1)(B), a private foundation's notification that it is commencing a termination pursuant to section 507(b)(1)(B) will not be treated as a notification described in section 507(a) even if the private foundation does not successfully terminate its private foundation status pursuant to section 507(b)(1)(B). A private foundation which terminates its private foundation status under section 507(b)(1)(B) does not incur tax under section 507(c) and, therefore, no abatement of such tax under section 507(g) is required.

(3) *Notification of termination.* In order to comply with the requirements under section 507(b)(1)(B)(ii), an organization shall before the commencement of the 12-month or 60-month period under section 507(b)(1)(B)(i) (or before March 29, 1973) or, in the case of the 12-month period for a community trust, before May 11, 1977, notify the district director of its intention to terminate its private foundation status.

Such notification shall contain the following information:

(i) The name and address of the private foundation;

(ii) Its intention to terminate its private foundation status;

(iii) Whether the 12-month or 60-month period shall apply;

(iv) The Code section under which it seeks classification (section 509(a) (1), (2), or (3));

(v) If section 509(a)(1) is applicable, the clause of section 170(b)(1)(A) involved;

(vi) The date its regular taxable year begins; and

(vii) The date of commencement of the 12-month or 60-month period.

(4) *Establishment of termination.* In order to comply with the requirements under section 507(b)(1)(B)(iii), an organization shall within 90 days after the expiration of the 12-month or 60-month period, file such information with the district director as is necessary to make a determination as to the organization's status as an organization described under section 509(a) (1), (2), or (3) and the regulations thereunder. See paragraphs (c) and (d) of this section as to the information required to be submitted under this subparagraph.

(5) *Incomplete information; 12- and 60-month terminations.* The failure to supply, within the required time, all of the information required by subparagraph (3) or (4) of this paragraph is not alone sufficient to constitute a failure to satisfy the requirements of section 507(b)(1)(B). If the information which is submitted within the required time is

incomplete and the organization supplies the necessary additional information at the request of the Commissioner within the additional time period allowed by him, the original submission will be considered timely.

(6) *Application of special rules and filing requirements.* An organization which has terminated its private foundation status under section 507(b)(1)(B) is not required to comply with the special rules set forth in section 508 (a) and (b). Such organization is also not required to file a return under the provisions of section 6043(b) or 6050 by reason of termination of its private foundation status under the provisions of section 507(b)(1)(B).

(7) *Extension of time to assess deficiencies.* If a private foundation files a notification (described in subparagraph (3) of this paragraph) that it intends to begin a 60-month termination pursuant to section 507(b)(1)(B) and does not file a request for an advance ruling pursuant to paragraph (e) of this section, such private foundation may file with the notification described in subparagraph (3) of this paragraph a consent under section 6501(c)(4) to the effect that the period of limitation upon assessment under section 4940 for any taxable year within the 60-month termination period shall not expire prior to 1 year after the date of the expiration of the time prescribed by law for the assessment of a deficiency for the last taxable year within the 60-month period. Such consents, if filed, will ordinarily be accepted by the Commissioner. See paragraph (f)(3) of this section for an illustration of the procedure required to obtain a refund of the tax imposed by section 4940 in a case where such a consent is not in effect.

(c) *Twelve-month terminations*—(1) *Method of determining normal sources of support*—(i) *In general.* The 12-month termination provisions of section 507(b)(1)(B) permit a private foundation to terminate its private foundation status by changing its organizational structure, its operations, the sources of its support, or any combination thereof, in order to conform to the requirements of section 509(a) (1), (2), or (3) by the end of the 12-month period.

(ii) *Support requirements for 12-month termination under section 170(b)(1)(A)(vi).* A private foundation attempting to meet the requirements of section 509(a)(1) as an organization described in section 170(b)(1)(A)(vi) will be considered *normally* to receive a substantial part of its support from governmental units or direct or indirect contributions from the general public if it can establish that it has changed the sources of its support before the close of the 12-month period to those of an organization described in section 170(b)(1)(A)(vi) and it can reasonably be expected to maintain its publicly supported status for subsequent years. In order to establish these facts, an organization shall submit all information sufficient to make a determination under §1.170A–9(e) as if such provisions applied, including a description of all organizational and operational changes which have occurred during the 12-month period. It shall also submit detailed information with respect to its sources of support for the 12-month period, as well as for the four taxable years immediately preceding the 12-month period. In applying the tests contained in §1.170A–9(e), however, data from periods preceding the 12-month period shall be disregarded except for purposes of determining whether the organization has effectively changed its sources of support and whether it can reasonably be expected to maintain such publicly supported status for subsequent years. Thus, for example, in applying the mathematical tests of §1.170A–9(e) only data for the 12-month period may enter into the computation.

(iii) *Support requirements for 12-month terminations under section 170(b)(1)(A)(iv).* Section 170(b)(1) (A)(iv) describes an organization which *normally* receives a substantial part of its support (exclusive of income from related activities) from the United States or any State or political subdivision thereof, or from the general public, and which is organized and operated exclusively to receive, hold, invest, and administer property and to make expenditures to or for the benefit of certain colleges or universities. For purposes of the 12-month termination period, the rule set forth in subdivision (ii) of this subparagraph with respect to section 170(b)(1)(A)(vi) organizations shall be applicable in determining whether an organization *normally* receives a substantial part of its support from the sources required under section 170(b)(1)(A)(iv).

(iv) *Support requirements for 12-month terminations under section 509(a)(2).* An organization attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 509(a)(2) by the end of the 12-month period will be considered as *normally* receiving its support in compliance with the one-third support requirements of section 509(a)(2) if:

(A) For the 12-month period under section 507(b)(1)(B), the organization receives more than one-third of its support from gifts, grants, contributions, membership fees, and gross receipts from related activities (as limited by section 509(a)(2)(A)(ii)) and not more than one-third of its support from items described in section 509 (a)(2)(B), and

(B) The organization can establish that it can reasonably be expected to maintain its continued public support for subsequent years. In order to establish a reasonable expectation of continued public support, an organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, and any changes in its foundation managers (as defined in section 4946(b)(1)). Duplicate copies of its governing instrument and bylaws, with an indication of any amendments made, and detailed information with respect to its sources of support for the 4 taxable years immediately preceding the 12-month period shall also be submitted as part of the evidence that the organization can reasonably be expected to maintain its publicly supported status.

(2) *Organizational and operational tests*—(i) *Section 509(a)(3) organizations*—(A) *In general.* An organization attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 509(a)(3) by the end of the 12-month period is required to meet the organizational and operational test of section 509(a)(3)(A), in addition to the requirements of section 509(a)(3) (B) and (C), by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969. An organization may qualify under section 509(a)(3)(A) even though its original governing instrument did not limit its purposes to those set forth in section 509(a)(3)(A) and even though it operated for some other purpose before the end of the 12-month period, if it has amended its governing instrument and changed its operations to conform to the requirements of section 509(a)(3) by the end of the 12-month period.

(B) *Proof of changed status.* In order to establish that an organization described in (A) of this subdivision will continue to be operated exclusively for the required purposes in years subsequent to the end of the 12-month period, such organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, any changes in foundation managers (as defined in section 4946(b)(1)), and duplicate copies of its governing instrument and bylaws, with an indication of any amendments made. A detailed statement of the relationship between such organization and the specified organizations described in section 509(a) (1) or (2) (as required by section 509(a)(3) (A) and (B)) and all pertinent information to establish that the organization does not violate the control requirements of section 509(a)(3)(C) shall also be submitted.

(ii) *Section 509(a)(1) organizations other than those described in section 170(b)(1)(A)(vi)*—

(A) *In general.* An organization attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 170(b)(1)(A) (i), (ii), (iii), (iv), or (v) by the end of the 12-month period is required to be operated as an organization described in clauses (i), (ii), (iii), (iv), or (v) of section 170(b)(1)(A) by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969.

(B) *Proof of changed status.* In order to establish that it will continue to be operated as an organization described in section 509(a)(1) in years subsequent to the end of the 12-month period, the organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, and any changes in its foundation managers (as defined in section 4946(b)(1)). Duplicate copies of its governing instrument and bylaws, with an indication of any amendments made, and its financial statements for the 4-taxable years immediately preceding the 12-month period shall also be submitted as evidence that the organization can reasonably be expected to maintain its status as an organization described in section 170(b)(1)(A)(i), (ii), (iii), (iv), or (v).

(3) *Extensions of the 12-month period.* (i) For purposes of this section, an organization may accomplish a 12-month termination if it meets the requirements of section 507(b)(1)(B) and this paragraph for such a termination with respect to any of the following periods:

(A) The 12-month period beginning with the organization's first taxable year which begins after December 31, 1969;

(B) The period described in paragraph (a)(5)(ii) of this section; or

(C) Any period consisting of two or more taxable years beginning with the organization's first taxable year beginning after December 31, 1969, and ending with any taxable year ending before the end of the period described in paragraph (a)(5)(ii) of this section.

(ii) An organization will be considered as ''normally'' meeting the requirements of section 170(b)(1)(A) (iv) or (vi) or 509(a)(2), as the case may be, if it meets the requirements of such provision with respect to any period described in subdivision (i) (A), (B), or (C) of this subparagraph. Thus, for example, an organization on a calendar year basis which seeks to convert to a section 509(a)(2) organization under section 507(b)(1)(B) may meet the one-third support requirement based on the aggregate support received during a period described in subdivision (i) (A), (B), or (C) of this subparagraph, for purposes of subparagraph (1)(iv) of this paragraph.

(4) *Status of organization subsequent to the 12-month period.* For purposes of sections 507 through 509, an organization, the status of which as a private foundation is terminated under section 507(b)(1), shall (except as provided in paragraph (b)(6) of this section) be treated as an organization created on the day after the date of such termination. However, termination of private foundation status under the provisions of section 507(b)(1)(B) is based upon an organization's submission of information establishing compliance by the end of the 12-month period with the requirements of subparagraph (1) or (2) of this paragraph. Therefore, if in the 4 taxable years immediately following the end of the 12-month period, the sources of support or the methods of operation of the organization are materially different from the facts and circumstances presented during the 12-month period upon which the determination under section 507(b)(1)(B)(iii) was made (and such material difference adversely affects such determination), the organization will be deemed not to have satisfied the requirements of section 507(b)(1)(B). Under such circumstances, section 509(c) will not apply and the organization will continue to remain subject to the provisions of section 507. However, the status of grants and contributions under sections 170, 4942, and 4945 will not be affected until the Internal Revenue Service makes notice to the public (such as by publication in the Internal Revenue Bulletin) that the organization has been deleted from classification as an organization described in section 509(a) (1), (2), or (3) unless the donor (1) was in part responsible for, or was aware of, the act or failure to act that resulted in the organization's inability to satisfy the requirements of section 507(b) (1)(B), or (2) had knowledge that such organization would be deleted from classification as an organization described in section 509(a) (1), (2), or (3). Prior to the making of any grant or contribution which allegedly will not result in the grantee's loss of classification under section 509(a) (1), (2), or (3), a potential grantee organization may request a ruling whether such grant or contribution may be made without such loss of classification. A request for such ruling may be filed by

the grantee organization with the district director. The issuance of such ruling will be at the sole discretion of the Commissioner.

(d) *Sixty-month terminations*—(1) *Method of determining normal sources of support.* (i) In order to meet the requirement of section 507(b)(1)(B) for the 60-month termination period as a section 509(a) (1) or (2) organization, an organization must meet the requirements of section 509(a) (1) or (2), as the case may be, for a continuous period of at least 60 calendar months. In determining whether an organization seeking status under section 509(a)(1) as an organization described in section 170(b)(1)(A) (iv) or (vi) or under section 509(a)(2) ''normally'' meets the requirements set forth under such sections, support received in taxable years prior to the commencement of the 60-month period shall not be taken into consideration, except as otherwise provided in this section. Therefore, in such cases rules similar to the rules applicable to new organizations would apply.

(ii) For purposes of section 507(b)(1)(B), an organization will be considered to be a section 509(a)(1) organization described in section 170(b)(1)(A)(vi) for a continuous period of 60 calendar months only if the organization satisfies the provisions of § 1.170A–9(e) based upon aggregate data for such entire period, rather than for any shorter period set forth in § 1.170A–9(e). Except for the substitution of such 60-month period for the periods described in § 1.170A–9(e), all other provisions of such regulations pertinent to determining an organization's normal sources of support shall remain applicable.

(iii) For purposes of section 507(b)(1)(B), an organization will be considered to be a section 509(a)(2) organization only if such organization meets the support requirements set forth in section 509(a)(2) (A) and (B) for the continuous period of 60 calendar months prescribed under section 507(b)(1)(B), rather than for any shorter period set forth in the regulations under section 509(a)(2). Except for the substitution of such 60-month period for the periods described in the regulations under section 509(a)(2), all other provisions of such regulations pertinent to determining an organization's normal sources of support shall remain applicable.

(2) *Organizational and operational tests.* In order to meet the requirements of section 507(b)(1)(B) for the 60-month termination period as an organization described in section 170(b)(1)(A) (i), (ii), (iii), (iv), or (v) or section 509(a)(3), as the case may be, an organization must meet the requirements of the applicable provision for a continuous period of at least 60 calendar months. For purposes of section 507(b)(1)(B), an organization will be considered to be such an organization only if it satisfies the requirements of the applicable provision (including with respect to section 509(a)(3), the organizational and operational test set forth in subparagraph (A) thereof) at the commencement of such 60-month period and continuously thereafter during such period.

(e) *Advance rulings for 60-month terminations*—(1) *In general.* An organization which files the notification required by section 507(b)(1)(B)(ii) that it is commencing a 60-month termination may obtain an advance ruling from the Commissioner that it can be expected to satisfy the requirements of section 507(b)(1)(B)(i) during the 60-month period. Such an advance ruling may be issued if the organization can reasonably be expected to meet the requirements of section 507(b)(1)(B)(i) during the 60-month period. The issuance of a ruling will be discretionary with the Commissioner.

(2) *Basic consideration.* In determining whether an organization can reasonably be expected (within the meaning of subparagraph (1) of this paragraph) to meet the requirements of section 507(b)(1)(B)(i) for the 60-month period, the basic consideration is whether its organizational structure (taking into account any revisions made prior to the beginning of the 60-month period), proposed programs or activities, intended method of operation, and projected sources of support are such as to indicate that the organization is likely to satisfy the requirements of section 509(a) (1), (2), or (3) and paragraph (d) of this section during the 60-month period. In making such a determination, all pertinent facts and circumstances shall be considered.

(3) *Reliance by grantors and contributors.* For purposes of sections 170, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522, grants or contributions to an organization which has obtained a ruling referred to in this paragraph will be treated as made to an organization described in section 509(a) (1), (2), or (3), as the case may be, until notice that such advance ruling is being revoked is made to the public (such as by publication in the Internal Revenue Bulletin). The preceding sentence shall not apply, however, if the grantor or contributor was responsible for, or aware of, the act or failure to act that resulted in the organization's failure to meet the requirements of section 509(a) (1), (2), or (3), or acquired knowledge that the Internal Revenue Service had given notice to such organization that its advance ruling would be revoked. Prior to the making of any grant or contribution which allegedly will not result in the grantee's failure to meet the requirements of section 509(a) (1), (2), or (3), a potential grantee organization may request a ruling whether such grant or contribution may be made without such failure. A request for such ruling may be filed by the grantee organization with the district director. The issuance of such ruling will be at the sole discretion of the Commissioner. The organization must submit all information necessary to make a determination on the factors referred to in subparagraph (2) of this paragraph. If a favorable ruling is issued, such ruling may be relied upon by the grantor or contributor of the particular contribution in question for purposes of sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522.

(4) *Reliance by organization.* An organization obtaining an advance ruling pursuant to this paragraph cannot rely on such a ruling. Consequently, if the organization does not pay the tax imposed by section 4940 for any taxable year or years during the 60-month period, and it is subsequently determined that such tax is due for such year or years (because the organization did not in fact complete a successful termination pursuant to section 507(b)(1)(B) and was not treated as an organization described in section 509(a) (1), (2), or (3) for such year or years), the organization is liable for interest in accordance with section 6601 if any amount of tax under section 4940 has not been paid on or before the last date prescribed for payment. However, since any failure to pay such tax during the 60-month period (or prior to the revocation of such ruling) is due to reasonable cause, the penalty under section 6651 with respect to the tax imposed by section 4940 shall not apply.

(5) *Extension of time to assess deficiencies.* The advance ruling described in subparagraph (1) of this paragraph shall be issued only if such organization's request for an advance ruling is filed with a consent under section 6501(c)(4) to the effect that the period of limitation upon assessment under section 4940 for any taxable year within the advance ruling period shall not expire prior to 1 year after the date of the expiration of the time prescribed by law for the assessment of a deficiency for the last taxable year within the 60-month period.

(f) *Effect on grantors or contributors and on the organization itself*—(1) *Effect of satisfaction of requirements for termination*—(i) *Treatment during the termination period.* In the event that an organization satisfies the requirements of section 507(b)(1)(B) for termination of its private foundation status by the end of the 12-month period or during the continuous 60-month period, such organization shall be treated for such entire 12-month or 60-month period in the same manner as an organization described in section 509(a) (1), (2), or (3).

(ii) *Twelve-month terminations by fiscal year organizations.* In the case of an organization which operates on a fiscal year basis and terminates its private foundation status by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969, such 12-month period shall, for purposes of this paragraph, be treated as including the period between January 1, 1970, and the last day of the taxable year immediately preceding its first taxable year which begins after December 31, 1969, so long as the requirements of section 507(b)(1)(B) and paragraph (c) of this section are met by the end of the 12-month period (including such additional period).

(2) *Failure to meet termination requirements*—(i) *In general.* Except as otherwise provided in subdivision (ii) of this subparagraph and paragraph (e) of this section, any organization which fails to satisfy the requirements of section 507(b)(1)(B) for termination of its private foundation status by the end of the 12-month period or during the continuous 60-month period shall be treated as a private foundation for the entire 12-month or 60-month period, for purposes of sections 507 through 509 and chapter 42, and grants or contributions to such an organization shall be treated as made to a private foundation for purposes of sections 170, 507(b)(1)(A), 4942, and 4945.

(ii) *Certain 60-month terminations.* Notwithstanding subdivision (i) of this subparagraph, if an organization fails to satisfy the requirements of section 509(a) (1), (2), or (3) for the continuous 60-month period but does satisfy the requirements of section 509(a) (1), (2), or (3), as the case may be, for any taxable year or years during such 60-month period, the organization shall be treated as a section 509(a) (1), (2), or (3) organization for such taxable year or years and grants or contributions made during such taxable year or years shall be treated as made to an organization described in section 509(a) (1), (2), or (3). In addition, sections 507 through 509 and chapter 42 shall not apply to such organization for any taxable year within such 60-month period for which it does meet such requirements. For purposes of determining whether an organization satisfies the requirements of section 509(a) (1), (2), or (3) for any taxable year in the 60-month period, the organization shall be treated as if it were a new organization with its first taxable year beginning on the date of the commencement of the 60-month period. Thus, for example, if an organization were attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 170(b)(1)(A)(vi), the rules under § 1.170A–9(e) relating to the initial determination of status of a new organization would apply.

(iii) *Aggregate tax benefit.* For purposes of section 507(d), the organization's aggregate tax benefit resulting from the organization's section 501(c)(3) status shall continue to be computed from the date from which such computation would have been made, but for the notice filed under section 507(b)(1)(B)(ii), except that any taxable year within such 60-month period for which such organization meets the requirements of section 509(a) (1), (2), or (3) shall be excluded from such computations.

(iv) *Excess business holdings.* See section 4943 and the regulations thereunder for rules relating to decreases in a private foundation's holdings in a business enterprise which are caused by the foundation's failure to terminate its private foundation status after giving the notification for termination under section 507(b)(1)(B)(ii).

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Y, a calendar year private foundation, notifies the district director that it intends to terminate its private foundation status by converting into a publicly supported organization described in section 170(b)(1)(A)(vi) and that its 60-month termination period will commence on January 1, 1974. Y does not obtain a ruling described in paragraph (e) of this section. Based upon its support for 1974 Y does not qualify as a publicly supported organization within the meaning of § 1.170A–9(e) and this paragraph. Consequently, in order to avoid the risks of penalties and interest if Y fails to terminate within the 60-month period, Y files its return as a private foundation and pays the tax imposed by section 4940. Similarly, based upon its support for the period 1974 through 1975, fails to qualify as such a publicly supported organization and files its return and pays the tax imposed by section 4940 for both 1975 and 1976. Since a consent (described in paragraph (b)(7) of this section) which would prevent the period of limitation from expiring is not in effect, in order to be able to file a claim for refund, Y and the district director agree to extend the period of limitation for all taxes imposed under chapter 42. However, based upon its support for the period 1974 through 1976 Y does qualify as a publicly supported organization, and therefore shall not be treated as a private foundation for either 1977 or 1978 even if it fails to terminate within the 60-month period. However, based upon the aggregate data for the entire 60-month period (1974 through 1978), Y does qualify as an organization described in section 170(b)(1)(A)(vi). Consequently, pursuant to this paragraph, Y is treated as if it had been a publicly supported organization for the entire 60-month period. Y files claim for refund for the taxes paid under section 4940 for the years 1974, 1975, and 1976, and such taxes are refunded.

(g) *Special transitional rules for organizations operating as public charities.* Section 4940 imposes a tax upon private foundations with respect to the carrying on of activities for each taxable year. For purposes of section 4940, an organization which terminates its private foundation status under section 507(b)(1)(B) by the end of the period described in paragraph (a)(5)(ii) of this section will not be considered as carrying on activities within the meaning of section 4940 during such period. Such organization will therefore not be subject to the tax imposed under section 4940 for such period. Consequently, in the case of an organization seeking to terminate its private foundation status under section 507(b)(1)(B) if the period described in paragraph (a)(5)(ii) of this section has not expired prior to the due date for the organization's annual return required to be filed under section 6033 or 6012 (determined with regard to any extension of time for filing the return) for its first taxable year which begins after December 31, 1969 (or any other taxable year ending before the expiration of the period described in paragraph (a)(5)(ii) of this paragraph) and if the organization has not terminated its private foundation status under section 507(b)(1)(B) by such date, then notwithstanding the provisions of paragraph (f) of this section, the organization must take either of the following courses of action:

(1) Complete and file its annual return including the line relating to excise taxes on investment income, by such date, and pay the tax on investment income imposed under section 4940 at the time it files its annual return. If such organization subsequently terminates its private foundation status under section 507(b)(1)(B) within a period specified in paragraph (c)(3)(i) of this section, it may file a claim for refund of the tax paid under section 4940; or

(2) Complete and file its annual return, except for the line relating to excise taxes on investment income, by such date, and in lieu of paying the tax on investment income imposed under section 4940, file a statement with its annual return which establishes that the organization has taken affirmative action by such date to terminate its private foundation status under section 507(b)(1)(B). Such statement must indicate the type of affirmative action taken and explain how such action will result in the termination of its private foundation status under section 507(b)(1)(B). Such affirmative action may include making application to the appropriate State court for approval to amend the provisions of the organization's trust instrument to limit payments to specified section 509(a) (1) or (2) beneficiaries pursuant to section 509(a)(3) in the case of a charitable trust; commencing a fund-raising drive among the general public in the case of an organization seeking to become a section 170(b)(1)(A)(vi) or 509(a)(2) organization; or the passage of a resolution by the organization's governing body or the filing of an amendment to the organization's articles of incorporation permitting a change in the operations of the organization to enable it to conform to the provisions of section 509(a) (1), (2), or (3) in the case of a not-for-profit corporation. An organization may take such affirmative action and may terminate its private foundation status under section 507(b)(1)(B) in reliance upon 26 CFR 13.12 (rev. as of Jan. 1, 1972) and upon the provisions of the notices of proposed rulemaking under sections 170(b)(1)(A), 507(b)(1), and 509. Thus, if an organization meets the requirement of the provisions of the notice of proposed rulemaking as a section 509(a)(3) organization, such organization may terminate its private foundation status under section 507(b)(1)(B) in reliance upon such provisions prior to the expiration of the period described in paragraph (a)(5)(ii) of this section. If such organization, however, fails to terminate its private foundation status under section 507(b)(1)(B) within the period specified in paragraph (a)(5)(ii) of this section by failing to meet the requirements of either the notices of proposed rulemaking under section 170(b)(1)(A), 507(b)(1), or 509 or the final regulations published under these Code sections, the tax imposed under section 4940 shall be treated as if due from the due date for its annual return (determined without regard to

any extension of time, for filing its return).

[T.D. 7248, 38 FR 861, Jan. 5, 1973; 38 FR 3598, Feb. 8, 1973; 38 FR 4259, Feb. 12, 1973, as amended by T.D. 7290, 38 FR 31833, Nov. 19, 1973; T.D. 7440, 41 FR 50654, Nov. 17, 1976; 41 FR 52454, Nov. 30, 1976; T.D. 7465, 42 FR 4437, Jan. 25, 1977; T.D. 7784, 46 FR 37889, July 23, 1981]

§ 1.507–3 Special rules; transferee foundations.

(a) *General rule.* (1) For purposes of part II, subchapter F, chapter 1 of the Code, in the case of a transfer of assets of any private foundation to another private foundation pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization, or reorganization, the transferee organization shall not be treated as a newly created organization. Thus, in the case of a significant disposition of assets to one or more private foundations within the meaning of paragraph (c) of this section, the transferee organization shall not be treated as a newly created organization. A transferee organization to which this paragraph applies shall be treated as possessing those attributes and characteristics of the transferor organization which are described in subparagraphs (2), (3), and (4) of this paragraph.

(2)(i) A transferee organization to which this paragraph applies shall succeed to the aggregate tax benefit of the transferor organization in an amount determined as follows: Such amount shall be an amount equal to the amount of such aggregate tax benefit multiplied by a fraction the numerator of which is the fair market value of the assets (less encumbrances) transferred to such transferee and the denominator of which is the fair market value of the assets of the transferor (less encumbrances) immediately before the transfer. Fair market value shall be determined as of the time of the transfer.

(ii) Notwithstanding subdivision (i) of this subparagraph, a transferee organization which is not effectively controlled (within the meaning of § 1.482–1(a)(3)), directly or indirectly, by the same person or persons who effectively control the transferor organization shall not succeed to an aggregate tax benefit in excess of the fair market value of the assets transferred at the time of the transfer.

(iii) This subparagraph may be illustrated by the following examples:

Example 1. Pursuant to a transfer described in section 507(b)(2), F, a private foundation, transfers to G, a private foundation, all of its assets, which have a fair market value of $400,000. Immediately before the transfer F's aggregate tax benefit was $200,000, and G's aggregate tax benefit was $300,000. After the transfer G's aggregate tax benefit is $500,000 ($200,000+$300,000).

Example 2. Pursuant to a transfer described in section 507(b)(2), M, a private foundation, transfers all of its assets, which immediately prior to the transfer have a fair market value of $100,000. The assets were transferred to the following organizations at the following fair market values (determined at the time of transfer) $40,000 to N, a private foundation, $30,000 to O, a private foundation, and $30,000 to P, an organization described in section 170(b)(1)(A)(vi). Immediately before the transfer M's aggregate tax benefit was $50,000. Therefore, N succeeds to M's aggregate tax benefit to the extent of $20,000 ($50,000×$40,000/$100,000) and O succeeds to M's aggregate tax benefit to the extent of $15,000 ($50,000×$30,000/$100,000). The remaining $15,000 of M's aggregate tax benefit is retained by M as M has not terminated under section 507.

Example 3. Assume the same facts as in Example 2 except that the transfers were made as follows: M transferred $30,000 to N on January 1, 1972, $40,000 to P on July 1, 1972, and $30,000 to O on December 31, 1972. Further, assume that the fair market value of the assets and the aggregate tax benefit do not change during 1972 and that O is not effectively controlled (directly or indirectly) by the same person or persons who effectively control M. N succeeds to M's aggregate tax benefit to the extent of $15,000 ($50,000×$30,000/$100,000). However, since $40,000 of the remaining $70,000 ($100,000−$30,000) of assets of M was transferred to P on July 1, 1972, immediately before the transfer to O, the fair market value of the assets held by M is $30,000 ($70,000−$40,000). On the other hand, because P is not a private foundation, M's aggregate tax benefit immediately before the transfer to O remains $35,000 ($50,000−$15,000). Therefore, before applying subdivision (ii) of this subparagraph, O would succeed to $35,000 ($35,000×$30,000/$30,000) of M's aggregate tax benefit. However, applying subdivision (ii) of this subparagraph since M transferred only $30,000 to O, O shall succeed to only $30,000 of M's aggregate tax benefit. The remaining $5,000 ($35,000−$30,000) of M's aggregate tax benefit is retained by M as M has not terminated under section 507.

(3) For purposes of section 507(d)(2), in the event of a transfer of assets described in section 507(b)(2), any person who is a *substantial contributor* (within the meaning of section 507(d)(2)) with respect to the transferor foundation shall be treated as a *substantial contributor* with respect to the transferee foundation, regardless of whether such person meets the $5,000-two percent test with respect to the transferee organization at any time. If a private foundation makes a transfer described in section 507(b)(2) to two or more transferee private foundations, any person who is a *substantial contributor* with respect to the transferor foundation prior to such transfer shall be considered a *substantial contributor* with respect to each transferee private foundation.

(4) If a private foundation incurs liability for one or more of the taxes imposed under chapter 42 (or any penalty resulting therefrom) prior to, or as a result of, making a transfer of assets described in section 507(b)(2) to one or more private foundations, in any case where transferee liability applies each transferee foundation shall be treated as receiving the transferred assets subject to such liability to the extent that the transferor foundation does not satisfy such liability.

(5) Except as provided in subparagraph (9) of this paragraph, a private foundation is required to meet the distribution requirements of section 4942 for any taxable year in which it makes a section 507(b)(2) transfer of all or part of its net assets to another private foundation. Such transfer shall itself be counted toward satisfaction of such requirements to the extent the amount transferred meets the requirements of section 4942(g). However, where the transferor has disposed of all of its assets, the recordkeeping requirements of section 4942(g)(3)(B) shall not apply during any period in which it has no assets. Such requirements are applicable for any taxable year other than a taxable year during which the transferor has no assets.

(6) For purposes of section 4943(c) (4), (5), and (6), whenever a private foundation makes a section 507(b)(2) transfer of all or part of its net assets to another private foundation, the applicable period of time described in section 4943(c) (4), (5), or (6) shall include both the period during which the transferor foundation held such assets and the period during which the transferee foundation holds such assets.

(7) Except as provided in subparagraph (9) of this paragraph, where the transferor has disposed of all of its assets, during any period in which the transferor has no assets, section 4945 (d)(4) and (h) shall not apply to the transferee or the transferor with respect to any *expenditure responsibility* grants made by the transferor. However, the exception contained in this subparagraph shall not apply with respect to any information reporting requirements imposed by section 4945 and the regulations thereunder for any year in which any such transfer is made.

(8)(i) Except as provided in subdivision (ii) of this subparagraph or subparagraph (6) or (9) of this paragraph or whenever a private foundation makes a transfer of assets described in section 507(b)(2) to one or more private foundations, the transferee foundation:

(a) Will not be treated as being in existence prior to January 1, 1970, with respect to any transferred assets;

(b) Will not be treated as holding the transferred assets prior to January 1, 1970; and

(c) Will not be treated as having engaged in, or become subject to, any transaction, lease, contract, or other obligation with respect to the transferred assets prior to January 1, 1970.

(ii) Notwithstanding subdivision (i) of this subparagraph, the provisions enumerated in *(a)* through *(g)* of this subdivision shall apply to the transferee foundation with respect to the assets transferred to the same extent and in the same manner that they would have applied to the transferor foundation had the transfer described in section 507(b)(2) not been effected:

(a) Section 4940(c)(4)(B) and the regulations thereunder with respect to basis of property,

(b) Section 4942(f)(4) and the regulations thereunder with respect to distributions of income,

(c) Section 101(l)(2) of the Tax Reform Act of 1969 (83 Stat. 533), as amended by

sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729), with respect to the provisions of section 4941,

(d) Section 101*(l)*(3)(A) of the Tax Reform Act of 1969 (83 Stat. 534) with respect to the provisions of section 4942, but only if the transferor qualified for the application of such section immediately before the transfer, and at least 85 percent of the fair market value of the net assets of the transferee immediately after the transfer was received pursuant to the transfer,

(e) Section 101*(l)*(3) (B) through (E) of the Tax Reform Act of 1969 (83 Stat. 534) with respect to the provisions of section 4942,

(f) Section 101(l)(5) of the Tax Reform Act of 1969 (83 Stat. 535) with respect to the provisions of section 4945, and

(g) Section 101*(l)*(6) of the Tax Reform Act of 1969 (83 Stat. 535) with respect to the provisions of section 508(e).

(9) (i) If a private foundation transfers all of its net assets to one or more private foundations which are effectively controlled (within the meaning of § 1.482–1(a)(3)), directly or indirectly, by the same person or persons which effectively controlled the transferor private foundation, for purposes of chapter 42 (section 4940 *et seq.*) and part II of subchapter F of chapter 1 of the Code (sections 507 through 509) such a transferee private foundation shall be treated as if it were the transferor. However, where proportionality is appropriate, such a transferee private foundation shall be treated as if it were the transferor in the proportion which the fair market value of the assets (less encumbrances) transferred to such transferee bears to the fair market value of the assets (less encumbrances) of the transferor immediately before the transfer.

(ii) Subdivision (i) of this subparagraph shall not apply to the requirements under sections 6033, 6056, and 6104 which must be complied with by the transferor private foundation, nor to the requirement under section 6043 that the transferor file a return with respect to its liquidation, dissolution, or termination.

(iii) This subparagraph may be illustrated by the following examples:

Example 1. The trustees of X charitable trust, a private foundation, form the Y charitable corporation, also a private foundation, in order to facilitate the conduct of their activities. The trustees of X are also the directors of Y. Y has the same charitable purposes as X. All of the assets of X are transferred to Y, and Y continues to carry on X's charitable activities. Under such circumstances, Y shall be treated as if it were X for the purposes of subdivision (i) of this subparagraph. Thus, for example, Y will be permitted to take advantage of any special rules or savings provisions with respect to chapter 42 to the same extent as X could have if X had continued in existence.

Example 2. A and B are the trustees of the P charitable trust, a private foundation, and are the only substantial contributors to P. On July 1, 1973, in order to facilitate accomplishment of diverse charitable purposes, A and B create and control the R Foundation, the S Foundation and the T Foundation and transfer the net assets of P to R, S, and T. As of the end of 1973, P has an outstanding grant to Foundation W and has been required to exercise expenditure responsibility with respect to this grant under sections 4945 (d)(4) and (h). Under these circumstances, R, S, and T shall each be treated as if they are P in the proportion the fair market value of the assets transferred to each bears to the fair market value of the assets of P immediately before the transfer. Since R, S, and T are treated as P, absent a specific provision for exercising expenditure responsibility with respect to the grant to W, each of them is required to exercise expenditure responsibility with respect to such grant. If, as a part of the transfer to R, P assigned, and R assumed, P's duties with respect to the expenditure responsibility grant to W, only R would be required to exercise expenditure responsibility with respect to the grant to W. Since R, S, and T are treated as P rather than as recipients of *expenditure responsibility* grants, there are no expenditure responsibility requirements which must be exercised under sections 4945 (d)(4) and (h) with respect to the transfers of assets to R, S, and T.

(10) For certain rules relating to filing requirements where a private foundation has transferred all its net assets, see § 1.507–1(b)(9).

(b) *Status of transferee organization under section 507(b)(2).* Since a transfer of assets pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization or reorganization to an organization not described in section 501(c)(3) (other than an organization described in section 509(a)(4)) or 4947 is a taxable expenditure under section 4945(d)(5), in order for such a transfer of assets not to be a taxable expenditure, it must be to an organization described in section 501(c)(3) (other than an organization described in section 509(a)(4)) or treated as described in section 501(c)(3) under section 4947. See §53.4945–6(c)(3) of this chapter. Consequently, unless such a transferee is an organization described in section 509(a) (1), (2), or (3), the transferee is a private foundation and the rules of section 507(b)(2) and paragraph (a) of this section apply. On the other hand, if such a transfer of assets is made to a transferee organization which is not described in either section 501(c)(3) (other than an organization described in section 509(a)(4)) or 4947, and in order to correct the making of a taxable expenditure, such assets are transferred to a private foundation, section 507(b)(2) and paragraph (a) of this section shall apply as if the transfer of assets had been made directly to such private foundation.

(c) *Section 507(b)(2) transfers.* (1) A transfer of assets is described in section 507(b)(2) if it is made by a private foundation to another private foundation pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization, or reorganization. This shall include any organization or reorganization described in subchapter C of chapter 1. For purposes of section 507(b)(2), the terms *other adjustment, organization, or reorganization* shall include any partial liquidation or any other significant disposition of assets to one or more private foundations, other than transfers for full and adequate consideration or distributions out of current income. For purposes of this paragraph, a distribution out of current income shall include any distribution described in section 4942(h)(1) (A) and (B).

(2) The term *significant disposition of assets to one or more private foundations* shall include any disposition for a taxable year where the aggregate of:

(i) The dispositions to one or more private foundations for the taxable year, and

(ii) Where any disposition to one or more private foundations for the taxable year is part of a series of related dispositions made during prior taxable years, the total of the related dispositions made during such prior taxable years, is 25 percent or more of the fair market value of the net assets of the foundation at the beginning of the taxable year (in the case of subdivision (i) of this subparagraph) or at the beginning of the first taxable year in which any of the series of related dispositions was made (in the case of subdivision (ii) of this subparagraph). A *significant disposition of assets* may occur in a single taxable year (as in subdivision (i) of this subparagraph) or over the course of two or more taxable years (as in subdivision (ii) of this subparagraph). The determination whether a significant disposition has occurred through a series of related distributions (within the meaning of subdivision (ii) of this subparagraph) will be made on the basis of all the facts and circumstances of the particular case. However, if one or more persons who are disqualified persons (within the meaning of section 4946) with respect to the transferor private foundation are also disqualified persons with respect to any of the transferee private foundations, such fact shall be evidence that the transfer is part of a series of related dispositions (within the meaning of subdivision (ii) of this subparagraph). In the case of a series of related dispositions described in subdivision (ii) of this subparagraph, each transferee private foundation shall (on any date) be subject to the provisions of section 507(b)(2) (with respect to all such dispositions made to it on or before such date) to the extent described in paragraphs (a) and (b) of this section.

(3) A private foundation which fails to meet the requirements of section 507(b)(1)(A) for a taxable year may be required to file a return under section 6043(b) by reason of a transfer of assets to one or more sections 509(a) (1), (2), or (3) organizations. Hence, such filing does not necessarily mean that a section 507(b)(2) transfer has occurred. See §1.6043–3(f)(1).

(4) This paragraph applies to any section 507(b)(2) transfer made by a private foundation referred to in section 170(b)(1)(E) (i), (ii), or (iii).

(5) The provisions of this paragraph may be illustrated by the following examples:

Example 1. M is a private foundation on the calendar year basis. It has net assets worth $100,000 as of January 1, 1971. In 1971, in addition to distributions out of current income, M transfers $10,000 to N, $10,000 to O, and $10,000 to P. N, O, and P are all private foundations. Under subparagraph (2)(i) of this paragraph, M has made a significant disposition of its assets in 1971 since M has disposed of more than 25 percent of its net assets (with respect to the fair market value of such assets as of January 1, 1971). M has therefore made section 507(b)(2) transfers within the meaning of this paragraph, and section 507(b)(2) applies to the transfers made to N, O, and P.

Example 2. U, a tax-exempt private foundation on the calendar year basis, has net assets worth $100,000 as of January 1, 1971. As part of a series of related dispositions in 1971 and 1972, U transfers in 1971, in addition to distributions out of current income, $10,000 to private foundation X and $10,000 to private foundation Y, and in 1972, in addition to distributions out of current income, U transfers $10,000 to private foundation Z. Under subparagraph (2)(ii) of this paragraph, U is treated as having made a series of related dispositions in 1971 and 1972. The aggregate of the 1972 disposition (under subparagraph (2)(i) of this paragraph) and the series of related dispositions (under subparagraph (2)(ii) of this paragraph) is $30,000, which is more than 25 percent of the fair market value of U's net assets as of the beginning of 1971 ($100,000), the first year in which any such disposition was made. Thus, U has made a significant disposition of its assets and has made transfers described in section 507(b)(2). The provisions of paragraphs (a) and (b) of this section apply to each of the transferees as of the date on which it received assets from U.

(d) *Inapplicability of section 507(a) to section 507(b)(2) transfers.* Unless a private foundation voluntarily gives notice pursuant to section 507(a)(1), a transfer of assets described in section 507(b)(2) will not constitute a termination of the transferor's private foundation status under section 507(a)(1). Such transfer must, nevertheless, satisfy the requirements of any pertinent provisions of chapter 42. See subparagraphs (5) through (7) of paragraph (a) of this section. However, if such transfer constitutes an act or failure to act which is described in section 507(a)(2)(A), then such transfer will be subject to the provisions of section 507(a)(2) rather than section 507(b)(2). For example, X, a private nonoperating foundation, transfers all of its net assets to Y, a private operating foundation, in 1971. X does not file the notice referred to in section 507(a)(1) and the transfer does not constitute either a willful and flagrant act (or failure to act), or one of a series of willful repeated acts (or failures to act), giving rise to liability for tax under chapter 42. Under these circumstances, the transfer is described in section 507(b)(2) and the provisions of paragraph (a) of this section apply with respect to Y. The private foundation status of X has not been terminated under section 507(a).

(e) *Transfers to certain section 509(a) (1), (2), or (3) organizations.* If a private foundation transfers all or part of its assets to one or more organizations described in section 509(a) (1), (2), or (3) and, within a period of 3 years from the date of such transfers, one or more of the transferee organizations lose their section 509(a) (1), (2), or (3) status and become private foundations, then for purposes of this section, a transfer of assets within the meaning of paragraph (c) of this section to such an organization which becomes a private foundation will be treated as a transfer described in section 507(b)(2), and the provisions of paragraph (a) of this section shall be treated as applying to such a transferee organization from the date on which any such transfer was made to it.

(f) *Certain transfers made during section 507(b)(1)(B) terminations.* If:

(1) During the course of the 12-month or 60-month period described in section 507(b)(1)(B), a private foundation makes one or more transfers to one or more private foundations;
